other documents authorizing the cutting or removal of timber or forest products shall be designed to standards appropriate for the intended uses, considering safety, cost of transportation, and impacts on land and resources. If the sale contract provides for road design standards in excess of those needed for the harvest and removal of timber from that sale, including measures to protect adjacent resource values, provision shall be made in the contract for compensating the purchaser for the additional costs, unless the purchaser elects Government construction under section 14(i) of the National Forest Management Act of 1976.

§ 223.39 [Reserved]

§ 223.40 Cancellation for environmental protection or inconsistency with plans.

Timber sale contracts, permits, and other such instruments, authorizing the harvesting of trees or other forest products, with terms of longer than 2 years, shall provide for cancellation in order to prevent serious environmental damage or when they are significantly inconsistent with land management plans adopted or revised in accordance with section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended. Such provision shall provide for reasonable compensation to the purchaser for unrecovered costs incurred under the contract and for the difference between the current contract value and the average value of comparable National Forest timber sold during the preceding 6-month period.

§ 223.41 Payment when purchaser elects government road construction.

Each contract having a provision for construction of specified roads with total estimated construction costs of \$50,000 or more shall include a provision to ensure that if the purchaser elects government road construction, the purchaser shall pay, in addition to the price paid for the timber or other forest products, an amount equal to the estimated cost of the roads.
