

Subpart D—Environmental Impact Statements

§ 10010.25 Supplemental environmental impact statements.

§ 10010.21 Purpose.

This subpart provides supplemental instructions for implementing those portions of the CEQ regulations pertaining to environmental impact statements (EIS).

(a) Supplement Environmental Impact Statements (SEIS) are only required if such changes in the proposed action or alternatives, new circumstances, or resultant significant effects are not adequately analyzed in the previously prepared EIS.

§ 10010.22 Statutory requirements.

NEPA requires that an EIS be prepared by the responsible Federal official. This official is normally the lowest-level official who has overall responsibility for formulating, reviewing, or proposing an action or, alternatively, has been delegated the authority or responsibility to develop, approve, or adopt a proposal or action. Preparation at this level will ensure that the NEPA process will be incorporated into the planning process and that the EIS will accompany the proposal through existing review processes.

(b) The Commission will consult with the Office of the Solicitor prior to proposing to CEQ to prepare a final supplement without preparing an intervening draft.

§ 10010.23 Timing.

(a) The feasibility analysis (go/no-go) stage, at which time an EIS is to be completed, is to be interpreted as the stage prior to the first point of major commitment to the proposal.

(c) If, after a Record of Decision has been executed based on a final EIS, a described proposal is further refined or modified and if there are only minor changes in effects or they are still within the scope of the earlier EIS, an EA and FONSI may be prepared for subsequent decisions rather than a SEIS. As identified in Sec. 10010.61(b)(1)(i), changes having no potential for significant environmental impact are categorically excluded from environmental documentation requirements.

(b) An EIS need not be commenced until an application is essentially complete; e.g., any required environmental information is submitted, any consultation required with other agencies has been conducted, and any required advance funding is paid by the applicant or other appropriate party.

§ 10010.26 Format.

§ 10010.24 Page limits.

An EIS should be as brief as possible and still convey the required information. Normally this should be accomplished in less than 150 pages, though documents of up to 300 pages are acceptable for more comprehensive issues. Where the text of an EIS for a complex proposal or group of proposals appears to require more than the normally prescribed limit of 300 pages, the Commission will ensure that the length of such statements is no greater than necessary to comply with NEPA, the CEQ regulations, and this part.

(a) Proposed departures from the standard format described in the CEQ regulations and this part must be approved by the Executive Director.

(b) The section listing the preparers of the EIS will also include other sources of information, including a bibliography or list of cited references, when appropriate.

(c) The section listing the distribution of the EIS will also briefly describe the consultation and public involvement processes utilized in planning the proposal and in preparing the EIS, if this information is not discussed elsewhere in the document.

(d) If CEQ's standard format is not used or if the EIS is combined with another planning or decision making document, the section which analyzes the environmental consequences of the proposal and its alternatives will be clearly and separately identified and not interwoven into other portions of or spread throughout the document.
