§ 707.13 Medical review of results of tests for illegal drug use.

(a) All test results shall be submitted for medical review by the MRO. A confirmed positive test for drugs shall consist of an initial test performed by the immunoassay method, with positive results on that initial test confirmed by another test performed by the gas chromatography/mass spectrometry method (GC/MS). This procedure is described in paragraphs 2.4 (e) and (f) of the HHS Mandatory Guidelines.

(b) The Medical Review Officer will consider the medical history of the employee or applicant, as well as any other relevant biomedical information. When there is a confirmed positive test result, the employee or applicant will be given an opportunity to report to the MRO the use of any prescription or over-the-counter medication. If the MRO determines that there is a legitimate medical explanation for a confirmed positive test result, consistent with legal and non-abusive drug use, the employee or applicant will be given an opportunity to report to the MRO the use of any prescription or over-the-counter medication. If the MRO determines that there is a legitimate medical explanation for a confirmed positive test result, consistent with legal and non-abusive drug use, the MRO will certify that the test results do not meet the conditions for a determination of use of illegal drugs. If no such certification can be made, the MRO will make a determination of use of illegal drugs. Determinations of use of illegal drugs will be made in accordance with the criteria provided in the Medical Review Officer Manual issued by the Department of Health and Human Services [DHHS Publication No. (ADM) 88–1526].

§ 707.14 Action pursuant to a determination of illegal drug use.

(a) When an applicant for employment has been tested and determined to have used an illegal drug, processing for employment will be terminated and the applicant will be so notified.

(b)(1) When an employee who is in a testing designated position has been tested and determined to have used an illegal drug, the contractor shall immediately remove that employee from the testing designated position; if such employee also holds, or is an applicant for, an access authorization, then the contractor shall immediately notify DOE security officials for appropriate adjudication. If this is the first determination of use of illegal drugs by that employee (for example, the employee has not previously signed a DOE drug certification, and has not previously tested positive for use of illegal drugs), the employee may be offered a reasonable opportunity for rehabilitation, consistent with the contractor’s policies. If rehabilitation is offered, the employee will be placed in a non-testing designated position, which does not require a security clearance, provided there is such an acceptable position in which the individual can be placed during rehabilitation; if there is no acceptable non-testing designated position, the employee will be placed on sick, annual, or other leave status, for a reasonable period sufficient to permit rehabilitation. However, the employee will not be protected from disciplinary action which may result from violations of work rules other than a positive test result for illegal drugs.

(2) Following a determination by the site occupational medical department, after counseling or rehabilitation, that the employee can safely return to duty, the contractor may offer the employee reinstatement, in the same or a comparable position to the one held prior to the removal, consistent with the contractor’s policies and the requirements of 10 CFR part 710. Failure to take the opportunity for rehabilitation, if it has been made available, for the use of illegal drugs, will require significant disciplinary action up to and including removal from employment under the DOE contract, in accordance with the contractor’s policies. Any employee who is twice determined to have used illegal drugs shall in all cases be removed from employment under the DOE contract. Also, if an employee who has signed a DOE drug certification violates the terms of the certification, DOE shall conduct a timely review of the circumstances of such violation, and the individual’s continued eligibility for a DOE access authorization shall be determined under the provisions of 10 CFR part 710, “Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Significant Quantities of Special Nuclear Material.”

(c) An employee who has been removed from a testing designated position because of the use of illegal drugs
