

through contract by the taxpayer. See, however, section 381(a) and 381(c)(10) for special rules with respect to deferred development expenditures in certain corporate acquisitions.

(c) *Mine or other natural deposit.* Section 616 has reference to expenditures made for the development of a mine or other natural deposit. Within an aggregated property, as that term is defined in section 614 (b) and (c), or within a single tract or parcel of land, there may be more than one mine or other natural deposit. Where a property, as determined under section 614, contains more than one mine or other natural deposit, the taxpayer may deduct under section 616(a) the development expenditures made with respect to one of such mines or deposits, and may defer under section 616(b) the development expenditures made with respect to another of such mines or deposits. Where there is more than one mine with respect to a single underlying deposit, the taxpayer may deduct under section 616(a) the development expenditures made with respect to one of such mines, and may defer under section 616(b) the development expenditures made with respect to another of such mines. The taxpayer must treat consistently all development expenditures with respect to each such mine or other natural deposit in a taxable year. The taxpayer must make a separate determination of the units of minerals or ores benefited in a mine or other natural deposit (regardless of the computation of the depletion allowance) in order that deferred expenditures with respect to such mine or deposit may be deducted on a ratable basis. See paragraph (f) of § 1.616-2.

§ 1.616-2 Election to defer.

(a) *General rule.* In lieu of taking a deduction under section 616(a), in the taxable year when the development expenditures are paid or incurred, a taxpayer may elect under section 616(b) to treat such expenditures with respect to each mine or other natural deposit as deferred expenses to be deducted ratably as the units of the produced ore or minerals benefited by such expenditures are sold. Section 616(b) is applicable to development expenditures paid or incurred both in the development

and producing stage of the mine or other natural deposit. However, in the case of such expenditures made in the development stage, this election is applicable only to the excess of the amount of such expenditures over the net receipts from the ore or minerals from such mine or deposit received or accrued during the development stage and in the same taxable year as the expenditures were paid or incurred. Such development expenditures not in excess of such net receipts shall be subject to the provisions of section 616(a).

(b) *Producing stage; definition of.* The mine or other natural deposit will be considered to be in a producing stage when the major portion of the mineral production is obtained from workings other than those opened for the purpose of development, or when the principal activity of the mine or other natural deposit is the production of developed ores or minerals rather than the development of additional ores or minerals for mining.

(c) *Expenditures made by the owner who retains a nonoperating interest.* (1) A taxpayer who elects to defer development expenditures and thereafter transfers his interest in the mine or other natural deposit, retaining an economic interest therein, shall deduct an amount attributable to such interest on a pro rata basis as the interest pays out. For example, a taxpayer who defers development expenditures and then leases his deposit, retaining a royalty interest therein, shall deduct the deferred expenditures ratably as he receives the royalties. If the taxpayer receives a bonus or advanced royalties in connection with the transfer of his interest, he shall deduct the deferred expenditures allocable to such bonus or advanced royalties in an amount which is in the same proportion to the total of such costs as the bonus or advanced royalties bears to the bonus and total royalties expected to be received. Also, in the case of a transfer of a mine or other natural deposit by a taxpayer who retains a production payment therein, he may deduct the development expenditures ratably over the payments expected to be received.

(2) Where a taxpayer receives an amount, in addition to retaining an economic interest, which amount is

§ 1.616-3

26 CFR Ch. I (4-1-13 Edition)

treated as from the sale or exchange of a capital asset or property treated under section 1231 (except coal or iron ore to which section 631(c) applies), the deferred development expenditures shall be allocated between the interest sold and the interest retained in proportion to the fair market value of each interest as of the date of sale. The amount allocated to the interest sold may not be deducted, but shall be a part of the basis of such interest for the purpose of determining gain or loss upon the sale thereof.

(d) *Losses from abandonment.* Section 165 and the regulations thereunder contain general rules relating to the treatment of losses resulting from abandonment.

(e) *Effect of election.* (1) The election to defer development expenditures shall apply only to expenditures for the taxable year for which made. However, once made, the election shall be binding with respect to the expenditures for that taxable year. Thus, a taxpayer cannot revoke his election for any reason whatsoever.

(2) The election shall be made for each mine or other natural deposit by a clear indication on the return or by a statement filed with the district director with whom the return was filed, not later than the time prescribed by law for filing such return (including extensions thereof) for the taxable year to which such election is applicable.

(f) *Computation of amount of deduction.* The amount of the deduction allowable during the taxable year is an amount A, which bears the same ratio to B (the total deferred development expenditures for a particular mine or other natural deposit reduced by the amount of such expenditures deducted in prior taxable years) as C (the number of units of the ore or mineral benefited by such expenditures sold during the taxable year) bears to D (the number of units of ore or mineral benefited by such expenditures remaining as of the taxable year). For the purposes of this proportion, the *number of units of ore or mineral benefited by such expenditures remaining as of the taxable year* is the number of units of ore or mineral benefited by the deferred development expenditures remaining at the end of the year to be recovered from the mine

or other natural deposit (including units benefited by such expenditures recovered but not sold) plus the number of units benefited by such expenditures sold within the taxable year. The principles outlined in § 1.611-2 are applicable in estimating the number of units remaining as of the taxable year and the number of units sold during the taxable year. The estimate is subject to revision in accordance with that section in the event it is ascertained, from any source, such as operations or development work, that the remaining units are materially greater or less than the number of units remaining from a prior estimate.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6841, 30 FR 9307, July 27, 1965]

§ 1.616-3 Time for making election with respect to returns due on or before May 2, 1960.

In the case of any taxable year beginning after December 31, 1953, and ending after August 16, 1954, the income tax return for which is due not later than May 2, 1960, the time to deduct or defer development expenditures for such a year under section 616 (a) or (b) shall expire on May 2, 1960.

§ 1.617-1 Exploration expenditures.

(a) *General rule.* Section 617 prescribes rules for the treatment of expenditures paid or incurred after September 12, 1966, for ascertaining the existence, location, extent, or quality of any deposit of ore or other mineral for which a deduction for depletion is allowable under section 613 (other than oil or gas) paid or incurred by the taxpayer before the beginning of the development stage of the mine or other natural deposit. Such expenditures hereinafter in the regulations under section 617 will be referred to as exploration expenditures. The development stage of the mine or other natural deposit will be deemed to begin at the time when, in consideration of all the facts and circumstances (including the actions of the taxpayer), deposits of ore or other mineral are disclosed in sufficient quantity and quality to reasonably justify commercial exploitation by the taxpayer. For example, core drilling expenditures paid or incurred
