

**§ 107.1530**

**13 CFR Ch. I (1–1–14 Edition)**

account. Its balance represents your Accumulated Prioritized Payments, unearned Adjustments and unearned Charges.

(2) *Distribution Account.* The Distribution Account is a liability account. Its balance represents your unpaid Earned Prioritized Payments, earned Adjustments and earned Charges.

(3) *Earned Payments Account.* The Earned Payments Account is a memorandum account. Each time you add to the Distribution Account balance, add the same amount to the Earned Payments Account. Its balance represents your total (paid and unpaid) Earned Prioritized Payments, earned Adjustments and earned Charges.

(d) *How to determine your profit for Prioritized Payment purposes.* As of the end of each fiscal year and any interim period for which you want to make a Distribution:

(1) Bring the Accumulation Account up to date by adding to it all Prioritized Payments and Charges through the end of the appropriate fiscal period.

(2) Determine whether you have profit for the purposes of this section by doing the following computation:

- (i) Cumulative Earmarked Profit (Loss) under §107.1510(f); minus
- (ii) The Earned Payments Account balance; minus
- (iii) All Distributions previously made under §§107.1550, 107.1560 and 107.1570(a); minus
- (iv) Any Profit Participation previously allocated to SBA under §107.1530, but not yet distributed.

(3) The amount computed in paragraph (d)(2) of this section, if greater than zero, is your profit. If the amount is zero or less, you have no profit.

(4) If you have a profit, continue with paragraph (e) of this section. Otherwise, continue with paragraph (f) of this section.

(e) *Allocating Prioritized Payments to the Distribution Account.* (1) If you have a profit under paragraph (d) of this section, determine the lesser of:

- (i) Your profit; or
- (ii) The balance in your Accumulation Account.

(2) Subtract the result in paragraph (e)(1) of this section from the Accumulation Account and add it to the Dis-

tribution Account and the Earned Payments Account.

(f) *How to compute Adjustments.* You must compute Adjustments as of the end of each fiscal year if you have a balance greater than zero in either your Accumulation Account or your Distribution Account, after giving effect to any Distribution that will be made no later than the second Payment Date following the fiscal year end.

(1) Determine the combined average Accumulation Account and Distribution Account balances for the fiscal year, assuming that Prioritized Payments accumulate on a daily basis without compounding.

(2) Multiply the average balance computed in paragraph (f)(1) of this section by the average of the Trust Certificate Rates for all the Participating Securities poolings during the fiscal year.

(3) Add the amounts computed in this paragraph (f) to your Accumulation Account.

(g) *Licensee's obligation to pay Prioritized Payments after redeeming Participating Securities.* This paragraph (g) applies if you have redeemed all your Participating Securities, but you still hold Earmarked Assets and still have a balance in your Accumulation Account.

(1) You must continue to perform all the procedures in this section as of the end of each fiscal quarter and prior to making any Distribution. You must distribute any Earned Prioritized Payments, earned Adjustments and earned Charges in accordance with §107.1540.

(2) After you dispose of all your Earmarked Assets and make any required Distributions in accordance with §107.1540, your obligation to pay any remaining Accumulated Prioritized Payments, unearned Adjustments and unearned Charges will be extinguished.

[63 FR 5870, Feb. 5, 1998]

**§ 107.1530 How a Licensee computes SBA's Profit Participation.**

This section tells you how to compute SBA's Profit Participation. Profit Participation is included in the Distributions you make to SBA under §§ 107.1550 and 107.1560.

(a) *How to compute Profit Participation.* Profit Participation equals your "Base" times your "Profit Participation Rate" (if the Base is zero or less, you do not owe SBA Profit Participation). Compute the Base using paragraph (c) of this section and the Profit Participation Rate using paragraphs (d) through (g) of this section. You must compute your Earmarked Profit (Loss) under §107.1510 and your Prioritized Payments and Adjustments under §107.1520 before you can compute Profit Participation.

(b) *How to keep track of Profit Participation.* You must establish a Profit Participation Account to record your computations under this section and payments under §§107.1550 and 107.1560. Its balance represents your unpaid Profit Participation.

(c) *How to compute the Base.* As of the end of each fiscal year and any year-to-date interim period for which you want to make a Distribution, compute your Base using the following formula:

$$B = EP - PPA - UL$$

where:

B = Base.

EP = Earmarked Profit (Loss) for the period from §107.1510.

PPA = Prioritized Payments for the period from §107.1520(a)(1), Adjustments (if applicable) from §107.1520(f), and Charges (if applicable) from §107.1130(d)(2).

UL = "Unused Loss" from prior periods as determined in this paragraph (c).

(1) If the Base computed as of the end of your previous fiscal year (your "Previous Base") was less than zero, your Unused Loss equals your Previous Base.

(2) If your Previous Base was zero or greater, your Unused Loss equals zero, with the following exception: If you made an interim Distribution of Profit Participation during your previous fiscal year, and your Previous Base was lower than the interim Base on which your Distribution was computed, then your Unused Loss equals the difference between the interim Base and the Previous Base. For example, assume you are computing your Base as of December 31, 1997, your fiscal year end. Your Previous Base, computed as of December 31, 1996, was \$3,000,000. During 1996, you made an interim Distribution which was computed on a Base of

\$3,500,000 as of June 30, 1996. The \$500,000 difference between the 1996 interim and year-end Bases would be carried forward as Unused Loss in the computation of your Base as of December 31, 1997.

(3) If you had no Participating Securities outstanding as of the end of your last fiscal year, you may request SBA's approval to treat your Undistributed Net Realized Loss, as reported on SBA Form 468 for that year, as Unused Loss. If you did not file SBA Form 468 because you were not yet licensed as of the end of your last fiscal year, you may request SBA's approval to treat pre-licensing losses as Unused Loss.

(d) *How to compute the Profit Participation Rate.* You must determine your Profit Participation Rate each time you compute a Base that is greater than zero. Compute the Rate by following the steps in paragraphs (e) through (g) of this section.

(e) *Compute the "PLC ratio"*—(1) *General rule.* The "PLC ratio" is the highest ratio of outstanding Participating Securities to Leverageable Capital that you have ever attained.

(2) *Exception.* You may reduce the ratio computed under paragraph (e)(1) of this section if you have increased your Leverageable Capital above its highest previous level. The increase must have taken place at least 120 days before the date as of which your Base is computed. In addition, the increase must have been expressly provided for in a plan of operations submitted to and approved by SBA in writing, or must be the result of the takedown of commitments or the conversion of non-cash assets that were included in your Private Capital. If these conditions are satisfied, compute your reduced PLC ratio as follows:

(i) Divide the highest dollar amount of Participating Securities you have ever had outstanding by your increased Leverageable Capital.

(ii) If the result in paragraph (e)(2)(i) of this section is lower than your PLC ratio currently in effect, such result will become your new PLC ratio.

(f) *Compute the Profit Participation Rate (before indexing).* Compute the Profit Participation Rate (before indexing) using the table in this paragraph (f). Then go to paragraph (g) of

§ 107.1530

13 CFR Ch. I (1-1-14 Edition)

this section to determine whether to index the Profit Participation Rate.

If your PLC ratio is:	Then your Profit Participation Rate is:
1 or less .....	9%×PLC Ratio.
More than 1 .....	9%+[3%×(PLC ratio-1)].

(g) *Indexing the Profit Participation Rate.* The Profit Participation Rate is indexed, up or down, to the yield-to-maturity on Treasury bonds with a remaining term of ten (10) years (the “Treasury Rate”). You must perform the indexing procedures in this paragraph (g) unless the Treasury Rate was exactly 8 percent on every date that you issued Participating Securities.

(1) *Licenseses that have issued Participating Securities on only one occasion.* Determine the Treasury Rate for the date you issued your Participating Security. Adjust the Profit Participation Rate from paragraph (f) of this section by the percentage difference between the Treasury Rate and 8 percent. For example, assume that you issued Participating Securities when the Treasury Rate was 10 percent. The percentage difference between 10 percent and 8 percent is 25 percent. If you had a PLC ratio of 1, the Profit Participation Rate before indexing would be 9 percent. You would increase this rate by 25 percent, giving you a Profit Participation Rate of 11.25 percent.

(2) *Licenseses that have issued Participating Securities on more than one occasion.* Determine the Treasury Rate for each of the dates you issued Participating Securities.

(i) Compute an average of all such Treasury Rates, weighted to reflect the dollar amount of each issuance (ignoring any redemptions) and the number of days from the date of each issuance to the date as of which you are computing the Profit Participation Rate.

*Example to paragraph (g)(2)(i) of this section.* If you issued \$10 million of Participating Securities on the 60th day of Fiscal Year 1 when the Treasury Rate was 8 percent, and another \$15 million on the 100th day of Fiscal Year 3 when the Treasury Rate was 10 percent, then the weighted average Treasury Rate computed as of the end of Fiscal Year 3 would be 8.55 percent. [Days elapsed since first issuance of Participating Securities = 1,035; days elapsed since second issuance of Participating Securities = 265; weighted amount of first issuance = \$10,000,000 × 1,035/

1,035 = \$10,000,000; weighted amount of second issuance = \$15,000,000 × 265/1035 = \$3,840,579; weighted average amount of Participating Securities issued = \$10,000,000 + \$3,840,579 = \$13,840,579; weighted average Treasury Rate = {(08 × \$10,000,000) + (.10 × \$3,840,579)} / \$13,840,579 = 8.55%]

(ii) Adjust the Profit Participation Rate from paragraph (f) of this section by the percentage difference between the weighted average Treasury Rate and 8 percent. In the example given in paragraph (g)(2)(i) of this section, if the PLC ratio were equal to 2, the Profit Participation Rate for the fiscal year would be 12.83 percent. [ {(0855 - .08) ÷ .08) + 1} × .12 × 100 = 12.83%]

(h) *Computing SBA’s Profit Participation.* If the Base from paragraph (c) of this section is greater than zero, you must compute SBA’s Profit Participation as follows:

(1) Multiply the Base from paragraph (c) of this section by the Profit Participation Rate from paragraph (g) of this section.

(2) If your last Profit Participation computation was for an interim period during the same fiscal year and used a higher Profit Participation Rate than the Rate you just used in paragraph (h)(1) of this section, you must adjust the amount computed in paragraph (h)(1) of this section as follows:

(i) Determine the difference between the Profit Participation Rate you just used in paragraph (h)(1) of this section and the Rate used in your previous computation;

(ii) Multiply the difference by the Base from your last Profit Participation computation; and

(iii) Add the result to the amount you computed in paragraph (h)(1) of this section.

(3) Reduce the Profit Participation computed in paragraphs (h)(1) and (h)(2) of this section by any amounts of Profit Participation that you distributed or reserved for distribution to SBA, or its designated agent or Trustee, for any previous interim period(s) during the fiscal year. The result is SBA’s Profit Participation (unless it is less than zero, in which case SBA’s Profit Participation is zero).

(i) *Allocation of Profit Participation.* Before any Distribution and in any case within 120 days following the end of your fiscal year, you must add the

amount of Profit Participation computed under this §107.1530 to the Profit Participation Account. You must reserve funds equal to this amount for distribution to SBA, or its designated agent or Trustee; you may not reinvest these funds or use them for any other purpose.

[61 FR 3189, Jan. 31, 1996; 61 FR 41496, Aug. 9, 1996, as amended at 63 FR 5871, Feb. 5, 1998]

**§ 107.1540 Distributions by Licensee—  
Prioritized Payments and Adjustments.**

After you compute Prioritized Payments and Adjustments under §107.1520, you must distribute them in accordance with this §107.1540. You must notify SBA of any planned distribution under this section 10 business days before the distribution date, unless SBA permits otherwise.

(a) *Requirement to distribute Prioritized Payments and Adjustments.* This paragraph (a) applies only if you satisfy the liquidity requirement in §107.1505. All Distributions under this paragraph (a) go to SBA or its designated agent or trustee.

(1) You must distribute the balance in your Distribution Account from §107.1520 annually on the first or second Payment Date following your fiscal year end, and on any date when you are making any other Distribution.

(2) You may distribute all or part of the balance in your Distribution Account on any Payment Date regardless of whether you are making any other Distribution on that date.

(b) *Additional requirement for Licensees with undistributed Prioritized Payments.* This paragraph (b) applies if you do not distribute the full amount in your Distribution Account by the second Payment Date following the end of your fiscal year. At the end of each fiscal quarter, until you reduce the balance in your Distribution Account to zero, you must:

(1) Do all the steps in §107.1520; and

(2) Distribute the balance in your Distribution Account on the next Payment Date following the end of your fiscal quarter, provided you satisfy the liquidity requirement in §107.1505.

[61 FR 3189, Jan. 31, 1996, as amended at 63 FR 5871, Feb. 5, 1998]

**§ 107.1550 Distributions by Licensee—  
permitted “tax Distributions” to private investors and SBA.**

If you have outstanding Participating Securities or Earmarked Assets, and you are a limited partnership, “S Corporation,” or equivalent pass-through entity for tax purposes, you may make “tax Distributions” to your investors in accordance with this §107.1550, whether or not they have an actual tax liability. SBA receives a share of any tax Distribution you make. This section tells you when you may make a “tax Distribution” and how to compute it. You must notify SBA of any planned distribution under this section 10 business days before the distribution date, unless SBA permits otherwise.

(a) *Conditions for making a tax Distribution.* You may make a tax Distribution only if:

(1) You have paid all your Prioritized Payments, Adjustments, and Charges, so that the balance in both your Distribution Account and your Accumulation Account is zero (see §107.1520).

(2) You satisfy the liquidity requirement in §107.1505.

(3) The tax Distribution does not exceed your Retained Earnings Available for Distribution.

(4) The tax Distribution does not exceed the Maximum Tax Liability from paragraph (b) of this section.

(b) *How to compute the Maximum Tax Liability.* (1) You may compute your Maximum Tax Liability for a full fiscal year or for any calendar quarter. Use the following formula:

$$M = (TOI \times HRO) + (TCG \times HRC)$$

where:

M = Maximum Tax Liability

TOI = Net ordinary income allocated to your partners or other owners for Federal income tax purposes for the fiscal year or calendar quarter for which the Distribution is being made, excluding Prioritized Payments allocated to SBA.

HRO = The highest combined marginal Federal and State income tax rate for corporations or individuals on ordinary income, determined in accordance with paragraphs (b)(2) through (b)(4) of this section.

TCG = Net capital gains allocated to your partners or other owners for Federal income tax purposes for the fiscal year or
