Railroad Retirement Board

§ 225.3

entitled to an annuity based on retirement or disability. When the employee’s death occurs before he or she reaches retirement age as defined in section 216(i) of the Social Security Act, the Base Years include the year of the employee’s death. Base Years are defined in sections 215(b)(2)(B)(ii) and 215(d) of the Social Security Act.

Benefits Computation Years means the years with the highest earnings used in computing the Average Indexed Monthly Earnings or Average Monthly Earnings. The number of Benefit Computation Years is determined in accordance with section 215(b)(2)(B)(i) of the Social Security Act and is based on the employee’s age or when the employee becomes disabled or dies.

Compensation means railroad compensation which is the amount of creditable railroad earnings under the Railroad Retirement Act, as explained in part 211 of this chapter.

Earnings means compensation creditable under the Railroad Retirement Act (other than compensation attributable to years of service prior to 1937) or “wages” creditable under the Social Security Act or both.

Eligible means that a person meets the necessary requirements and could qualify for payment if a valid application were filed.

Eligibility Year means the earliest of: the employee’s year of attainment of age 62; The year of disability onset; or the year of death. The Eligibility Year determines the formula used to compute a Primary Insurance Amount. Eligibility Year is defined in section 215(a) of the Social Security Act.

Employee means any person who is working or has worked for a railroad employer who is eligible for a retirement annuity or on whose account a survivor is eligible for a survivor annuity, as explained in part 216 of this chapter. For a detailed discussion of Employees under the Railroad Retirement Act, see part 200 of this chapter.

Entitled means that a person meets the necessary requirements, files a valid application and establishes his or her right to payment.

Indexed Earnings means the employee’s yearly earnings for the years after 1950 that have been adjusted to put the earnings in proportion to the earnings level of all workers for each of those years and to express the earnings in terms of a more recent dollar amount.

Primary Insurance Amount (PIA) means the result obtained by applying one of three formulas in the Social Security Act to the employee’s earnings as prescribed under that Act. A PIA can be based on the Average Indexed Monthly Earnings formula, the Average Monthly Earnings formula, or, in the case of the Special Minimum PIA, on a special formula based on years of coverage. Averaging earnings and PIA formulas are prescribed in section 215 of the Social Security Act.

Social Security Act means the Social Security Act as amended from time to time, unless the Act as in effect on a particular date is specified.

Wages means creditable wages or self-employment under sections 209 or 211, respectively, of the Social Security Act.

Year of service means 12 months of railroad service credited in accordance with part 210 of this chapter.

Years of coverage means years after 1936 as defined in section 215(a)(1)(C)(ii) of the Social Security Act in which the employee had earnings over certain specified amounts. Years of Coverage is primarily a factor in determining the Special Minimum formula PIA amount.

[54 FR 12903, Mar. 29, 1989, as amended at 68 FR 39010, July 1, 2003]

§ 225.3 PIA computation formulas.

(a) General. PIA’s are generally computed under one of two normal formulas determined by the employee’s eligibility year. In addition, there is a special PIA formula, based on an employee’s years of coverage, that is used when it produces a PIA that is higher than the PIA computed under the appropriate PIA formula. The two most common PIA formulas are the Average Indexed Monthly Earnings PIA formula and the Average Monthly Earnings PIA formula. The special PIA formula is called the Special Minimum PIA formula.

(b) Average Indexed Monthly Earnings PIA formula. When the employee’s eligibility year is after 1978, the Tier I PIA, Overall Minimum PIA, Survivor
§ 225.4 Limitation on amount of earnings used to compute a PIA.

Certain PIA’s used by the Board are based on a combination of compensation and wages, while other PIA’s used by the Board are based solely on either compensation or wages. For purposes of crediting earnings when computing any PIA, compensation is always treated as wages. Regardless of whether a PIA is based on a combination of compensation and wages or exclusively on either compensation or wages, the total earnings for each year used in computing a PIA cannot be higher than the maximum social security earnings credited in that year under sections 209(a) and 211(b) of the Social Security Act. The various PIA’s used by the Board are described in subparts B and C of this part.

Subpart B—PIA’s Used in Computing Employee, Spouse and Divorced Spouse Annuities

§ 225.10 General.

This subpart contains information about the PIA’s that can be used in computing most employee, spouse and divorced spouse annuities. The Tier I PIA is used in computing the tier I component of an employee, spouse or divorced spouse annuity. The Combined Earnings Dual Benefit PIA, Social Security Earnings Dual Benefit PIA and Railroad Earnings Dual Benefit PIA are used in computing an employee’s vested dual benefit component and a corresponding tier II component offset when entitlement to a vested dual benefit exists. Retirement annuity computations are discussed in part 226 of this chapter. The Overall Minimum PIA is used in computing the overall minimum guaranty formula rate as discussed in part 229 of this chapter.

§ 225.11 Tier I PIA.

(a) General. The Tier I PIA is used in computing an employee, spouse or divorced spouse tier I amount. Except for the cases described in paragraphs (b) through (d) of this section, a Tier I PIA is determined under sections 215 and 223 of the Social Security Act. Railroad...
