§ 679.63  
(2) What information must be included on a contract fishing application? The following information must be included on a contract fishing application:  
(i) Co-op name(s). The names of the cooperative or cooperatives that wish to contract with a non-member vessel.  
(ii) Designated representative(s). The names and signatures of the designated representatives for the cooperatives that wish to contract with a non-member vessel and the vessel’s home cooperative.  
(iii) Vessel name. The name and AFA permit number of the contracted vessel.  
(iv) Vessel owner. The name and signature of the owner of the contracted vessel.  
(v) Harvest schedule. A completed harvest schedule showing how all catch and any overages by the contracted vessel will be allocated between the contracting cooperative (or cooperatives) and the contract vessel’s home cooperative. In the event that multiple cooperatives are jointly contracting with a non-member vessel, the harvest schedule must clearly specify how all catch and any overages will be allocated among the various cooperatives.  
(3) What vessels are eligible to conduct contract fishing on behalf of an inshore cooperative? Only AFA catcher vessels with an inshore fishing endorsement that are members of an inshore cooperative may conduct contract fishing on behalf of another inshore cooperative.  
(4) Who must be informed? A cooperative that has contracted with a non-member vessel to harvest a portion of its inshore pollock allocation must inform any AFA inshore processors to whom the vessel will deliver pollock prior to the start of fishing under the contract.  
(5) How must contract fishing be reported to NMFS? An AFA inshore processor that receives pollock harvested by a vessel under contract to a cooperative must report the delivery to NMFS on the electronic delivery report by using the co-op code of the vessel’s home cooperative.  

50 CFR Ch. VI (10–1–14 Edition)
Fishery Conservation and Management

§ 679.64 Harvesting sideboard limits in other fisheries.

(a) Harvesting sideboards for listed AFA catcher/processors. The Regional Administrator will restrict the ability of listed AFA catcher/processors to engage in directed fishing for non-pollock groundfish species to protect participants in other groundfish fisheries from adverse effects resulting from the AFA and from fishery cooperatives in the BSAI as follows:

(1) How will groundfish sideboard limits for AFA listed catcher/processors be calculated? Except for Aleutian Islands pollock and BSAI Pacific cod, the Regional Administrator will establish annual AFA catcher/processor harvest limits for each groundfish species or species group in which a TAC is specified for an area or subarea of the BSAI as follows:

(i) Aleutian Islands Pacific ocean perch. (A) The Aleutian Islands Pacific ocean perch harvest limit will be equal to the 1996 through 1997 aggregate retained catch of Aleutian Islands Pacific ocean perch by catcher/processors listed in Sections 208(e)(1) through (20) and 209 of the AFA in non-pollock target fisheries divided by the sum of the Aleutian Islands Pacific ocean perch catch in 1996 and 1997 multiplied by the remainder of the Aleutian Islands Pacific ocean perch TAC after the subtraction of the CDQ reserve under §679.20(b)(1)(i)(C) in the year in which the harvest limit will be in effect.

(B) If the amount of Pacific ocean perch calculated under paragraph (a)(1)(i)(A) of this section is determined by the Regional Administrator to be insufficient to meet bycatch needs of AFA catcher/processors in other directed fisheries for groundfish, the Regional Administrator will prohibit directed fishing for Aleutian Islands Pacific ocean perch by AFA catcher/processors and establish the sideboard amount equal to the amount of Aleutian Islands Pacific ocean perch caught by AFA catcher/processors incidental
