

applicable requirements of this subpart have been accomplished.

(1) *Notice of arrival; assembly for inspection.* Any person importing fruits and vegetables into the United States must offer those agricultural products for inspection and entry at the port of first arrival. The owner or agent must assemble the fruits and vegetables for inspection at the port of first arrival, or at any other place designated by an inspector, and in a manner designated by the inspector. All fruits and vegetables must be accurately disclosed and made available to an inspector for examination. The owner or the agent must provide an inspector with the name and address of the consignee and must make full disclosure of the type, quantity, and country and locality of origin of all fruits and vegetables in the consignment, either orally for non-commercial consignments or on an invoice or similar document for commercial consignments.

(2) *Refusal of entry.* If an inspector finds that an imported fruit or vegetable is prohibited, or is not accompanied by required documentation, or is so infested with a plant pest or noxious weed that, in the judgment of the inspector, it cannot be cleaned or treated, or contains soil or other prohibited contaminants, the entire lot or consignment may be refused entry into the United States.

(3) *Release for movement.* No person may move a fruit or vegetable from the port of first arrival unless an inspector has either:

- (i) Released it;
- (ii) Ordered treatment at the port of first arrival and, after treatment, released the fruit or vegetable;
- (iii) Authorized movement of the fruit or vegetable to another location for treatment, further inspection, or destruction; or
- (iv) Ordered the fruit or vegetable to be reexported.

(4) *Notice to owner of actions ordered by inspector.* If an inspector orders any disinfection, cleaning, treatment, re-exportation, recall, destruction, or other action with regard to imported fruits or vegetables while the consignment is in foreign commerce, the inspector will issue an emergency action notification (PPQ Form 523) to the

owner of the fruits or vegetables or to the owner's agent. The owner must, within the time and in the manner specified in the PPQ Form 523, destroy the fruits and vegetables, ship them to a point outside the United States, move them to an authorized site, and/or apply treatments or other safeguards to the fruits and vegetables as prescribed to prevent the introduction of plant pests or noxious weeds into the United States.

(e) *Costs and charges.* APHIS will be responsible only for the costs of providing the services of an inspector during regularly assigned hours of duty and at the usual places of duty.¹ The owner of imported fruits or vegetables is responsible for all additional costs of inspection, treatment, movement, storage, destruction, or other measures ordered by an inspector under this subpart, including any labor, chemicals, packing materials, or other supplies required. APHIS will not be responsible for any costs or charges, other than those identified in this section.

(f) *APHIS not responsible for damage.* APHIS assumes no responsibility for any damage to fruits or vegetables that results from the application of treatments or other measures required under this subpart (or under part 305 of this chapter) to protect against the introduction of plant pests into the United States.

§ 319.56-4 Approval of certain fruits and vegetables for importation.

(a) *Determination by the Administrator.* The Administrator has determined that the application of one or more of the designated phytosanitary measures cited in paragraph (b) of this section to certain imported fruits and vegetables mitigates the risk posed by those commodities, and that such fruits and vegetables may be imported into the United States subject to one or more of

¹Provisions relating to costs for other services of an inspector are contained in part 354 of this chapter.

those measures, as provided in paragraphs (c) and (d) of this section. The name and origin of all fruits and vegetables authorized importation under this section, as well as the applicable requirements for their importation, may be found on the Internet at http://www.aphis.usda.gov/import_export/plants/manuals/ports/downloads/fv.pdf.

Commodities that require phytosanitary measures other than one or more of the designated phytosanitary measures cited in paragraph (b) of this section may only be imported in accordance with applicable requirements in § 319.56-3 and commodity-specific requirements contained elsewhere in this subpart.

(b) *Designated phytosanitary measures.*

(1) Fruits or vegetables are subject to inspection upon arrival in the United States and comply with all applicable provisions of § 319.56-3.

(2) The fruits or vegetables are imported from a pest-free area in the country of origin and are accompanied by a phytosanitary certificate stating that the fruits or vegetables originated in a pest-free area in the country of origin.

(3) The fruits or vegetables are treated in accordance with part 305 of this chapter.

(4) The fruits or vegetables are inspected in the country of origin by an inspector or an official of the national plant protection organization of the exporting country, and have been found free of one or more specific quarantine pests identified by risk analysis as likely to follow the import pathway.

(5) The fruits or vegetables are imported as commercial consignments only.

(c) *Fruits and vegetables authorized importation under this section.* (1) *Previously approved fruits and vegetables.* Fruits and vegetables that were authorized importation under this subpart either directly by permit or by specific regulation as of August 17, 2007 and that were subject only to one or more of the designated phytosanitary measures cited in paragraph (b) of this section and the general requirements of § 319.56-3, may continue to be imported into the United States under the same requirements that applied be-

fore August 17, 2007, except as provided in paragraph (d) of this section.

(2) *Other fruits and vegetables.* Fruits and vegetables that do not meet the criteria in paragraph (c)(1) of this section may be authorized importation under this section as follows:

(i) *Pest risk analysis.* The risk posed by the particular fruit or vegetable from a specified country or other region has been evaluated and publicly communicated as follows:

(A) *Availability of pest risk analysis.* APHIS published in the FEDERAL REGISTER, for 60 days public comment, a notice announcing the availability of a pest risk analysis that evaluated the risks associated with the importation of the particular fruit or vegetable.

(B) *Determination of risk; factors considered.* The Administrator determined, and announced in the notice referred to in the previous paragraph, that, based on the information available, the application of one or more of the designated phytosanitary measures described in paragraph (b) of this section is sufficient to mitigate the risk that plant pests or noxious weeds could be introduced into or disseminated within the United States via the imported fruit or vegetable. In order for the Administrator to make the determination described in this paragraph, he or she must conclude based on the information presented in the risk analysis for the fruit or vegetable that the risk posed by each quarantine pest associated with the fruit or vegetable in the country or other region of origin is mitigated by one or more of the following factors:

(1) *Inspection.* A quarantine pest is associated with the commodity in the country or region of origin, but the pest can be easily detected via inspection;

(2) *Pest freedom.* No quarantine pests are known to be associated with the fruit or vegetable in the country or region of origin, or a quarantine pest is associated with the commodity in the country or region of origin but the commodity originates from an area in the country or region that meets the requirements of § 319.56-5 for freedom from that pest;

(3) *Effectiveness of treatment.* A quarantine pest is associated with the fruit

or vegetable in the country or region of origin, but the risk posed by the pest can be reduced by applying an approved post-harvest treatment to the fruit or vegetable.

(4) *Pre-export inspection.* A quarantine pest is associated with the commodity in the country or region of origin, but the commodity is subject to pre-export inspection, and the commodity is to be accompanied by a phytosanitary certificate that contains an additional declaration that the commodity has been inspected and found free of such pests in the country or region of origin.

(5) *Commercial consignments.* A quarantine pest is associated with the fruit or vegetable in the country or region of origin, but the risk posed by the pest can be reduced by commercial practices.

(ii) *Issuance of import permits.* The Administrator will announce his or her decision in a subsequent FEDERAL REGISTER notice. If appropriate, APHIS would begin issuing permits for importation of the fruit or vegetable subject to requirements specified in the notice because:

(A) No comments were received on the pest risk analysis;

(B) The comments on the pest risk analysis revealed that no changes to the pest risk analysis were necessary; or

(C) Changes to the pest risk analysis were made in response to public comments, but the changes did not affect the overall conclusions of the analysis and the Administrator's determination of risk.

(d) *Amendment of import requirements.* If, after August 17, 2007, the Administrator determines that one or more of the designated phytosanitary measures is not sufficient to mitigate the risk posed by any of the fruits and vegetables that are authorized importation into the United States under this section, APHIS will prohibit or further restrict importation of the fruit or vegetable. APHIS may also publish a notice in the FEDERAL REGISTER advising the public of its finding. The notice will specify the amended import requirements, provide an effective date for the

change, and will invite public comment on the subject.

(Approved by the Office of Management and Budget under control number 0579-0293)

§ 319.56-5 Pest-free areas.

As provided elsewhere in this subpart, certain fruits and vegetables may be imported into the United States provided that the fruits or vegetables originate from an area that is free of a specific pest or pests. In some cases, fruits or vegetables may only be imported if the area of export is free of all quarantine pests that attack the fruit or vegetable. In other cases, fruits and vegetables may be imported if the area of export is free of one or more quarantine pests that attack the fruit or vegetable, and provided that the risk posed by the remaining quarantine pests that attack the fruit or vegetable is mitigated by other specific phytosanitary measures contained in the regulations in this subpart.

(a) *Application of international standard for pest free areas.* APHIS requires that determinations of pest-free areas be made in accordance with the criteria for establishing freedom from pests found in International Standard for Phytosanitary Measures No. 4, "Requirements for the establishment of pest free areas." The international standard was established by the International Plant Protection Convention of the United Nations' Food and Agriculture Organization and is incorporated by reference in §300.5 of this chapter.

(b) *Survey protocols.* APHIS must approve the survey protocol used to determine and maintain pest-free status, as well as protocols for actions to be performed upon detection of a pest. Pest-free areas are subject to audit by APHIS to verify their status.

(c) *Determination of pest freedom.* (1) For an area to be considered free of a specified pest for the purposes of this subpart, the Administrator must determine, and announce in a notice or rule published in the FEDERAL REGISTER for 60 days public comment, that the area meets the criteria of paragraphs (a) and (b) of this section.

(2) The Administrator will announce his or her decision in a subsequent
