In addition to a business plan and operations plan, a request for EE program approval must include analytical support documentation that demonstrates the program meets the requirements of § 1710.303 and assures RUS of the operational and financial integrity of the EE Program. This documentation must include, but is not necessarily limited to, the following:

(a) A comparison of the utility’s projected annual growth in demand after incorporating the EE Program together with an updated baseline forecast on file with RUS, where each includes an estimate of energy consuming devices used by customers in the service territory and a specific time horizon as determined by the utility for measuring the performance objectives established by them for the EE Program;

(b) Demonstration that the required periods of performance under § 1710.405(c) can reasonably be expected to be met;
to visit the applicant and discuss its financial needs and eligibility. Borrowers that have outstanding loans should contact their assigned RUS general field representative (GFR) or, in the case of a power supply borrower, the Director, Power Supply Division. Borrowers may consult with RUS field representatives and headquarters staff, as necessary.

(b) Before submitting an application for an insured loan the borrower shall ascertain from RUS the amount of supplemental financing required, as set forth in §1710.110. If the borrower is applying for either a municipal rate loan subject to the interest rate cap or a hardship rate loan, the application must provide a preliminary breakdown of residential consumers either by county or by census tract. Final data must be included with the application. See §1710.401(a)(8).
