with the monkfish DAS exemption request before issuance of the EFP application will be considered; and

(C) For EFP applications that require other regulatory exemptions that extend beyond the scope of the analysis contained in the Monkfish FMP, subsequent amendments, or framework adjustments, applicants may be required to provide additional analysis of the impacts of the requested exemptions before issuance of an EFP will be considered.

(ii) Monkfish DAS exemption requests shall be reviewed and approved by the Regional Administrator in the order in which they are received.

EDITORIAL NOTE: For Federal Register citations affecting §648.92, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 648.93 Monkfish minimum fish sizes.

(a) General provisions. All monkfish caught by vessels issued a valid Federal monkfish permit must meet the minimum fish size requirements established in this section.

MINIMUM FISH SIZES

<table>
<thead>
<tr>
<th>Total Length</th>
<th>Tail Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>17 inches (43.2 cm)</td>
<td>11 inches (27.9 cm)</td>
</tr>
</tbody>
</table>

(b) The minimum fish size applies to the whole fish (total length) or to the tail of a fish (tail length) at the time of landing. Fish or parts of fish, with the exception of cheeks and livers, must have skin on while possessed on board a vessel and at the time of landing in order to meet minimum size requirements. “Skin on” means the entire portion of the skin normally attached to the portion of the fish or fish parts possessed. Monkfish tails are measured from the anterior portion of the fourth cephalic dorsal spine to the end of the caudal fin. Any tissue anterior to the fourth dorsal spine is ignored. If the fourth dorsal spine or the tail is not intact, the minimum size is measured between the most anterior vertebra and the most posterior portion of the tail.

§ 648.94 Monkfish possession and landing restrictions.

(a) General. Monkfish may be possessed or landed either as tails only, tails with associated heads possessed separately, or in whole form (head on and gutted), or any combination of the three provided the weight of monkfish heads on board does not exceed 1.91 times the weight of monkfish tails on board. When any combination of tails and whole fish are possessed or landed, the possession or landing limit shall be based on tail weight where all whole monkfish (head on and gutted) are converted to tail weight using the conversion factor of 2.91. For example, whole weight is converted to tail weight by dividing the whole weight by 2.91. Conversely, tail weight is converted to whole weight by multiplying the tail weight by 2.91. If heads only are possessed in combination with tails, the possession or landing limit for monkfish heads may not exceed 1.91 times the tail weight of fish on board, excluding any whole monkfish. The allowed amount of head weight is determined by multiplying the tail weight by 1.91. For example a vessel possessing 100 lb (45 kg) of tail weight may possess an additional 191 lb (87 kg) of monkfish heads (100 × 1.91 = 191). A vessel may not possess heads only without possessing the equivalent weight of tails allowed by using the conversion factor.

(b) Vessels issued limited access monkfish permits—(1) Vessels fishing under the monkfish DAS program in the NFMA—(i) Category A and C vessels. Limited access monkfish Category A and C vessels that fish under a monkfish DAS exclusively in the NFMA may land up to 1,250 lb (567 kg) tail weight or 3,638 lb (1,650 kg) whole weight of monkfish per DAS (or any prorated combination of tail weight and whole weight based on the conversion factor for tail weight to whole weight of 2.91). For every 1 lb (0.45 kg) of tail only weight landed, the vessel may land up to 1.91 lb (0.87 kg) of
