In place of this deleted emissions control efficiency requirement, the revised paragraph now specifies a total annual VOC emissions limit of 1.0 ton from the recovery system and neutralization and distillation system vents. The revision lacked test procedures and record keeping requirements compatible with the revised emission limit. On March 1, 2010, Ohio submitted a commitment to revise OAC 3745-21-09(BBB) to include the necessary test procedures and record keeping requirements by September 16, 2011. When EPA determines the state has met its commitment, OAC 3745-21-09(BBB) will be incorporated by reference into the SIP.
