

determined, such portion to be determined in the ratio which the amount contributed by the particular employer bears to the aggregate of such wages.

(c) For example, three companies maintain a central management agency which carries on the administrative work of the several companies. The central agency organization consists of a staff of clerks, bookkeepers, stenographers, etc., who are the common employees of the three companies. The expenses of the central agency, including wages paid to the foregoing employees, are borne by the several companies in certain agreed proportions. Company X pays 45 percent, Company Y pays 35 percent and Company Z pays 20 percent of such expenses. The amount of tax required to be withheld on the wages paid to persons employed in the central agency should be determined in accordance with the provisions of this section. In such event, Company X is liable as an employer for the return and payment of 45 percent of the tax required to be withheld, Company Y is liable for the return and payment of 35 percent of the tax and Company Z is liable for the return and payment of 20 percent of the tax. (See §31.3504-1, relating to acts to be performed by agents.)

§ 31.3402(h)(1)-1 Withholding on basis of average wages.

(a) *In general.* An employer may determine the amount of tax to be deducted and withheld upon a payment of wages to an employee on the basis of the employee's average estimated wages, with necessary adjustments, for any quarter. This paragraph applies only where the method desired to be used includes wages other than tips (whether or not tips are also included).

(b) *Withholding on the basis of average estimated tips—(1) In general.* Subject to certain limitations and conditions, an employer may, at his discretion, withhold the tax under section 3402 in respect of tips reported by an employee to the employer on an estimated basis. An employer who elects to make withholding of the tax on an estimated basis shall:

(i) In respect of each employee, make an estimate of the amount of tips that will be reported, pursuant to section

6053, by the employee to the employer in a calendar quarter.

(ii) Determine the amount which must be deducted and withheld upon each payment of wages (exclusive of tips) which are under the control of the employer to be made during the quarter by the employer to the employee. The total amount which must be deducted and withheld shall be determined by assuming that the estimated tips for the quarter represent the amount of wages to be paid to the employee in the form of tips in the quarter and that such tips will be ratably (in terms of pay periods) paid during the quarter.

(iii) Deduct and withhold from any payment of wages (exclusive of tips) which are under the control of the employer, or from funds referred to in section 3402(k) (see §§31.3402(k) and 31.3402(k)-1), such amount as may be necessary to adjust the amount of tax withheld on the estimated basis to conform to the amount required to be withheld in respect of tips reported by the employee to the employer during the calendar quarter in written statements furnished to the employer pursuant to section 6053(a). If an adjustment is required, the additional tax required to be withheld may be deducted upon any payment of wages (exclusive of tips) which are under the control of the employer during the quarter and within the first 30 days following the quarter or from funds turned over by the employee to the employer for such purpose within such period. For provisions relating to the repayment to an employee, or other disposition, of amounts deducted from an employee's remuneration in excess of the correct amount of tax, see §31.6413(a)-1.

(2) *Estimating tips employee will report—(i) Initial estimate.* The initial estimate of the amount of tips that will be reported by a particular employee in a calendar quarter shall be made on the basis of the facts and circumstances surrounding the employment of that employee. However, if a number of employees are employed under substantially the same circumstances and

Internal Revenue Service, Treasury

§ 31.3402(h)(3)-1

working conditions, the initial estimate established for one such employee may be used as the initial estimate for other employees in that group.

(ii) *Adjusting estimate.* If the quarterly estimate of tips in respect of a particular employee continues to differ substantially from the amount of tips reported by the employee and there are no unusual factors involved (for example, an extended absence from work due to illness) the employer shall make an appropriate adjustment of his estimate of the amount of tips that will be reported by the employee.

(iii) *Reasonableness of estimate.* The employer must be prepared, upon request of the district director, to disclose the factors upon which he relied in making the estimate, and his reasons for believing that the estimate is reasonable.

[T.D. 7053, 35 FR 11626, July 21, 1970]

§ 31.3402(h)(2)-1 Withholding on basis of annualized wages.

An employer may determine the amount of tax to be deducted and withheld upon a payment of wages to an employee by taking the following steps:

Step 1. Multiply the amount of the employee's wages for the payroll period by the number of such periods in the calendar year.

Step 2. Determine the amount of tax which would be required to be deducted and withheld upon the amount determined in Step 1 if that amount constituted the actual wages for the calendar year and the payroll period of the employee were an annual payroll period.

Step 3. Divide the amount of tax determined in Step 2 by the number of periods by which the employee's wages were multiplied in Step 1.

Example. On July 1, 1970, A, a single person who is on a weekly payroll period and claims one exemption, receives wages of \$100 from X Co., his employer. X Co. multiplies the weekly wage of \$100 by 52 weeks to determine an annual wage of \$5,200. It then subtracts \$650 for A's withholding exemption and arrives at a balance of \$4,550. The applicable table in section 3402(a) for annual payroll periods indicates that the amount of tax to be withheld thereon is \$376 plus \$314.50 (17 percent of excess over \$2,700), or a total of \$690.50. The annual tax of \$690.50, when divided by 52 to arrive at the portion thereof attributable to the weekly payroll period, equals \$13.28. X Co. may, if it chooses, withhold \$13.28 rather

than the amount specified in section 3402 (a) or (c) for a weekly payroll period.

[T.D. 7053, 35 FR 11627, July 21, 1970]

§ 31.3402(h)(3)-1 Withholding on basis of cumulative wages.

(a) *In general.* In the case of an employee who has in effect a request that the amount of tax to be withheld from his wages be computed on the basis of his cumulative wages, and whose wages since the beginning of the current calendar year have been paid with respect to the same category of payroll period (e.g., weekly or semimonthly), the employer may determine the amount of tax to be deducted and withheld upon a payment of wages made to the employee after December 31, 1969, by taking the following steps:

Step 1. Add the amount of the wages to be paid the employee for the payroll period to the total amount of wages paid by the employer to the employee during the calendar year.

Step 2. Divide the aggregate amount of wages computed in Step 1 by the number of payroll periods to which that amount relates.

Step 3. Compute the total amount of tax that would have been required to be deducted and withheld under section 3402(a) if the average amount of wages (as computed in Step 2) had been paid to the employee for the number of payroll periods to which the aggregate amount of wages (computed in Step 1) relates.

Step 4. Determine the excess, if any, of the amount of tax computed in Step 3 over the total amount of tax already deducted and withheld by the employer from wages paid to the employee during the calendar year.

Example. On July 1, 1970, Y Co. employs B, a single person claiming one exemption. Y Co. pays B the following amounts of wages on the basis of a biweekly payroll period on the following pay days:

July 20	\$1,000
August 3	300
August 17	300
August 31	300
September 14	300
September 28	300

On October 5, B requests that Y Co. withhold on the basis of his cumulative wages with respect to his wages to be paid on October 12 and thereafter. Y Co. adds the \$300 in wages to be paid to B on October 12 to the payments of wages already made to B during the calendar year, and determines that the aggregate amount of wages is \$2,800. The average amount of wages for the 7 biweekly payroll periods is \$400. The total amount of tax
