

(d) Telephone companies shall apply only their shortest term special access rates in setting direct-trunked transport rates.

(e) Except as provided in paragraphs (f), (g), and (h) of this section, telephone companies shall not offer direct-trunked transport rates based on term discounts or volume discounts for multiple DS3s or any other service with higher volume than DS3.

(f) Except in the situations set forth in paragraphs (g) and (h) of this section, telephone companies may offer term and volume discounts in direct-trunked transport charges within each study area used for the purpose of jurisdictional separations, in which interconnectors have taken either:

(1) At least 100 DS1-equivalent cross-connects for the transmission of switched traffic (as described in § 69.121(a)(1)) in offices in the study area that the telephone company has assigned to the lowest priced density pricing zone (zone 1) under an approved density pricing zone plan as described in §§ 61.38(b)(4) and 61.49(k) of this section; or

(2) An average of at least 25 DS1-equivalent cross-connects for the transmission of switched traffic per office assigned to the lowest priced density pricing zone (zone 1).

(g) In study areas in which the telephone company has implemented density zone pricing, but no offices have been assigned to the lowest priced density pricing zone (zone 1), telephone companies may offer term and volume discounts in direct-trunked transport charges within the study area when interconnectors have taken at least 5 DS1-equivalent cross-connects for the transmission of switched traffic (as described in § 69.121(a)(1) of this chapter) in offices in the study area.

(h) In study areas in which the telephone company has not implemented density zone pricing, telephone companies may offer term and volume discounts in direct-trunked transport charges when interconnectors have taken at least 100 DS1-equivalent cross-connects for the transmission of switched traffic (as described in § 69.121(a)(1) of this chapter) in offices in the study area.

(i) Centralized equal access providers as described in Transport Rate Structure and Pricing, CC Docket No. 91–213, FCC 92–442, 7 FCC Rcd 7002 (1992), are not required to provide direct-trunked transport service. Telephone companies that do not have measurement and billing capabilities at their end offices are not required to provide direct-trunked transport services at those end offices without measurement and billing capabilities. Telephone companies that are not classified as Class A companies under § 32.11 of this chapter are required to provide direct-trunked transport service upon request. All other telephone companies shall provide a direct-trunked transport service.

[57 FR 54720, Nov. 20, 1992, as amended at 58 FR 41190, Aug. 3, 1993; 58 FR 44950, Aug. 25, 1993; 58 FR 48764, Sept. 17, 1993; 60 FR 50121, Sept. 28, 1995]

§ 69.113 Non-premium charges for MTS-WATS equivalent services.

(a) Charges that are computed in accordance with this section shall be assessed upon interexchange carriers or other persons that receive access that is not deemed to be premium access as this term is defined in § 69.105(b)(1) in lieu of carrier charges that are computed in accordance with §§ 69.105, 69.106, 69.118, 69.124, and 69.127.

(b) The non-premium charge for the Carrier Common Line element shall be computed by multiplying the premium charge for such element by .45.

(c) For telephone companies that are not subject to price cap regulation as that term is defined in § 61.3(x) of this chapter, the non-premium charge for the Local Switching element shall be computed by multiplying a hypothetical premium charge for such element by .45. The hypothetical premium charge for such element shall be computed by dividing the annual revenue requirement for each element by the sum of the projected access minutes for such period and a number that is computed by multiplying the projected non-premium minutes for such element for such period by .45. For telephone companies that are price cap carriers, the non-premium charge for the Local Switching element shall be computed by multiplying the premium charge for such element by .45. Though June 30,

1993, the non-premium charge shall be computed by multiplying the LS2 charge for such element by .45.

(d) The non-premium charge or charges for the interconnection charge element shall be computed by multiplying the corresponding premium charge or charges by .45.

(e) The non-premium charge for any BSEs in local switching shall be computed by multiplying the premium charge for the corresponding BSEs by .45.

[54 FR 6293, Feb. 9, 1989, as amended at 55 FR 42386, Oct. 19, 1990; 55 FR 50559, Dec. 7, 1990; 56 FR 33881, July 24, 1991; 57 FR 54721, Nov. 20, 1992; 59 FR 10304, Mar. 4, 1994; 64 FR 46594, Aug. 26, 1999]

§ 69.114 Special access.

(a) Appropriate subelements shall be established for the use of equipment or facilities that are assigned to the Special Access element for purposes of apportioning net investment, or that are equivalent to such equipment or facilities for companies subject to price cap regulation as that term is defined in § 61.3(x) of this chapter.

(b) Charges for all subelements shall be designed to produce total annual revenue that is equal to the projected annual revenue requirement for the Special Access element.

(c) Charges for an individual element shall be assessed upon all inter-exchange carriers that use the equipment or facilities that are included within such subelement.

(d) Charges for individual subelements shall be designed to reflect cost differences among subelements in a manner that complies with applicable Commission rules or decisions.

[48 FR 10358, Mar. 11, 1983, as amended at 48 FR 43019, Sept. 21, 1983. Redesignated at 54 FR 6293, Feb. 9, 1989, as amended at 55 FR 42386, Oct. 19, 1990; 64 FR 46594, Aug. 26, 1999]

§ 69.115 Special access surcharges.

(a) Pending the development of techniques accurately to measure usage of exchange facilities that are interconnected by users with means of interstate or foreign telecommunications, a surcharge that is expressed in dollars and cents per line termination per month shall be assessed upon users that subscribe to private

line services or WATS services that are not exempt from assessment pursuant to paragraph (e) of this section.

(b) Such surcharge shall be computed to reflect a reasonable approximation of the carrier usage charges which, assuming non-premium interconnection, would have been paid for average interstate or foreign usage of common lines, end office facilities, and transport facilities, attributable to each Special Access line termination which is not exempt from assessment pursuant to paragraph (e) of this section.

(c) If the association, carrier or carriers that file the tariff are unable to estimate such average usage for a period ending May 31, 1985, the surcharge for such period shall be twenty-five dollars (\$25) per line termination per month. As of June 30, 2000, these rates will remain and be capped at the current levels until June 30, 2005.

(d) A telephone company may propose reasonable and nondiscriminatory end user surcharges, to be filed in its federal access tariffs and to be applied to the use of exchange facilities which are interconnected by users with means of interstate or foreign telecommunication which are not provided by the telephone company, and which are not exempt from assessment pursuant to paragraph (e) of this section. Telephone companies which wish to avail themselves of this option must undertake to use reasonable efforts to identify such means of interstate or foreign telecommunication, and to assess end user surcharges in a reasonable and non-discriminatory manner.

(e) No special access surcharges shall be assessed for any of the following terminations:

(1) The open end termination in a telephone company switch of an FX line, including CCSA and CCSA-equivalent ONALs;

(2) Any termination of an analog channel that is used for radio or television program transmission;

(3) Any termination of a line that is used for telex service;

(4) Any termination of a line that by nature of its operating characteristics could not make use of common lines; and
