On July 12, 1988, the State submitted a Committal SIP for the Rapid City Group II PM\textsubscript{10} area, as required by the PM\textsubscript{10} implementation policy. § 52.2183 Variance provision.

The revisions to the variance provisions in Chapter 74:36:01:31.01 of the South Dakota Air Pollution Control Program, which were submitted by the Governor’s designee on September 25, 1991, are disapproved because they are inconsistent with section 110(i) of the Clean Air Act, which prohibits any state or EPA from granting a variance from any requirement of an applicable implementation plan with respect to a stationary source.

§ 52.2184 Operating permits for minor sources.

Emission limitations and related provisions established in South Dakota minor source operating permits, which are issued in accordance with ARSD 74:36:04 and which are submitted to EPA in a timely manner in both proposed and final form, shall be enforceable by EPA. EPA reserves the right to deem permit conditions not federally enforceable. Such a determination will be made according to appropriate procedures and will be based upon the permit approval procedures, or permit requirements which do not conform with the operating permit program requirements of EPA’s underlying regulations.
