Nuclear Regulatory Commission § 26.71

fitness is required, verify that a professional with the appropriate qualifications, as specified in §26.189(a), has indicated that the individual is fit to safely and competently perform his or her duties; and

(3) If the reviewing official determines that the individual’s authorization is warranted, implement any recommendations for treatment and followup drug and alcohol testing from the determination of fitness, which may include the collection of urine specimens under direct observation, and ensure that the individual complies with and successfully completes the treatment plans.

(e) Accepting followup testing and treatment plans from another FFD program. Licensees and other entities may rely on followup testing, treatment plans, and determinations of fitness that meet the requirements of §26.189 and were conducted under the FFD program of another licensee or entity who is subject to this subpart.

(1) If an individual leaves the FFD program in which a treatment and/or followup testing plan was required under paragraphs (b), (c), or (d) of this section, the licensee or other entity who imposed the treatment and/or followup testing plan shall ensure that information documenting the treatment and/or followup testing plan is identified to any subsequent licensee or other entity who seeks to grant authorization to the individual. If the individual is granted authorization by the same or another licensee or entity, the licensee or other entity who grants authorization to the individual shall ensure that any followup testing requirements are met and that the individual complies with any treatment plan, with accountability assumed by the granting licensee or other entity. If it is impractical for the individual to comply with a treatment plan that was developed under another FFD program because of circumstances that are outside of the individual’s or licensee’s or other entity’s control (e.g., geographical distance, closure of a treatment facility), then the granting FFD program shall ensure that an SAE develops a comparable treatment plan, with accountability for monitoring the individual’s compliance with the plan assumed by the granting licensee or other entity.

(2) If the previous licensee or other entity determined that the individual successfully completed any required treatment and followup testing, and the individual’s last period of authorization was terminated favorably, the receiving licensee or entity may rely on the previous determination of fitness and no further review or followup is required.

(f) Sanctions. If an individual has confirmed positive, adulterated, or substituted test results from any drug, validity, or alcohol test required in this section, the licensee or other entity shall, at a minimum and as appropriate—

(1) Deny authorization to the individual, as required by §26.75(b), (d), (e)(2), or (g); or

(2) Terminate the individual’s authorization, if it has been granted, as required by §26.75(e)(1) or (f).

§ 26.71 Maintaining authorization.

(a) Individuals may maintain authorization under the following conditions:

(1) The individual complies with the licensee’s or other entity’s FFD policies and procedures, as described in §26.27, including the responsibility to report any legal actions, as defined in §26.5;

(2) The individual remains subject to a drug and alcohol testing program that meets the requirements of §26.31, including random testing;

(3) The individual remains subject to a behavioral observation program that meets the requirements of §26.33; and

(4) The individual successfully completes required FFD training on the schedule specified in §26.29(c).

(b) If an authorized individual is not subject to an FFD program that meets the requirements of this section for more than 30 continuous days, then the licensee or other entity shall terminate the individual’s authorization and the individual shall meet the requirements in this subpart, as applicable, to regain authorization.
