§ 108.175

(e) A semi-enclosed derrick to the extent of its enclosure above the drill floor or to a height of 3 m (10 ft.) above the drill floor, whichever is greater.
(f) Except as provided in §108.175 an enclosed space that has an opening into a Class I, Division 2 location.

§ 108.175 Contiguous locations.

An enclosed space that has direct access to a Division 1 or Division 2 location is the same division as that location, except—
(a) An enclosed space that has direct access to a Division 1 location is not a hazardous location if—
(1) The access has self-closing gas-tight doors that form an air lock;
(2) The ventilation causes greater pressure in the space than in the Division 1 location; and
(3) Loss of ventilation overpressure activates an alarm at a manned station;
(b) An enclosed space that has direct access to a Division 1 location can be considered as a Division 2 location if—
(1) The access has a self-closing, gas-tight door that opens into the space and that has no hold-back device;
(2) Ventilation causes the air to flow with the door open from the space into the Division 1 location; and
(3) Loss of ventilation activates an alarm at a manned control station;
(c) An enclosed space that has direct access to a Division 2 location is not a hazardous location if—
(1) The access has a self-closing, gas-tight door that opens into the space and that has no hold-back device;
(2) Ventilation causes the air to flow with the door open from the space into the Division 2 location; and
(3) Loss of ventilation activates an alarm at a manned control station.

§ 108.177 Electrical equipment in classified locations.

Electrical equipment and devices installed in spaces made non-hazardous by the methods indicated in §108.175 must only be essential equipment.
