

**Proclamation 9032 of September 30, 2013****National Energy Action Month, 2013**

*By the President of the United States of America  
A Proclamation*

To meet the challenges of the 21st century, we must work to ensure a clean, safe, and sustainable energy future. This National Energy Action Month, we can build on the progress we have made by recommitting to increasing our energy security, strengthening our economy, combatting climate change, and improving the environment.

As a Nation, we are taking control of our energy future, and my Administration remains committed to our long-term energy security. Today, we produce more oil than we have in 15 years and import less oil than we have in 20 years. Since I took office, we have more than doubled the amount of renewable electricity we generate from wind and quintupled the amount we generate from solar energy. We are building our first new nuclear power plants in decades, and we produce more natural gas than any other country. And we have done this while creating hundreds of thousands of good jobs and sending less carbon pollution into the environment than we have in nearly two decades.

While we have made significant progress, more work remains. The continuing cycle of spiking gasoline prices hurts American families and our businesses' bottom lines, and it reflects our economy's outsized demand for oil. To transition to a secure energy future, we must increase our production of clean energy, minimize waste and maximize efficiency, further reduce our oil imports, eliminate inefficient fossil fuel subsidies, and continue to develop more energy sources here at home. Because meeting global energy challenges requires international action, we must also engage with partners around the world to reduce carbon pollution, and we must build global markets for new advanced technologies. If we take these actions, we can curb climate change, save money for consumers, and use our resources to create good American jobs.

A clean energy economy has the potential to fuel economic growth for decades to come. But we must invest in the technologies of the future and fund breakthrough research to make these technologies better and cheaper. With the American spirit of innovation powering our progress, our Nation can lead the world in creating green jobs and technologies that are vital to both a clean energy future and the fight against climate change.

Years from now, our children may wonder if we did all we could to leave a safe, clean, and stable world for them to inherit. If we keep our eyes on the long arc of our future and commit to doing what this moment demands, the answer will be yes.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim October 2013 as National Energy Action Month. I call upon the citizens of the United States to recognize this month by working together to achieve greater energy security, a more robust economy, and a healthier environment for our children.

**Proc. 9033**

**Title 3—The President**

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of September, in the year of our Lord two thousand thirteen, and of the Independence of the United States of America the two hundred and thirty-eighth.

BARACK OBAMA

**Proclamation 9033 of September 30, 2013**

**National Substance Abuse Prevention Month, 2013**

*By the President of the United States of America  
A Proclamation*

Today, too many Americans face futures limited by substance use, which threatens health, safety, and academic performance. Substance use disorders are linked to crime, motor vehicle crashes, and fatalities. This month, we recognize substance abuse prevention programs across our country, and we do our part to build healthier neighborhoods and brighter futures.

This year's theme, "Learn it! Live it!" encourages Americans to come together, learn how substance use affects our communities, and live to set a positive example for our families, friends, and neighbors. My Administration's *National Drug Control Strategy* begins with a commitment to stop drug use before it begins. We have expanded evidence-based national and community-focused programs that work to prevent substance use where young people learn, grow, and play. We support substance-free workplaces, and we provide information on effective strategies to parents and communities nationwide. Through the Affordable Care Act, we expanded substance use disorder and mental health benefits for more than 60 million Americans. And beginning this month, those who have been locked out of health insurance can sign up for affordable coverage by visiting [www.HealthCare.gov](http://www.HealthCare.gov).

Because adult role models play an integral role in preventing youth substance abuse, we must lead by example, adopt positive behaviors, and talk to our kids about living substance-free. This month, we stand with local coalitions and community organizations as they advance their drive to keep young people, families, and neighborhoods free from drug and alcohol abuse. I encourage parents, schools, health officials, law enforcement professionals, faith-based organizations, workplaces, the recovery community, and all Americans to join in this effort. If we take up the mantle of healthy lifestyles together, we can help our children avoid the devastating consequences of substance abuse and give them the chance to explore their limitless potential.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim October 2013 as National Substance Abuse Prevention Month. I call upon all Americans to engage in appropriate programs and activities to promote comprehensive substance abuse prevention efforts within their communities.
