

§ 625.1 Purpose and scope.

(a) The purpose of the Healthy Forests Reserve Program (HFRP) is to assist landowners, on a voluntary basis, in restoring, enhancing, and protecting forestland resources on private lands through easements, 30-year contracts, and 10-year cost-share agreements.

(b) The objectives of HFRP are to:

(1) Promote the recovery of endangered and threatened species under the Endangered Species Act of 1973 (ESA);

(2) Improve plant and animal biodiversity; and

(3) Enhance carbon sequestration.

(c) The regulations in this part set forth the policies, procedures, and requirements for the HFRP as administered by the Natural Resources Conservation Service (NRCS) for program implementation and processing applications for enrollment.

(d) The Chief may implement HFRP in any of the 50 States, District of Columbia, Commonwealth of Puerto Rico, Guam, Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

§ 625.2 Definitions.

The following definitions will be applicable to this part:

30-year Contract means a contract that is limited to acreage owned by Indian tribes. The 30-year contract is not eligible for use on tribal lands held in trust or subject to Federal restrictions against alienation.

Acreage Owned by Indian Tribes means lands to which the title is held by individual Indians and Indian tribes. This term does not include land held in trust by the United States or lands where the fee title contains restraints against alienation.

Biodiversity (Biological Diversity) means the variety and variability among living organisms and the ecological complexes in which they live.

Candidate Conservation Agreement with Assurances (CCA) means a voluntary arrangement between the U.S. Fish and Wildlife Service (FWS) or the National Marine Fisheries Service (NMFS), and cooperating non-Federal landowners under the authority of section 10(a)(1) of the Endangered Species Act of 1973, 16 U.S.C. 1539(a)(1). Under the CCA and an associated enhancement of sur-

vival permit, the non-Federal landowner implements actions that are consistent with the conditions of the permit. CCAA with FWS are also subject to regulations at 50 CFR 17.22(d) for endangered species or 50 CFR 17.32(d) for threatened species, or applicable subsequent regulations.

Carbon sequestration means the long-term storage of carbon in soil (as soil organic matter) or in plant material (such as in trees).

Chief means the Chief of the Department of Agriculture (USDA) NRCS, or designee.

Confer means to discuss for the purpose of providing information; to offer an opinion for consideration; or to meet for discussion, while reserving final decision-making authority with NRCS.

Conservation practice means one or more conservation improvements and activities, including structural practices, land management practices, vegetative practices, forest management, and other improvements that benefit the eligible land and optimize environmental benefits, planned and applied according to NRCS standards and specifications.

Conservation treatment means any and all conservation practices, measures, activities, and works of improvement that have the purpose of alleviating resource concerns, solving or reducing the severity of natural resource use problems, or taking advantage of resource opportunities, including the restoration, enhancement, maintenance, or management of habitat conditions for HFRP purposes.

Coordination means to obtain input and involvement from others while reserving final decision-making authority with NRCS.

Cost-share agreement means a legal document that specifies the rights and obligations of any participant accepted into the program. A HFRP cost-share agreement is a binding agreement for the transfer of assistance from USDA to the participant to share in the costs of applying conservation. A cost-share agreement under HFRP has a duration of 10-years.
