

§ 10.453

19 CFR Ch. I (4–1–14 Edition)

material by virtue of having undergone:

(a) Simple combining or packaging operations; or

(b) Mere dilution with water or with another substance that does not materially alter the characteristics of the good or material.

§ 10.453 Treatment of textile and apparel sets.

Notwithstanding the specific rules specified in General Note 26(n), HTSUS, textile and apparel goods classifiable as goods put up in sets for retail sale as provided for in General Rule of Interpretation 3, HTSUS, will not be regarded as originating goods unless each of the goods in the set is an originating good or the non-originating goods in the set do not exceed 10 percent of the adjusted value of the set.

§ 10.454 Regional value content.

Where General Note 26, subdivision (n), HTSUS, sets forth a rule that specifies a regional value content test for a good, the regional value content of such good may be calculated, at the choice of the person claiming the tariff treatment authorized by this note for such good, on the basis of the build-down method or the build-up method described in this section, unless otherwise specified in the note.

(a) *Build-down method.* For the build-down method, the regional value content must be calculated on the basis of the formula $RVC = ((AV - VNM) / AV) \times 100$, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value; and VNM is the value of non-originating materials used by the producer in the production of the good; or

(b) *Build-up method.* For the build-up method, the regional value content must be calculated on the basis of the formula $RVC = (VOM / AV) \times 100$, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value; and VOM is the value of originating materials used by the producer in the production of the good.

§ 10.455 Value of materials.

(a) *Calculating the regional value content.* For purposes of calculating the regional value content of a good under

General Note 26(n), HTSUS, and for purposes of applying the *de minimis* (see § 10.459) provisions of subdivision (e) of the note, the value of a material is:

(1) In the case of a material imported by the producer of the good, the adjusted value of the material with respect to that importation;

(2) In the case of a material acquired in the territory where the good is produced, except for a material to which paragraph (a)(3) of this section applies, the producer's price actually paid or payable for the material;

(3) In the case of a material provided to the producer without charge, or at a price reflecting a discount or similar reduction, the sum of—

(i) All expenses incurred in the growth, production or manufacture of the material, including general expenses, and

(ii) A reasonable amount for profit; or

(4) In the case of a material that is self-produced, the sum of—

(i) All expenses incurred in the production of the material, including general expenses, and

(ii) A reasonable amount for profit.

(b) *Permissible additions to, and deductions from, the value of materials.* The value of materials may be adjusted as follows:

(1) For originating materials, the following expenses, if not included under paragraph (a) of this section, may be added to the value of the originating material:

(i) The costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;

(ii) Duties, taxes and customs brokerage fees on the material paid in the territory of Chile or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and

(iii) The cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-product; and

(2) For non-originating materials, if included under paragraph (a) of this section, the following expenses may be

deducted from the value of the non-originating material:

(i) The costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;

(ii) Duties, taxes and customs brokerage fees on the material paid in the territory of Chile or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;

(iii) The cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products; and

(iv) The cost of originating materials used in the production of the non-originating material in the territory of Chile or of the United States.

(c) *Accounting method.* Any cost or value referenced in General Note 26(n), HTSUS, and this subpart, must be recorded and maintained in accordance with the generally accepted accounting principles applicable in the territory of the Party in which the good is produced (whether Chile or the United States).

[CBP Dec. 05-07, 70 FR 10873, Mar. 7, 2005, as amended by CBP Dec. 06-39, 71 FR 76133, Dec. 20, 2006]

§ 10.456 Accessories, spare parts or tools.

Accessories, spare parts or tools that form part of the good's standard accessories, spare parts or tools and are delivered with the good will be treated as a material used in the production of the good, if—

(a) The accessories, spare parts or tools are classified with and not invoiced separately from the good; and

(b) The quantities and value of the accessories, spare parts or tools are customary for the good.

§ 10.457 Fungible goods and materials.

(a) A person claiming preferential tariff treatment under the US-CFTA for a good may claim that a fungible good or material is originating either based on the physical segregation of each fungible good or material or by using an inventory management meth-

od. For purposes of this subpart, the term "inventory management method" means—

(1) Averaging,

(2) "Last-in, first-out,"

(3) "First-in, first-out," or

(4) Any other method that is recognized in the generally accepted accounting principles of the Party in which the production is performed (whether Chile or the United States) or otherwise accepted by that Party.

(b) A person selecting an inventory management method under paragraph (a) of this section for particular fungible goods or materials must continue to use that method for those fungible goods or materials throughout the fiscal year of that person.

[CBP Dec. 05-07, 70 FR 10873, Mar. 7, 2005, as amended by CBP Dec. 06-39, 71 FR 76134, Dec. 20, 2006]

§ 10.458 Accumulation.

(a) Originating goods or materials of Chile or the United States that are incorporated into a good in the territory of the other Party will be considered to originate in the territory of the other Party for purposes of determining the eligibility of the goods or materials for preferential tariff treatment under the US-CFTA.

(b) A good that is produced in the territory of Chile, the United States, or both, by one or more producers, will be considered as an originating good if the good satisfies the applicable requirements of § 10.451 and General Note 26, HTSUS.

[CBP Dec. 05-07, 70 FR 10873, Mar. 7, 2005, as amended by CBP Dec. 06-39, 71 FR 76134, Dec. 20, 2006]

§ 10.459 De minimis.

(a) Except as provided in paragraphs (b) and (c) of this section, a good that does not undergo a change in tariff classification pursuant to General Note 26(n), HTSUS, will nonetheless be considered to be an originating good if—

(1) The value of all non-originating materials that are used in the production of the good and do not undergo the applicable change in tariff classification does not exceed 10 percent of the adjusted value of the good;

(2) The value of such non-originating materials is included in calculating the
