

§ 52.1920

meet its commitment to meet these requirements within one year of final conditional approval, then USEPA's action for the State's requested SIP revision will automatically convert to a final disapproval.

(i) Incorporation by reference. August 1, 1995, Ohio Administrative Code Chapter 3745-101, effective August 21, 1995.

(4) On March 1, 1996, Ohio submitted revisions to its Permit to Install rules as a revision to the State implementation plan. The request was supplemented on April 16, 1997, September 5, 1997, December 4, 1997, and April 21, 1998.

(i) Incorporation by reference.

(A) Rule 3745-31-01 through 3745-31-20, effective September 25, 1998.

(b) On October 9, 2000, the Ohio Environmental Protection Agency submitted a revision to Ohio Administrative Code (OAC) 3745-21-09(BBB). The revision removed a requirement that for the agerite resin D process, the VOC emissions from the vapor recovery system vents and neutralization and distillation system vents (except wash kettle or still feed condenser vents, stills vacuum jet tailpipe vents, and process emergency safety relief devices) be vented to an emissions control device that is designed and operated to achieve an emissions control efficiency of at least 90 percent, by weight. In place of this deleted emissions control efficiency requirement, the revised paragraph now specifies a total annual VOC emissions limit of 1.0 ton from the recovery system and neutralization and distillation system vents. The revision lacked test procedures and record keeping requirements compatible with the revised emission limit. On March 1, 2010, Ohio submitted a commitment to revise OAC 3745-21-09(BBB) to include the necessary test procedures and record keeping requirements by September 16, 2011. When EPA determines the state has met its commitment, OAC 3745-21-09(BBB) will be incorporated by reference into the SIP.
