Pt. 1944, Subpt. I, Exh. B-2

total is the cumulative total number of EU's for the project.

11. Enter the number of houses planned in the TA Grantee proposal(s).

12. Enter the number of houses completed and occupied since the beginning of the grant.

13. Enter the number of houses that are under construction at the end of this quarter.

14. Enter the number of families in the preconstruction phase.

15. Enter the total number of construction supervisor(s) paid with TA grant funds.

16. Enter the number of employees paid with TA grant funds including those listed in item 15.

17. Insert the average elapsed time needed per house from excavation to final inspection by FmHA or its successor agency under Public Law 103–354 to complete construction of a house. If no self-help homes have been completed by this grantee, use other projects or your best estimate as a guide.

18. Enter the number of months it takes on average to approve or reject a borrower's docket once it's submitted.

7 CFR Ch. XVIII (1–1–13 Edition)

19. Enter number and percent of dockets submitted and rejected this quarter.

20. Enter date of exhibit submittal.

 $\mathbf{21}.$ Insert title of the Grantee or authorized representative.

 $22. \ {\rm Signature}$ of Grantee or authorized representative.

23. County Supervisor must answer questions concerning market value and loan amount and also should insert comments concerning progress of construction, success of the project and any problems that the organization may have.

24. Insert date of County Supervisor's review.

25. Signature of County Supervisor.

26. District Director representative should insert his/her comments concerning items listed in §1944.417(b)(1) of 1944–I.

27. Insert date of District Director review. 28. Signature of District Director or representative.

29. Insert State Office comments.

30. Insert date of State Office review.

31. Signature of State Office representative.

EXHIBIT B-3 TO SUBPART I OF PART 1944—PRE-CONSTRUCTION AND CON-STRUCTION PHASE BREAKDOWN

- I. General. This exhibit will be used by Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 and the Grantee in determining Grantee performance as required in §1944.417(b) of this subpart.
- II. Determining technical assistance (TA) cost per unit.

A. Equivalent units are used to measure progress at any time during the period of the grant. It is necessary because self-help grantees have several groups of families in various stages of progress during the period of the grant. The following formula has been developed to provide a more accurate method of determining progress.

FORMULA

	In percent—		
Phase breakdown	Value of each phase	Cumulative	
Pre-construction:			
Phase I	10	10	
Phase II	10	10	
Construction: Phase III	80	21–100	

B. Using the Description of Phase Breakdown as a guide, the project staff selects the total percentage pertinent to the stage the self-help group is in and multiplies that percentage by the number of families (units) in the group. The result is the equivalent number of units completed. No credit may be given for Phase I, if the application is rejected. When this computation has been completed for each group that falls within Phases I-III, the total number of equivalent units is divided into the total grant funds expended to that date. The result is the TA cost per unit at that stage of the program's progress.

C. The definition of pre-construction and construction phases described are follows:

Pre-Construction

Phase I: Hold community meetings; conduct interviews; obtain house plans; prepare cost estimates; begin search for land; submit family applications to the lender; lender runs credit check; applications. Lender either approves or rejects.

Phase II: Organize an association of section 502 Rural Housing eligible families; association conducts weekly meetings at which required lender forms are discussed and completed; house plans and land sites are selected; outside speakers explain and discuss
