Coast Guard, DHS § 162.80

§ 162.80 Mississippi River below mouth of Ohio River, including South and Southwest passes.

(a) Mooring on the Mississippi River between miles 311.5 AHP and 340.0 AHP. (1) No vessel or craft shall moor along either bank of the Mississippi River between miles 311.5 AHP and mile 340.0 AHP except in case of an emergency, pursuant to an approved navigation permit, or as authorized by the District Commander. Vessels may be moored any place outside the navigation channel in this reach in case of an emergency and then for only the minimum time required to terminate the emergency. When so moored, all vessels shall be securely tied with bow and stern lines of sufficient power or crew to permit ready maneuverability and safe handling.

(vi) All tows navigating the Pass Manchac bridges in Louisiana are limited to no more than two barges, not to exceed a combined tow length of 400 feet (excluding the towboat). Vessel operators for tows exceeding these limits must request and receive permission from the COTP New Orleans prior to navigating the bridges. Requests should be made by telephoning the COTP at 504-846-5923. Any decision made by the COTP is final agency action.

(6) Projections from vessels: Vessels or tows carrying a deck load which overhangs or projects over the side, or whose rigging projects over the side, so as to endanger passing vessels, wharves, or other property, shall not enter or pass through any of the narrow parts of the waterway without prior approval of the District Commander.

(7) Meeting and passing: Passing vessels shall give the proper signals and pass in accordance with the International Rules, the Navigation Rules, International-Inland, Commandant Instruction M16672.2 (Series), where applicable. At certain intersections where strong currents may be encountered, sailing directions may be issued through navigation bulletins or signs posted on each side of the intersections.

NOTE: The Corps of Engineers also has regulations dealing with this section in 33 CFR 207.

the responsibility and duty of the master of a towing vessel releasing or mooring a vessel in this reach of the Mississippi River to report such action immediately.

(b) Mooring on Mississippi River below Baton Rouge, La., including South and Southwest Passes. (1) When tied up individually or in fleets, vessels shall be moored with sufficient lines and shore fastenings to insure their remaining in place and withstanding the action of winds, currents and the suction of passing vessels.

NOTE: The Corps of Engineers also has regulations dealing with this section in 33 CFR Part 207.

§ 162.85 Yazoo Diversion Canal, Vicksburg, Miss., from its mouth at Kleinston Landing to Fisher Street; navigation.

(a) Speed. Excessive speeding is prohibited. A vessel shall reduce its speed sufficiently to prevent any damage when approaching another vessel in motion or tied up, a wharf or other structure, works under construction, plant engaged in river and harbor improvement, levees, floodwalls withstanding floodwaters, buildings submerged or partially submerged by high waters, or any other structure or improvement likely to be damaged by collision, suction, or wave action.

NOTE: The Corps of Engineers also has regulations dealing with this section in 33 CFR Part 207.

§ 162.90 White River, Arkansas Post Canal, Arkansas River, and Verdigris River between Mississippi River, Ark., and Catoosa, Okla.; use, administration, and navigation.

(a) The regulations in this section shall apply to:

(2) Bridges, wharves and other structures. All bridges, wharves, and other structures in or over the waterways described in paragraph (a)(1) of this section.

(3) Vessels and rafts. The term “vessels” as used in this section includes every description of watercraft used, or capable of being used, as a means of transportation on water, other than rafts.

(b) Waterways:

(1) Fairway. A clear channel shall at all times be left open to permit free and unobstructed navigation by all types of vessels and rafts that normally use the various waterways or sections thereof. The District Commander may specify the width of the fairway required in the waterways under his charge.

(2) Anchoring or mooring in waterway.

(i) No vessels or rafts shall anchor or moor in any of the land cuts or other narrow parts of the waterway, except in an emergency. Whenever it becomes necessary for a vessel or raft to stop in any such portions of the waterway, it shall be securely fastened to one bank and as close to the bank as possible. This shall be done only at such a place and under such conditions as will not obstruct or prevent the passage of other vessels or rafts. Stoppages shall be only for such periods as may be necessary.

(ii) Except temporarily, as authorized in paragraph (b)(2)(i) of this section, no vessel or raft will be allowed to use any portion of the fairway as a mooring place without written permission from the District Commander.

(iii) When tied up individually, all vessels shall be moored by bow and stern lines. Rafts and tows shall be secured at sufficiently close intervals to insure their not being drawn away from the bank by winds, currents, or the suction of passing vessels. Towlines shall be shortened so that the different parts of the tow will be as close together as possible. In narrow sections, no vessel or raft shall be tied abreast of another if the combined width of vessels or rafts is greater than 70 feet.
