**§ 180.129 o-Phenylphenol and its sodium salt; tolerances for residues.**

(a) *General.* Tolerances are established for combined residues of the fungicide o-phenylphenol and sodium o-phenylphenate, each expressed as o-phenylphenol, from postharvest application of either in or on the following food commodities:

| Commodity                                 | Parts per million |
|---|-------------------|
| Apple                                     | 25                |
| Cantaloupe (NMT 10 ppm in edible portion) | 125               |
| Carrot, roots                             | 20                |
| Cherry                                    | 5                 |
| Citrus fruits                             | 10                |
| Cucumber                                  | 10                |
| Lemon                                     | 10                |
| Nectarine                                 | 5                 |
| Orange                                    | 10                |
| Pepper, bell                              | 10                |
| Peach                                     | 20                |
| Pear                                      | 25.0              |
| Pineapple                                 | 10                |
| Plum, prune, fresh                        | 20                |
| Sweet potato, roots                       | 15                |
| Tomato                                    | 10                |

**§ 180.130 Hydrogen Cyanide; tolerances for residues.**

(a) *General.* A tolerance for residues of the insecticide hydrogen cyanide from postharvest fumigation as a result of application of sodium cyanide is established as follows: 50 parts per million in or on Fruit, citrus.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

**§ 180.132 Thiram; tolerances for residues.**

(a) *General.* Tolerances for residues of the fungicide thiram (tetramethyl thiuram disulfide), including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified is to be determined by measuring only thiram.

| Commodity           | Parts per million | Expiration/revocation date |
|---------------------|-------------------|----------------------------|
| Apple               | 7.0               | None                       |
| Banana <sup>1</sup> | 0.80              | 3/31/15                    |
| Peach               | 7.0               | None                       |
| Strawberry          | 20                | None                       |

<sup>1</sup> No U.S. registrations as of September 23, 2009.

**§ 180.142 2,4-D; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide, plant regulator, and fungicide 2,4-D, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels is to be determined by measuring residues of 2,4-D (2,4-dichlorophenoxyacetic acid), both free and conjugated, determined as the acid, in or on the following commodities:

| Commodity                                       | Parts per million |
|---|-------------------|
| Almond hulls                                    | 0.1               |
| Asparagus                                       | 5.0               |
| Barley, bran                                    | 4.0               |
| Barley, grain                                   | 2.0               |
| Barley, straw                                   | 50                |
| Berry, group 13                                 | 0.2               |
