

(2) *Collision insurance* means insurance that reimburses the insured party for physical damage to his property resulting from automobile accidents.

(3) *Insurance cost* means the insurance premium rate, as expressed in appropriate indices, for collision and medical payment, including personal injury protection in no-fault states.

(4) *Medical payment insurance* means insurance that reimburses the insured party for medical expenses sustained by himself, his family, and his passengers in automobile accidents.

[40 FR 4918, Feb. 3, 1975, as amended at 58 FR 12550, Mar. 5, 1993]

§ 582.4 Requirements.

(a) Each automobile dealer shall make available to prospective purchasers, without charge, the information specified in § 582.5, at each location where he or she offers new vehicles for sale.

(b) Each automobile dealer shall maintain a sufficient quantity of booklets containing the information specified in § 582.5 to assure that they are available for retention by prospective purchasers.

(c) The booklets shall be revised to reflect the updated data published by NHTSA each year within 30 days of NHTSA's publication of the data in the FEDERAL REGISTER.

[58 FR 12550, Mar. 5, 1993]

§ 582.5 Information form.

The information made available pursuant to § 582.4 shall be presented in writing in the English language and in not less than 10-point type. It shall be presented in the format set forth below, and shall include the complete explanatory text and the updated data published annually by NHTSA.

MARCH [YEAR TO BE INSERTED]

COMPARISON OF DIFFERENCES IN INSURANCE COSTS FOR PASSENGER CARS, STATION WAGONS/PASSENGER VANS, PICKUPS AND UTILITY VEHICLES ON THE BASIS OF DAMAGE SUSCEPTIBILITY

The National Highway Traffic Safety Administration (NHTSA) has provided the information in this booklet in compliance with Federal law as an aid to consumers considering the purchase of a new vehicle. The

booklet compares differences in insurance costs for different makes and models of passenger cars, station wagons/passenger vans, pickups, and utility vehicles on the basis of damage susceptibility. However, it does not indicate a vehicle's relative safety.

The following table contains the best available information regarding the effect of damage susceptibility on insurance premiums. It was taken from data compiled by the Highway Loss Data Institute (HLDI) in its December [YEAR TO BE INSERTED] *Insurance Collision Report*, and reflects the collision loss experience of passenger cars, utility vehicles, light trucks, and vans sold in the United States in terms of the average loss payment per insured vehicle year for [THREE APPROPRIATE YEARS TO BE INSERTED]. NHTSA has not verified the data in this table.

The table represents vehicles' collision loss experience in relative terms, with 100 representing the average for all passenger vehicles. Thus, a rating of 122 reflects a collision loss experience that is 22 percent higher (worse) than average, while a rating of 96 reflects a collision loss experience that is 4 percent lower (better) than average. The table is not relevant for models that have been substantially redesigned for [YEAR TO BE INSERTED], and it does not include information about models without enough claim experience.

Although many insurance companies use the HLDI information to adjust the "base rate" for the collision portion of their insurance premiums, the amount of any such adjustment is usually small. It is unlikely that your total premium will vary more than ten percent depending upon the collision loss experience of a particular vehicle.

If you do not purchase collision coverage or your insurance company does not use the HLDI information, your premium will not vary at all in relation to these rankings.

In addition, different insurance companies often charge different premiums for the same driver and vehicle. Therefore, you should contact insurance companies or their agents directly to determine the actual premium that you will be charged for insuring a particular vehicle.

PLEASE NOTE: In setting insurance premiums, insurance companies mainly rely on factors that are not directly related to the vehicle itself (except for its value). Rather, they mainly consider driver characteristics (such as age, gender, marital status, and driving record), the geographic area in which the vehicle is driven, how many miles are traveled, and how the vehicle is used. Therefore, to obtain complete information about insurance premiums, you should contact insurance companies or their agents directly.
