

license balance. If the refined sugar is not re-exported to Mexico within 30 days of entry, the license shall be charged the quantity that has not been re-exported.

(h) A manufacturer or a producer shall not exceed a license balance of 10,000 short tons, refined value for the sum of all charges and credits.

(i) A manufacturer's or a producer's consolidated license balance, or the sum of a parent company and wholly-owned subsidiary license balances if held separately, shall not exceed a license balance of 25,000 short tons, refined value for the sum of all charges and credits.

(j) For the purposes of the programs governed by this part, sugar is fully substitutable. The refined sugar transferred, exported, or used does not need to be the same sugar produced by refining raw sugar entered under sub-heading 1701.11.20 of the HTS.

(k) A licensee may use an agent to carry out the requirements of participation in the program. The licensee must retain ownership of and responsibility for the product until exported from the U.S. Customs Territory, to a restricted foreign trade zone, or used in the production of certain polyhydric alcohols, and must establish and maintain sufficient documentation, as agreed in the documentation agreement pursuant to §1530.110, to substantiate export of the product or the production of certain polyhydric alcohols.

(l) A license may be assigned only with the written permission of the Licensing Authority and subject to such terms and conditions as the Licensing Authority may impose.

(m) The Licensing Authority may impose such conditions, limitations or restrictions in connection with the use of a license at such time and in such manner as the Licensing Authority, at his or her discretion, determines to be necessary or appropriate to achieve the purposes of the relevant program.

**§ 1530.106 License charges and credits.**

(a) A license shall be charged or credited for the quantity of sugar entered, transferred, exported, or used, adjusted to a dry weight basis. Refiner quantities shall be adjusted to raw value, using the formulas set forth in para-

graphs (a) (1), (2), and (3) of this section. Manufacturer and producer quantities shall be adjusted to 100 degrees polarity on a dry weight basis.

(1) To adjust the raw value for sugar with a polarization of less than 92 degrees, divide the total sugar content by 0.972 (polarization × outturn weight/.972).

(2) To adjust the raw value for sugar with polarization of 92 degrees or above, multiply the polarization times 0.0175, subtract 0.68, and multiply the difference by the outturn weight ((polarization × 0.0175)–0.68) × outturn weight).

(3) To determine the quantity of refined sugar that must be transferred or exported to equal a corresponding quantity of entered raw sugar charged to a license, divide the quantity of entered raw sugar by 1.07 (raw quantity/1.07).

(b) [Reserved]

**§ 1530.107 Bond or letter of credit requirements.**

(a) The licensee may charge program sugar in anticipation of the transfer or export of refined sugar, the export of sugar in sugar containing products, or the production of certain polyhydric alcohols, if the licensee establishes a performance bond or a letter of credit with the U.S. Department of Agriculture, which meets the criteria set forth in this section.

(b) The bond or letter of credit may cover entries made either during the period of time specified in the bond (a term bond) or for a specified entry (a single entry bond).

(c) Only the licensee who will refine the sugar, manufacture the sugar containing product, or produce certain polyhydric alcohols may be the principal on the bond or letter of credit covering such sugar to be re-exported or used in the production of certain polyhydric alcohols. The surety or sureties shall be among those listed by the Secretary of the Treasury as acceptable on Federal bonds.

(d) The obligation under the bond or letter of credit shall be made effective no later than the date of entry of the

**§ 1530.108**

sugar for refiners or the date of transfer of the corresponding sugar for manufacture into a sugar containing product or certain polyhydric alcohols.

(e) The amount of the bond or letter of credit shall be equal to 20 cents per pound of sugar to be entered under the license.

(f) If a licensee fails to qualify for credit to a license within the specified time period of the date of export or use of corresponding sugar in an amount sufficient to offset the charge to the license for that corresponding sugar, payment shall be made to the U.S. Treasury. The payment shall be equal to the difference between the Number 11 contract price and the Number 14 contract price (New York Coffee, Sugar and Cocoa Exchange) in effect on the last market day before the date of entry of the sugar or the last market day before the end of the period during which export or use was required, whichever difference is greater. The difference shall be multiplied by the quantity of refined sugar, converted to raw value, that should have been exported in compliance with this part. If there was not a Number 11, or a Number 14 contract price for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

**§ 1530.108 Revocation or surrender of licenses.**

(a) A license may be revoked upon written notice by the Licensing Authority.

(b) A licensee may surrender a license when the sum of all credits is equal to or greater than the sum of all charges.

**§ 1530.109 Reporting.**

(a) A licensee may submit as often as monthly for charges and credits against a license balance, but must submit at least a quarterly report to the Licensing Authority not later than 90 days after the earliest transaction in the report for which credits or charges are being submitted. The licensee need not report when there have not been transactions during the reporting period.

(b) Reports may be submitted by e-mail, U.S. mail, private courier, or in

**7 CFR Ch. XV (1-1-13 Edition)**

person, but must be in an integrated database format acceptable to the Licensing Authority. A copy of this format may be obtained from the Licensing Authority. Applicants unable to submit a report in the specified electronic format may seek a temporary waiver to permit them to submit the report on paper.

(c) The reports must include the following for all program transactions:

(1) A unique number associated with the transaction;

(2) The date of the entry, transfer (only a refiner shall report transfers to the Licensing Authority), export, or use;

(3) The quantity of program sugar entered, transferred, exported as refined sugar, or used in the production of certain polyhydric alcohols;

(4) The licensee's license number, or if a transfer is being reported, the licensee's license number as well as the transfer recipient's license number;

(5) The country of origin (entry of raw sugar) or final destination (refined exports), using the exact country code designated in the HTS; and

(6) The initial and final polarization, and final weight (when available) for entries of raw sugar.

(d) Licensees have an affirmative and continuing duty to maintain the accuracy of the information contained in previously submitted reports.

(1) The licensee shall immediately notify the Licensing Authority and promptly request that previously claimed credits be charged back upon discovery that previously claimed exports of refined sugar, refined sugar in sugar containing products, or refined sugar used in the production of polyhydric alcohol were re-entered into the U.S. Customs Territory without substantial transformation, not used in the production of certain polyhydric alcohols, made under a false underlying proof of export, or made but previously submitted exports do not otherwise satisfy the requirements of regulations or the documentation agreement.

(2) Charge backs shall be as of the date of the erroneously claimed credit.
