

## § 191.24

concurrently resulting from the manufacturing process.

(c) *Used in less valuable waste.* Drawback is allowable under this method based on the quantity of merchandise or drawback products used to manufacture the exported or destroyed article, reduced by an amount equal to the quantity of this merchandise that the value of the waste would replace. This method must be used when multiple products also necessarily and concurrently result from the manufacturing process, and there is valuable waste.

(d) *Abstract or schedule.* A drawback claimant may use either the abstract or schedule method to show the quantity of material used or appearing in the exported or destroyed article. An abstract is the summary of records which shows the total quantity used in or appearing in all articles produced during the period covered by the abstract. A schedule shows the quantity of material used in producing, or appearing in, each unit of product. Manufacturers or producers submitting letters of notification of intent to operate under a general manufacturing drawback ruling (see §191.7) and applicants for approval of specific manufacturing drawback rulings (see §191.8) shall state whether the abstract or schedule method is used; if no such statement is made, drawback claims must be based upon the abstract method.

(e) *Recordkeeping*—(1) *Valuable waste.* When the waste has a value and the drawback claim is not limited to the quantity of imported or substituted merchandise or drawback products appearing in the exported or destroyed articles claimed for drawback, the manufacturer or producer shall keep records to show the market value of the merchandise or drawback products used to manufacture or produce the exported or destroyed articles, as well as the market value of the resulting waste, under the used in less valuable waste method (see §191.2(u) of this part).

(2) *If claim for waste is waived.* If claim for waste is waived, only the “appearing in” basis may be used (see paragraph (b) of this section). Waste records need not be kept unless required to establish the quantity of imported duty-paid merchandise or draw-

### § 191.24 Certificate of manufacture and delivery.

(a) *When required.* When an article or drawback product manufactured or produced under a general manufacturing drawback ruling or a specific manufacturing drawback ruling is transferred from the manufacturer or producer to another party, a certificate of manufacture and delivery shall be prepared and certified by the manufacturer.

(b) *Information required on certificate.* The following information shall be required on the certificate of manufacture and delivery executed by the manufacturer or producer:

(1) The person to whom the article or drawback product is delivered;

(2) If the article or drawback product was manufactured or produced under a general manufacturing drawback ruling, the unique computer-generated number assigned to the letter of acknowledgment for that ruling, and if the article or drawback product was manufactured or produced under a specific manufacturing drawback ruling, either the unique computer number or the T.D. number for that ruling;

(3) The quantity, kind and quality of imported, duty-paid merchandise or drawback product designated;

(4) Import entry numbers, HTSUS number for the imported merchandise to at least the 6th digit (such HTSUS number shall be from the entry summary and other entry documentation for the imported, duty-paid merchandise unless the issuer of the certificate of manufacture and delivery received the merchandise under another certificate (either of delivery or of manufacture and delivery), in which case such HTSUS number shall be from the other certificate), and applicable duty amounts;

(5) Date received at factory;

(6) Date used in manufacture;

(7) Value at factory, if applicable;

(8) Quantity of waste, if any, if applicable;

(9) Market value of any waste, if applicable;

(10) Total quantity and description of merchandise appearing in or used;

(11) Total quantity and description of articles produced;

(12) Date of manufacture or production of the articles;

(13) The quantity of articles transferred; and

(14) The person from whom the article or drawback product is delivered.

(c) *Filing of certificate.* The certificate of manufacture and delivery shall be filed with the drawback claim it supports (unless previously filed) (see § 191.51 of this part).

(d) *Effect of certificate.* A certificate of manufacture and delivery documents the delivery of articles from the manufacturer or producer to another party, identifies such articles as being those to which a potential right to drawback exists, and assigns such potential rights to the transferee (see also § 191.82 of this part).

#### § 191.25 Destruction under Customs supervision.

A claimant may destroy merchandise and obtain manufacturing drawback by complying with the procedures set forth in § 191.71 of this part relating to destruction.

#### § 191.26 Recordkeeping for manufacturing drawback.

(a) *Direct identification manufacturing*—(1) *Records required.* Each manufacturer or producer under 19 U.S.C. 1313(a) shall keep records to allow the verifying Customs official to trace all articles manufactured or produced for exportation or destruction with drawback, from importation, through production, to exportation or destruction. To this end, these records shall specifically establish:

(i) The date or inclusive dates of manufacture or production;

(ii) The quantity and identity of the imported duty-paid merchandise or drawback products used in or appearing in (see § 191.23) the articles manufactured or produced;

(iii) The quantity, if any, of the non-drawback merchandise used, when these records are necessary to determine the quantity of imported duty-

paid merchandise or drawback product used in the manufacture or production of the exported or destroyed articles or appearing in them;

(iv) The quantity and description of the articles manufactured or produced;

(v) The quantity of waste incurred, if applicable; and

(vi) That the finished articles on which drawback is claimed were exported or destroyed within 5 years after the importation of the duty-paid merchandise, without having been used in the United States prior to such exportation or destruction. (If the completed articles were commingled after manufacture, their identity may be maintained in the manner prescribed in § 191.14 of this part.)

(2) *Accounting.* The merchandise and articles to be exported or destroyed shall be accounted for in a manner which will enable the manufacturer, producer, or claimant:

(i) To determine, and the Customs official to verify, the applicable import entry, certificate of delivery, and/or certificate of manufacture and delivery associated with the claim; and

(ii) To identify with respect to that import entry, certificate of delivery, and/or certificate of manufacture and delivery, the imported duty-paid merchandise or drawback products used in manufacture or production.

(b) *Substitution manufacturing.* The records of the manufacturer or producer of articles manufactured or produced in accordance with 19 U.S.C. 1313(b) shall establish the facts in paragraph (a)(1)(i), (iv) through (vi) of this section, and:

(1) The quantity, identity, and specifications of the merchandise designated (imported duty-paid, or drawback product);

(2) The quantity, identity, and specifications of merchandise of the same kind and quality as the designated merchandise before its use to manufacture or produce (or appearing in) the exported or destroyed articles;

(3) That, within 3 years after receiving the designated merchandise at its plant, the manufacturer or producer used it in manufacturing or production and that during the same 3-year period it manufactured or produced the exported or destroyed articles; and
