§ 74.633 Temporary authorizations.

(a) Special temporary authority may be granted for TV broadcast auxiliary station operation which cannot be conducted in accordance with § 74.24. Such authority will normally be granted only for operations of a temporary nature. Where operation is seen as likely on a continuing annual basis, an application for a regular authorization should be submitted.

(b) A request for special temporary authority for the operation of a television broadcast auxiliary station must be made in accordance with the procedures of § 1.931(b) of this chapter.

(c) All requests for special temporary authority of a television broadcast auxiliary station must include full particulars including: licensee's name and address, facility identification number of the associated broadcast station(s) (if any), call letters of the television broadcast STL or intercity relay station (if assigned), type and manufacturer of equipment, effective isotropic radiated power, emission, frequency or frequencies proposed for use, commencement and termination date and location of the proposed operation, and purpose for which request is made including any particular justification.

(d) A request for special temporary authority shall specify a channel or channels consistent with the provisions of § 74.602: Provided, That in the case of events of wide-spread interest and importance which cannot be transmitted successfully on these frequencies, frequencies assigned to other services may be requested upon a showing that operation thereon will not cause interference to established stations: And provided further, That in no case will a television auxiliary broadcast operation be authorized on frequencies employed for the safety of life and property.

§ 74.634 Remote control operation.

(a) A TV auxiliary station may be operated by remote control provided that
such operation is conducted in accordance with the conditions listed below:

1. The remote control system must be designed, installed, and protected so that the transmitter can only be activated or controlled by persons authorized by the licensee.

2. The remote control equipment must be maintained to ensure proper operation.

3. The remote control system must be designed to prevent inadvertent transmitter operation caused by malfunctions in the circuits between the control point and transmitter.

(b) The FCC may notify the licensee to cease or modify operation in the case of frequency usage disputes, interference or similar situations where such action appears to be in the public interest, convenience and necessity.

§ 74.635 Unattended operation.

(a) TV relay stations, TV translator relay stations, TV STL stations, and TV microwave booster stations may be operated unattended under the following conditions:

1. The transmitter must be provided with adequate safeguards to prevent improper operation.

2. The transmitter shall be so installed and protected that it is not accessible to other than duly authorized persons.

3. TV relay stations, TV STL stations, TV translator relay stations, and TV microwave booster stations used with these stations, shall be observed at the receiving end of the microwave circuit as often as necessary to ensure proper station operation by a person designated by the licensee, who must institute measures sufficient to ensure prompt correction of any condition of improper operation. However, an STL station (and any TV microwave booster station) associated with a TV broadcast station operated by remote control may be observed by monitoring the associated TV translator station’s transmitted signal.

(b) The FCC may notify the licensee to cease or modify operation in the case of frequency usage disputes, interference or similar situations where such action appears to be in the public interest, convenience and necessity.

§ 74.636 Power limitations.

(a) On any authorized frequency, transmitter peak output power and the average power delivered to an antenna in this service must be the minimum amount of power necessary to carry out the communications desired and shall not exceed the values listed in the following table. Application of this principle includes, but is not to be limited to, requiring a licensee who replaces one or more of its antennas with larger antennas to reduce its antenna input power by an amount appropriate to compensate for the increased primary lobe gain of the replacement antenna(s). In no event shall the average equivalent isotropically radiated power (EIRP), as referenced to an isotropic radiator, exceed the values specified in the following table. In cases of harmful interference, the Commission may, after notice and opportunity for hearing, order a change in the effective radiated power of this station. The table follows:

<table>
<thead>
<tr>
<th>Frequency band (MHz)</th>
<th>Maximum allowable transmitter power (W)</th>
<th>Maximum allowable EIRP (dBW)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.025 to 2.110</td>
<td>12.0</td>
<td>+45</td>
</tr>
<tr>
<td>2.450 to 2.483.5</td>
<td>12.0</td>
<td>+45</td>
</tr>
<tr>
<td>6.425 to 6.525</td>
<td>12.0</td>
<td>+35</td>
</tr>
<tr>
<td>6.875 to 7.125</td>
<td>12.0</td>
<td>+55</td>
</tr>
<tr>
<td>12.700 to 13.250</td>
<td>1.5</td>
<td>+55</td>
</tr>
<tr>
<td>17.700 to 18.600</td>
<td>+55</td>
<td></td>
</tr>
<tr>
<td>18.600 to 18.800</td>
<td>+35</td>
<td></td>
</tr>
<tr>
<td>18.800 to 19.700</td>
<td>+55</td>
<td></td>
</tr>
</tbody>
</table>

The power delivered to the antenna is limited to +3 dBW.

* Stations licensed based on an application filed before April 16, 2003, for EIRP values exceeding those specified above, may continue to operate indefinitely in accordance with the terms of their current authorizations, subject to periodic renewal.
