§ 182.1748 \text{anhydroglucose unit, and with a minimum viscosity of 25 centipoises for 2 percent by weight aqueous solution at 25 °C.}

(b) \text{Conditions of use. This substance is generally recognized as safe when used in accordance with good manufacturing practice.}

§ 182.1748 \textit{Sodium caseinate.}

(a) \textit{Product.} Sodium caseinate.

(b) \textit{Conditions of use.} This substance is generally recognized as safe when used in accordance with good manufacturing practice.

§ 182.1778 \textit{Sodium phosphate.}

(a) \textit{Product.} Sodium phosphate (mono-, di-, and tribasic).

(b) \textit{Conditions of use.} This substance is generally recognized as safe when used in accordance with good manufacturing practice.

§ 182.1781 \textit{Sodium aluminum phosphate.}

(a) \textit{Product.} Sodium aluminum phosphate.

(b) \textit{Conditions of use.} This substance is generally recognized as safe when used in accordance with good manufacturing practice.

§ 182.1781 \textit{Sodium aluminum phosphate.}

(a) \textit{Product.} Sodium aluminum phosphate.

(b) \textit{Conditions of use.} This substance is generally recognized as safe when used in accordance with good manufacturing practice.

§ 182.1810 \textit{Sodium tripolyphosphate.}

(a) \textit{Product.} Sodium tripolyphosphate.

(b) \textit{Conditions of use.} This substance is generally recognized as safe when used in accordance with good manufacturing practice.

\textbf{Subpart C—Anticaking Agents}

§ 182.2122 \textit{Aluminum calcium silicate.}

(a) \textit{Product.} Aluminum calcium silicate.

(b) \textit{Tolerance.} 2 percent.

(c) \textit{Limitations, restrictions, or explanation.} This substance is generally recognized as safe when used in table salt in accordance with good manufacturing practice.

§ 182.2227 \textit{Calcium silicate.}

(a) \textit{Product.} Calcium silicate.

(b) \textit{Tolerance.} 2 percent and 5 percent.

(c) \textit{Limitations, restrictions, or explanation.} This substance is generally recognized as safe when used at levels not exceeding 2 percent in table salt and 5 percent in baking powder in accordance with good manufacturing practice.

§ 182.2437 \textit{Magnesium silicate.}

(a) \textit{Product.} Magnesium silicate.

(b) \textit{Tolerance.} 2 percent.

(c) \textit{Limitations, restrictions, or explanation.} This substance is generally recognized as safe when used in table salt in accordance with good manufacturing practice.

§ 182.2727 \textit{Sodium aluminosilicate.}

(a) \textit{Product.} Sodium aluminosilicate (sodium silicoaluminate).

(b) \textit{Tolerance.} This substance is generally recognized as safe for use at a level not exceeding 2 percent in accordance with good manufacturing practice.

§ 182.2729 \textit{Sodium calcium aluminosilicate, hydrated.}

(a) \textit{Product.} Hydrated sodium calcium aluminosilicate (sodium calcium silicoaluminate).

(b) \textit{Tolerance.} This substance is generally recognized as safe for use at a level not exceeding 2 percent in accordance with good manufacturing practice.

§ 182.2906 \textit{Tricalcium silicate.}

(a) \textit{Product.} Tricalcium silicate.

(b) \textit{Tolerance.} 2 percent.

(c) \textit{Limitations, restrictions, or explanation.} This substance is generally recognized as safe when used in table salt in accordance with good manufacturing practice.

\textbf{Subpart D—Chemical Preservatives}

§ 182.3013 \textit{Ascorbic acid.}

(a) \textit{Product.} Ascorbic acid.

(b) \textit{Conditions of use.} This substance is generally recognized as safe when used in accordance with good manufacturing practice.

§ 182.3041 \textit{Erythorbic acid.}

(a) \textit{Product.} Erythorbic acid.

(b) \textit{Conditions of use.} This substance is generally recognized as safe when used in accordance with good manufacturing practice.
