on the total allowable catch for the applicable species not being exceeded in the previous fishing year. If the total allowable catch is exceeded in the previous fishing year, the RA will file a notification with the Office of the Federal Register to maintain the quota for the applicable species from the previous fishing year for following fishing years, unless the best scientific information available determines maintaining the quota from the previous year is unnecessary. Except for the quotas for Gulf and South Atlantic coral, the quotas include species harvested from state waters adjoining the EEZ.

(b) Quota closures. When a quota specified in this part is reached, or is projected to be reached, the Assistant Administrator will file a notification to that effect with the Office of the Federal Register. On and after the effective date of such notification, for the remainder of the fishing year, the applicable closure restrictions for such a quota, as specified in this part apply. (See the applicable annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs) sections of subparts B through V of this part for closure provisions when an applicable ACL or ACT is reached or projected to be reached).

(c) Reopening. When a sector has been closed based on a projection of the quota specified in this part, or the ACL specified in the applicable annual catch limits and accountability measures sections of subparts B through V of this part being reached and subsequent data indicate that the quota or ACL was not reached, the Assistant Administrator may file a notification to that effect with the Office of the Federal Register. Such notification may reopen the sector to provide an opportunity for the quota or ACL to be harvested.

§ 622.10 Landing fish intact—general.

This section contains requirements for landing fish intact that are broadly applicable to finfish in the Gulf EEZ and Caribbean EEZ, as specified. See subparts B through V, as applicable, for additional species specific requirements for landing fish intact.

(a) Finfish in or from the Gulf EEZ or Caribbean EEZ, except as specified in paragraphs (b) and (c) of this section, must be maintained with head and fins intact.

(b) Shark, swordfish, and tuna species are exempt from the requirements of paragraph (a) of this section.

(c) In the Gulf EEZ or Caribbean EEZ:

(1) Bait is exempt from the requirement to be maintained with head and fins intact.
§ 622.11 Bag and possession limits—
general applicability.

This section describes the general applicability provisions for bag and possession limits specified in subparts B through V of this part.

(a) Applicability. (1) The bag and possession limits apply for species/species groups in or from the EEZ. Unless specified otherwise, bag limits apply to a person on a daily basis, regardless of the number of trips in a day. Unless specified otherwise, a person is limited to a single bag limit for a trip lasting longer than one calendar day. Unless specified otherwise, possession limits apply to a person on a trip after the first 24 hours of that trip. The bag and possession limits apply to a person who fishes in the EEZ in any manner, except a person aboard a vessel in the EEZ that has on board the commercial vessel permit required under this part for the appropriate species/species group. The possession of a commercial vessel permit notwithstanding, the bag and possession limits apply when the vessel is operating as a charter vessel or headboat. A person who fishes in the EEZ may not combine a bag limit specified in subparts B through V of this part with a bag or possession limit applicable to state waters. A species/species group subject to a bag limit specified in subparts B through V of this part taken in the EEZ by a person subject to the bag limits may not be transferred at sea, regardless of where such transfer takes place, and such fish may not be transferred in the EEZ. The operator of a vessel that fishes in the EEZ is responsible for ensuring that the bag and possession limits specified in subparts B through V of this part are not exceeded.

(b) [Reserved]

(78 FR 22952, Apr. 17, 2013, as amended at 79 FR 19494, Apr. 9, 2014)

§ 622.12 Annual catch limits (ACLs) and accountability measures (AMs) for Caribbean island management areas/Caribbean EEZ.

(a) If landings from a Caribbean island management area, as specified in Appendix E to this part, except for landings of queen conch (see §622.491(b)), or landings from the Caribbean EEZ for tilefish and aquarium trade species, are estimated by the SRD to have exceeded the applicable ACL, as specified in paragraph (a)(1) of this section for Puerto Rico management area species or species groups, paragraph (a)(2) of this section for St. Croix management area species or species groups, paragraph (a)(3) of this section for St. Thomas/St. John management area species or species groups, paragraph (a)(4) of this section for the Caribbean EEZ, the AA will file a notification with the Office of the Federal Register, at or near the beginning of the following fishing year, to reduce the length of the fishing season for the applicable species or species groups that year by the amount necessary to ensure landings do not exceed the applicable ACL. If NMFS determines the
