

§ 436.408

CMS encourages States to use automated capabilities to verify citizenship and identity of Medicaid applicants. Automated capabilities may fall within the computer matching provisions of the Privacy Act of 1974, and CMS will explore any implementation issues that may arise with respect to those requirements. When these capabilities become available, States will be required to match files for individuals who used third or fourth tier documents to verify citizenship and documents to verify identity, and CMS will make available to States necessary information in this regard. States must ensure that all case records within this category will be so identified and made available to conduct these automated matches. CMS may also require States to match files for individuals who used first or second level documents to verify citizenship as well. CMS may provide further guidance to States with respect to actions required in a case of a negative match.

(j) *Record retention.* The State must retain documents in accordance with 45 CFR 74.53.

(k) *Reasonable opportunity to present satisfactory documentary evidence of citizenship.* States must give an applicant or beneficiary a reasonable opportunity to submit satisfactory documentary evidence of citizenship before taking action affecting the individual's eligibility for Medicaid. The time States give for submitting documentation of citizenship should be consistent with the time allowed to submit documentation to establish other facets of eligibility for which documentation is requested. (See § 435.930 and § 435.911 of this chapter.)
