

costs identified pursuant to paragraph (h)(1) of this section through charges assessed upon purchasers of shared transport. This charge shall be expressed in dollars and cents per access minute of use. The charge shall be computed by dividing the projected costs of the shared ports by the historical annual access minutes of use calculated for purposes of recovery of common transport costs in § 69.111(c).

(2) Non-price cap local exchange carriers shall recover the projected annual revenue requirement for the Local Switching element that are not recovered in paragraph (h)(1) of this section through charges that are expressed in dollars and cents per access minute of use and assessed upon all interexchange carriers that use local exchange switching facilities for the provision of interstate or foreign services. The maximum charge shall be computed by dividing the projected remainder of the annual revenue requirement for the Local Switching element by the historical annual access minutes of use for all interstate or foreign services that use local exchange switching facilities.

[52 FR 37310, Oct. 6, 1987, as amended at 56 FR 33881, July 24, 1991; 62 FR 31933, June 11, 1997; 62 FR 40463, July 29, 1997; 66 FR 59731, Nov. 30, 2001]

§ 69.108 Transport rate benchmark.

(a) For transport charges computed in accordance with this subpart, the DS3-to-DS1 benchmark ratio shall be calculated as follows: the telephone company shall calculate the ratio of:

(1) The total charge for a 1.609 km (1 mi) channel termination, 16.09 km (10 mi) of interoffice transmission, and one DS3 multiplexer using the telephone company's DS3 special access rates to;

(2) The total charge for a 1.609 km (1 mi) channel termination plus 16.09 km (10 mi) of interoffice transmission using the telephone company's DS1 special access rates.

(b) Initial transport rates will generally be presumed reasonable if they are based on special access rates with a DS3-to-DS1 benchmark ratio of 9.6 to 1 or higher.

(c) If a telephone company's initial transport rates are based on special access rates with a DS3-to-DS1 bench-

mark ratio of less than 9.6 to 1, those initial transport rates will generally be suspended and investigated absent a substantial cause showing by the telephone company. Alternatively, the telephone company may adjust its initial transport rates so that the DS3-to-DS1 ratio calculated as described in paragraph (a) of this section of those rates is 9.6 or higher. In that case, initial transport rates that depart from existing special access rates effective on September 1, 1992 so as to be consistent with the benchmark will be presumed reasonable only so long as the ratio of revenue recovered through the interconnection charge to the revenue recovered through facilities-based charges is the same as it would be if the telephone company's existing special access rates effective on September 1, 1992 were used.

[58 FR 41189, Aug. 3, 1993, as amended at 58 FR 44952, Aug. 25, 1993; 58 FR 45267, Aug. 27, 1993]

§ 69.109 Information.

(a) A charge shall be assessed upon all interexchange carriers that are connected to assistance boards through interexchange directory assistance trunks.

(b) Except as provided in § 69.118, if such connections are maintained exclusively by carriers that offer MTS, the projected annual revenue requirement for the Information element shall be divided by 12 to compute the monthly assessment to such carriers.

(c) If such connections are provided to additional carriers, charges shall be established that reflect the relative use of such directory assistance service by such interexchange carriers.

[48 FR 10358, Mar. 11, 1983, as amended at 56 FR 33881, July 24, 1991]

§ 69.110 Entrance facilities.

(a) A flat-rated entrance facilities charge expressed in dollars and cents per unit of capacity shall be assessed upon all interexchange carriers and other persons that use telephone company facilities between the interexchange carrier or other person's point of demarcation and the serving wire center.
