

**§ 35.917-6**

undertake public participation activities commensurate with the appropriate public participation program but adjusted for constraints imposed by facilities planning activities that have already been completed.

(3) If a project is segmented, the Regional Administrator shall look at the project as a whole when considering any petition for exemption.

(e) *Relationship between facilities planning and other environmental protection programs.* Where possible, the grantee shall further the integration of facilities planning and related environmental protection programs by coordinating the facilities planning public participation program with public participation activities carried out under other programs. At a minimum, the grantee shall provide for a formal liaison between the facilities planning advisory group (or the grantee, where there is no advisory group) and any areawide advisory group established under subpart G of this part. The Regional Administrator may request review of the facilities plan by any appropriate State or areawide advisory group in association with the facilities plan review required by 40 CFR 35.1522.

(f) *Mid-project evaluation.* In accordance with 40 CFR 25.12(a)(2), EPA shall, in conjunction with other regular oversight responsibilities, conduct a mid-project review of compliance with public participation requirements.

[44 FR 10302, Feb. 16, 1979]

**§ 35.917-6 Acceptance by implementing governmental units.**

A facilities plan submitted for approval shall include adopted resolutions or, where applicable, executed agreements of the implementing governmental units, including Federal facilities, or management agencies which provide for acceptance of the plan, or assurances that it will be carried out, and statements of legal authority necessary for plan implementation. The Regional Administrator may approve any departures from these requirements before the plan is submitted.

**40 CFR Ch. I (7-1-14 Edition)**

**§ 35.917-7 State review and certification of facilities plan.**

Each facilities plan must be submitted to the State agency for review. The State must certify that:

(a) The plan conforms with requirements set forth in this subpart;

(b) The plan conforms with any existing final basin plans approved under section 303(e) of the Act;

(c) Any concerned 208 planning agency has been given the opportunity to comment on the plan; and

(d) The plan conforms with any waste treatment management plan approved under section 208(b) of the Act.

**§ 35.917-8 Submission and approval of facilities plan.**

The State agency must submit the completed facilities plan for the Regional Administrator's approval. Where deficiencies in a facilities plan are discovered, the Regional Administrator shall promptly notify the State and the grantee or applicant in writing of the nature of such deficiencies and of the recommended course of action to correct such deficiencies. Approval of a plan of study or a facilities plan will not constitute an obligation of the United States for any step 2, step 3, or step 2=3 project.

**§ 35.917-9 Revision or amendment of facilities plan.**

A facilities plan may provide the basis for several subsequent step 2, step 3, or step 2=3 projects. A facilities plan which has served as the basis for the award of a grant for a step 2, step 3, or step 2=3 project shall be reviewed before the award of any grant for a subsequent project involving step 2 or step 3 to determine if substantial changes have occurred. If the Regional Administrator decides substantial changes have occurred which warrant revision or amendment, the plan shall be revised or amended and submitted for review in the same manner specified in this subpart.

**§ 35.918 Individual systems.**

(a) For references to individual systems, the following definitions apply:

(1) *Individual systems.* Privately owned alternative wastewater treatment works (including dual waterless/

gray water systems) serving one or more principal residences or small commercial establishments which are neither connected into nor a part of any conventional treatment works. Normally, these are on-site systems with localized treatment and disposal of wastewater with minimal or no conveyance of untreated waste water. Limited conveyance of treated or partially treated effluents to further treatment or disposal sites can be a function of individual systems where cost-effective.

(2) *Principal residence.* Normally the voting residence, the habitation of the family or household which occupies the space for at least 51 percent of the time annually. Second homes, vacation, or recreation residences are not included in this definition. A commercial establishment with waste water flow equal to or smaller than one user equivalent (generally 300 gallons per day dry weather flows) is included.

(3) *Small commercial establishments.* Private establishments normally found in small communities such as restaurants, hotels, stores, filling stations, or recreational facilities with dry weather wastewater flows less than 25,000 gallons per day. Private, non-profit entities such as churches, schools, hospitals, or charitable organizations are considered small commercial establishments. A commercial establishment with waste water flow equal to or smaller than one user equivalent (generally 300 gallons per day dry weather flow) shall be treated as a residence.

(4) *Conventional system.* A collection and treatment system consisting of minimum size (6 or 8 inch) gravity collector sewers normally with manholes, force mains, pumping and lift stations, and interceptors leading to a central treatment plant.

(5) *Alternative waste water treatment works.* A waste water conveyance and/or treatment system other than a conventional system. This includes small diameter pressure and vacuum sewers and small diameter gravity sewers carrying partially or fully treated waste water.

(b) A public body otherwise eligible for a grant under § 35.920-1 is eligible for a grant to construct privately

owned treatment works serving one or more principal residences or small commercial establishments if the requirements of §§ 35.918-1, 35.918-2, and 35.918-3 are met.

(c) All individual systems qualify as alternative systems under § 35.908 and are eligible for the 4-percent set-aside (§ 35.915-1(e)) where cost-effective.

### § 35.918-1 Additional limitations on awards for individual systems.

In addition to those limitations set forth in § 35.925, the grant applicant shall:

(a) Certify that the principal residence or small commercial establishment was constructed before December 27, 1977, and inhabited or in use on or before that date;

(b) Demonstrate in the facility plan that the solution chosen is cost-effective and selected in accordance with the cost-effectiveness guidelines for the construction grants program (see appendix A to this subpart);

(c) Apply on behalf of a number of individual units located in the facility planning area;

(d) Certify that public ownership of such works is not feasible and list the reasons in support of such certification;

(e) Certify that such treatment works will be properly installed, operated, and maintained and that the public body will be responsible for such actions;

(f) Certify before the step 2 grant award that the project will be constructed and an operation and maintenance program established to meet local, State, and Federal requirements including those protecting present or potential underground potable water sources;

(g) Establish a system of user charges and industrial cost recovery in accordance with §§ 35.928 *et seq.*, 35.929 *et seq.*, 35.935-13, and 35.935-15;

(h) Obtain assurance (such as an easement or covenant running with the land), before the step 2 grant award, of unlimited access to each individual system at all reasonable times for such purposes as inspection, monitoring, construction, maintenance, operation, rehabilitation, and replacement. An option will satisfy this requirement if it
