

Fund's policies and procedures on environmental quality and control.

§ 1815.104 Specific responsibilities of the designated Fund official.

The designated Fund official shall:

(a) Coordinate the formulation and revision of Fund policies and procedures on matters pertaining to environmental quality and control;

(b) Establish and maintain working relationships with relevant government agencies (including Federal, state and local) concerned with environmental matters;

(c) Develop procedures within the Fund's planning and decisionmaking processes to ensure that environmental factors are properly considered in all proposals and decisions in accordance with this part;

(d) Develop, monitor, and review the Fund's implementation of standards, procedures, and working relationships for protection and enhancement of environmental quality and compliance with applicable laws and regulations;

(e) Monitor processes to ensure that the Fund's procedures regarding consideration of environmental quality are achieving their intended purposes;

(f) Advise the officers and employees of the Fund of technical and management requirements of environmental analysis, of appropriate expertise available, and, with the assistance of the Department of the Treasury's Office of the General Counsel, of relevant legal developments;

(g) Monitor the consideration and documentation of the environmental aspects of Fund planning and decisionmaking processes by appropriate officers and employees of the Fund;

(h) Ensure that all environmental assessments and, where required, all EISs are prepared in accordance with the appropriate regulations adopted by the Council on Environmental Quality and the Fund;

(i) Ensure that, as required, a legislative EIS is submitted with all proposed legislation;

(j) Consolidate and transmit to appropriate parties the Fund's comments on EISs and other environmental reports prepared by other agencies;

(k) Acquire information and prepare appropriate reports on environmental matters required of the Fund; and

(l) Coordinate the Fund's efforts to make available to other parties information and advice on the Fund's policies for protecting and enhancing the quality of the environment.

§ 1815.105 Major decision points.

(a) The possible environmental effects of an Application, including any Comprehensive Business Plan, must be considered along with technical, economic, and other factors throughout the decisionmaking process. For most Fund actions there are two distinct stages in the decisionmaking process:

(1) Preliminary approval stage, at which point applications are selected for funding; and

(2) Final approval and funding stage.

(b) Environmental review shall be integrated into the decisionmaking process of the Fund as follows:

(1) During the preliminary approval stage, the designated Fund official shall determine whether the Application proposes actions which are categorically excluded, or normally require an environmental assessment or an EIS;

(2) If the designated Fund official determines that the Application proposes actions which normally require an environmental assessment or an EIS, the applicant shall be informed that the final approval and funding, in addition to any other conditions, is contingent upon:

(i) The applicant supplying to the Fund all information necessary for the Fund to perform or have performed any environmental review required by this part;

(ii) The applicant not using any Fund financial assistance to perform any of such proposed actions in the Application that affect the physical environment until Fund approval is received; and

(iii) The outcome of the environmental review required by this part;

(3) The Fund will perform or have performed the environmental reviews required by this part;

(4) A preliminary approval of an Application may be withdrawn or further conditions may be imposed based upon

§ 1815.106

the outcome of an environmental review required by this part; and

(5) If the designated Fund official determines that the Application proposes actions that require an environmental assessment or an EIS, the environmental assessment and/or EIS must be completed and circulated prior to the use of Federal funds for any activity that triggers the need for an environmental assessment and/or EIS.

§ 1815.106 Supplemental environmental review.

(a) The designated Fund official shall determine whether the proposed actions in the Application are sufficiently definite to perform a meaningful environmental review during the preliminary approval stage.

(b) If the designated Fund official determines that the Application is sufficiently definite to perform a meaningful environmental review during the preliminary approval stage, no conditions for supplemental environmental review shall be imposed.

(c) If the designated Fund official determines that the Application, or any part of the Application, is not sufficiently definite to complete a meaningful environmental review during the preliminary approval stage, the Fund shall require a supplemental environmental review prior to the taking of any action directly using Fund financial assistance that is not categorically excluded from environmental review or for which an environmental assessment or EIS has not been approved by the Fund. The applicant shall notify the designated Fund official when proposing any action requiring a supplemental environmental review and shall supply to the Fund all information necessary for the Fund to perform the supplemental environmental review. The Fund shall perform or have performed such a supplemental environmental review. The applicant shall not use any Fund financial assistance to perform any of the proposed actions requiring a supplemental environmental review that affect the physical environment until Fund approval for such action is received.

12 CFR Ch. XVIII (1–1–14 Edition)

§ 1815.107 Determination of review requirement.

In deciding whether to prepare an EIS, the designated Fund official shall determine whether the proposal is one that normally:

- (a) Requires an EIS;
- (b) Requires an environmental assessment, but not necessarily an EIS; or
- (c) Does not require either an EIS or an environmental assessment (categorical exclusion).

§ 1815.108 Actions that normally require an EIS.

(a) If necessary, the Fund shall perform or have performed an environmental assessment to determine if an Application, or any portion of an Application, requires an EIS. However, it may be readily apparent that a proposed action in an Application will have a significant impact on the environment; in such cases, an environmental assessment is not required and the Fund shall immediately begin to prepare, or have prepared, an EIS.

(b) An EIS normally is required where an Application proposes to directly use financial assistance from the Fund for any Project that would:

(1) Remove, demolish, convert, or substantially rehabilitate 2,500 or more existing housing units, or would result in the construction or installation of 2,500 or more new housing units, or which would provide sites for 2,500 or more new housing units; or

(2) Remove, demolish, convert, or substantially rehabilitate 1,500,000 square feet or more of commercial space, or would result in the construction or installation of 1,500,000 square feet or more of new commercial space, or which would provide sites for 1,500,000 square feet or more of new commercial space.

§ 1815.109 Preparation of an EIS.

(a) If the Fund determines that an EIS should be prepared, it shall publish a notice of intent in the FEDERAL REGISTER in accordance with 40 CFR 1501.7 and 1508.22 of the CEQ regulations. After publishing the notice of intent, the Fund shall begin to prepare or have prepared the EIS. Procedures for preparing the EIS are set forth in 40 CFR part 1502 of the CEQ regulations.
