

§ 404.1092

20 CFR Ch. III (4-1-14 Edition)

(c) *Housing allowance when included in retirement pay.* You must exclude any parsonage or housing allowance included in your retirement pay or any other retirement benefit received after retirement pursuant to a church plan as defined in section 414(e) of the Internal Revenue Code when computing your net earnings from self-employment. For example, if a minister retires from Church A and the rental value of a parsonage or any other allowance is included in his/her retirement pay, the parsonage allowance must be excluded when determining net earnings from self-employment. However, if this same retired minister goes to work for Church B and is paid a parsonage allowance by Church B, this new income must be included when computing net earnings from self-employment.

(d) *Services outside the United States.* If you are a citizen or resident of the United States performing services outside the United States which are in the exercise of your ministry or in the exercise of duties required by your order, your net earnings from self-employment from the performance of these services are figured as described in paragraph (b) of this section. However, they are figured without regard to the exclusions from gross income provided in sections 911 and 931 of the Code relating to earned income from services performed outside the United States and from sources within possessions of the United States.

[45 FR 20075, Mar. 27, 1980, as amended at 50 FR 36574, Sept. 9, 1985; 70 FR 41955, July 21, 2005]

§ 404.1092 Figuring net earnings for U.S. citizens or residents living outside the United States.

(a) *Taxable years beginning after December 31, 1983.* If you are a citizen or resident of the United States and are engaged in a trade or business outside the United States, your net earnings from self-employment are figured without regard to the exclusion from gross income provided by section 911 (a)(1) of the Code.

(b) *Taxable years beginning after December 31, 1981, and before January 1, 1984.* If you are a citizen of the United States and were engaged in a trade or

business outside the United States, your net earnings from self-employment are figured without regard to the exclusion from gross income provided by section 911(a)(1) of the Code unless you are a resident of a foreign country or countries for an uninterrupted period which includes an entire taxable year.

[50 FR 36574, Sept. 9, 1985]

§ 404.1093 Possession of the United States.

In using the exclusions from gross income provided under section 931 of the Code (relating to income from sources within possessions of the United States) and section 932 of the Code (relating to citizens of possessions of the United States) for purposes of figuring your net earnings from self-employment, the term *possession of the United States* shall be deemed not to include the Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, or American Samoa.

[45 FR 20075, Mar. 27, 1980, as amended at 69 FR 51556, Aug. 20, 2004]

§ 404.1094 Options available for figuring net earnings from self-employment.

(a) *General.* If you have income from a trade or business in certain situations, you have options for figuring your net earnings from self-employment. The options available to you depend on whether you have income from an agricultural trade or business or a non-agricultural trade or business. For a definition of agricultural trade or business see § 404.1095.

(b) *Agricultural trade or business.* The net earnings from self-employment you derive from an agricultural trade or business may, at your option, be figured as follows:

(1) *Gross income of \$2,400 or less.* If your gross income is \$2,400 or less you may, at your option, report 66⅔ percent of the gross income as net earnings from self-employment instead of your actual net earnings from your business.

(2) *Gross income of more than \$2,400.* If your gross income is more than \$2,400 and your actual net earnings from your business are less than \$1,600 you may, at your option, report \$1,600 as net

earnings from self-employment instead of your actual net earnings. If your actual net earnings are \$1,600 or more you cannot use the optional method.

(3) *Two or more agricultural trades or businesses.* If you carry on more than one agricultural trade or business as a sole proprietor or as a partner, you must combine your gross income and net income from each trade or business to find out whether you may use the optional method of figuring net earnings.

(c) *Non-agricultural trade or business.*
 (1) The net earnings from self-employment you derive from a non-agricultural trade or business may be reported under an optional method if you are self-employed on a regular basis (as defined in paragraph (c)(4) of this section). You cannot use the optional method of reporting for more than 5 taxable years, and you cannot report less than your actual net earnings from self-employment.

(2) *Computation.* If your actual net earnings from self-employment are less than \$1,600 and less than 66⅔ percent of your gross income, you may, at your option, report 66⅔ percent of your gross income (but not more than \$1,600) as your net earnings from self-employment.

Example: A operates a grocery store and files income tax returns on a calendar year basis. A meets the *self-employed on a regular basis* requirement because actual net earnings from self-employment were \$400 or more in 1976 and in 1977. Gross income and net profit from operating the grocery store in 1978 through 1980 are as follows:

	1978	1979	1980
Gross income	\$2,800	\$1,200	\$1,000
Net profit	300	400	800

For the year 1978, A may report as annual net earnings from self-employment either—

- (i) None. (Actual net earnings from self-employment are less than \$400); or
- (ii) \$1,600. (Non-agricultural option, 66⅔ percent of \$2,800, but not to exceed the \$1,600 maximum.)

For the year 1979, A may report as annual net earnings from self-employment either—

- (i) \$400. (Actual net earnings from self-employment); or
- (ii) \$800. (Non-agricultural option, 66⅔ percent of \$1,200.)

For the year 1980, A must report \$800, the actual net earnings from self-employment. The non-agricultural option is not available

because A's actual net earnings are not less than 66⅔ percent of the gross income.

(3) *Figuring net earnings from both non-agricultural and agricultural self-employment.* If you are self-employed on a regular basis, you may use the non-agricultural optional method of reporting when you have both non-agricultural and agricultural trades or businesses. However, in order to use this method, your actual net earnings from non-agricultural self-employment combined with your actual net earnings from agricultural self-employment, or your optional net earnings from agricultural self-employment, must be less than \$1,600, and the net non-agricultural earnings must be less than 66⅔ percent of your gross non-agricultural income. If you qualify for using both the non-agricultural and agricultural option, you may report less than your actual total net earnings, but not less than your actual net earnings from non-agricultural self-employment alone. If you elect to use both options in a given taxable year, the combined maximum reportable net earnings from self-employment may not exceed \$1,600.

Example: C was regularly self-employed. She derived actual net earnings from self-employment of \$400 or more in 1975 and in 1976. Her gross income and net profit from operating both a grocery store and a farm in 1978 are:

GROCERY STORE	
Gross income	\$1,000
Net profit	800
FARM	
Gross income	\$2,600
Net profit	400

For the year 1978, C may report \$1,200 (actual net earnings from self-employment from both businesses), or \$2,400 (\$1,600 agricultural option (66⅔ percent of \$2,600 farm gross income not to exceed \$1,600) and \$800 grocery store profit). C cannot use the non-agricultural option for 1978 because her actual grocery store net exceeds 66⅔ percent of her grocery store gross income.

(4) *Self-employed on a regular basis.* For any taxable year beginning after 1972, we consider you to be self-employed on a regular basis, or to be a member of a partnership on a regular basis, if, in at least 2 of the 3 taxable years immediately before that taxable year, you had actual net earnings from self-employment of not less than \$400 from agricultural and non-agricultural

§ 404.1095

trades or businesses (including your distributive share of the net income or loss from any partnership of which you are a member).

(d) *Members of partnerships.* If you are a member of a partnership you may use the optional method of reporting. Your gross income is your distributive share of the partnership's gross income (after all guaranteed payments to which section 707(c) of the Code applies have been deducted), plus your own guaranteed payment.

(e) *Computing gross income.* For purposes of this section gross income means—

(1) Under the cash method of computing, the gross receipts from the trade or business reduced by the cost or other basis of property that was purchased and sold, minus any income that is excluded in computing net earnings from self-employment; or

(2) Under the accrual method of computing, the gross income minus any income that is excluded in figuring net earnings from self-employment.

(f) *Exercise of option.* For each taxable year for which you are eligible to use the optional method and elect to use that method, you must figure your net earnings from self-employment in that manner on your tax return for that year. If you wish to change your method of reporting after your tax return is filed, you may change it by filing an amended tax return with the Internal Revenue Service or by filing with us Form 2190, Change in Method of Computing Net Earnings from Self-Employment.

§ 404.1095 Agricultural trade or business.

(a) An agricultural trade or business is one in which, if the trade or business were carried on entirely by employees, the major portion of the services would be agricultural labor (§ 404.1057).

(b)(1) If the services are partly agricultural and partly non-agricultural, the time devoted to the performance of each type of service is the test used to determine whether the major portion of the services is agricultural labor.

(2) If more than half of the time spent in performing all the services is spent in performing services that are

agricultural labor, the trade or business is agricultural.

(3) If half or less of the time spent in performing all the services is spent in performing services that are agricultural labor, the trade or business is not agricultural. The time spent in performing the services is figured by adding the time spent in the trade or business during the taxable year by every individual (including the individual carrying on the trade or business and the members of that individual's family).

(c) We do not apply the rules in this section if the non-agricultural services are performed in connection with a trade or business separate and distinct from the agricultural trade or business. A roadside automobile service station on a farm is a trade or business separate and distinct from the agricultural trade or business, and the gross income from the service station, less the deductions attributable to it, is to be considered in determining net earnings from self-employment.

(d) We consider a sharefarmer (see § 404.1068(c)) or a materially participating owner or tenant (see § 404.1082(c)) to be engaged in an agricultural trade or business. We use the rules in this section to determine whether a farm crew leader who is self-employed (see § 404.1074) is engaged in an agricultural trade or business.

§ 404.1096 Self-employment income.

(a) *General.* Self-employment income is the amount of your net earnings from self-employment that is subject to social security tax and counted for social security benefit purposes. The term *self-employment income* means the net earnings from self-employment you derive in a taxable year, except as described in paragraphs (b), (c) and (d) of this section.

(b) *Maximum self-employment income.*
 (1) The term *self-employment income* does not include that part of your net earnings from self-employment that exceeds (or that part of your net earnings from self-employment which, when added to the wages you received in that taxable year, exceeds)—

Taxable year	Amount
Ending before 1955	\$3,600
