assigning different production expectations to different fields.

(2) The coverage period for perennial and other crops covered by this subpart begins on January 1 of the relevant crop year and ends on December 31 of that year.

[71 FR 52739, Sept. 7, 2006, as amended at 78 FR 21019, Apr. 9, 2013]

§ 1437.503 Covered losses and record-keeping requirements for covered tropical crops.

(a) Prevented planting coverage is not available for covered tropical crops, other than in Hawaii, Puerto Rico, and other areas approved by the Deputy Administrator, except as approved by the Deputy Administrator in special cases.

(b) Except in Hawaii, Puerto Rico, and other areas approved by the Deputy Administrator in individual cases, eligible causes of loss for covered tropical crops will only include hurricanes, typhoons, and named tropical storms.

(c) Producers who have applied for coverage on covered tropical crops must maintain for the full coverage period contemporaneous records. Contemporaneous records are those created at the time of planting and harvesting of the crop for which the application for coverage is filed. In this regard:

(1) Producers may be selected on a random or targeted basis for compliance review with this requirement and any other requirements that may apply to this program.

(2) A failure to maintain acceptable contemporaneous records throughout the crop year may be treated by CCC as grounds of ineligibility for benefits under this part.

[71 FR 52739, Sept. 7, 2006, as amended at 78 FR 21019, Apr. 9, 2013]

§ 1437.504 Notice of loss for covered tropical crops.

(a) The provisions of §1437.10(c) regarding late filed notice of loss do not apply to covered tropical crops.

(b) Where a notice of loss for covered tropical crops is provided according to §1437.10, producers must provide records maintained according to §1437.503(c) of the:

(1) Number of acres or other basis of measurement, as applicable, of the crop from which production could be achieved existing on the day the eligible natural disaster occurred or, for prolonged natural disasters, such as a drought and similar damage where applicable, existing on the day the notice of loss is filed.

(2) Amount, including zero, as applicable, of production harvested, before or after the disaster, from those crop plantings (damaged or undamaged) which were in existence on the farm at the time of the disaster including production from the covered plantings (in existence at the time of the loss event) that may occur after the loss event even when, to the extent provided for in paragraph (c) of this section, the harvest occurs after the end of the crop year. Crop acreage of the covered crop that is in existence at the time of the loss event that can be harvested after the eligible natural disaster must be harvested, or continue to be harvested, and the harvested acres and production reported to FSA according to this subpart, except that for perennial crops the requirement ends with the end of the crop year. For non-perennial crops the obligation to harvest ends with the end of the life-cycle for the plantings that were in existence at the time of the loss event. In this regard:

(i) Except as otherwise determined by FSA, such production, before or after the loss event, will be taken into account in computing eligibilities.

(ii) Production that must be reported under paragraph (b)(2)(i) of this section includes, except in the case of perennial plants, all production irrespective of whether the production occurs in the same crop year.

(iii) For perennial plants, only production in the same crop year must be reported.

(iv) All production that must be reported for covered tropical crops will, except as specified by the Deputy Administrator, be taken into account in the loss determinations made under this part. The producer is obligated to maximize that production. That is, harvesting and other production activities for the plants in the ground at the
