§ 882.4060 Ventricular cannula.
(a) Identification. A ventricular cannula is a device used to puncture the ventricles of the brain for aspiration or for injection. This device is frequently referred to as a ventricular needle.
(b) Classification. Class I (general controls). When made only of surgical grade stainless steel, the device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter subject to § 882.9.

§ 882.4100 Ventricular catheter.
(a) Identification. A ventricular catheter is a device used to gain access to the cavities of the brain for injection of material into, or removal of material from, the brain.
(b) Classification. Class II (performance standards).

§ 882.4150 Aneurysm clip applier.
(a) Identification. An aneurysm clip applier is a device used by the surgeon for holding and applying intracranial aneurysm clips.
(b) Classification. Class II (performance standards).

§ 882.4175 Dowel cutting instrument.
(a) Identification. A dowel cutting instrument is a device used to cut dowels of bone for bone grafting.
(b) Classification. Class II (performance standards).
