**§ 401.16 Conventional pollutants.**

The following comprise the list of conventional pollutants designated pursuant to section 304(a)(4) of the Act:

- 1. Biochemical oxygen demand (BOD)
- 2. Total suspended solids (nonfilterable) (TSS)
- 3. pH
- 4. Fecal coliform
- 5. Oil and grease

**§ 401.17 pH Effluent limitations under continuous monitoring.**

(a) Where a permittee continuously measures the pH of wastewater pursuant to a requirement or option in a National Pollutant Discharge Elimination System (NPDES) permit issued pursuant to section 402 of the Act, the per-

mittee shall maintain the pH of such wastewater within the range set forth in the applicable effluent limitations guidelines, except excursions from the range are permitted subject to the following limitations:

(1) The total time during which the pH values are outside the required range of pH values shall not exceed 7 hours and 26 minutes in any calendar month; and

(2) No individual excursion from the range of pH values shall exceed 60 minutes.

(b) The Director, as defined in § 122.3 of this chapter, may adjust the requirements set forth in paragraph (a) of this section with respect to the length of individual excursions from the range of pH values, if a different period of time is appropriate based upon the treatment system, plant configuration or other technical factors.

(c) For purposes of this section, an *excursion* is an unintentional and temporary incident in which the pH value of discharge wastewater exceeds the range set forth in the applicable effluent limitations guidelines.
