(c) **Preference compliance date.** No later than June 11, 2014, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased engine crankcase oils. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased engine crankcase oils.

(d) **Determining overlap with an EPA-designated recovered content product.** Qualifying products within this item may overlap with the EPA-designated recovered content product: Re-refined lubricating oils. USDA is requesting that manufacturers of these qualifying biobased products provide information on the USDA Web site of qualifying biobased products about the intended uses of the product, information on whether or not the product contains any recovered material, in addition to biobased ingredients, and performance standards against which the product has been tested. This information will assist Federal agencies in determining whether or not a qualifying biobased product overlaps with EPA-designated re-refined lubricating oil products and which product should be afforded the preference in purchasing.

NOTE TO PARAGRAPH (d): Engine crankcase oils within this designated product category can compete with similar re-refined lubricating oils. Under the Resource Conservation and Recovery Act of 1976, section 6092, the U.S. Environmental Protection Agency designated re-refined lubricating oil products containing recovered materials as products for which Federal agencies must give preference in their purchasing programs. The designation can be found in the Comprehensive Procurement Guideline, 40 CFR 247.17.

§ 3201.103 **Gasoline fuel additives.**

(a) **Definition.** Chemical agents added to gasoline to increase octane levels, improve lubricity, and provide engine cleaning properties to gasoline-fired engines.

(b) **Minimum biobased content.** The Federal preferred procurement product must have a minimum biobased content of at least 92 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) **Preference compliance date.** No later than June 11, 2014, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased gasoline fuel additives. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased gasoline fuel additives.

[78 FR 34872, June 11, 2013]

§ 3201.104 **Metal cleaners and corrosion removers.**

(a) **Definition.** (1) Products that are designed to clean and remove grease, oil, dirt, stains, soils, and rust from metal surfaces.

(2) Metal cleaners and corrosion removers for which Federal preferred procurement applies are:

(i) **Corrosion removers.** Products that are designed to remove rust from metal surfaces through chemical action.

(ii) **Stainless steel cleaners.** Products that are designed to clean and remove grease, oil, dirt, stains, and soils from stainless steel surfaces.

(iii) **Other metal cleaners.** Products that are designed to clean and remove grease, oil, dirt, stains, and soils from metal surfaces other than stainless steel.

(b) **Minimum biobased content.** The minimum biobased content for all metal cleaners and corrosion removers shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product. The applicable minimum biobased contents for the Federal preferred procurement products are:

(1) **Corrosion removers**—71 percent.

(2) **Stainless steel cleaners**—75 percent.

(3) **Other metal cleaners**—56 percent.

(c) **Preference compliance date.** No later than June 11, 2014, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased metal cleaners and corrosion removers.
