(3) The lender must notify the Agency when the property has not been sold within 30 days of the expiration of the permissible marketing period. If the REO remains unsold at the end of the permissible marketing period, the Agency will order a liquidation value appraisal and apply an acquisition and management resale factor to estimate holding and disposition cost. Interest expenses accrued beyond 90 days of the foreclosure sale date or expiration of any redemption period, whichever is later, will be the responsibility of the lender and not covered by the guarantee.

(g) Debt settlement reporting. The lender must report to the IRS and all national credit reporting repositories any debt settled through liquidation.

§ 3555.307 Assistance in natural disasters.

(a) Policy. Servicers must utilize general procedures available under this subpart for servicing borrowers affected by natural disasters, as supplemented by Rural Development, to minimize delinquencies and avoid foreclosure.

(b) Evaluating the damage. Servicers are expected to inspect a security property whenever they have reason to believe the property has been damaged.

(c) Special relief measures. The servicer must evaluate on an individual case basis a mortgage that is (or becomes) seriously delinquent as the result of the borrower’s incurring extraordinary damages or expenses related to the natural disaster. The servicer should document its individual mortgage file regarding all servicing actions taken during this time period. The lender must consider all special relief alternatives for disaster assistance available to the borrower prior to suspending collection and foreclosure activities. Servicing actions suspended as a result of the natural disaster will expire 90 days from the declaration date of the natural disaster, unless otherwise extended by the Agency.

(d) Insurance claim settlements. Prior to release of hazard insurance proceeds because of damage caused by a natural disaster, servicers must complete a cost and benefit analysis on a case-by-case basis to determine if the property can be repaired or rebuilt. The servicer’s actions must be based on the status of the mortgage, the amount of insurance proceeds, and the length of time required repairing or reconstructing the property, and the market conditions in the area. If the property will not be repaired or rebuilt, the insurance proceeds must be applied to the unpaid principal loan balance.

§§ 3555.308–3555.349 [Reserved]

§ 3555.350 OMB control number.

The report and recordkeeping requirements contained in this subpart are currently with the Office of Management and Budget under review and awaiting approval.
§ 3555.351 Loan guarantee limits.

(a) Original loan amount. For the purposes of this section, the term “Original Loan Amount” means the original promissory note amount minus any loans funds not actually disbursed to the borrower or on behalf of the borrower at the time the SFHGLP loan was made or thereafter.

(b) Maximum loss payment. The maximum payment for a loss sustained by the lender under the SFHGLP is the lesser of:

(1) 90 percent of the Original Loan Amount; or

(2) 100 percent of any loss equal to or less than 35 percent of the Original Loan Amount plus 85 percent of any remaining loss up to 65 percent of the Original Loan Amount.

§ 3555.352 Loss covered by the guarantee.

Subject to § 3555.351, the loss claim payment will be calculated as the difference between the Total Indebtedness on the loan and the Net Recovery Value calculated according to § 3555.353. The Total Indebtedness on the loan includes:

(a) Principal balance. The unpaid principal balance;

(b) Accrued interest. Accrued interest at the guaranteed loan note rate from the last day interest was paid by the borrower to the settlement date, as defined at § 3555.10;

(c) Additional interest. Additional interest on the unsatisfied principal accrued from the settlement date to the date the claim is paid, but not more than 90 days from the settlement date;

(d) Protective advances. Principal and interest for protective advances, as described in § 3555.303; and

(e) Liquidation costs. Reasonable and customary liquidation costs, such as attorney fees and foreclosure costs. Annual fees advanced by the lender to the Agency are ineligible for reimbursement when calculating the loss payment, as otherwise provided by the Agency.

§ 3555.353 Net recovery value.

The net recovery value of the property is determined differently for properties that have been sold than for properties that remain in the lender’s inventory at the time the loss claim is filed.

(a) Actual net recovery value. For a property that has been sold when a loss claim is filed, net recovery value is calculated as follows:

(1) The proceeds from the sale plus any other amounts recovered, minus

(2) The amount of actual liquidation and disposition costs provided those costs are reasonable and customary for the area. Costs incurred by in-house staff may not be included.

(b) Anticipated net recovery value. For a property that has not sold when a loss claim is filed, net recovery value is calculated as follows:

(1) The value of the property as determined by an Agency liquidation appraisal. The value should be determined as if the property would be sold without the market exposure it would ordinarily receive in a normal transaction, or within 90 days, minus;

(2) The amount of actual liquidation expenses and estimated disposition costs that are reasonable and customary for the area. Costs incurred by in-house staff may not be included.

(i) Actual liquidation expenses are the amount of attorney fees and costs, etc. incurred to acquire title to the property.

(ii) Estimated disposition costs are calculated by Rural Development using reasonable and customary cost factors appropriate for the area (available in any Rural Development office).

§ 3555.354 Loss claim procedures.

Rural Development may offer authorized lenders a web-based automated system to calculate, submit or update a loss claim request and/or future recovery subject to the requirements of § 3555.356. Manual paper loss claims may continue to be submitted by some lenders. Lenders must make a thorough review of all receipts and expenses prior to submitting a loss claim request. Supplemental adjustments to the initial claim may be considered, as provided by the Agency.
(a) Sold property. For property that has been sold, the lender must submit a loss claim within 45 calendar days of the sale. Late claims made beyond this period of time may be rejected or reduced by Rural Development. Instructions and forms may be obtained from Rural Development.

(b) REO. If the property has not been sold, the lender must take the following steps:
   (1) Notify Rural Development that the property has not been sold so that Rural Development may request an appraisal.
   (i) If the property is not located on American Indian restricted land, the lender must notify Rural Development if the property has not been sold within 9 months of foreclosure, or from the end of any applicable redemption period, whichever is later.
   (ii) If the property is located on American Indian restricted land, the lender must notify Rural Development if the property has not been sold within 12 months of foreclosure, or from the end of any redemption period, whichever is later.

(2) Upon notification that the property has not been sold, Rural Development will obtain an appraisal at the Agency’s expense and provide a liquidation value to the lender. The lender must submit a loss claim within 30 calendar days of receiving the liquidation value from Rural Development. Late claims made beyond this period of time will be rejected.

c) Deficiency judgments. The lender must enforce any judgment for which there are current prospects of collection before submitting a loss claim, and amounts collected must be applied against the outstanding debt. Rural Development will process the loss claim if there are no current prospects for collection.

§ 3555.355 Reducing or denying the claim.

(a) Determination of loss payment. Subject to the requirements of § 3555.108, if Rural Development determines that the amount of the loss was increased due to the lender’s failure to comply with the conditions of the Loan Note Guarantee, the Agency may reduce or deny any loss claim by the portion of the loss determined was caused by the lender’s action or failure to act. The circumstances under which loss claims may be denied or reduced include, but are not limited to, the following lender actions:
   (1) Failure to adhere to required servicing and liquidation procedures as set forth in Agency regulations and guidance, including the payment of real estate taxes or hazard insurance when due;
   (2) Failure to report defaulted loans to Rural Development within required timeframes;
   (3) Failure to ensure that the security property is adequately maintained during liquidation;
   (4) Delay in filing a loss claim;
   (5) Claiming unauthorized expenses;
   (6) Providing unauthorized assistance;
   (7) Failure to obtain the required security or maintain the security position;
   (8) Violating usury laws;
   (9) Negligence, gross negligence or misrepresentation; or
   (10) Committing fraud, or failing to report knowledge of fraud or false information.

(b) Disputes. If the lender disputes the loss claim amount determined by Rural Development, Rural Development will pay the undisputed portion of the loss claim, and the lender may appeal the decision in accordance with § 3555.4.

§ 3555.356 Future recovery.

The lender must notify the Agency upon sale of an REO property. If the lender recovers additional funds after the loss claim has been paid, the proceeds will be distributed so that the total loss to the Government is equivalent to the loss that would have been incurred had the recovered amount been included in the initial loss calculation.

§§ 3555.357–3555.399 [Reserved]

§ 3555.400 OMB control number.

The report and recordkeeping requirements contained in this subpart are currently with the Office of Management and Budget under review and awaiting approval.
PART 3560—DIRECT MULTI-FAMILY HOUSING LOANS AND GRANTS

Subpart A—General Provisions and Definitions

Sec.
3560.1 Applicability and purpose.
3560.2 Civil rights.
3560.3 Environmental requirements.
3560.4 Compliance with other Federal requirements.
3560.5 State, local or tribal laws.
3560.6 Borrower responsibility and requirements.
3560.7 Delegation of responsibility.
3560.8 Administrator’s exception authority.
3560.9 Reviews and appeals.
3560.10 Conflict of interest.
3560.11 Definitions.
3560.12–3560.49 [Reserved]
3560.50 OMB control number.

Subpart B—Direct Loan and Grant Origination

3560.51 General.
3560.52 Program objectives.
3560.53 Eligible use of funds.
3560.54 Restrictions on the use of funds.
3560.55 Applicant eligibility requirements.
3560.56 Processing section 515 housing proposals.
3560.57 Designated places for section 515 housing.
3560.58 Site requirements.
3560.59 Environmental requirements.
3560.60 Design requirements.
3560.61 Loan security.
3560.62 Technical, legal, insurance, and other services.
3560.63 Loan limits.
3560.64 Initial operating capital contribution.
3560.65 Reserve account.
3560.66 Participation with other funding or financing sources.
3560.67 Rates and terms for section 515 loans.
3560.68 Permitted return on investment (ROI).
3560.69 Supplemental requirements for congregate housing and group homes.
3560.70 Supplemental requirements for manufactured housing.
3560.71 Construction financing.
3560.72 Loan closing.
3560.73 Subsequent loans.
3560.74 Loan for final payments.
3560.75–3560.99 [Reserved]
3560.100 OMB control number.

Subpart C—Borrower Management and Operations Responsibilities

3560.101 General.
Pt. 3560
3560.302 Accounting, bookkeeping, budgeting, and financial management systems.
3560.303 Housing project budgets.
3560.304 Initial operating capital.
3560.305 Return on investment.
3560.306 Reserve account.
3560.307 Reports.
3560.308 Annual financial reports.
3560.309 Advancement (loan) of funds to a RRH project by the owner, member of the organization, or agent of the owner.
3560.3010–3560.349 [Reserved]
3560.350 OMB control number.

Subpart H—Agency Monitoring
3560.351 General.
3560.352 Agency monitoring scope, purpose, and borrower responsibilities.
3560.353 Scheduling of on-site monitoring reviews.
3560.354 Borrower response to monitoring review notifications.
3560.355–3560.399 [Reserved]
3560.400 OMB control number.

Subpart I—Servicing
3560.401 General.
3560.402 Loan payment processing.
3560.403 Account servicing.
3560.404 Final loan payments.
3560.405 Borrower organizational structure or ownership interest changes.
3560.406 MFH ownership transfers or sales.
3560.407 Sales or other disposition of security property.
3560.408 Lease of security property.
3560.409 Subordinations or junior liens against security property.
3560.410 Consolidations.
3560.411–3560.449 [Reserved]
3560.450 OMB control number.

Subpart J—Special Servicing, Enforcement, Liquidation, and Other Actions
3560.451 General.
3560.452 Monetary and non-monetary defaults.
3560.453 Workout agreements.
3560.454 Special servicing actions related to housing operations.
3560.455 Special servicing actions related to loan accounts.
3560.456 Liquidation.
3560.457 Negotiated debt settlement.
3560.458 Special property circumstances.
3560.459 Special borrower circumstances.
3560.460 Double damages.
3560.461 Enforcement provisions.
3560.462 Money laundering.
3560.463 Obstruction of Federal audits.
3560.464–3560.469 [Reserved]
3560.470 OMB control number.

7 CFR Ch. XXXV (1–1–14 Edition)

Subpart K—Management and Disposition of Real Estate Owned (REO) Properties
3560.501 General.
3560.502 Tenant notifications and assistance.
3560.503 Disposition of REO property.
3560.504 Sales price and bidding process.
3560.505 Agency loans to finance purchases of REO properties.
3560.506 Conversion of single family type REO property to MFH use.
3560.507–3560.549 [Reserved]
3560.550 OMB control number.

Subpart L—Off-Farm Labor Housing
3560.551 General.
3560.552 Program objectives.
3560.553 Loan and grant purposes.
3560.554 Use of funds restrictions.
3560.555 Eligibility requirements for off-farm labor housing loans and grants.
3560.556 Application requirements and processing.
3560.557 [Reserved]
3560.558 Site requirements.
3560.559 Design and construction requirements.
3560.560 Security.
3560.561 Technical, legal, insurance and other services.
3560.562 Loan and grant limits.
3560.563 Initial operating capital.
3560.564 Reserve accounts.
3560.565 Participation with other funding or financing sources.
3560.566 Loan and grant rates and terms.
3560.567 Establishing the profit base on initial investment.
3560.568 Supplemental requirements for seasonal off-farm labor housing.
3560.569 Supplemental requirements for manufactured housing.
3560.570 Construction financing.
3560.571 Loan and grant closing.
3560.572 Subsequent loans.
3560.573 Rental assistance.
3560.574 Operating assistance.
3560.575 Rental structure and changes.
3560.576 Occupancy restrictions.
3560.577 Tenant priorities for labor housing.
3560.578 Financial management of labor housing.
3560.579 Servicing off-farm labor housing.
3560.580–3560.599 [Reserved]
3560.600 OMB control number.

Subpart M—On-Farm Labor Housing
3560.601 General.
3560.602 Program objectives.
3560.603 Loan purposes.
3560.604 Restrictions on use of funds.
3560.605 Eligibility requirements.
3560.606 Application requirements and processing.
§ 3560.1 Applicability and purpose.

(a) This part sets forth requirements, policies, and procedures for multi-family housing (MFH) direct loan and grant programs to serve eligible very-low, low- and moderate income households. The programs covered by this part are authorized by title V of the Housing Act of 1949 and are:

(1) Section 515 Rural Rental Housing, which includes congregate housing, group homes, and Rural Cooperative Housing. Section 515 loans may be made to finance multi-family units in rural areas as defined in §3560.11.

(2) Sections 514 and 516 Farm Labor Housing loans and grants. Housing under these programs may be built in any area with a need and demand for housing for farm workers.

(3) Section 521 Rental Assistance. A project-based tenant rent subsidy which may be provided to Rural Rental Housing and Farm Labor Housing facilities.

(b) The programs covered by this part provide economically designed and constructed rural rental, cooperative, and farm labor housing and related facilities operated and managed in an affordable, decent, safe, and sanitary manner.
§ 3560.2

(c) Internal Agency procedures containing details for Agency processing under these regulations can be found in the program handbooks, available in any Rural Development office, or from the Rural Development Web site.

§ 3560.2 Civil rights.

(a) As per the Fair Housing Act, as amended and section 504 of the Rehabilitation Act of 1973, all actions taken by recipients of loans and grants will be conducted without regard to race, color, religion, sex, familial status, national origin, age, or disability. These actions include any actions in the sale, rental, or advertising of the dwellings, in the provision of brokerage services, or in residential real estate transactions involving Rural Housing Service (RHS) assistance. It is unlawful for a borrower or grantee or an agent of a borrower or grantee:

(1) To refuse to make reasonable accommodations in rules, policies, practices, or services that would provide a person with a disability an opportunity to use or continue to use a dwelling unit and all public and common use areas; or

(2) To refuse to provide a reasonable accommodation at the borrower’s expense that would not cause an undue financial or administrative burden, or to refuse to allow an individual with a disability to make reasonable modifications to the unit at their own expense with the understanding that the owner may require the tenant to return the unit to its original condition when the unit is vacated by the tenant making the modifications (see §3560.104(c)).

(b) Borrowers and grantees must take reasonable steps to ensure that Limited English Proficiency (LEP) persons receive the language assistance necessary to afford them meaningful access to USDA programs and activities, free of charge. Failure to ensure that LEP persons can effectively participate in or benefit from federally-assisted programs and activities may violate the prohibition under Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d and Title VI regulations against national origin discrimination. USDA has issued guidance to clarify the responsibilities of recipients and subrecipients who receive financial assistance from USDA and to assist them in fulfilling their responsibilities to LEP persons under Title VI of the Civil Rights Act, as amended, and implementing regulations.

(c) Any tenant/member or prospective tenant seeking occupancy in or use of facilities financed by the Agency who believes he or she is being discriminated against because of race, color, religion, sex, familial status, national origin, or disability may file a complaint in person with, or by mail to the U. S. Department of Agriculture’s Office of Civil Rights, Room 326–W, Whitten Building, 14th and Independence Avenue, Washington, DC 20410. Complaints received by Agency employees must be directed to the National Office Civil Rights staff through the State Civil Rights Manager/Coordinator.

(d) Borrowers or grantees that fail to comply with the requirements of federal civil rights requirements are subject to sanctions authorized by law. The following are the major civil rights laws affecting multifamily housing loan and grant programs:

(1) Equal Credit Opportunity Act (ECOA).

(2) Title VI of the Civil Rights Act of 1964.

(3) Title VIII of the Civil Rights Act of 1968.

(6) Title IX of the Education Amendments of 1972.

§ 3560.3 Environmental requirements.

RHS will consider environmental impacts of proposed housing as equal with economic, social, and other factors. By working with applicants, Federal agencies, Indian tribes, state and local governments, interested citizens, and organizations, RHS will formulate actions that advance program goals in a manner that protects, enhances, and restores environmental quality. Loan and grant processing and servicing actions taken by RHS under this part are subject to an environmental review conducted in accordance with 7 CFR part 1940, subpart G or any successor regulation.
§ 3560.4 Compliance with other Federal requirements.

RHS is responsible for ensuring that the application is in compliance with all applicable Federal requirements, including the following specific requirements:

(a) Intergovernmental review. 7 CFR part 3015, subpart V, or any successor regulation, including the Agency supplemental administrative instruction, RD Instruction 1970-I, ‘Intergovernmental Review,’ available in any Agency office or on the Agency’s Web site.

(c) Clean Air Act and Water Pollution Control Act Requirements. For any contract, all applicable standards, orders or requirements issued under section 306 of the Clean Air Act; section 508 of the Clean Water Act, Executive Order 11738, and 40 CFR part 32.

(d) Historic preservation requirements. The provisions of 7 CFR part 1901, subpart F or any successor regulation.

(e) Lead-based paint requirements. The applicable provisions of 24 CFR part 35, subparts A through D, J, and R, as published by the U.S. Department of Housing and Urban Development.

§ 3560.5 State, local or tribal laws.

Borrowers must comply with all applicable state and local laws, and laws of Federally-recognized Indian tribes to the extent they are not inconsistent with this part.

§ 3560.6 Borrower responsibility and requirements.

(a) Borrower responsibilities and requirements specified in this part may be carried out by an individual or entity designated by the borrower to act on behalf of the borrower such as a resident manager or management agent. Ultimate accountability to the Agency, however, is with the borrower whether or not the borrower designated another person or entity to act on the borrower’s behalf.

(b) Borrowers who have not executed a loan agreement, and who were not required to execute a loan agreement by the regulations in effect at the time of their loan closing are exempt from the requirements of subparts D through G of this part, as long as the borrower is not in default of any applicable requirement, security instrument, payment, or any other agreement with the Agency. Such borrowers must provide evidence of tenant income eligibility in accordance with §3560.152(a), except in Farm Labor Housing where the tenant is not paying shelter cost.

§ 3560.7 Delegation of responsibility.

The RHS Administrator may delegate, on an individual or other basis, any decision-making responsibility for Agency programs, unless otherwise noted.

§ 3560.8 Administrator’s exception authority.

The RHS Administrator may make an exception to any provision of this part or address any omissions provided that the exception is consistent with the applicable statute, does not adversely affect the interest of the Federal Government, and does not adversely affect the accomplishment of the purposes of the MFH programs or application of the requirement would result in undue hardship on the tenants. Exception requests presented to the RHS Administrator must have the concurrence of a Rural Development State Director or a Deputy Administrator for MFH.

§ 3560.9 Reviews and appeals.

Rural Housing Service decisions may be appealed pursuant to 7 CFR part 11.

§ 3560.10 Conflict of interest.

To reduce the potential for employee conflict of interest, all RHS activities will be conducted in accordance with 7 CFR part 1900, subpart D.

§ 3560.11 Definitions.

Unless otherwise noted, terms listed in this part shall be defined as follows: Administrator. The head of the Rural Housing Service who reports directly
to the Under Secretary for Rural Development in the U.S. Department of Agriculture.

Agency. The Rural Housing Service within the Rural Development mission area of the U.S. Department of Agriculture.

Amortization. Payment of debt in regular, periodic installments of principal and interest, as opposed to interest only payments.

Applicant. An individual, partnership or limited partnership, consumer cooperative, trust, state or local public agency, corporation, limited liability company, nonprofit organization, Indian tribe, association, or other entity that will be the owner of the project for which an application for funding from the Agency is submitted.

Appraisal. As used by the Agency, a written report developed by a qualified appraiser as established in subpart P that concludes an opinion of value(s) for a specific real property.

Assistance. Financial assistance in the form of a loan, grant, interest credit, or rental assistance.

Association of farmers. Two or more farmers acting as a single legal entity. Association members may include the individual members of farming partnerships or corporations.

Borrower. An individual, partnership or limited partnership, consumer cooperative, trust, state or local public agency, corporation, limited liability company, nonprofit organization, Indian tribe, association, or other entity that has received a loan from the Agency.

Capital Needs Assessment. A Capital Needs Assessment is designed to capture and report on the immediate and the long-range capital needs of an individual property. It includes attention to site features, mechanical and electrical systems, building exterior and common area systems, and dwelling unit interiors.

Caretaker. An individual employed by a borrower or a management agent to handle routine interior and exterior maintenance and upkeep of a MFHMFP project.

Congregate housing. A housing program authorized by section 515 of the Housing Act of 1949 which provides housing for elderly persons, individuals with disabilities, and families who require some supervision and central services but are otherwise able to care for themselves. Such housing does not include any licensed healthcare facility.

Consumer cooperative. A corporation organized under the cooperative laws of a state or Federally recognized Indian tribe that will own and operate the housing on a cooperative basis solely for the benefit of its members.

Conventional rents for comparable units (CRCU). Market rents for comparable rental units in conventional housing located in the same geographic area as a particular Section 514, 515, or 516 project.

Current appraisal. An appraisal with a report date that is no more than 1 year old.

Daily Interest Accrual System (DIAS). A system where interest is charged daily on outstanding principal. Level loan payments are made by the borrower. The amount of interest due on any date is equal to the unpaid daily interest that has accrued.

Default. Failure by a borrower to meet significant monetary or non-monetary obligations or terms of a loan, grant, or other agreement with the Agency which remain unpaid or unperformed for more than 30 days after the date such obligation is due or required to be paid or performed, or within time periods specified in notices of compliance violations.

Disability. The term disability is considered equivalent to the term handicap. Eligibility requirements for fully accessible units are contained in §§3560.154(g)(1)(i) and 3560.155(b). A person is considered to have a disability if either of the following two situations occur:

(1) As defined in section 501(b) of the Housing Act of 1949. The person is the head of household (or his or her spouse) and is determined to have an impairment which:

(i) Is expected to be of long-continued and indefinite duration;

(ii) Substantially impedes his or her ability to live independently; and

(iii) Is of such a nature that such ability could be improved by more suitable housing conditions, or if such person has a developmental disability as
defined in section 102(7) of the Developmental Disability and Bill of Rights Act (42 U.S.C. 6001(7)).

(2) As defined in the Fair Housing Act; the Americans with Disabilities Act; and section 504 of the Rehabilitation Act of 1973. The person has a physical or mental impairment which substantially limits one or more of such person’s major life activities; a record of such impairment; or being regarded as having such an impairment. The term does not include current, illegal use of or addiction to a controlled substance. As used in this definition, physical or mental impairment includes:

(i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genito-urinary; hemic and lymphatic; skin; and endocrine;

(ii) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The term “physical or mental impairment” includes, but is not limited to, such diseases and conditions as orthopedic, visual, speech and hearing impairments, cerebral palsy, autism, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, Human Immunodeficiency Virus infection, mental retardation, emotional illness, drug addiction (other than addiction caused by current, illegal use of a controlled substance), and alcoholism;

(iii) Major life activities means functions such as caring for one’s self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working;

(iv) Has a record of such an impairment means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities;

(v) Is regarded as having an impairment means:

(A) Has a physical or mental impairment that does not substantially limit one or more major life activities but that is treated by the borrower or management agent as constituting such a limitation;

(B) Has a physical or mental impairment that substantially limits one or more major life activities only as a result of the attitudes of others toward such impairment; or

(C) Has none of the impairments described in this definition but is treated by another person as having such an impairment.

Disabled domestic farm laborer. An individual with a disability as separately defined in this paragraph and who was a domestic farm laborer at the time of becoming disabled.

Domestic farm laborer. A person who, consistent with the requirements in §3560.576(b)(2), receives a substantial portion of his or her income from farm labor employment (not self-employed) in the United States, Puerto Rico, or the Virgin Islands and either is a citizen of the United States or resides in the United States, Puerto Rico or the Virgin Islands after being legally admitted for permanent residence. This definition may include the immediate family members residing with such a person.

Due diligence on hazardous substances. Due diligence is the process of inquiring into the environmental conditions of real estate, in the context of a real estate transaction to determine the presence of contamination from hazardous substances, and to determine the impact such contamination may have on the market value of the property.

Elderly household or individual with a handicapped household. A household in which the tenant or co-tenant of the household is 62 years old or older or is an individual with a disability. An elderly household may include persons younger than 62 years old and the household of an individual with a handicap may include persons without disabilities.

Elderly person. A person who is at least 62 years old. The term also means a person with a disability as separately defined in this paragraph, regardless of age.

Engagement. An Agency defined financial review of a housing project’s financial status that a borrower will
contract with a certified public accountant or other qualified individual to perform. An engagement will result in annual financial reports for use by the Agency as described in §3560.308.

**Familial status.** One or more individuals (who have not attained the age of 18 years) being domiciled with a parent or another person having legal custody of such individual or individuals; or the designee of such parent or other person having such custody, with the written permission of such parent or other person. The protections afforded against discrimination on the basis of familial status shall apply to any person who is pregnant or is in the process of securing legal custody of any individual who has not attained the age of 18 years.

**Family farm corporation or partnership.** A private corporation or partnership involved in agricultural production in which at least 90 percent of the stock or interest is owned and controlled by persons related by blood, which shall include parents, siblings, and children, or law. If more than three separate households are supported by the farming operation, the family farm corporation or partnership must be:

1. Legally organized and authorized to own and operate a farm business within the state;
2. Legally able to carry out the purposes of the loan; and
3. Prohibited from the sale or transfer of 90 percent of the stock or interest to other than family members by either the articles of incorporation, by-laws or by agreement between the stockholders or partners and the corporation or partnership.

**Farm.** A tract or tracts of land, improvements, and other appurtenances that are used or will be used in the production of crops, livestock, or aquaculture products for sale in sufficient quantities so that the property is recognized as a farm rather than a rural residence. The term “farm” also includes the term “ranch.” It may also include land and improvements and facilities used in a non-eligible enterprise or the residence that, although physically separate from the farm acreage, is ordinarily treated as part of the farm in the local community.

**Farmer.** A person who is actually involved in day to day on-site operations of a farm and who devotes a substantial amount of time to personal participation in the conduct of the operation of a “farm.”

**Farm labor.** Services in connection with cultivating the soil, raising or harvesting any agriculture or aquaculture commodity; or in catching, netting, handling, planting, drying, packing, grading, storing, or preserving in the unprocessed stage, without respect to the source of employment (but not self-employed), any agriculture or aquaculture commodity; or delivering to storage, market, or a carrier for transportation to market or to processing any agricultural or aquacultural commodity in its unprocessed stage.

**Farm labor contractor.** A person—other than an agricultural employer, a member of an agricultural association, or an employee of an agricultural employer or agricultural association—who recruits, solicits, hires, employs, furnishes, or transports any year-round or seasonal migrant farm laborer for money or other valuable consideration.

**Farm labor housing.** On-farm or off-farm housing for farm laborers authorized by section 514 and section 516 of the Housing Act of 1949.

**Farm owner.** A natural person, persons, or legal entity who are the owners of a “farm” as this term is further defined in this section.

**Foreclosure.** A proceeding in or out of court to extinguish all rights, title, and interest of the owners of property in order to sell the property to satisfy a lien against it.

**General overhead.** Includes general operation items necessary for the contractor to be in business. They may include, but are not limited to the following: tools and minor equipment; worker’s compensation and employer’s liability; unemployment tax; Social Security and Medicare; manager’s, clerical, and estimator’s salaries; pension and bonus plans; maintenance of office and light truck expense; vehicle expenses; depreciation of overhead capital expenditures; and office equipment maintenance.

**General requirements.** Includes items that are required in the construction
contract for the contractor to provide for the specific project. They do not include items that pertain to a specific trade nor overhead expenses of the contractor's general operation. Items may include, but are not limited to, the following: Field supervision; field engineering such as field office, sheds, toilets, phone; performance and payment or latent defects bonds; cost certification; building permits; site security; temporary utilities; property insurance; and cleaning or rubbish removal.

Grantee. An entity that has received a grant from the Agency.

Group home. Housing that is occupied by elderly persons or individuals with disabilities who share living space within a rental unit and in which a resident assistant may be required.

Household. The tenant or co-tenant and the persons or dependents living with a tenant or co-tenant, but not including a resident assistant.

Household furnishings. Basic durable items such as stoves, refrigerators, drapes, drapery rods, tables, chairs, dressers and beds.

Housing project. A property with two or more affordable, decent and sanitary rental units and related facilities operated under one management plan and financed with funds appropriated under the authority of sections 515, 514, or 516 of the Housing Act of 1949.

Identity-of-Interest (IOI). A relationship between applicants, borrowers, grantees, management agents, or suppliers of materials or services described under, but not limited to, any of the following conditions:

(1) There is a financial interest between the applicant, borrower, grantee and a management agent or the supplying entity;

(2) One or more of the officers, directors, stockholders or partners of the applicant, borrower, or management agent is also an officer, director, stockholder, or partner of the supplying entity;

(3) An officer, director, stockholder, or partner of the applicant, borrower, or management agent has a 10 percent or more financial interest in the supplying entity;

(4) The supplying entity has or will advance funds to an applicant, borrower, or management agent;

(5) The supplying entity provides or pays on behalf of the applicant, borrower, or management agent the cost of any materials or services in connection with obligations under the management plan or management agreement;

(6) The supplying entity takes stock or a financial interest in the applicant, borrower, or management agent as part of the consideration to be paid them; or

(7) There exists or come into being any side deals, agreements, contracts or understandings entered into thereby altering, amending, or canceling any of the management plan, management agreement documents, organization documents, or other legal documents pertaining to the property, except as approved by the Agency.

Indian tribe. The term “Indian tribe” means any Indian tribe, band, group, and nation, including Alaskan Indians, Aleuts, and Eskimos, and any Alaskan-Native Village, which is considered an eligible recipient under the Indian Self-Determination and Education Assistance Act (Public Law 93-638) or under the State and Local Fiscal Assistance Act of 1972 (Public Law 92-512).

Interest credit. A form of assistance available to eligible borrowers that reduces the effective interest rate of the loan.

Lease. A contract setting forth the rights and obligations of a tenant or cooperative member and a property owner, including charges and terms under which a tenant or cooperative member will occupy or use the housing or related facilities.

Legal or qualified alien. Legal or qualified alien refers to any person lawfully admitted to the country who meets the criteria in section 214 of the Housing and Community Development Act of 1980, 42 U.S.C. 1436a.

Letter of Priority Entitlement (LOPE). A letter issued by the Agency providing a tenant with priority entitlement to rental units in other Agency-financed housing projects for 120 days from the date of the LOPE.

Life cycle cost. The life cycle cost has 2 purposes: (1) To determine the expected usable life (utility) of a building
component or furnishing and (2) to determine which building components or furnishings are the most cost efficient over the life of the building. Cost efficient is not to be construed to mean the least initial cost.

Life cycle cost analysis. Life cycle cost analysis is the comparison of different materials to examine anticipated useful life and the cost of using a specific material or building component. The analysis has multiple uses, such as: (1) To conduct a cost efficiency comparison between products, (2) for developing component replacement time tables, and (3) for estimating future component replacement costs. Life cycle cost analysis can be accomplished through various methods, such as: insurance actuary tables or Agency documentation of a component’s life expectancy. Life cycle cost analysis is conducted by a design professional. For Agency financed projects, a life cycle cost analysis is to be conducted for specific components: (1) drives and parking, (2) roofing system and roofing material, (3) exterior finishes, and (4) energy source items.

Limited Liability Company (LLC). An unincorporated organization of one or more persons or entities established in accordance with applicable state laws and whose members may actively participate in the organization without being personally liable for the debts, obligations or liabilities of the organization.

Limited partnership. An ownership arrangement consisting of general and limited partners; general partners manage the business, while limited partners are passive and liable only for their own capital contributions.

Loan agreement. A written agreement between the Agency and the borrower that sets forth the borrower’s responsibilities with respect to Agency financing.

Low-income household. A household that has an adjusted income that is greater than the Department of Housing and Urban Development’s (HUD) established very-low income limit, but that does not exceed the HUD established low-income limit (generally 80 percent of median income adjusted for household size for the county where the property is or will be located).

Low-Income Housing Tax Credit (LIHTC). A federal tax credit allowed for investment in qualified low-income housing administered by the Internal Revenue Service (IRS) under section 42 of the Internal Revenue Code.

Management agent. A firm or individual employed or designated by a borrower to act on the borrower’s behalf in accordance with a written management agreement.

Management agreement. A written agreement between a borrower and a management agent setting forth the management agent’s responsibilities and fees for management services.

Management fee. The compensation provided to a management agent for services provided in accordance with a management agreement.

Management plan. A detailed description of the policies and procedures to be followed by the borrower in managing a MFH project.

Manufactured housing. Housing, constructed of one or more factory-built sections, which includes the plumbing, heating, and electrical systems contained therein, which is built to comply with the Federal Manufactured Home Construction and Safety Standards (FMHCS), and which is designed to be used with a permanent foundation.

Market area. The geographic or locational delineation of the market for a specific project, including outlaying areas that will be impacted by the project, i.e., the area in which alternative, similar properties effectively compete with the subject property.

Market rent. The most probable rent that a property should bring in a competitive and open market reflecting all conditions and restrictions of the specified lease agreement, including term, rental adjustment and revaluation, permitted uses, use restrictions, and expense obligations; the lessee and lessor each acting prudently and knowledgeably, and assuming consummation of a lease contract as a specified date and the passing of the leasehold from lessor to lessee.

Maximum debt limit. The maximum amount that the Agency will lend or grant for a MFH project based on the appraised value or total development cost excluding costs ineligible for
Rural Housing Service, USDA § 3560.11

payment from loan or grant funds, whichever is less, reduced by all funding available to the borrower from sources other than the Agency, multiplied by 95, 97, or 102 percent depending upon the applicant entity and their use of the low-income housing tax credit, in accordance with §3560.63(b).

**Member or co-member.** A stockholder or other person who has executed documents or stock pertaining to a cooperative housing type of living arrangement and has made a commitment to upholding the cooperative concept.

**Migrants or migrant agricultural laborer.** A person (and the family of such person) who receives a substantial portion of his or her income from farm labor employment and who establishes a residence in a location on a seasonal or temporary basis, in an attempt to receive farm labor employment at one or more locations away from their home base state, excluding day-haul agricultural workers whose travels are limited to work areas within one day of their residence.

**Minor.** An individual under 18 years of age who is a dependent of a tenant or an individual age 18 or older who is a full-time student and a dependent of a tenant.

**Moderate-income household.** A household that has an adjusted income that is greater than the HUD-established low-income limit but does not exceed the low-income limit by more than $5,500.

**Mortgage or Deed of Trust.** A form or security instrument or consensual lien on real property.

**Net recovery value.** The value realized from the Government’s acquisition of security property in a default situation after subtracting all costs, actual or anticipated, from acquiring, holding, and disposing of the security property.

**New construction.** A MFHMFH project being constructed to be occupied for the first time.

**Nonprofit organization.** A private organization that:

1. Is organized under state or local laws;
2. Has no part of its net earnings inuring to the benefit of any member, founder, contributor, or individual; and
3. Is approved by the Secretary of Agriculture and considered to be financially responsible.

**Nonprofit organization for section 515 program (Prepayment or Purchase).** To be eligible to purchase properties under the conditions of subpart N of this part, nonprofit organizations may not have among their officers or directorate any persons or parties with an identity-of-interest (or any persons or parties related to any person with identity-of-interest) in loans financed under section 515 that have been prepaid or have requested prepayment.

**Nonprofit organization of farm workers.** A nonprofit organization, as defined in this section, whose membership is composed of at least 51 percent farm workers.

**Notice of Funding Availability (NOFA).** A “Notice of Funding Availability” issued by the Agency to inform interested parties of the availability of assistance and other matters pertinent to the program.

**Occupancy agreement.** A contract establishing the rights and obligations of the cooperative member and the cooperative, including the amount of the monthly occupancy charge and the other terms under which the member will occupy the housing.

**Occupancy charge.** The amount of money charged a cooperative member to cover their proportional share of the cooperative’s operating costs and cash requirements.

**Off-farm labor housing.** Housing for farm laborers in any location approved by the Agency but not on the farm where the laborer works.

**Office of the General Counsel (OGC).** The USDA Office of the General Counsel, including the Regional Attorney, Associate Regional Attorney, or Assistant Regional Attorney.

**On-farm labor housing.** Housing for farm laborers located on the farm where they work that is away from service buildings or in the nearby community.

**Overage.** That portion of a tenant’s net tenant contribution that exceeds basic rent up to note rent. Full overage is an amount equal to the difference
between the note rent for a unit and the basic rent.

Plan I. A type of interest subsidy available to borrowers prior to October 27, 1980. Budgets and rental rates developed for Plan I loans are based on a 3 percent loan amortization.

Plan II. A type of interest subsidy available to borrowers operating on a limited profit basis. Budgets and rental rates developed for Plan II loans are based on both the loan being amortized at the interest rate shown on the promissory note and at a 1 percent subsidized rate.

Predetermined Amortization Schedule System (PASS). A system where loan payments are applied based on an amortization schedule.

Prepayment. Payment in full of the outstanding balance on an Agency loan prior to the note’s originally scheduled maturity date.

Program requirements. All provisions related to MFHMFH contained in the loan document, grant agreement, statute, regulation, handbook, or administrative notice.

Promissory note. A legal document containing conditions (interest rate and timing) for repayment of indebtedness.

Real estate owned (REO) property. The real estate owned by the Agency acquired through voluntary conveyance, foreclosure or other action.

Rehabilitation. Rehabilitation is when the remodeling of a property is of a complex nature involving structural repairs or when two or more of the life cycle cost components are included in the remodeling of a property.

Related facilities. Facilities in a MFHMFH project that are related to the housing and are in addition to rental units, (e.g., community rooms or buildings, cafeterias, dining halls, infirmaries, child care facilities, assembly halls, and essential service facilities such as central heating, sewerage, lighting systems, clothes washing facilities, trash disposal and safe domestic water supply).

Rent. The amount established as a charge for occupancy in a rental unit of Agency-financed MHF. Rents must be established at the same rate for all similar units in the housing project. The following terms are used to describe rents for various program purposes.

(1) Note rent is the rental charge established to cover expenses in the housing project’s approved budget and the required loan payment set at the interest rate shown in the promissory note.

(2) Basic rent is the rental charge established to cover expenses in the housing project’s approved budget and the required loan payment contained in the promissory note reduced by the interest credit agreement.

(3) HUD contract rent is the rental charge established for housing receiving project-based Section 8 rental subsidies in accordance with 24 CFR part 880 or part 884, as applicable.

(4) Low-income housing tax credit (LIHTC) rent is the rental charge established in accordance with LIHTC requirements.

Rental assistance (RA). The portion of the approved shelter cost paid by the Agency to compensate a borrower for the difference between the approved shelter cost and the tenant contribution when such contribution is less than the basic rent.

Rental assistance units. Dwelling units in a MFH project qualified for rental assistance. There are three types of rental assistance units.

(1) New construction units are units provided in conjunction with initial loans for construction or substantial rehabilitation of the MFHMFH projects.

(2) Replacement units are Agency-funded rental assistance units which replace units with expiring rental assistance agreements or which replace Section 8 units which have expired under the Section 8 contract.

(3) Servicing units are units provided to an operational MFHMFH project as a part of the Agency’s general loan servicing or preservation activities.

Repair and replacement. Repair and replacement is the restoration of minor building materials, elements, components, equipment and fixtures. Examples include: Painting, carpeting, appliances, cabinets, and other fixtures.

Resident assistant. A person residing in a rental unit who is essential to the
well-being and care of an elderly person or an individual with a disability, but who:

(1) Is not obligated for the tenant’s financial support;
(2) Would not be living in the unit except to provide the needed services;
(3) May be a family member, but is not a dependent of the tenant for tax purposes;
(4) Is not subject to the eligibility requirements of a tenant; and
(5) Is not considered a household member in the determination of household income.

**Resident or site manager.** The individual employed by the borrower and who is responsible for the day-to-day operations of the housing.

**Retired domestic farm laborer.** An individual who is at least 55 years of age and who has spent the last 5 years prior to retirement as a domestic farm laborer or spent the majority of the last 10 years prior to retirement as a domestic farm laborer.

**Return on Investment (ROI).** The annual amount of profit an owner operating on a limited or full profit basis may withdraw from a project, as established in the loan agreement. The amount is calculated as a percentage of the owner’s investment in the project.

**Rural area.** Any open country, or any place, town, village, or city which is not (except in the cases of Pajaro, in the State of California, and Guadalupe, in the State of Arizona) part of or associated with an urban area and which (1) has a population not in excess of 2,500 inhabitants, or (2) has a population in excess of 2,500 but not in excess of 10,000 if it is rural in character, or (3) has a population in excess of 10,000 but not in excess of 20,000 and (A) is not contained within a standard metropolitan statistical area, and (B) has a serious lack of mortgage credit for lower and moderate-income families, as determined by the Secretary and the Secretary of Housing and Urban Development. For purposes of this title, any area classified as “rural” or a “rural area” prior to October 1, 1990, and determined not to be “rural” or a “rural area” as a result of data received from or after the 1990 or 2000 decennial census shall continue to be so classified until the receipt of data from the decennial census in the year 2010, if such area has a population in excess of 10,000 but not in excess of 25,000, is rural in character, and has a serious lack of mortgage credit for lower and moderate-income families. Notwithstanding any other provision of this section, the city of Plainview, Texas, shall be considered a rural area for purposes of this title, and the city of Altus, Oklahoma, shall be considered a rural area for purposes of this title until the receipt of data from the decennial census in the year 2000.

**Rural Cooperative Housing (RCH).** A housing program authorized under section 515 of the Housing Act of 1949, in which a consumer cooperative, organized and operating on a nonprofit basis, may own and operate a MFH development.

**Rural Housing Service (RHS).** The Agency within the Rural Development mission area of the U.S. Department of Agriculture or its successor agency which administers programs authorized by sections 514, 515, 516, and 521 of the Housing Act of 1949, as amended.

**Rural Rental Housing (RRH).** A housing program authorized by section 515 of the Housing Act of 1949 to provide rental housing in rural areas for persons of very-low, low- and moderate-income.

**Seasonal housing.** Housing operated on a seasonal basis, typically for migrants or migrant agricultural laborers as opposed to year round.

**Security deposit.** A one-time fee charged a tenant prior to occupancy of a unit to cover possible loss or damage to the housing unit caused by the tenant.

**Self-employed.** A person who meets the IRS definition of self-employed at 26 CFR 1.401–10.

**Service agreement.** A written agreement between a borrower and a service provider establishing the specific service to be provided to a MFH project, the cost of the service, and the length of time the service will be provided.

**Service plan.** A written plan describing how services will be provided to a MFH project and which, at a minimum, must specify the services to be provided, the frequency of the services, who will provide the services, how tenants will be advised of the availability
of services, and the staff needed to provide the services.

Service provider. A person who signs a written agreement with a borrower to provide services to a MFH project.

Shelter costs. Basic or note rent plus the utility allowance, when used, or the occupancy charge plus the utility allowance. If the utility costs are included in the rent, the rent will equal shelter costs.

Sources and Uses Comprehensive Evaluation (SAUCE). A computer software program used by the Agency to analyze the total funds provided to a MFH project to ensure that the Agency is not providing excess assistance.

Special note rent (SNR). A rental rate charged at a Plan II project experiencing vacancies that is less than note rent but higher than basic rent.

State consolidated plan. A planning document for an individual state that includes a housing and homeless needs assessment; a housing market analysis; a strategic plan for addressing the state's housing challenges; an Action Plan that is an annual description of the state's Federal and other resources that are expected to be available to address its priority housing needs and how the Federal funds will leverage other resources; certifications relating to fair housing, its antidisplacement and relocation plan, a drug-free workplace, and other statutory and program requirements; and a monitoring plan to ensure that the state is using its Federal funds appropriately and effectively.

Tenant or co-tenant. An individual who signs a lease and occupies or will occupy a rental unit in a MFH project. The term tenant or co-tenant also refers to a member of cooperative housing occupying or planning to occupy a dwelling unit in cooperative housing.

Tenant contribution. The portion of the approved shelter cost paid by the tenant household. The proportion of tenant income and adjusted income paid will vary according to the type of subsidy provided to the tenant household.

Total development cost (TDC). The cost of constructing, purchasing, improving, altering, or repairing MFH and related facilities, buying household furnishings (for sections 514/516 only), and purchasing or improving the necessary land, including architectural, engineering, or legal fees, and charges and other technical and professional fees and charges, but excluding fees, charges, or commissions such as payments to brokers, negotiators, or other persons for the referral of prospective applicants or solicitations of loans. Although a developer's fee is part of the project's development cost, such fees are not eligible for payment from Agency loan or grant funds and are not included in determining the Agency authorized development cost.

Utility allowance. An amount determined by a borrower as the amount to be considered a tenant's portion of utility cost in the calculation of a tenant's total shelter cost when utility costs are not included in the rent.

Very low-income household. A household that has an adjusted income that does not exceed the HUD established very low-income limit (generally 50 percent of median income adjusted for household size in the county where the property is or will be located).

Workout agreement. An agreement between a borrower and the Agency listing actions to be taken over a period of time to prevent or correct a compliance violation or to cure a monetary or non-monetary default.

§§ 3560.12–3560.49 [Reserved]

§ 3560.50 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.
§ 3560.51 General.

This subpart contains the Agency’s loan origination requirements for multi-family housing (MFH) direct loans for Rural Rental Housing, Rural Cooperative Housing, and Farm Labor Housing. Additional requirements for farm labor housing loans and grants are contained in subpart L of this part for Off-Farm Labor Housing and subpart M of this part for On-Farm Labor Housing.

§ 3560.52 Program objectives.

The Agency uses appropriated funds to finance the construction, rehabilitation of program properties, or purchase and rehabilitation of MFH and related facilities to serve eligible persons in rural areas. The Agency encourages the use of such financing in conjunction with funding or financing from other sources.

§ 3560.53 Eligible use of funds.

Funds may be used for the following purposes.

(a) Construct housing. Funds may be used to construct MFH.

(b) Purchase and rehabilitate buildings. Funds may be used to purchase and rehabilitate buildings that have not been previously financed by the Agency.

(1) Rehabilitation must meet the definition of either moderate or substantial rehabilitation as defined in 7 CFR part 1924, subpart A.

(2) The building to be rehabilitated must be structurally sound and the improvements to the building must be necessary to meet the requirements of decent, safe, and sanitary living units.

(c) Subsequent loans. Funds may be used to provide subsequent loans in accordance with the provisions of § 3560.73.

(d) Purchase and improve sites. Funds may be used to purchase and improve the site on which MFH will be located, provided that the amount of loan funds used to purchase the site does not exceed the appraised market value of the site immediately prior to purchase.

(e) Develop and install necessary systems. Funds may be used to install streets, a water supply, sewage disposal, heating and cooling systems, electric, gas, solar, or other power sources for lighting and other features necessary for the housing. If such facilities are located off-site, loan funds may only be used if the following additional requirements are met:

(1) The loan applicant will hold title to the facility or have a legal right to use the facility in the form of an easement or other instrument acceptable to the Agency for a period of at least 50 percent longer than the term of the loan or grant and the title or right is transferable to any subsequent owner of the housing.

(2) The facilities will either be provided for the exclusive use of the proposed housing project, or Agency funds are limited to the prorated part of the total cost of the facility according to the use and benefit to the MFH project.

(f) Landscaping and site development. Funds may be used to provide landscaping and site development related to a MFH project such as lighting, walks, fences, parking areas, and driveways.

(g) Tenant-related facilities. Funds may be used to develop tenant-related facilities appropriate to the size, economics, and prospective tenants of a MFH project, such as a community room, development of space for education and training purposes for tenants, central laundry facility, outdoor seating, space for passive recreation, tot lots, and a small emergency care infirmary. In congregate housing and group homes, funds may be used for central cooking and dining areas.

(h) Management-related facilities. Funds may be used to develop management-related facilities appropriate to the size and economics of a MFH
§ 3560.53
project such as a maintenance workshop, storage facilities, office, and living quarters for a resident manager and other personnel.

(i) Purchase and install equipment and appliances. Funds may be used to purchase and install equipment and appliances affixed to the property as customary and appropriate for the area in which the housing is located.

(j) Household furnishings (Section 514/516). For farm labor housing sections 514 and 516 only, funds may be used to purchase household furnishings.

(k) Initial operating capital. Loan funds equal to 2 percent of total development cost or appraised value, whichever is less, may be used by a state or political subdivision thereof, Indian tribe, consumer cooperative, or any public or private nonprofit borrower who is not receiving low-income housing tax credits (LIHTC), to make the initial operating capital contribution required by § 3560.64. Other borrowers must use their own resources to make the required initial operating capital contribution and may not use loan funds for that purpose.

(l) Builder’s profit, overhead and general requirements. Subject to the following limits, funds may be used for builder’s profit, overhead and general requirements.

(1) Up to 10 percent of the construction contract may be used for builder’s profit.

(2) Up to 4 percent of the construction contract may be used for general overhead.

(3) Up to 7 percent of the construction contract may be used for general requirements.

(m) Legal, technical and professional services. Funds may be used for the costs of legal, technical, and professional services related to the borrower’s MFH project, including appraisals, environmental documentation, and construction plans and specifications.

(n) Permit and application fees. Funds may be used for required MFH permits and application fees.

(o) Reimbursement to nonprofit organizations and public bodies. Funds may be used to reimburse a nonprofit organization or public body for up to 2 percent of total development costs for section 515, or up to 4 percent of total development costs for off-farm labor housing, for costs that are reasonable and typical for the area, including:

(1) Development and packaging of a loan application and a MFH proposal; and

(2) Legal, technical, and professional fees incurred in the formation of the loan application and MFH proposal; or

(3) Technical assistance from another nonprofit organization to assist in the organization’s formation and in the development and packaging of a loan application and MFH proposal.

(p) Educational programs. Funds may be used for educational programs related to owning and managing a cooperative housing project for the board of directors of a housing cooperative during the first year of the housing operation. Such funds will be available from the initial operating account. The amount of the funds disbursed will be subject to Agency approval and availability of financial resources from the project.

(q) Interest and customary charges. Funds may be used for interest accrued and customary charges necessary to obtain interim financing.

(r) Purchase housing from an interim lender. Funds may be used to purchase MFH from an interim lender that holds fee simple title to Agency-financed housing upon which construction commenced and a letter of commitment had been issued by the Agency but the original applicant for whom funds were obligated will not or cannot continue with construction of the housing. In order for the purchase to take place, there must be no outstanding unpaid obligations in connection with the housing.

(s) Uniform Relocation Assistance and Real Property Acquisition Act of 1970. Funds may be used for necessary costs incurred to comply with the Uniform Relocation Assistance and Real Property Acquisition Act of 1970.

(t) Demonstration programs. With the RHS Administrator’s approval, funds may be used to construct demonstration housing involving innovative units and systems which do not meet existing published standards, rules, regulations, or policies but meet the intent of providing affordable, decent, safe, and
Sanitary rural housing, and are consistent with the requirements of Title V of the Housing Act of 1949.

(u) Conversion of section 502 properties. In accordance with §3560.506, loan funds may be used to finance the conversion of real estate owned units originally financed under section 502 of the Housing Act of 1949, to MFH authorized by section 515 of the Housing Act of 1949.

§3560.54 Restrictions on the use of funds.

(a) Ineligible uses of funds. Funds may not be used for:

(1) Housing intended to serve temporary and transient residents, with the exception of housing to serve migrant farm workers in accordance with §3560.554;

(2) Special care facilities or institutional-type homes;

(3) Facilities which are not in compliance with the design requirements specified in §3560.60;

(4) Any costs associated with space in a housing project that is leased for commercial use or any commercial facilities except essential service-type facilities when otherwise not conveniently available;

(5) Specialized equipment for training and therapy;

(6) Operating capital for a central dining facility or any items which do not become affixed to the real estate security with the exception of household furnishings for farm labor housing units financed under sections 514 and 516;

(7) Compensation to a loan applicant for value of land contributed in excess of the equity contribution requirements in §3560.63(c);

(8) Refinancing of an applicant’s debt except when the debt involves interim financing or when refinancing is necessary to obtain a release of an existing lien on land owned by a nonprofit organization;

(9) Payment of any fee, charge, or commission to a broker or anyone else as a developer’s fee or for referral of a prospective loan applicant or solicitation of a loan;

(10) Payment to any officer, director, trustee, stockholder, member, or agent of an applicant; or

(11) Purchasing land for a site in excess of what is needed, except when:

(i) The applicant cannot acquire an alternate site or cannot acquire the needed land as a separate parcel;

(ii) The applicant agrees to sell the excess land as soon as practical and to apply the proceeds to the loan; and

(iii) Program site density requirements are met in accordance with the site requirements established under §3560.58.

(b) Obligations incurred before loan approval. Funds may not be used for expenses incurred by an applicant prior to approval except when all the following conditions are met:

(1) The debts were incurred for eligible purposes;

(2) Contracts, materials, construction, and any land purchased meet Agency standards and requirements;

(3) Payment of the debts will remove any attached liens and any basis for liens that may attach to the property on account of such debts; and

(4) The appropriate level of environmental review in accordance with 7 CFR part 1940, subpart G has been completed.

§3560.55 Applicant eligibility requirements.

Applicants for off-farm labor housing loans and grants should also refer to §3560.555, and applicants for on-farm labor housing loans should refer to §3560.605.

(a) General. To be eligible for Agency assistance, applicants must meet the following requirements:

(1) Be a U. S. citizen or qualified alien(s); a corporation; a state or local public Agency; an Indian tribe as defined in §3560.11; or a limited liability company (LLC), nonprofit organization, consumer cooperative, trust, partnership, or limited partnership in which the principals are U.S. citizens or qualified aliens;

(2) Be unable to obtain similar credit elsewhere at rates that would allow for rents within the payment ability of eligible residents;

(3) Possess the legal and financial capacity to carry out the obligations required for the loan or grant;

(4) Be able to maintain, manage, and operate the housing for its intended
§3560.55

7 CFR Ch. XXXV (1–1–14 Edition)

purpose and in accordance with all Agency requirements:

(5) With the exception of applicants who are a nonprofit organization, housing cooperative or public body, be able to provide the borrower contribution from their own resources (this contribution must be in the form of cash, or land, or a combination thereof);

(6) Have or be able to obtain a minimum of 2 percent of the total development costs for use as initial operating capital (for nonprofit organizations, cooperatives, or public bodies, this amount may be financed through Agency funds); and

(8) Not delinquent on Federal debt or a Federal judgment debtor, with the exception of those debtors described in §3560.55(b).

(b) Additional requirement for applicants with prior debt. If an applicant or the managing general partner of a borrower, as well as any affiliated entity having a 10 percent or more ownership interest, has a prior or existing Agency debt, the following additional requirements must be met.

(1) The applicant must be in compliance with any existing loan or grant agreements and with all legal and regulatory requirements or must have an Agency-approved workout agreement and be in compliance with the provisions of the workout agreement. The Agency may require that applicants with monetary or non-monetary deficiencies be in compliance with an Agency-approved workout agreement for a minimum of 6 consecutive months before becoming eligible for further assistance.

(2) The applicant must be in compliance with the Title VI of the Civil Rights Act of 1964, section 504 of the Rehabilitation Act of 1973, and all other applicable civil rights laws.

(c) Additional requirements for nonprofit organizations. In addition to the eligibility requirements of paragraphs (a) and (b) of this section, nonprofit organizations must meet the following criteria:

(1) The applicant must have received a tax-exempt ruling from the IRS designating the applicant as a 501(c)(3) or 501(c)(4) organization.

(2) The applicant must have in its charter the provision of affordable housing.

(3) No part of the applicant’s earnings may benefit any of its members, founders, or contributors.

(4) The applicant must be legally organized under state and local law.

(5) In the case of off-farm labor housing loans and grants, nonprofit organizations must be “broad-based” nonprofit organizations (refer to §3560.555(a)(1)).

(d) Additional requirements for limited partnerships. In addition to the applicant eligibility requirements of paragraphs (a) and (b) of this section, limited partnership loan applicants must meet the following criteria:

(1) The general partners must be able to meet the borrower contribution requirements if the partnership is not able to do so at the time of loan request.

(2) The general partners must maintain a minimum 5 percent financial interest in the residuals or refinancing proceeds in accordance with the partnership organizational documents.

(3) The partnership must agree that new general partners can be brought into the organization only with the prior written consent of the Agency.

(e) Additional requirements for Limited Liability Companies (LLCs). In addition to the applicant eligibility requirements of paragraphs (a) and (b) of this section, LLC loan applicants must meet the following criteria:

(1) One member who holds at least a 5 percent financial interest in the LLC must be designated the authorized agent to act on the LLC’s behalf to bind the LLC and carry out the management functions of the LLC.

(2) No new members may be brought into the organization without prior consent of the Agency.
(3) The members must commit to meet the equity contribution requirements if the LLC is not able to do so at the time of loan request.

§ 3560.56 Processing section 515 housing proposals.

Processing requirements for farm labor housing proposals are found in subpart L of this part for Off-Farm and subpart M of this part for On-Farm.

(a) Notice of Funding Availability (NOFA) responses. (1) The Agency will publish an annual NOFA with deadlines and other information related to submission of new construction MFH proposals, including expansion of existing MFH in designated places selected in accordance with §3560.57.

(2) To be eligible for funding consideration, MFH proposals must be submitted in accordance with the NOFA and must provide information requested in the NOFA for the Agency to score and rank the proposals.

(3) MFH proposals needing rental subsidies must include requests for Agency rental assistance or a description of any non-Agency rental subsidy to be used with the proposal and must provide information required by §3560.260(c).

(4) The Agency will consider housing proposals requesting rental assistance in rank order to the extent rental assistance is available. When there is no rental assistance available, the Agency will consider only those housing proposals in rank order that do not require rental assistance.

(b) Preliminary proposal assessment. The Agency will make a preliminary assessment of the application using the following criteria and will reject those applications which do not meet all of these criteria:

(1) The proposal was received by the submission deadline specified in the NOFA.

(2) The proposal is complete as specified in the NOFA.

(3) The proposal is for an authorized purpose.

(4) The applicant meets Agency eligibility requirements.

(c) Scoring and ranking project proposals. The Agency will score and rank each housing proposal that meets the criteria of paragraph (b) of this section.

(1) The following criteria will be used to score housing proposals as more completely established in the NOFA:

(i) The presence and extent of leveraged assistance in the proposal for the units that will serve tenants meeting Agency income limits at basic rents comparable to what the rent would be if the Agency provided full financing.

(ii) The proposal will provide rental units in a colonia, tribal land, Rural Economic Area Partnership (REAP) community, Enterprise Zone or Empowerment Community (EZ/EC) or in a place identified in the state Consolidated Plan or a state needs assessment as a high need community for MFH.

(iii) The proposal supports Agency initiatives announced in the NOFA.

(iv) The proposal uses a donated site which meets the following conditions:

(A) The site is donated by a state, unit of local government, public body or a nonprofit organization;

(B) The site is suitable for the housing proposals and meets Agency requirements;

(C) Site development costs do not exceed what they would be to purchase and develop an alternative site;

(D) The overall cost of the MFH is reduced by the donation of the site; and

(E) A return on investment is not paid to the borrower for the value of the donated site nor is the value of the site considered as part of the borrower’s contribution.

(2) The Agency will rank housing proposals based on their scoring.

(i) When proposals have an equal score, preference will be given to Indian tribes as defined in §3560.11 and local nonprofit organizations or public bodies whose principal purposes include low-income housing that meet the conditions of §3560.55(c) and the following conditions.

(A) Is exempt from Federal income taxes under section 501(c)(3) or 501(c)(4) of the Internal Revenue code;

(B) Is not wholly or partially owned or controlled by a for-profit or limited-profit type entity;

(C) Whose members, or the entity, do not share an identity of interest with a for-profit or limited-profit type entity;

(D) Is not co-venturing with another entity; and
(E) The entity or its members will not be receiving any direct or indirect benefits pursuant to LIHTC.

(ii) A drawing will be held in the event of a tie score, first for proposals from applicants who meet the conditions of paragraph (c)(2)(i) of this section and next for proposals from applicants for which paragraph (c)(2)(i) of this section is not applicable. Each proposal will be numbered in the order in which it is drawn.

(3) The Agency will request initial loan applications from parties who submitted the housing proposals with the highest ranking, taking into consideration available funds. The Agency will notify non-selected parties with the reasons for their non-selection, and the process that may be used to seek a review of the non-selection decision.

(d) Processing initial loan applications. The Agency will review all initial loan applications submitted in accordance with Agency requirements to further evaluate the eligibility and feasibility of the housing proposals. This determination will include:

(1) A review of the preliminary plans and cost estimates,

(2) A market feasibility review,

(3) An Agency site visit to gather preliminary environmental information and determine that the proposed site meets the site requirements of §3560.58,

(4) A review of the Affirmative Fair Housing Marketing Plan,

(5) An analysis of current credit reports,

(6) A review of Civil Rights Impact Analysis in accordance with 7 CFR part 2006, subpart P, and

(7) Completion of the appropriate level of environmental review in accordance with 7 CFR part 1940, subpart G.

(e) Processing order of initial loan applications. The Agency will process initial loan applications in rank order, taken into account available funds. If any initial loan applications are withdrawn, rejected, or delayed for a period of time that will not permit funding in the current funding cycle, the Agency will process, in rank order, the next initial loan application as funding levels permit.

(f) Other assistance. During each stage of loan application processing, loan applicants must notify the Agency of all other assistance, including other Federal Government assistance proposed or approved for use in connection with the loan application.

(g) Proposal withdrawal or rejection. An applicant may withdraw a housing proposal, an initial loan application, or a final loan application at any time during the Agency review process with a written request. The Agency may reject a housing proposal, an initial loan application, or a final loan application at any time during the Agency review process when an applicant fails to provide information requested by the Agency within the time frame specified by the Agency.

(h) Final applications. Applicants, with initial loan applications that are selected by the Agency for further processing, must submit a final application, with any additional information requested by the Agency, to confirm and document a housing proposal’s eligibility and feasibility, including an affirmative fair housing marketing plan. The Agency will notify applicants with initial loan applications that are not selected for further processing of their non-selection, the reasons for their non-selection, and the process that may be used to seek a review of the non-selection decision.

(i) Rural cooperative housing proposals. Rural cooperative housing loan proposals will be solicited through a NOFA and will be assessed and processed in the same manner described in paragraphs (a) through (h) of this section.

§ 3560.57 Designated places for section 515 housing.

(a) Establish a list of designated places. The Agency will establish a list of designated places from which loan proposals will be accepted. The list is updated each fiscal year and is available when the NOFA is published. The NOFA provides information on obtaining the list. This list will be developed from a list of rural places which the Agency identifies as having the greatest need for multifamily housing based on the following factors:
§ 3560.58 Site requirements.

(a) Location. (1) New construction section 515 loans will be made only in designated places selected by the Agency in accordance with the requirements of §3560.57.

(2) Agency-financed MFH must be located in residential areas as part of established rural communities, except as permitted in §3560.58(b), and for farm labor housing units financed under sections 514 and 516, which may be developed in any area where a need for farm labor housing exists.

(3) Communities in which Agency-financed MFH is located must have adequate facilities and services to support the needs of tenants.

(4) Housing complexes will not be located in areas where there are undesirable influences such as high activity railroad tracks; adjacent to or near industrial sites; bordering sites or structures which are not decent, safe, or sanitary; or bordering sites which have potential environmental concerns such as processing plants. Sites which are not an integral part of a residential community and do not have reasonable access, either by location or terrain, to essential community facilities such as water, sewerage removal, schools, shopping, employment opportunities, medical facilities, may not be acceptable.

Consistent with Federal law and Departmental Regulation, the Agency

(1) Qualification as a rural area as defined in §3560.11.

(2) Lack of mortgage credit, and

(3) Demonstrated need for MFH based on:

(i) The incidence of poverty.

(ii) The existence of substandard housing.

(iii) The lack of affordable housing,

and

(iv) The following high need areas:

(A) Places identified in the state Consolidated Plan or similar state plan or needs assessment report,

(B) Indian reservations or communities located within the boundaries of tribal allotted or trust land, and

(C) EZ/EC or REAP communities.

(b) Establishing partnership designated place list. The Agency, in states with an active leveraging program and formal partnership agreement with the state agency, may establish a partnership designated place list consisting of places identified by the partnership as high need areas based on criteria consistent with the Agency’s and the state’s authorizing statutes. The partnership agreement and partnership designated place list must have the concurrence of the Administrator.

(c) Administrator’s discretion. The Administrator may add to the list of designated places any place that is determined to have a compelling need for MFH, for example, a place that has had a substantial increase in population not reflected in the most recent census data, or a place that has experienced a loss of affordable housing because of a natural disaster.

(d) Restrictions on loans in certain designated places. (1) Initial loan applications will not be requested and final loan applications will not be closed for housing proposals in designated places where any of the following conditions exist:

(i) The Agency has selected another MFH proposal in the designated place for processing.

(ii) A previously funded Agency, the U.S. Department of Housing and Urban Development (HUD), low-income housing tax credit or other similar assisted MFH in the designated place has not been completed or has not reached projected occupancy levels.

(iii) Existing assisted MFH in the designated place is experiencing high vacancy levels.

(iv) A special note rent or other loan servicing tool is pending or in effect for other assisted housing in the designated place, or

(v) The need in the market area is for additional rental assistance and not additional rental units.

(2) Exceptions to the provisions in §3560.57(d)(1) may be made:

(i) When a group home is proposed for persons with disabilities in an area where the existing MFH is insufficient or unavailable for their needs; or

(ii) There is a compelling need for additional MFH, for example when the units that have been approved or are under development represent only a small portion of the total units needed in the community.
must conduct an environmental assessment and a civil rights impact analysis before a site can be accepted. Sites may be determined by the Agency to be unacceptable if any of the adverse conditions described in this paragraph exist.

(b) Structures located in central business areas. The Agency will consider financing construction or the purchase and substantial rehabilitation of an existing structure located in the central business area of a rural community. With prior consent from the Agency, a portion of such a structure may be designated for commercial use on a lease basis. RHS funds may not be used to finance any cost associated with the commercial space.

(c) Site development costs and standards. The cost of site development must be less than or comparable to the cost of site development at other available sites in the community and the site must be developed in accordance with 7 CFR part 1924, subpart C and any applicable standards imposed by a state or local government.

(d) Densities. Allowable site densities will be determined based on the following criteria:

(1) Compatibility and consistency with the community in which the MFH is located;

(2) Impact on the total development costs; and

(3) Size sufficient to accommodate necessary site features.

(e) Flood or mudslide-prone areas. (1) The Agency will not approve sites subject to 100-year floods when non-floodplain sites exist. The environmental review process will assess the availability of a reasonable site outside the 100-year floodplain.

(2) Sites located within the 100 year floodplain are not eligible for federal financial assistance unless flood insurance is available through the National Flood Insurance Program (NFIP). The Agency will complete Federal Emergency Management Agency (FEMA) Form 81–93, Standard Flood Hazard Determination, to document the site's location in relation to the floodplain and the availability of insurance under NFIP.

§ 3560.60 Design requirements.

(a) Standards. All Agency-financed MFH will be constructed in accordance with 7 CFR part 1924, subpart A and will consist of two or more rental units plus appropriate related facilities. Single family structures may be used for group homes and cooperative housing. Also, manufactured homes may be used to create MFH and single family housing originally financed through section 502 of the Housing Act of 1949 may be converted to MFH. Maintenance requirements are listed in §3560.103(a)(3).

(b) Residential design. All MFH must be residential in character, except as provided for in §3560.58(b), and must meet the needs of eligible residents.

(c) Economical construction, operation and maintenance. Taking into consideration life-cycle costs, all housing must be economical to construct, operate, and maintain and must not be of elaborate design or materials.

(1) Economical construction means construction that results in housing of at least average quality with amenities that are reasonable and customary for the community and necessary to appropriately serve tenants.

(2) Economical operating and maintenance means housing with operational and maintenance costs that allow a basic rent structure less than or consistent with conventional rents for comparable units in the community or in a similar community except that when determined necessary by the Agency to allow for decent, safe and
Rural Housing Service, USDA § 3560.61

sanitary housing to be provided in market areas where conventional rents are not sufficient to cover necessary operating, maintenance, and reserve costs. Basic rents may be allowed to exceed comparable rents for conventional units, but in no case may the rent exceed 150% of the comparable rent for conventional unit rent level.

(3) In meeting the Agency objective of economical construction, operation and maintenance, housing proposals must:
   (i) Contain costs without jeopardizing the quality and marketability of the housing;
   (ii) Employ life-cycle cost analyses acceptable to the Agency to determine the types of materials which will reduce overall costs by lowering operation and maintenance costs, even though their initial costs may be higher; and
   (iii) Provide assurances that costs will be reduced when the Agency determines that housing costs are not economical. If assurances cannot be provided, funding may be withdrawn.

(4) The housing proposal will give maximum consideration to energy conservation measures and practices.

(d) Accessibility. All housing will meet the following accessibility requirements.

(1) For new construction of MFH, at least 5 percent of the units (but not less than one) must be constructed as fully accessible units to persons with disabilities. The Uniform Federal Accessibility Standards (UFAS) will be followed. Individual copies of these standards are available from the Architectural and Transportation Barriers Compliance Board, 1331 F Street, NW, Suite 1000, Washington, DC 20004–1111. Telephone: (202) 272–0080, TTY: (202) 272–0082, e-mail address: info@access-board.gov. When calculating how many accessible units are required, always round up to the next whole number to ensure the 5 percent requirement is met.

(2) For existing properties that do not have fully accessible units, the 5 percent requirement will apply when making substantial alterations as defined by UFAS. The UFAS defines substantial alteration as “alteration to any building or facility is to be consid-
§ 3560.62 Technical, legal, insurance, and other services.

(a) Legal services. Applicants must have written contracts for any legal services that are to be paid out of Agency loan funds.

(b) Title clearance. Applicants must obtain title clearance in accordance with the provisions of 7 CFR part 1927, subpart B applicable to title clearance, which would include title insurance or title opinion, unless the loan applicant is leasing the property or is an organization or an individual with special title or loan closing problems, in which case title clearance and related legal services will be obtained in accordance with procedures approved by the Agency.

(c) Architectural services. Applicants must obtain a written contract for architectural services in accordance with the provisions of 7 CFR part 1924, subpart A.

(d) Insurance. Applicants must have property and liability coverage at loan closing as well as flood insurance, if needed. Fidelity coverage must be in force as soon as there are assets within the organization and it must be obtained before any loan funds or interim financing funds are made available to the borrower. At a minimum, applicants must meet the property, liability, flood, and fidelity insurance requirements in §3560.105.

(e) Surety bonding. Applicants must comply with the surety bonding provisions of 7 CFR part 1924, subpart A.

§ 3560.63 Loan limits.

(a) Determining the security value. The security value for an Agency loan is the lesser of the total development cost (exclusive of any developer’s fee as provided by paragraph (d)(2) of this section) or the housing project’s security value as determined by an appraisal conducted in accordance with subpart P of this part, minus any prior or parity liens on the housing project. For purposes of determining security value:

(1) Total development cost must be calculated excluding costs not considered allowable under §3560.54(a), and excluding costs related to compliance with the Uniform Relocation Assistance and Real Property Acquisition Act of 1970.
(2) The appraisal, which will determine the market value, subject to restricted rents, will be obtained by the Agency and conducted in accordance with subpart P of this part.

(b) Limitations on loan amounts. The Agency will not make any loans without adequate security. The following limitations will be set on loan amounts:

(1) For all loan applicants who will receive benefits from the low-income housing tax credit program, the amount of Agency financing for the housing will not exceed 95 percent of the security value available for the Agency loan.

(2) For all loan applicants who will not receive low-income housing tax credit benefits and who are comprised solely of nonprofit organizations, consumer cooperatives, or state or local public agencies, the amount of the loan will be limited to the security value available for the Agency loan, plus the 2 percent initial operating capital and any necessary relocation costs incurred.

(3) For all other loan applicants who will not receive low-income housing tax credit benefits, the loan amount will be limited to no more than 97 percent of the security value available for the Agency loan.

(c) Equity contribution. Loan applicants, with the exception of nonprofit organizations, consumer cooperatives, or state or local public agencies who will not be receiving tax credits, must make an equity contribution from their own resources.

(1) Loan applicants who will receive benefits from the low-income housing tax credit program must make an equity contribution in the amount of 5 percent of the agency loan. The maximum agency loan will be determined in accordance with §3560.63(b).

(2) Loan applicants who will not receive benefits from the low-income housing tax credit program and are not nonprofit organizations, consumer cooperatives, or state or local public agencies must make an equity contribution in the amount of 3 percent of the agency loan. The maximum agency loan will be determined in accordance with §3560.63(b).

(d) Review of assistance from multiple sources. The Agency will analyze Federal Government and other assistance provided to any MFH project to establish the maximum loan amount and to assure that the assistance is not more than the minimum necessary to make the housing affordable, decent, safe, and sanitary to potential tenants.

(1) Determining minimum assistance. For purposes of determining minimum assistance, the total amount paid for builder's profit, overhead, and general requirements may not exceed 21 percent of the construction contract. Unless specified differently in a Memorandum of Understanding between the Agency and the state agency that allocates low-income housing tax credits, limits will be those specified in §3560.53(l).

(2) Developer's fee. While, in accordance with §3560.54(a)(9), payment of a developer's fee is not an eligible use of Agency loan funds, the Agency will include in total development costs a developer's fee paid from other sources when analyzing the Federal Government assistance to the housing. The Agency may recognize a developer's fee paid from other sources on construction or rehabilitation of up to 15 percent of the total development costs authorized for low-income housing tax credit purposes, or by another Federal Government program. Likewise for transfer proposals that include acquisition costs, the developer's fee on the acquisition cost may be recognized up to 8 percent of the acquisition costs only when authorized under a Federal Government program providing assistance. The developer's fee is not included in determining the Agency's maximum debt limit and loan amount.

(e) Limits on equity loans. For equity loans to avert prepayment, the amount of the Agency equity loan will be limited to no more than the difference between 90 percent of market value of the property when appraised as conventional unsubsidized MFH and all current unpaid balances. For information on appraisal issues, refer to subpart P of this part.

(f) Cost overruns. (1) All applicants must agree in writing to provide funds at no cost to the housing and without pledging the housing as security to pay
any cost for completing planned construction after the maximum debt limit is reached.

(2) After loan approval, the Agency will only approve cost increases for housing proposals involving new construction or major rehabilitation when the additional costs will not cause the limits specified in §3560.53(l) or the maximum debt limit to be exceeded and the cost increases were caused by:

(i) Unforeseen factors that are determined by the Agency to be beyond the borrower’s control;

(ii) Design changes required by the Agency, state, or the local government; or

(iii) Financing changes approved by the Agency.

§3560.64 Initial operating capital contribution.

Borrowers are required to make an initial operating capital contribution to the general operating account in the amount of at least 2 percent of the total development cost or appraised value, whichever is less.

(a) Borrowers that are nonprofit organizations, consumer cooperatives, or state or local public agencies and are not receiving low-income housing tax credits, may use loan funds for their initial operating capital contribution. All other borrowers must fund the initial operating capital contribution from their own resources.

(b) Borrowers must provide to the Agency for approval a list of materials and equipment to be funded from the general operating account for initial operating expenses. As specified in §3560.304(b), initial operating capital may be used only to pay for approved budgeted expenses. If total initial operating expenses exceed 2 percent, the additional amount must be paid by the borrower from its own resources, except that borrowers meeting the provisions of §3560.64(a) who do not have sufficient resources for this purpose may request Agency assistance. Withdrawals from the reserve account will not be approved for such expenses.

(c) Borrowers must provide the Agency with documentation of their initial operating capital contribution deposited into the general operating account prior to the start of construction or loan closing, whichever comes first, and such funds thereafter, may only be used for authorized budgeted purposes.

(d) If the conditions specified in §3560.304(c) are met, funds contributed as initial operating capital may be returned to the borrower.

§3560.65 Reserve account.

(a) For new construction, to meet major capital expenses of a housing project, applicants must establish and fund a reserve account that meets the requirements of §3560.306. The applicant must agree to make monthly contributions to the reserve account pursuant to a reserve account analysis which sets forth how the reserve account funds will meet the capital needs of the property over an acceptable 20-year period. The reserve account analysis is based on either a Capital Needs Assessment or life cycle cost analysis, provided and acceptable to Rural Development by the applicant. Adjustments may be made to the contribution amount at 5 or 10-year intervals, either through an updated Capital Needs Assessment or life cycle cost analysis will be paid for by the applicant. The cost of the initial Capital Needs Assessment or life cycle cost analysis may be included in the loan financing.

(b) For ownership transfers or sales, the requirements of §3560.406(d)(5) will be met.

(c) For other existing properties, at a minimum the borrower must agree to make monthly contributions to the reserve account at the rate of 1 percent annually of the amount of total development cost until the reserve account equals 10 percent of the total development cost.

§3560.66 Participation with other funding or financing sources.

(a) General requirements. The Agency encourages the use of funding or financing from other sources in conjunction with Agency loans. When the Agency is not the sole source of financing for MPF, the following conditions must be met.
(1) The Agency will enter into a participation (or intercreditor) agreement with the other participants that clearly defines each party’s relationship and responsibilities to the others.

(2) The rental units that will serve tenants eligible for housing under the Agency’s income standards must meet Agency standards and the number of units that will serve the Agency’s tenants are at least equal to the units financed by the Agency.

(3) All rental units must be operated and managed in compliance with the requirements of the Agency and the other sources. To the extent these requirements overlap, the most stringent requirement must be met. The Agency may negotiate the resolution of overlapping requirements on a case-by-case basis; however, at a minimum, Agency requirements must be met.

(4) If the number of units subject to the LIHTC rent and income restrictions is greater than the number of units projected to receive Agency rental assistance (RA) or similar tenant subsidy, the market feasibility documentation must clearly reflect a need and demand by LIHTC income-eligible households financially able to afford the projected rents without such a subsidy for the units not receiving RA or similar tenant subsidy.

(b) Rental assistance. The Agency may provide rental assistance with MFH loans participating with other sources of funding under the following conditions:

(1) The Agency’s loan equals at least 25 percent of the housing’s total development cost.

(2) The rental assistance is provided only to those rental units where the basic rents do not exceed what basic rents would have been had the Agency provided full financing.

(3) The provisions of subpart F of this part are met.

(c) Security requirements. The security requirements of §3560.61 must be met for all Agency-financed MFH participating with other sources of funding.

(d) Reserve requirements. Reserve account requirements will be determined on a case-by-case basis, taking into consideration the reserve requirements of the other participating lenders, so that the aggregate fully funded reserve account is consistent with the requirements of §3560.65. Reserve requirements and procedures for reserve account withdrawals must be agreed upon by all lenders and included in the intercreditor or participation agreement.

(e) Design requirements. Housing and related facilities must be planned and constructed in accordance with 7 CFR 1924, subparts A and C. If housing includes non-Agency financed common facilities, the following conditions must be met:

(1) The non-Agency-financed common facility’s operating and maintenance costs must be paid through collection of a user fee from residents who use the facility.

(2) The non-Agency-financed common facility must be designed and operated with appropriate safeguards for the health and safety of tenants, and

(3) The facility must be fully available and accessible to all tenants.

§ 3560.67 Rates and terms for section 515 loans.

Rates and terms for farm labor housing loans are found in subpart L of this part for Off-Farm and subpart M of this part for On-Farm.

(a) Interest. Loans will be closed at the lower of the interest rate in effect at the time of loan approval or the interest rate that is in effect at time of loan closing.

(b) Interest credit. The Agency will provide interest credit to subsidize the interest on the Agency loan to a payment rate of 1 percent for all of the Agency’s initial and subsequent loans.

(c) Amortization period and term. (1) Except for manufactured housing, loans will be amortized over a period not to exceed the lesser of the economic life of the housing being financed or 50 years and paid over a term not to exceed 30 years from the date of loan. The Agency may make a loan to the borrower to finance the final payment of a loan in accordance with §3560.74.

(2) Loans for manufactured housing will be amortized and paid over a term not to exceed 30 years as specified in §3560.70(c).
§ 3560.68 Permitted return on investment (ROI).

(a) Permitted return. Borrowers operating on a limited profit basis will be permitted a return not to exceed 8 percent of their required initial investment determined at the time of loan approval in accordance with §3560.63(c).

(b) Calculation of permitted return. The permitted return will be based on the borrower’s contributions from their own resources, which, when added to the Agency loan amount and all sources of funding or financing, do not exceed the security value of the MFH project as specified in §3560.63(a).

(1) Proceeds received by the borrower from the syndication of low-income housing tax credit and contributed to the MFH project may be considered funds from the borrower’s own resources for the portion of the proceeds which exceeds:

(i) The allowable developer’s fee determined by the state agency administering the low-income housing tax credit, and

(ii) The borrower’s expected contribution to the transaction, as determined by the state agency administering the low-income housing tax credit.

(2) A building site contributed by the borrower will be appraised by the Agency to determine its market value. A return may not be allowed on the amount above the equity contribution required by §3560.63(c) if the market value as determined by the Agency, when added to the loan and grant amounts from all sources, exceeds the security value of the MFH project as specified in §3560.63(a).

(c) Return on additional investment. The initial investment may exceed the equity contribution required by §3560.63(c) and a return allowed on the investment if the additional return does not increase basic rents and rental assistance costs above what basic rents and rental assistance costs would have been with the Agency financing 95 or 97 percent of the total development cost.

(d) Compensation to nonprofit organizations. Although nonprofit organizations are not eligible to take a return on investment, with prior Agency approval, cooperatives and nonprofit organizations may use housing project funds to pay asset management expenses directly attributable to ownership responsibilities, as described in §3560.303(b)(1)(ii).

§ 3560.69 Supplemental requirements for congregate housing and group homes.

(a) General. Congregate housing and group homes must be planned and developed in accordance with 7 CFR part 1924, subparts A and C.

(b) Design criteria. Congregate housing and group homes must be designed to accommodate all special services that will be provided.

(c) Services. Congregate housing and group home loan applicants, as part of their loan request, must submit a plan to make affordable services available to residents to assist the residents in living independently. The plan must address the availability of this assistance from service providers throughout the term of the loan.

(1) For congregate housing, the resident services plan must address how the following services will be provided or made available:

(i) One cooked meal per day, seven days per week;

(ii) Transportation to and from the property;

(iii) Assistance in housekeeping;

(iv) Personal services;

(v) Recreational and social activities; and

(vi) Access to medical services.

(2) For group homes, the resident services plan must address how access to the following services will be provided or made available:

(i) A common kitchen in which to prepare meals;

(ii) Transportation;

(iii) Nearby recreational and social activities which may be coordinated by the resident assistant, if applicable; and

(iv) Medical services as necessary.

(d) Necessary items. Borrowers must ensure items such as tables, chairs, and cookware necessary to furnish common areas are made available to congregate housing or group homes. The 2 percent initial operating capital may be used to purchase these items.

(e) Association with other organizations. Congregate housing and group homes may coordinate services or
training with another organization, such as a workshop for the developmentally disabled. However, the housing facility must be a separate entity and not dependent on the other organization.

(f) Market feasibility documentation. Market feasibility documentation for congregate housing and group homes is subject to the following requirements:

(1) Must address the need for housing with services and include information concerning alternative service providers;
(2) Must contain demographic information pertaining to the population that is to be served by the congregate housing or group home project; and
(3) May consider an expanded market area that includes nondesignated places, but the facility must be located in a designated place.

(g) Rental assistance for group homes. A unit in a group home consists of a space occupied by a specific tenant household, which may be an apartment unit, a bedroom, or a part of a bedroom. Agency rental assistance will be made available to tenants sharing a unit so long as the total rent for the unit does not exceed conventional rents for comparable units in the area or a similar area.

§ 3560.70 Supplemental requirements for manufactured housing.

(a) Design requirements. Manufactured housing must meet the requirements of 7 CFR part 1924, subpart A applicable to manufactured housing.

(b) Eligible properties. The manufactured housing must include two or more housing units. The applicant will become the first owner purchasing the manufactured homes for purposes other than resale. The following exceptions may be made to this provision:

(1) A housing proposal may include the purchase of the real property with existing manufactured housing which will be redeveloped with the placement of new manufactured homes.

(2) A housing proposal may include the rehabilitation of existing manufactured housing only if the units to be rehabilitated are currently financed by the Agency. The proposal will include the results of the applicant’s consultation with the manufacturer to determine if the proposed rehabilitation work will affect the structural integrity of the unit and, if so, the statement will include an explanation as to how.

(c) Terms. The maximum loan amount will be determined in accordance with the requirements of §3560.63. The amortization period and term of loans for manufactured housing will not exceed the lesser of the economic life of the housing being financed or 30 years.

(d) Security. A mortgage or deed of trust will be taken on the entire property purchased or improved with the loan. The encumbered property must be covered under a standard real estate title insurance policy or attorney’s title opinion that identifies the housing as real property and insures or indemnifies against any loss if the manufactured home is determined not to be part of the real property. The property must be taxed as real estate by the jurisdiction where the housing is located if such taxation is permitted under applicable law when the loan is closed.

(e) Special warranty requirements. The general contractor or dealer-contractor, as applicable, must provide a warranty in accordance with the provisions of 7 CFR part 1924, subpart A.

(1) The warranty must establish that the manufactured homes, foundations, positioning and anchoring of the units to their permanent foundations, and all contracted improvements, are constructed in conformity with applicable approved plans and specifications.

(2) The warranty must include provisions that the manufactured homes sustained no hidden damage during transportation and, for double-wide units, that the sections were properly joined and sealed.

(3) The general contractor or dealer contractor must warrant that the manufactured homes, foundations, rights, and remedies that the borrower or lender may have.

(4) The seller of the manufactured homes must deliver to the borrower the manufacturer’s warranty with an additional copy for RHS. The warranty must identify the units by serial number.
§ 3560.71 Construction financing.

(a) Construction financing plan. Prior to loan approval, applicants must submit to the Agency for its concurrence a plan for the construction financing and securing of the loan.

(b) Interim financing. Interim financing is required by the Agency for any construction, except as noted in paragraph (c) of this section.

(1) The Agency reserves the right to review and approve the interim financing arrangements proposed by the applicant.

(2) When interim financing is used, the agency will obligate the funds and provide an interim financing letter to the lender that will confirm the procedures and conditions for the construction financing. The take-out loan will be closed and the interim lender paid off when the conditions of the interim financing letter have been met.

(3) The applicable provisions of 7 CFR part 1924, subpart A will be used to monitor the construction.

(4) An environmental review must be completed in accordance with 7 CFR part 1940, subpart G, prior to issuance of the interim financing letter.

(c) Multiple advances. When interim financing is not available or when it is in the best interest of the Federal Government, the Agency may provide for multiple advances of the funds to cover the cost of construction.

(1) The Agency will review and approve the multiple advances proposed by the borrower.

(2) When multiple advances are used, the Agency will close the loan prior to any advancement of funds and the relevant provisions of 7 CFR part 1924, subpart A will be used to monitor the construction.

(3) The loan check will be handled in accordance with 7 CFR part 1902, subpart A.

§ 3560.72 Loan closing.

(a) Requirements. Loans will be closed in accordance with 7 CFR part 1927, subpart B and any state supplements. In all cases, the borrower must:

(1) Provide evidence that an Agency-approved accounting system is in place;

(2) Execute a restrictive-use contract acceptable to the Agency that establishes the borrower’s obligation to operate the housing for program purposes for the term of the Agency loan;

(i) For all section 514 loans, except as provided in §3560.621, made pursuant to a contract entered into on or after the effective date of this regulation, the following language will be included in the mortgage and deed of trust: “The borrower and any successors in interest agree to use the housing for the purpose of housing people eligible for occupancy as provided in sections 514 and 516 of title V of the Housing Act of 1949, and Rural Housing Service regulations then in effect. The restrictions are applicable for a term of 20 years from the date on which the last loan was closed. No eligible person occupying the housing will be required to vacate nor any eligible person denied occupancy for housing prior to the close of such period because of a prohibited change in the use of the housing. A tenant or person wishing to occupy the housing may seek enforcement of this provision as well as the Government.”

(ii) All other loans are subject to restrictive-use provisions as outlined in subpart N of this part.

(3) Provide evidence that construction financing arrangements are adequate when interim financing is going to be used;

(4) Provide evidence that all the funds from other sources as proposed in the application are available and that there have been no changes in the Sources and Uses Comprehensive Evaluation (SAUCE).

(5) Provide evidence of the title to all security required by the Agency;

(6) Provide a certification that all construction in the case of interim financing has been or, in the case of multiple advances, will be paid;

(7) Provide, in the case of interim financing, a dated and signed statement from the owner’s architect certifying to substantial completion of the housing project;

(8) Provide a certification that all construction in the case of interim financing has been or, in the case of multiple advances, will be in accordance with the plans and specifications concurred in by the Agency;
(9) Provide evidence, if applicable, that the conditions of the interim financing letter have been met; and
(10) Attend a pre-occupancy conference with the Agency.

(b) Cost certification. In all cases, the borrower must report actual construction costs. Whenever the State Director determines it appropriate, and in all situations where there is an identity of interest as defined in 7 CFR 1924.4 (i), the borrower, contractor and any subcontractor, material supplier, or equipment lessor having an identity of interest must each provide certification as to the actual cost of the work performed in connection with the construction contract in accordance with 7 CFR part 1924, subpart A. The construction costs must also be audited in accordance with Governmental Auditing Standards, by a Certified Public Accountant (CPA). In some cases, the Agency will contract directly with a CPA for the cost certification. Funds that were included in the loan for cost certification and which are ultimately not needed because Agency contracts for the cost certification will be returned on the loan. Agency personnel will utilize exhibit M of 7 CFR part 1924, subpart A to assist in the evaluation of the cost certification process.

(c) Notification of loan cancellation. Loans may be canceled after approval and before loan closing. The Agency will notify all parties of the cancellation and the reasons for the cancellation in accordance with 7 CFR part 1927, subpart B.

§ 3560.73 Subsequent loans.

(a) Applicability. The Agency may make a subsequent loan to a borrower to complete, improve, repair, or make modifications to MH initially financed by the Agency or for equity for preservation purposes. Loan requests to add units to comply with accessibility requirements may be processed as a subsequent loan; however, loan requests to add units to meet market demand will be processed as an initial loan request and must compete under the NOFA.

(b) Application requirements and processing. Upon receipt of a subsequent loan request, the Agency will inform the applicant what information is required based on the nature and purpose of the loan request. Subsequent loan requests do not have to compete for funding against initial loan proposals.

(c) Amortization and payment period. Subsequent loans will be amortized over a period not to exceed the lesser of the economic life of the housing being financed or 50 years and paid over a term not to exceed the lesser of the economic life of the housing or 30 years from the date of the loan.

(d) Equity contribution. Applicants for subsequent loans must make contributions on the loans in the same proportion as outlined in §3560.63(c). Loan applicants will not be given consideration for any increased equity value that the property may have since the initial loan.

(1) Excess initial investment on an initial loan may be credited toward the required investment on a subsequent loan.

(2) An initial operating capital contribution to the general operating account as described in §3560.64 is required for a subsequent loan approved under the conditions set in §3560.63(f) to complete housing construction but is not required for a subsequent loan to repair or improve existing housing.

(e) Environmental requirements. Subsequent loans are subject to the completion of an environmental review in accordance with 7 CFR part 1940, subpart G.

(f) Design requirements. All improvements, repairs, and modifications will be in accordance with 7 CFR part 1924, subparts A and C.

(g) Architectural services. The applicant must obtain architectural services when any of the following conditions exist:
(1) Enclosed space is being added,
(2) When required by state law, and
(3) When the Agency determines that the work being proposed requires architectural services.

(h) Restrictive-use requirements. Subsequent loans are subject to restrictive-use provisions as outlined in §3560.662(a) and borrowers must execute a restrictive-use contract in accordance with §3560.72(a)(2).

(i) Designation changes from rural to nonrural. If the designation of an area changes from rural to nonrural after
§ 3560.74 Loan for final payments.

(a) Use. The Agency may finance final payments for borrowers holding existing loans for which the Agency approved an amortization period that exceeded the term of the loan.

(b) Requirements. The Agency may finance final payments if documentation regarding the market area shows that a need for low-income rental housing still exists for that area and one of the following conditions has been met.

(1) It is more cost efficient and serves the tenant base more effectively to maintain existing MFH than to build another property in the same location; or

(2) The MFH has been maintained to such an extent that it can be expected to continue providing affordable, decent, safe and sanitary housing for 20 years beyond the date of the loan to finance a final payment; and

(3) Funds are available.

(c) Term. The term of Agency loans to finance final payments will not exceed 20 years from the date of the initial loan final payment.

§§ 3560.75–3560.99 [Reserved]

§ 3560.100 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart C—Borrower Management and Operations Responsibilities

§ 3560.101 General.

This subpart sets forth borrower obligations regarding management and operations of multi-family housing (MFH) projects financed by the Agency. As noted in §3560.6, the borrower requirements listed in this subpart must be complied with by the borrower. The borrower may designate in writing a person to act as the borrower’s authorized agent.

§ 3560.102 Housing project management.

(a) General. Borrowers hold final responsibility for housing project management and must ensure that operations comply with the terms of all loan or grant documents, Agency requirements and applicable local, state and Federal laws and ordinances. Project operations shall be conducted to meet the actual needs and necessary expenses of the property or for any other purpose authorized under Agency regulations. Any party not meeting these responsibilities may be subject to penalties. It is expected that only typical and reasonable expenses be incurred for the services rendered. Consequently, methods to inflate, duplicate, obscure, or failure to disclose the true nature and cost of work performed for the services rendered will cause the Agency to deny budget requests for the services or issue a demand for recovery and reimbursement for unauthorized actions.

(b) Management plan. Borrowers must develop and maintain a management plan for each housing project covered by their loan or grant. The management plan must establish the systems and procedures necessary to ensure that housing project operations comply with Agency requirements.

(1) At a minimum, management plans must address the following items:

(i) Maintenance systems, including procedures for routine maintenance, capital item repair and replacement,
and effective energy conservation practices:

(ii) Personnel policies, job descriptions, staffing plans, training procedures for on-site staff. The Borrower will include specific duties and responsibilities of each property manager, site manager and caretaker;

(iii) Front-line management functions to be performed by off-site staff;

(iv) Plans and procedures for providing supplemental services including laundry, vending, and security;

(v) Plans for accounting, record keeping and meeting Agency reporting requirements;

(vi) Procurement procedures;

(vii) Rent and occupancy charge collection procedures, and procedures for requesting and implementing changes in rents, utility allowances, or occupancy charges;

(viii) Plans and procedures for marketing rental units and maintaining compliance with the Affirmative Fair Housing Marketing Plan in accordance with §3560.104;

(ix) Unit leases and leasing policies and procedures, including procedures for maintaining and purging waiting lists, determining applicant eligibility, certifying and recertifying income, tenant selection, and occupancy policies such as security deposit amounts, occupancy rules, termination of leases or occupancy agreements and eviction;

(x) Plans for allowing tenant participation in property operations and for fostering tenant relationships with management;

(xi) Procedures for applicant and tenant appeals; and

(xii) Describe how management will make known to tenants and applicants that management will provide reasonable accommodations under the Fair Housing Act, section 504 of the Rehabilitation Act of 1973, and regulations implemented thereunder at the borrower's expense unless to do so would cause an undue financial or administrative burden, how such requests are to be made, and who within management will have the authority to approve or disapprove a request for an accommodation.

(2) Loan or grant applicants must submit a management plan before the Agency will give final approval to the loan or grant application. The plan must address the required items identified in paragraph (b)(1) of this section in sufficient detail to enable the Agency to monitor housing project performance.

(c) Management plan effective period. A management plan remains in effect as long as it accurately reflects housing project operations and the housing project is in compliance with the Agency requirements.

(1) Borrowers must submit an updated management plan to the Agency if operations change or are no longer consistent with the management plan on file with the Agency.

(2) When there are no changes in operations, borrowers must submit a certification to the Agency every 3 years stating that operations are consistent with the management plan and the plan is adequate to assure compliance with the loan and grant documents and Agency requirements or applicable local, state and Federal laws.

(3) If the Agency determines that operations are in compliance with Agency requirements, loan or grant agreements, or applicable local, state, and Federal laws, but are not consistent with the management plan, the Agency will require the borrower to:

(i) Revise the management plan to accurately reflect housing operations;

(ii) Take actions to ensure the management plan is followed; or

(iii) Advise the Agency in writing of the action taken.

(4) When a housing project is being transferred from one borrower to another, the transferee must submit a management plan that addresses the required items identified in paragraph (b)(1) of this section in sufficient detail to enable the Agency to give final approval of the transfer.

(d) Housing projects with compliance violations. Upon receiving notice of compliance violations in accordance with §3560.354, borrowers must submit to the Agency:

(1) Revisions to the management plan establishing the changes in housing operations that will be made to restore compliance;

(2) If the borrower determines the compliance violations were due to a failure to follow the management plan,
the borrower must certify to the Agency that the management plan is adequate to assure compliance with the applicable requirements of this part and submit a written description of the actions they will take to ensure the management plan is followed; or

(d) If the Agency discovers continued discrepancies between a management plan and housing project operations or compliance violations, the Agency may require the borrower to install a different management agent acceptable to the Agency as described in paragraph (e) of this section.

(e) Acceptable management agents. Borrowers must obtain Agency approval of the agent proposed to manage a housing project prior to entering into any formal agreement with the agent and prior to allowing the agent to assume responsibility for housing project operations. Borrowers that plan to self-manage a housing project also must receive Agency approval before assuming responsibility for housing operations.

(1) Borrowers must submit a written request for Agency approval of the proposed management agent at least 45 days prior to the date the agent is to assume responsibility for operations. This request must include a profile of the proposed management agent that provides sufficient information to allow the Agency to evaluate whether the agent is acceptable.

(2) The Agency will deny approval of any proposed management agent that cannot provide evidence of at least two years of experience and satisfactory performance in directing and overseeing the management of similar federally-assisted MFH.

(3) The Agency may issue approval of a management agent that does not meet the requirements of §3560.102(e)(2) if the management agent can provide evidence that indicates the ability to successfully manage a MFH project in accordance with Agency requirements.

(4) If a borrower enters into an agreement with a management agent or begins to self-manage prior to receiving Agency approval, the Agency will place the borrower in non-monetary default status and will require the borrower to immediately terminate the contract with the management agent.

(f) Self-management. Borrowers may self-manage a housing project but must receive Agency approval before assuming responsibility for housing operations. Borrowers that plan to self-manage must meet all requirements of §3560.102, except for paragraph (h) of this section.

(g) Identity-of-interest disclosure. Borrowers and management agents must disclose to the Agency all identity-of-interest relationships which they have with firms and must receive Agency approval to use such firms prior to entering into any contractual relationships with such entities that involve Agency funds.

(1) This disclosure must include any identity-of-interest relationships between:

(i) The borrower and the management agent;

(ii) The borrower or management agent and the providers of supplies and services to the housing project; and

(iii) The borrower or the management agent and employees of any of the above.

(2) Failure to disclose such relationships may subject the borrower, the management agent, and the other firms or employees found to have an identity of interest relationship to suspension, debarment, or other remedies available to the Agency.

(3) After disclosure of an identity-of-interest relationship:

(i) The borrower, management agent, and supplier of goods and services must provide documentation proving that use of identity-of-interest firms is in the best interest of the housing project;

(ii) Any supplier of goods and services must certify in writing to the Agency that the individual or organization has a viable, on-going trade or business qualified and licensed, if appropriate, to do the work for which a contract is being proposed;

(iii) The borrower, management agent, and supplier of goods and services must agree, in writing, that all records related to the housing project will be made available to the Agency, Office of the Inspector General (OIG), General Accountability Office (GAO), or a representative of the Agency, upon request; and
(iv) The Agency will deny the use of an identity-of-interest firm when the Agency determines such use is not in the best interest of the Federal Government or the tenants.

(h) Management agreement. Borrowers contracting with a management agent must execute a management agreement that establishes:

(1) The management agent's responsibility to comply with Agency requirements and local, state, and Federal laws;

(2) That the management fee is payable out of the housing project's general operating account consistent with the requirements of paragraph (i) of this section; and

(3) The Agency's authority to terminate the agreement for failure to operate the housing project in accordance with Agency requirements or local, state, or Federal laws.

(i) Management fees. Management fees will be an allowable expense to be paid from the housing project's general operating account only if the fee is approved by the Agency as a reasonable cost to the housing project and documented on the management certification. Management fees must be developed in accordance with the following:

(1) The management fee may compensate the management entity only for the specifically identified bundle of services to be provided to the housing project. Costs and services to be paid as part of the bundle of services include:

   (i) Supervision by the management agent and its staff (time, knowledge, and expertise) of overall operations and capital improvements of the site.

   (ii) Hiring, supervision, and termination of on-site staff.

   (iii) General maintenance of project books and records (general ledger, accounts payable and receivable, payroll, etc.). Preparation and distribution of payroll for all on-site employees, including the costs of preparing and submitting all appropriate tax reports and deposits, unemployment and workers' compensation reports, and other IRS- or state-required reports.

   (iv) Training provided to on-site staff at the project site.

   (v) Preparation and submission of proposed annual budgets and negotiation of approval with the Agency, other governmental agencies and the borrowers.

   (vi) Preparation and distribution of the Agency or other governmental agency forms and routine financial reports to borrowers.

   (vii) Preparation and distribution of required year-end reports to the Agency or other governmental agency and borrowers.

   (viii) Preparation of requests for reserve withdrawals, rent increases, or other required adjustments.

   (ix) Arranging for preparation by outside contractors of energy audits and utility allowance analysis. Implement appropriate changes.

   (x) Preparation and implementation of Affirmative Fair Housing Marketing Plans as well as general marketing plans and efforts.

   (xi) Review of tenant certifications and submission of monthly rental assistance requests, and overage. Submission of payments where required.

   (xii) Preparation, approval, and distribution of operating disbursements; oversight of project receipts; and reconciliation of deposits.

   (xiii) Overhead of management agent, including:

      (A) Establish, maintain, and control an accounting system sufficient to carry out accounting supervision responsibilities.

      (B) Maintain agent office arrangements, staff, equipment, furniture, and services necessary to communicate effectively with the properties, the Agency or other governmental agency and with the borrowers.

      (C) Postage expenses related to the normal responsibility for mailings to the properties, the Agency or other governmental agency, the tenants, the vendors, and the owners.

      (D) Expense of telephone and facsimile communication to the properties, tenants, the Agency or other governmental agency, and the borrowers.

      (E) Direct costs of insurance (fidelity bonds covering central office staff, computer and data coverage, general liability, etc.) directly related to protection of the funds and records of the borrower.
§ 3560.102

(F) Central office staff training and ongoing certifications.

(G) Maintenance of all required profession and business licenses and permits. (This does not include project site office permits or licenses.)

(H) Insurance coverage for agent’s office and operations (Property, Auto, Liability, E&O, Casualty, Workers Compensation, etc.)

(I) Travel of agent staff to the properties for on-site inspection, training, or supervision activities.

(J) Agent bookkeeping for their own business.

(xiv) Attendance at meetings (including travel) with tenants, owners, and the Agency or other governmental agency.

(xv) Development, preparation, and revision of management plans or agreements.

(xvi) Coordination of U.S. Department of Housing and Urban Development (HUD) certifications or vouchers with tenants, including all reporting to all pertinent agencies and borrowers.

(xvii) Directing the investment of project funds into required accounts.

(xviii) Maintenance of bank accounts and monthly reconciliations.

(xix) Preparation, request for, and disbursement of borrower’s initial operating capital (for new projects) as well as administration of annual owner’s return on investment.

(xx) Account maintenance, settlement, and disbursement of security deposits.

(xxi) Working with third party auditors for initial set-up of audits and annually thereafter for audit preparation and review. Assistance with supplemental letters and preparation of Agency financial reports or other governmental agency reports.

(xxii) Storage of records and adherence to records retention requirements.

(xxiii) Assist on-site staff with tenant relations and problems. Provide assistance to on-site staff in severe actions (eviction, death, insurance loss, etc.).

(xxiv) Oversight of general and preventive maintenance procedures and policies.

(xxv) Development and oversight of asset replacement plans.

(xxvi) Oversight of preparation of section 504 reviews, development of plans, and implementation of improvements necessary to comply with plans and section 504 requirements.

(xxvii) Reporting to general and limited partners and State agencies for Low Income Housing Tax Credit (LIHTC)-compliance purposes.

(2) Management fees may consist of a base per occupied unit fee and add-on fees for specific housing project characteristics. Management entities may be eligible to receive the full base per occupied unit fee for any month or part of a month during which the unit is occupied.

(i) Periodically, the Agency will develop a range of base per occupied unit fees that will be paid in each state. The Agency will develop the fees based on a review of housing industry data. The final base for occupied unit fees for each state will be made available to all borrowers.

(ii) Periodically, the Agency will develop the amount and qualifications to receive add-on fees. The final set of qualifications will be made available to all borrowers.

(3) Allowable Administrative Expenses. (i) Identifying the Type of Administrative Expense. Management Plans and Agreements must describe if administrative expenses are to be paid from the management fee or paid for as a project cost.

(A) A management plan is required for all projects. The management plan should describe administrative expenses paid from management agent fees or project operations. The management plan should provide job descriptions for the site manager, the management agent and other personnel. It is important that these documents accurately reflect the duties being performed by the various personnel. The management plan must meet the standards set out in this rule.

(B) A task list should be used to identify which services are included in the management fee, which services are included in project operations, and which are pro-rated along with the methodology used to pro-rating of expenses between management agent fees and project operations. Some property responsibilities are completed at the
property and some offsite. Agent responsibilities may be performed at the property, the management office, or at some other location.

(C) Disputes may arise as to who performs certain services. The management plan and job descriptions should normally provide sufficient clarity to avoid or resolve any such disputes; however, sometimes clarifications and supporting materials may be required to resolve disputes. The decision must be made based on the most complete evaluation of the facts presented.

(ii) Allowable Administrative Expenses. Payroll related administrative expenses are allowable expenses. Postage expense to mail out rental applications, third-party (asset income and adjustments to income) verifications, application processing correspondence (acceptance or denial letters), mailing project invoice payments, required correspondence, and report submittals to various regulatory authorities for the managed property are allowable project expenses no matter what location or point of origin the mail is generated. Photocopying or printing expense related to actual production of project brochures, marketing pieces, forms, reports, notices, and newsletters are allowable project expenses no matter what location or point of origin the work is performed including outsourcing the work to a professional printer. Correspondence or reports required for record retention or project compliance are allowable project expenses. The cost or expense of equipment and any related equipment service contract is a management agent direct expense, unless the machine becomes the property of the project after purchase.

(iii) Determining if Expenses are Reasonable. Generally, expenses charged to project operations, whether for management agent services or other expenses, must be reasonable, typical, necessary and show a clear benefit to the residents of the property. Services and expenses charged to the property must show value added and be for authorized purposes. If such value is not apparent, the service or expense should be examined.

(A) Administrative expenses for project operations exceeding 23 percent, or those typical for the area, of gross potential basic rents and revenues (i.e., referred to as gross potential rents in industry publications) highlight a need for closer review for unnecessary expenditures. Budget approval is required and project resources may not always permit an otherwise allowable expense to be incurred if it is not fiscally prudent.

(B) Excessive administrative expenses can result in inadequate funds to meet other essential project needs, including expenditures for repair and maintenance needed to keep the project in sound physical condition. Actions that are improper or not fiscally prudent may warrant budget disapproval and/or a demand for recovery action.

(4) Unallowable Administrative Expenses.

(i) Certain expenses are not allowable such as legal fees, association dues, bonuses or monetary performance awards, parties, computer hardware and some software, and telephone purchases.

(ii) It is inappropriate to charge for legal services to represent any interest other than the borrower’s interest (i.e., representing a general partner or limited partner to defend their individual owner interest is not allowable). Where there is no finding of a borrower’s fault, commercially reasonable legal expenses and costs for defending or settling lawsuits (without admission of liability) are allowable.

(iii) Charging for payment of penalties, including opposition legal fees resulting from an award finding improper actions on the part of the owner or management agent is generally an inappropriate project expense. The party responsible generally pays such expenses for violating the standards or by their insurance carriers.

(iv) Association dues to be paid by the project should only be related to training for site managers or management agents. To the extent that association dues can document training for site managers or management agents related to project activities by actual cost or pro-ration, a reasonable expense may be billed to the project.

(v) It is inappropriate for the project to pay for bonuses or monetary performance awards to site managers or
management agents that are not clearly provided for by the site manager salary contract.

(vi) Billing the project for parties that are large or unreasonable, such as renting expensive party halls or hotel rooms and payment for alcoholic beverages or gifts to management agent staff are also inappropriate.

(vii) It is inappropriate to bill the project for computer hardware, some software, and internal connections that are beyond the scope and size reasonably needed for the services supplied (i.e., purchasing equipment or software for use by a site manager that is clearly beyond that needed to support project operations). Note that computer learning center activities benefiting tenants are not covered in this prohibition.

(viii) It is inappropriate to bill the project for practices that are inefficient such as routine use of collect calls from a site manager to a management agent office.

(j) Management certification. (1) As a condition of approval of the management agent and the management fee, the borrower and the management agents must execute an Agency-approved certification establishing an allowable management fee to be paid out of the housing project’s general operating account and certifying that:

(i) The borrower and management agent agree to operate the housing project in accordance with the management plan;

(ii) The borrower and the management agent will comply with Agency requirements, loan or grant agreements, applicable local, state and Federal laws and ordinances, and contract obligations, will certify that no payments have been made to anyone in return for awarding the management contract to the management agent, and will agree that such payments will not be made in the future;

(iii) The borrower and the management agent will comply with Agency notices or other policy directives that relate to the management of the housing project;

(iv) The management agreement between the borrower and management agent complies with the requirements of this section;

(v) The borrower and the management agent will comply with Agency requirements regarding management fees as specified in paragraph (i) of this section, and allocation of management costs between the management fee and the housing project financial accounts specified in §3560.302(c)(3);

(vi) The borrower and the management agent will not purchase goods and services from entities that have an identity-of-interest (IOI) with the borrower or the management agent until the IOI relationship has been disclosed to the Agency according to paragraph (g) of this section, not denied by the Agency under paragraph (d)(3) of this section, and it has been determined that the costs are as low as or lower than arms-length, open-market purchases; and

(vii) The borrower and the management agent agree that all records related to the housing project are the property of the housing project and that the Agency, OIG, or GAO may inspect the housing records and the records of the borrower, management agent, and suppliers of goods and services having an IOI with the borrower or with a management agent acting as an agent of the borrower upon demand.

(2) A certification will be executed each time a management agent is proposed and a management agreement is executed or renewed. Any amendment to a management certification must be approved by the Agency and the borrower.

(k) Procurement. The borrower and the agents of the borrower must obtain contracts, materials, supplies, utilities, and services at a reasonable cost and seek the most advantageous terms to the housing project. Any discounts, rebates, fees, proceeds, or commissions obtainable with respect to purchases, service contracts, or other transactions must be credited to the housing project.

(l) Electronic Submission of Data to Agency. For properties with eight or more housing units, the Agency may specify that borrowers submit information required by this part electronically.
§ 3560.103 Maintaining housing projects.

(a) Physical maintenance. (1) The purposes of physical maintenance are the following:

(i) Provide decent, safe, and sanitary housing; and

(ii) Maintain the security of the property.

(2) Borrowers are responsible for the long-term, cost-effective preservation of the housing project.

(3) At all times, borrowers must maintain housing projects in compliance with local, state and federal laws and regulations and according to the following Agency requirements for affordable, decent, safe, and sanitary housing. Agency design requirements are discussed in § 3560.60. The Agency acknowledges that property maintenance is an ongoing process and will not penalize borrowers for less than 100 percent compliance as long as it is evident that the borrower is striving to achieve the standards listed in this paragraph. In addition, the Agency understands that although its multi-family housing portfolio is relatively homogeneous, no one standard is appropriate for all properties.

(i) Utilities. The housing project must have an adequate and safe water supply, a functional and safe waste disposal system, and must be free of hazardous waste material.

(ii) Drainage and erosion control. The housing project must have drainage that effectively protects the housing project from water damage from standing water and erosion. Units, basements, and crawl spaces must be free of water seepage.

(iii) Landscaping and grounds. The housing project must be landscaped attractively. Lawns, plants and shrubs must be maintained and must allow air to windows, vents, and sills. Recreation areas must be maintained in a safe and clean manner and trash collection areas must be adequately sized, screened, and maintained.

(iv) Drives, parking services and walks. The housing project must have drives, parking lots, and walks that are free of holes and deterioration. Walks with changes in height between slabs of approximately 1/2 inch or greater will be considered unacceptable.

(v) Exterior signage. All signs at the housing project, including those related to the housing project name, buildings, parking spaces, unit numbers and other informational directions must be visible and well-kept. Sign requirements must conform to § 3560.104(d).

(vi) Fences and retaining walls. The housing project must have fence lines that are free of trash, weeds, vines, and other vegetation. Fences must be free of holes and damaged or loose sections. The bases of all retaining walls must be erosion free and drainage weep holes must be cleaned out to prevent excessive pressure behind the retaining wall.

(vii) Debris and graffiti. The housing project, including common areas, must be free of trash, litter, and debris. Public walkways, walls of buildings and common areas must be free of graffiti.

(viii) Lighting. The housing project must have functional exterior lighting and functional interior lighting in common areas which permits safe access and security.

(ix) Foundation. The housing project must have a foundation that is free of evidence of structural failure, such as uneven settlement indicated by horizontal cracks or severe bowing of the foundation wall. Structural members must not have evidence of rot or insect or rodent infestation.

(x) Exterior walls and siding. The housing project must have walls that are free from deterioration which allows elements to infiltrate the structure, eaves, gables, and window trim that are free from deterioration, exterior wall coverings that are intact, securely attached, and in good condition. Brick veneers must be free of missing mortar or bricks.

(xii) Roofs, flashing, and gutters. The housing project must have gutters and downspouts, where appropriate for climatic conditions, that are securely attached, clean, and finished or painted properly with splash blocks or extenders that direct water flow away from the building. The housing project must have a roof that is free of leaks, defective covering, curled or missing shingles and which is not sagging or buckling. Fascia and soffits must be intact.
§3560.103  

have screens that are free of tears, breaks and rips and windows that are unbroken. Window thermopane seals must be unbroken and caulking on the exterior of windows and doors must be continuous and free of cracks. Doors must be weather tight, free of holes, and provide security with functional locks. Porches, balconies, and exterior stairs must be free of broken, missing, orrotting components.

(xiii) Common area accessibility. The housing project must have accessible, designated handicapped parking spaces with handicapped space signs properly posted. Common areas must be accessible through walks, ramps, porches, and thresholds. The laundry room must have accessible appliances and mailboxes must be at an accessible level. Elevators or mechanical lifts must be functional and kept in good repair.

(xiv) Common area signage. The following must be posted in a conspicuous place in a common area: “Justice for All” poster, HUD equal housing opportunity poster including the Spanish version if there are Hispanic Limited English Proficiency tenants or applicants, current affirmative fair housing marketing plan, the tenant grievance and appeal procedure, housing project occupancy rules, office hours and phone number, and emergency hours and phone number.

(xv) Flooring. If a housing project has carpeting, the carpet must be clean, without excessive wear, and seams that are secure and stretched properly. If the housing project has resilient flooring, the flooring must be clean, unstained, free of tears and breaks, and seams that are secure.

(xvi) Walls, floors, and ceilings. The housing project must have walls, floors, and ceilings that are free of holes, evidence of current water leaks, and free of material that appears in danger of falling. The housing project must have wallboard joints that are secure and free of cracks.

(xvii) Doors and windows. The housing project must have doors that are free of holes, secure, unbroken and easily operable hardware, deadbolt locks which are in place and secure, and, if doors are metal, free of rust. The housing project must have windows which are easily operated, free of bent blinds or torn curtains, and window interiors must be free of evidence of moisture damage.

(xviii) Electrical, air conditioning and heating. The housing project must have heating and cooling units that are free of bare wires and which are functioning properly, including thermostats. The housing project must not have uncovered outlets or other evident safety hazards, switches which work improperly, or light fixtures which are broken and inoperable.

(xix) Water heaters. The housing project must have water heaters which are operating properly, free of leaks, supply adequate hot water, and are fitted with temperature and pressure relief valves.

(xx) Smoke alarms. The housing project must have smoke alarms which are properly located according to local code and which operate properly.

(xxi) Emergency call system. If a housing project has an emergency call system, the switches must be located in the bathroom and bedroom, furnished with a pull cord, with the down position set to “ON”, and must operate properly.

(xxii) Insect or vermin infestation. The housing project must have all units free of visible signs of insects or rodents and must be free of signs of insect or rodent damage.

(xxiii) Range and range hood. The housing project must have range units in which all elements are operable, electrical connections are secure and insulated, doors and drawers which are secure, control knobs and handles which are in place and secure, and housing which is sound and the finish is free of chips, damage, or signs of rust. The range hood fan and light must be operable.

(xxiv) Refrigerator. The housing project must have refrigerators in which the cooler and freezer are operating properly, the shelves and door containers are secure and free of rust, door gaskets are in good condition and functioning properly, and the housing is sound and the finish is free of chips, damage, or signs of rust.

(xxv) Sinks. The housing project must have sinks in which the fittings work properly and are free of leaks, plumbing connections under the cabinet

642
which are free of leaks, the finish is free of chips, damage, or signs of rust, the strainer is in good condition and in place, and which are secured to a wall, counter, or vanity top.

(xxvi) Cabinets. The housing project must have cabinets and vanities which are secure to walls or floor and have faces, doors, and drawer fronts that are in good condition and free of breaks and peeling. Shelving must be in place, fastened securely, and free of warps. The housing project must have counter tops which are secure and free of burn marks or chips, bottoms under sinks which are free of evidence of warping, breaks, or being water soaked. Kitchen counter, vanity tops, and back splashes must be properly caulked.

(xxvii) Water closets. The housing project must have the base of the water closets at the floor properly caulked. The tanks must be free of cracks or leaks and have a lid which fits and is in good condition. The seats must be secure and in good condition, and the flushing mechanisms must be in good condition and operating properly. The stools must be free of cracks and breaks and be securely fastened to the floor.

(xviii) Bathtub and shower stalls. The housing project must have tubs or shower stalls which are free of cracks, breaks, and leaks, and a strainer in good condition and in place. The housing project must have walls and floors of the bathtubs which are properly caulked, tops and sides of shower stalls must be properly caulked, and the finish is free of chips, damage, or signs of rust.

(4) The Agency expects that upon discovery of a condition not in compliance with the standards listed in this section that the borrower will remedy the situation in a timeframe required by the Agency. The Borrower must provide documentation and justification for any failure to meet such timeframe. Properties with deficiencies in the process of being addressed will not be deemed to be out of compliance unless there are so many deficiencies that it would result in a declaration of substantial noncompliance and call into questions the viability of the property and the effectiveness of the borrower’s maintenance program. Failure to make such corrections or repairs constitutes a non-monetary default under §3560.452(e).

(b) Maintenance systems. Borrowers must establish the following maintenance systems and must describe these systems in their management plan:

(1) A system for routine maintenance, including:
   (i) Regular maintenance tasks that can be prescheduled or planned; and
   (ii) Tasks performed on a regular basis to maintain compliance with the standards established in paragraph (a)(3) of this section.

(2) A system for responsive maintenance including:
   (i) A process for responding to requests for maintenance from tenants;
   (ii) A process for responding to unexpected malfunctions of equipment or damages to building systems such as a furnace breakdown or a water leak; and
   (iii) A “work order” process for managing and tracking responses to maintenance requests and the performance of maintenance tasks.

(3) A system for preventive maintenance including:
   (i) Maintenance of mechanical systems, building exteriors, elevators, and heating and cooling systems which require specially trained personnel; and
   (ii) Maintenance that supports energy-efficient operation of the housing project.

(4) A system for correcting deficiencies identified by periodic inspections, which must include:
   (i) A move-in inspection;
   (ii) A move-out inspection; and
   (iii) An annual inspection of occupied units.

(c) Capital budgeting and planning. (1) Borrowers must develop a capital budget as part of their annual housing project budget required under §3560.303. The capital budget must include anticipated expenditures on the long-term capital needs of the housing project to assure adequate maintenance and replacement of capital items.

(2) If the borrower requests an increase in the project’s reserve for replacement account, the borrower must have a capital needs assessment prepared and submitted to the Agency to reflect anticipated needs of the housing
§ 3560.104 Fair housing.

(a) General. Borrowers must comply with the requirements of the Fair Housing Amendments Act of 1988, and this section to meet their fair housing responsibilities.

(b) Affirmative Fair Housing Marketing Plan. (1) Borrowers with housing projects that have four or more rental units must prepare and maintain an Affirmative Fair Housing Marketing Plan (AFHMP) as defined in 24 CFR part 200, subpart M.

(2) Loan or grant applicants must submit an AFHMP for Agency approval prior to loan closing or grant approval. Plans must be updated by the borrower whenever components of the plan change.

(3) Borrowers must post the approved AFHMP for public inspection at the housing project site, rental office, or at any other location where tenant applications for the project are received.

(4) When developing the plan, the following items must be considered by the borrower:

(i) Direction of marketing activities. The plan should be designed to attract applications for occupancy from all potentially eligible groups of people in the housing marketing area, regardless of race, color, religion, sex, age, familial status, national origin, or disability. The plan must show which efforts will be made to reach very low-income or low-income groups who would least likely be expected to apply without special outreach efforts.

(ii) Marketing program. The applicant or borrower should determine which methods of marketing such as radio, newspaper, TV, signs, etc., are best suited to reach those very low-income or low-income groups who are in the market area but who are least likely to apply for occupancy. Marketing must not rely on “word of mouth” advertising.

(A) Advertising. (1) Frequency. The borrower should advertise availability of housing units in advance of their availability to allow time to receive and process applications. Advertising by newsprint or electronic media must occur at least annually to promote project visibility, even if there is an adequate waiting list.

(B) Community contacts. Community leaders and special interest groups such as community, public interest, religious organizations, and organizations for the disabled must be contacted. Owners and managers of projects with fully accessible apartments must adopt suitable means to ensure that information regarding the availability of accessible units reaches eligible persons with disabilities. In addition, owners and managers of elderly housing must ensure that information regarding eligibility reaches people who are less than 62 years old but who are eligible because they are disabled. Appropriate contacts are with physical rehabilitation centers, hospitals, workshops for the disabled, commissions on aging, and veterans organizations.
(C) **Rental staff.** All staff persons responsible for renting the units must have had training provided on Federal, state, and local fair housing laws and regulations and in the requirements of fair housing marketing and in those actions necessary to carry out the marketing plan. Copies of instructions to the staff regarding fair housing and a summary of the training they have received must be attached to the plan when requesting approval.

(iii) **Marketing records.** Records must be maintained by the borrower reflecting efforts to fulfill the plan. These records will be reviewed by the Agency during civil rights compliance reviews. Plans will be updated as needed.

(c) **Accommodations and communication.** The borrower must take appropriate steps to ensure effective communication with applicants, tenants, and members of the public with disabilities. At a minimum, the following steps must be taken:

(1) Furnish appropriate auxiliary aids (electronic, mechanical, or personal assistance) where necessary, to afford an individual with disabilities an equal opportunity to participate in and enjoy the benefits of Agency financed housing.

(i) In determining what auxiliary aids are necessary, the borrower must give primary consideration to the requests of individuals with disabilities.

(ii) The borrower is not required to provide individually prescribed devices, readers for personal use or study, or other devices of a personal nature.

(2) Where a borrower communicates with applicants and tenants by telephone, telecommunication devices for deaf persons or equally effective communication systems must be available for use.

(3) The borrower must implement procedures to ensure that interested persons, including persons with impaired vision or hearing, can obtain information concerning the existence and location of accessible services, activities, and facilities in the housing project and community.

(4) The borrower is required to provide reasonable accommodations at the project’s expense unless doing so would result in undue financial or administrative burden on the project. Examples of reasonable accommodations may include such items as the installation of grab bars, ramps, and roll-in showers. Reasonable accommodations may also include the modification of rules or policies such as permitting a disabled tenant to have a two-bedroom unit to accommodate a resident assistant or to permit a disabled tenant to have a companion animal. The decision whether the requested accommodation is reasonable or unreasonable or whether to provide the accommodation would cause an undue financial or administrative burden lies with the borrower and would be for the borrower to defend should a complaint subsequently be filed. Borrowers may wish to consult with their legal counsel prior to denying a request. If the borrower takes the position that providing an accommodation would cause an undue financial or administrative burden, the borrower must permit the tenant to make reasonable modifications at the tenant’s expense. Requests for reasonable accommodations must be handled in accordance with the management plan.

(d) **Housing sign requirements.** (1) A permanent sign identifying the housing project is required for all housing projects approved on or after September 13, 1977. Permanent signs are recommended for all housing projects approved prior to September 13, 1977. The sign must meet the following requirements:

(i) Must be located at the primary site entrance and be readable and recognizable from the roadside;

(ii) Must be located near the site manager's office when the housing project has multiple sites and portable signs must be placed where vacancies exist at other site locations of a “scattered site” housing project;

(iii) May be of any shape;

(iv) Must be not less than 16 square feet of area for housing projects with 8 or more rental units (smaller housing projects may have smaller signs);

(v) Must be made of durable material including its supports;

(vi) Must include the housing project name;

(vii) Must show rental contact information including but not limited to the office location of the housing
§ 3560.105  Insurance and taxes.

(a) General. Borrowers must purchase and maintain property insurance on all buildings included as security for an Agency loan. Also, borrowers must furnish fidelity coverage, liability insurance, and any other insurance coverage required by the Agency in accordance with this paragraph to protect the security of the asset. Failure to maintain adequate insurance coverage or pay taxes may lead to a non-monetary default under §3560.452(c).

(b) General insurance requirements. All insurance policies must meet the requirements established by the loan documents and this section.

(1) At loan closing, prior to loan approval, applicants must provide documentary evidence that insurance requirements have been met. The borrower must maintain insurance in accordance with requirements of their loan or grant documents and this section until the loan is repaid or the terms of the grant expire.

(2) Insurance companies must meet the requirements of paragraph (e) of this section.

(3) Insurance coverage amount, terms, and conditions must meet the requirements of paragraph (f) of this section.

(c) Borrower failure or inability to meet insurance requirements. The Agency will take the following actions in cases where a borrower is unwilling or unable to meet the Agency’s insurance requirements:

(1) The Agency will obtain insurance for Agency financed property if the borrower fails to do so. If borrowers refuse to pay the insurance premium, the Agency will pay the insurance premium and charge the premium payment amount to the borrower’s Agency account and will place the borrower in default as described in §3560.452(c).

(2) If borrowers habitually fail to pay premiums in a timely manner, the Agency will require borrowers to escrow amounts appropriate to pay insurance premiums.

(3) If insurance that meets the Agency’s specified requirements is not available (e.g., flood or hurricane insurance), the Agency may accept the insurance policy that most nearly conforms to established requirements.

(4) If the best insurance policy a borrower can obtain at the time the borrower receives the loan or grant contains a loss deductible clause greater
than that allowed by paragraph (f)(8) of this section, the insurance policy and an explanation of the reasons why more adequate insurance is not available must be submitted to the Agency prior to loan or grant approval.

(d) Credits, refunds, or rebates. Borrowers must credit any refund or rebate from an insurance company to the project’s general operating account or reserve account.

(e) Insurance company requirements. All insurers, insurance agents, and brokers must meet the following requirements:

(1) Be licensed or authorized to do business in the state or jurisdiction where the housing project is located; and

(2) Be deemed reputable and financially sound as determined by the Agency.

(f) Property insurance. The following conditions apply to property insurance purchased for Agency-financed housing projects.

(1) At a minimum, borrowers must obtain the following types of property insurance:

   (i) Hazard insurance. A policy which generally covers loss or damage by fire, smoke, lightning, hail, explosion, riot, civil commotion, aircraft, and vehicles. These policies may also be known as “Fire and Extended Coverage,” “Homeowners,” “All Physical Loss,” or “Broad Form” policies.

   (ii) Flood insurance. This coverage is required for properties located in Special Flood Hazard Areas (SFHA) as defined in 44 CFR part 65, as determined by the Federal Emergency Management Agency (FEMA).

   (iii) Builder’s risk insurance. A policy that insures dwellings under construction or rehabilitation.

   (iv) Elevators, boiler, and machinery coverage. This coverage is required for properties that operate elevators, steam boilers, turbines, engines, or other pressure vessels.

(2) Other types of insurance that the Agency may require:

   (i) Windstorm Coverage.

   (ii) Earthquake Coverage.

   (iii) Sinkhole Insurance or Mine Subsidence Insurance.

(3) For property insurance, the minimum coverage amount must equal the “Total Estimated Reproduction Cost of New Improvements,” as reflected in the housing project’s most recent appraisal. At a minimum, property insurance coverage must be adequate to cover the lesser of the depreciated replacement value of essential buildings or the unpaid balance of all secured debt, unless such coverage is financially unfeasible for the housing project.

   (i) If the cost of the minimum level of property insurance coverage exceeds what the housing project can reasonably afford, the borrower, with Agency concurrence, must obtain the maximum amount of property insurance coverage that the housing project can afford.

   (ii) If the coverage amount is less than the depreciated replacement value of all essential buildings, borrowers must obtain coverage on one or more of the most essential buildings, as determined by the Agency.

(3) When required, the coverage amount for flood insurance must equal the outstanding loan balance or the maximum coverage allowed by FEMA’s “National Flood Insurance Program.”

(4) Except for flood insurance, property insurance is not required if the housing project:

   (i) Has a depreciated replacement value of $2,500 or less; or

   (ii) Is in a condition which the Agency determines makes insurance coverage not economical.

(5) Policies for several buildings or properties located on noncontiguous sites are acceptable if the insurer provides proof that each secured building or property related to the housing project is as fully protected as if a separate policy were issued.

(6) Borrowers must notify the Agency and their insurance company agents of any loss or damage to insured property and collect the amount of the loss.

(7) When the Agency is in the first lien position and an insurance settlement represents a satisfactory adjustment of a loss, the insurance settlement will be deposited in the housing project’s general operating account unless the settlement exceeds $5,000. If the settlement exceeds $5,000, the funds will be placed in the reserve account for the housing project.
(i) Insurance settlement funds which remain after all repairs, replacements, and other authorized disbursements have been made retain their status as housing project funds.

(ii) If the indebtedness secured by the insured property has been paid in full or the insurance settlement is in payment for loss of property on which the Agency has no claim; a loss draft which includes the Agency as co-payee may be endorsed by the Agency without recourse and delivered to the borrower.

(8) When the Agency is not in the first lien position and the insurance settlement represents satisfactory adjustment of the loss, the Agency will release the settlement funds to the primary mortgagee upon agreement of all parties to the provisions contained in agreements between the Agency and the primary lienholder.

(9) Allowable deductible amounts are as follows:

(i) Hazard/Property Insurance. (A) $1,000 on any housing project with an insurable value under $200,000; or (B) One-half of one percent (0.0050) of the insurable value, up to $10,000 on housing projects with insurance values over $200,000.

(ii) Flood Insurance. The Agency allows a maximum deductible of $5,000 per building.

(iii) Windstorm Coverage. When windstorm coverage is excluded from the “All Risk” policy, the deductible must not exceed five percent of the total insured value.

(iv) Earthquake Coverage. In the event that the borrower obtains earthquake coverage, the Agency is to be named as a loss payee. The deductible should be no more than 10 percent of the coverage amount.

(v) Sinkhole Insurance or Mine Subsidence Insurance. The deductible for sinkhole insurance or mine subsidence insurance should be similar to what would be required for earthquake insurance.

(10) Deductible amounts (excluding flood, windstorm, earthquake and sinkhole insurance or mine subsidence insurance) must be accounted for in the replacement reserve account. Borrowers who wish to increase the deductible amount must deposit an additional amount to the reserve account equal to the difference between the Agency’s maximum deductible and the requested new deductible. The Borrower will be required to maintain this additional amount so long as the higher deductible is in force.

(g) Liability insurance. The borrower must carry comprehensive general liability insurance with coverage amounts that meet or exceed Agency requirements. This coverage must insure all common areas, commercial space, and public ways in the security premises. Coverage may also include borrower exposure to certain risks such as errors and omissions, environmental damages, or protection against discrimination claims. The insurer’s limit of liability per occurrence for personal injury, bodily injury, or property damage under the terms of coverage must be at least $1 million.

(h) Fidelity coverage. Borrowers must provide fidelity coverage on any personnel entrusted with the receipt, custody, and disbursement of any housing monies, securities, or readily salable property other than money or securities. Borrowers must have fidelity coverage in force as soon as there are assets within the organization and it must be obtained before any loan funds or interim financing funds are made available to the borrower. In addition, the following conditions apply to fidelity insurance:

(1) Fidelity insurance coverage must be documented on a bond form acceptable to the Agency.

(2) Fidelity coverage policies must declare in the insuring agreements that the insurance company will provide protection to the insured against the loss of money, securities, and property other than money and securities, through any criminal or dishonest act or acts committed by any employee, whether acting alone or in collusion with others, not to exceed the amount of indemnity stated in the declaration of coverage.

(i) The fidelity insurance policy, at a minimum, must include an insuring agreement that covers employee dishonesty.

(ii) Fidelity coverage amounts and deductible:
(3) Blanket crime insurance coverage or fidelity bonds are acceptable types of fidelity coverage.

(4) At a minimum, borrowers must provide an endorsement, listing all of the borrower’s Agency financed properties and their locations covered under the policy or bond as evidence of required fidelity insurance. The policy or bond may also include properties or operations other than Agency financed properties on separate endorsement listings.

(5) Individual or organizational borrowers must have fidelity coverage when they have employees with access to the MFH complex assets. Borrowers who use a management agent with exclusive access to housing assets must require the agent to have fidelity coverage on all principals and employees with access to the housing assets. If active management reverts to the borrower, the borrower must obtain fidelity coverage, as a first course of business.

(6) Fidelity coverage is not required under the following circumstances:

(i) The borrower is an individual or a general partnership and the individual or general partner will be responsible for the financial activities of the housing project.

(ii) In the case of a land trust where the beneficiary is responsible for management, the beneficiary will be treated as an individual.

(iii) A limited partnership (or its general partners) unless one or more of its general partners perform financial acts within the scope of the usual duties of an “employee.”

(7) The premium for fidelity coverage of employees and general partners at a housing project is an eligible operating account expense.

(i) The premium of a management agent’s fidelity coverage for the agent’s principals and employees will be the management agent’s business expense (i.e., it is included within the management fee).

(ii) When a housing project employee is covered under the “umbrella” of the management agent’s fidelity coverage, the premium may be prorated among the housing projects covered.

(8) Borrowers must review fidelity coverage annually and adjust it as necessary to comply with the requirements of this section.

(i) Taxes. The borrower is responsible for paying all taxes and assessments on a housing project before they become delinquent.

(1) An exception to the above may be made if the borrower has formally contested the amount of the property assessment and escrowed the amount of taxes in question in a manner approved by the Agency.

(2) Failure to pay taxes and assessments when due will be considered a default. If a borrower fails to pay outstanding taxes and assessments, the Agency will pay the outstanding balance and charge the tax or assessment amount, assessed penalties, and any additional incurred costs to the borrower’s Agency account.

(3) The Agency will require borrowers who have demonstrated an inability to pay taxes in a timely manner to escrow amounts sufficient to pay taxes.

§ 3560.150 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.
§ 3560.151 General.

(a) Applicability. This subpart contains borrower and tenant requirements and Agency responsibilities related to occupancy of Agency-financed multi-family housing (MFH) projects. Occupancy eligibility requirements apply to the following:

1. Family housing projects, including farm labor housing;
2. Elderly housing projects; and
3. Congregate housing or group homes for persons with special needs.

(b) Civil rights requirements. All occupancy policies must meet applicable civil rights requirements, as stated in § 3560.2.

§ 3560.152 Tenant eligibility.

(a) General requirements. Except as specified in paragraph (b) of this section, a tenant eligible for occupancy in Agency-financed housing must either:

1. Be a United States citizen or qualified alien, and
2. Qualify as a very low-, low-, or moderate-income household or
3. Be eligible under the requirements established to qualify for housing benefits provided by sources other than the Agency, such as U.S. Department of Housing and Urban Development (HUD) Section 8 assistance or Low Income Housing Tax Credit (LIHTC), when a tenant receives such housing benefits.

(b) Exception. Households with incomes above the moderate-income level may occupy housing projects with an Agency loan approved prior to 1968 with a loan agreement that does not restrict occupancy by income.

(c) Requirements for elderly housing, elderly units in mixed housing, congregate housing, and group homes. In addition to the requirements of paragraph (a) of this section, the following occupancy requirements apply to elderly housing, elderly units in mixed housing, and congregate housing or group homes:

1. For elderly housing, elderly units in mixed housing, and congregate housing the following provisions apply:
   (i) Households must meet the definition of an elderly household in § 3560.11 to be eligible for occupancy in elderly or congregate housing.
   (ii) If non-elderly persons are members of a household where the tenant or co-tenant is an elderly person, the non-elderly persons are eligible for occupancy in the tenant’s or co-tenant’s rental unit.
   (iii) Applicants who will agree to participate in the services provided by a congregate housing project may be given occupancy priority.
2. For group homes, the following provisions apply:
   (i) Occupancy may be limited to a specific group of tenants, such as elderly persons or persons with developmental disabilities, or mental impairments, if such an occupancy limitation is contained in the borrower’s management plan.
   (ii) Tenants must be able to demonstrate a need for the special services provided by the group home.
   (iii) Tenants cannot be required to participate in an ongoing training or rehabilitation program.
   (iv) Tenants must be selected from the market area prior to considering applicants from other areas.

(d) Ineligible tenant waiver. The Agency may authorize the borrower in writing, upon receiving the borrower’s written request with the necessary documentation, to rent vacant units to ineligible persons for temporary periods to protect the financial interest of the Government. Likewise, this provision may extend to a cooperative. This authority will be for the entire project for periods not to exceed one year. Within the period of the lease, the tenant may not be required to move to allow an eligible applicant to obtain occupancy, should one become available. The Agency must make the following determinations:

1. There are no eligible persons on a waiting list.
2. The borrower provided documentation that a diligent but unsuccessful effort to rent any vacant units to an eligible tenant household has been made. Such documentation may consist of advertisements in appropriate publications, posting notices in several public places, including places where persons seeking rental housing would likely make contacts, holding
open houses, making appropriate contacts with public housing agencies and organizations, Chambers of Commerce, and real estate agencies.

(3) The borrower agrees to continue with aggressive efforts to locate eligible tenants and retain documentation of all marketing.

(4) The borrower is temporarily unable to achieve or maintain a level of occupancy sufficient to prevent financial default and foreclosure. The Agency’s approval of the waiver would then be for a limited duration.

(5) The lease agreement will not be more than 12 months and at its expiration will convert to a month-to-month lease. The monthly lease will require that the unit be vacated upon 30 days notice when an eligible applicant is available.

(6) Tenants residing in Rural Rental Housing (RRH) units who are ineligible because their adjusted annual income exceeds the maximum for the RRH project will be charged the Rural Housing Service (RHS) approved note rent for the size of unit occupied in a Plan II RRH project. In projects operated under Plan I, ineligible tenants will be charged a rental surcharge of 25 percent of the approved note rent.

(e) Tenant certification and verification. Tenants and borrowers must execute an Agency-approved tenant certification form establishing the tenant’s eligibility prior to occupancy. In addition, tenant households must be recertified and must execute a tenant certification form at least annually or whenever a change in household income of $100 or more per month occurs. Borrowers must recertify for changes of $50 per month, if the tenant requests that such a change be made.

(i) Tenant requirements. (i) Tenants must provide borrowers with the necessary income and other household information required by the Agency to determine eligibility.

(ii) Tenants must authorize borrowers to verify information provided to establish their eligibility or determination of tenant contribution.

(iii) Tenants must report all changes in household status that may affect their eligibility to borrowers.

(iv) Tenants who fail to comply with tenant certification and recertification requirements will be considered ineligible for occupancy and will be subject to unauthorized assistance claims, if applicable, as specified in subpart O of this part.

(2) Borrower requirements. (i) Borrowers must verify household income and other information necessary to establish tenant eligibility for the requested rental unit type, in a format approved by the Agency, prior to a tenant’s initial occupancy and prior to annual or other recertifications.

(ii) Borrowers must review all reported changes in household status and assess the impact of these changes on the tenant’s eligibility or tenant contribution.

(iii) Borrowers must submit initial or updated tenant certification forms to the Agency within 10 days of the effective date of an initial certification or any changes in a tenant’s status. The effective date of an initial or updated tenant certification form will always be a first day of the month.

(iv) Since tenant certifications are used to document interest credit and rental assistance eligibility and are a basic responsibility of the borrower under the loan documents, borrowers who fail to submit annual or updated tenant certification forms within the time period specified in paragraph (e)(2)(iii) of this section will be charged overage, as specified in §3560.203(c). Unauthorized assistance, if any, will be handled in accordance with subpart O of this part.

(v) Borrowers must submit tenant certification forms to the Agency using a format approved by the Agency.

(vi) Borrowers must retain executed tenant certification forms and any supporting documentation in the tenant file for at least 3 years or until the next Agency monitoring visit or compliance review, whichever is longer.

(3) The Agency maintains the right to independently verify tenant eligibility information.

Effective Date Note: At 70 FR 8503, Feb. 22, 2005, in §3560.152(a)(1), implementation of the words “Be a United States citizen or qualified alien, and” was delayed indefinitely.
§ 3560.153 Calculation of household income and assets.

(a) Annual income will be calculated in accordance with 24 CFR 5.609.
(b) Adjusted income will be calculated in accordance with 24 CFR 5.611.

§ 3560.154 Tenant selection.

(a) Application for occupancy. Borrowers must use tenant application forms that collect sufficient information to properly determine household eligibility and to enable the Agency to monitor compliance with the Fair Housing Act, section 504 of the Rehabilitation Act of 1973, and title VI of the Civil Rights Act of 1964 during compliance reviews. At a minimum, borrowers must use application forms that collect the following information:
(1) Name of the applicant and present address;
(2) Number of household members and their birthdates;
(3) Annual income information calculated in accordance with § 3560.153(a);
(4) Adjustments to income calculated in accordance with § 3560.153(b);
(5) Net assets calculated in accordance with § 3560.153(c);
(6) Indication of a need for a unit accessible to individuals with disabilities and any disability adjustments to income;
(7) Certification by the applicant that the unit will serve as the household’s primary residence, and a certification that the applicant is a U.S. citizen or a qualified alien as defined in § 3560.11;
(8) Signature of the applicant and date;
(9) Race, ethnicity, and sex designation. The following disclosure notice shall be used:

“The information regarding race, ethnicity, and sex designation solicited on this application is requested in order to assure the Federal Government, acting through the Rural Housing Service, that the Federal laws prohibiting discrimination against tenant applications on the basis of race, color, national origin, religion, sex, familial status, age, and disability are complied with. You are not required to furnish this information, but are encouraged to do so. This information will not be used in evaluating your application or to discriminate against you in any way. However, if you choose not to furnish it, the owner is required to note the race, ethnicity, and sex of individual applicants on the basis of visual observation or surname,” and

(10) Social security number.

(b) Additional information. Applicants are to be provided a list of any additional information that must be submitted with the application for the application to be considered complete (an application will be considered complete without verification of the applicant information). The list of information will be restricted to the same items for all Agency-assisted properties of a particular type, such as a family or elderly complex.

(c) Application submission. Borrowers must establish when applications may be submitted. Information on the place and times for tenant application submission must be documented in the housing project’s management plan and Affirmative Fair Housing Marketing Plan.

(d) Selection of eligible applicants. (1) Applicants may be determined ineligible for occupancy based on selection criteria other than Agency requirements only if such criteria are contained in the borrower’s management plan. Borrower established selection criteria may not contain arbitrary or discriminatory rejection criteria, but may consider an applicant’s past rental and credit history and relations with other tenants.

(2) Borrowers with projects receiving low-income housing tax credits (LIHTCs), may leave a housing unit vacant if they are required to rent the available unit to an LIHTC-eligible applicant, and none of the applicants on the waiting list meet the applicable LIHTC eligibility requirements.

(e) Recordkeeping. Borrowers must retain all tenant application forms for at least 3 years. The Agency may require borrowers to submit application information for Agency review.

(f) Waiting lists. (1) When an applicant has submitted an application form the borrower must place the applicant on the waiting list. All applications, whether complete, eligible, or ineligible, will be placed on the list. The waiting list will document the final disposition of all applications (rejected, withdrawn, or placed in a unit).
(2) The date and time a complete application was submitted will be recorded on the waiting list and will establish priority for selection from the list. If an applicant submits an incomplete application (see paragraph (a) of this section), they must be notified in writing within 10 days of the items that are needed for the application to be considered complete and that priority will not be established until the additional items are received.

(3) The race and the ethnicity of each applicant shall be recorded on the waiting list. This information shall be collected for statistical purposes only and must not be used when making eligibility determinations or in any other discriminatory manner. The information shall be recorded using the race and ethnicity codes that are utilized on the Agency tenant certification form available in the servicing office.

(4) Within 10 days of receipt of a complete application, the Borrower must notify the applicant in writing that he has been selected for immediate occupancy, placed on a waiting list, or rejected.

(5) Selections from the completed applications on the waiting list shall be made in the following priority order:
   (i) Very low-income applicants;
   (ii) Low-income applicants; and
   (iii) Moderate-income applicants.

(g) Priorities and preferences for admission. (1) Eligible applicants that meet the following conditions must be given priority for occupancy over all other tenants regardless of income. Such applicants, however, will be ranked among themselves by income level, giving priority first to very low-income households, then to low-income households, and finally to moderate-income households.
   (i) Persons who require the special design features of a unit accessible to individuals with disabilities will have priority only for units with these features.
   (ii) In congregate housing facilities, persons who agree to use the services provided by the facility will have priority over other applicants.
   (2) Eligible applicants that meet any of the following conditions must be given priority over other applicants in their same income category.
   (i) The applicant has a Letter of Priority Entitlement (LOPE) issued in accordance with §3560.660(c).
   (ii) The applicant was displaced from Agency-financed housing but was not issued a LOPE.
   (iii) The applicant was displaced in a Federally declared disaster area.

(3) Borrowers receiving Section 8 project-based assistance may establish preferences in accordance with U.S. Department of Housing and Urban Development (HUD) regulations. The use of such preferences must be documented in the project’s management plan.

(h) Notices of ineligibility or rejection. Borrowers must provide written notification to applicants who are determined to be ineligible or who are rejected for occupancy. Notices of ineligibility or rejection must give specific reasons for the ineligibility determination or rejection and, in accordance with §3560.160, the notice must advise the applicant of “the right to respond to the notice within ten calendar days after receipt” and of “the right to a hearing in accordance with §3560.160 which is available upon request.” When an applicant is rejected based on the information from a credit bureau report, the source of the credit bureau report must be revealed to the applicant in accordance with the Fair Credit Reporting Act.

(i) Purging waiting list. Procedures used by borrowers to purge waiting list must be documented in the project’s management plan and must be based on the length of the waiting list or the extent of time an applicant will be expected to wait for housing. At a minimum, borrowers must document removal of any names from the waiting list with the time and date of the removal. If an electronic waiting list is used, borrowers must periodically print out electronic waiting lists or preserve backup copies showing how the waiting list appeared before and after the removal of each name.

(j) Criminal activity. Borrowers may deny admission for criminal activity or alcohol abuse by household members in accordance with the provisions of 24 CFR 5.854, 5.855, 5.856, and 5.857.

EFFECTIVE DATE NOTE: At 70 FR 8503, Feb. 22, 2005, in §3560.154(a)(7), implementation of the words “* * * and a certification that the
§ 3560.155 Assignment of rental units and occupancy policies.

(a) General. Available rental units are assigned in accordance with the requirements of this section and the priorities and preferences outlined in §3560.154.

(b) Rental units accessible to individuals with disabilities. If a rental unit accessible to individuals with disabilities is available and there are no applicants that require the features of the unit, borrowers may rent the unit to a non-disabled tenant subject to the inclusion of a lease provision that requires the tenant to vacate the unit within 30 days of notification from management that an eligible individual with disabilities requires the unit and provided the accessible unit has been marketed as an accessible unit, outreach has been made to organizations representing the disabled, and marketing of the unit as an accessible unit continues after it has been rented to a tenant who is not in need of the special design features.

(c) Transfer of existing tenants within a housing project. When a rental unit becomes available for occupancy and an eligible tenant in the housing project is either over housed or under housed as provided for in paragraph (e) of this section, the borrower must use the available unit for the over housed or under housed tenant, if suitable, prior to selecting an eligible applicant from the waiting list.

(d) Applicant placement. When a specific rental unit type becomes available for occupancy, borrowers must select eligible applicants suitable for the available unit according to the priorities established in §3560.154.

(e) Occupancy policies. Borrowers must establish occupancy policies for each housing project. Households living in a rental unit with more bedrooms than persons in the household will be considered over housed and must be relocated in accordance with paragraph (c) of this section. Households under housed as defined by the project’s occupancy standards must be relocated in accordance with paragraph (c) of this section. Borrowers with no one-bedroom units in a housing project may make an exception to this requirement in their occupancy policies. In addition, a borrower’s occupancy policies must establish:

(1) Reasonable standards for determining when a tenant household is considered under housed. The standards will describe the maximum number of persons that may occupy units of a given size based on occupancy guidelines provided by the Agency or another governmental source;

(2) The order in which eligible applicants and existing tenants will be housed or re-housed; and

(3) How fair housing requirements will be met, including how reasonable accommodations will be made for applicants and tenants with disabilities.

(f) Agency concurrence. The Agency must concur with a borrower’s occupancy rules prior to initial occupancy of the housing project. All modifications to occupancy rules must be posted for tenant comment in accordance with §3560.160 and receive Agency concurrence prior to implementation.

§ 3560.156 Lease requirements.

(a) Agency approval. Borrowers must use a lease approved by the Agency. The lease must be consistent with Agency requirements and the requirements of all programs participating in the housing project. Prior to submitting the lease to the Agency for approval, borrowers must have their attorney certify that the lease complies with state and local laws, Agency requirements, and the requirements of all programs participating in the housing project. If there are conflicting requirements the borrower shall notify the Agency of the conflict and request guidance. Borrowers must execute their Agency approved lease with each tenant household prior to tenant occupancy of a rental unit.

(b) Lease requirements. (1) All leases must be in writing.

(2) Initial leases must be for a 1-year period.

(3) If the tenant is not subject to occupancy termination according to §3560.158 and §3560.159, a renewal lease or lease extension must be for a 1-year period.

(4) In areas with a concentration of non-English speaking populations,
leases (including the occupancy rules) must be available in both English and the non-English language.

(5) Leases must give the address of the management agent to which tenants may direct complaints.

(6) Leases must include a statement of the terms and conditions for modifying the lease.

(c) Required items and provisions. (1) Leases for tenants who hold a Letter of Priority Entitlement (LOPE) issued according to §3560.655(d) and are temporarily occupying a unit for which they are not eligible must include a clause establishing the tenant’s responsibility to move when a suitable unit becomes available in the housing project.

(2) Leases must contain a clause permitting escalation in the tenant contribution when there is an Agency-approved change in basic or note rate rents prior to the expiration of the lease. The escalation clause also must specify that the tenant contribution may be changed prior to expiration of the lease if the change is due to changes in tenant status, as documented on the tenant certification form, or the tenant’s failure to properly recertify.

(3) Leases must specify that no change in the tenant contribution will occur due to monetary or non-monetary default or when rental assistance or interest credit, is suspended, canceled, or terminated due to the borrower’s fault. For information on tenant contributions when a borrower pre-pays the Agency loan, refer to subpart N of this part.

(4) Leases must contain a requirement that tenants make restitution when unauthorized assistance is received due to applicant or tenant fraud or misrepresentation and a statement advising tenants that submission of false information could result in legal action.

(5) Leases must include a statement that the housing project is financed by the Agency and that the Agency has the right to further verify information provided by the applicant.

(6) Leases must state that the housing project is subject to:

(i) Title VI of the Civil Rights Act of 1964;

(ii) Title VIII of the Fair Housing Act;

(iii) Section 504 of the Rehabilitation Act of 1973; and

(7) Leases must establish the tenant’s responsibility according to the housing project’s occupancy rules to move to the next available appropriately sized rental unit if the household becomes over housed or under housed in the unit they occupy.

(8) Leases must include provisions that establish when a guest will be considered a member of the household and be required to be added to the tenant certification.

(9) Leases must include a provision stating that tenancy continues until the tenant’s possessions are removed from the housing either voluntarily or by legal means, subject to state and local law.

(10) Leases must include a requirement that tenants who are no longer eligible for occupancy under the housing project’s occupancy rules or do not meet the criteria set forth in §3560.155(c) and (e) must vacate the property within 30 days of being notified by the borrower that they are no longer eligible for occupancy or at the expiration of their lease, or whichever is greater, unless the conditions cited in §3560.158(c) exist:

(11) Leases for rental units receiving rental assistance must include clauses that specify that the tenant’s monthly tenant contribution and a description of the circumstances under which the tenant’s contribution may change.

(12) Leases must include a requirement that tenants notify borrowers when changes occur in their income or assets, their qualifications for adjustments to income, their citizenship status, or the number of persons living in the unit.

(13) A requirement that tenants agree to fulfill the tenant income verification and certification requirements established under §3560.152.

(14) Leases for tenants living in Plan II interest credit rental units must include provisions establishing the net monthly tenant contribution.

(15) Leases, including renewals, must include the following language:
"It is understood that the use, or possession, manufacture, sale, or distribution of an illegal controlled substance (as defined by local, State, or Federal law) while in or on any part of this apartment complex or cooperative is an illegal act. It is further understood that such action is a material lease violation. Such violations (hereafter called a "drug violation") may be evidenced upon the admission to or conviction of the use, possession, manufacture, sale, or distribution of a controlled substance (as defined by local, State, or Federal law) in any local, State, or Federal court.

The landlord may require any lessee or other adult member of the tenant household occupying the unit (or other adult or non-adult person outside the tenant household who is using the unit) who commits a drug violation to vacate the leased unit permanently, within timeframes set by the landlord, and not thereafter to enter upon the landlord’s premises or the lessee’s unit without the landlord’s prior consent as a condition for continued occupancy by the remaining members of the tenant’s household. The landlord may deny consent for entry unless the person agrees not to commit a drug violation in the future and is either actively participating in a counseling or recovery program, complying with court orders related to a drug violation, or has successfully completed a counseling or recovery program.

The landlord may require any lessee to show evidence that any non-adult member of the tenant household occupying the unit, who committed a drug violation, agrees not to commit a drug violation in the future, and to show evidence that the person is either actively seeking or receiving assistance through a counseling or recovery program, complying with court orders related to a drug violation, or has successfully completed a counseling or recovery program within timeframes specified by the landlord as a condition for continued occupancy in the unit. Should a further drug violation be committed by any non-adult person occupying the unit the landlord may require the person to be severed from tenancy as a condition for continued occupancy by the lessee.

If a person vacating the unit, as a result of the above policies, is one of the lessees, the person shall be severed from the tenancy and the lease shall continue among any other remaining lessees and the landlord. The landlord may also, at the option of the landlord, permit another adult member of the household to be a lessee.

Should any of the above provisions governing a drug violation be found to violate any of the laws of the land the remaining enforceable provisions shall remain in effect. The provisions set out above do not supplant any rights of tenants afforded by law."

(16) Leases for rental units accessible to individuals with disabilities occupied by those not needing the accessibility features must establish the tenant’s responsibility to move to another unit when an appropriate unit becomes available or when the unit is needed by an eligible individual with disabilities. Additionally, the lease clause must require the borrower to provide tenants written notification of the date by which they must move to another unit in the project.

(17) If loan prepayment occurs and the housing project is subject to restrictive use provisions, leases and renewals must be amended to include a clause specifying the tenant protections required under subpart N of this part.

(18) All leases must contain the following information and provisions:

(i) The name of the tenant, any co-tenants, and all members of the household residing in the rental unit;

(ii) The identification of the rental unit;

(iii) The amount and due date of monthly tenant contributions, any late payment penalties, and security deposit amounts;

(iv) The utilities, services, and equipment to be provided for the tenant;

(v) The tenant’s utility payment responsibility;

(vi) The certification process for determining tenant occupancy eligibility and contribution;

(vii) The limitations of the tenant’s right to use or occupancy of the dwelling;

(viii) The tenant’s responsibilities regarding maintenance and consequences if the tenant fails to fulfill these responsibilities;

(ix) The agreement of the borrower to accept the tenant contribution toward rent charges prior to payment of other charges that the tenant owes and a statement that borrowers may seek legal remedy for collecting other charges accrued by the tenant;

(x) The maintenance responsibilities of the borrower in buildings and common areas, according to state and local codes, Agency regulations, and Federal fair housing requirements;
(xi) The responsibility of the borrowers at move-in and move-out to provide the tenant with a written statement of rental unit’s condition and provisions for tenant participation in inspection;

(xii) The provision for periodic inspections by the borrower and other circumstances under which the borrower may enter the premises while a tenant is renting;

(xiii) The tenant’s responsibility to notify the borrower of an extended absence;

(xiv) A provision that tenants may not assign the lease or sublet the property;

(xv) A provision regarding transfer of the lease if the housing project is sold to an Agency-approved buyer;

(xvi) The procedures that must be followed by the borrower and the tenant in giving notices required under terms of the lease including lease violation notices;

(xvii) The good-cause circumstances under which the borrower may terminate the lease and the length of notice required;

(xviii) The disposition of the lease if the housing project becomes uninhabitable due to fire or other disaster, including rights of the borrower to repair building or terminate the lease;

(xix) The procedures for resolution of tenant grievances consistent with the requirements of §3560.160;

(xx) The terms under which a tenant may, for good cause, terminate their lease, with 30 days notice, prior to lease expiration; and

(xx) The signature and date clause indicating that the lease has been executed by the borrower and the tenant.

(d) Prohibited provisions. Borrowers are prohibited from including any of the following clauses in the lease:

(1) Clauses prohibiting families with children under 18;

(2) Clauses requiring prior consent by tenant to any lawsuit that borrowers may bring against the tenant in connection with the lease;

(3) Clauses authorizing borrowers to hold any of a tenant’s property until the tenant fulfills an obligation;

(4) Clauses in which tenants agree not to hold borrowers liable for anything they may do or fail to do;

(5) Clauses in which tenants agree that borrowers may institute suit without any notice to the tenant that the suit has been filed;

(6) Clauses in which tenants agree that borrowers may evict the tenant or sell their possessions whenever borrowers determine that a breach or default has occurred;

(7) Clauses authorizing the borrower’s attorneys to appear in court on behalf of the tenant, and to waive the tenant’s right to a trial by jury;

(8) Clauses authorizing the borrower’s attorneys to waive the tenant’s right to appeal or to file suit; and

(9) Clauses requiring the tenant to agree to pay legal fees and court costs whenever the borrower takes action against the tenant, even if the court finds in favor of the tenant.

(e) Housing projects and units receiving HUD assistance. (1) In housing projects receiving Section 8 project-based assistance, borrowers may use the HUD model lease. The provisions of the HUD model lease will prevail, unless they conflict with Agency lease requirements in accordance with this section. If there is conflict between HUD requirements and Agency requirements, the provision that will be enforced will be the one that is most favorable to the tenant.

(2) For units occupied by Section 8 certificate and voucher holders, borrowers may use:

(i) A standard HUD-approved lease;

(ii) A HUD-approved lease that includes a number of modifications from the standard HUD-approved lease; or

(iii) An Agency-approved lease may be used if acceptable by HUD or the local housing authority.

(f) State and local requirements. Borrowers must use a lease that is consistent with state and local requirements.

(1) If any lease provision is in violation of state or local law, the lease may be modified to the extent needed to comply with the law, but any changes must be consistent with the provisions established in paragraph (c) of this section.

(2) Leases must include a procedure for handling tenant’s abandoned property, as provided by state or local law.
§ 3560.157 Occupancy rules.

(a) General. The purpose of a borrower’s occupancy rules is to outline the basis for the tenant and management relationship. Prior to Agency approval of occupancy rules, borrowers must provide written certification from their attorney that the housing project’s occupancy rules are consistent with applicable Federal, state, and local laws, as well as Agency requirements, and the requirements of all programs participating in the housing project. Borrowers must obtain Agency approval of the occupancy rules prior to initial occupancy and obtain Agency approval prior to the implementation date of any subsequent modifications to the rules.

(b) Requirements. The occupancy rules must be in writing and posted for easy tenant access. A copy of these rules must be attached to the tenant’s lease upon initial occupancy. At a minimum, the occupancy rules must address:

1. The tenant’s rights and responsibilities under the lease or occupancy agreement;
2. The rent payment or occupancy charge policies;
3. The policies regarding periodic inspection of units;
4. The system for responding to tenant complaints;
5. The maintenance request and work order procedures;
6. The housing services and facilities available to tenants or members;
7. The office locations, hours, and emergency telephone numbers;
8. The restrictions on storage and prohibitions on non-functional vehicles in the housing project area;
9. Other requirements related to a subsidy provided to a tenant from non-Agency sources;
10. When a guest becomes a member of the tenant household; and
11. The procedures tenants must follow to request reasonable accommodations.

(c) Modification of occupancy rules. The Agency must concur with any modification to the occupancy rules prior to implementation. Proper notice must be given to each tenant at least 30 days in advance of implementation of such rules in accordance with §3560.160.

(d) Federal, state and local requirements. The occupancy rules must be consistent with Federal, state, and local law.

(e) Pets/Assistance Animals. All housing projects should establish reasonable written pet rules. No rules may be promulgated that would prevent occupancy by a household member who requires a service or assistance animal. In elderly housing, borrowers must not prohibit tenants from keeping domestic animals in their rental units as pets.

(f) Tenant organizations. Borrowers must not infringe on the rights of tenants to organize an association of tenants. Borrowers (or a designated management representative) should be available and willing to work with a tenant organization.

(g) Community rooms. Borrowers may not place unreasonable restrictions on tenants that desire to use a community room.

§ 3560.158 Changes in tenant eligibility.

(a) General requirements. Tenants must continue to meet the requirements of §3560.152 to remain eligible for occupancy.

(b) Tenants no longer eligible. Tenants who are no longer eligible for occupancy under the housing project’s occupancy rules or do not meet the criteria set forth in §3560.155(c) and (e) must vacate the property within 30 days of being notified by the borrower that they are no longer eligible for occupancy or at the expiration of their lease, whichever is greater, unless the conditions specified in paragraph (c) of this section exist.

(c) Temporary continuation of tenancy. If conditions described in §3560.155(b) or the following conditions exist, borrowers may permit tenants who are no longer eligible for occupancy to continue to reside at the housing project with prior approval of the Agency.

1. The waiting list for the specific rental unit type has no eligible applicants; or
(2) The required time period for vacating the rental unit would create a hardship on the tenant household.

(d) Surviving and remaining household members. (1) Members of a household may continue to reside in a housing project after the departure or death of the tenant or co-tenant, provided that:
   (i) They are eligible with respect to adjusted income;
   (ii) They occupied a rental unit in the housing project at the time of the departure or death of the tenant or co-tenant;
   (iii) They execute a tenant certification form establishing their own tenancy; and
   (iv) They have the legal ability to sign a lease for the rental unit, except where a legal guardian may sign when the tenant or member is otherwise eligible.

(2) Surviving or remaining members of the household may remain in the housing project, taking into consideration the conditions of paragraph (d)(1) of this section, but must move to a suitably sized rental unit within 30 days of its availability.

(3) After the death of a tenant or co-tenant in elderly housing, the surviving members of the household, regardless of age but taking into consideration the conditions of paragraph (d)(1) of this section, may remain in the rental unit in which they were residing at the time of the tenant’s or co-tenant’s death, even if the household is over housed according to the housing project’s occupancy rules as follows:
   (i) Continued occupancy of the rental unit will not be allowed when in either situation of paragraph (d)(1) or (d)(3) of this section, the rental unit has accessibility features for individuals with disabilities, the household no longer has a need for such accessibility features, and the housing project has a tenant application from an individual with a need for the accessibility features;
   (ii) If the housing project does not have a tenant application from an individual with a need for the accessibility features, the household may remain in the rental unit with such features until the housing project receives an application from an individual with a need for accessibility features. The household in the unit with accessibility features will be required to move within 30 days of the housing project’s receipt of a tenant application requiring accessibility features if another suitably sized unit without accessibility features is available in the project. If a suitably sized unit is not available in the project within 30 days, the tenant may remain in the unit with accessibility features until the first available unit in the project becomes available and then must move within 30 days.

§ 3560.159 Termination of occupancy.

(a) Tenants in violation of lease. Borrowers, in accordance with lease agreements, may terminate or refuse to renew a tenant’s lease only for material non-compliance with the lease provisions, material non-compliance with the occupancy rules, or other good causes. Prior to terminating a lease, the borrower must give the tenant written notice of the violation and give the tenant an opportunity to correct the violation. Subsequently, termination may only occur when the incidences related to the termination are documented and there is documentation that the tenant was given notice prior to the initiation of the termination action that their activities would result in occupancy termination.

(1) Material non-compliance with lease provisions or occupancy rules, for purposes of occupancy termination by a borrower, includes actions such as:
   (i) Violations of lease provisions or occupancy rules that are substantial and/or repeated;
   (ii) Non-payment or repeated late payment of rent or other financial obligations due under the lease or occupancy rules; or
   (iii) Admission to or conviction for use, attempted use, possession, manufacture, selling, or distribution of an illegal controlled substance when such activity occurred on the housing project’s premises by the tenant, a member of the tenant’s household, a guest of the tenant, or any other person under the tenant’s control at the time of the activity.

(2) Good causes, for purposes of occupancy terminations by a borrower, include actions such as:
(i) Actions by the tenant or a member of the tenant’s household which disrupt the livability of the housing by threatening the health and safety of other persons or the right of other persons to enjoyment of the premises and related facilities;

(ii) Actions by the tenant or a member of the tenant’s household which result in substantial physical damage causing an adverse financial effect on the housing or the property of other persons;

(iii) Actions prohibited by state and local laws.

(b) Lease expiration or tenant eligibility. A tenant’s occupancy in an Agency-financed housing project may not be terminated by a borrower when the lease agreement expires unless the tenant’s actions meet the conditions described in paragraph (a) of this section, or the tenant is no longer eligible for occupancy in the housing. Borrowers must handle terminations of occupancy due to a change in tenant eligibility status in accordance with §3560.158. At a minimum, the occupancy termination notice must include the following information:

(1) A specific date by which lease termination will occur;

(2) A statement of the basis for lease termination with specific reference to the provisions of the lease or occupancy rules that, in the borrower’s judgment, have been violated by the tenant in a manner constituting material non-compliance or good cause; and

(3) A statement explaining the conditions under which the borrower may initiate judicial action to enforce the lease termination notice.

(c) Other terminations. If occupancy is terminated due to conditions which are beyond the control of the tenant, such as a condition related to required repair or rehabilitation of the building, or a natural disaster, the tenants who are affected by such a circumstance are entitled to benefits under the Uniform Relocation Act and may request a Letter of Priority Entitlement (LOPE) from the Agency. If tenants need additional time to secure replacement housing, the Agency may, at the tenant’s request, extend the LOPE entitlement period.

(d) Criminal activity. Borrowers may terminate tenancy for criminal activity or alcohol abuse by household members in accordance with the provisions of 24 CFR 5.858, 5.859, 5.860, and 5.861.

§3560.160 Tenant grievances.

(a) General. (1) The requirements established in this section are designed to ensure that there is a fair and equitable process for addressing tenant or prospective tenant concerns and to ensure fair treatment of tenants in the event that an action or inaction by a borrower, including anyone designated to act for a borrower, adversely affects the tenants of a housing project.

(2) Any tenant/member or prospective tenant/member seeking occupancy in or use of Agency facilities who believes he or she is being discriminated against because of age, race, color, religion, sex, familial status, disability, or national origin may file a complaint in person with, or by mail to the U.S. Department of Agriculture’s Office of Civil Rights, Room 326–W, Whitten Building, 14th and Independence Avenue, S.W., Washington DC 20250–9410 or to the Office of Fair Housing and Equal Opportunity, U.S. Department of Housing and Urban Development (HUD), Washington, DC 20410. Complaints received by Agency employees must be directed to the National Office Civil Rights Staff through the State Civil Rights Manager/Coordinator.

(b) Applicability. (1) The requirements of this section apply to a borrower action regarding housing project operations, or the failure to act, that adversely affects tenants or prospective tenants.

(2) This section does not apply to the following situations:

(i) Rent changes authorized by the Agency in accordance with the requirements of §3560.203(a);

(ii) Complaints involving discrimination which must be handled in accordance with §3560.2(b) and paragraph (a)(2) of this section;

(iii) Housing projects where an association of all tenants has been duly formed and the association and the borrower have agreed to an alternative method of settling grievances;
(iv) Changes required by the Agency in occupancy rules or other operational or management practices in which proper notice and opportunity have been given according to law and the provisions of the lease;
(v) Lease violations by the tenant that would result in the termination of tenancy and eviction;
(vi) Disputes between tenants not involving the borrower; and
(vii) Displacement or other adverse actions against tenant as a result of loan prepayment handled according to subpart N of this part.

(c) Borrower responsibilities. Borrowers must permanently post tenant grievance procedures that meet the requirements of this section in a conspicuous place at the housing project. Borrowers also must maintain copies of the tenant grievance procedure at the housing project’s management office for inspection by the tenants and the Agency upon request. Each tenant must receive an Agency summary of tenant’s rights when a lease agreement is signed. If a housing project is located in an area with a concentration of non-English speaking individuals, the borrower must provide grievance procedures in both English and the non-English language. The notice must include the telephone number and address of USDA’s Office of Civil Rights and the appropriate Regional Fair Housing and Enforcement Agency.

(d) Reasons for grievance. Tenants or prospective tenants may file a grievance in writing with the borrower in response to a borrower action, or failure to act, in accordance with the lease or Agency regulations that results in a denial, significant reduction, or termination of benefits or when a tenant or prospective tenant contests a borrower’s notice of proposed adverse action as provided in paragraph (e) of this section. Acceptable reasons for filing a grievance may include:

1. Failure to maintain the premises in such a manner that provides decent, safe, sanitary, and affordable housing in accordance with §3560.103 and applicable state and local laws;
2. Borrower violation of lease provisions or occupancy rules;
3. Modification of the lease;
4. Occupancy rule changes;
5. Rent changes not authorized by the Agency according to §3560.205;
6. Denial of approval for occupancy.

(e) Notice of adverse action. In the case of a proposed action that may have adverse consequences for tenants or prospective tenants such as denial of admission to occupancy and changes in the occupancy rules or lease, the borrower must notify the tenant or prospective tenant in writing. In the case of a Borrower’s proposed adverse action including denial of admission to occupancy, the Borrower shall notify the applicant/tenant in writing. The notice must be delivered by certified mail return receipt requested, or a hand-delivered letter with a signed and dated acknowledgement of receipt from the applicant/tenant. The notice must give specific reasons for the proposed action. The notice must also advise the tenant or prospective tenant of “the right to respond to the notice within ten calendar days after date of the notice” and of “the right to a hearing in accordance with §3560.160 (f), which is available upon request.” The notice must contain the information specified in paragraph (a)(2) of this section. For housing projects in areas with a concentration of non-English speaking individuals, the notice must be in English and the non-English language.

(f) Grievances and responses to notice of adverse action. The following procedures must be followed by tenants, prospective tenants, or borrowers involved in a grievance or a response to an adverse action.
1. The tenant or prospective tenant must communicate to the borrower in writing any grievance or response to a notice within 10 calendar days after occurrence of the adverse action or receipt of a notice of intent to take an adverse action.
2. Borrowers must offer to meet with tenants to discuss the grievance within 10 calendar days of receiving the grievance. The Agency encourages borrowers and tenants or prospective tenants to make an effort to reach a mutually satisfactory resolution to the grievance at the meeting.
(3) If the grievance is not resolved during an informal meeting to the tenant or prospective tenant’s satisfaction, the borrower must prepare a summary of the problem and submit the summary to the tenant or prospective tenant and the Agency within 10 calendar days. The summary should include: The borrower’s position; the applicant/tenant’s position; and the result of the meeting. The tenant also may submit a summary of the problem to the Agency.

(g) Hearing process. The following procedures apply to a hearing process.

(1) Request for hearing. If the tenant or prospective tenant desires a hearing, a written request for a hearing must be submitted to the borrower within 10 calendar days after the receipt of the summary of any informal meeting.

(2) Selection of hearing officer or hearing panel. In order to properly evaluate grievances and appeals, the borrower and tenant must select a hearing officer or hearing panel. If the borrower and the tenant cannot agree on a hearing officer, then they must each appoint a member to a hearing panel and the members selected must appoint a third member. If within 30 days from the date of the request for a hearing, the tenant and borrower have not agreed upon the selection of a hearing officer or hearing panel, the borrower must notify the Agency by mail of the situation. The Agency will appoint a person to serve as the sole hearing officer. The Agency may not appoint a hearing officer who was earlier considered by either the borrower or the tenant, in the interest of ensuring the integrity of the process.

(3) Standing hearing panel. In lieu of the procedure contained in paragraph (g)(2) of this section for each grievance or appeal presented, a borrower may ask the Agency to approve a standing hearing panel for the housing project.

(4) Examination of records. The borrower must allow the tenant the opportunity, at a reasonable time before a hearing and at the expense of the tenant, to examine or copy all documents, records, and policies of the borrower that the borrower intends to use at a hearing unless otherwise prohibited by law or confidentiality agreements.

(5) Scheduling of hearing. If a standing hearing panel has been approved, a hearing will be scheduled within 15 calendar days after receipt of the tenant’s or prospective tenant’s request for a hearing. If a hearing officer or hearing panel must be selected, a hearing will be scheduled within 15 calendar days after the selection or appointment of a hearing panel or a hearing officer. All hearings will be held at a time and place mutually convenient to both parties. If the parties cannot agree on a meeting place or time, the hearing officer or hearing panel will designate the place and time.

(6) Escrow deposits. If a grievance involves a rent increase not authorized by the Agency, or a situation where a borrower fails to maintain the property in a decent, safe, and sanitary manner, rental payments may be deposited by the tenant into an escrow account, provided the tenant’s rental payments are otherwise current.

(i) The escrow account deposits must continue until the complaint is resolved through informal discussion or by the hearing officer or panel.
(ii) The escrow account must be in a Federally-insured institution or with a bonded independent agent.
(iii) Failure to make timely rent payments into the escrow account will result in a termination of the tenant grievance and appeals procedure and all sums will immediately become due and payable under the lease.
(iv) Receipts of escrow account deposits must be available for examination by the borrower.

(7) Failure to request a hearing. If the tenant or prospective tenant does not request a hearing within the time provided by paragraph (f)(1) of this section, the borrower’s disposition of the grievance or appeal will become final.

(h) Requirements governing the hearing. The following requirements will govern the hearing process.

(1) Subject to paragraph (f)(2) of this section, the hearing will proceed before a hearing officer or hearing panel at which evidence may be received without regard to whether that evidence could be used in judicial proceedings.

(2) The hearing must be structured so as to provide basic due process safeguards for both the borrower and the
tenants or prospective tenants, which must protect:

(i) The right of both parties to be represented by counsel or another person chosen as their representative;

(ii) The right of the tenant or prospective tenant to a private hearing unless a public hearing is requested;

(iii) The right of the tenant or prospective tenant to present oral or written evidence and arguments in support of their grievance or appeal and to cross-examine and refute the evidence of all witnesses on whose testimony or information the borrower relies; and

(iv) The right of the borrower to present oral and written evidence and arguments in support of the decision, to refute evidence relied upon by the tenant or prospective tenant, and to confront and cross-examine all witnesses in whose testimony or information the tenant or prospective tenant relies.

(3) At the hearing, the tenant or prospective tenant must present evidence that they are entitled to the relief sought, and the borrower must present evidence showing the basis for action or failure to act against that which the grievance or appeal is directed.

(4) The hearing officer or hearing panel must require that the borrower, the tenant or prospective tenant, counsel, and other participants or spectators conduct themselves in an orderly manner. Failure to comply may result in exclusion from the proceedings or in a decision adverse to the interests of the disorderly party and granting or denial of the relief sought, as appropriate.

(5) If either party or their representative fails to appear at a scheduled hearing, the hearing officer or hearing panel may make a determination to postpone the hearing for no more than five days or may make a determination that the absent party has waived their right to a hearing under this subpart. If the determination is made that the absent party has waived their rights, the hearing officer or hearing panel will make a decision on the grievance. Both the tenant or prospective tenant and the borrower must be notified in writing of the determination of the hearing officer or hearing panel.

(i) Decision. Hearing decisions must be issued in accordance with the following requirements.

(1) The hearing officer or hearing panel has the authority to affirm or reverse a borrower’s decision.

(2) The hearing officer or hearing panel must prepare a written decision, together with the reasons thereof based solely and exclusively upon the facts presented at the hearing within 10 calendar days after the hearing. The notice must state that the decision is not effective for 10 calendar days to allow time for an Agency review as specified in paragraphs (1)(3) and (1)(4) of this section.

(3) The hearing officer or hearing panel must send a copy of the decision to the tenant, or prospective tenant, borrower, and the Agency.

(4) The decision of the hearing officer or hearing panel shall be binding upon the parties to the hearing unless the parties to the hearing are notified within 10 calendar days by the Agency that the decision is not in compliance with Agency regulations.

(5) Upon receipt of written notification from the hearing officer or hearing panel, the borrower and tenant must take the necessary action, or refrain from any actions, specified in the decision.

§§ 3560.161–3560.199 [Reserved]

§ 3560.200 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.
§ 3560.201 General.

This subpart sets forth the requirements for establishing and collecting rents charged to occupants of multifamily housing (MFH) projects financed by the Agency.

§ 3560.202 Establishing rents and utility allowances.

(a) General. Rents and utility allowances for rental units in Agency-financed housing projects are set by the borrower and must be based on the operating, management and maintenance expenses and other costs related to the housing project including loan payment amounts due to the Agency.

(b) Agency approval. All rents and utility allowances set by borrowers are subject to Agency approval.

(c) Rents. As applicable, borrowers must establish the following rents:

(1) Note rent;
(2) Basic rent;
(3) U.S. Department of Housing and Urban Development (HUD) contract rents; and
(4) Low-income housing tax credit (LIHTC) rents.

(d) Utility allowances. In projects where tenants pay the utilities, borrowers must establish utility allowances for each size and type of rental unit in the housing project based on estimated utility costs. Borrowers must review utility allowances annually, adjust for accuracy, and submit any utility allowance changes to the Agency for approval. If no changes are needed, the borrower must notify the Agency that no changes were made. Documentation to justify utility allowances must be maintained in the housing project files.

(e) Funds contributed to reduce rents. If borrowers use funds contributed from sources other than the Agency (e.g., state or local grants, private contributions) to reduce general operating and management expenses, housing project rents must be reduced to reflect the funding being used to offset housing project expenses. When funds contributed from sources other than the Agency are used for housing project expenses, the borrower must certify to the Agency, in writing, that the funds provided will not need to be repaid with Agency funds. Funds from borrower contributions or rehabilitation loans will not be counted towards reducing rents.

(f) Rents for resident manager, caretaker, or owner-occupied unit. (1) If approved as a part of a management plan, a borrower may occupy a rental unit in a housing project when they are acting as a management agent or resident manager as specified in §3560.102(e).

(2) If the rental unit being occupied by a borrower or resident manager is designated as a revenue-producing unit, borrowers must calculate the rental charge to the borrower or resident manager in the same manner as tenant contributions.

(g) LIHTC. Borrowers who receive LIHTCs may establish rents in accordance with LIHTC requirements. However, borrowers are obligated to ensure that sufficient annual funds are available to cover expenses in the housing project’s approved budget, including the required payments on the borrower’s Agency loan. Borrowers must not use housing project funds to make up any difference between rents required under Agency program requirements and the maximum allowed rents under the LIHTC program.

§ 3560.203 Tenant contributions.

(a) Tenant contributions. A tenant’s contribution to rent charged for a rental unit in an Agency financed housing project is based on the tenant’s income, as calculated on the Agency’s tenant certification forms, and the availability of Agency or non-Agency rental subsidies.

(1) Tenant contributions. Borrowers must set tenant contributions to rent at the highest of the following standards but never more than the note rent:

(i) Thirty percent of monthly adjusted income;
(ii) Ten percent of gross monthly income;
(iii) An amount equal to the portion of an assistance payment specifically designated to meet the household’s shelter costs if the household is receiving assistance payments from a public agency; or

(iv) The basic rent, unless RHS rental assistance is provided to the household.

(2) Tenant contribution surcharge. Tenants in a Plan I housing project with incomes above the eligibility standards set in §3560.152(a)(1) must pay a 25 percent surcharge in addition to note rent.

(b) Adjustment of tenant contribution. Borrowers must adjust the tenant contribution whenever there is a change in tenant household status or income sufficient to generate a revised tenant certification in accordance with §3560.152(e) or an Agency approved rent or utility allowance change that affects the tenant contribution amount.

(c) Overage. If a tenant’s tenant contribution is higher than basic rent, borrowers must remit to the Agency the rent collected in excess of the basic rent and up to the note rent.

§ 3560.204 Security deposits and membership fees.

(a) General. Borrowers may collect security deposits when it is reasonable and customary for the area in which the housing is located. Borrowers must hold security deposits in a separate bank or bookkeeping account in accordance with §3560.302(c)(3).

(b) Allowable amounts. Borrowers may charge security deposits that are typical for the area in which the housing is located, as long as the security deposit charged a tenant does not exceed that tenant’s net contribution for one month’s rent or basic rent, whichever is greater.

(1) As noted in §3560.102(b)(1)(viii) and §3560.156(c)(18)(iii), borrowers must specify in the housing project’s management plan how the amount to be charged as a security deposit will be established and must specify the amount to be charged to individual tenants in the lease to be signed by the tenant.

(2) Borrowers may charge security deposits to households receiving HUD assistance in accordance with HUD requirements.

(3) Members of a cooperative shall be required to pay a membership fee no greater than one month’s occupancy charge.

(4) Additional security deposits for pets may be charged as long as the additional deposit is not greater than basic rent for 1 month. No additional security deposit for assistance animals is allowed where an assistance animal is necessary for the normal functioning of a household member with a disability.

(5) Borrowers must not charge additional security deposits based on disabilities of tenants or other personal characteristics.

(c) Payment plans. Borrowers must offer, for persons who are eligible for rental assistance or Section 8 assistance, the option of paying the security deposit on an installment payment plan. Should installments not be met, the total charge may become due and payable in full.

(d) Charges for damage or loss. Borrowers may charge tenants for damage or loss caused or allowed by the tenant equal to the cost of the damage or loss.

(1) Borrowers must consider expenses due for addressing normal wear and tear as normal operating expenses and must not charge tenants a fee or withhold security deposits to pay for such costs.

(2) Borrowers may withhold security deposits and may charge tenants for damage or loss costs above security deposit amounts.

(e) State and local security deposit requirements. Borrowers must follow all state and local laws and other requirements governing the handling and disposition of security deposits.

(1) Resolution of any security deposit disputes must be handled in accordance with state and local law.

(2) Any interest earned on security deposits will accrue in accordance with state law.

(f) Unclaimed security deposits. Any funds in the housing project’s security deposit account unclaimed by a tenant must be deposited into the housing project’s general operating account.

§ 3560.205 Rent and utility allowance changes.

(a) General. Borrowers must fully document that changes to rents and utility allowances are necessary to
cover housing or utility costs allowed under the approved budget for the housing. Any changes must apply to all similar units in the housing project.

(b) Agency approval. Borrowers must submit a fully documented request to the Agency to effect any rent or utility allowance change.

(1) Borrowers must obtain written consent or approval from the Agency as specified in paragraph (e) of this section before implementing any changes in the rents or utility allowances.

(2) If a borrower implements an unauthorized rent or utility allowance charge, the Agency will require the borrower to roll back rents to the last authorized rent charge, and the borrower must reimburse tenants for any unauthorized rents collected.

(c) Timing of request for changes. Borrowers must submit rent and utility allowance change requests in conjunction with the annual budget submission as required under §3560.303(d). The effective dates of any approved changes will coincide with the start of the housing project’s fiscal year or the start of the season for seasonally occupied farm labor housing. However, the Agency will accept borrower requests for rent or utility allowance changes anytime during the year if a change is necessary to preserve the financial integrity of the housing complex and the financial distress is due to circumstances beyond the borrower’s control.

(d) Tenant notification. Borrowers must notify tenants and solicit their comments to proposed rent or utility allowance change requests that are submitted to the Agency at the same time that the initial request is made to the Agency.

(1) Tenants will be given 20 calendar days to provide their comments to the Agency.

(2) Borrowers must deliver the proposed rent or utility allowance change request notice to each tenant and post at least one copy of the notice at the housing project site in a visible location frequented by tenants.

(e) Approval. If the Agency approves a rent or utility allowance increase request on which the comments were solicited, the borrower will deliver a notice announcing the rent or utility allowance change to the tenants to be effective 30 calendar days from the date of the notification.

(f) Denial of change request. The Agency may deny a rent or utility allowance increase request in the following circumstances.

(1) The Agency determines that the borrower did not provide sufficient information to justify operating costs.

(2) The borrower is out of compliance with Agency requirements including any corrective action requirements agreed to in a workout agreement developed according to subpart J of this part.

(3) Sufficient funds are being collected under existing rents to meet approved expenses.

(g) Notice of denial. If the rent change will not be approved as requested, the Agency will notify the borrower of the denial in accordance with §3560.303(d).

§3560.206 Conversion to Plan II (Interest Credit).

The Agency encourages any borrower not on Plan II to convert to Plan II to provide more favorable rent costs to very-low, low, and moderate-income households.

§3560.207 Annual adjustment factors for Section 8 units.

(a) General. For rental units receiving project-based Section 8 assistance, the Agency will review rents annually without regard to HUD’s automatic annual adjustment.

(b) Establishing rents in housing with HUD rent assistance. Borrowers will set note and basic rents for housing receiving HUD project-based Section 8 assistance, as specified in §3560.202(c)(3).

(1) Borrowers must notify the Agency of any HUD rent changes.

(2) If allowed by the interest credit agreement, the borrower will remit the amount collected in excess of the basic rent up to the note rent to the Agency as overage.

(3) When HUD contract rents exceed note rents, borrowers must deposit HUD funds equal to the difference between the Agency approved note rent and the HUD approved rent into the reserve account for the housing project.
(c) **Excess HUD rents.** When permitted by the Agency interest credit agreement, the Agency may reduce or cancel the interest credit on the housing, if excess HUD rents deposited in the reserve account result in the reserve account being funded beyond the fully funded level approved by the Agency.

§ 3560.208 **Rents during eviction or failure to recertify.**

(a) **Rents during eviction.** If a tenant is appealing an eviction and the borrower refuses to accept rent payment during the appeal of the eviction, the tenant must escrow required rent payments to safeguard their occupancy, unless State or local laws specify otherwise.

(b) **Rents when tenants fail to recertify.** If a borrower can document that a tenant received a notice specifying a tenant recertification date and the tenant fails to comply by the specified date or fails to cooperate with verification or other procedures related to the tenant’s recertification so that the tenant recertification cannot be completed by the recertification date, the borrower, within 10 days of the recertification date, shall give the tenant and the Agency written notification that:

1. Termination proceedings are being initiated, in accordance with §3560.159; and
2. The tenant will be charged note rent until the tenant’s lease is terminated.

(c) **Unauthorized assistance due to tenant recertification failure.** Any unauthorized assistance received because of the tenant’s failure to be recertified will be collected in accordance with the provisions of subpart O of this part.

(d) **Rents when borrowers fail to recertify tenants.** If a borrower cannot document that a tenant received a recertification notice, and a tenant is not recertified within 12 months of the most recently executed tenant certification, tenants shall continue to make net tenant contributions to rent based on their most recent tenant certification and the borrower must remit to the Agency full overage as if the tenant was paying the note rent until the tenant is recertified.

(e) **Unauthorized assistance due to borrower recertification failure.** Any unauthorized assistance received as a result of the borrower’s failure to recertify a tenant will be collected from the borrower in accordance with the provisions of subpart O of this part and may not be paid from housing project funds or funds collected from the tenant.

§ 3560.209 **Rent collection.**

(a) **General.** Borrowers must collect rents on a monthly basis and maintain a system for collecting and tracking rents.

(b) **Fees for late rent payments.** Borrowers may adopt a late fee schedule for overdue rental payments. Late fee schedules must be submitted to the Agency for approval as part of the housing project’s management plan, be in accordance with State and local law, and consistent with the following requirements:

1. A grace period of 10 days from the rental payment due date must be allowed for all tenants.
2. The late fee must not exceed the higher of $10 or an amount equal to 5 percent of the tenant’s gross tenant contribution.

3. Tenants receiving housing benefits from sources other than the Agency may be subject to the late rent fee requirements of the other funding sources.

(c) **Improperly advanced rents.** Improperly advanced interest credit or rental assistance is considered unauthorized assistance and is subject to recapture in accordance with subpart O of this part.

§ 3560.210 **Special note rents (SNRs).**

When a Plan II housing project is experiencing severe vacancies due to market conditions, the Agency may allow the borrower to charge an SNR, which is less than note rent but higher than basic rent, to attract or retain tenants whose income level would require them to pay special note rent. The requirements for requesting and receiving an SNR are established under §3560.454.

§§ 3560.211–3560.249 [Reserved]

§ 3560.250 **OMB control number.**

The information collection requirements contained in this regulation have been approved by the Office of
Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart F—Rental Subsidies

§ 3560.251 General.

This subpart contains policies for borrower administration and tenant use of rental subsidies in Agency financed multi-family housing (MFH) projects.

§ 3560.252 Authorized rental subsidies.

(a) General. The purpose of rental subsidies is to reduce amounts paid by tenants for rent. Rental subsidies equal the difference between the approved shelter costs and tenant contributions as calculated in accordance with § 3560.203(a)(1).

(b) Forms of rental subsidies. Rental subsidies may be in the form of:

(1) Agency rental assistance;
(2) HUD section 8 assistance, including project-based and vouchers;
(3) Private rental subsidies; or
(4) State or local government rental subsidies.

(c) Multiple rent subsidies. (1) Multiple types of rent subsidies may be used in the same MFH project.

(2) Tenants with subsidies from sources other than the Agency may be eligible for Agency rental assistance if the following conditions are met.

(i) The tenant qualifies for Agency rental assistance.

(ii) The rental subsidy the tenant is receiving is not a HUD voucher.

(iii) The rental subsidy being received by the tenant is less than the full amount of Agency rental assistance for which the tenant would qualify. In such cases, the Agency may provide the difference between the subsidy received by the tenant and the amount of Agency rental assistance for which the tenant qualifies.

(d) Agency rental assistance (RA). Agency RA is obligated to MFH projects on a rental unit basis. The obligation is composed of a number of rental units and associated dollar amounts of RA specified in a RA agreement with a borrower. The following types of Agency RA may be obligated to a housing project.

(1) Renewal units. RA may be assigned to a housing project to replace existing rental unit obligations because funds associated with the units have been fully disbursed.

(2) New construction units. RA may be provided in conjunction with initial Agency loans for construction or substantial rehabilitation of MFH projects.

(3) Servicing units. Additional RA may be provided to operational MFH projects as a part of the Agency’s general loan servicing or preservation activities.

§ 3560.253 [Reserved]

§ 3560.254 Eligibility for rental assistance.

(a) Eligible housing. Housing projects eligible for Agency RA include the following types of projects.

(1) Housing projects that operate under an Interest Credit Plan II RA agreement.

(2) Housing projects financed with an Agency off-farm labor housing loan or grant. On-farm labor housing is not eligible for rental assistance.

(3) Housing projects financed with a direct or insured Rural Rental Housing loan approved prior to August 1, 1968, and operated under an interest credit agreement that identifies the housing project as a Plan RA project.

(4) Housing projects financed from Agency and other sources if the conditions of § 3560.66 are met.

(b) Eligible units. Borrowers may not request RA for rental units that the Agency determines are not habitable in accordance with § 3560.103.

(c) Eligible households. Households eligible for rental assistance are those:

(1) With very low-or low-incomes who are eligible to live in MFH;

(2) Whose net tenant contribution to rent determined in accordance with
§ 3560.203(a)(2) is less than the basic rent for the unit;
(3) Whose head of the household is a U.S. citizen or a legal alien as defined in § 3560.11;
(4) Who meet the occupancy rules established by the borrower in accordance with § 3560.155(e); and
(5) Who have a signed, unexpired tenant certification form on file with the borrower.

EFFECTIVE DATE NOTE: At 70 FR 8503, Feb. 22, 2005, in § 3560.254(c)(3), implementation of the words “Whose head of the household is a U.S. citizen or a legal alien as defined in § 3560.11.” was delayed indefinitely.

§ 3560.255 Requesting rental assistance.

(a) Submitting requests. Borrowers seeking an allocation of rental assistance for MFH must request the rental assistance from the Agency as follows.

(1) Renewal rental assistance. To the extent sufficient funds are available, the Agency will automatically renew expiring rental assistance agreements at the existing number of units.

(2) New construction units. Loan applicants proposing to use Agency rental assistance must include their request for rental assistance in their loan proposal in accordance with § 3560.56.

(3) Servicing units. Borrowers requesting rental assistance must have tenants or eligible tenant applicants on a waiting list who are RA eligible.

(b) Denial of requests. (1) If a rental assistance request is denied due to the loan applicant’s or borrower’s ineligibility, the Agency will send the loan applicant or borrower written notification of the decision with an explanation of the denial.

(2) If a rental assistance request to renew expiring rental assistance agreements is denied because funding is not available, the Agency will notify the borrower and the borrower must notify the tenants of rent increases in accordance with their lease and state and local law. Tenants losing RA due to a lack of Agency funding may quit the lease and vacate the housing without penalty in accordance with the terms of their lease.

(3) Loan applicants or borrowers determined to be eligible for RA as a result of an appeal or funding review will receive RA, if RA funding is available, beginning with the month following the date of the appeal or funding review decision or beginning in the first month that RA funding becomes available.

§ 3560.256 Rental assistance payments.

(a) Borrower submission requirements. The borrower must submit monthly requests for RA payments to the Agency based on occupancy as of the first day of the month previous to the month in which the request is being made.

(b) Basis of RA requests. Borrower requests for RA payments must be based on the difference between the basic rent plus utility allowances for each rental unit eligible for RA and the net tenant contribution of the tenant.

(c) Payments to borrower. Prior to making RA payments to a borrower, the Agency will deduct from the approved RA payment amount any unpaid loan payments, late fees, and other amounts which the borrower owes to the Agency.

(d) Utility payments to tenants. The borrower must pay tenants the difference between the utility allowance and the tenant’s net contribution to rent when a tenant receiving RA is billed directly for utilities and the utility allowance exceeds the net tenant contribution to rent. Such utility payments to tenants must be made on a monthly basis.

(e) Administrative errors. Borrowers are responsible for correcting borrower errors made in regard to RA requests for payments. In accordance with subpart O of this part, borrowers will be required to repay the Agency for any unauthorized RA received or any unauthorized use of RA except in certain cases of tenant error or fraud.

§ 3560.257 Assigning rental assistance.

(a) Priorities for rental assistance. (1) Borrowers must use the following priorities when assigning available rental assistance.

(i) First priority is to eligible very low-income tenants paying the highest percentage of their adjusted annual income for Agency approved shelter costs.

(ii) Second priority, if the housing project has vacant rental units, is to
eligible very low-income applicants on the waiting list.

(iii) Third priority is to eligible low-income tenants paying the highest percentage of their adjusted annual income for Agency approved shelter costs.

(iv) Fourth priority, if the housing project has vacant rental units, is to eligible low-income applicants on the waiting list.

(v) Fifth priority is to households which are residing in a rental unit for which they do not qualify on the basis of an occupancy waiver or other special approval situations.

(2) In order to provide rental assistance to the third, fourth, and fifth priority categories, a borrower must fully document either that there are no very low-income households on the housing project's waiting list or that occupancy by low-income households is limited as follows:

(i) For housing occupied on or after November 30, 1983, no more than 5 percent of the units in the housing are occupied by low-income households; or

(ii) For housing occupied before November 30, 1983, no more than 25 percent of the units in the housing are occupied by low-income households.

(b) Continued eligibility. Tenants receiving rental assistance may continue to do so as long as they remain eligible for occupancy and for rental assistance under §3560.254(c), and as long as rental assistance units are available.

(c) Assignment of rental assistance. Except as provided in §3560.454(c) and using the priorities given in paragraph (a) of this section, borrowers must assign available rental assistance units as soon as rental assistance units become available.

1. When a rental assistance unit is assigned to an eligible existing tenant on a day other than the first day of a month, the Agency will not provide the borrower rental assistance for the newly assigned existing tenant and the tenant will not pay reduced rental charges until the first of the month following the assignment of the rental assistance.

2. When an eligible applicant moves into a rental assistance unit on a day other than the first day of a month, they will pay a prorated rent based on the number of days they occupy the rental assistance unit and the amount of rental assistance they will be receiving.

(d) Incorrectly assigned rental assistance. Incorrectly assigned rental assistance is viewed as unauthorized assistance and handled in accordance with subpart O of this part.

§3560.258 Terms of agreement.

(a) Term of agreement. Rental assistance agreements will be consistent with available funding. Rental assistance agreements expire when the funds obligated for rental assistance units are fully disbursed in accordance with the conditions of the agreement.

(b) Replacing expiring obligations. To the extent funds are available for replacement units, the Agency will renew rental assistance agreements.

§3560.259 Transferring rental assistance.

(a) Agency authority. The Agency may transfer rental assistance in the following instances:

1. To accompany the transfer of a housing project to a different borrower;

2. After a voluntary conveyance or a foreclosure sale;

3. After a liquidation or prepayment;

4. To the extent permitted by law, when any rental assistance units have not been used for a 6-month period; or

5. When the loan cannot be closed.

(b) Agency review before transferring rental assistance. The Agency must perform a review to determine if all eligible tenants in the project are receiving rental assistance before the Agency transfers it to another project.

(c) Transferring rental assistance for displaced tenants. The Agency may transfer rental assistance from one housing project to another eligible housing project for a tenant who is moving due to displacement as a result of prepayment, liquidation, or a natural disaster. The tenant must begin using the rental assistance within 4 months of the transfer or the RA will become available for use by the next rental assistance eligible tenant in the housing project.
§ 3560.260 Rental subsidies from non-Agency sources.

(a) General. The Agency may authorize the use of rental subsidies from sources other than the Agency in Agency financed housing projects. The Agency will make no commitment to providing Agency rental assistance at the expiration of the rental subsidies from other sources.

(b) HUD vouchers. For tenants with HUD vouchers, the borrower must set the rental unit rent at the basic rent or the rent standard set by the public housing authority, whichever is less. The public housing authority distributing the HUD vouchers may set the utility allowance.

(c) Loan proposals using non-Agency rental subsidy. Loan applicants or borrowers proposing to use rental subsidy from sources other than the Agency must provide:

(1) Documentation demonstrating that a market exists for households eligible for the subsidy and the households are at income levels that would benefit from the amount of rental subsidy that will be provided;

(2) A plan describing actions to be taken when the rental subsidy expires to minimize the impact on tenants losing the rental assistance and to avoid displacement; and

(3) A copy of the project-based rental assistance agreement to be signed by the borrower and the provider of the rental assistance.

(d) Rental subsidy agreement. The borrower and the provider of rental subsidies from sources other than the Agency must execute a rental subsidy agreement and submit a copy of the agreement to the Agency. At a minimum, the rental subsidy agreement between the borrower and the source of the rental subsidy must include the following provisions:

(1) A description of how the subsidy will be paid. The rental subsidy payments may be paid directly to the tenant, to the borrower on behalf of the tenants, or deposited to a separate account established for the subsidy. The tenants must be advised of the amount and source of the subsidy through the lease or a supplement to the lease.

(2) The life of a project-based rental subsidy agreement with a non-Agency source must be similar to existing or current Agency rental assistance funding levels and sufficient funds must be set aside to assure availability of the rental subsidy for this term. The method of supplying the funds must be clearly established.

§ 3560.261 Improperly advanced rental assistance.

Improperly advanced RHS rental assistance resulting from tenant or borrower error or fraud constitutes unauthorized assistance and the provisions of subpart O of this part apply.

§§ 3560.262–3560.299 [Reserved]

§ 3560.300 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart G—Financial Management

§ 3560.301 General.

This subpart contains requirements for the financial management of Agency-financed multi-family housing (MFH) projects, including accounts, budgets, reports, and engagements. Financial management systems and procedures must cover all housing operations and provide adequate documentation to ensure that program objectives are met.

§ 3560.302 Accounting, bookkeeping, budgeting, and financial management systems.

(a) General. Borrowers must establish the accounting, bookkeeping, budgeting and financial management procedures necessary to conduct housing
project operations in a financially safe and sound manner. Borrowers must maintain records in a manner suitable for an engagement and must be able to report accurate operational results to the Agency from these accounts and records.

(b) Acceptable methods of accounting.  
(1) Borrowers may use a cash, accrual, or modified accrual method of accounting, bookkeeping, and budget preparations as long as the method is consistent with the statements required by the engagement in accordance with the standards identified in §3560.308.

(2) Borrowers must describe their accounting, bookkeeping, budget preparation, and financial reporting procedures, including Agency-approved engagements, in their management plan.

(3) Borrowers must notify the Agency of any changes in their accounting, bookkeeping, budget preparation, and financial management reporting systems through a revision of their management plan.

(c) Account requirements.  (1) As used in this paragraph, the term account is used interchangeably to mean a bookkeeping account (ledger) or a bank account.

(2) At a minimum, borrowers must maintain the accounts required by their loan agreement or resolution.

(3) The following list identifies the financial accounts that are required for each housing project. Additional accounts may be required by third-party lenders. Accounts are to be funded in the following priority order, except that paragraphs (c)(3)(iv), (v), and (vi) of this section are funded directly by tenant security deposits or patron capital receipts respectively:

(i) General operating account;

(ii) Real estate tax and insurance account (if not part of the general operating account);

(iii) Reserve account;

(iv) Tenant security deposit account;

(v) Membership fee account for cooperative housing; and

(vi) For cooperative housing only, a patron capital account.

(4) Amounts escrowed for taxes and insurance may be kept in the general operating account as long as the accounting system reflects the amount escrowed.

(5) Regardless of the number or types of accounts established, the borrower must meet the following requirements:

(i) All housing project funds must be held only in financial institution accounts insured by an agency of the Federal Government, backed by collateral provided by the bank, or held in securities meeting the conditions in this subpart.

(ii) Funds maintained in an institution may not exceed the limit established for Federal deposit insurance. If funds exceed the amount covered by Federal deposit insurance, borrowers must obtain a collateral pledge from the institution to cover all funds or must move funds to an institution that will insure the funds.

(iii) All funds and proceeds in any account must be used only for authorized purposes as described in Agency’s regulations, loan or grant documents. Use of funds for non-program purposes constitutes non-monetary default as described in §3560.452(c).

(iv) All funds received and held in any account, except the tenant security deposit, membership fee, and patron capital accounts, must be held in trust by the borrower for the loan obligation until used and serve as security for the Agency loan or grant.

(v) Borrowers must be able to account for housing project funds with accounting methods or practices that maintain the proprietary identity of the funds for each project. A borrower may operate one account for multiple projects as long as the funds for each project themselves are accounted for separately.

(vi) Each borrower must have access to at least one demand deposit or checking account.

(vii) Housing project funds may not be pledged as collateral for debts without Agency approval. If such a need arises for an eligible program purpose, the borrower must obtain prior Agency approval.

(6) Tenant security deposit accounts or membership fee accounts and patron capital accounts must be maintained in a separate account in trust for the tenants or members and handled in a manner consistent with state and local laws.
(d) Documentation of separate accountability. Housing project funds may be combined in one or more bank accounts for two or more housing projects as long as the borrower’s accounting system segregates and tracks funds for each project separately.

(1) When borrowers request Agency approval of an accounting system that combines funds from two or more housing projects, they must demonstrate to the Agency that the accounting systems are structured to segregate and maintain separate accountability for each housing project. Such demonstration must include a statement issued by a Certified Public Accountant (CPA) stating that the accounting system is structured to meet this principle of separate accountability.

(2) The accounting system and management plan must document the method for prorating revenue and expenses that are not clearly identifiable as being associated with a particular housing project.

(3) Funds for housing projects managed by the same management company must not be co-mingled.

(e) Records. (1) Borrowers must retain all housing project financial records, books, and supporting material for at least three years after the issuance of the engagement and financial reports. Upon request, these materials will immediately be made available to the Agency, its representatives, the USDA Office of the Inspector General (OIG), or the General Accountability Office (GAO).

(2) Borrower accounts and records will be kept or made available in a location with reasonable access for inspection, review, and copying by the Agency, other authorized representatives of the USDA, OIG, or GAO.

(3) Automated records may be used if they meet the conditions of paragraph (f) of this section.

(f) Forms generated by automated systems. (1) The forms and formats approved for use by borrowers may be prepared on automated systems when they meet the requirements of this paragraph.

(2) Forms may be automated if they meet the following requirements:

(i) The identical wording and nomenclature of an official form must be included in the automated version of the form, including the Office of Management and Budget (OMB) approval number.

(ii) The logic or mathematical calculation of an official form must be the same in an automated version of the form.

(iii) The name or logo of the source of the automated form must be visible on each output of the automated form.

(iv) Output size must be 8½ × 11 inches.

(v) Nominal spacing adjustment and colored paper are allowed.

(g) Farm Labor Housing. Borrowers with on-farm labor housing units will be considered in compliance with this section by virtue of completing the record keeping and reporting requirements outlined in subpart M of this part.

§ 3560.303 Housing project budgets.

(a) General requirements. (1) Using an Agency-approved format, borrowers must submit to the Agency for approval a proposed annual housing project budget prior to the start of the housing project’s fiscal year. The capital budget section of the annual project budget must include anticipated expenditures on the project’s long-term capital needs as specified in §3560.103(c).

(2) Budget projections regarding income, expenses, vacancies, and contingencies must be realistic given the housing project’s history, current circumstances, and market conditions.

(3) Borrowers must document that the operating expenses included in the budget accurately reflect reasonable and necessary costs to operate the housing project in a manner consistent with the objectives of the loan and in accordance with the applicable Agency requirements.

(4) Borrower must submit supporting documentation to justify housing project utility allowances.

(5) Upon Agency request, borrowers must submit any additional documentation necessary to establish that applicable Agency requirements have been met.

(b) Allowable and unallowable project expenses. Expenses charged to project operations, whether for management
agent services or other expenses, must be reasonable, typical, necessary and show a clear benefit to the residents of the property. Services and expenses charged to the property must show value added and be for authorized purposes.

(1) Allowable expenses. Allowable expenses include those expenses that are directly attributable to housing project operations and are necessary to carry out successful operations.

(i) Housing project expenses must not duplicate expenses included in the management fee as defined in §3560.102(i).

(ii) Actual costs for direct personnel costs of permanent and part-time staff assigned directly to the project site. This includes managers, maintenance staff, and temporary help including their:

(A) Gross salary;
(B) Employer FICA contribution;
(C) Federal unemployment tax;
(D) State unemployment tax;
(E) Workers compensation insurance;
(F) Health insurance premiums;
(G) Cost of fidelity or comparable insurance;
(H) Leasing, performance incentive or annual bonuses;
(I) Direct costs of travel to off-site locations by on-site staff for property business or training; and/or
(J) Retirement benefits.

(iii) Legal fees directly related to the operation and management of the property including tenant lease enforcement actions, property tax appeals and suits, and the preparation of all legal documents.

(iv) All outside account and auditing fees, if required by the Agency, directly related to the preparation of the annual audit, partnership tax returns and 401-K’s, as well as other outside reports and year-end reports to the Agency, or other governmental agency.

(v) All repair and maintenance costs for the project including:

(A) Maintenance staffing costs and related expenses.
(B) Maintenance supplies.
(C) Contract repairs to the projects (e.g., heating and air conditioning, painting, roofing).
(D) Make ready expenses including painting and repairs, flooring replacement and appliance replacement as well as drapery or mini-blind replacement. (Turnover maintenance).
(E) Preventive maintenance expenses including occupied unit repairs and maintenance as well as common area systems repairs and maintenance.
(F) Snow removal.
(G) Elevator repairs and maintenance contracts.
(H) Section 504 and other Fair Housing compliance modifications and maintenance.
(I) Landscaping maintenance, replacements, and seasonal plantings.
(J) Pest control services.
(K) Other related maintenance expenses.

(vi) All operational costs related to the project including:

(A) The costs of obtaining and receiving credit reports, police reports, and other checks related to tenant selection criteria for prospective residents.
(B) The cost of duplicating forms for those properties not owning a copier. This will include the costs of producing or purchasing forms and mailing or delivering those forms to the project site.
(C) All bank charges related to the property including purchases of supplies (e.g., checks, deposit slips, returned check fees, service fees).
(D) Costs of site-based telephone including initial installation, basic services, directory listings, and long-distance charges.
(E) All advertising costs related specifically to the operations of that project. This can include advertising for applicants or employees in newspapers, newsletters, radio, cable TV, and telephone books.
(F) Postage and delivery costs from the site including expenses to the Agency or other governmental agencies, tenants, verifying third parties, central management offices, etc.

(G) Partnership or corporate business expenses including state taxes and other mandated state or local fees as well as other relevant expenses required for operation of the property by a third-party governmental unit. Costs of continuation financing statements and site license and permit costs.

(H) Expenses related to site utilities including actual costs and surcharges
as well as deposits and expense of utility bonds in lieu of bonds.

(I) Site office furniture and equipment including site based computer and copiers. Service agreements and warranties for copiers, telephone systems and computers are also included (if approved by the Agency).

(J) Real estate taxes (personal tangible property and real property taxes) and expenses related to controlling or reducing taxes.

(K) All costs of insurance including property liability and casualty as well as fidelity or crime and dishonesty coverage for on-site employees and the owners.

(L) Costs of collecting rents on-site including bookkeeping supplies and recordkeeping items.

(M) Costs of preparing and maintaining tenant files and processing tenant certifications including all office supplies, copies and other associated expenses.

(N) Public relations expense relative to maintaining positive relationships between the local community and the tenants with the management staff and the borrowers. Chamber of Commerce dues, contributions to local charity events, and sponsorship of tenant activities, are examples.

(O) Tax Credit Compliance Monitoring Fees imposed by HFAs.

(P) All insurance deductibles as well as adjuster expenses.

(Q) Professional service contracts (audits and compilations, tax returns, energy audits, utility allowances, architectural, construction, rehabilitation and inspection contracts, etc.)

(R) On-site training pre-approved by the Agency provided by outside training vendors.

(S) Site manager salary for additional hours associated with congregate housing.

(vii) With prior Agency approval, cooperatives and nonprofit organizations may use housing project funds to pay asset management expenses directly attributable to ownership responsibilities. Such expenses may include:

(A) Errors and omissions insurance policy for the Board of Directors.

(B) Board of Director review and approval of proposed Agency’s annual operating budgets, including proposed repair and replacement outlays and accruals.

(C) Board of Director review and approval of capital expenditures, financial statements, and consideration of any management comments noted.

(D) Long-term asset management reviews.

(2) Unallowable expenses. Housing project funds may not be used for any of the following:

(i) Equity skimming as defined in 42 U.S.C. 543 (a).

(ii) Purposes unrelated to the housing project.

(iii) Reimbursement of inaccurate or false claims.

(iv) Settlement agreements, court ordered decrees, legal fees, or other costs that result from the filing of civil rights complaints or legal action alleging the borrower, or a representative of the borrower, has committed a civil rights violation.

(v) Fines, penalties, and legal fees where the borrower or a borrower’s representative has been found guilty of violating laws, including, but not limited to, civil rights, and building codes.

(vi) Association dues to be paid by the project should be related to training for site managers or management agents. To the extent that association dues can document training for site managers or management agents related to project activities by actual cost or pro-ration, a reasonable expense may be billed to the project.

(vii) Pay for bonuses or monetary performance awards to site managers or management agents that are not clearly provided for by the site manager salary contract.

(viii) Billing for parties that are large or unreasonable, such as renting expensive party halls or hotel rooms and payment for alcoholic beverages or gifts to management agent staff.

(ix) Billing for practices that are inefficient such as routine use of collect calls from a site manager to a management agent office.

(c) Priorities. The priority order of planned and actual budget expenditures will be:

(1) Senior position lienholder, if any;

(2) Operating and maintenance expenses, including taxes and insurance;

(3) Agency debt payments;
§ 3560.304 Initial operating capital.

(a) Purpose. To provide a source of capital for start-up costs, such as the purchase of equipment, and paying operating, maintenance, and debt service expenses. Borrowers are required to make an initial operating capital contribution to the general operating account as described in §3560.64.

(b) Authorized uses of initial operating capital. Initial operating capital may be used only to pay for approved budgeted expenses.

(c) Withdrawal of initial operating capital. Initial operating capital funds may be withdrawn by a borrower if:

1. The initial operating capital was provided from the borrower’s own funds;
2. The borrower requests the withdrawal after the second year of housing project operations and prior to the 7th year of operations;
3. The housing project has had a 90 percent occupancy rate for a period of 12 months prior to the withdrawal request;
4. The withdrawal will not affect the financial viability of the housing project;
5. Contributions to the reserve account are at authorized levels;
6. The withdrawal request will not result in rent increases; and
7. There are no outstanding deficiencies in management’s physical maintenance of the housing project.

§ 3560.305 Return on investment.

(a) Borrower’s return on investment. Borrowers may receive a return on their investment (ROI) in accordance with the terms of their loan agreement and the following:

1. If there is a positive net cash flow in housing project operations, the ROI may be taken by the borrower after the housing project’s fiscal year, provided that the balance of the reserve account is equal to or greater than required deposits minus authorized withdrawals. If the annual financial reports indicate that an ROI should not have been taken, borrowers will be required to return any unauthorized ROI.
2. If there is negative cash flow in housing project operations, the Agency may authorize the borrower to take the ROI only after the Agency has reviewed the housing project’s annual financial reports and determines:

(i) Surplus cash exists in either the general operating account as defined in §3560.306(d)(1) or the reserve account, if
§ 3560.306 Reserve account.

(a) Purpose. To meet the major capital expense needs of a housing project, borrowers must establish and maintain a reserve account.

(b) Financial management of the reserve account. Borrower management of the reserve account is subject to the requirements of 7 CFR part 1902, subpart A regarding supervised bank accounts.

(c) Funding of the reserve account. Borrowers must make payments to the reserve account in the amount established in loan documents, beginning with the first loan payment or a date specified in loan documents.

(d) Transfer of surplus general operating account funds. (1) The general operating account will be deemed to contain surplus funds when the balance at the end of the housing project’s fiscal year, after all payables, exceeds 20 percent of the operating and maintenance expenses. If the borrower is escrowing taxes and insurance premiums, include the amount that should be escrowed by year end and subtract such tax and insurance premiums from operating and maintenance expenses. If the borrower is escrowing taxes and insurance premiums, include the amount that should be escrowed by year end and subtract such tax and insurance premiums from operating and maintenance expenses.

(2) If a housing project’s general operating account has surplus funds at the end of the housing project’s fiscal year, the Agency will require the borrower to use the surplus funds to address capital needs, make a deposit in the housing project’s reserve account, reduce the debt service on the borrower’s loan, or reduce rents in the following year. At the end of the borrower’s fiscal year, if the borrower is required to transfer surplus funds from the general operating account to the reserve account, the transfer does not change the future required contributions to the reserve account.

(e) Account requirements. Borrowers must establish and maintain the reserve account according to §3560.65, §3560.302(c)(5), and the following requirements:

(1) Reserve accounts must be deposited in interest-bearing accounts or securities; and

(2) Reserve accounts must be supervised accounts that require Agency countersignatures on all withdrawals.

(f) Funds invested in securities. In addition to the requirements specified in paragraph (e) of this section, the following requirements apply when reserve funds are invested in securities:

(1) The reserve account must be held either at a Federally insured domestic institution such as a bank, savings and loan association, credit union, or at a domestic institution authorized to sell securities.

(2) The borrower must record the price actually paid for the securities. When designated as a reserve deposit, the price paid must equal the required contribution to reserves.

(3) Borrowers must be knowledgeable about industry practices and consider the impact of typical fees and charges for purchases and sales and maintenance of an account when making investment decisions. Such fees may be paid for out of reserves, only with the consent of the Agency. Housing project funds may not be used to pay for a financial advisor.

(g) Use of the reserve account. (1) Borrowers must request Agency approval of reserve account withdrawals prior to the withdrawal. Borrowers must inform the Agency of planned uses of reserve accounts in their annual capital budget if known at budget planning time. Any item on the approved capital budget does not require additional preapproval by the Agency.

(2) The Agency will indicate any conditions governing withdrawals from a reserve account at the time it approves the withdrawal.

(3) In emergency situations, the Agency may specify special procedures to provide an expedited approval process for the use of the reserve account.
(4) The Agency may approve the use of reserve funds for operating costs when circumstances that are determined by the Agency to be beyond the borrower’s control have resulted in a shortfall in the housing project’s general operating account.

(b) Allowable uses. Allowable uses of reserve funds include the following:

(1) Major capital improvements and replacements.

(2) Housing project operating expenses provided the requirement of paragraph (g)(4) of this section has been met, including:

(i) Payments due on the loan, or

(ii) Payment of a return on investment at the end of the borrower’s fiscal year if such payment comes from surplus operating funds in the reserve account.

(3) With Agency approval, borrowers operating on a for-profit or a limited profit basis may make an annual withdrawal from the reserve account, equal to no more than 25 percent of the interest earned on a reserve account during the prior year.

(4) For other purposes, which in the judgment of the Agency will promote the loan purposes, strengthen the security or facilitate, improve, or maintain the housing and the orderly collection of the loan without jeopardizing the loan or impairing the adequacy of the security.

(k) Excess reserves. Amounts in the reserve account which exceed the total required by the loan or grant agreement must be used, at the direction of the Agency, for any of the following:

(1) Pay for expenses specified in a long-term capital plan;

(2) Make payments and reamortize the Agency loan;

(3) Reduce rents by a transfer to the general operating account;

(4) Fund preservation incentives authorized in subpart N of this part; or

(5) Cover other expenditures determined to be related to the purpose of the housing project and in the best interest of the Federal Government.

(l) Procurement. The requirements of §3560.102(g), (j), and (k), and all other Agency requirements relating to procurement, bidding, identity-of-interest, cost-reasonableness, and construction management apply to any work or services paid out of reserve funds. Structural repairs and other significant work on major building systems such as heating or air conditioning must be done in accordance with the requirements of 7 CFR part 1924, subpart A.

§ 3560.307 Reports.

(a) Required reports. Borrowers must submit required reports using Agency-approved formats.

(b) Quarterly and monthly reports. The Agency may require quarterly or monthly reports to monitor financial progress when closer supervision is warranted.

§ 3560.308 Annual financial reports.

(a) General. Borrowers must submit annual financial reports that meet the requirements of this section. The annual financial reports to be submitted are the Multi-Family Housing (MFH) Project Budget with actual expenditures and the MFH Balance Sheet. Annual financial reports are due to the Agency within 90 days of the end of the borrower’s fiscal year.

(1) Borrowers with 16 or more units in their housing project must base their annual financial reports on an engagement report completed according to procedures established by the Agency as specified in paragraph
(b) of this section. Borrowers must include the engagement report with their annual financial reports submitted to the Agency.

(2) Borrowers with less than 16 units in their housing project must submit annual financial reports using a limited scope engagement based on Agency approved procedures and certify that the housing meets the performance standards established in paragraph (c) of this section. Borrowers may use a CPA to prepare this report. For properties that prepare a limited scope engagement, the Agency may undertake random audits, once every two or three years.

(3) If a third party requires it, the borrower may have a CPA prepare an audit in accordance with generally accepted government auditing standards (GAGAS). Costs incurred to obtain this audit are an allowable project expense.

(b) Engagement requirements. Borrowers required to submit annual financial reports based on an engagement performed by a CPA must meet the following requirements:

(1) Borrowers must use an Agency approved engagement letter. Borrowers must submit the results of an engagement that examines specific records using agreed upon procedures established by the Agency and that describes the borrower’s performance in meeting the standards described in paragraph (c) of this section.

(2) The engagement will be initiated by the borrower using the Agency’s engagement letter, which will specify the engagement program and establish the reporting requirements for the engagement.

(3) The engagement must be conducted by a CPA in accordance with American Institute of Certified Public Accountant (AICPA) Standards and Agency requirements.

(4) All engagement reports must be prepared for use by the Agency.

(c) Performance standards. Borrowers must ensure that:

(1) Required accounts are properly maintained and tracked separately;

(2) Payments from operating accounts are disclosed and accurately represented on financial reports;

(3) The reserve amount is at the authorized level and there are no encumbrances;

(4) Tenant security deposit accounts are fully-funded and are maintained in separate accounts and meet state and local requirements;

(5) Amount of payment of owner return was consistent with the terms of the applicable loan agreement;

(6) The borrower has maintained proper insurance in accordance with the requirements of §3560.105(b); and

(7) All financial records are adequate and suitable for examination.

(d) Other financial reports. (1) Non-profit and public borrower entities must submit audits in accordance with 7 CFR part 3052 that must also include the requirements set forth in the limited scope engagement.

(2) The Agency may require additional opinions of financial condition and compliance, such as audits, to assure the security of the asset, determine whether the housing project is being operated at a reasonable cost, or to detect fraud, waste, or abuse.

(3) Any audits independently obtained by the borrower also must be submitted to the Agency.

§3560.309 Advancement (loan) of funds to a RRH project by the owner, member of the organization, or agent of the owner.

(a) Prior written approval by the Servicing Office is required. Such advances may be authorized when justified by unusual short-term conditions. When conditions are not short-term in nature, a servicing plan may be developed and advances may be approved in accordance with the provisions set out in §3560.453 of this part. Justification will be based on the following:

(1) A review of the documented circumstances and the project operating budget before any funds are advanced (loaned). The financial position of the project must not be jeopardized.

(2) Funds are not immediately available from any of the following sources:

(i) Reserve funds;

(ii) Initial operating capital; and

(iii) An imminent rent increase.

(b) The funds will be applied to ordinary project operating and maintenance expenses.
§§ 3560.310–3560.349

(c) Interest may be charged or paid on the loan from project income; however, interest must be reasonable. The proposal may be denied if Rural Development financing can be provided to resolve the problem in a more cost-effective manner.

(d) No lien in connection with the loan will be filed against the property securing the Rural Development loan or against project income. The advance may show as an unsecured project liability on financial statements prepared for year-end reports until such time as it is authorized to be repaid.

(e) The payoff of the advance (loan) may be permitted by the Servicing Official provided the terms and conditions were mutually agreed to by the borrower and Rural Development at the time of the advance and the financial position of the project will not be jeopardized. Payback should only be permitted on the advance when the Rural Development debt is current and the reserve requirements are being maintained at the authorized levels.

§§ 3560.310–3560.349 [Reserved]

§ 3560.350 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart H—Agency Monitoring

§ 3560.351 General.

This subpart contains policies for Agency monitoring of operations and management at multi-family housing (MFH) projects.

§ 3560.352 Agency monitoring scope, purpose, and borrower responsibilities.

(a) Scope of Agency monitoring activities. The Agency will review reports, records, and other materials related to the housing project, including borrower financial reports, housing project records, and other communications. The Agency also will review material related to a housing project submitted by a tenant or other source. To assess conditions such as a housing project’s physical condition, record keeping procedures, and operations and management activities, including borrower compliance with Federal, state, and local laws and Agency requirements, the Agency will conduct periodic on-site monitoring reviews of a housing project.

(b) Purpose of Agency monitoring activities. Agency monitoring activities are designed to assess borrower and tenant compliance with Agency requirements, and to:

(1) Ensure housing projects are managed in accordance with the goals and objectives of the Agency’s MFH programs and are maintained in accordance with Agency requirements for affordable, decent, safe, and sanitary housing;

(2) Preserve the value of the Agency-financed housing projects;

(3) Detect waste, fraud, and abuse in housing project operations or management and to ensure the cost of operations and management are necessary and reasonable;

(c) Borrower responsibilities. The borrower is responsible for cooperating fully and promptly with Agency monitoring activities. Agency monitoring activities do not diminish borrower operation and management responsibilities and do not relieve borrowers from any Agency requirements including,
§ 3560.401 General.

(a) Purpose. This subpart contains actions the Agency may take to service and collect loans or other debts owed by multi-family housing (MFH) borrowers. The loan servicing and other actions set forth are designed to protect Agency and tenant interests and assist borrowers in meeting program objectives.

(b) General servicing policies. Borrowers must repay loans or other amounts due to the Agency according to provisions specified in promissory notes, loan agreements and resolutions, mortgages, deeds-of-trust, assumption agreements, reamortization agreements, or other agreements executed between the borrower and the Agency.

(c) Special servicing actions. The Agency will not agree to any proposal for loan servicing or debt collection action other than actions consistent with this section, debt instruments, and other agreements. When payments due to the Agency from a borrower remain unpaid for more than 30 days after the due date, past due, after the Agency may
§ 3560.402 Loan payment processing.

(a) Predetermined Amortization Schedule System (PASS) requirements. All loans, except the loans specified in paragraph (c) of this section, must be closed and serviced using the PASS.

(b) Required conversion to PASS. Borrowers with Daily Interest Accrual System (DIAS) accounts must convert to PASS whenever a loan servicing action on the account involves a change in the loan rates or terms or whenever a subsequent loan to the borrower is closed.

(c) Exceptions. Seasonal farm labor housing loans and on-farm labor housing loans may be closed on DIAS, monthly, or annual payment schedules.

§ 3560.403 Account servicing.

(a) Payment due dates. Loan or other payments due to the Agency are due on the first day of each month unless otherwise established in the debt instrument or other agreement executed with the Agency.

(b) Payment application order. Loan payments will be applied to the borrower’s account in the following order of priority:

1. Amortized audit receivables. (i.e., amounts due to the Agency, over a period of time, as a result of a finding from an audit or other monitoring activity.)

2. Unamortized audit receivables. (i.e., amounts due to the Agency, in a lump sum payment, as a result of a finding from an audit or other monitoring activity.)

3. Late fees. (i.e., amounts due to the Agency as a result of late payments.)

4. Amortized recoverable costs. (i.e., amounts due to the Agency, over a period of time, as a result of Agency payments made on behalf of a borrower for housing project related expenses such as taxes or insurance premiums.)

5. Unamortized recoverable costs. (i.e., amounts due to the Agency, in a lump sum payment, as a result of Agency payments made on behalf of a borrower for housing project related expenses such as taxes or insurance premiums.)

6. Overage. (i.e., amounts due to the Agency as a result of a tenant’s tenant contribution being higher than basic rent.)

7. Interest. (i.e., amounts due to the Agency as a result of scheduled interest on a loan and as a result of interest charged on unpaid delinquent principal amounts.)

8. Principal. (i.e., amounts due to the Agency as the loan principal.)

9. Advance payments. (Any funds remaining after disbursement of a payment to all other payment priorities will be applied to the borrower’s account as an advance regular payment unless a borrower specifically designates, in writing, another application.)

(c) Late fees. If payments on a borrower’s account, under PASS, are more than $15 delinquent after the close of business on the 10th day after the payment due date, a late fee will be charged to the borrower’s account.

1. Late fees charged to a borrower’s account will equal 6 percent of the total regular payments due as specified in any promissory notes, assumption agreements, or reamortization agreements related to the borrower’s account.

2. Late fees are a borrower expense and must not be paid from housing project funds.

3. The Agency may waive late fees for circumstances beyond a borrower’s control and when a waiver is determined by the Agency to be in the best financial interest of the Federal Government.

(d) Interest on unpaid overdue principal. On the first day of the month following a payment due date, the Agency will charge interest at the note rate on any unpaid principal payment due according to the loan’s amortization schedule (i.e., interest will be charged on delinquent principal). The interest charged on the unpaid principal payment due will be charged to the borrower in addition to the scheduled interest due on payments according to the loan’s amortization schedule.

§ 3560.404 Final loan payments.

(a) Payoff statements. At the borrower’s request, the Agency will provide a statement indicating the pay off
§ 3560.405 Borrower organizational structure or ownership interest changes.

(a) General. The requirements of this section apply to changes in a borrower entity’s organizational structure or to a change in a borrower entity’s controlling interest. If 100 percent of a borrower entity’s ownership interest is transferred, within a 12-month period, the change will be considered a housing project transfer and the provisions of §3560.406, which covers transfers or sales of housing projects, will apply.

(b) Agency requirements. Borrowers must notify the Agency prior to the implementation of any changes in a borrower entity’s organizational structure. The Agency must give its consent prior to the implementation of changes in a borrower entity’s controlling interest.

(1) Borrowers must submit written requests for Agency consent to the Agency at least 45 days prior to the anticipated effective date of the proposed organizational change. The request must document that the proposed changes will not adversely affect the program purposes or security interest of the Agency and will not adversely affect tenants.

(2) If the controlling interest change involves a transfer of interest to an entity not previously holding an ownership interest in the borrower entity, the request for consent must include a written certification, executed by the party receiving the ownership interest,
§ 3560.406 MFH ownership transfers or sales.

(a) General. The provisions of this section apply to ownership transfers or sales (e.g., title transfers) involving an Agency financed housing project. The provisions cover situations where Agency loans are being assumed as a part of a housing project transfer or sale.

(b) Agency consent requirements. Agency consent must be obtained prior to an ownership transfer or sale and Agency consent will only be given when the transfer or sale is in the best interest of the Federal Government. Any ownership transfer or sale without the consent of the Agency will be considered a default and will be handled in accordance with subpart J of this part.

(1) Priority consideration will be given to ownership transfers or sales needed to remove a hardship to the borrower that was caused by circumstances beyond the borrower’s control.

(2) Ownership transfers or sales with an assumption of debt at an amount less than the borrower’s debt amount will only be approved by the Agency when all persons in the borrower entity who are transferring their ownership interest or are involved in the selling of the property are not part of the transferee organization.

(c) Consent request requirements. Borrowers must submit written requests for Agency consent to an ownership transfer or sale of a housing project to the Agency at least 45 days prior to proposed ownership transfer or sale date. The consent request must document that the proposed transfer or sale meets the requirements of paragraph (d) of this section and must include the following items:

(1) A statement disclosing any identity-of-interest between the borrower and the party to which the housing project ownership is being transferred or sold.

(2) A statement certifying that the housing project’s financial accounts are funded at required levels, less authorized withdrawals, and that payments due for operation and maintenance expenses, tax assessments, insurance premiums, any required tenant security deposit accounts, and other obligations incurred as a part of the housing project operations are paid in full with no overdue balances or a statement explaining the housing project’s
financial situation and the reasons for overdue payments or under funded accounts.

(3) A proposed housing project budget covering the partial year, if applicable, and first full year operation following the ownership transfer or housing project sale.

(4) A written statement, signed by the proposed transferee or buyer, certifying that the transferee or buyer will assume the borrower responsibilities and obligations specified in Agency program requirements including requirements in a promissory note, loan agreement or other documents related to Agency loans held by the borrower entity.

(5) A certification from the borrower and the proposed transferee or buyer that the borrower does not and will not have a reversionary interest in the housing project.

(d) Requirements for ownership transfers or sales. An ownership transfer or sale of a housing project with an assumption of Agency loans by the transferee or buyer must comply with the following conditions:

(1) The transferee or buyer must be an eligible borrower under the requirements established by subpart B of this part;

(2) The transferee or buyer must agree to set basic rents at the housing project covered by the assumed loans at levels that do not exceed conventional rents for comparable units in the area, except that when determined necessary by the Agency to allow for decent, safe and sanitary housing to be provided in market areas where conventional rents are not sufficient to cover necessary operating, maintenance, and reserve costs. Basic rents may be allowed to exceed comparable rents for conventional units, but in no case by more than 150% of the comparable rent for conventional unit rent level; and

(3) The value of the housing project covered by the loans to be assumed, at the time of an ownership transfer or sale, must be sufficient to ensure that all Agency loans being assumed and all subsequent loans being offered as a part of the transfer or sale can be secured to a level that fully protects the Agency’s interest. Loans from third-party sources that are not dependent on project revenue for payment will not be included in this determination.

(i) If the total value of the loans being offered as a part of an ownership transfer or sale is $100,000 or less, the security value of the housing project may be determined through either: An Agency review of monitoring reports conducted in accordance with the requirements in subpart H of this part or an appraisal paid for by the borrower and conducted in accordance with subpart P of this part.

(ii) If the total value of the loans being offered as a part of an ownership transfer or sale exceeds $100,000, the security value of the housing project must be determined through an appraisal obtained by the Agency and conducted in accordance with subpart P of this part.

(iii) The Agency may approve a loan write-down, in accordance with §3560.455, prior to an ownership transfer or sale to reduce the amount of debt being assumed by the transferee or buyer.

(4) Prior to Agency approval of an ownership transfer or sale, an environmental review, as required under the National Environmental Policy Act and in accordance with 7 CFR part 1940, subpart G, must be conducted on all property related to the ownership transfer or sale. If contamination from hazardous substances or petroleum products is found on the property, the finding must be disclosed to the Agency and the transferee or buyer and must be taken into consideration in the determination of the housing project’s value.

(5) All immediate and long-term repair and rehabilitation needs must be identified by a capital needs assessment. The reserve requirements for the housing project will be reviewed by the Agency and adjusted, if necessary, to adequately cover the cost of addressing the property’s capital needs. The Agency may approve the release of the current reserve amount to the transferor provided the transferee agrees to deposit the amount to cover the project’s immediate needs into the reserve account at closing.
§ 3560.406

(6) The borrower and transferee must disclose to the Agency all terms, conditions, or other considerations related to the ownership transfer or sale. All side or other agreements must be disclosed and all sources and uses of funds related to the ownership transfer or sale must be disclosed.

(7) An agreement must be signed between the borrower and the transferee listing all repairs known by the borrower to be necessary to bring the housing project into compliance with Agency requirements for decent, safe, and sanitary housing as listed in subpart C of this part.

(i) The agreement must include repairs required to correct compliance violations cited in a compliance violation notice issued by the Agency.

(ii) The agreement must specify whether each repair listed will be completed by the borrower prior to the ownership transfer or by the transferee in accordance with a workout agreement developed in accordance with the requirements of §3560.453 and executed between the transferee or buyer and the Agency.

(8) A civil rights compliance review, as required by 7 CFR part 1901, subpart E, will be conducted by the Agency prior to the ownership transfer or sale.

(9) During or immediately after the transfer, a review of the property must be conducted to ensure that it complies with or will comply with section 504(c) of the Americans with Disabilities Act (ADA), which covers accessibility requirements, and the Title VI of the Fair Housing Act of 1968.

(10) A transferee must ensure that tenant certifications in compliance with subpart D of this part for all occupied rental units are on file with the Agency.

(11) A transferee must comply with insurance and bonding requirements established in subpart C of this part at the time of the transfer.

(12) A transferee must agree to submit financial reports to the Agency according to subpart G of this part.

(13) A transferee must establish that there are no liens, judgments, or other claims against the housing project other than those by the Agency and those to which the Agency has previously agreed.

(14) A limited profit Rural Rental Housing transferee’s initial investment and return on investment will remain the same as that originally provided to the transferor unless:

(i) The property is transferred to a non-profit entity and the return on investment is eliminated; or

(ii) The transferee contributes additional funds for repair or rehabilitation and the Agency agrees to recognize a higher initial investment.

(e) Equity payments. The Agency will withhold any equity payment due to the borrower, as part of an ownership transfer or sale, if any of the following conditions exist:

(1) The borrower’s indebtedness to the Agency has not been paid in full or is not being assumed by the transferee. The Agency will require that all or part of an equity payment be applied against other Agency loans owed by the borrower if payments on the other loans are not current.

(2) Any non-Agency prior liens against a housing project are not paid in full.

(3) Any housing project financial accounts are not funded at required levels, less authorized withdrawals, or any payments due for operation and maintenance expenses, tax assessments, insurance premiums, tenant security deposits or other obligations incurred as a part of housing project operations are not paid in full.

(4) Any management deficiencies cited in a compliance violation notice issued by the Agency to the borrower have not been corrected or the housing project is not operating under an approved management plan or, if applicable, an approved management agreement.

(5) Any operation and maintenance deficiencies cited in compliance violation notices issued by the Agency have not been corrected or are not scheduled for correction in a workout agreement developed in accordance with the requirements of §3560.453.

(6) The borrower entity is, at the time of the ownership transfer or sale, cited by the Agency or other Federal, state, or local agencies for violations of Fair Housing or Equal Opportunity requirements.
(7) The borrower entity is, at the time of the ownership transfer or sale, cited by the Agency or any other entity involved in the financing of the housing project for misappropriation of funds.

(f) Equity payment funding sources. Equity may be provided in cash or through a loan. If a full equity payment to the transferor is not paid at the time of the ownership transfer or sale or has not been paid through an Agency equity loan or third-party equity loan approved by the Agency to the borrower, the transferee must certify that equity payments due to the borrower will be paid from sources other than housing project’s funds and must identify the sources of such payments.

(g) Restrictive-use requirement. Transferees assuming Agency loans, including loans approved prior to December 21, 1979, will be required to execute a restrictive-use agreement that contains the language specified in §3560.662. The restrictive-use agreement will require the housing project to be used for program purposes for a specified period of time beyond the date that the ownership transfer or sale is closed. When an equity loan is involved at the time of transfer, the restrictions will be for 30 years.

(h) Subsequent loans. The Agency may approve a subsequent loan or permit a loan from a third-party source in conjunction with an ownership transfer or sale of a housing project. The subsequent loan may be in the form of a junior or parity lien.

(1) Subsequent loans on a housing project proposed in conjunction with an ownership transfer or sale must be requested and processed in accordance with the Agency loan origination requirements in subpart B of this part.

(2) The Agency may amortize the subsequent loan over a period not to exceed the remaining economic life of the housing or 50 years, whichever is less.

(3) The Agency may extend the term of the existing loan to a period not to exceed 30 years or the remaining economic life of the housing, whichever is less.

(i) Loan assumption interest rates. The interest rate for Agency loans assumed in conjunction with an ownership transfer or sale will be determined as follows:

(1) The interest rate for all loans, except farm labor housing loans, will be set at the lower of:

(i) The note rate of the existing Agency loan;

(ii) The Agency note rate on the day the transfer is approved;

(iii) The Agency note rate on the day the transfer is closed; or

(iv) If the rents are increased due to a transfer, the transfer will be done under new rates and terms when the Agency determines that it is in the best interest of the government. Subsequent loan may be in the form of a senior, junior or parity lien or soft second.

(2) The interest rate on farm labor housing loans will be the rate specified in the note, except that loans transferred to public bodies, nonprofit organizations of farm workers, and broadly-based nonprofit corporations for farm labor housing purposes may be at a one percent interest rate regardless of the rate specified in the note if the Agency determines that such a reduction is necessary to maintain affordable rental rates for tenants.

(j) Loan assumption terms. The amount of the loan balance that may be assumed through an ownership transfer or sale must not exceed the security value of the housing project determined according to §3560.406(d)(3)(i).

(1) The Agency may reamortize a loan assumed through an ownership transfer or sale over a period not to exceed the remaining economic life of the housing or 50 years, whichever is less.

(2) The Agency may extend the term of the loan to a period not to exceed 30 years or the remaining economic life of the housing, whichever is less.

(3) When loans assumed through an ownership transfer or sale are amortized on an annual payment basis, the loans will be converted, at the time of the transfer or sale, to a monthly payment amortization and will be made subject to PASS. When on- or off-farm labor housing projects are involved in an ownership transfer or sale, the related loans may be transferred on a DIAS basis or converted to PASS if the...
§ 3560.407

Agency determines that such a conversion will not be detrimental to the operation of the farm labor housing.

(k) Processing ownership transfers or sales. (1) At the time of the transfer, the Agency will require the borrower to transfer all equipment, related facilities, and housing project financial accounts to the transferee including the operation and maintenance account, reserve account, tenant security deposit account, tax and insurance escrow accounts.

(i) Any funds remaining in a rental assistance contract not dispersed by the transferor will be assigned to the transferee unless the rental assistance is not needed for tenants or another form of rental subsidy is to be used.

(ii) Any rental assistance determined to be unnecessary will be reassigned to other housing projects in accordance with the provisions of subpart F of this part.

(2) The Agency will require that appropriate loan documents are executed by the transferee. The Agency may require such documents to be referenced in security instruments (e.g., mortgage or deed of trust).

(3) If all of a borrower’s outstanding Agency debt is not assumed or paid off at the time of the transfer or sale, the Agency will not release a borrower from liability unless the Agency determines that the borrower is unable to pay the remaining debt from assets taken as security through the debt settlement procedure in accordance with §3560.457.

(i) Ownership transfers or sales under special rates, terms, and conditions. Housing projects may be transferred or sold to entities that do not meet borrower eligibility requirements for the type of loans being assumed. However, such a transfer or sale will only be considered when it is determined by the Agency to be in the best interest of the Federal Government and the objectives of the original loan can no longer be met. The following special rates, terms, and conditions will apply to such situations.

(1) The transferee makes a down payment of at least 10 percent of the remaining loan balance to be assumed.

(2) The transferee has the ability to pay the Agency debt.

(3) Monthly or annual installments will be amortized over the term of the loan and the interest rate will be at a rate of interest at least one percent higher than the interest rate offered to eligible borrowers as specified in paragraphs (1)(1) or (2) of this section.

§ 3560.407 Sales or other disposition of security property.

(a) General. Borrowers must obtain Agency approval prior to selling or exchanging all or a part of, or an interest in, property serving as security for Agency loans. Agency approval also must be requested and received prior to the granting or conveyance of rights-of-way through property serving as security property. An environmental review must be completed in accordance with 7 CFR part 1940, subpart G, before the Agency approves all such sales or other dispositions of security property.

(b) Request requirements. Requests for Agency approval of transactions related to security property must document that the following conditions will be met.

(1) The borrower’s ability to repay the Agency debt will not be impaired;

(2) The transaction will not interfere with the successful operation of the housing project or prevent the borrower from carrying out the purpose for which the loan was made.

(3) The monetary or other consideration offered in the transaction is equal to or greater than the market value of the security property being disposed of or the rights being granted, except that right-of-way easements may be granted or conveyed with minimal or no consideration being offered if:

(i) The value of the security property will not be reduced;

(ii) The suitability of the security property for the intended purpose will not be impaired; and

(iii) The easement is granted to allow the borrower to develop additional lots or units that will be integrated into the housing project or for enhancement of streets, utilities or other services provided by a public body.

(4) The property that will remain as security for Agency loans, after any
transaction related to security property, will fully secure the borrower's debt to the Agency.

(5) Borrowers must report to the Agency the total of all proceeds derived from the sale or other disposition of property serving as security for Agency loans. The proceeds from the disposition of the security property will be used for purposes approved by the Agency.

§ 3560.408 Lease of security property.

(a) General. Borrowers must obtain Agency approval prior to entering into a lease agreement related to any property serving as security for Agency loans. An environmental review must be completed in accordance with 7 CFR part 1940, subpart G, before the Agency can give lease approval for real property serving as security for Agency loans.

(b) Leases to public housing authorities. Borrowers may not lease all or part of their housing facilities to a housing authority. Lease agreements in place prior to the effective date of this regulation may be continued provided that leases are in a form acceptable to the housing authority and are on terms that will enable the borrower to comply with Agency program requirements, to meet Agency program objectives, and make loan and other required payments to the Agency on an Agency approved schedule.

(c) Lease of a portion of the security property. The Agency may, subject to the applicable provisions governing loan purposes found in of §3560.53, §3560.553 and §3560.603, approve the leasing of facilities related to a housing project (e.g., central kitchens, recreation facilities, laundry rooms, and community rooms) when the borrower will continue to operate the facilities for the purposes for which the loan was made. Agency approval is not required for leases with a term of less than 30 days. The Agency will only approve a lease with a term over 30 days if the following conditions are met:

(1) The lease is in the best interest of the borrower, the tenants, and the Federal Government.

(2) The amount of the consideration agreed to in the lease is adequate to pay all prorated operating and maintenance expenses, a prorated share of the annual reserve deposit, and the prorated part of the loan amortization at the note rate of interest.

(3) All compensation and considerations, whether payments, a share of proceeds, or improvements to the property paid for by the lessee, must be disclosed to the Agency. No payments or compensation for entering into a lease shall flow to the borrower or any identity-of-interest related to the borrower.

(4) The lease provides at its termination for the restoration of the leased space to its original condition or a condition acceptable to the owner and the Federal Government.

(5) Consent to the lease will not exceed 3 years at a time unless the Agency determines that a longer lease is advantageous to the borrower, the tenants, and the Federal Government.

(6) When another lienholder’s mortgage requires that lienholder’s consent to a lease, the borrower must obtain written consent from the lienholder before the Agency will consider approving the lease.

(d) Mineral leases. Mineral leases will be handled according to 7 CFR 3550.159 except that all references to County Supervisor will be construed to mean District Director when applied to the MFH Programs.

§ 3560.409 Subordinations or junior liens against security property.

(a) General. Borrowers must obtain Agency consent prior to entering into any financial transaction that will require a subordination of the Agency security interest in the property (i.e., granting of a prior interest to another lender.) An environmental review must be completed in accordance with 7 CFR part 1940, subpart G, before the Agency can consent to a subordination or junior lien against the property. Borrowers must use an Agency approved subordination agreement.

(1) If a lien is placed against property serving as security for an Agency loan without prior Agency consent, the Agency will declare the borrower to be in default and will pursue liquidation of the borrower’s loans in accordance with the procedures specified in §3560.457, unless an agreement can be
§ 3560.409

reached between the borrower and the Agency to work out removal of the lien or post approve the lien.

(2) Subordinations or junior liens need not encompass the entire site, (e.g., a subordination or junior lien requested to permit an interim lender to advance construction funds may only cover the portion of the site proposed for construction.)

(3) The subordination or junior lien must be for a specific amount.

(4) The subordination or junior lien must not adversely impact the Agency’s ability to service the loan according to the requirements of this part.

(b) Consent request requirements. Borrowers proposing to have the Agency subordinate its interest to another lender or to give a creditor a junior lien against property serving as security for an Agency loan must submit a consent request to the Agency. The consent request must document the following:

(1) The action will enable the borrower to obtain financial resources for improvements or repairs on the security property that are consistent with the purposes of the Agency loan secured by the property.

(2) The action will not adversely impact the borrower’s financial condition and the borrower’s ability to repay the Agency loan being secured by the property.

(3) The action will not result in basic rents at the security property that exceed conventional rents for comparable units in the area.

(4) The terms and conditions of the credit to be secured by the subordination or junior lien are not expected to adversely affect the borrower’s ability to meet the terms and conditions of the Agency loan secured by the property.

(5) The proposed use of the funds obtained through the granting of a subordination or junior lien will not adversely affect the borrower’s ability to operate and manage the housing project in a manner consistent with program objectives.

(6) The creditor receiving the “subordination” of interest in the property or the junior lien will agree that a foreclosure or acceptance of a deed-in-lieu of foreclosure will not be initiated without at least 30 days prior notice to the Agency.

(7) The subordination or junior lien is not being secured with any funding from housing project financial accounts.

(8) The “subordination” of interest or junior lien will not cause the debt from all sources to exceed the value of the security property.

(9) The transaction related to the placement of a “subordination” of interest or junior lien against the property serving as security for an Agency loan is in the best interest of the Federal Government.

(c) Required conditions for subordinations and junior liens. Subordinations of interest in or junior liens against property serving as security for an Agency loan may be approved by the Agency only if they improve a borrower’s financial condition and allow for improvements or repairs that are consistent with the purposes of the Agency loan secured by the property.

(1) Farm Labor Housing loans on farm tracts may be subordinated for essential farm improvements and operations.

(2) Any proposed development must be planned and performed according to 7 CFR part 1924, subpart A, or in a manner directed by the other lienholder that meets the objectives of 7 CFR part 1924, subpart A.

(d) Other liens against a property or other assets. (1) Borrowers must not enter into any agreements to place a lien on a housing project or any equipment related to a housing project without prior Agency approval and unless the following conditions are met:

(i) The transaction will not adversely affect the Agency’s security position;

(ii) The lien is not related to a non-program eligible action;

(iii) The items to be acquired by the funding related to the lien is needed for the operation of the property; and

(iv) The financing arrangements are otherwise sound.

(2) In cases where the above criteria are met, borrowers must complete and provide the Agency a copy of the financing statement, loan document, or
§ 3560.410 Consolidations.

(a) General. With Agency approval, loans, loan agreements, or loan resolutions may be consolidated to reduce the administrative burden (i.e., record keeping, budgeting), to improve the cost effectiveness and efficiencies of housing project operations, and to effectively utilize facilities common to housing projects.

(b) Loan consolidations. Loan consolidations will only be considered when:

(1) Multiple loans to the one borrower entity are being transferred to a different borrower entity in accordance with §3560.406, or

(2) One borrower entity has an initial loan and one or more subsequent loans for the same housing project and all the loans were closed on the same date and with the same rates and terms.

(c) Loan agreement or loan resolution consolidations. Loan agreements or loan resolutions may be consolidated, even if the loans related to the agreement or resolution are not consolidated, to allow borrowers to comply with reporting, accounting, and other Agency requirements as a single housing project.

(1) The loan agreements or loan resolutions may only be consolidated when they are related to loans made for the same purposes, to the same borrower, and operating under the same type of interest credit, if applicable.

(2) All of a borrower’s loan accounts must be current after the loan agreement or loan resolution consolidation is processed, unless otherwise approved by the Agency.

§§ 3560.411–3560.449 [Reserved]

§ 3560.450 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart J—Special Servicing, Enforcement, Liquidation, and Other Actions

§ 3560.451 General.

This subpart contains special servicing, enforcement, liquidation, and other actions that the borrower may request or the Agency may implement when compliance violations, monetary defaults, or non-monetary defaults cannot be resolved through regular servicing.

(a) Agency obligations. The Agency is under no obligation to offer or agree to any special servicing actions.

(b) Relationship to workout agreements. Special servicing actions may be implemented either as a part of a workout agreement, developed in accordance with §3560.453, or as an action approved by the Agency separate from a workout agreement unless indicated otherwise in this subpart.

§ 3560.452 Monetary and non-monetary defaults.

(a) General. Borrowers are in default when they have received a compliance violation notice, issued in accordance with §3560.354, and have failed to correct the compliance violation identified in the compliance violation notice within the time period specified in the notice. Compliance violations include, but are not limited to, violations of promissory note provisions, loan or grant agreement provisions, regulatory, or other Agency requirements, including requirements imposed on a borrower through a workout agreement developed in accordance with §3560.453.

(b) Monetary defaults. A monetary default exists when any amount due to the Agency or a third party (such as real estate taxes and insurance) under a promissory note, loan or grant agreement, workout agreement, or other agreement remains due more than 30 days after the due date.

(c) Nonmonetary defaults. A nonmonetary default exists when a borrower...
§ 3560.453 Workout agreements.

(a) General. (1) Prevention or resolution of compliance violations or default cures are a borrower’s responsibility.

(2) A borrower may develop and submit to the Agency for approval a workout agreement that proposes actions to be taken over a period of time to prevent or correct a compliance violation or to cure a monetary or non-monetary default.

(3) A borrower developed workout agreement may propose, but is not limited to, the following actions:

(i) A combination of one or more of the special servicing actions outlined in §§ 3560.454 and 3560.455;

(ii) A change in operations and management at a housing project; or

(iii) A commitment of additional financial resources to the housing project with the amount and source of the additional resources to be committed to the housing project specifically identified.

(b) Workout agreement approval. (1) The Agency is under no obligation to approve a workout agreement as submitted by a borrower or to act with forbearance when a housing project is in monetary or non-monetary default.

(2) Borrower developed workout agreements may not be implemented until the borrower receives written approval from the Agency.

(3) The Agency will only approve a workout agreement if the Agency determines that the actions proposed are likely to prevent or correct compliance violations or cure a default and approval is in the best interest of the Federal Government and tenants.

(4) The Agency will only approve a workout agreement if the proposed actions are consistent with the borrower’s management plan. If proposed actions are not consistent with the borrower’s management plan, applicable revisions to the borrower’s management plan must be made before approval of the workout agreement is given.

(c) Workout agreement required content. (1) Workout agreements submitted

Rural Housing Service, USDA § 3560.454

to the Agency for approval must be in writing and signed by the borrower. Workout agreements must describe proposed actions in sufficient detail to demonstrate the likelihood of the actions to prevent or correct compliance violations or cure defaults.

(2) At a minimum, workout agreements must include the following.

(i) The name and address of the housing project, project number, borrower’s tax identification number, and other information necessary to identify the housing project.

(ii) A description of the potential or actual compliance violation or default situation, including an explanation of related causes, such as cash flow concerns, budget revisions, deferred maintenance, vacancies, or violations of statutes.

(iii) A definition and description of the housing project’s market area, including information on housing availability, rents, and vacancy rates in the market area.

(iv) A description of the proposed actions to prevent or correct compliance violations or to cure defaults along with a date specific schedule indicating when interim and final actions will be taken to correct the compliance violation or cure the default.

(v) A description of financial and other resources necessary to prevent or correct the compliance violation or cure the default including an identification of the sources for such resources.

(d) Workout agreement budgets. Budget revisions submitted as a part of a workout agreement for a housing project experiencing cash flow problems must prioritize cash disbursements in the following order:

(1) Prior lienholder, if any;

(2) Critical operating and maintenance expenses, including taxes and insurance;

(3) Agency debt payments;

(4) Reserve account requirements; and

(5) Other authorized expenditures.

(e) Workout agreement terms and cancellation. (1) Workout agreements shall be in effect for no longer than a 2-year time period, beginning on the date of Agency approval. If an approved workout agreement calls for actions that extend beyond a 2-year period, borrowers must submit an updated and, if necessary, revised workout agreement to the Agency for approval. The updated workout agreement must be submitted to the Agency 30 days prior to the expiration of the workout agreement in effect.

(2) The Agency may cancel a workout agreement at any time if the borrower fails to comply with the terms of the agreement. The Agency will provide notice to the borrower upon cancellation of the workout agreement.

§ 3560.454 Special servicing actions related to housing operations.

(a) Changing rents or revising budgets. The Agency may approve a borrower request for a rent change, rent incentives, or a revised budget, at any time during a housing project’s fiscal year.

(b) Occupancy waivers. If the Agency determines that a housing project with high vacancies could be kept operationally and financially viable by allowing the borrower to accept as tenants persons with incomes above the income eligibility standards specified in §3560.152(a), the Agency, in writing, may grant the borrower an occupancy waiver to allow such persons as tenants. Occupancy waivers will be in effect only during the time period specified by the Agency when the waiver is granted. In addition, borrowers must rent to all eligible applicants on the housing project’s waiting list prior to accepting persons with incomes above the Agency standards as tenants.

(c) Additional rental assistance (RA). If the Agency determines that a housing project with high vacancies could be kept operationally and financially viable by increasing the amount of RA allocated to the housing project, the Agency, subject to available funds, may offer the housing project RA as a means of preventing or correcting a compliance violation or curing a default.

(d) Special note rents. When a Plan II housing project is experiencing severe vacancies due to market conditions, the Agency may approve a rent less than the note rent to attract and keep tenants whose incomes, according to the formula in §3560.203, would require them to pay the note rent. The reduced
Special Note Rent (SNR) and, as noted in §3560.210, approval of an SNR may affect approvals of loan proposals submitted to the Agency for the market area where the SNR is in effect.

(1) An SNR rent may only be requested as a part of a proposed workout agreement and must include documentation of market conditions, the housing project’s vacancy rates, evidence of marketing efforts, and other concerns necessitating the request for an SNR.

(2) Borrowers must forego the annual return to owner for each housing project’s fiscal year that an SNR is in effect for all or part of a fiscal year at a housing project.

(3) SNR’s may be increased, decreased, or terminated any time during a housing project’s fiscal year when market conditions, vacancy rates, or other concerns that necessitated the SNR warrant a change.

(4) In addition to any state lease law requirements that might be related to the implementation of an SNR, the borrower must notify each tenant of any change in rents or utility allowances that result from approval of an SNR, in accordance with §3560.205(c) and must submit the appropriate budget changes to the Agency for approval.

(e) Termination of management agreement. If the Agency determines that a compliance violation or loan default was caused, in full or in part, by actions or inactions of the housing project’s management agent, the Agency will require the borrower to terminate the management agreement with that agent, or in the case of a borrower managed housing project, to enter an agreement with a third-party non-identity of interest management agent, unless the borrower and the Agency agree on a written plan to prevent recurrence of the violation. Housing project funds may not be used to pay a management fee to a management agent after the Agency has directed the borrower to terminate a management agreement with that agent, except during an Agency approved transition period.

§3560.455 Special servicing actions related to loan accounts.

(a) General. To prevent or correct a compliance violation or to prevent or cure a default in a situation that cannot be resolved through regular servicing, the Agency may approve a deferral of loan payments or a loan restructuring. Nothing herein precludes the Agency from initiating appropriate legal action to correct a compliance violation if the Agency determines such action is more in the Government’s interest than entering into a special servicing agreement as provided for in this section. Procedures for debt collection are discussed in §3560.460. As part of a workout agreement, the Agency may agree to accept less than full monthly payment installments due on an Agency loan for a specified period of time, not to exceed the effective period of the workout agreement.

(b) Loan reamortizations. A loan reamortization is a restructuring of loan terms and conditions over a period of time that does not exceed the remaining useful life of the housing project.

(1) Loan reamortizations will only be approved when they are in the best interest of the Federal Government and tenants and when the following conditions are met.

(i) The Agency determines that the borrower will be unable to meet their obligations without a reduction in monthly payment installments; and

(ii) The Agency is satisfied that the security, including the potential income for debt service, will be adequate to protect the Agency’s interest over the term of the reamortization and that the reamortization will not adversely affect the Federal Government’s lien priority.

(2) If the Agency approves a reamortization of a loan under this section, it will be at the existing note rate, or the current interest rate at the time of reamortization closing or approval, whichever is less.

(3) Loan reamortization may be used to:

(i) Restructure loan repayments to prevent or correct a compliance violation or cure a default caused by circumstances beyond the borrower’s control in situations where the borrower is
§ 3560.456 Liquidation.

Prior to any servicing action which might lead to the acquisition of real property by the Agency, the Agency must complete a due diligence report to assess any potential contamination of the property from hazardous substances, hazardous wastes, or petroleum products. The borrower must cooperate with the Agency in the development of this report.

(a) Before acceleration. Before accelerating a project loan, the Agency will consider the possibility that the borrower is forcing an acceleration to circumvent the prepayment process. If it is found that this is the borrower’s motivation, the Agency will consider alternatives to acceleration, such as suing for specific performance under loan and management documents.

(b) Acceleration. When a borrower is in monetary or non-monetary default, the Agency will accelerate the loan unless the Agency decides other enforcement measures are more appropriate.

(1) If the borrower does not pay the full account balance and meet the other terms of the acceleration notice within the time period set forth in the acceleration notice, the Agency will foreclose or acquire the security property through deed in lieu of foreclosure.

(2) The Agency will suspend interest credit and rental assistance.

(3) The Agency will not accept partial payment of an accelerated loan unless required by state law.

(c) Voluntary liquidation. After acceleration, borrowers may voluntarily liquidate through either of the following mechanisms:

(1) Deed in lieu of foreclosure. RHS may accept a deed in lieu of foreclosure to convey title to the security property only after the debt has been accelerated and when it is in the Government’s best interest.

(2) Offer by third party. If a junior lienholder or cosigner makes an offer in the amount of at least the net recovery value, RHS may assign the note and mortgage after all appeal rights have expired.

(d) Foreclosure. (1) The Agency will initiate foreclosure when a borrower is in monetary or non-monetary default.

(ii) Repay principal, outstanding interest, overage, and advances made by the Agency for recoverable cost items when less than full payments were authorized under the provisions of an Agency approved workout agreement;

(iii) Restructure a borrower’s loan payments in conjunction with an incentive package developed in accordance with §3560.656 to prevent prepayment of the loan;

(iv) Restructure an existing loan in conjunction with a subsequent loan for rehabilitation; or

(v) Restructure remaining debt when a portion of the property serving as loan security is sold and there is a need to reestablish the financial stability of the housing project.

(c) Loan writedowns. A loan writedown is a reduction of a borrower's debt approved by the Agency.

(1) Loan writedowns will only be approved when they are in the best interest of the Federal Government and when the following conditions exist:

(i) Sound management of the housing project is evident or sound management practices are proposed for correction in accordance with an Agency approved workout agreement; and

(ii) The housing project’s financial stability is being affected by conditions beyond the borrower’s control, such as market weaknesses, unforeseen site problems, or natural disasters.

(2) Prior to Agency approval for a loan writedown, the borrower must obtain an appraisal of the housing project that concludes the ‘‘as-is’’ market value, subject to restricted rents, conducted in accordance with subpart P of this part. The Agency will not approve a loan write-down unless the appraisal indicates the Federal Government’s interests are secured at the proposed writedown level.

(3) Any writedown will be conditioned on a finding that the borrower does not have the ability to pay a higher loan payment, even if the loan is re-amortized.

(4) Loan writedowns may be used to allow for a loan transfer and assumption for less than the total amount of outstanding debt.
§ 3560.457 Negotiated debt settlement.

(a) Borrower proposals to settle debt. A borrower who cannot pay the full amount of loan payments may propose an offer to settle an outstanding debt for less than the full amount of that debt. The Agency may approve a negotiated debt settlement only in cases where a default is evident and doing so is in the best interest of the Federal Government and tenants.

(b) Required information. Borrowers requesting debt settlement must submit complete and accurate information from which a full determination of financial condition can be made. Debt settlement offers will not be approved by the Agency unless the financial information submitted by the borrower indicates that the borrower will be able to make the debt settlement payments as proposed.

(c) Effective date of approval. Debt settlement offers will not be accepted until the borrower receives written approval from the Agency.

(d) Appraisal requirement. No debt settlement offer will be accepted for less than the net recovery value of the security as determined by a licensed appraiser or other qualified official, and concurred in by the Agency’s qualified appraisal review official or other qualified official.

(e) Disposition of security prior to offer. Borrowers are not required to dispose of security prior to making a debt settlement offer. However, if a borrower has disposed of security prior to making a debt settlement offer, the proceeds from the disposed security must be applied to the borrower’s account prior to any negotiations on the debt settlement offer.

(f) Final release condition. Upon full payment of the approved debt settlement, the Agency will release the borrower from liability.

§ 3560.458 Special property circumstances.

(a) Abandonment. When the Agency determines that a borrower has abandoned security for a loan under this part, the Agency will take the steps necessary to protect the Federal Government’s interest in the security. Costs associated with managing abandoned property are the responsibility of the borrower and will be charged to the borrower’s account until liquidation is completed.

(b) Other security. The Agency will service security such as collateral assignments, assignments of rents, Housing Assistance Payments Contracts, and notices of lienholder interest according to acceptable practices in the respective states.

(c) Taking of additional security to protect Agency interests. The Agency may require borrowers to provide additional security in the form of real estate, cash reserves, letters of credit, or other security when needed to improve the chances that the Agency will not suffer a loss, and when:

1. The account is in default; or
2. The property has not been properly managed or maintained.

(d) Due diligence. When the Agency has completed an environmental review in accordance with 7 CFR part 1940, subpart G, and decides not to acquire security property through liquidation action or chooses to abandon its security interest in real property, whether due in whole or in part, to the presence of contamination from hazardous substances, hazardous wastes, or petroleum products, the Agency will provide the appropriate environmental authorities with a copy of its due diligence report.
§ 3560.459 Special borrower circumstances.

(a) Deceased borrower, bankruptcy, insolvency, and divorce actions. The Agency will address borrower accounts affected by special circumstances such as death, bankruptcy, insolvency, and divorce on a case-by-case basis. The Agency will make servicing decisions in such cases on the basis of best interest to the Federal Government and tenants. The Agency will bring a legal action to establish the legal capacity of the borrower to administer the project if found necessary to protect the government’s interests. In order for the Agency to make servicing decisions in such cases, the borrower or the borrower’s representative will provide to the Agency:

(1) On the part of the heirs or executor of the borrower’s estate, evidence of legal action due to a will or court actions that establish who is to become the owner;

(2) The financial status of the borrower and any member pledging additional security for the debt;

(3) The status of the security property; and

(4) The impact of the identified actions on the operation of the project.

(b) Membership liability agreements. If a borrower’s note is endorsed by individuals other than the borrower or a borrower has security agreements with members of the organization for the purchase of shares of stock or for the payment of a pro rata share of the loan in the event of default, or has individual liability agreements, which are usually assigned to and held by the Agency as additional security for the loan, the security and liability agreements must be adequate to protect the Agency’s interest.

(c) Security issues in participation loans. When a multi-family housing (MFH) project is receiving financing or a subsidy from sources other than the Agency, the Agency will service the account in accordance with the participation agreements made with the Agency and the other funding sources under § 3560.65.

§ 3560.460 Double damages.

(a) Action to recover assets or income. The Agency may request to the Attorney General to bring an action in a United States district court to recover any assets or income used by any person in violation of the provisions of a loan made by the Agency under this section or in violation of any applicable statute or regulation.

(2) For the purposes of this section, a use of assets or income in violation of the applicable loan, statute, or regulation includes any use for which the documentation in the books and accounts does not establish that the use was made for a reasonable operating expense or necessary repair of the project or for which the documentation has not been maintained in accordance with the requirements of the Agency and in reasonable condition for proper audit.

(3) For the purposes of this section, the term “person” means:

(i) Any individual or entity that borrows funds in accordance with programs authorized by this section;

(ii) Any individual or entity holding 25 percent or more interest in any entity that the Agency funds in accordance with programs authorized by this section; and

(iii) Any officer, director, or partner of an entity that borrows funds in accordance with programs authorized by this section.

(b) Amount recoverable. (1) In any judgment favorable to the United States entered under this section, the Attorney General may recover double the value of the assets and income of the project that the court determines to have been used in violation of the provisions of a loan made by the Agency under this section or any applicable statute or regulation, plus all costs related to the actions, including reasonable attorney and auditing fees.

(2) Notwithstanding any other provisions of law, the Agency may use amounts recovered under this section for activities authorized under this section and such funds must remain available for such use until expended.

(c) Time limitation. Notwithstanding any other provisions of law, an action under this section may be commenced at any time during the six-year period beginning on the date that the Agency discovered or should have discovered the violation of the provisions of this
section or any related statutes or regulations.

(d) Continued availability of other remedies. The remedy provided in this section is in addition to and not in substitution of any other remedies available to the Agency or the United States.

§ 3560.461 Enforcement provisions.

(a) Equity skimming—(1) Criminal penalty. Whoever, as an owner, agent, employee, or manager, or is otherwise in custody, control, or possession of property that is security for a loan made under this title, willfully uses, or authorizes the use, of any part of the rents, assets, proceeds, income, or other funds derived from such property, for any purpose other than to meet actual, reasonable, and necessary expenses of the property, or for any other purpose not authorized by this title or the regulations adopted pursuant to this title, must be fined under title 18, United States Code, or imprisoned not more than five years, or both.

(2) Civil sanctions. An entity or individual who as an owner, operator, employee, or manager, or who acts as an agency for a property that is security for a loan made under this title where any part of the rents, assets, proceeds, income, or other funds derived from such property are used for any purpose other than to meet actual, reasonable, and necessary expenses of the property, or for any other purpose not authorized by this title or the regulations adopted pursuant to this title, must be fined under title 18, United States Code, or imprisoned not more than five years, or both.

(b) Civil monetary penalties—(1) When civil monetary penalties may be imposed. The Agency may, after notice and opportunity for a hearing, impose a civil monetary penalty in accordance with this section against any individual or entity, including its owners, officers, general partners, limited partners, or employees, who knowingly and materially violate, or participate in the violation of, the provisions of this title, the regulation issued by the Agency pursuant to this title, or agreements made in accordance to this title by:

(i) Submitting information to the Agency that is false.

(ii) Providing the Agency with false certifications.

(iii) Failing to submit information requested by the Agency in a timely manner.

(iv) Failing to maintain the property subject to loans made under this title in good repair and condition, as determined by the Agency.

(v) Failing to provide management for a project that received a loan made under this title that is acceptable to the Agency.

(vi) Failing to comply with the provisions of applicable civil rights statutes and regulations.

(2) Amount. (i) The amount of a civil penalty imposed under this section must not exceed the greater of twice the damages the Agency or the project that is secured for a loan under this section suffered or would have suffered as a result of the violation, or $50,000 per violation.

(ii) Determination. In determining the amount of a civil monetary penalty under this section, the Agency must take into consideration:

(A) The gravity of the offense;

(B) Any history of prior offenses by the violator (including offenses occurring prior to the enactment of this section);

(C) Any injury to tenants;

(D) Any injury to the public;

(E) Any benefits received by the violator as a result of the violation;

(F) Deterrence of future violations; and

(G) Such other factors as the Agency may establish by regulation.

(3) Payment of penalties. No payment of a penalty assessed under this section may be made from funds provided under this title or from funds of a project which serve as security for a loan made under this title.

(4) Remedies for noncompliance. (i) Judicial intervention. If a person or entity fails to comply with a final determination by the Agency imposing a civil monetary penalty, the Agency may request the Attorney General of the United States to bring an action in an appropriate district court to obtain a monetary judgment against such an individual or entity and such other relief
as may be available. The monetary judgment may, in the court’s discretion, include attorney’s fees and other expenses incurred by the United States in connection with the action.

(ii) Reviewability of determination. In an action under this paragraph, the validity and appropriateness of a determination by the Agency imposing the penalty must not be subject to review.

(c) Conditions for renewal extension. The Agency may require that expiring loan or assistance agreements entered into under this title must not be renewed or extended unless the owner executes an agreement to comply with additional conditions prescribed by the Agency, or executes a new loan or assistance agreement in the form prescribed by the Agency.

§ 3560.462 Money laundering.
The Agency will act in accordance with U.S. Code Title 18, part I, chapter 95, section 1956(c)(7)(D).

§ 3560.463 Obstruction of Federal audits.
The Agency will act in accordance with U.S. Code Title 18, part I, chapter 73, section 1516(a).

§§ 3560.464–3560.499 [Reserved]

§ 3560.500 OMB control number.
The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart K—Management and Disposition of Real Estate Owned (REO) Properties

§ 3560.501 General.
This subpart contains Agency procedures and other policies related to the management and disposition of multi-family housing (MFH) projects in the Agency’s inventory (Real Estate Owned (REO) property). Housing projects will not be accepted into the Agency’s inventory unless one of the following has occurred:

(a) The borrower has abandoned the housing project and the Agency has performed the required steps to take the housing project into custody.

(b) The housing project title has been transferred to the Agency as a result of foreclosure, voluntary conveyance, redemption, or other action.

§ 3560.502 Tenant notifications and assistance.
Each tenant in an REO property designated to be sold as a non-program property will be notified by the Agency, in writing, of the housing projects’ non-program designation and will be given an opportunity to obtain a Letter Of Priority Entitlement (LOPE) as specified in §3560.159(c).

§ 3560.503 Disposition of REO property.

(a) Preference will be given to offers from bidders who are determined eligible by the Agency to purchase REO property designated to be sold as program property. It is the Agency’s priority that property previously operated as program property prior to becoming REO inventory property be sold as program property. However, REO property may be sold under whatever Agency program is most appropriate for the property and the community needs regardless of the program under which the property was originally financed or whether the property was being used to secure loans under more than one Agency program.

(b) When the Agency determines that the REO property to be sold is not decent, safe, and sanitary and/or does not meet cost effective energy conservation standards, it will disclose the
basis for this determination to prospective purchasers. The deed by which such an REO property is conveyed will contain a covenant restricting it from residential use until it is decent, safe, and sanitary, and meets the Agency’s cost effective conservation standards. The Agency will also notify any potential purchaser of any known lead based paint hazards.

§ 3560.504 Sales price and bidding process.

(a) The loan documents related to REO property sold for program purposes must contain the restrictive-use language specified in §3560.662(a).

(b) Entities bidding on REO property designated to be sold as program property must submit a loan application package that meets the requirements specified in subpart B of this part.

(1) Bidders on REO property designated to be sold as program property must meet the eligibility requirements established under §3560.55.

(2) Bidders determined by the Agency to be ineligible to purchase REO property designated to be sold as program property will be notified in writing. The bidding process will continue regardless of pending appeals.

(3) All offers from bidders determined to be eligible to purchase REO property designated to be sold as program property will be considered in the bidding process and must provide evidence of financial stability and credit worthiness.

(c) The Agency will determine the successful bidder on REO property designated to be sold as program property by conducting a drawing of sealed bids.

(1) The Agency may authorize the sale of an REO property by sealed bid or public auction when it is in the best interest of the Government. The Agency will publicly solicit requests for sealed bids and publicize auctions. If the highest bid is lower than the minimum acceptable bid established by the Agency, or if no acceptable bids are received, the Agency may negotiate a sale without further public notice.

(2) Bidders who desire to withdraw their bids must do so prior to the drawing date.

(d) Property designated to be sold as non-program property may be sold to entities that do not meet the Agency’s eligible borrower requirements specified in §3560.55, and must be sold for cash or on terms approved by the Agency. Cash sales will be given first preference and will be drawn before any sales on terms.

§ 3560.505 Agency loans to finance purchases of REO properties.

(a) Agency loans to finance the purchase of REO property designated to be sold as program property must meet the same requirements as specified in subparts A and B of this part. In addition, the following provisions apply.

(1) At the borrower’s option, the interest rate will be the prevailing rate at the time of loan approval or the prevailing rate at loan closing.

(2) Purchasers may pay closing costs from their own funds or, if allowable under subparts B, L, or M of this part, as applicable, may finance such costs as part of the Agency loan.

(b) Agency loans to finance the purchase of REO property designated to be sold as non-program property must meet the following terms.

(1) A down payment of not less than 10 percent of the purchase price is required at closing.

(2) The interest rate will equal the lesser of the prevailing interest rate at the time of loan approval or loan closing for MFH loans plus one-half percent.

(3) The note amount will be amortized over a period not to exceed 10 years. If the Agency determines that more favorable terms are necessary to facilitate the sale, the note amount may be amortized using a 30-year factor with payment in full due no later than 10 years from the date of closing (balloon payment). In no case will the term be longer than the useful life of the property.

(4) Agency loans to finance the purchase of non-program REO property are subject to the availability of funds.

(c) Loan limits and allowable uses of loan funds specified in subparts B, L, and M of this part, as applicable, are applicable to any Agency-financed (credit) sale of REO property.

(d) Title clearance and loan closing for an Agency financed sale and any
subsequent loan to be closed simultaneously with the sale must meet the requirements in subpart B of this part for an initial loan, with the following exceptions:

(1) A “Quit Claim” or other non-warranty deed will be used; and

(2) The buyer must pay attorney’s fees, insurance costs, recording fees and other customary fees unless they are included in a subsequent loan and the subsequent loan is for purposes other than closing costs and fees.

(e) After approval of an Agency-financed sale of occupied REO property designated to be sold as program property, but prior to closing, the purchaser must prepare a budget for housing operations in accordance with subpart B of this part. If a rent increase is necessary, procedures specified in subparts E and F of this part for calculating rents, net tenant contributions, and rental assistance will be followed by the borrower.

§ 3560.506 Conversion of single family type REO property to MFH use.

Single family type REO property may be sold for conversion to MFH program use under the following conditions:

(a) The Agency will allow nonprofit organizations, public bodies, or for-profit entities to purchase single family type REO property for conversion to MFH program use. When the Agency finances the sale of single family-type REO property for conversion to rural rental housing program use (i.e., MFH including group homes and homes for the elderly or disabled, farm labor housing, or rural cooperative housing), the sale price will be the lesser of the Federal Government’s investment or an amount based on the “as-is” market value of the housing project as determined by an appraisal conducted in accordance with subpart P of this part.

(b) The Agency will only accept written offers to purchase two or more single family type REO properties for conversion to rural rental housing from nonprofit organizations, public bodies, or for-profit entities with a good record of providing housing under the Agency’s MFH programs. The single family type properties are not required to be contiguous, however, they must be located in close enough proximity so that management capabilities are not diminished because of distance.

§§ 3560.507–3560.549 [Reserved]

§ 3560.550 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart L—Off-Farm Labor Housing

§ 3560.551 General.

This subpart establishes the requirements for making loans and grants for off-farm labor housing and for ongoing operations of this housing. Unless otherwise specified in this subpart, the requirements of subparts A through K, N, O, and P of this part will apply in addition to the requirements in this subpart.

§ 3560.552 Program objectives.

(a) In addition to the objectives stated in §3560.52, off-farm labor housing loan and grant funds will be used to increase:

1. The supply of affordable housing for farm labor; and

2. The ability of communities to attract farm labor by providing housing which is affordable, decent, safe and sanitary.

(b) Under section 516(i) of the Housing Act of 1949 (42 U.S.C. 1486(i)), the Agency may award technical assistance grants to encourage the development of farm labor housing.

§ 3560.553 Loan and grant purposes.

(a) In addition to the purposes stated in §3560.53, off-farm labor housing loan
and grant funds may be used to provide facilities for seasonal or temporary residential use with appropriate furnishings and equipment. A temporary residence is a dwelling which is used for occupancy, usually for a short period of time, but is not the legal domicile for the occupant.

(b) The Agency may award technical assistance grants to eligible private and public nonprofit agencies. These grant recipients will, in turn, assist other organizations to obtain loans and grants for the construction of farm labor housing.

(c) Technical assistance services may not be used to reimburse a nonprofit or public body applicant for technical services provided by a nonprofit organization, with housing and/or community development experience, to assist the nonprofit applicant entity in the development and packaging of its loan/grant docket and project. In addition, technical assistance will not be funded by the Agency when an identity of interest exists between the technical assistance provider and the loan or grant applicant.

§ 3560.554 Use of funds restrictions.

Off-farm labor housing loan and grant funds may not be used for any purpose prohibited by §3560.54 except §3560.54(a)(1). Off-farm labor housing may be used to serve migrant farmworkers.

§ 3560.555 Eligibility requirements for off-farm labor housing loans and grants.

(a) Eligibility for loans. Applicants for off-farm labor housing loans must be:

(1) A broad-based nonprofit organization, a nonprofit organization of farmworkers, a federally recognized Indian tribe, a community organization, or an agency or political subdivision of State or local government, and must meet the requirements of §3560.55, excluding §3560.55(a)(6). A broad-based nonprofit organization is a nonprofit organization that has a membership that reflects a variety of interests in the area where the housing will be located; or

(2) A limited partnership with a nonprofit general partner which meets the requirements of §3560.55(d).

(b) Eligibility for grants. To be eligible for off-farm labor housing grants, applicants must:

(1) Meet the requirements in §3560.555(a)(1); and

(2) Be able to contribute at least one-tenth of the total farm labor housing development cost from its own or other resources. The applicant’s contribution must be available at the time of grant closing. An off-farm labor housing loan financed by RHS may be used to meet this requirement.

(c) Limitation. Limited partnerships eligible under paragraph (a)(2) of this section are not eligible for farm labor housing grants.

§ 3560.556 Application requirements and processing.

Off-farm loans and grants will be available under a Notice of Funding Availability (NOFA) that will be published in the Federal Register each fiscal year.

§ 3560.557 [Reserved]

§ 3560.558 Site requirements.

The requirements established in §3560.58 apply to all applications for off-farm labor housing loans and grants except that off-farm labor housing are not limited to rural areas.

§ 3560.559 Design and construction requirements.

(a) General. The requirements established in §3560.60 apply to all applications for off-farm labor housing loans and grants except that seasonal off-farm labor housing that will be occupied for eight months or less per year by migrant farmworkers while they are away from their residence, may be constructed in accordance with Exhibit I of 7 CFR part 1924, subpart A.

(b) Additional requirements. In addition to the requirements established in §3560.60. It is encouraged that the design of off-farm labor housing incorporate outdoor shower, boot washing station, and/or hose bibb facilities as necessary to protect the resident and the asset from excess dirt and chemical exposure.
§ 3560.560 Security.

The security requirements established in §3560.61 will apply to all applications for off-farm labor housing loans.

§ 3560.561 Technical, legal, insurance and other services.

The requirements established under §3560.62 apply to all applications for off-farm labor housing loans and grants.

§ 3560.562 Loan and grant limits.

(a) Determining the security value. The requirements established under §3560.63(a) apply to off-farm labor housing loans.

(b) Maximum amount of loan. The requirements established in §3560.63(c)(1) and (2), regarding borrower equity contribution apply to all applications for off-farm labor housing loans. For applicants eligible under §3560.555(a)(2), the amount of Agency financing for the housing will not exceed 95 percent of the total development cost or 95 percent of the security value available for the Agency loan, whichever is lower.) In determining the amount of the loan, the Agency will also review the capacity of the applicant to amortize such loan, considering any rental assistance provided for use in the housing, and any rents anticipated to be paid by farmworkers expected to occupy the housing.

(c) Maximum amount of grant. The amount of any off-farm labor housing grant must not exceed the lesser of:

1. Ninety percent of the total development cost, or
2. That portion of the total development cost which exceeds the sum of any amount provided by the applicant from their own resources plus the amount of any loans approved for the applicant, considering the capacity of the applicant to amortize the loan.

§ 3560.563 Initial operating capital.

The requirements for §3560.64 apply to all applications for off-farm labor housing loans and grants.

§ 3560.564 Reserve accounts.

The requirements for §3560.65 apply to all applications for off-farm labor housing loans and grants.

§ 3560.565 Participation with other funding or financing sources.

The requirements established in §3560.66 apply to all applications for off-farm labor housing loans and grants, except that the 25 percent requirements stated in paragraph §3560.66(b)(1) may consist of loan and/or grant funds.

§ 3560.566 Loan and grant rates and terms.

(a) Amortization period. The loan will be amortized over a period not to exceed 33 years. The amortization schedule will take into account the depreciation of the security and ensure that the loan will be adequately secured.

(b) Interest rate. The effective interest rate will be 1 percent.

(c) Term of grant agreement. The grant agreement will remain in effect for so long as there is a need for farm labor housing.

§ 3560.567 Establishing the profit base on initial investment.

The requirements established under §3560.68 apply to applicants eligible under §3560.555(a)(2) and operating as a limited partnership with a nonprofit general partner.

§ 3560.568 Supplemental requirements for seasonal off-farm labor housing.

For off-farm labor housing operating on a seasonal basis, the management plan must establish specific opening and closing dates. During the off-season, off-farm labor housing may be used as defined in subpart A of this part under short-term lease provisions. Where rents are charged on a per-unit basis and family income qualifies the household for rental assistance, rental assistance may be used.
§ 3560.569 Supplemental requirements for manufactured housing.

The requirements established in §3560.70 apply to all applications for off-farm labor housing loans and grants.

§ 3560.570 Construction financing.

The requirements established in §3560.71 apply to all applications involving off-farm labor housing loans and grants. In addition, the following requirements apply.

(a) Equity contributions being made by the borrower or grantee must be contributed and disbursed prior to any disbursement of interim loan funds and any loan or grant funds from the Agency.

(b) If the Agency is providing both loan and grant funds, loan funds must be fully released and expended prior to the release of grant funds by the Agency.

(c) If construction is financed with a Labor Housing grant, it is subject to the provisions of the Davis-Bacon Act (published in the Department of Labor regulations 29 CFR parts 1, 2, and 5).

§ 3560.571 Loan and grant closing.

The requirements established in §3560.72 apply to all applications for off-farm labor housing loans and grants. In addition, the following requirements apply.

(a) A nonprofit organization will have its Board of Directors adopt an Agency-approved loan and/or grant resolution, which is required as part of the loan docket before loan and/or grant approval. All other loan applicants will execute an Agency-approved loan agreement.

(b) For grants, an Agency approved grant agreement, must be executed by the applicant on the date of grant closing.

(c) The obligations incurred by the applicant, as a condition of accepting the grant, will be in accordance with the off-farm labor housing grant agreement.

(d) Off-farm labor housing loans used to build or acquire new units made pursuant to a contract entered into on or after the effective date of this regulation, will be subject to the restrictive-use provision stated in §3560.72(a)(2)(ii).

§ 3560.572 Subsequent loans.

The requirements established in §3560.73 will apply to all applications for subsequent off-farm labor housing loans.

§ 3560.573 Rental assistance.

(a) Rental assistance may be provided to income eligible tenants living in off-farm labor housing in accordance with subpart F of this part. The requirements established in §3560.252 apply to all tenants receiving rental assistance.

(b) For dormitory style facilities operating on a per bed basis, rental assistance will be made available to the housing on a per unit basis, but may be pro-rated to tenants on a per bed basis. However, total rent charged for a unit must not exceed conventional rent for comparable units in the area or a similar area and per bed rents must be comparable to per bed rents in the market.

§ 3560.574 Operating assistance.

Operating assistance may be used in lieu of tenant-specific rental assistance in off-farm labor housing projects financed under section 514 or section 516(i) of the Housing Act of 1949 (U.S.C. 1486(i)) that serve migrant farmworkers. Owners of eligible projects may choose tenant-specific rental assistance as described in §3560.573 or operating assistance, or a combination of both, however, any tenant or unit assisted under this section may not receive rental assistance under §3560.572. The objective of this program is to provide assistance toward the cost of operating the project so that rents may be set at rates that are affordable to very low and low-income migrant farmworkers.

(a) Project eligibility requirements. To be eligible for the operating assistance program, projects must be:

(1) Off-farm labor housing projects financed under section 514 or section 516...
with units that are for migrant farmworkers. Housing units for year-round farmworker households are ineligible; and

(2) Eligible for the Agency’s rental assistance program as defined in §3560.573.

(b) Operating assistance limits. The amount of operating assistance requested by the owner must be based on the project’s actual income and expenses and must be approved by the Agency. In the case of a mixed project, the amount of operating assistance must be based on the portion of actual income and expenses that are attributable to the units that are for migrant farmworkers. In no instance may the annual amount of operating assistance exceed 90 percent of the annual operating costs that are attributable to the migrant units.

(c) Owner responsibilities—(1) Requesting for operating assistance program. Owners of off-farm labor housing projects with units for migrant farmworkers may request operating assistance by submitting a request to the Agency, which must include a budget. The budget must include:

(i) Estimated operating costs for the migrant units, including authorized expenditures such as reserve deposits;

(ii) Proposed rental rates for the migrant units to generate sufficient funds for operating costs of those units, taking into consideration all other sources of project income; and

(iii) Estimated rental income from tenants, based on a tenant contribution of 30 percent of the average adjusted monthly income of migrant farmworker households in the area.

(2) Requesting operating assistance payments. Each month, the owner will submit a request for operating assistance to the Agency.

(3) Verifying tenant income eligibility. Owners are responsible for verifying tenant income eligibility. Only very low or low-income households are eligible for the operating assistance rents. Households with incomes above the low-income limits must pay the full rent.

(4) Reporting requirements. (i) Owners will complete and submit monthly to the Agency a project worksheet for operating assistance.

(ii) Owners will complete and submit a report to the Agency a project worksheet for operating assistance.

(iii) Owners must submit an annual planning budget to the Agency prior to the project’s fiscal year.

§3560.575 Rental structure and changes.

Off-farm labor housing is subject to the tenant contribution and rental unit rent requirements for Plan II housing established under subpart E of this part, except where seasonal housing will be occupied for less than a 3-month period. In such instances the best available and practical income verification methods may be used with prior approval of the Agency.

§3560.576 Occupancy restrictions.

(a) Restrictions on conditions of occupancy. (1) No borrower or grantee will be permitted to require that an occupant work on any particular farm or for any particular owner or interest as a condition of occupancy of the housing.

(2) Tenant selection should be in accordance with the loan agreement, subpart D of this part and §3560.577.

(3) No borrower or grantee will discriminate, or permit discrimination by any agent, lessee, or other operator in the use or occupancy of the housing or related facilities because of race, color, religion, sex, age, disability, familial status, or national origin.

(b) Eligible households. To be eligible for occupancy in off-farm labor housing, households must meet the following requirements.

(1) Occupational. An eligible household must include a domestic tenant or co-tenant farm laborer, a retired domestic farm laborer, or a disabled domestic farm laborer.

(2) Income. The household must meet the definition of income eligible as established in §3560.152 and the tenant or co-tenant must receive a substantial portion of income from farm labor employment. To determine if a substantial portion of income is from farm labor employment, the following measures will be used.

(i) For housing rented to farm laborers and owned by public bodies, public or private nonprofit organizations, and
limited partnerships when charging rent.

(A) Actual dollars earned from farm labor by domestic farm laborers other than migrant farmworkers must equal at least 65 percent of the annual income limits indicated for the Standard Federal regions as published by the Agency for their particular region of the country. For migrant farmworkers living in seasonal housing the actual dollars earned from farm labor by a domestic farm laborer must equal at least 50 percent of annual income limits indicated for the Standard Federal regions, as published by the Agency.

(B) An alternate measure for determining substantial portion of income when actual earnings are not available may be the duration of time a farm laborer worked on a farm or other farming enterprise as a domestic farmworker during the preceding 12 months. In order to be considered as substantial the farm laborer must have worked at least 110 whole days in farm work. For purposes of this section one whole day is the equivalent of at least 7 hours. When using a period of more than 1 year, a yearly average must amount to at least 110 days per year.

(ii) For housing owned by a farmer, family-farm partnership, family-farm corporation, or an association of farmers which was initially provided on a non-rental basis, a substantial portion of income when earned is considered as housing is provided by the owner as part of employment compensation for farm labor.

(iii) When a natural disaster has occurred, such as a drought, flood, freeze, etc., figures for the 12 months preceding such disaster will be used to determine substantial portion of income under paragraph (b)(2) of this section.

(iv) The tenant who qualifies as a domestic farm laborer residing in a property with a nonrestrictive farm labor clause in the mortgage covenants must not have adjusted income which exceeds the moderate income limit for the appropriate household size and appropriate geographical area.

(3) Occupancy. The household must remain in compliance with the borrower’s occupancy policy as established in §3560.155.

(c) Tenant eligibility requirements for operating assistance rents. To be eligible for operating assistance rents, tenants must meet the rental assistance eligibility requirements described in §3560.573 and in §3560.252.

(d) Ineligible tenants. Tenants who, at any time, fail to meet all the requirements in paragraph (b) of this section will be deemed ineligible for occupancy in off-farm labor housing. Ineligible tenants in off-farm labor housing will be addressed in accordance with the requirements of §3560.158.

(e) Non-farm laborer tenants. When there is a diminished need for housing for persons or families in the above categories, units in off-farm labor housing complexes may be made available to persons or families eligible for occupancy under §3560.152. Eligible tenants under this section may occupy the labor housing until such time the units are again needed by persons or families eligible under paragraph (b) of this section. As the basis for Agency approval or disapproval of the borrower’s determination of diminished need, the borrower must submit a current analysis of need and demand to the Agency, identical to the market analysis that is required of loan applicants in the loan origination process. The borrower’s determination and the State Director’s recommendation should be forwarded to the National Office for concurrence. The procedures specified in §3560.158 shall be followed when tenants are required to vacate housing to allow for occupancy by persons eligible under paragraph (b) of this section.

§ 3560.577 Tenant priorities for labor housing.

Tenant occupancy in off-farm labor housing is based on eligible farm labor certified through the income certification process required by §3560.152 and is prioritized in the following order.

(a) First priority is to be given to eligible active farm laborer households with first priority going to very low-income households, next priority to low-income households, and last to moderate-income households.

(b) Second priority is given to retired domestic farm laborer households and disabled domestic farm laborer households who were active in the local farm labor market area at the time of retiring or becoming disabled. Occupancy
priority will be given in accordance with paragraph (a) of this section.
(c) Third priority is to be given to retired domestic farm laborer households and disabled domestic farm laborer households who were not active in the local farm labor market at the time of retiring or becoming disabled. Occupancy priority will be given in accordance with paragraph (a) of this section.

§ 3560.578 Financial management of labor housing.
The requirements established in subpart G of this part will apply to all off-farm labor housing.

§ 3560.579 Servicing off-farm labor housing.
The requirements established in subparts I and J of this part will apply to all off-farm labor housing. Servicing according to subparts I and J of this part shall apply throughout the term of the loan or grant, whichever is longer.

§§ 3560.580–3560.599 [Reserved]

§ 3560.600 OMB control number.
The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart M—On-Farm Labor Housing
§ 3560.601 General.
This subpart contains the requirements for making loans for on-farm labor housing and for ongoing operation and management of on-farm labor housing. Unless otherwise specified in this subpart, the requirements of subparts A through K, N, O, and P of this part will apply in addition to requirements given in this subpart.

§ 3560.602 Program objectives.
In addition to the objectives stated in §3560.52, on-farm labor housing funds will be used to increase:
(a) The supply of affordable housing for farm labor; and
(b) The ability of the farmer to provide affordable, decent, safe and sanitary housing for farm workers.

§ 3560.603 Loan purposes.
On-farm labor housing loans may be made only for the purposes established in §3560.53. Grants are not available for on-farm labor housing.

§ 3560.604 Restrictions on use of funds.
On-farm labor housing loans may not be used for any purpose prohibited by §3560.54 except §3560.54(a)(1). On-farm labor housing may be used to serve migrant workers. In addition, on-farm labor housing loan funds may not be used to provide housing for members of the immediate family of the applicant when the applicant is an individual farm owner, family farm corporation, family farm partnership, or a member of an association of farmers. Immediate family includes mother, father, brothers, sisters, sons, and daughters of the applicant and spouse.

§ 3560.605 Eligibility requirements.
(a) To be eligible for an on-farm labor housing loan, the applicant must meet the requirements of §3560.55(a) with the exception of §3560.55(a)(1), (5), and (6) and the following requirements.
(1) The applicant must be a farm owner, family farm partnership, family farm corporation, or an association of farmers engaged in agricultural or aquacultural farming operations whose farming operations demonstrate a need for on-farm labor housing and who will own the housing and operate it on a nonprofit basis.
(2) The applicant must agree to use the labor housing to engage in the farming operations of the individual farm owner applicant, or in the farming operations of its members if it is a family farm corporation or partnership, or an association of farmers.
§ 3560.606 Application requirements and processing.

(a) On-farm labor housing loan applications will be processed according to 7 CFR part 1940, subpart L. Applicants must submit an application in an Agency-approved format that adequately documents the need for the housing and the eligibility of the applicant.

(b) The applicant must certify that the farm workers for which the housing is intended are or will be involved in the applicant’s agricultural or aquacultural farming operations.

(c) The applicant must certify that housing operations will be conducted in a non-profit manner such that income from the housing does not exceed eligible expenses associated with the housing. Eligible expenditures for the housing include, but are not limited to housing repairs and upkeep, payment of installments on the loan, taxes, insurance and reserves and other essential uses needed for success of the operations.

§ 3560.607 [Reserved]

§ 3560.608 Site and construction requirements.

(a) General. Cost and development standards for on-farm labor housing will be consistent with the requirements, standards, and cost limits specified in subpart B of this part, if the housing is a multi-family housing type structure, or consistent with section 502 of the Housing Act of 1949, if the housing is a single family type structure.

(b) Permanent units. On-farm labor housing occupied for 8 months or more of the year will be required to meet the following requirements.

(1) Housing may be multi-family or single family in type and may be located on the farm away from farm service buildings, or in the nearby community. Single-family type housing is defined as an individual or a group of single family detached dwelling units. All sites and housing shall be planned and constructed in accordance with 7 CFR part 1924, subparts A and C.

(2) Sites must be accessible from a public road, when feasible.

(c) Seasonal units. On-farm labor housing occupied for less than 8 months of the year will be considered seasonal housing. Such housing must meet the following requirements.
(1) Housing designed for seasonal occupancy may be either single family or multi-family.

(2) Seasonal housing may be constructed in accordance with exhibit I of 7 CFR part 1924, subpart A. If constructed in accordance with exhibit I, the housing must be suitable to allow for conversion to full-year occupancy if the need for migrant farmworkers in the area declines.

(d) Accessibility. On-farm labor housing that consists of buildings with less than three units, need not meet the requirement that five percent of the units be constructed as fully accessible units, as described in §3560.60(d). This does not, however, eliminate any other accessibility requirements.

§ 3560.609 [Reserved]

§ 3560.610 Security.

(a) Security instruments must meet the requirements established under §3560.560.

(b) When feasible, the on-farm labor housing will be located on a tract of land that is surveyed such that, for security purposes, it is considered separate and distinct from the farm. The security for the loan must include a lien on the tract of land where the on-farm labor housing is located and the security must have adequate value to protect the Federal government’s interest. The Agency will seek a first or parity lien position on Agency-financed property in all instances, however, the Agency may accept a junior lien position if the Federal government’s interests are adequately secured.

(c) The Agency will determine the value of the security for the loan in accordance with 7 CFR part 1922, subpart B if the farm is used as security or in accordance with section 502 of the Housing Act of 1949, if only the on-farm labor housing and related land is used for security.

(d) If necessary to provide adequate security for the loan, the Agency may require that any household furnishings purchased with loan funds also be secured.

(e) Personal liability and recourse will be required of all borrowers, including the individual members, stockholders or partners of an association of farmers, family farm corporations or partnerships, respectively.

§ 3560.611 Technical, legal, insurance and other services.

When technical, legal, insurance, or services are required for development of on-farm labor housing, applicants must comply with the applicable requirements of §3560.62. Regarding insurance coverage, the requirements of §3560.62(d) apply to on-farm labor housing.

§ 3560.612 Loan limits.

The maximum loan amount will be 100 percent of the allowable total development costs of on-farm labor housing and related facilities subject to §§3560.603, 3560.604 and 3560.608.

§ 3560.613 [Reserved]

§ 3560.614 Reserve accounts.

When on-farm labor housing operations include 12 or more units, the Agency will require such properties to comply with the reserve account requirements in §3560.65.

§ 3560.615 Participation with other funding sources.

The Agency encourages the use of other funding sources in conjunction with on-farm labor housing loans. Use of such financing in conjunction with an on-farm labor housing loan is subject to the approval of the Agency and must comply with the requirements of §3560.66.

§ 3560.616 Rates and terms.

(a) The interest rate for on-farm labor housing loans will be 1 percent.

(b) The term of the on-farm labor housing loan will not exceed 33 years.

(c) Loan amortization for on-farm labor housing may be on a monthly or an annual basis.

§ 3560.617 [Reserved]

§ 3560.618 Supplemental requirements for on-farm labor housing.

The management plan for on-farm labor housing operated on a seasonal basis must have specific opening and closing dates. During the off-season,
§ 3560.619  
on-farm labor housing may be used under short-term lease provisions.

§ 3560.619 Supplemental requirements for manufactured housing.  

On-farm labor housing loan funds used for manufactured housing must comply with §3560.70. Manufactured housing located on-farm may consist of individual units.

§ 3560.620 Construction financing.  
The requirements established in §3560.71 apply to all applications involving on-farm labor housing loans.

§ 3560.621 Loan closing.  
Applicants for on-farm labor housing loans must execute an Agency-approved loan agreement. In addition, if determined appropriate by the Agency, on-farm labor housing loans made on or after the effective date of this regulation may be subject to the restrictive-use provisions as stated in §3560.72(a)(2)(ii). All other on-farm labor housing loans are subject to the restrictive-use provisions contained in their loan documents and as outlined in subpart N of this regulation.

§ 3560.622 Subsequent loans.  
The requirements established in §3560.572 apply to all applications for on-farm labor housing subsequent loans.

§ 3560.623 Housing management and operations.  
Borrowers with on-farm labor housing loans must:
(a) Develop and submit to the Agency a management plan in a format specified by the Agency. At a minimum, the management plan will detail the borrower’s operational and occupancy policies, how the borrower will deal with resident complaints, and how repairs will be completed; and
(b) Maintain a lease or employment contract with each tenant specifying employment with the borrower as a condition for continued occupancy.

§ 3560.624 Occupancy restrictions.  
(a) The immediate relatives of the borrowers are ineligible occupants for on-farm labor housing.

(b) Occupants must meet the definition of a domestic farm laborer, as defined in §3560.11.
(a) Occupancy of on-farm labor housing is restricted to employees of the borrower unless otherwise approved by the Agency.
(d) With prior written permission of the Agency, on-farm labor housing may be occupied by ineligible tenants on a short-term basis. The permission of the Agency must also be for a limited duration.

§ 3560.625 Maintaining the physical asset.  
On-farm labor housing must meet state and local building and occupancy codes.

§ 3560.626 Affirmative Fair Housing Marketing Plan.  
On-farm labor housing must meet the requirements of §3560.104.

§ 3560.627 Response to resident complaints.  
The management plan submitted in accordance with §3560.623 (a) will include a provision for dealing with resident complaints.

§ 3560.628 Establishing and modifying rental charges.  
If it becomes necessary to establish or modify a shelter cost, the borrower must obtain Agency approval as specified in subpart E of this part.

§ 3560.629 Security deposits.  
Borrowers that require security deposits to be paid by the tenants will be required to comply with the requirements of §3560.204.

§ 3560.630 Financial management.  
Financial information must be submitted in an Agency-approved format and will show operation of the housing in a non-profit manner.

§ 3560.631 Agency monitoring.  
A compliance review and physical inspection will be conducted by the Agency at least once every 3 years. The purpose of this review will be to inspect:
(a) Tenant eligibility documentation;
§ 3560.653 Prepayment and restrictive-use categories.

(a) Loans with prepayment prohibitions include:
   (1) Initial section 515 loans made on or after December 15, 1989, and
   (2) Subsequent loans made on or after December 15, 1989, for additional rental units.

(b) Loans without prepayment prohibitions but with restrictive-use provisions include:
   (1) All loans made after December 21, 1979, but prior to December 15, 1989;
   (2) Subsequent loans made on or after December 15, 1989, for purposes other than additional rental units; or
   (3) Loans subsequently restricted by servicing actions including transfers.

(c) Loans without prepayment prohibitions or restrictive-use provisions include all loans made on or before December 21, 1979 or loans that had restrictive-use provisions that have expired. Such loans are eligible to receive incentives subject to the provisions of this subpart.

(d) Loans may be prepaid if another loan or grant from the Agency imposes the same or more stringent restrictive-use provisions on the housing project covered by the loan being prepaid.

§ 3560.653 Prepayment requests.

(a) Borrowers seeking to prepay an Agency loan must submit a written prepayment request to the Agency at least 180 days in advance of the anticipated prepayment date and must obtain Agency approval before the Agency will accept prepayment.

(b) Prior to submitting a prepayment request, borrowers must take whatever actions are necessary to provide the following items:
   (1) A clear description of the loan to be prepaid, the housing project covered by the loan being prepaid, and the requested date of prepayment.
   (2) A statement documenting the borrower’s ability to prepay under the terms specified.
   (3) A certification that the borrower will comply with any federal, state, or local laws or regulations which may relate to the prepayment request and a statement of actions needed to assure such compliance.
(4) A copy of lease language to be used during the period between the submission date and the final resolution of the prepayment request notifying tenant applicants that the owner of the housing project has submitted a prepayment request to the Agency and explaining the potential effect of the request on the lease.

(5) Borrowers are required to submit a signed release of information form along with the prepayment request. The Agency will notify nonprofit organizations and public bodies involved in providing affordable housing or financial assistance to tenants of the receipt of a borrower's request to prepay their loan(s). Additionally, the Agency is to notify nonprofit organizations and public bodies whenever a borrower, who has requested prepayment, is required or elects to offer their property for sale to a nonprofit or public body.

(6) A certification that the borrower has notified all governmental entities involved in providing affordable housing or financial assistance to tenants in the project and that the borrower has provided a statement specifying how long financial assistance from such parties will be provided to tenants after prepayment.

(7) A statement affirming that units in the property applying for prepayment will continue to be available for rent by eligible residents during the prepayment process.

(c) The Agency will review complete requests to determine if:

(1) The loan is eligible for prepayment under §3560.652(b);

(2) The borrower has the ability to prepay; and

(3) The borrower has complied or has the ability to comply with applicable Federal, state, and local laws related to the prepayment request.

(d) If a prepayment request lacks full and complete information on any item, the Agency will return the prepayment request to the borrower with a letter citing the deficiencies in the prepayment request. The Agency will offer borrowers an opportunity, within 30 days following the date of the return, to address the reasons given by the Agency for the return of the prepayment request and will allow the borrower to submit a revised prepayment request.

(e) If the Agency determines that the prepayment request appropriately satisfies all the conditions listed in paragraph (d) of this section, the Agency will process the prepayment request and make a reasonable effort to enter into a new restrictive-use agreement with the borrower in accordance with §3560.652 or §3560.655. If the Agency determines that a loan is ineligible for prepayment or the borrower does not have the ability to prepay, the Agency will return the prepayment request to the borrower with a written explanation of the Agency's determinations.

(69 FR 69106, Nov. 26, 2004, as amended at 73 FR 65506, Nov. 4, 2008)

§3560.654 Tenant notification requirements.

(a) Within 30 calendar days of receiving a complete prepayment request, the Agency will send a prepayment request notice to each tenant in the housing project. Borrowers must post the Agency's prepayment request notice in public areas throughout the housing project from the date of the notice until the final resolution of the prepayment request. The prepayment request notice will establish a date and place where tenants may meet with the Agency to discuss the prepayment request and will advise tenants that:

(1) They may review all information submitted with the prepayment request except financial information regarding the borrower entity, which the Agency will withhold from tenant review unless given written permission for the release of the information from the borrower; and,

(2) They have 30 days from the date of the prepayment request notice to give the Agency comments on the prepayment request and will advise tenants that:

(1) They may review all information submitted with the prepayment request except financial information regarding the borrower entity, which the Agency will withhold from tenant review unless given written permission for the release of the information from the borrower; and,

(2) They have 30 days from the date of the prepayment request notice to give the Agency comments on the prepayment request.

(b) Borrowers may provide a prepayment request notice of their own directly to tenants and may establish a date and place where tenants may meet with the borrower to discuss the prepayment request. The Agency and other providers of housing assistance for very-low, low, and moderate-income households may attend a borrower's prepayment request meeting with tenants.
(c) If the Agency agrees to accept prepayment on a loan, the Agency will send a prepayment acceptance notice to each tenant in the housing project at least 60 days prior to the prepayment date. Borrowers must post copies of the Agency’s prepayment acceptance notice in public areas throughout the housing project until prepayment is made. If the prepayment acceptance was based on a borrower’s agreement to comply with restrictive-use provisions, the notice will describe the restrictive-use provisions that will apply to the housing project after prepayment and the tenant’s rights to enforcement of the provisions.

(d) If the borrower withdraws the prepayment request, the Agency will provide a prepayment request cancellation notice to each tenant in the housing project. Borrowers must post copies of the prepayment request cancellation notice in the public areas throughout the housing project for a period of 60 days following the date of the prepayment request cancellation notice.

(e) If the borrower agrees to accept incentives and restrictive-use provisions, the Agency will notify each tenant, in writing, of the agreement and provide a description of the restrictive-use provision.

(f) If a borrower agrees to sell a housing project involved in a prepayment request to a nonprofit organization or public body, the Agency will notify each tenant, in writing, of the proposed sale to a nonprofit organization or public body and will explain the time-frames involved with the proposed sale, any potential impact on tenants, and the actions tenants may take to alleviate any adverse impact. Borrowers must post copies of the Agency’s proposed sale notice in public areas throughout the housing project until the housing project is sold or the offer to sell is withdrawn.

(g) If a tenant applicant signs a lease in a housing project for which a prepayment request has been submitted, the borrower must provide the tenant with copies of all notifications provided to tenants by the Agency or the borrower prior to the tenant’s occupancy in the housing project.

(h) If a borrower is unable to sell a housing project involved in a prepayment request to a nonprofit organization or public body within 180 days as specified in §3560.659, the Agency will send a notice to each tenant in the housing project explaining the potential impact of the borrower’s inability to sell the housing project on tenants and the actions tenants may take to alleviate any adverse impact. Borrowers must post the Agency’s notice in public areas throughout the housing project for a period of 60 days following the date of the notice.

§ 3560.655 Agency requested extension.

Before accepting an offer to prepay from a borrower with a restricted loan, the Agency must first make a reasonable effort to enter into a new restrictive-use agreement with the borrower. Under this agreement, the borrower would make a binding commitment to extend the low-income use of the housing and related facilities for 20 years for loans with interest credit, beginning on the date on which the new agreement is executed. If the borrower is unwilling to enter into a new restrictive-use provisions and restrictive-use agreement, the Agency should proceed to take the actions described in §3560.658.

§ 3560.656 Incentives offers.

(a) The Agency will offer a borrower, who submits a prepayment request meeting the conditions of §3560.653(d), incentives to agree to the restrictive-use period in §3560.662 if the following conditions are met:

(1) The market value of the housing project is determined by the Agency, based on an appraisal conducted in accordance with subpart P of this part.

(2) There are no restrictive-use agreements or prepayment prohibitions in effect.

(b) Specific incentives offered will be based on the Agency’s assessment of:

(1) The value of the housing project as determined by the Agency based on an “as-is” market value appraisal conducted in accordance with subpart P of this part;

(2) An incentive amount that will provide a fair return to the borrower;

(3) An incentive amount that will not cause basic rents at the housing project to exceed conventional rents
for comparable units; except that when determined necessary by the Agency to allow for decent, safe and sanitary housing to be provided in market areas where conventional rents are not sufficient to cover necessary operating, maintenance, and reserve costs. Basic rents may be allowed to exceed comparable rents for conventional units, but in no case by more than 150% of the comparable rent for conventional unit rent level; and

(4) An incentive amount that will be the least costly alternative for the Federal Government while being consistent with the Agency’s commitment to the preservation of housing for very-low, low, and moderate income households in rural areas.

(c) The Agency may offer the following incentives:

(1) The Agency may increase the borrower’s annual return on equity by one of the following two methods. The actual withdrawal of the return remains subject to the procedures and conditions for withdrawal specified in subpart G of this part.

(i) The Agency may recognize the borrower’s current equity in the housing project. The equity will be determined using an Agency accepted appraisal based on the housing project’s value as unsubsidized conventional housing.

(ii) When a current appraisal indicates an equity loan can not be made, the Agency may recognize the borrower’s current equity in the housing project at the higher of the original rate of return or the current 15-year Treasury bond rate plus 2 percent rounded to the nearest one-quarter percent. The equity will be determined using the most recent Agency accepted appraisal of the housing project prior to receiving the prepayment request.

(2) The Agency may agree to convert projects without interest credit or with Plan I interest credit to Plan II interest credit or increase the interest credit subsidy for loans with Section 8 assistance to lower the interest rate on the loan and make basic rents more financially feasible.

(3) The Agency may offer additional rental assistance, or an increase in assistance provided under existing contracts under §§521(a)(2), 521(a)(5) of the Housing Act of 1949 (42 U.S.C. 1490a(a)(2)) or section 8 of the United States Housing Act of 1937 (42 U.S.C. §1437f).

(4) The Agency may make an equity loan to the borrower. The equity loan must not adversely affect the borrower’s ability to repay other Agency loans held by the borrower and must be made in conformance with the following requirements:

(i) The equity loan must not exceed the difference between the current unpaid loan balance and 90 percent of the housing project’s value as determined by an “as-is” market value appraisal conducted in accordance with subpart P of this part.

(ii) Borrowers with farm labor housing loans are not eligible to receive equity loans as incentives.

(iii) If an incentive offer for an equity loan is accepted, the equity loan may be processed and closed with the borrower or any eligible transferee.

(iv) Excess reserve funds will be used to reduce the amount of an equity loan offered to a borrower.

(v) Equity loans may not be offered unless the Agency determines that other incentives are not adequate to provide a fair return on the investment of the borrower to prevent prepayment of the loan or to prevent displacement of project tenants.

(5) The Agency will offer rental assistance to protect tenants from rent overburden caused by any rent increase as a result of a borrower’s acceptance of an incentive offer or tenants who are currently overburdened.

(6) In housing projects with project-based section 8 assistance, the Agency may permit the borrower to receive rents in excess of the amounts determined necessary by the Agency to defray the cost of long-term repair or maintenance of such a project.

(d) The Agency must determine that the combination of assistance provided is necessary to provide a fair return on the investment of the borrower and is the least costly alternative for the Federal Government.

(e) At the time a specific incentive offer is developed, the Agency must take into consideration the costs of any deferred maintenance, items in the housing project’s operating budget, and
any expected long-term repair or replacement costs based on a capital needs assessment developed in accordance with §3560.103(c). Deferred maintenance may include specific items identified in previous Agency inspections where the borrower has had the opportunity and resources available to take corrective actions and did not.

(1) Deferred maintenance does not include routine repair and replacement that results from normal wear and tear of the physical asset. The amount required for the reserve account to be considered fully funded will be adjusted accordingly. To determine if basic rents exceed conventional rents for comparable units in the area, monthly contributions necessary to obtain the adjusted fully funded reserve account will be included in the calculation of basic rents.

(2) Deferred maintenance including any deficiencies identified in project compliance with section 504 of the Rehabilitation Act of 1973 must be addressed as part of the development of the incentive and must be completed as part of an acceptance agreement of any incentive.

(f) Existing loans must be consolidated, provided consolidation retains the Agency’s lien position, and reamortized in accordance with subparts I and J of this part, provided it maintains feasibility of the housing for the tenants or reduces the debt service or the level of monthly rental assistance.

(g) The borrower must accept or reject the incentive offer within 30 days. If no answer to the offer is received within 30 days, the Agency may consider the incentive offer to be rejected.

(1) If the borrower accepts the incentive offer, procedures outlined in §3560.657 must be followed.

(2) If the borrower rejects the incentive offer, the borrower must comply with requirements listed in §3560.658.

[69 FR 69106, Nov. 26, 2004, as amended at 73 FR 65506, Nov. 4, 2008]

§ 3560.657 Processing and closing incentive offers.

(a) Borrower responsibilities. If a borrower accepts the Agency’s offer of incentives, the borrower must complete the following actions:

(1) Subject to the Agency’s approval, the borrower must legally restrict the use of the project in accordance with and for the number of years stated in §3560.662.

(2) If the incentive offer accepted includes an equity loan, the borrower must complete an application for the equity loan, and the borrower must continue to qualify as an eligible borrower or transferee in accordance with subpart B of this part.

(3) If the incentive offer accepted includes rent increases, the borrower must follow the rent increase requirements established in subpart E of this part.

(b) Waiting lists. If funds for components of incentive offers are limited, the Agency will establish a waiting list of accepted incentive offers for funding in the date order that the complete prepayment request was received.

(c) Unfunded incentive offers. If the borrower accepts the incentive offer but the Agency is unable to fund the incentive within 15 months, the borrower may choose one of the following actions:

(1) The borrower may offer to sell the housing project in accordance with §3650.659. In this case the borrower will be removed from the list of borrowers awaiting incentives.

(2) The borrower may stay on the list of borrowers awaiting incentives until the borrower’s incentive offer is funded. The Agency will not negotiate the incentive offer; but, at a borrower’s request, may adjust the incentive amount to reflect an updated appraisal, loan balance, and terms of third party financing.

(3) The borrower may withdraw the prepayment request and be removed from the list of borrowers awaiting incentives and either continue operating the housing project for program purposes and in accordance with Agency requirements or continue processing their prepayment process in accordance with §3560.658. If the borrower chooses to withdraw their request, the borrower may resubmit an updated prepayment request, at any time, and repeat the prepayment process in accordance with this subpart.

(4) The borrower may elect to obtain a third-party equity loan provided
§ 3560.658 Borrower rejection of the incentive offer.

(a) If a borrower rejects the incentive package offered by the Agency or an Agency request to extended restrictive-use provisions, made in accordance with §3560.662, the loan will only be prepaid if the borrower elects to agree to the following:

1. The borrower agrees to sign restrictive-use provisions to extend restrictive-use by 10 years from the date of prepayment, and at the end of the restrictive-use period offer to sell the housing to a qualified nonprofit organization or public body in accordance with §3560.659.

2. If housing opportunities for minorities would be lost as a result of prepayment, the borrower will offer to sell the housing to a qualified nonprofit organization or public body in accordance with §3560.659.

(b) If the borrower does not elect or agree to enter an agreement in accordance with paragraph (a) of this section, then the Agency will assess the impact of prepayment on two factors: housing opportunities for minorities and the supply of decent, safe, and sanitary rental housing in the market area. The Agency will review relevant information to determine the availability of comparable affordable housing for existing tenants in the market area and if minorities in the project, or in the market area will be disproportionately adversely affected by the loss of the affordable rental housing units.

1. If restrictive-use provisions are in place, the borrower will agree to sign the restrictive-use provisions, as determined by the Agency, and at the end of the restrictive-use period, offer to sell the housing to a qualified nonprofit organization or public body in accordance with §3560.659.

2. If the restrictive-use provisions will have an adverse impact on minorities, then the borrower must offer to sell to a qualified nonprofit organization or public body in accordance with the provisions of paragraph (a) of this section.

(c) If the Agency determines that the prepayment will not have an adverse effect on housing opportunities for minorities but there is not an adequate supply of decent, safe, and sanitary rental housing affordable to program eligible tenant households in the market area, the loan may be prepaid only if the borrower agrees to sign restrictive-use provisions, as determined by the Agency, to protect tenants at the time of prepayment.

(d) If the Agency determines that there is no adverse impact on minorities and there is an adequate supply of decent, safe, and sanitary rental housing affordable to program eligible tenant households in the market area the prepayment will be accepted with no further restriction.

§ 3560.659 Sale or transfer to nonprofit organizations and public bodies.

(a) Sales price. For the purpose of establishing a sales price when a borrower is required or elects to sell a housing project to a nonprofit organization or public body, two independent appraisals will be ordered, one by the Agency and one by the borrower. Both appraisals will conclude market value and be in accordance with subpart P of this part. If the borrower’s assessment of the Agency’s appraised market value indicates that no further appraisal is needed, the borrower may agree to accept the Agency’s appraisal.

1. The expense of the borrower’s appraisal shall be borne by the borrower. The appraiser selected may not have an identity of interest with the borrower.

2. If the two appraisers fail to agree on the market value, the Agency and
the borrower will jointly select an appraiser whose appraisal will be binding on the Agency and the borrower. The Agency and the borrower shall jointly fund the cost of the appraisal.

(b) Marketing to nonprofit organizations and public bodies. If a borrower must offer the property for sale to a nonprofit organization or public body under this paragraph, the borrower must take the following actions to inform appropriate entities of the sale:

(1) The borrower must advertise and offer to sell the project for a minimum of 180 days. The borrower may choose to suspend advertising and other sales efforts while eligibility of an interested purchaser is determined. If the purchaser is determined to be ineligible, the borrower must resume advertising for the balance of the required 180 days.

(2) The Agency will assist the borrower in initially notifying nonprofit organizations and public bodies.

(3) The borrower must provide the nonprofit organizations and public bodies contacted with sufficient information regarding the housing project and its operations for interested purchasers to make an informed decision. The information provided must include the minimum value of the housing project based on the market value determined in accordance with paragraph (a) of this section.

(4) If an interested purchaser requests additional information concerning the housing project, the borrower must promptly provide the requested materials.

(c) Preference for local nonprofit and public bodies. Local nonprofit organizations and public bodies have priority over regional and national nonprofit organizations and public bodies. The Agency may determine that no local nonprofit organizations or public bodies are available to purchase the housing project. After this determination, the borrower may accept an offer from a regional or national nonprofit organization or public body.

(d) Eligible nonprofit organizations. To be eligible to purchase properties under the conditions of this subpart, nonprofit organizations may not have among its officers or directorate any persons or parties with an identity-of-interest (or any persons or parties related to any person with identity-of-interest) in loans financed under section 515 that have been prepaid. In addition to local nonprofit organizations, eligible nonprofit organizations include regional or national nonprofit organizations or public bodies provided no part of the net earnings of which accrue to the benefit of any member, founder, contributor or individual.

(e) Requirements for nonprofit organizations and public bodies. To purchase and operate a housing project, a nonprofit organization or public body must meet the following requirements:

(1) The purchaser must agree to maintain the housing project for very low- and low-income families or persons for the remaining useful life of the housing and related facilities. However, currently eligible moderate-income tenants will not be required to move.

(2) The purchaser must agree that no subsequent transfer of the housing project will be permitted for the remaining useful life of the housing project unless the Agency determines that the transfer will further the provision of housing for low-income households, or there is no longer a need for the housing project. Language to be included in the deed, conveyance instrument, loan resolution, and assumption agreement (as applicable) is provided in §3560.662.

(3) The purchaser must demonstrate financial feasibility of the housing project including anticipated funding.

(4) The purchaser must certify to the Agency that no identity-of-interest relationships in accordance with §3560.102(g). The purchaser must not have any identity of interest with the seller or any borrower that has previously prepaid or requested prepayment of an Agency MFH loan.

(5) The purchaser must complete an Agency-approved application and obtain Agency approval in accordance with subpart B of this part.

(6) The purchaser must make a good faith offer taking into consideration the value of the housing project as determined in accordance with paragraph (a) of this section.

(f) Selection priorities. If more than one qualified nonprofit organization or
§ 3560.660 Acceptance of prepayments.

(a) When the Agency agrees to accept prepayment, the Agency will notify borrowers, in writing, of the conditions under which the Agency will accept prepayment, including the specific restrictive-use provisions to which the borrower has agreed and the date by which the borrower must make the prepayment.

(1) Prepayment must be made 180 days from the date of the Agency’s prepayment acceptance notice to the borrower.

(2) If the borrower’s prepayment is not received within 180 days of the prepayment acceptance notice and the Agency has not agreed to an alternative date based on a written request from the borrower, the Agency may cancel the prepayment acceptance agreement.
(b) Tenants will be notified of the prepayment acceptance agreement in accordance with §3560.654(c). If a prepayment is anticipated to result in increased net tenant contributions, displacements or involuntary relocations, the tenants, who are affected by such a circumstance, may request a Letter Of Priority Entitlement (LOPE) in accordance with §3560.159(c). Tenants must request a LOPE within one year of the prepayment acceptance notice date.

(c) Owners will provide certification stating that they will meet state and local laws prior to prepayment acceptance.

§ 3560.661 Sale or transfers.

(a) If a sale or transfer is to take place in conjunction with the Agency incentive offer, the sale or transfer must comply with the processing provisions of subpart I of this part.

(b) If a proposed transferee is determined not to be eligible for the transfer and assumption, the borrower will be given an additional 45 days to find another transferee.

(c) In cases where the existing owner is in program non-compliance or default, the Agency may make an offer of incentives contingent on the successful transfer of the housing to an acceptable purchaser. The Agency may offer a smaller incentive or no incentive if the borrower does not agree to transfer the project to an acceptable purchaser, or if the transfer does not take place.

§ 3560.662 Restrictive-use provisions and agreements.

All restrictions require Agency approval and must be in accordance with the following restrictions:

(a) The undersigned, and any successors in interest, agree to use the property (described herein) in compliance with 42 U.S.C. 1484 or 1485, whichever is applicable, and applicable regulations and the subsequent amendments, for the purpose of housing:

(1) Very low-, or low-income households when required by §3560.658(a)(2), or

(2) Very low-, low-, or moderate-income households.

(b) The period of the restriction will be inserted in accordance with the following:

(1) 10 years if required by §3560.658(a)(1);

(2) The last existing tenant (that occupied the property on the date of prepayment) voluntarily vacates if required by §3560.658(b)(3);

(3) 30 years if required by §3560.406(g);

(4) Remaining period of existing restrictive-use provisions and any agreed extension if required by §3560.655 or §3560.658 (b)(1);

(5) The remaining useful life of the housing and related facilities if required by §3560.658(a)(2);

(6) 20 years in all other cases.

(c) When required by §3560.658(a)(1) or (a)(2), the undersigned agrees that at the end of the expiration of the period described in paragraph (b) of this section, the property will be offered for sale to a qualified nonprofit organization or public body, in accordance with previously cited statutes and regulations.

(d) The Agency and eligible tenants or applicants may enforce these restrictions.

(e) The undersigned also agrees to:

(1) To set rents, other charges, and conditions of occupancy in a manner to meet these restrictions;

(2) To post an Agency approved notice of this restriction for the tenants of the property;

(3) To adhere to applicable local, state, and Federal laws; and

(4) To obtain Agency concurrence for any rental procedures that deviate from those approved at the time of prepayment, prior to implementation.

(f) The undersigned will be released from these obligations before the termination period in paragraph (b) of this section only when the Agency determines that there is no longer a need for the housing or that financial assistance provided the residents of the housing will no longer be provided due to no fault, action or lack of action on the part of the borrower.

[69 FR 69106, Nov. 26, 2004, as amended at 73 FR 65506, Nov. 4, 2008]
§ 3560.663 Post-payment responsibilities for loans subject to continued restrictive-use provisions.

(a) If a borrower prepays a loan and the housing project remains subject to restrictive-use provisions, the requirements of this section apply after prepayment.

(b) Owners of prepaid housing projects will be responsible for ensuring that the restrictive-use provisions agreed to as a condition of prepayment are observed.

(c) Owners must maintain appropriate documentation to demonstrate compliance with the restrictive-use provisions and must make the documentation and the housing project site available for Federal Government inspection upon request.

(1) Owners must document rent increases in accordance with subpart G of this part.

(2) Owners must document tenant eligibility in accordance with § 3560.152.

(3) In an Agency approved format, owners must provide the agency with a signed and dated certification within 30 days of the beginning of each calendar year for the full period of the restrictive-use provisions establishing that the restrictive-use provisions are being met.

(d) Owners must observe Agency policies on tenant grievances as described in § 3560.160. The Agency may enforce restrictive-use provisions through administrative and legal actions. Tenants may enforce the restrictive-use provisions by contacting the Agency or through legal action. The Agency will release the restrictive-use provisions when the Agency conditions have been met.

§§ 3560.664–3560.699 [Reserved]

§ 3560.700 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart O—Unauthorized Assistance

§ 3560.701 General.

(a) This subpart contains the policies for recapturing unauthorized assistance when the Agency determines that a borrower or tenant was ineligible for, or improperly used, assistance received from the Agency.

(b) The Agency may seek repayment of any unauthorized assistance provided to a borrower or tenant, plus the cost of collection, regardless of whether the unauthorized assistance was due to errors by the Agency, the borrower, or the tenant.

§ 3560.702 Unauthorized assistance sources and situations.

(a) Unauthorized assistance can be received by a borrower or tenant in the form of loans, grants, interest credit, rental assistance, or other assistance provided by the Agency including assistance received as a result of an incorrect interest rate being applied to an Agency loan. Agency officials may pursue identification and recapture of unauthorized assistance through any legal remedies available.

(b) Unauthorized assistance may result from situations such as:

(1) Assistance being provided to an ineligible borrower or tenant;

(2) Assistance to an eligible borrower or tenant being used for an unauthorized purpose;

(3) Assistance being obtained as a result of inaccurate, incomplete, or fraudulent information provided by a borrower or tenant; or

(4) Assistance being obtained as a result of errors by the Agency, borrower, or tenant.

§ 3560.703 Identification of unauthorized assistance.

(a) The Agency will use all available means to identify unauthorized assistance, including Agency monitoring activities, OIG reports, GAO reports, and
§ 3560.704 Unauthorized assistance determination notice.

(a) The Agency will notify borrowers, in writing, when a determination has been made that unauthorized assistance was received by the borrower. Borrowers will notify tenants, in writing, when a determination is made that unauthorized assistance was received by the tenant and will simultaneously send the Agency a copy of the written notice to the tenant.

(b) The unauthorized assistance determination notice is a preliminary notice, not a demand letter. The unauthorized assistance determination notice will:

(1) Specify the reasons the assistance was determined to be unauthorized;

(2) State the amount of unauthorized assistance to be repaid and specify the party responsible for repayment of the unauthorized assistance (i.e., the tenant or borrower) according to the provision of §3560.708;

(3) Establish a place and time when the person receiving the unauthorized assistance determination notice may meet with the Agency or, in the case of tenants, may meet with the borrower, to discuss issues related to the unauthorized assistance notice such as the establishment of a repayment schedule; and

(4) Advise the borrower or tenant that they may present facts, figures, written records, or other information within a specified period of time which might alter the determination that the assistance received was unauthorized.

(c) Repayment may be made either with a lump sum payment or through payments made over a period of time. If a borrower or tenant agrees to repay unauthorized assistance, the amount due will be the amount stated in the unauthorized assistance determination notice unless another amount has been approved by the Agency.

(d) Borrowers must retain copies of all correspondence and a record of all conversations between the borrower and a tenant regarding unauthorized assistance received by a tenant.

(e) When a tenant, who has received unauthorized assistance due to tenant error or fraud as determined by the Agency, moves out of a housing project, the borrower is no longer responsible for recapturing the unauthorized assistance provided that the borrower notifies the Agency of the tenant’s move and transfers all records related to the tenant’s unauthorized assistance to the Agency within 30 days of the tenant’s move. The Agency will pursue collection of the unauthorized assistance from the tenant.

(f) If a borrower refuses to enter into an unauthorized assistance repayment schedule with the Agency, the Agency...
§ 3560.706

will initiate liquidation procedures, in accordance with §3560.456, or other enforcement actions, such as suspension, debarment, civil, or criminal penalties, in accordance with §3560.461. If a tenant refuses to enter into an unauthorized assistance repayment schedule, the Agency will initiate recovery actions against the tenant.

(g) Borrowers may not use housing project funds to pay amounts due to the Agency as a result of unauthorized assistance due to borrower fraud.

§ 3560.706 Offsets.

Offsets and any other available remedies may be used by the Agency to recapture unauthorized assistance. Guidance concerning use of offsets can be found at 7 CFR 3550.210.

§ 3560.707 Program participation and corrective actions.

(a) With Agency approval, a borrower or tenant, who has received unauthorized assistance, may continue to participate in the project if they have the legal and financial capabilities to do so. Approval considerations for such forbearance and repayment are in §3560.705.

(b) A borrower or tenant who was responsible for the circumstances causing the unauthorized assistance must take appropriate action to correct the problem within 90 days of the unauthorized assistance determination notice date, unless an alternative date is agreed to by the Agency.

(c) When the interest rate shown in a debt instrument resulted in the receipt of unauthorized assistance, the debt instrument will be modified to the correct interest rate. All payments made by the borrower at the incorrect interest rate will be reapplied at the correct interest rate, and remaining payments due on the loan will be recalculated on the basis of the correct interest rate, plus any amounts due to the Agency as a result of the use of an incorrect interest rate, unless the Agency agrees to a separate repayment process.

§ 3560.708 Unauthorized assistance received by tenants.

(a) Tenant actions that require tenant repayment of unauthorized assistance received by tenants include, but are not limited to:

1. Knowingly or mistakenly misrepresenting income, assets, adjustments to income, or household status to the borrower as required under subpart D of this part; or

2. Failure to properly report changes in income, assets, adjustments to income, or household status to the borrower as required in subpart D of this part.

(b) Borrower actions that require borrower repayment of unauthorized assistance received by tenants include, but are not limited to:

1. Incorrect determination of tenant income or household status by the borrower, resulting in rental assistance or interest credit that is not allowable under the provisions of subparts D, E, or F of this part, as applicable; or

2. Assignment of rental assistance to a household that is ineligible under the requirements of subpart F of this part.

(c) When it is determined that a tenant has received unauthorized assistance, the borrower shall notify the tenant and the Agency through the procedure specified in §3560.704.

(d) Borrowers may not charge tenants to pay amounts due to the Agency as a result of unauthorized assistance to tenants through borrower error.

(e) Borrowers must notify the Agency of all collections from tenants as repayments for unauthorized assistance and must remit or credit the amounts collected to applicable housing project accounts.

(f) When rental assistance was improperly assigned to a tenant, for any reason, the rental assistance benefit must be canceled and reassigned.

1. Before a borrower notifies a tenant of rental assistance cancellation, the borrower must request Agency approval. If the Agency determines that the unauthorized rental assistance was received by the tenant due to borrower fraud or error, the borrower must give the tenant 30 days notice, in writing, that the unit was assigned in error and that the rental assistance benefit will be canceled effective on date that the next monthly rental payment is due after the end of the 30-day notice period.
(2) Tenants also must be notified, in writing, that they may cancel their lease without penalty at the time the rental assistance is canceled. Tenants must be offered an opportunity to meet with a borrower to discuss the rental assistance cancellation.

§ 3560.709 Demand letter.

(a) If a borrower fails to respond to an unauthorized assistance determination notice or fails to agree to a repayment schedule, the Agency will send the borrower a demand letter specifying:

(1) The amount of unauthorized assistance to be repaid and the basis for the unauthorized assistance determination; and

(2) The actions to be taken by the Agency if repayment is not made by a specified date.

(b) If a tenant fails to respond to the unauthorized assistance determination notice or fails to agree to a repayment schedule, the borrower will send the tenant a demand letter specifying:

(1) The amount of unauthorized assistance to be repaid and the basis for the unauthorized assistance determination;

(2) The actions to be taken if repayment is not made by a specified date, including termination of tenancy; and

(3) The appeal rights of the tenant as specified in § 3560.160.

(c) A demand letter may be sent to a borrower or tenant, in lieu of an unauthorized assistance determination notice, when the evidence documenting the unauthorized assistance determination is deemed to be conclusive by the Agency or borrower sending the letter.

§§ 3560.710–3560.749 [Reserved]

§ 3560.750 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Subpart P—Appraisals

§ 3560.751 General.

This subpart sets forth appraisal policies for Agency-financed multi-family housing (MFH) projects consisting of five or more rental units. Agency-financed housing projects with fewer than five rental units may be appraised in accordance with the Agency’s single family housing appraisal policies established under 7 CFR 3550.62.

§ 3560.752 Appraisal use, request, review, and release.

(a) Appraisal uses. The Agency will use appraisals to determine whether the security offered by an applicant or borrower is adequate to secure a loan or determine appropriate servicing or preservation decisions. Appraisals used for Agency decision-making must be current, unless the Agency and the applicant, or borrower, mutually agree to the use of an appraisal that is not current. A current appraisal is an appraisal with a report date that is not more than one year old.

(b) Appraisal requests. Appraisal requests must be in writing and must specify the client and other intended users, the intended use, the purpose, and the scope of work of the appraisal, including the type and definition of the value(s) to be developed.

(1) Type of Value. The appraisal request must indicate whether the “market value”, the “market value, subject to restricted rents”, or any other type of value of the housing project and related facilities is to be concluded.

(2) A request for “market value, subject to restricted rents” means the appraisal will take into consideration any rent limits, rent subsidies, expense abatements, or restrictive-use conditions that will affect the property as a result of an agreement with the Agency or any other financing source. Each type of financing involved, including,
but not limited to, interest credit subsidy, low-interest loans from other sources, tax-exempt bond financing, tax credits, and grants, must be valued separately in the appraisal.

(ii) A request for “market value” means the appraisal will take into consideration the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

(A) Buyer and seller are typically motivated;
(B) Both parties are well informed or well advised and acting in what they consider their best interests;
(C) A reasonable time is allowed for exposure in the open market;
(D) Payment is made in terms of cash in United States dollars or in terms of financial arrangements comparable thereto; and
(E) The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

(2) ‘‘As-is’ Value’ or ‘‘Prospective Value’’. The appraisal request must indicate whether the ‘‘as-is’ value’’ or ‘‘prospective value’’ of the housing is to be concluded.

(i) ‘‘As-is’ value’’ means the value of the housing and related facilities as of the effective date of the appraisal. It relates to what physically exists and is legally permissible at the time of the appraisal and excludes all hypothetical conditions.

(ii) ‘‘Prospective value’’ means the forecasted value of the housing and related facilities as of a specified future date. For Agency appraisals, this date will typically be the projected completion date of proposed new construction or rehabilitation.

(3) Section 8 project-based assistance. Depending on the intended use of the appraisal, the Agency will specify whether or not section 8 project-based assistance will be considered in the valuation of the housing. The remaining term of the section 8 contract and the probability of subsequent renewal terms being authorized will be taken into consideration when making this determination.

(4) Low-Income Housing Tax Credit (LIHTC) and other financing sources. Depending on the intended use of the appraisal, the Agency will specify whether or not tax credits and other financing sources involved in the housing will be considered in the valuation of the housing.

(c) Appraisal review. All MFH appraisals that were not written by an Agency appraiser will be reviewed by an Agency appraiser, who will write and file a technical review report that complies with the Uniform Standards of Professional Appraisal Practice (USPAP) and Agency requirements.

(d) Release of appraisals. MFH appraisals procured by the Agency will be released to owners/applicants, from their own files, upon their request.

§ 3560.753 Agency appraisal standards and requirements.

(a) General. The Agency recognizes USPAP as the basic standards for appraisals. Appraisals used by the Agency must comply with USPAP and this subpart.

(b) Appraiser. MFH appraisals prepared for the Agency will be written by Agency appraisers or independent fee appraisers who are state certified general appraisers, certified in the state where the property is located. Technical review reports will be written by Agency state certified general appraisers.

(c) Appraisal report. The appraisal report format may be a form appraisal or a narrative appraisal. The Agency will specify the appraisal format that is most appropriate for the scope of work involved when the appraisal is requested.

(1) Form appraisal reports. The Agency will accept appraisal report forms that meet generally accepted industry standards, comply with USPAP, and have been approved by the Agency.

(2) Narrative appraisal reports. Narrative appraisal reports must, at a minimum, contain the following items:

(i) Transmittal letter;
(ii) Factual information about the property;
(iii) Regional and neighborhood data;
(iv) Description of the subject property;
(v) Description of existing and planned improvements;
(vi) A highest and best use analysis;
(vii) A statement regarding any environmental issues, such as potential contamination of the property from hazardous substances, hazardous wastes, or petroleum products;
(viii) A cost approach analysis (if applicable);
(ix) A sales comparison approach analysis (if applicable);
(x) An income approach analysis (if applicable);
(xi) A reconciliation of the value indications derived from the included approaches to value; and
(xii) A signed and dated certification of value.

(3) At the time an appraisal is requested, the Agency will specify either a complete or a limited appraisal and one of the following types of appraisal reports, based upon the complexity of the appraisal assignment.

(i) A self-contained report that comprehensively describes all information significant to the solution of the appraisal problem;
(ii) A summary report that summarizes all information significant to the solution of the appraisal problem; or
(iii) A restricted use report, intended for Agency use only, that briefly states all information significant to the solution of the appraisal problem.

(d) Highest and best use statement and analysis. The highest and best use is to be concluded for the subject site as though it was vacant, and for the subject property as improved, if improvements have been made. If the highest and best use of a subject property is for something other than MFH, the appraisal report must provide this information to the Agency for consideration in the loan process. In addition to being reasonably probable and appropriately supported, the highest and best use of both the land as though vacant and the property as improved must meet four implicit criteria. The highest and best use must be:

(1) Physically possible;
(2) Legally permissible;
(3) Financially feasible; and
(4) Maximally productive.

(e) Valuation methods and variances. The final opinion of value presented in an appraisal report must have considered a cost approach, a sales comparison approach, and an income approach. If one of these standard approaches is not used, the reconciliation narrative will provide a full and complete explanation of the reasons the approach was excluded. The reconciliation will fully discuss and reconcile variances in the value indications concluded by each approach.

(f) Real estate history. Appraisals must contain a 5-year ownership and sales history for the housing project being appraised.

(g) Reserve accounts. Funds in the housing project’s reserve account will not be considered in the valuation of the housing project.

(h) Escrow accounts. Short-term prepaid escrow accounts for general operating expenses, such as taxes and insurance, shall not be considered in the valuation of the housing project.

(i) Rental rates comparison. The appraisal report must document whether the housing project’s basic rents are less than, equal to, or greater than market rents for comparable conventional, or non-subsidized, units in the area where the housing is located.

(j) Description of housing and property rights. The appraisal report must identify and describe both the real estate, which is the land and improvements, and the real property, or property rights, being appraised.

(k) Exclusion of rental units from valuation. The Agency will provide appraisers with instructions and supporting information on any rental units that do not produce rental income at the time of the appraisal.

(l) Non-contiguous sites. When a housing project has real property located on non-contiguous sites, a separate appraisal must be developed for each site.
Management and Budget (OMB) and have been assigned OMB control number 0575–0189. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 18 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

PART 3565—GUARANTEED RURAL RENTAL HOUSING PROGRAM

Subpart A—General Provisions

Sec.
3565.1 Purpose.
3565.2 Applicability and authority.
3565.3 Definitions.
3565.4 Availability of assistance.
3565.5 Ranking and selection criteria.
3565.6 Inclusion of tax-exempt debt.
3565.7 Agency environmental requirements.
3565.8 Civil rights compliance.
3565.9 Compliance with federal requirements.
3565.10 Conflict of interest.
3565.11–3565.12 [Reserved]
3565.13 Exception authority.
3565.14 Review and appeals.
3565.15 Oversight and monitoring.
3565.16 [Reserved]
3565.17 Demonstration programs.
3565.18–3565.49 [Reserved]
3565.50 OMB control number.

Subpart B—Guarantee Requirements

3565.51 Eligible loans and advances.
3565.52 Conditions of guarantee.
3565.53 Guarantee fees.
3565.54 Transferability of the guarantee.
3565.55 Participation loans.
3565.56 Suspension or termination of loan guarantee agreement.
3565.57 Modification, extension, reinstatement of loan guarantee.
3565.58–3565.99 [Reserved]
3565.100 OMB control number.

Subpart C—Lender Requirements

3565.101 Responsibility of lenders.
3565.102 Lender eligibility.
3565.103 Approval requirements.
3565.104 Application requirements.
3565.105 Lender compliance.
3565.106 Construction lender requirements.
3565.107 [Reserved]

Subpart D—Borrower Eligibility Requirements

3565.108 Responsibility for actions of agents and mortgage brokers.
3565.109 Minimum loan prohibition.
3565.110 Insolvency of lender.
3565.111 Lobbying activities.
3565.112–3565.149 [Reserved]
3565.150 OMB control number.

Subpart E—Loan Requirements

3565.201 General.
3565.202 Tenant eligibility.
3565.203 Restrictions on rents.
3565.204 Maximum loan amount.
3565.205 Eligible uses of loan proceeds.
3565.206 Ineligible uses of loan proceeds.
3565.207 Form of lien.
3565.208 Maximum loan term.
3565.209 Loan amortization.
3565.210 Maximum interest rate.
3565.211 Interest credit.
3565.212 Multiple guaranteed loans.
3565.213 Geographic distribution.
3565.214 [Reserved]
3565.215 Special conditions.
3565.216–3565.249 [Reserved]
3565.250 OMB control number.

Subpart F—Property Requirements

3565.251 Eligible property.
3565.252 Housing types.
3565.253 Form of ownership.
3565.254 Property standards.
3565.255 Environmental requirements.
3565.256 Architectural services.
3565.257 Procurement actions.
3565.258–3565.299 [Reserved]
3565.300 OMB control number.

Subpart G—Processing Requirements

3565.301 Loan standards.
3565.302 Allowable fees.
3565.303 Issuance of loan guarantee.
3565.304 Lender loan processing responsibilities.
3565.305 Mortgage and closing requirements.
3565.306–3565.549 [Reserved]
3565.350 OMB control number.
Subpart H—Project Management

3565.351 Project management.
3565.352 Preservation of affordable housing.
3565.353 Affirmative fair housing marketing.
3565.354 Fair housing accommodations.
3565.355 Changes in ownership.
3565.356–3565.399 [Reserved]
3565.400 OMB control number.

Subpart I—Servicing Requirements

3565.401 Servicing objectives.
3565.402 Servicing responsibilities.
3565.403 Special servicing.
3565.404 Transfer of loans or mortgage servicing.
3565.405 Repurchase of guaranteed loans.
3565.406–3565.449 [Reserved]
3565.450 OMB control number.

Subpart J—Assignment, Conveyance, and Claims

3565.451 Preclaim requirements.
3565.452 Decision to liquidate.
3565.453 Disposition of the property.
3565.454 [Reserved]
3565.455 Alternative disposition methods.
3565.456 Filing a claim.
3565.457 Determination of claim amount.
3565.458 Withdrawal of claim.
3565.459–3565.499 [Reserved]
3565.500 OMB control number.

Subpart K—Agency Guaranteed Loans That Back Ginnie Mae Guaranteed Securities

3565.501 Applicability.
3565.502 Incontestability.
3565.503 Repurchase.
3565.504 Transfers.
3565.505 Liability.
3565.506–3565.549 [Reserved]
3565.550 OMB control number.

SOURCE: 63 FR 39458, July 22, 1998, unless otherwise noted.

Subpart A—General Provisions

§ 3565.1 Purpose.

The purpose of the Guaranteed Rural Rental Housing Program (GRRHP) is to increase the supply of affordable rural rental housing, through the use of loan guarantees that encourage partnerships between the Rural Housing Service, private lenders and public agencies.

§ 3565.2 Applicability and authority.

The regulation prescribes the policies, authorizations, and procedures for the guarantee of multifamily loans under section 538 of the Housing Act of 1949.

§ 3565.3 Definitions.

Administrator. The Administrator of the Rural Housing Service, or his or her designee.
Agency. The Rural Housing Service, or a successor agency.
Allowable claim amount. The total losses incurred by the lender, as calculated pursuant to subpart J of this part.
Applicable Federal Rate (AFR). The interest rate set by the federal government for federal financing programs pursuant to section 42 of the Internal Revenue Code.
Approved lender. An eligible lender who has been authorized by the Agency to originate and service guaranteed multifamily loans under the program.
Assignment. The delivery by a lender to the Agency of the note and any other security instruments securing the guaranteed loan; and any and all liens, interest, or claims the lender may have against the borrower.
Assistance. Financial assistance in the form of a loan guarantee or interest credit received from the Agency.
Borrower. The individuals or entities responsible for repaying the loans.
Claim. The presentation to the Agency of a demand for payment for losses incurred on a loan guaranteed under the program.
Conditional commitment. The written commitment by the Agency to guarantee a loan subject to the stated terms and conditions.
Construction and permanent loan. A loan which provides advances during the construction period and remains in place as a permanent loan at the completion of construction.
Construction contingency reserve. A cash reserve of at least two percent of the construction contract, inclusive of the contractor's fee and all hard and soft costs that must be set up and fully funded by the closing of the construction loan. This reserve will be held by
the lender, and funds will only be disbursed for change order requests approved by the Agency and the lender. Unused funds from the construction contingency reserve will be held in the operating and maintenance reserve and cannot be released to the borrower until the project reaches an occupancy of 90% for 90 consecutive days. In addition the reserve accounts established in the conditional commitment must be fully funded prior to the release of the construction contingency reserve. These requirements remain in effect regardless of whether the lender has established a lease-up reserve in lieu of the occupancy requirement.

**Correspondent relationship.** A contractual relationship between an approved lender and a non-approved lender or mortgage broker in which the correspondent performs certain origination, underwriting or servicing functions for the approved lender.

**Default.** Failure by a borrower to meet any obligation or term of a loan, grant, or regulatory agreement, or any program requirement.

**Delinquency.** Failure to make a timely payment under the terms of the promissory note or regulatory agreement.

**Department of Housing and Urban Development (HUD).** A federal agency which may be a partner in some of the Agency guarantees.

**Due diligence.** The process of evaluating real estate in the context of a real estate transaction for the presence of contamination from release of hazardous substances, petroleum products, or other environmental hazards and determining what effect, if any, the contamination has on the regulatory status or security value of the property.

**Eligible borrower.** A borrower who meets the requirements of subpart D of this part.

**Eligible lender.** A lender who meets the requirements of subpart C of this part or any successor regulation.

**Eligible loan.** A loan that meets the requirements of subpart E of this part or any successor regulation.

**Eligible rural area.** An eligible rural area is an area which meets the requirements of part 3550 of this chapter or any successor regulation.

**Fannie Mae.** A Federally chartered, publicly owned enterprise created by Congress to purchase, sell or otherwise facilitate the purchase or sale of mortgages in the secondary mortgage market.

**Federal Home Loan Bank System.** A system of member savings and loans, banks and other lenders whose primary business is the making of housing loans.

**Final claim payment.** The amount due to the lender (or the Agency) after disposition of the collateral is complete and the proceeds from liquidation, as well as any other claim payments, are applied against the allowable claim amount.

**Foreclosure.** The process by which the ownership interest of a borrower in a mortgaged property is extinguished and the security is liquidated with the proceeds applied to the loan.

**Freddie Mac.** A Federally chartered, publicly owned enterprise created to purchase, sell or otherwise facilitate the purchase or sale of mortgages in the secondary mortgage market.

**Ginnie Mae.** Ginnie Mae is a reference to the Government National Mortgage Association.

**Government National Mortgage Association.** The Government National Mortgage Association (Ginnie Mae) is a government corporation within the Department of Housing and Urban Development. Ginnie Mae guarantees privately issued securities backed by mortgages or loans which are insured or guaranteed by the Federal Housing Administration (FHA), the Department of Veterans Affairs (VA), or the Rural Housing Service (RHS) and certain other loans or mortgages guaranteed or insured by the Government.

**GRRHP.** Guaranteed Rural Rental Housing Program.

**Guarantee fees.** The fees paid by the lender to the Agency for the loan guarantee.

1. An initial guarantee fee is due at the time the guarantee is issued.
2. An annual guarantee fee is due at the beginning of each year that the guarantee remains in effect.

**Guaranteed loan.** Any loan for which the Agency provides a loan guarantee.

**Holder.** A person or entity, other than the lender, who owns all or part of the
guaranteed portion of the loan with no servicing responsibilities. When the single note option is used and the lender assigns a part or all of the guaranteed portion of the loan with no servicing responsibilities. When the single note option is used and the lender assigns a part or all of the guaranteed portion of the loan to an assignee, the assignee becomes a Holder only when the Agency receives notice and the transaction is completed through use of an assignment guarantee agreement form approved by the Agency.

**Housing Finance Agency (HFA).** A state or local government instrumentality authorized to issue housing bonds or otherwise provide financing for housing. Identity of interest. With respect to a project, an actual or apparent financial interest of any type, that exists or will exist among the borrower, contractor, lender, syndicator, management agent, suppliers of materials or services, including professional services, or vendors (including servicing and property disposal), in any combination of relationships which may result in an actual or perceived conflict of interest.

**Income eligibility.** A determination that the income of a tenant at initial occupancy does not exceed 115 percent of the area median income as such area median income is defined by HUD or a successor agency.

**Indian tribe.** Any Indian tribe, band, nation, or other organized group or community of Indians, including any Alaska Native village or regional or village corporation, as defined by or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), that is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians pursuant to the Indian Self-Determination and Education Assistance Act of 1975 (25 U.S.C. 450 et seq.); or any entity established by the governing body of an Indian tribe, as described in this definition, for the purpose of financing economic development.

**Interest credit.** A subsidy available to eligible borrowers that reduces the effective interest rate of the loan to the Applicable Long Term Monthly AFR.

**Land lease.** A written agreement between a landowner and a borrower for the possession and use of real property for a specified period of time.

**Lease.** A contract containing the rights and obligations of a tenant or cooperative member and a borrower, including the amount of the monthly occupancy charge and other terms under which the tenant will occupy the housing.

**Lease-up period.** The period of time that begins when the first unit in the project receives a certificate of occupancy until the time that occupancy of 90% of the units for a minimum of 90 consecutive days is achieved.

**Lease-up reserve.** A cash deposit which is available to a property to help pay operating costs and debt service at the initiation of operations while units are being leased to their initial occupants.

**Lender.** A bank or other financial institution, including a housing finance agency, that originates or services the guaranteed loan.

**Lender agreement.** The written agreement between the Agency and the lender containing the requirements the lender must meet on a continuing basis to participate in the program.

**Loan.** A mechanism by which a lender funds the acquisition and development of a multifamily project. A loan in this context is secured by a mortgage executed by the lender and borrower.

**Loan guarantee.** A pledge to pay part of the loss incurred by a lender in the event of default by the borrower.

**Loan guarantee agreement.** The written agreement between the Agency and the lender containing the terms and conditions of the guarantee with respect to an individual loan.

**Loan participation.** A loan made by more than one lender wherein each lender funds an individual portion of the loan.

**Loan-to-cost ratio.** The amount of the loan divided by the total cost to develop the project.

**Loan-to-value ratio.** The amount of the loan divided by the appraised market value of the project.

**Maximum guarantee payment.** The maximum payment by the Agency under the guarantee agreement computed by applying the guarantee percentage times the allowable claim amount, but not to exceed original principal amount.
§ 3565.3

Mortgage. A written instrument evidencing or creating a lien against real property for the purpose of providing collateral to secure the repayment of a loan. For program purposes, this may include a deed of trust or any similar document.

Multifamily project. A project designed with five or more living units.

Negligent servicing or origination. Negligent servicing or origination is a failure to perform those services which a reasonably prudent lender would perform in servicing or originating its own portfolio and includes not only the failure to act but also the failure to act in a timely manner.

NOFA. A “Notice of Funding Availability” published in the Federal Register to inform interested parties of the availability of assistance and other non-regulatory matters pertinent to the program.

Non-monetary default. A default that does not involve the payment of money.

Note. Any note, bond, assumption agreement, or other evidence of indebtedness pertaining to a guaranteed loan.

Operating and maintenance reserve. A cash reserve required of all projects of at least two percent of the loan amount held by the lender that is used for the up-keep of the project.

Payment effective date. For the month payment is due, the day of the month on which payment will be effectively applied to the account by the lender, regardless of the date payment is received.

Permanent loan. A permanent loan is defined as a mortgage loan usually covering development costs, interim loans, construction loans, financing expenses, marketing, administrative, legal, and other Agency approved costs. This loan differs from the construction loan in that financing goes into place after the project is completely constructed and open for occupancy. It is a long-term obligation, generally for a period of no less than 25 years and no more than 40 years.

Prepayment. The payment of the outstanding balance on a loan prior to the note’s maturity date.

Project. The total number of rental housing units and related facilities subject to a guaranteed loan that are operated under one management plan and one Regulatory Agreement.

Program requirements. Any requirements contained in any loan document, guarantee agreement, statute, regulation, handbook, or administrative notice.

Promissory note. See “Note”.

Qualified alien. For the purposes of this part, qualified alien refers to any person lawfully admitted into the country who meets the criteria of 42 U.S.C. 1436a.

Real estate owned. Denotes real estate that has been acquired by the lender or the Agency (often known as “inventory property”).

Recourse. The lender’s right to seek satisfaction from the borrower’s personal financial resources or other resources for monetary default.

Regulatory agreement. The agreement that establishes the relationship among the Agency, the lender, and the borrower; and contains the borrower’s responsibilities with respect to all aspects of the management and operation of the project.

RHS. The Rural Housing Service within the Rural Development mission area, or a successor agency, which administers section 538 guarantees.

Rural area. A geographic area as defined in section 520 of the Housing Act of 1949.

Rural Development. A mission area within USDA which includes RHS, Rural Utilities Service, and Rural Business-Cooperative Service.

Servicing. The broad scope of activities undertaken to manage the performance of a loan throughout its term and to assure compliance with the program requirements.

Single asset ownership. A borrower who owns only one project.

Surplus cash. The borrower’s remaining funds at the project’s fiscal year end, after making all required payments, excluding required reserves and escrows.

Tenant. The individual that holds the right to occupy a unit in accordance with the terms of a lease executed with the project owner.
Rural Housing Service, USDA

§ 3565.8 Civil rights compliance.

(a) All actions taken by the Agency, or on behalf of the Agency, by a lender will be conducted without regard to race, color, religion, national origin, sex, marital status, age, income from public assistance or having exercised their right under the Consumer Credit Protection Act, and in accordance with the Equal Credit Opportunity Act (ECOA).

(b) Any action related to the sale, rental or advertising of dwellings; in
the provision of brokerage services; or in making available residential real estate transactions involving Agency assistance, must be in accordance with the Fair Housing Act, which prohibits discrimination on the basis of race, color, religion, sex, national origin, familial status or handicap. It is unlawful for a lender or borrower participating in the program to:

(1) Refuse to make accommodations in rules, policies, practices, or services if such accommodations are necessary to provide a person with a disability an opportunity to use or continue to use a dwelling unit and all public and common use areas; and

(2) Refuse to allow an individual with a disability to make reasonable modifications to a unit at his or her expense, if such modifications may be necessary to afford the individual full enjoyment of the unit.

(c) Any resident or prospective resident seeking occupancy or use of a unit, property or related facility for which a loan guarantee has been provided, and who believes that he or she is being discriminated against may file a complaint with the lender, the Agency or the Department of Housing and Urban Development. A written complaint should be sent to the Secretary of Agriculture or of the Department of Housing and Urban Development in Washington, DC.

(d) Lenders and borrowers that fail to comply with the requirements of title VIII of the Civil Rights Act of 1968, as amended (the Fair Housing Act), are liable for those sanctions authorized by law.

(e) For guaranteed loans with “interest credit,” the following additional civil rights laws will apply and be enforced by the agency delivering this guarantee program: title VI of the Civil Rights Act of 1964, section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act, Age Discrimination Act of 1975, and title IX of the Education Amendments of 1972.

(f) In accordance with title VI, borrowers will be subjected to compliance reviews for projects that receive interest credit.

[64 FR 32371, June 16, 1999]
§ 3565.13 Exception authority.

An Agency official may request and the Administrator or designee may make an exception to any requirement or provision, or address any omission of this part, if the Administrator determines that application of the requirement or provision, or failure to take action, would adversely affect the government’s interest or the program objectives, and provided that such an exception is not inconsistent with any applicable law or statutory requirement.

(64 FR 32372, June 16, 1999)

§ 3565.14 Review and appeals.

Whenever RHS makes a decision that is adverse to a lender or a borrower, RHS will provide written notice of such adverse decision and of the right to a USDA National Appeals Division hearing in accordance with 7 CFR part 11 or successor regulations. The lender or borrower may request an informal review with the decision maker and the use of available alternative dispute resolution or mediation programs as a means of resolution of the adverse decision. Any adverse decision, whether appealable or non-appealable may also be reviewed by the next level RHS supervisor. Adverse decisions affecting project tenants or applicants for tenancy will be handled in accordance with 7 CFR part 1944, subpart L or successor regulations.

§ 3565.15 Oversight and monitoring.

The lender, borrower, and all parties involved in any manner with any guarantee under this program must cooperate fully with all oversight and monitoring efforts of the Agency, Office of Inspector General, the U.S. General Accounting Office, and the U.S. Department of Justice or their representatives including making available any records concerning this transaction. This includes the annual eligibility audit and any other oversight or monitoring activities. If the Agency implements a requirement for an electronic transfer of information, the lender and borrower must cooperate fully.

§ 3565.16 [Reserved]

§ 3565.17 Demonstration programs.

To test ways to expand the availability or enhance the effectiveness of the guarantee program, or for similar purposes, the Agency may, from time to time, propose demonstration programs that use loan guarantees or interest credit. Toward this end, the Agency may enter into special partnerships with lenders, financial intermediaries, or others to carry out one or more elements of a demonstration program. Demonstration programs will be publicized by notices in the FEDERAL REGISTER.

§§ 3565.18–3565.49 [Reserved]

§ 3565.50 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575–0174.
§ 3565.51 Eligible loans and advances.

Upon approval of an application from an eligible or approved lender, the Agency will commit to providing a guarantee for a permanent loan or a construction and permanent loan, subject to the availability of funds.

[76 FR 3, Jan. 3, 2011]

§ 3565.52 Conditions of guarantee.

A loan guarantee under this part will be evidenced by a Loan Note Guarantee issued by the Agency. Each lender will execute a Lender’s Agreement. If a valid Lender’s Agreement already exists, it is not necessary to execute a new Lender’s Agreement with each loan guarantee.

(a) Rights and liabilities. A guarantee under this part is backed by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which the lender had knowledge at the time the lender acquired the guarantee or assigned the loan, or in which a lender participates or condones. The guarantee will be unenforceable by the lender to the extent any loss is occasioned by a violation of usury laws, negligent servicing or origination by the lender, including a failure to acquire required security, or as a result of a use of loan funds for purposes other than those authorized by the Agency. The acts in the previous sentence constitute grounds for the refusal to make full payment under the guarantee to the lender, and will not be taken until the Agency gives the lender notice of the acts or omissions that it considers to constitute such grounds, specifying the applicable provisions of the Statute, Regulations, Loan Note Guarantee, or Lender’s Agreement; the lender has knowledge of fraud, misrepresentation or misuse of funds, and its rights under the guarantee shall be fully enforceable notwithstanding the actions of the lender, unless the Holder has knowledge of fraud, misrepresentation or misuse of funds when it becomes the Holder or condones or participates in such actions.

(b) Liability of the Holder. The Holder shall not be liable for the actions of the lender including, but not limited to, negligence, fraud, abuse, misrepresentation or misuse of funds, and its rights under the guarantee shall be fully enforceable notwithstanding the actions of the lender, unless the Holder has knowledge of fraud, misrepresentation or misuse of funds when it becomes the Holder or condones or participates in such actions.

(c) Types of guarantees. The Agency may provide a lesser guarantee based upon its evaluation of the credit quality of the loan. Penalties incurred as a result of default are not covered by the guarantee. The Agency liability under any guarantee will decrease or increase, in proportion to any increase or decrease in the amount of the unpaid portion of the loan, up to the maximum amount specified in the Loan Note Guarantee. The Agency will not guarantee construction loans only. The Agency offers the following types of guarantees:

(1) Option One. The Agency may guarantee permanent loans subject to the conditions specified in §3565.303(d). The maximum guarantee for a permanent loan will be 90 percent [unless the Agency establishes a different percent and announces this different percent through a Notice in the FEDERAL REGISTER] of the unpaid principal and interest up to default and accrued interest 90 calendar days from the date the liquidation plan is approved by the Agency, as defined in §3565.452.

7 CFR Ch. XXXV (1–1–14 Edition)
Rural Housing Service, USDA

§ 3565.52

(2) **Option Two.** The Agency may provide a guarantee which will cover construction loan advances (advances) during construction. The maximum guarantee of construction advances related to a construction and permanent loan will not at any time exceed the lesser of 90 percent (or the percent established by the Agency and announced through a Notice in the Federal Register) of the amount of principal and accrued interest up to default for amounts which exceed the original advance if for eligible uses of loan proceeds or 90 percent of the original principal amount and accrued interest up to default of the loan. The Agency’s guarantee will cover losses to the extent aforementioned once all sureties/insurances and/or performance and payment bonds have fully performed their contractual obligations. A construction contingency reserve is required. This guarantee will be enforceable during the construction period but will cease to be enforceable once construction is completed unless and until the requirements for the continuation of the guarantee contained in the Conditional Commitment and this part are completed and approved by the Agency by the date stated in the Conditional Commitment and any Agency approved extension(s). The Agency will provide written confirmation to the lender when all of the requirements for continuation of the guarantee to cover the permanent loan have been satisfied. Any losses sustained while the guarantee is unenforceable (after the end of the construction period and, if applicable, before the continuation of the guarantee) are not covered by the guarantee. For purposes of this guarantee, the construction period will end on the earlier of:

(i) Twenty-four months from the closing of the construction loan, if the certificates of occupancy for all units in the project have not been issued by then; or

(ii) The date of the issuance of the last certificate of occupancy, if the certificates of occupancy for all units in the project are issued on or before 24 months from the closing of the construction loan.

(3) **Option Three.** The Agency may provide a single, continuous guarantee for construction and permanent loans. Only projects that have low loan-to-cost ratios, which will be defined by the Agency in a Notice published periodically in the Federal Register, are eligible for this type of guarantee. A construction contingency reserve is required. The Agency may require that a lease-up reserve, in an amount established by the Agency and announced through a Notice in the Federal Register, be set-aside prior to closing the construction loan. This lease-up reserve is an additional amount, over and above the required initial operating and maintenance contribution. The maximum guarantee of construction advances will not at any time exceed the lesser of 90 percent (or the percent established by the Agency and announced through a Notice in the Federal Register) of the amount of principal and interest up to default advanced for eligible uses of loan proceeds or 90 percent of the original principal amount and interest up to default.

(d) **Maximum loss payment.** The maximum loss payment to a lender or holder is as follows:

(1) To any holder, 100 percent of any loss sustained by the holder on the guaranteed portion of the loan and on interest due on such portion.

(2) To the lender, the lesser of:

(i) Any loss sustained by the lender on the guaranteed portion, including principal and up to 90 days of accrued interest as evidenced by the notes or assumption agreements and secured advances for protection and preservation of collateral made with the Agency’s authorization; or

(ii) The guaranteed principal advanced to or assumed by the borrower and any interest and accrued interest up to 90 days due thereon.

(e) **Funding of reserves.** For each Option under paragraph (c) of this section, the lender must require an operating and maintenance reserve and provide the Agency adequate evidence of the funding of all required reserves.

(1) For Option 1 under paragraph (c) of this section, the funding schedule for the lease-up reserve and the operating and maintenance reserve must be included in the Agency-approved construction budget and be fully funded.
§ 3565.53 Guarantee fees.

As a condition of receiving a loan guarantee, the Agency will charge the following guarantee fees to the lender.

(a) Initial guarantee fee. The Agency will charge an initial guarantee fee equal to one percent of the guarantee amount. For purposes of calculating this fee, the guarantee amount is the product of the percentage of the guarantee times the initial principal amount of the guaranteed loan.

(b) Annual guarantee fee. An annual guarantee fee of at least 50 basis points (one-half percent) of the outstanding principal amount of the loan will be charged each year or portion of a year that the guarantee is in effect. This fee will be collected on February 28, of each calendar year.

(c) Surcharge for guarantees on construction advances. The Agency may, at its sole discretion, charge an additional fee on the portion of the loan advanced during construction. This fee will be charged in advance at the start of construction and will be announced in NOFA before loan approval.

§ 3565.54 Transferability of the guarantee.

A lender must receive the Agency’s approval prior to any sale or transfer of the loan guarantee.

§ 3565.55 Participation loans.

Loans involving multiple lenders are eligible for a guarantee when one of the lenders is an approved lender and agrees to act as the lead lender with responsibility for the loan under the loan guarantee agreement.

§ 3565.56 Suspension or termination of loan guarantee agreement.

A guarantee agreement will terminate when one of the following actions occurs: (In accordance with subpart H of this part, use restrictions on the property will remain if the following actions take place prior to the term of the loan and RHS determines the restrictions apply.)

(a) Voluntary termination. A lender and borrower voluntarily request the termination of the loan guarantee.

(b) Agency withdrawal of guarantee. The Agency withdraws the loan guarantee in the event of fraud, misrepresentation, abuse, negligence, or failure to meet the program requirements.

(c) Mortgage pay-off. The loan is paid.

(d) Settlement of claim. Final settlement of the claim.

§ 3565.57 Modification, extension, reinstatement of loan guarantee.

To protect its interest or further the objectives of the program, the Agency may, at its sole discretion, modify, extend, or reinstate a loan guarantee. In making this decision the Agency will consider potential losses under the program, impact on the tenants and the public reaction that may be received regarding the action. Further, the Agency may authorize a guarantee on a new loan that is originated as a part of a workout agreement.

§§ 3565.58–3565.99 [Reserved]

§ 3565.100 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575–0174.
Subpart C—Lender Requirements

§3565.101 Responsibility of lenders.
A participating lender must originate and service a guaranteed loan in accordance with the regulation and program requirements throughout the life of a loan or guarantee, whichever is less. When it is in the best interests of the Agency, the Agency may permit the transfer of servicing from the originating lender to a servicer.

§3565.102 Lender eligibility.
An eligible lender must be a licensed business entity or HFA in good standing in the state or states where it conducts business; be approved by the Agency; and meet at least one of the criteria contained below. Lenders who are not eligible may participate in the program if they maintain a correspondent relationship with a lender who is eligible. An eligible lender must:

(a) Meet the qualifications of, and be approved by, the Secretary of HUD to make multifamily housing loans that are to be insured under the National Housing Act;

(b) Meet the qualifications and be approved by Fannie Mae, Freddie Mac or Ginnie Mae to make multifamily housing loans that are to be sold to or securitized by such corporations;

(c) Be a state or local HFA, or a member of the Federal Home Loan Bank system, with a demonstrated ability to underwrite, originate, process, close, service, manage, and dispose of multifamily housing loans in a prudent manner;

(d) Be a lender who meets the requirements for Agency approval contained in this subpart and has demonstrated the ability to underwrite, originate, process, close, service, manage, and dispose of multifamily housing loans in a prudent manner;

(e) Be a lender who meets the following requirements in addition to the other requirements of this subpart and of subpart I of this part:
(1) Have qualified staff to perform multifamily housing servicing and asset management;
(2) Have facilities and systems that support servicing and asset management functions; and
(3) Have documented procedures for carrying out servicing and asset management responsibilities.

§3565.103 Approval requirements.
The Agency will establish and maintain a "list of approved lenders". To be an approved lender, eligible lenders must meet the following requirements and maintain them on a continuing basis at a level consistent with the nature and size of their portfolio of guaranteed loans.

(a) Commitment. A lender must have a commitment for a guaranteed loan or an agreement to purchase a guaranteed loan.

(b) Audited statement. A lender must provide the Agency with an annual audited financial statement conducted in accordance with generally accepted government auditing standards.

(c) Previous participation. A lender may not be delinquent on a federal debt or have an outstanding finding of deficiency in a federal housing program.

(d) Ongoing requirements. A lender must meet the following requirements at initial application and on a continuing basis thereafter:
(1) Overall financial strength, including capital, liquidity, and loan loss reserves, to have an acceptable level of financial soundness as determined by a lender rating service (such as Sheshunoff, Inc.); or to be an approved Fannie Mae, Freddie Mac, Ginnie Mae or HUD Federal Housing Administration multifamily lender; or, if a state housing finance agency, to have a top tier rating by a rating agency (such as Standard and Poor's Corporation);
(2) Bonding and insurance to cover business related losses, including directors and officers insurance, business income loss insurance, and bonding to secure cash management operations;
(3) A minimum of two years experience in originating and servicing multifamily loans;
(4) A positive record of past performance when participating in RHS or other federal loan programs;
(5) Adequate staffing and training to perform the program obligations; the head underwriter must have 3 years of
§ 3565.104 Application requirements.

Eligible lenders must submit a lender approval application, in a format prescribed by the Agency. The lender approval application submission must occur at the time the lender submits its first application for a loan guarantee, or its first application to purchase a guaranteed loan. The application must include documentation of lender compliance with §3565.103. A non-refundable application fee will be charged for each review of a lender’s application. The amount of the fee will be announced in NOFA.

§ 3565.105 Lender compliance.

A lender will remain an approved lender unless terminated by the Agency. To maintain approval, the lender must comply with the following requirements.

(a) Maintain eligibility in accordance with §§3565.102 and 3565.103;
(b) Comply with all applicable statutes, regulations, and procedures;
(c) Inform the Agency of any material change in the lender’s staffing, policies and procedures, or corporate structure;
(d) Cooperate fully with all program or Agency monitoring and auditing policies and procedures, including the Agency’s annual audit of approved lenders; and
(e) Maintain active participation in the multifamily guaranteed loan program by initiating a new loan guarantee or holding a loan guaranteed under this program.

§ 3565.106 Construction lender requirements.

A lender making a construction loan, as part of a construction and permanent loan, must demonstrate an ability to originate and service construction loans, in addition to meeting the other requirements of this subpart.

§ 3565.107 [Reserved]

§ 3565.108 Responsibility for actions of agents and mortgage brokers.

An approved lender is responsible for the actions of its agents and mortgage brokers.

§ 3565.109 Minimum loan prohibition.

A lender must not establish a minimum loan amount for loans under this program.

§ 3565.110 Insolvency of lender.

The Agency may require a lender to transfer a guaranteed loan or loans to another approved lender prior to a determination of insolvency by the lender. If the lender fails to transfer a loan when required, the guarantee will be considered null and void.

§ 3565.111 Lobbying activities.

An approved lender must comply with RD Instruction 1940-Q (available in any Rural Development Office) regarding lobbying activities.

§§ 3565.112–3565.149 [Reserved]

§ 3565.150 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575–0174.

Subpart D—Borrower Eligibility Requirements

§ 3565.151 Eligible borrowers.

Guaranteed loans must be made to an eligible borrower whose intention is to provide and maintain rural rental housing. The ownership entity must be a valid entity in good standing under the laws of the jurisdiction in which it is organized. Eligible borrowers shall include individuals, corporations, state...
or local public agencies or an instrumentality thereof, partnerships, limited liability companies, trusts, Indian tribes, or any organization deemed eligible by the Agency. Eligible borrowers must be U.S. citizens or permanent legal residents; a U.S. owned corporation, or a limited liability company, or partnership in which the principals are U.S. citizens or permanent legal residents.

§ 3565.152 Control of land.

At time of application, the lender must have evidence of site control by the borrower (option to purchase, lease, deed or other evidence acceptable to the Agency). At the time of loan closing, the lender’s closing docket must provide documentary evidence that the borrower owns or has a long-term lease on the land on which the housing is or will be located. The form of ownership or the leasehold agreement must meet Agency requirements. Notwithstanding any investment in the site, the site may not be accepted based on the Agency’s environmental assessment.

§ 3565.153 Experience and capacity of borrower.

At the time of application, the lender must certify that the borrower:

(a) Has the ability and experience to construct or rehabilitate multifamily housing that meets the requirements established by the Agency, the lender and the loan agreement;

(b) Has the legal and financial capacity to meet all of the obligations of the loan; and

(c) Has the ability and experience to meet the property management requirements established by the Agency, the lender, and the loan agreement.

§ 3565.154 Previous participation in state and federal programs.

Loans to borrowers who are delinquent on a federal debt may not be guaranteed. Furthermore, borrowers or principals thereof who have defaulted on state or local government loans will not be eligible for a guarantee unless the Agency determines that the default was beyond the borrower’s control, and that the identifiable reasons for the default no longer exist. At the time of application, the lender must obtain from the borrower a certification that the borrower is not under any state or federal order suspending or debarring participation in state or federal loan programs and that the borrower is not delinquent on any non-tax obligation to the United States.

§ 3565.155 Identity of interest.

At the time of application, the lender must certify that it has disclosed any and all identity of interest relationships and preexisting conditions with respect to its relationships and that of the borrower, or that no identity of interest relationships exists. Identity of interest relationships include any financial or other relationship that exists or will exist between a lender, borrower, management agent, supplier, or any agent of any of these entities, that could influence, give the appearance of influencing or have the potential to influence the actions of the parties in carrying out their responsibilities under the program. Disclosure will be in a form and manner established by the Agency.

§ 3565.156 Certification of compliance with federal, state, and local laws and with Agency requirements.

At the time of application, the lender must obtain from the borrower a certification of compliance with all applicable federal, state, and local laws, and with Agency requirements regarding discrimination and equal opportunity in housing, including title VIII of the Civil Rights Act of 1968, and the Fair Housing Amendments Act of 1988. The borrower must also certify that it is not the subject of any federal, state, or local sanction or punitive action.

§§ 3565.157–3565.199 [Reserved]

§ 3565.200 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575–0174.
Subpart E—Loan Requirements

§ 3565.201 General.
To be eligible for a guarantee, a loan must comply with the provisions of this subpart and be originated by an approved lender.

§ 3565.202 Tenant eligibility.
(a) Limits on income of tenants. The housing units subject to a guaranteed loan must be available for occupancy only by low or moderate-income families or individuals whose incomes at the time of initial occupancy do not exceed 115 percent of the area median income. After initial occupancy, a tenant’s income may exceed these limits.
(b) Citizenship status. A tenant must be a United States citizen or a noncitizen who is a qualified alien as defined in §3565.3.

§ 3565.203 Restrictions on rents.
The rent for any individual housing unit, including any tenant-paid utilities, must not exceed an amount equal to 30 percent of 115 percent of area median income, adjusted for family size. In addition, on an annual basis, the average rent for a project, taking into account all individual unit rents, must not exceed 30 percent of 100 percent of area median income, adjusted for family size.

§ 3565.204 Maximum loan amount.
(a) Section 207(c) limits and exceptions.
For that part of the property that is attributable to dwelling use, the principal obligation of each guaranteed loan must not exceed the applicable maximum per-unit limitations under section 207(c) of the National Housing Act.
(b) Loan-to-value limits.
(1) In the case of a borrower that is a nonprofit organization or an agency or body of any State, local or tribal government, each guaranteed loan must involve a principal obligation that does not exceed the lesser of 97 percent of:
   (i) The development costs of the housing and related facilities, or
   (ii) The lender’s determination of value not to exceed the appraised value of the housing and facilities.
(2) In the case of a borrower that is a for-profit entity or other entity not referred to in paragraph (b)(1) of this section, each guaranteed loan must involve a principal obligation that does not exceed the lesser of 90 percent of:
   (i) The development costs of the housing and related facilities, or
   (ii) The lender’s determination of value not to exceed the appraised value of the housing and facilities.
(3) To protect the interest of the Agency or to further the objectives of the program, the Agency may establish lower loan-to-value limits or further restrict the statutory maximum limits based upon its evaluation of the credit quality of the loan.
(c) Necessary assistance review.
(1) A lender requesting a loan guarantee must review all loans to determine the appropriate amount of assistance necessary to complete and maintain the project. The lender shall recommend to the Agency an adjustment in the loan amount if appropriate as a result of this review.
(2) Where the project financing combines a guaranteed loan with Low-Income Housing Tax Credits or other Federal assistance, the project must conform to the policies regarding necessary assistance in 7 CFR 3560.63 (d) or successor provision.

§ 3565.205 Eligible uses of loan proceeds.
Eligible uses of loan proceeds must conform with standards and conditions for housing and facilities contained in 7 CFR part 1924, subpart A or successor provision, except that the Agency, at its sole discretion, may approve, in advance, a higher level of amenities, construction, and fees for projects proposed for a guaranteed loan provided the costs and features are reasonable and customary for similar housing in the market area.
(a) Use of loan proceeds.
(1) New construction costs of the project;
(2) Moderate or substantial rehabilitation of buildings and acquisition...
Rural Housing Service, USDA § 3565.206

Costs when related to the rehabilitation of a building as described in paragraph (b) of this section;
(3) Acquisition of existing buildings, when approved by the Agency, for projects that serve a special housing need;
(4) Acquisition and improvement of land on which housing will be located;
(5) Development of on-site and off-site improvements essential to the use of the property;
(6) Development of related facilities such as community space, recreation, storage or maintenance structures, except that any high cost recreational facility, such as swimming pools and exercise clubs or similar facilities, must be specifically approved in advance by the Agency;
(7) Construction of on-site management or maintenance offices and living quarters for operating personnel for the property being financed;
(8) Purchase and installation of appliances and certain approved decorating items, such as window blinds, shades, or wallpaper;
(9) Development of the surrounding grounds, including parking, signs, landscaping and fencing;
(10) Costs associated with commercial space provided that:
   (i) The project is designed primarily for residential use;
   (ii) The commercial use consists of essential tenant service type facilities, such as laundry rooms, that are not otherwise conveniently available;
   (iii) The commercial space does not exceed 10 percent of the gross floor area of the residential units and common areas, unless a higher level is specifically approved in writing by the Agency; and
   (iv) The commercial activity is compatible with the use of the project and that the income is not more than 10 percent of the total annual operating income of the project.
(11) Costs for feasibility determination, loan application fees, appraisals, environmental documentation, professional fees or other fees determined by the Agency to be necessary to the development of the project;
(12) Technical assistance to and by non-profit entities to assist in the formation, development, and packaging of a project, or formation or incorporation of a borrower entity;
(13) Education programs for a board of directors, both before and after incorporation of a cooperative that will serve as the borrower;
(14) Construction interest accrued on the construction loan;
(15) Relocation assistance in the case of rehabilitation projects;
(16) Developers’ fees; and
(17) Repaying applicant debts in the following cases:
   (i) When the Agency authorizes in writing in advance the use of loan funds to pay debts for work, materials, land purchase, or other fees and charges before the loan is closed; or
   (ii) When the Agency concurs in writing with a determination by the lender that costs for work, fees and charges incurred prior to loan application are integral to development of the guarantee application and project.

§ 3565.206 Ineligible uses of loan proceeds.

Loan proceeds must not be used for the following:
(a) Specialized equipment for training and therapy;
(b) Housing in military impact areas;
(c) Housing that serves primarily temporary and transient residents;
(d) Nursing homes, special care facilities, and institutional type homes that

741
require licensing as a medical care facility;
(e) Operating capital for central dining facilities or for any items not affixed to the real estate, such as special portable equipment, furnishings, kitchen ware, dining ware, eating utensils, movable tables and chairs, etc.;
(f) Payment of fees, salaries and commissions or compensation to borrowers (except developers’ fees); or
(g) Refinancing of an outstanding debt, except in the case of an existing guaranteed loan where the Agency determines that the refinancing is in the government’s interest or furthers the objectives of the program. The term and amount of any loan for refinancing must not exceed the maximum loan amount or term limits.

§ 3565.207 Form of lien.
The loan originated by the lender for a guarantee must be secured by a first lien against the property.

§ 3565.208 Maximum loan term.
(a) Statutory term limit. The lender may set the term of the loan, but in no instance may the term of a guaranteed loan exceed the lesser of 40 years or the remaining economic life of the project.
(b) Prepayment of loans. A guaranteed loan may be prepaid in whole or in part at the determination of the lender, and upon the lender’s written notice to the Agency at least 30 days prior to the expected date of prepayment. The Agency will not pay any lockout or prepayment penalty assessed by the lender. The lender must certify the following in the notice of prepayment:
(1) The lease documents used by the borrower or its agent prohibit the abrogation of tenant leases in the event of prepayment; and
(2) The borrower has notified tenants of the request to prepay the loan, including notice of the prohibition against abrogation of the lease and the policy and procedure for handling complaints regarding compliance with the long-term use restriction as contained in subpart H of this part.

§ 3565.209 Loan amortization.
Each guaranteed loan shall be made for a period of not less than 25 nor greater than 40 years from the date the loan was made and may provide for amortization of the loan over a period of not to exceed 40 years with a final payment of the balance due at the end of the loan term.

§ 3565.210 Maximum interest rate.
The interest rate for a guaranteed loan must not exceed the maximum allowable rate specified by the Agency in NOFA. Such rate must be fixed over the term of the loan.

§ 3565.211 Interest credit.
(a) Limitation. For at least 20 percent of the loans made during each fiscal year, the Agency will provide assistance in the form of interest credit, to the extent necessary to reduce the agreed-upon rate of interest to the AFR as such term is used in section 42(1)(2)(D) of the Internal Revenue Code of 1986, 26 U.S.C. 7805, § 1.42–1T.
(b) Selection criteria. The Agency will select projects to receive interest credits using any of such criteria as the Agency may establish for priority projects as contained in subpart A of this part.

§ 3565.212 Multiple guaranteed loans.
The Agency may guarantee more than one loan on any project if all guaranteed loans, in the aggregate, comply with these regulations, including without limitation:
(a) In the aggregate, loans do not exceed the maximum guaranteed loan amount and loan-to-value limits, as contained in §3565.204;
(b) In the aggregate, loans are all to be secured equally by a first lien as the Agency may, at its sole discretion, determine necessary to ensure repayment of the loans; and
(c) If different lenders originate the loans, each lender has executed an intercreditor agreement in form and substance acceptable to the Agency.

§ 3565.213 Geographic distribution.
The Agency may refuse to guarantee a loan in an area where there is undue risk due to a concentration in the market of properties subject to a Agency.
guaranteed loan. The Agency will consider the credit quality of the loan and overall market conditions in making a determination of undue risk. If any of the Agency guaranteed loans in the market are experiencing vacancy rates in excess of 15% and the vacancy is due to market conditions, the Agency will invoke this provision and not guarantee the loan.

§ 3565.214 [Reserved]

§ 3565.215 Special conditions.

(a) Use of third party funds. As a condition of receiving a guaranteed loan, the Agency, or the lender if designated by the Agency, must review the terms and conditions of any secondary financing or funding of projects, including loans, capital grants or rental assistance.

(b) Recourse. If required by the lender, loans guaranteed under this program may be made on a recourse or nonrecourse basis, or with any personal or special borrower guarantees on collateralization.

§§ 3565.216–3565.249 [Reserved]

§ 3565.250 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575–0174.

Subpart F—Property Requirements

§ 3565.251 Eligible property.

To be eligible for a guaranteed loan, a property must be used primarily for residential dwelling purposes and must meet the following requirements or the requirements of this subpart:

(a) Property location. All the property must be located in a rural area.

(b) Minimum size of development. The property must consist of at least five rental dwelling units.

(c) Non-contiguous sites. For a loan secured by two or more non-contiguous parcels of land, all sites must meet each of the following requirements:

(1) Located in one market area;

(2) Managed under one management plan with one loan agreement or resolution for all of the sites; and

(3) Consist of single asset ownership.

(d) Compliance with statutes. All properties must comply with the applicable requirements in section 504 of the Rehabilitation Act of 1973, the Fair Housing Act, the Americans with Disabilities Act, and other applicable statutes.

§ 3565.252 Housing types.

The property may include new construction or rehabilitation of existing structures. The units may be attached, detached, semi-detached, row houses, modular or manufactured houses, or multifamily structures. Manufactured housing must meet Agency requirements contained in 7 CFR part 1924, subpart A or a successor regulation. The Agency will guarantee proposals for new construction or acquisition with moderate or substantial rehabilitation of at least $6,500 per dwelling unit. The portion of guaranteed funds available for acquisition with rehabilitation may be limited in the annual Notice of Fund Availability.

(70 FR 2931, Jan. 19, 2005)

§ 3565.253 Form of ownership.

The property must be owned in fee simple or be subject to a ground lease or other legal right in land acceptable to the Agency.

§ 3565.254 Property standards.

(a) Housing quality and site and neighborhood standards. The property must meet the site and neighborhood requirements established by the state or locality, and those standards contained under 7 CFR part 1924, subparts A and C or any successor regulations.

(b) Third party assessments. As part of the application for a guaranteed loan, the lender must provide documentation of qualified third parties' assessments of the property’s physical condition and any environmental conditions or hazards which may have a bearing on the market value of the property. These assessments must include:

(1) An acceptable property appraisal.
(2) A Phase I Environmental Site Assessment (American Society of Testing and Materials).

(3) A Standard Flood Hazard Determination.

(4) In the case of the purchase of an existing structure, rehabilitation or refinancing, a physical needs assessment.

§ 3565.255 Environmental requirements.

Under the National Environmental Policy Act, the Agency is required to assess the potential impact of the proposed actions on protected environmental resources. Measures to avoid or at least mitigate adverse impacts to protected resources may require a change in site or project design. A site will not be approved until the Agency has completed the environmental review in accordance with 7 CFR part 1940, subpart G or successor regulation.

§ 3565.256 Architectural services.

Architectural services must be provided for the project in accordance with 7 CFR part 1924, subpart A or successor regulation, including plan certifications.

§ 3565.257 Procurement actions.

All construction procurement actions, whether by sealed bid or by negotiation, must be conducted in a manner that provides maximum open and free competition.

§§ 3565.258-3565.299 [Reserved]

§ 3565.300 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575-0174.

Subpart G—Processing Requirements

§ 3565.301 Loan standards.

An approved lender must originate and underwrite the loan and appraise the subject property in accordance with prudent lending practices and Agency criteria addressing the following factors:

(a) Borrower qualifications and creditworthiness;
(b) Property, vacancy, market vacancy or collection loss;
(c) Rental concessions and rent levels;
(d) Tenant demand and housing supply;
(e) Property operating and maintenance expense;
(f) Property requirements as contained in subpart F of this part;
(g) Debt coverage ratio;
(h) Operating and long-term capital requirements;
(i) Loan-to-value ratio;
(j) Return on borrower equity; and
(k) Estimated long-term marketability of the project.

§ 3565.302 Allowable fees.

(a) Lender fees. The lender is authorized to charge reasonable and necessary fees in connection with a borrower’s application for a guaranteed loan.

(b) Agency fees. The Agency will charge one or more types of fees deemed appropriate as reimbursement for reasonable and necessary costs incurred in connection with applications received from lenders for monitoring or annual renewal fees. These fees will be published in NOFA. Agency fees may include, but are not limited to the following:

(1) Site assessment and market analysis or preliminary feasibility fee. A fee for review of an application for a determination of preliminary feasibility.
(2) Application fee. A fee submitted in conjunction with the application for a loan guarantee.
(3) Inspection fee. A fee for inspection of the property in conjunction with a loan guarantee.
(4) Transfer fee. A fee in connection with a request for approval of a transfer of physical assets or a change in the composition of the ownership entity.
(5) Extension or reopening fees. A fee to extend the guarantee commitment or to reopen an application when a commitment has expired.

§ 3565.303 Issuance of loan guarantee.

(a) Preliminary feasibility review. During the initial processing of a loan, the
lender may request a preliminary feasibility review by the Agency when required loan documentation is submitted.

(b) **Conditional commitment to guarantee a loan.** The Agency will issue a conditional commitment to guarantee a loan. This commitment will be good for such time frame as the Agency deems appropriate based on project requirements. The commitment to guarantee a loan, will specify any conditions necessary to obtain a determination by the Agency that all program requirements have been met. A conditional commitment can be issued, subject to the availability of funds, after:

(1) Completion by the Agency of an environmental review in accordance with 7 CFR part 1940, subpart G or successor regulation, and the National Environmental Policy Act; and

(2) Selection of the proposed project for funding by the Agency in accordance with ranking and selection criteria.

(c) **Guarantee during construction.** When requesting a guarantee on construction loan advances under § 3565.52(c)(2) and (c)(3), Options 2 and 3, the Agency will only issue a guarantee to an approved lender that the Agency determines is eligible under § 3565.106 of this part.

(1) This guarantee will be subject to the limits contained in subpart B of this part and in the loan closing documentation.

(2) In all cases, the lender must obtain one of the following protections:

(i) Surety bonding or performance and payment bonding acceptable to the Agency; or

(ii) An irrevocable letter of credit acceptable to the Agency; or

(iii) A pledge to the lender of collateral that is acceptable to the Agency.

(3) The lender must verify amounts expended prior to each payment for completed work and certify that an independent inspector has inspected the property and found it to be in conformance with Agency standards. The lender must provide verification that all subcontractors have been paid and no liens have been filed against the property.

(d) **Permanent loan guarantee.** The guarantee of a permanent loan provided under § 3565.52(c)(1) or (c)(2) will be issued once the following items have been submitted to and approved by the Agency:

(1) Certification from the lender stating that the lender or its qualified representative inspected the property and found that the construction meets the Government’s requirements for the standards and conditions for housing and facilities in 7 CFR part 1924, subpart A and the standards for site development in 7 CFR part 1924, subpart C, or its successor regulations;

(2) Cash flow certification—the lender certifies, in writing, the project’s cash flow assumptions are still valid and depict compliance with the section 538 program’s debt service coverage ratio requirement of at least 1.15, based on the lender’s analysis of current market conditions and comparable properties in the project’s market area;

(3) Documentation that either:

(i) The project has attained a minimum level of acceptable occupancy of 90% for 90 continuous days within the 120-day period immediately preceding the issuance of the permanent guarantee, or

(ii) Additional funds, supplementing the funds required under § 3565.303(d), have been added to the lease-up reserve in an amount the Agency determines is necessary to cover projected shortfalls.

(4) A new appraisal based upon completion of construction. Upon a lender’s written request, the Agency may exempt a project from this requirement if requested by the lender and the project meets the following criteria:

(i) **Original appraisal**—the original appraisal that meets the Agency’s appraisal requirements with a valuation date no older than 36 months;

(ii) **Valuation**—the appraisal’s lowest valuation, regardless of valuation approach and rent restrictions considered, is greater than the section 538 guaranteed loan amount; and

(iii) **Guaranteed loan balance**—the Agency’s guaranteed loan’s principal balance does not exceed 50 percent unless a different percent has been announced in a Notice published in the Federal Register of the project’s total development costs.

(5) A certificate of substantial completion;
§ 3565.304 Lender loan processing responsibilities.

(a) Application. The lender will be responsible for submitting an application for a loan guarantee in a format prescribed by the Agency. Lenders may submit an application at the feasibility stage or when they request a conditional commitment.

(b) Project servicing, management and disposition. Unless otherwise permitted to

(6) A certificate of occupancy or similar evidence of local approval;

(7) A final inspection conducted by a qualified Agency representative;

(8) A final cost certification in a form acceptable to the Agency;

(9) A submission to the Agency of the complete closing docket;

(10) A certification by the lender that the project has reached an acceptable minimum level occupancy;

(11) An executed regulatory agreement;

(12) The Lender certifies that it has approved the borrower’s management plan and assures that the borrower is in compliance with Agency standards regarding property management contained in subparts E and F of this part;

(13) Necessary information to complete an updated necessary assistance review by the Agency under §3565.204(c); and

(14) Compliance with all conditions contained in the conditional commitment for guarantee.

(e) Modification of guarantee amount after commitment. The Agency may modify the guarantee amount or decline to issue a loan guarantee when a lender fails to honor obligations or to fulfill representations made under the guarantee commitment.

(f) Continuous Guarantee Compliance. The continuous guarantee will remain in effect once construction is completed. In order to remain in compliance with 7 CFR part 3565, the following items must be submitted to and approved by the Agency. These items will be submitted to the Agency by the date stated in the Conditional Commitment and any Agency approved extension(s).

(1) Certification from the lender stating that the lender or its qualified representative inspected the property and found that the construction meets the Government’s requirements for the standards and conditions for housing and facilities in 7 CFR part 1924, subpart A and the standards for site development in 7 CFR part 1924, subpart C, or its successor regulations;

(2) Cash flow certification—the lender certifies in writing the project’s cash flow assumptions are still valid and depict compliance with the section 538 program’s debt service coverage ratio requirement of at least 1.15, based on the lender’s analysis of current market conditions and comparable properties in the project’s market area;

(3) Documentation that either:

(i) The project has attained a minimum level of acceptable occupancy of 90% for 90 continuous days within the 120-day period immediately preceding the issuance of the permanent guarantee, or

(ii) Additional funds, supplementing the funds required under §3565.303(d), have been added to the lease-up reserve in an amount the Agency determines is necessary to cover projected shortfalls.

(4) An appraisal of the property;

(5) A certificate of substantial completion;

(6) A certificate of occupancy or similar evidence of local approval;

(7) A final inspection conducted by a qualified Agency representative;

(8) A final cost certification in a form acceptable to the Agency;

(9) A submission to the Agency of the complete closing docket;

(10) A certification by the lender that the project has reached an acceptable minimum level occupancy;

(11) An executed regulatory agreement;

(12) The Lender certifies that it has approved the borrower’s management plan and assures that the borrower is in compliance with Agency standards regarding property management contained in subparts E and F of this part;

(13) Necessary information to complete an updated necessary assistance review by the Agency under §3565.204(c); and

(14) Compliance with all conditions contained in the conditional commitment for guarantee.

§ 3565.351 Project management.

As a condition of the guarantee, the lender is to obtain borrower certification that the project is in compliance with local, state, federal laws and program requirements.

(a) Regulatory agreement. A regulatory agreement between the borrower and lender must be executed at the time of loan closing and contain the following covenants:

(1) That it is binding upon the borrower and any of its successors and assigns, as well as upon the lender and any of its successors and assigns, for the duration of the guaranteed loan;

(2) That the borrower makes all payments due under the note and to the required escrow and reserve accounts;

(3) That the borrower maintains the project as affordable housing in accordance with the purposes and for the duration defined in the statute;

(4) That the borrower maintains the property in good physical and financial condition at all times;

(5) That the borrower obtains and maintains property insurance and any other insurance coverage required to protect the security;

(6) That the borrower maintains complete project books and financial records, and provides the Agency and the lender with an annual audited financial statement after the end of each fiscal year;

(7) That the borrower makes project books and records available for review by the Office of Inspector General, Rural Development staff, General Accounting Office, and the Department of Justice, or their representatives or successors upon appropriate notification;

(8) That the borrower prepares and complies with the Affirmative Fair Housing Marketing Plan and all other Fair Housing requirements;

(9) That the borrower operates as a single asset ownership entity, unless otherwise approved by the Agency;

(10) That the borrower complies with applicable federal, state and local laws;

(11) That the borrower provides management satisfactory to the lender and to the Agency and complies with an approved management plan for the project.

(b) Management plan. The lender must approve the borrower’s management plan and assure that the borrower is in compliance with Agency standards regarding property management, including the requirements contained in subparts E and F of this part.

(c) Tenant protection and grievance procedures. Tenants in properties subject to a guaranteed loan are entitled to the grievance and appeal rights contained in 7 CFR part 3560, subpart D or successor regulation. The borrower must inform tenants in writing of these rights.

(d) Financial management—(1) Borrower reporting requirements. At a minimum, the lender must obtain, on an annual basis, an audited annual financial statement conducted in accordance with generally accepted government auditing standards.

Subpart H—Project Management
(2) Lender reporting requirements. The lender must review the financial reports to assure that the property is in sound fiscal condition and the borrower is in compliance with financial requirements. The lender must report findings to the Agency as follows:

(i) Annual reports. The lender must submit to the Agency a copy of the annual financial audit of the project and must report on the nature and status of any findings. To the extent that outstanding findings or issues remain, the lender must submit to the Agency a copy of a plan of action for any unresolved findings.

(ii) Monthly reports. The lender must submit monthly reports to the Agency on all loans that are either in default, delinquent, or not in compliance with program requirements. This report must provide information on the financial condition of each loan, the physical condition of the property, the amount of delinquency, any other non-compliance with program requirements and the proposed actions and timetable to resolve the delinquency, default or non-compliance.

(3) Reserve releases. The lender is responsible for approving or disapproving all borrower requests for release of funds from the reserve and escrow accounts. Security deposit accounts will not be considered a reserve or escrow account.

(4) Insurance requirements. At loan closing, the borrower will provide the lender with documentary evidence that Agency insurance requirements have been met. The borrower must maintain insurance in accordance with Agency requirements until the loan is repaid and the lender must be named as the insurance policy’s beneficiary. The lender must obtain insurance on the secured property if the borrower is unable or unwilling to do so and charge the cost as an advance.

(5) Distribution of surplus cash. Prior to the distribution of surplus cash to the owner, the lender must certify that the property is in good financial and physical condition and in compliance with the regulatory agreement. Such compliance includes payment of outstanding obligations, debt service, and required funding of reserve and escrow accounts.

(e) Physical maintenance. The lender must annually inspect the property to ensure that it is in compliance with state and local codes and program requirements. The lender must certify to the Agency that a property is in such compliance, or report to the Agency on any non-compliance items and proposed actions and timetable for resolution. Failure to provide responsive corrective action can result in reduction or cancellation of the guarantee by the Agency.

§ 3565.352 Preservation of affordable housing.

(a) Original purpose. During the period of the guarantee, owners are prohibited from using the housing or related facilities for any purpose other than an approved program purpose.

(b) Use restriction. For the original term of the guaranteed loan, the housing must remain available for occupancy by low and moderate income households, in accordance with subpart E of this part. This requirement will be included in a deed restriction or other instrument acceptable to the Agency. The restriction will apply unless the housing is acquired by foreclosure or an instrument in lieu of foreclosure, or the Agency waives the applicability of this requirement after determining that each of the following three circumstances exist.

(1) There is no longer a need for low- and moderate-income housing in the market area in which the housing is located; and

(2) Housing opportunities for low-income households and minorities will not be reduced as a result of the waiver; and

(3) Additional federal assistance will not be necessary as a result of the waiver.

§ 3565.353 Affirmative fair housing marketing.

As a condition of the guarantee, the lender must ensure that the lender and borrower are in compliance with the approved Affirmative Fair Housing
Marketing Plan. This plan must be reviewed annually by the lender to ensure that the borrower remains in compliance and to recommend modifications, as necessary.

§ 3565.354 Fair housing accommodations.

The lender must ensure that the borrower is in compliance with the applicable fair housing laws in the development of the property, the selection of applicants for housing, and ongoing management. See subpart A of this part.

§ 3565.355 Changes in ownership.

Any change in ownership, in whole or in part, must be approved by the lender and the Agency before such change takes effect.

§§ 3565.356–3565.399 [Reserved]

§ 3565.400 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575–0174.

Subpart I—Servicing Requirements

§ 3565.401 Servicing objectives.

The participating lender is responsible for servicing the guaranteed loan throughout the term of the loan or guarantee, whichever is less. In all cases, the lender remains responsible for liquidation of the property in accordance with the Loan Note Agreement, unless otherwise determined by the Agency. A lender-servicing plan must be designed and implemented to achieve the following objectives.

(a) To preserve the value of the loan and the real estate;
(b) To avoid a loss to the lender or the Agency and to limit exposure to potential loss;
(c) To protect the interests of the tenants; and
(d) To further program objectives.

§ 3565.402 Servicing responsibilities.

The lender must service the loan in accordance with this subpart and perform the services contained in this section in a reasonable and prudent manner. The lender is responsible for the actions of its agents and representatives.

(a) Funds management. The lender must have a funds management system to receive and process borrower payments, including the following.

1. All principal and interest (P&I) funds and guarantee fees collected and deposited into the appropriate custodial accounts.
2. Payments to custodial escrow accounts for taxes and insurance premiums, assessments that might impair the security (such as ground rent), and reserve accounts for repair and capital improvement of the property.

(b) Asset management. The lender must ensure that the property securing the guaranteed loan remains in good physical and financial condition, in accordance with project management requirements contained in subpart H of this part.

(c) Management of delinquencies and defaults. Each month the lender must report to the Agency any delinquencies and defaults in accordance with subpart H of this part.

§ 3565.403 Special servicing.

Special servicing must be initiated when regular servicing actions are insufficient to resolve borrower default or property deficiencies.

(a) Repurchase from Holder. For securitized loans, the Holder may require the lender or Government to repurchase the security in accordance with the provisions of §3565.405.

(b) Responsibility of lender. It is the lender’s responsibility during special servicing to make a special effort to ensure that maintenance of the property meets Agency requirements and the tenants’ rights are protected, until such time that the property is liquidated by the lender, the loan is paid in full, or the loan is assigned to the Agency. The lender must update the Agency monthly until the default is cured or a claim is filed. The lender must maintain adequate records of any and all efforts to cure the default or to foreclose.
(c) Initiating special servicing. When special servicing is initiated, the lender must submit for Agency review a special servicing plan that includes proposed actions to cure the deficiencies and a timeframe for completion. The special servicing plan will specify the proposed terms of any workout agreement recommended by the lender. The lender must obtain Agency approval of the terms of any workout agreement with the borrower. The workout agreement may include a loan modification, transfer of physical assets, or partial payment of claim and reamortization of the loan. Failure to comply with terms contained in the executed workout agreement will be considered a default of the guaranteed loan.

(1) Loan modification. The borrower and lender may agree to a loan modification when such action will improve the financial viability of the project and its operations, and when a circumstance exists that is beyond the borrower’s control. The Agency must approve in advance any loan modification that extends the life of the loan or requires an increase in the amount of the guarantee. All changes must be within the requirements of section 538 of the Housing Act of 1949.

(2) Change in ownership and transfer of physical assets. A default or delinquency may be resolved by a change of the ownership entity in whole or in part. The Agency must approve all changes in ownership prior to the effective date of the transfer, and may require additional resources from the lender or borrower to resolve project deficiencies.

(3) Partial payment of claims. The lender may request a partial payment of claim as a result of a loss experienced by the lender as a means to work out a troubled loan. The Agency will accept such claim if it determines that it is in the best interest of the government. In applying the partial payment, the lender must assign the obligation covered by the partial payment to the Agency, and, if required by the Agency, reamortize the obligation using the amount of the remaining obligation over an agreed-upon term.

(d) Claims processing. In the event of a loss, the lender must submit claims under the guarantee in accordance with subpart J of this part. Prior to submitting a claim, the lender must exhaust all possibilities of collection on the loan.

(e) Displacement prevention. The actions of the lender must not harm the property’s tenants through displacement.

§ 3565.404 Transfer of loans or mortgage servicing.

Transfer of servicing is prohibited unless the Agency determines that circumstances warrant such action, the proposed lender is an eligible lender approved by the Agency, and the transfer of servicing is approved by the Agency in advance.

§ 3565.405 Repurchase of guaranteed loans.

(a) Repurchase by lender. The Holder may make written demand on the lender to repurchase the unpaid guaranteed portion of the loan when the borrower is in default not less than 60 calendar days on principal or interest due on the loan; or the lender has failed to remit to the Holder its pro rata share of any payment made by the borrower within 30 calendar days of receipt by the lender. The Holder must concurrently send a copy of the demand letter to the Agency. The lender will notify the Holder and the Agency of its decision to repurchase within 10 business days from the date of the written demand letter by the Holder. The lender may agree to repurchase the unpaid portion of the entire loan from the Holder, even though the guarantee does not cover any unguaranteed portion of the loan or the note interest to the Holder on the guaranteed loan accruing after 90 calendar days from the date of the Holder’s demand letter requesting the repurchase. The guarantee does not cover any unguaranteed portion of the loan or the note interest to the Holder on the guaranteed loan accruing after 90 calendar days from the date of the Holder’s demand letter to the lender requesting the repurchase. The lender may deduct the lender’s servicing fee
from the repurchase amount. The lender will accept an assignment without recourse from the Holder upon repurchase. The lender is encouraged to repurchase the loan to facilitate the accounting of funds, resolve problems, and to prevent default where and when reasonable.

(b) Repurchase by Agency. (1) If the lender does not repurchase the loan as provided in paragraph (a) of this section, the Agency will purchase from the Holder the unpaid principal balance of the guaranteed portion together with accrued interest to date of repurchase, less the lender’s servicing fee, within 30 calendar days after written demand to the Agency from the Holder. The guarantee will not cover the note interest to the Holder on the guaranteed loan accruing after 90 calendar days from the date of the original demand letter of the Holder to the lender requesting the repurchase. Holders of Loan Note Guarantees that have been issued prior to the effective date of this final rule may opt to adhere to the terms and conditions of the Loan Note Guarantee then in effect. In case of loan default, the Holder of a Loan Note Guarantee issued prior to the effective date of this final rule will stipulate, in a written demand for repurchase, its preference for repurchase in accordance with the Loan Note Guarantee issued prior to the effective date of this final rule. If the demand for repurchase does not stipulate a preference for repurchase in accordance with the Loan Note Guarantee issued prior to the effective date of this final rule, the Agency will process the demand for repurchase as stated in this final rule. The Holder must stipulate a preference for repurchase changing the preference stipulated in the original demand for repurchase.

(2) The Holder’s demand to the Agency must include a copy of the written demand made to the lender. The Holder must also include evidence of its right to require payment from the Agency. Such evidence will consist of either the original of the Loan Note Guarantee properly endorsed to the Agency or the original of an Agency approved assignment guarantee agreement, properly assigned to the Agency without recourse including all rights, title, and interest in the loan. The Holder must include in its demand the amount due including unpaid principal, unpaid interest to date of demand, and interest subsequently accruing from date of demand to proposed payment date. The Agency will be subrogated to all rights of the Holder.

(3) The Agency will notify the lender of its receipt of the Holder’s demand for payment. The lender must provide the Agency with the information necessary for the Agency to determine the appropriate amount due the Holder within 10 business days from the date of the written demand letter to the lender from the Holder requesting repurchase of the guaranteed portion. The lender will furnish a current statement certified by an appropriate authorized officer of the lender stating the unpaid principal and interest then owed by the borrower on the loan and the amount then owed to any Holder. Any discrepancy between the amount claimed by the Holder and the information submitted by the lender must be resolved between the lender and the Holder before payment will be approved. The Agency will coordinate the resolution of the discrepancy. Such conflict will suspend the running of the 30 calendar day payment requirement.

(4) Purchase by the Agency does not change, alter, or modify any of the lender’s obligations to the Agency arising from the loan or guarantee nor does it waive any of the Agency’s rights against the lender. As Holder, the Agency will have the right to set-off any payments the Agency owes the lender.

[70 FR 2931, Jan. 19, 2005]

§§ 3565.406–3565.449 [Reserved]

§ 3565.450 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control
Subpart J—Assignment, Conveyance, and Claims

§ 3565.451 Preclaim requirements.

(a) Lender certifications. After borrower default and before filing a claim or assignment of the loan to the Agency, the lender must make every reasonable and prudent effort to resolve the default. The lender must provide the Agency with an accounting of all proposed and actual actions taken to cure the default. The lender must certify that all reasonable efforts to cure the default have been exhausted. Where the lender fails to comply with the terms of the loan guarantee agreement and the corresponding regulations and guidance with regard to liquidating the property, the Agency, at its option, may take possession of the security collateral and dispose of the property.

(b) Due diligence by lender. For all loan servicing actions where a market, net recovery or liquidation value determination is required, guaranteed lenders shall perform due diligence in conjunction with the appraisal and submit it to the Agency for review. The Phase I Environmental Site Assessment published by the American Society of Testing and Materials is considered an acceptable format for due diligence.

(c) Environmental review. The Agency is required to complete an environmental review under the National Environmental Policy Act, in accordance with 7 CFR part 1940, subpart G or a successor regulation, prior to disposition of inventory property, if title is held by the Agency, and prior to any authorization to the guaranteed lender to foreclose and dispose of property, and for any other servicing action requiring Agency approval or consent.

§ 3565.452 Decision to liquidate.

(a) A decision to liquidate shall be made when it is determined that the default cannot be cured through actions contained in § 3565.403 or it has been determined that it is in the best interest of the Agency and the lender to liquidate. For interest accrual purposes, interest will accrue for 90 calendar days after the date the liquidation plan is approved by the Agency. If within 20 calendar days of the Agency’s receipt of the liquidation plan, the Agency fails to respond to the lender’s proposal or advise the lender to make revisions to the plan that was submitted, the liquidation plan will be approved by default, and the 90 calendar day period for interest accrual will commence.

(b) In the event of a default involving a loan to an Indian tribe or tribal corporation made under this section which is secured by an interest in land within such tribe’s reservation (as determined by the Secretary of the Interior), including a community in Alaska incorporated by the Secretary of the Interior pursuant to the Indian Reorganization Act (25 U.S.C. 461 et seq.), the lender shall only pursue liquidation after offering to transfer the account to an eligible tribal member, the tribe, or the Indian housing authority serving the tribe. If the lender subsequently proceeds to liquidate the account, the lender shall not sell, transfer, or otherwise dispose of or alienate the property except to one of the entities described in the preceding sentence.

[67 FR 16971, Apr. 9, 2002, as amended at 70 FR 2932, Jan. 19, 2005]

§ 3565.453 Disposition of the property.

(a) Submission of the liquidation plan. The lender will, within 30 calendar days after a decision to liquidate, submit to the Agency in writing, its proposed detailed plan of liquidation. The Agency will inform the lender, in writing, whether the Agency concurs in the lender’s liquidation plan. Should the Agency and the lender not agree on the liquidation plan, negotiations will take place between the Agency and the lender to resolve the disagreement. When the liquidation plan is approved by the Agency, the lender will proceed expeditiously with liquidation. The liquidation plan submitted to the Agency by the lender shall include:

(1) Satisfactory proof of the lender’s ownership of the guaranteed loan promissory note and related security instruments.

(2) A copy of the payment ledger or equivalent which reflects the current

7 CFR Ch. XXXV (1–1–14 Edition)
loan balance and accrued interest to date and the method of computing the interest.

(3) A full and complete list of all collateral including any personal and corporate guarantees.

(4) The recommended liquidation methods for making the maximum collection possible on the indebtedness and the justification for such methods, including recommended actions for:
   (i) Obtaining an appraisal of the collateral;
   (ii) Acquiring and disposing of all collateral;
   (iii) Collecting from guarantors;
   (iv) Setting the proposed date of foreclosure; and
   (v) Setting the proposed date of liquidation.

(5) Necessary steps for protection of the tenants and preservation of the collateral.

(6) Copies of the borrower’s latest available financial statements.

(7) Copies of the guarantor’s latest available financial statements.

(8) An itemized list of estimated liquidation expenses expected to be incurred along with justification for each expense.

(9) A schedule to periodically report to the Agency on the progress of liquidation.

(10) Estimated protective advance amounts with justification.

(11) Proposed protective bid amounts on collateral to be sold at auction and a breakdown to show how the amounts were determined.

(12) If a voluntary conveyance is considered, the proposed amount to be credited to the guaranteed debt.

(13) Any legal opinions supporting the decision to liquidate.

(14) The lender will obtain a complete appraisal report on all collateral securing the loan, which will reflect the fair market value and potential liquidation value, and an examination of the title on the collateral. In order to formulate a liquidation plan, which maximizes recovery, collateral must be evaluated for hazardous substances, petroleum products, or other environmental hazards, which may adversely impact the market value of the collateral.

(15) A transfer and assumption of the borrower’s operation can be accomplished before or after the loan goes into liquidation. However, if the collateral has been purchased through foreclosure or the borrower has conveyed title to the lender, no transfer and assumption is permitted.

(c) A protective bid may be made by the lender, with prior Agency written approval, at a foreclosure sale to protect the lender’s and the Agency’s interest. The protective bid will not exceed the amount of the loan, including expenses of foreclosure, and should be based on the liquidation value considering estimated expenses for holding and reselling the property. These expenses include, but are not limited to, expenses for resale, interest accrual, length of weatherization, and prior liens.

(d) Filing an estimated loss claim. When the lender is conducting the liquidation and owns any or all of the guaranteed portion of the loan, the lender will file an estimated loss claim with the liquidation plan if the lender expects liquidation to exceed 90 calendar days. The estimated loss payment will be based on the outstanding loan amount minus the liquidation value of the collateral. For the purpose of reporting and loss claim computation, the loss claim will be promptly processed in accordance with applicable Agency regulations, as set forth in this section. The loss claim calculation will include 90 calendar days of interest accrual on the defaulted loan at the time the estimated loss claim is paid by the Agency. If the lender estimates that there will be no loss after considering the costs of liquidation, the lender submits an estimated loss claim of zero. Interest accrual will cease 90 calendar days after the date the liquidation plan is approved by the Agency.

(e) Property disposition. Once the liquidation plan has Agency approval, the lender must make every effort to liquidate the property in a manner that will yield the highest market value consistent with the protections afforded to tenants in 7 CFR part 1944, subpart L or successor regulation.

(f) Accounting and reports. When the lender conducts liquidation, the lender will account for funds during the period of liquidation and provide the Agency with reports at least quarterly.
on the progress of liquidation, including disposition of collateral, resulting costs, and additional procedures necessary for successful completion of the liquidation.

(g) Transmitting payments and proceeds to the Agency. When the Agency is the Holder of a portion of the guaranteed loan, the lender will transmit to the Agency its pro rata share of any payments received from the borrower, liquidation, or elsewhere.

[70 FR 2932, Jan. 19, 2005]

§ 3565.454 [Reserved]

§ 3565.455 Alternative disposition methods.

The Agency, in its sole discretion, may choose to obtain an assignment of the loan from the lender or conveyance of title obtained by the lender through foreclosure or a deed-in-lieu of foreclosure.

(a) Assignment. In the case of an assignment of the loan, the assignment of the security instruments or the security must be in written and recordable form. Completion of the assignment will occur once the following transactions are completed to the Agency’s satisfaction.

(i) Conveyance to the Agency of all the lender’s rights and interests arising under the loan.

(ii) Assignment to the Agency of all claims against the borrower or others arising out of the loan transactions, including:

(A) All collateral agreements affecting financing, construction, use or operation of the property; and

(B) All insurance or surety bonds, or other guarantees, and all claims under them.

(iii) Certification that the collateral has been evaluated for the presence of contamination from the release of hazardous substances, petroleum products or other environmental hazards which may adversely impact the market value of the property and the results of that evaluation.

(b) Conveyance of title. In the case of a conveyance of title to the property, the lender must inform the Agency in advance of how it plans to acquire title and a timetable for doing so. The Agency will accept the conveyance upon receipt of an assignment to the Agency of all claims of the lender against the property and assignment of the lender’s rights to any operating funds and any reserves or escrows established for the maintenance of the property or the payment of property taxes and insurance.

§ 3565.456 Filing a claim.

Once the lender has disposed of the property or the Agency has agreed to accept an assignment of the loan or conveyance of title to the property, the lender may file a claim for the guaranteed portion of allowable losses. All claim amounts must be calculated in accordance with this subpart and be approved by the Agency.

§ 3565.457 Determination of claim amount.

In all liquidation cases, final settlement will be made with the lender after the collateral is liquidated, unless otherwise designated as a future recovery or after settlement and compromise of all parties has been completed.

(a) Report of loss form. An Agency approved form will be used for calculations of all estimated and final loss determinations. Estimated loss payments will only be paid by the Agency after it has approved a liquidation plan.

(b) Estimated loss. An estimated loss claim based on liquidation appraisal value will be prepared and submitted by the lender.

(i) The estimated loss payment shall be applied as of the date of such payment. The total amount of the loss payment paid by the Agency will be applied by the lender on the loan debt. Such application does not release the borrower from liability.

(ii) The Government’s written authorization is required for all protective advances in excess of $5,000. Protective advances include, but are not limited to, advances made for property taxes, annual assessments, ground rent, hazard or flood insurance premiums affecting the collateral, and other expenses necessary to preserve or protect the security. Attorney fees are not a protective advance. A protective advance claim will be paid only at the time of the final report of loss payment except...
in certain transfer and assumption situations with Agency approval.

(c) Final loss. Within 30 calendar days after liquidation of all collateral, except for certain unsecured personal or corporate guarantees (as provided for in this section) is completed, a final report of loss on a form approved by the Agency must be prepared and submitted by the lender to the Agency. Before approval by the Agency of any final loss report, the lender must account for all funds during the period of liquidation, disposition of the collateral, all costs incurred, and any other information necessary for the successful completion of liquidation. Upon receipt of the final accounting and report of loss, the Agency may audit all applicable documentation to determine the final loss. The lender will make its records available and otherwise assist the Agency in making any investigation. The documentation accompanying the report of loss must support the amounts shown on the report of loss form.

(1) A determination must be made regarding the collectability of unsecured personal and corporate guarantees. If reasonably possible, such guarantees should be promptly collected prior to completion of the final loss report. However, in the event that collection from the guarantors appears unlikely or will require a prolonged period of time, the report of loss will be filed when all other collateral has been liquidated, and unsecured personal or corporate guarantees will be treated as a future recovery with the net proceeds to be shared on a pro rata basis by the lender and the Agency.

(2) The lender must document that all of the collateral has been accounted for and properly liquidated and that liquidation proceeds have been properly accounted for and applied correctly to the loan.

(3) The lender will show a breakdown of any protective advance amount as to the payee, purpose of the expenditure, date paid, and evidence that the amount expended was proper and that payment was actually made. Liquidation expenses are recoverable only from collateral proceeds.

(5) Accrued interest will be supported by documentation as to how the amount was accrued.

(6) Loss payments will be paid by the Agency within 60 calendar days after the receipt of the final loss report and accounting of the collateral.

(7) Should there be a circumstance where the lender cannot or will not sign a final report of loss, the State Director may complete the final report of loss and submit it to the Finance Office without the lender’s signature. Before this action can be taken, all collateral must be disposed of or accounted for; there must be no evidence of fraud, misrepresentation, or negligent servicing by the lender; and all efforts to obtain the cooperation of the lender must have been exhausted and documented.

(d) Maximum guarantee payment. The maximum guarantee payment will not exceed the amount of guarantee percentage as contained in the guarantee agreement (but in no event more than 90%) times the allowable loss amount.

(e) Rent. Any net rental or other income that has been received by the lender from the collateral will be applied on the guaranteed loan debt after paying operating expenses of the property.

(f) Liquidation costs. Liquidation costs will be deducted from the proceeds of the disposition of primary collateral. If changed circumstances after submission of the liquidation plan require a substantial revision of liquidation costs, the lender will procure the Agency’s written concurrence prior to proceeding with the proposed changes.

(g) Payment. When the Agency finds the final report of loss to be proper in all respects, it will approve the form and proceed as follows:

(1) If the loss is greater than any estimated loss payment, the Agency will pay the additional amount owed by the Agency to the lender.

(2) If the loss is less than the estimated loss payment, the lender will reimburse the Agency for the overpayment.
(3) If the Agency determines that it is in the Government’s best interest to take assignment of the loan and conduct liquidation, as stipulated in 42 U.S.C. 1490(1)(3), Assignment by Secretary, the Agency will pay the lender in accordance with the Loan Note Guarantee.

(h) Date of loss. The date of loss is the date on which the collateral will be liquidated in the liquidation plan, unless an alternative date is approved by the Agency. Where the Agency chooses to accept an assignment of the loan or conveyance of title, the date of loss will be the date on which the Agency accepts assignment of the loan or conveyance of title.

(i) Allowable claim amount. The allowable claim amount must be calculated by:

(1) Adding to the unpaid principal and interest on the date of loss, an amount approved by the Agency for payments made by the lender for amounts due and owning on the property, including:

(ii) Property taxes and other protective advances as approved by the Agency;

(iii) Water and sewer charges and other special assessments that are liens prior to the guaranteed loan;

(iv) Insurance of the property; and

(v) Reasonable liquidation expenses.

(2) And by deducting the following items:

(i) Any amount received by the lender on the account of the guaranteed loan after the date of default;

(ii) Any net income received by the lender from the secured property after the date of default; and

(iii) Any cash items retained by the lender, except any amount representing a balance of the guaranteed loan not advanced to the borrower. Any loan amount not advanced will be applied by the lender to reduce the outstanding principal on the loan.

(j) Lender certification. The lender must certify that all possibilities of collection have been exhausted and that all of the items specified in paragraph (c) of this section have been identified and reported to the Agency as a condition for payment of claim.

§ 3565.458 Withdrawal of claim.

If the lender provides timely written notice to the Agency of withdrawal of the claim, the guarantee will continue as if the default had not occurred if the borrower cures the default prior to foreclosure or prior to acceptance of a deed-in-lieu of foreclosure.

§§ 3565.459–3565.499 [Reserved]

§ 3565.500 OMB control number.

According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575–0174.

Subpart K—Agency Guaranteed Loans That Back Ginnie Mae Guaranteed Securities

SOURCE: 70 FR 2934, Jan. 19, 2005, unless otherwise noted.

§ 3565.501 Applicability.

The provisions of this subpart apply when Agency guaranteed loans are used to back Ginnie Mae securities. In instances where this subpart applies, the provisions of this subpart prevail over any other provisions of this part.

§ 3565.502 Incontestability.

In the case of loans that back Ginnie Mae securities or loans that are acquired by Ginnie Mae as a consequence of its guaranty, the Agency guarantee under this part is incontestable except that the guarantee may not be enforced by a lender who commits fraud or misrepresentation or by a lender who had knowledge of the fraud or misrepresentation at the time such a lender acquired the guarantee or was assigned the loan.

§ 3565.503 Repurchase.

Lenders and security Holders must comply with Ginnie Mae requirements regarding the repurchase of loans from pools backing Ginnie Mae guaranteed securities.
§ 3565.504 Transfers.
(a) Loans and/or mortgage servicing on loans backing Ginnie Mae guaranteed securities may only be transferred to a Ginnie Mae issuer and may only be transferred with prior Ginnie Mae approval.
(b) Agency approval shall not be required for transfer of the servicing on the guaranteed mortgages to Ginnie Mae.

§ 3565.505 Liability.
(a) Ginnie Mae shall not be liable for the actions of the lender including, but not limited to, negligence, fraud, abuse, misrepresentation or misuse of funds, property condition, or violations of usury laws.
(b) Ginnie Mae’s rights under the guarantee shall be fully enforceable notwithstanding the actions of the lender.

§§ 3565.506–3565.549 [Reserved]

§ 3565.550 OMB control number.
According to the Paperwork Reduction Act of 1995, no party is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0575–0174.

Subpart A [Reserved]

Subpart B—Community Facilities Grant Program

SOURCE: 64 FR 32388, June 17, 1999, unless otherwise noted.

§ 3570.51 General.
(a) This subpart contains Rural Housing Service (RHS) policies and authorizations and establishes procedures for making essential Community Facilities Grants (CFG) authorized under section 306(a)(19) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(19)).
(b) Funds allocated for use in accordance with this subpart are also to be considered for use by federally recognized Indian tribes within a State regardless of whether State development strategies include Indian reservations within the State’s boundaries. Indian tribes must have equal opportunity along with other rural residents to participate in the benefits of this program.
(c) Federal statutes provide for extending RHS financial assistance without regard to race, color, religion, sex, national origin, age, disability, and marital or familial status. To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington DC 20250, or call 1-
§ 3570.52 Purpose.

The purpose of CFG program is to assist in the development of essential community facilities in rural areas. The Agency will authorize grant funds on a graduated basis. Eligible applicants located in smaller communities with lower populations and lower median household incomes may receive a higher percentage of grant funds. The amount of CFG funds provided for a facility shall not exceed 75 percent of the cost of developing the facility.

§ 3570.53 Definitions.

Agency. The Rural Housing Service (RHS), an agency of the U.S. Department of Agriculture, or a successor agency.

Approval official. An official who has been delegated loan or grant approval authorities within applicable programs, subject to certain dollar limitations.

CFG. Community Facilities. CFG. Community Facilities Grant.

Essential community facilities. Those public improvements requisite to the beneficial and orderly development of a community that is operated on a nonprofit basis. (See § 3570.62(a)(1)). An essential community facility must:

(1) Serve a function customarily provided by a local unit of government;

(2) Be a public improvement needed for the orderly development of a rural community;

(3) Not include private affairs or commercial or business undertakings (except for limited authority for industrial parks) unless it is a minor part of the total facility;

(4) Be within the area of jurisdiction or operation for the public bodies eligible to receive assistance or a similar local rural service area of a not-for-profit corporation; and

(5) Be located in a rural area.

Facility. The physical structure financed by the Agency or the resulting service provided to rural residents.

Grantee. An entity with whom the Agency has entered into a grant agreement under this program.
Instructions. Agency internal procedures available in any Rural Development office and variously referred to as Rural Development Instructions, RD Instructions.

Minor part. No more than 15 percent of the total floor space of the proposed facility.

Nonprofit corporations. Any corporation that is not organized or maintained for the making of a profit and that meets the eligibility requirements for RHS financial assistance in accordance with §3570.61(a)(2).

Processing office. The office designated by the State program official to accept and process applications for CF projects.

Project cost. The cost of completing the proposed facility. (Facilities previously constructed will not be considered in determining project costs.) Total project cost will include only those costs eligible for CFG assistance.

Poverty line. The level of income for a family of four as defined by section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)).

Public body. Any State, county, city, township, incorporated town or village, borough, authority, district, economic development authority, or federally recognized Indian tribe in rural areas.

Reasonable rates and terms. The rates and terms customarily charged public and nonprofit type borrowers in similar circumstances in the ordinary course of business and subject to Agency review.

RHS. The Rural Housing Service, an agency of the United States Department of Agriculture, or a successor agency.

Rural and rural area. For fiscal year 1999, the terms “rural” and “rural area” include a city or town with a population of 20,000 or less inhabitants according to the latest decennial census of the United States. There is no limitation placed on population in open rural areas. After fiscal year 1999, the terms “rural” and “rural area” include a city, town, or unincorporated area that has a population of 50,000 inhabitants or less, other than an urbanized area immediately adjacent to a city, town, or unincorporated area that has a population in excess of 50,000 inhabitants.

Rural Development. A mission area within USDA which includes Rural Housing Service, Rural Utilities Service, and Rural Business-Cooperative Service.

RUS. The Rural Utilities Service, an agency of USDA or a successor agency.

Service area. The area reasonably expected to be served by the facility.

State. The term “State” means each of the 50 States, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, the Marshall Islands, the Republic of Palau, and the Federated States of Micronesia.

State Director. The term “State Director” means, with respect to a State, the Director of the Rural Development State Office.

State nonmetropolitan median household income. The median household income of the State’s nonmetropolitan counties and portions of metropolitan counties outside of cities, towns or places of 50,000 or more population.

State strategic plan. A plan developed by each State for Rural Development initiatives and the type of assistance required. Plans shall identify goals, methods, and benchmarks for measuring success.

§§ 3570.54–3570.60 [Reserved]

§ 3570.61 Eligibility for grant assistance

The essential community facility must primarily serve rural areas, be located in a rural area, and the median household income of the population to be served by the proposed facility must be below the higher of the poverty line or the eligible percentage (60, 70, 80, or 90) of the State nonmetropolitan median household income (see §3570.63(b)).

(a) Eligible applicant. An applicant must be: (1) Public body, such as a municipality, county, district, authority, or other political subdivision of a State; (2) Nonprofit corporation or association. Applicants, other than nonprofit utility applicants, must have significant ties with the local rural community. Such ties are necessary to ensure...
to the greatest extent possible that a facility under private control will carry out a public purpose and continue to primarily serve rural areas. Ties may be evidenced by items such as:

(i) Association with, or controlled by, a local public body or bodies, or broadly based ownership and control by members of the community; or

(ii) Substantial public funding through taxes, revenue bonds, or other local government sources or substantial voluntary community funding, such as would be obtained through a community-wide funding campaign.

(3) Federally recognized Indian tribe in a rural area.

(b) Eligible facilities. Essential community facilities must be:

(1) Located in rural areas, except for utility-type services, such as telecommunications or hydroelectric, serving both rural and non-rural areas. In such cases, RHS funds may be used to finance only that portion serving rural areas, regardless of facility location.

(2) Necessary for orderly community development and consistent with the State Strategic Plan.

(c) Credit elsewhere. The approval official must determine that the applicant is unable to finance the proposed project from its own resources, or through commercial credit at reasonable rates and terms, or other funding sources without grant assistance under this subpart. The applicant must certify to such status in writing.

(d) Economic feasibility. All projects financed under the provisions of this section must be based on satisfactory sources of revenues as outlined in 7 CFR 1942.17(h) and 1942.116. The amount of CFG assistance must be the minimum amount sufficient for feasibility which will provide for facility operation and maintenance, reasonable reserves, and debt repayment. The applicant’s available excess funds must be used to supplement eligible project costs.

(e) Legal authority and responsibility. Each applicant must have, or will obtain, prior to the grant award, the legal authority necessary to own, construct, operate, and maintain the proposed facility. The applicant shall be responsible for operating, maintaining, and managing the facility and providing for its continued availability and use at reasonable rates and terms. This responsibility shall be the applicant’s even though the facility may be operated, maintained, or managed by a third party under contract or management agreement. If an applicant does not have the authority to borrow funds, but owns, operates, and maintains the facility, the applicant is eligible for CFG funds.

(i) Facilities for public use. All facilities shall be for the benefit of the public at large without discrimination as to race, color, religion, sex, national origin, disability, and marital or familial status.

§ 3570.62 Use of grant funds.

Grants of up to 75 percent of the cost of developing essential community facilities may be used to supplement financial assistance authorized in accordance with 7 CFR parts 1942, subparts A and C, and 3575, subpart A. Eligible CFG purposes are those listed in paragraphs (a), (b), (c), and (d) of this section. Funding for the balance of the project may consist of other CF financial assistance, applicant contributions, or loans and grants from other sources. CFGs may be used to:

(a) Construct, enlarge, extend, or otherwise improve essential community facilities providing essential service primarily to rural residents and rural businesses. Rural businesses include facilities such as educational and other publicly owned facilities.

(b) Reduce or eliminate discrimination in the operation of essential community facilities and to make them accessible to all segments of the public.

(c) Facilitate the effective operation of essential community facilities.

(d) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(e) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(f) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(g) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(h) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(i) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(j) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(k) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(l) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(m) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(n) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(o) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(p) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(q) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(r) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(s) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(t) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(u) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(v) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(w) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(x) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(y) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.

(z) Reimburse essential community facilities for losses due to fire, disaster, or any other emergency.
(vii) Supplemental and supporting structures for other rural electrification or telephone systems (including facilities such as headquarters and office buildings, storage facilities, and maintenance shops) when not eligible for RUS financing;

(viii) Natural gas distribution systems; and

(ix) Industrial park sites, but only to the extent of land acquisition and necessary site preparation, including access ways and utility extensions to and throughout the site. Funds may not be used in connection with industrial parks to finance on-site utility systems, or business and industrial buildings.

(2) “Otherwise improve” includes, but is not limited to, the following:

(i) The purchase of major equipment (such as solid waste collection trucks, telecommunication equipment, necessary maintenance equipment, fire service equipment, X-ray machines) which will in themselves provide an essential service to rural residents; and

(ii) The purchase of existing facilities when it is necessary either to improve or to prevent a loss of service.

(b) Construct or relocate public buildings, roads, bridges, fences, or utilities and to make other public improvements necessary to the successful operation or protection of facilities authorized in paragraph (a) of this section.

(c) Relocate private buildings, roads, bridges, fences, or utilities, and other private improvements necessary to the successful operation or protection of facilities authorized in paragraph (a) of this section.

(d) Pay the following expenses, but only when such expenses are a necessary part of a project to finance facilities authorized in paragraphs (a), (b), and (c) of this section:

(1) Reasonable fees and costs such as legal, engineering, architectural, fiscal advisory, recording, environmental impact analyses, archeological surveys and possible salvage or other mitigation measures, planning, establishing or acquiring rights.

(2) Costs of acquiring interest in land; rights, such as water rights, leases, permits, and rights-of-way; and other evidence of land or water control necessary for development of the facility.

(3) Purchasing or renting equipment necessary to install, maintain, extend, protect, operate, or utilize facilities.

(4) Obligations for construction incurred before grant approval. Construction work should not be started and obligations for such work or materials should not be incurred before the grant is approved. However, if there are compelling reasons for proceeding with construction before grant approval, applicants may request Agency approval to pay such obligations. Such requests may be approved if the Agency determines that:

(i) Compelling reasons exist for incurring obligations before grant approval;

(ii) The obligations will be incurred for authorized grant purposes;

(iii) Contract documents have been approved by the Agency;

(iv) All environmental requirements applicable to the Agency and the applicant have been met; and

(v) The applicant has the legal authority to incur the obligations at the time proposed, and payment of the debts will remove any basis for any mechanic’s, material, or other liens that may attach to the security property.

The Agency may authorize payment of such obligations at the time of grant closing. The Agency’s authorization to pay such obligations, however, is on the condition that it is not committed to make the grant; it assumes no responsibility for any obligations incurred by the applicant; and the applicant must subsequently meet all grant approval requirements. The applicant’s request and the Agency’s authorization for paying such obligations shall be in writing.

§ 3570.63 Grant limitations.

(a) Grant funds may not be used to:

(1) Pay initial operating expenses or annual recurring costs, including purchases or rentals that are generally considered to be operating and maintenance expenses (unless a CF loan is part of the funding package);

(2) Construct or repair electric generating plants, electric transmission lines, or gas distribution lines to provide services for commercial sale;
§ 3570.64

(3) Refinance existing indebtedness;
(4) Pay interest;
(5) Pay for facilities located in nonrural areas, except as noted in § 3570.61(b)(1).
(6) Pay any costs of a project when the median household income of the population to be served by the proposed facility is above the higher of the poverty line or eligible percent (60, 70, 80, or 90) of the State nonmetropolitan median household income (see § 3570.63(b));
(7) Pay project costs when other loan funding for the project is not at reasonable rates and terms;
(8) Pay an amount greater than 75 percent of the cost to develop the facility;
(9) Pay costs to construct facilities to be used for commercial rental unless it is a minor part of the total facility;
(10) Construct facilities primarily for the purpose of housing State, Federal, or quasi-Federal agencies; and
(11) Pay for any purposes restricted by 7 CFR 1942.17(d)(2).

(b) Grant assistance will be provided on a graduated scale with smaller communities with the lowest median household incomes being eligible for projects with a higher proportion of grant funds. Grant assistance is limited to the following percentages of eligible project costs:
(1) 75 percent when the proposed project is:
   (i) Located in a rural community having a population of 5,000 or less; and
   (ii) The median household income of the population to be served by the proposed facility is below the higher of the poverty line or 60 percent of the State nonmetropolitan median household income.
(2) 55 percent when the proposed project is:
   (i) Located in a rural community having a population of 12,000 or less; and
   (ii) The median household income of the population to be served by the proposed facility is below the higher of the poverty line or 70 percent of the State nonmetropolitan median household income.
(3) 35 percent when the proposed project is:
   (i) Located in a rural community having a population of 20,000 or less; and
   (ii) The median household income of the population to be served by the proposed facility is below the higher of the poverty line or 80 percent of the State nonmetropolitan median household income.
(4) 15 percent when the proposed project is:
   (i) Located in a rural community having a population of 50,000 or less; and
   (ii) The median household income of the population to be served by the proposed facility is below the higher of the poverty line or 90 percent of the State nonmetropolitan median household income.
(5) 60 percent when the proposed project is:
   (i) Located in a rural community with a population of 20,000 or less; and
   (ii) The median household income of the population to be served by the proposed facility is below the higher of the poverty line or 90 percent of the State nonmetropolitan median household income. The 60 percent grants are only available to communities impacted by a disaster that has resulted in a loss of 60 percent of the community's population and is located in a rural community designated as a major disaster area by the President.
(6) Grant assistance cannot exceed the higher of the applicable percentages contained in this section which the applicant is eligible to receive and may be further limited due to availability of funds or by the maximum grant assistance allowable determined in accordance with § 3570.66.

[64 FR 32388, June 17, 1999, as amended at 73 FR 14173, Mar. 17, 2008]

§ 3570.64 Applications determined ineligible.

If, at any time, an application is determined ineligible, the processing office will notify the applicant in writing of the reasons. The applicant will be advised that it may appeal the decision. (See 7 CFR part 11.)
§ 3570.65 Processing preapplications and applications.

For combination proposals for loan and grant funds, only one preapplication package and one application package should be prepared and submitted. Preapplications and applications for grants will be developed in accordance with applicable portions of 7 CFR 1942.2, 1942.104, and 3575.52.

(a) Preapplications. Applicants will file an original and one copy of “Application for Federal Assistance (For Construction),” with the appropriate Agency office. This form is available in all Agency offices. The preapplication and supporting documentation are used to determine applicant eligibility and priority for funding.

(1) All preapplications shall be accompanied by:
   (i) Evidence of applicant’s legal existence and authority; and
   (ii) Appropriate clearinghouse agency comments.

(b) Application processing. Upon notification on “Notice of Preapplication Review Action” that the applicant is eligible for CFG funding, the applicant will be provided forms and instructions for filing a complete application. The forms required for a complete application, including the following, will be submitted to the processing office by the applicant:

   (1) Updated “Application for Federal Assistance (For Construction),”
   (2) Financial feasibility report.

(c) Discontinuing the processing of the application. If the applicant fails to submit the application and related material by the date shown on “Notice of Preapplication Review Action” (normally 60 days from the date of this form), the Agency will discontinue consideration of the application.

§ 3570.66 Determining the maximum grant assistance.

(a) Responsibility. State Directors are responsible for determining the applicant’s eligibility for grant assistance.

(b) Maximum grant assistance. Grant assistance cannot exceed the lower of:

   (1) Qualifying percentage of eligible project cost determined in accordance with §3570.61(b); or
   (2) Minimum amount sufficient to provide for economic feasibility as determined in accordance with §3570.61(d); or
   (3) Either 50 percent of the annual State allocation or $50,000, whichever is greater, unless an exception is made by the RHS Administrator in accordance with §3570.90.

§ 3570.67 Project selection priorities.

Applications are scored on a priority basis. Points will be distributed as follows:

(a) Population priorities. The proposed project is located in a rural community having a population of:

   (1) 5,000 or less—30 points;
   (2) Between 5,001 and 12,000, inclusive—20 points;
   (3) Between 12,001 and 20,000, inclusive—10 points; or
   (4) Between 20,001 and 50,000, inclusive, when applicable—5 points.

(b) Income priorities. The median household income of the population to be served by the proposed project is below the higher of the poverty line or:

   (1) 60 percent of the State nonmetropolitan median household income—30 points;
   (2) 70 percent of the State nonmetropolitan median household income—20 points;
   (3) 80 percent of the State nonmetropolitan median household income—10 points; or
   (4) 90 percent of the State nonmetropolitan median household income—5 points.

(c) Other priorities. Points will be assigned for one or more of the following initiatives:

   (1) Project is consistent with, and is reflected in, the State Strategic Plan—10 points;
   (2) Project is for health care—10 points; or
   (3) Project is for public safety—10 points.

(d) Discretionary. (1) The State Director may assign up to 15 points to a project in addition to those that may be scored under paragraphs (a) through (c) of this section. These points are to address unforeseen exigencies or emergencies, such as the loss of a community facility due to an accident or natural disaster or the loss of joint financing if Agency funds are not committed in a timely fashion. In addition, the
§ 3570.68 Selection process.

Each request for grant assistance will be carefully scored and prioritized to determine which projects should be selected for further development and funding.

(a) Selection of applications for further processing. The approval official will, subject to paragraph (b) of this section, authorize grants for those eligible preapplications with the highest priority score. When selecting projects, the following circumstances must be considered:

(1) Scoring of project and scores of other applications on hand;
(2) Funds available in the State allocation; and
(3) If other Community Facilities financial assistance is needed for the project, the availability of other funding sources.

(b) Lower scoring projects. (1) In cases when preliminary cost estimates indicate that an eligible, high-scoring application is not feasible, or would require grant assistance exceeding 50 percent of a State’s current annual allocation, or an amount greater than that remaining in the State’s allocation, the approval official may instead select the next lower-scoring application for further processing provided the high-scoring applicant is notified of this action and given an opportunity to review the proposal and resubmit it prior to selection of the next application.

(2) If it is found that there is no effective way to reduce costs, the approval official, after consultation with the applicant, may request an additional allocation of funds from the National Office.

§ 3570.69 Environmental review, intergovernmental review, and public notification.

All grants awarded under this subpart, including grant-only awards, are subject to the environmental requirements of 7 CFR part 1940, subpart G, to the intergovernmental review requirements of 7 CFR 3015, subpart V and RD Instruction 1970–I, ‘Intergovernmental Review,’ available in any Agency office or on the Agency’s Web site, and the public information process in 7 CFR 1942.17(j)(9).

§ 3570.70 Other considerations.

Each application must contain the comments, necessary certifications, and recommendations of appropriate Federal or State regulatory or other agency or institution having expertise in the planning, operation, and management of similar facilities as required by 7 CFR parts 1942, subparts A and C, and 3575, subpart A. Proposals for facilities financed in whole or in part with Agency funds will be coordinated with appropriate Federal, State, and local agencies as required by the following:

(a) Grants under this subpart are subject to the provisions of 7 CFR 1942.17(k) which include title VI of the Civil Rights Act of 1964, section 504 of the Rehabilitation Act of 1973, Americans with Disability Act of 1990, and the regulations issued thereto. Certain housing-related projects, such as nursing homes, group homes, or assisted-living facilities, must comply with the requirements of the Fair Housing Act.

(b) Governmentwide debarment and suspension (nonprocurement) and requirements for drug-free workplace are applicable to CFG and grantees. See 7
§ 3570.75 Grantee contracts.

The requirements of 7 CFR 1942.4, 1942.17(e), 1942.17(l), 1942.118, and 1942.119 will be applicable when agreements between grantees and third parties are involved.

§ 3570.76 Planning, bidding, contracting, and construction.

Planning, bidding, contracting, and construction will be handled in accordance with 7 CFR 1942.9, 1942.18, and 1942.126.

§§ 3570.77–3570.79 [Reserved]

§ 3570.80 Grant closing and delivery of funds.

(a) “Community Facilities Grant Agreement” will be used as the grant agreement between the Agency and the grantee and will be signed by the grantee before grant funds are advanced.

(b) Approval officials may require applicants to record liens or other appropriate notices of record to indicate that personal or real property has been acquired or improved with Federal grant funds and that use and disposition conditions apply to the property as provided by 7 CFR parts 3015, 3016, or 3019, as subsequently modified.

(c) Agency grant funds will be disbursed and monitored in accordance with 7 CFR 1942.17(p), 1942.123, and 1942.127.

(d) Grant funds will not be disbursed until they are actually needed by the applicant and all borrower, Agency, or other funds are expended, except when:

(1) Interim financing of the total estimated amount of loan funds needed during construction is arranged,

(2) All interim funds have been disbursed, and

(3) Agency grant funds are needed before RHS or other loans can be closed.

(e) If grant funds are available from other agencies and are transferred for disbursement by RHS, these grant funds will be disbursed in accordance with the agreement governing such other agencies’ participation in the project.

§§ 3570.81–3570.82 [Reserved]

§ 3570.83 Audits.

(a) Audits will be conducted in accordance with 7 CFR 1942.17(q)(4), except as provided in this section.

(b) Grantees who are not required to submit an audit report will, within 60 days following the end of the fiscal year in which any grant funds were expended, furnish RHS with annual financial statements, consisting of a verification of the organization’s balance sheet and statement of income and expense report signed by an appropriate official of the organization or other documentation as determined appropriate by the approval official.

§ 3570.84 Grant servicing.

Grants will be serviced in accordance with 7 CFR parts 1951, subparts E and O.

§ 3570.85 Programmatic changes.

The grantee shall obtain prior Agency approval for any change to the objectives of the approved project. (For construction projects, a material change in approved space utilization or functional layout shall be considered such a change.) Failure to obtain prior approval of changes to the approved project or budget may result in suspension, refund, or termination of grant funds.

§§ 3570.86 [Reserved]

§ 3570.87 Grant suspension, termination, and cancellation.

Grants may be suspended or terminated for cause or convenience in accordance with 7 CFR parts 3015, 3016, or 3019, as applicable.

§ 3570.88 Management assistance.

Grant recipients will be supervised to the extent necessary to ensure that facilities are constructed in accordance
§ 3570.89 with approved plans and specifications and to ensure that funds are expended for approved purposes.

§ 3570.89 [Reserved]

§ 3570.90 Exception authority.

An RHS official may request, and the Administrator or designee may make, in individual cases, an exception to any requirement or provision of this subpart or address any omission of this subpart if the Administrator determines that application of the requirement or provision, or failure to take action in the case of an omission, would adversely affect the Government’s interest.

§ 3570.91 Regulations.

Grants under this part will be in accordance with 7 CFR parts 3015, 3016, or 3019, as applicable, and any conflicts between those parts and this part will be resolved in favor of applicable 7 CFR parts 3015, 3016, or 3019.

§ 3570.92 [Reserved]

§ 3570.93 Regional Commission grants.

(a) Grants are sometimes made by Federal Regional Commissions (designated under Title V of the Public Works and Economic Development Act of 1965) for projects eligible for RHS assistance. RHS has agreed to administer such funds in a manner similar to administering RHS assistance.

(b) The transfer of funds from a Federal Regional Commission to RHS will be based on specific applications determined to be eligible for an authorized purpose in accordance with the requirements of RHS and the Federal Regional Commission.

(c) The Appalachian Regional Commission (ARC) is authorized under the Appalachian Regional Development Act of 1965 to serve the Appalachian region. ARC grants are handled in accordance with the ARC Agreement which applies to all ARC grants administered by Rural Development. Therefore, a separate Project Management Agreement between RHS and ARC is not needed for each ARC grant.

(d) Grants by other Federal Regional Commissions are handled in accordance with a separate Federal Regional Commission and RHS for each Commission grant or class of grants administered by RHS.

(e) When the Agency has funds in the project, no charge will be made for administering Federal Regional Commission grant funds.

(f) When RHS has no loan or grant funds in the project, an administrative charge will be made pursuant to the Economy Act (31 U.S.C. 1535).

§§ 3570.94–3570.99 [Reserved]

§ 3570.100 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0173. You are not required to respond to this collection of information unless it displays a valid OMB control number.

§ 3575.2

Subpart A—Community Programs Guaranteed Loans

§ 3575.1 General.

(a) This subpart contains the regulations for Community Programs loans guaranteed by the Agency and applies to lenders, holders, borrowers, and other parties involved in making, guaranteeing, holding, servicing, or liquidating such loans.

(b) The purpose of the Community Programs guaranteed loan program is to improve, develop, or finance essential community facilities in rural areas. This purpose is achieved through bolstering the existing private credit structure through the guarantee of quality loans which will provide lasting community benefits.

§ 3575.2 Definitions.

The following general definitions are applicable to the terms used in this subpart:

Agency. The Rural Housing Service which is within the Rural Development mission area of the United States Department of Agriculture or its successor agencies with authority delegated by the Secretary of Agriculture to administer the Community Facilities programs.

Application. An Agency prescribed form to request an Agency guarantee (available in any Agency office).

Arm’s length transaction. The sale, release, or disposition of assets in which the title to the property passes to a ready, willing, and able third party who is not affiliated with, or related to, and has no security, monetary, or stockholder interest in the borrower or transferor at the time of the transaction.

Assignment Guarantee Agreement. The signed agreement among the Agency, the lender, and the holder setting forth the terms and conditions of an assignment of the guaranteed portion of a loan or any part thereof (available in any Agency office).

Borrower. The entity that borrows money from the lender.

Collateral. Property pledged to secure the guaranteed loan.

Community facility (essential). The term “facility” as used in this subpart.
§ 3575.2  

refers to both the physical structure financed and the resulting service provided to rural residents. An essential community facility must:

1. Be a function customarily provided by a local unit of government;
2. Be a public improvement needed for the orderly development of a rural community;
3. Not include private affairs or commercial or business undertakings (except for limited authority for industrial parks);
4. Be within the area of jurisdiction or operation for eligible public bodies or a similar local rural service area of a not-for-profit corporation; and
5. Be located in a rural area.

Conditional Commitment for Guarantee. The Agency’s written statement to the lender that the material submitted is approved subject to the completion of all conditions and requirements contained in the commitment (available in any Agency office).

Guaranteed loan. A loan made and serviced by a lender for which the Agency and lender have entered into a Lender’s Agreement and for which the Agency has issued a Loan Note Guarantee.

Holder. The person or entity (other than the lender) who holds all or a part of the guaranteed portion of the loan with no servicing responsibilities. When the lender assigns part or all of the guaranteed portion of the loan to an assignee, the assignee becomes a holder when the Assignment Guarantee Agreement is signed by all parties.

Immediate family. Individuals who are closely related by blood or by marriage, or within the same household, such as a spouse, parent, child, brother, sister, aunt, uncle, grandparent, grandchild, niece, or nephew.

In-house expenses. In-house expenses include, but are not limited to, employees’ salaries, staff lawyers, travel, and overhead.

Insurance. Fire, windstorm, lightning, hail, explosion, riot, civil commotion, aircraft, vehicles, smoke, builder’s risk, liability, property damage, flood or mudslide, worker’s compensation, fidelity bond, malpractice, or any similar insurance that is available and needed to protect the security or that is required by law.

Joint financing. Two or more lenders (or any combination of lenders and other financial sources) making separate relatively contemporaneous loans to supply the funds required by one borrower. For example, such joint financing may consist of the Agency’s financial assistance with the Economic Development Administration, Department of Housing and Urban Development (HUD), or other Federal and State agencies, and private and quasi-public financial institutions.

Lender. The person or organization making and responsible for servicing the loan. The lender is also referred to in this subpart as the applicant who is requesting a guarantee during the preapplication and application stage of processing.

Lender’s Agreement. The signed agreement between the Agency and the lender containing the lender’s responsibilities when the Loan Note Guarantee is issued (available in any Agency office).

Loan classification system. The process by which loans are examined and categorized by degree of potential loss in the event of default.

Loan Note Guarantee. The signed commitment issued by the Agency containing the terms and conditions of the guarantee of an identified loan (available in any Agency office).

Market value. The amount for which property would sell for its highest and best use at a voluntary sale in an arm’s length transaction.

Note. An evidence of debt. In those instances where the Agency guarantees a bond issue, “note” shall also be construed to include a bond or other evidence of indebtedness, as appropriate.

Participation. Sale of an interest in a loan in which the lender retains the note, collateral securing the note, and all responsibility for loan servicing and liquidation.

Principals of borrowers. The owners, officers, directors, entities, and supervisors directly involved in the operation and management of the borrower.

Problem loan. A loan which is not complying with its terms and conditions.

Protective advances. Advances made by the lender for the purpose of preserving and protecting the collateral where the debtor has failed to, and will
not or cannot, meet obligations to protect or preserve collateral.

Public body. A municipality, county, or other political subdivision of a State, special purpose district, an Indian tribe on a Federal or State reservation, or another federally recognized Indian tribe.

Rural and rural area. (1) For fiscal year 1999, the terms “rural” and “rural area” mean a city, town, or unincorporated area with 20,000 inhabitants or less according to the latest decennial census.

(2) For later fiscal years, the terms “rural” and “rural area” mean a city, town, or unincorporated area that has a population of 50,000 inhabitants or less according to the latest decennial census of the United States, other than an urbanized area immediately adjacent to a city, town, or unincorporated area that has a population in excess of 50,000 inhabitants.

Service area. The area reasonably expected to be served by the facility being financed by the guaranteed loan.

State. Any of the 50 States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, Commonwealth of the Northern Mariana Islands, Republic of the Marshall Islands, Republic of Palau, and the Federated States of Micronesia.

State Bond Banks and State Bond Pools. An entity authorized by the State to issue State debt instruments and utilize the funds received to finance essential community facilities.

State Director. The Rural Development State Director or the staff member who has been delegated authority to perform action on behalf of the State Director.

Substantive change. Any change in the purpose of the loan or any change in the financial condition of the borrower or the collateral which would jeopardize the performance of the loan.

Transfer and assumption. The conveyance by a debtor to an assuming party of the assets, collateral, and liabilities of the loan in return for the assuming party’s binding promise to pay the outstanding debt.

§ 3575.4 Full faith and credit.

The Loan Note Guarantee constitutes an obligation supported by the full faith and credit of the United States and is not contestable except for fraud or misrepresentation (including negligent misrepresentation) of which the lender or holder has actual knowledge, participates in, or condones. A note which provides for the payment of interest on interest shall not be guaranteed and any Loan Note Guarantee or Assignment Guarantee Agreement attached to, or relating to, a note which provides for payment of interest on interest is void. The Loan Note Guarantee will not be enforceable by the lender to the extent any loss is occasioned by violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which the Agency acquires knowledge of the foregoing. Any losses occasioned will not be enforceable by the lender to the extent that loan funds are used for purposes other than those specifically approved by the Agency in its Conditional Commitment for Guarantee. Negligent servicing is defined as the failure to perform those services which a reasonably prudent lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act, but also not acting in a timely manner, acting in a manner contrary to the manner in which a reasonably prudent lender would act up to the time of loan maturity, or until a final loss is paid. The Loan Note Guarantee or Assignment Guarantee Agreement in the hands of a holder shall not cover interest accruing 90 days after the holder has demanded repurchase by the lender, nor shall the Loan Note Guarantee or Assignment Guarantee Agreement in the hands of a holder cover interest accruing 90 days after the lender or Agency has requested the holder to surrender the evidence of debt for repurchase.

§ 3575.4 Conditions of guarantee.

A loan guarantee under this part will be evidenced by a Loan Note Guarantee.
issued by the Agency. Each lender will also execute a Lender’s Agreement.

(a) The entire loan will be secured by the same security with equal lien priority for the guaranteed and non-guaranteed portions of the loan. The non-guaranteed portion of the loan will not be paid first nor given any preference or priority over the guaranteed portion.

(b) The lender will be responsible for servicing the entire loan and will remain mortgagee or secured party of record notwithstanding the fact that another party may hold a portion of the loan.

(c) When a guaranteed portion of a loan is sold to a holder, the holder shall have all rights of the lender under the Loan Note Guarantee to the extent of the portion purchased. The lender will remain bound by all the obligations under the Loan Note Guarantee, Lender’s Agreement, and Agency program regulations. If the Agency makes a payment to a holder, then the lender must reimburse the Agency.

(d) A lender will receive all payments of principal and interest on the account of the entire loan and will promptly remit to each holder a pro rata share, less any lender servicing fee.

(e) The lender may retain all of the unguaranteed portion of the loan or may sell part of the unguaranteed portion of the loan through participation. However, the lender is required to retain 5 percent of the loan amount from the unguaranteed portion in their portfolio.

§§ 3575.5–3575.7 [Reserved]

§ 3575.8 Access to lender’s records.

Upon request by the Agency, the lender will permit representatives of the Agency (or other agencies of the U.S. Department of Agriculture authorized by that Department or the U.S. Government) to inspect and make copies of any of the records of the lender pertaining to the guaranteed loans. Such inspection and copying may be made during regular office hours of the lender or at any other time the lender and the Agency agree upon.

§ 3575.9 Environmental requirements.

Requirements for an environmental review or mitigation actions are contained in part 1940, subpart G, of this title. The lender must assist the Agency to ensure that the lender’s applicant complies with any mitigation measures required by the Agency’s environmental review for the purpose of avoiding or reducing adverse environmental impacts of construction or operation of the facility financed with the guaranteed loan. This assistance includes ensuring that the lender’s applicant is to take no actions (for example, initiation of construction) or incur any obligations with respect to their proposed undertaking that would either limit the range of alternatives to be considered during the Agency’s environmental review process or which would have an adverse effect on the environment. If construction is started prior to completion of the environmental review and the Agency is deprived of its opportunity to fulfill its obligation to comply with applicable environmental requirements, the application for financial assistance may be denied. Satisfactory completion of the environmental review process must occur prior to Agency approval of the applicant’s request or any commitment of Agency resources.

§§ 3575.10–3575.11 [Reserved]

§ 3575.12 Inspections.

The lender will notify the Agency of any scheduled field inspections during construction and after issuance of the Loan Note Guarantee. The Agency may attend such field inspections. Any inspections or review conducted by the Agency, including those with the lender, are for the benefit of the Agency only and not for the benefit of other parties of interest. Agency inspections do not relieve any parties of interest of their responsibilities to conduct necessary inspections.

§ 3575.13 Appeals.

Only the borrower, lender, or holder can appeal an Agency decision. In cases where the Agency has denied or reduced the amount of final loss payment to the lender, the adverse decision may
be appealed only by the lender. A decision by a lender adverse to the interest of the borrower is not a decision by the Agency, whether or not concurred in by the Agency. Appeals will be handled in accordance with the regulations of the National Appeals Division, U.S. Department of Agriculture, published at 7 CFR part 11.

§§ 3575.14–3575.16 [Reserved]

§ 3575.17 Exception authority.

The Administrator may, in individual cases, make an exception to any requirement or provision of this subpart or address any omission of this subpart provided the Administrator determines that application of the requirement or provision, or failure to take action in the case of an omission, would adversely affect the Government's financial interest. Requests for exceptions must be in writing by the State Director.

§§ 3575.18–3575.19 [Reserved]

§ 3575.20 Eligibility.

(a) Availability of credit from other sources. The Agency must determine that the borrower is unable to obtain the required credit without the loan guarantee from private, commercial, or cooperative sources at reasonable rates and terms for loans for similar purposes and periods of time. This determination shall become a part of the Agency casefile. The Agency must also determine if an outstanding judgment obtained by the United States in a Federal Court (other than the U.S. Tax Court) has been entered against the borrower or if the borrower has an outstanding delinquent debt with any Federal agency. Such judgment or delinquency shall cause the potential borrower to be ineligible to receive a loan guarantee until the judgment is paid in full or otherwise satisfied or the delinquency is cured.

(b) Legal authority and responsibility.

(1) Each borrower must have, or will obtain, the legal authority necessary to construct, operate, and maintain the proposed facility and services. They must also have legal authority for obtaining security and repaying the proposed loan.

(2) The borrower shall be responsible for operating, maintaining, and managing the facility and services, and providing for the continued availability and use of the facility and services at reasonable rates and terms.

(i) These responsibilities must be exercised by the borrower even though the facility may be operated, maintained, or managed by a third party under contract, management agreement, or written lease.

(ii) Leases may only be used when this is the only feasible way to provide the service, is the customary practice to provide such service in the State, and must provide for the borrower’s management control of the facility.

(iii) Contracts, management agreements, or leases must not contain options or other provisions for transfer of ownership.

(3) The lender is responsible for reviewing any contracts, management agreements, or leases to determine that they will not adversely impact the borrower’s repayment ability or the security value of the guaranteed loan.

(c) Borrower. (1) A public body such as a municipality, county, district, authority, or other political subdivision of a State located in a rural area.

(2) An organization operated on a not-for-profit basis such as an association, cooperative, or private corporation. For-profit corporations operated as not-for-profit corporations are eligible borrowers as long as they operate as a not-for-profit corporation for the duration of their guaranteed loans. Single member corporations or corporations owned or substantially controlled by other corporations or associations are not eligible organizations. Before a loan is made to a borrower other than a public body, the articles of incorporation or the loan agreement will include a condition similar to the following:

If the corporation dissolves or ceases to perform the community facility objectives and functions, the board of directors shall distribute all business property and assets to one or more nonprofit corporations or public bodies. This distribution must be approved by 75 percent of the users or members and must serve the public welfare of the community. The assets may not be distributed to any members, directors, stockholders, or...
others having financial or managerial interest in the corporation. Nothing herein shall prohibit the corporation from paying its debts.

(3) A private nonprofit essential community facility (other than utilities) must have significant ties with the local rural community. Such ties are necessary to ensure to the greatest extent possible that a facility under private control will carry out a public purpose and continue to primarily serve rural areas. Ties may be evidenced by items such as:

(i) Association with, or controlled by, a local public body or bodies or broadly based ownership and controlled by members of the community.

(ii) Substantial public funding through taxes, revenue bonds, or other local government sources, or substantial voluntary community funding such as would be obtained through a community-wide funding campaign.

(4) Indian tribes on Federal and State reservations and other federally recognized Indian tribes.

(d) Facility location. Facilities must be located in rural areas, except:

(1) For utility services such as natural gas or hydroelectric serving both rural and non-rural areas. In such cases, Agency funds may be used to finance only that portion serving rural areas, regardless of facility location.

(2) Telecommunication projects. The part of the facility located in a non-rural area must be necessary to provide the essential services to rural areas.

(e) Facilities for public use. All facilities financed under the provisions of this subpart shall be for public purposes.

(1) Facilities will be installed to serve any user within the service area who desires service and can be feasibly and legally served.

(2) In no case will boundaries for the proposed service area be chosen in such a way that any user or area will be excluded because of race, color, religion, sex, marital status, age, disability, or national origin. This does not preclude:

(i) Financing or constructing projects in phases when it is not practical to finance or construct the entire project at one time, and

(ii) Financing or constructing facilities where it is not economically feas-

ible to serve the entire area, provided economic feasibility is determined on the basis of the entire system or facility and not by considering the cost of separate extensions to, or parts thereof. Additionally, the borrower must publicly announce a plan for extending service to areas not initially receiving service. Also, the borrower must provide written notice to potential users located in the areas not to be initially served.

(3) The lender will determine that, when feasible and legally possible, inequities within the proposed project’s service area for the same type service proposed (i.e., gas distribution system) will be remedied by the owner, or before completion of the project. Inequities are defined as unjustified variations in availability, adequacy, or quality of service. User rate schedules for portions of existing systems or facilities that were developed under different financing, rates, terms, or conditions do not necessarily constitute inequities.

§§ 3575.21–3575.23 [Reserved]

§ 3575.24 Eligible loan purposes.

(a) Funds may be used to construct, enlarge, extend, or otherwise improve other essential community facilities providing essential service primarily to rural residents and rural businesses.

(1) Essential community facilities include, but are not limited to:

(i) Fire, rescue, and public safety,

(ii) Health services,

(iii) Community, social, or cultural services,

(iv) Transportation facilities such as streets, roads, and bridges,

(v) Telecommunication equipment,

(vi) Hydroelectric generating facilities and related connecting systems and appurtenances only when not eligible for financing under the authorities of the Rural Utilities Service. Funds may not be used to finance other types of electrical generating or transmitting facilities.

(vii) Supplemental and supporting structures for other rural electrification or telephone systems (including facilities such as headquarters and office buildings, storage facilities, and
maintenance shops) only when not eligible for financing under the authorities of the Rural Utilities Service,

(viii) Natural gas distribution systems,

(ix) Industrial park sites (but only to the extent of land acquisition and necessary site preparation) including access ways and utility extensions to and throughout the site. Funds may not be used in connection with industrial parks to finance on-site utility systems or business and industrial buildings, and

(x) Community parks, community activity centers, and similar types of facilities that are an integral part of the orderly development of a community. Recreational components, such as, but not limited to, playground equipment of an otherwise non-recreational eligible community facility such as childcare, educational, or health care facilities are also eligible.

(2) Otherwise improve includes, but is not limited to, the following:

(i) The purchase of major equipment (such as telecommunication equipment and X-ray machines) which will in themselves provide an essential service to rural residents,

(ii) The purchase of existing facilities, when necessary, either to improve or to prevent a loss of service, and

(iii) Payment of tap fees and other utility connection charges as provided in utility purchase contracts.

(b) Funds also may be used:

(1) To construct or relocate public buildings, roads, bridges, fences, or utilities and to make other public improvements necessary to the successful operation or protection of facilities authorized by paragraph (a) of this section.

(2) To relocate private buildings, roads, bridges, fences, or utilities, and other private improvements necessary to the successful operation or protection of facilities authorized by paragraph (a) of this section.

(3) To pay the following expenses (but only when such expenses are a necessary part of a loan to finance facilities authorized in paragraph (a) of this section):

(i) Reasonable fees and costs such as origination fee, loan guarantee fee, legal, engineering, architectural, fiscal advisory, recording, environmental impact analyses, archaeological surveys, possible salvage or other mitigation measures, planning and establishing or acquiring rights.

(ii) Interest on loans until the facility is self-supporting, but not for more than 2 years unless a longer period is approved by the Agency; interest on loans secured by general obligation bonds until tax revenues are available for payment, but not for more than 2 years unless a longer period is approved by the Agency’s National Office; and interest on interim financing.

(iii) Costs of acquiring interest in land; rights such as water rights, leases, permits, rights-of-way, and other evidence of land or water control necessary for development of the facility.

(iv) Purchasing or renting equipment necessary to install, maintain, extend, protect, operate, or utilize facilities.

(v) Initial operating expenses for a period ordinarily not exceeding 1 year when the borrower is unable to pay such expenses.

(vi) Refinancing debts incurred by, or on behalf of, a community when all of the following conditions exist:

(A) The debts being refinanced are less than 50 percent of the total loan,

(B) The debts were incurred for the facility or service being financed or any part thereof (such as interim financing, construction expenses, etc.), and

(C) Arrangements cannot be made with the creditors to extend or modify the terms of the debts so that a sound basis will exist for making a loan.

(4) To pay obligations for construction incurred prior to filing a preapplication and application with the Agency. Construction work must not be started (and obligations for such work or materials must not be incurred) before the Conditional Commitment for Guarantee is issued. If there are compelling reasons for proceeding with construction before the Conditional Commitment for Guarantee is issued, lenders may request Agency approval to pay such obligations and not jeopardize a guarantee from the Agency. Such request must comply with the following:
§ 3575.25 Ineligible loan purposes.

Loan funds may not be used to finance:

(a) Properties to be used for commercial rental when the borrower has no control over tenants and services offered except for industrial-site infrastructure development,

(b) Facilities primarily for the purpose of housing Federal or State agencies,

(c) Community antenna television services or facilities,

(d) Telephone systems,

(e) Facilities which are not modest in size, design, and cost,

(f) Finder’s and packager’s fees,

(g) Projects located within the Coastal Barriers Resource System that do not qualify for an exception as defined in section 6 of the Coastal Barriers Resource Act, 16 U.S.C. 3601 et seq. (available in any Agency office),

(h) New combined sanitary and storm water sewer facilities, or

(i) Projects that are located in a special flood or mudslide hazard area as designated by the Federal Emergency Management Agency in a community that is not participating in the National Flood Insurance Program.

(j) Golf courses, water parks, race tracks or other recreational type facilities inherently commercial in nature.

[64 FR 28337, May 26, 1999, as amended at 78 FR 26486, May 7, 2013]
must be approved by the National Office prior to the issuance of the loan guarantee.

(b) Conflict of interest. When the lender’s officers, stockholders, directors, or partners (including their immediate families) or the borrower, its officers, stockholders, directors, or partners (including their immediate families) own, or have management responsibilities in each other, the lender must disclose such business or ownership relationships. The Agency will determine if such relationships are likely to result in a conflict of interest. This does not preclude lender officials from being on the borrower’s board of directors.

§ 3575.28 Transfer of lenders or borrowers (prior to issuance of Loan Note Guarantee).

(a) Prior to issuance of the loan guarantee, the Agency may approve the transfer of an outstanding Conditional Commitment for Guarantee from the present lender to a new eligible lender, provided:

(1) The former lender states in writing why it does not wish to continue to be the lender for this project;

(2) No substantive changes in ownership or control of the borrower have occurred;

(3) No substantive changes in the borrower’s written plan, scope of work, or changes in the purpose or intent of the project has occurred; and

(4) No substantive changes in the loan agreement or Conditional Commitment for Guarantee are required.

(b) The substitute lender must execute a new application for loan and guarantee (available in any Agency office).

(c) If approved, the Agency will issue a letter of amendment to the original Conditional Commitment for Guarantee reflecting the new lender who will acknowledge acceptance of the offer in writing.

(d) Once the Conditional Commitment for Guarantee is issued, the Agency will not approve any substitution of borrowers, including changes in the form of the legal entity. Exceptions to a change in the legal entity may be requested when the original borrower is replaced with substantially the same individuals or officers with the same interest as originally approved.

§ 3575.29 Fees and charges by lender.

(a) Routine charges and fees. The lender may establish the charges and fees for the loan, provided they do not exceed those charged other borrowers for similar types of transactions. “Similar types of transactions” mean those transactions involving the same type of loan for which a non-guaranteed loan borrower would be assessed charges and fees.

(b) Late payment fees. Late payment charges will not be covered by the Loan Note Guarantee. Such charges may not be added to the principal and interest due under any guaranteed note. Late payment charges may be made only if:

(1) They are routinely made by the lender in all types of loan transactions;

(2) Payment has not been received within the customary timeframe allowed by the lender; or

(3) The lender agrees with the borrower, in writing, that the rate or method of calculating the late payment charges will not be changed to increase charges while the Loan Note Guarantee is in effect.

(c) Guarantee fees. The guaranteed loan fee will be the applicable guarantee fee rate multiplied by the principal loan amount multiplied by the percent of guarantee. The one-time guarantee fee is paid when the Loan Note Guarantee is issued.

(1) The fee will be paid to the Agency by the lender and is nonreturnable. The lender may pass the fee to the borrower.

(2) The guarantee fee rates are available in any Agency office.

§ 3575.30 Loan guarantee limitations.

The percentage of guarantee, up to the maximum allowed by this section, is a matter for negotiation between the lender and the Agency.

(a) The maximum guarantee is 90 percent of eligible loss.

(b) The lender will retain a minimum of 5 percent of the total loan amount. The retained amount must be from the unguaranteed portion of the loan and cannot be participated to another lender.
§ 3575.33 Interest rates.

(a) General. Rates will be negotiated between the lender and the borrower. They may be either fixed or variable rates. Interest rates will be those rates customarily charged borrowers in similar circumstances in the ordinary course of business and are subject to Agency review and approval.

(b) Variable rate publication. A variable interest rate must be tied to a base rate published periodically in a recognized national or regional financial publication specifically agreed to by the lender and borrower. Such an agreement must be documented in the borrower or lender loan agreement.

(1) Interest rate caps and incremental adjustment limitations will also be negotiated between the lender and the borrower. Notice of any interest rate change proposed by the lender should allow a sufficient time period for the borrower to obtain any required State or other regulatory approval and to implement any user rate adjustments necessary as a result of the interest rate change. The intervals between interest rate adjustments will be specified in the loan agreement (but not more often than quarterly).

(2) The lender must incorporate within the variable rate note, the provision for adjustment of payments coincident with an interest rate adjustment. This will ensure the outstanding principal balance is properly amortized within the prescribed loan maturity and eliminate the possibility of a balloon payment at the end of the loan.

(c) Changes. Any change in the interest rate between the date of issuance of the Conditional Commitment for Guarantee and before the issuance of the Loan Note Guarantee must be approved by the Agency. Approval of such change will be shown as an amendment to the Conditional Commitment for Guarantee.

(d) Different rates on guaranteed and unguaranteed portion of the loan. It is permissible to have one interest rate on the guaranteed portion of the loan and another interest rate on the unguaranteed portion of the loan, provided the lender and borrower agree, and:

(1) The rate on the unguaranteed portion does not exceed that currently being charged on loans for similar purposes to borrowers under similar circumstances; and,

(2) The rate on the guaranteed portion of the loan will not exceed the rate on the unguaranteed portion. This requirement does not apply when the unguaranteed rate is variable and the guaranteed portion is fixed.

(e) Multi-rates. When multi-rates are used, the lender will provide the Agency with the overall effective interest rate for the entire loan. Multi-rate loans may be either fixed, variable, or a combination of fixed and variable. When a combination of fixed and variable interest rates are used, the interest rate for the unguaranteed portion will not be lower than the guaranteed portion of the loan.

§ 3575.34 Terms of loan repayment.

(a) General. Principal and interest on the loan will be due and payable as provided in the note except, any interest accrued as the result of the borrower’s default on the guaranteed loan over and above that which would have accrued at the note rate on the guaranteed loan will not be guaranteed by the Agency. The lender will structure repayments as established in the loan agreement between the lender and borrower. Ordinarily, such installments will be scheduled for payment as agreed upon by the lender and borrower on terms that reasonably ensure repayment of the loan. However, the first installment to include a repayment of principal may be scheduled for payment after the project is operable and has begun to generate income. Such installment must be due and payable within 3 years from the date of the note and at least annually thereafter. Interest will be due at least annually from the date of the note. Monthly payments will be required except for borrowers with income limited to less frequent intervals.

(b) Term length. The maximum time allowable for final maturity for a guaranteed CP loan will be limited to the useful life of the facility, not to exceed 40 years.

(c) Balloon payments. The principal balance should be properly amortized
within the prescribed loan maturity. Balloon payments at the end of the loan are prohibited.

§§ 3575.35–3575.36 [Reserved]

§ 3575.37 Insurance and fidelity bonds.

The lender must provide evidence that the borrower has adequate insurance and fidelity bond coverage by loan closing or start of construction, whichever occurs first. Adequate coverage must be maintained for the life of the loan and is subject to Agency review and approval.

§§ 3575.38–3575.39 [Reserved]

§ 3575.40 Equal opportunity and Fair Housing Act requirements.

(a) Equal Credit Opportunity Act. The lender will comply with the requirements of title V of the Equal Credit Opportunity Act (15 U.S.C. 1691 et seq.). (See the Federal Reserve Board Regulation, 12 CFR part 202.)

(b) Fair Housing Act. Certain housing-related projects such as nursing homes, group homes, or assisted-living facilities must comply with the requirements of the Fair Housing Act (42 U.S.C. 3601 et seq.). This includes completion of an Affirmative Fair Housing Marketing Plan and compliance with the Housing and Urban Development accessibility guidelines except for areas open to the public which are covered by the Americans with Disabilities Act (42 U.S.C. 12181 et seq.). The lender will determine that the borrower has a valid plan in effect at all times.

§ 3575.41 [Reserved]

§ 3575.42 Design and construction requirements.

The lender will provide the Agency with a written certification at the end of construction that all funds were utilized for authorized purposes. The borrower and the lender will authorize designs and plans based upon the preliminary architectural and engineering reports or plans approved by the lender and concurred in by the Agency. The borrower will take into consideration any lender or Agency comments when the facility is being designed.

(a) Architectural and engineering practices. All project facilities must be designed utilizing accepted architectural and engineering practices and must conform to applicable Federal, State, and local codes and requirements. The lender must ensure that the planned project will be completed within the available funds and, once completed, will be suitable for the borrower’s needs.

(b) Construction monitoring. The lender will monitor the progress of construction and undertake the reviews and inspections necessary to ensure that construction proceeds in accordance with the approved plans, specifications, and contract documents and that funds are used for eligible project costs. The lender must expeditiously report any problems in project development to the Agency.

(c) Equal employment opportunities. For all construction contracts in excess of $10,000, the contractor must comply with Executive Order 11246 entitled “Equal Employment Opportunity” as amended and as supplemented by applicable Department of Labor regulations (41 CFR part 60–1). The borrower and lender are responsible for ensuring that the contractor complies with these requirements.

(d) Americans with Disabilities Act. Community Facilities loans which involve the construction of, or addition to, facilities that accommodate the public and commercial facilities as defined by the Americans with Disabilities Act (42 U.S.C. 12181—et seq.) must comply with that Act. The lender and borrower are responsible for compliance.

§ 3575.43 Other Federal, State, and local requirements.

In addition to the specific requirements of this subpart and beginning on the date of issuance of the Loan Note Guarantee, proposals for facilities financed in whole or in part with a loan guaranteed by the Agency will be coordinated with all appropriate Federal, State, and local agencies. Borrowers and lenders will be required to comply with any Federal, State, or local laws or regulatory commission rules which are in existence and which affect the project including, but not limited to:
§§ 3575.44–3575.46
(a) Organization and authority to design, construct, develop, operate, and maintain the proposed facilities;
(b) Borrowing money, giving security, and raising revenues for repayment;
(c) Land use zoning;
(d) Health, safety, and sanitation standards; and
(e) Protection of the environment and consumer affairs.

§§ 3575.44–3575.46 [Reserved]

§ 3575.47 Economic feasibility requirements.
All projects financed under the provisions of this section must be based on taxes, assessments, revenues, fees, or other sources of revenues in an amount sufficient to provide for facility operation and maintenance, a reasonable reserve, and debt payment. Other sources of revenue or guarantors are particularly important in considering the feasibility of recreation-type loans. The lender is responsible for determining the credit quality and economic feasibility of the proposed loan and must address all elements of the credit quality in a written financial feasibility analysis which includes adequacy of equity, cash flow, security, history, and management capabilities. Financial feasibility reports must take into consideration any interest rate adjustment which may be instituted under the terms of the note. The lender’s financial credit analysis may also serve as the feasibility analysis when sufficient evidence is included to determine economic feasibility as well as financial viability.

(a) Financial feasibility. The borrower, lender, or other qualified entity must prepare the financial feasibility analysis (suggested financial feasibility guidelines are available in any Agency office) in the following instances:
(1) Facilities primarily used for fire and rescue services;
(2) Facilities that are not dependent on facility revenues for debt payment;
(3) Loans of less than $500,000; or
(4) Projects in which the borrower has operated similar facilities on a financially successful basis.
(b) Utility projects. The borrower’s consulting engineer may complete the financial feasibility analysis for utility systems.
(c) Other community facilities. Financial feasibility reports for all other facilities must be prepared by a qualified entity not having a direct interest in the management of the facility. The lender may prepare the feasibility study if qualified staff is available.
(d) Exceptions. The Agency loan approval official may exempt the lender from the requirement for an independent financial feasibility report (when requested by the borrower and the lender) provided the approval official determines that the financial feasibility analysis prepared by the borrower fairly represents the financial feasibility of the facility and the financial feasibility analysis contains an accurate projection of the usage, revenues, and expenses of the facility.
(e) Insufficient information. When the lender or Agency has insufficient information to determine the borrower’s repayment ability, an independent feasibility analysis is required.

§ 3575.48 Security.
(a) Lender responsibility. The lender is responsible for obtaining and maintaining proper and adequate security to protect the interest of the lender, the holder, and the Government.
(b) Type of security. Security must be of such a nature that repayment of the loan is reasonably ensured when considered with the integrity and ability of project management, soundness of the project, and the borrower’s prospective earnings. The security may include, but is not limited to, the following: General obligation bonds, revenue bonds, pledge of taxes or assessments, assignment of facility revenue, land, easements, rights-of-way, water rights, buildings, machinery, equipment, accounts receivable, contracts, cash, or other accounts or assignments of leases or leasehold interest.
(c) Separate security. All security must secure the entire loan. The lender will not take separate security to secure only the unguaranteed portion of the loan. The lender will not require compensating balances or certificates of deposit as a means of eliminating the lender’s exposure on the unguaranteed portion of the loan.
§ 3575.52 Processing.

(a) Preapplications. (1) The preapplication package must be submitted either alone or the necessary information may be submitted simultaneously with the application. The preapplication package will contain:
   (i) An Application for Federal Assistance on a form provided by the Agency (available in any Agency office);
   (ii) State intergovernmental or other type review comments and recommendations for the borrower’s project (clearinghouse comments, if applicable);
   (iii) Supporting documentation necessary to make an eligibility determination such as financial statements, audits, copies of organizational documents, existing debt instruments, etc.; and
   (iv) Documentation of lender eligibility in accordance with §3575.27.
   (2) If the Agency determines that the project may meet requirements and is likely to be funded, the lender must submit a complete application if it has not previously submitted one. The Agency must do an environmental review before further processing will be completed.

(b) Applications. Contents of application package:
   (1) Application for Loan and Guarantee on a form prescribed by the Agency (available in any Agency office);
   (2) Proposed loan agreement;
   (3) Request for Environmental Information (available in any Agency office);
   (4) Preliminary architectural or engineering report;
   (5) Cost estimates;
   (6) Appraisal reports (as appropriate);
   (7) Credit reports;
   (8) Financial feasibility analysis and report; and
   (9) Any additional information required.

§ 3575.53 Evaluation of application.

If the Agency determines that the borrower is eligible, the proposed loan is for an eligible purpose, there is reasonable assurance of repayment ability, sufficient collateral and equity exists, the proposed loan complies with all applicable statutes and regulations, the environmental review is complete and considered in determining compliance, and adequate funds are available, the Agency will provide the lender and the borrower with the Conditional Commitment for Guarantee, listing all conditions for the guarantee. Applicable requirements will include the following:

(a) Approved use of guaranteed loan funds (source and use of funds);
(b) Rates and terms of the loan;
(c) Scheduling of payments;
(d) Number of customers;
(e) Security and lien priority;
(f) Appraisals;
(g) Insurance and bonding;
(h) Financial reporting;
(i) Equal opportunity and nondiscrimination;
(j) Environment or mitigation;
(k) Americans with Disabilities Act;
(l) By-laws and articles of incorporation changes; and
(m) Other requirements necessary to protect the Government.

§§ 3575.54–3575.58 [Reserved]

§ 3575.59 Review of requirements.

(a) Lender and borrower. The lender and borrower must complete and sign the Acceptance of Conditions and return a copy to the Agency as soon as possible. Notwithstanding the preceding sentence, if certain conditions cannot be met, the lender and borrower may propose alternate conditions for Agency consideration.

(b) Cancellation. If the lender decides at any time after receiving a Conditional Commitment for Guarantee that it no longer wants a guarantee, the lender must immediately advise the Agency of the cancellation.

(c) Modifications. The lender agrees that once the Conditional Commitment for Guarantee is issued and accepted by the lender and borrower, it will not be modified as to the scope of the project, overall facility concept, project purpose, use of proceeds, or other terms and conditions.
§ 3575.63 Conditions precedent to issuance of the Loan Note Guarantee.

The Loan Note Guarantee will not be issued until:

(a) The lender certifies that:

(1) No changes have been made in the lender’s loan conditions and requirements since the issuance of the Conditional Commitment for Guarantee except those approved in the interim by the Agency in writing.

(2) All planned property acquisition has been completed and all development has been substantially completed in accordance with plans, specifications, and applicable building codes. No costs have exceeded the amounts approved by the lender and the Agency.

(3) Required insurance is in effect.

(4) All equal opportunity and Fair Housing Plan requirements have been met.

(5) The loan has been properly closed and the required security instruments have been obtained on any after-acquired property that cannot be covered initially under State statutory provisions.

(6) The borrower has marketable title to the collateral then owned by the borrower, subject to the instrument securing the loan to be guaranteed and subject to any other exceptions approved, in writing, by the Agency.

(7) When required, the entire amount of the loan for working capital has been disbursed except in cases where the Agency has approved disbursement over an extended time.

(8) All other requirements of the Conditional Commitment for Guarantee have been met.

(9) Lien priorities are consistent with requirements of the Conditional Commitment for Guarantee.

(10) The loan proceeds have been disbursed for purposes and in amounts consistent with the Conditional Commitment for Guarantee and as specified on the application for the guaranteed loan. A copy of a detailed statement by the lender detailing the use of loan funds will be attached to support this certification.

(11) There has been no substantive adverse change in the borrower’s financial condition nor any other adverse change in the borrower during the period of time from the Agency’s issuance of the Conditional Commitment for Guarantee to issuance of the Loan Note Guarantee. The lender’s certification must address all adverse changes of the borrower and the guarantors. For purposes of this paragraph, the term borrower includes any parent, affiliate, or subsidiary of the borrower.

(b) The lender has executed and delivered the Lender’s Agreement and closing report for the guaranteed loan along with the appropriate guarantee fee.

(c) The lender has advised the Agency of plans to sell or assign any part of the loan as provided in the Lender’s Agreement.

(d) Where applicable, the lender must certify that the borrower has obtained:

(1) A legal opinion relative to the title to rights-of-way and easements. Lenders are responsible for ensuring that borrowers have obtained valid, continuous, and adequate rights-of-way and easements needed for the construction, operation, and maintenance of a facility.

(2) A title opinion or title insurance showing ownership of the land and all mortgages or other lien defects, restrictions, or encumbrances, if any. It is the responsibility of the lender to ensure that the borrower has obtained and recorded such releases, consents, or subordinations to such property rights from holders of outstanding liens or other instruments as may be necessary for the construction, operation, and maintenance of the facility and to provide the required security. For example, when a site is for major structures for utility-type facilities (such as a gas distribution system) and the lender and borrower are able to obtain only a right-of-way or easement on such a site rather than a fee simple
title, such a title opinion must be requested.

(e) For loans exceeding $150,000, the lender has certified its compliance with the Anti-Lobby Act (18 U.S.C. 1913). Also, if any funds have been, or will be, paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to guarantee a loan, the lender shall completely disclose such lobbying activities in accordance with 31 U.S.C. 1352.

(f) If the Loan Note Guarantee cannot be issued before the Conditional Commitment expires, the lender must submit a written request for an extension of the expiration date. The lender must document and certify to paragraph (a)(1) and (a)(11) of this section specifically identifying any modifications.

(g) Coincident with, or immediately after, loan closing, the lender will contact the Agency and provide those documents and certifications required in this section. For loans to public bodies, lenders may require an opinion from recognized bond counsel regarding the adequacy of the preparation and issuance of the debt instruments. Only when the Agency is satisfied that all conditions for the guarantee have been met will the Loan Note Guarantee be executed.

§ 3575.64 Issuance of Lender's Agreement, Loan Note Guarantee, and Assignment Guarantee Agreement.

(a) Lender's Agreement. If the Agency finds that all requirements have been met, the lender and the Agency will execute the Lender's Agreement. The original will be retained by the Agency and a signed duplicate original will be retained by the lender. A separate Lender's Agreement must be executed for each loan to be guaranteed by the Agency.

(b) Loan Note Guarantee. (1) Upon receipt of the executed Lender's Agreement and after all requirements have been met, the Agency will execute the Loan Note Guarantee. All originals of the Loan Note Guarantee will be provided to the lender and attached to the note.

(2) If the lender has selected the multi-note system, a Loan Note Guarantee will be prepared and attached to each note the borrower issues. All the notes will be listed on the Loan Note Guarantee. Not more than ten notes will be issued for the guaranteed portion (unless the Agency and borrower agree otherwise) and one note issued for the unguaranteed portion.

(c) Assignment of guarantee. In the event the lender assigns the guaranteed portion of the loan to a holder, the lender, holder, and Agency will execute an Agency prescribed Assignment Guarantee Agreement.

(d) Failure to meet conditions. If the Agency determines that it cannot execute the Loan Note Guarantee because all requirements have not been met, the lender will have a reasonable period within which to satisfy the objections. If the lender satisfies the objections within the time allowed, the guarantee will be issued.

(e) Loan closing report. The lender will prepare and deliver a guaranteed loan closing report for each loan to be guaranteed and a guarantee fee to the Agency in return for the Loan Note Guarantee.

§ 3575.65 Lender's sale or assignment of the guaranteed portion of loan.

The lender may retain all of the guaranteed loan. The lender must not sell or participate any amount of the guaranteed or non-guaranteed portion of the loan to the borrower or to members of the borrower's immediate families, the borrower's officers, directors, stockholders, other owners, or a subsidiary or affiliate. Disposition of the guaranteed portion of a loan may not be made prior to full disbursement, completion of construction, and acquisition of real estate and equipment without the prior written approval of the Agency. If the lender desires to market all or part of the guaranteed portion of the loan at, or subsequent to, loan closing, the loan must not be in default.

(a) Assignment. Any sale or assignment by the lender of the guaranteed
portion of the loan must be accomplished in accordance with the conditions in the Lender’s Agreement.

(b) Participation. The lender may obtain participation in the loan under its normal operating procedures.

(c) Minimum retention. The lender is required to hold in its own portfolio or retain a minimum of 5 percent of the total loan amount. This amount must be of the non-guaranteed portion of the loan and cannot be participated to another. The lender may sell the remaining amount of the non-guaranteed portion of the loan only through participation.

§§ 3575.66–3575.68 [Reserved]

§ 3575.69 Loan servicing.

(a) Lender responsibilities. The lender is responsible for servicing the entire loan in accordance with the lender’s loan agreement. The unguaranteed portion of the loan will not be paid first nor given any preference or priority over the guaranteed portion of the loan. The lender is responsible for taking all servicing actions that a prudent lender would perform in servicing a portfolio of loans that are not guaranteed. This responsibility includes, but is not limited to, the collection of payments; obtaining compliance with the covenants and provisions in the note, loan agreement, security instrument, or any supplemental agreements; obtaining and analyzing financial statements; verifying the payment of taxes and insurance premiums; and maintaining liens on collateral. The lender must notify the Agency of any violation of the loan agreement with the borrower within 30 days of such violation.

(b) Financial reports. The lender must obtain the financial statements required by the Loan Agreement. The lender must submit the borrower’s annual financial statements to the Agency within 120 days of the end of the borrower’s fiscal year. The lender must analyze the financial statements and provide the Agency with a written summary of the lender’s analysis and conclusions, including trends, strengths, weaknesses, extraordinary transactions, and other indications of the financial condition of the borrower. Additionally, when applicable, the lender will require an audit in accordance with Office of Management and Budget (OMB) circulars (available in any Agency office).

(c) Delinquent loans. The lender will service delinquent loans in accordance with the Lender’s Agreement and reasonable and prudent lending standards.

(d) Loan balances. The lender must report to the Agency the outstanding principal and interest balance on each guaranteed loan semiannually.

(e) Collateral inspections. The lender will inspect the collateral as often as necessary to properly service the loan.

§§ 3575.70–3575.72 [Reserved]

§ 3575.73 Replacement of loss, theft, destruction, mutilation, or defacement of Loan Note Guarantee or Assignment Guarantee Agreement.

(a) Replacement of Loan Note Guarantee. The Agency may issue a replacement Loan Note Guarantee or Assignment Guarantee Agreement which may have been lost, stolen, destroyed, mutilated, or defaced while in the custody of the lender or holder upon receipt of a certificate of loss and an indemnity bond in accordance with this section.

(b) Lender responsibilities. When a Loan Note Guarantee or Assignment Guarantee Agreement is lost, stolen, destroyed, mutilated, or defaced while in the custody of the lender or holder, the lender will coordinate the activities of the party who seeks the replacement documents and will submit the required documents to the Agency for processing. The requirements for replacement are as follows:

1. A certificate of loss properly notarized which includes:
   (i) Legal name and present address of either the lender or the holder who is requesting the replacement forms;
   (ii) Legal name and address of the lender of record;
   (iii) Capacity of person certifying;
   (iv) Full identification of the Loan Note Guarantee or Assignment Guarantee Agreement, including the name of the borrower, Agency case number, date of the Loan Note Guarantee, Assignment Guarantee Agreement, face amount of the evidence of debt purchased, date of evidence of debt,
§ 3575.78 Repurchase of loan.

(a) Repurchase by lender. The lender has the option to repurchase the loan from a holder within 30 days of written demand from the holder when the borrower is in default not less than 60 days on payment. The repurchase will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest less the lender’s servicing fee. The guarantee does not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the demand letter to the lender. The holder will concurrently send a copy of the demand to the Agency. The lender will accept an assignment without recourse from the holder upon repurchase. The lender is encouraged to repurchase the loan to facilitate the accounting of funds, resolve the problem, and permit the borrower to cure the default, where reasonable. The lender will notify the holder and the Agency of its decision within 30 days of receipt of demand from the holder.

(b) Servicing options. In considering servicing options, the prospects for providing a permanent cure without adversely affecting the risks to the Agency and the lender must be the paramount objective. Temporary curative actions (such as payment deferments or collateral subordination) must strengthen the loan and be in the best financial interest of the lender and the Agency. Some of these actions may require concurrence of the holder.

(c) Multi-note. If the loan was closed with the multi-note option, the lender may need to possess all notes to take some servicing actions. In those situations when the Agency is holder of some of the notes, the Agency may endorse the notes back to the lender, provided a proper receipt is received from the lender which defines the reason for the transfer. Under no circumstances will the Agency endorse the original Loan Note Guarantee to the lender.

§§ 3575.76–3575.77 [Reserved]

§ 3575.78 Repurchase of loan.

(a) Repurchase by lender. The lender has the option to repurchase the loan from a holder within 30 days of written demand from the holder when the borrower is in default not less than 60 days on payment. The repurchase will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest less the lender's servicing fee. The guarantee does not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the demand letter to the lender. The holder will concurrently send a copy of the demand to the Agency. The lender will accept an assignment without recourse from the holder upon repurchase. The lender is encouraged to repurchase the loan to facilitate the accounting of funds, resolve the problem, and permit the borrower to cure the default, where reasonable. The lender will notify the holder and the Agency of its decision within 30 days of receipt of demand from the holder.

(b) Servicing options. In considering servicing options, the prospects for providing a permanent cure without adversely affecting the risks to the Agency and the lender must be the paramount objective. Temporary curative actions (such as payment deferments or collateral subordination) must strengthen the loan and be in the best financial interest of the lender and the Agency. Some of these actions may require concurrence of the holder.

(c) Multi-note. If the loan was closed with the multi-note option, the lender may need to possess all notes to take some servicing actions. In those situations when the Agency is holder of some of the notes, the Agency may endorse the notes back to the lender, provided a proper receipt is received from the lender which defines the reason for the transfer. Under no circumstances will the Agency endorse the original Loan Note Guarantee to the lender.

§§ 3575.76–3575.77 [Reserved]

§ 3575.78 Repurchase of loan.

(a) Repurchase by lender. The lender has the option to repurchase the loan from a holder within 30 days of written demand from the holder when the borrower is in default not less than 60 days on payment. The repurchase will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest less the lender’s servicing fee. The guarantee does not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the demand letter to the lender. The holder will concurrently send a copy of the demand to the Agency. The lender will accept an assignment without recourse from the holder upon repurchase. The lender is encouraged to repurchase the loan to facilitate the accounting of funds, resolve the problem, and permit the borrower to cure the default, where reasonable. The lender will notify the holder and the Agency of its decision within 30 days of receipt of demand from the holder.

(b) Servicing options. In considering servicing options, the prospects for providing a permanent cure without adversely affecting the risks to the Agency and the lender must be the paramount objective. Temporary curative actions (such as payment deferments or collateral subordination) must strengthen the loan and be in the best financial interest of the lender and the Agency. Some of these actions may require concurrence of the holder.

(c) Multi-note. If the loan was closed with the multi-note option, the lender may need to possess all notes to take some servicing actions. In those situations when the Agency is holder of some of the notes, the Agency may endorse the notes back to the lender, provided a proper receipt is received from the lender which defines the reason for the transfer. Under no circumstances will the Agency endorse the original Loan Note Guarantee to the lender.

§§ 3575.76–3575.77 [Reserved]

§ 3575.78 Repurchase of loan.

(a) Repurchase by lender. The lender has the option to repurchase the loan from a holder within 30 days of written demand from the holder when the borrower is in default not less than 60 days on payment. The repurchase will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest less the lender’s servicing fee. The guarantee does not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the demand letter to the lender. The holder will concurrently send a copy of the demand to the Agency. The lender will accept an assignment without recourse from the holder upon repurchase. The lender is encouraged to repurchase the loan to facilitate the accounting of funds, resolve the problem, and permit the borrower to cure the default, where reasonable. The lender will notify the holder and the Agency of its decision within 30 days of receipt of demand from the holder.
(b) Agency repurchase. (1) If the lender does not repurchase as provided in paragraph (a) of this section, the Agency will purchase from the holder the unpaid principal balance of the guaranteed portion together with accrued interest to date of repurchase (less the lender’s servicing fee) within 30 days after written demand to the Agency. The guarantee will not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the original demand letter. The lender shall not charge the Agency any servicing fees nor are any such fees collectible from the Agency.

(2) The holder’s demand to the Agency must include a copy of the written demand made upon the lender. The holder or duly authorized agent must also include evidence of the right to require payment from the Agency. Such evidence will consist of either the original of the Loan Note Guarantee properly endorsed to the Agency or the original of the Assignment Guarantee Agreement properly assigned to the Agency without recourse including all rights, title, and interest in the loan. The Agency will be subrogated to all rights of the holder. The holder must include in the demand the amount due including unpaid principal, unpaid interest to date of demand, and interest subsequently accruing from the date of demand to the proposed payment date. Unless otherwise agreed to by the Agency, such proposed payment will not be later than 30 days from the date of demand.

(3) The lender must promptly provide the Agency with the information necessary for the Agency’s determination of the appropriate amount due the holder upon the Agency’s notification to the lender of the holder’s demand for payment. This information must be certified by an authorized officer of the lender. Any discrepancy between the amount claimed by the holder and the information submitted by the lender must be resolved before payment will be approved. The Agency will notify both parties and such conflict will suspend the running of the 30-day payment requirement.

(4) Any purchase by the Agency does not change, alter, or modify any of the lender’s obligations to the Agency arising from the loan or guarantee nor does it waive any of the Agency’s rights against the lender. The Agency may set off against the lender all rights inuring to the Agency as the holder of the instrument against the Agency’s obligation to the lender under the Loan Note Guarantee.

(c) Repurchase for servicing. When the lender determines that repurchase of the guaranteed portion of the loan is necessary to service the loan, the holder must sell the guaranteed portion to the lender for the unpaid principal and interest balance (less the lender’s servicing fee). The guarantee does not cover interest accruing after 90 days from the date the lender’s or Agency’s letter requesting the holder to tender its guaranteed portion. The lender must not repurchase from the holder for arbitrage purposes to further its own financial gain. Any repurchase must be made only after the lender obtains the Agency written approval. If the lender does not repurchase the portion from the holder, the Agency may, at its option, purchase such guaranteed portion for servicing purposes.

§ 3575.79 [Reserved]

§ 3575.80 Interest rate changes after loan closing.

(a) General. Subject to the restrictions below, the borrower, lender, and holder (if any) may collectively effect a permanent reduction in the interest rate on the guaranteed loan at any time during the life of the loan on written agreement by all of the applicable parties. After such a permanent reduction, the Loan Note Guarantee will only cover losses of interest at the reduced interest rate. The Agency must be notified by the lender, in writing, within 10 calendar days of the change. When the Agency is a holder, it will concur only when it is demonstrated that the change is more viable than liquidation and that the Government’s financial interests are not adversely affected. Factors which will be considered in making such determination are the Government’s cost of borrowing money and the project’s enhancement
of rural development. The monetary recovery must be greater than the liquidation recovery, and a financial feasibility analysis must show the project’s continued viability.

(1) Fixed rates cannot be changed to variable rates to reduce the interest rate to the borrower unless the variable rate has a ceiling which is less than the original fixed rate.

(2) Variable rates can be changed to a lower fixed rate. In a final loss settlement when qualifying rate changes are made with the required written agreements and notification, the interest will be calculated for the periods the given rates were in effect. The lender must maintain records which adequately document the accrued interest claimed.

(3) The lender is responsible for the legal documentation of interest rate changes. However, the lender may not issue a new note.

(b) Increases. No increases in interest rates will be permitted under the loan guarantee except the normal fluctuations in approved variable interest rate loans.

§ 3575.81 Liquidation. Liquidation will occur when the lender concludes that liquidation of the guaranteed loan is necessary because of default or third party actions that the borrower cannot, or will not, cure or eliminate within a reasonable period of time and the Agency concurs with the lender; or the Agency, at any time, independently concludes that liquidation is necessary. The lender will proceed as expeditiously as possible, including giving any notices or taking any legal actions required by the security instruments.

(a) General. If a lender has made a loan guaranteed by the Agency under previous regulations, the lender has the option to liquidate the loan under the provisions of this subpart or under the provisions of previous regulations. The lender will notify the Agency in writing within 10 days after its decision to liquidate, which regulatory provisions it chooses to use. The lender may not choose some provisions of one regulation and other provisions of the other regulation.

(b) Acquiring property titles. If a lender acquires title to property, the Agency may elect to permit the lender the option of calculating the final loss settlement using the net proceeds received at the time of the ultimate disposition of the property. The lender must submit to the Agency a written request to use this option within 15 days of acquiring title and the Agency must agree, in writing, prior to the lender submitting any request for estimated loss payment.

(c) Liquidation plan. The lender will (within 30 days after a decision to liquidate) submit to the Agency, in writing, a proposed, detailed liquidation plan. Upon approval by the Agency of the liquidation plan, the lender will commence liquidation. The lender’s liquidation plan must include, but is not limited to, the following:

(1) Such proof as the Agency requires to establish the lender’s ownership of the guaranteed loan notes and related security instruments, a copy of the payment ledger or other documentation which reflects the outstanding loan balance and accrued interest to date, and the method of computing the interest;

(2) A complete list of collateral;

(3) The recommended liquidation methods for making the maximum collection possible on the indebtedness and the justification for such methods, including the recommended action for acquiring and disposing of all collateral;

(4) Necessary steps for preservation of the collateral;

(5) Copies of the borrower’s latest available financial statements;

(6) An itemized list of estimated liquidation expenses expected to be incurred and justification for each expense;

(7) A schedule to periodically report to the Agency on the progress of the liquidation;

(8) Estimated protective advance amounts with justification;

(9) Proposed protective bid amounts on collateral to be sold at auction and a discussion of how the amounts were determined;

(10) If a voluntary conveyance is considered, the proposed amount to be credited to the guaranteed debt;
§ 3575.82

(11) Legal opinions, as needed; and
(12) If the outstanding balance of principal and interest is less than $250,000, the lender will obtain an estimate of fair market and potential liquidation value of the collateral. If the outstanding balance of principal and interest is $250,000 or more, the lender will obtain an independent appraisal report on all collateral securing the loan which will reflect the fair market value and potential liquidation value. The independent appraiser’s fee will be shared equally by the Agency and the lender.

(d) **Partial liquidation plan.** If actions are necessary to immediately preserve and protect the collateral, a partial liquidation plan may be submitted and, when approved, must be followed by a complete liquidation plan prepared by the lender.

(e) **Disposition of collateral.** Disposition of collateral acquired by the lender must be approved, in writing, by the Agency when:

(1) The lender’s cost to acquire the collateral of a borrower exceeds the potential recovery value of the security and the lender proposes abandoning the collateral in lieu of liquidation; or

(2) The acquired collateral is to be sold to the borrower, borrower’s stockholders or officers, or the lender or lender’s stockholders or officers.

(f) **Agency liquidation.** The Agency will liquidate at its option only when it is a holder and there is reason to believe the lender is not likely to initiate liquidation efforts that will result in maximum recovery. When the Agency liquidates, reasonable liquidation expenses will be assessed against the proceeds derived from the sale of the collateral.

(g) **Final loss payment.** Final loss payments will be made only after all collateral has been properly accounted for and liquidation expenses are determined to be reasonable and within approved limits. Any estimated loss payments made to the lender will be credited against the final loss on the guaranteed loan. The amount of an estimated loss payment must be credited as a deduction from the principal balance of the loan.

§ 3575.83 **Protective advances.**

Protective advances can only be added to the loan account for purposes of requirements to preserve the value of the security. Protective advances constitute an indebtedness of the borrower to the lender and must be secured by collateral to the same extent as principal and interest. Protective advances include, but are not limited to, advances made for taxes, annual assessments, ground rent, hazard and flood insurance premiums affecting the collateral (including any other expenses necessary to protect the collateral). Attorney fees are not a protective advance.

(a) **Agency approval.** The Agency must approve, in writing, all protective advances on loans within its loan approval authority which exceed a total cumulative advance amount of $5,000 to the same borrower. Protective advances must be reasonable when associated with the value of the collateral being preserved.

(b) **Preserving collateral.** When considering protective advances, sound judgment must be exercised in determining that the additional funds advanced will actually preserve collateral and recovery is actually enhanced by making the advance.

§ 3575.84 **Additional loans or advances.**

The lender will not make additional expenditures or new loans to the borrower without first obtaining the written approval of the Agency even though such expenditures or loans will not be guaranteed.

§ 3575.85 **Bankruptcy.**

(a) **Calculating losses.** Report of Loss form (available in any Agency office) will be used for calculating estimated and final loss determinations.

(b) **Lender responsibility.** The lender is responsible for protecting the guaranteed loan debt and all the collateral securing it in bankruptcy proceedings. These responsibilities include, but are not limited to, the following:

(1) Filing a proof of claim, where necessary, and all necessary papers and pleadings;
(2) Attending and, where necessary, participating in meetings of the creditors and all court proceedings;

(3) Immediately seeking adequate protection of the collateral if it is subject to being used by the trustee in bankruptcy or the debtor in possession;

(4) Where appropriate, seeking involuntary conversion of a pending chapter 11 case to a liquidation proceeding or seeking dismissal of the proceedings; and

(5) Keeping the Agency adequately and regularly informed, in writing, of all aspects of the proceedings.

(c) Appraisals. In a chapter 9 or chapter 11 reorganization, the lender must obtain an independent appraisal of the collateral if the Agency believes an independent appraisal is necessary. The Agency and the lender will share the appraisal fee equally.

(d) Liquidation expenses. Only expenses authorized by the court of chapter 11 reorganizations, or chapters 11 or 7 liquidation (unless the liquidation is by the lender), may be deducted from the collateral proceeds.

(e) Repurchase from the holder. The Agency or the lender, with the approval of the Agency, may initiate the repurchase of the unpaid guaranteed portion of the loan from the holder. If the lender is the holder, an estimated loss payment may be filed at the initiation of a chapter 7 proceeding or after a chapter 11 proceeding becomes a liquidation proceeding. Any loss payment on loans in bankruptcy must be approved by the Agency.

(f) Chapter 11 bankruptcy. If a borrower has filed for protection under chapter 11 of the United States Code for a reorganization (but not chapter 13) and all or a portion of the debt has been discharged, the lender may request an estimated loss payment of the guaranteed portion of the accrued interest and principal discharged by the court. If the court approves revisions to the chapter 11 reorganization plan, subsequent estimated loss payments may be requested in accordance with the court approved changes. Once the reorganization plan has been satisfactorily completed, the lender is responsible for submitting the documentation necessary for the Agency to review and adjust the estimated loss claim to reflect any actual discharge of principal and interest and to reimburse the lender for any court ordered interest-rate reduction under the terms of the reorganization plan.

(g) Agency approval of estimated liquidation expenses. The Agency must approve, in advance and in writing, the lender’s estimated liquidation expenses of collateral in a liquidation if the liquidation is performed by the lender. These expenses must be reasonable and customary and not include in-house expenses of the lender.

(h) Reconciliation. In the event that the estimated loss payment exceeds the actual loss, the lender will reimburse the Agency the amount in excess of the actual loss plus interest at the note rate from the date of the estimated loss payment.

§§ 3575.86–3575.87 [Reserved]

§ 3575.88 Transfers and assumptions.

(a) General. For all transfers and assumptions, the lender must concur in the plans for disposition of funds in the transferor’s debt service, reserve, and operation and maintenance account. The Agency will approve, in writing, transfers and assumptions of loans to transferees who will continue the original purpose of the guaranteed loan subject to the following applicable provisions:

(1) When the transaction is to a member of the borrower’s organization, it will be at an amount which will not result in a loss to the lender.

(2) Transfers to eligible borrowers will receive preference if recovery to the lender from the sale price is not less than it would be if the transfer was to an ineligible borrower.

(3) The present borrower is unable or unwilling to accomplish the objectives of the guaranteed loan, and the transferee will be to the lender’s and Agency’s advantage.

(4) The transferee will assume an amount at least equal to either the present market value or the debt, whichever is less.

(b) Transfers to an eligible borrower. (1) The total indebtedness may be transferred to an eligible borrower on the same terms.
§ 3575.88

(2) The total indebtedness may be transferred to another eligible borrower on different terms not to exceed those terms for which an initial guaranteed loan can be made.

(3) Less than the total indebtedness may be transferred to another eligible borrower on the same or different terms and the pro rata share of any eligible loss paid to the lender.

(4) A guaranteed loan for which the transferee is eligible may be made in connection with a transfer subject to the policies and procedures governing the type of loan being made.

(5) If the transferor is to receive a payment for the equity, the total debt must be assumed.

(c) Ineligible borrower. Transfers to ineligible borrowers are considered only when needed as a method for servicing problem cases when an eligible transferee is not available. Transfers should not be considered as a means by which members can obtain equity or as a method of providing a source of easy credit for purchasers. Transfers must meet the following requirements:

(1) All transfers to ineligible borrowers will include a one-time non-refundable transfer fee to the Agency of no more than one percent. Transfer fees will be collected, and payments applied, in accordance with paragraph (d) of this section.

(2) For all loans covered by this subpart, the Agency may approve a transfer of indebtedness to, and assumption of, a loan by a transferee who does not meet the eligibility requirements for the kind of loan being assumed when the ineligible borrower will:

(i) Make a significant down payment, and

(ii) Agree to pay the remaining balance within not more than 15 years. Installments will be at least equal to the amount amortized over a period not greater than the remaining life of the debt being transferred, and the balance will be due the fifteenth year.

(3) Interest rates to ineligible transferees will be the rate specified in the note of the transferor or the rates customarily charged borrowers in similar circumstances in the ordinary course of business and are subject to Agency review and approval. The rates may be either fixed or variable.

(i) Transferees must have the ability to repay as determined by the lender the debt according to the Assumption Agreement and must have the legal authority to enter into the contract. The transferee will submit a current balance sheet to the lender. The lender will obtain and analyze the credit history of the transferee.

(ii) The transferor may receive equity payments only when the full amount of the debt is assumed. However, equity payments will not be made on more favorable terms than those on which the balance of the debt will be paid.

(d) Transfer fees. Transfer fees are a one-time nonrefundable cost to be collected by the lender at the time of application or proposal.

(1) The transfer fees will be a standard fee plus the cost of the appraisal.

(2) The lender will collect and submit the fee to the Agency.

(3) The Agency may waive the transfer fee if it determines that such waiver is in the best interest of the Agency.

(e) Processing transfers and assumptions. (1) In any transfer and assumption case, the transferor (including any guarantor) may be released from liability by the lender only with prior Agency written concurrence and only when the value of the collateral being transferred is at least equal to the amount of the loan, or part of the loan, being assumed. If the transfer is for less than the entire debt:

(i) The Agency must determine that the transferor and any guarantor have no reasonable debt-paying ability considering their assets and income at the time of transfer, and

(ii) The lender must certify that the transferor has cooperated in good faith, used due diligence to maintain the collateral against loss, and has otherwise fulfilled all of the regulations of this subpart to the best of the borrower's ability.

(2) The lender will make, in all cases, a complete credit analysis to determine viability of the project (subject to the Agency review and approval) including any requirement for deposit in an escrow account as security to meet the determined equity requirements for the project.
§ 3575.90 Disposition of acquired property.

(a) General. When the lender acquires title to the collateral and the final loss claim is not paid until final disposition, the lender must proceed as quickly as possible to develop a plan to fully protect the collateral, and the lender must dispose of the collateral without delay.

(b) Re-title collateral. Any collateral accepted by the lender must not be titled in the Agency’s name in whole or in part. The Agency’s position is that of a guarantor relating to losses, not a lender.

(c) Collateral preservation. After acquiring the collateral, the lender must protect the collateral from deterioration (weather, vandalism, etc.). Hazard insurance in an amount necessary to cover the fair market value of the collateral must be maintained.

(d) Collateral sale. (1) The lender will prepare and submit to the Agency a plan on the best method of sale, keeping in mind any prospective purchasers. The Agency must approve the plan in writing. If an existing approved liquidation plan addresses the disposition of acquired property, no further

§ 3575.89 Mergers.

(a) General. The Agency may approve mergers or consolidations (herein referred to as “mergers”) when the resulting organization will be eligible for an Agency guaranteed loan and assumes all the liabilities and acquires all the assets of the merged borrower. Mergers may be approved when:

(1) The merger is in the best interest of the Government and the merging borrower;

(2) The resulting borrower can meet all required conditions as contained in specific loan note agreements; and

(3) All property can be legally transferred to the resulting borrower.

(b) Distinguishing mergers from transfers and assumptions. Mergers occur when one entity combines with another entity in such a way that the first entity ceases to exist as a separate entity while the other continues. In a consolidation, two or more entities combine to form a new, consolidated entity with the original entity ceasing to exist. Such transactions must be distinguished from transfers and assumptions in which a transferor will not necessarily go out of existence, and the transferee will not always take all the transferor’s assets nor assume all the transferor’s liabilities.
review is required unless modification of the plan is needed.

(2) Anytime there is a case when the conversion of collateral to cash can reasonably be expected to result in a negative net recovery amount, abandonment of the collateral should be considered. The Agency must approve abandonment in writing.

§§ 3575.91–3575.93 [Reserved]

§ 3575.94 Determination and payment of loss.

In all liquidation cases, final settlement will be made with the lender after the collateral is liquidated. The Agency will have the right to recover losses paid under the guarantee from any liable party.

(a) General. If the lender takes title to collateral, any loss will be based on the collateral value at the time the lender obtains title.

(b) Loss calculations. The Report of Loss form (available in any Agency office) will be used for calculations of all estimated and final loss determinations. Estimated loss payments may only be approved after the lender has submitted a liquidation plan approved by the Agency.

(c) Estimated loss payments. When the lender is conducting the liquidation and owns any of the guaranteed portion of the loan, it may request an estimated loss payment by submitting an estimate of loss that will occur in connection with liquidation of the loan. An estimated loss payment may be approved after the Agency has approved the liquidation plan.

(1) The lender will prepare and submit a Report of Loss using the appraised value in lieu of amount received from sale of collateral.

(2) The estimated loss payment shall be calculated as of the date of such payment. The total amount of the loss payment remitted by the Agency will be applied by the lender on the guaranteed portion of the loan debt. Such application does not release the borrower from liability. At the time of final loss settlement, the lender may notify the borrower that the loss payment has been so applied.

(3) After liquidation has been completed, a final Report of Loss will be submitted by the lender to the Agency.

(d) Final report of loss. In all cases, a final Report of Loss must be submitted to the Agency. Before Agency approval of any final loss report, the lender must account for all funds obtained, disposition of the collateral, all costs incurred, and any other information necessary for the successful completion of liquidation. Upon receipt of the final accounting and Report of Loss, the Agency may conduct an audit and will determine the final loss. The lender will make its records available to, and otherwise assist, the Agency in making any audit it requires of the Report of Loss. The documentation accompanying the Report of Loss must support the loss claimed.

(1) The lender must document and show that all of the collateral has been accounted for and properly liquidated and that liquidation proceeds have been properly accounted for and applied correctly on the loan. The Agency must be satisfied that the lender has accomplished this in the manner contained herein and that the lender has maximized the collections in conducting the liquidation.

(2) The lender must show a breakdown on any protective advance amount as to the payee, purpose of the expenditure, date paid, evidence that the amount expended was proper, and that the amount was actually paid.

(3) The lender must show a breakdown of liquidation expenses as to the payee, purpose of the expenditure, date paid, evidence that the amount expended was proper, and that the amount was actually paid.

(4) Accrued interest should be supported by attachments showing how the amount was accrued by the lender. A copy of the promissory note and ledger will be attached. If the interest rate was a variable rate, the lender must include documentation of changes in the selected base rate and when the changes in the loan rate became effective.

(e) Liquidation income. Any net rental or other income that has been received by the lender from the collateral will be applied on the guaranteed loan debt.
(f) *Liquidation costs.* Certain reasonable liquidation costs will be allowed during the liquidation process. The liquidation costs must be submitted as a part of the liquidation plan. Such costs will be deducted from gross proceeds received from the disposition of collateral unless the costs have been previously determined by the lender (with Agency concurrence) to be protective advances. If changed circumstances after submission of the liquidation plan require a revision of liquidation costs, the lender will obtain the Agency’s written concurrence prior to proceeding with the proposed changes. No in-house expenses of the lender will be allowed.

(g) *Protective advance losses.* In those instances where the lender made authorized protective advances, the lender may claim recovery for the guaranteed portion of any loss of monies advanced as well as interest resulting from such protective advances. These claims shall be included in the final Report of Loss.

(h) *Final loss approval.* After the final Report of Loss has been tentatively approved:

1. If the actual loss is greater than any estimated loss payment, such loss will be paid by the Agency;
2. If the actual loss is less than any estimated loss payment, the lender will reimburse the Agency;
3. If the Agency conducted the liquidation, it will provide an accounting to the lender and will pay the lender in accordance with the Loan Note Guarantee.

(i) *Loss limits.* The amount payable by the Agency to the lender cannot exceed the limits contained in the Loan Note Guarantee. If the Agency conducts the liquidation, loss occasioned by accruing interest will be covered by the guarantee only to the date the Agency accepts this responsibility. When the liquidation is conducted by the lender, loss occasioned by accruing interest will be covered to the extent of the guarantee to the date of final settlement provided the lender proceeds expeditiously with the liquidation plan approved by the Agency.

§ 3575.95 *Future recovery.*

After a loan has been liquidated and a final loss has been paid by the Agency, any future funds which may be recovered by the lender will be pro-rated between the Agency and the lender in accordance with the guaranteed percentage even if the Loan Note Guarantee has been terminated.

§ 3575.96 *Termination of Loan Note Guarantee.*

The Loan Note Guarantee under this subpart will terminate automatically:

(a) Upon full payment of the guaranteed loan; or
(b) Upon full payment of any loss obligation or negotiated loss settlement except for future recovery provisions; or
(c) Upon written request from the lender to the Agency, provided that the lender holds all of the guaranteed portion and the original Loan Note Guarantee is returned to the Agency.

§§ 3575.97–3575.99 [Reserved]

§ 3575.100 *OMB control number.*

The report and recordkeeping requirements contained in this regulation have been approved by the Office of Management and Budget and have been assigned OMB control number 0575–0137.

Subpart B [Reserved]

PART 3600—ORGANIZATION AND FUNCTIONS

Sec. 3600.1 General.
3600.2 Organization.
3600.3 Functions.
3600.4 Authority to act for the Administrator.

APPENDIX A TO PART 3600—LIST OF STATE STATISTICAL OFFICES

AUTHORITY: 5 U.S.C. 301 and 552; and 7 CFR 2.85.
SOURCE: 60 FR 57534, Nov. 16, 1995, unless otherwise noted.

§ 3600.1 General.

The National Agricultural Statistics Service (NASS) was established on April 17, 1986, by Secretary’s Memorandum 1020–24, which renamed the Statistical Reporting Service concurrent with an internal restructuring. Primary NASS responsibilities are development and dissemination of national and State agricultural statistics, statistical research, and coordination of Department statistical programs.

§ 3600.2 Organization.

The headquarters organization consists of: The Administrator and Associate Administrator; Deputy Administrator for Field Operations; Four Divisions: Estimates, Survey Management, Research, and Systems and Information; and the Agricultural Statistics Board. In the field, each of the 45 State Statistical Offices, serving the 50 States, is under a State Statistician.

§ 3600.3 Functions.

(a) Administrator. The Administrator is responsible for the formulation of current, intermediate, and long-range policies and plans to carry out a broad statistical program for the agricultural sector and Departmental functions and activities assigned to NASS. Specific functions are:

(1) Administering an agricultural statistics program which includes estimates of production, marketings, inventories, and selected economic characteristics of the U.S. agricultural and rural economy.

(2) Administering a methodological research program to improve agricultural data collection and processing, data management, estimation, and forecasting.

(3) Administering programs to conduct surveys for other agencies, improve statistics through statistical standards for the Department, and coordinate statistical methods and techniques within the Federal Government.

(4) Administering statistical official programs jointly developed through cooperative agreements with State agencies, universities, private groups, and other Federal agencies.

(5) Administering selected international agricultural statistics programs which provide foreign technical assistance, training on statistical methodology for developing countries, and exchange of information.

(b) Associate Administrator. The Associate Administrator is responsible for advising and counseling the Administrator and high-level policy officials on matters related to programs of NASS. Major functions include:

(1) Chairing Agricultural Statistics Board activities, designating Board membership, presiding at Board sessions, and formulating specific procedures.

(2) Chairing the NASS Strategic Planning Council which coordinates long-range planning, information resources management, and research reviews.

(3) Chairing the Resource Management Council which coordinates NASS hiring, promotion, and training activities.

(c) Deputy Administrator for Field Operations. The Deputy Administrator manages and coordinates data collection and estimating programs carried out by State Statistical Offices. This includes supervision of statistical programs with cooperating State and private groups, universities, and other Federal agencies. Major functions include:

(1) Formulating policies and programs that relate to functions and responsibilities of State Statistical Offices.
(2) Directing agricultural statistics programs established through cooperative agreements with State Departments of Agriculture, Land-Grant colleges and universities, or appropriate private organizations.

(3) Establishing and maintaining relationships with respondents, producers, commodity groups, data users, and other interested groups to gain cooperation in providing useful, timely, and reliable information.

(d) Director, Estimates Division. The Director is responsible for NASS estimating and forecasting programs. Major functions include:

(1) Defining input and output requirements, estimators and variances to be utilized, statistical standards, editing and summarization requirements, and analytic procedures.

(2) Collaborating with the Chairperson of the Agricultural Statistics Board to establish the annual programs of statistical reports.

(3) Developing appropriate systems parameters; processing, summarizing, and presenting current survey and related historical data for Agricultural Statistics Board analysis; and preparing official estimates and forecasts.

(e) Director, Survey Management Division. The Director is responsible for application of survey design and data collection methodologies to the agricultural statistics program. Major functions include:

(1) Constructing and maintaining appropriate sampling frames for agricultural and rural surveys.

(2) Designing, testing, and establishing survey techniques and standards, including sample design, sample selection, questionnaires, data collection methods, survey materials, and training methods for NASS.

(3) Reviewing specifications for special data collection activities for programs of other Federal or State agencies.

(f) Director, Research Division. The Director is responsible for researching statistical methodology for survey design, data collection, processing, estimating, and forecasting. Major functions include:

(1) Conducting statistical research to develop new and improved sampling techniques, develop improved data collection methods, and identify methods of controlling sampling and nonsampling errors.

(2) Researching statistical computing methods and developing efficient uses of computer technology including telecommunications, networking, and other applications.

(3) Developing new statistical theory and models and solving statistical problems, including numerical methods involving advanced mathematical statistics.

(g) Director, Systems and Information Division. The Director is responsible for NASS information management system and processing services. Specific functions are:

(1) Designing, maintaining, and providing access to an integrated and standardized information management system containing sampling frames, survey data, estimates, and administrative records utilized by NASS.

(2) Providing appropriate support for assisting users of the information management system through documentation, evaluation, training, and resolution of information management problems.

(3) Designing and issuing all reports releasing official State and national estimates and forecasts from NASS.

(h) Chairperson, Agricultural Statistics Board. The Chairperson reviews, prepares, and issues on specific dates, following approval by the Secretary of Agriculture as provided by law (7 U.S.C. 411a) and Departmental Regulation, the official State and national estimates relating to crop production, livestock and livestock products, dairy and dairy products, poultry and poultry products, stocks of agricultural commodities, value of farm products, farm inputs, and other assigned agricultural aspects.

§ 3600.4 Authority to act for the Administrator.

In the absence of the Administrator, the following officials are designated to serve as Acting Administrator in the order indicated:

- Associate Administrator
- Deputy Administrator for Field Operations
- Director, Estimates Division
- Director, Survey Management Division
- Director, Systems and Information Division
APPENDIX A TO PART 3600—LIST OF STATE STATISTICAL OFFICES

Section 1. General

Information concerning NASS statistics programs and activities related to individual States may be obtained from the State Statistician, State Statistical Office, NASS, in the locations listed below.

PART 3601—PUBLIC INFORMATION

Sec.

3601.1 General statement.
3601.2 Public inspection, copying, and indexing.
3601.3 Requests for records.
3601.4 Multitrack processing.
3601.5 Denials.
3601.6 Appeals.
3601.7 Requests for published data and information.

AUTHORITY: 5 U.S.C. 301, 552; 7 CFR part 1, subpart A and appendix A thereeto.

SOURCE: 66 FR 57843, Nov. 19, 2001, unless otherwise noted.
§ 3601.1 General statement.

This part is issued in accordance with the regulations of the Secretary of Agriculture in part 1, subpart A of this title and appendix A thereto, implementing the Freedom of Information Act (FOIA) (5 U.S.C. 552), and governs the availability of records of the National Agricultural Statistics Service (NASS) to the public.

§ 3601.2 Public inspection, copying, and indexing.

5 U.S.C. 552(a)(2) requires that certain materials be made available for public inspection and copying and that a current index of these materials be published quarterly or otherwise be made available. Members of the public may request access to such materials maintained by NASS at the following office: Information Staff, ARS, REE, USDA, Room 1–2248, Mail Stop 5128, 5601 Sunnyside Avenue, Beltsville, MD 20705–5128; Telephone (301) 504–1640 or (301) 504–1655; TTY-VOICE (301) 504–1743. Office hours are 8 a.m. to 4:30 p.m. Information maintained in our electronic reading room can be accessed at http://www.ars.usda.gov/is/foia/#Electronic.

§ 3601.3 Requests for records.

Requests for records of NASS under 5 U.S.C. 552(a)(3) shall be made in accordance with §1.5 of this title and submitted to the FOIA Coordinator, Information Staff, ARS, REE, USDA, Mail Stop 5128, 5601 Sunnyside Avenue, Beltsville, MD 20705–5128; Telephone (301) 504–1640 or (301) 504–1655; TTY-VOICE (301) 504–1743; Facsimile (301) 504–1648; e-mail vherberger@ars.usda.gov or shutchison@ars.usda.gov. The FOIA Coordinator is delegated authority to make determinations regarding such requests in accordance with §1.3(c) of this title.

§ 3601.4 Multitrack processing.

(a) When NASS has a significant number of requests, the nature of which includes a determination within 20 working days, the requests may be processed in a multitrack processing system, based on the date of receipt, the amount of work and time involved in processing the request, and whether the request qualifies for expedited processing.

(b) NASS may establish as many processing tracks as appropriate; processing within each track shall be based on a first-in, first-out concept, and rank-ordered by the date of receipt of the request.

(c) A requester whose request does not qualify for the fastest track may be given an opportunity to limit the scope of the request in order to qualify for the fastest track. This multitrack processing system does not lessen agency responsibility to exercise due diligence in processing requests in the most expeditious manner possible.

(d) NASS shall process requests in each track on a “first-in, first-out” basis, unless there are unusual circumstances as set forth in §1.16 of this title, or the requester is entitled to expedited processing as set forth in §1.9 of this title.

§ 3601.5 Denials.

If the FOIA Coordinator determines that a requested record is exempt from mandatory disclosure and that discretionary release would be improper, the FOIA Coordinator shall give written notice of denial in accordance with §1.7(a) of this title.

§ 3601.6 Appeals.

Any person whose request is denied shall have the right to appeal such denial. Appeals shall be made in accordance with §1.13 of this title and should be addressed as follows: Administrator, NASS, U.S. Department of Agriculture, Washington, DC 20250.

§ 3601.7 Requests for published data and information.

(a) Published data and reports produced by NASS since 1995 are available via the NASS Web site at http://www.usda.gov/nass/ or an e-mail subscription may be established via the website under Publications. Searching on the website is available by topic, by title, or by date. The titles displayed in the search include NASS’s published periodicals and annual reports. Full text of all the titles is available at no cost (PDF Files beginning 1999). Printed copies and reports published after 1996 can be purchased from the ERS-NASS sales desk at the National Technical Information Center at 1 (800) 999–
6779 (8:30 a.m.–5 p.m. Eastern Time, M-F).

(b) Information on published data, printed subscription rates, and historic publications is available from the Secretary, Agricultural Statistics Board, NASS, U.S. Department of Agriculture, Washington, DC 20250. This information is also available from the NASS website under Publications, NASS Catalog, NASS Periodicals and Annual Reports. Published data, from each State Statistical Office, are available via the NASS website under State Information or by e-mail subscription. Published data subscription forms are available from the State Statistician at each State Statistical Office. Addresses are listed in appendix A to part 3600 of this chapter.

PART 3700—ORGANIZATION AND FUNCTIONS

Sec. 3700.1 General.
3700.2 Organization.
3700.3 Functions.
3700.4 Authority to act for the Administrator.

SOURCE: 61 FR 1827, Jan. 24, 1996, unless otherwise noted.

§ 3700.1 General.
The Economic Research Service (ERS), originally established in 1961 under the authority of the Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627), was reestablished as an agency of the U.S. Department of Agriculture of September 30, 1981 (46 FR 47747), in response to Secretary’s Memorandum 1000–1 of June 17, 1981, entitled “Reorganization of Department.” The mission of ERS is to provide economic and other social science information and analysis for public and private decisions on agriculture, food, natural resources, and rural America. Its primary customers are USDA policy officials and program administrators, the Office of the White House, Congress, and environmental, consumer, and rural public interest groups, including farm groups and industry.

§ 3700.2 Organization.
ERS maintains its offices at 1301 New York Avenue, NW., Washington, DC 20005–4788. The organization consists of:
(a) The Administrator;
(b) Associate Administrator;
(c) Five Divisions; Commercial Agriculture Division, Food and Consumer Economics Division, Information Services Division, Natural Resources and Environment Division, and Rural Economy Division; and
(d) Office of Energy and New Uses.

§ 3700.3 Functions.
(a) Administrator and Associate Administrator. The Administrator and Associate Administrator are responsible for developing and implementing policies and plans in support of a program of economic and social science research, analysis, and data dissemination. General functions are: Conducting research and staff analysis, and developing short to long-term outlook analysis and economic indicators.

(b) Director, Commercial Agriculture Division. The Director, Commercial Agriculture Division, is responsible for conducting a program of economic research; economic intelligence gathering, analysis, and reporting; and data development and dissemination on economic conditions, U.S. and foreign policies, and agriculture production, trade, and marketing. General functions are:
(1) Developing and monitoring current intelligence and indicators on domestic and international agricultural markets and related farm and trade developments and short to long-term forecasts of domestic and world agricultural markets.

(2) Assessing the technological, economic, and institutional forces influencing U.S. and world agricultural markets.

(3) Conducting special analyses of U.S. and world agricultural markets for policy officials to assist in policy development and the operation of USDA programs.

(4) Collecting necessary information and performing international, national, and regional macroeconomics analysis to estimate the effects of macro economic trends and events in the global economy on the American farm sector.

(c) Director, Food and Consumer Economic Division. The Director, Food and Consumer Economic Division, is responsible for providing economic research, monitoring and statistical indicators, and staff and the policy analysis of consumer and food marketing issues, including: Consumption determinants and trends; consumer demand for food quality, safety, and nutrition; food security; market competition; vertical coordination; nutrition education and food assistance programs; and food safety regulation. General functions are:
(1) Analyzing consumer behavior and food choices, including research regarding the socio-demographic and economic determinants of food and nutrient consumption; consumer valuation...
of quality, safety, and nutrition characteristics; and the role of information in determining food choices.

(2) Examining food assistance and nutrition programs, nutritional adequacy of diets, and food security, including costs and benefits of food assistance and nutrition programs, program and policy alternatives, the extent and social cost of good insecurity, and the role of food assistance in meeting larger goals of welfare programs.

(3) Analyzing the food processing and distribution sector, including the ability of the sector to meet changing consumer demand; the effect of government market interventions to facilitate that response; and the effect of government interventions and rapid changes in the sector on consumer and producer welfare.

(4) Analyzing food safety issues, including consumer benefits from risk reduction, production tradeoffs in reducing hazards, impact of proposed regulations and international harmonization, and policy alternatives.

(5) Developing and monitoring indicators of individual, household, and market level food consumption, expenditures, and nutrients; food marketing costs, marketing margins, and farm-retail price spreads; and food safety hazards, their effects, and mitigation.

(d) **Director, Information Services Division.** The Director, Information Services Division, is responsible for managing and directing agencywide information technology, communications, and administrative activities in support of the economic research and analysis mission of ERS. General functions are:

(1) Developing and managing information technology infrastructure and training.

(2) Developing and managing communications, publication, and dissemination programs, policies, and procedures.

(3) Providing operations and management services, including liaison with the ARS’s Administrative and Financial Management unit.

(e) **Director, Natural Resources and Environment Division.** The Director, Natural Resources and Environment Division, is responsible for providing economic research, monitoring and statistical indicators, and staff and policy analysis of agricultural resource and environment issues including the relationship between agriculture—its practices, technologies, policies, and resource use—and the environment, including effects on the sustainability of the natural resource base, preservation of species and genetic diversity, and environmental quality. General functions are:

(1) Developing and disseminating data for assessing the use of agricultural resources and technologies by agricultural producers. These data include use and ownership of land, use of agricultural chemicals and equipment, and water use.

(2) Evaluating the implications of alternative agricultural and resource conservation policies and programs on commodity prices, consumer welfare, competitiveness, and long-range maintenance of agricultural land and water resources.

(3) Analyzing the costs, benefits, and distributional impacts of alternative policies to reduce environmental and health risk externalities associated with agriculture.

(4) Monitoring and analyzing the uses and conditions of the nation’s water resources and the economic consequences of agricultural and environmental policies affecting water supply, use, and quality.

(5) Analyzing the impacts of national and global developments and domestic and international policies on the use and value of land, water, capital assets, and other agricultural production decisions.

(6) Assessing the possible impacts of proposed or anticipated domestic policy and program changes on agricultural production decisions.

(7) Assessing the effects of technology on input use and markets and evaluating the factors affecting input productivity and technology adoption.

(8) Analyzing the implications of global environmental change and sustainable development for U.S. agriculture.

(f) **Director, Rural Economy Division.** The Director, Rural Economy Division, is responsible for conducting a program of economic and social science research
and analysis on national rural and agricultural conditions and trends, and identifying and assessing the potential impact of public and private sector actions and policies that affect rural areas and the agricultural sector. General functions are:

1. Analyzing and reporting on current economic and demographic issues facing rural areas and agricultural, especially how changes in the national and global economies affect rural areas and the agriculture sector.

2. Determining the effects of economic, social, and governmental events and actions on the demand for and supply of rural local government services, the quality of such services, and the relationships between local services and the viability of rural communities.

3. Developing and disseminating information on current trends in the non-metropolitan and farm populations, the number, location and characteristics of such people, and the factors associated with these trends.

4. Developing estimates and analyzing labor force trends in rural labor markets, including analyses of unemployment and employment by industry and occupational groups, including farm labor.

5. Developing data on the income situation of rural people and evaluating the effectiveness of alternative public policies and programs in improving incomes of rural people, especially people in disadvantaged groups.

6. Monitoring information on and analyzing the development of rural portions of geographic regions of the United States, including changes in industry mix, impacts of energy costs, credit availability, and other economic activities.

7. Analyzing and reporting on developments in rural and agricultural financial markets and in Federal tax laws, and their consequences for agriculture and rural economies.

8. Collecting and disseminating financial information on farms and farm enterprises, and developing techniques necessary to measure and describe the financial condition of the agriculture sector and its components.

§ 3701.3 Requests for records.

Requests for records of ERS under 5 U.S.C. 552(a)(3) shall be made in accordance with §1.5 of this title and submitted to the FOIA Coordinator, Information Staff, ARS, REE, USDA, Mail Stop 5128, 5601 Sunnyside Avenue, Beltsville, MD 20705–5128; Telephone (301) 504–1640 or (301) 504–1655; TTY-VOICE (301) 504–1743; Facsimile (301) 504–1648; e-mail vherberger@ars.usda.gov or shutchison@ars.usda.gov. The FOIA Coordinator is delegated authority to make determinations regarding such requests in accordance with §1.3(c) of this title.

§ 3701.4 Multitrack processing.

(a) When ERS has a significant number of requests, the nature of which precludes a determination within 20 working days, the requests may be processed in a multitrack processing system, based on the date of receipt, the amount of work and time involved in processing the request, and whether the request qualifies for expedited processing.

(b) ERS may establish as many processing tracks as appropriate; processing within each track shall be based on a first-in, first-out concept, and rank-ordered by the date of receipt of the request.

(c) A requester whose request does not qualify for the fastest track may be given an opportunity to limit the scope of the request in order to qualify for the fastest track. This multitrack processing system does not lessen agency responsibility to exercise due diligence in processing requests in the most expeditious manner possible.

(d) ERS shall process requests in each track on a “first-in, first-out” basis, unless there are unusual circumstances as set forth in §1.16 of this title, or the requester is entitled to expedited processing as set forth in §1.9 of this title.

§ 3701.5 Denials.

If the FOIA Coordinator determines that a requested record is exempt from mandatory disclosure and that discretionary release would be improper, the FOIA Coordinator shall give written notice of denial in accordance with §1.7(a) of this title.

§ 3701.6 Appeals.

Any person whose request is denied shall have the right to appeal such denial. Appeals shall be made in accordance with §1.14 of this title and should be addressed as follows: Administrator, ERS, U.S. Department of Agriculture, Washington, DC 20250.

§ 3701.7 Requests for published data and information.

Published data and reports produced by ERS since 1996 are available on the ERS Web site at http://www.ers.usda.gov. Searching on the website is available by topic, by title, or by date. The titles displayed in the search include ERS’s separately published research reports as well as articles in ERS-produced periodicals. Full text of all the titles are available at no cost (usually in PDF files). Printed copies and reports published before 1996 (while supplies last) can be purchased from the ERS-NASS sales desk at the National Technical Information Center at 1–800–999–6779 (8:30 a.m.–5 p.m., Eastern Standard Time, M-F).

PART 3800—ORGANIZATION AND FUNCTIONS

Sec.
3800.1 General.
3800.2 Organization.
3800.3 Functions.
3800.4 Authority to act for the Chairperson.

AUTHORITY: 5 U.S.C. 301 and 552, and 7 CFR 2.86, except as otherwise stated.

SOURCE: 53 FR 5358, Feb. 24, 1988, unless otherwise noted.

§ 3800.1 General.

The World Agricultural Outlook Board (WAOB) was established on June 3, 1977, by Secretary’s Memorandum 1920, entitled “World Food and Agricultural Outlook and Situation Board.” The primary responsibility of WAOB is to coordinate and review all commodity and aggregate agricultural and food data and analyses used to develop outlook and situation material within the Department of Agriculture.

§ 3800.2 Organization.

The central and only office of WAOB is located in Washington, DC, and consists of the Chairperson, Deputy Chairperson, and supporting staff.

§ 3800.3 Functions.

The WAOB has four major areas of responsibility:

(a) Agricultural outlook and situation.
(1) Coordinate and review all crop and commodity data used to develop outlook and situation material within the Department of Agriculture.
(2) Oversee and clear for consistency of analytical assumptions and results, all estimates and analyses which significantly relate to international and domestic commodity supply and demand. This includes such estimates and analyses prepared for public distribution by the Foreign Agricultural Service, the Economic Research Service, or by any other agency or office of the Department.
(3) Participate in planning and developing research programs relating to improving the Department’s forecasting and estimating capabilities.
(4) Provide liaison between the Department and Commodity Futures Trading Commission to assure that the futures market serves the best interest of agriculture and the public.
(5) Plan and participate in Departmental, interdepartmental, regional and international outlook conferences and briefings, to maintain an awareness of current and upcoming economic issues significant to the food and agricultural system.
(b) Interagency commodity estimates. (1) Establish Interagency Commodity Estimates Committees to bring together estimates and analyses from supporting agencies and to develop official estimates of supply, utilization, and prices for commodities.
(2) Review for consistency of analytical assumptions and results, all proposed decisions made by the Interagency Commodity Estimates Committee prior to any release outside the Department.
(c) Weather and climate. (1) Serve as a focal point within the Department for coordination of weather, climate, and related crop monitoring activities.
(d) Remote sensing. (1) Provide technical assistance, coordination, and guidance to Department agencies in planning, developing, and carrying out satellite remote sensing activities to assure full consideration and evaluation of advanced technology.
(2) Coordinate administrative, management, and budget information relating to Department’s remote sensing activities.

§ 3800.4 Authority to act for the Chairperson.

When the Chairperson is absent or temporarily unavailable, the Deputy Chairperson is authorized to act for the Chairperson.

PART 3801—AVAILABILITY OF INFORMATION TO THE PUBLIC

Sec.
3801.1 General.
3801.2 Public inspection, copying, and indexing.
3801.3 Requests for records.
3801.4 Denials.
3801.5 Appeals.
3801.6 Requests for published data and information.

AUTHORITY: 5 U.S.C. 301 and 552; 7 CFR 1.1–1.23 and Appendix A.
§ 3801.1 General.
This part is issued in accordance with the regulations of the Secretary of Agriculture in §§1.1–1.23 of this title and Appendix A thereto, implementing the Freedom of Information Act (FOIA) (5 U.S.C. 552), and governs the availability of records of the World Agricultural Outlook Board (WAOB) to the public.

§ 3801.2 Public inspection, copying, and indexing.
5 U.S.C. 552(a)(2) requires that certain materials be made available for public inspection and copying and that a current index of these materials be published quarterly or otherwise be made available. WAOB does not maintain any materials within the scope of these requirements.

§ 3801.3 Requests for records.
Requests for records of WAOB shall be made in accordance with §1.6 (a) and (b) of this title and addressed to: Economics Agencies FOIA Officer, Economics Management Staff, USDA, Room 4310, South Building, 12th and Independence Avenue SW., Washington, DC 20250. This official is delegated authority to make determinations regarding such requests in accordance with §1.3(a)(3) of this title.

§ 3801.4 Denials.
If the Economics Agencies FOIA Officer determines that a requested record is exempt from mandatory disclosure and that discretionary release would be improper, the Economics Agencies FOIA Officer shall give written notice of denial in accordance with §1.8(a) of this title.

§ 3801.5 Appeals.
Any person whose request is denied shall have the right to appeal such denial. Appeals shall be in accordance with §1.6(e) of this title and addressed to the Chairperson, World Agricultural Outlook Board, U.S. Department of Agriculture, Washington, DC 20250.

§ 3801.6 Requests for published data and information.
Information on published data, subscription rates, and all WAOB programs is available from the Chairperson, World Agricultural Outlook Board, U.S. Department of Agriculture, Washington, DC 20250.

PART 4274—DIRECT AND INSURED LOANMAKING

Subparts A–C [Reserved]

Subpart D—Intermediary Relending Program (IRP)

§ 4274.301 Introduction.

(a) This subpart contains regulations for loans made by the Agency to eligible intermediaries and applies to borrowers and other parties involved in making such loans. The provisions of this subpart supersede conflicting provisions of any other subpart. The servicing and liquidation of such loans will be in accordance with part 1951, subpart R, of this title.

(b) The purpose of the program is to alleviate poverty and increase economic activity and employment in rural communities, especially disadvantaged and remote communities, through financing targeted primarily towards smaller and emerging businesses, in partnership with other public and private resources, and in accordance with State and regional strategy based on identified community needs. This purpose is achieved through loans made to intermediaries that establish programs for the purpose of providing loans to ultimate recipients for business facilities and community developments in a rural area.

(c) Proposed intermediaries are required to identify any known relationship or association with a USDA Rural Development employee. Any processing or servicing Agency activity conducted pursuant to this subpart involving authorized assistance to United States Department of Agriculture (USDA) Rural Development employees, members of their families, close relatives, or business or close personal associates, is subject to the provisions of subpart D of part 1900 of this chapter.

(d) Copies of all forms, regulations, and Agency procedures referenced in this subpart are available in the National Office or any Rural Development State Office.

§ 4274.302 Definitions and abbreviations.

(a) General definitions. The following definitions are applicable to the terms used in this subpart:

Agency. The Federal agency within the USDA with responsibility assigned by the Secretary of Agriculture to administer IRP. At the time of publication of this rule, that Agency was the Rural Business-Cooperative Service (RBS).

Agency IRP loan funds. Cash proceeds of a loan obtained from the Agency through IRP, including the portion of
an IRP revolving fund directly provided by the Agency IRP loan. Agency IRP loan funds are Federal funds.

Agricultural production or agriculture production. The cultivation, production, growing, raising, feeding, housing, breeding, hatching, or managing of crops, plants, animals, or birds, either for fiber, food for human consumption, or livestock feed.

Initial Agency IRP loan. The first IRP loan made by the Agency to an intermediary.

Intermediary. The entity requesting or receiving Agency IRP loan funds for establishing a revolving fund and re-lending to ultimate recipients.

IRP revolving fund. A group of assets, obtained through or related to an Agency IRP loan and recorded by the intermediary in a bookkeeping account or set of accounts and accounted for, along with related liabilities, revenues, and expenses, as an entity or enterprise separate from the intermediary’s other assets and financial activities.

Principals of intermediary. Members, officers, directors, and other individuals or entities directly involved in the operation and management (including setting policy) of an intermediary.

Processing office or officer. The processing office for an IRP application is the office within the Agency administrative organization with assigned authority and responsibility to process the application. The processing office is the primary contact for the proposed intermediary and maintains the official application case file. The processing officer for an application is the person in charge of the processing office. The processing officer is responsible for ensuring that all regulations and Agency procedures are complied with in regard to applications under the office’s jurisdiction.

Revolved funds. The cash portion of an IRP revolving fund that is not composed of Agency loan funds, including funds that are repayments of Agency IRP loans and including fees and interest collected on such loans. Revolved funds shall not be considered Federal funds.

Rural area. All territory of a State that is not within the outer boundary of any city having a population of 25,000 or more, according to the latest decennial census.

Servicing office or officer. The servicing office for an IRP loan is the office within the Agency administrative organization with assigned authority and responsibility to service the loan. The servicing office is the primary contact for the borrower and maintains the official case file after the loan is closed. The servicing officer for a loan is the person in charge of the servicing office. The servicing officer is responsible for ensuring that all regulations and Agency procedures are complied with in regard to loans under the office’s jurisdiction.

State. Any of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

Statewide Nonmetropolitan Median Household Income (SNMHI). Median household income of the State’s non-metropolitan counties and portions of metropolitan counties outside of cities, towns or places of 50,000 or more population.

Subsequent IRP loan. An IRP loan from the Agency to an intermediary that has received one or more IRP loans previously.

Technical assistance. A function performed for the benefit of an ultimate recipient or proposed ultimate recipient, which is a problem solving activity. The Agency will determine whether a specific activity qualifies as technical assistance.

Ultimate recipient. An entity or individual that receives a loan from an intermediary’s IRP revolving fund.

Underrepresented group. U.S. citizens with identifiable common characteristics, that have not received IRP assistance or have received a lower percentage of total IRP dollars than the percentage they represent of the general population.

United States. The 50 States of the United States of America, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American
Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

(b) Abbreviations. The following are applicable to this subpart:

- B&I—Business and Industry
- IRP—Intermediary Relending Program
- OGC—Office of the General Counsel
- OIG—Office of Inspector General
- OMB—Office of Management and Budget
- RBS—Rural Business-Cooperative Service, or any successor agency
- RDLF—Rural Development Loan Fund
- USDA—United States Department of Agriculture

§§ 4274.303–4274.306 [Reserved]

§ 4274.307 Eligibility requirements—Intermediary.

(a) The types of entities which may become intermediaries are:

(1) Private nonprofit corporations.

(2) Public agencies—Any State or local government, or any branch or agency of such government having authority to act on behalf of that government, borrow funds, and engage in activities eligible for funding under this subpart.

(3) Indian groups—Indian tribes on a Federal or State reservation or other federally recognized tribal groups.

(4) Cooperatives—Incorporated associations, at least 51 percent of whose members are rural residents, whose members have one vote each, and which conduct, for the mutual benefit of their members, such operations as producing, purchasing, marketing, processing, or other activities aimed at improving the income of their members as producers or their purchasing power as consumers.

(b) The intermediary must:

(1) Have the legal authority necessary for carrying out the proposed loan purposes and for obtaining, giving security for, and repaying the proposed loan.

(2) Have a proven record of successfully assisting rural business and industry, or, for intermediaries that propose to finance community development, a proven record of successfully assisting rural community development projects of the type planned.

(i) Except as provided in paragraph (b)(2)(ii) of this section, such record will include recent experience in loan making and servicing with loans that are similar in nature to those proposed for the IRP and a delinquency and loss rate acceptable to the Agency.

(ii) The Agency may approve an exception to the requirement for loan making and servicing experience provided:

(A) The proposed intermediary has a proven record of successfully assisting (other than through lending) rural business and industry or rural community development projects of the type planned; and

(B) The proposed intermediary will, before the loan is closed, bring individuals with loan making and servicing experience and expertise into the operation of the IRP revolving fund.

(c) Have the services of a staff with loan making and servicing expertise acceptable to the Agency.

(d) Have capitalization acceptable to the Agency.

(e) No loans will be extended to an intermediary unless:

(1) There is adequate assurance of repayment of the loan based on the fiscal and managerial capabilities of the proposed intermediary.

(2) The loan is not otherwise available on reasonable (i.e., usual and customary) rates and terms from private sources or other Federal, State, or local programs.

(3) The amount of the loan, together with other funds available, is adequate to assure completion of the project or achieve the purposes for which the loan is made.

(d) At least 51 percent of the outstanding interest or membership in any nonpublic body intermediary must be composed of citizens of the United States or individuals who reside in the United States after being legally admitted for permanent residence.

(e) Any delinquent debt to the Federal Government by the intermediary or any principal of the intermediary shall cause the intermediary to be ineligible to receive any IRP loan. Agency loan funds may not be used to satisfy the debt.
§ 4274.308 Eligibility requirements—Ultimate recipients.

(a) Ultimate recipients may be individuals, public or private organizations, or other legal entities, with authority to incur the debt and carry out the purpose of the loan.

(b) To be eligible to receive loans from the IRP revolving loan fund, ultimate recipients:

(1) Must be citizens of the United States or reside in the United States after being legally admitted for permanent residence. In the case of an organization, at least 51 percent of the outstanding membership or ownership must be either citizens of the United States or residents of the United States after being legally admitted for permanent residence.

(2) Must be located in a rural area of a State.

(3) Must be unable to finance the proposed project from its own resources or through commercial credit or other Federal, State, or local programs at reasonable rates and terms.

(4) Must, along with its principal officers (including their immediate family), hold no legal or financial interest or influence in the intermediary. Also, the intermediary and its principal officers (including immediate family) must hold no legal or financial interest or influence in the ultimate recipient. However, this paragraph shall not prevent an intermediary that is organized as a cooperative from making a loan to one of its members.

(c) Any delinquent debt to the Federal Government by the ultimate recipient or any of its principals shall cause the proposed ultimate recipient to be ineligible to receive a loan from Agency IRP loan funds. Agency IRP loan funds may not be used to satisfy the delinquency.

§§ 4274.309–4274.313 [Reserved]

§ 4274.314 Loan purposes.

(a) Intermediaries. Agency IRP loan funds must be placed in the intermediary’s IRP revolving fund and used by the intermediary to provide direct loans to eligible ultimate recipients.

(b) Ultimate recipients. Loans from the intermediary to the ultimate recipient using the IRP revolving fund must be for community development projects, the establishment of new businesses, expansion of existing businesses, creation of employment opportunities, or saving existing jobs. Such loans may include, but are not limited to:

(1) Business and industrial acquisitions when the loan will keep the business from closing, prevent the loss of employment opportunities, or provide expanded job opportunities.

(2) Business construction, conversion, enlargement, repair, modernization, or development.

(3) Purchase and development of land, easements, rights-of-way, buildings, facilities, leases, or materials.

(4) Purchase of equipment, leasehold improvements, machinery, or supplies.

(5) Pollution control and abatement.

(6) Transportation services.

(7) Start-up operating costs and working capital.

(8) Interest (including interest on interim financing) during the period before the facility becomes income producing, but not to exceed 3 years.

(9) Feasibility studies.

(10) Debt refinancing.

(i) The intermediary is responsible for making prudent lending decisions based on sound underwriting principles when considering the restructuring of an ultimate recipient’s debt; and

(ii) Refinancing debts may be allowed only when it is determined by the intermediary that the project is viable and refinancing is necessary to create new or save existing jobs or create or continue a needed service; and

(iii) On any request for refinancing of existing secured loans, the intermediary is required, at a minimum, to obtain the previously held collateral as security for the loans and must not pay off a creditor in excess of the value of the collateral. Additional collateral will be required when the refinancing of unsecured loans is unavoidable to accomplish the necessary strengthening of the ultimate recipient’s position.

(11) Reasonable fees and charges only as specifically listed in this paragraph. Authorized fees include loan packaging fees, environmental data collection fees, management consultant fees, and
other fees for services rendered by professionals. Professionals are generally persons licensed by States or accreditation associations, such as engineers, architects, lawyers, accountants, and appraisers. The maximum amount of fee will be what is reasonable and customary in the community or region where the project is located. Any such fees are to be fully documented and justified.

(12) Hotels, motels, tourist homes, bed and breakfast establishments, convention centers, and other tourist and recreational facilities except as prohibited by §4274.319.

(13) Educational institutions.

(14) Revolving lines of credit: Provided:

(i) The portion of the intermediary’s total IRP revolving fund that is committed to or in use for revolving lines of credit will not exceed 25 percent at any time;

(ii) All ultimate recipients receiving revolving lines of credit will be required to reduce the outstanding balance of the revolving line of credit to zero at least one time each year;

(iii) All revolving lines of credit will be approved by the intermediary for a specific maximum amount and for a specific maximum time period, not to exceed two years;

(iv) The intermediary will provide a detailed description, which will be incorporated into the intermediary’s work plan and be subject to Agency approval, of how the revolving lines of credit will be operated and managed. The description will include evidence that the intermediary has an adequate system for:

(A) Interest calculations on varying balances, and

(B) Monitoring and control of the ultimate recipients’ cash, inventory, and accounts receivable; and

(v) If, at any time, the Agency determines that an intermediary’s operation of revolving lines of credit is causing excessive risk of loss for the intermediary or the Government, the Agency may terminate the intermediary’s authority to use the IRP revolving fund for revolving lines of credit. Such termination will be by written notice and will prevent the intermediary from approving any new lines of credit or extending any existing revolving lines of credit beyond the effective date of termination contained in the notice.

(15) Aquaculture-based rural small businesses.

[63 FR 6053, Feb. 6, 1998, as amended at 73 FR 54307, Sept. 19, 2008]

§ 4274.319 Ineligible loan purposes.

Agency IRP loan funds may not be used for payment of the intermediary’s administrative costs or expenses. The IRP revolving fund may not be used for:

(a) Assistance in excess of what is needed to accomplish the purpose of the ultimate recipient’s project .

(b) Distribution or payment to the owner, partners, shareholders, or beneficiaries of the ultimate recipient or members of their families when such persons will retain any portion of their equity in the ultimate recipient.

(c) Charitable institutions, that would not have revenue from sales, fees, or stable revenue to support the operation and repay the loan, and fraternal organizations.

(d) Assistance to Federal government employees, active duty military personnel, employees of the intermediary, or any organization for which such persons are directors or officers or have 20 percent or more ownership.

(e) A loan to an ultimate recipient which has an application pending with or a loan outstanding from another intermediary involving an IRP revolving fund if the total IRP loans would exceed the limits established in §4274.331(b).

(f) Agricultural production.

(g) The transfer of ownership unless the loan will keep the business from closing, or prevent the loss of employment opportunities in the area, or provide expanded job opportunities.

(h) Community antenna television services or facilities.

(i) Any illegal activity.

(j) Any project that is in violation of either a Federal, State, or local environmental protection law or regulation or an enforceable land use restriction unless the assistance given will result in curing or removing the violation.
(k) Lending and investment institutions and insurance companies.
(l) Golf courses, race tracks, or gambling facilities.
(m) For any legitimate business activity when more than 10 percent of the annual gross revenue is derived from legalized gambling activity.

[63 FR 6053, Feb. 6, 1998, as amended at 73 FR 54307, Sept. 19, 2008]

§ 4274.320 Loan terms.

(a) No loan to an intermediary shall be extended for a period exceeding 30 years. Interest and principal payments will be scheduled at least annually. The initial principal payment may be deferred (during the period before the facility becomes income producing) by the Agency, but not more than 3 years.

(b) Loans made by an intermediary to an ultimate recipient from the IRP revolving fund will be scheduled for repayment over a term negotiated by the intermediary and ultimate recipient. The term must be reasonable and prudent considering the purpose of the loan, expected repayment ability of the ultimate recipient, and the useful life of collateral, and must be within any limits established by the intermediary’s work plan.

§§ 4274.321–4274.324 [Reserved]

§ 4274.325 Interest rates.

(a) Loans made by the Agency pursuant to this subpart shall bear interest at a fixed rate of 1 percent per annum over the term of the loan.

(b) Interest rates charged by intermediaries to ultimate recipients on loans from the IRP revolving fund shall be negotiated by the intermediary and ultimate recipient. The rate must be within limits established by the intermediary’s work plan approved by the Agency. The rate should normally be the lowest rate sufficient to cover the loan’s proportional share of the IRP revolving fund’s debt service costs, reserve for bad debts, and administrative costs.

§ 4274.326 Security.

(a) Intermediaries. Security for all loans to intermediaries must be such that the repayment of the loan is reasonably assured, when considered along with the intermediary’s financial condition, work plan, and management ability. It is the responsibility of the intermediary to make loans to ultimate recipients in such a manner that will fully protect the interests of the intermediary and the Government.

(1) Security for such loans may include, but is not limited to:

(i) Any realty, personalty, or intangible capable of being mortgaged, pledged, or otherwise encumbered by the intermediary in favor of the Agency; and

(ii) Any realty, personalty, or intangible capable of being mortgaged, pledged, or otherwise encumbered by an ultimate recipient in favor of the Agency.

(2) Initial security will consist of a pledge by the intermediary of all assets now in or hereafter placed in the IRP revolving fund, including cash and investments, notes receivable from ultimate recipients, and the intermediary’s security interest in collateral pledged by ultimate recipients. Except for good cause shown, the Agency will not obtain assignments of specific assets at the time a loan is made to an intermediary or ultimate recipient. The intermediary will covenant that, in the event the intermediary’s financial condition deteriorates or the intermediary takes action detrimental to prudent fund operation or fails to take action required of a prudent lender, the intermediary will provide additional security, execute any additional documents, and undertake any reasonable acts the Agency may request to protect the Agency’s interest or to perfect a security interest in any asset, including physical delivery of assets and specific assignments to the Agency. All debt instruments and collateral documents used by an intermediary in connection with loans to ultimate recipients must be assignable.

(3) In addition to normal security documents, a first lien interest in the intermediary’s revolving fund account will be accomplished by a control agreement satisfactory to RBS. The control agreement does not have to require RBS signature for withdrawals. The depository bank shall waive its offset and recoupment rights against the
depository account to RBS and subordinate any liens it may have against the IRP depository bank account. The use of Form RD 402-1, "Deposit Agreement," or similar form developed by the State Regional Office of the General Counsel is acceptable.

(b) Ultimate recipients. Security for a loan from an intermediary’s IRP revolving fund to an ultimate recipient will be negotiated between the intermediary and ultimate recipient, within the general security policies established by the intermediary and approved by the Agency.

§§ 4274.327–4274.330 [Reserved]

§ 4274.331 Loan limits.

(a) Intermediary. (1) No loan to an intermediary will exceed the maximum amount the intermediary can reasonably be expected to lend to eligible ultimate recipients, in an effective and sound manner, within 1 year after loan closing.

(2) The initial Agency IRP loan as defined in §4274.302(a) will not exceed $2 million.

(3) Intermediaries that have received one or more IRP loans may apply for and be considered for subsequent IRP loans provided:

(i) At least 80 percent of each of an intermediary’s IRP loans, except those earmarked for special purposes, must have been disbursed to eligible ultimate recipients or the subsequent loan will serve a geographic area not included in an area currently served.

(ii) The intermediary is promptly repaying any collections from loans made from its IRP revolving fund in excess of what is needed for required debt service, reasonable administrative costs approved by the Agency, and a reasonable reserve for debt service and uncollectible accounts;

(iii) The outstanding loans of the intermediary’s IRP revolving fund are generally sound; and

(iv) The intermediary is in compliance with all applicable regulations and its loan agreements with the Agency.

(4) Subsequent loans will not exceed $1 million each and not more than one loan will be approved by the Agency for an intermediary in any single fiscal year unless the request is from an IRP earmark.

(5) Total outstanding IRP indebtedness of an intermediary to the Agency will not exceed $15 million at any time.

(b) Ultimate recipients. Loans from intermediaries to ultimate recipients using the IRP revolving fund must not exceed the lesser of:

(1) $250,000; or

(2) Seventy five percent of the total cost of the ultimate recipient’s project for which the loan is being made.

(c) Portfolio. No more than 25 percent of an IRP loan approved may be used for loans to ultimate recipients that exceed $150,000. This limit does not apply to revolving funds.

[63 FR 6053, Feb. 6, 1998, as amended at 70 FR 38573, July 5, 2005]

§ 4274.332 Post award requirements.

(a) Applicability. Intermediaries receiving loans under this program shall be governed by these regulations, the loan agreement, the approved work plan, security interests, and any other conditions which the Agency may impose in making a loan. Whenever this subpart imposes a requirement on loans made from the “IRP revolving fund,” such requirement shall apply to all loans made by an intermediary to an ultimate recipient from the intermediary’s IRP revolving fund for as long as any portion of the intermediary’s IRP loan from the Agency remains unpaid. Whenever this subpart imposes a requirement on loans made by intermediaries from “Agency IRP loan funds,” without specific reference to the IRP revolving fund, such requirement shall apply only to loans made by an intermediary using Agency IRP loan funds, and will not apply to loans made from revolving funds.

(b) Maintenance of IRP revolving fund. For as long as any part of an IRP loan to an intermediary remains unpaid, the intermediary must maintain the IRP revolving fund. All Agency IRP loan funds received by an intermediary...
must be deposited into an IRP revolving fund. The intermediary may transfer additional assets into the IRP revolving fund. All cash of the IRP revolving fund shall be deposited in a separate bank account or accounts. No other funds of the intermediary will be commingled with such money. All moneys deposited in such bank account or accounts shall be money of the IRP revolving fund. Loans to ultimate recipients are advanced from the IRP revolving fund. The receivables created by making loans to ultimate recipients, the intermediary’s security interest in collateral pledged by ultimate recipients, collections on the receivables, interest, fees, and any other income or assets derived from the operation of the IRP revolving fund are a part of the IRP revolving fund.

(1) The portion of the IRP revolving fund that consists of Agency IRP loan funds, on a last-in-first-out basis, may only be used for making loans in accordance with §4274.314 of this subpart. The portion of the IRP revolving fund which consists of revolved funds may be used for debt service, reasonable administrative costs, or reserves in accordance with this section, or for making additional loans.

(2) The intermediary must submit an annual budget of proposed administrative costs for Agency approval. The amount removed from the IRP revolving fund for administrative costs in any year must be reasonable, must not exceed the actual cost of operating the IRP revolving fund, including loan servicing and providing technical assistance, and must not exceed the amount approved by the Agency in the intermediary’s annual budget.

(3) A reasonable amount of revolved funds must be used to create a reserve for bad debts. Reserves must be accumulated over a period of years. The total amount should not exceed maximum expected losses, considering the quality of the intermediary’s portfolio of loans. Unless the intermediary provides loss and delinquency records that, in the opinion of the Agency, justifies different amounts, a reserve for bad debts of 6 percent of outstanding loans must be accumulated over 3 years and then maintained.

(4) Any cash in the IRP revolving fund from any source that is not needed for debt service, approved administrative costs, or reasonable reserves must be available for additional loans to ultimate recipients.

(5) All reserves and other cash in the IRP revolving loan fund not immediately needed for loans to ultimate recipients or other authorized uses will be deposited in accounts in banks or other financial institutions. Such accounts will be fully covered by Federal deposit insurance or fully collateralized with U.S. Government obligations, and must be interest bearing. Any interest earned thereon remains a part of the IRP revolving fund.

(6) If an intermediary receives more than one IRP loan, it need not establish and maintain a separate IRP revolving loan fund for each loan; it may combine them and maintain only one IRP revolving fund, unless the Agency requires separate IRP revolving funds because there are significant differences in the loan purposes, work plans, loan agreements, or requirements for the loans. The Agency may allow loans with different requirements to be combined into one IRP revolving fund if the intermediary agrees in writing to operate the combined revolving funds in accordance with the most stringent requirements as required by the Agency.

§§ 4274.333–4274.336 [Reserved]

§ 4274.337 Other regulatory requirements.

(a) Intergovernmental consultation. The IRP is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. The approval of a loan to an intermediary will be the subject of intergovernmental consultation. For each ultimate recipient to be assisted with a loan from Agency IRP loan funds and for which the State in which the ultimate recipient is to be located has elected to review the program under their intergovernmental review process, the State Single Point of Contact must be notified. Notification, in the form of a project description, must be initiated by the intermediary or the ultimate recipient. Any
comments from the State must be included with the intermediary’s request to use the Agency loan funds for the ultimate recipient. Prior to the Agency’s decision on the request, compliance with the requirements of intergovernmental consultation must be demonstrated for each ultimate recipient. These requirements are set forth in U.S. Department of Agriculture regulations 7 CFR part 3015, subpart V, and RD Instruction 1970–I, ‘Intergovernmental Review,’ available in any Agency office or on the Agency’s Web site.

(b) Environmental requirements. (1) Unless specifically modified by this section, the requirements of part 1940, subpart G, of this title apply to this subpart. Intermediaries and ultimate recipients must consider the potential environmental impacts of their projects at the earliest planning stages and develop plans to minimize the potential to adversely impact the environment. Both the intermediaries and the ultimate recipients must cooperate and furnish such information and assistance as the Agency needs to make any of its environmental determinations.

(2) For each application for an initial loan to an intermediary, the Agency will review the application, supporting materials, and any environmental information required from the intermediary and complete a Class II environmental assessment. This assessment will focus on the potential cumulative impacts of the projects as well as any environmental concerns or problems that are associated with individual projects that can be identified at this time. Neither the completion of the environmental assessment nor the approval of the application is an Agency commitment to the use of loan funds for a specific project; therefore, no public notification requirements for a Class II assessment will apply to the application. An application for a subsequent loan to an intermediary may be considered a categorical exclusion for environmental review, rather than a Class II action, provided the service area, eligibility requirements, and eligible purposes for loans to ultimate recipients will be the same for the subsequent loan as were considered in the previous environmental assessment, and the purpose of the loan is not environmentally controversial.

(3) For each proposed loan from an intermediary to an ultimate recipient using Agency IRP loan funds, the Agency will complete the environmental review required by part 1940, subpart G, of this title including public notification requirements. The results of this review will be used by the Agency in making its decision on concurrence in the proposed loan. The Agency will prepare an Environmental Impact Statement for any application for a loan from Agency IRP loan funds determined to have a significant effect on the quality of the human environment.

(c) Equal opportunity and non-discrimination requirements. (1) In accordance with title V of Pub. L. 93–495, the Equal Credit Opportunity Act, and section 504 of the Rehabilitation Act for Federally Conducted Programs and Activities, neither the intermediary nor the Agency will discriminate against any employee, intermediary, or proposed ultimate recipient on the basis of sex, marital status, race, color, religion, national origin, age, physical or mental disability (provided the proposed intermediary or proposed ultimate recipient has the capacity to contract), because all or part of the proposed intermediary’s or proposed ultimate recipient’s income is derived from public assistance of any kind, or because the proposed intermediary or proposed ultimate recipient has in good faith exercised any right under the Consumer Credit Protection Act, with respect to any aspect of a credit transaction anytime Agency loan funds are involved.

(2) The regulations contained in subpart E of part 1901 of this title apply to this program.

(3) The Administrator will assure that equal opportunity and non-discrimination requirements are met in accordance with the Equal Credit Opportunity Act, title VI of the Civil Rights Act of 1964, “Nondiscrimination in Federally Assisted Programs,” 42 U.S.C. 2000d–4, Section 504 of the Rehabilitation Act for Federally Conducted Programs and Activities, the Age Discrimination Act of 1975, and the Americans With Disabilities Act.
§4274.338 Loan agreements between the Agency and the intermediary.

A loan agreement or a supplement to a previous loan agreement must be executed by the intermediary and the Agency at loan closing for each loan. The loan agreement will be prepared by the Agency and reviewed by the intermediary prior to loan closing.

(a) The loan agreement will, as a minimum, set out:

(1) The amount of the loan;

(2) The interest rate;

(3) The term and repayment schedule;

(4) The provisions for late charges. The intermediary shall pay a late charge of 4 percent of the payment due if payment is not received within 15 calendar days following the due date. The late charge shall be considered unpaid if not received within 30 calendar days of the missed due date for which it was imposed. Any unpaid late charge shall be added to principal and be due as an extra payment at the end of the term. Acceptance of a late charge by the Agency does not constitute a waiver of default;

(5) The disbursement procedure. Disbursement of loan funds by the Agency to the intermediary shall take place after the loan agreement and promissory note are executed, and any other conditions precedent to disbursement of funds are fully satisfied. For purposes of computing interest, the date of each draw down shall constitute the date the funds are advanced under the loan agreement;

(i) The intermediary may initially draw up to 25 percent of the loan funds or, the intermediary must have at least one ultimate recipient loan application ready to close. Upon requesting a disbursement, the intermediary must provide documentation showing that its equity contribution has been deposited into the IRP revolving loan fund account. The initial draw must be deposited in an interest bearing account in accordance with §4274.332(b)(5) until needed and must be used for loans to ultimate recipients before any additional Agency IRP loan funds may be drawn by the intermediary.

(ii) After the initial draw of funds, an intermediary may draw down only such funds as are necessary to cover a 30-day period in implementing its approved work plan. Advances must be requested by the intermediary in writing;

(6) The provisions regarding default. On the occurrence of any event of default, the Agency may declare all or any portion of the debt and interest to be immediately due and payable and may proceed to enforce its rights under the loan agreement or any other instruments securing or relating to the loan and in accordance with the applicable law and regulations. Any of the following may be regarded as an "event of
default” in the sole discretion of the Agency:

(i) Failure of the intermediary to carry out the specific activities in its loan application as approved by the Agency or comply with the loan terms and conditions of the loan agreement, any applicable Federal or State laws, or with such USDA or Agency regulations as may become applicable;

(ii) Failure of the intermediary to pay within 15 calendar days of its due date any installment of principal or interest on its promissory note to the Agency;

(iii) The occurrence of:

(A) The intermediary becoming insolvent, or ceasing, being unable, or admitting in writing its inability to pay its debts as they mature, or making a general assignment for the benefit of, or entering into any composition or arrangement with creditors, or;

(B) Proceedings for the appointment of a receiver, trustee, or liquidator of the intermediary, or of a substantial part of its assets, being authorized or instituted by or against it;

(iv) Submission or making of any report, statement, warranty, or representation by the intermediary or agent on its behalf to USDA or the Agency in connection with the financial assistance awarded hereunder which is false, incomplete, or incorrect in any material respect; or

(v) Failure of the intermediary to remedy any material adverse change in its financial or other condition (such as the representational character of its board of directors or policymaking body) arising since the date of the Agency’s award of assistance hereunder which is false, incomplete, or incorrect in any material respect; or

(7) The insurance requirements. (i) Hazard insurance with a standard mortgage clause naming the intermediary as beneficiary will be required by the intermediary on every ultimate recipient’s project funded from the IRP revolving fund in an amount that is at least the lesser of the depreciated replacement value of the property being insured or the amount of the loan. Hazard insurance includes fire, windstorm, lightning, hail, business interruption, explosion, riot, civil commotion, aircraft, vehicle, marine, smoke, builder’s risk, public liability, property damage, flood or mudslide, or any other hazard insurance that may be required to protect the security. The intermediary’s interest in the insurance will be assigned to the Agency, upon the Agency’s request, in the event of default by the intermediary.

(ii) Ordinarily, life insurance, which may be decreasing term insurance, is required for the principals and key employees of the ultimate recipient funded from the IRP revolving fund and will be assigned or pledged to the intermediary and subsequently, in the event of request by the Agency following default by the intermediary, to the Agency. A schedule of life insurance available for the benefit of the loan will be included as part of the application.

(iii) Workmen’s compensation insurance on ultimate recipients is required in accordance with the State law.

(iv) Flood insurance. The intermediary is responsible for determining if an ultimate recipient funded from the IRP revolving fund is located in a special flood or mudslide hazard area. If the ultimate recipient is in a flood or mudslide area, then flood or mudslide insurance must be provided in accordance with subpart B of part 1806 of this chapter.

(v) Intermediaries will provide fidelity bond coverage for all persons who have access to intermediary funds. Coverage may be provided either for all individual positions or persons, or through “blanket” coverage providing protection for all appropriate employees and officials. The Agency may also require the intermediary to carry other appropriate insurance, such as public liability, workers compensation, and property damage.

(A) The amount of fidelity bond coverage required by the Agency will normally approximate the total annual debt service requirements for the Agency loans;

(B) Other types of coverage may be considered acceptable if it is determined by the Agency that they fulfill essentially the same purpose as a fidelity bond;

(C) Intermediaries must provide evidence of adequate fidelity bond and other appropriate insurance coverage by loan closing. Adequate coverage in
 accordance with this section must then be maintained for the life of the loan. It is the responsibility of the intermediary to assure and provide evidence that adequate coverage is maintained. This may consist of a listing of policies and coverage amounts in reports required by paragraph (b)(4) of this section or other documentation.

(b) The intermediary will agree in the loan agreement:

(1) Not to make any changes in the intermediary’s articles of incorporation, charter, or by-laws without the concurrence of the Agency;
(2) Not to make a loan commitment to an ultimate recipient to be funded from Agency IRP loan funds without first receiving the Agency’s written concurrence;
(3) To maintain a separate ledger and segregated account for the IRP revolving fund;
(4) To Agency reporting requirements by providing:

(i) An annual audit;
(A) Dates of audit report period need not necessarily coincide with other reports on the IRP. Audit reports shall be due 90 days following the audit period. Audits must cover all of the intermediary’s activities. Audits will be performed by an independent certified public accountant. An acceptable audit will be performed in accordance with Generally Accepted Government Auditing Standards and include such tests of the accounting records as the auditor considers necessary in order to express an opinion on the financial condition of the intermediary. The Agency does not require an unqualified audit opinion as a result of the audit. Compilations or reviews do not satisfy the audit requirement;
(B) It is not intended that audits required by this subpart be separate and apart from audits performed in accordance with State and local laws or for other purposes. To the extent feasible, the audit work should be done in connection with these audits. Intermediaries covered by OMB Circular A–133 should submit audits made in accordance with that circular.
(ii) Quarterly or semiannual reports (due 30 days after the end of the period):
(A) Reports will be required quarterly during the first year after loan closing and, if all loan funds are not utilized during the first year, quarterly reports will be continued until at least 90 percent of the Agency IRP loan funds have been advanced to ultimate recipients. Thereafter, reports will be required semiannually. Also, the Agency may require quarterly reports if the intermediary becomes delinquent in repayment of its loan or otherwise fails to fully comply with the provisions of its work plan or Loan Agreement, or the Agency determines that the intermediary’s IRP revolving fund is not adequately protected by the current sound worth and paying capacity of the ultimate recipients.
(B) These reports shall contain information only on the IRP revolving loan fund, or if other funds are included, the IRP loan program portion shall be segregated from the others; and in the case where the intermediary has more than one IRP revolving fund from the Agency a separate report shall be made for each of the IRP revolving funds.
(C) The reports will include, on a form provided by the Agency, information on the intermediary’s lending activity, income and expenses, financial condition, and a summary of names and characteristics of the ultimate recipients the intermediary has financed.
(iii) Annual proposed budget for the following year; and
(iv) Other reports as the Agency may require from time to time.
(5) Before the first relending of Agency funds to an ultimate recipient, to obtain written Agency approval of:

(i) All forms to be used for relending purposes, including application forms, loan agreements, promissory notes, and security instruments;
(ii) Intermediary’s policy with regard to the amount and form of security to be required;
(6) To obtain written approval of the Agency before making any significant changes in forms, security policy, or the work plan. The servicing officer
may approve changes in forms, security policy, or work plans at any time upon a written request from the intermediary and determination by the Agency that the change will not jeopardize repayment of the loan or violate any requirement of this subpart or other Agency regulations. The intermediary must comply with the work plan approved by the Agency so long as any portion of the intermediary’s IRP loan is outstanding;

(7) To secure the indebtedness by pledging the IRP revolving fund, including its portfolio of investments derived from the proceeds of the loan award, and pledging its real and personal property and other rights and interests as the Agency may require;

(8) In the event the intermediary’s financial condition deteriorates or the intermediary takes action detrimental to prudent fund operation or fails to take action required of a prudent lender, to provide additional security, execute any additional documents, and undertake any reasonable acts the Agency may request, to protect the agency’s interest or to perfect a security interest in any assets, including physical delivery of assets and specific assignments; and

(9) That if any part of the loan has not been used in accordance with the intermediary’s work plan by a date three years from the date of the loan agreement, the Agency may cancel the approval of any funds not yet delivered to the intermediary and the intermediary will return, as an extra payment on the loan, any funds delivered to the intermediary that have not been used by the intermediary in accordance with the work plan. The Agency, at its sole discretion, may allow the intermediary additional time to use the loan funds by delaying cancellation of the funds by not more than 3 additional years. If any loan funds have not been used by 6 years from the date of the loan agreement, the approval will be canceled of any funds that have not been delivered to the intermediary and the intermediary will return, as an extra payment on the loan, any funds it has received and not used in accordance with the work plan. In accordance with the Intermediary Relending Program promissory note, regular loan payments will be based on the amount of funds actually drawn by the intermediary.

§ 4274.343 Application.

(a) The application will consist of:

(1) An application form provided by the Agency;

(2) A written work plan and other evidence the Agency requires to demonstrate the feasibility of the intermediary’s program to meet the objectives of this program. The plan must, at a minimum:

(i) Document the intermediary’s ability to administer IRP in accordance with the provisions of this subpart. In order to adequately demonstrate the ability to administer the program, the intermediary must provide a complete listing of all personnel responsible for administering this program along with a statement of their qualifications and experience. The personnel may be either members or employees of the intermediary’s organization or contract personnel hired for this purpose. If the personnel are to be contracted for, the contract between the intermediary and the entity providing such service will be submitted for Agency review, and the terms of the contract and its duration must be sufficient to adequately service the Agency loan through to its ultimate conclusion. If the Agency determines the personnel lack the necessary expertise to administer the program, the loan request will not be approved;

(ii) Document the intermediary’s ability to commit financial resources under the control of the intermediary to the establishment of IRP. This should include a statement of the sources of non-Agency funds for administration of the intermediary’s operations and financial assistance for projects;

(iii) Demonstrate a need for loan funds. As a minimum, the intermediary should identify a sufficient number of proposed and known ultimate recipients it has on hand to justify Agency funding of its loan request, or include
well developed targeting criteria for ultimate recipients consistent with the intermediary’s mission and strategy for IRP, along with supporting statistical or narrative evidence that such prospective recipients exist in sufficient numbers to justify Agency funding of the loan request;

(iv) Include a list of proposed fees and other charges it will assess the ultimate recipients;

(v) Demonstrate to Agency satisfaction that the intermediary has secured commitments of significant financial support from public agencies and private organizations;

(vi) Provide evidence to Agency satisfaction that the intermediary has a proven record of obtaining private or philanthropic funds for the operation of similar programs to IRP;

(vii) Include the intermediary’s plan (specific loan purposes) for relending the loan funds. The plan must be of sufficient detail to provide the Agency with a complete understanding of what the intermediary will accomplish by lending the funds to the ultimate recipient and the complete mechanics of how the funds will get from the intermediary to the ultimate recipient. The service area, eligibility criteria, loan purposes, fees, rates, terms, collateral requirements, limits, priorities, application process, method of disposition of the funds to the ultimate recipient, monitoring of the ultimate recipient’s accomplishments, and reporting requirements by the ultimate recipient’s management are some of the items that must be addressed by the intermediary’s relending plan;

(viii) Provide a set of goals, strategies, and anticipated outcomes for the intermediary’s program. Outcomes should be expressed in quantitative or observable terms such as jobs created for low income area residents or self empowerment opportunities funded, and should relate to the purpose of IRP (see §4274.301(b)); and

(ix) Provide specific information as to whether and how the intermediary will ensure that technical assistance is made available to ultimate recipients and potential ultimate recipients. Describe the qualifications of the technical assistance providers, the nature of technical assistance that will be available, and expected and committed sources of funding for technical assistance. If other than the intermediary itself, describe the organizations providing such assistance and the arrangements between such organizations and the intermediary.

(3) Environmental information on a form provided by the Agency for all projects positively identified as proposed ultimate recipient loans that are Class I or Class II actions under subpart G of part 1940 of this title;

(4) Comments from the State Single Point of Contact, if the State has elected to review the program under Executive Order 12372;

(5) A pro forma balance sheet at start-up and projected balance sheets for at least 3 additional years; financial statements for the last 3 years, or from inception of the operations of the intermediary if less than 3 years; and projected cash flow and earnings statements for at least 3 years supported by a list of assumptions showing the basis for the projections. The projected earnings statement and balance sheet must include one set of projections that shows the IRP revolving fund only and a separate set of projections that shows the proposed intermediary organization’s total operations. Also, if principal repayment on the IRP loan will not be scheduled during the first 3 years, the projections for the IRP revolving fund must extend to include a year with a full annual installment on the IRP loan;

(6) A written agreement of the intermediary to the Agency audit requirements;

(7) An agreement on a form provided by the Agency assuring compliance with Title VI of the Civil Rights Act of 1964;

(8) Complete organizational documents, including evidence of authority to conduct the proposed activities;

(9) Evidence that the loan is not available at reasonable rates and terms from private sources or other Federal, State, or local programs;

(10) Latest audit report, if available;

(11) A form provided by the Agency in which the applicant certifies its understanding of the Federal collection policies for consumer or commercial debts;
(12) A Department of Agriculture form containing a certification regarding debarment, suspension, and other responsibility matters for primary covered transactions; and
(13) A statement on a form provided by the Agency regarding lobbying, as required by 7 CFR part 3018.

(b) Applications from intermediaries that already have an active IRP loan may be streamlined as follows:
(1) The requirements of paragraphs (a)(6), (a)(8), and (a)(10) of this section may be omitted;
(2) A statement that the new loan would be operated in accordance with the work plan on file for the previous loan may be submitted in lieu of a new work plan; and
(3) The financial information required by paragraph (a)(5) of this section may be limited to projections for the proposed new IRP revolving loan fund.

§ 4274.344 Filing and processing applications for loans.

(a) Intermediaries’ contact. Intermediaries desiring assistance under this subpart may file applications with the state office for the state in which the intermediary’s headquarters is located. Intermediaries headquartered in the District of Columbia may file the application with the National Office, Rural Business-Cooperative Service, USDA, Specialty Lenders Division, STOP 1521, 1400 Independence Avenue SW, Washington, DC 20250–1521.

(b) Filing applications. Intermediaries must file the complete application, in one package. Applications received by the Agency will be reviewed and ranked quarterly and funded in the order of priority ranking. The Agency will retain unsuccessful applications for consideration in subsequent reviews, through a total of four quarterly reviews.

(c) Loan priorities. A point system will be used to determine an eligible applicant’s priority for available loan funds. Points will be allowed only for factors indicated by well documented, reasonable plans which, in the opinion of the Agency, provide assurance that the items have a high probability of being accomplished. The points awarded will be as specified in paragraphs (c)(1) through (c)(6) of this section. If an application does not fit one of the categories listed, it receives no points for that paragraph or subparagraph.

(1) Other funds. Points allowed under this paragraph are to be based on documented successful history or written evidence that the funds are available.
(i) The intermediary will obtain non-Federal loan or grant funds to pay part of the cost of the ultimate recipients’ projects. The amount of funds from other sources will average:
(A) At least 10% but less than 25% of the total project cost—5 points;
(B) At least 25% but less than 50% of the total project cost—10 points; or
(C) 50% or more of the total project cost—15 points.
(ii) The intermediary will provide loans to ultimate recipients from its project contribution funds to pay part of the costs of ultimate recipient projects. Project contribution funds must be separate and distinct from any loan or grant dollars provided to the intermediary under the IRP, as well as the intermediary’s equity contribution. When evaluating an application for initial or supplemental funding, the Agency will consider the level of the applicant’s project contribution and award points as follows:
(A) At least 10% but less than 25% of the total project costs—5 points;
(B) At least 25% but less than 50% of total project costs—10 points; or
(C) 50% or more of total project costs—15 points.
(2) Employment. For computations under this paragraph, income data should be from the latest decennial census of the United States, updated according to changes in the consumer price index. The poverty line used will be as defined in section 673 (2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)). Unemployment data used will be that published by the Bureau of Labor Statistics, U.S. Department of Labor.
(i) The median household income in the service area of the proposed intermediary equals the following percentage of the poverty line for a family of four:
(A) At least 150% but not more than 175%—5 points;
(B) At least 125% but less than 150%—10 points; or
(C) Below 125%—15 points.

(ii) The following percentage of the loans the intermediary makes from Agency IRP loan funds will be in counties with median household income below 80 percent of the statewide non-metropolitan median household income. (To receive priority points under this category, the intermediary must provide a list of counties in the service area that have qualifying income):
(A) At least 50% but less than 75%—5 points;
(B) At least 75% but less than 100%—10 points; or
(C) 100%—15 points.

(iii) The unemployment rate in the intermediary’s service area equals the following percentage of the national unemployment rate:
(A) At least 100% but less than 125%—5 points;
(B) At least 125% but less than 150%—10 points; or
(C) 150% or more—15 points.

(iv) The intermediary will require, as a condition of eligibility for a loan to an ultimate recipient from Agency IRP loan funds, that the ultimate recipient certify in writing that it will employ the following percentage of its workforce from members of families with income below the poverty line:
(A) At least 10% but less than 20% of the workforce—5 points;
(B) At least 20% but less than 30% of the workforce—10 points; or
(C) 30% or more—15 points.

(v) The intermediary has a demonstrated record of providing assistance to members of underrepresented groups, has a realistic plan for targeting loans to members of underrepresented groups, and, based on the intermediary’s record and plans, it is expected that the following percentages of its loans made from Agency IRP loan funds will be made to entities owned by members of underrepresented groups:
(A) At least 10% but less than 20%—5 points;
(B) At least 20% but less than 30%—10 points; or
(C) 30% or more—15 points.

(vi) The population of the service area according to the most recent decennial census was lower than that recorded by the previous decennial census by the following percentage:
(A) At least 10 percent but less than 20 percent—5 points;
(B) At least 20 percent but less than 30 percent—10 points; or
(C) 30 percent or more—15 points.

(3) Intermediary contribution. All assets of the IRP revolving fund will serve as security for the IRP loan, and the intermediary will contribute funds not derived from the Agency into the IRP revolving fund along with the proceeds of the IRP loan. The amount of non-Agency derived funds contributed to the IRP revolving fund will equal the following percentage of the Agency IRP loan:
(i) At least 5% but less than 15%—15 points;
(ii) At least 15% but less than 25%—30 points; or
(iii) 25% or more—50 points.

(4) Experience. The intermediary has actual experience in making and servicing commercial loans, with a successful record, for the following number of full years:
(i) At least 1 but less than 3 years—5 points;
(ii) At least 3 but less than 5 years—10 points; or
(iii) 5 or more years—20 points.

(5) Community representation. The service area is not more than 14 counties and the intermediary utilizes local opinions and experience by including community representatives on its board of directors or equivalent oversight board. For purposes of this section, community representatives are people, such as civic leaders, business representatives, or bankers, who reside in the service area and are not employees of the intermediary. Points will be assigned as follows:
(i) At least 10% but less than 40% of the board members are community representatives—5 points;
(ii) At least 40% but less than 75% of the board members are community representatives—10 points; or
(iii) At least 75% of the board members are community representatives—15 points.

(6) Administrative. The Administrator may assign up to 35 additional points to an application to account for the following items not adequately covered by the other priority criteria set out in this section. The items that may be considered are the amount of funds requested in relation to the amount of need; a particularly successful business development record; a service area with no other IRP coverage; a service area with severe economic problems, such as communities that have remained persistently poor over the last 60 years or have experienced long-term population decline or job deterioration; a service area with emergency conditions caused by a natural disaster or loss of a major industry; a work plan that is in accord with a strategic plan, particularly a plan prepared as part of a request for an Empowerment Zone/Enterprise Community designation; or excellent utilization of a previous IRP loan.

[63 FR 6053, Feb. 6, 1998, as amended at 70 FR 38573, July 5, 2005]

§§ 4274.345–4274.349 [Reserved]

§ 4274.350 Letter of conditions.

If the Agency is able to make the loan, it will provide the intermediary a letter of conditions listing all requirements for the loan. Immediately after reviewing the conditions and requirements in the letter of conditions, the intermediary should complete, sign and return the form provided by the Agency indicating the intermediary’s intent to meet the conditions. If certain conditions cannot be met, the intermediary may propose alternate conditions to the Agency. The Agency loan approval official must concur with any changes made to the initially issued or proposed letter of conditions prior to acceptance.

§§ 4274.351–4274.354 [Reserved]

§ 4274.355 Loan approval and obligating funds.

The loan will be considered approved on the date the signed copy of the obligation of funds document is mailed to the intermediary. The approving official may request an obligation of funds when available and according to the following:

(a) The obligation of funds document may be executed by the loan approving official providing the intermediary has the legal authority to contract for a loan and to enter into required agreements, and has signed the obligation of funds document.

(b) An obligation of funds established for an intermediary may be transferred to a different (substituted) intermediary provided:

1. The substituted intermediary is eligible to receive the assistance approved for the original intermediary;
2. The substituted intermediary bears a close and genuine relationship to the original intermediary; and
3. The need for and scope of the project and the purposes for which Agency IRP loan funds will be used remain substantially unchanged.

§ 4274.356 Loan closing.

(a) At loan closing, the intermediary must certify to the following:

1. No major changes have been made in the work plan except those approved in the interim by the Agency.
2. All requirements of the letter of conditions have been met.
3. There has been no material change in the intermediary nor its financial condition since the issuance of the letter of conditions. If there have been changes, they must be explained. The changes may be waived, at the sole discretion of the Agency.
4. That no claim or liens of laborers, materialmen, contractors, subcontractors, suppliers of machinery and equipment, or other parties are pending against the security of the intermediary, and that no suits are pending or threatened that would adversely affect the security of the intermediary when the security instruments are filed.

(b) The processing officer will approve only minor changes which do not materially affect the project, its capacity, employment, original projections, or credit factors. Changes in legal entities or where tax consideration are the reason for change will not be approved.
§ 4274.357–4274.360  [Reserved]

§ 4274.361 Requests to make loans to ultimate recipients.

(a) An intermediary may use re- volved funds to make loans to ultimate recipients without obtaining prior Agency concurrence. When an inter- mediate proposes to use Agency IRP loan funds to make a loan to an ultimate recipient, and prior to final ap- proval of such loan, Agency concur- rence is required.

(b) A request for Agency concurrence in approval of a proposed loan to an ultimate recipient must include:

(1) Certification by the intermediary that:
   (i) The proposed ultimate recipient is eligible for the loan;
   (ii) The proposed loan is for eligible purposes;
   (iii) The proposed loan complies with all applicable statutes and regulations;
   (iv) The ultimate recipient is unable to finance the proposed project through commercial credit or other Federal, State, or local programs at reasonable rates and terms; and
   (v) The intermediary and its prin- cipal officers (including immediate family) hold no legal or financial inter- est or influence in the ultimate recipi- ent, and the ultimate recipient and its principal officers (including immediate family) hold no legal or financial inter- est or influence in the intermediary ex- cept the interest and influence of a co- operative member when the inter- mediary is a cooperative;

(2) For projects that meet the cri- teria for a Class I or Class II environ- mental assessment or environmental impact statement as provided in sub- part G of part 1940 of this title, a com- pleted and executed request for envi- ronmental information on a form pro- vided by the Agency;

(3) All comments obtained in accord- ance with § 4274.337(a), regarding inter- governmental consultation;

(4) Copies of sufficient material from the ultimate recipient’s application and the intermediary’s related files, to allow the Agency to determine the:
   (i) Name and address of the ultimate recipient;
   (ii) Loan purposes;
   (iii) Interest rate and term;
   (iv) Location, nature, and scope of the project being financed;
   (v) Other funding included in the project; and
   (vi) Nature and lien priority of the collateral.

(5) Such other information as the Agency may request on specific cases.

§§ 4274.362–4274.372  [Reserved]

§ 4274.373 Appeals.

Any appealable adverse decision made by the Agency which affects the intermediary may be appealed in ac- cordance with USDA appeal regula- tions found at 7 CFR part 11.

§§ 4274.374–4274.380  [Reserved]

§ 4274.381 Exception authority.

The Administrator may, in indi- vidual cases, grant an exception to any requirement or provision of this sub- part which is not inconsistent with any applicable law, provided the Adminis- trator determines that application of the requirement or provision would ad- versely affect USDA’s interest.

§§ 4274.382–4274.399  [Reserved]

§ 4274.400 OMB control number.

The reporting and recordkeeping re- quirements contained in this regula- tion have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. chapter 35 and have been assigned OMB control num- ber 0570-0021 in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507).

4279.46–4279.57 [Reserved]
4279.58 Equal Credit Opportunity Act.
4279.59 [Reserved]
4279.60 Civil Rights Impact Analysis.
4279.61–4279.70 [Reserved]
4279.71 Public bodies and nonprofit corporations.
4279.72 Conditions of guarantee.
4279.73–4279.74 [Reserved]
4279.75 Sale or assignment of guaranteed loan.
4279.76 Participation.
4279.77 Minimum retention.
4279.78 Repurchase from holder.
4279.79–4279.83 [Reserved]
4279.84 Replacement of document.
4279.85–4279.99 [Reserved]
4279.100 OMB control number.

Subpart B—Business and Industry Loans

4279.101 Introduction.
4279.102 Definitions.
4279.103 Exception authority.
4279.104 Appeals.
4279.105–4279.106 [Reserved]
4279.107 Guarantee fees.
4279.108 Eligible borrowers.
4279.109–4279.112 [Reserved]
4279.113 Eligible loan purposes.
4279.114 Ineligible purposes.
4279.115 Prohibition under Agency programs.
4279.116–4279.118 [Reserved]
4279.119 Loan guarantee limits.
4279.120 Fees and charges.
4279.121–4279.124 [Reserved]
4279.125 Interest rates.
4279.126 Loan terms.
4279.127–4279.130 [Reserved]
4279.131 Credit quality.
4279.132–4279.136 [Reserved]
4279.137 Financial statements.
4279.138–4279.142 [Reserved]
4279.143 Insurance.
4279.144 Appraisals.
4279.145–4279.148 [Reserved]
4279.149 Personal and corporate guarantee.
4279.150 Feasibility studies.
4279.151–4279.154 [Reserved]
4279.155 Loan priorities.
4279.156 Planning and performing development.
4279.157–4279.160 [Reserved]
4279.161 Filing preapplications and applications.
4279.162–4279.164 [Reserved]
4279.165 Evaluation of application.
4279.166–4279.172 [Reserved]
4279.173 Loan approval and obligating funds.
4279.174 Transfer of lenders.
4279.175 Domestic lamb industry adjustment assistance program set aside.
4279.176–4279.179 [Reserved]
4279.180 Changes in borrower.
4279.181 Conditions precedent to issuance of Loan Note Guarantee.
4279.182–4279.185 [Reserved]
4279.186 Issuance of the guarantee.
4279.187 Refusal to execute Loan Note Guarantee.
4279.188–4279.199 [Reserved]
4279.200 OMB control number.

Subpart C—Biorefinery Assistance Loans

4279.201 Purpose and scope.
4279.202 Compliance with §§ 4279.1 through 4279.84.
4279.203–4279.223 [Reserved]
4279.224 Loan processing.
4279.225 Ineligible loan purposes.
4279.226 Fees.
4279.227 Borrower eligibility.
4279.228 Project eligibility.
4279.229 Guaranteed loan funding.
4279.230 [Reserved]
4279.231 Interest rates.
4279.232 Terms of loan.
4279.233 [Reserved]
4279.234 Credit evaluation.
4279.235–4279.236 [Reserved]
4279.237 Financial statements.
4279.238–4279.239 [Reserved]
4279.244 Appraisals.
4279.245–4279.249 [Reserved]
4279.250 Feasibility studies.
4279.251–4279.254 [Reserved]
4279.255 Loan priorities.
4279.256 Construction planning and performing development.
4279.257–4279.258 [Reserved]
4279.259 Borrower responsibilities.
4279.260 Guarantee applications—general.
4279.261 Application for loan guarantee content.
4279.262–4279.264 [Reserved]
4279.265 Guarantee application evaluation.
4279.266–4279.278 [Reserved]
4279.279 Domestic lamb industry adjustments assistance program.
4279.280 Changes in borrowers.
4279.281 Conditions precedent to issuance of loan note guarantee.
4279.282–4279.289 [Reserved]
4279.290 Requirements after project construction.
4279.291–4279.300 [Reserved]

Subpart A—General

§ 4279.1 Purpose.

(a) This subpart contains general regulations for making and servicing Business and Industry (B&I) loans guaranteed by the Agency and applies to lenders, holders, borrowers and other parties involved in making, guaranteeing,
holding, servicing, or liquidating such loans.

(b) It is the responsibility of the lender to ascertain that all requirements for making, securing, servicing, and collecting the loan are complied with.

(c) Copies of all forms, regulations, and Instructions referenced in this subpart are available in any Agency office. Whenever a form is designated in this subpart, that designation includes predecessor and successor forms, if applicable, as specified by the field or National Office.

§ 4279.2 Definitions and abbreviations.

(a) Definitions.

Adjusted tangible net worth. Tangible balance sheet equity plus allowed tangible asset appreciation and subordinated owner debt.

Agency. The Rural Business-Cooperative Service or successor Agency assigned by the Secretaty of Agriculture to administer the B&I program. References to the National Office, Finance Office, State Office or other Agency offices or officials should be read as preaced by “Agency” or “Rural Development” as applicable.

Allowed tangible asset appreciation. The difference between the current net book value recorded on the financial statements (original cost less cumulative depreciation) of real property assets and the lesser of their current market value or original cost, where current market value is determined using an appraisal satisfactory to the Agency.

Arm's-length transaction. The sale, release, or disposition of assets in which the title to the property passes to a ready, willing, and able disinterested third party that is not affiliated with or related to and has no security, monetary or stockholder interest in the borrower or transferor at the time of the transaction.

Assignment Guarantee Agreement (Business and Industry). Form RD 4279-6, the signed agreement among the Agency, the lender, and the holder containing the terms and conditions of an assignment of a guaranteed portion of a loan, using the single note system.

Biogas. Biomass converted to gaseous fuel.

Biomass. Any organic material that is available on a renewable or recurring basis including agricultural crops, trees grown for energy production, wood waste and wood residues, plants, including aquatic plants and grasses, fibers, animal waste and other waste materials, fats, oils, greases, including recycled fats, oils and greases. It does not include paper that is commonly recycled or unsegregated solid waste.

Borrower. All parties liable for the loan except for guarantors.

Commercially available. Energy projects utilizing technology that has a proven operating history, and for which there is an established industry for the design, installation, and service (including spare parts) of the equipment.

Conditional Commitment (Business and Industry). Form RD 4279-3, the Agency’s notice to the lender that the loan guarantee it has requested is approved subject to the completion of all conditions and requirements set forth by the Agency.

Deficiency balance. The balance remaining on a loan after all collateral has been liquidated.

Deficiency judgment. A monetary judgment rendered by a court of competent jurisdiction after foreclosure and liquidation of all collateral securing the loan.

Energy projects. Commercially available projects that produce or distribute energy or power and/or produce biomass or biogas fuel. Commercially available energy projects that utilize technology that has a proven operating history, and for which there is an established industry for the design, installation, and service (including spare parts) of the equipment.

Existing lender debt. A debt not guaranteed by the Agency, but owed by a borrower to the same lender that is applying for or has received the Agency guarantee.

Fair market value. The price that could reasonably be expected for an asset in an arm’s-length transaction between a willing buyer and a willing seller under ordinary economic and business conditions.

Farmer’s Home Administration (FmHA). The former agency of USDA that previously administered the programs of
this Agency. Many Instructions and forms of FmHA are still applicable to Agency programs.

Finance Office. The office which maintains the Agency financial accounting records located in St. Louis, Missouri.

High-impact business. A business that offers specialized products and services that permit high prices for the products produced, may have a strong presence in international market sales, may provide a market for existing local business products and services, and which is locally owned and managed.

Holder. A person or entity, other than the lender, who owns all or part of the guaranteed portion of the loan with no servicing responsibilities. When the single note option is used and the lender assigns a part of the guaranteed note to an assignee, the assignee becomes a holder only when the Agency receives notice and the transaction is completed through the use of Form RD 4279–6 or predecessor form.

Interest. A fee paid by a borrower to the lender as a form of compensation for the use of money. When money is borrowed, interest is paid as a fee over a certain period of time (typically months or years) to the lender as a percentage of the principal amount owed. “Interest” does not include default or penalty, or late fees or charges. The lender may charge these fees and interest with prior Agency approval, but they are not covered by the Loan Note Guarantee.

Interim financing. A temporary or short-term loan made with the clear intent that it will be repaid through another loan. Interim financing is frequently used to pay construction and other costs associated with a planned project, with permanent financing to be obtained after project completion.

Lender. The organization making, servicing, and collecting the loan which is guaranteed under the provision of the appropriate subpart.

Lender’s Agreement (Business and Industry). Form RD 4279–4 or predecessor form between the Agency and the lender setting forth the lender’s loan responsibilities when the Loan Note Guarantee is issued.

Loan Agreement. The agreement between the borrower and lender containing the terms and conditions of the loan and the responsibilities of the borrower and lender.

Loan Note Guarantee (Business and Industry). Form RD 4279–5 or predecessor form, issued and executed by the Agency containing the terms and conditions of the guarantee.

Loan-to-value. The ratio of the dollar amount of a loan to the dollar value of the collateral pledged as security for the loan.

Natural resource value-added product. Any naturally occurring product that is processed to add value to the product. For example, straw is processed into particle board.

Negligent servicing. The failure to perform those services which a reasonably prudent lender would perform in servicing (including liquidation of) its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act, but also not acting in a timely manner, or acting in a manner contrary to the manner in which a reasonably prudent lender would act.

Parity. A lien position whereby two or more lenders share a security interest of equal priority in collateral. In the event of default, each lender will be affected on a pro rata basis.

Participation. Sale of an interest in a loan by the lender wherein the lender retains the note, collateral securing the note, and all responsibility for loan servicing and liquidation.

Poor. A community or area is considered poor if, based on the most recent decennial census data, either the county, city, or census tract where the community or area is located has a median household income at or below the poverty line for a family of four; has a median household income below the nonmetropolitan median household income for the State; or has a population of which 25 percent or more have income at or below the poverty line.

Promissory Note. Evidence of debt. “Note” or “Promissory Note” shall also be construed to include “Bond” or other evidence of debt where appropriate.

Qualified Intellectual Property. Trademarks, patents or copyrights included
on current (within one year) audited balance sheets for which an audit opinion has been received that states the financial reports fairly represent the values therein and the reported value has been arrived at in accordance with GAAP standards for valuing intellectual property. The supporting work papers must be satisfactory to the Administrator.

Refinancing loan. A loan, all of the proceeds of which are applied to extinguish the entire balance of an outstanding debt.

Rural Development. The Under Secretary for Rural Development has policy and operational oversight responsibilities for RHS, RBS and RUS.

Spreadsheet. A table containing data from a series of financial statements of a business over a period of time. Financial statement analysis normally contains spreadsheets for balance sheet items and income statements and may include funds flow statement data and commonly used ratios. The spreadsheets enable a reviewer to easily scan the data, spot trends, and make comparisons.

State. Any of the 50 States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

Subordinated owner debt. Debt owed by the borrower to one or more of the owner(s) that is subordinated to debt owed by the borrower to the Agency or guaranteed by the Agency (aggregate B&I loan exposure) pursuant to a subordination agreement satisfactory to the Agency. The debt must have been issued in exchange for cash loaned to the borrower for the benefit of the borrower’s business. The terms of the subordination agreement must provide that repayment will not commence until the earlier of the date all aggregate B&I loan exposure has been repaid or when a period of three consecutive years has passed during which the borrower has met all loan covenants and evidenced operating profit sufficient to commence partial repayment of this subordinated debt after giving effect to the annual debt service requirements of the aggregate B&I loan exposure.

The partial repayment schedule in the case of the latter scenario is subject to annual Agency concurrence and may not be more accelerated than the rate of the debt repayment schedule in effect for the Agency’s aggregate B&I loan exposure.

Subordination. An agreement between the lender and borrower whereby lien priorities on certain assets pledged to secure payment of the guaranteed loan will be reduced to a position junior to, or on parity with, the lien position of another loan in order for the Agency borrower to obtain additional financing, not guaranteed by the Agency, from the lender or a third party.

Tangible balance sheet equity. Total equity less the value of intangible assets recorded on the financial statements, as determined from balance sheets prepared in accordance with generally accepted accounting principles (GAAP), plus qualified intellectual property.

Veteran. For the purposes of assigning priority points, a veteran is a person who is a veteran of any war, as defined in section 101(12) of title 38, United States Code.

(b) Abbreviations.

(c) Accounting terms not otherwise defined in this part shall have the definition ascribed to them under GAAP.

§§ 4279.3–4279.14 [Reserved]

§ 4279.15 Exception authority.

The Administrator may, in individual cases, grant an exception to any requirement or provision of this subpart which is not inconsistent with any
applicable law provided, the Administrator determines that application of the requirement or provision would adversely affect USDA’s interest.

§ 4279.16 Appeals.

Only the borrower, lender, or holder can appeal an Agency decision made under this subpart. In cases where the Agency has denied or reduced the amount of final loss payment to the lender, the adverse decision may be appealed by the lender only. An adverse decision that only impacts the holder may be appealed by the holder only. A decision by a lender adverse to the interest of the borrower is not a decision by the Agency, whether or not concurred in by the Agency. Appeals will be handled in accordance with 7 CFR, part 11. Any party adversely affected by an Agency decision under this subpart may request a determination of appealability from the Director, National Appeals Division, USDA, within 30 days of the adverse decision.

§§ 4279.17–4279.28 [Reserved]

§ 4279.29 Eligible lenders.

(a) Traditional lenders. An eligible lender is any Federal or State chartered bank, Farm Credit Bank, other Farm Credit System institution with direct lending authority, Bank for Cooperatives, Savings and Loan Association, or mortgage company that is part of a bank-holding company. These entities must be subject to credit examination and supervision by either an agency of the United States or a State. Eligible lenders may also include credit unions provided, they are subject to credit examination and supervision by either the National Credit Union Administration or a State agency, and insurance companies provided they are regulated by a State or National insurance regulatory agency. Eligible lenders include the National Rural Utilities Cooperative Finance Corporation.

(b) Other lender. Rural Utilities Service borrowers and other lenders not meeting the criteria of paragraph (a) of this section may be considered by the Agency for eligibility to become a guaranteed lender provided, the Agency determines that they have the legal authority to operate a lending program and sufficient lending expertise and financial strength to operate a successful lending program.

(1) Such a lender must:

(i) Have a record of successfully making at least three commercial loans annually for at least the most recent 3 years, with delinquent loans not exceeding 10 percent of loans outstanding and historic losses not exceeding 10 percent of dollars loaned, or when the proposed lender can demonstrate that it has personnel with equivalent previous experience and where the commercial loan portfolio was of a similar quantity and quality; and

(ii) Have tangible balance sheet equity of at least seven percent of tangible assets and sufficient funds available to disburse the guaranteed loans it proposes to approve within the first 6 months of being approved as a guaranteed lender.

(2) A lender not eligible under paragraph (a) of this section that wishes consideration to become a guaranteed lender must submit a request in writing to the State Office for the State where the lender’s lending and servicing activity takes place. The National Office will notify the prospective lender, through the State Director, whether the lender’s request for eligibility is approved or rejected. If rejected, the reasons for the rejection will be indicated to the prospective lender in writing. The lender’s written request must include:

(i) Evidence showing that the lender has the necessary capital and resources to successfully meet its responsibilities.

(ii) Copy of any license, charter, or other evidence of authority to engage in the proposed loanmaking and servicing activities. If licensing by the State is not required, an attorney’s opinion to this effect must be submitted.

(iii) Information on lending experience, including length of time in the lending business; range and volume of lending and servicing activity; status of loan portfolio including delinquency rate, loss rate as a percentage of loan amounts, and other measures of success; experience of management and loan officers; audited financial statements not more than 1 year old;
§ 4279.30 Lenders’ functions and responsibilities.

(a) General. (1) Lenders have the primary responsibility for the successful delivery of the B&I loan program. All lenders obtaining or requesting a B&I loan guarantee are responsible for:

(i) Processing applications for guaranteed loans;

(ii) Developing and maintaining adequately documented loan files;

(iii) Recommending only loan proposals that are eligible and financially feasible;

(iv) Obtaining valid evidence of debt and collateral in accordance with sound lending practices;

(v) Supervising construction;

(vi) Distribution of loan funds;

(vii) Servicing guaranteed loans in a prudent manner, including liquidation if necessary;

(viii) Following Agency regulations, and

(ix) Obtaining Agency approvals or concurrence as required.

(2) This subpart, along with subpart B of this part and subpart B of part 4287 of this chapter, contain the regulations for this program, including the lenders’ responsibilities.

(b) Credit evaluation. This is a key function of all lenders during the loan processing phase. The lender must analyze all credit factors associated with each proposed loan and apply its professional judgment to determine that the credit factors, considered in combination, ensure loan repayment. The lender must have an adequate underwriting process to ensure that loans are reviewed by other than the originating officer. There must be good credit documentation procedures.

(c) Environmental responsibilities. Lenders have a responsibility to become familiar with Federal environmental requirements; to consider, in consultation with the prospective borrower, the potential environmental impacts of their proposals at the earliest planning stages; and to develop proposals that minimize the potential to adversely impact the environment. Lenders must alert the Agency to any controversial environmental issues related to a proposed project or items that may require extensive environmental review. Lenders must help the borrower prepare Form FmHA 1940–20, “Request for Environmental Information” (when required by subpart G of part 1940 of this title); assist in the collection of additional data when the Agency needs such data to complete its environmental review of the proposal; and assist in the resolution of environmental problems.

(d) Loan closing. The lender will conduct loan closings.

§§ 4279.31–4279.42 [Reserved]

§ 4279.43 Certified Lender Program.

(a) General. This section provides policies and procedures for the Certified Lender Program (CLP) for loans guaranteed under this part. The objectives are to expedite loan approval, making, and servicing.

(b) CLP eligibility criteria. The lender must meet established eligibility criteria as follows:

(1) Be an “eligible lender” as defined in 4279.29 of this subpart and authorized to do business in the State in which CLP status is desired.

(2) Demonstrate to the Agency’s satisfaction that it has a thorough knowledge of commercial lending. The lender will demonstrate such knowledge by providing a summary of its guaranteed and unguaranteed business lending activity. At a minimum, the summary must include the dollar amount and number of loans in the lender’s portfolio, unguaranteed and guaranteed by any Federal agency, with information on delinquencies and losses and, if applicable, the performance of the lender as a Small Business Administration
(SBA) certified or preferred lender. A certified lender must be recognized throughout the State as a commercial lender and have a track record of successfully making at least five commercial loans per year for at least the most recent 5 years, with delinquent commercial loans outstanding not exceeding 6 percent of commercial loans outstanding and historic losses not exceeding 6 percent of dollars loaned, or it must demonstrate that it has personnel with equivalent previous experience where the commercial loan portfolio was of a similar quantity and quality. The lender will provide a written certification to this effect along with a statistical analysis of its commercial loan portfolio for the last 3 of its fiscal years.

(3) The percentage of guarantee will not exceed 80 percent.

(4) If the lender is a bank or savings and loan, it must have a financial strength rating in the upper half of possible ratings as reported by a lender rating service selected by the Agency.

(5) Possess loan officers and other appropriate personnel who have received training conducted by the Agency. Additional training may be required if the lender’s contact person changes or if the Agency determines further instruction is needed.

(6) Have committed no action within the most recent 2 years prior to requesting CLP status which would be considered cause for revoking CLP status under paragraph (e) of this section.

(c) CLP approval. The Agency may grant CLP status for a period not to exceed 5 years by executing Form 4279–8, “Certified Lender, Business and Industry Program,” with the lender. CLP status will not apply to branches or suboffices of the lender unless so specified in the agreement. Such branches or suboffices may submit loans as regular lenders or apply for their own CLP status. Any lender who desires CLP status must prepare a written request to the State Director where it desires CLP status. The request must address each of the required criteria outlined in paragraph (b) of this section, except paragraph (b)(3), and should be accompanied by any other information the lender believes will be helpful. The request will also include Form 4279–8 completed and executed by the lender and an executed Lender’s Agreement if it does not already have a valid Lender’s Agreement on file with the Agency. Loans made by the lender and guaranteed by the Agency prior to the lender receiving CLP status shall continue to be governed by the forms and agreements executed between the lender and the Agency for those loans.

(d) Renewal of CLP status. Renewal of CLP status is not automatic. CLP status will lapse upon the expiration date of Form 4279–8 unless the lender obtains a renewal. A lender whose CLP status has lapsed may continue to submit loan guarantee requests as a regular lender. A new Form 4279–8 completed and executed by the lender must be provided, along with a written update of the eligibility criteria required by this section for CLP approval. This information must be supplied at least 60 days prior to the expiration of the existing agreement to be assured of uninterrupted status. The information must address how the lender is complying with each of the required criteria described in paragraph (b) of this section. It must include any proposed changes in the designated persons for processing guaranteed loans or operating methods used in processing and servicing Agency guaranteed loans.

(e) Revocation of CLP status. The lender’s CLP status may be revoked at any time for cause. The debarment of a lender is an additional alternative the Agency may consider. A lender which has lost its CLP status, but has not been debarred and still meets the requirements of § 4279.29 of this subpart may continue to submit loan guarantee requests as a regular lender. Cause for revoking CLP status includes:

(1) Failure to maintain status as an eligible lender as set forth in § 4279.29 of this subpart;

(2) Knowingly submitting false information when requesting a guarantee or basing a guarantee request on information known to be false or which the lender should have known to be false;

(3) Making a guaranteed loan with deficiencies which may cause losses not to be covered by the Loan Note Guarantee;

(4) Conviction for acts in connection with any loan transaction whether or
not the loan was guaranteed by the Agency;

(5) Violation of usury laws in connection with any loan guaranteed by the Agency;

(6) Failure to obtain the required security for any loan guaranteed by the Agency;

(7) Using loan funds guaranteed by the Agency for purposes other than those specifically approved by the Agency in the Conditional Commitment;

(8) Violation of any term of the Lender’s Agreement;

(9) Failure to correct any cited deficiency in loan documents in a timely manner;

(10) Failure to submit reports required by the Agency in a timely manner;

(11) Failure to process Agency guaranteed loans in a reasonably prudent manner;

(12) Failure to provide for adequate construction planning and monitoring in connection with any loan to ensure that the project will be completed with the available funds and, once completed, will be suitable for the borrower’s needs;

(13) Repetitive recommendations for guaranteed loans with marginal or sub-standard credit quality or that do not comply with Agency requirements;

(14) Repetitive recommendations for servicing actions that do not comply with Agency requirements;

(15) Negligent servicing; or

(16) Failure to conduct any approved liquidation of a loan guaranteed by the Agency or its predecessors in a timely and effective manner and in accordance with the approved liquidation plan.

(f) General loan processing and servicing guidelines. All requests for guaranteed loans will be processed and serviced under subparts A and B of this part and subpart B of part 4287 of this chapter except as modified by this section. When determining whether or not to request a guarantee for a proposed loan, lenders must consider the priorities set forth in §279.155 of subpart B of this part.

(1) Prior to processing an application, the CLP lender may give written notice to the State Director of its intention to submit an application. Upon receipt of such written notice, the Agency will notify the CLP lender whether or not there is sufficient guarantee authority for the loan. Such guarantee authority will be held for 30 days pending receipt of the application. If a complete application for which guarantee authority is being held is not received within 30 days of the notice of intent to file or is rejected, the guarantee authority for this application will no longer be held in reserve. Notwithstanding the preceding, no guarantee authority will be held in reserve the last 60 days of the Agency’s fiscal year.

(2) Refinancing of existing lender debt in accordance with §4279.113(q) of subpart B of this part will not be permitted without prior Agency approval.

(3) CLP lenders will process all guaranteed loans as a “complete application” by obtaining and completing all items required by §§4279.161(b) of subpart B of this part. The CLP lender must maintain all information required by §§4279.161(b) in its loan file and determine that such material complies with all requirements.

(4) CLP lenders will make all material relating to any guarantee application available to the Agency upon request.

(5) At the time of the Agency’s issuance of the Loan Note Guarantee, the CLP lender will provide the Agency with copies of the following documents:

(i) Executed Loan Agreement;

(ii) Executed Promissory Notes; and

(iii) Executed security documents including personal and corporate guarantees.

(g) Unique characteristics of the CLP. A proposed loan by a CLP lender requires a review by the Agency of the information submitted by the lender, plus satisfactory completion of the environmental review process by the Agency. The Agency may rely on the lender’s credit analysis.

(1) The following will constitute a complete application submitted by a CLP lender:

(i) Form 4279–1, “Application for Loan Guarantee (Business and Industry),” (marked with the letters “CLP” at the top) completed in its entirety and executed by the borrower and CLP lender;
(ii) Copy of the proposed Loan Agreement or a list of proposed requirements;
(iii) Form FmHA 1940–20, completed and signed, with attachments;
(iv) The lender’s complete written analysis of the proposal, including spreadsheets of the balance sheets and income statements for the 3 previous years (for existing businesses), pro forma balance sheet at startup, and 2 years projected yearend balance sheets and income statements, with appropriate ratios and comparisons with industry standards (such as Dun & Bradstreet or Robert Morris Associates). All data must be shown in total dollars and also in common size form, obtained by expressing all balance sheet items as a percentage of assets and all income and expense items as a percentage of sales. The lender’s credit analysis must include the borrower’s management, repayment ability including a cash flow analysis, history of debt repayment, necessity of any debt refinancing, and the credit reports of the borrower, its principals, and any parent, affiliate, or subsidiary;
(v) Intergovernmental consultation comments in accordance with 7 CFR part 3015, subpart V; and
(vi) If the loan will exceed $1 million and will increase direct employment by more than 50 employees, Form 4279–2, “Certification of Non-Relocation and Market Capacity Information Report,” must be completed by the lender. For such loans, the Agency will submit Form 4279–2 to the Department of Labor and obtain clearance before a Conditional Commitment may be issued.

(2) The Agency will make the final credit decision based primarily on a review of the credit analysis submitted by the lender and approval of the Agency’s completed environmental analysis, if required, except that refinancing of existing lender debt in accordance with §4279.113(q) of subpart B of this part will not be approved without a credit analysis by the Agency of the borrower’s complete financial statements; and completion by the Agency of the environmental analysis. The Agency may request such additional information as it determines is needed to make a decision.

(h) Lender loan servicing responsibilities. CLP lenders will be fully responsible for all aspects of loan servicing and, if necessary, liquidation as described in subpart B of part 4287 of this chapter.

§4279.44 Access to records.

The lender will permit representatives of the Agency (or other agencies of the United States) to inspect and make copies of any records of the lender pertaining to the Agency guaranteed loans during regular office hours of the lender or at any other time upon agreement between the lender and the Agency.

§§4279.45–4279.57 [Reserved]

§4279.58 Equal Credit Opportunity Act.

In accordance with title V of Public Law 93–465, the Equal Credit Opportunity Act, with respect to any aspect of a credit transaction, neither the lender nor the Agency will discriminate against any applicant on the basis of race, color, religion, national origin, sex, marital status or age (providing the applicant has the capacity to contract), or because all or part of the applicant’s income derives from a public assistance program, or because the applicant has, in good faith, exercised any right under the Consumer Protection Act. The lender will comply with the requirements of the Equal Credit Opportunity Act as contained in the Federal Reserve Board’s Regulation implementing that Act (see 12 CFR part 222). Such compliance will be accomplished prior to loan closing.

§4279.59 [Reserved]

§4279.60 Civil Rights Impact Analysis.

The Agency is responsible for ensuring that all requirements of FmHA Instruction 2006–P, “Civil Rights Impact Analysis” are met and will complete the appropriate level of review in accordance with that instruction.

§§4279.61–4279.70 [Reserved]

§4279.71 Public bodies and nonprofit corporations.

Any public body or nonprofit corporation that receives a guaranteed
§ 4279.72 Conditions of guarantee.

A loan guarantee under this part will be evidenced by a Loan Note Guarantee issued by the Agency. Each lender will execute a Lender’s Agreement. If a valid Lender’s Agreement already exists, it is not necessary to execute a new Lender’s Agreement with each loan guarantee. The provisions of this part and part 4287 of this chapter will apply to all outstanding guarantees. In the event of a conflict between the guarantee documents and these regulations as they exist at the time the documents are executed, the regulations will control.

(a) Full faith and credit. A guarantee under this part constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which a lender or holder has actual knowledge at the time it becomes such lender or holder or which a lender or holder participates in or condones. The guarantee will be unenforceable to the extent that any loss is occasioned by a provision for interest on interest. In addition, the guarantee will be unenforceable by the lender to the extent any loss is occasioned by the violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which the Agency acquires knowledge thereof. Any losses occasioned will be unenforceable to the extent that loan funds are used for purposes other than those specifically approved by the Agency in its Conditional Commitment. The Agency will guarantee payment as follows:

1. To any holder, 100 percent of any loss sustained by the holder on the guaranteed portion of the loan and on interest due on such portion.

2. To the lender, the lesser of:

(i) Any loss sustained by the lender on the guaranteed portion, including principal and interest evidenced by the notes or assumption agreements and secured advances for protection and preservation of collateral made with the Agency’s authorization;

(ii) The guaranteed principal advanced to or assumed by the borrower and any interest due thereon.

(b) Rights and liabilities. When a guaranteed portion of a loan is sold to a holder, the holder shall succeed to all rights of the lender under the Loan Note Guarantee to the extent of the portion purchased. The lender will remain bound to all obligations under the Loan Note Guarantee, Lender’s Agreement, and the Agency program regulations. A guarantee and right to require purchase will be directly enforceable by a holder notwithstanding any fraud or misrepresentation by the lender or any unenforceability of the guarantee by the lender, except for fraud or misrepresentation of which the holder had actual knowledge at the time it became the holder or in which the holder participates or condones. The lender will reimburse the Agency for any payments the Agency makes to a holder of lender’s guaranteed loan that, under the Loan Note Guarantee, would not have been paid to the lender had the lender retained the entire interest in the guaranteed loan and not conveyed an interest to a holder.

(c) Payments. A lender will receive all payments of principal and interest on account of the entire loan and will promptly remit to the holder its pro rata share thereof, determined according to its respective interest in the loan, less only the lender’s servicing fee.
§ 4279.75 Sale or assignment of guaranteed loan.

The lender may sell all or part of the guaranteed portion of the loan on the secondary market or retain the entire loan. The lender shall not sell or participate any amount of the guaranteed or unguaranteed portion of the loan to the borrower or members of the borrower's immediate families, officers, directors, stockholders, other owners, or a parent, subsidiary or affiliate. If the lender desires to market all or part of the guaranteed portion of the loan at or subsequent to loan closing, such loan must not be in default. Loans made with the proceeds of any obligation the interest on which is excludable from income under 26 U.S.C. 103 (interest on State and local banks) or any successor section will not be guaranteed.

(a) Single note system. The entire loan is evidenced by one note, and one Loan Note Guarantee is issued. The lender may assign all or part of the guaranteed portion of the loan to one or more holders by using the Agency's Assignment Guarantee Agreement. The holder, upon written notice to the lender and the Agency, may reassign the unpaid guaranteed portion of the loan sold under the Assignment Guarantee Agreement. Upon notification and completion of the assignment through the use of Form 4279–6, the assignee shall succeed to all rights and obligations of the holder thereunder. If this option is selected, the lender may not at a later date cause any additional notes to be issued.

(b) Multinote system. Under this option the lender may provide one note for the unguaranteed portion of the loan and no more than 10 notes for the guaranteed portion. When this option is selected by the lender, the holder will receive one of the borrower's executed notes and a Loan Note Guarantee. The Agency will issue a Loan Note Guarantee for each note, including the unguaranteed note, to be attached to the note. An Assignment Guarantee Agreement will not be used when the multinote option is utilized.

(c) After loan closing. If a loan is closed using the multinote option and at a later date additional notes are desired, the lender may cause a series of new notes, so that the total number of notes issued does not exceed the total number provided for in paragraph (b) of this section, to be issued as replacement for previously issued guaranteed notes, provided:

1. Written approval of the Agency is obtained;
2. The borrower agrees and executes the new notes;
3. The interest rate does not exceed the interest rate in effect when the loan was closed;
4. The maturity date of the loan is not changed;
5. The Agency will not bear or guarantee any expenses that may be incurred in reference to such reissuances of notes;
6. There is adequate collateral securing the notes;
7. No intervening liens have arisen or have been perfected and the secured lien priority is better or remains the same; and
8. All holders agree.

(d) Termination of lender servicing fee. The lender's servicing fee will stop when the Agency purchases the guaranteed portion of the loan from the secondary market. No such servicing fee may be charged to the Agency and all loan payments and collateral proceeds received will be applied first to the guaranteed loan and, when applied to the guaranteed loan, will be applied on a pro rata basis.

§ 4279.76 Participation.

The lender may obtain participation in the loan under its normal operating procedures; however, the lender must retain title to the notes if any of them are unguaranteed and retain the lender's interest in the collateral.

§ 4279.77 Minimum retention.

The lender is required to hold in its own portfolio a minimum of 5 percent of the total loan amount. The amount required to be maintained must be of the unguaranteed portion of the loan and cannot be participated to another. The lender may sell the remaining amount of the unguaranteed portion of the loan only through participation.
§ 4279.78 Repurchase from holder.

(a) Repurchase by lender. A lender has the option to repurchase the unpaid guaranteed portion of the loan from a holder within 30 days of written demand by the holder when the borrower is in default not less than 60 days on principal or interest due on the loan; or the lender has failed to remit to the holder its pro rata share of any payment made by the borrower within 30 days of the lender’s receipt thereof. The repurchase by the lender will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest less the lender’s servicing fee. The holder must concurrently send a copy of the demand letter to the Agency. The guarantee will not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the demand letter to the lender requesting the repurchase. The lender will accept an assignment without recourse from the holder upon repurchase. The lender is encouraged to repurchase the loan to facilitate the accounting of funds, resolve the problem, and prevent default, where and when reasonable. The lender will notify the holder and the Agency of its decision.

(b) Agency purchase. (1) If the lender does not repurchase the unpaid guaranteed portion of the loan as provided in paragraph (a) of this section, the Agency will purchase from the holder the unpaid principal balance of the guaranteed portion together with accrued interest to date of repurchase, less the lender’s servicing fee, within 30 days after written demand to the Agency from the holder. (This is in addition to the copy of the written demand on the lender.) The guarantee will not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the original demand letter of the lender to the lender requesting the repurchase.

(2) The holder’s demand to the Agency must include a copy of the written demand made upon the lender. The holder must also include evidence of its right to require payment from the Agency. Such evidence will consist of either the original of the Loan Note Guarantee Agreement properly endorsed to the Agency or the original of the Assignment Guarantee Agreement properly assigned to the Agency without recourse including all rights, title, and interest in the loan. The holder must include in its demand the amount due including unpaid principal, unpaid interest to date of demand, and interest subsequently accruing from date of demand to proposed payment date. The Agency will be subrogated to all rights of the holder.

(3) The Agency will notify the lender of its receipt of the holder’s demand for payment. The lender must promptly provide the Agency with the information necessary for the Agency to determine the appropriate amount due the holder. Upon request by the Agency, the lender will furnish a current statement certified by an appropriate authorized officer of the lender of the unpaid principal and interest then owed by the borrower on the loan and the amount then owed to any holder. Any discrepancy between the amount claimed by the holder and the information submitted by the lender must be resolved between the lender and the holder before payment will be approved. Such conflict will suspend the running of the 30 day payment requirement.

(4) Purchase by the Agency neither changes, alters, nor modifies any of the lender’s obligations to the Agency arising from the loan or guarantee nor does it waive any of Agency’s rights against the lender. The Agency will have the right to set-off against the lender all rights inuring to the Agency as the holder of the instrument against the Agency’s obligation to the lender under the guarantee.

(c) Repurchase for servicing. If, in the opinion of the lender, repurchase of the guaranteed portion of the loan is necessary to adequately service the loan, the holder must sell the guaranteed portion of the loan to the lender for an amount equal to the unpaid principal and interest on such portion less the lender’s servicing fee. The guarantee will not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the demand letter of the lender or the Agency to the holder requesting the holder to tender its guaranteed portion. The lender must not repurchase from the
holder for arbitrage or other purposes to further its own financial gain. Any repurchase must only be made after the lender obtains the Agency’s written approval. If the lender does not repurchase the portion from the holder, the Agency may, at its option, purchase such guaranteed portion for servicing purposes.

§ 4279.79–4279.83 [Reserved]

§ 4279.84 Replacement of document.

(a) The Agency may issue a replacement Loan Note Guarantee or Assignment Guarantee Agreement which was lost, stolen, destroyed, mutilated, or defaced to the lender or holder upon receipt of an acceptable certificate of loss and an indemnity bond.

(b) When a Loan Note Guarantee or Assignment Guarantee Agreement is lost, stolen, destroyed, mutilated, or defaced while in the custody of the lender or holder, the lender will coordinate the activities of the party who seeks the replacement documents and will submit the required documents to the Agency for processing. The requirements for replacement are as follows:

(1) A certificate of loss, notarized and containing a jurat, which includes:
   (i) Name and address of owner;
   (ii) Name and address of the lender of record;
   (iii) Capacity of person certifying;
   (iv) Full identification of the Loan Note Guarantee or Assignment Guarantee Agreement including the name of the borrower, the Agency’s case number, date of the Loan Note Guarantee or Assignment Guarantee Agreement, face amount of the evidence of debt purchased, date of evidence of debt, present balance of the loan, percentage of guarantee, and, if an Assignment Guarantee Agreement, the original named holder and the percentage of the guaranteed portion of the loan assigned to that holder. Any existing parts of the document to be replaced must be attached to the certificate;
   (v) A full statement of circumstances of the loss, theft, or destruction of the Loan Note Guarantee or Assignment Guarantee Agreement; and
   (vi) For the holder, evidence demonstrating current ownership of the Loan Note Guarantee and Note or the Assignment Guarantee Agreement. If the present holder is not the same as the original holder, a copy of the endorsement of each successive holder in the chain of transfer from the initial holder to present holder must be included if in existence. If copies of the endorsement cannot be obtained, best available records of transfer must be submitted to the Agency (e.g., order confirmation, canceled checks, etc.).

(2) An indemnity bond acceptable to the Agency shall accompany the request for replacement except when the holder is the United States, a Federal Reserve Bank, a Federal corporation, a State or territory, or the District of Columbia. The bond shall be with surety except when the outstanding principal balance and accrued interest due the present holder is less than $1 million verified by the lender in writing in a letter of certification of balance due. The surety shall be a qualified surety company holding a certificate of authority from the Secretary of the Treasury and listed in Treasury Department Circular 580.

(3) All indemnity bonds must be issued and payable to the United States of America acting through the USDA. The bond shall be in an amount not less than the unpaid principal and interest. The bond shall hold USDA harmless against any claim or demand which might arise or against any damage, loss, costs, or expenses which might be sustained or incurred by reasons of the loss or replacement of the instruments.

(4) In those cases where the guaranteed loan was closed under the provision of the multinote system, the Agency will not attempt to obtain, or participate in the obtaining of, replacement notes from the borrower. It will be the responsibility of the holder to bear costs of note replacement if the borrower agrees to issue a replacement instrument. Should such note be replaced, the terms of the note cannot be changed. If the evidence of debt has been lost, stolen, destroyed, mutilated or defaced, such evidence of debt must be replaced before the Agency will replace any instruments.
§§ 4279.85–4279.99 [Reserved]

§ 4279.100 OMB control number.

The information collection requirements contained in this regulation have been approved by OMB and have been assigned OMB control number 0575–0171. Public reporting burden for this collection of information is estimated to vary from 1 hour to 8 hours per response, with an average of 4 hours per response, including time for reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Agriculture, Clearance Officer, OIRM, Stop 7630, Washington, D.C. 20250. You are not required to respond to this collection of information unless it displays a currently valid OMB control number.

Subpart B—Business and Industry Loans

§ 4279.101 Introduction.

(a) Content. This subpart contains loan processing regulations for the Business and Industry (B&I) Guaranteed Loan Program. It is supplemented by subpart A of this part, which contains general guaranteed loan regulations, and subpart B of part 4287 of this chapter, which contains loan servicing regulations.

(b) Purpose. The purpose of the B&I Guaranteed Loan Program is to improve, develop, or finance business, industry, and employment and improve the economic and environmental climate in rural communities. This purpose is achieved by bolstering the existing private credit structure through the guarantee of quality loans which will provide lasting community benefits. It is not intended that the guarantee authority will be used for marginal or substandard loans or for relief of lenders having such loans.

(c) Documents. Copies of all forms, regulations, and Instructions referenced in this subpart are available in any Agency office.

§ 4279.102 Definitions.

The definitions and abbreviations in § 4279.2 of subpart A of this part are applicable to this subpart.

§§ 4279.103–4279.106 [Reserved]

§ 4279.107 Guarantee fees.

For all new loans there are two types of non-refundable guarantee fees to be paid by the lender. The fees may be passed on to the borrower. The fees may be forwarded to the Agency through an electronic funds transfer system or, at the Agency’s discretion, by a check payable to USDA using a USDA-approved form.

(a) Initial guarantee fee. The initial fee is paid at the time the Loan Note Guarantee is issued. The fee may be included as an eligible loan purpose in the guaranteed loan. The fee will be the rate (a specified percentage not to exceed 2 percent) multiplied by the principal loan amount, multiplied by the percent of guarantee. Subject to specified annual limits set by the Agency, the initial guarantee fee may be reduced to 1 percent if the borrower’s business supports value-added agriculture and results in farmers benefiting financially, or

(1) Is a high impact business development investment in accordance with § 4279.155(b)(5), and

(2) Is located in a rural community that:

(i) Is experiencing long-term population decline and job deterioration, or

(ii) Has remained persistently poor over the last 60 years, or

(iii) Is experiencing trauma as a result of natural disaster, or

(iv) Is experiencing fundamental structural changes in its economic base.

(b) Annual renewal fee. The annual renewal fee is paid once a year and is required to maintain the enforceability of the guarantee as to the lender.
(1) The rate of the annual renewal fee (a specified percentage) is established by Rural Development in an annual notice published in the Federal Register, multiplied by the outstanding principal loan balance as of December 31 of each year, multiplied by the percent of guarantee. The rate is the rate in effect at the time the loan is obligated, and will remain in effect for the life of the loan.

(2) Annual renewal fees are due on January 31. Payments not received by April 1 are considered delinquent, and, at the Agency’s discretion, may result in cancellation of the guarantee to the lender. Holders’ rights will continue in effect as specified in the Loan Note Guarantee and Assignment Guarantee Agreement. Any delinquent annual renewal fees will bear interest at the note rate and will be deducted from any loss payment due the lender. For loans where the Loan Note Guarantee is issued between October 1 and December 31, the first annual renewal fee payment will be due January 31 of the second year following the date the Loan Note Guarantee was issued.

§ 4279.108 Eligible borrowers.

(a) Type of entity. A borrower may be a cooperative organization, corporation, partnership, or other legal entity organized and operated on a profit or nonprofit basis; an Indian tribe on a Federal or State reservation or other Federally recognized tribal group; a public body; or an individual. A cooperative organization is a cooperative or an entity, not chartered as a cooperative, that operates as a cooperative in that it is owned and operated for the benefit of its members, including the manner in which it distributes its dividends and assets. A borrower must be engaged in or proposing to engage in a business. Business may include manufacturing, wholesaling, retailing, providing services, or other activities that will:

(1) Provide employment;

(2) Improve the economic or environmental climate;

(3) Promote the conservation, development, and use of water for aquaculture; or

(4) Reduce reliance on nonrenewable energy resources by encouraging the development and construction of solar energy systems and other renewable energy systems (including wind energy systems, geothermal energy systems, and anaerobic digesters for the purpose of energy generation).

(b) Citizenship. Individual borrowers must be citizens of the United States (U.S.) or reside in the U.S. after being legally admitted for permanent residence. Citizens and residents of the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands shall be considered U.S. citizens. Corporations or other nonpublic body organization-type borrowers must be at least 51 percent owned by persons who are either citizens of the U.S. or reside in the U.S. after being legally admitted for permanent residence.

(c) Rural area. The business financed with a B&I Guaranteed Loan must be located in a rural area, except for cooperative organizations financed in accordance with paragraph (d)(3) of this section. Loans to borrowers with facilities located in both rural and non-rural areas will be limited to the amount necessary to finance the facility in the eligible rural area, except for cooperative organizations financed in accordance with paragraph (d)(3) of this section. Rural areas are any areas other than:

(1) A city or town that has a population of greater than 50,000 inhabitants; and

(2) The urbanized area contiguous and adjacent to such a city or town, as defined by the U.S. Bureau of the Census using the latest decennial census of the United States.

(d) Loans to cooperative organizations.

(1) B&I loans to eligible cooperative organizations may be made in principal amounts up to $40 million if the project is located in a rural area, the cooperative facility being financed provides for the value-added processing of agricultural commodities, and the total amount of loans exceeding $25 million does not exceed 10 percent of the funds available for the fiscal year.

(2) Cooperative organizations that are headquartered in a non-rural area may be eligible for a B&I loan if the
§§ 4279.109–4279.112

loan is used for a project or venture that is located in a rural area.

(3) B&I loans to eligible cooperative organizations may also be made in non-rural areas provided:

(i) The primary purpose of the loan is for a facility to provide value-added processing for agricultural producers that are located within 80 miles of the facility;

(ii) The applicant satisfactorily demonstrates that the primary benefit of the loan will be to provide employment for rural residents;

(iii) The principal amount of the loan does not exceed $25 million; and

(iv) The total amount of loans guaranteed under this section does not exceed 10 percent of the funds available for the fiscal year.

(4) An eligible cooperative organization may refinance an existing B&I loan provided that the existing loan is current and performing, the existing loan is not and has not been in payment default (more than 30 days late) or the collateral of which has not been converted, and there is adequate security or full collateral for the new B&I loan.

(e) Other credit. All applications for assistance will be accepted and processed without regard to the availability of credit from any other source.

§§ 4279.109–4279.112 [Reserved]

§ 4279.113 Eligible loan purposes.

Loan purposes must be consistent with the general purpose contained in §4279.101 of this subpart. They include but are not limited to the following:

(a) Business and industrial acquisitions when the loan will keep the business from closing, prevent the loss of employment opportunities, or provide expanded job opportunities.

(b) Business conversion, enlargement, repair, modernization, or development.

(c) Purchase and development of land, easements, rights-of-way, buildings, or facilities.

(d) Purchase of equipment, leasehold improvements, machinery, supplies, or inventory.

(e) Pollution control and abatement.

(f) Transportation services incidental to industrial development.

(g) Startup costs and working capital.

(h) Agricultural production, when not eligible for Farm Service Agency (FSA) farmer program assistance and when it is part of an integrated business also involved in the processing of agricultural products.

(1) Examples of potentially eligible production include but are not limited to: An apple orchard in conjunction with a food processing plant; poultry buildings linked to a meat processing operation; or sugar beet production coupled with storage and processing. Any agricultural production considered for B&I financing must be owned, operated, and maintained by the business receiving the loan for which a guarantee is provided. Independent agricultural production operations, even if not eligible for FSA farmer programs assistance, are not eligible for the B&I program.

(2) The agricultural-production portion of any loan will not exceed 50 percent of the total loan or $1 million, whichever is less.

(i) Purchase of membership, stocks, bonds, or debentures necessary to obtain a loan from Farm Credit System institutions and other lenders provided that the purchase is required for all of their borrowers.

(j) Purchase of cooperative stock by individual farmers or ranchers in a farmer or rancher cooperative established for the purpose of processing an agricultural commodity.

(1) The cooperative may contract for services to process agricultural commodities or otherwise process value-added agricultural products during the 5-year period beginning on the operation startup date of the cooperative in order to provide adequate time for the planning and construction of the processing facility of the cooperative.

(2) Notwithstanding §§ 4279.131(d) and 4279.137, the individual farmer or rancher may provide financial information in the manner that is generally required by commercial agricultural lenders in order to obtain a loan.

(k) Aquaculture, including conservation, development, and utilization of water for aquaculture.
§ 4279.114 Ineligible purposes.

(a) Distribution or payment to an individual owner, partner, stockholder, or beneficiary of the borrower or a close relative of such an individual when such individual will retain any
portion of the ownership of the borrower.

(b) Projects in excess of $1 million that would likely result in the transfer of jobs from one area to another and increase direct employment by more than 50 employees.

(c) Projects in excess of $1 million that would increase direct employment by more than 50 employees, if the project would result in an increase in the production of goods for which there is not sufficient demand, or if the availability of services or facilities is insufficient to meet the needs of the business.

(d) Charitable institutions, churches, or church-controlled or fraternal organizations.

(e) Lending and investment institutions and insurance companies.

(f) Assistance to Government employees and military personnel who are directors or officers or have a major ownership of 20 percent or more in the business.

(g) Racetracks for the conduct of races by professional drivers, jockeys, etc., where individual prizes are awarded in the amount of $500 or more.

(h) Any business that derives more than 10 percent of annual gross revenue from gambling activity.

(i) Any illegal business activity.

(j) Prostitution.

(k) Any line of credit.

(l) The guarantee of lease payments.

(m) The guarantee of loans made by other Federal agencies.

(n) Owner-occupied housing. Bed and breakfasts, storage facilities, etc., are allowed when the pro rata value of the owner's living quarters is deleted.

(o) Projects that are eligible for the Rural Rental Housing and Rural Cooperative Housing loans under sections 515, 521, and 538 of the Housing Act of 1949, as amended.

(p) Loans made with the proceeds of any obligation the interest on which is excludable from income under 26 U.S.C. 103 or a successor statute. Funds generated through the issuance of tax-exempt obligations may neither be used to purchase the guaranteed portion of any Agency guaranteed loan nor may an Agency guaranteed loan serve as collateral for a tax-exempt issue. The Agency may guarantee a loan for a project which involves tax-exempt financing only when the guaranteed loan funds are used to finance a part of the project that is separate and distinct from the part which is financed by the tax-exempt obligation, and the guaranteed loan has at least a parity security position with the tax-exempt obligation.

(q) The guarantee of loans where there may be, directly or indirectly, a conflict of interest or an appearance of a conflict of interest involving any action by the Agency.

(r) Golf courses.

§ 4279.115 Prohibition under Agency programs.

No B&I loans guaranteed by the Agency will be conditioned on any requirement that the recipients of such assistance accept or receive electric service from any particular utility, supplier, or cooperative.

§§ 4279.116–4279.118 [Reserved]

§ 4279.119 Loan guarantee limits.

(a) Loan amount. The total amount of Agency loans to one borrower, including: The guaranteed and unguaranteed portions; the outstanding principal and interest balance of any existing Agency guaranteed loans; and new loan request, must not exceed $10 million, except as outlined in paragraphs (a)(1) and (2) of this section.

(1) The Administrator may, at the Administrator's discretion, grant an exception to the $10 million limit for loans of $25 million or less under the following circumstances:

(i) The project to be financed is a high-priority project. Priority will be determined in accordance with the criteria contained in §4279.155 of this subpart;

(ii) The lender must document to the satisfaction of the Agency that the loan will not be made and the project will not be completed if the guarantee is not approved;

(iii) The percentage of guarantee will not exceed 60 percent. No exception to this requirement will be approved under paragraph (b) of this section for loans exceeding $10 million; and

(iv) Any request for a guaranteed loan exceeding the $10 million limit
must be submitted to the Agency in the form of a preapplication. The preapplication must be submitted to the National Office for review and concurrence before encouraging a full application.

(2) The Secretary, whose authority may not be redelegated, may approve guaranteed loans in excess of $25 million, at the Secretary’s discretion, for rural cooperative organizations that process value-added agricultural commodities in accordance with § 4279.108(d)(1) of this subpart.

(b) Percent of guarantee. The percentage of guarantee, up to the maximum allowed by this section, is a matter of negotiation between the lender and the Agency. The maximum percentage of guarantee is 80 percent for loans of $5 million or less, 70 percent for loans between $5 and $10 million, and 60 percent for loans exceeding $10 million. Notwithstanding the preceding, the Administrator may, at the Administrator’s discretion, grant an exception allowing guarantees of up to 90 percent on loans of $10 million or less under the following circumstances:

(1) The project to be financed is a high-priority project. Priority will be determined in accordance with the criteria contained in 4279.155 of this subpart;

(2) The lender must document to the satisfaction of the Agency that the loan will not be made and the project will not be completed if the higher guarantee percentage is not approved; and

(3) The State Director may grant an exception for loans of up to 90 percent on loans of $2 million or less subject to the State Director’s delegated loan authority and meeting all of the conditions as set forth in this section. In cases where the State Director does not have the loan approval authority to approve a loan of $2 million or less or the proposed percentage, the case must be submitted to the National Office for review.

(4) Each fiscal year, the Agency will establish a limit on the maximum portion of guarantee authority available for that fiscal year that may be used to guarantee loans with a guarantee percentage exceeding 80 percent. The limit will be announced by publishing a notice in the Federal Register. Once the limit has been reached, the guarantee percentage for all additional loans guaranteed during the remainder of that fiscal year will not exceed 80 percent.

§ 4279.120 Fees and charges.

(a) Routine lender fees. The lender may establish charges and fees for the loan provided they are similar to those normally charged other applicants for the same type of loan in the ordinary course of business.

(b) Professional services. Professional services are those rendered by entities generally licensed or certified by States or accreditation associations, such as architects, engineers, packagers, accountants, attorneys, or appraisers. The borrower may pay fees for professional services needed for planning and developing a project provided that the amounts are reasonable and customary in the area. Professional fees may be included as an eligible use of loan proceeds.

§§ 4279.121–4279.124 [Reserved]

§ 4279.125 Interest rates.

The interest rate for the guaranteed loan will be negotiated between the lender and the applicant and may be either fixed or variable as long as it is a legal rate. Interest rates will not be more than those rates customarily charged borrowers in similar circumstances in the ordinary course of business and are subject to Agency review and approval. Lenders are encouraged to utilize the secondary market and pass interest-rate savings on to the borrower.

(a) A variable interest rate agreed to by the lender and borrower must be a rate that is tied to a base rate agreed to by the lender and the Agency. The variable interest rate may be adjusted at different intervals during the term of the loan, but the adjustments may not be more often than quarterly and must be specified in the Loan Agreement. The lender must incorporate, within the variable rate Promissory Note at loan closing, the provision for adjustment of payment installments
§ 4279.126 Loan terms.

(a) The maximum repayment for loans on real estate will not exceed 30 years; machinery and equipment repayment will not exceed the useful life of the machinery and equipment purchased with loan funds or 15 years, whichever is less; and working capital repayment will not exceed 7 years. The term for a loan that is being refinanced may be based on the collateral the lender will take to secure the loan.

(b) The first installment of principal and interest will, if possible, be scheduled for payment after the project is operational and has begun to generate income. However, the first full installment must be due and payable within 3 years from the date of the Promissory Note and be paid at least annually thereafter. Interest-only payments will be paid at least annually from the date of the note.

(c) Only loans which require a periodic payment schedule which will retire the debt over the term of the loan without a balloon payment will be guaranteed.

(d) A loan’s maturity will take into consideration the use of proceeds, the useful life of assets being financed, and the borrower’s ability to repay the loan. The lender may apply the maximum guidelines specified above only when the loan cannot be repaid over a shorter term.

(e) All loans guaranteed through the B&I program must be sound, with reasonably assured repayment.

§§ 4279.127–4279.130 [Reserved]

§ 4279.131 Credit quality.

The lender is primarily responsible for determining credit quality and must address all of the elements of credit quality in a written credit analysis including adequacy of equity, cash flow, collateral, history, management, and the current status of the industry for which credit is to be extended.

(a) Cash flow. All efforts will be made to structure or restructure debt so that the business has adequate debt coverage and the ability to accommodate expansion.

(b) Collateral. (1) Collateral must have documented value sufficient to protect the interest of the lender and the Agency and, except as set forth in paragraph (b)(2) of this section, the discounted collateral value will be at least equal to the loan amount. Lenders will discount collateral consistent with sound loan-to-value policy.

(2) Some businesses are predominately cash-flow oriented, and where cash flow and profitability are strong, loan-to-value coverage may be discounted accordingly. A loan primarily based on cash flow must be supported by a successful and documented financial history.

(c) Industry. Current status of the industry will be considered and businesses in areas of decline will be required to provide strong business plans which outline how they differ from the current trends. The regulatory environment surrounding the particular business or industry will be considered.

(d) Equity. (1) A minimum of 10 percent tangible balance sheet equity will be required for existing businesses at loan closing. A minimum of 20 percent tangible balance sheet equity will be required for new businesses at loan closing. For energy projects, the minimum tangible balance sheet equity requirement range will be between 25 percent and 40 percent. Criteria for considering the minimum equity required for
an individual application will be based on: existing businesses with successful financial and management history vs. start-up businesses; personal/corporate guarantees offered; contractual relationships with suppliers and buyers; credit rating; and strength of the business plan/feasibility study. Where the application is a request to refinance outstanding Federal direct or guaranteed loans, without any new financing, the equity requirement may be determined using adjusted tangible net worth. An application that combines a refinancing guarantee request with a new loan guarantee request is subject to the standard, unadjusted, equity requirement except as provided in paragraphs (d)(1)(i) or (d)(1)(ii) of this section. Increases or decreases in the equity requirements may be imposed or granted as follows:

(i) A reduction in the equity requirement for existing businesses may be permitted by the Administrator. In order for a reduction to be considered, the borrower must furnish the following:

(A) Collateralized personal and corporate guarantees, including any parent, subsidiary, or affiliated company, when feasible and legally permissible (in accordance with § 4279.149 of this subpart), and

(B) Pro forma and historical financial statements that indicate the business to be financed meets or exceeds the median quartile (as identified in the Risk Management Association’s Annual Statement Studies or similar publication) for the current ratio, quick ratio, debt-to-worth ratio, debt coverage ratio, and working capital.

(ii) The approval official may require more than the minimum equity requirements provided in this paragraph if the official makes a written determination that special circumstances necessitate this course of action.

(2) The equity requirement must be met in the form of either cash or tangible earning assets contributed to the business and reflected on the balance sheet.

(3) The lender must certify that the equity requirement was determined using balance sheets prepared in accordance with GAAP and met upon giving effect to the entirety of the loan in the calculation, whether or not the loan itself is fully advanced, as of the date the guaranteed loan is closed.

(e) Lien priorities. The entire loan will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the loan. The unguaranteed portion of the loan will neither be paid first nor given any preference or priority over the guaranteed portion. A parity or junior position may be considered provided that discounted collateral values are adequate to secure the loan in accordance with paragraph (b) of this section after considering prior liens.

(f) Management. A thorough review of key management personnel will be completed to ensure that the business has adequately trained and experienced managers.

§§ 4279.132–4279.136 [Reserved]

§ 4279.137 Financial statements.

(a) The lender will determine the type and frequency of submission of financial statements by the borrower. At a minimum, annual financial statements prepared by an accountant in accordance with Generally Accepted Accounting Principles will be required.

(b) If specific circumstances warrant and the proposed guaranteed loan will exceed $3 million, the Agency may require annual audited financial statements. For example, the need for audited financial statements will be carefully considered in connection with loans that depend heavily on inventory and accounts receivable for collateral.

§§ 4279.138–4279.142 [Reserved]

§ 4279.143 Insurance.

(a) Hazard. Hazard insurance with a standard mortgage clause naming the lender as beneficiary will be required on every loan in an amount that is at least the lesser of the depreciated replacement value of the collateral or the amount of the loan. Hazard insurance includes fire, windstorm, lightning, hail, explosion, riot, civil commotion, aircraft, vehicle, marine, smoke, builder’s risk during construction by the business, and property damage.
§ 4279.144 Appraisals.

Lenders will be responsible for ensuring that appraisal values adequately reflect the actual value of the collateral. All real property appraisals associated with Agency guaranteed loanmaking and servicing transactions will meet the requirements contained in the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) of 1989 and the appropriate guidelines contained in Standards 1 and 2 of the Uniform Standards of Professional Appraisal Practices (USPAP). In accordance with USPAP, the agency will require documentation that the appraiser has the necessary experience and competency to appraise the property in question. All appraisals will include consideration of the potential effects from a release of hazardous substances or petroleum products or other environmental hazards on the market value of the collateral. For additional guidance and information concerning the completion of real property appraisals, refer to “Standard Practices for Environmental Site Assessments: Transaction Screen Questionnaire” and “Phase I Environmental Site Assessment,” both published by the American Society of Testing and Materials. Chattels will be evaluated in accordance with normal banking practices and generally accepted methods of determining value.

[69 FR 64831, Nov. 9, 2004]

§§ 4279.145–4279.148 [Reserved]

§ 4279.149 Personal and corporate guarantee.

(a) Unconditional personal and corporate guarantees are part of the collateral for the loan, but are not considered in determining whether a loan is adequately secured for loanmaking purposes. Agency approved personal and corporate guarantees for the full term of the loan and at least equal to the guarantor’s percent interest in the borrower, times the loan amount are required from those owning at least a 20 percent interest in the borrower, unless the lender documents to the Agency’s satisfaction that collateral, equity, cashflow, and profitability indicate an above-average ability to repay the loan. The guarantors will execute an Agency approved unconditional guarantee form. When warranted by an Agency assessment of potential financial risk, Agency approved guarantees may also be required of parent, subsidiaries, or affiliated companies (owning less than a 20 percent interest in the borrower) and require security for any guarantee provided under this section.

(b) Exceptions to the requirement for personal guarantees must be requested by the lender and concurred by the Agency approval official on a case-by-case basis. The lender must document that collateral, equity, cashflow, and profitability indicate an above-average ability to repay the loan.

[71 FR 67033, Nov. 20, 2006; 72 FR 27241, May 15, 2007]

§ 4279.150 Feasibility studies.

A feasibility study by a qualified independent consultant may be required by the Agency for start-up businesses or existing businesses when the project will significantly affect the borrower’s operations. An acceptable feasibility study should include, but not be limited to, economic, market, technical, financial, and management feasibility.
§ 4279.155 Loan priorities.

Applications and preapplications received by the Agency will be considered in the order received; however, for the purpose of assigning priorities as described in paragraph (b) of this section, the Agency will compare an application to other pending applications.

(a) When applications on hand otherwise have equal priority, applications for loans from qualified veterans will have preference.

(b) Priorities will be assigned by the Agency to eligible applications on the basis of a point system as contained in this section. The application and supporting information will be used to determine an eligible proposed project’s priority for available guarantee authority. All lenders, including CLP lenders, will consider Agency priorities when choosing projects for guarantee. The lender will provide necessary information related to determining the score, as requested.

(1) Population priority. Projects located in an unincorporated area or in a city with under 25,000 population (10 points).

(2) Community priority. The priority score for community will be the total score for the following categories:
   (i) Located in an eligible area of long term population decline and job deterioration based on reliable statistical data (5 points).
   (ii) Located in a rural community that has remained persistently poor over the last 60 years (5 points).
   (iii) Located in a rural community that is experiencing trauma as a result of natural disaster or experiencing fundamental structural changes in its economic base (5 points).
   (iv) Located in a city or county with an unemployment rate 125 percent of the statewide rate or greater (5 points).

(3) Empowerment Zone/Enterprise Community (EZ/EC). (i) Located in an EZ/EC designated area (10 points).

   (ii) Located in a designated Champion Community (5 points). A Champion Community is a community which developed a strategic plan to apply for an EZ/EC designation, but not selected as a designated EZ/EC Community.

(4) Loan features. The priority score for loan features will be the total score for the following categories:
   (i) Lender will price the loan at the Wall Street Journal published Prime Rate plus 1.5 percent or less (5 points).
   (ii) Lender will price the loan at the Wall Street Journal published Prime Rate plus 1 percent or less (5 points).
   (iii) The Agency guaranteed loan is less than 50 percent of project cost (5 points).
   (iv) Percentage of guarantee is 10 or more percentage points less than the maximum allowable for a loan of its size (5 points).

(5) High impact business investment priorities. The priority score for high impact business investment will be the total score for the following three categories:
   (i) Industry. The priority score for industry will be the total score for the following, except that the total score for industry cannot exceed 10 points.
      (A) Business that offers high value, specialized products and services that command high prices (2 points).
      (B) Business that provides an additional market for existing local business (3 points).
      (C) Business that is locally owned and managed (3 points).
      (D) Business that will produce a natural resource value-added product (2 points).
   (ii) Business. The priority score for business will be the total score for the following:
      (A) Industry that has 20 percent or more of its sales in international markets (5 points).
      (B) Industry that is not already present in the community (5 points).
   (iii) Occupations. The priority score for occupations will be the total score for the following, except that the total score for job quality cannot exceed 10 points:
      (A) Business that creates jobs with an average wage exceeding 125 percent of the Federal minimum wage (5 points).
      (B) Business that creates jobs with an average wage exceeding 150 percent of the Federal minimum wage (10 points).

(6) Administrative points. The State Director may assign up to 10 additional
§ 4279.156 Planning and performing development.

(a) Design policy. The lender must ensure that all project facilities must be designed utilizing accepted architectural and engineering practices and must conform to applicable Federal, state, and local codes and requirements. The lender will also ensure that the project will be completed using the available funds and, once completed, will be used for its intended purpose and produce products in the quality and quantity proposed in the completed application approved by the Agency.

(b) Project control. The lender will monitor the progress of construction and undertake the reviews and inspections necessary to ensure that construction conforms with applicable Federal, state, and local code requirements; proceeds are used in accordance with the approved plans, specifications, and contract documents; and that funds are used for eligible project costs.

(c) Equal opportunity. For all construction contracts in excess of $10,000, the contractor must comply with Executive Order 11246, entitled “Equal Employment Opportunity,” as amended by Executive Order 11375, and as supplemented by applicable Department of Labor regulations (41 CFR, part 60). The borrower and lender are responsible for ensuring that the contractor complies with these requirements.

(d) Americans with Disabilities Act (ADA). B&I Guaranteed Loans which involve the construction of or addition to facilities that accommodate the public and commercial facilities, as defined by the ADA, must comply with the ADA. The lender and borrower are responsible for compliance.

§§ 4279.157–4279.160 [Reserved]

§ 4279.161 Filing preapplications and applications.

Borrowers and lenders are encouraged to file preapplications and obtain Agency comments before completing an application. However, if they prefer, they may file a complete application as the first contact with the Agency. Neither preapplications nor applications will be accepted or processed unless a lender has agreed to finance the proposal. Guaranteed loans of $600,000 and less may be processed under paragraph (b) or (c) of this section, but guaranteed loans exceeding $600,000 must be processed under paragraph (b) of this section.

(a) Preapplications. Lenders may file preapplications by submitting the following to the Agency:

(1) A letter signed by the borrower and lender containing the following:

(i) Borrower’s name, organization type, address, contact person, and federal tax identification and telephone numbers.

(ii) Amount of the loan request, percent of guarantee requested, and the proposed rates and terms.

(iii) Name of the proposed lender, address, telephone number, contact person, and lender’s Internal Revenue Service (IRS) identification number.

(iv) Brief description of the project, products, services provided, and availability of raw materials and supplies.

(v) Type and number of jobs created or saved.

(vi) Amount of borrower’s equity and a description of collateral, with estimated values, to be offered as security for the loan.

(vii) If a corporate borrower, the names and addresses of the borrower’s parent, affiliates, and subsidiary firms, if any, and a description of the relationship.

(2) A completed Form 4279–2, “Certification of Non-Relocation and Market Capacity Information Report,” if
the proposed loan is in excess of $1 million and will increase direct employment by more than 50 employees.

(3) For existing businesses, a current balance sheet and a profit and loss statement not more than 90 days old and financial statements for the borrower and any parent, affiliates, and subsidiaries for at least the 3 most recent years.

(4) For start-up businesses, a preliminary business plan must be provided.

(b) Applications. Except for CLP lenders, applications will be filed with the Agency by submitting the following information: (CLP applications will be completed in accordance with 4279.43(g)(1) but CLP lenders must have the material listed in this paragraph in their files.)

(1) A completed Form 4279–1, “Application for Loan Guarantee (Business and Industry)”.

(2) The information required for filing a preapplication, as listed above, if not previously filed or if the information has changed.

(3) Form FmHA 1940–20, “Request for Environmental Information,” and attachments, unless the project is categorically excluded under Agency environmental regulations.

(4) A personal credit report from an acceptable credit reporting company for a proprietor (owner), each partner, officer, director, key employee, and stockholder owning 20 percent or more interest in the applicant, except for those corporations listed on a major stock exchange. Credit reports are not required for elected and appointed officials when the applicant is a public body.

(5) Intergovernmental consultation comments in accordance with 7 CFR, part 3015, subpart V.

(6) Appraisals, accompanied by a copy of the appropriate environmental site assessment, if available. (Agency approval in the form of a Conditional Commitment may be issued subject to receipt of adequate appraisals.)

(7) For all businesses, a current (not more than 90 days old) balance sheet, a pro forma balance sheet at startup, and projected balance sheets, income and expense statements, and cash flow statements for the next 2 years. Projections should be supported by a list of assumptions showing the basis for the projections.

(8) Lender’s complete written analysis, including spreadsheets of the balance sheets and income statements for the 3 previous years (for existing businesses), pro forma balance sheet at startup, and 2 years projected yearend balance sheets and income statements, with appropriate ratios and comparisons with industrial standards (such as Dun & Bradstreet or Robert Morris Associates). All data must be shown in total dollars and also in common size form, obtained by expressing all balance sheet items as a percentage of assets and all income and expense items as a percentage of sales. The lender’s credit analysis must address the borrower’s management, repayment ability including a cash-flow analysis, history of debt repayment, necessity of any debt refinancing, and the credit reports of the borrower, its principals, and any parent, affiliate, or subsidiary.

(9) Commercial credit reports obtained by the lender on the borrower and any parent, affiliate, and subsidiary firms.

(10) Current personal and corporate financial statements of any guarantors.

(11) A proposed Loan Agreement or a sample Loan Agreement with an attached list of the proposed Loan Agreement provisions. The Loan Agreement must be executed by the lender and borrower before the Agency issues a Loan Note Guarantee. The following requirements must be addressed in the Loan Agreement:

(i) Prohibition against assuming liabilities or obligations of others.

(ii) Restriction on dividend payments.

(iii) Limitation on the purchase or sale of equipment and fixed assets.

(iv) Limitation on compensation of officers and owners.

(v) Minimum working capital or current ratio requirement.

(vi) Maximum debt-to-net worth ratio.

(vii) Restrictions concerning consolidations, mergers, or other circumstances.

(viii) Limitations on selling the business without the concurrence of the lender.
(ix) Repayment and amortization of the loan.

(x) List of collateral and lien priority for the loan including a list of persons and corporations guaranteeing the loan with a schedule for providing the lender with personal and corporate financial statements. Financial statements on the corporate and personal guarantors must be updated at least annually.

(xi) Type and frequency of financial statements to be required for the duration of the loan.

(xii) The final Loan Agreement between the lender and borrower will contain any additional requirements imposed by the Agency in its Conditional Commitment.

(xiii) A section for the later insertion of any necessary measures by the borrower to avoid or reduce adverse environmental impacts from this proposal’s construction or operation. Such measures, if necessary, will be determined by the Agency through the completion of the environmental review process.

(12) A business plan, which includes, at a minimum, a description of the business and project, management experience, products and services, proposed use of funds, availability of labor, raw materials and supplies, and the names of any corporate parent, affiliates, and subsidiaries with a description of the relationship. Any or all of these requirements may be omitted if the information is included in a feasibility study.

(13) Independent feasibility study, if required.

(14) For companies listed on a major stock exchange or subject to the Securities and Exchange Commission (SEC) regulations, a copy of SEC Form 10-K, “Annual Report Pursuant to Section 13 or 15D of the Act of 1934.”

(15) For health care facilities, a certificate of need, if required by statute.

(16) A certification by the lender that it has completed a comprehensive analysis of the proposal, the applicant is eligible, the loan is for authorized purposes, and there is reasonable assurance of repayment ability based on the borrower’s history, projections and equity, and the collateral to be obtained.

(17) Any additional information required by the Agency.

(c) Applications of $600,000 and less. Guaranteed loan applications may be processed under this paragraph if the request does not exceed $400,000. Beginning in fiscal year 2004, this limit may be increased on a case-by-case basis to $600,000 provided that the Agency determines that there is not a significant increased risk of a default on the loan. Applications may be resubmitted under paragraph (b) of this section when the application under this paragraph contains insufficient information for the Agency to guarantee the loan. Applications submitted under this paragraph must use the Agency’s short application form and include the information contained in paragraphs (b)(3), (5), (7), (8), and (11) of this section. The lender must have the documentation identified in paragraph (b) of this section, with the exception of paragraphs (b)(1), (2), (14), and (15), available in its file for review.

§§ 4279.162–4279.164 [Reserved]

§ 4279.165 Evaluation of application.

(a) General review. The Agency will evaluate the application and make a determination whether the borrower is eligible, the proposed loan is for an eligible purpose, there is reasonable assurance of repayment ability, there is sufficient collateral and equity, and the proposed loan complies with all applicable statutes and regulations. If the Agency determines it is unable to guarantee the loan, the lender will be informed in writing. Such notification will include the reasons for denial of the guarantee.

(b) Environmental requirements. The environmental review process must be completed, in accordance with subpart G of part 1940 of this title, prior to the issuance of the Conditional Commitment, loan approval, or obligation of funds, whichever occurs first.
§ 4279.173 Loan approval and obligating funds.

(a) Upon approval of a loan guarantee, the Agency will issue a Conditional Commitment to the lender containing conditions under which a Loan Note Guarantee will be issued.

(b) If certain conditions of the Conditional Commitment cannot be met, the lender and applicant may propose alternate conditions. Within the requirements of the applicable regulations and instructions and prudent lending practices, the Agency may negotiate with the lender and the applicant regarding any proposed changes to the Conditional Commitment.

§ 4279.174 Transfer of lenders.

(a) The loan approval official may approve the substitution of a new eligible lender in place of a former lender who holds an outstanding Conditional Commitment when the Loan Note Guarantee has not yet been issued provided, that there are no changes in the borrower’s ownership or control, loan purposes, or scope of project and loan conditions in the Conditional Commitment and the Loan Agreement remain the same.

(b) The new lender’s servicing capability, eligibility, and experience will be analyzed by the Agency prior to approval of the substitution. The original lender will provide the Agency with a letter stating the reasons it no longer desires to be a lender for the project. The substituted lender must execute a new part B of Form 4279–1.

§ 4279.175 Domestic lamb industry adjustment assistance program set aside.

A 3-year set aside of B&I Guaranteed Loan Program funds has been established in the National Office to fund loans to lamb processors for real estate purchases and improvements; working capital; debt refinancing; and upgrading, replacing, and installing new processing and packaging equipment for domestic lamb packing and processing plants. The set aside is $15 million for FY 2001, $5 million for FY 2002, and $5 million for FY 2003. These funds will be available through the third quarter of each respective year and, if not used, will revert for use in the general program.

§ 4279.176 Changes in borrower.

Any changes in borrower ownership or organization prior to the issuance of the Loan Note Guarantee must meet the eligibility requirements of the program and be approved by the Agency loan approval official.

§ 4279.181 Conditions precedent to issuance of Loan Note Guarantee.

The Loan Note Guarantee will not be issued until the lender, including a CLP lender, certifies to the following:

(a) No major changes have been made in the lender’s loan conditions and requirements since the issuance of the Conditional Commitment, unless such changes have been approved by the Agency.

(b) All planned property acquisition has been or will be completed, all development has been or will be substantially completed in accordance with plans and specifications, conforms with applicable Federal, state, and local codes, and costs have not exceeded the amount approved by the lender and the Agency.

(c) Required hazard, flood, liability, worker compensation, and personal life insurance, when required, are in effect.

(d) Truth-in-lending requirements have been met.

(e) All equal credit opportunity requirements have been met.

(f) The loan has been properly closed, and the required security instruments have been obtained or will be obtained on any acquired property that cannot be covered initially under State law.

(g) The borrower has marketable title to the collateral then owned by the borrower, subject to the instrument securing the loan to be guaranteed and to any other exceptions approved in writing by the Agency.

(h) When required, the entire amount of the loan for working capital has been disbursed except in cases where the Agency has approved disbursement over an extended period of time.
(i) When required, personal, partnership, or corporate guarantees have been obtained.

(j) All other requirements of the Conditional Commitment have been met.

(k) Lien priorities are consistent with the requirements of the Conditional Commitment. No claims or liens of laborers, subcontractors, suppliers of machinery and equipment, or other parties have been or will be filed against the collateral and no suits are pending or threatened that would adversely affect the collateral when the security instruments are filed.

(l) The loan proceeds have been or will be disbursed for purposes and in amounts consistent with the Conditional Commitment and Form 4279–1. A copy of the detailed loan settlement of the lender must be attached to support this certification.

(m) There has been neither any material adverse change in the borrower’s financial condition nor any other material adverse change in the borrower, for any reason, during the period of time from the Agency’s issuance of the Conditional Commitment to issuance of the Loan Note Guarantee regardless of the cause or causes of the change and whether or not the change or causes of the change were within the lender’s or borrower’s control. The lender must address any assumptions or reservations in the requirement and must address all adverse changes of the borrower, any parent, affiliate, or subsidiary of the borrower, and guarantors.

(n) None of the lender’s officers, directors, stockholders, or other owners (except stockholders in an institution that has normal stockshare requirements for participation) has a substantial financial interest in the borrower and neither the borrower nor its officers, directors, stockholders, or other owners has a substantial financial interest in the lender. If the borrower is a member of the board of directors or an officer of a Farm Credit System (FCS) institution that is the lender, the lender will certify that an FCS institution on the next highest level will independently process the loan request and act as the lender’s agent in servicing the account.

(o) The Loan Agreement includes all measures identified in the Agency’s environmental impact analysis for this proposal (measures with which the borrower must comply) for the purpose of avoiding or reducing adverse environmental impacts of the proposal’s construction or operation.

§§ 4279.182–4279.185 [Reserved]

§ 4279.186 Issuance of the guarantee.

(a) When loan closing plans are established, the lender will notify the Agency. Coincident with, or immediately after loan closing, the lender will provide the following to the Agency:

(1) Lender’s certifications as required by § 4279.181.

(2) Executed Lender’s Agreement.

(3) Form FmHA 1980–19, “Guaranteed Loan Closing Report,” and appropriate guarantee fee.

(b) When the Agency is satisfied that all conditions for the guarantee have been met, the Loan Note Guarantee and the following documents, as appropriate, will be issued:

(1) Assignment Guarantee Agreement. In the event the lender uses the single note option and assigns the guaranteed portion of the loan to a holder, the lender, holder, and the Agency will execute the Assignment Guarantee Agreement; and

(2) Certificate of Incumbency. If requested by the lender, the Agency will provide the lender with a certification on Form 4279–7, “Certificate of Incumbency and Signature (Business and Industry),” of the signature and title of the Agency official who signs the Loan Note Guarantee, Lender’s Agreement, and Assignment Guarantee Agreement.

(c) The Agency may, at its discretion, request copies of loan documents for its file.

(d) There may be instances when not all of the working capital has been disbursed, and it appears practical to disburse the balance over a period of time. The State Director, after review of a disbursement plan, may amend the Conditional Commitment in accordance with the disbursement plan and issue the guarantee.
§ 4279.187 Refusal to execute Loan Note Guarantee.

If the Agency determines that it cannot execute the Loan Note Guarantee, the Agency will promptly inform the lender of the reasons and give the lender a reasonable period within which to satisfy the objections. If the lender requests additional time in writing and within the period allowed, the Agency may grant the request. If the lender satisfies the objections within the time allowed, the guarantee will be issued.

§§ 4279.188–4279.199 [Reserved]

§ 4279.200 OMB control number.

The information collection requirements contained in this regulation have been approved by OMB and have been assigned OMB control number 0575–0170. Public reporting burden for this collection of information is estimated to vary from 30 minutes to 54 hours per response, with an average of 27 hours per response, including time for reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Agriculture, Clearance Officer, OIRM, Stop 7630, Washington, DC 20250. You are not required to respond to this collection of information unless it displays a currently valid OMB control number.

Subpart C—Biorefinery Assistance Loans

SOURCE: 76 FR 4661, Feb. 14, 2011, unless otherwise noted.

§ 4279.201 Purpose and scope.

The purpose and scope of this subpart is to provide financial assistance for the development and construction of commercial-scale biorefineries or for the retrofitting of existing facilities using eligible technology for the development of advanced biofuels.

§ 4279.202 Compliance with §§ 4279.1 through 4279.84.

Except as specified in paragraphs (a) through (l) of this section, all loans guaranteed under this subpart shall comply with the provisions found in §§ 4279.1 through 4279.84 of this title.

(a) Definitions. The terms used in this subpart are defined in either § 4279.2 or in this paragraph. If a term is defined in both § 4279.2 and this paragraph, it will have, for purposes of this subpart only, the meaning given in this section.

Advanced biofuel. Fuel derived from renewable biomass, other than corn kernel starch, to include:

(i) Biofuel derived from cellulose, hemicellulose, or lignin;

(ii) Biofuel derived from sugar and starch (other than ethanol derived from corn kernel starch);

(iii) Biofuel derived from waste material, including crop residue, other vegetative waste material, animal waste, food waste, and yard waste;

(iv) Diesel-equivalent fuel derived from renewable biomass, including vegetable oil and animal fat;

(v) Biogas (including landfill gas and sewage waste treatment gas) produced through the conversion of organic matter from renewable biomass;

(vi) Butanol or other alcohols produced through the conversion of organic matter from renewable biomass; and

(vii) Other fuel derived from cellulosic biomass.

Agricultural producer. An individual or entity directly engaged in the production of agricultural products, including crops (including farming); livestock (including ranching); forestry products; hydroponics; nursery stock; or aquaculture, whereby 50 percent or greater of their gross income is derived from the operations.

Association of agricultural producers. An organization that represents agricultural producers and whose mission includes working on behalf of such producers and the majority of whose membership and board of directors is comprised of agricultural producers.

Bio-based product. A product determined by the Secretary to be a commercial or industrial product (other than food or feed) that is either:

(i) Composed, in whole or in significant part, of biological products, including renewable domestic agricultural materials and forestry materials; or
(i) An intermediate ingredient or feedstock.

Biofuel. A fuel derived from renewable biomass.

Biorefinery. A facility (including equipment and processes) that converts renewable biomass into biofuels and biobased products and may produce electricity.

Borrower. Any party that borrows or seeks to borrow money from the lender, including any party or parties liable for the guaranteed loan except guarantors.

Business plan. A comprehensive document that includes a clear description of the borrower’s ownership structure and management experience, including, if applicable, discussion of a parent, affiliates, and subsidiaries, and a discussion of how the borrower will operate the proposed project, including, at a minimum, a description of the business and project; the products and services to be provided; the availability of the resources necessary to provide those products and services; and pro forma financial statements for a period of 2 years, including balance sheet, income and expense, and cash flows.

Byproduct. Any and all biobased products generated under normal operations of the proposed project that can be reasonably measured and monitored. Byproducts may or may not have a readily identifiable commercial use or value.

Default. The condition that exists when a borrower is not in compliance with the promissory note, the loan agreement, or other related documents evidencing the loan.

Eligible project costs. Those expenses approved by the Agency for the project.

Eligible technology. Eligible technology is defined as either:

(i) A technology that is being adopted in a viable commercial-scale operation of a biorefinery that produces an advanced biofuel; or

(ii) A technology not described in paragraph (i) of this definition that has been demonstrated to have technical and economic potential for commercial application in a biorefinery that produces an advanced biofuel.

Existing business. A business that has been in operation for at least one full year. Businesses that have undergone mergers, changes in the business name, changes in the legal type of entity, or expansions of product lines are considered to be existing businesses as long as there is not a significant change in operations.

Farm cooperative. A business owned and controlled by agricultural producers that is incorporated, or otherwise recognized by the state in which it operates, as a cooperatively operated business.

Farmer Cooperative Organization. An organization whose membership is composed of farm cooperatives.

Feasibility study. An analysis by an independent qualified consultant of the economic, market, technical, financial, and management feasibility of a proposed project or business in terms of its expectation for success.

Indian tribe. This term has the meaning as defined in 25 U.S.C. 450b.

Institution of higher education. This term has the meaning as defined in 20 U.S.C. 1002(a).

Loan classification. The assigned score or metric reflecting the lender’s analysis of the degree of potential loss in the event of default.

Local owner. An individual who owns any portion of an eligible advanced biofuel biorefinery and whose primary residence is located within a certain distance from the biorefinery as specified by the Agency in a Notice published in the Federal Register.

Market value. The amount for which a property will sell for its highest and best use at a voluntary sale in an arm’s length transaction.

Material adverse change. Any change in the purpose of the loan, the financial condition of the borrower, or the collateral that would likely jeopardize loan performance.

Negligent loan origination. The failure of a lender to perform those services that a reasonably prudent lender would perform in originating its own portfolio of unguaranteed loans. The term includes the concepts of failure to act, not acting in a timely manner, or acting in a manner contrary to the manner in which a reasonably prudent lender would act.

Off-take agreement. The terms and conditions governing the sale and transportation of biofuels, biobased
products, and electricity produced by the borrower to another party.

Project. The facility or portion of a facility producing eligible advanced biofuels and any eligible biobased product receiving funding under this subpart.

Protective advances. Advances made by the lender for the purpose of preserving and protecting the collateral where the debtor has failed to, and will not or cannot, meet its obligations to protect or preserve collateral.

Renewable biomass. (i) Materials, pre-commercial thinnings, or invasive species from National Forest System land or public lands (as defined in section 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702)) that:

(A) Are byproducts of preventive treatments that are removed to reduce hazardous fuels; to reduce or contain disease or insect infestation; or to restore ecosystem health;

(B) Would not otherwise be used for higher-value products; and

(C) Are harvested in accordance with applicable law and land management plans and the requirements for old-growth maintenance, restoration, and management direction of paragraphs (2), (3), and (4) of subsection (e) of section 102 of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6512) and large-tree retention of subsection (f) of that section; or

(ii) Any organic matter that is available on a renewable or recurring basis from non-Federal land or land belonging to an Indian or Indian tribe that is held in trust by the United States or subject to a restriction against alienation imposed by the United States, including:

(A) Renewable plant material, including feed grains; other agricultural commodities; other plants and trees; and algae; and

(B) Waste material, including crop residue; other vegetative waste material (including wood waste and wood residues); animal waste and byproducts (including fats, oils, greases, and manure); and food waste and yard waste.

Retrofitting. The modification of a building or equipment to incorporate functions not included in the original design that allow for the production of advanced biofuels.

Rural or rural area. Any area of a State not in a city or town that has a population of more than 50,000 inhabitants, according to the latest decennial census of the United States, or in the urbanized area contiguous and adjacent to a city or town that has a population of more than 50,000 inhabitants, and any area that has been determined to be “rural in character” by the Under Secretary for Rural Development, or as otherwise identified in this definition.

(1) An area that is attached to the urbanized area of a city or town with more than 50,000 inhabitants by a contiguous area of urbanized census blocks that is not more than 2 census blocks wide. Applicants from such an area should work with their Rural Development State Office to request a determination of whether their project is located in a rural area under this provision.

(2) For the purposes of this definition, cities and towns are incorporated population centers with definite boundaries, local self government, and legal powers set forth in a charter granted by the State.

(3) For the Commonwealth of Puerto Rico, the island is considered rural and eligible for Business Programs assistance, except for the San Juan Census Designated Place (CDP) and any other CDP with greater than 50,000 inhabitants. CDPs with greater than 50,000 inhabitants, other than the San Juan CDP, may be determined to be eligible if they are “not urban in character.”

(4) For the State of Hawaii, all areas within the State are considered rural and eligible for Business Programs assistance, except for the Honolulu CDP within the County of Honolulu.

(5) For the purpose of defining a rural area in the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands, the Agency shall determine what constitutes rural and rural area based on available population data.

(6) The determination that an area is “rural in character” will be made by
the Under Secretary of Rural Development. The process to request a determination under this provision is outlined in paragraph (6)(ii) of this definition.

(i) The determination that an area is “rural in character” under this definition will apply to areas that are within:

(A) An urbanized area that has two points on its boundary that are at least 40 miles apart, which is not contiguous or adjacent to a city or town that has a population of greater than 150,000 inhabitants or the urbanized area of such a city or town; or

(B) An urbanized area contiguous and adjacent to a city or town of greater than 50,000 inhabitants that is within one-quarter mile of a rural area.

(ii) Units of local government may petition the Under Secretary of Rural Development for a “rural in character” designation by submitting a petition to both the appropriate Rural Development State Director and the Administrator on behalf of the Under Secretary. The petition shall document how the area meets the requirements of paragraph (6)(i)(A) or (B) above and discuss why the petitioner believes the area is “rural in character,” including, but not limited to, the area’s population density, demographics, and topography and how the local economy is tied to a rural economic base. Upon receiving a petition, the Under Secretary will consult with the applicable Governor or leader in a similar position and request comments to be submitted within 5 business days, unless such comments were submitted with the petition. The Under Secretary will release to the public a notice of a petition filed by a unit of local government not later than 30 days after receipt of the petition by way of publication in a local newspaper and posting on the Agency’s Web site, and the Under Secretary will make a determination not less than 15 days, but no more than 60 days, after the release of the notice. Upon a negative determination, the Under Secretary will provide to the petitioner an opportunity to appeal a determination to the Under Secretary, and the petitioner will have 10 business days to appeal the determination and provide further information for consideration.

Semi-work scale. A manufacturing plant operating on a limited commercial scale to provide final tests of a new product or process.

Startup business. A business that has been in operation for less than one full year. Startup businesses include newly formed entities leasing space or constructing facilities in a new market area, even if the owners of the startup business own affiliated businesses doing the same kind of business. Newly formed entities that are buying existing businesses or facilities will be considered an existing business as long as the business or facility being bought remains in operation and there is no significant change in operations.

Tangible net worth. Tangible assets minus liabilities.

Technical and economic potential. A technology not described in paragraph (i) of the definition of “eligible technology” is considered to have demonstrated “technical and economic potential” for commercial application in a biorefinery that produces an advanced biofuel if each of the following conditions is met:

(i) The advanced biofuel biorefinery’s likely financial and production success is evidenced in a thorough evaluation including, but not limited to:

(A) Feedstocks;
(B) Process engineering;
(C) Siting;
(D) Technology;
(E) Energy production; and
(F) Financial and sensitivity review using a banking industry software analysis program with appropriate industry standards.

(ii) The evaluation in paragraph (i) of this definition is completed by an independent third-party expert in a feasibility study, technical report, or other analysis, which must be satisfactory to the Agency, that demonstrates the potential success of the project.

(iii) The advanced biofuel technology has successfully completed at least a 12-month (four seasons) operating cycle at semi-work scale.

Tier 1 capital. This term has the meaning given it under applicable Federal Deposit Insurance Corporation regulations.
Tier 2 capital. This term has the meaning given it under applicable Federal Deposit Insurance Corporation regulations.

Tier 1 leverage capital ratio. This term has the meaning given it under applicable Federal Deposit Insurance Corporation regulations.

Tier 1 risk-based capital ratio. This term has the meaning given it under applicable Federal Deposit Insurance Corporation regulations.

Total project costs. The sum of all costs associated with a completed project.

Total qualifying capital. This term has the meaning given to it under applicable Federal Deposit Insurance Corporation regulations.

Total risk-based capital ratio. This term has the meaning given it under applicable Federal Deposit Insurance Corporation regulations.

Viable commercial-scale operation. An operation is considered to be a viable commercial-scale operation if it demonstrates that:

(i) Its revenue will be sufficient to recover the full cost of the project over the term of the loan and result in an anticipated annual rate of return sufficient to encourage investors or lenders to provide funding for the project;

(ii) It will be able to operate profitably without public and private sector subsidies upon completion of construction (volumetric excise tax is not included as a subsidy);

(iii) Contracts for feedstocks are adequate to address proposed off-take from the biorefinery;

(iv) It has the ability to achieve market entry, suitable infrastructure to transport the advanced biofuel to its market is available, and the advanced biofuel technology and related products are generally competitive in the market;

(v) It can be easily replicated and that replications can be sited at multiple facilities across a wide geographic area based on the proposed deployment plan; and

(vi) The advanced biofuel technology has at least a 12-month (four seasons) successful operating history at semi-work scale, which demonstrates the ability to operate at a commercial scale.

Working capital. Current assets available to support a business’s operations and growth. Working capital is calculated as current assets less current liabilities.

(b) Exception authority. The exception authority provisions of this paragraph apply to this subpart instead of those in §4279.15. The Administrator may, with the concurrence of the Secretary of Agriculture, make an exception, on a case-by-case basis, to any requirement or provision of this subpart that is not inconsistent with any authorizing statute or applicable law, if the Administrator determines that application of the requirement or provision would adversely affect the Federal government’s interest.

(c) Lender eligibility requirements. The requirements specified in §4279.29 do not apply to this subpart. Instead, a lender must meet the requirements specified in paragraphs (c)(1) through (c)(5) of this section in order to be approved for participation in this program.

(1) An eligible lender is any Federal or State chartered bank, Farm Credit Bank, other Farm Credit System institution with direct lending authority, and Bank for Cooperatives. These entities must be subject to credit examination and supervision by either an agency of the United States or a State. Credit unions subject to credit examination and supervision by either the National Credit Union Administration or a State agency, and insurance companies regulated by a State or National insurance regulatory agency are also eligible lenders. The National Rural Utilities Cooperative Finance Corporation is also an eligible lender. Savings and loan associations, mortgage companies, and other lenders as identified in 7 CFR 4279.29(b) are not eligible.

(2) The lender must demonstrate the minimum acceptable levels of capital specified in paragraphs (c)(2)(i) through (c)(2)(iii) of this section at the time of application and at time of issuance of the loan note guarantee. This information may be identified in Call Reports and Thrift Financial Reports. If the information is not identified in the Call Reports or Thrift Financial Reports, the lender will be required to calculate
its levels and provide them to the Agency.

(i) Total Risk-Based Capital ratio of 10 percent or higher;
(ii) Tier 1 Risk-Based Capital ratio of 6 percent or higher; and
(iii) Tier 1 Leverage Capital ratio of 5 percent or higher.

(3) The lender must not be debarred or suspended by the Federal government.

(4) If the lender is under a cease and desist order from a Federal agency, the lender must inform the Agency. The Agency will evaluate the lender’s eligibility on a case-by-case basis given the risk of loss posed by the cease and desist order.

(5) The Agency, in its sole determination, will approve applications for loan guarantees only from lenders with adequate experience and expertise, from similar projects, to make, secure, service, and collect loans approved under this subpart.

(d) Independent credit risk analysis. The Agency will require an evaluation and either a credit rating or a credit assessment of the total project’s indebtedness, without consideration for a government guarantee, from a nationally-recognized rating agency for loans of $125,000,000 or more.

(e) Environmental responsibilities. The provisions of this paragraph shall be used instead of the provisions specified in §4279.30(c) for determining a lender’s environmental responsibilities under this subpart. Lenders have a responsibility to become familiar with Federal environmental requirements; to consider at the earliest planning stages, in consultation with the prospective borrower, the potential environmental impacts of their proposals; and to develop proposals that minimize the potential to adversely impact the environment.

(1) Lenders must alert the Agency to any controversial environmental issues related to a proposed project or items that may require extensive environmental review.

(2) Lenders must help the borrower prepare Form RD 1940–20, “Request for Environmental Information,” (when required by 7 CFR part 1940, subpart G, or successor regulations); assist in the collection of additional data when the Agency needs such data to complete its environmental review of the proposal; and assist in the resolution of environmental problems.

(3) Lenders must ensure that the borrower has:

(i) Provided the necessary environmental information to enable the Agency to undertake its environmental review process in accordance with 7 CFR part 1940, subpart G, or successor regulations, including the provision of all required Federal, State, and local permits;
(ii) Complied with any mitigation measures required by the Agency; and
(iii) Not taken any actions or incurred any obligations with respect to the proposed project that will either limit the range of alternatives to be considered during the Agency’s environmental review process or which will have an adverse effect on the environment.

(f) Additional lender functions and responsibilities. In addition to the requirements in §4279.30, the requirements specified in paragraphs (f)(1) through (f)(3) apply.

(1) Any action or inaction on the part of the Agency does not relieve the lender of its responsibilities to originate and service the loan guaranteed under this subpart.

(2) The lender must compile a complete application for each guaranteed loan and maintain such application in its files for at least 3 years after the final loss has been paid.

(3) The lender must report to the Agency all conflicts of interest and appearances of conflicts of interest.

(g) Certified lender program. Section 4279.43 does not apply to this subpart.

(h) Oversight and monitoring. In addition to complying with requirements specified in §4279.44, the lender will cooperate fully with Agency oversight and monitoring of all lenders involved in any manner with any guarantee under the Biorefinery Assistance program to ensure compliance with this subpart. Such oversight and monitoring will include, but is not limited to, reviewing lender records and meeting with lenders (in accordance with §4287.107(c)).

(i) Conditions of guarantee. All loan guarantees under this subpart are subject to the provisions of §4279.72, except
for §4279.72(b), and the provisions specified in paragraphs (i)(1) through (i)(6) of this section.

(1) The entire loan, the guaranteed and unguaranteed portions, must be secured by a first lien on all collateral necessary to run the project. The Agency may consider a subordinate lien position on inventory and accounts receivable for working capital loans provided: The Agency determines the working capital is necessary for the operation; with the subordination, the Agency remains adequately secured; and the subordination is in the best interests of the Government.

(2) The holder of a guaranteed portion shall have all rights of payment, as defined in the loan note guarantee, to the extent of the portion purchased. Even if all or a portion of the loan note guarantee has been sold to a holder, the lender will remain bound by all obligations under the loan note guarantee, Lender’s Agreement, and Agency program regulations.

(3) The lender must be shown as an additional insured on insurance policies (or other risk sharing instruments) that benefit the project and must be able to assume any contracts that are material to running the project, including any feedstock or off-take agreements, as may be applicable.

(4) If a lender does not satisfactorily comply with the provision found in §4279.256(c) and such failure leads to losses, then such losses may not be recoverable under the guarantee.

(5) When a guaranteed portion of a loan is sold to a holder, the holder shall succeed to all rights of the lender under the Loan Note Guarantee to the extent of the portion purchased. The lender will remain bound to all obligations under the Loan Note Guarantee, Lender’s Agreement, and Agency program regulations. A guarantee and right to require purchase will be directly enforceable by a holder notwithstanding any fraud or misrepresentation by the lender or any unenforceability of the guarantee by the lender, except for fraud or misrepresentation of which the holder had actual knowledge at the time it became the holder or in which the holder participates or condones. The lender will reimburse the Agency for any payments the Agency makes to a holder of lender’s guaranteed loan that, under the Loan Note Guarantee, would not have been paid to the lender had the lender retained the entire interest in the guaranteed loan and not conveyed an interest to a holder.

(j) Sale or assignment of guaranteed loan. The provisions of §4279.75 apply to this subpart.

(k) Minimum retention. The provisions of §4279.77 apply to this subpart, except that the lender is required to hold in its own portfolio a minimum of 7.5 percent of the total loan amount.

(l) Replacement of document. Documents must be replaced in accordance with §4279.84, except, in §4279.84(b)(1)(v), a full statement of the circumstances of any defacement or mutilation of the Loan Note Guarantee or Assignment Guarantee Agreement would also need to be provided.

§§4279.203–4279.223 [Reserved]

§4279.224 Loan processing.

Processing of Biorefinery Assistance Guaranteed loans under this subpart shall comply with the provisions found in §§4279.107 through 4279.187 of this chapter, except as provided in the following sections.

§4279.225 Ineligible loan purposes.

For the purposes of this subpart, the ineligible purposes identified in §4279.114(b), (c), and (p) do not apply to this subpart.

§4279.226 Fees.

Fees will be determined according to the provisions of this section in lieu of §4279.107.

(a) Guarantee fee. The guarantee fee will be paid to the Agency by the lender and is nonrefundable. The fee may be passed on to the borrower. Issuance of the Loan Note Guarantee is conditioned on payment of the guarantee fee by closing. The guarantee fee will be the percentage specified in paragraphs (a)(1) or (a)(2) of this section, as applicable, unless otherwise specified by the Agency in a notice published in the Federal Register, multiplied by the principal loan amount multiplied by
§ 4279.227 Borrower eligibility.

Borrower eligibility will be determined according to the provisions of this section in lieu of § 4279.108.

(a) Eligible entities. To be eligible, a borrower must meet the requirements specified in paragraphs (a)(1) and (a)(2) of this section, as applicable.

1. Type of borrower. The borrower must be one of the following:
   (i) An individual;
   (ii) An entity;
   (iii) An Indian tribe;
   (iv) A unit of State or local government;
   (v) A corporation;
   (vi) A farm cooperative;
   (vii) A farmer cooperative organization;
   (viii) An association of agricultural producers;
   (ix) A National Laboratory;
   (x) An institution of higher education;
   (xi) A rural electric cooperative;
   (xii) A public power entity; or
   (xiii) A consortium of any of the above entities.

(b) Annual renewal fee. The annual renewal fee shall be as follows:

1. One hundred basis points (1 percent) for guarantees on loans that were originally greater than 75 percent of total project costs.
2. Seventy five basis points (0.75 percent) for guarantees on loans that were originally greater than 65 percent but less than or equal to 75 percent of total project costs.
3. Fifty basis points (0.50 percent) for guarantees on loans that were originally for 65 percent or less of total project costs.

§ 4279.228 Project eligibility.

In lieu of the requirements specified in § 4279.113, to be eligible for a guaranteed loan under this subpart, at a minimum, a borrower and project, as applicable, must meet each of the requirements specified in paragraphs (a) through (g) of this section.

(a) The project must be located in a State, as defined in § 4279.2.

(b) The project must be for either:

1. The development and construction of commercial-scale biorefineries using eligible technology; or
2. The retrofitting of existing facilities, including, but not limited to, wood products facilities and sugar mills, with eligible technology.

(c) The project must use an eligible feedstock for the production of advanced biofuels and biobased products. Eligible feedstocks include, but are not
Limited to, renewable biomass, including municipal solid waste consisting of renewable biomass, biosolids, treated sewage sludge, and byproducts of the pulp and paper industry. For the purposes of this subpart, recycled paper is not an eligible feedstock.

(d) The majority of the biorefinery production must be an advanced biofuel. Unless otherwise approved by the Agency, and determined to be in the best financial interest of the government, the advanced biofuel must be sold as a biofuel. The following will be considered in determining what constitutes the majority of production:

(1) When the biorefinery produces a biobased product and, if applicable, byproduct that has an established BTU content from a recognized Federal source, majority biofuel production will be based on BTU content of the advanced biofuel, the biobased product, and, if applicable, the byproduct, or

(2) When the biorefinery produces a biobased product or, if applicable, byproduct that does not have an established BTU content, then majority biofuel production will be based on output volume, using parameters announced by the Agency in periodic Notices in the Federal Register, of the advanced biofuel, the biobased product, and, if applicable, the byproduct.

(e) An advanced biofuel that is converted to another form of energy for sale will still be considered an advanced biofuel.

(f) The project must provide funds (e.g., cash, subordinate financing, non-federal grant) of not less than 20 percent of eligible project costs. All projects must meet the equity requirements specified in §4279.234(c)(1).

(g) The Agency will consider refinancing only under either of the two conditions specified in paragraphs (g)(1) and (g)(2) of this section.

(1) Permanent financing used to refinance interim construction financing of the proposed project only if the application for the guaranteed loan under this subpart was approved prior to closing the interim loan for the construction of the facility.

(2) Refinancing that is no more than 20 percent of the loan for which the Agency is guaranteeing and the purpose of the refinance is to enable the Agency to establish a first lien position with respect to pre-existing collateral subject to a pre-existing lien and the refinancing would be in the best financial interests of the Federal Government.

§ 4279.229 Guaranteed loan funding.

Instead of the provisions found in §4279.119, the provisions of this section apply to loans guaranteed under this subpart.

(a) In administering this program's budgetary authority each fiscal year, the Agency will allocate up to, but no more, than 50 percent of its budgetary authority to fund applications received by the end of the first application window, including those carried over from the previous application period. Any funds not obligated to support applications submitted by the end of the first application window will be available to support applications received by the end of the second window, including those carried over from the previous application period. The Agency, therefore, will have a minimum of 50 percent of each fiscal year's budgetary authority for this program available to support applications received by the end of the second application window.

(b) The amount of a loan guaranteed for a project under this subpart will not exceed 80 percent of total eligible project costs. Total Federal participation will not exceed 80 percent of total eligible project costs. The borrower needs to provide the remaining 20 percent from other non-Federal sources to complete the project. Eligible project costs are specified in paragraph (e) of this section.

(c) The maximum principal amount of a loan guaranteed under this subpart is $250 million to one borrower; there is no minimum amount. If an eligible borrower receives other direct Federal funding (i.e., direct loans and grants) for a project, the amount of the loan that the Agency will guarantee under this subpart must be reduced by the same amount of the other direct Federal funding that the eligible borrower received for the project. For example, an eligible borrower is applying for a loan guarantee on a $1 million project. The borrower provides the minimum matching requirement of 20 percent, or
§ 4279.230

$200,000. This leaves $800,000 in other funding needed to implement the project. If the borrower receives no other direct Federal funding for this project and requests a guarantee for the $800,000, the Agency will consider a guarantee on the $800,000. However, if this borrower receives $100,000 in other direct Federal funding for this project, the Agency will only consider a guarantee on $700,000.

(d) The maximum guarantee on the principal and interest due on a loan guaranteed under this subpart will be determined as specified in paragraphs (d)(1) through (d)(4) of this section.

(1) If the loan amount is equal to or less than $125 million, 80 percent for the entire loan amount unless all of the conditions specified in paragraphs (d)(1)(i) through (d)(1)(iii) of this section are met, in which case 90 percent for the entire loan amount.

(i) Equity of 40 percent, excluding qualified intellectual property;

(ii) Feedstock and off-take contracts of at least 1 year in duration; and

(iii) Collateral coverage ratio, total discounted collateral value divided by total loan request, exceeding 1.5 to 1.

(2) If the loan amount is more than $125 million and less than $150 million, 80 percent for the entire loan amount.

(3) If the loan amount is equal to or more than $150 million but less than $200 million, 70 percent on the entire loan amount.

(4) If the loan amount is $200 million up to and including $250 million, 60 percent on the entire loan amount.

(e) Eligible project costs are only those costs associated with the items listed in paragraphs (e)(1) through (e)(7) of this section, as long as the items are an integral and necessary part of the total project, as determined by the Agency.

(1) Purchase and installation of equipment (new, refurbished, or re-manufactured), except agricultural tillage equipment, used equipment, and vehicles.

(2) Construction or retrofitting.

(3) Permit and license fees.

(4) Working capital.

(5) Land acquisition.

(6) Cost of financing, excluding guarantee and renewal fees.

(7) Any other item identified by the Agency in a notice published in the Federal Register.

(f) Loans made with the proceeds of any obligation the interest on which is excludable from income under the Internal Revenue Code are ineligible. Funds generated through the issuance of tax-exempt obligations cannot be used to purchase the guaranteed portion of any Agency guaranteed loan and an Agency guaranteed loan cannot serve as collateral for a tax-exempt issue. The Agency may guarantee a loan with respect to a project at a facility that has received, or will receive, tax-exempt financing only when the guaranteed loan funds are used to finance a project that is separate and distinct from the activities at the facility that have been or will be financed by the tax-exempt obligation, and the guaranteed loan has at least a parity security position with the tax-exempt obligation.

§ 4279.230 [Reserved]

§ 4279.231 Interest rates.

The provisions found in § 4279.125 apply to loans guaranteed under this subpart, except as provided in paragraphs (a) through (c) of this section. Lenders are encouraged to pass interest-rate savings realized through the secondary market on to the borrower.

(a) The rate on the unguaranteed portion of the loan shall not exceed the rate on the guaranteed portion of the loan by more than 500 basis points;

(b) Variable rate loans will not provide for negative amortization nor will they give the borrower the ability to choose its payment among various options.

(c) Both the guaranteed and unguaranteed portions of the loan must be amortized over the same term, as provided in § 4279.232(a).

§ 4279.232 Terms of loan.

Instead of the provisions found in § 4279.126, the provisions of this section apply to loans guaranteed under this subpart, except as provided in § 4279.232(e).

(a) The repayment term for a loan under this subpart will be for a maximum period of 20 years or the useful
life of the project, as determined by the lender and confirmed by the Agency, whichever is less. The length of the loan term shall be the same for both the guaranteed and unguaranteed portions of the loan.

(b) Guarantees shall be provided only after consideration is given to the borrower’s overall credit quality and to the terms and conditions of any applicable subsidies, tax credits, and other such incentives.

(c) All loans guaranteed under this subpart must be financially sound and feasible, with reasonable assurance of repayment.

(d) A loan’s maturity will take into consideration the use of proceeds, the useful life of assets being financed, and the borrower’s ability to repay the loan.

(e) Repayment of the loan shall be in accordance with §4279.125(a) and §4279.126(b) and (c).

§ 4279.233 [Reserved]

§ 4279.234 Credit evaluation.

Instead of the provisions found in §4279.131, the provisions of this section apply to loans guaranteed under this subpart. For all applications for guarantee, the lender must prepare a credit evaluation. An acceptable credit evaluation must:

(a) Use credit documentation procedures and an underwriting process that are consistent with generally accepted commercial lending practices, and

(b) Include an analysis of the credit factors associated with each guarantee application, including consideration of each of the following five elements.

(1) Credit worthiness. Those financial qualities that generally make the borrower more likely to meet its obligations as demonstrated by its credit history.

(2) Cash flow. A borrower’s ability to produce sufficient cash to repay the loan as agreed.

(3) Capital. The financial resources that the borrower currently has and those it is likely to have when payments are due. The borrower must be adequately capitalized.

(4) Collateral. The assets pledged by the borrower in support of the loan, including processing technology owned by the borrower and excluding assets acquired with other Federal funds. Collateral must have documented value sufficient to protect the interest of the lender and the Agency, and the discounted collateral value must be at least equal to the loan amount. Lenders will discount collateral consistent with sound loan-to-value policy. The Agency may consider the value of qualified intellectual property, as defined in §4279.2, arrived at in accordance with GAAP standards. The value of the intellectual property may not exceed 30 percent of the total value of all collateral.

(i) If there is an established market for the intellectual property, the value of the intellectual property will be valued according to the lender’s standard discounting practice for intellectual property for determining adequacy of collateral.

(ii) If there is no established market for the intellectual property, the value of the intellectual property will be valued not greater than 25 percent, as determined by the Agency, for determining adequacy of collateral.

(5) Conditions. The general business environment and status of the borrower’s industry.

(c) When determining the credit quality of the borrower, the lender must include the following in its analysis:

(1) The borrower shall demonstrate that it will be able to provide equity in the project of not less than 20 percent of eligible project costs at the time the loan is closed. For existing biorefineries, the fair market value of project equity (including the guaranteed loan being applied for) in real property and equipment and the value of qualified intellectual property based on the audited financial statements in accordance with Generally Accepted Accounting Principles may be substituted in whole or in part to meet the equity requirement. However, the appraisal completed to establish the fair market value of the real property and equipment must not be more than 1 year old. The Agency may require the lender to provide a more recent appraisal in order to reflect current market conditions. The appraisal used to establish fair market value of the real property
and equipment must conform to the requirements of §4279.244. Otherwise, equity must be in the form of cash and cannot include other direct Federal funding (i.e., loans and grants).

(2) The credit analysis must also include spreadsheets of the balance sheets and income statements of the borrower for the 3 previous years (for existing businesses), pro forma balance sheets at startup, and projected year-end balance sheets and income statements for a period of not less than 3 years of stabilized operation, with appropriate ratios and comparisons with industrial standards (such as Dun & Bradstreet or Robert Morris Associates) to the extent industrial standards are available.

(3) All data must be shown in total dollars and also in common size form, obtained by expressing all balance sheet items as a percentage of assets and all income and expense items as a percentage of sales.

§§ 4279.235–4279.236 [Reserved]

§ 4279.237 Financial statements.

The provisions of §4279.137 do not apply to this subpart. Instead, the submittal of financial statements with the loan guarantee application must meet the requirements specified in §4279.261(c).

§§ 4279.238–4279.243 [Reserved]

§ 4279.244 Appraisals.

All appraisals must be in accordance with §4279.144 and each appraisal must be a complete, self-contained appraisal. Lenders must complete at least a Transaction Screen Questionnaire for any undeveloped sites and a Phase I Environmental Site Assessment on existing business sites in accordance with ASTM International Standards, which should be provided to the appraiser for completion of the self-contained appraisal. Specialized appraisers will be required to complete appraisals under this section. The Agency may approve a waiver of this requirement only if a specialized appraiser does not exist in a specific industry or hiring one will cause an undue financial burden to the borrower.

§§ 4279.245–4279.249 [Reserved]

§ 4279.250 Feasibility studies.

The provisions of §4279.150 do not apply to this subpart. Instead, feasibility studies must meet the requirements specified in §4279.261(f).

§§ 4279.251–4279.254 [Reserved]

§ 4279.255 Loan priorities.

The provisions of §4279.155 do not apply to this subpart.

§ 4279.256 Construction planning and performing development.

The lender must comply with §4279.156(a) through (c), except as otherwise provided in paragraphs (a) through (f) of this section.

(a) Architectural and engineering practices. Under paragraph §4279.156(a), the lender must also ensure that all project facilities are designed utilizing accepted architectural and engineering practices that conform to the requirements of this subpart.

(b) Onsite inspector. The lender must provide an onsite project inspector.

(c) Changes and cost overruns. The borrower shall be responsible for any changes or cost overruns. If any such change or cost overrun occurs, then any change order must be expressly approved by the Agency, which approval shall not be unreasonably withheld, and neither the lender nor borrower will divert funds from purposes identified in the guaranteed loan application approved by the Agency to pay for any such change or cost overrun without the express written approval of the Agency. In no event will the current loan be modified or a subsequent guaranteed loan be approved to cover any such changes or costs. In the event of any of the aforementioned increases in cost or expenses, the borrower must provide for such increases in a manner that does not diminish the borrower’s operating capital. Failure to comply with the terms of this paragraph will be considered a material adverse change in the borrower’s financial condition, and the lender must address this matter, in writing, to the Agency’s satisfaction.
(d) **New draw certifications.** The following three certifications are required for each new draw:

1. Certification by the project engineer to the lender that the work referred to in the draw has been successfully completed;
2. Certification from the lender that all debts have been paid and all mechanics’ liens have been waived; and
3. Certification from the lender that the borrower is complying with the Davis-Bacon Act.

(e) **Surety.** Surety, as the term is commonly used in the industry, will be required in cases when the guarantee will be issued prior to completion of construction unless the contractor will receive a lump sum payment at the end of work. Surety will be made a part of the contract if the borrower requests it or if the contractor requests partial payments for construction work. In such cases where no surety is provided and the project involves pre-commercial technology, technology that is first of its type in the U.S., or new designs without sufficient operating hours to prove their merit, a latent defects bond may be required by the Agency to cover the work.

(f) **Reporting during construction.** During the construction of the project, lenders shall submit quarterly construction progress reports to the Agency. These reports must contain, at a minimum, planned and completed construction milestones, loan advances, and personnel hiring, training, and retention. This requirement applies to both the development and construction of commercial-scale biorefineries and to the retrofitting of existing facilities using eligible technology for the development of advanced biofuels. The lender must expeditiously report any problems in project development to the Agency.

§§ 4279.257–4279.258 [Reserved]

§ 4279.259 **Borrower responsibilities.**

(a) **Federal, State, and local regulations.** Borrowers must comply with all Federal, State, and local laws and rules that are in existence and that affect the project including, but not limited to:

1. Land use zoning;
2. Health, safety, and sanitation standards as well as design and installation standards; and
3. Protection of the environment and consumer affairs.

(b) **Permits, agreements, and licenses.** Borrowers must obtain all permits, agreements, and licenses that are applicable to the project.

(c) **Insurance.** The borrower is responsible for maintaining all hazard, flood, liability, worker compensation, and personal life insurance, when required, on the project.

(d) **Access to borrower’s records.** Except as provided by law, upon request by the Agency, the borrower will permit representatives of the Agency (or other Federal agencies as authorized by the Agency) to inspect and make copies of any of the records of the borrower pertaining to any Agency-guaranteed loan. Such inspection and copying may be made during regular office hours of the borrower or at any other time agreed upon between the borrower and the Agency.

(e) **Access to the project.** The borrower must allow the Agency access to the project and its performance information until the loan is repaid in full and permit periodic inspections of the project by a representative of the Agency.

§ 4279.260 **Guarantee applications—general.**

Unless otherwise noted, the provisions of § 4279.161 do not apply to this subpart. Instead, the application provisions of this section and § 4279.261 apply to the preparation of Biorefinery Assistance Guaranteed loan applications.

(a) **Application submittal.** For each guarantee request, the lender must submit to the Agency an application that is in conformance with § 4279.261. The methods of application submittal will be specified in the annual Federal Register notice.

(b) **Application deadline.** Unless otherwise specified by the Agency in a notice published in the Federal Register, complete applications must be received by the Agency on or before May 1 of each year to be considered for funding for that fiscal year. If the application
deadline falls on a weekend or a Federally observed holiday, the deadline will be the next Federal business day.

(c) Incomplete applications. Incomplete applications will be rejected. Lenders will be informed of the elements that made the application incomplete. If a resubmitted application is received by the applicable application deadline, the Agency will reconsider the application.

(d) Application withdrawal. During the period between the submission of an application and the execution of documents, the lender must notify the Agency, in writing, if the project is no longer viable or the borrower is no longer requesting financial assistance for the project. When the lender so notifies the Agency, the selection will be rescinded or the application withdrawn.

§ 4279.261 Application for loan guarantee.

Approved lenders must submit an Agency-approved application form for each loan guarantee sought under this subpart. Loan guarantee applications from approved lenders must contain the information specified in paragraphs (a) through (n) of this section, organized pursuant to a table of contents in a chapter format, and in paragraph (o) of this section as applicable.

(a) Project Summary. Provide a concise summary of the proposed project and application information, project purpose and need, and project goals, including the following:

(1) Title. Provide a descriptive title of the project.

(2) Borrower eligibility. Describe how the borrower meets the eligibility criteria identified in §4279.227.

(3) Project eligibility. Describe how the project meets the eligibility criteria identified in paragraph (c) of this section. Clearly state whether the application is for the construction and development of a biorefinery or for the retrofitting of an existing facility. Provide results from demonstration or pilot facilities that prove that the technology proposed to be used meets the definition of eligible technology. Additional project description information will be needed later in the application process.

(4) Matching funds. Submit a spreadsheet identifying sources, amounts, and availability of matching funds. The spreadsheet must also include a directory of matching funds source contact information. Attach any applications, correspondence, or other written communication between borrower and matching fund source.

(b) Lender’s analysis and credit evaluation. This analysis shall conform to §4279.232(b) and shall include:

(1) A summary of the technology to be used in the project;

(2) The viability of such technology for the particular project application;

(3) The development type (e.g., installation, construction, retrofit);

(4) The credit reports of the borrower, its principals, and any parent, affiliate, or subsidiary as follows:

(i) A personal credit report from an Agency-approved credit reporting company for individuals who are key employees of the borrower, as determined by the Agency, and for individuals owning 20 percent or more interest in the borrower or any owner with more than 10 percent ownership interest in the borrower if there is no owner with more than 20 percent ownership interest in the borrower, except for when the borrower is a corporation listed on a major stock exchange unless otherwise determined by the Agency; and

(ii) Commercial credit reports on the borrower and any parent, affiliate, and subsidiary firms;

(5) The credit analysis specified in §4279.232(b);

(6) For loans of $125 million or more, an evaluation and either a credit rating or a credit assessment of the total project’s indebtedness, without consideration for a government guarantee, from a nationally-recognized rating agency; and

(7) Whether the loan note guarantee is requested prior to construction or after completion of construction of the project.

(c) Financial statements. Financial statements as follows:

(1) For businesses that have been in existence for one or more years,
(i) The most recent audited financial statements of the borrower if the guaranteed loan is $3 million or more, unless alternative financial statements are authorized by the Agency; or

(ii) The most recent audited or Agency-acceptable financial statements of the borrower if the guaranteed loan is less than $3 million.

(2) For businesses that have been in existence for less than one year, the most recent Agency-authorized financial statements of the borrower regardless of the amount of the guaranteed loan request.

(3) For all businesses, a current (not more than 90 days old) balance sheet; a pro forma balance sheet at startup; and projected balance sheets, income and expense statements, and cash flow statements for a period of not less than 3 years of stabilized operation. Projections should be supported by a list of assumptions showing the basis for the projections.

(4) Depending on the complexity of the project and the financial condition of the borrower, the Agency may request additional financial statements and additional related information.

(d) Environmental information. Environmental information required by the Agency to conduct its environmental reviews (as specified in Exhibit H of 7 CFR part 1940, subpart G).

(e) Appraisals. Unless otherwise approved by the Agency, an appraisal conducted as specified under § 4279.244.

(f) Feasibility study. Elements in an acceptable feasibility study include, but are not limited to, the elements outlined in Table 1. In addition, as part of the feasibility study, a technical assessment of the project is required, as specified in paragraph (h) of this section.

TABLE 1—FEASIBILITY STUDY COMPONENTS—Continued

Feasibility/plans of project to work with producer associations or cooperatives, including estimated amount of annual feedstock, biofuel, and byproduct purchased from or sold to producer associations and cooperatives.

(C) Market Feasibility:
- Information on the sales organization and management;
- Nature and extent of market and market area;
- Marketing plans for sale of projected output—principal products and byproducts;
- Extent of competition, including other similar facilities in the market area;
- Commitments from customers or brokers—principal products and byproducts.

Risks related to the Advanced Biofuel industry, including
- Industry status;
- Specific market risks; and
- Competitive threats and advantages.

(D) Technical Feasibility:
- Suitability of the selected site for the intended use.
- Scale of development for which the process technology has been proven (i.e., lab or bench, pilot, demonstration, or semi-work scale).
- Specific volume of the process (expressed either as volume of feedstock processed [tons per unit of time] or as product [gallons per unit of time]).

Identification and estimation of project operation and development costs. Specify the level of accuracy of these estimates and the assumptions on which these estimates have been based.

Ability of the proposed system to be commercially replicated.

Risks related to:
- Construction of the Biorefinery;
- Advanced Biofuel production;
- Regulation and governmental action; and
- Design-related factors that may affect project success.

(E) Financial Feasibility:
- Reliability of the financial projections and the assumptions on which the financial statements are based, including all sources and uses of project capital, private or public, such as Federal funds. Provide detailed analysis and description of projected balance sheets, income and expense statements, and cash flow statements over the useful life of the project.

A detailed description of:
- Investment incentives;
- Productivity incentives;
- Loans and grants; and
- Other project authorities and subsidies that affect the project.

Any constraints or limitations in the financial projections.

Ability of the business to achieve the projected income and cash flow.

Assessment of the cost accounting system.

Availability of short-term credit or other means to meet seasonal business costs.

Adequacy of raw materials and supplies.

Sensitivity analysis, including feedstock and energy costs and product and byproduct prices.

Risks related to:
- The project;
- Borrower financing plan;
- The operational units; and
- Tax issues.

(F) Management Feasibility:
- Borrower and/or management’s previous experience concerning:
  - Biofuel production;
  - Acquisition of feedstock;
  - Marketing and sale of off-take; and
  - The receipt of Federal financial assistance, including amount of funding, date received, purpose, and outcome.
### Table 1—Feasibility Study Components—Continued

| Management plan for procurement of feedstock and labor, marketing of the off-take, and management succession. |
| Risks related to: |
| Borrower as a company (e.g., development-stage); |
| Conflicts of interest; and |
| Management strengths and weaknesses. |
| (G) Qualifications: |
| A resume or statement of qualifications of the author of the feasibility study, including prior experience, must be submitted. |

(g) **Business plan.** The lender must submit a business plan that includes the information specified in paragraphs (g)(1) through (g)(10) of this section. Any or all of this information may be omitted if it is included in the feasibility study specified in paragraph (f) of this section.

1. The borrower’s experience;
2. The borrower’s succession planning, addressing both ownership and management;
3. The names and a description of the relationship of the borrower’s parent, affiliates, and subsidiaries;
4. The borrower’s business strategy;
5. Possible vendors and models of major system components;
6. The availability of the resources (e.g., labor, raw materials, supplies) necessary to provide the planned products and services;
7. Site location and its relation to product distribution (e.g., rail lines or highways) and any land use or other permits necessary to operate the facility;
8. The market for the product and its competition, including any and all competitive threats and advantages;
9. Projected balance sheets, income and expense statements, and cash flow statements for a period of not less than 3 years of stabilized operation; and
10. A description of the proposed use of funds.

(h) **Technical Assessment.** As part of the feasibility study required under paragraph (f) of this section, a detailed technical assessment is required for each project. The technical assessment must demonstrate that the design, procurement, installation, startup, operation and maintenance of the project will permit it to operate or perform as specified over its useful life in a reliable and cost effective manner, and must identify what the useful life of the project is. The technical assessment must also identify all necessary project agreements, demonstrate that those agreements will be in place at or before the time of loan closing, and demonstrate that necessary project equipment and services will be available over the useful life of the project. The technical assessment must be based upon verifiable data and contain sufficient information and analysis so that a determination can be made on the technical feasibility of achieving the levels of income or production that are projected in the financial statements. All technical information provided must follow the format specified in paragraphs (h)(1) through (h)(9) of this section. Supporting information may be submitted in other formats. Design drawings and process flow charts are required as exhibits. A discussion of a topic identified in paragraphs (h)(1) through (h)(9) of this section is not necessary if the topic is not applicable to the specific project. Questions identified in the Agency’s technical review of the project must be answered to the Agency’s satisfaction before the application will be approved. All projects require the services of an independent, third-party professional engineer.

1. **Qualifications of project team.** The project team will vary according to the complexity and scale of the project. The project team must have demonstrated expertise in similar advanced biofuel technology development, engineering, installation, and maintenance. Authoritative evidence that project
team service providers have the necessary professional credentials or relevant experience to perform the required services for the development, construction, and retrofitting, as applicable, of technology for producing advanced biofuels must be provided. In addition, authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the biorefinery to operate over its useful life must be provided. The application must:

(i) Discuss the proposed project delivery method. Such methods include a design-bid-build method, where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the borrower’s risk, and a design-build method, often referred to as “turnkey,” where the borrower establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;

(ii) Discuss the manufacturers of major components of advanced biofuels technology equipment being considered in terms of the length of time in business and the number of units installed at the capacity and scale being considered;

(iii) Discuss the project team members’ qualifications for engineering, designing, and installing advanced biofuels refineries, including any relevant certifications by recognized organizations or bodies. Provide a list of the same or similar projects designed, installed, or supplied and currently operating, with references if available; and

(iv) Describe the advanced biofuels refinery operator’s qualifications and experience for servicing, operating, and maintaining such equipment or projects. Provide a list of the same or similar projects designed, installed, or supplied and currently operating, with references if available.

(2) Agreements and permits. The application must identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (h)(2)(i) through (h)(2)(vi) of this section.

(i) Advanced biofuels refineries must be installed in accordance with applicable local, State, and national codes and applicable local, State, and Federal regulations. Identify zoning and code requirements and necessary permits and the schedule for meeting those requirements and securing those permits.

(ii) Identify licenses where required and the schedule for obtaining those licenses.

(iii) Identify land use agreements required for the project, the schedule for securing those agreements, and the term of those agreements.

(iv) Identify any permits or agreements required for solid, liquid, and gaseous emissions or effluents and the schedule for securing those permits and agreements.

(v) Identify available component warranties for the specific project location and size.

(vi) Identify all environmental issues, including environmental compliance issues, associated with the project.

(3) Resource assessment. The application must provide adequate and appropriate evidence of the availability of the feedstocks required for the advanced biofuels refinery to operate as designed. Indicate the type and quantity of the feedstock, and discuss storage of the feedstock, where applicable, and competing uses for the feedstock. Indicate shipping or receiving methods and required infrastructure for shipping, and other appropriate transportation mechanisms. For proposed projects with an established resource, provide a summary of the resource.

(4) Design and engineering. The application must provide authoritative evidence that the advanced biofuels refinery will be designed and engineered so as to meet its intended purposes, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. Projects shall be engineered by a qualified entity. Each biorefinery must be engineered as a complete, integrated facility. The engineering must be comprehensive, including site selection, systems and component selection, and...
systems monitoring equipment. Bio-
refineries must be constructed by a
qualified entity.

(i) The application must include a
concise but complete description of the
project, including location of the
project; resource characteristics, in-
cluding the kind and amount of feed-
stocks; biorefinery specifications; kind,
amount, and quality of the output; and
monitoring equipment. Address per-
formance on a monthly and annual
basis. Describe the uses of or the mar-
et for the advanced biofuels produced
by the biorefinery. Discuss the impact
of reduced or interrupted feedstock
availability on the biorefinery's oper-
ations.

(ii) The application must include:

(A) A description of the project site
that addresses issues such as site ac-
cess, foundations, and backup equip-
ment when applicable;

(B) A completed Form RD 1940–20 and
an environmental assessment prepared
in accordance with Exhibit H of 7 CFR
part 1940, subpart G; and

(C) Identification of any unique con-
struction and installation issues.

(iii) Sites must be controlled by the
eligible borrower for at least the fin-
ancing term of the loan note guaran-
tee.

(5) Project development schedule. The
application must describe each signifi-
cant task, its beginning and end, and
its relationship to the time needed to
initiate and carry the project through
startup and shakedown. Provide a de-
tailed description of the project
timeline including resource assess-
ment, project and site design, permits
and agreements, equipment procure-
ment, and project construction from
excavation through startup and shake-
down.

(6) Equipment procurement. The appli-
cation must demonstrate that equip-
ment required by the biorefinery is
available and can be procured and de-
ivered within the proposed project de-
velopment schedule. Biorefineries may
be constructed of components manu-
factured in more than one location.
Provide a description of any unique
equipment procurement issues such as
scheduling and timing of component
manufacture and delivery, ordering,
warranties, shipping, receiving, and on-
site storage or inventory.

(7) Equipment installation. The appli-
cation must provide a full description
of the management of and plan for site
development and systems installation,
details regarding the scheduling of
major installation equipment needed
for project construction, and a descrip-
tion of the startup and shakedown
specification and process and the con-
ditions required for startup and shake-
down for each equipment item individ-
ually and for the biorefinery as a
whole.

(8) Operations and maintenance. The
application must provide the oper-
ations and maintenance requirements
of the biorefinery necessary for the bio-
refinery to operate as designed over its
useful life. The application must also
include:

(i) Information regarding available
biorefinery and component warranties
and availability of spare parts;

(ii) A description of the routine oper-
ations and maintenance requirements
of the proposed biorefinery, including
maintenance schedules for the mechani-
cal, piping, and electrical systems and
system monitoring and control require-
ments, as well as provision of informa-
tion that supports expected useful life
of the biorefinery and timing of major
component replacement or rebuilds;

(iii) A discussion of the costs and
labor associated with operating and
maintaining the biorefinery and plans
for in-sourcing or outsourcing. A de-
scription of the opportunities for tech-
nology transfer for long-term project
operations and maintenance by a local
entity or owner/operator; and

(iv) Provision and discussion of the
risk management plan for handling
large, unanticipated failures of major
components.

(9) Decommissioning. A description of
the decommissioning process, when the
project must be uninstalled or re-
moved. A description of any issues, re-
quirements, and costs for removal and
disposal of the biorefinery.

(i) Scoring information. The applica-
tion must contain information in a for-
mat that is responsive to the scoring
criteria specified in §4279.265(d).

(j) Loan Agreement. A proposed loan
agreement or a sample loan agreement
with an attached list of the proposed loan agreement provisions as specified in §4279.161(b)(11).

(k) Lender certifications. The lender must provide certification in accordance with §4279.161(b)(16). In addition, the lender must certify that the lender concludes that the project has technical merit.

(l) Intergovernmental consultation. Intergovernmental consultation comments in accordance with RD Instruction 1940–J and 7 CFR part 3015, subpart V.

(m) DUNS Number. For borrowers other than individuals, a Dun and Bradstreet Universal Numbering System (DUNS) number, which can be obtained online at http://fedgov.dnb.com/webform.

(n) Bioenergy experience. Identify borrower’s, including its principals’, prior experience in bioenergy projects and the receipt of Federal financial assistance, including the amount of funding, date received, purpose, and outcome, for such projects.

(o) Other information. Any other information determined by the Agency to be necessary to evaluate the application.

§§ 4279.262–4279.264 [Reserved]

§ 4279.265 Guarantee application evaluation.

Instead of evaluating applications using the provisions of §4279.165, the Agency will evaluate and award applications according to the provisions specified in paragraphs (a) through (h) of this section.

(a) Application processing. Upon receipt of a complete application, the Agency will conduct a review to determine if the borrower, lender, and project are eligible; if the project has technical merit as determined under paragraph (b) of this section; and if the minimum financial metric criteria under paragraph (c) of this section are met.

(1) If the borrower, lender, or the project is determined to be ineligible for any reason, the Agency will inform the lender, in writing, of the reasons.

No further evaluation of the application will occur.

(2) If the Agency determines it is unable to guarantee the loan, the lender will be informed in writing. Such notification will include the reasons for denial of the guarantee.

(b) Technical merit determination. The Agency’s determination of a project’s technical merit will be based on the information in the application. Projects determined by the Agency to be without technical merit will not be selected for funding.

(c) Financial metric criteria. The borrower must meet the financial metric criteria specified in paragraphs (c)(1) through (c)(3) of this section. These financial metric criteria shall be calculated from the realistic information in the pro forma statements or borrower financial statements, submitted in accordance with §4279.261(c), of a typical operating year after the project is completed and stabilized.

(1) A debt coverage ratio of 1.0 or higher.

(2) A debt-to-tangible net worth ratio of 4:1 or lower for startup businesses and of 9:1 or lower for existing businesses.

(3) A discounted loan-to-value ratio of no more than 1.0.

(d) Scoring applications. The Agency will score each complete and eligible application it receives on or before May 1 in the fiscal year in which it was received. The Agency will score each eligible application that meets the minimum requirements for financial and technical feasibility using the evaluation criteria identified below. A maximum of 100 points is possible.

(1) Whether the borrower has established a market for the advanced biofuel and the byproducts produced and whether the advanced biofuel meets an applicable renewable fuel standard. A maximum of 10 points can be awarded. Points to be awarded will be determined as follows:

(i) If the business has less than or equal to a 50 percent commitment for each of the following: feedstocks, marketing agreements for the advanced biofuel, and the byproducts produced or
RBS and RUS, USDA § 4279.265

If the project does not produce an advanced biofuel that meets an applicable renewable fuel standard, 0 points will be awarded.

(ii) If the business has a greater than 50 percent commitment for any one or two of the following: feedstocks, marketing agreements for the advanced biofuel, and the byproducts produced and if the project produces an advanced biofuel that meets an applicable renewable fuel standard, 5 points will be awarded.

(iii) If the business has a greater than 50 percent commitment for each of the following: Feedstocks, marketing agreements for the advanced biofuel, and the byproducts produced and if the project produces an advanced biofuel that meets an applicable renewable fuel standard, 10 points will be awarded.

(2) Whether the area in which the borrower proposes to place the biorefinery, defined as the area that will supply the feedstock to the proposed biorefinery, has any other similar advanced biofuel facilities. A maximum of 5 points can be awarded. Points to be awarded will be determined as follows:

(i) If the area that will supply the feedstock to the proposed biorefinery does not have any other similar advanced biofuel biorefineries, 5 points will be awarded.

(ii) If there are other similar advanced biofuel biorefineries located within the area that will supply the feedstock to the proposed biorefinery, 0 points will be awarded.

(3) Whether the borrower is proposing to use a feedstock not previously used in the production of advanced biofuels. A maximum of 15 points can be awarded. Points to be awarded will be determined as follows:

(i) If the borrower proposes to use a feedstock previously used in the production of advanced biofuels, 0 points will be awarded.

(ii) If the borrower proposes to use a feedstock not previously used in production of advanced biofuels in a commercial facility, 15 points will be awarded.

(4) Whether the borrower is proposing to work with producer associations or cooperatives. A maximum of 5 points can be awarded. Points to be awarded will be determined as follows:

(i) Five (5) points will be awarded if any one of the three conditions specified in paragraphs (d)(4)(i)(A) through (d)(4)(i)(C) of this section is met.

(A) At least 60 percent of the dollar value of feedstock to be used by the proposed biorefinery will be supplied by producer associations and cooperatives;

(B) At least 60 percent of the dollar value of the advanced biofuel to be produced by the proposed biorefinery will be sold to producer associations and cooperatives; or

(C) At least 60 percent of the dollar value of the biobased products to be produced by the proposed biorefinery will be sold to producer associations and cooperatives.

(ii) Three (3) points will be awarded if any one of the three conditions specified in paragraphs (d)(4)(ii)(A) through (d)(4)(ii)(C) of this section is met.

(A) At least 30 percent of the dollar value of feedstock to be used by the proposed biorefinery will be supplied by producer associations and cooperatives;

(B) At least 30 percent of the dollar value of the advanced biofuel, or an advanced biofuel converted to electricity, to be produced by the proposed biorefinery will be sold to producer associations and cooperatives; or

(C) At least 30 percent of the dollar value of the biobased products to be produced by the proposed biorefinery will be sold to producer associations and cooperatives.

For example, consider a proposed biorefinery that will purchase $1,000,000 of feedstock and produce $5,000,000 worth of biofuel and $2,000,000 worth of biobased products. In order to receive the 5 points under this criterion, at least $600,000 worth of feedstock purchases must be from producer associations or cooperatives, at least $3,000,000 worth of biofuel must be sold to producer associations or cooperatives, or at least $1,200,000 worth of biobased products must be sold to producer associations or cooperatives.

(5) The level of financial participation by the borrower, including support from non-Federal government sources
and private sources. Other direct Federal funding (i.e., direct loans and grants) will not be considered as part of the borrower’s equity participation. A maximum of 15 points can be awarded. Points to be awarded will be determined as follows:

(i) If the borrower’s equity plus other resources results in a debt-to-tangible net worth ratio equal to or less than 3 to 1, but greater than 2.5 to 1, 8 points will be awarded.

(ii) If the borrower’s equity plus other resources results in a debt-to-tangible net worth ratio equal to or less than 2.5 to 1, 15 points will be awarded.

(iii) If a project uses other Federal direct funding, 10 points will be deducted.

(6) Whether the borrower has established that the adoption of the process proposed in the application will have a positive effect on three impact areas: resource conservation (e.g., water, soil, forest), public health (e.g., potable water, air quality), and the environment (e.g., compliance with an applicable renewable fuel standard, greenhouse gases, emissions, particulate matter). A maximum of 10 points can be awarded. Based on what the borrower has provided in either the application or the feasibility study, points to be awarded will be determined as follows:

(i) If process adoption will have a positive impact on any one of the three impact areas (resource conservation, public health, or the environment), 3 points will be awarded.

(ii) If process adoption will have a positive impact on two of the three impact areas, 6 points will be awarded.

(iii) If process adoption will have a positive impact on all three impact areas, 10 points will be awarded.

(iv) If the project proposes to use a feedstock that can be used for human or animal consumption as a feedstock, 5 points will be deducted from the score.

(7) Whether the borrower can establish that, if adopted, the biofuels production technology proposed in the application will not have any economically significant negative impacts on existing manufacturing plants or other facilities that use similar feedstocks. A maximum of 10 points can be awarded. Points to be awarded will be determined as follows:

(i) If the borrower has not established, through an independent third party feasibility study, that the biofuels production technology proposed in the application, if adopted, will not have any economically significant negative impacts on existing manufacturing plants or other facilities that use similar feedstocks, 0 points will be awarded.

(ii) If the borrower has established, through an independent third party feasibility study, that the biofuels production technology proposed in the application, if adopted, will not have any economically significant negative impacts on existing manufacturing plants or other facilities that use similar feedstocks, 10 points will be awarded.

(iii) If the feedstock is wood pellets, no points will be awarded under this criterion.

(8) The potential for rural economic development. If the project is located in a rural area and the business creates jobs with an average wage that exceeds the County median household wages where the biorefinery will be located, 10 points will be awarded.

(9) The level of local ownership of the biorefinery proposed in the application. A maximum of 5 points can be awarded. Points to be awarded will be determined as follows:

(i) If local owners have an ownership interest in the biorefinery of more than 20 percent but less than or equal to 50 percent, 3 points will be awarded.

(ii) If local owners have an ownership interest in the biorefinery of more than 50 percent, 5 points will be awarded.

(10) Whether the project can be replicated. A maximum of 10 points can be awarded. Points to be awarded will be determined as follows:

(i) If the project can be commercially replicated regionally (e.g., Northeast, Southwest, etc.), 5 points will be awarded.

(ii) If the project can be commercially replicated nationally, 10 points will be awarded.

(11) If the project uses a particular technology, system, or process that is not currently operating in the advanced biofuel market as of October 1
of the fiscal year for which the funding is available, 5 points will be awarded.

(12) The Administrator can award up to a maximum of 10 bonus points to applications that promote partnerships and other activities that assist in the development of new and emerging technologies for the development of advanced biofuels so as to increase the energy independence of the United States; promote resource conservation, public health, and the environment; diversify markets for agricultural and forestry products and agriculture waste material; and create jobs and enhance the economic development of the rural economy. These partnerships and other activities will be identified in a FEDERAL REGISTER notice each fiscal year. However, the Administrator’s bonus points may not raise an applicant’s score to more than 100 points.

(e) Ranking of applications. The Agency will rank all scored applications to create a priority list of scored applications for the program. Unless otherwise specified in a notice published in the FEDERAL REGISTER, the Agency will rank applications by approximately January 31 for complete and eligible applications received on or before November 1 and by approximately July 31 for complete and eligible applications received on or before May 1.

(1) All applications received on or before November 1 and May 1 will be ranked by the Agency and will be competed against the other applications received on or before such date. All applications that are ranked will be considered for selection for funding for that application cycle.

(2) When an application scored in first set of applications is carried forward into the second set of applications, it will be competed against all of the applications in the second set using its score from the first set of applications.

(f) Selection of applications for funding. Using the priority list created under paragraph (e) of this section, the Agency will select applications for funding based on the criteria specified in paragraphs (f)(1) through (f)(3) of this section. The Agency will notify, in writing, lenders whose applications have been selected for funding.

(1) Ranking. The Agency will consider the score an application has received compared to the scores of other applications in the priority list, with higher scoring applications receiving first consideration for funding. A minimum score of 55 points is required in order to be considered for a guarantee.

(2) Availability of budgetary authority. The Agency will consider the size of the request relative to the budgetary authority that remains available to the program during the fiscal year.

(i) If there is insufficient budgetary authority during a particular funding period to select a higher scoring application, the Agency may elect to select the next highest scoring application for further processing. Before this occurs, the Agency will provide the borrower of the higher scoring application the opportunity to reduce the amount of its request to the amount of budgetary authority available. If the borrower agrees to lower its request, it must certify that the purposes of the project can be met, and the Agency must determine the project is financially feasible at the lower amount.

(ii) If the amount of funding required is greater than 25 percent of the program’s outstanding budgetary authority, the Agency may elect to select the next highest scoring application for further processing, provided the higher scoring borrower is notified of this action and given an opportunity to revise their application and resubmit it for an amount less than or equal to 25 percent of the program’s outstanding budgetary authority.

(3) Availability of other funding sources. If other financial assistance is needed for the project, the Agency will consider the availability of other funding sources. If the lender cannot demonstrate that funds from these sources are available at the time of selecting applications for funding or potential funding, the Agency may instead select the next highest scoring application for further processing ahead of the higher scoring application.

(g) Ranked applications not funded. A ranked application that is not funded in the application cycle in which it was submitted will be carried forward one additional application cycle, which may be in the next fiscal year. The
Agency will notify the lender in writing. If an application has been selected for funding, but has not been funded because additional information is needed, the Agency will notify the lender of what information is needed, including a timeframe for the lender to provide the information. If the lender does not provide the information within the specified timeframe, the Agency will remove the application from further consideration and will so notify the lender.

(h) Wage rates. As a condition of receiving a loan guaranteed under this subpart, each borrower shall ensure that all laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed in whole or in part with guaranteed loan funds under this subpart shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with sections 3141 through 3144, 3146, and 3147 of title 40, U.S.C. Awards under this subpart are further subject to the relevant regulations contained in title 29 of the Code of Federal Regulations.

§ 4279.266–4279.278 [Reserved]

§ 4279.279 Domestic lamb industry adjustment assistance program.

The provisions of §4279.175 do not apply to this subpart.

§ 4279.280 Changes in borrowers.

All changes in borrowers must be in accordance with §4279.180, but the eligibility requirements of this program apply.

§ 4279.281 Conditions precedent to issuance of loan note guarantee.

The loan note guarantee will not be issued until the lender certifies to the conditions identified in §4279.181(a) through (o) of subpart B of this part and paragraphs (a) through (h) of this section. If the lender is unable to provide any of the certifications required under this section, the lender must provide an explanation satisfactory to the Agency as to why the lender is unable to provide the certification. The lender can request the guarantee prior to construction, but must still certify to all conditions in this section.

(a) For loans exceeding $150,000, the lender has certified its compliance with the Anti-Lobby Act (18 U.S.C. 1913). Also, if any funds have been, or will be, paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to guarantee a loan, the lender shall completely disclose such lobbying activities in accordance with 31 U.S.C. 1352.

(b) Where applicable, the lender must certify that the borrower has obtained:

(1) A legal opinion relative to the title to rights-of-way and easements. Lenders are responsible for ensuring that borrowers have obtained valid, continuous, and adequate rights-of-way and easements needed for the construction, operation and maintenance of a facility.

(2) A title opinion or title insurance showing ownership of the land and all mortgages or other lien defects, restrictions, or encumbrances, if any. It is the responsibility of the lender to ensure that the borrower has obtained and recorded such releases, consents, or subordinations to such property rights from holders of outstanding liens or other instruments as may be necessary for the construction, operation and maintenance of the facility and to provide the required security. For example, when a site is for major structures for utility-type facilities (such as a gas distribution system) and the lender and borrower are able to obtain only a right-of-way or easement on such site rather than a fee simple title, such a title opinion must be provided.

(c) The minimum financial criteria, including those financial criteria contained in the Conditional Commitment, have been maintained through the issuance of the loan note guarantee. Failure to maintain these financial criteria shall result in an ineligible application.

(d) Each borrower shall certify to the lender that all laborers and mechanics
employed by contractors or subcontractors in the performance of construction work financed in whole or in part with guaranteed loan funds under this subpart shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with sections 3141 through 3144, 3146, and 3147 of title 40 U.S.C. Awards under this subpart are further subject to the relevant regulations contained in title 29 of the Code of Federal Regulations.

(e) The lender certifies that it has reviewed all contract documents and verified compliance with Sections 3141 through 3144, 3146, and 3147 of title 40 U.S.C., and title 29 of the Code of Federal Regulations. The lender will certify that the same process will be completed for all future contracts and any changes to existing contracts.

(f) The lender certifies that the proposed facility complies with all Federal, State, and local laws and regulatory rules that are in existence and that affect the project, the borrower, or lender activities.

(g) The lender will notify the Agency in writing whenever there has been a change in the classification of a loan within 15 calendar days of such change.

(h) The lender certifies that the borrower has provided the equity in the project identified in the Conditional Commitment.

§§ 4279.282–4279.289 [Reserved]

§ 4279.289 Requirements after project construction.

Once the project has been constructed, the lender must:

(a) Provide the Agency annual reports from the borrower commencing the first full calendar year following the year in which project construction was completed and continuing for the life of the guaranteed loan. The borrower’s reports will include, but not be limited to, the information specified in the following paragraphs, as applicable.

(1) The actual amount of advanced biofuels, biobased products, and, if applicable, byproducts produced in order to assess whether project goals related to majority production are being met;

(2) If applicable, documentation that identified health and/or sanitation problems have been solved;

(3) A summary of the cost of operating and maintaining the facility;

(4) A description of any maintenance or operational problems associated with the facility;

(5) Certification that the project is and has been in compliance with all applicable State and Federal environmental laws and regulations;

(6) The number of jobs created;

(7) A description of the status of the project’s feedstock including, but not limited to, the feedstock being used, outstanding feedstock contracts, feedstock changes and interruptions, and quality of the feedstock;

(8) The results of the annual inspections conducted under paragraph (b) of this section; and

(b) For the life of the guaranteed loan, conduct annual inspections.

PART 4280—LOANS AND GRANTS

Subpart A—Rural Economic Development Loan and Grant Programs

Sec. 4280.1 Purpose.

4280.2 Policy.

4280.3 Definitions.

4280.4–4280.12 [Reserved]

4280.13 Applicant eligibility.

4280.14 [Reserved]

4280.15 Ultimate Recipient Projects eligible for Rural Economic Development Loan funding.

4280.16 REDL and REDG Loan terms.

4280.17 Additional REDL terms.

4280.18 [Reserved]

4280.19 REDG Grants.

4280.20 [Reserved]

4280.21 Eligible REDG initial Ultimate Recipients and Projects.

4280.22 [Reserved]

4280.23 Requirements for lending from Revolving Loan Fund.

4280.24 Revolved funds.

4280.25 Revolving Loan Fund Plan.

4280.26 Administration and operation of the Revolving Loan Fund.

4280.27 Ineligible purposes.

4280.28 [Reserved]

4280.29 Supplemental financing required for the Ultimate Recipient Project.

4280.30 Restrictions on the use of REDL or REDG funds.

4280.31–4280.35 [Reserved]
Pt. 4280

4280.36 Other laws that contain compliance requirements for these Programs.
4280.37 Application forms and filing dates.
4280.38 Maximum amount of loans and Grants.
4280.39 Contents of an application.
4280.40 [Reserved]
4280.41 Environmental review of the application.
4280.42 Application evaluation and selection.
4280.43 Discretionary points.
4280.44 Limitation on the number of loans or Grants to an Intermediary.
4280.45–4280.46 [Reserved]
4280.47 Non-selection of applications.
4280.48 Post-selection period.
4280.49 [Reserved]
4280.50 Disbursement of Zero-Interest Loan funds.
4280.51–4280.52 [Reserved]
4280.53 Loan payments.
4280.54 Construction procurement requirements.
4280.55 Monitoring responsibilities.
4280.56 Submission of reports and audits.
4280.57–4280.61 [Reserved]
4280.62 Appeals.
4280.63 Exception authority.
4280.64–4280.69 [Reserved]
4280.100 OMB control number.

Subpart B—Rural Energy for America Program General

4280.101 Purpose.
4280.102 Organization of subpart.

RENEWABLE ENERGY SYSTEM FEASIBILITY STUDY GRANTS

4280.170 Applicant eligibility.
4280.171 Project eligibility.
4280.172 Application eligibility provisions.
§ 4280.1 Purpose.

The Rural Economic Development Loan (REDL) and Grant (REDG) Programs provide financing to eligible Rural Utilities Service (RUS) electric or telecommunications borrowers (Intermediaries) to promote rural economic development and job creation projects.

§ 4280.2 Policy.

(a) REDL Program. REDL Zero-Interest Loans are made to Intermediaries, to relend, at a zero-interest rate, to Ultimate Recipients. Ultimate Recipients are responsible for repayment to the Intermediary. The Intermediary must
transmit Ultimate Recipient loan repayments to Rural Development.

(b) REDG Program. Grants are made to Intermediaries to establish Revolving Loan Funds. REDG Zero-Interest Loans are made by the Intermediary from the Revolving Loan Fund to Ultimate Recipients for the purpose of financing specific, approved Projects. Ultimate Recipients are responsible for repayment to the Intermediary. The Ultimate Recipient’s loan repayments are to be retained in the Revolving Loan Fund, which is maintained by the Intermediary, to finance other rural economic development Projects. Only the initial loan made by the Intermediary from the Revolving Loan Fund has to be at zero interest.

§ 4280.3 Definitions.

The following definitions are applicable to this subpart:

Advanced Telecommunications. Using communications equipment for purposes, such as the simultaneous transmission of images and voice or the electronic transmission of data between multiple sites that do not consist primarily of providing local exchange voice or other routine communications.

Agricultural Production. The cultivation, production, growing, raising, feeding, housing, breeding, hatching, or managing of crops, plants, animals, fish, or birds, either for fiber, food for human consumption, or livestock feed.

Business Incubator. A facility in which small businesses can share premises, support staff, computers, software or hardware, telecommunications terminal equipment, machinery, janitorial services, utilities, or other overhead expenses, and where such businesses can receive Technical Assistance, financial advice, business planning services or other support.

Community Facilities Project. An eligible community facility under the Community Facility Direct or Guaranteed programs.

Cushion of Credit. The amount contributed by the Intermediary pursuant to 7 U.S.C. 940c.

Direct Job. A job that is created or saved by an Ultimate Recipient employer as a result of funding received from these Programs.

Established Operation. An entity that has engaged in the nature of the Project for more than one year.

Full-Time Job. A job for which a worker is scheduled to work 35 hours per week, or more, on a regular basis.

Grant. For the REDG Program only: a transfer of monies other than a loan, from Rural Development to an Intermediary for specific use in funding a Revolving Loan Fund from which loans are made to Ultimate Recipients. Grant funds must be repaid by the Intermediary to Rural Development in the event the Fund is unused for more than one year, misused, no longer needed for its intended purposes, or the Grant is terminated.

Independent Provider. An entity or individual, other than the Intermediary or the Ultimate Recipient that is not owned by a subsidiary or an affiliate of the Intermediary or Ultimate Recipient or would otherwise have an interest in the Intermediary or Ultimate Recipient that would be a conflict of interest or have the appearance of a conflict of interest.

Indirect Job. A job that is created or saved as a result of a funded Project, but is not with the Ultimate Recipient.

Infrastructure. Facilities required to support private sector economic activity such as: Highways, streets, roads, and bridges; public transit; water supply; wastewater treatment; water resources; solid waste; and hazardous waste services.

Intermediary. An entity that is identified by RUS as an eligible borrower under the Rural Electrification Act and obtains a REDG Grant or a REDL Loan.

Part-Time Job. A job for which a worker is scheduled to work less than 35 hours per week, on a regular basis.

Programs. The Rural Economic Development Loan (REDL) and the Rural Economic Development Grant (REDG) Programs.

Project. The facility, equipment, or activity of the Ultimate Recipient that is funded under one of the Programs.

REDG. The Rural Economic Development Grant Program.

REDL. The Rural Economic Development Loan Program.

Revolving Loan Fund (or Fund). A revolving loan fund that is created with
RBS and RUS, USDA

§ 4280.15

Grant funds and the Intermediary’s supplemental contribution under the REDG Program that makes loans and uses the loan repayments and interest earnings to make subsequent loans until the Fund is terminated.

Revolving Loan Fund Plan. A plan developed by the Intermediary and approved by Rural Development that governs the use of the Revolving Loan Fund. The plan must at least include a detailed explanation of the Intermediary’s Fund administration policies and procedures and planned Fund use after the funds in the Revolving Loan Fund have revolved. Fund administration policies and procedures must at least include information regarding the review and approval of loans from the Fund.

Rural Area. This information will be taken from the most recent census data. Any area other than:

(1) A city or town that has a population of greater than 50,000 inhabitants; and

(2) The urbanized area contiguous and adjacent to such a city or town.

Rural Business-Cooperative Service (RBS). The Rural Business-Cooperative Service, an agency within the Rural Development mission area of the USDA.

Rural Development. For purposes of this regulation, The Rural Business-Cooperative Service (RBS), an Agency of the United States Department of Agriculture, or a successor Agency, will be referred to as Rural Development.

Rural Utilities Service (RUS). The Rural Utilities Service, an Agency within the Rural Development mission area of the USDA.

Seasonal Job. A job whether Part-Time or Full-Time that begins and ends in accordance with a specified time period of less than a year and generally within a range less than four months.

Start-Up Venture(s). An entity that has engaged in the nature of the Project for less than one year. An entity that has operated in excess of one year, but which is about to enter into a new line of business, would be considered a Start-Up Venture.

State. Any of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

Technical Assistance. Managerial, financial and operational analysis and consultation by Independent Providers to assist Project owners in identifying and evaluating problems or potential problems and to provide training that enables Project owners to successfully implement, manage, operate and maintain viable Projects.

Ultimate Recipient. An entity or individual that receives a loan from an Intermediary. The Ultimate Recipient may be a for profit or not-for-profit entity such as, but not limited to, a sole proprietorship, a corporation, a cooperative, a partnership, or a Limited Liability Company. The Ultimate Recipient may also be a public body, such as, but not limited to, a political subdivision of a State or locality, or a Federally-recognized Indian tribe.

USDA. The United States Department of Agriculture.

Zero-Interest Loan. A loan made by the Intermediary to the Ultimate Recipient with no interest and which will be repaid to the Intermediary by the Ultimate Recipient.

§§ 4280.4-4280.12 [Reserved]

§ 4280.13 Applicant eligibility.

Applicants that are not delinquent on any Federal debt or otherwise disqualified from participation in these Programs are eligible to apply. An applicant must be eligible under 7 U.S.C. 940c.

§ 4280.14 [Reserved]

§ 4280.15 Ultimate Recipient Projects eligible for Rural Economic Development Loan funding.

An Intermediary may receive REDL funds only when it has a pre-approved Ultimate Recipient and Project that have an immediate need for the Zero-Interest Loan. REDL funds may only be used by the Intermediary to make a
§ 4280.16 Zero-Interest Loan to the Ultimate Recipient to finance financially viable economic development or job creation Projects in a Rural Area. Funds may only be used to provide the following assistance:
(a) Start-Up Venture costs, including, but not limited to financing fixed assets such as real estate, buildings (new or existing), equipment, or working capital;
(b) Business expansion;
(c) Business Incubators;
(d) Technical Assistance;
(e) Project feasibility studies;
(f) Advanced Telecommunications services and computer networks for medical, educational, and job training services;
(g) Other Projects eligible under § 4280.21; or
(h) Community Facilities Projects.

§ 4280.16 REDL and REDG Loan terms.
REDL and REDG loans made by the Intermediary are governed by the following terms:
(a) The maximum term of a loan is 10 years, including any principal deferment period. The Intermediary may choose a shorter term if desired.
(b) Deferments on Zero-Interest Loans will automatically be granted by Rural Development upon request of the Intermediary as follows:
(1) A deferral for up to 1 year for Projects involving an Established Operation; or
(2) A deferral for up to 2 years for Projects involving a Start-Up venture or a Community Facilities Project whether or not such Project also receives funding under USDA Community Facilities funding programs.
(c) The Intermediary must provide the Ultimate Recipient with the same loan terms as the Intermediary receives from Rural Development.
(d) The Intermediary is solely responsible for the financial approval of Fund loans and all other Fund decisions and actions.

§ 4280.17 Additional REDL terms.
(a) The Intermediary is responsible for fully repaying the Zero-Interest Loan to RBS even if the Ultimate Recipient does not repay the Intermediary.
(b) The Intermediary is responsible for remitting any partial or full payment to RBS at the time the Ultimate Recipient pays the Intermediary.
(c) Unless deferred pursuant to § 4280.16(b) of this subpart, loan payments to Rural Development under the REDL Program are due monthly.
(d) If the Intermediary does not have an outstanding loan with RUS, the Intermediary must immediately provide, as security for any REDL loan it receives, a Rural Development-approved irrevocable letter of credit that remains in effect until the loan is repaid.

§ 4280.18 [Reserved]

§ 4280.19 REDG Grants.
Intermediaries receiving Grants must partially finance a Revolving Loan Fund that the Intermediary will operate and administer, by providing supplemental funds of at least 20 percent of the Grant. Grants are subject to 7 CFR parts 3015, 3019, and 3052, as applicable.

§ 4280.20 [Reserved]

§ 4280.21 Eligible REDG Ultimate Recipients and Projects.
The Intermediary may only make loans from the Revolving Loan Fund to entities located in a Rural area of a State. Eligible entities are as follows:
(a) Non-profit entities, public bodies, or Federally-recognized Indian tribes Ultimate Recipients for:
(1) Community development or Community Facility Projects that:
(i) will create or save employment; and
(ii) are open to and serve all Rural residents, and are owned by the Ultimate Recipient;
(2) Business Incubators;
(3) Facilities and equipment to provide education and training to residents of Rural Areas that will facilitate economic development;
(4) Facilities and equipment to provide medical care to residents of Rural Areas. Equipment and facilities may be funded to enable eligible entities to provide medical training and related professional health care skills to rural health care providers;
(5) Projects that utilize Advanced Telecommunications or computer networks to facilitate medical or educational services or job training; or
(6) Project feasibility studies and Technical Assistance. A qualified Independent Provider must perform feasibility studies or Technical Assistance.
(b) For-profit Ultimate Recipients for Projects under paragraphs (a)(3), (4), (5), or (6) of this section.
§ 4280.22 [Reserved]
§ 4280.23 Requirements for lending from Revolving Loan Fund.
(a) Supplemental contribution. The Intermediary must establish a Revolving Loan Fund and contribute an amount equal to at least 20 percent of the Grant. The supplemental contribution must come from Intermediary’s funds which may not be from other Federal Grants, unless permitted by law.
(b) Use of supplemental contribution. The Intermediary’s contribution will only be used to make REDG loans and not other investment purposes. The Intermediary’s contribution must remain a permanent part of the Revolving Loan Fund until the Fund is terminated.
(c) REDG Zero-Interest Loan Requirements. The Fund is made up of Rural Development and Intermediary contributions and must be loaned in accordance with one of the following 2 options:
(1) The contribution may be used to fund the same Project that Rural Development is funding. The interest rate on that portion of the financing using Rural Development funds will be at zero percent. The interest rate on that portion of the financing using the Intermediary’s contribution may be greater than zero percent but must be less than, or equal to, the prevailing prime rate. Using this option, loan security and recovery of loan losses must provide for the pro rata recovery and distribution between the Intermediary and Rural Development based on the respective amounts of each contribution to the total loan amount for the Project.
(2) The Intermediary’s contribution may be used to fund Projects separate from the Project financed with Rural Development funds, provided that the Project is eligible in accordance with §4280.21.
(3) Whether the Intermediary chooses the option under paragraph (c)(1) or paragraph (c)(2) of this section, its contribution must be used to fund an eligible Project within 3 years from the date of the Grant agreement. If the Intermediary fails to use its contribution within this 3-year period, Rural Development will terminate the Grant.
(d) Intermediary’s supplemental funds. Once revolved, monies from the Fund may be loaned at an interest rate called for in the Revolving Loan Fund Plan, not to exceed the prevailing prime rate.
(e) Eligible purposes only. Until the total amount in the Fund has been loaned, all loans must be made for eligible purposes as stated in §4280.21. After the Fund has been loaned, in accordance with §4280.21 of this subpart, the Intermediary shall make loans to finance rural economic development purposes in accordance with the Revolving Loan Fund Plan. All loan repayments, including interest earned, must be deposited into the Fund.
(f) Termination for cause. Rural Development will terminate the Fund and require repayment of the Grant funds in accordance with 7 CFR parts 3015 and 3019 if Rural Development determines that the Fund is not being operated according to the approved Revolving Loan Fund Plan, this subpart, or for other good cause determined by Rural Development, such as questionable prepayment of initial loans.
(g) All REDG Loans must be made to Rural Ultimate Recipients.
§ 4280.24 Revolved funds. Rural Development and the Intermediary’s supplemental funds will be considered revolved after they have been loaned to Ultimate Recipients and subsequently repaid. Loans made from revolved funds will not require prior approval of Rural Development for creditworthiness or environmental clearance purposes. All other Federal compliance requirements, including those in this subpart, remain in effect.
§ 4280.25 Revolving Loan Fund Plan.

Each REDG Intermediary must adopt a Rural Development-approved plan that specifies that:

(a) The initial loan made from the Fund will be at zero percent interest and have a maximum term of 10 years;

(b) Loans made from loan repayments may carry an interest rate less than, or equal to, the prevailing prime rate. The Intermediary determines repayment terms and security arrangements on these loans.

(c) Loans made from repayments of REDG loans must be for eligible Program purposes;

(d) The Intermediary is solely responsible for the financial approval of Fund loans and all other Fund decisions and actions; and

(e) No changes will be made to a Rural Development-approved Revolving Loan Fund Plan without the prior written approval of Rural Development.

§ 4280.26 Administration and operation of the Revolving Loan Fund.

(a) The Intermediary will operate and administer the Revolving Loan Fund. The Intermediary may contract with a third party for administrative services regarding the Fund. However, the Intermediary must permanently retain all Project review, approval, and monitoring authority and responsibility. This authority and responsibility cannot be delegated to any other person or entity.

(b) Up to 10 percent of Rural Development Grant funds may be applied toward operating expenses over the life of the Fund. Operating expenses include the costs of administering the Fund and Technical Assistance provided to Project owners by Independent Providers.

(c) In cases where the Intermediary uses its supplemental contribution to the Revolving Loan Fund for a Project other than the Project that resulted in the Intermediary being awarded the Grant, the loan terms must not exceed 10 years and the interest rate must be less than, or equal to, the prevailing prime rate.

§ 4280.27 Ineligible purposes.

Zero-Interest Loans may not be used:

(a) For activities that would adversely affect the environment, or activities that limit the choice of reasonable alternatives prior to satisfying Rural Development environmental requirements;

(b) To pay off or refinance any existing indebtedness or costs of the Project that were incurred prior to Rural Development receipt of the Intermediary’s completed application;

(c) For any electric or telecommunications purpose or for the Intermediary’s electric or telecommunications operations, for affiliated operations of the Intermediary, or for the benefit of other Intermediaries or their affiliated operations, except those purposes contained in § 4280.15(f);

(d) To pay the salaries of any employee or owner of the Intermediary, its subsidiaries, or affiliates, except for salaries incurred in administering a Revolving Loan Fund established under the REDG Program;

(e) For community antenna or cable television systems or facilities;

(f) For residential purposes such as residential dwellings and land sites; facilities to provide entertainment television; to transfer property between owners without making improvements that will promote or sustain economic development in Rural Areas; or for personal, non-business related vehicles;

(g) Where there is directly or indirectly a conflict of interest or the appearance of a conflict of interest in the Project; for Intermediaries this would include a situation in which the Intermediary, its officers, managers, Board of Directors, employees, their spouses, children, or close relatives, have a financial or ownership interest in the Project being funded, including its construction or development;

(h) For any purpose when receipt of loan funds is conditioned upon the requirement that the Ultimate Recipient acquire electric or telecommunications service from the Intermediary or its affiliates;

(i) For any gambling activity;

(j) For a Project that would result in the transfer of existing employment or business activity more than 25 miles from its existing location;
(k) For proposed Projects located in areas covered by the Coastal Barrier Resources Act (16 U.S.C. 3501–3510);  
(l) For any illegal activity or any activity involving prostitution;  
(m) For Agricultural Production, except where the Project is a farmer-owned cooperative or similar organization where the benefits of the Project are passed on to the farmer-owners, and the Agricultural Production is part of an integrated business that processes the agricultural products, and the Agricultural Production portion of the loan will not exceed 50% of the loan amount;  
(n) For any pass-through Grant funding activity (a Grant by the Intermediary to the Ultimate Recipient);  
(o) Provision of only local exchange voice telephone service; or  
(p) for any other purpose announced in a notice by Rural Development. This will not affect Grants that have already been awarded.

§ 4280.28 [Reserved]

§ 4280.29 Supplemental financing required for the Ultimate Recipient Project.

(a) For REDL loans, either the Ultimate Recipient or the Intermediary must provide supplemental funds for the Project equal to at least 20 percent of the loan to the Intermediary. For REDG grants, the Intermediary must provide supplemental funds, to capitalize the Revolving Loan Fund, equal to at least 20 percent of the Grant to the Intermediary.  
(b) Funds provided by the Ultimate Recipient must be:  
(1) Cash or its equivalent;  
(2) Provided after Rural Development receives the completed application; and  
(3) Disbursed for an eligible Project within a three year period that begins on the day the Intermediary signs the Grant agreement.  
(c) Satisfactory evidence of the Ultimate Recipient’s funds must be provided to Rural Development before it will advance any funds to the Intermediary.

§ 4280.30 Restrictions on the use of REDL or REDG funds.

(a) Conflict of interest. The Intermediary must not own or manage any Ultimate Recipient Project, unless the Project is acquired as a result of servicing a loan made from the Revolving Loan Fund. Conflicts of interest and all appearances of a conflict of interest are not permitted.  
(b) Fees. The Intermediary may charge reasonable loan servicing fees, which are limited to one percent per year of the principal amount outstanding on the loan; reasonable professional service fees that are customary for the service being provided and in accordance with any standard fee schedules that have been established for the service; and reasonable expenses the Intermediary has incurred from Independent Providers.  
(c) Interest earnings. Any interest earned by the Intermediary on advances of Rural Development REDG or REDL funds prior to the disbursement for the Project, must be returned to Rural Development.

§§ 4280.31–4280.35 [Reserved]

§ 4280.36 Other laws that contain compliance requirements for these Programs.

(a) Equal employment opportunity. For all construction contracts and Grants in excess of $10,000, the contractor must comply with Executive Order 11246, as amended by Executive Order 11375, and as supplemented by applicable Department of Labor regulations (41 CFR part 60). The applicant is responsible for ensuring that the contractor complies with these requirements.  
(b) Equal opportunity and nondiscrimination. Rural Development will ensure that equal opportunity and nondiscriminatory requirements are met in accordance with the Equal Credit Opportunity Act and 7 CFR part 15d, conducted by USDA. Rural Development will not discriminate against applicants on the bases of race, color, religion, national origin, sex, marital status, or age (provided that the applicant has the capacity to contract); to the fact that all or part of the applicant’s income derives from public assistance program; or to the fact that the applicant has in good faith exercised any right under the Consumer Credit Protection Act.
(c) Civil rights compliance. Recipients of Grants must comply with the Americans with Disabilities Act of 1990, Title VI of the Civil Rights Act of 1964, and Section 504 of the Rehabilitation Act of 1973. This includes collection and maintenance of data on the race, sex, and national origin of the recipient’s membership/ownership and employees. These data must be available to conduct compliance reviews in accordance with 7 CFR part 1901 subpart E, §1901.204. Initial compliance reviews will be conducted with the Intermediary when Form RD 400–4, “Assurance Agreement,” is signed. For each loan or Grant an Intermediary receives, a new Form RD 400–4 must be completed. Each Ultimate Recipient must go through the same pre-award compliance review process and must also sign Form RD 400–4. For loans and Grants, a pre-award review is required before loan or Grant approval or any disbursement of funds. For Intermediaries, a post-award compliance review is required 90 days after closing the loan or Grant. This review is not required for Ultimate Recipients. Subsequent compliance reviews will be conducted 3 years from the date the post-award compliance review is completed for Intermediaries and 3 years from the date the pre-award compliance review is completed for Ultimate Recipients. Where Grant funds are used for a Revolving Loan Fund, compliance reviews are required for Intermediaries for as long as the Fund is in operation. For Ultimate Recipients, compliance reviews are conducted until the loan is repaid to the Fund.

(d) Architectural barriers. All facilities financed with Zero-Interest Loans that are open to the public or in which persons may be employed or reside must be designed, constructed, or altered to be readily accessible to and usable by disabled persons. Standards for these facilities must comply with the Architectural Barriers Act of 1968 (42 U.S.C. 4151–4157) and the “Uniform Federal Accessibility Standards”, (41 CFR part 101–101.6, Appendix A).

(e) Uniform relocation assistance. Relocations in connection with these Programs are subject to 49 CFR part 21 except that the provisions in title III of the Uniform Act do not apply to these Programs.

(f) Drug-free workplace. Grants made under these Programs are subject to the requirements contained in 7 CFR part 3021 which implements the Drug-Free Workplace Act of 1988 (41 U.S.C. 701–706). An Intermediary requesting a REDG Grant will be required to certify that it will establish and make a good faith effort to maintain a drug-free workplace program.

(g) Debarment and suspension. The requirements of 7 CFR part 3017 are applicable to these Programs.

(h) Intergovernmental review of Federal programs. These Programs are subject to the requirements of Executive Order 12372 (3 CFR 1982 Comp., p. 197) and 7 CFR part 3015, subpart V which implements Executive Order 12372. Proposed Projects are subject to the State and local government review process contained in 7 CFR part 3015.

(i) Restrictions on lobbying. The restrictions and requirements imposed by 31 U.S.C. 1352, and 7 CFR part 3018, are applicable to these Programs.

(j) Earthquake hazards. These Programs are subject to the seismic requirements of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701–7706).

(k) Environmental requirements. The requirements of 7 CFR part 1940, subpart G, are applicable to these Programs and to the loans made from the Revolving Loan Fund using Rural Development funds. Financial assistance from the Revolving Loan Fund, when funds are derived from repayments by third parties, is not considered Federal assistance for purposes of meeting the compliance requirements of 7 CFR part 1940, subpart G.

(l) Affirmative fair housing. If applicable, the Intermediary will be required to comply with the Affirmative Fair Housing Act (42 U.S.C. 3601–3631).

(m) Flood hazard insurance. These Programs are subject to the National Flood Insurance Act of 1968 and the Flood Disaster Protection Act of 1973, as amended by 42 U.S.C. 4001–4129.

(n) Audits. These Programs are subject to 7 CFR part 3052.
§ 4280.37 Application forms and filing dates.
(a) The Intermediary may obtain forms that supplement the written narrative sections of its application from the Rural Development State Office for the State where the Intermediary is located.
(b) An original copy only of the application is to be filed with the Rural Development State Office. No other copies are required.

§ 4280.38 Maximum amount of loans or Grants.
During any given fiscal year, Rural Development will publish an announcement of available loan and Grant funds and will indicate the maximum loan and Grant amounts for which an Intermediary or prospective Intermediary may apply. This announcement will also include contact information and application deadlines. All pending applications on file at RBS, including both loan and Grant applications, from the same Intermediary or prospective Intermediary for the same Project will be considered to be one application in determining that the maximum size of the application is in accordance with this section.

§ 4280.39 Contents of an application.
An application for a loan or a Grant must contain the following:
(a) Required forms and certifications:
(2) A Resolution of the Board of Directors signed by the directors and certified by the Intermediary’s board secretary. The board resolution must indicate whether the Intermediary is requesting a loan or Grant, agree to the provisions of this subpart and the loan or Grant agreement including the Intermediary’s 20 percent Fund contribution, and state that the Intermediary has the legal authority to enter into a loan or Grant agreement under these Programs;
(3) Form AD 1047, “Certification Regarding Debarment, Suspension, and other Responsibility Matters—Primary Covered Transactions;” and Form AD–1048, “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Transactions.”
(4) Assurance statement for the Uniform Act signed by the Ultimate Recipient. This statement provides Rural Development with the required assurance statement that any relocations of persons or acquisitions of real property, as part of completing the Ultimate Recipient Project, will be handled in accordance with this statute.
(5) RD Instruction 1940–Q, Exhibit A–1, applies if the loan is greater than $150,000 or the Grant is greater than $100,000;
(6) SF LLL, “Disclosure of Lobbying Activities,” (if the Intermediary or the Ultimate Recipient engages in lobbying activities);
(7) Form AD 1049, “Certification Regarding Drug-Free Workplace Requirements,” for Grants only;
(8) Seismic certification if construction of a building is proposed. The Project owner certifies that any building constructed will comply with standards that reduce the damage caused by earthquakes;
(9) Form RD 1940–20, “Request for Environmental Information”; and
(10) RUS Form 7, “Financial and Statistical Report” and RUS Form 7a “Investments, Loan Guarantees, and Loans,” or similar information.
(b) A written narrative section must be provided. This section consists of the following:
(1) A Project description, including details of the work to be performed with Rural Development funds, and a business plan, including a discussion of management and prior experience of the Ultimate Recipient.
(2) A discussion of how the Project meets each selection factor in §4280.42(b).
(3) A Revolving Loan Fund Plan is required if the Intermediary is applying for a Grant to establish a Revolving Loan Fund.
§ 4280.41 Environmental review of the application.

(a) Rural Development will conduct a review for the potential of any environmental impacts resulting from the proposed Project identified in the application and inform the Intermediary of any additional information Rural Development needs and any subsequent environmental requirements necessary for Rural Development to make a finding.

(b) Rural Development will conduct all necessary environmental reviews as prescribed in 7 CFR part 1940, subpart G. These reviews must be completed before the application can be considered for approval.

§ 4280.42 Application evaluation and selection.

(a) Rural Development will evaluate the application and score it based on the selection factors in this section. All applications will be ranked on a nationwide basis, based on the total points scored.

(b) The application will be evaluated and scored using the information provided in accordance with §4280.39(b)(2) of this subpart.

(1) Nature of the Project. Rural Development will award up to 60 points based on whether the Project:

(i) Is a for-profit business, Business Incubator, industrial building or park, or an infrastructure connection project (such as streets or utilities)—20 points;

(ii) Provides Technical Assistance to rural businesses or rural residents, or educates or provides medical care to rural residents—20 points;

(iii) Will enhance rural economic development by providing Advanced Telecommunications services and computer networks for medical, educational, and job training services. This review will be based on the application’s telecommunications design—20 points.

(2) Number of direct full-time equivalent jobs created or saved within a 3-year period. To calculate full-time equivalent Direct-Jobs, count two part-time jobs as one full-time job or three part-time or seasonal jobs as one full-time job. If the total numbers of part-time and seasonal jobs add up to a fraction, round up to the next whole number after combining same. Indirect-Jobs or non-Rural jobs cannot be used for this calculation.

<table>
<thead>
<tr>
<th>If the number of Rural full-time equivalent direct-jobs jobs created or saved per $100,000 of total, Project cost is:</th>
<th>Then Rural Development will award:</th>
</tr>
</thead>
<tbody>
<tr>
<td>(i) Greater than five</td>
<td>25 points.</td>
</tr>
<tr>
<td>(ii) From one to five</td>
<td>15 points.</td>
</tr>
</tbody>
</table>

(3) Supplemental funds for the Project. Points will be based on a calculation of the amount of supplemental funds to be provided to the Project. All supplemental funds used in the following calculation must be disbursed to the Project between the date of Rural Development receipt of the application and 1 year after the first advance of funds by Rural Development.

<table>
<thead>
<tr>
<th>If supplemental funds as a percentage of the Rural Development loan or grant to be provided to the Project are:</th>
<th>Then Rural Development will award:</th>
</tr>
</thead>
<tbody>
<tr>
<td>(i) Greater than 200%</td>
<td>20 points.</td>
</tr>
<tr>
<td>(ii) From 100% to 200%</td>
<td>10 points.</td>
</tr>
<tr>
<td>(iii) From 50% to less than 100%</td>
<td>5 points.</td>
</tr>
</tbody>
</table>

(4) Unemployment rate for the county(ies) where the Project is physically located. Rural Development will compare the current unemployment rate(s) in the county(ies) to the State and national unemployment rates, and, if applicable, award points under the following categories, whichever is greater:
If the unemployment rate(s) in the county(ies) where the Project will be located:

Then Rural Development will award:

(i) Exceeds the national unemployment rate by 30% or more ........................................................ 15 points.
(ii) Is greater than the national unemployment rate, but exceeds it by less than 30% .................. 5 points.
(iii) Exceeds the State unemployment rate by 30% or more .............................................................. 10 points.
(iv) Is greater than the State unemployment rate but exceeds it by less than 30% .......................... 5 points.

(5) Per capita personal income for the county(ies) where the Project is physically located. Rural Development will compare the per capita personal income in the county(ies) where the Project will be located to the national and State per capita personal income levels, and, if applicable, award points under the following categories, whichever is greater:

If the per capita personal income level in the county(ies) is:

Then Rural Development will award:

(i) Less than or equal to 90% of the national level ................................................................. 15 points.
(ii) Between 90 and 100% of the national level ................................................................. 5 points.
(iii) Less than or equal to 90% of the State level ............................................................................. 10 points.
(iv) Between 90 and 100% of the State level ............................................................................. 5 points.

(6) Rural Area location. (i) If the Project is physically located in an incorporated city or town or equivalent having a population of 1,249 or less, or if it is physically located in an unincorporated area, Rural Development will award 20 points.

(ii) If the Project is physically located in an incorporated area having a population of 1,250 to 2,500, Rural Development will award 10 points.

(7) Decline in population for the county where the Project is physically located. If there has been a decline in population in the county where the Project will be located over the time period covered by the two most recent decennial censuses of the United States to the present, Rural Development will award 10 points.

(8) Cushion of Credit Payments. Rural Development will determine the level of Cushion of Credit Payments on deposit by the Intermediary, as follows:

If the Intermediary's Cushion of Credit account level is:

Then Rural Development will award:

(i) In excess of $300,000, or a dollar amount in excess of 3 percent of the Intermediary’s total assets, whichever is less. 15 points.
(ii) Within the range of $100,000 to $299,999.99, or a dollar amount that is within the range of one percent to 2.99 percent of Intermediary’s total assets, whichever is less. 10 points.
(iii) Within the range of $10,000 to $99,999.99, or a dollar amount that is within the range of 0.5 percent to 0.99 percent of Intermediary’s total assets, whichever is less. 5 points.

(9) Initial loan and Grant. If the loan or Grant application will result in the first award to an Intermediary under these Programs, Rural Development will award 10 points.

(10) County participation. If the Project will be the first REDLG Project financed in a county Rural Development will award 10 points.

(11) The business plan for the Applicant’s Ultimate Recipient will be evaluated by Rural Development and must include:

(i) A description of the business or Project plans, its management, and, if applicable, its products and operating plans. (The business plan evaluated by Rural Development for Advanced Telecommunications will be its telecommunications and engineering design)—up to 15 points; and
§ 4280.43 Discretionary points.

The RBS Administrator has the discretion to designate up to 25 points (no more than 5 points for each of the following elements) based on whether the Project:

(a) Is located in a Rural Empowerment Zone, Rural Economic Area Partnership Zone, Rural Enterprise Community, or Champion Community;

(b) Is located in a county that has experienced the loss, removal, or closing of a major source or sources of employment in the last 3 years which causes an increase of 2 percentage points or more in the county’s most recent unemployment rate compared with the same period immediately before the dislocation;

(c) Is located in a county that has experienced chronic or long-term economic deterioration;

(d) Is located in a county that was designated a disaster area by the President of the United States that significantly affected rural economic development and job creation. The county must have been designated within 3 years prior to filing of the completed application with Rural Development; or

(e) Is consistent with the Rural Development State Office’s approved strategic plan and mission area objectives and is identified as a priority area for assistance in the States’ plan.

§ 4280.44 Limitation on number of loans or Grants to an Intermediary.

Depending on the amount of funds available, Rural Development may publish an announcement limiting an Intermediary to one selected Grant application and two selected loan applications in a fiscal year.

§§ 4280.45–4280.46 [Reserved]

§ 4280.47 Non-selection of applications.

Provided the application requirements have not changed, an application not selected will be reconsidered in 3 subsequent funding competitions for a total of four funding competitions. If an application is withdrawn, it can be resubmitted and will be evaluated as a new application.

§ 4280.48 Post selection period.

Rural Development will notify the Intermediary in writing if the application is selected. The documents to be executed by the Intermediary will include:

(a) For a loan:

(1) A Letter of Conditions with Project-specific terms and conditions;

(2) A Loan agreement with general terms and conditions;

(3) A note covering the repayment terms of the loan; and

(4) A legal opinion concerning the authority of the Intermediary to engage in the Project.

(b) For a Grant:

(1) A Letter of Conditions with Project-specific terms and conditions;

(2) A Grant agreement with general terms and conditions; and

(3) A legal opinion concerning the authority of the Intermediary to participate in the Revolving Loan Fund and to engage in the Project.

§ 4280.49 [Reserved]

§ 4280.50 Disbursement of Zero-Interest Loan funds.

(a) For a REDL loan, Rural Development will disburse Zero-Interest Loan funds to the Intermediary in accordance with the terms of the executed loan agreement. All loan funds will be disbursed either as an advance to the Intermediary, in multiple advances, or as a reimbursement for eligible project costs, once the Intermediary has complied with Rural Development requirements.

(b) The Intermediary must provide to the Ultimate Recipient all loan funds that the Intermediary receives from Rural Development within one year of receiving them. If the Intermediary does not re-lend Rural Development
RBS and RUS, USDA 

§ 4280.56 Submission of reports and audits.

(a) In addition to any reports required by 7 CFR parts 3015 and 3019, the Intermediary must submit the following monitoring reports to Rural Development:

(1) Loan. The Intermediary must submit Form RD 4280–1 “Survey of Recipients of Rural Economic Development Loan and Grant Program” to Rural Development on an annual basis until it no longer owes money to USDA under the REDLG Program.

(2) Grant (Revolving Loan Fund). The Intermediary must submit the Form RD 4280–1 to Rural Development on an annual basis until all projects financed with Rural Development Grant proceeds have been repaid or are otherwise retired, whichever occurs last. Thereafter, on a triennial basis until the fund is terminated, the Intermediary will submit to Rural Development the Form RD 4280–1, reporting on the activity of all loans made from the Revolving Loan Fund.

(b) If the Intermediary does not have an existing loan with RUS, the Intermediary will submit a copy of its annual audit to Rural Development within 90 days of its completion. All REDL audits must be conducted in accordance with Generally Accepted Government Auditing Standards or Generally Accepted Accounting Principles and

§§ 4280.51–4280.52 [Reserved]

§ 4280.53 Loan payments.

The Intermediary must make all REDL payments to Rural Development by electronic funds transfer or other means as specified in the loan documents.

§ 4280.54 Construction procurement requirements.

Construction, including bidding and awarding of contracts, must be conducted in a manner that provides maximum open and free competition.

§ 4280.55 Monitoring responsibilities.

(a) The Intermediary must monitor the Project to ensure that:

(1) Funds are used only for the approved purposes as specified in the legal documents;

(2) Disbursements and expenditures of funds are properly supported with certifications, invoices, contracts, bills of sale, or other forms of evidence, which are maintained on the premises of the Intermediary;

(3) Project time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved; and

(4) The Project is in compliance with all applicable regulations.

(b) Rural Development may inspect and copy records and documents that pertain to the Project. The Intermediary must retain these records for the term of the Project loan plus 2 years. In addition, Rural Development may also perform Project site visits and reviews of the use of loan or Grant proceeds.

(c) Rural Development will review and monitor Grants in accordance with 7 CFR parts 3015, 3017, 3018, 3019, 3021, and 3052.
REDG audits in accordance with 7 CFR part 3052.

(c) Rural Development may require Ultimate Recipients that receive loans financed with Grant funds provided under the REDG Program to submit annual audits to comply with Federal audit regulations. In accordance with 7 CFR part 3052, Ultimate Recipients that are nonprofit entities, or a State or local government, may be required to submit an audit subject to the threshold established in OMB Circular No. A–133.

§§ 4280.57–4280.61 [Reserved]

§ 4280.62 Appeals.

An Intermediary may appeal any appealable adverse decision made by Rural Development that affects the Intermediary in accordance with 7 CFR part 11.

§ 4280.63 Exception authority.

Except as specified in paragraphs (a) through (c) of this section, the RBS Administrator may, on a case-by-case basis, make exceptions to any requirement or provision of this subpart, if such exception is necessary to implement the intent of the authorizing statute in a time of national emergency or in accordance with a Presidentially-declared disaster, or when such an exception is in the best interests of the Federal Government and is otherwise not in conflict with applicable law.

(a) Applicant eligibility. No exception to applicant eligibility can be made.

(b) Project eligibility. No exception to project eligibility can be made.

(c) Rural area definition. No exception to the definition of rural area, as defined, can be made.

§§ 4280.64–4280.99 [Reserved]

§ 4280.100 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0035. A person is not required to respond to this collection of information unless it displays a currently valid OMB control number.

§ 4280.101 Purpose.

This subpart contains the procedures and requirements for providing the following financial assistance under the Rural Energy for America Program:

(a) Grants or guaranteed loans, or a combination grant and guaranteed loan, for the purpose of purchasing and installing renewable energy systems and energy efficiency improvements in rural areas;

(b) Grants for conducting renewable energy system feasibility studies; and

(c) Grants to assist agricultural producers and rural small businesses by conducting energy audits and providing recommendations and information on renewable energy development assistance and improving energy efficiency.

§ 4280.102 Organization of subpart.

(a) Sections 4280.103 through 4280.111 discuss definitions, exception authority, appeals, conflict of interest, USDA Departmental regulations, other applicable laws, ineligible applicants, borrowers, and owners, general applicant and application provisions, and notifications, which are applicable to all of the funding programs under this subpart.

(b) Sections 4280.112 through 4280.121 discuss the requirements specific to renewable energy system and energy efficiency improvement grants. Sections 4280.112 and 4280.113 discuss, respectively, applicant and project eligibility. Section 4280.114 discusses the circumstances under which an applicant may qualify to submit a simplified application for a grant. Sections 4280.115 through 4280.118 address grant funding, grant application content and required documentation, the evaluation process, and insurance requirements. Sections 4280.119 through 4280.121 address project planning, development, and completion, grantee requirements, and grant servicing.
(c) Sections 4280.122 through 4280.160 discuss the requirements specific to renewable energy system and energy efficiency improvement guaranteed loans. Sections 4280.122 through 4280.127 discuss eligibility and requirements for making and processing loans guaranteed by the Agency. Section 4280.128 addresses the application and documentation requirements, separating the requirements for loans over $600,000 and for loans of $600,000 or less. Section 4280.129 addresses the evaluation of guaranteed loan applications. Sections 4280.130 through 4280.160 provide guaranteed loan origination and servicing requirements. These requirements apply to lenders, holders, and other parties involved in making, guaranteeing, holding, servicing, or liquidating such loans.

(d) Section 4280.165 presents the process by which the Agency will make combined loan guarantee and grant funding available for renewable energy system and energy efficiency improvement projects.

(e) Sections 4280.170 through 4280.182 present the process by which the Agency will make renewable energy system feasibility study grant funding available. These sections cover applicant, project, and application eligibility; grant funding; application content, evaluation, scoring, and selection for award; and grant award, administration, and servicing.

(f) Sections 4280.186 through 4280.196 present the process by which the Agency will make energy audit and renewable energy development assistance grant funding available. These sections cover applicant and project eligibility; grant funding; application content, evaluation, scoring, and selection for award; and grant award, administration, and servicing.

(g) Appendices A through D of this subpart cover technical report requirements. Appendix A applies to projects with total eligible project costs of $200,000 or less; Appendix B applies projects with total eligible project costs greater than $200,000; Appendix C applies to hydropower projects; and Appendix D applies to flexible fuel pumps. Appendix E identifies the contents of the feasibility study that will be required to be submitted to the Agency if funding is provided under §§ 4280.170 through 4280.182.

§ 4280.103 Definitions.

Terms used in this subpart are defined in either § 4279.2 of this chapter or in this section. If a term is defined in both § 4279.2 and this section, it will have, for purposes of this subpart only, the meaning given in this section.

Agency. The Rural Business-Cooperative Service or successor Agency assigned by the Secretary of Agriculture to administer the Rural Energy for America Program. References to the National Office, Finance Office, State Office, or other Agency offices or officials should be read as prefaced by “Agency” or “Rural Development” as applicable.

Agricultural producer. An individual or entity directly engaged in the production of agricultural products, including crops (including farming); livestock (including ranching); forestry products; hydroponics; nursery stock; or aquaculture, whereby 50 percent or greater of their gross income is derived from the operations.

Anaerobic digester project. A renewable energy system that uses animal waste and other organic substrates, via anaerobic digestion, to produce biogas that is used to produce thermal or electrical energy or converted to a compressed gaseous or liquid state.

Annual receipts. The total income or gross income (sole proprietorship) plus cost of goods sold.

Applicant. The agricultural producer or rural small business that is seeking a grant, guaranteed loan, or a combination of a grant and loan, under this subpart.

Assignment Guarantee Agreement (Form RD 4279-6) or successor form. A signed agreement between the Agency, the lender, and the holder containing the terms and conditions of an assignment of a guaranteed portion of a loan.

Bioenergy project. A renewable energy system that produces fuel, thermal energy, or electric power from a biomass
source, other than an anaerobic digester project.

Biogas. Renewable biomass converted to gaseous fuels.

Blended liquid transportation fuel. A fuel used for transportation that:

1. Is composed of one or more fuel types, at least one of which must meet the Renewable Fuel Standard, and

2. Results in a blended fuel that exceeds the highest requirement for the percentage volume for a renewable fuel.

Borrower. Any party or parties liable for a guaranteed loan made under this subpart except guarantors.

Capacity. The maximum load that an apparatus or heating unit is able to meet on a sustained basis as rated by the manufacturer.

Commercially available. A system that has a proven operating history specific to the proposed application. Such a system is based on established design, and installation procedures and practices. Professional service providers, trades, large construction equipment providers, and labor are familiar with installation procedures and practices. Proprietary and balance of system equipment and spare parts are readily available. Service is readily available to properly maintain and operate the system. An established warranty exists for parts, labor, and performance.

Conditional Commitment (Form RD 4279-3) or successor form. Agency notice to the lender that the loan guarantee is approved subject to the completion of all conditions and requirements set forth by the Agency.

Default. The condition where a borrower or grantee is not in compliance with one or more loan covenants or grant conditions as stipulated in the Letter of Conditions, Conditional Commitment, or loan or grant agreement.

Departmental regulations. The regulations of the Department of Agriculture’s Office of Chief Financial Officer (or successor office) as codified in 2 CFR part 417 and 7 CFR parts 3000 through 3099, including, but not necessarily limited to, 7 CFR parts 3015 through 3019, 7 CFR part 3021, and 7 CFR part 3052.

Design/build method. A method of project development whereby all design, engineering, procurement, construction, and other related project activities are performed under a single contract. The prime contractor is solely responsible and accountable for successful delivery of the project to the owner.

Eligible project costs. The total project costs that are eligible to be paid with program funds.

Energy assessment. A report conducted by an experienced energy assessor, certified energy manager or professional engineer assessing energy cost and efficiency by analyzing energy bills and briefly surveying the target building, machinery, or system. The report identifies and provides a savings and cost analysis of low-cost/no-cost measures. The report will estimate the overall costs and expected energy savings from these improvements, and dollars saved per year. The report will estimate weighted-average payback period in years.

Energy assessor. An individual or entity that conducts an energy assessment.

Energy audit. An audit conducted by a certified energy manager or professional engineer that focuses on potential capital-intensive projects and involves detailed gathering of field data and engineering analysis. The audit will provide detailed project costs and savings information with a high level of confidence sufficient for major capital investment decisions.

Energy auditor. An individual or entity that conducts an energy audit.

Energy efficiency improvement (EEI). Improvements to a facility, building, or process that reduce energy consumption, or reduce energy consumed per square foot.

Existing business. A business that has completed at least one full business cycle.

Fair market value of equity in real property. Fair market value of real property, as established by an appraisal, less the outstanding balance of any mortgages, liens, or encumbrances.

Feasibility study. An analysis of the economic, market, technical, financial, and management feasibility of a proposed project or business.

Financial feasibility. The ability of a project or business to achieve the income, credit, and cash flows to financially sustain a project over the long
term. The concept of financial feasibility includes assessments of the cost-accounting system, the availability of short-term credit for seasonal businesses, and the adequacy of raw materials and supplies.

Flexible fuel pump. A retail pump that combines and dispenses a blended liquid transportation fuel or dispenses a blended liquid transportation fuel. If a flexible fuel pump dispenses more than one blend of liquid transportation fuel, at least one of the blends must meet the definition of blended liquid transportation fuel found in this section.

Geothermal, direct use. A system that uses thermal energy directly from a geothermal source.

Geothermal, electric generation. A system that uses geothermal energy to produce high pressure steam for electric power production.

Holder. A person or entity, other than the lender, who owns all or part of the guaranteed portion of the loan with no servicing responsibilities. When the single note option is used and the lender assigns a part of the guaranteed note to an assignee, the assignee becomes a holder only when the Agency receives notice and the transaction is completed through the use of Form RD 4279-6.

Hydroelectric energy. Energy created from various hydroelectric sources including, but not limited to, diverted run-of-river water, in-stream run-of-river water, and in-conduit water.

Hydrogen project. A renewable energy system that produces hydrogen or a renewable energy system that uses mechanical or electric power or thermal energy from a renewable resource using hydrogen as an energy transport medium.

Hydropower. Energy created by hydroelectric or ocean energy.

Institution of higher education. As defined in 20 U.S.C. 1002(a).

Instrumentality. An organization recognized, established, and controlled by a State, tribal, or local government, for a public purpose or to carry out special purposes.

Interconnection agreement. The terms and conditions governing the interconnection and parallel operation of the grantee’s or borrower’s electric generation equipment and the utility’s electric power system.

Interim financing. A temporary or short-term loan made with the clear intent that it will be repaid through another loan, cash, or other financing mechanism. Interim financing is frequently used to pay construction and other costs associated with a planned project, with permanent financing to be obtained after project completion.

Large solar, electric. Large solar electric systems are those for which the rated power of the system is larger than 10 kilowatts (kW). Large solar electric systems are either stand-alone (off grid) or interconnected to the grid (on grid).

Large solar, thermal. Large solar thermal systems are those for which the rated storage volume of the system is greater than 240 gallons or that have a collector area of more than 1,000 square feet.

Large wind system. A wind energy project for which the rated power of the individual wind turbine(s) is larger than 100kW.

Lender. The organization making, servicing, and collecting the loan that is guaranteed under the provisions of this subpart.

Lender’s Agreement (Form RD 4279-4) or successor form. Agreement between the Agency and the lender setting forth the lender’s loan responsibilities.

Loan Note Guarantee (Form RD 4279-5) or successor form. Instrument issued and executed by the Agency containing the terms and conditions of the guarantee.

Matching funds. The funds needed to pay for the portion of the eligible project costs not funded or guaranteed by the Agency through a grant or guaranteed loan under this program. Unless authorized by statute, other Federal grant funds cannot be used to meet a matching funds requirement.

Necessary capital improvement. A capital improvement required to keep an existing system in compliance with regulations or to maintain technical or operational feasibility.

Ocean energy. Energy created by use of various types of moving water including, but not limited to, tidal, wave, current, and thermal changes.

Participation. The sale of interest in a loan by the lender wherein the lender...
retains the note, collateral securing the note, and all responsibility for loan servicing and liquidation.

**Passive investor.** An equity investor that does not actively participate in management and operation decisions of the business entity as evidenced by a contractual arrangement.

**Post-application.** The period of time after the Agency has received a complete application, which contains all parts necessary for the Agency to determine applicant and project eligibility, to score the application, and to conduct the technical evaluation.

**Power purchase agreement.** The terms and conditions governing the sale and transportation of electricity produced by the grantee or borrower to another party.

**Pre-commercial technology.** Technology that has emerged through the research and development process and has technical and economic potential for commercial application, but is not yet commercially available.

**Promissory Note.** Evidence of debt. A note that a borrower signs promising to pay a specific amount of money at a stated time or on demand.

**Public power entity.** Is defined using the definition of state utility as defined in section 217(A)(4) of the Federal Power Act (16 U.S.C. 824q(a)(4)). As of this writing, the definition “means a State or any political subdivision of a State, or any agency, authority, or instrumentality of any one or more of the foregoing, or a corporation that is wholly owned, directly or indirectly, by any one or more of the foregoing, competent to carry on the business of developing, transmitting, utilizing, or distributing power.”

**Qualified consultant.** An entity possessing the knowledge, expertise, and experience to perform a specific task.

**Qualified party.** An independent third party entity possessing the knowledge, expertise, and experience to perform in an efficient, effective, and authoritative manner the specific task required.

**Rated power.** The maximum amount of energy that can be created at any given time.

**Renewable biomass.**
1. Materials, pre-commercial thinnings, or invasive species from National Forest System land and public lands (as defined in section 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702)) that:
   (i) Are byproducts of preventive treatments that are removed to reduce hazardous fuels; to reduce or contain disease or insect infestation; or to restore ecosystem health;
   (ii) Would not otherwise be used for higher-value products; and
   (iii) Are harvested in accordance with applicable law and land management plans and the requirements for old-growth maintenance, restoration, and management direction of paragraphs (e)(2), (e)(3), and (e)(4) and large-tree retention of subsection (f) of section 102 of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6512); or
2. Any organic matter that is available on a renewable or recurring basis from non-Federal land or land belonging to an Indian or Indian tribe that is held in trust by the United States or subject to a restriction against alienation imposed by the United States, including:
   (1) Renewable plant material, including feed grains; other agricultural commodities; other plants and trees; and algae; and
   (ii) Waste material, including crop residue; other vegetative waste material (including wood waste and wood residues); animal waste and byproducts (including fats, oils, greases, and manure); and food waste and yard waste.

**Renewable energy.** Energy derived from:
1. A wind, solar, renewable biomass, ocean (including tidal, wave, current, and thermal), geothermal or hydroelectric source; or
2. Hydrogen derived from renewable biomass or water using wind, solar, ocean (including tidal, wave, current, and thermal), geothermal or hydroelectric energy sources.

**Renewable Energy Development Assistance.** Assistance provided by eligible grantees to agricultural producers and rural small businesses to become more energy efficient and to use renewable energy technologies and resources. The renewable energy development assistance may consist of renewable energy site assessment and/or renewable energy technical assistance.
Renewable energy site assessment. A report provided to an agricultural producer or rural small business providing recommendations and information regarding the use of renewable energy technologies in its operation. The report shall be prepared by a qualified consultant and evaluate a specific site or geographic area for potential use of one or more renewable energy technologies. Typically, the report will evaluate a potential renewable energy project with an estimated total cost of construction of less than $200,000. The evaluation shall be based on existing data, which may include data regarding existing and/or proposed structures, commercially available technologies, feed-stocks, and other renewable energy resources. The report will consider factors such as the site and the potential uses of renewable energy technology at the site. The report will not include information about any residential dwelling(s).

Renewable energy system (RES). A system that produces or produces and delivers usable energy from a renewable energy source, or is a flexible fuel pump.

Renewable energy technical assistance. Assistance provided to agricultural producers and rural small businesses on how to use renewable energy technologies and resources in their operations.

Rural or rural area. Any area of a State not in a city or town that has a population of more than 50,000 inhabitants, according to the latest decennial census of the United States, or in the urbanized area contiguous and adjacent to a city or town that has a population of more than 50,000 inhabitants, and any area that has been determined to be “rural in character” by the Under Secretary for Rural Development, as or otherwise identified in this definition.

(1) An area that is attached to the urbanized area of a city or town with more than 50,000 inhabitants by a contiguous area of urbanized census blocks that is not more than 2 census blocks wide. Applicants from such an area should work with their Rural Development State Office to request a determination of whether their project is located in a rural area under this provision.

(2) For the purposes of this definition, cities and towns are incorporated population centers with definite boundaries, local self government, and legal powers set forth in a charter granted by the State.

(3) For the Commonwealth of Puerto Rico, the island is considered rural and eligible for Business Programs assistance, except for the San Juan Census Designated Place (CDP) and any other CDP with greater than 50,000 inhabitants. CDPs with greater than 50,000 inhabitants, other than the San Juan CDP, may be determined to be eligible if they are “not urban in character.”

(4) For the State of Hawaii, all areas within the State are considered rural and eligible for Business Programs assistance, except for the Honolulu CDP within the County of Honolulu.

(5) For the purpose of defining a rural area in the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands, the Agency shall determine what constitutes rural and rural area based on available population data.

(6) The determination that an area is “rural in character” will be made by the Under Secretary of Rural Development. The process to request a determination under this provision is outlined in paragraph (6)(ii) of this definition.

(i) The determination that an area is “rural in character” under this definition will apply to areas that are within:

(A) An urbanized area that has two points on its boundary that are at least 40 miles apart, which is not contiguous or adjacent to a city or town that has a population of greater than 150,000 inhabitants or the urbanized area of such a city or town; or

(B) An urbanized area contiguous and adjacent to a city or town of greater than 50,000 inhabitants that is within one-quarter mile of a rural area.

(ii) Units of local government may petition the Under Secretary of Rural Development for a “rural in character” designation by submitting a petition to both the appropriate Rural Development State Director and the Administrator on behalf of the Under Secretary. The petition shall document how the area meets the requirements...
of paragraph (6)(i)(A) or (B) of this definition and discuss why the petitioner believes the area is “rural in character,” including, but not limited to, the area’s population density, demographics, and topography and how the local economy is tied to a rural economic base. Upon receiving a petition, the Under Secretary will consult with the applicable Governor or leader in a similar position and request comments to be submitted within 5 business days, unless such comments were submitted with the petition. The Under Secretary will release to the public a notice of a petition filed by a unit of local government not later than 30 days after receipt of the petition by way of publication in a local newspaper and posting on the Agency’s Web site, and the Under Secretary will make a determination not less than 15 days, but no more than 60 days, after the release of the notice. Upon a negative determination, the Under Secretary will provide to the petitioner an opportunity to appeal the determination to the Under Secretary, and the petitioner will have 10 business days to appeal the determination and provide further information for consideration.

*Rural Energy for America Program Grant Agreement (Form RD 4280–2) or successor form.* An agreement between the Agency and the grantee setting forth the provisions under which the grant will be administered.

**Simple payback.** The estimated simple payback of a project funded under this subpart as calculated using paragraph (1), (2), or (3), as applicable, of this definition.

(1) For energy generation projects, simple payback is calculated as follows:

\[
\text{Simple payback} = \frac{(\text{Total Project Costs (including REAP Grant)})}{(\text{Average Net Income} + \text{Interest Expense} + \text{Depreciation Expense (for the project))}}
\]

(A) Average net income:

(i) Is based on all energy related revenue streams which include monetary benefits from Production Tax Credit (PTC), Renewable Energy Credit, Carbon Credits, revenue from byproducts produced by the energy system, fair market value of byproducts produced by and used in the project or related enterprises, and other incentives that can be annualized.

(ii) Is based on income remaining after all project obligations are paid (operating and maintenance), except interest and depreciation as noted above.

(C) Is based on the Agency’s review and acceptance of the project’s typical year income (which is after the project is operating and stabilized) projections at the time of application submittal.

(D) Does not allow Investment Tax Credits, State tax incentives, or other one-time construction and investment related benefits that cannot be annualized to be included as income or reduce total eligible project costs.

(2) For energy replacement and energy efficiency improvement projects, simple payback is calculated as follows:

\[
\text{Simple payback} = \frac{(\text{Total Project Costs (including REAP Grant)})}{(\text{Dollar Value of Energy Generated or Saved (as applicable))}}
\]

(B) Dollar value of energy generated or saved incorporates the following:

(A) All energy related revenue streams, which include monetary benefits from PTC, Renewable Energy Credit, Carbon Credits, revenue from byproducts produced by the energy system, and other monetary incentives that can be annualized.

(B) Energy saved or replaced shall be calculated on the quantity of energy saved or replaced (e.g., BTU) and converted to a monetary value using a constant value or price of energy as determined under paragraph (2)(d)(ii)(B)(3) of this definition.

(1) The actual total quantity of energy used (BTU) in the original building and equipment in the 12 months prior to the RES or EEI project application.

(2) Projected energy usage after the RES or EEI project shall be the projected total quantity of energy used (BTU) on an annual basis for the same size or capacity as the original building or equipment. For energy efficiency improvement to equipment, if the new piece of equipment has a different capacity than the piece of equipment being replaced, the projected total quantity of energy used for the new piece of equipment shall be adjusted.
based on the ratio of the capacity of the replaced piece of equipment to the capacity of the new piece of equipment.

(3) Value or price of energy shall be the actual average price paid over the last year and used as a constant for all calculations of the value of energy.

(C) Does not allow energy efficiency improvements to monetize benefits other than the dollar amount of the energy savings the agricultural producer or rural small business realizes as a result of the improvement.

(D) Does not allow Investment Tax Credits, State tax incentives, or other one-time construction and investment related benefits that cannot be annualized to be included as income or reduce total project costs.

(3) For flexible fuel pumps, the calculation for simple payback is as follows:

(i) Simple payback = \frac{\text{Total Project Costs (including REAP Grant)}}{\text{Increase in Net Income + Interest Expense + Depreciation Expense (for the project)}}

(ii) Increase in income:

(A) Is based on all flexible fuel pump related net income (the projected increase in annual net income resulting by the installation of the project), which includes monetary benefits from Tax Credits and other credits or incentives that can be annualized.

(B) Is based on income remaining after all project obligations are paid (operating and maintenance), except interest and depreciation as noted above.

(C) Is based on the Agency’s review and acceptance of the project’s typical year income (which is after the project is operating and stabilized) projections at the time of application submittal.

(D) Does not allow State tax incentives or other one-time construction and investment related benefits that cannot be annualized to be included as income or reduce total eligible project costs.

Simplified application. An application that conforms to the criteria and procedures specified in § 4280.114.

Small business. An entity is considered a small business in accordance with the Small Business Administration’s (SBA) small business size standards by the North American Industry Classification System (NAICS) found in 13 CFR part 121. A private entity, including a sole proprietorship, partnership, corporation, cooperative (including a cooperative qualified under section 501(c)(12) of the Internal Revenue Code), and an electric utility, including a Tribal or governmental electric utility, that provides service to rural consumers on a cost-of-service basis without support from public funds or subsidy from the Government authority establishing the district, provided such utilities meet SBA’s definition of small business. These entities must operate independent of direct Government control except for Tribal business entities formed as Section 17 Corporations as determined by the Secretary of the Interior or other Tribal business entities that have similar structures and relationships with their Tribal governments as determined by the Agency. The Agency shall determine the small business status of such a Tribal entity without regard to the resources of the Tribal government. With the exception of the entities described above, all other non-profit entities are excluded.

Small hydropower. A hydropower project for which the rated power of the system is 30 megawatts or less.

Small solar, electric. Small solar electric projects are those for which the rated power of the system is 10kW or smaller. Small solar electric projects are either stand-alone (off grid) or interconnected to the grid at less than 600 volts (on grid).

Small solar, thermal. Small solar thermal projects are those for which the rated storage volume of the system is 240 gallons or smaller or that have a collector area of 1,000 square feet or less.

Small wind system. Wind energy system for which the rated power of the wind turbine is 100kW or smaller and with a generator hub height of 120 feet or less. A small wind system is either stand-alone or connected to the local electrical system at less than 600 volts.

Spreadsheet. A table containing data from a series of financial statements of a business over a period of time. Financial statement analysis normally contains spreadsheets for balance sheets and income statements and may include cash flow statement data and
commonly used ratios. The spreadsheets enable a reviewer to easily scan the data, spot trends, and make comparisons.

**State.** Any of the 50 states of the United States, the Commonwealth of Puerto Rico, the District of Columbia, the U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

**Total project costs.** The sum of all costs associated with a completed project.

**Used equipment.** Any equipment that has been used in any previous application and is provided in an “as is” condition.

**Very small business.** A business with fewer than 15 employees and less than $1 million in annual receipts.

§ 4280.104 Exception authority.

The Administrator may, with the concurrence of the Secretary of Agriculture, make an exception, on a case-by-case basis, to any requirement or provision of this subpart that is not inconsistent with any authorizing statute or applicable law, if the Administrator determines that application of the requirement or provision would adversely affect the Federal government’s interest.

§ 4280.105 Appeals.

Only the grantee, borrower, lender, or holder can appeal an Agency decision made under this subpart. In cases where the Agency has denied or reduced the amount of final loss payment to the lender, the adverse decision may be appealed by the lender only. An adverse decision that only impacts the holder may be appealed by the holder only. A decision by a lender adverse to the interest of the borrower is not a decision by the Agency, whether or not concurred in by the Agency. An adverse decision regarding a grant application may be appealed by the applicant only. Appeals will be handled in accordance with 7 CFR part 11 of this title.

§ 4280.106 Conflict of interest.

(a) No conflict of interest or appearance of conflict of interest will be allowed. For purposes of this subpart, conflict of interest includes, but is not limited to, distribution or payment of grant and guaranteed loan funds or award of project contracts to an individual owner, partner, stockholder, or beneficiary of the applicant or borrower or a close relative of such an individual when such individual will retain any portion of the ownership of the applicant or borrower.

(b) No member of or delegate to Congress shall receive any share or part of this grant or any benefit that may arise there from; but this provision shall not be construed to bar as a contractor under the grant a publicly held corporation whose ownership might include a member of Congress.

§ 4280.107 USDA Departmental Regulations.

All projects funded under this subpart are subject to the provisions of the Departmental regulations (7 CFR subtitle A), as applicable.

§ 4280.108 Laws that contain other compliance requirements.

(a) Equal employment opportunity. For all construction contracts and grants in excess of $10,000, the contractor must comply with Executive Order 11246, as amended by Executive Order 11375, and as supplemented by applicable Department of Labor regulations (41 CFR part 60). The applicant or the lender and borrower, as applicable, is responsible for ensuring that the contractor complies with these requirements.

(b) Equal opportunity and nondiscrimination. The Agency will ensure that equal opportunity and nondiscrimination requirements are met in accordance with the Equal Credit Opportunity Act and 7 CFR part 15d. Nondiscrimination in Programs and Activities Conducted by USDA. The Agency will not discriminate against applicants on the basis of race, color, religion, national origin, sex, marital status, or age (provided that the applicant has the capacity to contract); the fact that all or part of the applicant’s
income derives from any public assistance program; or the fact that the applicant has in good faith exercised any right under the Consumer Credit Protection Act. Lenders will comply with the requirements of the Equal Credit Opportunity Act (see 12 CFR part 202). Such compliance will be accomplished prior to loan closing.

(c) Civil rights compliance. Recipients of grants must comply with the Americans with Disabilities Act of 1990, Title VI of the Civil Rights Act of 1964, and Section 504 of the Rehabilitation Act of 1973. This may include collection and maintenance of data on the race, sex, and national origin of the recipient’s membership/ownership and employees. These data must be available to conduct compliance reviews in accordance with 7 CFR part 1901, subpart E, §1901.204 of this title. Grants will require one subsequent compliance review after the last disbursement of grant funds has been made, and the facility has been in full operation for 90 days.

(d) Americans with Disabilities Act (ADA). Guaranteed loans that involve the construction of or addition to facilities that accommodate the public and commercial facilities, as defined by the ADA, must comply with the ADA. The lender and borrower are responsible for compliance.

(e) Environmental analysis. Subpart G of part 1940 of this title outlines environmental procedures and requirements for this subpart. Prospective applicants are advised to contact the Agency to determine environmental requirements as soon as practicable after they decide to pursue any form of financial assistance directly or indirectly available through the Agency.

1. Any required environmental review must be completed by the Agency prior to the Agency obligating any funds.

2. The applicant will be notified of all specific compliance requirements, including, but not limited to, the publication of public notices, and consultation with State Historic Preservation Offices and the U.S. Fish and Wildlife Service.

3. A site visit by the Agency may be scheduled, if necessary, to determine the scope of the review.

4. The applicant taking any actions or incurring any obligations during the time of application or application review and processing that would either limit the range of alternatives to be considered or that would have an adverse effect on the environment, such as the initiation of construction, will result in project ineligibility.

(f) Executive Order 12898. When a project is proposed and financial assistance requested, the Agency will conduct a Civil Rights Impact Analysis (CRIA) with regards to environmental justice. The CRIA must be conducted and the analysis documented utilizing Form RD 2006-38, “Civil Rights Impact Analysis Certification.” This certification must be done prior to loan approval, obligation of funds, or other commitments of Agency resources, including issuance of a Letter of Conditions or Form RD 4279–3, whichever occurs first.

(g) Discrimination complaints. The regulations contained in 7 CFR part 1901, subpart E of this title apply to this program, with the exception of guaranteed loans. Any person or any specific class of person, believing they have been subjected to discrimination may file a complaint within 180 days of an alleged act of discrimination or from the time discrimination is known, or should have been known, with the USDA Director, Office of Adjudication, Room 3326–W, Whitten Building, 1400 Independence Avenue, SW., Washington, DC 20250–9410.

§ 4280.109 Ineligible applicants, borrowers, and owners.

Applicants, borrowers, and owners will be ineligible to receive funds under this subpart as discussed in paragraphs (a) and (b) of this section.

(a) If an applicant, borrower, or owner has an outstanding judgment obtained by the U.S. in a Federal Court (other than in the United States Tax Court), is delinquent in the payment of Federal income taxes, or is delinquent on a Federal debt, the applicant is not eligible to receive a grant or guaranteed loan until the judgment is paid in full or otherwise satisfied or the delinquency is resolved.
§ 4280.110 General applicant and application provisions.

(a) Complete applications. Applicants must submit complete applications in order to be considered. If an application is incomplete, the Agency will identify those parts of the application that are incomplete and provide a written explanation to the applicant for possible future resubmission. Upon receipt of a complete application by the appropriate Agency office and by the applicable application deadline, the Agency will complete its evaluation.

(b) Application withdrawal. During the period between the submission of an application and the execution of loan and/or grant award documents, the applicant must notify the Agency, in writing, if the project is no longer viable or the applicant no longer is requesting financial assistance for the project. When the applicant so notifies the Agency, the selection will be rescinded or the application withdrawn.

(c) Satisfactory progress. An applicant that has received one or more grants and/or guaranteed loans under this program must make satisfactory progress, as determined by the Agency, toward completion of any previously funded projects before the applicant will be considered for subsequent funding under this subpart.

§ 4280.111 Notifications.

(a) Eligibility. If an applicant is determined by the Agency to be eligible for participation, the Agency will notify the applicant or lender, as applicable, in writing. If the applicant or the project is ineligible, the Agency will inform the applicant or lender, as applicable, in writing of the decision, reasons therefore, and any appeal rights. No further evaluation of the application will occur.

(b) Ineligible applications. If an application is determined to be ineligible at any time, the Agency will inform the applicant in writing of the decision, reasons therefore, and any appeal rights. No further evaluation of the application will occur.

(c) Award. Each applicant will be notified of the Agency’s decision on their application.

RENEWABLE ENERGY SYSTEM AND ENERGY EFFICIENCY IMPROVEMENT GRANTS

§ 4280.112 Applicant eligibility.

To receive a RES or EEI grant under this subpart, an applicant must be an agricultural producer or rural small business, as defined in §4280.103.

§ 4280.113 Project eligibility.

For a renewable energy system or energy efficiency improvement project to be eligible to receive a RES or EEI grant under this subpart, the proposed project must meet each of the criteria, as applicable, in paragraphs (a) through (j), as applicable, of this section, and is subject to the limitations specified in paragraph (k) of this section.

(a) The project must be for the purchase of a renewable energy system or to make energy efficiency improvements. Energy efficiency improvements to existing renewable energy systems are eligible energy efficiency improvement projects.

(b) The project must be for a pre-commercial or commercially available, and replicable technology.

(c) The project must have technical merit, as determined using the procedures specified in §4280.117(b).

(d) The facility for which the project is being proposed must be located in a rural area, as defined in §4280.103, in a State if the type of applicant is a rural small business, or in a rural or non-rural area in a State if the type of applicant is an agricultural producer. If the agricultural producer’s facility is in a non-rural area, then the application can only be for renewable energy systems or energy efficiency improvements on integral components of or that are directly related to the facility, such as vertically integrated operations, and are part of and co-located with the agriculture production operation.

(e) The applicant must have a place of business in a State.
(f) The applicant must be the owner of the project and control the revenues and expenses of the project, including operation and maintenance. A third-party under contract to the owner may be used to control revenues and expenses and manage the operation and/or maintenance of the project.

(g) Sites must be controlled by the agricultural producer or rural small business for the financing term of any associated Federal loans or loan guarantees.

(h) Satisfactory sources of revenue in an amount sufficient to provide for the operation, management, maintenance, and debt service of the project must be available for the life of the project.

(i) For the purposes of this subpart, only hydropower projects with a rated power of 30 megawatts or less are eligible. The Agency refers to these hydropower sources as "small hydropower," which includes hydropower projects commonly referred to as "micro-hydropower" and "mini-hydropower."

(j) The project has demonstrated technical feasibility.

(k) No renewable energy system or energy efficiency improvement, or portion thereof, can be used for any residential purpose, including any residential portion of a farm, ranch, agricultural facility, or rural small business. However, an applicant may apply for funding for the installation of a second meter or provide certification in the application that any excess power generated by the renewable energy system will be sold to the grid and will not be used by the applicant for residential purposes.

§ 4280.114 Qualification for simplified applications.

When applying for a RES or EEI grant, applicants may qualify for the simplified application process. In order to use the simplified application process, each of the conditions specified in paragraphs (a)(1) through (a)(8) of this section must be met.

(a) Simplified application criteria.

(1) The applicant must be eligible in accordance with §4280.112.

(2) The project must be eligible in accordance with §4280.113.

(3) Total eligible project costs must be $200,000 or less.

(4) The proposed project must use commercially available renewable energy systems or energy efficiency improvements.

(5) Construction planning and performing development must be performed in compliance with §4280.119. The applicant or the applicant's prime contractor must assume all risks and responsibilities of project development.

(6) The applicant or the applicant's prime contractor is responsible for all interim financing.

(7) The proposed project is scheduled to be completed within 2 years after entering into a grant agreement. The Agency may extend this period if the Agency determines, at its sole discretion, that the applicant is unable to complete the project for reasons beyond the applicant's control.

(8) The applicant agrees not to request reimbursement from funds obligated under this program until after project completion, including all operational testing and certifications acceptable to the Agency.

(b) Application processing and administration.

(1) Application documents. Application documents shall be submitted in accordance with §4280.116 or, if applying for a combined grant and loan, also in accordance with §4280.165(c).

(2) Project development. Section 4280.119 applies, except as follows:

(i) Any grantee may participate in project development without direct compensation subject to the approval in writing by the prime contractor, provided that all applicable construction practices, manufacturer instructions, and all safety codes and standards are followed during construction and testing, and the work product meets all applicable manufacture specifications, and all applicable codes and standards. The prime contractor remains responsible for the overall successful completion of the project, including any work done by the grantee, or

(ii) A grantee who can demonstrate to the Agency that the grantee has the necessary experience and other resources to successfully complete the project may serve as the prime contractor/installer. Projects where the grantee serves as the prime contractor
will need to secure the services of an independent, professionally responsible, qualified consultant to certify testing specifications, procedures, and testing results.

(3) **Project completion.** The project is complete when the applicant has provided a written final project development, testing, and performance report acceptable to the Agency. Upon notification of receipt of an acceptable project completion report, the applicant may request grant reimbursement. The Agency reserves the right to observe the testing.

(4) **Insurance.** Section 4280.118 applies, except business interruption insurance is not required.

§ 4280.115 RES and EEI grant funding.

(a) The amount of grant funds that will be made available to an eligible RES or EEI project under this subpart will not exceed 25 percent of total eligible project costs. Eligible project costs are specified in paragraph (c) of this section.

(b) The applicant is responsible for securing the remainder of the total eligible project costs not covered by grant funds. The amount secured by the applicant must be the remainder of total eligible project costs.

(1) Without specific statutory authority, other Federal grant funds cannot be used to meet the matching fund requirement.

(2) Passive third-party equity contributions are acceptable for renewable energy system projects, including those that are eligible for Federal production tax credits, provided the applicant meets the requirements of §4280.112.

(c) Eligible project costs are only those costs associated with the items identified in paragraphs (c)(1) through (c)(10) of this section, as long as the items are an integral and necessary part of the renewable energy system or energy efficiency improvement.

(1) Post-application purchase and installation of equipment (new, refurbished, or remanufactured), except agricultural tillage equipment, used equipment, and vehicles.

(2) Post-application construction or improvements, except residential.

(3) Energy audits or assessments.

(4) Permit and license fees.

(5) Professional service fees, except for application preparation.

(6) Feasibility studies and Technical reports.

(7) Business plans.

(8) Retrofitting.

(9) Construction of a new energy efficient facility only when the facility is used for the same purpose, is approximately the same size, and, based on the energy assessment or audit, will provide more energy savings than improving an existing facility. Only costs identified in the energy assessment or audit for energy efficiency improvements are allowed.

(10) Energy efficiency improvements are limited to only improvements identified in the energy assessment or audit. Equipment identified by the assessment or audit to be replaced shall be replaced with equipment similar in capacity. If the energy efficiency improvement has a greater capacity than the existing equipment, the Agency will pro-rate the energy efficiency improvement’s total eligible project costs based on the capacity of the existing equipment. A calculation shall be performed by dividing the capacity of the existing equipment by the capacity of the proposed equipment to determine the percentage of the energy efficiency improvement’s eligible project costs that the Agency will use in determining the maximum grant assistance under this subpart (see example).

Example. A business plans to build a new production line with a capacity of 625 units per hour to replace an existing production line that produces 500 units per hour. The total project costs of the new production line is $20,000, of which $15,000 would otherwise qualify as eligible project costs. However, because the new production line has a greater production capacity than the existing line (625 units per hour versus 500 units per hour), only a portion of the $15,000 of otherwise eligible project costs that the Agency will use in determining the maximum grant assistance available. In this example, because the original capacity (500 units per hour) is 80 percent of the new capacity (625 units per hour), only 80 percent of the $15,000 of otherwise eligible project costs associated with the new production line (i.e., $12,000) will be considered as total eligible
§ 4280.116 Application and documentation.

The requirements in this section apply to RES and EEI grant applications under this subpart.

(a) General. To ensure that projects are accurately scored by the Agency, applicants are requested to number each evaluation criteria and include, in that section, its corresponding supporting documentation and calculations according to § 4280.117.

(1) One funding type applications. Only one type of funding application (grant-only, guaranteed loan-only, or guaranteed loan/grant combination) for each project can be submitted under this subpart per Federal fiscal year.

(2) Environmental information. Each application must include all environmental review documents with supporting documentation in accordance with 7 CFR part 1940, subpart G.

(3) Foreign technology. As stated in § 4280.113(b), projects must be for a pre-commercial or commercially available technology. The Agency’s position is that if the system is currently commercially available only outside the United States (U.S.), then applicants must provide authoritative evidence of the foreign operating history, performance, and reliability in order to address the proven operating history identified in the definition. “Commercial” applicants must provide evidence that professional service providers, trades, large construction equipment providers and labor are readily available domestically and familiar with installation procedures and practices, and spare parts and service are readily available in the U.S. to properly maintain and operate the system. All warranties must be valid in the U.S.

(4) Commercial application demonstration of pre-commercial technologies. In accordance with the definition of “pre-commercial” technology found in § 4280.103, technical and economic potential for commercial application must be demonstrated to the Agency. In order to demonstrate the system has emerged through research and development as well as the demonstration process, applicants must provide authoritative evidence of the operating history, performance, and reliability past completion of start-up, shake-down, and commissioning. Typically, and in line with financial and operating performance evaluation protocol, the documented operating history, which may be established domestically or outside the U.S., should provide performance data for a minimum of 12 months. The time period will address the economic and technical performance potential of the pre-commercial project cost to be financed under this subpart. The maximum grant award in this example would be $3,000, which is equal to $12,000 \times 25\%.

(d) The maximum amount of grant assistance to one individual or entity will not exceed $750,000 per Federal fiscal year. For those applicants that have not received a grant award during the previous 2 Federal fiscal years, additional points will be added to their priority score.

(e) Applications for renewable energy system grants will be accepted for a minimum grant request of $2,500 up to a maximum of $500,000.

(f) Applications for energy efficiency improvement grants will be accepted for a minimum grant request of $1,500 up to a maximum of $250,000.

(g) In determining the amount of a RES or EEI grant awarded, the Agency will take into consideration the following six criteria:

1. The type of renewable energy system to be purchased;
2. The estimated quantity of energy to be generated by the renewable energy system;
3. The expected environmental benefits of the renewable energy system;
4. The quantity of energy savings expected to be derived from the activity, as demonstrated by an energy audit;
5. The estimated period of time for the energy savings generated by the activity to equal the cost of the activity; and
6. The expected energy efficiency of the renewable energy system.

(h) Time limit. Unless otherwise agreed to by the Agency, any renewable energy system or energy efficiency improvement grant agreement under this subpart will terminate 2 years from the date the Agency signs the agreement.
technology, as defined in §4280.103. Lastly, in accordance with demonstrating the potential for commercial application, applicants must provide evidence that professional service providers, trades, large construction equipment providers, and labor are readily available domestically and sufficiently familiar with installation procedures and practices, and spare parts and service are available in the U.S. to properly maintain and operate the system. Any warranties have to be valid in the U.S.

(b) Grant application content. Applications and documentation for projects using the simplified application process, as described in §4280.114, must provide the required information organized pursuant to the Table of Contents in a chapter format presented in the order shown in paragraphs (b)(1) through (b)(8) of this section; paragraph (b)(4) of this section does not apply for projects using the simplified application process. Applications and documentation for projects not using the simplified application process must provide the required information organized pursuant to the Table of Contents in a chapter format presented in the order shown in paragraphs (b)(1) through (b)(8) of this section.

(1) Forms, certifications, and organizational documents. Each application must contain the items identified in paragraphs (b)(1)(i) through (b)(1)(iv) in this section.

(A) Project specific forms.

(B) Form SF–424, “Application for Federal Assistance.”

(C) Exhibit A–1 of RD Instruction 1940–Q, “Certification for Contracts, Grants and Loans,” required by 7 CFR 3018.110 if the grant exceeds $100,000.

(D) Form SF–LLL, “Disclosure of Lobbying Activities,” must be completed if the applicant or borrower has made or agreed to make payment using funds other than Federal appropriated funds to influence or attempt to influence a decision in connection with the application.

(E) AD–1047, “Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions.”

(F) Form RD 400–1, “Equal Opportunity Agreement.”

(G) Form RD 400–4, “Assurance Agreement.”

(H) Applicants and borrowers must provide a certification indicating whether or not there is a known relationship or association with an Agency employee.

(iii) Organizational documents. Except for sole proprietors, each applicant must submit, with the application, a copy of the legal organizational documents.

(iv) The applicant’s Dun and Bradstreet Data Universal Numbering System (DUNS) number (except for individuals).

(2) Table of Contents. Include page numbers for each component of the application in the table of contents. Begin pagination immediately following the Table of Contents.

(3) Project Summary. Provide a concise summary of the project proposal and applicant information, project purpose and need, and project goals that includes the following:

(i) Title. Provide a descriptive title of the project (identified on SF 424).

(ii) Applicant eligibility. Describe how each of the applicable criteria identified in §§4280.109 and 4280.112 is met.

(iii) Project eligibility. Describe how each of the criteria in §4280.113(a) through (j), as applicable, is met. Clearly state whether the application is for the purchase of a renewable energy system or to make energy efficiency improvements. The response to
§ 4280.113(a) must include a brief description of the system or improvement. This description must be sufficient to provide the reader with a frame of reference when reviewing the rest of the application. Additional project description information may be needed later in the application.

(iv) Operation description. Describe the applicant’s total farm/ranch/business operation and the relationship of the proposed project to the applicant’s total farm/ranch/business operation. Provide a description of the ownership of the applicant, including a list of individuals and/or entities with ownership interest, names of any corporate parents, affiliates, and subsidiaries, as well as a description of the relationship, including products, between these entities.

(v) Financial information for gross income or size determination. Provide financial information to allow the Agency to determine the agricultural producer’s percent of gross income derived from agricultural operations or the rural small business’ size, as applicable. All information submitted under this paragraph must be substantiated by authoritative records.

(A) Rural small businesses. Provide sufficient information to determine total annual receipts for and number of employees of the business and any parent, subsidiary, or affiliates at other locations. Voluntarily providing tax returns is one means of satisfying this requirement. The information provided must be sufficient for the Agency to make a determination of business size as defined by SBA.

(B) Agricultural producers. Provide the gross market value of your agricultural products, gross agricultural income, and gross nonfarm income of the applicant for the calendar year preceding the year in which you submit your application.

(4) Financial information. Financial information is required on the total operation of the agricultural producer/rural small business and its parent, subsidiary, or affiliates at other locations. All information submitted under this paragraph must be substantiated by authoritative records.

(i) Historical financial statements. Provide historical financial statements prepared in accordance with Generally Accepted Accounting Practices (GAAP) for the past 3 years, including income statements and balance sheets. If agricultural producers are unable to present this information in accordance with GAAP, they may instead present financial information for the past years in the format that is generally required by commercial agriculture lenders.

(ii) Current balance sheet and income statement. Provide a current balance sheet and income statement prepared in accordance with GAAP and dated within 90 days of the application. Agricultural producers should present financial information in the format that is generally required by commercial agriculture lenders.

(iii) Pro forma financial statements. Provide pro forma balance sheet at start-up of the agricultural producer’s/rural small business’ business that reflects the use of the loan proceeds or grant award; and 3 additional years, indicating the necessary start-up capital, operating capital, and short-term credit; and projected cash flow and income statements for 3 years supported by a list of assumptions showing the basis for the projections.

(5) Matching funds. Submit a spreadsheet identifying sources of matching funds, amounts, and status of matching funds. The spreadsheet must also include a directory of matching funds source contact information. Attach any applications, correspondence, or other written communication between applicant and matching fund source.

(6) Self-evaluation score. Self-score the project using the evaluation criteria in § 4280.117(c). To justify the score, submit the total score along with appropriate calculations and attached documentation, or specific cross-references to information elsewhere in the application.

(7) Renewable Energy System and Energy Efficiency Improvements Technical Report. A Technical Report must be submitted as part of the application to allow the Agency to determine the overall technical merit of the renewable energy system or energy efficiency improvement project.

(i) Simplified applications. Simplified applications, which are submitted for
renewable energy system projects or energy efficiency improvement projects with total eligible project costs of $200,000 or less, must include a Technical Report prepared in accordance with the requirements specified in paragraphs (b)(7)(i)(A) through (b)(7)(i)(C) of this section.

(A) The Technical Report must be prepared in accordance with Appendix A, C, or D, as applicable, of this subpart. If a renewable energy system project does not fit one of the technologies identified in Appendices A, C, and D, the applicant must submit a Technical Report in accordance with paragraph (b)(7)(ii) of this section. The information in all Technical Reports must be of sufficient detail to allow the Agency to score the project and evaluate its technical feasibility.

(B) Either an energy assessment or an energy audit is required for energy efficiency improvement projects. For energy efficiency improvement projects with total eligible project costs greater than $50,000, an energy audit must be conducted; it must be conducted by or reviewed and certified by an energy auditor. For energy efficiency improvement projects with total eligible project costs of $50,000 or less, an energy assessment or an energy audit may be conducted by either an energy assessor or an energy auditor.

(C) Technical Reports prepared prior to the applicant’s selection of a prime contractor may be modified after selection, pursuant to input from the prime contractor, and submitted to the Agency, provided the overall scope of the project is not materially changed as determined by the Agency. Changes in the report must be accompanied by an updated Form RD 1940–20.

(ii) Full applications. Full applications, which must be submitted for applications for renewable energy system projects or energy efficiency improvement projects with total eligible project costs greater than $200,000, must include a Technical Report prepared in accordance with Appendix B, C, or D, as applicable, of this subpart and with paragraphs (b)(7)(i)(A) through (b)(7)(i)(G) of this section, as applicable.

(A) The Technical Report must demonstrate that the renewable energy system or energy efficiency improvement project can be installed and perform as intended in a reliable, safe, cost-effective, and legally compliant manner.

(B) Either an energy assessment or an energy audit is required for energy efficiency improvement projects. For energy efficiency improvement projects with total eligible project costs greater than $50,000, an energy audit must be conducted; it must be conducted by or reviewed and certified by an energy auditor. For energy efficiency improvement projects with total eligible project costs of $50,000 or less, an energy assessment or an energy audit may be conducted by either an energy assessor or an energy auditor.

(C) For renewable energy system projects with total eligible project costs greater than $400,000 and for energy efficiency improvement projects with total eligible project costs greater than $200,000, the design review, installation monitoring, testing prior to commercial operation, and project completion certification will require the services of a licensed professional engineer (PE) or team of licensed PEs.

(D) For projects with total eligible project costs greater than $1,200,000, the Technical Report must be reviewed and include an opinion and recommendation by an independent qualified consultant.

(E) Technical Reports prepared prior to the applicant’s selection of a final design, equipment vendor, or prime contractor, or other significant decision may be modified and resubmitted to the Agency, provided the overall scope of the project is not materially changed as determined by the Agency. Changes in the Technical Report must be accompanied by an updated Form RD 1940–20.

(F) All information provided in the Technical Report will be evaluated against the requirements provided in Appendix B, C, or D, as applicable, of this subpart. Any Technical Report not prepared in the following format and in accordance with Appendix B, C, or D, where applicable, will be penalized under scoring for technical merit.
(G) All Technical Reports shall follow the outline presented below and shall contain the information described in paragraphs (b)(7)(ii)(G)(1) through (b)(7)(ii)(G)(10) of this section and Appendix B, C, or D, as applicable, of this subpart if the technology is identified in Appendix B, C, or D for the particular project. If none of the Technical Reports in Appendix B apply to the proposed technology, the applicant may submit a Technical Report that conforms to the overall outline and subjects specified in paragraph (b)(7)(ii)(G) of this section. For Technical Reports prepared for technologies not identified in Appendices B, C, and D, the Agency will review the reports and notify, in writing, the applicant of the changes to the report required in order for the Agency to accept the report.

(1) Qualifications of the project team. Describe the project team, their professional credentials, and relevant experience. The description must support that the project team service, equipment, and installation providers have the necessary professional credentials, licenses, certifications, or relevant experience to develop the proposed project.

(2) Agreements and permits. Describe the necessary agreements and permits required for the project and the anticipated schedule for securing those agreements and permits. For example, interconnection agreements and purchase power agreements are necessary for all renewable energy projects electrically interconnected to the utility grid. The applicant must demonstrate that the applicant is familiar with the regulations and utility policies and that these arrangements will be secured in a reasonable timeframe.

(3) Energy or resource assessment. Describe the quality and availability of the renewable resource, and an assessment of expected energy savings through the deployment of the proposed system or increased production created by the system.

(4) Design and engineering. Describe the intended purpose of the project and the design, engineering, testing, and monitoring needed for the proposed project. The description must support that the system will be designed, engineered, tested, and monitored so as to meet its intended purpose, ensure public safety, and comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, the applicant must identify all the major equipment that is proprietary equipment and justify how this unique equipment is needed to meet the requirements of the proposed design.

(5) Project development. Describe the overall project development method, including the key project development activities and the proposed schedule for each activity. The description must identify each significant historical and projected activity, its beginning and end, and its relationship to the time needed to initiate and carry the activity through to successful project completion. The description must address applicant project development cash flow requirements. Details for equipment procurement and installation shall be addressed in paragraphs (b)(7)(ii)(G)(7) and (b)(7)(ii)(G)(8) of this section.

(6) Project economic assessment. Describe the financial performance of the proposed project. The description must address project costs, energy savings, and revenues, including applicable investment and production incentives. Cost centers include, but are not limited to, administrative and general, fuel supply, operations and maintenance, product delivery and debt service. Revenues to be considered must accrue from the sale of energy, offset or savings in energy costs, byproducts, and green tags. Incentives to be considered must accrue from government entities.

(7) Equipment procurement. Describe the availability of the equipment required by the system. The description must support that the required equipment is available and can be procured and delivered within the proposed project development schedule.

(8) Equipment installation. Describe the plan for site development and system installation, including any special equipment requirements. In all cases,
the system or improvement must be installed in conformance with manufacturer’s specifications and design requirements, and comply with applicable laws, regulations, agreements, permits, codes, and standards.

(9) Operations and maintenance. Describe the operations and maintenance requirements of the system, including major rebuilds and component replacements necessary for the system to operate as designed over the design life. All systems or improvements must have a warranty. The warranty must cover and provide protection against both breakdown and a degradation of performance. The performance of the renewable energy system or energy efficiency improvement must be monitored and recorded as appropriate to the specific technology.

(10) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. The budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes must also be described.

(8) Business-level feasibility study for renewable energy systems. For each application for a renewable energy system project, with total eligible project costs greater than $200,000, a business-level feasibility study by an independent, qualified consultant will be required by the Agency for start-up businesses or existing businesses. An acceptable business-level feasibility study must conform to the requirements of an acceptable feasibility study as specified in Appendix E of this subpart.

§ 4280.117 Evaluation of RES and EEI grant applications.

(a) General review. The Agency will evaluate each RES and EEI application and make a determination as to whether the applicant is eligible, the proposed grant is for an eligible project, and the proposed grant complies with all applicable statutes and regulations.

(b) Technical merit. The Agency’s determination of a project’s technical merit will be based on the information provided by the applicant. The Agency may engage the services of other government agencies or other recognized industry experts in the applicable technology field, at its discretion, to evaluate and rate the application. The Agency may use this evaluation and rating to determine the level of technical merit of the proposed project. Projects that the Agency determines are without technical merit shall be deemed ineligible.

(c) Evaluation criteria. Agency personnel will score each application based on the evaluation criteria specified in paragraphs (c)(1) through (c)(10) of this section.

(1) Quantity of energy replaced, produced, or saved, and flexible fuel pumps. Points may only be awarded for energy replacement, energy savings, or energy generation, or for flexible fuel pumps. Points will not be awarded for more than one category.

(i) Energy replacement. If the proposed renewable energy system is intended primarily for self-use by the agricultural producer or rural small business and will provide energy replacement of greater than zero, but equal to or less than 25 percent, 5 points will be awarded; greater than 25 percent, but equal to or less than 50 percent, 10 points will be awarded; or greater than 50 percent, 15 points will be awarded. Energy replacement is to be determined by dividing the estimated quantity of renewable energy to be generated over a 12-month period by the estimated quantity of energy consumed over the same 12-month period during the previous year by the applicable energy application. The estimated quantities of energy must be converted to either British thermal units (BTUs), Watts, or similar energy equivalents to facilitate scoring. If the estimated energy produced equals more than 150 percent of the energy requirements of the applicable process(es), the project will be scored as an energy generation project.

(ii) Energy savings. If the estimated energy expected to be saved by the installation of the energy efficiency improvements will be from 20 percent up to, but not including 30 percent, 5 points will be awarded; 30 percent up to, but not including 35 percent, 10 points will be awarded; or, 35 percent or greater, 15 points will be awarded. Energy savings will be determined by
the projections in an energy assessment or audit. Projects with total eligible project costs of $50,000 or less that opt to obtain a professional energy audit will be awarded an additional 5 points.

(iii) Energy generation. If the proposed renewable energy system is intended primarily for production of energy for sale, 10 points will be awarded.

(iv) Flexible fuel pump(s). (A) If the proposed project is for one or more flexible fuel pumps, points will be awarded based on the overall percentage of proposed flexible fuel pumps to the applicant’s total retail pump inventory at the facility. The percentage of proposed flexible fuel pumps shall be calculated using the following equation.

Equation: \[ FFP\% = \frac{FFPx}{TP} \times 100 \]
where:
\( FFP\% \) = Proposed flexible fuel pump(s), percentage.
\( FFPx \) = Number of proposed flexible fuel pumps to be installed at applicant’s facility.
\( TP \) = Number of proposed pumps to be installed plus the number of pumps installed and operating at the facility.

(B) If the proposed flexible fuel pump percentage calculated is 5 percent or below, 5 points will be awarded; above 5 percent and up to, but not including, 10 percent, 10 points will be awarded; or 10 percent and above, 15 points will be awarded.

(2) Environmental benefits. If the purpose of the proposed system contributes to the environmental goals and objectives of other Federal, State, or local programs, 10 points will be awarded. Points will only be awarded for this paragraph if the applicant is able to provide documentation from an appropriate authority supporting this claim.

(3) Commercial availability. If the proposed system or improvement is commercially available and replicable, 5 points will be awarded. If the proposed system or improvement is commercially available and replicable and is also provided with a 5-year or longer warranty providing the purchaser protection against system degradation or breakdown or component breakdown, 10 points will be awarded.

(4) Technical Merit. The Technical Merit of each project will be determined using the procedures specified in paragraphs (c)(4)(i) and (c)(4)(ii) of this section. The procedures specified in paragraph (c)(4)(i) will be used to score paragraphs (c)(4)(i)(A) through (c)(4)(i)(J) of this section. The final score awarded will be calculated using the procedures described in paragraph (c)(4)(ii) of this section.

(i) Technical merit. Each subparagraph has its own maximum possible score and will be scored according to the following criteria: If the description in the subparagraph has no significant weaknesses and exceeds the requirements of the subparagraph, 100 percent of the total possible score for the subparagraph will be awarded. If the description meets the basic requirements of the subparagraph, but also has several weaknesses, 60 percent of the points will be awarded. If the description is lacking in one or more critical aspects, key issues have not been addressed, but the description demonstrates some merit or strengths, 40 percent of the total possible score will be awarded. If the description has serious deficiencies, internal inconsistencies, or is missing information, 20 percent of the total possible score will be awarded. If the description has no merit in this area, 0 percent of the total possible score will be awarded. The total possible points for Technical Merit is 35 points.

(A) Qualifications of the project team (maximum score of 10 points). The applicant has described the project team service providers, their professional credentials, and relevant experience. The description supports that the project team service, equipment, and installation providers have the necessary professional credentials, licenses, certifications, or relevant experience to develop the proposed project.

(B) Agreements and permits (maximum score of 5 points). The applicant has described the necessary agreements and permits required for the project and the schedule for securing those agreements and permits.
(C) Energy or resource assessment (maximum score of 10 points). The applicant has described the quality and availability of a suitable renewable resource or an assessment of expected energy savings for the proposed system.

(D) Design and engineering (maximum score of 30 points). The applicant has described the design, engineering, and testing needed for the proposed project. The description supports that the system will be designed, engineered, and tested so as to meet its intended purpose, ensure public safety, and comply with applicable laws, regulations, agreements, permits, codes, and standards.

(E) Project development schedule (maximum score of 5 points). The applicant has described the development method, including the key project development activities and the proposed schedule for each activity. The description identifies each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through to successful completion. The description addresses grantee or borrower project development cash flow requirements.

(F) Project economic assessment (maximum score of 20 points). The applicant has described the financial performance of the proposed project, including the calculation of simple payback. The description addresses project costs and revenues, such as applicable investment and production incentives, and other information to allow the assessment of the project’s cost effectiveness.

(G) Equipment procurement (maximum score of 5 points). The applicant has described the availability of the equipment required by the system. The description supports that the required equipment is available, and can be procured and delivered within the proposed project development schedule.

(H) Equipment installation (maximum score of 5 points). The applicant has described the plan for site development and system installation.

(I) Operation and maintenance (maximum score of 5 points). The applicant has described the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life.

(J) Dismantling and disposal of project components (maximum score of 5 points). The applicant has described the requirements for dismantling and disposing of project components at the end of their useful life and associated wastes.

(ii) Calculation of Technical Merit Score. To determine the actual points awarded a project for Technical Merit, the following procedure will be used: The score awarded for paragraphs (c)(4)(i)(A) through (c)(4)(i)(J) of this section will be added together and then divided by 100, the maximum possible score, to achieve a percentage. This percentage will then be multiplied by the total possible points of 35 to achieve the points awarded for the proposed project for Technical Merit.

(5) Readiness. If the applicant has written commitments from the source(s) confirming commitment of 50 percent up to but not including 75 percent of the matching funds prior to the Agency receiving the complete application, 5 points will be awarded. If the applicant has written commitments from the source(s) confirming commitment of 75 percent up to but not including 100 percent of the matching funds prior to the Agency receiving the complete application, 10 points will be awarded. If the applicant has written commitments from the source(s) of matching funds confirming commitment of 100 percent of the matching funds prior to the Agency receiving the complete application, 15 points will be awarded.

(6) Small agricultural producer/very small business. If the applicant is an agricultural producer producing agricultural products with a gross market value of less than $600,000 in the preceding year, 5 points will be awarded. If the applicant is an agricultural producer producing agricultural products with a gross market value of less than $200,000 in the preceding year or is a very small business, as defined in §4280.103, 10 points will be awarded.

(7) Simplified application/low cost projects. If the applicant is eligible for and uses the simplified application process or the project has total eligible project costs of $200,000 or less, 5 points will be awarded.
(8) Previous grantees and borrowers. If an applicant has not been awarded a grant or loan under this program within the 2 previous Federal fiscal years, 5 points will be awarded.

(9) Simple payback. A maximum of 15 points will be awarded for either renewable energy systems or energy efficiency improvements; points will not be awarded for more than one category. In either case, points will be awarded based on the simple payback of the project.

(i) Renewable energy systems, including flexible fuel pumps. If the simple payback of the proposed project is:
   (A) Less than 10 years, 15 points will be awarded;
   (B) 10 years up to but not including 15 years, 10 points will be awarded;
   (C) 15 years up to and including 20 years, 5 points will be awarded; or
   (D) Longer than 20 years, no points will be awarded.

(ii) Energy efficiency improvements. If the simple payback of the proposed project is:
   (A) Less than 4 years, 15 points will be awarded;
   (B) 4 years up to but not including 8 years, 10 points will be awarded;
   (C) 8 years up to and including 12 years, 5 points will be awarded; or
   (D) Longer than 12 years, no points will be awarded.

(10) State Director and Administrator priorities and points. A State Director, for its State allocation under this subpart, or the Administrator, for making awards from the National Office reserve, may award up to 10 points to an application if the application is for an under-represented technology or for flexible fuel pumps or if selecting the application would help achieve geographic diversity. In no case shall an application receive more than 10 points under this criterion.

§ 4280.118 Insurance requirements.

Agency approved insurance coverage must be maintained for the life of the RES or EEI grant unless this requirement is waived or modified by the Agency in writing.

(a) National flood insurance is required in accordance with 7 CFR part 1806, subpart B, of this title, if applicable.

(b) Business interruption insurance is required except for projects with total eligible project costs of $200,000 or less.

§ 4280.119 Construction planning and performing development.

The requirements of this section apply for planning, designing, bidding, contracting, and constructing renewable energy systems and energy efficiency improvement projects as applicable. For contracts of $200,000 or less, the simple contract method, as specified in paragraph (g) of this section, may be used. Contracts greater than $200,000 shall use the contract method specified in paragraph (g) of this section.

(a) Technical services. Applicants are responsible for providing the engineering, architectural, and environmental services necessary for planning, designing, bidding, contracting, inspecting, and constructing their facilities. Services may be provided by the applicant’s “in-house” engineer or architect or through contract, subject to Agency concurrence. Engineers and architects must be licensed in the State where the facility is to be constructed.

(b) Design policies. Facilities funded by the Agency will meet the requirements of §1780.57(b), (c), (d), and (o) of this title. Final plans and specifications must be reviewed by the Agency and approved prior to the start of construction.

(c) Owners accomplishing work. In some instances, owners may wish to perform a part of the work themselves. For an owner to perform project development work, the owner must meet the experience requirements of §1780.67 of this title. For an owner to provide a portion of the work, with the remainder to be completed by a contractor, a clear understanding of the division of work must be established and delineated in the contract. In such cases, the contractor will be required to inspect the owner’s work and accept it. Owners are not eligible for payment for their own work as it is not an eligible project cost. See §4280.115(c) of this subpart for further details on eligible project costs.

(d) Equipment purchases. Equipment purchases of less than $200,000 will not require a performance and payment
bond, unless required by the applicant, as long as the contract purchase is a lump sum payment and the manufacturer provides the required warranties on the equipment as outlined in paragraph (i) in the applicable section found in Appendices A, B, C, and D of this subpart. Payment shall be certified by copies of the Manufacturer’s paid invoices and warranty documents.

(e) Simple contract method. The simple contract method may be used for small projects with a contract not greater than $200,000. In smaller projects, Agency funds will typically be used to reimburse project costs upon completion of the work as a lump sum payment. Partial payments will be made in accordance with Form RD 4280–2 and Form RD 1924–6, “Construction Contract,” or other Agency approved contract. All construction work will be performed under a written contract, as described below. A design/build method, where the same person or entity provides design and engineering work, as well as construction or installation, may be used under this method.

(1) Contracting requirements threshold. For contracts above $100,000, certain Federal requirements, including surety, must be met. An attachment to the contract may be used to incorporate language for these requirements.

(2) Forms used. Form RD 1924–6 or other Agency approved contract must be used. Other contracts must be approved by the Agency and may be used only if they are customarily used in the area and protect the interest of the applicant and the Government with respect to compliance with items such as the drawings, specifications, payments for work, inspections, completion, non-discrimination in construction work and acceptance of the work. The Agency will not become a party to a construction contract or incur any liability under it. No contract shall become effective until concurred in writing by the Agency. Such concurrence statement shall be attached to and made a part of the contract.

(3) Contract provisions. Contracts will have a listing of attachments and the minimum provisions of the contract will include:

(i) The contract sum;
(ii) The dates for starting and completing the work;
(iii) The amount of liquidated damages to be charged;
(iv) The amount, method, and frequency of payment;
(v) Whether or not surety bonds will be provided. If not, a latent defects bond may be required, as described in paragraph (e)(4) of this section;
(vi) The requirement that changes or additions must have prior written approval of the Agency; and
(vii) The warranty period to be provided in accordance with Appendices A and B, sections 1 through 10, paragraph (i)(1) and in Appendices C and D, paragraph (i)(1).

(4) Surety. Surety per 7 CFR part 1780, subpart C, §1780.75(c) of this title will be required, and made a part of the contract, if the applicant requests it, or if the contractor requests partial payments for construction work. If the contractor will receive a lump sum payment at the end of work, the Agency will not require surety. In such cases where no surety is provided and the project involves pre-commercial technology, first of its type in the U.S., or new designs without sufficient operating hours to prove their merit, a latent defects bond may be required to cover the work.

(5) Equal opportunity. Section 1901.205 of 7 CFR part 1901, subpart E of this title applies to all financial assistance involving construction contracts and subcontracts in excess of $10,000. Language for this requirement is included in Form RD 1924–6. If this form is not used, such language must be made a part of the Agency approved contract.

(6) Obtaining bids and selecting a contractor.

(i) The applicant may select a contractor and negotiate a contract or contact several contractors and request each to submit a bid. The applicant will provide a statement to the Agency describing the process for obtaining the bid(s) and what alternatives were considered.

(ii) When a price has already been negotiated by an applicant and a contractor, the Agency will review the proposed contract. If the contractor is qualified to perform the development and provide a warranty of the work and
the price compares favorably with the cost of similar construction in the area, further negotiation is unnecessary. If the Agency determines the price is too high or otherwise unreasonable, the applicant will be required to negotiate further with the contractor. If a reasonable price cannot be negotiated or if the contractor is not qualified, the applicant will be required to negotiate with another contractor.

(iii) When an applicant has proposed development with no contractor in mind, competition will be required. The applicant must obtain bids from as many qualified contractors, dealers, or trades people as feasible depending on the method and type of construction.

(iv) If the award of the contract is by competitive bidding, Form RD 1924–5, “Invitation for Bid (Construction Contract),” or another similar Agency approved invitation bid form containing the requirements of subpart E of part 1901 of this title may be used. All contractors from whom bids are requested should be informed of all conditions of the contract, including the time and place of opening bids. Conditions shall not be established which would give preference to a specific bidder or type of bidder. When applicable, copies of Forms RD 1924–6 and RD 400–6, “Compliance Statement,” also should be provided to the prospective bidders.

(f) Design/build contracts. The design/build method, where the same person or entity provides design and engineering work, as well as construction or installation, may be used with Agency written approval. If the design/build contract amount is $200,000 or less, development and contracting will follow paragraph (e) of this section. If the design/build contract amount is greater than $200,000, Agency prior concurrence must be obtained as described below, and the remaining requirements of this section apply.

(1) Concurrence information. The applicant will request Agency concurrence by providing the Agency at least the information specified in paragraphs (f)(1)(i) through (f)(1)(viii) of this section.

(i) The owner’s written request to use the design/build method with a description of the proposed method.

(ii) A proposed scope of work describing in clear, concise terms the technical requirements for the contract. It should include a nontechnical statement summarizing the work to be performed by the contractor and the results expected, and a proposed construction schedule showing the sequence in which the work is to be performed.

(iii) A proposed firm-fixed-price contract for the entire project which provides that the contractor shall be responsible for any extra cost which may result from errors or omissions in the services provided under the contract, as well as compliance with all Federal, State, and local requirements effective on the contract execution date.

(iv) Where noncompetitive negotiation is proposed, an evaluation of the contractor’s performance on previous similar projects in which the contractor acted in a similar capacity.

(v) A detailed listing and cost estimate of equipment and supplies not included in the construction contract but which are necessary to properly operate the facility.

(vi) Evidence that a qualified construction inspector who is independent of the contractor has or will be hired.

(vii) Preliminary plans and outline specifications. However, final plans and
specifications must be completed and reviewed by the Agency prior to the start of construction.  

(viii) The owner’s attorney’s opinion and comments regarding the legal adequacy of the proposed contract documents and evidence that the owner has the legal authority to enter into and fulfill the contract.

(2) Agency concurrence of design/build method. The Agency shall review the material submitted by the applicant. When all items are acceptable, the loan approval official will concur in the use of the design/build method for the proposal.

(3) Forms used. American Institute of Architects (AIA) contract forms between the owner and design-builder that are approved by the Agency should be used. Other Agency approved contract documents may be used provided they are customarily used in the area and protect the interest of the applicant and the Agency with respect to compliance with items such as the drawings, specifications, payments for work, inspections, completion, non-discrimination in construction work, and acceptance of the work. The Agency will not become a party to a construction contract or incur any liability under it. No contract shall become effective until concurred in writing by the Agency. Such concurrence statement shall be attached to and made a part of the contract.

(4) Contract provisions. Contracts will have a listing of attachments and shall meet the following requirements:

(i) The contract sum;

(ii) The dates for starting and completing the work;

(iii) The amount of liquidated damages, if any, to be charged;

(iv) The amount, method, and frequency of payment;

(v) Surety provisions that meet the requirements of §1780.75(c) of this title;

(vi) The requirement that changes or additions must have prior written approval of the Agency;

(vii) The warranty period to be provided in accordance with Appendices A and B, sections 1 through 10, paragraph (i) and Appendices C and D, paragraph (i);

(viii) Contract review and concurrence in accordance with §1780.61(b) of this title;

(ix) Owner’s contractual responsibility in accordance with §1780.68 of this title; and

(x) Further contract provisions concerning remedies, termination, surety, equal employment opportunity, anti-kickback, records, State energy conservation plan, change orders, Agency concurrence, retainage, and other compliance requirements must be met in accordance with 7 CFR part 1780, subpart C, §1780.75 of this title.

(5) Obtaining bids and selecting a contractor. The applicant may select a contractor based on competitive sealed bids, competitive negotiation, or non-competitive negotiation as described in §1780.72(b), (c), or (d) of this title.

(g) Contract method. If the contract amount is greater than $200,000 and is not of the design/build method, the following conditions must be met:

(1) Procurement method. Procurement method shall comply with the requirements of §§1780.72, 1780.75, and 1780.76 of this title.

(2) Forms used. The AIA Form A101, “Standard Form of Agreement Between Owner and Contractor,” or Engineering Joint Council Document Committee (EJCDC) Form C-521, “Suggested Form of Agreement Between Owner and Contractor (Stipulated Price) Funding Agency Edition,” should be used. Other Agency approved contract documents may be used provided they are customarily used in the area and protect the interest of the applicant and the Agency with respect to compliance with items such as the drawings, specifications, payments for work, inspections, completion, non-discrimination in construction work, and acceptance of the work. The Agency will not become a party to a construction contract or incur any liability under it. No contract shall become effective until concurred in writing by the Agency. Such concurrence statement shall be attached to and made a part of the contract.

(3) Contract provisions. Contracts will have a listing of attachments and shall meet the requirements of §1780.75 of this title and the following requirements:
§ 4280.121 Servicing grants.

(a) General. RES and EEI grants will be serviced in accordance with the Departmental Regulations, 7 CFR part 1951, subparts E and O of this title, and Form RD 4280–2.

(b) Change of contractor or vendor. After an award has been made, the recipient of the award can request to change a contractor or vendor if the technical merit score for the project remains the same or is higher. Prior to changing a contractor or vendor, the recipient must submit to the Agency a written request providing information that allows the Agency to re-score the project’s technical merit. If the Agency determines that the project achieves the same or higher technical merit score, the recipient may make the change. No additional funding will be available from the Agency if costs for the project have increased. If the Agency determines that the project does not achieve the same or higher technical merit score, the change will not be approved.

§ 4280.120 RES and EEI grantee requirements.

(a) A Letter of Conditions will be prepared by the Agency, establishing conditions that must be understood and agreed to by the applicant before any obligation of funds can occur. The applicant must sign Form RD 1942–46, “Letter of Intent to Meet Conditions” and Form RD 1940–1, “Request for Obligation of Funds,” if they accept the conditions of the grant.

(b) The applicant must complete, sign, and return the Form RD 4280–2. The grantee must abide by all requirements contained in Form RD 4280–2, this subpart, and any other applicable Federal statutes or regulations. Failure to follow these requirements may result in termination of the grant and adoption of other available remedies.

(c) Where applicable, the grantee shall provide to the Agency a copy of the executed power purchase agreement within 12 months from the date that the grant agreement is executed, unless otherwise approved by the Agency.
§ 4280.122 Borrower eligibility.

To receive a RES or EEI guaranteed loan under this subpart, a borrower must meet the criteria specified in §§ 4280.109 and 4280.112.

§ 4280.123 Project eligibility.

For a RES or EEI project to be eligible to receive a guaranteed loan under this subpart, the project must meet each of the criteria, as applicable, specified in § 4280.113(a) through (j). In addition, guaranteed loan funds may be used for necessary capital improvements to an existing renewable energy system.

§ 4280.124 Guaranteed loan funding.

(a) The amount of the loan that will be made available to an eligible project under this subpart will not exceed 75 percent of total eligible project costs. Eligible project costs are specified in paragraph (e) of this section.

(b) The minimum amount of a guaranteed loan made to a borrower will be $5,000, less any program grant amounts. The maximum amount of a guaranteed loan made to a borrower is $25 million.

(c) The percentage of guarantee, up to the maximum allowed by this section, will be negotiated between the lender and the Agency. The maximum percentage of guarantee is 85 percent for loans of $600,000 or less; 80 percent for loans greater than $600,000 up to and including $5 million; 70 percent for loans greater than $5 million up to and including $10 million; and 60 percent for loans greater than $10 million.

(d) The total amount of the loans guaranteed by the Agency under this program to one borrower, including the outstanding principal and interest balance of any existing loans guaranteed by the Agency under this program, and new loan request, must not exceed $25 million.

(e) Eligible project costs are only those costs associated with the items identified in paragraphs (e)(1) through (e)(12) of this section, as long as the items are an integral and necessary part of the renewable energy system or energy efficiency improvement.

1. Post-application purchase and installation of equipment (new, refurbished, or remanufactured), except agricultural tillage equipment, used equipment, and vehicles.

2. Post-application construction or improvements, except residential.

3. Energy audits or assessments.

4. Permit and license fees.

5. Professional service fees, except for application preparation.

6. Feasibility studies and technical reports.

8. Retrofitting.

9. Construction of a new energy efficient facility only when the facility is used for the same purpose, is approximately the same size, and, based on the energy assessment or audit, will provide more energy savings than improving an existing facility. Only costs identified in the energy assessment or audit for energy efficiency improvements are allowed.

10. Energy efficiency improvements are limited to only improvements identified in the energy assessment or audit. Equipment identified by the audit to be replaced shall be replaced with equipment similar in capacity. If the energy efficiency improvement has a greater capacity than the existing equipment, the Agency will pro-rate the energy efficiency improvement’s total eligible project costs based on the capacity of the existing equipment. A calculation shall be performed by dividing the capacity of the existing equipment by the capacity of the proposed equipment to determine the percentage of the energy efficiency improvement’s eligible project costs that the Agency will use in determining the maximum guaranteed loan assistance under this subpart (see example).

Example. A business plans to build a new production line with a capacity of 625 units per hour to replace an existing production line that produces 500 units per hour. The total project costs of the new production line is $20,000, of which $15,000 would otherwise qualify as eligible project costs. However, because the new production line has a greater production capacity than the existing line (625 units per hour versus 500 units per hour), only a portion of the $15,000 otherwise eligible project costs can be included in the eligible project costs.
costs would be used in determining total eligible project cost and the maximum guaranteed loan assistance available. In this example, because the original capacity (500 units per hour) is 80 percent of the new capacity (625 units per hour), only 80 percent of the $15,000 of otherwise eligible project costs associated with the new production line (i.e., $12,000) will be considered as total eligible project cost to be financed under this subpart. The maximum guaranteed loan award in this example would be $9,000, which is equal to $12,000 \times 75\%$.

(11) Working capital.
(12) Land acquisition.

(f) In determining the amount of a loan awarded, the Agency will take into consideration the following six criteria:

(1) The type of renewable energy system to be purchased;
(2) The estimated quantity of energy to be generated by the renewable energy system;
(3) The expected environmental benefits of the renewable energy system;
(4) The quantity of energy savings expected to be derived from the activity, as demonstrated by an energy audit;
(5) The estimated period of time it would take for the energy savings generated by the activity to equal the cost of the activity; and
(6) The expected energy efficiency of the renewable energy system.

§ 4280.125 Interest rates.

(a) The interest rate for the guaranteed loan will be negotiated between the lender and the applicant and may be either fixed or variable as long as it is a legal rate. The variable rate must be based on published indices, such as money market indices. In no case, however, shall the rate be more than the rate customarily charged borrowers in similar circumstances in the ordinary course of business. The interest rate charged is subject to Agency review and approval.

(b) Comply with § 4279.125(a), (b), and (d) of this chapter.

§ 4280.126 Terms of loan.

(a) The repayment term for a loan for:

(1) Real estate must not exceed 30 years;
(2) Machinery and equipment must not exceed 20 years, or the useful life, including major rebuilds and component replacement, whichever is less;
(3) Combined loans on real estate and equipment must not exceed 30 years; and
(4) Working capital loans must not exceed 7 years.

(b) The first installment of principal and interest will, if possible, be scheduled for payment after the project is operational and has begun to generate income.

(c) Payment terms must comply with § 4279.126(c) of this chapter.

(d) The maturity of a loan will be based on the use of proceeds, the useful life of the assets being financed, and the borrower’s ability to repay.

(e) All loans guaranteed through this program must be sound, with reasonably assured repayment.

(f) Guarantees must be provided only after consideration is given to the borrower’s overall credit quality and to the terms and conditions of renewable energy and energy efficiency subsidies, tax credits, and other such incentives.

(g) A principal plus interest repayment schedule is permissible.

§ 4280.127 Guarantee/annual renewal fee percentages.

(a) Fee ceilings. The maximum guarantee fee that may be charged is 1 percent. The maximum annual renewal fee that may be charged is 0.5 percent. The Agency will establish each year the guarantee fee and annual renewal fee and a notice will be published annually in the FEDERAL REGISTER.

(b) Guarantee fee. The guarantee fee will be paid to the Agency by the lender and is nonrefundable. The guarantee fee may be passed on to the borrower. The guarantee fee must be paid at the time the Loan Note Guarantee is issued.

(c) Annual renewal fee. The annual renewal fee will be calculated on the unpaid principal balance as of close of business on December 31 of each year. It will be calculated by multiplying the outstanding principal balance times the percent of guarantee times the annual renewal fee. The fee will be billed
§ 4280.128 Application and documentation.

The requirements in this section apply to guaranteed loan applications for RES and EEI projects under this subpart.

(a) General. Applications must be submitted in accordance with the requirements specified in §4280.116(a).

(b) Application content for guaranteed loans greater than $600,000. Applications and documentation for guaranteed loans greater than $600,000 must provide the required information organized pursuant to a Table of Contents in a chapter format presented in the order shown in paragraphs (b)(1) and (b)(2) of this section.

(1) Guaranteed loan application content.
   (i) Table of contents. Include page numbers for each component of the application in the table of contents. Begin pagination immediately following the Table of Contents.
   (ii) Project summary. Provide a concise summary of the proposed project and applicant information, project purpose and need, and project goals, including the following:
      (A) Title. Provide a descriptive title of the project.
      (B) Borrower eligibility. Describe how each of the criteria identified in §§4280.109 and 4280.112 is met.
      (C) Project eligibility. Describe how each of the criteria, as applicable, in §4280.113(a) through (j) is met. Clearly state whether the application is for the purchase of a renewable energy system (including making necessary capital improvements to an existing renewable energy system) or to make energy efficiency improvements. The response to §4280.113(a) must include a brief description of the system or improvement. This description is to provide the reader with a frame of reference for reviewing the rest of the application. Additional project description information will be needed later in the application.
      (D) Operation description. Describe the applicant’s total farm/ranch/business operation and the relationship of the proposed project to the applicant’s total farm/ranch/business operation as specified in §4280.116(b)(3)(iv).
   (iii) Financial information for gross income or size determination. Provide financial information to allow the Agency to determine the agricultural producer’s percent of gross income derived from agricultural operations or the rural small business’ size, as applicable, as specified in §4280.116(b)(3)(v).
   (iv) Matching funds. Submit a spreadsheet identifying sources, amounts, and status of matching funds as specified in §4280.116(b)(5).
   (v) Self-evaluation score. Self-score the project using the evaluation criteria in §4280.117(c) as specified in §4280.116(b)(6).
   (vi) Renewable energy and energy efficiency technical report. For both renewable energy system projects and energy efficiency improvement projects, submit a Technical Report in accordance with applicable provisions of Appendix B, C, or D, as applicable, of this subpart and as specified in §4280.116(b)(7)(ii). For loan requests in excess of $600,000, the services of a licensed PE or a team of licensed PE’s is required. If none of the Technical Reports in Appendices B, C, and D apply to the proposed technology, the applicant may submit a Technical Report that conforms to the overall outline and subjects specified in applicable provisions of §4280.116(b)(7)(ii)(A) through (G).
   (vii) Business-level feasibility study for renewable energy systems. For each application for a renewable energy system project submitted by a start-up or existing business, a business-level feasibility study by an independent qualified consultant will be required by the Agency. An acceptable business-level feasibility study must conform to the requirements of an acceptable feasibility study as specified in Appendix E of this subpart.

(b) Lender forms, certifications, and agreements. Each application submitted under paragraph (b)(1) of this section must contain applicable items described in paragraphs (b)(2)(i) through (b)(2)(xi) of this section.

(i) A completed Form RD 4279–1, “Application for Loan Guarantee.”
(ii) A personal credit report from an Agency approved credit reporting company for each owner, partner, officer, director, key employee, and stockholder owning 20 percent or more interest in the borrower’s business, except passive investors and those corporations listed on a major stock exchange.

(iv) Appraisals completed in accordance with § 4280.141. Completed appraisals should be submitted when the application is filed. If the appraisal has not been completed when the application is filed, the applicant must submit an estimated appraisal. In all cases, a completed appraisal must be submitted prior to the loan being closed.

(v) Commercial credit reports obtained by the lender on the borrower and any parent, affiliate, and subsidiary firms.

(vi) Current personal and corporate financial statements of any guarantors.

(vii) Financial statements as specified in § 4280.116(b)(4)(i) through (iii). Financial information is required on the total operation of the agricultural producer/rural small business and its parent, subsidiary, or affiliates at other locations. All information submitted under this paragraph must be substantiated by authoritative records.

(viii) Business-level feasibility study.

(ix) Lender’s complete comprehensive written analysis in accordance with § 4280.139.

(x) A certification by the lender that it has completed a comprehensive written analysis of the proposal, the borrower is eligible, the loan is for authorized purposes with technical merit, and there is reasonable assurance of repayment ability based on the borrower’s history, projections, equity, and the collateral to be obtained.

(xi) A proposed loan agreement or a sample loan agreement with an attached list of the proposed loan agreement provisions. The following requirements must be addressed in the proposed or sample loan agreement:

(A) Prohibition against assuming liabilities or obligations of others;

(B) Restriction on dividend payments;

(C) Limitation on the purchase or sale of equipment and fixed assets;

(D) Limitation on compensation of officers and owners;

(E) Minimum working capital or current ratio requirement;

(F) Maximum debt-to-net worth ratio;

(G) Restrictions concerning consolidations, mergers, or other circumstances;

(H) Limitations on selling the business without the concurrence of the lender;

(I) Repayment and amortization of the loan;

(J) List of collateral and lien priority for the loan, including a list of persons and corporations guaranteeing the loan with a schedule for providing the lender with personal and corporate financial statements. Financial statements for corporate and personal guarantors must be updated at least annually once the guarantee is provided;

(K) Type and frequency of financial statements to be required from the borrower for the duration of the loan;

(L) The addition of any requirements imposed by the Agency in Form RD 4279–3;

(M) A reserved section for any Agency environmental requirements; and

(N) A provision for the lender or the Agency to have reasonable access to the project and its performance information during its useful life or the term of the loan, whichever is longer, including the periodic inspection of the project by a representative of the lender or the Agency.

(c) Application content for guaranteed loans of $600,000 or less. Applications and documentation for guaranteed loans $600,000 or less must comply with paragraphs (c)(1) and (c)(2) of this section.

(1) Application Contents. Applications and documentation for guaranteed loans $600,000 or less must provide the required information organized pursuant to a Table of Contents in a chapter format presented in the order shown in § 4280.116(b)(2) through (8), except as specified in paragraphs (c)(1)(i) through (c)(1)(iii) of this section.

(1) Section 4280.116(b)(7)(i) does not apply.

(ii) Technical Reports must be submitted according to paragraph
(c)(1)(ii)(A) or (B) of this section, as applicable.

(A) For renewable energy system projects and energy efficiency improvement projects utilizing commercially available systems or improvements and with total eligible project costs of $200,000 or less, submit a Technical Report as described in Appendix A, C, or D, as applicable, of this subpart. If a renewable energy project does not fit one of the technologies identified in Appendices A, C, and D, the applicant must submit a Technical Report that conforms to the overall outline and subjects specified in §4280.116(b)(7)(i)(G).

(B) For renewable energy projects and energy efficiency projects utilizing pre-commercial technology or with total eligible project costs greater than $200,000, submit a Technical Report as described in Appendix B, C, or D, as applicable, of this subpart and as specified in §4280.116(b)(7)(i)(G)(7) through (10), as applicable.

(iii) Business-level feasibility study for renewable energy systems. For each application for a renewable energy system project submitted by a start-up or existing business, a business-level feasibility study by an independent qualified consultant will be required by the Agency. An acceptable business-level feasibility study must conform to the requirements of an acceptable feasibility study as specified in Appendix E of this subpart. Renewable energy projects with total eligible project costs of $200,000 or less are exempt from the feasibility study requirement.

(2) Lender forms, certifications, and agreements. Applications submitted under paragraph (c) of this section must use Form RD 4279-1A, “Application for Loan Guarantee, Short Form,” and include the documentation contained in paragraphs (b)(2)(ii), (b)(2)(vii), (b)(2)(viii), (b)(2)(ix), and (b)(2)(xi) of this section. The lender must have the documentation contained in paragraphs (b)(2)(ii), (b)(2)(vii), (b)(2)(viii), (b)(2)(ix), and (b)(2)(xi) available in its files for the Agency’s review.

§4280.129 Evaluation of RES and EEI guaranteed loan applications.

(a) General review. The Agency will evaluate each application and make a determination as to whether the borrower and project are eligible, the project has technical merit, there is reasonable assurance of repayment, there is sufficient collateral and equity, and the proposed loan complies with all applicable statutes and regulations. If the Agency determines it is unable to guarantee the loan, the lender will be informed in writing. Such notification will include the reasons for denial of the guarantee.

(b) Technical merit determination. The Agency’s determination of a project’s technical merit will be based on the information provided by the applicant. The Agency may engage the services of other government agencies or recognized industry experts in the applicable technology field, at its discretion, to evaluate and rate the application. The Agency may use this evaluation and rating to determine the level of technical merit of the proposed project. Projects determined by the Agency to be without technical merit shall be deemed ineligible.

(c) Evaluation criteria. The Agency will score each application based on the evaluation criteria specified in §4280.117, except for the criteria specified in §4280.117(c)(5) and in paragraphs (c)(1) and (c)(2) of this section. Points will be awarded for either paragraph (c)(1) or (c)(2) of this section, but not both.

(1) If the interest rate on the loan is to be below the prime rate (as published in The Wall Street Journal) plus 1.5 percent, 5 points will be awarded.

(2) If the interest rate on the loan is to be below the prime rate (as published in The Wall Street Journal) plus 1 percent, 10 points will be awarded.

§4280.130 Eligible lenders.

Eligible lenders are those identified in §4279.29 of this chapter, excluding mortgage companies that are part of a bank-holding company.

§4280.131 Lender’s functions and responsibilities.

(a) General. Lenders are responsible for implementing the guaranteed loan program under this subpart. All lenders requesting or obtaining a loan guarantee must comply with §4279.30(a)(1)(i) through (ix) of this chapter.
§ 4280.138 **Replacement of document.**

Documents must be replaced in accordance with §4279.84(b) of this chapter, except, in §4279.84(b)(1)(v), a full statement of the circumstances of any defacement or mutilation of the Loan Note Guarantee or Assignment Guarantee Agreement would also need to be provided.

§ 4280.139 **Credit quality.**

The lender must determine credit quality and must address all of the elements of credit quality in a written credit analysis, including adequacy of equity, cash flow, collateral, history, management, and the current status of the industry for which credit is to be extended.

(a) **Cash flow.** All efforts will be made to structure debt so that the business has adequate debt coverage and the ability to accommodate expansion.

(b) **Collateral.** Collateral must have documented value sufficient to protect the interest of the lender and the Agency. The discounted collateral value will normally be at least equal to the loan amount. Lenders will discount collateral consistent with sound loan-to-value policy. Guaranteed loans made under this subpart shall have at least parity position with guaranteed loans made under 7 CFR part 4279, subpart B of this title.

(c) **Industry.** The current status of the industry will be considered. Borrowers developing well established commercially available renewable energy systems with significant support infrastructure may be considered for better terms and conditions than those borrowers developing systems with limited infrastructure.

(d) **Equity.** In determining the adequacy of equity, the lender must meet the criteria specified in paragraph (d)(1) of this section for loans over $600,000 and the criteria in paragraph (d)(2) of this section for loans of $600,000 or less. Cash equity injection, as discussed in paragraphs (d)(1) and (d)(2) of this section, must be in the form of cash. Federal grant funds may be counted as cash equity.

(1) For loans over $600,000, borrowers shall demonstrate evidence of cash equity injection in the project of not less than 25 percent of eligible project.
costs. The fair market value of equity in real property that is to be pledged as collateral for the loan may be substituted in whole or in part to meet the cash equity requirement. However, the appraisal completed to establish the fair market value of the real property must not be more than 1 year old and must meet Agency appraisal standards.

(2) For loans of $600,000 or less, borrowers shall demonstrate evidence of cash equity injection in the project of not less than 15 percent of eligible project costs. The fair market value of equity in real property that is to be pledged as collateral for the loan may be substituted in whole or in part to meet the cash equity requirement. However, the appraisal completed to establish the fair market value of the real property must not be more than 1 year old and must meet Agency appraisal standards.

(e) Lien priorities. The entire loan will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the loan. The unguaranteed portion of the loan will neither be paid first nor given any preference or priority over the guaranteed portion. A parity or junior position may be considered provided that discounted collateral values are adequate to secure the loan in accordance with paragraph (b) of this section after considering prior liens.

§ 4280.140 Financial statements.

(a) The financial information required in §4280.116(b)(3)(v) and (b)(4) is required for the guaranteed loan program.

(b) If the proposed guaranteed loan exceeds $3 million, the Agency may require annual audited financial statements, at its sole discretion when the Agency is concerned about the applicant’s credit risk.

§ 4280.141 Appraisals.

(a) Conduct of appraisals. All appraisals must be in accordance with §4279.144 of this chapter.

(1) For loans of $600,000 or more, a complete self-contained appraisal must be conducted. Lenders must complete at least a Transaction Screen Questionnaire for any undeveloped sites and a Phase I environmental site assessment on existing business sites, which should be provided to the appraiser for completion of the self-contained appraisal.

(2) For loans for less than $600,000, a complete summary appraisal may be conducted in lieu of a complete self-contained appraisal as required under paragraph (a)(1) of this section. Summary appraisals must be conducted in accordance with Uniform Standards of Professional Appraisal Practice (USPAP).

(b) Specialized appraisers. Specialized appraisers will be required to complete appraisals in accordance with paragraphs (a)(1) and (a)(2) of this section. The Agency may approve a waiver of this requirement only if a specialized appraiser does not exist in a specific industry or hiring one would cause an undue financial burden to the borrower.

§ 4280.142 Personal and corporate guarantees.

(a) All personal and corporate guarantees must be in accordance with §4279.149(a) of this chapter.

(b) Except for passive investors, unconditional personal and corporate guarantees for those owners with a beneficial interest at least 20 percent of the borrower will be required where legally permissible.

§ 4280.143 Loan approval and obligation of funds.

The lender and applicant must comply with §4279.173 of this chapter, except that either or both parties may also propose alternate conditions to the Conditional Commitment if certain conditions cannot be met.

§ 4280.144 Transfer of lenders.

All transfers of lenders must be in accordance with §4279.174 of this chapter, except that it will be the Agency rather than the loan approval official who may approve the substitution of a new eligible lender.

§ 4280.145 Changes in borrower.

All changes in borrowers must be in accordance with §4279.180 of this chapter, but the eligibility requirements of this program apply.
§ 4280.146 Conditions precedent to issuance of Loan Note Guarantee.

(a) The Loan Note Guarantee will not be issued until the lender certifies to the conditions identified in paragraphs § 4279.181(a) through (o) of this chapter and paragraphs (b) and (c) of this section.

(b) All planned property acquisitions and development have been performing at a steady state operating level in accordance with the technical requirements, plans, and specifications, conforms with applicable Federal, State, and local codes, and costs have not exceeded the amount approved by the lender and the Agency.

(c) Where applicable, the lender shall provide to the Agency a copy of the executed power purchase agreement.

§ 4280.147 Issuance of the guarantee.

(a) When loan closing plans are established, the lender must notify the Agency in writing. At the same time, or immediately after loan closing, the lender must provide the following to the Agency:

(1) Lender’s certifications as required by § 4280.146;

(2) An executed Form RD 4279–4; and

(b) When the Agency is satisfied that all conditions for the guarantee have been met, the Loan Note Guarantee and the following documents, as appropriate, will be issued:

(1) Assignment Guarantee Agreement. If the lender assigns the guaranteed portion of the loan to a holder, the lender, holder, and the Agency must execute the Assignment Guarantee Agreement;

(2) Certificate of Incumbency. If requested by the lender, the Agency will provide the lender with a copy of Form RD 4279–7, “Certificate of Incumbency and Signature,” with the signature and title of the Agency official responsible for signing the Loan Note Guarantee, Lender’s Agreement, and Assignment Guarantee Agreement;

(3) Copies of legal loan documents; and

(4) Disbursement plan, if working capital is a purpose of the project.

§ 4280.148 Refusal to execute Loan Note Guarantee.

If the Agency determines that it cannot execute the Loan Note Guarantee, § 4279.187 of this chapter will apply.

§ 4280.149 Requirements after project construction.

Once the project has been constructed, the lender must provide the Agency periodic reports from the borrower. The borrower’s reports will include the information specified in paragraphs (a) and (b) of this section, as applicable.

(a) Renewable energy projects. For renewable energy projects, commencing the first full calendar year following the year in which project construction was completed and continuing for 3 full years, provide a report detailing the information specified in paragraphs (a)(1) through (a)(7) of this section.

(1) The actual amount of energy produced in BTUs, kilowatt-hours, or similar energy equivalents.

(2) If applicable, documentation that any identified health and/or sanitation problem has been solved.

(3) The annual income and/or energy savings of the renewable energy system.

(4) A summary of the cost of operating and maintaining the facility.

(5) A description of any maintenance or operational problems associated with the facility.

(6) Recommendations for development of future similar projects.

(7) Actual jobs created or saved.

(b) Energy efficiency improvement projects. For energy efficiency improvement projects, commencing the first full calendar year following the year in which project construction was completed and continuing for 2 full years, provide a report detailing the actual amount of energy saved due to the energy efficiency improvements.

§ 4280.150 Insurance requirements.

Each borrower must obtain the insurance required in § 4280.118. The coverage required by this section must be maintained for the life of the loan unless this requirement is waived or modified by the Agency in writing.
§ 4280.152 Servicing guaranteed loans.

The lender must service the entire loan and must remain mortgagee and secured party of record notwithstanding the fact that another party may hold a portion of the loan. The entire loan must be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the loan. The unguaranteed portion of a loan will neither be paid first nor given any preference or priority over the guaranteed portion of the loan.

(a) Routine servicing. Comply with § 4287.107 of this chapter, except that all notifications from the lender to the Agency shall be in writing and all actions by the lender in servicing the entire loan must be consistent with the servicing actions that a reasonable, prudent lender would perform in servicing its own portfolio.

(b) Interest rate adjustments. Comply with § 4287.112 of this chapter, except that under § 4287.112(a)(3) of this chapter the interest rates, after adjustments, must comply with the requirements for interest rates on new loans as established by § 4280.125.

(c) Release of collateral. (1) Collateral may only be released in accordance with § 4287.113(a) and (b) of this chapter and paragraph (c)(2) of this section.

(2) Within the parameters of paragraph (c)(1) of this section, lenders may, over the life of the loan, release collateral (other than personal and corporate guarantees) with a cumulative value of up to 20 percent of the original loan amount without Agency concurrence, if the proceeds generated are used to reduce the guaranteed loan or to buy replacement collateral or real estate equal to or greater than the collateral being replaced.

(d) Subordination of lien position. All subordinations of the lender’s lien position must comply with § 4287.123 of this chapter.

(e) Alterations of loan instruments. All alterations of loan instruments must comply with § 4287.124 of this chapter.

(f) Loan transfer and assumption. All loan transfers and assumptions must comply with § 4287.134(c), (d), (f), (g), and (i) through (k) of this chapter in addition to the following:

(1) Documentation of request. All transfers and assumptions must be approved in writing by the Agency and must be to eligible applicants in accordance with § 4280.122. An individual credit report must be provided for transferee proprietors, partners, officers, directors, and stockholders with 20 percent or more interest in the business, along with such other documentation as the Agency may request to determine eligibility.

(2) Terms. Loan terms must not be changed unless the change is approved in writing by the Agency with the concurrence of any holder and the transferor (including guarantors), if they have not been or will not be released from liability. Any new loan terms must be within the terms authorized by § 4280.126. The lender’s request for approval of new loan terms will be supported by an explanation of the reasons for the proposed change in loan terms.

(3) Additional loans. Loans to provide additional funds in connection with a transfer and assumption must be considered as a new loan application under § 4280.128.

(4) Loss resulting from transfer. If a loss should occur upon consummation of a complete transfer and assumption for less than the full amount of the debt and the transferor (including personal guarantors) is released from liability, the lender, if it holds the guaranteed portion, may file Form RD 449-30, “Loan Note Guarantee Report of Loss,” to recover its pro rata share of the actual loss. If a holder owns any of the guaranteed portion, such portion must be repurchased by the lender or the Agency in accordance with § 4279.78(c) of this chapter. In completing the report of loss, the amount of the debt assumed will be entered as net collateral (recovery). Approved protective advances and accrued interest thereon made during the arrangement of a transfer and assumption will be included in the calculations.

§ 4280.153 Substitution of lender.

(a) All substitutions of lenders must comply with § 4287.135(a)(2) and (b) of this chapter and paragraph (b) of this section.
RBS and RUS, USDA § 4280.165

(b) The Agency may approve the substitution of a new lender if the proposed substitute lender:
   (1) Is an eligible lender in accordance with §4280.130;
   (2) Is able to service the loan in accordance with the original loan documents; and
   (3) Acquires title to the unguaranteed portion of the loan held by the original lender and assumes all original loan requirements, including liabilities and servicing responsibilities.

§ 4280.154 Default by borrower.
If the loan goes into default, the lender must comply with §4287.145 of this chapter.

§ 4280.155 Protective advances.
All protective advances made by the lender must comply with §4287.156 of this chapter.

§ 4280.156 Liquidation.
All liquidations must comply with §4287.157 of this chapter, except as follows:
   (a) Under §4287.157(d)(13) of this chapter, whenever $200,000 is used substitute $100,000; and
   (b) Under §4287.157(d)(13) of this chapter, replace the sentence “The appraisal shall consider this aspect” with “Both the estimate and the appraisal shall consider this aspect.”

§ 4280.157 Determination of loss and payment.
Loss and payments will be determined in accordance with §4287.158 of this chapter.

§ 4280.158 Future recovery.
Future recoveries will be conducted in accordance with §4287.169 of this chapter.

§ 4280.159 Bankruptcy.
Bankruptcies will be handled in accordance with §4287.170 of this chapter, except that the notification required under §4287.170(b)(4) of this chapter shall be made in writing.

§ 4280.160 Termination of guarantee.
Guarantees will be terminated in accordance with §4287.180 of this chapter.

§§ 4280.161–4280.164 [Reserved]

COMBINED FUNDING FOR RENEWABLE ENERGY SYSTEMS AND ENERGY EFFICIENCY IMPROVEMENTS

§ 4280.165 Combined funding for renewable energy systems and energy efficiency improvements.
The requirements for a RES or EEI project for which an applicant is seeking a combined grant and guaranteed loan are defined as follows:
   (a) Eligibility. Applicants must meet the applicant eligibility requirements specified in §§4280.109 and 4280.112 and the borrower eligibility requirements specified in §4280.122. Projects must meet the project eligibility requirements specified in §§4280.113 and 4280.123. Applicants may submit simplified applications if the project meets the requirements specified in §4280.114.
   (b) Funding. Funding provided under this section is subject to the limits described in paragraphs (b)(1) through (b)(3) of this section.
      (1) The amount of any combined grant and guaranteed loan must not exceed 75 percent of total eligible project costs. For purposes of combined funding requests, total eligible project costs are based on the total costs associated with those items specified in §§4280.115(c) and 4280.124(e). The applicant must provide the remaining total funds needed to complete the project.
      (2) The minimum combined funding request allowed is $5,000, with the grant portion of the funding request being at least $1,500.
      (3) Applicants whose combination applications are approved for funding must utilize both the loan guarantee and the grant. The Agency reserves the right to reduce the total loan guarantee and grant award as appropriate.
   (c) Application and documentation. When applying for combined funding, the applicant must submit separate applications for both types of assistance (grant and guaranteed loan). Each application must meet the requirements, including the requisite forms and certifications, specified in §§4280.116 and 4280.128. The separate applications must be submitted simultaneously. The applicant must submit at least one set of documentation, but does not
need to submit duplicate forms or certifications.

(d) Evaluation. The Agency will evaluate each application according to applicable procedures specified in §§ 4280.117 and 4280.129.

(e) Interest rate and terms of loan. The interest rate and terms of the loan for the loan portion of the combined funding request will be determined based on the procedures specified in §§ 4280.125 and 4280.126 for guaranteed loans.

(f) Other provisions. In addition to the requirements specified in paragraphs (a) through (e) of this section, the combined funding request shall be subject to the other requirements specified in this subpart, including, but not limited to, processing and servicing requirements, as applicable, as described in paragraphs (f)(1) through (f)(3) of this section.

(1) All other provisions of §§ 4280.101 through 4280.111 apply to the combined funding request.

(2) All other provisions of §§ 4280.112 through 4280.121 apply to the grant portion of the combined funding request.

(3) All other provisions of §§ 4280.122 through 4280.160 apply to the guaranteed loan portion of the combined funding request.

§§ 4280.166–4280.169 [Reserved]

RENEWABLE ENERGY SYSTEM FEASIBILITY STUDY GRANTS

§ 4280.170 Applicant eligibility.

To be eligible for a renewable energy system feasibility study grant under this subpart, the applicant must be an agricultural producer or a rural small business, as defined in §4280.103, and must be the prospective owner of the renewable energy system for which the feasibility study grant is sought.

§ 4280.171 Project eligibility.

Only renewable energy system projects that meet the requirements specified in this section are eligible for feasibility study grants under this subpart. The project for which the feasibility study grant is sought shall:

(a) Be for the purchase, installation, expansion, or other energy-related improvement of a renewable energy system located in a State, as defined in §4280.103;

(b) Be for a facility located in a rural area if the applicant is a rural small business, or in a rural or non-rural area if the applicant is an agricultural producer. If the agricultural producer’s facility is in a non-rural area, then the feasibility study can only be for a renewable energy system on integral components of or directly related to the facility, such as vertically integrated operations, and are part of and co-located with the agriculture production operation;

(c) Be for technology that is pre-commercial or commercially available, and that is replicable;

(d) Not have had a feasibility study already completed for it with Federal and/or State assistance; and

(e) The applicant has a place of business in a State.

§ 4280.172 Application eligibility provisions.

(a) Applications for industry-level feasibility studies, also known as feasibility study templates or guides, are not eligible because the assistance is not provided to a specific project.

(b) Applications must be from the prospective owner(s) of the renewable energy system for which the feasibility study grant is sought. Applications from other entities (e.g., entities that would be conducting the feasibility study and are not the prospective owners) will not be accepted.

(c) Applications can be submitted for a modification to an existing renewable energy system (e.g., for the expansion portion of an existing wind farm).

(d) Applications cannot be submitted in a Fiscal Year for an RES project if an RES application for the same renewable energy system is submitted in that same Fiscal Year and vice versa.

§ 4280.173 Grant funding for feasibility studies.

(a) Maximum grant amount. The maximum amount of grant funds that will be made available for an eligible feasibility study project under this subpart to any one recipient will not exceed $50,000 or 25 percent of the total eligible project cost of the study, whichever
is less. Eligible project costs are specified in paragraph (b) of this section.

(b) Eligible project costs. Only post-application costs will be considered eligible. Eligible project costs for renewable energy system feasibility studies shall be specific to the completion of the feasibility study (refer to Appendix E of this subpart for information on the content of a feasibility study) including, but not limited to, the items listed in paragraphs (b)(1) through (b)(3) of this section.

(1) Resource assessment;
(2) Transmission study; and
(3) Environmental study.

(c) Ineligible project costs. Ineligible project costs for renewable energy system feasibility studies include, but are not limited to:

(1) Costs associated with selection of engineering, architectural, or environmental services;
(2) Designing, bidding, or contract development for the proposed facility;
(3) Permitting and other licensing costs required to construct the facility; and
(4) Any goods or services provided by a person or entity who has a conflict of interest as provided in §4280.106.

(d) Time limit. The grantee will have 2 years from the date of the grant agreement to provide the Agency with a complete and acceptable feasibility study and request disbursement of the funds. If the grantee does not submit to the Agency a complete and acceptable feasibility study within this 2 year period, the grant is subject to termination by and reimbursement to the Agency according to Departmental regulations.

§§4280.174–4280.175 [Reserved]

§ 4280.176 Feasibility study grant applications—content.

Applications for feasibility study grants must include a Table of Contents with clear pagination and chapter identification and shall contain the information specified in paragraphs (a) and (b) of this section and shall be presented in the same order.

(a) Forms, documents, and certifications. The application shall contain the forms and documents specified in paragraphs (a)(1) through (a)(11) of this section.

(1) Form SF–424.
(2) Form SF–424A, “Budget Information—Non-Construction Programs” (as applicable).
(3) Form SF–424B, “Assurances—Non-Construction Programs” (as applicable).
(4) Form SF–424C (as applicable).
(5) Form SF–424D (as applicable).
(6) Form RD 1940–20 (as applicable).
(7) Except for sole proprietors, a copy of legal organizational documents.
(8) A proposed work plan, which includes:
(i) A brief description of the proposed system the feasibility study will evaluate;
(ii) A description of the feasibility study to be conducted. The contents of an acceptable feasibility study are identified in Appendix E of this subpart. Applicants shall require those conducting the feasibility study to consider and document within the feasibility study the important environmental factors within the planning area and the potential environmental impacts of the project for which the feasibility study is being conducted, as well as the alternatives considered;
(iii) The timeframe for completion of the feasibility study;
(iv) The experience of the company/individual completing the feasibility study, including the number of similar projects the company/individual has performed, the number of years the company has been performing a similar service, and corresponding resumes; and
(v) The source and amount of other project funds needs to be clearly identified. Agency approved written documentation/confirmation from any third party committing a specific amount of such funds is required. Documentation includes such items as bank statements, lender commitment letters, and so forth;
(9) A certification that the applicant has not received any other Federal or State assistance for a feasibility study for the subject renewable energy system.
(10) If the applicant is a rural small business, certification that the feasibility study grant will be for a renewable energy system project that is located in a rural area.
§ 4280.177 Evaluation of feasibility study grant applications.

(a) Agency evaluation. Feasibility study applications submitted under this subpart will be evaluated by the Agency for eligibility, completeness, and scoring.

(b) General review. The Agency will evaluate each application and make a determination as to whether the applicant is eligible, the proposed grant is for an eligible feasibility study, and the proposed grant complies with all applicable statutes and regulations.

(1) Applicant eligibility. The Agency will first determine whether the entity is eligible to compete for a feasibility study grant. Applications for applicants determined by the Agency not to be eligible will not be processed further. The Agency will determine applicant eligibility based on the criteria specified in § 4280.170.

(2) Proposal eligibility. After determining applicant eligibility, the Agency will review the application to determine if the proposal is eligible. Applications determined by the Agency not to be eligible will not be processed further. The Agency will determine whether the application contains certification by the applicant that the applicant has not received any other Federal or State assistance for a feasibility study on the subject facility. If the application does not contain such certification, it is an ineligible application and the Agency will stop processing the application.

§ 4280.178 Scoring feasibility study grant applications.

Agency personnel will score each feasibility study application based on the evaluation criteria specified in paragraphs (a) through (f) of this section, with a maximum score of 100 points possible.

(a) Energy replacement or generation. The project can be for either replacement or generation, but not both. A maximum of 25 points can be awarded under this section.

(1) Energy replacement. 25 points will be awarded if proposed project will offset any portion of the applicant's energy needs.

(2) Energy generation. 15 points will be awarded if the proposed renewable energy system is intended primarily for production of energy for sale.

(b) Commitment of funds for the feasibility study. Appropriate documentation must verify commitment of funds. A maximum of 25 points can be awarded under this section.

(1) 10 points—100 percent of matching funds.

(2) 7.5 points—75 percent up to, but not including 100 percent of matching funds.

(3) 5 points—50 percent up to, but not including 75 percent of matching funds.

(4) 0 points—less than 50 percent of matching funds.

(c) Designation as a Small agricultural producer/very small business. An applicant will be considered either an agricultural producer or rural small business. No applicant will be considered as both. Points will only be awarded under either paragraph (c)(1) or (c)(2) of
this section. A maximum of 20 points can be awarded under this section.

(1) For an Agricultural Producer:
   (i) 10 points will be awarded if the applicant is an agricultural producer producing agricultural products with a gross market value of less than $600,000 in the preceding year, or
   (ii) 20 points will be awarded if the applicant is an agricultural producer producing agricultural products with a gross market value of less than $200,000 in the preceding year.

(2) For a Rural Small Business, 20 points will be awarded if the applicant is a very small business, as defined in §4280.103.

(d) Experience and qualifications of the entity identified to perform the feasibility study. A maximum of 15 points can be awarded under this section.

(1) 15 points will be awarded if the entity has 5 or more years experience in the field of study for the technology being proposed.

(2) 7.5 points will be awarded if the entity has 2 or more years, but less than 5 years, experience in the field of study for the technology field being proposed.

(3) 0 points will be awarded if the entity has less than 2 years experience in the field of study for the technology field being proposed.

(e) Size of feasibility study grant request. A maximum of 20 points can be awarded under this section. If the feasibility study request is:

(1) $10,000 or less, 20 points will be awarded.

(2) Greater than $10,000 up to and including $25,000, 10 points will be awarded.

(3) Greater than $25,000, 0 points will be awarded.

(f) Resources to implement project. Considering the technology being proposed, the applicant may qualify for other local or State programs to assist in the construction or operation of the facility. These programs will benefit the applicant and/or proposed project during or after the facility is constructed and operational. Points can be awarded for both types of assistance, for a maximum of 10 points.

(1) If the applicant has identified local programs, 5 points will be awarded.

(2) If the applicant has identified State programs, 5 points will be awarded.

§4280.179 Selecting feasibility study grant applications for award.

The Agency will use the following process to determine which feasibility study grants receive funding under this subpart.

(a) Ranking of applications. All scored applications will be ranked by the Agency as soon after the application deadline as possible. All applications that are ranked will be considered for selection for funding.

(b) Selection of applications for funding. Using the ranking created under paragraph (a) of this section, the Agency will consider the score an application has received compared to the scores of other ranked applications, with higher scoring applications receiving first consideration for funding.

(c) Funding selected applications. As applications are funded, if insufficient funds remain to fund the next highest scoring application, the Agency may elect to fund a lower scoring application. Before this occurs, the Agency will provide the applicant of the higher scoring application the opportunity to reduce the amount of its grant request to the amount of funds available. If the applicant agrees to lower its grant request, it must certify that the purposes of the project can be met, and the Agency must determine the project is financially feasible at the lower amount.

(d) Disposition of ranked applications not funded. Based on the availability of funding, a ranked application may not be funded in the fiscal year in which it was submitted. Such ranked applications will not be carried forward into Fiscal Year 2012 and the Agency will notify the applicant in writing.

§4280.180 Actions prior to grant closing.

(a) Environmental. If construction is a component of the study, the appropriate level of environmental assessment must be completed prior to the obligation of funds. All feasibility study grants made under this subpart are subject to the requirements of 7
§ 4280.181 Awarding and administering feasibility study grants.

Renewable energy system feasibility study grants will be awarded and administered in accordance with Departmental regulations and paragraphs (a) through (e) of this section.

(a) Letter of conditions. The Agency will notify the approved applicant in writing, setting out the conditions under which the grant will be made. The notice will include those matters necessary to ensure that the proposed grant is completed in accordance with the terms of the scope of work and budget, that grant funds are expended for the feasibility study, and that the applicable requirements prescribed in the relevant Departmental regulations are complied with. The Letter of Conditions will be sent to the applicant.

(b) Applicant’s intent to meet conditions. Upon reviewing the conditions and requirements in the Letter of Conditions, the applicant must complete, sign and return a Form RD 1942–46, “Letter of Intent to Meet Conditions,” to the Agency; or if certain conditions cannot be met, the applicant may propose alternate conditions to the Agency. The Agency must concur with any changes proposed to the Letter of Conditions by the applicant before the application will be further processed.

(c) Forms and certifications. The forms specified in paragraphs (c)(1) through (c)(6) of this section will be attached to the letter of conditions referenced in paragraph (a) of this section. The forms specified in paragraphs (c)(1) through (c)(5) of this section and all of the certifications must be submitted prior to grant approval. The form specified in paragraph (c)(6), which is to be completed by the contractor (if any), does not need to be returned to the Agency, but must be kept on file.

(1) Form AD–1047.
(2) Form AD–1049.
(3) Either Form SF–LLL or Exhibit A–1 of RD Instruction 1940–Q.
(4) Form RD 400–1.
(5) Form RD 400–4.
(6) Form AD–1048.

(d) Grant approval. The applicant will be sent a copy of the executed Form RD 1940–1, the approved scope of work, and Form RD 4280–2. Form RD 1940–1 must be signed by the applicant.

(e) Grant agreement. Prior to grant disbursement, but after grant obligation, the applicant must complete, sign, and return Form RD 4280–2. The grantee must abide by all requirements contained in Form RD 4280–2, this subpart, and any other applicable Federal statutes or regulations. Failure to follow these requirements may result in termination of the grant and adoption of other available remedies.

§ 4280.182 Servicing feasibility study grants.

Feasibility study grants will be serviced in accordance with Departmental regulations; 7 CFR part 1951, subparts E and O; and paragraphs (a) through (n) of this section.

(a) Inspections. Grantees will permit periodic inspection of the project records and operations by a representative of the Agency.

(b) Programmatic changes. The grantee shall obtain prior Agency approval for any change to the scope or objectives of the approved project. Failure to obtain prior approval of changes to the scope of work or budget may result in suspension, termination, and recovery of grant funds.

(c) Changes in project cost or scope. If there is a significant reduction in project cost or changes in project scope, the applicant’s funding needs, eligibility, and scoring, as applicable, will be reassessed. Decreases in Agency funds will be based on revised project costs and other selection factors; however, other factors, including Agency regulations and Notices used at the time of grant approval, will remain the same. Obligated grant funds not needed
to complete the project will be de-obligated.

(d) Transfer of obligations. Subject to Agency approval, an obligation of funds established for a grantee may be transferred to a different (substituted) grantee provided:

(1) The substituted grantee

(i) Is eligible;

(ii) Has a close and genuine relationship with the original grantee; and

(iii) Has the authority to receive the assistance approved for the original grantee; and

(2) The type of renewable energy technology and the scope of the project for which the Agency funds will be used remain unchanged.

(e) Financial management system and records. Grantees are required to maintain a financial management system and records in accordance with Departmental regulations.

(f) Fund disbursement. Grant funds will be expended on a pro rata basis with matching funds.

(1) Requests for reimbursement may be submitted monthly or more frequently if authorized to do so by the Agency. Ordinarily, payment will be made within 30 days after receipt of a proper request for reimbursement.

(2) The Grantee shall not request reimbursement for the Federal share of amounts withheld from contractors to ensure satisfactory completion of work until after it makes those payments.

(3) Payment shall be made by electronic funds transfer.

(4) Standard Form 270, “Request for Advance or Reimbursement,” or other format prescribed by the Agency shall be used to request grant reimbursements.

(5) For renewable energy system feasibility studies, grant funds will be disbursed in accordance with the above through 90 percent of grant disbursement. The final 10 percent of grant funds will be held by the Agency until a feasibility study acceptable to the Agency has been submitted.

(g) Deobligation of grant funds. Funds remaining after all costs incident to the project have been paid or provided for are subject to deobligation.

(h) Monitoring of project. Grantees are responsible for ensuring that all activities are performed within the approved scope of work and that funds are only used for approved purposes. Grantees shall constantly monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, financial resources are being appropriately expended by contractors (if applicable), and any other performance objectives identified in the scope of work are being achieved. The Agency will monitor grantees to ensure that activities are performed in accordance with the Agency-approved scope of work and to ensure that funds are expended for approved purposes. The Agency’s monitoring of grantees neither relieves the grantee of its responsibilities to ensure that activities are performed within the scope of work approved by the Agency and that funds are expended for approved purposes only nor provides recourse or a defense to the grantee should the grantee conduct unapproved activities, engage in unethical conduct, engage in activities that are or give the appearance of a conflict of interest, or expend funds for unapproved purposes.

(i) Federal financial reports. A SF–425, “Federal Financial Report,” and a project performance report will be required of all grantees on a semiannual basis. The grantee will complete the project within the total sums available to it, including the grant, in accordance with the scope of work and any necessary modifications thereof prepared by the grantee and approved by the Agency. The final federal financial report must be submitted to the Agency within 90 days after the feasibility study has been completed.

(j) Performance reports. Grantees must submit to the Agency, in writing, semiannual performance reports and a final performance report. Grantees are to submit an original of each report to the Agency.

(1) Semiannual performance reports. Each semiannual performance report shall describe current progress and identify any problems, delays, or adverse conditions, if any, which have affected or will affect attainment of overall project objectives or prevent meeting time frame for completion of the feasibility study within 2 years. This disclosure shall be accompanied
by a statement of the action taken or planned to resolve the situation.

(2) Final performance report. A final performance report, which will serve as the last semiannual performance report, will be required within 90 days after the feasibility study has been completed. The final performance report shall summarize any problems, delays, or adverse conditions, if any, which have affected the project objectives or prevented meeting time frames for completion of the feasibility study. The final performance report should indicate if the grantee intends to proceed with the construction of the project.

(k) Final deliverables. Upon completion of the feasibility study, the grantee shall submit the following to the Agency:

(1) The project feasibility study; and
(2) SF–270.

(l) Renewable energy feasibility studies. Beginning the first full year after the feasibility study has been completed, grantees shall report annually for 2 years on the following:

(1) Is the renewable energy system project for which the feasibility study was conducted underway? If “yes,” describe how far along the renewable energy system project is (e.g., financing has been secured, site has been secured, construction contracts are in place, project is completed).

(2) Is the renewable energy system project complete? If so, what is the actual amount of energy being produced?

(m) Other reports. For clarification purposes, the Agency may request any additional project and/or performance data for the project for which grant funds have been received.

(a) Grant close-out and related activities. Grant close-out and related activities shall be performed in accordance with the Departmental Regulations. In addition, failure to submit satisfactory reports on time under the provisions of paragraphs (i) through (m) of this section may result in the suspension or termination of a grant. The provisions of this section apply to grants and subgrants.

§§ 4280.183–4280.185 [Reserved]

§ 4280.186 Applicant eligibility.

To be eligible for an energy audit grant or a renewable energy development assistance grant under this subpart, the applicant must meet each of the criteria, as applicable, specified in paragraphs (a) through (c) of this section. The Agency will determine an applicant’s eligibility.

(a) Type of applicant. The applicant must be one of the following:

(1) A unit of State, tribal, or local government;
(2) A land-grant college or university, or other institution of higher education;
(3) A rural electric cooperative;
(4) A public power entity; or
(5) An instrumentality of a State, tribal, or local government.

(b) Capacity to perform. The applicant must have sufficient capacity to perform the energy audit or renewable energy development assistance activities proposed in the application to ensure success. The Agency will make this assessment based on the information provided in the application.

(c) Legal authority and responsibility. Each applicant must have, or obtain, the legal authority necessary to carry out the purpose of the grant.

§ 4280.187 Project eligibility.

To be eligible for an energy audit or a renewable energy development assistance grant, the grant funds for a project must be used by the grant recipient to assist agricultural producers or rural small businesses located in a State in one or both of the purposes specified in paragraphs (a) and (b) of this section, and shall also comply with paragraphs (c) through (e), and, if applicable, paragraph (f) of this section.

(a) Grant funds may be used to conduct and promote energy audits that meet the requirements of the energy audit as defined in this subpart. Energy audits must cover the following:

(1) Situation report. Provide a narrative description of the facility or
process being audited; its energy system(s) and usage; its activity profile; and the price per unit of energy (electricity, natural gas, propane, fuel oil, renewable energy, etc.) paid by the customer on the date of the audit. Any energy conversion data should be based on use and source.

(2) Potential improvements. List specific information regarding all potential energy-saving opportunities and the associated cost.

(3) Technical analysis. Discuss the interactions of the potential improvements with existing energy systems.

(i) Estimate the annual energy and energy costs savings expected from each improvement identified for the potential project.

(ii) Estimate all direct and attendant indirect costs of each improvement.

(iii) Rank potential improvement measures by cost-effectiveness.

(4) Potential improvement description. Provide a narrative summary of the potential improvement and its ability to provide needed benefits, including a discussion of non-energy benefits such as project reliability and durability.

(i) Provide preliminary specifications for critical components.

(ii) Provide preliminary drawings of project layout, including any related structural changes.

(iii) Document baseline data compared to projected consumption, together with any explanatory notes. Provide the actual total quantity of energy used (BTU) in the original building and/or equipment in the 12 months prior to the EEI project and the projected energy usage after the EEI project shall be the projected total quantity of energy used (BTU) on an annual basis for the same size or capacity as the original building or equipment. For energy efficiency improvement to equipment, if the new piece of equipment has a different capacity than the piece of equipment being replaced, the projected total quantity of energy used for the new piece of equipment shall be adjusted based on the ratio of the capacity of the replaced piece of equipment to the capacity of the new piece of equipment. When appropriate, show before-and-after data in terms of consumption per unit of production, time or area. Include at least 1 year’s bills for those energy sources/fuel types affected by this project. Also submit utility rate schedules, if appropriate.

(iv) Identify significant changes in future related operations and maintenance costs.

(v) Describe explicitly how outcomes will be measured annually.

(b) Grant funds may be used to conduct and promote renewable energy development assistance by providing to agricultural producers and rural small businesses recommendations and information on how to improve the energy efficiency of their operations and to use renewable energy technologies and resources in their operations.

(c) Energy audit and renewable energy development assistance can be provided only to a facility located in a rural area unless the owner of such facility is an agricultural producer. If the facility is owned by an agricultural producer, the facility for which such services are being provided may be located in either a rural or non-rural area. If the agricultural producer’s facility is in a non-rural area, then the energy audit or renewable energy development assistance can only be for a renewable energy system or energy efficiency improvement on integral components of or directly related to the facility, such as vertically integrated operations, and are part of and co-located with the agriculture production operation.

(d) The energy audit or renewable energy development assistance must be provided to a recipient in a State.

(e) The applicant must have a place of business in a State.

(f) For the purposes of this subpart, only small hydropower projects are eligible for energy audits and renewable energy development assistance. Per consultation with the U.S. Department of Energy, the Agency is defining small hydropower as having a rated power of 30 megawatts or less, which includes hydropower projects commonly referred to as “micro-hydropower” and “mini-hydropower.”
§ 4280.188 Grant funding for energy audit and renewable energy development assistance.

(a) Maximum grant amount. The maximum aggregate amount of energy audit and renewable energy development assistance grants awarded to any one recipient under this subpart cannot exceed $100,000. Grant funds awarded for energy audit and renewable energy development assistance projects may be used only to pay eligible project costs, as described in paragraph (b) of this section. Grant funds awarded for energy audits and renewable energy development assistance projects are prohibited from being used to pay costs associated with the items listed in paragraph (c) of this section.

(b) Eligible project costs. Eligible project costs for energy audits and renewable energy development assistance are those post-application expenses directly related to conducting and promoting energy audits and renewable energy development assistance, which include but are not limited to:

(1) Salaries directly or indirectly related to the project;
(2) Travel expenses directly related to conducting energy audits or renewable energy development assistance;
(3) Office supplies (e.g., paper, pens, file folders); and
(4) Administrative expenses, up to a maximum of 5 percent of the grant, which include but are not limited to:

(i) Utilities;
(ii) Office space;
(iii) Operation expenses of office and other project-related equipment (e.g., computers, cameras, printers, copiers, scanners); and
(iv) Expenses for outreach and marketing of the energy audit and renewable energy development assistance activities, including associated travel expenses.

(c) Ineligible project purposes. Grant funds may not be used to:

(1) Pay for any construction-related activities;
(2) Purchase equipment;
(3) Pay any costs of preparing the application package for funding under this subpart;
(4) Pay any costs of the project incurred prior to the application date of the grant made under this subpart;
(5) Fund political or lobbying activities; and
(6) Pay any judgment or debt owed to the United States.

(d) Energy audits. A recipient of a grant under this subpart that conducts an energy audit shall require that, as a condition of the energy audit, the agricultural producer or rural small business pay at least 25 percent of the cost of the energy audit. Further, the amount paid by the agricultural producer or rural small business will be retained by the recipient as a contribution towards the cost of the energy audit.

(e) Time limit. Unless otherwise agreed to by the Agency, any energy audit or renewable energy development assistance grant agreement under this subpart will terminate 2 years from the date the Agency signs the agreement.

§ 4280.189 [Reserved]

§ 4280.190 EA/REDA grant applications—content.

Applications must contain the elements specified in paragraphs (a) through (g) of this section.

(a) Form SF–424.
(b) Form SF–424A.
(c) Form SF–424B.
(d) If applicable, a copy of the applicant’s organizational documents showing the applicant’s legal existence and authority to perform the activities under the grant.

(e) A proposed scope of work, including a description of the proposed project, details of the proposed activities to be accomplished and timeframes for completion of each task, the number of months duration of the project, and the estimated time it will take from grant approval to beginning of project implementation. A written narrative to be used as the scope of work which includes, at a minimum, the following items:

(1) An Executive Summary;
(2) The plan and schedule for implementation;
(3) The anticipated number of agricultural producers and/or rural small businesses to be served;
(4) An itemized budget—compute total cost per rural small business or
agricultural producer served—matching funds should be clearly identified as cash;

(5) The geographic scope of the proposed project;

(6) Applicant’s experience as follows:
   (i) If applying for a renewable energy development assistance grant, the applicant’s experience in completing similar renewable energy development assistance activities, including the number of similar projects the applicant has performed and the number of years the applicant has been performing a similar service.
   (ii) If applying for an energy audit grant, the number of energy audits and assessments the applicant has completed and the number of years the applicant has been performing those services;
   (iii) For all applicants, the amount of experience in administering energy audit, renewable energy development assistance, or similar activities using State or Federal support.

(7) Applicant’s resources, including personnel, finances, and technology, to complete what is proposed. If an application is for projects located in multiple states, resources must be sufficient to complete all projects;

(8) Leveraging and commitment of other sources of funding being brought to the project. Leveraged funds should be clearly identified as cash and by source. Written documentation/confirmation from the party committing a specific amount of leveraged funds is required;

(9) Outreach activities/marketing efforts specific to conducting energy audit and renewable energy development assistance including:
   (i) Project title;
   (ii) Goals of the project;
   (iii) Identified need;
   (iv) Target audience;
   (v) Timeline and type of activities/action plan; and
   (vi) Marketing strategies.

(10) Method and rationale used to select the areas and businesses that will receive the service.

(11) Brief description of how the work will be performed, including whether organizational staff, consultants, or contractors will be used.

(f) The most recent financial audit (not more than 18 months old) of the applicant, or subdivision thereof, that will be performing the proposed work. If such an audit is not available, the latest financial information that shows the financial capacity of the applicant, or subdivision thereof, to perform the proposed work. Such information may include, but is not limited to, the most recent year-end balance sheet, income statement, and other appropriate data that identify the applicant’s resources.

(g) The applicant’s Dun and Bradstreet Data Universal Numbering System (DUNS) number.

§ 4280.191 Evaluation of energy audit and renewable energy development assistance grant applications.

Upon receipt of an application, the Agency will conduct a review to determine if the applicant and project are eligible. The Agency will notify the applicant in writing of the Agency’s findings. If the Agency has determined that either the applicant or project is ineligible, it will include in the notification the reason(s) for its determination(s).

§ 4280.192 Scoring energy audit and renewable energy development assistance grant applications.

Agency personnel will score each application using the criteria specified in paragraphs (a) through (h) of this section, with a maximum score of 100 points possible.

(a) Project proposal (maximum score of 10 points). The applicant will be scored based on its in-house ability to conduct audits versus using third party auditing organizations as illustrated in the application.

(1) If the applicant proposes to use at least 51 percent of the awarded funding to employ internal, qualified auditors and/or renewable energy specialists for program implementation, up to 10 points will be awarded as follows:
   (i) If the percentage is between 51 percent and 75 percent (inclusive), 5 points will be awarded.
   (ii) If the percentage is more than 75 percent, 10 points will be awarded.

(2) If the applicant proposes to use less than 51 percent of the awarded funding to employ internal, qualified auditors and/or renewable energy specialists for program implementation, points will not be awarded.

(1) Method and rationale used to select the areas and businesses that will receive the service.

(ii) If the percentage is more than 75 percent, 10 points will be awarded.

(2) If the applicant proposes to use less than 51 percent of the awarded funding to employ internal, qualified auditors and/or renewable energy specialists for program implementation, points will not be awarded.
auditors and/or renewable energy specialists for program implementation, zero points will be awarded.

(b) Use of Grant Funds for Administrative Expenses (maximum score of 10 points). Grantees selected to participate may use up to 5 percent of their award for administrative expenses.

(1) If the applicant proposes to use none of the grant funds for Administrative Expenses, 10 points will be awarded.

(2) If the applicant proposes to use a portion (up to 5 percent) of the grant funds for Administrative Expenses, zero points will be awarded.

(c) Applicant’s organizational experience in completing proposed activity (maximum score of 15 points). The applicant will be scored on the experience of the organization in meeting the benchmarks below. This means that an organization must have been in business and provided services as noted in the scoring requirements. An organization’s experience must be documented with references and resumes. Points will be awarded as follows:

(1) More than 3 years of experience, 15 points will be awarded.

(2) At least 2 years and up to and including 3 years of experience, 10 points will be awarded.

(3) At least 1 year but less than 2 years of experience, 5 points will be awarded.

(4) Less than 1 year of experience, zero points will be awarded.

(d) Geographic scope of project in relation to identified need (maximum score of 10 points). (1) If the applicant’s proposed or existing service area is State-wide or includes all or parts of multiple states, and the marketing and outreach plan has identified needs throughout that service area, 10 points will be awarded.

(2) If the applicant’s proposed or existing service area consists of multiple counties in a single State and the marketing and outreach plan has identified needs throughout that service area, 7.5 points will be awarded.

(3) If the applicant’s service area consists of a single county or municipality and the marketing and outreach plan has identified needs throughout that service area, 5 points will be awarded.

(e) Number of agricultural producers/ rural small businesses to be served (maximum score of 15 points). (1) If the applicant plans to provide audits to ultimate recipients with average audit costs of $1,000 or less, 15 points will be awarded.

(2) If the applicant plans to provide audits to ultimate recipients with average audit costs over $1,000 but less than $1,500, 10 points will be awarded.

(3) If the applicant plans to provide audits to ultimate recipients with average audit costs of at least $1,500 but less than $2,000, 5 points will be awarded.

(f) Potential of project to produce energy savings and its attending environmental benefits (maximum score of 25 points). Applicants can be awarded points under both paragraphs (f)(1) and (f)(2) of this section.

(1) If the applicant has an existing program that can demonstrate the achievement of energy savings with the agricultural producers and/or rural small businesses it has served, 13 points will be awarded.

(2) If the applicant provides evidence that it has received awards in recognition of its renewable energy, energy savings, or energy-based technical assistance, up to 12 points will be awarded based on number of awards and rigourousness of the competition for each award.

(g) Marketing and outreach plan (maximum score of 10 points). If the applicant includes in the application a marketing and outreach plan and provides a satisfactory discussion of each of the following criteria, two points for each of the following will be awarded:

(1) The goals of the project;

(2) Identified need;

(3) Target beneficiaries;

(4) Timeline and action plan; and

(5) Marketing strategies and supporting data for strategies.

(h) Level and commitment of other funds for the project (maximum score of 5 points). (1) If the applicant proposes to leverage grant funding with 50 percent or more in non-State and non-Federal government matching funds for the subject grant, and has a written commitment for those funds, 5 points will be awarded.

944
(2) If the applicant proposes to leverage grant funding with less than 50 percent but more than 20 percent in non-State and non-Federal government matching funds for the subject grant, and has a written commitment for those funds, 2 points will be awarded.

(3) If the applicant proposes 20 percent or less in non-State and non-Federal government matching funds, zero points will be awarded.

§ 4280.193 Selecting energy audit and renewable energy development assistance grant applications for award.

Applications will be scored by the State Offices and submitted to the National Office for review. To ensure the equitable geographic distribution of funds, the two highest scoring applications from each State, based on the scoring criteria established under § 4280.192 will be submitted to the National Office to compete for funding.

(a) Ranking of applications. All applications submitted to the National Office will be ranked. All applications that are ranked will be considered for selection for funding.

(b) Selection of applications for funding. Using the ranking created under paragraph (a) of this section, the Agency will consider the score an application has received compared to the scores of other ranked applications, with higher scoring applications receiving first consideration for funding.

(c) Funding selected applications. As applications are funded, if insufficient funds remain to fund the next highest scoring application, the Agency may elect to fund a lower scoring application. Before this occurs, the Agency will provide the applicant of the higher scoring application the opportunity to reduce the amount of its grant request to the amount of funds available. If the applicant agrees to lower its grant request, it must certify that the purposes of the project can be met, and the Administrator must determine the project is financially feasible at the lower amount.

(d) Disposition of ranked applications not funded. Based on the availability of funding, a ranked application submitted under this subpart may not be funded. Such ranked applications will not be carried forward into Fiscal Year 2012 and the Agency will notify the applicant in writing.

§ 4280.194 Actions prior to grant closing.

Applicants expecting funds from other sources for use in completing projects being partially financed with Agency funds must have these funds from other such sources prior to grant closing. Agency funds will not be expended in advance of funds committed to the project from other sources without prior Agency approval.

§ 4280.195 Awarding and administering energy audit and renewable energy development assistance grants.

Energy audit and renewable energy development assistance grants under this subpart will be awarded and administered in accordance with Departmental regulations and with paragraphs (a) through (e) of this section.

(a) Letter of conditions. The Agency will notify the approved applicant in writing, setting out the conditions under which the grant will be made. The notice will include those matters necessary to ensure that the proposed grant is completed in accordance with the terms of the scope of work and budget, that grant funds are expended for authorized purposes, and that the applicable requirements prescribed in the relevant Departmental regulations are complied with. The Letter of Conditions will be sent to the applicant.

(b) Applicant's intent to meet conditions. Upon reviewing the conditions and requirements in the letter of conditions, the applicant must complete, sign, and return Form RD 1942-46 to the Agency; or if certain conditions cannot be met, the applicant may propose alternate conditions to the Agency. The Agency must concur with any changes proposed to the Letter of Conditions by the applicant before the application will be further processed.

(c) Forms. The forms specified in paragraphs (c)(1) through (c)(6) of this section will be attached to the letter of conditions referenced in paragraph (a) of this section. The forms specified in paragraphs (c)(1) through (c)(5) of this section must be submitted prior to
§ 4280.196 Servicing energy audit and renewable energy development assistance grants.

Energy audit and renewable energy development assistance grants will be serviced in accordance with the requirements specified in Departmental regulations, 7 CFR part 1951, subparts E and O, and paragraphs (a) through (n) of this section.

(a) Inspections. Grantees will permit periodic inspection of the project operations by a representative of the Agency.

(b) Programmatic changes. The grantee shall obtain prior Agency approval for any change to the scope or objectives of the approved project. Failure to obtain prior approval of changes to the scope of work or budget may result in suspension, termination, and recovery of grant funds.

(c) Changes in project cost or scope. If there is a significant reduction in project cost or changes in project scope, the applicant’s funding needs, eligibility, and scoring, as applicable, will be reassessed. Decreases in Agency funds will be based on revised project costs and other selection factors; however, other factors, including Agency regulations used at the time of grant approval, will remain the same. Obligated grant funds not needed to complete the project will be de-obligated.

(d) Transfer of obligations. The grantee may request a transfer of obligation to a different (substitute) grantee. Subject to Agency approval, an obligation of funds established for a grantee may be transferred to a substitute grantee provided:

(1) The substituted grantee
   (i) Is eligible;
   (ii) Has a close and genuine relationship with the original grantee; and
   (iii) Has the authority to receive the assistance approved for the original grantee;

(2) The need, purpose(s), and scope of the project for which the Agency funds will be used remain substantially unchanged.

(e) Financial management system and records. (1) The grantee will provide for Financial Management Systems that will include:

   (i) Accurate, current, and complete disclosure of the financial result of each grant.
   (ii) Records that identify adequately the source and application of funds for grant-supporting activities, together with documentation to support the records. Those records shall contain information pertaining to grant awards and authorizations, obligations, unobligated balances, assets, liabilities, outlays, and income.
   (iii) Effective control over and accountability for all funds. Grantee shall adequately safeguard all such assets and shall ensure that funds are used solely for authorized purposes.

(2) The grantee will retain financial records, supporting documents, statistical records, and all other records pertinent to the grant for a period of at least 3 years after completion of grant activities except that the records shall be retained beyond the 3-year period if audit findings have not been resolved or if directed by the United States. Microfilm copies may be substituted in lieu of original records. The Agency and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the grantee which are
pertinent to the specific grant for the purpose of making audit, examination, excerpts, and transcripts.

(f) Audit requirements. Grantees must provide an annual audit in accordance with 7 CFR part 3052.

(g) Fund disbursement. The Agency will determine, based on the applicable Departmental regulations, whether disbursement of a grant will be by advance or reimbursement. A SF-270 must be completed by the grantee and submitted to the Agency no more often than monthly to request either advance or reimbursement of funds. Upon receipt of a properly completed SF-270, the funds will be requested through the field office terminal system. Ordinarily, payment will be made within 30 days after receipt of a proper request for advance or reimbursement.

(h) Deobligation of grant funds. Funds remaining after all costs incident to the project have been paid or provided for are subject to deobligation.

(i) Monitoring of project. Grantees are responsible for ensuring that all activities are performed within the approved scope of work and that funds are only used for approved purposes. Grantees shall constantly monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, financial resources are appropriately expended by contractors (if applicable), and any other performance objectives identified in the scope of work are being achieved. The Agency will monitor grantees to ensure that activities are performed in accordance with the Agency-approved scope of work and to ensure that funds are expended for approved purposes. The Agency’s monitoring of grantees neither relieves the grantee of its responsibilities to ensure that activities are performed within the scope of work approved by the Agency and that funds are expended for approved purposes only nor provides recourse or a defense to the grantee should the grantee conduct unapproved activities, engage in unethical conduct, engage in activities that are or give the appearance of a conflict of interest, or expend funds for unapproved purposes.

(j) Federal financial reports. A SF-425 and a project performance report will be required of all grantees on a semi-annual basis. The grantee will complete the project within the total sums available to it, including the grant, in accordance with the scope of work and any necessary modifications thereof prepared by grantee and approved by the Agency.

(k) Performance reports. Grantees must submit to the Agency, in writing, semiannual performance reports and a final performance report. Grantees are to submit an original of each report to the Agency.

(1) Semiannual performance reports. Project performance reports shall include, but not be limited to, the following:

(i) A comparison of actual accomplishments to the objectives established for that period (e.g., the number of audits performed, number of recipients of renewable energy development assistance);

(ii) A list of recipients, each recipient’s location, and each recipient’s NAICS code;

(iii) Problems, delays, or adverse conditions, if any, that have in the past or will in the future affect attainment of overall project objectives, prevent meeting time schedules or objectives, or preclude the attainment of particular project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or planned to resolve the situation;

(iv) Percentage of financial resources expended on contractors; and

(v) Objectives and timetable established for the next reporting period.

(2) Final performance report. A final performance report will be required with the final Federal financial report within 90 days after project completion. In addition to the information required under paragraph (k)(1) of this section, the final performance report must contain the information specified in paragraphs (k)(2)(i) and (k)(2)(ii), as applicable, of this section.

(i) For energy audit projects, the final performance report must provide complete information regarding:

(A) The number of audits conducted,

(B) A list of recipients (agricultural producers and rural small businesses) with each recipient’s North American Industry Classification System code,
(C) The location of each recipient,
(D) The cost of each audit,
(E) The expected energy saved for each audit conducted if the audit is implemented, and
(F) The percentage of financial resources expended on contractors.

(ii) For renewable energy development assistance projects, the final performance report must provide complete information regarding:
(A) A list of recipients with each recipient’s North American Industry Classification System code,
(B) The location of each recipient,
(C) The expected renewable energy that would be generated if the projects were implemented, and
(D) The percentage of financial resources expended on contractors.

(l) Final status report. One year after submittal of the final performance report, the grantee will provide the Agency a final status report on the number of projects that are proceeding with one or all of the grantee’s recommendations, including the amount of energy saved and the amount of renewable energy generated, as applicable.

(m) Other reports. The Agency may request any additional project and/or performance data for the project for which grant funds have been received.

(n) Grant close-out and related activities. In addition to the requirements specified in the Departmental regulations, failure to submit satisfactory reports on time under the provisions of paragraphs (i) through (m) of this section may result in the suspension or termination of a grant. The provisions of this section apply to grants and subgrants.

§§ 4280.197–4280.199 [Reserved]

§ 4280.200 OMB control numbers.

The information collection requirements contained in the regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control numbers 0570–0050, 0570–0059, and 0570–0061. A person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

APPENDIX A TO SUBPART B OF PART 4280—TECHNICAL REPORTS FOR PROJECTS WITH TOTAL ELIGIBLE PROJECT COSTS OF $200,000 OR LESS

The Technical Report for projects with total eligible project costs of $200,000 or less must demonstrate that the project design, procurement, installation, startup, operation, and maintenance of the renewable energy system or energy efficiency improvement will operate or perform as specified over its design life in a reliable and a cost-effective manner. The Technical Report must also identify all necessary project agreements, demonstrate that those agreements will be in place, and that necessary project equipment and services are available over the design life.

All technical information provided must follow the format specified in Sections 1 through 10 of this appendix. Supporting information may be submitted in other formats. Design drawings and process flowcharts are encouraged as exhibits. A discussion of each topic is not necessary if the topic is not applicable to the specific project. Questions identified in the Agency’s technical review of the project must be answered to the Agency’s satisfaction before the application will be approved. The applicant must submit the original technical report plus one copy to the Rural Development State Office. Depending on the level of engineering required for the specific project or if necessary to ensure public safety, the services of a licensed professional engineer or a team of licensed professional engineers may be required.

SECTION 1. BIOENERGY

The technical requirements specified in this section apply to bioenergy projects, which are, as defined in §4280.103, renewable system[s] that produce fuel, thermal energy, or electric power from a biomass source, other than an anaerobic digester project.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credentials for each professional.

(b) Agreements, permits, and certifications.

(1) Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits.

(2) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the
utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(3) Identify and address environmental issues, including any compliance issues associated with or expected as a result of the project on Form RD 1940-20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(c) Resources assessment. Provide adequate and appropriate evidence of the availability of the renewable resource required for the system to operate as designed. Indicate the type, quantity, quality, and seasonality of the biomass resource, including harvest and storage, where applicable. Where applicable, indicate shipping or receiving method and required infrastructure for shipping. For proposed projects with an established resource, provide a summary of the resource.

(d) Design and engineering. Applicants must submit a statement certifying that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:

1. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose;

2. List possible suppliers and models of major pieces of equipment;

3. Provide a description of the components, materials, or systems to be installed. Include the location of the project;

4. Provide a one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system;

5. Describe the expected electric power, fuel production, or thermal energy production of the proposed system as rated and as expected in actual field conditions. For systems with a capacity of more than 20 tons per day of biomass, address performance on a monthly and annual basis. For small projects such as a commercial biomass furnace or pelletizer of up to 5 tons daily capacity, proven, commercially available devices need not be addressed in detail. Describe the uses of or the market for electricity, heat, or fuel produced by the system;

6. Discuss the impact of reduced or interrupted biomass availability on the system process; and

7. Describe the project site and address issues such as proximity to the load or the electrical grid, unique safety concerns, and whether special circumstances exist.

(e) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate that the project can be adequately managed and be able to identify impacts of any delays on the project completion. The applicant must submit a statement certifying that the project will be completed within 2 years from the date of approval.

(f) Project economic assessment. Provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following established operation, the successful applicant must deliver invoices and evidence of payment.

1. Operations and maintenance. Identify any unique operations and maintenance requirements of the project necessary for the system to operate as designed over the design life. State the design life of the system.

1. Provide information on all system warranties. A minimum 3-year warranty for equipment and a 10-year warranty on design are expected.

2. If the project has any unique operation and maintenance issues, describe them.

1. Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.

SECTION 2. ANAEROBIC DIGESTER PROJECTS

The technical requirements specified in this section apply to anaerobic digester projects, which are, as defined in §4280.103, renewable energy systems that use animal waste and other organic substrates to produce thermal or electrical energy via anaerobic digestion.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credentials for each professional.

(b) Agreements, permits, and certifications.

1. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits.

2. For systems planning to interconnect with a utility, describe the utility’s system
interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. These agreements must be in place even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(3) Identify all environmental issues, including any compliance issues associated with or expected as a result of the project on Form RD 1940–20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of digestable substrate resource available. Indicate the source of the data and assumptions. Indicate the substrates used as digester inputs, including animal wastes, food-processing wastes, or other organic wastes in terms of type, quantity, seasonality, and frequency of collection. Describe any special handling of feedstock that may be necessary. Describe the process for determining the feedstock resource. Show the digestion conversion factors and calculations used to estimate biogas production and heat or power production.

(d) Design and engineering. Applicants must submit a statement certifying that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:

(1) Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose;
(2) List possible suppliers and models of major pieces of equipment;
(3) Provide a description of the components, materials, or systems to be installed. Include the location of the project;
(4) Provide a one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system;
(5) Describe the expected electric power, fuel production, or thermal energy production of the proposed system as rated and as expected in actual field conditions. Describe the uses of the or the market for electricity, heat, or fuel produced by the system; and
(6) Describe the project site and address issues such as proximity to the load or the electrical grid, unique safety concerns, and whether special circumstances exist.

(e) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate the project can be adequately managed and be able to identify impacts of any delays on the project completion. The applicant must submit a statement certifying that the project will be completed within 2 years from the date of approval.

(f) Project economic assessment. Provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Include a statement from the applicant certifying “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following established operation, the successful applicant must deliver invoices and evidence of payment.

(i) Operations and maintenance. Identify any unique operations and maintenance requirements of the project necessary for the system to operate as designed over the design life. State the design life of the system.

(1) Provide information on all system warranties. A minimum 3-year warranty for equipment and a 10-year warranty on design are expected.
(2) If the project has any unique operation and maintenance issues, describe them.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.

SECTION 3. GEOTHERMAL, ELECTRIC GENERATION

The technical requirements specified in this section apply to electric generation geothermal projects, which are, as defined in §1230.163, systems that use geothermal energy to produce high pressure steam for electric power production.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credential for each professional.

(b) Agreements, permits, and certifications.

(1) Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including any permits or agreements required for well construction...
and for disposal or re-injection of cooled geothermal waters and the schedule for securing those agreements and permits.

(2) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(3) Identify all environmental issues, including any compliance issues associated with or expected as a result of the project on Form RD 1940-20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(c) Resources assessment. Provide adequate and appropriate evidence of the availability of the renewable resource required for the system to operate as designed. Indicate the quality of the geothermal resource, including temperature, flow, and sustainability and what conversion system is to be installed. Describe any special handling of cooled geothermal waters that may be necessary. Describe the process for determining the geothermal resource, including measurement setup for the collection of the geothermal resource data. For proposed projects with an established resource, provide a summary of the resource and the specifications of the measurement setup.

(d) Design and engineering. Applicants must submit a statement certifying that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:

(1) Provide authoritative evidence that the system will be designed and engineered as to meet its intended purpose;
(2) List possible suppliers and models of major pieces of equipment;
(3) Provide a description of the components, materials, or systems to be installed. Include the location of the project;
(4) Provide a one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system;
(5) Describe the expected electric power, fuel production, or thermal energy production of the proposed system as rated and as expected in actual field conditions. Describe the uses of or the market for electricity, heat, or fuel produced by the system; and
(6) Describe the project site and address issues such as proximity to the load or the electrical grid, unique safety concerns, and whether special circumstances exist.

(e) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate that the project can be adequately managed and be able to identify impacts of any delays on the project completion. The applicant must submit a statement certifying that the project will be completed within 2 years from the date of approval.

(f) Project economic assessment. Provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Include a statement from the applicant certifying that ‘open and free’ competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following established operation, the successful applicant must deliver invoices and evidence of payment.

(i) Operations and maintenance. Identify any unique operations and maintenance requirements of the project necessary for the system to operate as designed over the design life. State the design life of the system.

(1) Provide information on all system warranties. A minimum 3-year warranty for equipment and a 10-year warranty on design are expected.
(2) If the project has any unique operation and maintenance issues, describe them.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.

SECTION 4. GEOTHERMAL, DIRECT USE

The technical requirements specified in this section apply to direct use geothermal projects, which are, as defined in 4280.103, systems that use thermal energy directly from a geothermal source.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credentials for each professional.

(b) Agreements, permits, and certifications.
(1) Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including any permits or agreements required for the project; identify any compliance issues associated with or expected as a result of the project on Form RD 1940–20, “Request for Environmental Information”; and in compliance with 7 CFR part 1940, subpart G of this title.

(c) Resources assessment. Provide adequate and appropriate evidence of the availability of the renewable resource required for the system to operate as designed. Indicate the quality of the geothermal resource, including temperature, flow, and sustainability and what direct use system is to be installed. Describe any special handling of cooled geothermal waters that may be necessary. Describe the process for determining the geothermal resource, including measurement setup for the collection of the geothermal resource data. For proposed projects with an established resource, provide a summary of the resource and the specifications of the measurement setup.

(d) Design and engineering. Applicants must submit a statement certifying that their project will be designed and engineered so as to meet its intended purpose; will ensure public safety; and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:

(1) Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose;
(2) List possible suppliers and models of major pieces of equipment;
(3) Provide a description of the components, materials, or systems to be installed. Include the location of the project;
(4) Provide one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system;
(5) Describe the expected thermal energy production of the proposed system as rated and as expected in actual field conditions. Describe the uses of, or the market for, heat produced by the system; and
(6) Describe the project site and address issues such as proximity to the load, unique safety concerns, and whether special circumstances exist.

(e) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate the project can be adequately managed and be able to identify impacts of any delays on the project completion. The applicant must submit a statement certifying that the project will be completed within 2 years from the date of approval.

(f) Project economic assessment. Provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following established operation, the successful applicant must deliver invoices and evidence of payment.

(i) Operations and maintenance. Identify any unique operations and maintenance requirements of the project necessary for the system to operate as designed over the design life. State the design life of the system.

(1) Provide information on all system warranties. A minimum 3-year warranty for equipment and a 10-year warranty on design are expected.
(2) If the project has any unique operation and maintenance issues, describe them.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.

SECTION 5. HYDROGEN

The technical requirements specified in this section apply to hydrogen projects, which are, as defined in §4280.103, renewable energy systems that produce hydrogen, or a renewable energy system that uses mechanical or electric power or thermal energy from a renewable resource using hydrogen as an energy transport medium.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credentials for each professional.

(b) Agreements, permits, and certifications.

(1) Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits.
(2) For systems planning to interconnect with a utility, describe the utility’s system
interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. Design and engineering. Applicants must submit a statement certifying that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:

1. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose.
2. List possible suppliers and models of major pieces of equipment.
3. Provide a description of the components, materials, or systems to be installed. Include the location of the project;
4. Provide a one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system; and
5. Describe the project site and address issues such as proximity to the load or the electrical grid, unique safety concerns, and whether special circumstances exist.

(a) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate the project can be adequately managed and be able to identify impacts of any delays on the project completion. The applicant must submit a statement certifying that the project will be completed within 2 years from the date of approval.

(b) Project economic assessment. Provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(c) Equipment procurement. Include a statement from the applicant certifying that "open and free" competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(d) Design and engineering. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following established operation, the successful applicant must deliver invoices and evidence of payment.

1. Operations and maintenance. Identify any unique operations and maintenance requirements of the project necessary for the system to operate as designed over the design life. State the design life of the system.
2. If the project has any unique operation and maintenance issues, describe them.

(i) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.

SECTION 6. SOLAR, SMALL

The technical requirements specified in this section apply to small solar electric projects and small solar thermal projects, as defined in §4280.103.

Small solar electric projects are those for which the rated power of the system is 10kW or smaller. Small solar electric projects are either stand-alone (off grid) or interconnected to the grid at less than 600 volts (on grid).

Small solar thermal projects are those for which the rated storage volume of the system is 240 gallons or smaller, or which have a collector area of 1,000 square feet or less.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credentials for each professional.

(b) Agreements, permits, and certifications.
1. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits.
2. For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their...
interconnection agreement, describe the applicable local net metering program.

(3) Identify all environmental issues, including any compliance issues associated with or expected as a result of the project on Form RD 1940–20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of solar resource available. Indicate the source of the solar data and assumptions.

(d) Design and engineering. Applicants must submit a statement certifying that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:

(1) Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose;

(2) List possible suppliers and models of major pieces of equipment;

(3) Provide a description of the components, materials, or systems to be installed. Include the location of the project;

(4) Provide a one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system; and

(5) Describe the project site and address issues such as solar access, orientation, proximity to the load or the electrical grid, unique safety concerns, and whether special circumstances exist.

(e) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate that the project can be adequately managed and be able to identify impacts of any delays on the project completion. The applicant must submit a statement certifying that the project will be completed within 2 years from the date of approval.

(f) Project economic assessment. Provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following establishment of operation, the successful applicant must deliver invoices and evidence of payment.

(i) Operations and maintenance. Identify any unique operation and maintenance requirements of the project necessary for the system to operate as designed over the design life. State the design life of the system.

(1) Provide information on all system warranties. A minimum 3-year warranty for equipment and a 10-year warranty on design are expected.

(2) If the project has any unique operation and maintenance issues, describe them.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.

SECTION 7. SOLAR, LARGE

The technical requirements specified in this section apply to large solar electric projects and large solar thermal projects, as defined in §4280.103.

Large solar electric systems are those for which the rated power of the system is larger than 10kW. Large solar electric systems are either stand-alone (off grid) or interconnected to the grid (on grid).

Large solar thermal systems are those for which the rated storage volume of the system is greater than 240 gallons or that have a collector area of more than 1,000 square feet.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credential for each professional.

(b) Agreements, permits, and certifications.

(1) Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits.

(2) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(3) Identify all environmental issues, including any compliance issues associated with or expected as a result of the project on Form RD 1940–20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.
(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of solar resource available. Indicate the source of the solar data and assumptions.

(d) Design and engineering. Applicants must submit a statement certifying that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:

(1) Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose;

(2) List possible suppliers and models of major pieces of equipment;

(3) Provide a description of the components, materials, or systems to be installed. Include the location of the project;

(4) Provide a one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system; and

(5) Describe the project site and address issues such as solar access, orientation, proximity to the load or the electrical grid, unique safety concerns, and whether special circumstances exist.

(e) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate the project can be adequately managed and be able to identify impacts of any delays on the project completion. The applicant must submit a statement certifying that the project will be completed within 2 years from the date of approval.

(f) Project economic assessment. Provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project's cost effectiveness.

(g) Equipment procurement. Include a statement from the applicant certifying that "open and free" competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following established operation, the successful applicant must deliver invoices and evidence of payment.

(i) Operations and maintenance. Identify any unique operations and maintenance requirements of the project necessary for the system to operate as designed over the design life. State the design life of the system.

(1) Provide information on all system warranties. A minimum 3-year warranty for equipment and a 10-year warranty on design are expected.

(2) If the project has any unique operation and maintenance issues, describe them.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.

SECTION 8. WIND, SMALL

The technical requirements specified in this section apply to small wind systems, which are, as defined in §4280.103, wind energy systems for which the rated power of the wind turbine is 100 kW or smaller and with a generator hub height of 120 feet or less. Small wind systems are either stand-alone or connected to the local electrical system at less than 600 volts.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credentials for each professional.

(b) Agreements, permits, and certifications.

(1) Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits.

(2) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(3) Identify all environmental issues, including any compliance issues associated with or expected as a result of the project on Form RD 1940-20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of local wind resource where the small wind turbine is to be installed. Indicate the source of the wind data and assumptions.

(d) Design and engineering. Applicants must certify that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:
(1) Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose;
(2) List possible suppliers and models of major pieces of equipment;
(3) Provide a description of the components, materials, or systems to be installed. Include the location of the project;
(4) Provide a one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system; and
(5) Describe the project site and address issues such as proximity to the load or the electrical grid, unique safety concerns, and whether special circumstances exist.

Section 9. Wind, Large

The technical requirements specified in this section apply to large wind systems, which are, as defined in §4280.103, wind energy projects for which the rated power of the individual wind turbine(s) is larger than 100kW.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credentials for each professional.

(b) Agreements, permits, and certifications.
(1) Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits.
(2) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(3) Identify all environmental issues, including any compliance issues associated with or expected as a result of the project on Form RD 1990–20, “Request for Environmental Information,” and in compliance with 7 CFR part 3015 of this title.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of local wind resource where the large wind turbine is to be installed. Indicate the source of the wind data and assumptions. Projects greater than 500kW must obtain wind data from the proposed project site. For such projects, describe the proposed measurement setup for the collection of the wind resource data. For proposed projects with an established wind resource, provide a summary of the wind resource and the specifications of the measurement setup. Large wind systems larger than 500kW in size will typically require at least 1 year of on-site monitoring. If less than 1 year of data is used, the qualified meteorological consultant must provide a detailed analysis of correlation between the site data and a nearby long-term measurement site.

(d) Design and engineering. Applicants must submit a statement certifying that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. In addition, applicants must:

(i) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.
(1) Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose;
(2) List possible suppliers and models of major pieces of equipment;
(3) Provide a description of the components, materials, or systems to be installed. Include the location of the project;
(4) Provide one-line diagram for the electrical interconnection. Provide diagrams or schematics as required showing all major installed structural, mechanical, and electrical components of the system; and
(5) Describe the project site and address issues such as proximity to the load or the electrical grid, unique safety concerns, and whether special circumstances exist.

(e) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate the project can be adequately managed and be able to identify impacts of any delays on the project completion. The applicant must submit a statement certifying that the project will be completed within 3 years from the date of approval.

(f) Project economic assessment. Provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following established operation, the successful applicant must deliver invoices and evidence of payment.

(i) Operations and maintenance. Identify any unique operations and maintenance requirements of the project necessary for the system to operate as designed over the design life. State the design life of the system.

(1) Provide information on all system warranties. A minimum 3-year warranty for equipment and a 10-year warranty on design are expected.
(2) If the project has any unique operation and maintenance issues, describe them.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives.

SECTION 10. ENERGY EFFICIENCY IMPROVEMENTS

The technical requirements specified in this section apply to energy efficiency improvement projects, which are, as defined in §4280.103, improvements to a facility, building, or process that reduce energy consumption, or reduce energy consumed per square foot.

(a) Qualifications of key project service providers. List all key project service providers. If one or more licensed professionals are involved in the project, provide the credentials for each professional. For projects with total eligible project costs greater than $50,000, also discuss the qualifications of the energy auditor, including any relevant certifications by recognized organizations or bodies.

(b) Agreements, permits, and certifications.

(1) The applicant must certify that they will comply with all necessary agreements and permits required for the project. Indicate the status and schedule for securing those agreements and permits.

(2) Identify all environmental issues, including any compliance issues associated with or expected as a result of the project on Form RD 1940-20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(c) Energy assessment and audits. For all energy efficiency improvement projects, provide adequate and appropriate evidence of energy savings expected when the system is operated as designed.

(1) For energy efficiency improvement projects with total eligible project costs greater than $50,000, an energy audit must be conducted. An energy audit is a written report by an independent, qualified party that documents current energy usage, recommended potential improvements and their costs, energy savings from these improvements, dollars saved per year, and simple payback. The methodology of the energy audit must meet professional and industry standards.

(2) The energy assessment or energy audit must cover the following:

(i) Situation report. Provide a narrative description of the facility or process, its energy system(s) and usage, and activity profile. Also include price per unit of energy (electricity, natural gas, propane, fuel oil, renewable energy, etc.), paid by the customer on the date of the assessment or audit. Any energy conversion should be based on use rather than source.

(ii) Potential improvements. List specific information on all potential energy-saving opportunities and the associated costs.
(iii) Technical analysis. Discuss the interactions of the potential improvements with existing energy systems.

(A) Estimate the annual energy and energy costs savings expected from each improvement identified in the potential project.

(B) Calculate all direct and attendant indirect costs of each improvement.

(C) Rank potential improvement measures by cost-effectiveness.

(iv) Potential improvement description. Provide a narrative summary of the potential improvement and its ability to provide needed benefits, including a discussion of non-energy benefits such as project reliability and durability.

(A) Provide preliminary specifications for critical components.

(B) Provide preliminary drawings of project layout, including any related structural changes.

(C) Document baseline data compared to projected consumption, together with any explanatory notes. Provide the actual total quantity of energy used (BTU) in the original building and/or equipment in the 12 months prior to the EEI project and the projected energy usage after the EEI project shall be the projected total quantity of energy used (BTU) on an annual basis for the same size or capacity as the original building or equipment. For energy efficiency improvement to equipment, if the new piece of equipment has a different capacity than the piece of equipment being replaced, the projected total quantity of energy used for the new piece of equipment shall be adjusted based on the ratio of the capacity of the replaced piece of equipment to the capacity of the new piece of equipment in accordance with the regulations.

When appropriate, show before-and-after data in terms of consumption per unit of production, time or area. Include at least 1 year’s bills for those energy sources/fuel types affected by this project. Also submit utility rate schedules, if appropriate.

(D) Identify significant changes in future related operations and maintenance costs.

(E) Describe explicitly how outcomes will be measured.

(d) Design and engineering. The applicant must submit a statement certifying that their project will be designed and engineered so as to meet the intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards.

(1) Identify possible suppliers and models of major pieces of equipment.

(2) Describe the components, materials, or systems to be installed. Include the location of the project.

(e) Project development schedule. Provide a project schedule in an appropriate level of detail that will demonstrate the project can be adequately managed. The applicant must submit a statement certifying that the project will be completed within 2 years from the date of approval.

(f) Project economic assessment. For projects with total eligible project costs greater than $50,000, provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Include a statement from the applicant certifying that ‘open and free’ competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. The project must be installed in accordance with applicable local, State, and national building and electrical codes and regulations. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules. Upon successful system installation and following established operation, the successful applicant must deliver invoices and evidence of payment.

(1) Operations and maintenance. Identify any unique operations and maintenance requirements of the project necessary for the improvement(s) to perform as designed over the design life. State the design life of the improvement(s). Provide information regarding component warranties.

(i) Dismantling and disposal of project components. Describe a plan for dismantling and proper disposal of the project components and associated wastes at the end of their useful lives.

Appendix B to Subpart B of Part 4280—Technical Reports for Projects With Total Eligible Project Costs of Greater Than $200,000

The Technical Report for projects with total eligible project costs greater than $200,000 (and for any other project that must submit a Technical Report under this appendix) must demonstrate that the project design, procurement, installation, startup, operation, and maintenance of the renewable energy system or energy efficiency improvement will operate or perform as specified over its design life in a reliable and a cost-effective manner. The Technical Report must also identify all necessary project agreements, demonstrate that those agreements will be in place, and that necessary project equipment and services are available over the design life.
All technical information provided must follow the format specified in Sections 1 through 10 of this appendix. Supporting information may be submitted in other formats. Design drawings and process flow charts are encouraged as exhibits. A discussion of each topic is not necessary if the topic is not applicable to the specific project. Questions identified in the Agency's technical review of the project must be answered to the Agency's satisfaction before the application will be approved. The applicant must submit the original technical report plus one copy to the Rural Development State Office. Renewable energy projects with total eligible project costs greater than $400,000 and for energy efficiency improvement projects with total eligible project costs greater than $200,000 require the services of a licensed professional engineer (PE) or team of PEs. Depending on the level of engineering required for the specific project or if necessary to ensure public safety, the services of a licensed PE or a team of licensed PEs may be required for smaller projects.

SECTION 1. BIOENERGY

The technical requirements specified in this section apply to bioenergy projects, which are, as defined in §4280.103, renewable energy systems that produces fuel, thermal energy, or electric power from a renewable biomass source only, other than an anaerobic digester project.

(a) Qualifications of project team. The bioenergy project team will vary according to the complexity and scale of the project. For engineered systems, the project team should consist of a system designer, a project manager, an equipment supplier, a project engineer, a construction contractor or system installer, and a system operator and maintainer. One individual or entity may serve more than one role. The project team must have demonstrated expertise in similar bioenergy systems development, engineering, installation, and maintenance. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided. The application must:

(1) Discuss the proposed project delivery method. Such methods include a design, bid, build where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the applicant’s risk, and a design/build method, often referred to as turnkey, where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;

(2) Discuss the bioenergy system equipment manufacturers of major components being considered in terms of the length of time in business and the number of units installed at the capacity and scale being considered;

(3) Discuss the project manager, equipment supplier, system designer, project engineer, and construction contractor qualifications for engineering, designing, and installing bioenergy systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available; and

(4) Describe the system operator’s qualifications and experience for servicing, operating, and maintaining bioenergy renewable energy projects or systems. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (8).

(1) Identify zoning and code issues, and required permits and the anticipated schedule for meeting those requirements and securing those permits.

(2) Identify licenses where required and the schedule for obtaining those licenses.

(3) Identify land use agreements required for the project and the anticipated schedule for securing the agreements and the term of those agreements.

(4) Identify any permits or agreements required for solid, liquid, and gaseous emissions or effluents and the schedule for securing those permits and agreements.

(5) Identify available component warranties for the specific project location and size.

(6) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(7) Identify all environmental issues, including environmental compliance issues, associated with the project on Form RD 1940-20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(8) Submit a statement certifying that the project will be installed in accordance with
applicable local, State, and national codes and regulations.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the type, quantity, quality, and seasonality of the biomass resource, including harvest and storage, where applicable. Where applicable, also indicate shipping or receiving method and required infrastructure for shipping. For proposed projects with an established resource, provide a summary of the resource.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. Projects shall be engineered by a qualified party. Systems must be engineered as a complete, integrated system with matched components. The engineering must be comprehensive, including site selection, system and component selections, and system monitoring equipment. Systems must be constructed by a qualified party.

(1) Provide a concise but complete description of the bioenergy project, including location of the project, resource characteristics, system specifications, electric power system interconnection, and monitoring equipment. Identify possible vendors and models of major system components. Describe the expected electric power, fuel production, or thermal energy production of the proposed system as rated and as expected in actual field conditions. For systems with a capacity of more than 20 tons per day of biomass, address performance on a monthly and annual basis. For small projects such as a commercial biomass furnace or pelletizer of up to 5 tons daily capacity, proven, commercially available devices need not be addressed in detail. Describe the uses of or the market for specific products or services. Provide adequate information necessary to assess the project's cost effectiveness.

(2) Describe the project site and address issues such as site access, foundations, backup equipment when applicable, and environmental concerns with emphasis on land use, air quality, water quality, soil degradation, habitat fragmentation, land use, visibility, odor, noise, construction, and installation issues. Identify any unique construction and installation issues.

(e) Project development schedule. Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shakedown. Provide a detailed description of the project timeline, including resource assessment, system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

(f) Project economic assessment. Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project, including the calculation of simple payback. Provide a detailed analysis and description of project costs, including investment incentives, productivity incentives, loans, and grants. Include other information necessary to assess the project's cost effectiveness.

(g) Equipment procurement. Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Bioenergy systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. Fully describe the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment needed for project construction, and provide a description of the startup and shakedown specifications and process and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(i) Operations and maintenance. Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. In addition:

(1) Provide information regarding available system and component warranties and availability of spare parts;

(2) Describe the routine operations and maintenance requirements of the proposed system, including maintenance schedule for...
the mechanical, piping, and electrical systems and system monitoring and control requirements. Provide information that supports expected design life of the system and timing of major component replacement or rebuilds. Discuss the costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or out-sourcing. Describe opportunities for technology transfer for long-term project operations and maintenance by a local entity or owner/operator; and

(3) For systems having a biomass input capacity exceeding 10 tons of biomass per day, provide and discuss the risk management plan for handling large, potential failures of major components.

(i) **Dismantling and disposal of project components.** Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.

**Section 2. Anaerobic Digester Projects**

The technical requirements specified in this section apply to anaerobic digester projects, which are, as defined in §4280.103, renewable energy systems that use animal or other waste and may include other organic substrates to produce biofuel, biogas, thermal, or electrical energy via anaerobic digestion.

(a) **Qualifications of project team.** The anaerobic digester project team should consist of a system designer, a project manager, an equipment supplier, a project engineer, a construction contractor, and a system operator or maintainer. One individual or entity may serve more than one role. The project team must have demonstrated commercial-scale expertise in anaerobic digester systems development, engineering, installation, and maintenance as related to the organic materials and operating mode of the system. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided. The application must:

(1) Discuss the proposed project delivery method. Such methods include a design, bid, build where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the applicant’s risk, and a design/build method, often referred to as turnkey, where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;

(2) Discuss the anaerobic digester system equipment manufacturers of major components being considered in terms of the length of time in business and the number of units installed at the capacity and scale being considered;

(3) Discuss the project manager, equipment supplier, system designer, project engineer, and construction contractor qualifications for engineering, designing, and installing anaerobic digester systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar projects designed, installed, or supplied and currently operating consistent with the substrate material with references, if available; and

(4) For regional or centralized digester plants, describe the system operator’s qualifications and experience for servicing, operating, and maintaining similar projects. Farm scale systems may not require operator experience as the developer is typically required to provide operational training during system startup and shakedown. Provide a list of the same or similar projects designed, installed, or supplied and currently operating consistent with the substrate material with references, if available.

(b) **Agreements, permits, and certifications.** Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (8).

(1) Identify zoning and code issues, and required permits and the anticipated schedule for meeting those requirements and securing those permits.

(2) Identify licenses where required and the schedule for obtaining those licenses.

(3) For regional or centralized digester plants, identify feedstock access agreements required for the project and the anticipated schedule for securing those agreements and the term of those agreements.

(4) Identify any permits or agreements required for transport and ultimate waste disposal and the schedule for securing those agreements and permits.

(5) Identify available component warranties for the specific project location and size.

(6) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(7) Identify all environmental issues, including environmental compliance issues, associated with the project on Form RD 1940-

(b) Submit a statement certifying that the project will be designed and engineered in accordance with applicable local, State, and national codes and regulations.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the substrates used as digester inputs, including animal wastes, food processing wastes, or other organic wastes in terms of type, quantity, seasonality, and frequency of collection. Describe any special handling of feedstock that may be necessary. Describe the process for determining the feedstock resource. Provide either tabular values or laboratory analysis of representative samples that include biodegradability studies to produce gas production estimates for the project on daily, monthly, and seasonal basis.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. Projects shall be engineered by a qualified party. Systems must be engineered as a complete, integrated system with matched components. The engineering must be comprehensive, including site selection, digester component selection, gas handling component selection, and gas use component selection. Systems must be constructed by a qualified party.

(1) Ensure that systems must have at least equipment installation from excavation through startup and shakedown, and operator training.

(2) Ensure that systems must have at least equipment installation from excavation through startup and shakedown, and operator training.

(f) Project economic assessment. Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project, including the calculation of simple payback. Provide a detailed analysis and description of annual project revenues and expenses. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Anaerobic digester systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. Describe fully the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment needed for project construction, and provide a description of the startup and shakedown specifications and process and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(i) Operations and maintenance. Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. The application must:

(1) Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the substrates used as digester inputs, including animal wastes, food processing wastes, or other organic wastes in terms of type, quantity, seasonality, and frequency of collection. Describe any special handling of feedstock that may be necessary. Describe the process for determining the feedstock resource. Provide either tabular values or laboratory analysis of representative samples that include biodegradability studies to produce gas production estimates for the project on daily, monthly, and seasonal basis.

(2) Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the substrates used as digester inputs, including animal wastes, food processing wastes, or other organic wastes in terms of type, quantity, seasonality, and frequency of collection. Describe any special handling of feedstock that may be necessary. Describe the process for determining the feedstock resource. Provide either tabular values or laboratory analysis of representative samples that include biodegradability studies to produce gas production estimates for the project on daily, monthly, and seasonal basis.

(3) Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Anaerobic digester systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.
year warranty on design. Provide information regarding system warranties and availability of spare parts;

(2) Describe the routine operations and maintenance requirements of the proposed project, including maintenance for the digester, the gas handling equipment, and the gas use systems. Describe any maintenance requirements for system monitoring and control equipment;

(3) Provide information that supports the expected design life of the system and the timing of major component replacement or rebuilds;

(4) Provide and discuss the risk management plan for handling large, potential failures of major components. Include in the discussion, costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or out-sourcing; and

(5) Describe opportunities for technology transfer for long-term project operations and maintenance by a local entity or owner/operator.

(1) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.

SECTION 3. GEOTHERMAL, ELECTRIC GENERATION

The technical requirements specified in this section apply to electric generation geothermal projects, which are, as defined in §4280.103, systems that use geothermal energy to produce high pressure steam for electric power production.

(a) Qualifications of project team. The electric generating geothermal plant project team should consist of a system designer, a project manager, an equipment supplier, a project engineer, a construction contractor, and a system operator and maintainer. One individual or entity may serve more than one role. The project team must have demonstrated expertise in geothermal electric generation systems development, engineering, installation, and maintenance. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided. The application must:

(1) Discuss the proposed project delivery method. Such methods include a design, bid, build where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the applicant’s risk, and a design/build method, often referred to as turnkey, where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;

(2) Discuss the geothermal plant equipment manufacturers of major components being considered in terms of the length of time in business and the number of units installed at the capacity and scale being considered;

(3) Discuss the project manager, equipment supplier, system designer, project engineer, and construction contractor qualifications for engineering, designing, and installing geothermal electric generation systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available; and

(4) Describe the system operator’s qualifications and experience for servicing, operating, and maintaining electric generating geothermal projects. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (7).

(1) Identify zoning and code issues and required permits and the anticipated schedule for meeting those requirements and securing those permits.

(2) Identify any permits or agreements required for well construction and for disposal or re-injection of cooled geothermal waters and the schedule for securing those agreements and permits.

(3) Identify land use or access to the resource agreements required for the project and the anticipated schedule for securing the agreements and the term of those agreements.

(4) Identify available component warranties for the specific project location and size.

(5) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements.

(6) Identify all environmental issues, including environmental compliance issues, associated with the project on Form RD 1940-20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(7) Submit a statement certifying that the project will be installed in accordance with
applicable local, State, and national codes and regulations.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the quality of the geothermal resource, including temperature, flow, and sustainability and what conversion system is to be installed. Describe the process for determining the geothermal resource, including measurement setup for the collection of the geothermal resource data. For proposed projects with an established resource, provide a summary of the resource and the specifications of the measurement setup.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. Projects shall be engineered by a qualified party. Systems must be engineered as a complete, integrated system with matched components. The engineering must be comprehensive, including site selection, system and component selection, conversion system component and selection, design of the local collection grid, interconnection equipment selection, and system monitoring equipment. Systems must be constructed by a qualified party.

(1) Provide a concise but complete description of the geothermal project, including location of the project, resource characteristics, thermal system specifications, electric power system, interconnection equipment and project monitoring equipment. Identify possible vendors and models of major system components. Provide the expected system energy production on a monthly and annual basis.

(2) Describe the project site and address issues such as site access, proximity to the electrical grid, environmental concerns with emphasis on land use, air quality, water quality, habitat fragmentation, visibility, noise, construction, and installation issues. Identify any unique construction and installation issues.

(e) Project development schedule. Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shakedown. Provide a detailed description of the project timeline, including resource assessment, system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

(f) Project economic assessment. Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project, including the calculation of simple payback. Provide a detailed analysis and description of project costs, including project management, resource assessment, project design, project permitting, land agreements, equipment, site preparation, system installation, startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed analysis and description of annual project revenues, including electricity sales, production tax credits, revenues from green tags, and any other production incentive programs throughout the life of the project. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Geothermal systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. Describe fully the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment needed for project construction, and provide a description of the startup and shakedown specifications and process and the conditions required for startup or shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(i) Operations and maintenance. Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. The application must:

(1) Ensure that systems must have at least a 3-year warranty for equipment. Provide information regarding turbine warranties and availability of spare parts;

(2) Describe the routine operations and maintenance requirements of the proposed project, including maintenance for the mechanical and electrical systems and system monitoring and control requirements;
(3) Provide information that supports expected design life of the system and timing of major component replacement or rebuilds;

(4) Provide and discuss the risk management plan for handling large, potential failures of major components such as the turbine. Include in the discussion, costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or out-sourcing; and

(5) Describe opportunities for technology transfer for long-term project operations and maintenance by a local entity or owner/operator.

Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.

SECTION 4. GEOTHERMAL, DIRECT USE

The technical requirements specified in this section apply to direct use geothermal projects, which are, as defined in §4280.103, systems that use thermal energy directly from a geothermal source.

(a) Qualifications of project team. The geothermal project team should consist of a system designer, a project manager, an equipment supplier, a project engineer, a construction contractor, and a system operator and maintainer. One individual or entity may serve more than one role. The project team must have demonstrated expertise in geothermal heating systems development, engineering, installation, and maintenance. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided. The application must:

(1) Discuss the proposed project delivery method. Such methods include a design, bid, build where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the applicant’s risk, and a design/build method, often referred to as turnkey, where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;

(2) Discuss the geothermal system equipment manufacturers of major components being considered in terms of the length of time in business and the number of units installed at the capacity and scale being considered;

(3) Discuss the project manager, equipment supplier, system designer, project engineer, and construction contractor qualifications for engineering, designing, and installing direct use geothermal systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available; and

(4) Describe system operator’s qualifications and experience for servicing, operating, and maintaining direct use generating geothermal projects. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (7).

(1) Identify zoning and code issues, and required permits and the anticipated schedule for meeting those requirements and securing those permits.

(2) Identify licenses where required and the schedule for obtaining those licenses.

(3) Identify land use or access to the resource agreements required for the project and the anticipated schedule for securing the agreements and the term of those agreements.

(4) Identify any permits or agreements required for well construction and for disposal or re-injection of cooled geothermal waters and the anticipated schedule for securing those permits and agreements.

(5) Identify available component warranties for the specific project location and size.

(6) Identify all environmental issues, including environmental compliance issues, associated with the project on Form RD 1940–20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(7) Submit a statement certifying that the project will be installed in accordance with applicable local, State, and national codes and regulations.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the quality of the geothermal resource, including temperature, flow, and sustainability and what direct use system is to be installed. Describe any special handling of cooled geothermal waters that may be necessary. Describe the process for determining the geothermal resource, including measurement setup for the collection of the geothermal resource data. For proposed projects with an established resource, provide a summary of the resource and the specifications of the measurement setup.

965
(d) **Design and engineering.** Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and comply with applicable laws, regulations, agreements, permits, codes, and standards. Projects shall be engineered by a qualified party. Systems must be engineered as a complete, integrated system with matched components. The engineering must be comprehensive, including site selection, system and component selection, thermal system component selection, and system monitoring equipment. Systems must be constructed by a qualified party.

(1) Provide a concise but complete description of the geothermal project, including location of the project, resource characteristics, thermal system specifications, and monitoring equipment. Identify possible vendors and models of major system components. Provide the expected system energy production on a monthly and annual basis.

(2) Describe the project site and address issues such as site access, thermal backup equipment, environmental concerns with emphasis on land use, air quality, water quality, habitat fragmentation, visibility, noise, construction, and installation issues. Identify any unique construction and installation issues.

(e) **Project development schedule.** Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shakedown. Provide a detailed description of the project timeline, including resource assessment, system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

(f) **Project economic assessment.** Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project, including the calculation of simple payback. Provide a detailed analysis and description of project costs, including project management, resource assessment, project design, project permitting, land agreements, equipment, site preparation, system installation, startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. In addition, provide other information necessary to assess the project’s cost-effectiveness.

(g) **Equipment procurement.** Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Geothermal systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) **Equipment installation.** Describe fully the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment needed for project construction, and provide a description of the startup and shakedown specifications and process and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(i) **Operations and maintenance.** Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. The application must:

(1) Ensure that systems must have at least a 3-year warranty for equipment. Provide information regarding system warranties and availability of spare parts;

(2) Describe the routine operations and maintenance requirements of the proposed project, including maintenance for the mechanical and electrical systems and system monitoring and control requirements;

(3) Provide information that supports expected design life of the system and timing of major component replacement or rebuilds;

(4) Describe how the operation and maintenance of the system, and plans for in-sourcing or out-sourcing; and

(5) Describe opportunities for technology transfer for long-term project operations and maintenance by a local entity or owner/operator.

(j) **Dismantling and disposal of project components.** Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.
SECTION 5. HYDROGEN PROJECTS

The technical requirements specified in this section apply to hydrogen projects, which are, as defined in §4280.103, renewable energy systems that produce hydrogen or, a renewable energy system that uses mechanical or electric power or thermal energy from a renewable resource using hydrogen as an energy transport medium.

(a) Qualifications of project team. The hydrogen project team will vary according to the complexity and scale of the project. For engineered systems, the project team should consist of a system designer, a project manager, an equipment supplier, a project engineer, a construction contractor or system installer, and a system operator and maintainer. One individual or entity may serve more than one role. The project team must have demonstrated expertise in similar hydrogen systems development, engineering, installation, and maintenance. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided.

The application must:

1. Discuss the proposed project delivery method. Such methods include a design, build, and install method, often referred to as turnkey, where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk.

2. Discuss the hydrogen system equipment manufacturers of major components for the hydrogen system being considered in terms of the length of time in the business and the number of units installed at the capacity and scale being considered;

3. Discuss the project manager, equipment supplier, system designer, project engineer, and construction contractor qualifications for engineering, designing, and installing hydrogen systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available; and

4. Describe the system operator’s qualifications and experience for servicing, operating, and maintaining hydrogen system equipment or projects. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (8).

1. Identify zoning and building code issues, and required permits and the anticipated schedule for meeting those requirements and securing those permits.

2. Identify licenses where required and the schedule for obtaining those licenses.

3. Identify land use agreements required for the project and the anticipated schedule for securing the agreements and the term of those agreements.

4. Identify any permits or agreements required for solid, liquid, and gaseous emissions or effluents and the anticipated schedule for securing those permits and agreements.

5. Identify available component warranties for the specific project location and size.

6. For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

7. Identify all environmental issues, including environmental compliance issues associated with the project on Form RD 1940–20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

8. Submit a statement certifying that the project will be installed in accordance with applicable local, State, and national codes and regulations.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the type, quantity, quality, and seasonality of the biomass resource. For solar, wind, or geothermal sources of energy used to generate hydrogen, indicate the local renewable resource where the hydrogen system is to be installed. Local resource maps may be used as an acceptable preliminary source of renewable resource data. For proposed projects with an established renewable resource, provide a summary of the resource.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. Projects shall be engineered by a qualified party. Systems must be engineered as a complete, integrated system with matched components. The engineering must be comprehensive, including site selection, system
and component selection, and system monitoring equipment. Systems must be constructed by a qualified party.

1. Provide a concise but complete description of the project, including location of the project, resource characteristics, system specifications, electric power system interconnection equipment, and monitoring equipment. Identify possible vendors and models of major system components. Describe the expected electric power, fuel production, or thermal energy production of the proposed system. Address performance on a monthly and annual basis. Describe the uses of or the market for electricity, heat, or fuel produced by the system. Discuss the impact of reduced or interrupted resource availability on the system process.

2. Describe the project site and address issues such as site access, foundations, backup equipment when applicable, and any environmental and safety concerns with emphasis on land use, air quality, water quality, and safety hazards. Identify any unique construction and installation issues.

3. Project development schedule. Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shakedown. Provide a detailed description of the project timeline, including resource assessment, system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

4. Project economic assessment. Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project, including the calculation of simple payback. Provide a detailed analysis and description of project costs, including project management, resource assessment, project design and engineering, project permitting, land agreements, equipment, site preparation, system installation, startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed analysis and description of annual project revenues and expenses. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. In addition, provide other information necessary to assess the project's cost effectiveness.

5. Equipment procurement. Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Hydrogen systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues, such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, and receiving, and on-site storage or inventory. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that 'open and free' competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title. (h) Equipment installation. Describe fully the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment needed for project construction, and provide a description of the startup and shakedown specifications and process and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

1. Operations and maintenance. Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. The application must:

2. Provide information regarding system warranties and availability of spare parts;

3. Describe the routine operations and maintenance requirements of the proposed project, including maintenance of the reformer, electrolyzer, or fuel cell as appropriate, and other mechanical, piping, and electrical systems and system monitoring and control requirements;

4. Provide information that supports expected design life of the system and timing of major component replacement or rebuilds;

5. Describe and discuss the risk management plan for handling large, potential failures of major components. Include in the discussion, costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or out-sourcing; and

6. Describe opportunities for technology transfer for long-term project operations and maintenance by a local entity or owner/operator.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.

Section 6. Solar, Small

The technical requirements specified in this section apply to small solar electric projects and small solar thermal projects, as defined in §4280.103.

Small solar electric projects are those for which the rated power of the system is 10kW or smaller. Small solar electric projects are...
either stand-alone (off grid) or interconnected to the grid at less than 600 volts (on grid).

Small solar thermal projects are those for which the rated storage volume of the system is 240 gallons or smaller, or which have a collector area of 1,000 square feet or less.

(a) Qualifications of project team. The small solar project team must consist of a system designer, a project manager or general contractor, an equipment supplier of major components, a system installer, and, in some cases, the owner of the application or load served by the system. One individual or entity may serve more than one role. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. The application must:

(1) Identify zoning, building, and electrical code issues, and required permits and the anticipated schedule for meeting those requirements and securing those permits, including the items specified in paragraphs (b)(1) through (5).

(2) Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (5).

(3) Provide a concise but complete description of the project, including the anticipated schedule for meeting those requirements and securing those permits.

(4) Identify all environmental issues, including environmental compliance issues, as associated with the project on Form RD 1940–20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(5) Submit a statement certifying that the project will be installed in accordance with applicable local, State, and national codes and regulations.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the source of the solar data and assumptions.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. For small solar electric systems, the engineering must be comprehensive, including solar collector design and selection, support structure design and selection, water conditioning design and selection, surface or submersible water pumps and energy storage requirements as applicable, and selection of cabling, disconnects and interconnection equipment. For small solar thermal systems, the engineering must be comprehensive, including solar collector design and selection, support structure design and selection, pump and piping design and selection, and energy storage design and selection.

(1) Provide a concise but complete description of the small solar project, including location of the project and proposed equipment specifications. Identify possible vendors and models of major system components. Provide the expected system energy production based on available solar resource data on a monthly (when possible) and annual basis and how the energy produced by the system will be used.

(2) Describe the project site and address issues such as solar access, orientation, proximity to the load or the electrical grid, environmental concerns such as water quality and land use, unique safety concerns such as hazardous materials handling, construction, and installation issues, and whether special circumstances exist.

(e) Project development schedule. Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shakedown. Provide a detailed description of the project timeline, including system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

(f) Project economic assessment. Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project, including the calculation of simple payback. Provide a detailed analysis and description of project costs, including design, permitting,
equipment, site preparation, system installation, system startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. Include a statement from the applicant certifying that the equipment installation will be individually and for the system as a whole. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Provide a detailed description of equipment certification. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that the system necessary for the system to operate as designed over the design life. The application must:

1. Ensure that systems must have at least a 5-year warranty for equipment. Provide information regarding system warranty and availability of spare parts;
2. Describe the routine operations and maintenance requirements of the proposed system, including maintenance schedules for the mechanical and electrical and software systems;
3. For owner maintained portions of the system, describe any unique knowledge, skills, or abilities needed for service operations or maintenance; and
4. Provide information regarding expected system design life and timing of major component replacement or rebuilds. Include in the discussion, costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or outsourcing.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes. Describe any environmental compliance requirements such as proper disposal or recycling procedures to reduce potential impact from any hazardous chemicals.

SECTION 7. SOLAR, LARGE

The technical requirements specified in this section apply to large solar electric projects and large solar thermal projects, as defined in §4280.103.

Large solar electric systems are those for which the rated power of the system is larger than 10kW. Large solar electric systems are either stand-alone (off grid) or interconnected to the grid (on grid).

Large solar thermal systems are those for which the rated storage volume of the system is greater than 240 gallons or that have a collector area of more than 1,000 square feet.

(a) Qualifications of project team. The large solar project team should consist of an equipment supplier of major components, a project manager, general contractor, system engineer, system installer, and system maintainer. One individual or entity may serve more than one role. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided. The application must:

1. Discuss the proposed project delivery method. Such methods include a design, bid, build where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the applicant’s risk, and a design/ build method, often referred to as turnkey, where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;
2. Discuss the qualifications of the suppliers of major components being considered;
(3) Discuss the project manager, general contractor, system engineer, and system installer qualifications for engineering, designing, and installing large solar systems, including certifications by recognized organizations. Provide a list of the same or similar systems designed or installed by the design, engineering, and installation team and currently operating with references, if available; and

(4) Describe the system operator’s qualifications and experience for servicing, operating, and maintaining the system for the proposed application. Provide a list of the same or similar systems designed or installed by the design, engineering, and installation team and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (5).

(1) Identify zoning, building, and electrical code issues, and required permits and the anticipated schedule for meeting those requirements and securing those permits.

(2) Identify available component warranties for the specific project location and size.

(3) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(4) Identify all environmental issues, including environmental compliance issues, associated with the project on Form RD 1940–20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(5) Submit a statement certifying that the project will be installed in accordance with applicable local, State, and national codes and regulations.

(c) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the source of the solar data and assumptions.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards.

(1) For large solar electric systems, the engineering must be comprehensive, including solar collector design and selection, support structure design and selection, power conditioning design and selection, surface or submersible water pumps and energy storage requirements as applicable, and selection of cabling, disconnects, and interconnection equipment. A complete set of engineering drawings, stamped by a professional engineer, must be provided.

(2) For large solar thermal systems, the engineering must be comprehensive, including solar collector design and selection, support structure design and selection, pump and piping design and selection, and energy storage design and selection. Provide a complete set of engineering drawings stamped by a professional engineer.

(3) For either type of system, provide a concise but complete description of the large solar system, including location of the project and proposed equipment and system specifications. Identify possible vendors and models of major system components. Provide the expected system energy production based on available solar resource data on a monthly (when possible) and annual basis and how the energy produced by the system will be used.

(4) For either type of system, provide a description of the project site and address issues such as solar access, orientation, proximity to the load or the electrical grid, environmental concerns such as land use, water quality, habitat fragmentation, and aesthetics, unique safety concerns, construction, and installation issues, and whether special circumstances exist.

(e) Project development schedule. Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shakedown. Provide a detailed description of the project timeline, including system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

(f) Project economic assessment. Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project, including the calculation of simple payback. Provide a detailed analysis and description of project costs, including Design and engineering, permitting, equipment, site preparation, system installation, system startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. Provide a detailed description of historic or expected energy use and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.
(g) Equipment procurement. Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Large solar systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Provide a detailed description of equipment certification. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. Describe fully the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment, including cranes and other devices needed for project construction, and provide a description of the startup and shakedown specifications and process and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(1) Operations and maintenance. Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. The application must:

1. Ensure that systems must have at least a 5-year warranty for equipment. Provide information regarding system warranty and availability of spare parts;
2. Describe the routine operations and maintenance requirements of the proposed system, including maintenance schedules for the mechanical, electrical, and software systems;
3. For owner maintained portions of the system, describe any unique knowledge, skills, or abilities needed for service operations or maintenance; and
4. Provide information regarding expected system design life and timing of major component replacement or rebuilds. Include in the discussion, costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or outsourcing.

(g) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes. Describe any environmental compliance requirements such as proper disposal or recycling procedures to reduce any potential impact from hazardous chemicals.

SECTION 8. WIND, SMALL

The technical requirements specified in this section apply to small wind systems, which are, as defined in §4280.103, wind energy systems for which the rated power of the wind turbine is 100 kW or smaller and with a generator hub height of 120 ft or less. Small wind systems are either stand-alone or connected to the local electrical system at less than 600 volts.

(a) Qualifications of project team. The small wind project team should consist of a system designer, a project manager or general contractor, an equipment supplier of major components, a system installer, a system maintainer, and, in some cases, the owner of the application or load served by the system. One individual or entity may serve more than one role. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and replacement parts for the system to operate over its design life must also be provided. The application must:

1. Discuss the small wind turbine manufacturers and other equipment suppliers of major components being considered in terms of their length of time in business and the number of units installed at the capacity and scale being considered;
2. Describe the knowledge, skills, and abilities needed to service, operate, and maintain the system for the proposed application; and
3. Discuss the project manager, system designer, and system installer qualifications for engineering, designing, and installing small wind systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar systems designed, installed, or supplied and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (5).

1. Identify zoning, building, and electrical code issues, and required permits and the anticipated schedule for obtaining those requirements and securing those permits.
2. Identify available component warranties for the specific project location and size.
3. For systems planning to interconnect with a utility, describe the utility’s system
interconnection requirements, power purchase agreements, or licenses, where required, and the anticipated schedule for meeting those requirements and obtaining the necessary permits. This is required even if the system is installed on the customer side of the utility meter. For systems planning to utilize a local net metering program as their interconnection agreement, describe the applicable local net metering program.

(d) Design and engineering. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the source of the wind data and the conditions of the wind monitoring when collected at the site or assumptions made when applying nearby wind data to the site.

(e) Resources assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the source of the wind data and the conditions of the wind monitoring when collected at the site or assumptions made when applying nearby wind data to the site.

(f) Project economic assessment. Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project, including the calculation of simple payback. Provide a detailed analysis and description of project costs, including design, permitting, equipment, site preparation, system installation, system startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. Provide a detailed description of historic or expected energy use and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Small wind systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Provide a detailed description of equipment certification. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. Describe fully the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment, including cranes and
other devices needed for project construction, and provide a description of the startup and shakedown specifications and process and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(1) Operations and maintenance. Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. The application must:

(1) Ensure that systems must have at least a 5-year warranty for equipment and a commitment from the supplier to have spare parts available. Provide information regarding system warranty and availability of spare parts;

(2) Describe the routine operations and maintenance requirements of the proposed system, including maintenance schedules for the mechanical, electrical, and software systems;

(3) Provide historical or engineering information that supports expected design life of the system and timing of major component replacement or rebuilds. Include in the discussion, costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or out-sourcing; and

(4) For owner maintained portions of the system, describe any unique knowledge, skills, or abilities needed for service operations or maintenance.

(2) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.

SECTION 9. WIND, LARGE

The technical requirements specified in this section apply to wind energy systems, which are, as defined in §4280.103, wind energy projects for which the rated power of the individual wind turbine(s) is larger than 100kW.

(a) Qualifications of project team. The large wind project team should consist of a project manager, a meteorologist, an equipment supplier, a project engineer, a primary or general contractor, construction contractor, and a system operator and maintainer and, in some cases, the owner of the application or load served by the system. One individual or entity may serve more than one role. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided. The application must:

(1) Discuss the proposed project delivery method. Such methods include a design, bid, build where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the applicant’s risk, and a design/build method, often referred to as turnkey, where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;

(2) Discuss the large wind turbine manufacturers and other equipment suppliers of major components being considered in terms of the length of time in business and the number of units installed at the capacity and scale being considered;

(3) Discuss the project manager, equipment supplier, project engineer, and construction contractor qualifications for engineering, designing, and installing large wind systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available;

(4) Discuss the qualifications of the meteorologist, including references; and

(5) Describe system operator’s qualifications and experience for servicing, operating, and maintaining the system for the proposed application. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (6).

(1) Identify zoning, building, and electrical code issues, and required permits and the anticipated schedule for meeting those requirements and securing those permits;

(2) Identify land use agreements required for the project and the anticipated schedule for securing the agreements and the term of those agreements;

(3) Identify available component warranties for the specific project location and size.

(4) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements.

(5) Identify all environmental issues, including environmental compliance issues, associated with the project on Form RD 1940.

(b) Submit a statement certifying that the project will be carried out in accordance with applicable local, State, and national codes and regulations.

(c) Resource assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Projects greater than 500kW must obtain wind data from the proposed project site. For such projects, describe the proposed measurement setup for the collection of the wind resource data. For proposed projects with an established wind resource, provide a summary of the wind resource and the specifications of the measurement setup. Large wind systems larger than 500kW in size will typically require at least 1 year of on-site monitoring. If less than 1 year of data is used, the qualified meteorological consultant must provide a detailed analysis of the correlation between the site data and a nearby, long-term measurement site.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. Large wind systems must be engineered by a qualified party. Systems must be engineered as complete, integrated systems with matched components. The engineering must be comprehensive, including site selection, turbine selection, tower selection, tower foundation, design of the local collection grid, interconnection equipment selection, and system monitoring equipment. For stand-alone, non-grid applications, engineering information must be provided that demonstrates appropriate matching of wind turbine and load.

(1) Provide a concise, but complete, description of the large wind project, including location of the project, proposed turbine specifications, tower height and type of tower, the collection grid, interconnection equipment, and monitoring equipment. Identify possible vendors and models of major system components. Provide the expected system energy production based on available wind resource data on a monthly and annual basis. For wind projects larger than 500kW in size, provide the expected system energy production over the life of the project, including a discussion on inter-annual variation using a comparison of the on-site monitoring data with long-term meteorological data from a nearby monitored site.

(2) Describe the project site and address issues such as site access, proximity to the electrical grid or application load, environmental concerns with emphasis on historic properties, visibility, noise, bird and bat populations, and wildlife habitat destruction and/or fragmentation, construction, and installation issues and whether special circumstances such as proximity to airports exist.

(e) Project development schedule. Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through start-up and shakedown. Provide a detailed description of the project timeline, including resource assessment, system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

(f) Project economic assessment. Provide a study that describes the costs and revenues of the proposed project to demonstrate the financial performance of the proposed project. Provide a detailed analysis and description of project costs, including project management, resource assessment, project design, project permitting, land agreements, equipment, site preparation, system installation, startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. Provide a detailed analysis and description of annual project revenues, including electricity sales, production tax credits, revenues from green tags, and any other production incentive programs throughout the life of the project. Provide a description of planned contingency fees or reserve funds to be used for unexpected large component replacement or repairs and for low productivity periods. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Large wind turbines may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Provide a detailed description of equipment certification. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) Equipment installation. Describe fully the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment, including cranes or
other devices, needed for project construction, and provide a description of the startup
and shakedown specifications and process and the conditions required for startup and
shakedown of equipment. Authoritative evidence that project team service providers
have the necessary professional credentials or relevant experience to perform the re-
quired services must be provided. Authoritative evidence that vendors of proprietary
components can provide necessary equipment and spare parts for the system to oper-
ate over its design life must also be provided. The application must:

(a) Qualifications of project team. The energy efficiency project team is expected to consist of an energy auditor or other service pro-
der, a project manager, an equipment supplier of major components, a project engi-
neer, and a construction contractor or system installer. One individual or entity may
serve more than one role. Authoritative evidence that project team service providers
have the necessary professional credentials or relevant experience to perform the re-
quired services must be provided. Authoritative evidence that vendors of proprietary
components can provide necessary equipment and spare parts for the system to oper-
ate over its design life must also be provided. The application must:

(1) Operations and maintenance. Identify the operations and maintenance requirements of the system necessary for the system to oper-
ate as designed over the design life. The application must:

(i) Ensure that systems must have at least a 3-year warranty for equipment. Provide in-
formation regarding turbine warranties and availability of spare parts;

(ii) Describe the routine operations and maintenance requirements of the proposed
project, including maintenance schedules for the mechanical and electrical systems and
system monitoring and control requirements;

(iii) Provide information that supports expected design life of the system and timing of
major component replacement or rebuilds;

(iv) Provide and discuss the risk management plan for handling large, potential fail-
ures of major components such as the turbine gearbox or rotor. Include in the discus-
sion, costs and labor associated with the operation and maintenance of the system, and
plans for in-sourcing or out-sourcing;

(v) Describe opportunities for technology transfer for long-term project operations and
maintenance by a local entity or owner/operator; and

(vi) For owner maintained portions of the system, describe any unique knowledge,
skills, or abilities needed for service operations or maintenance.

(b) Dismantling and disposal of project compo-
nents. Describe a plan for dismantling and dis-
posing of project components and associ-
ated wastes at the end of their useful lives.
Describe the budget for and any unique con-
cerns associated with the dismantling and
disposal of project components and their
wastes.

SECTION 10. ENERGY EFFICIENCY
IMPROVEMENTS

The technical requirements specified in this section apply to projects that involve
energy efficiency improvements, which are, as defined in § 4280.103, improvements to a fa-
cility, building, or process that reduce energy consumption, or reduce energy con-
sumed per square foot. The system engineer-
ing for such projects must be performed by a qualified party or certified Professional En-
gineer.

(a) Qualifications of project team. The energy efficiency project team is expected to consist of an energy auditor or other service pro-
vider, a project manager, an equipment sup-
plier of major components, a project engi-
neer, and a construction contractor or sys-
tem installer. One individual or entity may
serve more than one role. Authoritative evidence that project team service providers
have the necessary professional credentials or relevant experience to perform the re-
quired services must be provided. Authoritative evidence that vendors of proprietary
components can provide necessary equipment and spare parts for the system to oper-
ate over its design life must also be provided. The application must:

(1) Discuss the qualifications of the various
project team members, including any rel-
vant certifications by recognized organiza-
tions;

(2) Describe qualifications or experience of
the team as related to installation, service,
operation and maintenance of the project;

(3) Provide a list of the same or similarly
engineered projects designed, installed, or
supplied by the team or by team members
and currently operating. Provide references
if available; and

(4) Discuss the manufacturers of major en-
ergy efficiency equipment being considered,
including length of time in business.

(b) Agreements, permits, and certifications.
Identify all necessary agreements and per-
mits required for the energy efficiency im-
provement(s) and the status and anticipated
schedule for securing those agreements and
permits, including the items specified in
paragraphs (b)(1) through (4). The applicant
must also submit a statement certifying that the applicant will comply with all nec-
essary agreements and permits for the en-
ergy efficiency improvement(s).

(1) Identify building code, electrical code,
and zoning issues and required permits, and
the anticipated schedule for meeting those
requirements and securing those permits.

(2) Identify available component war-
nanties for the specific project location and size.

(3) Identify all environmental issues, in-
cluding environmental compliance issues, as-
associated with the project on Form RD 1940-
20, “Request for Environmental Informa-
tion,” and in compliance with 7 CFR part
1940, subpart G of this title.

(4) Submit a statement certifying that the
project will be installed in accordance with
applicable local, State, and national codes
and regulations.

(c) Energy audits. For all energy efficiency
improvement projects, provide adequate and
appropriate evidence of energy savings ex-
pected when the system is operated as de-
sign.

(1) An energy audit is a written report by
an independent, qualified party that docu-
ments current energy usage, recommended
potential improvements and their costs, en-
ergy savings from these improvements, dol-
ars saved per year, and simple payback. The

(c) Energy audits. For all energy efficiency
improvement projects, provide adequate and
appropriate evidence of energy savings ex-
pected when the system is operated as de-
sign.

(1) An energy audit is a written report by
an independent, qualified party that docu-
ments current energy usage, recommended
potential improvements and their costs, en-
ergy savings from these improvements, dol-
ars saved per year, and simple payback. The

976

7 CFR Ch. XLII (1–1–14 Edition)
methodology of the energy audit must meet professional and industry standards.

(2) The energy audit must cover the following:
   (i) **Situation report.** Provide a narrative description of the facility or process, its energy systems and usage, and activity profile. Also include price per unit of energy (electricity, natural gas, propane, fuel oil, renewable energy, etc.) paid by the customer on the date of the audit. Any energy conversion should be based on use rather than source.
   (ii) **Potential improvements.** List specific information on all potential energy-saving opportunities and the associated costs.
   (iii) **Technical analysis.** Discuss the interactions of the potential improvements with existing energy systems.
      (A) Estimate the annual energy and energy costs savings expected from each improvement identified in the potential project.
      (B) Calculate all direct and attendant indirect costs of each improvement.
      (C) Rank potential improvement measures by cost-effectiveness.
   (iv) **Potential improvement description.** Provide a narrative summary of the potential improvement and its ability to provide needed benefits, including a discussion of non-energy benefits such as project reliability and durability.
      (A) Provide preliminary specifications for critical components.
      (B) Provide preliminary drawings of project layout, including any related structural changes.
      (C) Document baseline data compared to projected consumption, together with any explanatory notes. Provide the actual total quantity of energy used (BTU) in the original building and/or equipment in the 12 months prior to the EEI project and the projected energy usage after the EEI project shall be the projected total quantity of energy used (BTU) on an annual basis for the same size or capacity as the original building or equipment. For energy efficiency improvement to equipment, if the new piece of equipment has a different capacity than the piece of equipment being replaced, the projected total quantity of energy used for the new piece of equipment shall be adjusted based on the ratio of the capacity of the replaced piece of equipment to the capacity of the new piece of equipment in accordance with the regulation. When appropriate, show before-and-after data in terms of consumption per unit of production, time or area. Include at least 1 year’s bills for those energy sources/fuel types affected by this project. Also submit utility rate schedules, if appropriate.
      (D) Identify significant changes in future related operations and maintenance costs.
      (E) Describe explicitly how outcomes will be measured.
      (F) Provide evidence that the energy efficiency improvement(s) will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards.
   (1) Energy efficiency improvement projects in excess of $50,000 must be engineered by a qualified party. Systems must be engineered as a complete, integrated system with matched components.
   (2) For all energy efficiency improvement projects, identify and itemize major energy efficiency improvements, including associated project costs. Specifically delineate which costs of the project are directly associated with energy efficiency improvements. Describe the components, materials or systems to be installed and how they improve the energy efficiency of the process or facility being modified. Discuss passive improvements that reduce energy loads, such as improving the thermal efficiency of a storage facility, and active improvements that directly reduce energy consumption, such as replacing existing energy consuming equipment with high efficiency equipment, as separate topics. Discuss any anticipated synergies between active and passive improvements or other energy systems. Include in the discussion any change in on-site effluents, pollutants, or other by-products.
   (3) Identify possible suppliers and models of major pieces of equipment.
   (e) **Project development schedule.** Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shake down. Provide a detailed description of the project timeline, including energy audit (if applicable), system and site design, permits and agreements, equipment procurement, and system installation from site preparation through startup and shake down.
   (f) **Project economic assessment.** For projects whose total eligible costs are greater than $50,000, provide an analysis of the proposed project to demonstrate its financial performance, including the calculation of simple payback. The analysis should include applicable investment incentives, productivity incentives, loans and grants, and expected energy offsets or sales on a monthly and annual basis. In addition, provide other information necessary to assess the project’s cost effectiveness.
   (g) **Equipment procurement.** Demonstrate that equipment required for the energy efficiency improvement(s) is available and can be procured and delivered within the proposed project development schedule. Energy efficiency improvements may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such
as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Provide a detailed description of equipment certification. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 305 of this title.

(h) Equipment installation. Describe fully the management of and plan for installation of the energy efficiency improvement(s), identify specific issues associated with installation, provide details regarding the scheduling of major installation equipment needed for project discussion, and provide a description of the startup and shakedown specifications and process and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include in this discussion any unique concerns, such as the effects of energy efficiency improvements on system power quality. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(i) Operations and maintenance. Identify the operations and maintenance requirements of the energy efficiency improvement(s) necessary for the energy efficiency improvement(s) to perform as designed over the design life. The application must:

1. Provide information regarding component warranties and the availability of spare parts;
2. Describe the routine operation and maintenance requirements of the proposed project, including maintenance schedules for the mechanical and electrical systems and system monitoring and control requirements;
3. Provide information that supports expected design life of the improvement(s) and timing of major component replacement or rebuilds;
4. Provide and discuss the risk management plan for handling large, potential failures of major components. Include in the discussion, costs and labor associated with the operation and maintenance of the improvement(s), and plans for in-sourcing or outsourcing; and
5. For owner maintained portions of the improvement(s), describe any unique knowledge, skills, or abilities needed for service operations or maintenance.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposing of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.

APPENDIX C TO SUBPART B OF PART 4280—TECHNICAL REPORT FOR HYDROPOWER PROJECTS

The technical requirements specified in this appendix apply to all hydropower projects. Hydropower projects are those projects that create hydroelectric or ocean energy.

The Technical Report for hydropower projects must demonstrate that the project design, procurement, installation, startup, operation, and maintenance of the renewable energy system will operate or perform as specified over its design life in a reliable and cost-effective manner. The Technical Report must also identify all necessary project agreements, demonstrate that those agreements will be in place, and that necessary project equipment and services are available over the design life.

All technical information provided must follow the format specified in this appendix. Supporting information may be submitted in other formats. Design drawings and process flowcharts are encouraged as exhibits. A discussion of each topic is not necessary if the topic is not applicable to the specific project. Questions identified in the Agency’s technical review of the project must be answered to the Agency’s satisfaction before the application will be approved. The applicant must submit the original Technical Report plus one copy to the Rural Development State Office. Hydropower projects with total eligible project costs greater than $400,000 require the services of a licensed professional engineer (PE) or team of PEs. Depending on the level of engineering required for the specific project or if necessary to ensure public safety, the services of a licensed PE or a team of licensed PEs may be required for smaller projects.

(a) Qualifications of project team. The hydropower project team should consist of a system designer, a project manager, an equipment supplier, a project engineer, a construction contractor, and a system operator and maintainer. One individual or entity may serve more than one role. The project team must have demonstrated expertise in hydropower development, engineering, installation, and maintenance. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided.

The application must:

1. Discuss the proposed project delivery method. Such methods include a design, bid,
build where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the applicant’s risk; and a design/build method, often referred to as turnkey, where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;

(2) Discuss the hydropower equipment manufacturers of major components being considered in terms of the length of time in business and the number of units installed at the capacity and scale being considered;

(3) Discuss the project manager, equipment supplier, system designer, project engineer, and construction contractor qualifications for engineering, designing, and installing hydropower systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available; and

(4) Describe the system operator’s qualifications and experience for servicing, operating, and maintaining hydropower projects. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (b)(6).

(1) Identify zoning and code issues and required permits and the anticipated schedule for meeting those requirements and securing those permits. This list should include all local, state, and federal permits required, estimated timeline for each permit and current status of acquiring each permit.

(2) Identify land use agreements required for the project and the anticipated schedule for securing the agreements and the term of those agreements.

(3) Identify available component warranties for the specific project location and size.

(4) For systems planning to interconnect with a utility, describe the utility’s system interconnection requirements, power purchase agreements, or licenses where required and the anticipated schedule for meeting those requirements and obtaining those agreements.

(5) Identify all environmental issues, including environmental compliance issues, associated with the project on Form RD 1940-20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G. (Note: The environmental review process, including all required publications, must be completed prior to approval of any Rural Development funding.) The applicant may want to work with all Federal organizations involved with the project to mulligate a single environmental review document.

(6) Submit a statement certifying that the project will be installed in accordance with applicable local, State, and national codes, regulations, and permits.

(c) Resource assessment. Provide adequate and appropriate data to demonstrate the amount of renewable resource available. Indicate the quality of the resource, including temperature (if applicable), flow, and sustainability of the resource, including a summary of the resource evaluation process and the specifications of the measurement setup and the date and duration of the evaluation process and proximity to the proposed site. If less than 1 year of data is used, a qualified consultant must provide a detailed analysis of the correlation between the site data and a nearby, long-term measurement site.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. Projects shall be engineered by a qualified party. Systems must be engineered as a complete, integrated system with matched components. The engineering must be comprehensive, including site selection, system specifications, electric power system interconnection equipment and project monitoring equipment. Systems must be constructed by a qualified party.

(1) Provide a concise but complete description of the hydropower project, including location of the project, resource characteristics, system specifications, electric power system interconnection equipment and project monitoring equipment. Identify possible vendors and models of major system components. Provide the expected system energy production on a monthly and annual basis.

(2) Describe the project site and address issues such as site access, proximity to the electrical grid, environmental concerns with emphasis on land use, air quality, water quality, habitat fragmentation, visibility, noise, construction, and installation issues. Identify any unique construction and installation issues.

(e) Project development schedule. Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shakedown. Provide a detailed description of the project timeline, including resource assessment, system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

(f) Project economic assessment. Provide a study that describes the costs and revenues
of the proposed project to demonstrate the financial performance of the proposed project. Provide a detailed analysis and description of project costs, including project management, resource assessment, project design, project permitting, land agreements, equipment, site preparation, system installation, startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. Provide a detailed analysis and description of annual project revenues, including electricity sales, production tax credits, revenues from green tags, and any other production incentive programs throughout the life of the project. Provide a description of planned contingency fees or reserve funds to be used for unexpected large component replacement or repairs and for low productivity periods. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) **Equipment procurement.** Demonstrate that equipment required by the system is available and can be procured and delivered within the proposed project development schedule. Hydropower systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Provide a description of equipment certification. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that “open and free” competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015 of this title.

(h) **Equipment installation.** Describe fully the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment, including cranes, barges or other devices, needed for project construction, and provide a description of the startup and shakedown specifications and process and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(i) **Operations and maintenance.** Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. The application must:

1. Ensure that systems must have at least a 3-year warranty for equipment. Provide information regarding turbine warranties and availability of spare parts;
2. Describe the routine operations and maintenance requirements of the proposed project, including maintenance schedules for the mechanical and electrical systems and system monitoring and control requirements;
3. Provide information that supports expected design life of the system and timing of major component replacement or rebuilds;
4. Provide and discuss the risk management plan for handling large, potential failures of major components such as the turbine gearbox or rotor. Include in the discussion, costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or out-sourcing;
5. Describe opportunities for technology transfer for long-term project operations and maintenance by a local entity or owner/operator; and
6. For owner maintained portions of the system, describe any unique knowledge, skills, or abilities needed for service operations or maintenance.

(j) **Dismantling and disposal of project components.** Describe a plan for dismantling and disposing of system components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.

### APPENDIX D TO SUBPART B OF PART 4280—TECHNICAL REPORT FOR FLEXIBLE FUEL PUMPS

The technical requirements specified in this appendix apply to flexible fuel pump projects, as defined in §4280.103.

(a) **Qualifications of project team.** The flexible fuel pump project team is expected to consist of a project manager, an equipment supplier of major components, a project engineer, and a construction contractor or system installer. One individual or entity may serve more than one role. Authoritative evidence that project team service providers have the necessary professional credentials or relevant experience to perform the required services must be provided. Authoritative evidence that vendors of proprietary components can provide necessary equipment and spare parts for the system to operate over its design life must also be provided. The application must:

1. Discuss the proposed project delivery method. Such methods include a design, bid, build where a separate engineering firm may design the project and prepare a request for bids and the successful bidder constructs the project at the applicant’s risk, and a design/build method, often referred to as turnkey,
RBS and RUS, USDA

Pt. 4280, Subpt. B, App. D

where the applicant establishes the specifications for the project and secures the services of a developer who will design and build the project at the developer’s risk;

(2) Discuss the flexible fuel system equipment, manufacturers of major components being considered in terms of the length of time in business and the number of units installed at the capacity and scale being considered;

(3) Discuss the project manager, equipment supplier, system designer, project engineer, and construction contractor qualifications for engineering, designing, and installing fuel dispensing systems, including any relevant certifications by recognized organizations. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available; and

(4) Describe the system operator’s qualifications and experience for servicing, operating, and maintaining fuel dispensing equipment or projects. Provide a list of the same or similar projects designed, installed, or supplied and currently operating with references, if available.

(b) Agreements, permits, and certifications. Identify all necessary agreements and permits required for the project and the status and schedule for securing those agreements and permits, including the items specified in paragraphs (b)(1) through (b)(8).

(1) Include Underwriters Laboratory certifications for installed flexible fuel pumps.

(2) Identify zoning and code issues and required permits and the anticipated schedule for meeting those requirements and securing those permits.

(3) Identify licenses where required and the schedule for obtaining those licenses.

(4) Identify land use agreements required for the project and the anticipated schedule for securing the agreements and the term of those agreements.

(5) Identify any permits or agreements required for solid, liquid, and gaseous emissions or effluents and the schedule for securing those permits and agreements.

(6) Identify available component warranties for the specific project location and size.

(7) Identify all environmental issues, including environmental compliance issues associated with the project on Form RD 1940–20, “Request for Environmental Information,” and in compliance with 7 CFR part 1940, subpart G of this title.

(8) Submit a statement certifying that the project will be installed in accordance with applicable local, State, and national codes and regulations.

(c) Resource assessment. Provide adequate and appropriate data to demonstrate the amount of renewable fuels available. Indicate the type, quantity, and quality and the demand for that fuel in its service area.

(d) Design and engineering. Provide authoritative evidence that the system will be designed and engineered so as to meet its intended purpose, will ensure public safety, and will comply with applicable laws, regulations, agreements, permits, codes, and standards. Projects shall be engineered by a qualified party. Systems must be engineered as a complete, integrated system with matched components. The engineering must be comprehensive, including site selection, system and component selections, and system monitoring equipment. Systems must be constructed by a qualified party.

(1) Provide a concise but complete description of the flexible fuel pump project, including location of the project, resource characteristics, system specifications, electric power system, fire suppression systems, and monitoring equipment. Identify possible vendors and models of major system components. Describe the system capacity, storage tank(s), and dispensing apparatus of the proposed system as rated and as expected in actual field conditions.

(2) Describe the project site and address issues such as site access, foundations, backup equipment when applicable, and environmental concerns with emphasis on land use, air quality, water quality, soil degradation, habitat fragmentation, land use, visibility, odor, noise, construction, and installation issues. Identify any unique construction and installation issues.

(e) Project development schedule. Identify each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through startup and shakedown. Provide a detailed description of the project timeline, including resource assessment, system and site design, permits and agreements, equipment procurement, and system installation from excavation through startup and shakedown.

(f) Project economic assessment. Provide a report that describes the costs and revenues of the proposed project to demonstrate the financial performance of the project (the projected increase in annual net income resulting by the installation of the project) and include the calculation of simple payback. Provide a detailed analysis and description of project costs, including project management, resource assessment, project design, project permitting, equipment, site preparation, system installation, startup and shakedown, warranties, insurance, financing, professional services, and operations and maintenance costs. Provide a detailed analysis and description of annual project revenues and expenses. Provide a detailed description of applicable investment incentives, productivity incentives, loans, and grants. In addition, provide other information necessary to assess the project’s cost effectiveness.

(g) Equipment procurement. Demonstrate that equipment required by the system is
available and can be procured and delivered within the proposed project development schedule. Flexible fuel systems may be constructed of components manufactured in more than one location. Provide a description of any unique equipment procurement issues such as scheduling and timing of component manufacture and delivery, ordering, warranties, shipping, receiving, and on-site storage or inventory. Identify all the major equipment that is proprietary and justify how this unique equipment is needed to meet the requirements of the proposed design. Include a statement from the applicant certifying that "open and free" competition will be used for the procurement of project components in a manner consistent with the requirements of 7 CFR part 3015.

(b) Equipment installation. Fully describe the management of and plan for site development and system installation, provide details regarding the scheduling of major installation equipment needed for project construction, and provide a description of the startup and shakedown specifications and processes and the conditions required for startup and shakedown for each equipment item individually and for the system as a whole. Include a statement from the applicant certifying that equipment installation will be made in accordance with all applicable safety and work rules.

(i) Operations and maintenance. Identify the operations and maintenance requirements of the system necessary for the system to operate as designed over the design life. In addition:

(1) Provide information regarding available system and component warranties and availability of spare parts;

(2) Describe the routine operations and maintenance requirements of the proposed system, including maintenance schedule for the mechanical, piping, and electrical systems and system monitoring and control requirements. Provide information that supports expected design life of the system and timing of major component replacement or rebuilds. Discuss the costs and labor associated with the operation and maintenance of the system, and plans for in-sourcing or outsourcing. Water infiltration should be checked daily. Replace filters if pumpdispenser is running slowly. Check/calibrate pump two weeks after initial load conversion.

(j) Dismantling and disposal of project components. Describe a plan for dismantling and disposal of project components and associated wastes at the end of their useful lives. Describe the budget for and any unique concerns associated with the dismantling and disposal of project components and their wastes.

APPENDIX E TO SUBPART B OF PART 4280—FEASIBILITY STUDY CONTENT

Elements in an acceptable feasibility study include, but are not limited to, the elements specified in Sections A through G, as applicable, of this Appendix. Both a technical report for the project and an economic analysis of the project are required as part of the feasibility study. The technical report must conform to that required under Appendix A, B, C, or D of this subpart, as applicable.

Section A. Executive Summary. Provide an introduction and overview of the project. In the overview, describe the nature and scope of the proposed project, including purpose, project location, design features, capacity, and estimated total capital cost. Include a summary of each of the elements of the feasibility study, including:

(1) Economic feasibility determinations;

(2) Market feasibility determinations;

(3) Technical feasibility determinations;

(4) Financial feasibility determinations;

(5) Management feasibility determinations; and

(6) Recommendations for implementation of the proposed project.

Section B. Economic Feasibility. Provide information regarding project site, the availability of trained or trainable labor; and the availability of infrastructure, including utilities, and rail, air and road service to the site. Discuss feedstock source management, including feedstock collection, pre-treatment, transportation, and storage, and provide estimates of feedstock volumes and costs. Discuss the proposed project's potential impacts on existing manufacturing plants or other facilities that use similar feedstock if the proposed technology is adopted. Provide projected impacts of the proposed project on resource conservation, public health, and the environment. Provide an overall economic impact of the project including any additional markets created (e.g., for agricultural and forestry products and agricultural waste material) and potential for rural economic development. Provide feasibility plans of project to work with producer associations or cooperatives including estimated amount of annual feedstock and biofuel and byproduct dollars from producer associations and cooperatives.

Section C. Market Feasibility. Provide information on the sales organization and management. Discuss the nature and extent of market and market area and provide marketing plans for sale of projected output, including both the principal products and the by-products. Discuss the extent of competition including other similar facilities in the market area. Provide projected total supply of and projected competitive demand for raw materials. Describe the procurement plan, including projected procurement costs and
the form of commitment of raw materials (e.g., marketing agreements, etc.). Identify commitments from customers or brokers for both the principal products and the by-products. Discuss all risks related to the industry, including industry status.

Section D. Technical Feasibility. The technical feasibility report shall be based upon verifiable data and contain sufficient information and analysis so that a determination may be made on the technical feasibility of achieving the levels of income or production that are projected in the financial statements. The project engineer or architect is considered an independent party provided neither the principals of the firm nor any individual of the firm who participates in the technical feasibility report has a financial interest in the project. If no other individual or firm with the expertise necessary to make such a determination is reasonably available to perform the function, an individual or firm that is not independent may be used.

(1) Identify any constraints or limitations in the financial projections and any other facility or design-related factors that might affect the success of the enterprise. Identify and estimate project operation and development costs and specify the level of accuracy of these estimates and the assumptions on which these estimates have been based.

(2) Discuss all risks related to the project and regulation and governmental action as they affect the technical feasibility of the project.

Section E. Financial Feasibility. Discuss the reliability of the financial projections and assumptions on which the financial statements are based including all sources of project capital both private and public, such as Federal funds. Provide 3 years (minimum) projected Balance Sheets and Income Statements and cash flow projections for the life of the project. Discuss the ability of the business to achieve the projected income and cash flow. Provide an assessment of the cost accounting system. Discuss the availability of short-term credit or other means to meet seasonal business costs and the adequacy of raw materials and supplies. Provide a sensitivity analysis, including feedstock and energy costs. Discuss all risks related to the project, financing plan, the operational units, and tax issues.

Section F. Management Feasibility. Discuss the continuity and adequacy of management. Identify applicant and/or management’s previous experience concerning the receipt of federal financial assistance, including amount of funding, date received, purpose, and outcome. Discuss all risks related to the applicant as a company (e.g., applicant is at the Development-Stage) and conflicts of interest, including appearances of conflicts of interest.

Section G. Qualifications. Provide a resume or statement of qualifications of the author of the feasibility study, including prior experience.
§ 4280.302 Definitions and abbreviations.

(a) General definitions. The following definitions apply to the terms used in this subpart.

Administrative expenses. Those expenses incurred by an MDO for the operation of services under this program. Not more than 10 percent of TA grant funding may be used for such expenses.

Agency. USDA Rural Development, Rural Business-Cooperative Service or its successor organization.

Agency personnel. Individuals employed by the Agency.

Applicant. The legal entity, also referred to as a microenterprise development organization or MDO, submitting an application to participate in the program.

Application. The forms and documentation submitted by an MDO for acceptance into the program.

Award. The written documentation, executed by the Agency after the application is approved, containing the terms and conditions for provision of financial assistance to the applicant. Financial assistance may constitute a loan or a grant or both.

Business incubator. An organization that provides temporary premises at below market rates, technical assistance, advice, use of equipment, and may provide access to capital, or other facilities or services to rural microentrepreneurs and microenterprises starting or growing a business.

Close relative. Individuals who are closely related by blood, marriage, or adoption, or live within the same household: a spouse, domestic partner, parent, child, brother, sister, aunt, uncle, grandparent, grandchild, niece, or nephew.

Default. The condition that exists when a borrower is not in compliance with the promissory note, the loan and/or grant agreement, or other related documents evidencing the loan.

Delinquency. Failure by an MDO to make a scheduled loan payment by the due date or within any grace period as stipulated in the promissory note and loan agreement.

Eligible project cost. The total cost of a microborrower’s project for which a microloan is being sought from a microlender less any costs identified as ineligible in § 4280.323.

Facilitation of access to capital. For purposes of this program, facilitation of access to capital means assisting a technical assistance client of the TA-only grantee in obtaining a microloan whether or not the microloan is wholly or partially capitalized by funds provided under this program.

Federal Fiscal year (FY). The 12-month period beginning October 1 of any given year and ending on September 30 of the following year.

Full-time equivalent employee (FTE). The Agency uses the Bureau of Labor Statistics definition of full-time jobs as its standard definition. For purposes of this program, a full-time job is a job that has at least 35 hours in a work week. As such, one full-time job with at least 35 hours in a work week equals one FTE; two part-time jobs with combined hours of at least 35 hours in a work week equals one FTE, and three seasonal jobs equals one FTE. If an FTE calculation results in a fraction, it should be rounded up to the next whole number.

Indian tribe. As defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b), “any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village, or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688) [43 U.S.C. 1601 et seq.], which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.”

Loan loss reserve fund (LLRF). An interest-bearing deposit account that each microlender must establish and maintain in an amount equal to not less than 5 percent of the total amount owed by the microlender under this program to the Agency to pay any shortage in the RMRF caused by delinquencies or losses on microloans.

Microborrower. A microentrepreneur or microenterprise that has received financial assistance from a microlender under this program in an amount of $50,000 or less.

Microenterprise means:
A sole proprietorship located in a rural area; or
(ii) A business entity, located in a rural area, with not more than 10 full-time-equivalent employees. Rural microenterprises are businesses employing 10 people or fewer that are in need of $50,000 or less in business capital and/or in need of business based technical assistance and training. Such businesses may include any type of legal business that meets local standards of decency. Business types may also include agricultural producers provided they meet the stipulations in this definition.
(iii) All microenterprises assisted under this regulation must be located in rural areas.

Microenterprise development organization (MDO). An organization that is a non-profit entity; an Indian tribe (the government of which tribe certifies that no MDO serves the tribe and no RMAP exists under the jurisdiction of the Indian tribe); or a public institution of higher education; and that, for the benefit of rural microentrepreneurs and microenterprises:
(i) Provides training and technical assistance and/or;
(ii) Makes microloans or facilitates access to capital or another related service; and/or
(iii) Has a demonstrated record of delivering, or an effective plan to develop a program to deliver, such services.

Microentrepreneur. An owner and operator, or prospective owner and operator, of a microenterprise who is unable to obtain sufficient training, technical assistance, or credit other than under this section, as determined by the Secretary. All microentrepreneurs assisted under this regulation must be located in rural areas.

Microlender. An MDO that has been approved by the Agency for participation under this subpart to make microloans and provide an integrated program of training and technical assistance to its microborrowers and prospective microborrowers.

Microloan. A business loan of not more than $50,000 with a fixed interest rate and a term not to exceed 10 years.

Military personnel. Individuals, regardless of rank or grade, currently in active United States military service with less than 6 months remaining in their active duty service requirement.

Nonprofit entity. An entity chartered as a nonprofit entity under State Law.

Program. The Rural Microentrepreneur Assistance Program (RMAP).

Rural microloan revolving fund (RMRF). An exclusive interest-bearing account on which the Agency will hold a first lien and from which microloans will be made; into which payments from microborrowers and reimbursements from the LLRF will be deposited; and from which payments will be made by the microlender to the Agency.

Rural or rural area. Any area of a State not in a city or town that has a population of more than 50,000 inhabitants, according to the latest decennial census of the United States, and the contiguous and adjacent urbanized area, and any area that has been determined to be “rural in character” by the Under Secretary for Rural Development, or as otherwise identified in this definition. In determining which census blocks in an urbanized area are not in a rural area, the Agency will exclude any cluster of census blocks that would otherwise be considered not in a Rural Area only because the cluster is adjacent to not more than two census blocks that are otherwise considered not in a rural area under this definition.

(i) For the purposes of this definition, cities and towns are incorporated population centers with definite boundaries, local self government, and legal powers set forth in a charter granted by the State.

(ii) For the Commonwealth of Puerto Rico, the island is considered rural and eligible for Business Programs assistance, except for the San Juan Census Designated Place (CDP) and any other CDP with greater than 50,000 inhabitants. CDPs with greater than 50,000 inhabitants, other than the San Juan CDP, may be determined to be eligible if they are “not urban in character.” Any such requests must be forwarded to the National Office, Business and Industry Division, with supporting documentation as to why the area is “not urban in character” for review, analysis, and decision by the Rural Development Under Secretary.
(iii) For the State of Hawaii, all areas within the State are considered rural and eligible for Business Programs assistance, except for the Honolulu CDP within the County of Honolulu.

(iv) For the purpose of defining a rural area in the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands, the Agency shall determine what constitutes rural and rural area based on available population data.

(v) On the petition of a unit of local government in an area described in paragraph (v)(A) or (B) of this definition, or on the initiative of the Under Secretary for Rural Development, the Under Secretary may determine that part of an area described in paragraph (v)(A) or (B) of this definition, is a rural area for the purposes of this paragraph, if the Under Secretary finds that the part is “rural in character”, as determined by the Under Secretary.

(A) An urbanized area that has two points on its boundary that are at least 40 miles apart, which is not contiguous or adjacent to a city or town that has a population of greater than 150,000 inhabitants or the urbanized area of such a city or town; or

(B) An urbanized area contiguous and adjacent to a city or town of greater than 50,000 population that is within one-quarter mile of a rural area.

State. Any of the 50 States of the United States, the Commonwealth of Puerto Rico, the District of Columbia, the U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

The provision of education, guidance, or instruction to one or more rural microentrepreneurs to prepare them for self-employment; to improve the state of their existing rural microenterprises; to increase their capacity in a specific technical aspect of the subject business; and, to assist the rural microentrepreneurs in achieving a degree of business preparedness and/or functioning that will allow them to obtain, one or more business loans of $50,000 or less, whether or not from program funds.

Technical assistance grant. A grant, the funds of which are used to provide technical assistance and training, as defined in this section.

(b) Abbreviations. The following abbreviations apply to the terms used in this subpart:

FTE—Full-time employee
LLRF—Loan loss reserve fund
MDO—Microenterprise development organization
RMAP—Rural microentrepreneur assistance program
RMRF—Rural microloan revolving fund
TA—Technical assistance.

§ 4280.303 Exception authority.

The Administrator may make limited exceptions to the requirements or provisions of this subpart. Such exceptions must be in the best financial interest of the Federal government and may not conflict with applicable law. No exceptions may be made regarding applicant eligibility, project eligibility, or the rural area definition. In addition, exceptions may not be made:

(a) To accept an applicant into the program that would not normally be accepted under the eligibility or scoring criteria; or

(b) To fund an interested party that has not successfully competed for funding in accordance with the regulations.

§ 4280.304 Review or appeal rights and administrative concerns.

(a) Review or appeal rights. An applicant MDO, a microlender, or grantee MDO may seek a review of an adverse Agency decision under this subpart from the appropriate Agency official that oversees the program in question, and/or appeal the Agency decision to the National Appeals Division in accordance with 7 CFR part 11.

(b) Administrative concerns. Any questions or concerns regarding the administration of the program, including any action of the microlender, may be addressed to: USDA Rural Development, Rural Business-Cooperative Service, Specialty Programs Division or its successor agency, or the local USDA Rural Development office.
§ 4280.305 Nondiscrimination and compliance with other Federal laws.

(a) Any entity receiving funds under this subpart must comply with other applicable Federal laws, including the Equal Employment Opportunities Act of 1972, the Americans with Disabilities Act, the Equal Credit Opportunity Act, the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and 7 CFR part 1901, subpart E.

(b) The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual’s income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA’s TARGET Center at (202) 720–2600 (voice and TDD). Any applicant that believes it has been discriminated against as a result of applying for funds under this program should contact: USDA, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, DC 20250–9410, or call (866) 632–9992 (toll free) or (202) 401–0216 (TDD) for information and instructions regarding the filing of a Civil Rights complaint. USDA is an equal opportunity provider, employer, and lender.

(c) A pre-award compliance review will take place at the time of application when the applicant completes Form RD 400–8, “Compliance Review”. Post-award compliance reviews will take place once every three years after the beginning of participation in the program and until such time as a microlender leaves the program.

§ 4280.306 Forms, regulations, and instructions.

§§ 4280.307–4280.309 [Reserved]

§ 4280.310 Program requirements for MDOs.

(a) Eligibility requirements for applicant MDOs. To be eligible for a direct loan or grant award under this subpart, an applicant must meet each of the criteria set forth in paragraphs (a)(1) through (4) of this section, as applicable.

(1) Type of applicant. The applicant must meet the definition of an MDO under this program.

(2) Citizenship. For non-profit entities only, to be eligible to apply for status as an MDO, the applicant must be at least 51 percent controlled by persons who are either:

(i) Citizens of the United States, the Republic of Palau, the Federated States of Micronesia, the Republic of the Marshall Islands, American Samoa, or the Commonwealth of Puerto Rico; or

(ii) Legally admitted permanent residents residing in the U.S.

(3) Legal authority and responsibility. The applicant must have the legal authority necessary to carry out the purpose of the award.

(4) Other eligibility requirements. For potential microlenders only.

(i) The applicant must also provide evidence that it:

(A) Has demonstrated experience in the management of a revolving loan fund; or

(B) Certifies that it, or its employees, have received education and training from a qualified microenterprise development training entity so that the applicant has the capacity to manage such a revolving loan fund; or

(C) Is actively and successfully participating as an intermediary lender in good standing under the U.S. Small Business Administration (SBA) Microloan Program or other similar loan programs as determined by the Administrator.

(ii) An attorney’s opinion regarding the potential microlender’s legal status and its ability to enter into program transactions is required at the time of initial entry into the program. Subsequent to acceptance into the program,
an attorney’s opinion will not be required unless the Agency determines significant changes to the microlender have occurred.

(b) Minimum score. Once deemed eligible, an entity will be evaluated based on the scoring criteria in §4280.316 for adequate qualification to participate in the program. Eligible MDOs must score a minimum of seventy points (70 points) in order to be considered to receive an award under this subpart.

(c) Ineligible applicants. An applicant will be considered ineligible if it:

1. Does not meet the definition of an MDO as provided in §4280.302;
2. Is debarred, suspended or otherwise excluded from, or ineligible for, participation in Federal assistance programs; and
3. Has an outstanding judgment against it, obtained by the United States in a Federal Court (other than U.S. Tax Court).

(d) Delinquencies. No applicant will be eligible to receive a loan if it is delinquent on a Federal debt.

(e) Application eligibility and qualification. An application will be considered eligible for funding if it is submitted by an eligible MDO. The applicant will qualify for funding based on the results of review, scoring, and other procedures as indicated in this subpart, and will further:

1. Establish an RMRF, or add capital to an RMRF originally capitalized under this program and establish or continue a training and TA program for its microborrowers and prospective microborrowers; or
2. Fund a TA-only grant program to provide services to rural microentrepreneurs and microenterprises.

(f) Business incubators. Because the purpose of a business incubator is to provide business-based technical assistance and an environment in which micro-level, very small, and small businesses may thrive, a microlender that meets all other eligibility requirements and owns and operates a small business incubator will be considered eligible to apply. In addition, a business incubator selected to participate as a microlender may use RMAP funding to lend to an eligible microenterprise tenant, without creating a conflict of interest under §4280.323(c).
(e) Loan terms and conditions for micro-lenders. Loans will be made to micro-lenders under the following terms and conditions:

1. Funds received from the Agency and any non-Federal share will be deposited into an interest-bearing account that will be the RMRF account.

2. The RMRF account, including any interest earned on the account and the microloans made from the account, will be used to make fixed-rate microloans, to accept repayments from microborrowers and reimbursements from the LLRF, to repay the Agency and, with the advance written approval of the Agency, to supplement the LLRF with interest earnings (from payments received or from account earnings) from the RMRF.

3. The term of a loan made to a micro-lender will not exceed 20 years. If requested by the applicant MDO, a shorter term may be agreed upon by the micro-lender and the Agency.

4. Each loan made to a micro-lender will automatically receive a 2-year deferral during which time no repayment to the Agency will be required. Voluntary payments will be accepted.

i. Interest will accrue during the deferral period only on funds disbursed by the Agency.

ii. The deferral period will begin on the day the Agency loan to the micro-lender is closed.

iii. Loan repayments will be made in equal monthly installments to the Agency beginning on the last day of the 24th month of the life of the loan.

5. Partial or full repayment of debt to the Agency under this program may be made at any time, including during the deferral period, without any prepayment penalties being assessed.

6. The micro-lender is responsible for full repayment of its loan to the Agency regardless of the performance of its microloan portfolio.

7. The Agency may call the entire loan due and payable prior to the end of the full term, due to any non-performance, delinquency, or default on the loan.

8. Loan closing between the micro-lender and the Agency must take place within 90 days of loan approval or funds will be forfeited and the loan will be deobligated.

9. Micro-lenders will be eligible to receive a disbursement of up to 25 percent of the total loan amount at the time of loan closing. Interest will accrue on all funds disbursed to the micro-lender beginning on the date of disbursement.

10. A micro-lender must make one or more microloans within 60 days of any disbursement it receives from the Agency. Failure to make a microloan within this time period may result in the micro-lender not receiving any additional funds from the Agency and may result in the Agency demanding return of any funds already disbursed to the micro-lender.

11. Micro-lenders may request in writing, and receive additional disbursements not more than quarterly, until the full amount of the loan to the micro-lender is disbursed, or until the end of the 36th month of the loan, whichever occurs first. Letters of request for disbursement must be accompanied by a description of the micro-lender’s anticipated need. Such description will indicate the amount and number of microloans anticipated to be made with the funding.

12. Each loan made to a micro-lender during its first five years of participation in this program will bear an interest rate of 2 percent. After the fifth year of an MDO’s continuous and satisfactory participation in this program, each new loan made to the micro-lender will bear an interest rate of 1 percent. Satisfactory participation requires a default rate of 5 percent or less and a pattern of delinquencies of 10 percent or less. Except in the case of liquidation or early repayment, loans to micro-lenders must fully amortize over the life of the loan.

13. During the initial deferral period, each loan to a micro-lender will accrue interest at a rate of 1 or 2 percent based on the ultimate interest rate on the loan. Interest accrued during the 2-year deferral period will be capitalized so that, during the 24th month of the initial deferral period, the micro-lender’s debt to the Agency will be calculated and amortized over the remaining life of the loan. The first payment will be due to the Agency on the last day of the 24th month of the life of the loan.
(14) Funds not disbursed to the micro lender by the end of the 36th month of the loan from the Agency will be de-obligated.

(15) The Agency will hold first lien position on the RMRF account, the LLRF, and all notes receivable from microloans.

(16) If a micro lender makes a withdrawal from the RMRF for any purpose other than to make a micro loan, repay the Agency, or, with advance written approval, transfer an appropriate amount of non-Federal funds to the LLRF, the Agency may restrict further access to withdrawals from the account by the micro lender.

(17) In the event a micro lender fails to meet its obligations to the Agency, the Agency may pursue any combination of the following:
   (i) Take possession of the RMRF and/or any microloans outstanding, and/or the LLRF;
   (ii) Call the loan due and payable in full; and/or
   (iii) Enter into a workout agreement acceptable to the Agency, which may or may not include transfer or sale of the portfolio to another micro lender (whether or not funded under this program) deemed acceptable to the Agency.

(f) Loan funding limitations—(1) Minimum and maximum loan amounts. The minimum loan amount a micro lender may borrow under this program will be $50,000. The maximum any micro lender may borrow under this program, or in any given Federal fiscal year, will be $500,000. In no case will the aggregate outstanding balance owed to the program by any single micro lender exceed $2,500,000.

(2) Use of funds. Loans must be used only to establish or recapitalize an existing Agency funded RMRF out of which microloans will be made, into which microloan payments will be deposited, and from which repayments to the Agency will be made. In some instances, as described in §4280.311(e)(2), interest earned by these funds may be used to fund and recapitalize both RMRF and the LLRF.

(g) Loan loss reserve fund (LLRF). Each micro lender that receives one or more loans under this program will be required to establish an interest-bearing LLRF.

(1) Purpose. The purpose of the LLRF is to protect the micro lender and the Agency against losses that may occur as the result of the failure of one or more micro borrowers to repay their loans on a timely basis.

(2) Capitalization and maintenance. The LLRF is subject to each of the following conditions:
   (i) The micro lender must maintain the LLRF at a minimum of 5 percent of the total amount owed by the micro lender under this program to the Agency. If the LLRF falls below the required amount, the micro lender will have 30 days to replenish the LLRF. The Agency will hold a security interest in the account and all funds therein until the MDO has repaid its debt to the Agency under this program.
   (ii) No Agency loan funds may be used to capitalize the LLRF.
   (iii) The LLRF must be held in an interest-bearing, Federally-insured deposit account separate and distinct from any other fund owned by the micro lender.
   (iv) Earnings on the LLRF account must remain open, appropriately capitalized, and active until such time as:
      (A) All obligations owed to the Agency by the micro lender under this program are paid in full; or
      (B) The LLRF is used to assist with full repayment or prepayment of the micro lender’s program debt.

(3) Use of LLRF. The LLRF must be used only to:
   (i) Recapitalize the RMRF in the event of the loss and write-off of a micro loan: that is, when a loss has been paid to the RMRF, from the LLRF, the micro lender must, within 30 days, replenish the LLRF, with non-federal funds, to the required level;
   (ii) Accept non-Federal deposits as required for maintenance of the fund at a level equal to 5 percent or more of the amount owed to the Agency by the micro lender under this program;
   (iii) Accrue interest (interest earnings accrued by the LLRF will become part of the LLRF and may be used only for eligible purposes); and
(iv) Prepay or repay the Agency program loan.

(4) LLRF funded at time of closing. The LLRF account must be established by the microlender prior to the closing of the loan from the Agency. At the time of initial loan closing, sources of funding for the LLRF must be identified by the microlender so that as microloans are made, the amount in the LLRF can be built over time to an amount greater than or equal to 5 percent of the amount owed to the Agency by the microlender under this program. After the first disbursement is made to a microlender, further disbursements will only be made if the LLRF is funded at the appropriate amount. After the initial loan is made to a microlender, subsequent loan closings will require the LLRF to be funded in an amount equal to 5 percent of the anticipated initial drawdown of funds for the RMRF. Federal funds, except where specifically permitted by other laws, may not be used to fund LLRF.

(5) Additional LLRF funding. In the event of exhibited weaknesses, such as losses that are greater than 5 percent of the microloan portfolio, on the part of a microlender, the Agency may require additional funding be put into the LLRF; however, the Agency may never require an LLRF of more than 10 percent of the total amount owed by the microlender.

(h) Recordkeeping, reporting, and oversight. Microlenders must maintain all records applicable to the program and make them available to the Agency upon request. Microlenders must submit quarterly reports as specified in paragraphs (h)(1) through (4) of this section. Portfolio reporting requirements must be met via the electronic reporting system. Other reports, such as narrative information, may be submitted as hard copy in the event the microlender, grantee, or Agency do not have the capability to submit or accept same electronically.

(1) Periodic reports. On a quarterly basis, within 30 days of the end of the calendar quarter, each microlender that has an outstanding loan under this section must provide to the Agency:

(i) Quarterly reports, using an Agency-approved form, containing such information as the Agency may require, and in accordance with OMB circulars and guidance, to ensure that funds provided are being used for the purposes for which the loan to the microlender was made. At a minimum, these reports must identify each microborrower under this program and should include a discussion reconciling the microlender’s actual results for the period against its goals, milestones, and objectives as provided in the application package;

(ii) SF–PPR, “Performance Progress Report” cover sheet, performance measures (SF–PPR–A), and activity based expenditures (SF–PPR–E); and

(iii) SF–270, “Request for Advance or Reimbursement”.

(2) Minimum retention. Microlenders must provide evidence in their quarterly reports that the sum of the unexpended amount in the RMRF, plus the amount in the LLRF, plus debt owed by the microborrowers is equal to a minimum of 105 percent of the amount owed by the microlender to the Agency unless the Agency has established a higher LLRF reserve requirement for a specific microlender.

(3) Combining accounts and reports. If a microlender has more than one loan from the Agency, a separate report must be made for each except when RMRF accounts have been combined. A microlender may combine RMRF accounts only when:

(i) The underlying loans have the same rates, terms and conditions;

(ii) The combined report allows the Agency to effectively administer the program, including providing the same level of transparency and information for each loan as if separate RMRF reports had been prepared; and

(iii) The accompanying LLRF fund reports also provide the same level of transparency and information for each loan as if separate LLRF reports had been prepared.

(iv) The Agency must approve the combining of accounts and reports in writing before such accounts are combined and reports are submitted.

(4) Delinquency. In the event that a microlender has delinquent loans in its RMAP portfolio, quarterly reports will include narrative explanation of the
steps being taken to cure the delinquencies.

(5) Other reports. Other reports may be required by the Agency from time to time in the event of poor performance, one or more work out agreements or other such occurrences that require more than the usual set of reporting information.

(6) Site visits. The Agency may, at any time, choose to visit the microlender and inspect its files to ensure that program requirements are being met.

(7) Access to microlender’s records. Upon request by the Agency, the microlender will permit representatives of the Agency (or other agencies of the U.S. Department of Agriculture authorized by that Department or the U.S. Government) to inspect and make copies of any records pertaining to operation and administration of this program. Such inspection and copying may be made during regular office hours of the microlender or at any other time agreed upon between the microlender and the Agency.

(8) Changes in key personnel. Before any additions are made to key personnel, the microlender must notify and the Agency must approve such changes.

§ 4280.312 Loan approval and closing.

(a) Loan approval and obligating funds. The loan will be considered approved on the date the signed copy of Form RD 1940-1, “Request for Obligation of Funds,” is signed by the Agency. Form RD 1940-1 authorizes funds to be obligated and may be executed by the Agency provided the microlender has the legal authority to contract for a loan, and to enter into required agreements, including an Agency-approved loan agreement, and meets all program loan requirements and has signed Form RD 1940-1.

(b) Letter of conditions. Upon reviewing the conditions and requirements in the letter of conditions, the applicant must complete, sign, and return Form RD 1942-46, “Letter of Intent to Meet Conditions,” to the Agency; or if certain conditions cannot be met, the applicant may propose alternate conditions. The Agency will review any requests for changes to the letter of conditions. The Agency may approve only minor changes that do not materially affect the microlender. Changes in legal entities prior to loan closing will not be approved.

(c) Loan closing. (1) Prior to loan closing, microlenders must provide evidence that the RMRF and LLRF bank accounts have been set up and the LLRF has been, or will be, funded as described in §4280.311(g)(4). Such evidence shall consist of:

(i) A pre-authorized debit form allowing the Agency to withdraw payments from the RMRF account, and in the event of a repayment workout, from the LLRF account;

(ii) An Agency-approved automatic deposit authorization form from the depository institution providing the Agency with the RMRF account number into which funds may be deposited at time of disbursement to the microlender;

(iii) A statement from the depository institution as to the amount of cash in the LLRF account;

(iv) An Agency-approved promissory note must be executed at loan closing; and

(v) An appropriate security agreement on the LLRF and RMRF accounts.

(2) At loan closing, the microlender must certify that:

(i) All requirements of the letter of conditions have been met and

(ii) There has been no material adverse change in the microlender or its financial condition since the issuance of the letter of conditions. If one or more adverse changes have occurred, the microlender must explain the changes and the Agency must determine that the microlender remains eligible and qualified to participate as an MDO.

(3) The microlender will provide sufficient evidence, which may include but is not limited to, mechanics’ lien waivers or in their absence receipts of payment, that no lawsuits are pending or threatened that would adversely affect the security of the microlender when Agency security instruments are filed.

§ 4280.313 Grant provisions.

(a) General. The following provisions apply to each type of grant offered.
under this program unless otherwise specified annually in a Federal Register notice. Competition for these funds will occur as a part of the application and qualification process of becoming a microlender. Failure to meet scoring benchmarks will preclude an applicant from receiving loan and/or grant dollars. Once an MDO is participating as a microlender, grant funds will be made available automatically based on lending and the availability of funds.

1) **Grant amounts.**—(i) The maximum TA grant amount for a microlender is 25 percent of the first $400,000 of outstanding microloans owed to the microlender under this program, plus an additional 5 percent of the outstanding loan amount owed by the microborrowers to the lender under this program over $400,000 up to and including $2.5 million. This calculation leads to a maximum grant of $205,000 annually for any microlender to provide technical assistance to its clients. These grants will be awarded annually.

(ii) The maximum amount of a TA-only grant under this program will not exceed 10 percent of the amount of funding available for TA-only grants. The amount of funding available for TA funding will be announced annually and will be based on the availability of funds. In no case will funding for the TA-only grants exceed 10 percent of the amount appropriated for the program each Federal fiscal year.

2) **Matching requirement.** The MDO is required to provide a match of not less than 15 percent of the total amount of the grant in the form of matching funds, indirect costs, or in-kind goods or services. Unless specifically permitted by laws other than the statute authorizing RMAP, matching contributions must be made up of non-Federal funding.

3) **Administrative expenses.** Not more than 10 percent of a grant received by a MDO for a Federal fiscal year (FY) may be used to pay administrative expenses. MDOs must submit an annual budget of proposed administrative expenses for Agency approval. The Agency has the right to deny the 10 percent and to fund administration expenses at a lower level.

4) **Ineligible grant purposes.** Grant funds, matching funds, indirect costs, and in-kind goods and services may not be used for:

   (i) Grant application preparation costs;
   (ii) Costs incurred prior to the obligation date of the grant;
   (iii) Capital improvements;
   (iv) Political or lobbying activities;
   (v) Assistance to any ineligible entity;
   (vi) Payment of any judgment or debt owed; and
   (vii) Payment of any costs other than those allowed in paragraphs (b)(1) and (c) of this section.

5) **Changes in key personnel.** Before any additions are made to key personnel, the microlender must notify and the Agency must approve such changes.

(b) **Grants to assist microentrepreneurs (Microlender Technical Assistance (TA) Grants).** The capacity of a microlender to provide an integrated program of microlending and technical assistance will be evaluated during the scoring process. An eligible MDO selected to be a microlender will be eligible to receive a microlending TA grant if it receives funding to provide microloans under this program.

1) **Purpose.** The Agency shall make microlender TA grants to microlenders to assist them in providing marketing, management, and other technical assistance to rural microentrepreneurs and microenterprises that have received or are seeking one or more microloans from the microlender.

2) **Grant amounts.** Microlender TA grants will be limited to an amount equal to not more than 25 percent of the total outstanding balance of microloans made under this program and active by the microlender as of the date the grant is awarded for the first $400,000 plus an additional 5 percent of the loan amount owed by the microborrowers to the lender under this program over $400,000 up to and including $2.5 million. Funds cannot be used to pay off the loans. During the first year of operation, the percentage will be determined based on the amount of the loan to the microlender, but will be disbursed on a quarterly basis based on the amount of microloans made. Any
grant dollars obligated, but not spent, from the initial grant, will be subtracted from the subsequent year grant to ensure that obligations cover only microloans made and active.

(3) **TA grant fund uses and limitations.** The microlender will agree to use TA grant funding exclusively for providing technical assistance and training to eligible microentrepreneurs and microenterprises, with the exception that up to 10 percent of the grant funds may be used to cover the microlender’s administrative expenses, except as may be reduced as provided under §4280.313(a)(4).

The following limitations will apply to TA grant funding:

(i) Administrative expenses should be kept to a minimum. As such, the applicant MDO is required, in the application materials, to provide an administrative budget plan indicating the amount of funding it will need for administrative purposes. Applicants will be scored accordingly, with those using less than 10 percent of the funding for administrative purposes being scored higher than those using 10 percent of the funding for administrative purposes.

(ii) While operating the program, the selected microlender will be expected to adhere to the estimates it provides in the application. If for any reason, the microlender cannot meet the expectations of the application, it must contact the Agency in writing to request a budget adjustment.

(iii) At no time will it be appropriate for the microlender to expend more than 10 percent of its grant funding on administrative expenses. Microlenders that go over 10 percent will be considered in performance default and may be subject to forfeiting funding.

(iv) Budget adjustments will be considered within the 10 percent limitation and approved or denied on a case-by-case basis.

(c) **TA-only grants.** Grants will be competitively made to MDOs for the purpose of providing technical assistance and training to prospective microborrowers. Technical assistance-only grants will be provided to eligible MDOs that seek to provide business-based technical assistance and training to eligible microentrepreneurs and microenterprises, but do not seek funding for an RMRF. Entities receiving microlending TA grants will not be eligible to apply for TA-only grants.

(1) **Grant term.** TA-only grants will have a grant term not to exceed 12 months from the date the grant agreement is signed.

(2) **Funding level.** The maximum amount of a TA-only grant under this program will not exceed 10 percent of the amount of funding available for TA-only grants. In no case will funding for the TA-only grants exceed 10 percent of the amount appropriated for the program each Federal fiscal year.

(3) **Loan referencing.** TA-only grantees will be required to:

(i) Refer clients to internal or external non-program funded lenders for loans of $50,000 or less and

(ii) Collect data regarding such clients. TA-only grantees will be considered successful if a minimum of 1-in-5 TA clients are referred for a microloan and are operating a business within 18 months of receiving technical assistance.

(4) **Facilitation of access to capital.** Technical assistance-only grantees will be expected to provide training and technical assistance services to the extent that access to capital for eligible microentrepreneurs and microenterprises is facilitated by referral to either an internal or external non-program loan fund so that these clients may take advantage of available financing programs.

(5) **Microlender funding.** No entity will receive grant funding as both a microlender and a TA-only provider; that is, RMAP microlenders are not eligible for TA-only funding and an MDO receiving TA-only funding are not eligible for microlender funding.

(d) **Grant agreement.** For any grant to an MDO or microlender, the Agency will notify the approved applicant in writing, using an Agency-approved grant agreement setting out the conditions under which the grant will be made. The form will include those matters necessary to ensure that the proposed grant is completed in accordance with the proposed project, that grant
funds are expended for authorized purposes, and that the applicable requirements prescribed in the relevant Department regulations are complied with.

§ 4280.314 [Reserved]

§ 4280.315 MDO application and submission information.

(a) Initial and subsequent applications. Applications shall be submitted in accordance with the provisions of this subpart unless adjusted by the Agency in an annual Federal Register Notice for Solicitation of Applications (NOSA) or a Notice of Funding Availability (NOFA), depending on the availability of funds at the time of publication.

(1) The information required in this section is necessary for an application to be considered complete.

(2) When preparing applications, applicants are strongly encouraged to review the scoring criteria in § 4280.316 and provide documentation that will support a competitive score.

(3) Only those applicants that meet the basic eligibility requirements in § 4280.310 will have their applications fully scored and considered for participation in the program under this section.

(b) Content and form of submission. The content and form requirements will differ based on the nature of the application. All applicants must provide the information specified in paragraph (c) of this section. Additional application information is required in paragraph (d) of this section depending on the type of application being submitted.

(c) Application information for all applicants. All applicants must provide the following information and forms fully completed and with all attachments:

(1) Standard Form-424, “Application for Federal Assistance.”

(2) Standard Form-424A, “Budget Information—Non-construction Programs.”

(3) Standard Form-424B, “Assurances—Non-construction Programs.”

(4) For entities that are applying for more than $150,000 in loan funds and/or more than $100,000 in grant funds, only, SF LLL, “Disclosure of Lobbying Activities.”

(5) AD 1047, “Certification Regarding Debarment, Suspension, and other Responsibility Matters—Primary Covered Transaction.”

(6) For entities applying for program loan funds to become an RMAP micro-lender only, Form RD 1910–11, “Certification of No Federal Debt.”

(7) Form RD 400–8, “Compliance Review.”

(8) Demonstration that the applicant is eligible to apply to participate in this program. To demonstrate eligibility, applicants must submit documentation that the applicant is an MDO as defined in § 4280.302, as follows:

(i) If a nonprofit entity, evidence that the applicant organization meets the citizenship requirements;

(ii) If a nonprofit entity, a copy of the applicant’s bylaws and articles of incorporation, which include evidence that the applicant is legally considered a non-profit organization;

(iii) If an Indian tribe, evidence that the applicant is a Federally-recognized Indian tribe, and that the tribe neither operates nor is served by an existing MDO;

(iv) If a public institution of higher education, evidence that the applicant is a public institution of higher education; and

(v) For nonprofit applicants only, a Certificate of Good Standing, not more than 6 months old, from the Office of the Secretary of State in the State in which the applicant is located. If the applicant has offices in more than one state, then the state in which the applicant is organized and licensed will be considered the home location.

(9) Certification by the applicant that it cannot obtain sufficient credit elsewhere to fund the activities called for under this program with similar rates and terms.

(10) Form RD 400–4, “Assurance Agreement.”

(d) Type of application specific information. In addition to the information required under paragraph (c) of this section, the following information is also required, as applicable:

(1) The information specified in § 4280.316(a).
(2) An applicant for status as a microlender with more than 3 years of experience as an MDO seeking to participate as a microlender must provide the additional information specified in §4280.316(b). Such an applicant will be applying for a loan to capitalize an RMRF, which, unless otherwise requested by the applicant, will be accompanied by a microlending TA grant.

(3) An applicant for status as a microlender with 3 years or less experience as an MDO seeking to participate as a microlender must provide the additional information specified in §4280.316(c). Such an applicant will be applying for a loan to capitalize an RMRF, which, unless otherwise requested by the applicant, will be accompanied by a microlending TA grant.

(4) All applicants seeking status as a microlender must identify in their application which cost share option(s) the applicant will utilize, as described in §4280.311(d), to meet the Federal cost share requirement. If the applicant will utilize the RMRF-level option, the applicant shall identify the amount(s) and source(s) of the non-Federal share.

(5) An applicant seeking TA-only grant funding must provide the additional information specified in §4280.316(d).

(e) Application limits. Paragraph (d) of this section sets out three types of funding under which applications may be submitted. MDOs may only submit and have pending for consideration, at any given time, one application, regardless of funding category.

(f) Completed applications. Applications that fulfill the requirements specified in paragraphs (a) through (e) of this section will be fully reviewed, scored, and ranked by the Agency in accordance with the provisions of §4280.316.
bottom line fund balance, its ability to manage one or more federal programs, and its capacity to manage multiple funding sources, restricted and non-restricted funding sources, income, earnings, and expenditures. Up to 10 points will be awarded.

(6) A copy of the applicant’s organizational mission statement. The mission statement will be rated based on its relative connectivity to microenterprise development and general economic development. The mission statement may or may not be a part of a larger statement. For example, if the mission statement is included in the by-laws or other organizational documents, please so note, direct the reviewer to the proper document, and do not submit these documents twice. Up to 5 points will be awarded.

(7) Information regarding the geographic service area to be served. Describe the service area, which must be rural as defined. State the number of counties or other jurisdictions to be served. Describe the demographics of the service area and whether or not the population is a diverse population. Note that the applicant will not be scored on the size of the service area, but on its ability to fully cover the service area as described. Up to 10 points will be awarded.

(b) Program loan application requirements for MDOs seeking to participate as RMAP microlenders with more than 3 years of experience. In addition to the information required under paragraph (a) of this section, applicants with more than 3 years of experience as a microlender also must provide the information specified in paragraphs (b)(1) through (5) of this section. The total number of points available under this paragraph, in addition to the up to 45 points available in paragraph (a) of this section, is 55, for a total of 100.

(1) History of provision of microloans. The applicant must provide data regarding its history of making microloans for the three years previous to this application by answering the questions in paragraphs (b)(1)(i) through (vi) of this section. This information should be provided clearly and concisely in numerical format as the data will be used to calculate points as noted. Figure 1 presents an example of the format and data required. The maximum number of points under this criterion is 20.

(i) Number and amount of microloans made during each of the three previous Federal FYs. Do not include current year information. A narrative may be included as a separate attachment, not in the body of the suggested table.

(ii) Number and amount of microloans made in rural areas in each of the three years prior to the year in which the application is submitted. If the history of providing microloans in rural areas shows:

(A) More than the three consecutive years immediately prior to this application, 5 points will be awarded;

(B) At least two of the years but not more than the three consecutive years immediately prior to this application, 3 points will be awarded;

(C) At least 6 months, but not more than one year immediately prior to this application, 1 point will be awarded.
(iii) Percentage of number of loans made in rural areas. Calculate and enter the total number of microloans made in rural areas as a percentage of the total number of all microloans made for each of the past three Federal FYs. If the percentage of the total number of microloans made in rural areas is:

(A) 75 percent or more, 5 points will be awarded;

(B) At least 50 percent but less than 75 percent, 3 points will be awarded;

(C) At least 25 but less than 50 percent, 1 point will be awarded.

(iv) The percentage of dollar amount of loans made in rural areas. Enter the dollar amount of microloans made in rural areas as a percentage of the dollar amount of the total portfolio (rural and non-rural) of microloans made for each of the previous three Federal FYs. If percentage of the dollar amount of the microloans made in rural areas is:

(A) 75 percent or more of the total amount, 5 points will be awarded;

(B) At least 50 percent but less than 75 percent, 3 points will be awarded;

(C) At least 25 percent but less than 50 percent, 1 point will be awarded.

(v) Each applicant shall compare the diversity of its entire microloan portfolio to the demographic makeup of its service area (as determined by the latest applicable decennial census for the State) based on the number of microloans made during the three years preceding the subject application. Demographic groups shall include gender, racial and ethnic minority status, and disability (as defined in The Americans with Disabilities Act). Points will be awarded on the basis of how close the MDO’s microloan portfolio matches the demographic makeup of its service area. A maximum of 5 points will be awarded.

(A) If at least one loan has been made to each demographic group and if the percentage of loans made to each demographic group is each within 5 or less percent of the demographic makeup, 5 points will be awarded.

(B) If at least one loan has been made to each demographic group and if the percentage of loans made to each demographic group is each within 10 or less percent of the demographic makeup, 3 points will be awarded.

(C) If at least one loan has been made to each demographic group and if the percentage of loans made to one or more of the demographic groups is greater than 10 percent of the demographic makeup or if no loans have been made to one of the demographic groups and if the percentage of loans made to each of the other demographic groups is each within 10 or less percent of the demographic makeup, 1 point will be awarded.

(D) If no loans have been made to two or more demographic groups, no points will be awarded.

(2) Portfolio management. Each applicant’s ability to manage its portfolio will be determined based on the data provided in response to paragraphs (b)(2)(i) and (ii) of this section and scored accordingly. The maximum number of points under this criterion is 10.

(i) Enter the total number of your microloans paying on time for the three previous Federal FYs. If the total number of microloans paying on time at the end of each year over the prior three Federal FYs is:

(A) 95 percent or more, 5 points will be awarded;

(B) At least 85 percent but less than 95 percent, 3 points will be awarded;

(C) Less than 85 percent, 0 points will be awarded.

(ii) Enter the total number of microloans 30 to 90 days in arrears or that have been written off at year end for the three previous Federal FYs. If the total number of these microloans is:

(A) 5 percent or less of the total portfolio, 5 points will be awarded;

(B) More than 5 percent, 0 points will be awarded.

(3) History of provision of technical assistance. Each applicant’s history of provision of technical assistance to microentrepreneurs and microenterprises, and their ability to reach diverse communities, will be scored based on the data specified in paragraphs (b)(3)(i) through (iv) of this section. Applicants may use a chart such as that suggested in Figure 1 as they deem appropriate. The maximum number of points under this criterion is 15.

(i) Provide the total number of rural and non-rural microentrepreneurs and
microenterprises that received both microloans and TA services for each of the previous three Federal FYs.

(ii) Provide the percentage of the total number of only rural microentrepreneurs and rural microenterprises that received both microloans and TA services for each of the previous three Federal FYs (calculate this as the total number of rural microloans made each year divided by the total number of loans made during the past three Federal FYs). If provision of both microloans and technical assistance to rural microentrepreneurs and rural microenterprises is demonstrated at a rate of:

(A) 75 percent or more, 5 points will be awarded;
(B) At least 50 percent but less than 75 percent, 3 points will be awarded;
(C) At least 25 percent but less than 50 percent, 1 point will be awarded.

(iii) Provide the percentage of the total number of rural microentrepreneurs and rural microenterprises by racial and ethnic minority, disabled, and/or gender that received both microloans and TA services for each of the previous three Federal FYs. If the demonstrated provision of microloans and technical assistance to these rural microentrepreneurs and rural microenterprises is at a rate of:

(A) 75 percent or more, 5 points will be awarded;
(B) At least 50 percent but less than 75 percent, 3 points will be awarded;
(C) At least 25 percent but less than 50 percent, 1 point will be awarded.

(iv) Provide the ratio of TA clients that also received microloans during each of the previous three Federal FYs. If the ratio of clients receiving technical assistance to clients receiving microloans is:

(A) Between 1:1 and 1:5, 5 points will be awarded.
(B) Between 1:6 and 1:8, 3 points will be awarded.
(C) Either 1:9 or 1:10, 1 point will be awarded.

(4) Ability to provide technical assistance. In addition to providing a statistical history of their provision of technical assistance to microentrepreneurs, microenterprises, and microborrowers, applicants must provide a narrative of not more than five pages describing the teaching and training methods used by the applicant organization to provide such technical assistance and discussing the outcomes of their endeavors. Technical assistance is defined in §4280.302. The narrative will be scored as specified in paragraphs (b)(4)(i) through (iv) of this section. The maximum number of points under this criterion is 5.

(i) Applicants that have used more than one method of training and technical assistance (e.g., classroom training, peer-to-peer discussion groups, individual assistance, distance learning) will be awarded 2 points.

(ii) Applicants that provide success stories to demonstrate the effects of technical assistance on their clients will be awarded 1 point.

(iii) Applicants that provide evidence that they require evaluations by the clients of their training programs and indicate that the average level of evaluation scores is “good” or higher will be awarded 1 point.

(iv) Applicants that present their narrative information clearly and concisely (five pages or less) and at a level expected by trainers and teachers will be awarded 1 point.

(5) Proposed administrative expenses to be spent from TA grant funds. The maximum number of points under this criterion is 5. If the percentage of grant funds to be used for administrative purposes is:

(i) Less than 5 percent of the TA grant funding, 5 points will be awarded;
(ii) Between 5 percent and 8 percent, but not including 8 percent, 3 points will be awarded; and
(iii) Between 8 percent up to and including 10 percent, 0 point will be awarded.

(c) Application requirements for MDOs seeking to participate as RMAP microlenders with 3 years or less experience. In addition to the information required under paragraph (a) of this section, an applicant MDO with 3 years or less experience that is applying to be a microlender must submit the information specified in paragraphs (c)(1) through (8) of this section. The total number of points available under this paragraph, in addition to the up to 45 points available in paragraph (a) of this section, is 55, for a total of 100.
(1) The applicant must provide a narrative work plan that clearly indicates its intention for the use of loan and grant funding. Provide goals and milestones for planned microlending and technical assistance activities. In relation to the information requested in paragraph (a) of this section, the applicant must describe how it will incorporate its mission statement, utilize its employees, and maximize its human and capital assets to meet the goals of this program. The applicant must provide its strategic plan and organizational development goals and clearly indicate its lending goals for the five years after the date of application. The narrative work plan should be not more than five pages in length. Up to 10 points will be awarded.

(2) The applicant will provide the date that it began business as an MDO or other provider of business education and/or facilitator of capital. This date will reflect when the applicant became licensed to do business, in good standing with the Secretary of State in which it is registered to do business, and regularly paid staff to conduct business on a daily basis. If the applicant has been in business for:

(i) More than 2 years but less than 3 years, 5 points will be awarded;
(ii) At least 1 year, but not more than 2 years, 3 points will be awarded;
(iii) At least 6 months, but not more than 1 year, 1 point will be awarded;
(iv) Less than 6 months, or more than 3 full years, 0 points will be awarded.
(If more than 3 full years, the applicant must apply under the provisions for MDOs with more than 3 years experience as specified in § 4280.315.)

(3) The applicant must describe in detail any microenterprise development training received by it as a whole, or its employees as individuals, to date. The narrative may refer reviewers to already submitted resumes to save space. The training received will be rated on its topical variety, the quality of the description, and its relevance to the organization’s strategic plan. The applicant should not submit training brochures or conference announcements. Up to 10 points will be awarded.

(4) The applicant must indicate its current number of employees, those that concentrate on rural microentrepreneurial development, and the current average caseload for each. Indicate how the caseload ratio does or does not optimize the applicant’s ability to perform the services described in the work plan. Discuss how Agency grant funding will be used to assist with TA program delivery and how loan funding will affect the portfolio. Up to 5 points will be awarded.

(5) The applicant must indicate any training organizations with which it has a working relationship. Provide contact information for references regarding the applicant’s capacity to perform the work plan provided. If the recommendations received from references are:

(i) Generally excellent, 5 points will be awarded;
(ii) Generally above average, 3 points will be awarded;
(iii) Generally average, 1 point will be awarded;
(iv) Generally less than average, 0 points will be awarded.

(6) Describe any plans for continuing training relationship(s), including ongoing or future training plans and goals, and the timeline for same. Up to 5 points will be awarded.

(7) The applicant will describe its internal benchmarking system for determining client success, reporting on client success, and following client success for up to 5 years after completion of a training relationship. Up to 10 points will be awarded.

(8) The applicant will identify its proposed administrative expenses to be spent from TA grant funds. The maximum total number of points under this criterion is 5. If the percentage of grant funds to be used for administrative purposes is:

(i) Less than 5 percent of the TA grant funding, 5 points will be awarded;
(ii) Between 5 percent and 8 percent, but not including 8 percent, 3 points will be awarded; and
(iii) Between 8 percent up to and including 10 percent, 0 points will be awarded.

(d) Application requirements for MDOs seeking technical assistance-only grants. TA-only grants may be provided to MDOs that are not RMAP microlenders
seeking to provide training and technical assistance to rural microentrepreneurs and rural microenterprises. An applicant seeking a TA-only grant must submit the information specified in paragraphs (d)(1) through (4) of this section. The total number of points available under this section, in addition to the 45 points available in paragraph (a) of this section, is 55, for a total of 100 points.

(1) History of provision of technical assistance. Each applicant’s history of provision of technical assistance to microentrepreneurs and microenterprises, and their ability to reach diverse communities, will be scored based on the data specified in paragraphs (d)(1)(i) through (iv) of this section. Applicants may use a chart such as that suggested in Figure 1 as they deem appropriate. The maximum number of points under this criterion is 20.

(i) Provide the total number of rural and non-rural microentrepreneurs and microenterprises that received both microloans and TA services for each of the previous three Federal FYs.

(ii) Provide the percentage of the total number of rural microentrepreneurs and rural microenterprises that received both microloans and TA services for each of the previous three Federal FYs (calculate this as the total number of rural microloans made each year divided by the total number of rural and non-rural microloans made during the past three Federal FYs). If provision of both technical assistance and resultant microloans to rural microentrepreneurs and rural microenterprises is demonstrated at a rate of:

(A) 75 percent or more, 5 points will be awarded;
(B) At least 50 percent but less than 75 percent, 3 points will be awarded;
(C) At least 25 percent but less than 50 percent, 1 point will be awarded.

(iii) Provide the ratio of TA clients that also received microloans during each of the last three years. If the ratio of clients receiving technical assistance to clients receiving microloans is:

(A) Between 1:1 and 1:5, 5 points will be awarded.
(B) Between 1:6 and 1:8, 3 points will be awarded.
(C) Either 1:9 or 1:10, 1 point will be awarded.

(2) Ability to provide technical assistance. In addition to providing a statistical history of their provision of technical assistance to microentrepreneurs, microenterprises, and microborrowers, applicants must provide a narrative of not more than five pages describing the teaching and training method(s) used by the applicant organization to provide technical assistance and discussing the outcomes of their endeavors. The narrative will be scored as specified in paragraphs (d)(2)(i) through (iv) of this section. The maximum number of points under this criterion is 20.

(i) Applicants that have used more than one method of training and technical assistance (e.g., classroom training, peer-to-peer discussion groups, individual assistance, distance learning) will be awarded 5 points.

(ii) Applicants that provide success stories to demonstrate the effects of technical assistance on their clients will be awarded points under either of the following paragraphs, but not both.

(A) News stories that highlight businesses made successful as a result of technical assistance, 5 points will be awarded.
(B) Internal stories that highlight businesses made successful as a result of technical assistance, 3 points.

(iii) Applicants that provide evidence that they require evaluations by the clients of their training programs and indicate that the evaluation scores are generally:
(A) Excellent, 5 points will be awarded.
(B) Good, 3 points will be awarded.
(C) Less than good, 0 points will be awarded.

(iv) Applicants that present well-written narrative information that is clearly and concisely written and is five pages or less will be awarded 5 points.

(3) Technical assistance plan. Submit a plan for the provision of technical assistance explaining how the funding will benefit the current program and how it will allow the applicant to expand its non-program microlending activities. Up to 10 points will be awarded

(4) Proposed administrative expenses to be spent from TA grant funds. The maximum number of points under this criterion is 5. If the percentage of grant funds to be used for administrative purposes is:

(i) Less than 5 percent of the TA grant funding, 5 points will be awarded;
(ii) Between 5 percent and 8 percent, but not including 8 percent, 3 points will be awarded; and
(iii) Between 8 percent up to and including 10 percent, 1 point will be awarded.

(e) Re-application requirements for participating microlenders with more than 5 years experience as a microlender under this program. (1) Microlender applicants with more than 5 years of experience as an MDO under this program may choose to submit a shortened loan/grant application that includes the following:

(i) A letter of request for funding stating the amount of loan and/or grant funds being requested;
(ii) An indication of the loan and/or grant amounts being requested accompanied by a completed SF 424 and any pertinent attachments;
(iii) An indication of the number and percent of program microentrepreneurs and microenterprises remaining in business for two years or more after microloan disbursement; and
(iv) A recent resolution of the applicant’s Board of Directors approving the application for debt.

(2) The Agency, using this request, and data available in the reports submitted under previous findings, will review the overall program performance of the applicant over the life of its participation in the program to determine its continued qualification for subsequent funding. Requirements include:

(i) A default rate of 5 percent or less;
(ii) A pattern of delinquencies during the period of participation in this program of 10 percent or less;
(iii) A pattern of use of TA dollars that indicates at least one in ten TA clients receive a microloan;
(iv) A statement discussing the need for more funding, accompanied by account documentation showing the amounts in each of the RMRF and LLRF accounts established to date; and
(v) A pattern of compliance with program reporting requirements.

(3) Shortened applications under this section will be rated on a pass or fail basis. Passing applications will be assigned a score of 90 points and will be ranked accordingly in the quarterly competitions. Failing applications will be scored 0.

§ 4280.317 Selection of applications for funding.

All applications received will be scored using the scoring criteria specified in § 4280.316. Because each set of applications is scored on a 100 point scale, applications will be ranked together. Shortened applications can only receive 90 points. Within funding limitations, applications will be funded in descending order, from the highest ranking application down. If two or more applications score the same, the Administrator may prioritize such applications to help the program achieve overall geographic diversity.

(a) Timing and submission of applications. (1) All applications must be submitted as a complete application, in one package. Packages must be bound in a three ring binder and evidence must be organized in the order of appearance in § 4280.315 of this document. Applications that are unbound, disorganized, or otherwise not ready for evaluation will be returned.

(2) Applications will be accepted on a quarterly basis using Federal fiscal quarters. Deadlines and specific application instructions will be published annually in the Federal Register.
(3) Applications received will be reviewed, scored, and ranked quarterly. Unless withdrawn by the applicant, the Agency will retain unsuccessful applications that score 70 points or more, for consideration in subsequent reviews. Applications unsuccessful after 4 quarters will be returned.

(b) Availability of funds. If an application is received, scored, and ranked, but insufficient funds remain to fully fund it, the Agency may elect to fund an application requesting a smaller amount that has a lower score. Before this occurs, the Agency, as applicable, will provide the higher scoring applicant the opportunity to reduce the amount of its request to the amount of funds available. If the applicant agrees to lower its request, it must certify that the purposes of the project can be met, and the Agency must determine that the project is financially feasible at the lower amount.

(c) Applicant notification. The Agency will notify applicants regarding their selection or non-selection, provide appeal rights of unsuccessful applicants, and closing procedures for the loans and/or grants to awardees.

(d) Closing. Awardees unable to complete closing for obligation within 90 days will forfeit their funding. Such funding will revert back to the Agency for later use.

§§ 4280.318–4280.319 [Reserved]

§ 4280.320 Grant administration.

(a) Oversight. Any MDO receiving a grant under this program is subject to Agency oversight, with site visits and inspection of records occurring at the discretion of the Agency. In addition, MDOs receiving a grant under this subpart must submit reports, as specified in paragraphs (a)(1) through (3) of this section.

(1) On a quarterly basis, within 30 days after the end of each Federal fiscal quarter, the microlender will provide to the Agency an Agency-approved quarterly report containing such information as the Agency may require to ensure that funds provided are being used for the purposes for which the grant was made, including:

(i) SF–PPR, “Performance Progress Report,” including narrative reporting information as required by Office of Management and Budget (OMB) circulators and successor regulations. This report will include information on the microlender’s technical assistance, training, and/or enhancement activity, and grant expenses, milestones met, or unmet, explanation of difficulties, observations and other such information;

(ii) As appropriate, SF–270; and

(iii) If requesting grant funding at the time of reporting, SF–PPR–E, “Activity Based Expenditures.”

(2) If a microlender has more than one grant from the Agency, a separate report must be made for each.

(3) Other reports may be required by the Agency from time to time in the event of poor performance or other such occurrences that require more than the usual set of reporting information.

(b) Payments. The Agency will make grant payments not more often than on a quarterly basis. The first payment may be made in advance and will equal no more than one fourth of the grant award. Payment requests must be submitted on Standard Form 270 and will only be paid if reports are up to date and approved.

§ 4280.321 Grant and loan servicing.

In addition to the ongoing oversight of the participating MDOs:

(a) Grants. Grants will be serviced in accordance with all applicable regulations:

(1) Department of Agriculture regulations including, but not limited to 7 CFR part 1951, subparts E and O, parts 3015, 3016, 3017, 3018, 3019, and 3052; and

(2) Office of Management and Budget (OMB) regulations including, but not limited to, 2 CFR parts 215, 220, 230, and OMB Circulars A–110 and A–133.

(b) Loans. Loans to microlenders will be serviced in accordance with the following:

(1) Department of Agriculture regulations 7 CFR part 1951, subparts E, O, and R;

(2) Other Department of Agriculture regulations as may be applicable; and

(3) OMB Circular A–129.
§ 4280.322 Loans from the micro-lenders to micro-entrepreneurs.

The primary purpose of making a loan to a micro-lender is to enable that micro-lender to make microloans. It is the responsibility of each micro-borrower to repay the micro-lender in accordance with the terms and conditions agreed to with the micro-lender. It is the responsibility of each micro-lender to make microloans in such a fashion that the terms and conditions of the microloan will support micro-borrower success while enabling the micro-lender to repay the Federal Government.

(a) Maximum microloan amount. The maximum amount of a microloan made under this program will be $50,000.

(b) Microloan terms and conditions. The terms and conditions for microloans made by micro-lenders will be negotiated between the prospective micro-borrower and the micro-lender, with the following limitations:

(1) No microloan may have a term of more than 10 years;
(2) The interest rate charged to the micro-borrower will be established at, or before the closing of the microloan; and
(3) The micro-lender may establish its margin of earnings but may not adjust the margin so as to violate Fair Credit Lending laws. Margins must be reasonable so as to ensure that microloans are affordable to the micro-borrowers.

(c) Microloan insurance requirements. The requirement of reasonable hazard, key person, and other insurance will be at the discretion of the micro-lender.

(d) Credit elsewhere test. Micro-borrowers will be subject to a “credit elsewhere” test so that the micro-lender will make loans only to those borrowers that cannot obtain business funding of $50,000 or less at affordable rates and on acceptable terms. Each micro-borrower file must contain evidence that the micro-lender has sought credit elsewhere or that the rates and terms available within the community at the time were outside the range of the micro-borrower’s affordability. Evidence may include a comparison of rates, loan limitations, terms, etc. for other funding sources to those forth offered by the micro-lender). Denial letters from other lenders are not required.

(e) Fair credit requirements. To ensure fairness, micro-lenders must publicize their rates and terms on a regular basis. Micro-lenders are also subject to Fair Credit lending laws as discussed in § 4280.305.

(f) Eligible microloan purposes. Agency loan funds may be used to make microloans as defined in § 4280.302 for any legal business purpose not identified in § 4280.323 as an ineligible purpose. Micro-lenders may make microloans for qualified business activities and expenses including, but not limited to:

(1) Working capital;
(2) The purchase of furniture, fixtures, supplies, inventory or equipment;
(3) Debt refinancing;
(4) Business acquisitions; and
(5) The purchase or lease of real estate that is already improved and will be used for the location of the subject business only, provided no demolition or construction will be accomplished with program funding. Neither interior decorating, nor the affixing of chattel to walls, floors, or ceilings is considered to be demolition or construction.

(g) Military personnel. Military personnel who are or seek to be a micro-entrepreneur and are on active duty with six months or less remaining in their active duty status may receive a microloan and/or technical assistance and training if they are otherwise qualified to participate in the program.

§ 4280.323 Ineligible microloan purposes and uses.

Agency loan funds will not be used for the payment of micro-lender administrative costs or expenses and micro-lenders may not make microloans under this program for any of purposes and uses identified as ineligible in paragraphs (a) through (p) of this section.

(a) Construction costs.
(b) Any amount in excess of that needed by a micro-borrower to accomplish the immediate business goal.
(c) Assistance that will cause a conflict of interest or the appearance of a conflict of interest including but not limited to:

(1) Financial assistance to principals, directors, officers, or employees of the
RBS and RUS, USDA

§ 4280.324–4280.399 [Reserved]

§ 4280.400 OMB control number.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0570-0062. A person is not required to respond to this collection of information unless it displays a currently valid OMB control number.

PART 4284—GRANTS

Subpart A—General Requirements for Cooperative Services Grant Programs

Sec.
4284.1 Purpose.

4284.600 OMB control number.

Subpart G—Rural Business Opportunity Grants

Sec.
4284.601 Purpose.
4284.602 Policy.
4284.603 Definitions.
4284.604–4284.619 [Reserved]
4284.620 Applicant eligibility.
§ 4284.1 Purpose.

The purpose of this subpart is to set forth definitions and requirements which are common to all grant programs set forth in this part administered by Cooperative Services within.
the Rural Business-Cooperative Service (RBS). Programs administered by the Business Programs within RBS are not affected by this subpart.

§ 4284.2 Policy.

It is the policy of Cooperative Services to administer grant programs as uniformly as possible to minimize unnecessary inconsistencies in the administration of the grant programs provided for in this part. The specific provisions or definitions provided in the subparts that are specific to Cooperative Services are supplemental to these general provisions. Where a specific program provision is expressly different from what is provided in this subpart, the program specific subpart shall prevail.

§ 4284.3 Definitions.

Agency—Rural Business-Cooperative Service (RBS), an agency of the United States Department of Agriculture (USDA), or a successor agency.

Agricultural Producer—Persons or entities, including farmers, ranchers, loggers, agricultural harvesters and fishermen, that engage in the production or harvesting of an agricultural product. Producers may or may not own the land or other production resources, but must have majority ownership interest in the agricultural product to which Value-Added is to accrue as a result of the project. Examples of agricultural producers include: a logger who has a majority interest in the logs harvested that are then converted to boards, a fisherman that has a majority interest in the fish caught that are then smoked, a wild herb gatherer that has a majority interest in the gathered herbs that are then converted into essential oils, a cattle feeder that has a majority interest in the cattle that are fed, slaughtered and sold as boxed beef, and a corn grower that has a majority interest in the corn produced that is then converted into corn meal.

Agricultural Product—Plant and animal products and their by-products to include forestry products, fish and seafood products.

Cooperative Services—The office within RBS, and its successor organization, that administers programs authorized by the Cooperative Marketing Act of 1926 (7 U.S.C. 451 et seq.) and such other programs so identified in USDA regulations.

Economic development—The economic growth of an area as evidenced by increase in total income, employment opportunities, decreased out-migration of population, value of production, increased diversification of industry, higher labor force participation rates, increased duration of employment, higher wage levels, or gains in other measurements of economic activity, such as land values.

Emerging Market—A new or developing market for the applicant, which the applicant has not traditionally supplied.

Farmer or Rancher Cooperative—A farmer or rancher-owned and controlled business from which benefits are derived and distributed equitably on the basis of use by each of the farmer or rancher owners.

Fixed equipment—Tangible personal property used in trade or business that would ordinarily be subject to depreciation under the Internal Revenue Code, including processing equipment, but not including property for equipping and furnishing offices such as computers, office equipment, desks or file cabinets.

Independent Producers—Agricultural producers, individuals or entities (including for profit and not for profit corporations, LLCs, partnerships or LLPs), where the entities are solely owned or controlled by Agricultural Producers who own a majority ownership interest in the agricultural product that is produced. An independent producer can also be a steering committee composed of independent producers in the process of organizing an association to operate a Value-Added venture that will be owned and controlled by the independent producers supplying the agricultural product to the market. Independent Producers must produce and own the agricultural product.
product to which value is being added. Producers who produce the agricultural product under contract for another entity but do not own the product produced are not independent producers.

Majority-Controlled Producer-Based Business Venture—A venture where more than 50% of the ownership and control is held by Independent Producers, or, partnerships, LLCs, LLPs, corporations or cooperatives that are themselves 100 percent owned and controlled by Independent Producers.

Matching Funds—Cash or confirmed funding commitments from non-Federal sources unless otherwise provided by law. Unless otherwise provided, matching funds must be at least equal to the grant amount. Unless otherwise provided, in-kind contributions that conform to the provisions of 7 CFR 3015.50 and 7 CFR 3019.23, as applicable, can be used as matching funds. Examples of in-kind contributions include volunteer services furnished by professional and technical personnel, donated supplies and equipment, and donated office space. Matching funds must be provided in advance of grant funding, such that for every dollar of grant that is advanced, not less than an equal amount of match funds shall have been funded prior to submitting the request for reimbursement. Matching funds are subject to the same use restrictions as grant funds. Funds used for an ineligible purpose will not be considered matching funds.

National Office—USDA RBS headquarters in Washington, DC.

Nonprofit institution—Any organization or institution, including an accredited institution of higher education, no part of the net earnings of which may inure, to the benefit of any private shareholder or individual.

Product segregation—Physical separation of a product or commodity from similar products. Physical separation requires a barrier to prevent mixing with the similar product.

Public body—Any state, county, city, township, incorporated town or village, borough, authority, district, economic development authority, or Indian tribe on federal or state reservations or other federally recognized Indian tribe in rural areas.

RFP—Request for Proposals.

Rural and rural area—Includes all the territory of a state that is not within the outer boundary of any city or town having a population of 50,000 or more and the urbanized area contiguous and adjacent to such city or town, as defined by the U.S. Bureau of the Census using the latest decennial census of the United States.

Rural Development—A mission area within the USDA consisting of the Office of Under Secretary for Rural Development, Office of Community Development, Rural Business-Cooperative Service, Rural Housing Service and Rural Utilities Service and their successors.

State—Includes each of the several States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and, as may be determined by the Secretary to be feasible, appropriate and lawful, the Federated States of Micronesia.

State Office—USDA Rural Development offices located in each state.

Value-Added—The incremental value that is realized by the producer from an agricultural commodity or product as the result of a change in its physical state, differentiated production or marketing, as demonstrated in a business plan, or Product segregation. Also, the economic benefit realized from the production of farm or ranch-based renewable energy. Incremental value may be realized by the producer as a result of either an increase in value to buyers or the expansion of the overall market for the product. Examples include milling wheat into flour, slaughtering livestock or poultry, making strawberries into jam, the marketing of organic products, an identity-preserved marketing system, wind or hydro power produced on land that is farmed and collecting and converting methane from animal waste to generate energy. Identity-preserved marketing systems include labeling that identifies how the product was produced and by whom.
§ 4284.4 Appeals.
Any appealable adverse decision made by the Agency may be appealed in accordance with USDA appeal regulations found at 7 CFR part 11 and subpart B of part 1900. If the Agency makes a determination that a decision is not appealable, a participant may request that it be reviewed by the Director of the National Appeals Division.

§ 4284.5 [Reserved]

§ 4284.6 Applicant eligibility.
An outstanding judgment obtained against an applicant by the United States in a Federal Court (other than in the United States Tax Court), which has been recorded, shall cause the applicant to be ineligible to receive any assistance until the judgment is paid in full or otherwise satisfied. RBS grant funds may not be used to satisfy the judgment.

§ 4284.7 Electronic submission.
Applicants and grant awardees are encouraged, but not required, to submit applications and reports in electronic form as prescribed in requests for proposals issued by USDA and in the applicable grant agreements.

§ 4284.8 Grant approval and obligation of funds.
The following statement will be entered in the comment section of the Request for Obligation of Funds, which must be signed by the grantee:
The grantee certifies that it is in compliance with and will continue to comply with all applicable laws, regulations, Executive Orders and other generally applicable requirements, including those contained in 7 CFR part 4284 and 7 CFR parts 3015, 3016, 3017, 3018, 3019 and 3052 in effect on the date of grant approval, and the approved Letter of Conditions.

§ 4284.9 Grant disbursement.
The Agency will determine, based on 7 CFR parts 3015, 3016 and 3019, as applicable, whether disbursement of a grant will be by advance or reimbursement. The Agency may limit the frequency in which a Request for Advance or Reimbursement may be submitted.

§ 4284.10 Ineligible grant purposes.
Grant funds may not be used to:
(a) Duplicate current services or replace or substitute support previously provided. If the current service is inadequate, however, grant funds may be used to expand the level of effort or services beyond what is currently being provided;
(b) Pay costs of preparing the application package for funding under this program;
(c) Pay costs of the project incurred prior to the date of grant approval;
(d) Fund political activities;
(e) Pay for assistance to any private business enterprise which does not have a least 51 percent ownership by those who are either citizens of the United States or reside in the United States after being legally admitted for permanent residence;
(f) Pay any judgment or debt owed to the United States;
(g) Plan, repair, rehabilitate, acquire, or construct a building or facility (including a processing facility);
(h) Purchase, rent or install Fixed Equipment;
(i) Pay for the repair of privately owned vehicles; or
(j) Fund research and development.

§ 4284.11 Award requirements.
In addition to specific grant requirements, all approved applicants will be required to do the following:
(a) Enter into a grant agreement with USDA in form and substance similar to the form of agreement as may be published within or as an appendix to the applicable RFP;
(b) Submit a feasibility study and business plan showing the viability of the venture, if any Federal grant and matching funds are to be used as working capital;
(c) Use “Request for Advance or Reimbursement” to request advances or reimbursements, as applicable, but not more frequently than once a month;
(d) Maintain a financial management system that is acceptable to the Agency; and
(e) Collect and maintain data on race, sex and national origin of the beneficiaries of the project.
§ 4284.12 Reporting requirements.

Grantees must submit the following to USDA:

(a) A “Financial Status Report” listing expenditures according to agreed upon budget categories, on a semi-annual basis. Reporting periods end each March 31 and September 30. Reports are due 30 days after the reporting period ends.

(b) Semi-annual performance reports that compare accomplishments to the objectives stated in the proposal. Identify all tasks completed to date and provide documentation supporting the reported results. If the original schedule provided in the work plan is not being met, the report should discuss the problems or delays that may affect completion of the project. Objectives for the next reporting period should be listed. Compliance with any special condition on the use of award funds should be discussed. Reports are due as provided in paragraph (a) of this section. The supporting documentation for completed tasks include, but are not limited to, feasibility studies, marketing plans, business plans, articles of incorporation and bylaws and an accounting of how working capital funds were spent.

(c) Final project performance reports, inclusive of supporting documentation. The final performance report is due within 30 days of the completion of the project.

§ 4284.13 Confidentiality of reports.

All reports submitted to the Agency will be held in confidence to the extent permitted by law.

§ 4284.14 Grant servicing.

Grants will be serviced in accordance with 7 CFR part 1951, subparts E and O. Grantees will permit periodic inspection of the program operations by a representative of the Agency. All non-confidential information resulting from the Grantee’s activities shall be made available to the general public on an equal basis.

§ 4284.15 Performance reviews.

(a) USDA will incorporate performance criteria in grant award documentation and will regularly evaluate the progress and performance of grant awardees.

(b) USDA may elect to suspend or terminate a grant in all or part, or funding of a particular workplan activity, but nevertheless fund the remainder of a request for an advance or reimbursement, as applicable, where USDA has determined:

1. That the grantee or subrecipient of grant funds has demonstrated insufficient progress in complying with the terms of the grant agreement;

2. There is reason to believe that other sources of joint funding have not been or will not be forthcoming on a timely basis; or

3. Such other cause as USDA identifies in writing to the grantee (including but not limited to the use of Federal grant funds for ineligible purposes).

§ 4284.16 Other considerations.

(a) Environmental review. All grants made under this subpart are subject to the requirements of 7 CFR part 1940, subpart G. Applications for technical assistance or planning projects are generally excluded from the environmental review process by §1940.333, provided the assistance is not related to the development of a specific site. Applicants for grant funds must consider and document within their plans the important environmental factors within the planning area and the potential environmental impacts of the plan on the planning area, as well as the alternative planning strategies that were reviewed.

(b) Civil rights. All grants made under this subpart are subject to the requirements of title VI of the Civil Rights Act of 1964, which prohibits discrimination on the basis of race, color and national origin as outlined in 7 CFR part 1901, subpart E. In addition, the grants made under this subpart are subject to the requirements of section 504 of the Rehabilitation Act of 1973, as amended, which prohibits discrimination on the basis of disability; the requirements of the Age Discrimination Act of 1975, which prohibits discrimination on the basis of age; and title III of the Americans with Disabilities Act, which prohibits discrimination on the basis of disability by private entities in places
of public accommodations. This program will also be administered in accordance with all other applicable civil rights law.

(c) Other USDA regulations. The grant programs under this part are subject to the provisions of the following regulations, as applicable:

1. 7 CFR part 3015, Uniform Federal Assistance Regulations;
2. 7 CFR part 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments;
3. 7 CFR part 3017, Governmentwide Debarment and Suspension (non-procurement) and Governmentwide Requirements for Drug-Free Workplace (Grants);
4. 7 CFR part 3018, New Restrictions on Lobbying;
5. 7 CFR part 3019, Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals and Other Non-profit Organizations; and
6. 7 CFR part 3052, Audits of States, Local Governments and Non-profit Organizations.

§ 4284.17 Member delegate clause.
No Member of Congress shall be admitted to any share or part of a grant program or any benefit that may arise therefrom, but this provision shall not be construed to bar as a contractor under a grant a publicly held corporation whose ownership might include a Member of Congress.

§ 4284.18 Audit requirements.
Grantees must comply with the audit requirements of 7 CFR part 3052. The audit requirements apply to the years in which grant funds are received and years in which work is accomplished using grant funds.

§ 4284.19 Programmatic changes.
The Grantee shall obtain prior approval for any change to the scope or objectives of the approved project. Failure to obtain prior approval of changes to the scope of work or budget may result in suspension, termination and recovery of grant funds.

§§ 4284.20–4284.99 [Reserved]

§ 4284.100 OMB control number.
The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0570–0045.

Subparts B–E [Reserved]

Subpart F—Rural Cooperative Development Grants

SOURCE: 69 FR 23428, Apr. 29, 2004, unless otherwise noted.

§ 4284.501 Purpose.
This subpart outlines the Agency’s polices and procedures for making grants for cooperative development in rural areas.

§ 4284.502 Policy.
Rural cooperative development grants will be used to facilitate the creation or retention of jobs in rural areas through the development of new rural cooperatives, Value-Added processing and rural businesses.

§ 4284.503 Program administration.
The rural cooperative development grant program is administered by Cooperative Services within the Agency.

§ 4284.504 Definitions.
Center—The entity established or operated by the grantee for rural cooperative development. It may or may not be an independent legal entity separate from the grantee.

Cooperative development—The startup, expansion or operational improvement of a cooperative to promote development in rural areas of services and products, processes that can be used in the marketing of products, or enterprises that create Value-Added to farm products through processing or marketing activities. Development activities may include, but are not limited to, technical assistance, research services, educational services and advisory services. Operational improvement includes making the cooperative more efficient or better managed.
1994 Institution—means a college identified as such for purposes of the Equity in Educational Land-Grant Status Act of 1994 (7 U.S.C. 301 note). Contact the Agency for a list of currently eligible colleges.

Project—A planned undertaking by a Center that utilizes the funds provided to it to promote economic development in rural areas through the creation and enhancement of cooperatives.

§§ 4284.505–4284.506 [Reserved]

§ 4284.507 Eligibility for grant assistance.

Grants may be made to Nonprofit corporations and institutions of higher education. Grants may not be made to Public bodies.

§ 4284.508 Use of grant funds.

Grant funds may be used to pay up to 75 percent (95 percent where the grantee is a 1994 Institution) of the cost of establishing and operating centers for rural cooperative development. Matching funds contributed by the applicant may include a loan from another federal source. Grant funds may be used for, but are not limited to, providing the following to individuals, cooperatives, small businesses and other similar entities in rural areas served by the Center:

(a) Applied research, feasibility, environmental and other studies that may be useful for the purpose of cooperative development.

(b) Collection, interpretation and dissemination of principles, facts, technical knowledge, or other information for the purpose of cooperative development.

(c) Providing training and instruction for the purpose of cooperative development.

(d) Providing loans and grants for the purpose of cooperative development in accordance with the subpart.

(e) Providing technical assistance, research services and advisory services for the purpose of cooperative development.

§ 4284.509 Limitations on grants.

Grants made pursuant to this subpart shall be for one year or less.

§ 4284.510 Application processing.

(a) Applications. USDA will solicit applications on a competitive basis by publication of one or more Requests for Proposals (RFPs). Unless otherwise specified in the applicable RFP, applicants must file an original and one hard copy of the required forms and a proposal.

(b) Required forms. The following forms must be completed, signed and submitted as part of the application package. Other forms may be required. This will be published in the applicable RFP.

(1) “Application for Federal Assistance”

(2) “Budget Information—Non-Construction Programs”

(3) “Assurances—Non-Construction Programs”

(c) Proposal. Each proposal must contain the following elements. Additional elements may be published in the applicable RFP.

(1) Title Page.

(2) Table of Contents.

(3) Executive Summary. A summary of the proposal should briefly describe the Center, including goals and tasks to be accomplished, the amount requested, how the work will be performed and whether organizational staff, consultants or contractors will be used.

(4) Eligibility. A detailed discussion describing how the applicant meets the eligibility requirements.

(5) Proposal Narrative. The narrative portion of the proposal must include, but is not limited to, the following:

(i) Project Title. The title of the proposed project must be brief, not to exceed 75 characters, yet describe the essentials of the project.

(ii) Information Sheet. A separate one-page information sheet listing each of the evaluation criteria referenced in the RFP, followed by the page numbers of all relevant material and documentation contained in the proposal that address or support the criteria.

(iii) Goals of the Project. This section must include the following:

(A) A provision that substantiates that the Center will effectively serve rural areas in the United States;

(B) A provision that the primary objective of the Center will be to improve...
the economic condition of rural areas through cooperative development;

(C) A description of the contributions that the proposed activities are likely to make to the improvement of the economic conditions of the rural areas for which the Center will provide services;

(D) Provisions that the Center, in carrying out the activities, will seek, where appropriate, the advice, participation, expertise, and assistance of representatives of business, industry, educational institutions, the Federal Government, and State and local governments.

(iv) Work Plan. Applicants must discuss the specific tasks to be completed using grant and matching funds. The work plan should show how customers will be identified, key personnel to be involved, and the evaluation methods to be used to determine the success of specific tasks and overall objectives of Center operations. The budget must present a breakdown of the estimated costs associated with cooperative development activities as well as the operation of the Center and allocate these costs to each of the tasks to be undertaken. Matching funds as well as grant funds must be accounted for in the budget.

(v) Performance Evaluation Criteria. Performance criteria suggested by the applicant for incorporation in the grant award in the event the proposal receives grant funding under this subpart. These suggested criteria are not binding on USDA.

(vi) Undertakings. The applicant must expressly undertake to do the following:

(A) Take all practicable steps to develop continuing sources of financial support for the Center, particularly from sources in the private sector;

(B) Make arrangements for the activities by the nonprofit institution operating the Center to be monitored and evaluated; and

(C) Provide an accounting for the money received by the grantee under this subpart.

(vii) Delivery of Cooperative development assistance. The applicant must describe its previous accomplishments and outcomes in Cooperative development activities and/or its potential for effective delivery of Cooperative development services to rural areas. The applicant should also describe the type(s) of assistance to be provided, the expected impacts of that assistance, the sustainability of cooperative organizations receiving the assistance, and the transferability of its Cooperative development strategy and focus to other areas of the U.S.

(viii) Qualifications of Personnel. Applicants must describe the qualifications of personnel expected to perform key center tasks, and whether these personnel are to be full/part-time Center employees or contract personnel. Those personnel having a track record of positive solutions for complex cooperative development or marketing problems, or those with a record of conducting feasibility studies that later proved to be accurate, business planning, marketing analysis, or other activities relevant to the Center’s success should be highlighted.

(ix) Support and commitments. Applicants must describe the level of support and commitment in the community for the proposed Center and the services it would provide. Plans for coordinating with other developmental organizations in the proposed service area, or with state and local government institutions should be included. Letters supporting cooperation and coordination from potential local customers should be provided.

(x) Future support. Applicants should describe their vision for Center operations beyond the first year, including issues such as sources and uses of alternative funding; reliance on Federal, state, and local grants; and the use of in-house personnel for providing services versus contracting out for that expertise. To the extent possible, applicants should document future funding sources that will help achieve long-term sustainability of the Center.

(xi) Evaluation criteria. Each of the evaluation criteria referenced in the RFP must be specifically and individually addressed in narrative form.

(6) Verification of Matching Funds. Applicants must provide a budget to support the work plan showing all sources and uses of funds during the project period. Applicants will be required to verify matching funds, both cash and
§4284.511 Evaluation screening.

The Agency will conduct an initial screening of all proposals to determine whether the applicant is eligible and whether the application is complete and sufficiently responsive to the requirements set forth in the applicable RFP so as to allow for an informed review. Incomplete or non-responsive applications will not be evaluated further. Applicants may revise their applications and re-submit them prior to the published deadline if there is sufficient time to do so.

§4284.512 Evaluation process.

(a) Applications will be evaluated by qualified reviewers appointed by the Agency.

(b) After all proposals have been evaluated using the evaluation criteria and scored in accordance with the point allocation specified in the applicable RFP, the Agency will present to the Administrator of RBS a list of all applications in rank order, together with funding level recommendations.

§4284.513 Evaluation criteria and weights.

Unless supplemented in a RFP, the criteria listed in this section will be used to evaluate grants under this subpart. Preference will be given to items in paragraphs (a) through (f) of this section. The distribution of points to be awarded per criterion will be identified in the applicable RFP.

(a) Administrative capabilities. The application will be evaluated to determine whether the subject Center has a track record of administering a nationally coordinated, regional or state-wide operated project. Centers that have capable financial systems and audit controls, personnel and program administration performance measures and clear rules of governance will receive more points than those not evidencing this capacity.

(b) Technical assistance and other services. The Agency will evaluate the applicant’s demonstrated expertise in providing technical assistance in Rural areas.

(c) Economic development. The Agency will evaluate the applicant’s demonstrated ability to assist in the retention of businesses, facilitate the establishment of cooperatives and new cooperative approaches and generate employment opportunities that will improve the economic conditions of rural areas.

(d) Linkages. The Agency will evaluate the applicant’s demonstrated ability to create horizontal linkages among businesses within and among various sectors in rural areas of the United States and vertical linkages to domestic and international markets.

(e) Commitment. The Agency will evaluate the applicant’s commitment to providing technical assistance and other services to underserved and economically distressed areas in rural areas of the United States.

(f) Matching Funds. All applicants must demonstrate Matching Funds equal to at least 25 percent (5 percent for 1994 Institutions) of the grant amount requested. Applications exceeding these minimum commitment levels will receive more points.

(g) Delivery. The Agency will evaluate whether the Center has a track record in providing technical assistance in rural areas and accomplishing effective outcomes in cooperative development. The Center’s potential for delivering effective cooperative development assistance, the expected effects of that assistance, the sustainability of cooperative organizations receiving the assistance, and the transferability of the Center’s cooperative development strategy and focus to other States will also be assessed.

(h) Work Plan/Budget. The work plan will be reviewed for detailed actions and an accompanying timetable for implementing the proposal. Clear, logical, realistic and efficient plans will result in-kind. Sufficient information should be included such that USDA can verify all representations.

(7) Certification. Applicants must certify that matching funds will be available at the same time grant funds are anticipated to be spent and that matching funds will be spent in advance of grant funding, such that for every dollar of grant that is advanced, not less than an equal amount of match funds will have been funded prior to submitting the request for advance.
RBS and RUS, USDA § 4284.601

in a higher score. Budgets will be reviewed for completeness and the quality of non Federal funding commitments.

(i) Qualifications of those Performing the Tasks. The application will be evaluated to determine if the personnel expected to perform key center tasks have a track record of positive solutions for complex Cooperative development or marketing problems, or a successful record of conducting accurate feasibility studies, business plans, marketing analysis, or other activities relevant to Cooperative development center success.

(j) Local support. Applications will be reviewed for previous and expected local support for the Center, plans for coordinating with other developmental organizations in the proposed service area and coordination with state and local institutions. Support documentation should include recognition of rural values that balance employment opportunities with environmental stewardship and other positive rural amenities. Centers that demonstrate strong support from potential beneficiaries and formal evidence of the Center’s intent to coordinate with other developmental organizations will receive more points than those not evidencing such support and formal intent.

(k) Future support. Applications that demonstrate their vision for funding center operations for future years, including diversification of funding sources and building in-house technical assistance capacity, will receive more points for this criterion.

§ 4284.514 Grant closing.

(a) Letter of Conditions. The Agency will notify an approved applicant in writing, setting out the conditions under which the grant will be made.

(b) Applicant’s intent to meet conditions. Upon reviewing the conditions and requirements in the letter of conditions, the applicant must complete, sign and return the Agency’s “Letter of Intent to Meet Conditions,” or, if certain conditions cannot be met, the applicant may propose alternate conditions to the Agency. The Agency must concur with any changes proposed to the letter of conditions by the applicant before the application will be further processed.

(c) Grant agreement. The Agency and the grantee must enter into the Agency’s “Agriculture Innovation Center Grant Agreement” prior to the advance of funds.

§§ 4284.515–4284.599 [Reserved]

§ 4284.600 OMB control number.

The reporting and recordkeeping requirements contained in this regulation have been approved by the Office of Management and Budget and have been assigned OMB control number 0570-0006 in accordance with the Paperwork Reduction Act of 1995.

Subpart G—Rural Business Opportunity Grants

SOURCE: 64 FR 71986, Dec. 23, 1999, unless otherwise noted.

§ 4284.601 Purpose.

This subpart outlines Agency policies and authorizations and sets forth procedures for making grants to provide technical assistance for business development and conduct economic development planning in rural areas. The purpose of this program is to promote sustainable economic development in rural communities with exceptional needs by:

(a) Promoting economic development that is sustainable over the long term through local effort without subsidies or external support and that leads to improvements in quality as well as the quantity of economic activity in the community;

(b) Catalyzing economic development projects by providing critical investments that enable effective development projects to be undertaken by rural communities that, with the Rural Business Opportunity Grants (RBOG) assistance, will be able to identify their needs and take full advantage of available resources and opportunities;

(c) Focusing assistance on priority communities (defined in § 4284.603); and

(d) Sponsoring economic development activities with significant potential to serve as examples of “best practices” that merit implementation in
§ 4284.602 Policy.

(a) The grant program will be used to assist in the economic development of rural areas.

(b) Funds allocated for use in accordance with this subpart are also to be considered for use by Indian tribes within the State regardless of whether State development strategies include Indian reservations within the State's boundaries. Indians residing on such reservations must have equal opportunity, along with other rural residents, to participate in the benefits of these programs.

§ 4284.603 Definitions.

Agency. The Federal agency within the United States Department of Agriculture (USDA) with responsibility assigned by the Secretary of Agriculture to administer the RBOG Program. At the time of publication, that agency is the Rural Business-Cooperative Service.

Best practice project. An action that has potential applicability in other rural communities and which potentially has instructional value when shared with those communities.

Business support centers. Centers established to provide assistance to businesses in such areas as counseling, business planning, training, management assistance, marketing information, and locating financing for business operations. The centers need not be located in a rural area, but must provide assistance to businesses located in rural areas.

Economic development. The industrial, business and financial augmentation of an area as evidenced by increases in total income, employment opportunities, value of production, duration of employment, or diversification of industry, reduced outmigration, higher labor force participation rates or wage levels, or gains in other measurements of economic activity, such as land values.

Long-term. The period of time covered by the three most recent decennial censuses of the United States to the present.

Planning. A process to coordinate economic development activities, develop guides for action, or otherwise assist local community leaders in the economic development of rural areas.

Priority communities. Communities targeted for Agency assistance as determined by the USDA Under Secretary for Rural Development. Priority communities are those that are experiencing trauma due to natural disasters or are undertaking or completing fundamental structural changes, have remained persistently poor, or have experienced long-term population decline or job deterioration.

Project. The result of the use of grant funds provided under this subpart through technical assistance or planning relating to the economic development of a rural area.

Rural and rural area. Any area other than a city or town that has a population of greater than 50,000 inhabitants including the urbanized area contiguous and adjacent to such a city or town. The population figure used must be in accordance with the latest decennial census of the United States.

State. Any of the 50 States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

Sustainable development. Development planned and designed to consider and balance environmental quality, economic needs, and social concerns.

Technical assistance. A nonconstruction, problem solving activity performed for the benefit of a business or community to assist in the economic development of a rural area. The Agency will determine whether a specific activity qualifies as technical assistance.

United States. The 50 States of the United States of America, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of
Applicant eligibility.

(a) Grants may be made to public bodies, nonprofit corporations, Indian tribes on Federal or State reservations and other Federally recognized tribal groups, and cooperatives with members that are primarily rural residents and that conduct activities for the mutual benefit of the members.

(b) Applicants must have sufficient financial strength and expertise in activities proposed in the application to ensure accomplishment of the described activities and objectives.

(1) Financial strength will be analyzed by the Agency based on financial data provided in the application. The analysis will consider the applicant’s tangible net worth, which must be positive, and whether the applicant has dependable sources of revenue or a successful history of raising revenue sufficient to meet cash requirements.

(2) Expertise will be analyzed by the Agency based on the applicant staff’s training and experience in activities similar to those proposed in the application and, if consultants will be used, on the staff’s experience in choosing and supervising consultants.

(c) Any delinquent debt to the Federal Government shall cause the applicant to be ineligible to receive any RBOG funds until the debt has been paid.

Eligible grant purposes.

(a) Grant funds may be used to assist in the economic development of rural areas by providing technical assistance for business development and economic development planning. Grant funds may be used for, but are not limited to, the following purposes:

(1) Identify and analyze business opportunities that will use local rural materials or human resources. This includes opportunities in export markets, as well as feasibility and business plan studies.

(2) Identify, train, and provide technical assistance to existing or prospective rural entrepreneurs and managers;

(3) Establish business support centers and otherwise assist in the creation of new rural businesses;

(4) Conduct local community or multi-county economic development planning;

(5) Establish centers for training, technology, and trade that will provide training to rural businesses in the utilization of interactive communications technologies to develop international trade opportunities and markets;

(6) Conduct leadership development training of existing or prospective rural entrepreneurs and managers;

(7) Pay reasonable fees and charges for professional services necessary to conduct the technical assistance, training, or planning functions.

(b) Grants may be made only when there is a reasonable prospect that the project will result in the economic development of a rural area.

(c) Grants may be made only when the proposal includes a basis for determining the success or failure of the project and individual major elements of the project and outlines procedures that will be taken to assess the project’s impact at its conclusion.

(d) Grants may be made only when the proposed project is consistent with local and area-wide strategic plans for community and economic development, coordinated with other economic development activities in the project area and consistent with any USDA Rural Development State Strategic Plan.

(e) A grant may be considered for the amount needed to assist with the completion of a proposed project, provided that the project can reasonably be expected to be completed within 2 full years after it is begun. If grant funds are requested to establish or assist with an activity of more than 2 years duration, the amount of a grant approved in any fiscal year will be limited to the amount needed to assist with no more than 1 full year of operation. Subsequent grant requests may be considered in subsequent years, if needed to continue the operation, but
§§ 4284.622–4287.628

funding for 1 year provides no assurance of additional funding in subsequent years.

§§ 4284.622–4287.628 [Reserved]

§ 4284.629 Ineligible grant purposes.

Grant funds may not be used to:

(a) Duplicate current services or replace or substitute support previously provided. If the current service is inadequate, however, grant funds may be used to expand the level of effort or services beyond what is currently being provided;

(b) Pay costs of preparing the application package for funding under this program;

(c) Pay costs of the project incurred prior to the effective date of the grant made under this subpart;

(d) Fund political activities;

(e) Pay for assistance to any private business enterprise which does not have at least 51 percent ownership by those who are either citizens of the United States or reside in the United States after being legally admitted for permanent residence;

(f) Pay any judgment or debt owed to the United States; or

(g) Pay costs of real estate acquisition or development or building construction.

§ 4284.630 Other considerations.

(a) Civil rights compliance requirements. All grants made under this subpart are subject to title VI of the Civil Rights Act of 1964 and part 1901, subpart E of this title.

(b) Environmental review. All grants made under this subpart are subject to the requirements of subpart G of part 1940 of this title. Applications for technical assistance or planning projects are generally excluded from the environmental review process by § 1940.333 of this title provided the assistance is not related to the development of a specific site. Applicants for grant funds must consider and document within their plans the important environmental factors within the planning area and the potential environmental impacts of the plan on the planning area, as well as the alternative planning strategies that were reviewed.

(c) Other USDA regulations. This program is subject to the provisions of the following regulations, as applicable:

(1) 7 CFR part 3015, Uniform Federal Assistance Regulations;

(2) 7 CFR part 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments;

(3) 7 CFR part 3017, Governmentwide Debarment and Suspension (Non-procurement) and Governmentwide Requirements for Drug-Free Workplace (Grants);

(4) 7 CFR part 3018, New Restrictions on Lobbying;

(5) 7 CFR part 3019, Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations; and

(6) 7 CFR part 3052, Audits of States, Local Governments, and Non-profit Organizations.

§§ 4284.631–4284.637 [Reserved]

§ 4284.638 Application processing.

(a) Applications. (1) Applicants will file an original and one copy of “Application For Federal Assistance (For Nonconstruction),” with the Agency State Office (available in any Agency office).

(2) All applications shall be accompanied by:

(i) Copies of applicant’s organizational documents showing the applicant’s legal existence and authority to perform the activities under the grant;

(ii) A proposed scope of work, including a description of the proposed project, details of the proposed activities to be accomplished and timeframes for completion of each task, the number of months duration of the project, and the estimated time it will take from grant approval to beginning of project implementation;

(iii) A written narrative which includes, at a minimum, the following items:

(A) An explanation of why the project is needed, the benefits of the proposed project, and how the project meets the grant selection criteria;

(B) Area to be served, identifying each governmental unit, i.e., town,
county, etc., to be affected by the project;
(C) Description of how the project will coordinate economic development activities with other economic development activities within the project area;
(D) Business to be assisted, if appropriate; economic development to be accomplished;
(E) An explanation of how the proposed project will result in increased or saved jobs in the area and the number of projected new and saved jobs;
(F) Description of the applicant’s demonstrated capability and experience in providing the proposed project assistance or similar economic development activities, including experience of key staff members and persons who will be providing the proposed project activities and managing the project;
(G) Method and rationale used to select the areas and businesses that will receive the service;
(H) Brief description of how the work will be performed including whether organizational staff or consultants or contractors will be used; and
(I) Other information the Agency may request to assist it in making a grant award determination.
(iv) The latest financial information to show the organization’s financial capacity to carry out the proposed work. At a minimum, the information should include the most recent balance sheet and an income statement. A current audited report is required if available;
(v) An evaluation method to be used by the applicant to determine if objectives of the proposed activity are being accomplished; and
(vi) Intergovernmental review comments from the State Single Point of Contact, or evidence that the State has elected not to review the program under Executive Order 12372.

(b) Letter of conditions. The Agency will notify the approved applicant in writing, setting out the conditions under which the grant will be made.
(c) Applicant’s intent to meet conditions. Upon reviewing the conditions and requirements in the letter of conditions, the applicant must complete, sign and return a “Letter of Intent to Meet Conditions” to the Agency; or if certain conditions cannot be met, the applicant may propose alternate conditions to the Agency. The Agency must concur with any changes proposed to the letter of conditions by the applicant before the application will be further processed.

§ 4284.639 Grant selection criteria.
Agency officials will select projects to receive assistance under this program according to the following criteria:
(a) A score of 0 to 10 points will be awarded based on the Agency assessment of the extent to which economic development resulting from the proposed project will be sustainable over the long term by local efforts, without the need for continued subsidies by governments or other organizations outside the community.
(b) A score of 0 to 10 points will be awarded based on the Agency assessment of the extent to which the project should lead to improvements in the quality of economic activity within the community, such as higher wages, improved benefits, greater career potential, and the use of higher levels of skills than currently are typical within the economy.
(c) If the grant will fund a critical element of a larger program of economic development, without which the overall program either could not proceed or would be far less effective, or if the program to be assisted by the grant will also be partially funded from other sources, points will be awarded as follows based on the percentage of the cost of the overall program that will be funded by the grant.
(1) Less than 20 percent—30 points;
(2) 20 but less than 50 percent—20 points;
(3) 50 but less than 75 percent—10 points; or
(4) More than 75 percent—0 points.
(d) Points will be awarded for each of the following criteria met by the community or communities that will receive the primary benefit of the grant. However, regardless of the mathematical total of points indicated by paragraphs (d)(1) through (d)(5) of this section, total points awarded under paragraph (d) must not exceed 40.
(1) Experiencing trauma due to a major natural disaster that occurred
not more than 3 years prior to the filing of the application for RBOG assistance—15 points;
(2) Undergoing fundamental structural change in the local economy, such as that caused by the closing or major downsizing of a military facility or other major employer not more than 3 years prior to the filing of the application for RBOG assistance—15 points;
(3) Has experienced long-term poverty—10 points;
(4) Has experienced long-term population decline—10 points; and
(5) Has experienced long-term job deterioration—10 points.
(e) A score of 0 to 10 points will be awarded based on the Agency determination of the extent of the project's usefulness as a new best practice as defined in §4284.603.
(f) The State Director may assign up to 15 discretionary points to an application. If allocation of funds under National Office control is being considered, the Agency Administrator may assign up to 20 additional discretionary points. Assignment of discretionary points by either the State Director or the Agency Administrator must include a written justification. Permissible justifications are geographic distribution of funds, special importance for implementation of a strategic plan in partnership with other organizations, or extraordinary potential for success due to superior project plans or qualifications of the grantee.

§ 4284.640 Appeals.
Any appealable adverse decision made by the Agency may be appealed in accordance with USDA appeal regulations found at 7 CFR part 11. If the Agency makes a determination that a decision is not appealable, a request for a determination of appealability may be made to the National Appeals Staff.

§§ 4284.641–4287.646 [Reserved]

§ 4284.647 Grant approval and obligation of funds.
(a) The following statement will be entered in the comment section of the Request For Obligation of Funds, which must be signed by the grantee:
The grantee certifies that it is in compliance with and will continue to comply with all applicable laws; regulations; Executive Orders; and other generally applicable requirements, including those contained in 7 CFR part 4284, subpart G, and 7 CFR parts 3015, 3016, 3017, 3018, 3019, and 3052 in effect on the date of grant approval; and the approved Letter of Conditions.
(b) [Reserved]

§ 4284.648 Fund disbursement.
The Agency will determine, based on 7 CFR parts 3015, 3016, and 3019, as applicable, whether disbursement of a grant will be by advance or reimbursement. A Request for Advance or Reimbursement, (available in any Agency office) must be completed by the grantee and submitted to the Agency no more often than monthly to request either advance or reimbursement of funds.

§§ 4284.649–4284.655 [Reserved]

§ 4284.656 Reporting.
(a) A Financial Status Report (available in any Agency office) and a project performance activity report will be required of all grantees on a quarterly basis. The grantee will cause said program to be completed within the total sums available to it, including the grant, in accordance with the scope of work and any necessary modifications thereof prepared by grantee and approved by the Agency. A final project performance report will be required with the final Financial Status Report. The final report may serve as the last quarterly report. The final report must provide complete information regarding the jobs created and saved as a result of the grant. Grantees shall constantly monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved. Grantees are to submit an original of each report to the Agency. The project performance reports shall include, but not be limited to, the following:
(1) A comparison of actual accomplishments to the objectives established for that period;
(2) Problems, delays, or adverse conditions, if any, which have affected or will affect attainment of overall project objectives, prevent meeting
time schedules or objectives, or preclude the attainment of particular project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or planned to resolve the situation; and
(3) Objectives and timetable established for the next reporting period.
(b) Within 1 year after the conclusion of the project, the grantee will provide a project evaluation report based on criteria developed in accordance with §§ 4284.621(c) and 4284.638(a)(2)(v).
(c) The Agency may also require grantees to prepare a report suitable for public distribution describing the accomplishments made through the use of the grant and, in the case where the grant funded the development or application of a “best practice,” to describe that “best practice.”
(d) The grantee will provide for Financial Management Systems which will include:
(1) Accurate, current, and complete disclosure of the financial result of each grant.
(2) Records which identify adequately the source and application of funds for grant-supporting activities, together with documentation to support the records. Those records shall contain information pertaining to grant awards and authorizations, obligations, unobligated balances, assets, liabilities, outlays, and income.
(3) Effective control over and accountability for all funds. Grantee shall adequately safeguard all such assets and shall assure that funds are used solely for authorized purposes.
(e) The grantee will retain financial records, supporting documents, statistical records, and all other records pertinent to the grant for a period of at least 3 years after grant closing except that the records shall be retained beyond the 3-year period if audit findings have not been resolved or if directed by the United States. Microfilm copies may be substituted in lieu of original records. The Agency and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the grantee which are pertinent to the specific grant program for the purpose of making audit, examination, excerpts, and transcripts.
§ 4284.657 Audit requirements.
Grantees must provide an annual audit in accordance with 7 CFR part 3052. The audit requirements apply to the years in which grant funds are received and years in which work is accomplished that will be paid for with grant funds.
§§ 4284.658–4284.666 [Reserved]
§ 4284.667 Grant servicing.
Grants will be serviced in accordance with part 1951, subparts E and O, of this title. Grantees will permit periodic inspection of the program operations by a representative of the Agency. All non-confidential information resulting from the Grantee’s activities shall be made available to the general public on an equal basis.
§ 4284.668 Programmatic changes.
The Grantee shall obtain prior approval for any change to the scope or objectives of the approved project. Failure to obtain prior approval of changes to the scope of work or budget may result in suspension, termination, and recovery of grant funds.
§§ 4284.669–4284.683 [Reserved]
§ 4284.684 Exception authority.
The Administrator may, in individual cases, grant an exception to any requirement or provision of this subpart provided the Administrator determines that application of the requirement or provision would adversely affect USDA’s interest.
§§ 4284.685–4284.698 [Reserved]
§ 4284.699 Member delegate clause.
No member of Congress shall be admitted to any share or part of this grant or any benefit that may arise therefrom; but this provision shall not be construed to bar as a contractor under the grant a publicly held corporation whose ownership might include a member of Congress.
§ 4284.700 OMB control number.

The reporting and recordkeeping requirements contained in this regulation have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. chapter 35 and have been assigned OMB control number 0570–0024 in accordance with the Paperwork Reduction Act of 1995. You are not required to respond to this collection of information unless it displays a valid OMB control number.

Subparts H–I [Reserved]

Subpart J—Value-Added Producer Grant Program

SOURCE: 76 FR 10122, Feb. 23, 2011, unless otherwise noted.

GENERAL

§ 4284.901 Purpose.

This subpart implements the value-added agricultural product market development grant program (Value-Added Producer Grants (VAPG)) administered by the Rural Business-Cooperative Service whereby grants are made to enable viable agricultural producers (those who are prepared to progress to the next business level of planning for, or engaging in, value-added production) to develop businesses that produce and market value-added agricultural products. The provisions of this subpart constitute the entire provisions applicable to this Program; the provisions of subpart A of this part do not apply to this subpart.

§ 4284.902 Definitions.

The following definitions apply to this subpart:

Administrator. The Administrator of the Rural Business-Cooperative Service or designees or successors.

Agency. The Rural Business-Cooperative Service or successor for the programs it administers.

Agricultural commodity. An unprocessed product of farms, ranches, nurseries, and forests and natural and man-made bodies of water, that the independent producer has cultivated, raised, or harvested with legal access rights. Agricultural commodities include plant and animal products and their by-products, such as crops, forestry products, hydroponics, nursery stock, aquaculture, meat, on-farm generated manure, and fish and seafood products. Agricultural commodities do not include horses or other animals raised or sold as pets, such as cats, dogs, and ferrets.

Agricultural food product. Agricultural food products can be a raw, cooked, or processed edible substance, beverage, or ingredient intended for human consumption. These products cannot be animal feed, live animals, non-harvested plants, fiber, medicinal products, cosmetics, tobacco products, or narcotics.

Agricultural producer. An individual or entity directly engaged in the production of an agricultural commodity, or that has the legal right to harvest an agricultural commodity, that is the subject of the value-added project. Agricultural producers may “directly engage” either through substantially participating in the labor, management, and field operations themselves or by maintaining ownership and financial control of the agricultural operation.

Agricultural producer group. A membership organization that represents independent producers and whose mission includes working on behalf of independent producers and the majority of whose membership and board of directors is comprised of independent producers. The independent producers, on whose behalf the value-added work will be done, must be confirmed as eligible and identified by name or class.

Applicant. The legal entity submitting an application to participate in the competition for program funding. The applicant must be legally structured to meet one of the four eligible applicant types: Independent Producer, Agricultural Producer Group, Farmer or Rancher Cooperative, or Majority-Controlled Producer Based Business.

Beginning farmer or rancher. This term has the meaning given it in section 343(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1991(a)) and is an entity in which none of the individual owners have operated a farm or a ranch for more than 10 years. For the purposes of this subpart, a beginning farmer or rancher must be
an Independent Producer that, at the time of application submission, currently owns and produces more than 50 percent of the agricultural commodity to which value will be added and has an applicant ownership or membership of 51 percent or more beginning farmers or ranchers. Except as provided, for the purposes of §4284.922(c)(1)(i), to compete for reserved funds, for applicant entities with multiple owners, all owners must be eligible beginning farmers or ranchers.

Branding. The activities involved in the practice of creating a name, symbol or design that identifies and differentiates a product from other products that attracts and retains customers or encourages confidence in the quality and performance of that individual or firm’s products or services.

Business plan. A formal statement of a set of business goals, the reasons why they are believed attainable, and the plan for reaching those goals, including pro forma financial statements appropriate to the term and scope of the project and sufficient to evidence the viability of the venture. It may also contain background information about the organization or team attempting to reach those goals.

Change in physical state. An irreversible processing activity that alters the raw agricultural commodity into a marketable value-added product. This processing activity must be something other than a post-harvest process that primarily acts to preserve the commodity for later sale. Examples of eligible value-added products in this category include, but are not limited to, fish fillets, diced tomatoes, bio-diesel fuel, cheese, jam, and wool rugs. Examples of ineligible products include, but are not limited to, pressure-ripened produce, raw bottled milk, container grown trees, plugs, and cut flowers.

Conflict of interest. A situation in which a person or entity has competing personal, professional, or financial interests that make it difficult for the person or business to act impartially. Regarding use of both grant and matching funds, Federal procurement standards prohibit transactions that involve a real or apparent conflict of interest for owners, employees, officers, agents, or their immediate family members having a financial or other interest in the outcome of the project, or that restrict open and free competition for unrestrained trade. Specifically, grant and matching funds may not be used to support costs for services or goods going to, or coming from, a person or entity with a real or apparent conflict of interest, including, but not limited to, owner(s) and their immediate family members. See §4284.923(a) and (b) for limited exceptions to this definition and practice for VAPG.

Departmental regulations. The regulations of the Department of Agriculture’s Office of Chief Financial Officer (or successor office) as codified in 7 CFR parts 3000 through 3099, including, but not necessarily limited to, 7 CFR parts 3015 through 3019, 7 CFR part 3021, and 7 CFR part 3052, and successor regulations to these parts.

Emerging market. A new or developing, geographic or demographic market that is new to the applicant or the applicant’s product. To qualify as new, the applicant cannot have supplied this product, geographic, or demographic market for more than two years at time of application submission.

Family farm. The term has the meaning given it in §761.2 of title 7, Code of Federal Regulations as in effect on November 8, 2007 (see 7 CFR parts 700–799, revised as of January 1, 2007), in effect that, a Family Farm produces agricultural commodities for sale in sufficient quantity to be recognized as a farm and not a rural residence, owners are primarily responsible for daily physical labor and management, hired help only supplements family labor, and owners are related by blood or marriage or are immediate family.

Farm or ranch. Any place from which $1,000 or more of agricultural products were raised and sold or would have been raised and sold during the previous year, but for an event beyond the control of the farmer or rancher.

Farm- or Ranch-based renewable energy. An agricultural commodity that is used to generate renewable energy on a farm or ranch owned or leased by the independent producer applicant that produces the agricultural commodity. On-farm generation of energy
from wind, solar, geothermal or hydro sources are not eligible.

Farmer or rancher cooperative. A business owned and controlled by independent producers that is incorporated, or otherwise identified by the state in which it operates, as a cooperatively operated business. The independent producers, on whose behalf the value-added work will be done, must be confirmed as eligible and identified by name or class.

Feasibility study. An analysis by a qualified consultant of the economic, market, technical, financial, and management capabilities of a proposed project or business in terms of the project's expectation for success.

Financial feasibility. The ability of a project or business to achieve the income, credit, and cash flows to financially sustain a venture over the long term.

Fiscal year. The Federal government's fiscal year.

Immediate family. Individuals who are closely related by blood, marriage, or adoption, or live within the same household, such as a spouse, domestic partner, parent, child, brother, sister, aunt, uncle, grandparent, grandchild, niece, or nephew.

Independent producers. (1) Individual agricultural producers or entities that are solely owned and controlled by agricultural producers. Independent producers must produce and own the majority of the agricultural commodity to which value will be added as the subject of the project proposal. Independent producers must maintain ownership of the agricultural commodity or product from its raw state through the production and marketing of the value-added product. Producers who produce the agricultural commodity under contract for another entity, but do not own the agricultural commodity or value-added product produced are not considered independent producers. Entities that contract out the production of an agricultural commodity are not considered independent producers. Independent producer entities must confirm their owner members as eligible and must identify them by name or class.

(2) A steering committee comprised of specifically identified agricultural producers in the process of organizing one of the four program eligible entity types that will operate a value-added venture and will supply the majority of the agricultural commodity for the value-added project during the grant period. Such entity must be legally authorized before the grant agreement will be approved by the Agency.

(3) A harvester of an agricultural commodity that can document their legal right to access and harvest the majority of the agricultural commodity that will be used for the value-added product.

Local or regional supply network. An interconnected group of entities through which agricultural based products move from production through consumption in a local or regional area of the United States. Examples of participants in a supply network may include agricultural producers, aggregators, processors, distributors, wholesalers, retailers, consumers, and entities that organize or provide facilitation services and technical assistance for development of such networks.

Locally-produced agricultural food product. Any agricultural food product, as defined in this subpart, that is raised, produced, and distributed in:

(1) The locality or region in which the final product is marketed, so that the total distance that the product is transported is less than 400 miles from the origin of the product; or

(2) The State in which the product is produced.

Majority-controlled producer-based business venture. An entity (except farmer or rancher cooperatives) in which more than 50 percent of the financial ownership and voting control is held by independent producers. Independent Producer members must be confirmed as eligible and must be identified by name or class, along with their percentage of ownership.

Marketing plan. A plan for the project conducted by a qualified consultant that identifies a market window, potential buyers, a description of the distribution system and possible promotional campaigns.

Matching funds. A cost-sharing contribution to the project via confirmed
cash or funding commitments from eligible sources without a real or apparent conflict of interest, that are used for eligible project purposes during the grant funding period. Matching funds must be at least equal to the grant amount, and combined grant and matching funds must equal 100 percent of the total project costs. All matching funds must be verified by authentic documentation from the source as part of the application. Matching funds must be provided in the form of confirmed applicant cash, loan, or line of credit, or provided in the form of a confirmed applicant or family member in-kind contribution that meets the requirements and limitations in §4284.923(a) and (b); or confirmed third-party cash or eligible third-party in-kind contribution; or confirmed non-federal grant sources (unless otherwise provided by law). See examples of ineligible matching funds and matching funds verification requirements in §§4284.924 and 4284.931.

Medium-sized farm. A farm or ranch that is structured as a family farm that has averaged $250,001 to $1,000,000 in annual gross sales of agricultural commodities in the previous three years.

Mid-tier value chain. Local and regional supply networks that link independent producers with businesses and cooperatives that market value-added agricultural products in a manner that:

1. Targets and strengthens the profitability and competitiveness of small and medium-sized farms and ranches that are structured as a family farm; and

2. Obtains agreement from an eligible agricultural producer group, farmer or rancher cooperative, or majority-controlled producer-based business venture that is engaged in the value chain on a marketing strategy.

3. For mid-tier value chain projects, the Agency recognizes that, in a supply chain network, a variety of raw agricultural commodity and value-added product ownership and transfer arrangements may be necessary. Consequently, applicant ownership of the raw agricultural commodity and value-added product from raw through value-added is not necessarily required, as long as the mid-tier value chain proposal can demonstrate an increase in customer base and an increase in revenue returns to the applicant producers supplying the majority of the raw agricultural commodity for the project.

Planning grant. A grant to facilitate the development of a defined program of economic planning activities to determine the viability of a potential value-added venture, and specifically for the purpose of paying for a qualified consultant to conduct and develop a feasibility study, business plan, and/or marketing plan associated with the processing and/or marketing of a value-added agricultural product.

Produced in a manner that enhances the value of the agricultural commodity. The use of a recognizably coherent set of agricultural production practices in the growing or raising of the raw commodity, such that a differentiated market identity is created for the resulting product. Examples of eligible products in this category include, but are not limited to, sustainably grown apples, eggs produced from free-range chickens, or organically grown carrots.

Product segregation. Separating an agricultural commodity or product on the same farm from other varieties of the same commodity or product on the same farm during production and harvesting, with assurance of continued separation from similar commodities during processing and marketing in a manner that results in the enhancement of the value of the separated commodity or product.

Pro forma financial statement. A financial statement that projects the future financial position of a company. The statement is part of the business plan and includes an explanation of all assumptions, such as input prices, finished product prices, and other economic factors used to generate the financial statements. The statement must include projections for a minimum of three years in the form of cash flow statements, income statements, and balance sheets.

Project. All of the eligible activities to be funded by grant and matching funds.
§ 4284.903 Qualified consultant. An independent, third-party, without a conflict of interest, possessing the knowledge, expertise, and experience to perform the specific task required in an efficient, effective, and authoritative manner.

Rural Development. A mission area of the Under Secretary for Rural Development within the U.S. Department of Agriculture (USDA), which includes Rural Housing Service, Rural Utilities Service, and Rural Business-Cooperative Service and their successors.

Small farm. A farm or ranch that is structured as a Family Farm that has averaged $250,000 or less in annual gross sales of agricultural products in the previous three years.

Socially disadvantaged farmer or rancher. This term has the meaning given it in section 355(e) of the Consolidated Farm and Rural Development Act (7 U.S.C. 2003(e)): A farmer or rancher who is a member of a “socially disadvantaged group.” In this definition, the term farmer or rancher means a person that is engaged in farming or ranching or an entity solely owned by individuals who are engaged in farming or ranching. A socially disadvantaged group means a group whose members have been subjected to racial, ethnic, or gender prejudice because of their identity as members of a group without regard to their individual qualities. In the event that there are multiple farmer or rancher owners of the applicant organization, the Agency requires that at least 51 percent of the ownership be held by members of a socially disadvantaged group.

State. Any of the 50 States of the United States, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

State director. The term “State Director” means, with respect to a State, the Director of the Rural Development State Office.

State office. USDA Rural Development offices located in each state.

Total project cost. The sum of all grant and matching funds in the project budget that reflects the eligible project tasks associated with the work plan.

Value-added agricultural product. Any agricultural commodity that meets the requirements specified in paragraphs (1) and (2) of this definition.

(1) The agricultural commodity must meet one of the following five value-added methodologies:

(i) Has undergone a change in physical state;

(ii) Was produced in a manner that enhances the value of the agricultural commodity;

(iii) Is physically segregated in a manner that results in the enhancement of the value of the agricultural commodity;

(iv) Is a source of farm- or ranch-based renewable energy, including E-85 fuel; or

(v) Is aggregated and marketed as a locally-produced agricultural food product.

(2) As a result of the change in physical state or the manner in which the agricultural commodity was produced, marketed, or segregated:

(i) The customer base for the agricultural commodity is expanded and

(ii) A greater portion of the revenue derived from the marketing, processing, or physical segregation of the agricultural commodity is available to the producer of the commodity.

Venture. The business and its value-added undertakings, including the project and other related activities.

Working capital grant. A grant to provide funds to operate a value-added project, specifically to pay the eligible project expenses related to the processing and/or marketing of the value-added product that are eligible uses of grant funds.

§ 4284.903 Review or appeal rights.

A person may seek a review of an Agency decision under this subpart from the appropriate Agency official that oversees the program in question or appeal to the National Appeals Division in accordance with 7 CFR Part 11.
§ 4284.904 Exception authority.

Except as specified in paragraphs (a) and (b) of this section, the Administrator may make exceptions to any requirement or provision of this subpart, if such exception is necessary to implement the intent of the authorizing statute in a time of national emergency or in accordance with a Presidential-declared disaster, or, on a case-by-case basis, when such an exception is in the best financial interests of the Federal Government and is otherwise not in conflict with applicable laws.

(a) Applicant eligibility. No exception to applicant eligibility can be made.

(b) Project eligibility. No exception to project eligibility can be made.

§ 4284.905 Nondiscrimination and compliance with other Federal laws.

(a) Other Federal laws. Applicants must comply with other applicable Federal laws, including the Equal Employment Opportunities Act of 1972, the Americans with Disabilities Act, the Equal Credit Opportunity Act, Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and 7 CFR part 1901, subpart E.

(b) Nondiscrimination. The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual’s income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA’s TARGET Center at (202) 720–2600 (voice and TDD). Any applicant that believes it has been discriminated against as a result of applying for funds under this program should contact: USDA, Director, Office of Adjudication and Compliance, 1400 Independence Avenue, SW., Washington, DC 20250–9410, or call (800) 795–3272 (voice) or (202) 720–6382 (TDD) for information and instructions regarding the filing of a Civil Rights complaint. USDA is an equal opportunity provider, employer, and lender.

(c) Civil rights compliance. Recipients of grants must comply with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973. This includes collection and maintenance of data on the basis of race, sex and national origin of the recipient’s membership/ownership and employees. These data must be available to conduct compliance reviews in accordance with 7 CFR Part 1901, subpart E. For grants, initial compliance review will be conducted after Form RD 400–4, “Assurance Agreement,” is signed and one subsequent compliance review after the last disbursement of grant funds have been made, and the facility or programs has been in full operations for 90 days.

(d) Executive Order 12898. When a project is proposed and financial assistance is requested, the Agency will conduct a Civil Rights Impact Analysis (CRIA) with regards to environmental justice. The CRIA must be conducted and the analysis documented utilizing Form RD 2006–38, “Environmental Justice (EJ) and Civil Rights Impact Analysis (CRIA) Certification.” This certification must be done prior to grant approval, obligation of funds, or other commitments of Agency resources, including issuance of a Letter of Conditions, whichever occurs first.

§ 4284.906 State laws, local laws, regulatory commission regulations.

If there are conflicts between this subpart and State or local laws or regulatory commission regulations, the provisions of this subpart will control.

§ 4284.907 Environmental requirements.

All grants awarded under this subpart are subject to the environmental requirements in subpart G of 7 CFR part 1940 or successor regulations. Applications for planning grants are generally excluded from the environmental review process by §1940.333 of this title. Applicants for working capital grants must submit Form RD 1940–20, “Request for Environmental Information.”
§ 4284.908 Compliance with other regulations.

(a) Departmental regulations. Applicants must comply with the regulations of the Department of Agriculture’s Office of Chief Financial Officer (or successor office) as codified in 7 CFR parts 3000 through 3099, including, but not necessarily limited to, 7 CFR parts 3015 through 3019, 7 CFR part 3021, and 7 CFR part 3052, and successor regulations to these parts.

(b) Cost principles. Applicants must comply with the cost principles found in 2 CFR part 230 and in 48 CFR part 31.2.

(c) Definitions. If a term is defined differently in the Departmental Regulations, 2 CFR part 230, or 48 CFR 31.2 and in this subpart, such term shall have the meaning as found in this subpart.

§ 4284.909 Forms, regulations, and instructions.

Copies of all forms, regulations, instructions, and other materials related to the program referenced in this subpart may be obtained through the Agency.

§§ 4284.910–4284.914 [Reserved]

FUNDING AND PROGRAMMATIC CHANGE NOTIFICATIONS

§ 4284.915 Notifications.

In implementing this subpart, the Agency will issue notifications addressing funding and programmatic changes, as specified in paragraphs (a) and (b) of this section, respectively. The methods that the Agency will use in making these notifications is specified in paragraph (c) of this section, and the timing of these notifications is specified in paragraph (d) of this section.

(a) Funding and simplified applications. The Agency will issue notifications concerning:

1. The funding level and the minimum and maximum grant amount and any additional funding information as determined by the Agency; and

2. The contents of simplified applications, as provided for in §4284.922.

(b) Programmatic changes. The Agency will issue notifications of the programmatic changes specified in paragraphs (b)(1) through (4) of this section.

1. The following is the set of Administrator priority categories that may be considered if the provisions specified in §4284.942(b)(6) are not to be used for awarding Administrator points:

   (i) Unserved or underserved areas.
   (ii) Geographic diversity.
   (iii) Emergency conditions.
   (iv) Priority mission area plans, goals, and objectives.

2. Additional reports that are generally applicable across projects within a program associated with the monitoring of and reporting on project performance.

3. Any requirement specified in §4284.933.

4. Preliminary review information.

(c) Notification methods. The Agency will issue the information specified in paragraphs (a) and (b) of this section in one or more FEDERAL REGISTER notices. In addition, all information will be available at any Rural Development office.

(d) Timing. The Agency will make the information specified in paragraphs (a) and (b) of this section available as specified in paragraphs (d)(1) through (3) of this section.

1. The Agency will make the information specified in paragraph (a) of this section available each fiscal year.

2. The Agency will make the information specified in paragraph (b)(1) of this section available at least 60 days prior to the application deadline, as applicable.

3. The Agency will make the information specified in paragraphs (b)(2) through (4) of this section available on an as needed basis.

§§ 4284.916–4284.919 [Reserved]

ELIGIBILITY

§ 4284.920 Applicant eligibility.

To be eligible for a grant under this subpart, an applicant must demonstrate that they meet the requirements specified in paragraphs (a) through (d) of this section, as applicable, and are subject to the limitations specified in paragraphs (e) and (f) of this section.

(a) Type of applicant. The applicant must demonstrate that they meet all
§ 4284.922 Project eligibility.

To be eligible for a VAPG grant, the application must demonstrate that the project meets the requirements specified in paragraphs (a) through (c) of this section, as applicable.

(a) Product eligibility. Each product that is the subject of the proposed project must meet the definition of a value-added agricultural product, including a demonstration that:

(1) The value-added product results from one of the value-added methodologies identified in paragraphs (1)(i) through (v) of the definition of value-added agricultural product;

(2) As a result of the project, the customer base for the agricultural commodity or value-added product is expanded; and

(3) As a result of the project, a greater portion of the revenue derived from the marketing or processing of the value-added product is available to the applicant producer of the agricultural commodity.

(b) Purpose eligibility. (1) The grant funds requested must not exceed the
§ 4284.922

amount specified in the annual solicitation for planning and working capital grant requests, per §4284.915.

(2) The matching funds required for the project budget must be eligible and without a real or apparent conflict of interest, available during the project period, and source verified in the application.

(3) The proposed project must be limited to eligible planning or working capital activities as defined at §4284.923, as applicable, with eligible tasks directly related to the processing and/or marketing of the subject value-added product, to be demonstrated in the required work plan and budget as described at §4284.922(b)(5).

(4) Applications that propose ineligible expenses in excess of 10 percent of total project costs will be deemed ineligible to compete for funds. Eligible applications selected for award must eliminate any ineligible expenses from the project budget.

(5) The project work plan and budget must demonstrate eligible sources and uses of funds and must:

(i) Present a detailed narrative description of the eligible activities and tasks related to the processing and/or marketing of the value-added product along with a detailed breakdown of all estimated costs allocated to those activities and tasks;

(ii) Identify the key personnel that will be responsible for overseeing and/or conducting the activities or tasks and provide reasonable and specific timeframes for completion of the activities and tasks;

(iii) Identify the sources and uses of grant and matching funds for all activities and tasks specified in the budget; and indicate that matching funds will be spent at a rate equal to or in advance of grant funds; and

(iv) Present a project budget period that commences within the start date range specified in the annual solicitation, concludes not later than 36 months after the proposed start date, and is scaled to the complexity of the project.

(6) Except as noted in paragraphs (b)(6)(i) and (ii) of this section, working capital applications must include a feasibility study and business plan completed specifically for the proposed value-added project by a qualified consultant. The Agency must concur in the acceptability or adequacy of the feasibility study and business plan for eligibility purposes.

(i) An Independent Producer applicant seeking a working capital grant of $50,000 or more, who can demonstrate that they are proposing market expansion for an existing value-added product(s) that they currently own and produce from at least 50 percent of their own agricultural commodity and that they have produced and marketed for at least 2 years at time of application submission, may submit a business or marketing plan for the value-added project in lieu of a feasibility study. These applications must still document for increased customer base and increased revenues returning to the applicant producers as a result of the project, and meet all other eligibility requirements. Further, the waiver of the independent feasibility study does not change the proposal evaluation or scoring elements that pertain to issues that might be supported by an independent feasibility study, so applicants are encouraged to well-document their project plans and expectations for success in their proposals.

(ii) All four applicant types that submit a Simplified Application for working capital grant funds of less than $50,000 are not required to provide an independent feasibility study or business plan for the project/venture but must provide adequate documentation to demonstrate the expected increases in customer base and revenues resulting from the project that will benefit the producer applicants supplying the majority of the agricultural commodity for the project. All other eligibility requirements remain the same. The waiver of the requirement to submit a feasibility study and business plan does not change the proposal evaluation or scoring elements that pertain to issues that might be supported by a feasibility study or business plan, so applicants are encouraged to well-document their project plans and expectations for success in their proposals.

(7) If the applicant is an agricultural producer group, a farmer or rancher cooperative, or a majority-controlled producer-based business venture, the
applicants must demonstrate that it is entering an emerging market unserved by the applicant in the previous two years.

8 All applicants requesting working capital funds must either be currently marketing each value-added agricultural product that is the subject of the grant application, or be ready to implement the working capital activities in accord with the budget and work plan timeline proposed.

(c) Reserved funds eligibility. In addition to the requirements specified in paragraphs (a) and (b) of this section, the requirements specified in paragraphs (c)(1) and (2) of this section must be met, as applicable, if applicants choose to compete for reserved funds. All eligible, but unfunded reserved funds applications will be eligible to compete for general funds in that same fiscal year, as funding levels permit.

1 If the applicant is applying for beginning farmer or rancher, or socially-disadvantaged farmer or rancher reserved funds, the applicant must provide the following documentation to demonstrate that the applicant meets all the requirements for one of these definitions.

(i) For beginning farmers and ranchers, documentation must include a description from each of the individual owner(s) of the applicant farm or ranch organization, addressing the qualifying elements in the beginning farmer or rancher definition, including the length and nature of their individual owner/operator experience at any farm in the previous 10 years, along with one IRS income tax form from the previous 10 years showing that each of the individual owner(s) did not file farm income; or a detailed letter from a certified public accountant or attorney certifying that each owner meets the reserved funds beginning farmer or rancher eligibility requirements. For applicant entities with multiple owners, all owners must be eligible beginning farmers or ranchers.

(ii) For socially disadvantaged farmers and ranchers, documentation must include a description of the applicant’s farm or ranch ownership structure and demographic profile that indicates the owner(s)’ membership in a socially disadvantaged group that has been subjected to racial, ethnic or gender prejudice; including identifying the total number of owners of the applicant organization; along with a self-certification statement from the individual owner(s) evidencing their membership in a socially disadvantaged group. All farmer and rancher owners must be members of a socially disadvantaged group.

2 If the applicant is applying for Mid-Tier Value Chain reserved funds, the applicant must be one of the four VAPG applicant types and the application must provide documentation demonstrating that the project meets the Mid-Tier Value Chain definition, and must:

(i) Demonstrate that the project proposes development of a local or regional supply network of an interconnected group of entities (including nonprofit organizations, as appropriate) through which agricultural commodities and value-added products move from production through consumption in a local or regional area of the United States, including a description of the network, its component members, either by name or by class, and its purpose;

(ii) Describe at least two alliances, linkages, or partnerships within the value chain that link independent producers with businesses and cooperatives that market value-added agricultural commodities or value-added products in a manner that benefits small or medium-sized farms and ranches that are structured as a family farm, including the names of the parties and the nature of their collaboration;

(iii) Demonstrate how the project, due to the manner in which the value-added product is marketed, will increase the profitability and competitiveness of at least two, eligible, small or medium-sized farms or ranches that are structured as a family farm, including documentation to confirm that the participating small or medium-sized farms are structured as a family farm and meet these program definitions. A description of the two farms or ranches confirming they meet the Family Farm requirements, and IRS income tax forms evidencing eligible farm income is sufficient;
(iv) Document that the eligible agricultural producer group/cooperative/majority-controlled producer-based business venture applicant organization has obtained at least one agreement with another member of the supply network that is engaged in the value chain on a marketing strategy; or that the eligible independent producer applicant has obtained at least one agreement from an eligible agricultural producer group/cooperative/majority-controlled producer-based business venture engaged in the value-chain on a marketing strategy;

(A) For Planning grants, agreements may include letters of commitment or intent to partner on marketing, distribution or processing; and should include the names of the parties with a description of the nature of their collaboration. For Working Capital grants, demonstration of the actual existence of the executed agreements is required.

(B) Independent Producer applicants must provide documentation to confirm that the non-applicant agricultural producer group/cooperative/majority-controlled partnering entity meets program eligibility definitions, except that, in this context, the partnering entity does not need to supply any of the raw agricultural commodity for the project;

(v) Demonstrate that the applicant organization currently owns and produces more than 50 percent of the raw agricultural commodity that will be used for the value-added product that is the subject of the proposal; and

(vi) Demonstrate that the project will result in an increase in customer base and an increase in revenue returns to the applicant producers supplying the majority of the raw agricultural commodity for the project.

(d) Priority. In addition, applicants that demonstrate eligibility may apply for priority points if they propose projects that contribute to increasing opportunities for beginning farmers or ranchers, socially disadvantaged farmers or ranchers, or if they are Operators of small- or medium-sized farms or ranches that are structured as a family farm, propose Mid-Tier Value Chain projects, or are a farmer or rancher Cooperative.

(1) Applicants seeking priority points as beginning farmers or ranchers or as socially disadvantaged farmers or ranchers must provide the documentation specified in paragraphs (c)(1)(i) or (ii), as applicable, of this section. For entities with multiple owners or members, 51 percent of owners or members must be eligible beginning farmers or ranchers or socially disadvantaged farmers or ranchers, as applicable.

(2) Applicants seeking priority points as Operators of small- or medium-sized farms and ranches that are structured as a family farm must:

(i) Be structured as family farm;

(ii) Meet all requirements in the associated definitions; and

(iii) Provide the following documentation:

(A) A description from the individual owner(s) of the applicant organization addressing each qualifying element in the definitions, including identification of the average annual gross sales of agricultural commodities from the farm in the previous three years, not to exceed $250,000 for small operators or $1,000,000 for medium operators;

(B) The names and identification of the blood or marriage relationships of all applicant/owners of the farm; and

(C) A statement that the applicant/owners are primarily responsible for the daily physical labor and management of the farm with hired help merely supplementing the family labor.

(3) Applicants seeking priority points for Mid-Tier Value Chain proposals must be one of the four eligible applicant types and provide the documentation specified in paragraphs (c)(2)(i) through (c)(2)(vi) of this section, demonstrating that the project meets the Mid-Tier Value Chain definition.

(4) Applicants seeking priority points for a Farmer or Rancher Cooperative must:

(i) Demonstrate that it is a business owned and controlled by Independent Producers that is legally incorporated as a Cooperative; or that it is a business owned and controlled by Independent Producers that is not legally incorporated as a Cooperative, but is identified by the state in which it operates as a cooperatively operated business;
(ii) Identify, by name or class, and confirm that the Independent Producers on whose behalf the value-added work will be done meet the definition requirements for an Independent Producer, including that each member is an individual agricultural producer, or an entity that is solely owned and controlled by agricultural producers, that is directly engaged in the production of the majority of the agricultural commodity to which value will be added; and

(iii) Provide evidence of “good standing” as a cooperatively operated business in the state of incorporation or operations, as applicable.

§ 4284.923 Eligible uses of grant and matching funds.

In general, grant and cost-share matching funds have the same use restrictions and must be used to fund only the costs for eligible purposes as defined in paragraphs (a) and (b) of this section.

(a) Planning funds may be used to pay for a qualified consultant to conduct and develop a feasibility study, business plan, and/or marketing plan associated with the processing and/or marketing of a value-added agricultural product. Planning funds may not be used to compensate applicants or family members for participation in planning activities. However, in-kind contribution of matching funds may also include contributions of time spent on eligible tasks by applicants or applicant family members so long as the value of such contribution does not exceed a maximum of 25 percent of the total project costs and an adequate explanation of the basis for the valuation, referencing comparable market values, salary and wage data, expertise or experience of the contributor, per unit costs, industry norms, etc. is provided. Final valuation for applicant or family member in-kind contributions is at the discretion of the Agency.

(b) Working capital funds may be used to pay the project’s operational costs directly related to the processing and/or marketing of the value-added product. Examples of eligible working capital expenses include designing or purchasing a financial accounting system for the project, paying salaries of employees without ownership or immediate family interest to process and/or market and deliver the value-added product to consumers, paying for inventory supply costs from a third party necessary to produce the value-added product from the agricultural commodity, and paying for a marketing campaign for the value-added product. In-kind contributions may include appropriately valued inventory of raw commodity to be used in the project. In-kind contributions of matching funds may also include contributions of time spent on eligible tasks by applicants or applicant family members so long as the value of such contribution does not exceed a maximum of 25 percent of the total project costs and an adequate explanation of the basis for the valuation, referencing comparable market values, salary and wage data, expertise or experience of the contributor, per unit costs, industry norms, etc. is provided. Final valuation for applicant or family member in-kind contributions is at the discretion of the Agency.

§ 4284.924 Ineligible uses of grant and matching funds.

Federal procurement standards prohibit transactions that involve a real or apparent conflict of interest for owners, employees, officers, agents, or their immediate family members having a personal, professional, financial or other interest in the outcome of the project; including organizational conflicts, and conflicts that restrict open and free competition for unrestrained trade. In addition, the use of funds is limited to only the eligible activities identified in §4284.923 and prohibits other uses of funds. Ineligible uses of grant and matching funds awarded under this subpart include, but are not limited to:

(a) Support costs for services or goods going to or coming from a person or entity with a real or apparent conflict of interest, except as specifically
noted for limited in-kind matching funds in §4284.923(a) and (b);
(b) Pay costs for scenarios with non-competitive trade practices;
(c) Plan, repair, rehabilitate, acquire, or construct a building or facility (including a processing facility);
(d) Purchase, lease purchase, or install fixed equipment, including processing equipment;
(e) Purchase or repair vehicles, including boats;
(f) Pay for the preparation of the grant application;
(g) Pay expenses not directly related to the funded project for the processing and marketing of the value-added product;
(h) Fund research and development;
(i) Fund political or lobbying activities;
(j) Fund any activities prohibited by 7 CFR parts 3015 and 3019, 2 CFR part 230, and 48 CFR subpart 31.2.
(k) Fund architectural or engineering design work;
(l) Fund expenses related to the production of any agricultural commodity or product, including seed, rootstock, labor for harvesting the crop, and delivery of the commodity to a processing facility;
(m) Conduct activities on behalf of anyone other than a specifically identified independent producer or group of independent producers, as identified by name or class. The Agency considers conducting industry-level feasibility studies or business plans, that are also known as feasibility study templates or guides or business plan templates or guides, to be ineligible because the assistance is not provided to a specific group of Independent Producers;
(n) Pay owner or immediate family member salaries or wages;
(o) Pay for goods or services from a person or entity that employs the owner or an immediate family member;
(p) Duplicate current services or replace or substitute support previously provided;
(q) Pay any costs of the project incurred prior to the date of grant approval, including legal or other expenses needed to incorporate or organize a business;
(r) Pay any judgment or debt owed to the United States;
(s) Purchase land; or
(t) Pay for costs associated with illegal activities.

§4284.925 Funding limitations.
(a) Grant funds may be used to pay up to 50 percent of the total eligible project costs, subject to the limitations established for maximum total grant amount.
(b) The maximum total grant amount provided to a grantee in any one year shall not exceed the amount announced in an annual notice issued pursuant to §4284.915, but in no event may the total amount of grant funds provided to a grant recipient exceed $500,000.
(c) A grant under this subsection shall have a term that does not exceed 3 years, and a project start date within 90 days of the date of award, unless otherwise specified in a notice pursuant to §4284.915. Grant project periods should be scaled to the complexity of the objectives for the project. The Agency may extend the term of the grant period, not to exceed the 3-year maximum.
(d) The aggregate amount of awards to majority controlled producer-based businesses may not exceed 10 percent of the total funds obligated under this subpart during any fiscal year.
(e) Not more than 5 percent of funds appropriated each year may be used to fund the Agricultural Marketing Resource Center, to support electronic capabilities to provide information regarding research, business, legal, financial, or logistical assistance to independent producers and processors.
(f) Each fiscal year, the following amounts of reserved funds will be made available:
(1) 10 percent to fund projects that benefit beginning farmers or ranchers, or socially-disadvantaged farmers or ranchers; and
(2) 10 percent to fund projects that propose development of mid-tier value chains.
(3) Funds not obligated by June 30 of each fiscal year shall be available to the Secretary to make grants under this subsection to eligible entities as determined by the Secretary.
§ 4284.930 Preliminary review.

The Agency encourages applicants to contact their State Office well in advance of the application submission deadline, to ask questions and to discuss applicant and project eligibility potential. At its option, the Agency may establish a preliminary review deadline so that it may informally assess the eligibility of the application and its completeness. The result of the preliminary review is not binding on the Agency. To implement this section, the Agency will issue a notification addressing this issue in accordance with § 4284.915.

§ 4284.931 Application package.

All applicants are required to submit an application package that is comprised of the elements in this section.

(a) Application forms. The following application forms (or their successor forms) must be completed when applying for a grant under this subpart.

(1) Form SF–424, “Application for Federal Assistance.”

(2) Form SF–424A, “Budget Information—Non-Construction Programs.”

(3) Form SF–424B, “Assurances—Non-Construction Programs.”

(4) Form RD 400–4, “Assurance Agreement.”

(5) Form RD 1940–20, “Request for Environmental Information.” Applications for planning grants are generally excluded from the environmental review process by § 1940.333 of this title.

(6) All applicants are required to have a DUNS number (including individuals and sole proprietorships).

(b) Application content. The following content items must be completed when applying for a grant under this subpart:

(i) Eligibility discussion. The applicant must demonstrate in detail how the:

(1) Applicant eligibility requirements in §§ 4284.920 and 4284.921 are met;

(2) Project eligibility requirements in § 4284.922 are met;

(3) Eligible use of grant and matching funds requirements in §§ 4284.923 and 4284.924 are met; and

(iv) Funding limitation requirements in § 4284.925 are met.

(2) Evaluation criteria. Using the format prescribed by the application package, the applicant must address each evaluation criterion identified below.

(i) Performance Evaluation Criteria. As part of the application, applicants for both planning and working capital grants must suggest one or more relevant criterion that will be used to evaluate the performance of the grant project during its operational phase post-award, as benchmarks to ascertain whether or not the primary goals and objectives proposed in the work plan are accomplished during the project period. These benchmarks should relate to the overall project goal of creating and serving new markets, with a resulting increase in customer base and increase in revenues returning to the producer applicants; as well as to the practical and/or logistical activities and tasks to be accomplished during the project period. The Agency application package will provide additional instruction to assist applicants when responding to this criterion. Applicant suggested performance criteria will be incorporated into the applicant’s semi-annual and final reporting requirements if selected for award, and will be specified in the grant agreement associated with the award. In addition, applicants for both planning and working capital grants must identify the number of jobs anticipated to be created or saved as a direct result of the project. Planning grant applicants should identify the number of jobs expected to be created or saved as a result of continuing the project into its operational phase. Working capital grant applicants should identify the actual number of jobs created or saved as a result of the project.

(ii) Proposal evaluation criteria. Applicants for both planning and working capital grants must address each proposal evaluation criterion identified in § 4284.942 in narrative form, in the application package.

(3) Certification of matching funds. Using the format prescribed by the application package, applicants must certify that:
(i) Cost-share matching funds will be spent in advance of grant funding, such that for every dollar of grant funds disbursed, not less than an equal amount of matching funds will have been expended prior to submitting the request for reimbursement; and

(ii) If matching funds are proposed in an amount exceeding the grant amount, those matching funds must be spent at a proportional rate equal to the match-to-grant ratio identified in the proposed budget.

(4) Verification of cost-share matching funds. Using the format prescribed by the application package, the applicant must demonstrate and provide authentic documentation from the source to confirm the eligibility and availability of both cash and in-kind contributions that meet the definition requirements for Matching Funds and Conflict of Interest in §4284.902, as well as the following criteria:

(i) Matching funds are subject to the same use restrictions as grant funds, and must be spent on eligible project expenses during the grant funding period.

(ii) Matching funds must be from eligible sources without a real or apparent conflict of interest.

(iii) Matching funds must be at least equal to the amount of grant funds requested, and combined grant and matching funds must equal 100 percent of the total eligible project costs.

(iv) Unless provided by other authorizing legislation, other Federal grant funds cannot be used as matching funds.

(v) Matching funds must be provided in the form of confirmed applicant cash, loan, or line of credit; or provided in the form of a confirmed applicant or family member in-kind contribution that meets the requirements and limitations specified in §4284.923(a) and (b); or provided in the form of confirmed third-party cash or eligible third-party in-kind contribution; or non-federal grant sources (unless otherwise provided by law).

(vi) Examples of ineligible matching funds include funds used for an ineligible purpose, contributions donated outside the proposed grant funding period, third-party in-kind contributions that are over-valued, or are without substantive documentation for an independent reviewer to confirm a valuation, conducting activities on behalf of anyone other than a specific Independent Producer or group of Independent Producers, expected program income at time of application, or instances where a real or apparent conflict of interest exists, except as detailed in §4284.923(a) and (b).

(5) Business plan. For working capital grant applications, applicants must provide a copy of the business plan that was completed for the proposed value-added venture, except as provided for in §§4284.922(b)(6) and 4284.932. The Agency must concur in the acceptability or adequacy of the business plan. For all planning grant applications including those proposing product eligibility under "produced in a manner that enhances the value of the agricultural commodity," a business plan is not required as part of the grant application.

(6) Feasibility study. As part of the application package, applicants for working capital grants must provide a copy of the third-party feasibility study that was completed for the proposed value-added project, except as provided for at §§4284.922(b)(6) and 4284.932. The Agency must concur in the acceptability or adequacy of the feasibility study.

§ 4284.932 Simplified application.

Applicants requesting less than $50,000 will be allowed to submit a simplified application, the contents of which will be announced in an annual notice issued pursuant to §4284.915. Applicants requesting working capital grants of less than $50,000 are not required to provide feasibility studies or business plans, but must provide information demonstrating increases in customer base and revenue returns to the producers supplying the majority of the agricultural commodity as a result of the project. See §4284.922(b)(6)(ii).

§ 4284.933 Filing instructions.

Unless otherwise specified in a notification issued under §4284.915, the requirements specified in paragraphs (a) through (e) of this section apply to all applications.
(a) **When to submit.** Complete applications must be received by the Agency on or before the application deadline established for a fiscal year to be considered for funding for that fiscal year. Applications received by the Agency after the application deadline established for a fiscal year will not be considered.

(b) **Incomplete applications.** Incomplete applications will be rejected. Applicants will be informed of the elements that made the application incomplete. If a resubmitted application is received by the applicable application deadline, the Agency will reconsider the application.

(c) **Where to submit.** All applications must be submitted to the State Office of Rural Development in the State where the project primarily takes place, or on-line through grants.gov.

(d) **Format.** Applications may be submitted as paper copy, or electronically via grants.gov. If submitted as paper copy, only one original copy should be submitted. An application submission must contain all required components in their entirety. Emailed or faxed submissions will not be acknowledged, accepted or processed by the Agency.

(e) **Other forms and instructions.** Upon request, the Agency will make available to the public the necessary forms and instructions for filing applications. These forms and instructions may be obtained from any State Office of Rural Development, or the Agency’s Value-Added Producer Grant program Web site in [http://www.rurdev.usda.gov/rbs/coops/vadg.htm](http://www.rurdev.usda.gov/rbs/coops/vadg.htm).

§ 4284.941 [Reserved]

§ 4284.942 Proposal evaluation criteria and scoring applications.

(a) **General.** The Agency will only score applications for which it has determined that the applicant and project are eligible, the application is complete and sufficiently responsive to program requirements, and the project is likely feasible. Any applicant whose application will not be reviewed because the Agency has determined it fails to meet the preceding criteria will be notified of appeal rights pursuant to §4284.903. Each such viable application the Agency receives on or before the application deadline in a fiscal year will be scored in the fiscal year in which it was received. Each application will be scored based on the information provided and/or adequately referenced
in the scoring section of the application at the time the applicant submits the application to the Agency. Scoring information must be readily identifiable in the application or it will not be considered.

(b) Scoring Applications. The criteria specified in paragraphs (b)(1) through (b)(6) of this section will be used to score all applications. For each criterion, applicants must demonstrate how the project has merit, and provide rationale for the likelihood of project success. Responses that do not address all aspects of the criterion, or that do not comprehensively convey pertinent project information will receive lower scores. The maximum number of points that will be awarded to an application is 100. Points may be awarded lump sum or on a graduated basis. The Agency application package will provide additional instruction to assist applicants when responding to the criteria below.

(1) Nature of the Proposed Venture (graduated score 0–30 points). Describe the technological feasibility of the project, as well as the operational efficiency, profitability, and overall economic sustainability resulting from the project. In addition, demonstrate the potential for expanding the customer base for the value-added product, and the expected increase in revenue returns to the producer-owners providing the majority of the raw agricultural commodity to the project. Applications that demonstrate high likelihood of success in these areas will receive more points than those that demonstrate less potential in these areas.

(2) Qualifications of Project Personnel (graduated score 0–20 points). Identify the individuals who will be responsible for completing the proposed tasks in the work plan, including the roles and activities that owners, staff, contractors, consultants or new hires may perform; and demonstrate that these individuals have the necessary qualifications and expertise, including those hired to do market or feasibility analyses, or to develop a business operations plan for the value-added venture. Include the qualifications of those individuals responsible to lead or manage the total project (applicant owners or project managers), as well as those individuals responsible for actually conducting the various individual tasks in the work plan (such as consultants, contractors, staff or new hires). Demonstrate the commitment and the availability of any consultants or other professionals to be hired for the project. If staff or consultants have not been selected at the time of application, provide specific descriptions of the qualifications required for the positions to be filled. Applications that demonstrate the strong credentials, education, capabilities, experience and availability of project personnel that will contribute to a high likelihood of project success will receive more points than those that demonstrate less potential for success in these areas.

(3) Commitments and Support (graduated score 0–10 points). Producer commitments to the project will be evaluated based on the number of independent producers currently involved in the project; and the nature, level and quality of their contributions. End-user commitments will be evaluated on the basis of potential or identified markets and the potential amount of output to be purchased, as evidenced by letters of intent or contracts from potential buyers referenced within the application. Other Third-Party commitments to the project will be evaluated based on the critical and tangible nature of the contribution to the project, such as technical assistance, storage, processing, marketing, or distribution arrangements that are necessary for the project to proceed; and the level and quality of these contributions. Applications that demonstrate the project has strong direct financial, technical and logistical support to successfully complete the project will receive more points than those that demonstrate less potential for success in these areas.

(4) Work Plan and Budget (graduated score 0–20 points). In accord with §4284.922(b)(5), applicants must submit a comprehensive work plan and budget. The work plan must provide specific and detailed narrative descriptions of the tasks and the key project personnel that will accomplish the project's
goals. The budget must present a detailed breakdown of all estimated costs associated with the activities and allocate those costs among the listed tasks. The source and use of both grant and matching funds must be specified for all tasks. An eligible start and end date for the project itself and for individual project tasks must be clearly indicated and may not exceed Agency specified timeframes for the grant period. Points may not be awarded unless sufficient detail is provided to determine that both grant and matching funds are being used for qualified purposes and are from eligible sources without a conflict of interest. It is recommended that applicants utilize the budget format templates provided in the Agency’s application package.

(5) **Priority Points (lump sum score 0 or 10 points).** Priority points may be awarded in both the General Funds competition, as well as the Reserved Funds competitions. Qualifying applicants may request priority points if they meet the requirements for one of the following categories and provide the documentation specified in § 4284.922(d), as applicable. Priority categories include: Beginning Farmer or Rancher, Socially Disadvantaged Farmer or Rancher, Operator of a Small or Medium-sized farm or ranch that is structured as a Family Farm, Mid Tier Value Chain proposals, and Farmer or Rancher Cooperative. It is recommended that applicants utilize the Agency application package when documenting for priority points and refer to the documentation requirements specified in § 4284.922(d). All qualifying applicants in this category will receive 10 points.

(6) **Administrator Priority Categories (graduated score 0–10 points).** Unless otherwise specified in a notification issued under § 4284.915(b)(1), the Administrator of USDA Rural Development Business and Cooperative Programs has discretion to award up to 10 points to an application to improve the geographic diversity of awardees in a fiscal year.

**§ 4284.951 Award process.**

(a) **Selection of applications for funding and for potential funding.** The Agency will select and rank applications for funding based on the score an application has received in response to the proposal evaluation criteria, compared to the scores of other value-added applications received in the same fiscal year. Higher scoring applications will receive first consideration for funding. The Agency will notify applicants, in writing, whether or not they have been selected for funding. For those applicants not selected for funding, the Agency will provide a brief explanation for why they were not selected.

(b) **Ranked applications not funded.** A ranked application that is not funded in the fiscal year in which it was submitted will not be carried forward into the next fiscal year. The Agency will notify the applicant in writing.

(c) **Intergovernmental review.** If State or local governments raise objections to a proposed project under the intergovernmental review process that are not resolved within 90 days of the Agency’s award announcement date, the Agency will rescind the award and will provide the applicant with a written notice to that effect. The Agency, in its sole discretion, may extend the 90-day period if it appears resolution is imminent.

**§ 4284.951 Obligate and award funds.**

(a) **Letter of conditions.** When an application is selected subject to conditions established by the Agency, the Agency will notify the applicant using a Letter of Conditions, which defines the conditions under which the grant will be made. Each grantee will be required to meet all terms and conditions of the award within 90 days of receiving a Letter of Conditions unless otherwise specified by the Agency at the time of the award. If the applicant agrees with the conditions, the applicant must complete, sign, and return the Agency’s Form RD 1942–46, “Letter of Intent to Meet Conditions.” If the applicant believes that certain conditions cannot
be met, the applicant may propose alternate conditions to the Agency. The Agency must concur with any proposed changes to the Letter of Conditions by the applicant before the application will be further processed. If the Agency agrees to any proposed changes, the Agency will issue a revised or amended Letter of Conditions that defines the final conditions under which the grant will be made.

(b) Grant agreement and conditions. Each grantee will be required to sign a grant agreement that outlines the approved use of funds and actions under the award, as well as the restrictions and applicable laws and regulations that pertain to the award.

(c) Other documentation. The grantee will execute additional documentation in order to obligate the award of funds including, but not limited to,

(1) Form RD 1940–1, “Request for Obligation of Funds;”
(2) Form AD–1047, “Certification Regarding Debarment, Suspension, and Other Responsibility Matters-Primary Covered Transaction;”
(3) Form AD–1048, “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions;”
(4) Form AD–1049, “Certification Regarding Drug-Free Workplace Requirements;”
(5) Form RD 400–4, “Assurance Agreement (under Title VI, Civil Rights Act of 1964);”
(6) Form SF–3881, “ACH Vendor/Miscellaneous Payment Enrollment Form;”
(7) RD Instruction 1940–Q, Exhibit A–1, “Certification for Contracts, Grants and Loans;” and

d) Grant disbursements. Grant disbursements will be made in accordance with the Letter of Conditions, and/or the grant agreement, as applicable. A disbursement request may be submitted by the grantee not more frequently than once every 30 days by using Form SF 270, “Request for Advance or Reimbursement.” The disbursement request is typically in the form of a reimbursement request for eligible expenses incurred by the grantee during the grant funding period. Adequate supporting documentation must accompany each request, and may include, but is not limited to, receipts, hourly wage rates, personnel payroll records, contract progression certification, or other similar documentation.

§§ 4284.952–4284.959 [Reserved]

Post Award Activities and Requirements

§ 4284.960 Monitoring and reporting program performance.

The requirements specified in this section shall apply to grants made under this subpart.

(a) Grantees must complete the project per the terms and conditions specified in the approved work plan and budget, and in the grant agreement and letter of conditions. Grantees are responsible to expend funds only for eligible purposes and will be monitored by Agency staff for compliance. Grantees must maintain a financial management system, and property and procurement standards in accordance with Departmental Regulations.

(b) Grantees must submit prescribed narrative and financial performance reports that include a comparison of accomplishments with the objectives stated in the application. The Agency will prescribe both the narrative and financial report formats in the grant agreement.

(1) Semi-annual performance reports shall be submitted within 45 days following March 31 and September 30 each fiscal year. A final performance report shall be submitted to the Agency within 90 days of project completion. Failure to submit a performance report within the specified timeframes may result in the Agency withholding grant funds.

(2) Additional reports shall be submitted as specified in the grant agreement or Letter of Conditions, or as otherwise provided in a notification issued under § 4284.915.

(3) Copies of supporting documentation and/or project deliverables for completed tasks must be provided to the Agency in a timely manner in accordance with the development or completion of materials and in conjunction with the budget and project timeline.
Examples include, but are not limited to, a feasibility study, marketing plan, business plan, success story, distribution network study, or best practice.

(4) The Agency may request any additional project and/or performance data for the project for which grant funds have been received, including but not limited to,
   (i) Information about jobs created and/or saved as a result of the project;
   (ii) Increases in producer customer base and revenues as a result of the project;
   (iii) Data regarding renewable energy capacity or emissions reductions resulting from the project;
   (iv) The nature of and advantages or disadvantages of supply chain arrangements or equitable distribution of rewards and responsibilities for mid-tier value chain projects; and
   (v) Recommendations from Beginning Farmers or Socially Disadvantaged Farmers.

(5) The Agency may terminate or suspend the grant for lack of adequate or timely progress, reporting, or documentation, or for failure to comply with Agency requirements.

§ 4284.961 Grant servicing.

All grants awarded under this subpart shall be serviced in accordance with 7 CFR part 1951, subparts E and O, and the Departmental Regulations with the exception that delegation of the post-award servicing of the program does not require the prior approval of the Administrator.

§ 4284.962 Transfer of obligations.

At the discretion of the Agency and on a case-by-case basis, an obligation of funds established for an applicant may be transferred to a different (substituted) applicant provided:
   (a) The substituted applicant:
      (1) Is eligible;
      (2) Has a close and genuine relationship with the original applicant; and
      (3) Has the authority to receive the assistance approved for the original applicant; and
   (b) The project continues to meet all product, purpose, and reserved funds eligibility requirements so that the need, purpose(s), and scope of the project for which the Agency funds will be used remain substantially unchanged.

§ 4284.963 Grant close out and related activities.

Grant closeout is the administrative wrap-up of a grant that has concluded or has been terminated. Typical close-out activities include a letter to the grantee with final instructions and reminders for amounts to be de-obligated for any unexpended grant funds, final project performance reports due, submission of outstanding deliverables, audit requirements, or other outstanding items of closure.

§§ 4284.964–4284.999 [Reserved]

Subpart K—Agriculture Innovation Demonstration Centers

SOURCE: 69 FR 23433, Apr. 29, 2004, unless otherwise noted.

§ 4284.1001 Purpose.

This subpart implements a demonstration program administered by the Rural Business-Cooperative Service whereby grants are made to innovation centers responsible for providing technical and business development assistance to agricultural producers seeking to engage in the marketing or the production of Value-Added products.

§ 4284.1002 Policy.

It is the policy of the Secretary of Agriculture to fund Centers which evidence broad support from the agricultural community in the state or region, significant coordination with end users (processing and distribution companies and regional grocers), strategic alliances with entities having technical research capabilities and a focused delivery plan for reaching out to the producer community. It is also the policy of the Secretary, using the research and technical services of the U.S. Department of Agriculture, to assist the grantees in establishing Centers. This program is not intended to fund scientific research.
§ 4284.1003 Program administration.

The Agriculture Innovation Demonstration Center program is administered by Cooperative Services within the Agency.

§ 4284.1004 Definitions.

Board of Directors—The group of individuals that govern the Center.

Center—The Agriculture Innovation Center to be established and operated by the grantees. It may or may not be an independent legal entity, but it must be independently governed in accordance with the requirements of this subpart.

Producer Services—Services to be provided by the Centers to agricultural producers. Producer Services consist of the following types of services:

(1) Technical assistance, consisting of engineering services, applied research, Scale Production Assessments, and similar services, to enable the agricultural producers to establish businesses to produce Value-Added agricultural commodities or products;

(2) Assistance in marketing, market development and business planning, including advisory services with respect to leveraging capital assets; and

(3) Organizational, outreach and development assistance to increase the viability, growth and sustainability of businesses that produce Value-Added agricultural commodities or products.

Qualified Board of Directors—A Board of Directors that includes representatives from each of the following groups:

(1) The two general agricultural organizations with the greatest number of members in the State in which the Center is located;

(2) The State department of agriculture, or equivalent, of the State in which the Center is located; and

(3) Entities representing the four highest grossing commodities produced in the State in which the Center is located, as determined on the basis of annual gross cash sales.

Scale Production Assessments—Studies that analyze facilities, including processing facilities, for potential Value-added activities in order to determine the size that optimizes construction and other cost efficiencies.

§ 4284.1007 Eligibility for grant assistance.

Non-profit and for-profit corporations, institutions of higher learning and other entities, including a consortium where a lead entity has been designated and agrees to act as funding agent, that meet the following requirements are eligible for grant assistance:

(a) The entity—

(1) Has provided services similar to those listed for Producer Services; or

(2) Demonstrates the capability of providing Producer Services;

(b) The application includes a plan that meets the requirements of § 4284.1010(c)(5)(iv) that also outlines—

(1) The support for the entity in the agricultural community;

(2) The technical and other expertise of the entity; and

(3) The goals of the entity for increasing and improving the ability of local agricultural producers to develop markets and processes for Value-Added agricultural commodities or products;

(c) The entity demonstrates that adequate resources (in cash or in kind) are available, or have been committed to be made available to the entity, to increase and improve the ability of local agricultural producers to develop markets and processes for Value-Added agricultural commodities or products; and

(d) The proposed Center has a Qualified Board of Directors.

§ 4284.1008 Use of grant funds.

Grant funds may be used to assist eligible recipients in establishing Centers that provide Producer Services and may only be used to support operations of the Center that directly relate to providing Producer Services. Grant funds may be used for the following purposes, subject to the limitations set forth in § 4284.10:

(a) Consulting services for legal, accounting and technical services to be used by the grantee in establishing and operating a Center;

(b) Hiring of employees, at the discretion of the Qualified Board of Directors;

(c) The making of matching grants to agricultural producers, individually
not to exceed $5,000, where the aggregate amount of all such matching grants made by the grantee does not exceed $50,000;
(d) Applied research;
(e) Legal services; and
(f) Such other related purposes as the Agency may announce in the RFP.
§ 4284.1009 Limitations on awards.
The maximum grant award for an agriculture innovation center shall be in an amount that does not exceed the lesser of $1,000,000 or twice the dollar amount of the resources (in cash or in kind) that the eligible entity demonstrates are available, or have been committed to be made available, to the eligible entity.
§ 4284.1010 Application processing.
(a) Applications. USDA will solicit applications on a competitive basis by publication of one or more Requests for Proposals (RFPs). Unless otherwise specified in the applicable RFP, applicants must file an original and one copy of the required forms and a proposal.
(b) Required forms. The following forms must be completed, signed and submitted as part of the application package. Other OMB approved forms may be required. This will be published in the applicable RFP.
(1) “Application for Federal Assistance.”
(2) “Budget Information—Non-Construction Programs.”
(3) “Assurances—Non-Construction Programs.”
(c) Proposal. Each proposal must contain the following elements. Additional elements may be published in the applicable RFP.
(1) Title Page.
(2) Table of Contents.
(3) Executive Summary. A summary of the proposal should briefly describe the project including goals, tasks to be completed and other relevant information that provides a general overview of the project and the amount requested.
(4) Eligibility. A detailed discussion describing how the applicant meets the eligibility requirements.
(5) Proposal Narrative. The narrative portion of the proposal must include, but is not limited to, the following:
(i) Project Title. The title of the proposed project must be brief, not to exceed 75 characters, yet describe the essentials of the project.
(ii) Information Sheet. A separate one page information sheet listing each of the evaluation criteria referenced in the RFP followed by the page numbers of all relevant material and documentation contained in the proposal that address or support the criteria.
(iii) Goals of the Project. The first part of this section should list each Producer Service to be offered by the Center. The second part of this section should list one or more specific goals relating to increasing and improving the ability of identified local agricultural producers to develop a market or process for Value-Added agricultural commodities or products.
(iv) Work Plan. Actions that must be taken in order for the Producer Services to be available from the Center. Each action listed should include a target date by which it will be completed. General start up tasks should be listed, followed by specific tasks listed for each Producer Service to be offered, as well as tasks associated with the start of operations. The tasks associated with the start of operations should include a focused marketing and delivery plan directed to the local agricultural producers that were identified in paragraph (c)(5)(iii) of this section. The actions to be taken should include steps for identifying customers, acquiring personnel and contracting for services to the Center, including arrangements for strategic alliances.
(v) Performance Evaluation Criteria. Performance criteria suggested by the applicant for incorporation in the grant award in the event the proposal receives grant funding under this subpart. These suggested criteria are not binding on USDA.
(vi) Agricultural Community Support. Evidence of support from the local agricultural community should be included in this section. Letters in support should reflect that the writer is familiar with the provisions of the Plan for the Center, including the stated goals.
Evidence of support can take the form of making employees available to the Center, service as a board member and other in-kind contributions.

(vii) Strategic Coordination and Alliances. Describe arrangements in place or planned with end users (processing and distribution companies and regional grocers) as well as arrangements with entities having technical research capabilities, broad support from the agricultural community in the state or region, significant coordination with end users (processing and distribution companies and regional grocers), strategic alliances with entities having technical research capabilities and a focused delivery plan for reaching out to the producer community.

(viii) Capacity. Evidence of the ability of the grantee(s) to successfully establish and operate a Center. A description of the grantee’s track record in providing services similar to those listed for Producer Services or evidence that the entity has the capability to provide Producer Services. Resumes of key personnel should be included in this section. Past successes should be described in detail, with a focus on lessons learned, best practices, familiarity with producer problems in Value-Added ventures, and how these barriers are best overcome should be elaborated on in this section. For every challenge identified, the applicant should demonstrate how they are addressed in the Work Plan (see paragraph (c)(5)(iv) of this section). All successes should include a monetary estimate of the Value-Added achieved.

(ix) Legal structure. Provide a description of the legal relationship between the grantee(s) and the proposed Center. If the Center is to be an independent corporate entity, provide copies of the corporate charter, bylaws and other relevant organizational documents. Describe how funds for the Center will be handled and include copies of the agreements documenting the legal relationships between the Center and related parties. If the Center is not to be an independent legal entity, provide copies of the corporate governance documents that describe how members of the Board of Directors for the Center are to be determined.

(x) Evaluation Criteria. Each of the evaluation criteria referenced in the RFP must be specifically and individually addressed in narrative form. Supporting documentation, as applicable, should be included in this section, or a cross reference to other sections in the application should be provided, as applicable.

(xi) Verification of Adequate Resources. Present a budget to support the work plan showing sources and uses of funds during the start up period prior to the start of operations and for the first year of full operations. Present a copy of a bank statement evidencing sources of funds equal to amounts required in excess of the grant requested, or, in the alternative, a copy of confirmed funding commitments from credible sources such that USDA is satisfied that the Center has adequate resources to complete a full year of operation. Include information sufficient to facilitate verification by USDA of all representations.

(xii) Certification of Adequate Resources. Applicants must certify that non-Federal funds identified in the budget pursuant to paragraph (c)(5)(xi) of this section will be available and funded commensurately with grant funds.

§4284.1011 Evaluation screening.

The Agency will conduct an initial screening of all proposals to determine whether the applicant is eligible and whether the application is complete and sufficiently responsive to the requirements set forth in the applicable RFP so as to allow for an informed review. Incomplete or non-responsive applications will not be evaluated further, and may be returned to the applicant. Applicants may revise their applications and re-submit them prior to the published deadline if there is sufficient time to do so.

§4284.1012 Evaluation process.

(a) Applications will be evaluated by qualified reviewers appointed by the Agency.

(b) After all proposals have been evaluated using the evaluation criteria and scored in accordance with the point allocation specified in the applicable RFP, Agency officials will present to
the Administrator of RBS a list of all applications in rank order, together with funding level recommendations.

(c) The Administrator reserves the right to award additional points, as specified in the applicable RFP, to accomplish agency objectives (e.g., to ensure geographic distribution, put emphasis on a specific commodity, or to accomplish presidential initiatives.) The maximum number of points that can be added to an application under this paragraph cannot exceed ten percent of the total points the application originally scored.

(d) After giving effect to the Administrator’s point awards, applications will be funded in rank order until all available funds have been obligated.

§ 4284.1013 Evaluation criteria and weights.

Unless supplemented in a RFP, the criteria listed in this section will be used to evaluate grants under this subpart. The distribution of points to be awarded per criterion will be identified in the applicable RFP.

(a) Ability to Deliver. The application will be evaluated as to whether it evidences unique abilities to deliver Producer Services so as to create sustainable Value-Added ventures. Abilities that are transferable to a wide range of agricultural Value-Added commodities are preferred over highly specialized skills. Strong skills must be accompanied by a credible and thoughtful plan.

(b) Successful Track Record. The applicant’s track record in achieving Value-Added successes.

(c) Work Plan/Budget. The work plan will be reviewed for detailed actions and an accompanying timetable for implementing the proposal. Clear, logical, realistic and efficient plans will result in a higher score. Budgets will be reviewed for completeness and the strength of non-Federal funding commitments.

(d) Qualifications of personnel. Proposals will be reviewed for whether the key personnel who are to be responsible for performing the proposed tasks have the necessary qualifications and whether they have a track record of performing activities similar to those being proposed. If a consultant or others are to be hired, points may be awarded for consultants only if the proposal includes evidence of their availability and commitment as well. Proposals using in-house employees with strong track records in innovative activities will receive higher points relative to proposals that out-source expertise.

(e) Local support. Proposed Centers must show local support and coordination with other developmental organizations in the proposed service area and with state and local institutions. Support documentation should include recognition of rural values that balance employment opportunities with environmental stewardship and other rural amenities. Proposed Centers that show strong support from potential beneficiaries and coordination with other developmental organizations will receive more points than those not evidencing such support.

(f) Future support. Applicants that can demonstrate their vision for funding center operations for future years, including diversification of funding sources and building in-house technical assistance capacity, will receive more points for this criterion.

§ 4284.1014 Grant closing.

(a) Letter of Conditions. The Agency will notify an approved applicant in writing, setting out the conditions under which the grant will be made.

(b) Applicant’s intent to meet conditions. Upon reviewing the conditions and requirements in the letter of conditions, the applicant must complete, sign and return the Agency’s “Letter of Intent to Meet Conditions,” or, if certain conditions cannot be met, the applicant may propose alternate conditions to the Agency. The Agency must concur with any changes proposed to the letter of conditions by the applicant before the application will be further processed.

(c) Grant agreement. The Agency and the grantee must enter into an “Agriculture Innovation Center Grant Agreement” prior to the advance of funds.

Subpart A—Federal-State Research on Cooperatives Program

§ 4285.1 Objective.

This subpart sets forth the policies and procedures and delegates authority for providing Federal-State Research on Cooperatives cooperative agreement funds to finance programs of research on cooperatives as authorized under Section 204 (b) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623 (b)). The primary purpose of this matching fund program, via cooperative agreements, is to encourage State Departments of Agriculture and State Agricultural Experiment Stations in conducting research related to agricultural cooperatives.

§ 4285.2 Cooperative agreement purposes.

Rural Development Administration (RDA) or its successor agency may enter into a cooperative agreement with a State agency to provide funds to the State agency to:

(a) Conduct marketing research related to agricultural cooperatives.

(b) Assist other organizations in conducting marketing research related to agricultural cooperatives.

§ 4285.3 Definitions.

As used in this part:

Agreement period. The total period of time approved by the Assistant Administrator for Cooperative Services for conducting the proposed project as outlined in an approved application. The time period is normally no more than 3 years, renewable for cause not to exceed a total of 4 fiscal years.

Agricultural products. Agricultural products include agricultural, horticultural, viticultural, and dairy products, livestock and poultry, bees, forest products, fish and shellfish, and any products thereof, including processed or manufactured products, and any and all products raised or produced on farms and any processed or manufactured product thereof.

Assistant Administrator for Cooperative Services. The Assistant Administrator for Cooperative Services, Rural Development Administration or its successor agency, USDA or any authorized delegate.

Awarding official. The Assistant Administrator for Cooperative Services or authorized delegate.

Cooperative agreement. A legal instrument reflecting a relationship between the United States Government and a State where:
(1) The principal purpose of the relationship is the transfer of money, property, services, or anything of value to the State agency to carry out research related to cooperatives; and

(2) Substantial involvement is anticipated between RDA or its successor agency, acting for the Federal Government, and the State or other recipient during performance of the research in the agreement.

Cooperator. The State agency designated in the cooperative agreement award document as the responsible legal entity to whom a cooperative agreement is awarded under this part.

Department. The U.S. Department of Agriculture.

Methodology. The research approach to be followed to carry out the project.

Principal investigator. A single individual who is responsible for the scientific and technical direction of the project, as designated by the cooperator in the cooperative agreement application and approved by the Assistant Administrator for Cooperative Services.

Project. The particular activity within the scope of one or more of the research program areas identified in the annual program solicitation that is supported by a cooperative agreement under this part.

State agencies. State agencies include, among others, State Agricultural Experiment Stations and State Departments of Agriculture in the 50 States, the Virgin Islands, and Guam, and other appropriate State agencies. Final determination of whether certain 1890 or 1862 Land Grant institutions qualify as state agencies will be determined on a case-by-case basis by the Office of the General Counsel (OGC), USDA.

§§ 4285.4–4285.23 [Reserved]

§ 4285.24 Eligibility.

To enter into a cooperative agreement for these funds, the applicant must:

(a) Be a State Agency as defined in § 4285.3 of this subpart;

(b) Have the financial, legal, administrative, and actual capacity to assume and carry out the responsibilities imposed by the Agreement. To meet the requirement of actual capacity it must either:

(1) Have necessary background and experience with proven ability to perform responsibly in the field of economic, business management, or other needed research area; or

(2) Have the necessary administrative and supervisory controls in place to assure an agreed upon contracting organization has the proven ability to perform responsibly in the field of economic, business management, or other needed research area;

(c) Legally obligate itself to administer cooperative agreement funds, provide adequate accounting of the expenditure of such funds, and comply with the cooperative agreement;

(d) Provide at least 50 percent of the funds necessary to conduct the research from non-federal funds; and

(e) Agree to conduct proposed research related to cooperatives and agricultural marketing.

§ 4285.25 Authorized use of cooperative agreement funds.

Funds received for research under cooperative agreements in this program shall only be used for:

(a) Payment of salaries and necessary employee benefits of personnel as agreed upon in the Cooperative Agreement. Included are salaries and benefits of State employees assigned full-time to one or more projects, or the percent of the salaries and benefits related to project work for State employees assigned part-time to research on one or more projects. Salaries and benefits include basic salary, other compensation such as holiday pay, sick or annual leave, and personnel benefits (quarters allowance, payments to other funds such as employees' life insurance, health benefits, retirement, Federal Insurance Contributions Act (FICA), accident compensation, and similar payments). For any of the benefit items when the State usually pays the employer share, Federal funds may be used to pay the proportionate share of such employer contributions.

(b) Payment of necessary and reasonable office expenses such as office rental, office utilities, and office equipment.
The purchase of office equipment is permissible when the cooperator determines it to be more economical than renting. However, as a general rule, these types of expenses would be classified as indirect costs in multiple funded organizations and would not be an allowable expense. Planned purchases of equipment costing more than $200 per unit must be approved by RDA or its successor agency. Equipment purchased becomes State property pursuant to the cooperative agreement.

(c) Payment of necessary and reasonable costs of printing publications of research project results. However, all such publications should show the RDA or its successor agency as cooperator in the project and bear the following statement: “State funds for this project (publication) were matched with Federal funds under the Federal-State Research on Cooperatives Program of the U.S. Department of Agriculture, Rural Development Administration or its successor agency, Cooperative Services, as provided by the Agricultural Marketing Act of 1946 and (appropriate) fiscal year appropriations.”

(d) Purchase of office supplies (such as paper, pens, pencils, and trade magazines) and postage needed for project activities.

(e) Payment of necessary and reasonable travel expenses.

§§ 4285.26–4285.45 [Reserved]

§ 4285.46 Prohibited use of cooperative agreement funds.

(a) The Agricultural Marketing Act prohibits the use of Federal funds to pay for newspaper or periodical space and radio and television time, either directly to the media or indirectly through an advertising agency or other firm. County and State fair exhibits, as well as commodity months and weeks, are also excluded as the research on cooperatives program activities.

(b) Federal funds cannot be used to purchase products or samples of products to give away to the public.

(c) Federal program funds cannot be used to purchase:

(1) Promotional pieces such as point-of-sale materials, promotional kits, billboard space and signs, streamers, automobile stickers, table tents, and placemats; or

(2) Promotion items of a personal gift nature.

(d) Cooperative agreement funds cannot be used to conduct general publicity or information programs designed to build the image of the State’s agriculture or of a particular State Department of Agriculture or Agricultural Experiment Station.

(e) Project funds cannot be used to pay for the salary and travel of employees of cooperatives, trade associations, commodity groups, and other industry organizations, or of State personnel while engaged in managing market orders, cooperatives, or other group endeavors.

(f) Commissioners, Directors, and Secretaries of State Departments of Agriculture, Agricultural Experiment Stations, and other State agencies cannot charge their salaries and travel to project funds, with the exception of travel to workshops or conferences devoted to the Federal-State Research On Cooperatives Program.

(g) Funds made available for this program shall not be subject to reduction for indirect costs or for tuition remission.

§ 4285.47 Limitations.

The amount of funds available for the cooperative agreements under this program is limited to the amount appropriated for the fiscal year.

§§ 4285.48–4285.57 [Reserved]

§ 4285.58 How to apply for cooperative agreement funds.

(a) A program solicitation will be prepared and announced through publications such as the Federal Register, professional trade journals, agency or program handbooks, and/or any other appropriate means, as early as practicable each fiscal year in which funds are appropriated for the program.

(b) The annual program solicitation will contain information sufficient to enable all eligible applicants to prepare proposals including:

(1) Desired research topics. The FY-94 solicitation will encourage studies:
(1) To improve the efficiency and effectiveness of marketing of agricultural cooperatives;
(ii) To measure the impact of rural cooperatives on the local economies;
(iii) That help identify opportunities to develop cooperatives for new or alternative market uses of agricultural products;
(iv) That help identify ways to develop agricultural marketing cooperatives; and
(v) Addressing other cooperative marketing objectives;
(2) Explanation of eligibility requirements as outlined in §4285.24 of this subpart;
(3) The notice of availability of application forms and instructions for submission of applications;
(4) The notice of deadline dates for postmarking proposal packages.
(c) Format for proposals. Unless otherwise indicated by the Department in the annual program solicitation, the following information must be submitted for the preparation of proposals under this program:
(1) Form SF–424, "Application for Federal Assistance."
(2) Form SF–424A, "Budget Information—Non-Construction Programs."
(3) Form SF–424B, "Assurances—Non-Construction Programs."
(4) Statement of Work. The application must include a narrative statement describing the nature of the proposed research. The Statement of Work must include at least the following:
(i) Title of the Project. The title of the proposal must be brief, yet represent the major thrust of the project.
(ii) Project Leaders. List the name(s) of the principal investigator(s). Minor collaborators or consultants should be so designated and not listed as principal investigators.
(iii) Need for the Project. A concisely worded rationale behind the proposed research must be presented. The need for the proposed research must be clearly related to marketing and to the needs of agricultural cooperatives.
(iv) Objectives of the project. The specific description of the overall project goal(s) and supporting objectives must be presented.
(v) Procedures for conducting the research. The hypotheses or questions being asked and the methodology being applied to the proposed project must be described. A description of any subcontracting arrangements that will be used for conducting the research must be included. A tentative schedule for conducting major steps involved in the investigation must also be included.
(vi) The expected output of the project. A description of how the results of the research will be disseminated should be presented. Responsibility for publishing any research reports or other types of output should also be identified.
(5) Collaborative arrangements. If the nature of the proposed project requires collaboration or subcontractual arrangements with other research scientists, corporations, organizations, agencies, or entities, the applicant must identify the collaborator(s) and provide a full explanation of the nature of the collaboration. Evidence (i.e., letters of intent) should be provided to assure reviewers that the collaborators involved have agreed to render this service. In addition, the proposal must indicate whether or not such a collaborative arrangement(s) has the potential for conflict(s) of interest.
(6) Personnel support. To assist reviewers in assessing the competence and experience of the proposed project staff, key personnel who will be involved in the proposed project must be identified clearly. For each principal investigator involved, and for all senior associates and other professional personnel who expect to work on the project, whether or not funds are sought for their support, the following must be included:
(i) An estimate of the time commitments necessary;
(ii) Curriculum Vitae. The curriculum vitae should be limited to a presentation of academic and research credentials, e.g., educational, employment and professional history, and honors and awards. Unless pertinent to the project, it should not include meetings attended, seminars given, or personal data such as birth date, marital status, or community activities; and
(iii) Publication List(s). A chronological list of all publications in refereed journals during the past five years, including those in press, must be
provided for each professional project member for whom a curriculum vitae is provided. Also list other non-refereed technical publications that have relevance to the proposed project. Authors should be listed in the same order as they appear on each paper cited, along with the title and complete reference as these usually appear in journals.

§§ 4285.59–4285.68 [Reserved]

§ 4285.69 Evaluation and disposition of applications.

(a) Evaluation. (1) All proposals received from eligible applicants and postmarked in accordance with deadlines established in the annual program solicitation shall be evaluated by the Assistant Administrator for Cooperative Services through an RDA or its successor agency staff panel. The Assistant Administrator for Cooperative Services will select the evaluation panel from staff determined to be highly qualified in the subject matter areas that were emphasized in the current year’s solicitation and from those with no potential conflict of interest with the applicants.

(2) Prior to technical examination, a preliminary review will be made for responsiveness to the program solicitation (e.g., relationship of proposal to research topic(s) listed in solicitation). Proposals that do not fall within the guidelines as stated in the program solicitation will be eliminated from competition and will be returned to the applicant.

(3) Proposals will be ranked based on evaluation criteria established in §4285.70 of this subpart, and financial support levels will be recommended to the Assistant Administrator for Cooperative Services by the panel within the limitation of the total funding available in the fiscal year. The purpose of these evaluations is to provide information upon which the Assistant Administrator for Cooperative Services may make informed judgments in selecting proposals. Such recommendations are advisory only and are not binding on the awarding official of RDA or its successor agency. To ensure a comprehensive evaluation, all applications should be written with the care and thoroughness accorded papers for publication.

(b) Disposition. (1) On the basis of the Assistant Administrator for Cooperative Services’s evaluation of an application in accordance with paragraph (a) of this section, the Assistant Administrator for Cooperative Services will either:

(i) Approve support using currently available funds;

(ii) Defer support due to lack of funds or need for further evaluation; or

(iii) Disapprove support for the proposed project in whole or in part.

(2) With respect to any approved project, the Assistant Administrator for Cooperative Services will determine the project period during which the project may be funded.

(3) Any deferral or disapproval of an application will not preclude its reconsideration or reapplication during subsequent fiscal years. However, applicants must reapply if reconsideration is desired.

(4) The Assistant Administrator for Cooperative Services will not make a cooperative agreement funding award, based upon an application covered by this part, unless the application has been properly reviewed in accordance with the provisions of this part and unless said reviewers have made recommendations concerning the scientific merit and relevance to the program of such application.

§ 4285.70 Evaluation criteria.

(a) In evaluating the proposal, the RDA or its successor agency staff review panel and the awarding official will take into account the degree to which the proposal demonstrates the following:

(1) Focus on a practical solution to a significant problem involving one or more of the following on a cooperative business basis: the preparation for market, processing, packaging, handling, storing, transporting, distributing, or marketing of agricultural products. (35%)

(2) Adequacy, soundness, and appropriateness of the proposed approach to solve the identified problem. (30%)

(3) Feasibility and probability of success of project solving the problem. (10%)
(4) Qualifications, experience in related work, competence, and availability of project personnel to direct and carry out the project. (25%)

(b) In addition, the cost relative to the expected research results will be considered in determining the awarding of the agreements.

§§ 4285.71–4285.80 [Reserved]

§ 4285.81 Cooperative agreement awards.

(a) General. Within the limit of funds available for such purpose, the awarding official shall make awards for cooperative agreements to those applicants whose proposals are judged most meritorious in the announced program areas under the evaluation criteria and procedures set forth in this part. The date specified by the Assistant Administrator for Cooperative Services as the beginning of the project period shall be no later than September 30 of the Federal fiscal year in which the project is approved and funds are appropriated for such purpose, unless otherwise permitted by law. All funds awarded under this part shall be expended solely in accordance with the methods identified in approved application and budget, the regulations of this part, the terms and conditions of the award, the applicable Federal cost principles, and the Department’s “Uniform Federal Assistance Regulations” (part 3015 of this title) and the Department’s “Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments” (part 3016 of this title).

(b) Cooperative agreement award document and notice of award—(1) Cooperative agreement award document. The award document shall include at a minimum the following:

(i) Legal name and address of performing organization or institution to whom the Assistant Administrator for Cooperative Services has competitively awarded funds under the terms of this part;

(ii) Title of project;

(iii) Name(s) and address(es) of principal investigator(s) chosen to direct and control approved activities;

(iv) Identifying cooperative agreement number assigned by RDA or its successor agency;

(v) Project period, specifying the amount of time the Agency intends to support the project without requiring recompetition for funds;

(vi) Total amount of Agency financial assistance approved by the Assistant Administrator for Cooperative Services during the project period;

(vii) Legal authority(ies) under which the cooperative agreement is awarded;

(viii) Approved budget plan for categorizing allocable project funds to accomplish the stated purpose of the cooperative agreement award; and

(ix) Other information or provisions deemed necessary by RDA or its successor agency to carry out its agreement activities or to accomplish the purpose of a particular cooperative agreement.

(2) Notice of award. The notice of award of funds for the cooperative agreement will be in the form of a letter providing pertinent instructions or information to the cooperator.

(c) Types of cooperative agreement instruments. The types of cooperative agreements shall be as follows:

(1) New agreement. This is an agreement instrument by which RDA or its successor agency agrees to support a specified level of effort for a project not supported previously under this program. This type of agreement is approved on the basis of an RDA or its successor agency Staff evaluation review and recommendation.

(2) Renewal agreement. This is an agreement instrument by which RDA or its successor agency agrees to provide additional funding for a project beyond the period approved in an original or amended agreement, provided that the cumulative period does not exceed the statutory limitation. When a renewal application is submitted, it must include a summary of progress to date from the previous agreement period. A renewal agreement shall be based upon new application, de novo review and staff evaluation, new recommendation and approval, and a new award instrument.

(3) Supplemental agreement. This is an instrument by which RDA or its successor agency agrees to provide small
§ 4285.82 Use of funds; changes.

(a) Delegation of fiscal responsibility. The cooperator may not, in whole or in part, delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of cooperative agreement funds.

(b) Change in project plans. (1) The permissible changes by the cooperator, principal investigator(s), or other key project personnel in the approved cooperative agreement shall be limited to changes in methodology, techniques, or other aspects of the project to expedite achievement of the project’s approved goals. If the cooperator and/or the principal investigator(s) is uncertain whether a particular change complies with this provision, the question must be referred to the Assistant Administrator for Cooperative Services for a final determination.

(2) Changes in approved goals, or objectives, shall be requested by cooperator and approved in writing by the Assistant Administrator for Cooperative Services, or authorized delegate, prior to effecting such changes. Normally, no requests for such changes outside the scope of the original approved project will be approved.

(3) Changes in approved project leadership or the replacement or realignment of other key project personnel shall be requested by the cooperator and approved in writing by the Assistant Administrator for Cooperative Services, or authorized delegate, prior to effecting such changes.

(4) Transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not Federal funds are involved, shall be requested by the cooperator and approved in writing by the Assistant Administrator for Cooperative Services, or authorized delegate, prior to effecting such changes.

(c) Changes in project period. The project period determined pursuant to §4285.81(b) of this subpart may be extended by the Assistant Administrator for Cooperative Services without additional financial support, for such additional period(s) as the Assistant Administrator for Cooperative Services determines may be necessary to complete, or fulfill the purposes of, an approved project. Any extension, when combined with the originally approved or amended project period, shall not exceed four (4) years and shall be further conditioned upon prior request by the cooperator and approval in writing by the Assistant Administrator for Cooperative Services, or authorized delegate, except as may be allowed in the terms and conditions of a cooperative agreement award.

(d) Changes in approved budget. The terms and conditions of a cooperative agreement...
agreement will prescribe circumstances under which written Agency approval must be requested and obtained prior to instituting changes in an approved budget.

§§ 4285.83–4285.92 [Reserved]

§ 4285.93 Other Federal statutes and regulations that apply.

Several other Federal statutes and regulations apply to cooperative agreement proposals considered for review or to agreements awarded under this part. These include but are not limited to:

(a) 7 CFR Part 1, Subpart A—USDA implementation of the Freedom of Information Act;
(b) 7 CFR Part 3—USDA implementation of OMB Circular A–129 regarding debt collection;
(c) 7 CFR Part 15, Subpart A—USDA implementation of title VI of the Civil Rights Act of 1964 in order to assure nondiscrimination;
(d) 7 CFR Part 1473—National Agricultural, Research, Extension, and Teaching Policy Act Amendments of 1981 if the project involves a college or university;
(e) 7 CFR Part 3015—USDA Uniform Federal Assistance Regulations implementing OMB directives (i.e., Circular Nos. A–110, A–21, and A–122) and incorporating provisions of 31 U.S.C. 6301–6308 (formerly, the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. 95–224, 92 Stat. 3), as well as general policy requirements applicable to recipients of Departmental financial assistance;
(f) 7 CFR Part 3016—USDA Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments;
(g) 7 CFR Part 3017—USDA implementation of Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants);
(h) 7 CFR Part 3018—USDA implementation of New Restrictions on Lobbying. Imposes new prohibitions and requirements for disclosure and certification related to lobbying on recipients of Federal contracts, grants, cooperative agreements, and loans;
(i) 7 CFR Part 3051—Audits of Institutions of Higher Education and Other Nonprofit Institutions;
(j) 29 U.S.C. 794, section 504—Rehabilitation Act of 1973, and 7 CFR Part 15B prohibiting discrimination based upon physical or mental handicap in Federally assisted programs;
(k) 35 U.S.C. 200 et seq.—Bayh-Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs (implementing regulations are contained in 37 CFR part 401).

§ 4285.94 Other conditions.

Post-award requirements. Upon awarding the cooperative agreement, the post-award requirements of subparts C and D of part 3016 of this title apply.

§§ 4285.95–4285.99 [Reserved]

§ 4285.100 OMB control number.

The reporting and recordkeeping requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0570–0005. Public reporting burden for this collection of information is estimated to vary from 10 minutes to 36 hours per response with an average of 3.48 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, Ag Box 7630, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB #0570–0005), Washington, DC 20503.
§ 4287.101 Introduction.

(a) This subpart supplements part 4279, subparts A and B, by providing additional requirements and instructions for servicing and liquidating all Business and Industry (B&I) Guaranteed Loans. This includes Drought and Disaster (D&D), Disaster Assistance for Rural Business Enterprises (DARBE), and Business and Industry Disaster (BID) loans.

(b) The lender will be responsible for servicing the entire loan and will remain mortgagee and secured party of record notwithstanding the fact that another party may hold a portion of the loan. The entire loan will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the loan. The unguaranteed portion of a loan will neither be paid first nor given any preference or priority over the guaranteed portion of the loan.

(c) Copies of all forms, regulations, and instructions referenced in this subpart are available in any Agency office. Whenever a form is designated in this subpart, that designation includes predecessor and successor forms, if applicable, as specified by the field or National Office.

§ 4287.102 Definitions.

The definitions and abbreviations contained in § 4279.2 of subpart A of part 4279 of this chapter apply to this subpart.

§ 4287.103 Exception authority.

Section 4279.15 of subpart A of part 4279 of this chapter applies to this subpart.

§§ 4287.104–4287.105 [Reserved]

§ 4287.106 Appeals.

Section 4279.16 of subpart A of part 4279 of this chapter applies to this subpart.

§ 4287.107 Routine servicing.

The lender is responsible for servicing the entire loan and for taking all servicing actions that a prudent lender would perform in servicing its own portfolio of loans that are not guaranteed. The Loan Note Guarantee is unenforceable by the lender to the extent any loss is occasioned by violation of usury laws, use of loan funds for unauthorized purposes, negligent servicing, or failure to obtain the required security interest regardless of the time at which the Agency acquires knowledge of the foregoing. This responsibility includes but is not limited to the collection of payments, obtaining compliance with the covenants and provisions in the Loan Agreement, obtaining and analyzing financial statements, checking on payment of taxes and insurance.
§ 4287.113 Release of collateral.

(a) All releases of collateral with a value exceeding $100,000 must be supported by a current appraisal on the collateral released. The appraisal will be at the expense of the borrower and must meet the requirements of § 4279.144 of subpart B of part 4279 of this chapter. The remaining collateral must be sufficient to provide for repayment of the Agency's guaranteed loan. The Agency may, at its discretion, require an appraisal of the remaining collateral in cases where it is determined necessary.

that the Agency may be adversely affected by the release of collateral. Sale or release of collateral must be based on an arm's-length transaction.

(b) Within the parameters of paragraph (a) of this section, lenders may, over the life of the loan, release collateral (other than personal and corporate guarantees) with a cumulative value of up to 20 percent of the original loan amount without Agency concurrence if the proceeds generated are used to reduce the guaranteed loan or to buy replacement collateral.

(c) Within the parameters of paragraph (a) of this section, release of collateral with a cumulative value in excess of 20 percent of the original loan or when the proceeds will not be used to reduce the guaranteed loan or to buy replacement collateral must be requested in writing by the lender and concurred in by the Agency in writing in advance of the release. A written evaluation will be completed by the lender to justify the release.

§§ 4287.114–4287.122 [Reserved]

§ 4287.123 Subordination of lien position.

A subordination of the lender’s lien position must be requested in writing by the lender and concurred in by the Agency in writing in advance of the subordination. The subordination must enhance the borrower’s business and the Agency’s interest. After the subordination, collateral must be adequate to secure the loan. The lien to which the guaranteed loan is subordinated must be for a fixed dollar limit and fixed or limited term, after which the guaranteed loan lien priority will be restored. Subordination to a revolving line of credit will not exceed 1 year. There must be adequate consideration for the subordination.

§ 4287.124 Alterations of loan instruments.

The lender shall neither alter nor approve any alterations of any loan instrument without the prior written approval of the Agency.

§§ 4287.125–4287.133 [Reserved]

§ 4287.134 Transfer and assumption.

(a) Documentation of request. All transfers and assumptions must be approved in writing by the Agency and must be to eligible applicants in accordance with subpart B of part 4279 of this chapter. An individual credit report must be provided for transferee proprietors, partners, officers, directors, and stockholders with 20 percent or more interest in the business, along with such other documentation as the Agency may request to determine eligibility.

(b) Terms. Loan terms must not be changed unless the change is approved in writing by the Agency with the concurrence of any holder and the transferor (including guarantors) if they have not been or will not be released from liability. Any new loan terms must be within the terms authorized by 4279.126 of subpart B of part 4279 of this chapter. The lender’s request for approval of new loan terms will be supported by an explanation of the reasons for the proposed change in loan terms.

(c) Release of liability. The transferor, including any guarantor, may be released from liability only with prior Agency written concurrence and only when the value of the collateral being transferred is at least equal to the amount of the loan being assumed and is supported by a current appraisal and a current financial statement. The Agency will not pay for the appraisal. If the transfer is for less than the debt, the lender must demonstrate to the Agency that the transferor and guarantors have no reasonable debt-paying ability considering their assets and income in the foreseeable future.

(d) Proceeds. Any proceeds received from the sale of collateral before a transfer and assumption will be credited to the transferor’s guaranteed loan debt in inverse order of maturity before the transfer and assumption are closed.

(e) Additional loans. Loans to provide additional funds in connection with a transfer and assumption will be considered as a new loan application under subpart B of part 4279 of this chapter.

(f) Credit quality. The lender must make a complete credit analysis which
is subject to Agency review and approval.

(g) Documents. Prior to Agency approval, the lender must advise the Agency, in writing, that the transaction can be properly and legally transferred, and the conveyance instruments will be filed, registered, or recorded as appropriate.

(1) The assumption will be done on the lender’s form of assumption agreement and will contain the Agency case number of the transferor and transferee. The lender will provide the Agency with a copy of the transfer and assumption agreement. The lender must ensure that all transfers and assumptions are noted on all original Loan Note Guarantees.

(2) A new Loan Agreement, consistent in principle with the original Loan Agreement, should be executed to establish the terms and conditions of the loan being assumed. An assumption agreement can be used to establish the loan covenants.

(3) The lender will provide to the Agency a written certification that the transfer and assumption is valid, enforceable, and complies with all Agency regulations.

(h) Loss resulting from transfer. If a loss should occur upon consummation of a complete transfer and assumption for less than the full amount of the debt and the transferee (including personal guarantors) is released from liability, the lender, if it holds the guaranteed portion, may file an estimated report of loss to recover its pro rata share of the actual loss. If a holder owns any of the guaranteed portion, such portion must be repurchased by the lender or the Agency in accordance with 4279.78(c) of subpart A of part 4279 of this chapter. In completing the report of loss, the amount of the debt assumed will be entered as net collateral (recovery). Approved protective advances and accrued interest thereon made during the arrangement of a transfer and assumption will be included in the calculations.

(i) Related party. If the transferor and transferee are affiliated or related parties, any transfer and assumption must be for the full amount of the debt.

(j) Payment requests. Requests for a loan guarantee to provide equity for a transfer and assumption must be considered as a new loan under subpart B of part 4279 of this chapter.

(k) Cash downpayment. When the transferee will be making a cash downpayment as part of the transfer and assumption:

(1) The lender must have an appropriate appraiser, acceptable to both the transferee and transferor and currently authorized to perform appraisals, determine the value of the collateral securing the loan. The appraisal fee and any other costs will not be paid by the Agency.

(2) The market value of the collateral, plus any additional property the transferee proposes to offer as collateral, must be adequate to secure the balance of the guaranteed loans.

(3) Cash downpayments may be paid directly to the transferee provided:

(i) The lender recommends that the cash be released, and the Agency concurs prior to the transaction being completed. The lender may wish to require that an amount be retained for a defined period of time as a reserve against future defaults. Interest on such account may be paid periodically to the transferor or transferee as agreed;

(ii) The lender determines that the transferee has the repayment ability to meet the obligations of the assumed guaranteed loan as well as any other indebtedness;

(iii) Any payments by the transferee to the transferor will not suspend the transferee’s obligations to continue to meet the guaranteed loan payments as they come due under the terms of the assumption; and

(iv) The transferor agrees not to take any action against the transferee in connection with the assumption without prior written approval of the lender and the Agency.

§ 4287.135 Substitution of lender.

After the issuance of a Loan Note Guarantee, the lender shall not sell or transfer the entire loan without the prior written approval of the Agency. The Agency will not pay any loss or share in any costs (i.e., appraisal fees, environmental studies, or other costs
associated with servicing or liquidating the loan) with a new lender unless a relationship is established through a substitution of lender in accordance with paragraph (a) of this section. This includes cases where the lender has failed and been taken over by a regulatory agency such as the Federal Deposit Insurance Corporation (FDIC) and the loan is subsequently sold to another lender.

(a) The Agency may approve the substitution of a new lender if:

(1) The proposed substitute lender:
   (i) Is an eligible lender in accordance with 4279.29 of subpart A of part 4279 of this chapter;
   (ii) Is able to service the loan in accordance with the original loan documents; and
   (iii) Agrees in writing to acquire title to the unguaranteed portion of the loan held by the original lender and assumes all original loan requirements, including liabilities and servicing responsibilities.

(b) Where the lender has failed and been taken over by FDIC and the guaranteed loan is liquidated by FDIC rather than being sold to another lender, the Agency will pay losses and share in costs as if FDIC were an approved substitute lender.

§§ 4287.136–4287.144 [Reserved]

§ 4287.145 Default by borrower.

(a) The lender must notify the Agency when a borrower is 30 days past due on a payment or is otherwise in default of the Loan Agreement, Form FmHA 1980–44, “Guaranteed Loan Borrower Default Status,” will be used and the lender will continue to submit this form bimonthly until such time as the loan is no longer in default. If a monetary default exceeds 60 days, the lender will arrange a meeting with the Agency and the borrower to resolve the problem.

(b) In considering options, the prospects for providing a permanent cure without adversely affecting the risk to the Agency and the lender is the paramount objective.

(1) Curative actions include but are not limited to:
   (i) Deferment of principal (subject to rights of any holder);
   (ii) An additional unguaranteed loan by the lender to bring the account current;
   (iii) Reamortization of or rescheduling the payments on the loan (subject to rights of any holder);
   (iv) Transfer and assumption of the loan in accordance with §4287.134 of this subpart;
   (v) Reorganization;
   (vi) Liquidation;
   (vii) Subsequent loan guarantees; and
   (viii) Changes in interest rates with the Agency’s, the lender’s, and holder’s approval, provided that the interest rate is adjusted proportionately between the guaranteed and unguaranteed portion of the loan and the type of rate remains the same.

(2) In the event a deferment, rescheduling, reorganization, or moratorium is accomplished, it will be limited to the remaining life of the collateral or remaining limits as contained in §4279.126 of subpart B of part 4279 of this chapter, whichever is less.

§§ 4287.146–4287.155 [Reserved]

§ 4287.156 Protective advances.

Protective advances are advances made by the lender for the purpose of preserving and protecting the collateral where the debtor has failed to, will not, or cannot meet its obligations. Sound judgment must be exercised in determining that the protective advance preserves collateral and recovery is actually enhanced by making the advance. Protective advances will not be made in lieu of additional loans.

(a) The maximum loss to be paid by the Agency will never exceed the original principal plus accrued interest regardless of any protective advances made.

(b) Protective advances and interest thereon at the note rate will be guaranteed at the same percentage of loss as provided in the Loan Note Guarantee.

(c) Protective advances must constitute an indebtedness of the borrower.
to the lender and be secured by the security instruments. Agency written authorization is required when cumulative protective advances exceed $5,000.

§ 4287.157 Liquidation.

In the event of one or more incidents of default or third party actions that the borrower cannot or will not cure or eliminate within a reasonable period of time, liquidation may be considered. If the lender concludes that liquidation is necessary, it must request the Agency’s concurrence. The lender will liquidate the loan unless the Agency, at its option, carries out liquidation. When the decision to liquidate is made, if the loan has not already been repurchased, provisions will be made for repurchase in accordance with § 4279.78 of subpart A of part 4279 of this chapter.

(a) Decision to liquidate. A decision to liquidate shall be made when it is determined that the default cannot be cured through actions contained in § 4287.145 of this subpart or it has been determined that it is in the best interest of the Agency and the lender to liquidate. The decision to liquidate or continue with the borrower must be made as soon as possible when any of the following exist:

(1) A loan has been delinquent 90 days and the lender and borrower have not been able to cure the delinquency through one of the actions contained in § 4287.145 of this subpart.

(2) It has been determined that delaying liquidation will jeopardize full recovery on the loan.

(3) The borrower or lender has been uncooperative in resolving the problem and the Agency or the lender has reason to believe the borrower is not acting in good faith, and it would enhance the position of the guarantee to liquidate immediately.

(b) Liquidation by the Agency. The Agency may require the lender to assign the security instruments to the Agency if the Agency, at its option, decides to liquidate the loan. When the Agency liquidates, reasonable liquidation expenses will be assessed against the proceeds derived from the sale of the collateral. Form FmHA 1980–45, “Notice of Liquidation Responsibility,” will be forwarded to the Finance Office when the Agency liquidates the loan.

(c) Submission of liquidation plan. The lender will, within 30 days after a decision to liquidate, submit to the Agency in writing its proposed detailed method of liquidation. Upon approval by the Agency of the liquidation plan, the lender will commence liquidation.

(d) Lender’s liquidation plan. The liquidation plan must include, but is not limited to, the following:

(1) Such proof as the Agency requires to establish the lender’s ownership of the guaranteed loan promissory note and related security instruments and a copy of the payment ledger if available which reflects the current loan balance and accrued interest to date and the method of computing the interest.

(2) A full and complete list of all collateral including any personal and corporate guarantees.

(3) The recommended liquidation methods for making the maximum collection possible on the indebtedness and the justification for such methods, including recommended action:

(i) For acquiring and disposing of all collateral; and

(ii) To collect from guarantors.

(4) Necessary steps for preservation of the collateral.

(5) Copies of the borrower’s latest available financial statements.

(6) Copies of the guarantor’s latest available financial statements.

(7) An itemized list of estimated liquidation expenses expected to be incurred along with justification for each expense.

(8) A schedule to periodically report to the Agency on the progress of liquidation.

(9) Estimated protective advance amounts with justification.

(10) Proposed protective bid amounts on collateral to be sold at auction and a breakdown to show how the amounts were determined.

(11) If a voluntary conveyance is considered, the proposed amount to be credited to the guaranteed debt.

(12) Legal opinions, if needed.

(13) If the outstanding balance of principal and accrued interest is less than $200,000, the lender will obtain an estimate of fair market and potential liquidation value of the collateral. If
the outstanding balance of principal and accrued interest is $200,000 or more, the lender will obtain an independent appraisal report meeting the requirements of §4279.144 of subpart B of part 4279 of this chapter on all collateral securing the loan which will reflect the fair market value and potential liquidation value. In order to formulate a liquidation plan which maximizes recovery, collateral must be evaluated for the release of hazardous substances, petroleum products, or other environmental hazards which may adversely impact the market value of the collateral. The appraisal shall consider this aspect. The independent appraiser’s fee, including the cost of the environmental site assessment, will be shared equally by the Agency and the lender.

(e) Approval of liquidation plan. The Agency will inform the lender in writing whether it concurs in the lender’s liquidation plan. Should the Agency and the lender not agree on the liquidation plan, negotiations will take place between the Agency and the lender to resolve the disagreement. When the liquidation plan is approved by the Agency, the lender will proceed expeditiously with liquidation.

(1) A transfer and assumption of the borrower’s operation can be accomplished before or after the loan goes into liquidation. However, if the collateral has been purchased through foreclosure or the borrower has conveyed title to the lender, no transfer and assumption is permitted.

(2) A protective bid may be made by the lender, with prior Agency written approval, at a foreclosure sale to protect the lender’s and the Agency’s interest. The protective bid will not exceed the amount of the loan, including expenses of foreclosure, and should be based on the liquidation value considering estimated expenses for holding and reselling the property. These expenses include, but are not limited to, expenses for resale; interest accrual; length of time necessary for resale; maintenance, guard service, weatherization, and prior liens.

(f) Acceleration. The lender, or the Agency if it liquidates, will proceed to accelerate the indebtedness as expeditiously as possible when acceleration is necessary including giving any notices and taking any other legal actions required. A copy of the acceleration notice or other acceleration document will be sent to the Agency (or lender if the Agency liquidates). The guaranteed loan will be considered in liquidation once the loan has been accelerated and a demand for payment has been made upon the borrower.

(g) Filing an estimated loss claim. When the lender is conducting the liquidation and owns any or all of the guaranteed portion of the loan, the lender will file an estimated loss claim once a decision has been made to liquidate if the liquidation will exceed 90 days. The estimated loss payment will be based on the liquidation value of the collateral. For the purpose of reporting and loss claim computation, the lender will discontinue interest accrual on the defaulted loan in accordance with Agency procedures, and the loss claim will be promptly processed in accordance with applicable Agency regulations.

(h) Accounting and reports. When the lender conducts liquidation, it will account for funds during the period of liquidation and will provide the Agency with reports at least quarterly on the progress of liquidation including disposition of collateral, resulting costs, and additional procedures necessary for successful completion of the liquidation.

(i) Transmitting payments and proceeds to the Agency. When the Agency is the holder of a portion of the guaranteed loan, the lender will transmit to the Agency its pro rata share of any payments received from the borrower; liquidation; or other proceeds using Form FmHA 1980–43, “Lender’s Guaranteed Loan Payment to FmHA.”

(j) Abandonment of collateral. There may be instances when the cost of liquidation would exceed the potential recovery value of the collection. The lender, with proper documentation and concurrence of the Agency, may abandon the collateral in lieu of liquidation. A proposed abandonment will be considered a servicing action requiring the appropriate environmental review by the Agency in accordance with subpart G of part 1940 of this title. Examples where abandonment may be considered include, but are not limited to:
(1) The cost of liquidation is increased or the value of the collateral is decreased by environmental issues;
(2) The collateral is functionally or economically obsolete;
(3) There are superior liens held by other parties in excess of the value of the collateral;
(4) The collateral has deteriorated; or
(5) The collateral is specialized and there is little or no demand for it.

(k) *Disposition of personal or corporate guarantees.* The lender should take action to maximize recovery from all collateral, including personal and corporate guarantees. The lender will seek a deficiency judgment when there is a reasonable chance of future collection of the judgment. The lender must make a decision whether or not to seek a deficiency judgment when:
(1) A borrower voluntarily liquidates the collateral, but the sale fails to pay the guaranteed indebtedness;
(2) The collateral is voluntarily conveyed to the lender, but the borrower and personal and corporate guarantors are not released from liability; or
(3) A liquidation plan is being developed for forced liquidation.

(l) *Compromise settlement.* A compromise settlement may be considered at any time.
(1) The lender and the Agency must receive complete financial information on all parties obligated for the loan and must be satisfied that the statements reflect the true and correct financial position of the debtor including all assets. Adequate consideration must be received before a release from liability is issued. Adequate consideration includes money, additional security, or other benefit to the goals and objectives of the Agency.
(2) Before a personal guarantor can be released from liability, the following factors must be considered.
   (i) Cash, either lump sum or over a period of time, or other consideration offered by the guarantor;
   (ii) Age and health of the guarantor;
   (iii) Potential income of the guarantor;
   (iv) Inheritance prospects of the guarantor;
   (v) Availability of the guarantor's assets.
   (vi) Possibility that the guarantor's assets have been concealed or improperly transferred; and
   (vii) Effect of other guarantors on the loan.
(3) Once the Agency and the lender agree on a reasonable amount that is fair and adequate, the lender can proceed to effect the settlement compromise.
(4) A compromise will only be accepted if it is in the best interest of the Agency.

§4287.158 Determination of loss and payment.

In all liquidation cases, final settlement will be made with the lender after the collateral is liquidated, unless otherwise designated as a future recovery or after settlement and compromise of all parties has been completed. The Agency will have the right to recover losses paid under the guarantee from any party which may be liable.

(a) *Report of loss form.* Form FmHA 449–30, “Loan Note Guarantee Report of Loss,” will be used for calculations of all estimated and final loss determinations. Estimated loss payments may only be approved by the Agency after the Agency has approved a liquidation plan.

(b) *Estimated loss.* In accordance with the requirements of §4287.157(g) of this subpart, an estimated loss claim based on liquidation appraisal value will be prepared and submitted by the lender.
(1) The estimated loss payment shall be applied as of the date of such payment. The total amount of the loss payment remitted by the Agency will be applied by the lender on the guaranteed portion of the loan debt. Such application does not release the borrower from liability.
(2) An estimated loss will be applied first to reduce the principal balance on the guaranteed loan and the balance, if any, to accrued interest. Interest accrual on the defaulted loan will be discontinued.
(3) A protective advance claim will be paid only at the time of the final report of loss payment, except in certain transfer and assumption situations as specified in §4287.134 of this subpart.
Final loss. Within 30 days after liquidation of all collateral, except for certain unsecured personal or corporate guarantees as provided for in this section, is completed, a final report of loss must be prepared and submitted by the lender to the Agency. The Agency will not guarantee interest beyond this 30-day period other than for the period of time it takes the Agency to process the loss claim. Before approval by the Agency of any final loss report, the lender must account for all funds during the period of liquidation. disposition of the collateral, all costs incurred, and any other information necessary for the successful completion of liquidation. Upon receipt of the final accounting and report of loss, the Agency may audit all applicable documentation to determine the final loss. The lender will make its records available and otherwise assist the Agency in making any investigation. The documentation accompanying the report of loss must support the amounts shown on Form FmHA 449–30.

(1) A determination must be made regarding the collectibility of unsecured personal and corporate guarantees. If reasonably possible, such guarantees should be promptly collected or otherwise disposed of in accordance with §4287.157(k) of this subpart prior to completion of the final loss report. However, in the event that collection from the guarantors appears unlikely or will require a prolonged period of time, the report of loss will be filed when all other collateral has been liquidated, and unsecured personal or corporate guarantees will be treated as a future recovery with the net proceeds to be shared on a pro rata basis by the lender and the Agency.

(2) The lender must document that all of the collateral has been accounted for and properly liquidated and that liquidation proceeds have been properly accounted for and applied correctly to the loan.

(3) The lender will show a breakdown of any protective advance amount as to the payee, purpose of the expenditure, date paid, and evidence that the amount expended was proper and that payment was actually made.

(4) The lender will show a breakdown of liquidation expenses as to the payee, purpose of the expenditure, date paid, and evidence that the amount expended was proper and that payment was actually made. Liquidation expenses are recoverable only from collateral proceeds. Attorney fees may be approved as liquidation expenses provided the fees are reasonable and cover legal issues pertaining to the liquidation that could not be properly handled by the lender and its in-house counsel.

(5) Accrued interest will be supported by documentation as to how the amount was accrued. If the interest rate was a variable rate, the lender will include documentation of changes in both the selected base rate and the loan rate.

(6) Loss payments will be paid by the Agency within 60 days after the review of the final loss report and accounting of the collateral.

(d) Loss limit. The amount payable by the Agency to the lender cannot exceed the limits set forth in the Loan Note Guarantee.

(e) Rent. Any net rental or other income that has been received by the lender from the collateral will be applied on the guaranteed loan debt.

(f) Liquidation costs. Liquidation costs will be deducted from the proceeds of the disposition of primary collateral. If changed circumstances after submission of the liquidation plan require a substantial revision of liquidation costs, the lender will procure the Agency's written concurrence prior to proceeding with the proposed changes. No in-house expenses of the lender will be allowed. In-house expenses include, but are not limited to, employee's salaries, staff lawyers, travel, and overhead.

(g) Payment. When the Agency finds the final report of loss to be proper in all respects, it will approve Form FmHA 449–30 and proceed as follows:

(1) If the loss is greater than any estimated loss payment, the Agency will pay the additional amount owed by the Agency to the lender.

(2) If the loss is less than the estimated loss payment, the lender will reimburse the Agency for the overpayment plus interest at the note rate from the date of payment.
(3) If the Agency has conducted the liquidation, it will pay the lender in accordance with the Loan Note Guarantee.

§§ 4287.159–4287.168 [Reserved]

§ 4287.169 Future recovery.
After a loan has been liquidated and a final loss has been paid by the Agency, any future funds which may be recovered by the lender will be pro rated between the Agency and the lender based on the original percentage of guarantee.

§ 4287.170 Bankruptcy.
The lender is responsible for protecting the guaranteed loan and all collateral securing the loan in bankruptcy proceedings.

(a) Lender’s responsibilities. It is the lender’s responsibility to protect the guaranteed loan debt and all of the collateral securing it in bankruptcy proceedings. These responsibilities include but are not limited to the following:

(1) The lender will file a proof of claim where necessary and all the necessary papers and pleadings concerning the case.

(2) The lender will attend and, where necessary, participate in meetings of the creditors and all court proceedings.

(3) When permitted by the Bankruptcy Code, the lender will request modification of any plan of reorganization whenever it appears that additional recoveries are likely.

(4) The Agency will be kept adequately and regularly informed in writing of all aspects of the proceedings.

(5) In a Chapter 11 reorganization, if an independent appraisal of collateral is necessary in the Agency’s opinion, the Agency and the lender will share such appraisal fee equally.

(b) Reports of loss during bankruptcy. When the loan is involved in reorganization proceedings, payment of loss claims may be made as provided in this section. For a liquidation proceeding, only paragraphs (b)(3) and (5) of this section are applicable.

(1) Estimated loss payments. (i) If a borrower has filed for protection under Chapter 11 of the United States Code for a reorganization (but not Chapter 13) and all or a portion of the debt has been discharged, the lender will request an estimated loss payment of the guaranteed portion of the accrued interest and principal discharged by the court. Only one estimated loss payment is allowed during the reorganization. All subsequent claims of the lender during reorganization will be considered revisions to the initial estimated loss. A revised estimated loss payment may be processed by the Agency, at its option, in accordance with any court-approved changes in the reorganization plan. Once the reorganization plan has been completed, the lender is responsible for submitting the documentation necessary for the Agency to review and adjust the estimated loss claim to reflect any actual discharge of principal and interest and to reimburse the lender for any court-ordered interest-rate reduction under the terms of the reorganization plan.

(ii) The lender will use Form FmHA 449–30 to request an estimated loss payment and to revise any estimated loss payments during the course of the reorganization plan. The estimated loss claim, as well as any revisions to this claim, will be accompanied by documentation to support the claim.

(iii) Upon completion of a reorganization plan, the lender will complete a Form FmHA 1980–44 and forward this form to the Finance Office.

(2) Interest loss payments. (i) Interest losses sustained during the period of the reorganization plan will be processed in accordance with paragraph (b)(1) of this section.

(ii) Interest losses sustained after the reorganization plan is completed will be processed annually when the lender sustains a loss as a result of a permanent interest rate reduction which extends beyond the period of the reorganization plan.

(iii) If an estimated loss claim is paid during the operation of the Chapter 11 reorganization plan and the borrower repays in full the remaining balance without an additional loss sustained by the lender, a final report of loss is not necessary.

(3) Final loss payments. Final loss payments will be processed when the loan is liquidated.

(4) Payment application. The lender must apply estimated loss payments
first to the unsecured principal of the guaranteed portion of the debt and then to the unsecured interest of the guaranteed portion of the debt. In the event a bankruptcy court attempts to direct the payments to be applied in a different manner, the lender will immediately notify the Agency servicing office.

(5) Overpayments. Upon completion of the reorganization plan, the lender will provide the Agency with the documentation necessary to determine whether the estimated loss paid equals the actual loss sustained. If the actual loss sustained as a result of the reorganization is less than the estimated loss, the lender will reimburse the Agency for the overpayment plus interest at the note rate from the date of payment of the estimated loss. If the actual loss is greater than the estimated loss payment, the lender will submit a revised estimated loss in order to obtain payment of the additional amount owed by the Agency to the lender.

(6) Protective advances. If approved protective advances were made prior to the borrower having filed bankruptcy, these protective advances and accrued interest will be considered in the loss calculations.

(c) Legal expenses during bankruptcy proceedings. (1) When a bankruptcy proceeding results in a liquidation of the borrower by a trustee, legal expenses will be handled as directed by the court.

(2) Chapter 11 pertains to a reorganization of a business contemplating an ongoing business rather than a termination and dissolution of the business where legal protection is afforded to the business as defined under Chapter 11 of the Bankruptcy Code. Consequently, expenses incurred by the lender in a Chapter 11 reorganization can never be liquidation expenses unless the proceeding becomes a Chapter 11 liquidation. If the proceeding should become a Liquidating 11, reasonable and customary liquidation expenses may be deducted from proceeds of collateral as provided in the Lender’s Agreement. Chapter 7 pertains to a liquidation of the borrower’s assets. If, and when, liquidation of the borrower’s assets under Chapter 7 is conducted by the bankruptcy trustee, then the lender cannot claim expenses.

§§ 4287.180 Termination of guarantee.
A guarantee under this part will terminate automatically:
(a) Upon full payment of the guaranteed loan;
(b) Upon full payment of any loss obligation; or
(c) Upon written notice from the lender to the Agency that the guarantee will terminate 30 days after the date of notice, provided that the lender holds all of the guaranteed portion and the Loan Note Guarantee is returned to the Agency to be canceled.

§§ 4287.181–4287.199 [Reserved]

§ 4287.200 OMB control number.
The information collection requirements contained in this regulation have been approved by OMB and have been assigned OMB control number 0575–0168. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 8 hours per response, with an average of 4 hours per response, including time for reviewing the collection of information. Send comments regarding this burden, estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the Department of Agriculture, Clearance Officer, OIRM, Stop 7630, Washington, DC 20250. You are not required to respond to this collection of information unless it displays a currently valid OMB control number.

Subpart D—Servicing Biorefinery Assistance Guaranteed Loans

SOURCE: 76 FR 8475, Feb. 14, 2011, unless otherwise noted.

§ 4287.301 Introduction.
(a) This subpart supplements 7 CFR part 4279, subparts A and C, by providing additional requirements and instructions for servicing and liquidating all Biorefinery Assistance Guaranteed Loans.
(b) The lender will be responsible for servicing the entire loan and will remain mortgagee and secured party of record notwithstanding the fact that another party may hold a portion of the loan. The entire loan will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the loan. The unguaranteed portion of a loan will neither be paid first nor given any preference or priority over the guaranteed portion of the loan.

(c) Copies of all forms, regulations, and Instructions referenced in this subpart are available in any Agency office. Whenever a form is designated in this subpart, that designation includes predecessor and successor forms, if applicable, as specified by the field or National Office.

§ 4287.302 Definitions.
The definitions and abbreviations contained in §4279.2 of subpart A and in §4279.202 of subpart C of part 4279 of this chapter apply to this subpart.

§ 4287.303 Exception authority.
The exception authority provisions of this paragraph apply to this subpart instead of those in §4279.15 of subpart A of part 4279 of this chapter. The Administrator may, with the concurrence of the Secretary of Agriculture, make an exception, on a case-by-case basis, to any requirement or provision of this subpart that is not inconsistent with any authorizing statute or applicable law, if the Administrator determines that application of the requirement or provision would adversely affect the Federal government’s interest.

§§ 4287.304–4287.305 [Reserved]

§ 4287.306 Appeals.
Section 4279.16 of subpart A of part 4279 of this chapter applies to this subpart.

§ 4287.307 Servicing.
Except as specified in paragraphs (a) through (m) of this section, all loans guaranteed under this subpart shall comply with the provisions found in §§4287.101 through 4287.180 of this chapter. If the Agency determines that the lender is not in compliance with its servicing responsibilities, the Agency reserves the right to take any action the Agency determines necessary to protect the Agency’s interests with respect to the loan. If the Agency exercises this right, the lender must cooperate with the Agency. Any cost to the Agency associated with such action will be assessed against the lender.

(a) Periodic reports. Each lender shall submit quarterly reports, unless more frequent ones are needed as determined by the Agency to meet the financial interests of the United States, regarding the condition of its Agency guaranteed loan portfolio (including borrower status and loan classification) and any material adverse change in the general financial condition of the borrower since the last report was submitted.

(b) Default reports. Lenders shall submit monthly default reports, including borrower payment history, for each loan in monetary default using a form approved by the Agency.

(c) Financial reports. The financial report requirements specified in §4287.107(d) apply except as follows:

1. The financial reports required under §4287.107(d) may be specified in either the loan agreement or the Conditional Commitment;

2. The lender must submit to the Agency quarterly financial statements within 45 days of the end of each quarter; and

3. The annual financial statements required under §4287.107(d) must be audited financial statements and must be submitted within 180 days.

(d) Additional loans. Instead of complying with the additional expenditures provisions specified in §4287.107(e), the lender may make additional expenditures or new loans to a borrower with an outstanding loan guaranteed only with prior written Agency approval. The Agency will only approve additional expenditures or new loans where the expenditure or loan will not violate one or more of the loan covenants of the borrower’s loan agreement. In all instances, the lender must notify the Agency when they make any additional expenditures or new loans. Any additional expenditure or loan made by the lender must be junior in priority to the loan guaranteed under 7 CFR part 4279 except for working capital loans for
which the Agency may consider a subordinate lien provided it is consistent with the conditional provisions specified in §4279.202(i)(1).

(e) Interest rate adjustments. The provisions of §4287.112 apply, except for §4287.112(a)(2).

5 Collateral inspection and release. In lieu of complying with §4287.113, lenders must comply with the provisions of this paragraph. The lender must inspect the collateral as often as necessary to properly service the loan. The Agency must give prior approval for the release of collateral, except as specified in paragraph (f)(1) of this section or where the release of collateral is made under the abundance of collateral provision of the applicable security agreement, subject to the provisions of paragraph (f)(3) of this section. Appraisals on the collateral being released are required on all transactions exceeding $250,000 and will be at the expense of the borrower. The appraisal must meet the requirements of §4279.244. The sale or release of collateral must be based on an arm’s length transaction, unless otherwise approved by the Agency in writing.

(1) Lenders may, over the life of the guaranteed loan, release collateral with a cumulative value of up to 20 percent of the original loan amount without Agency concurrence (subject to the provisions of paragraph (f)(3) of this section) if the proceeds generated are used to pay down secured debt in order of lien priority or to buy replacement collateral.

(2) Release of collateral with a cumulative value in excess of 20 percent of the original loan amount without Agency concurrence (subject to the provisions of paragraph (f)(3) of this section) if the proceeds generated are used to pay down secured debt in order of lien priority or to buy replacement collateral, must be requested, in writing, by the lender and concurred by the Agency, in writing, in advance of the release. A written evaluation will be completed by the lender to justify the release.

(3) Lenders may not release collateral with a value of more than 10 percent of the original loan amount at any one time and within any one calendar year without Agency concurrence.

(4) Any release of collateral must not adversely affect the project’s operation or financial condition.

(g) Subordination of lien position. In addition to complying with the provisions found in §4287.123, a subordination must not extend the term of the guaranteed loan.

(h) Transfers and assumptions. Transfers and assumptions shall comply with §4287.134, except as specified in paragraphs (h)(1) through (h)(3) of this section, and with paragraphs (h)(4) and (h)(5) of this section.

(1) In complying with §4287.134(a), eligible applicants shall be determined in accordance with subpart C of part 4279 of this chapter instead of subpart B of part 4279.

(2) Any new loan terms under §4287.134(b) must be within the terms authorized by §4279.232 of subpart C of part 4279 of this chapter instead of §4279.126 of subpart B of part 4279.

(3) Additional loans under §4287.134(e) will be considered as a new loan application under subpart C of part 4279 of this chapter instead of subpart B of part 4279.

(4) The Agency may charge the lender a nonrefundable transfer fee at the time of a transfer application. The Agency will set the amount of the transfer fee in an annual notice of funds availability published in the FEDERAL REGISTER.

(5) Assumption shall be deemed to occur in the event of a change in the control of the borrower. For purposes of the loan, change of control means the merger of the borrower, sale of all or substantially all of the assets of the borrower, or the sale of more than 25 percent of the stock or other equity interest in either the borrower or its corporate parent.

(6) The Agency will not approve any change in terms that results in an increase in the cost of the loan guarantee, unless the Agency can secure any additional budget authority that would be required and the change otherwise conforms with applicable regulations.

(i) Substitution of lender after issuance of the Loan Note Guarantee. All substitutions of lenders must comply with §4287.135 except that, instead of approving a new lender as a substitute lender using the provisions of §4287.135(a), the Agency may approve the substitution
of a new lender if the proposed substitute lender:

1. Is an eligible lender in accordance with §4279.202(b);
2. Is able to service the loan in accordance with the original loan documents; and
3. Acquires title to the unguaranteed portion of the loan held by the original lender and assumes all original loan requirements, including liabilities and servicing responsibilities.

(j) Default by borrower. The provisions of §4287.145 apply to this subpart, except that:
1. Instead of complying with §4287.145(b)(2), in the event a deferment, rescheduling, reamortization, or moratorium is accomplished, it will be limited to the remaining life of the collateral or remaining limits as contained in §4279.232(a) of part 4279 of this chapter; and
2. If a loan goes into default, the lender must provide the notification required under §4287.145(a) to the Agency within 15 calendar days of when a borrower is 30 days past due on a payment or is otherwise in default of the Loan Agreement.

(k) Protective advances. All protective advances made by the lender must comply with §4287.156 and the provisions of paragraphs (k)(1) and (k)(2) of this section.
1. Instead of the $5,000 specified in §4287.156(c), the Agency's written authorization is required when cumulative protective advances exceed $100,000, unless otherwise specified by the Agency at a lesser amount.
2. The lender must obtain written Agency approval for any protective advance that will singularly or cumulatively amount to more than $100,000 or 10 percent of the guaranteed loan, whichever is less.

(l) Liquidation. Liquidations shall comply with §4287.157, except that, in complying with §4287.157(d)(13), lenders are to obtain an independent appraisal report meeting the requirements of §4279.244, instead of §4279.144, when the outstanding balance of principal and accrued interest is $200,000 or more.

(m) Determination of loss and payment. In addition to complying with §4287.158, if a lender receives a final loss payment, the lender must submit to the Agency an annual report on its collection activities for each unsatisfied account for 3 years following payment of the final loss claim.

§4287.308 Fiscal Year 2009 and Fiscal Year 2010 loan guarantees.

Any loan guarantee application that has been submitted to the Agency under this program prior to March 16, 2011 may submit to the Agency a written request for an irrevocable election to have the guaranteed loan serviced in accordance with this subpart. Such an election must be made by October 1, 2011.

§§4287.309–4287.400 [Reserved]
§ 4288.1 Purpose and scope.

(a) Purpose. The purpose of this program is to provide financial incentives to biorefineries in existence on June 18, 2008, the date of the enactment of the Food, Conservation, and Energy Act of 2008 (the 2008 Farm Bill) (Pub. L. 110–246), to replace the use of fossil fuels used to produce heat or power at their facilities by installing new systems that use renewable biomass, or to produce new energy from renewable biomass.

(b) Scope. The Agency may make payments under this program to any biorefinery that meets the requirements of the program up to the limits established for the program. Based on our research and survey of medium-sized project costs, the Agency has determined that the dollar amount identified will provide adequate incentive for biorefineries to apply.

(1) The Agency will determine the amount of payments to be made to a biorefinery taking into consideration the percentage reduction in fossil fuel used by the biorefinery (including the quantity of fossil fuels a renewable biomass system is replacing), and the cost and cost-effectiveness of the renewable biomass system.

(2) The Agency will determine who receives payment under this program based on the percentage reduction in fossil fuel used by the biorefinery that will result from the installation of the renewable biomass system; the cost and cost-effectiveness of the renewable biomass system; and other scoring criteria identified in §4288.21. The above criteria will be used to determine priority for awards of 50 percent of total eligible project costs, up to the maximum award applicable for the fiscal year.

§ 4288.2 Definitions.

The definitions set forth in this section are applicable for all purposes of program administration under this subpart.

Agency. The USDA Rural Development, Rural Business-Cooperative Service or its successor organization.

Application period. The time period announced by the Agency during which the Agency will accept applications.

Base energy use. The amount of documented fossil fuel energy use over an extended operating period.

(1) The extended operating period must be at least 24 months of recorded usage, and requires metered utility records for electric energy, natural gas consumption, fuel oil, coal shipments and propane use, as applicable for providing heat or power for the operation of the biorefinery.

(2) Utility billing, oil and coal shipments must be actual bills, with meter readings, applicable rates and tariffs, costs and usage. Billing must be complete, without gaps and arranged in chronological order. Drop shipments of coal or oil can be substituted for metered readings, provided the biorefinery documents the usage and its relationship to providing heat or power to the biorefinery.

(3) A biorefinery in existence on or before June 18, 2008 with less than 24
months of actual operating data must provide at least 12 months of data supported by engineering and design calculations, and site plans, prepared by the construction engineering firm.

Biobased products. Products determined by the Secretary to be commercial or industrial products (other than food or feed) that are:

(1) Composed, in whole or in significant part, of biological products, including renewable domestic agricultural materials and forestry materials; or
(2) Intermediate ingredients or feedstocks.

Biofuel. Fuel derived from renewable biomass.

Biorefinery. A facility (including equipment and processes) that converts renewable biomass into biofuels and biobased products, and may produce electricity.

Eligible biorefinery. A biorefinery that has been in existence on or before June 18, 2008.

Feasibility study. An Agency-acceptable analysis of the economic, environmental, technical, financial, and management capabilities of a proposed project or business in terms of its expected success. A list of items that must be included in a feasibility study is presented in §4288.20(c)(9) of this subpart.

Financial interest. Any ownership, creditor, or management interest in the biorefinery.

Fiscal year. A 12-month period beginning each October 1 and ending September 30 of the following calendar year.

Fossil fuel. Coal, oil, propane, and natural gas.

Renewable biomass.

(1) Materials, pre-commercial thinnings, or invasive species from National Forest System land or public lands (as defined in section 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702)) that:

(i) Are byproducts of preventive treatments that are removed to reduce hazardous fuels; to reduce or contain disease or insect infestation; or to restore ecosystem health; and

(ii) Would not otherwise be used for higher value products; and

(iii) Are harvested in accordance with applicable law and land management plans and the requirements for old growth maintenance, restoration, and management direction as per paragraphs (e)(2), (e)(3), and (e)(4), and large tree retention as per paragraph (f), of section 102 of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6512); or

(2) Any organic matter that is available on a renewable or recurring basis from non-Federal land or land belonging to an Indian or Indian Tribe that is held in trust by the United States or subject to a restriction against alienation imposed by the United States, including:

(i) Renewable plant material, including feed grains; other agricultural commodities; other plants and trees; and algae; and

(ii) Waste material, including crop residue; other vegetative waste material (including wood waste and wood residues); animal waste and byproducts (including fats, oils, greases, and manure); and food waste and yard waste.

Rural or rural area. Any area of a State not in a city or town that has a population of more than 50,000 inhabitants, according to the latest decennial census of the United States, or in the urbanized area contiguous and adjacent to a city or town that has a population of more than 50,000 inhabitants, and any area that has been determined to be "rural in character" by the Under Secretary for Rural Development, or as otherwise identified in this definition.

(1) An area that is attached to the urbanized area of a city or town with more than 50,000 inhabitants by a contiguous area of urbanized census blocks that is not more than 2 census blocks wide. Applicants from such an area should work with their Rural Development State Office to request a determination of whether their project is located in a rural area under this provision.

(2) For the purposes of this definition, cities and towns are incorporated population centers with definite boundaries, local self government, and legal
powers set forth in a charter granted by the State.

(3) For the Commonwealth of Puerto Rico, the island is considered rural and eligible for Business Programs assistance, except for the San Juan Census Designated Place (CDP) and any other CDP with greater than 50,000 inhabitants. CDPs with greater than 50,000 inhabitants, other than the San Juan CDP, may be determined to be eligible if they are “not urban in character.”

(4) For the State of Hawaii, all areas within the State are considered rural and eligible for Business Programs assistance, except for the Honolulu CDP within the County of Honolulu.

(5) For the purpose of defining a rural area in the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands, the Agency shall determine what constitutes rural and rural area based on available population data.

(6) The determination that an area is “rural in character” will be made by the Under Secretary of Rural Development. The process to request a determination under this provision is outlined in paragraph (6)(ii) of this definition.

(i) The determination that an area is “rural in character” under this definition will apply to areas that are within:

(A) An urbanized area that has two points on its boundary that are at least 40 miles apart, which is not contiguous or adjacent to a city or town that has a population of greater than 150,000 inhabitants or the urbanized area of such a city or town; or

(B) An urbanized area contiguous and adjacent to a city or town of greater than 50,000 inhabitants that is within one-quarter mile of a rural area.

(ii) Units of local government may petition the Under Secretary of Rural Development for a “rural in character” designation by submitting a petition to both the appropriate Rural Development State Director and the Administrator on behalf of the Under Secretary. The petition shall document how the area meets the requirements of paragraph (6)(i)(A) or (6)(i)(B) of this definition and discuss why the petitioner believes the area is “rural in character,” including, but not limited to, the area’s population density, demographics, and topography and how the local economy is tied to a rural economic base. Upon receiving a petition, the Under Secretary will consult with the applicable Governor or leader in a similar position and request comments to be submitted within 5 business days, unless such comments were submitted with the petition. The Under Secretary will release to the public a notice of a petition filed by a unit of local government not later than 30 days after receipt of the petition by way of publication in a local newspaper and posting on the Agency’s Web site, and the Under Secretary will make a determination not less than 15 days, but no more than 60 days, after the release of the notice. Upon a negative determination, the Under Secretary will provide to the petitioner an opportunity to appeal a determination to the Under Secretary, and the petitioner will have 10 business days to appeal the determination and provide further information for consideration.

§ 4288.3 Review or appeal rights.

A person may seek a review of an Agency decision or appeal to the National Appeals Division in accordance with 7 CFR part 11 of this title.

§ 4288.4 Compliance with other laws and regulations.

Participating biorefineries must comply with other applicable Federal, State, and local laws, including, but not limited to, the Equal Employment Opportunities Act, the Equal Credit Opportunity Act, Title VI of the Civil Rights Act of 1964, 7 CFR Part 1901, subpart E, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975. Applicants must submit and will be subject to preaward and postaward compliance reviews with the terms and conditions set forth in Form RD 400–1, “Equal Opportunity Agreement” and Form RD 400–4, “Assurance Agreement.”

§ 4288.5 Oversight, monitoring, and reporting requirements.

(a) Verification. The Agency reserves the right to verify all payment requests and subsequent payments made
under this program, including field visits, as frequently as necessary to ensure the integrity of the program. Documentation provided will be used to verify, reconcile, and enforce the payment terms of Form RD 4288-5, “Repowering Assistance Program—Agreement,” along with any potential refunds that the recipient will be required to make should they fail to adequately document their request.

(b) Records. (1) For purposes of verifying the eligible project costs supporting payments under this subpart, each biorefinery must maintain in one place such books, documents, papers, receipts, payroll records and bills of sale adequate to identify the purposes for which, and the manner in which funds were expended for eligible project costs. The biorefinery must maintain copies of all documents submitted to the Agency in connection with payments made hereunder. These records must be available at all reasonable times for examination by the Agency and must be held and be available for Agency examination for a period of not less than 3 years from the final payment date.

(2) For the purpose of verifying compliance with the fossil fuel reduction and energy production requirements of this subpart, each biorefinery must make available and provide for the metering of all power and heat producing boilers, containment vessels, generators and any other equipment related to the production of heat or power required to displace fossil fuel loads with renewable biomass. These records must be held in one place and be available at all reasonable times for examination by the Agency. Such records include all books, papers, contracts, scale tickets, settlement sheets, invoices, and any other documents related to the program that are within the control of the biorefinery. These records must be held and made available for Agency examination for a period of not less than 3 years from the date the repowering project becomes operational.

(c) Reporting. Upon completion of the repowering project, the biorefinery must submit a report using Form RD 4288-6, “Repowering Assistance Programs—Reporting Form,” to the Agency annually for the first 3 years after completion of the project. The reports are to be submitted as of October 1 of each year. The report must include the items specified in paragraphs (c)(1) and (c)(2) of this section.

(1) Documentation regarding the usage and production of energy at the biorefinery during the previous year, including both the previous and current fossil fuel load and the renewable biomass energy production.

(ii) Metered data must be verifiable and subject to independent calibration testing.

(2) Current utility billing data, indentifying metered loads, from the base energy use period.

§ 4288.6 Forms, regulations, and instructions.

Copies of all forms, regulations, instructions, and other materials related to this program may be obtained from the USDA Rural Development State Office, Renewable Energy Coordinator and the USDA Rural Development Web site at http://www.rurdev.usda.gov/regs/.

§ 4288.7 Exception authority.

The Administrator of the Agency (“Administrator”) may, with the concurrence of the Secretary of Agriculture, make an exception, on a case-by-case basis, to any requirement or provision of this subpart that is not inconsistent with any authorizing statute or applicable law, if the Administrator determines that application of the requirement or provision would adversely affect the Federal government’s interest.

§§ 4288.8–4288.9 [Reserved]

§ 4288.10 Applicant eligibility.

(a) Eligible projects. To be eligible for this program, the applicant must be an eligible biorefinery utilizing only renewable biomass for replacement fuel, and must meet the requirements specified in paragraphs (a)(1) through (a)(5) of this section.

(1) Timely complete application submission. To be eligible for this program, the applicant must submit a complete
§ 4288.11 Eligible project costs.

Eligible project costs will be only for project related construction costs for repowering improvements associated with the equipment, installation, engineering, design, site plans, associated professional fees, permits and financing fees.

§ 4288.12 Ineligible project costs.

Any project costs incurred by the applicant prior to application for payment assistance under this program will be ineligible for payment assistance.

§ 4288.13 Payment information.

(a) Maximum payment. For purposes of this program, the maximum payment an applicant may receive will be 50 percent of total eligible project costs up to the applicable fiscal year’s maximum award as announced in an annual Federal Register notice. There is no minimum payment to an applicant.

(b) Reimbursement payments. The Agency shall only make payments based on the biorefinery’s expenditures on eligible project costs. Payments shall be determined by multiplying the amount of eligible expenditures stated on the payment request by a percentage obtained by dividing the aggregate payment award by total eligible project costs.

(c) Timing of payments. The Applicant may request payments not more frequently than once a month by submitting an original, completed, validly signed Standard Form (SF) 271, “Outlay Report and Request for Reimbursement for Construction Programs” including the supporting documentation identified in §4288.23, to reimburse the applicant for the Agency’s pro rata share of funds expended on eligible project costs. The Agency shall make such payments until 90 percent of the total payment award has been expended. The final 10 percent of the payment award will be paid upon completion of the repowering project and satisfactory evidence has been received by the Agency demonstrating that the biorefinery is operating as described in the Agency approved application.

§§ 4288.14–4288.19 [Reserved]

§ 4288.20 Submittal of applications.

(a) Address to make application. Application must be submitted to USDA, Rural Development-Energy Division, Program Branch, Attention: Repowering Assistance Program, 1400 Independence Avenue, SW., Stop 3225, Washington, DC 20250–3225.

(b) Content and form of submission. Applicants must submit a signed original and one copy of an application containing the information specified in this section. The applicant must also furnish the Agency the required documentation identified in Form RD 4288–4. “Repowering Assistance Program Application,” to verify compliance with program provisions before acceptance into the program. Note that applicants are required to have a Dun and
Bradstreet Universal Numbering System (DUNS) number (unless the applicant is an individual). The DUNS number is a nine-digit identification number, which uniquely identifies business entities. A DUNS number can be obtained at no cost via a toll-free request line at 1-866-705-5711, or online at http://fedgov.dnb.com/webform. Applicants must submit to the Agency the documents specified in paragraphs (b)(1) through (b)(6) of this section.

(1) Form RD 4288–4. Applicants must submit this form and all necessary attachments providing project information on the biorefinery; the facility at which the biorefinery operates, including location and products produced; and the types and quantities of renewable biomass feedstock being proposed to produce heat or power. This form requires the applicant to provide relevant data to allow for technical analysis of their existing facilities to demonstrate replacement of fossil fuel by renewable biomass with reasonable costs and maximum efficiencies. The applicant must also submit evidence that the biorefinery was in existence on or before June 18, 2008. The applicant is required to certify the information provided.

(2) RD Instruction 1940–Q, Exhibit A–1, “Certification for Contracts, Grants and Loans.”

(3) Form RD 400–1.

(4) Form RD 400–4.

(5) Form RD 1940–20, “Request for Environmental Information” (first page only). Note, however, that applicants must substitute the narrative outlined in RD Instruction 1940–G, Exhibit H, in place of the narrative attachment specified in the instructions to Form RD 1940–20.

(6) Certifications. The applicant must furnish to the Agency all required certifications before acceptance into the program, and furnish access to records required by the Agency to verify compliance with program provisions. The applicant must submit forms or other written documentation certifying to the following:

(i) AD–1047, “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Primary Covered Transactions” or other written documentation.

(ii) AD–1048, “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions.”

(iii) SF–LLL, “Disclosure of Lobbying Activities.”

(c) Application package contents. Applicants are required to provide relevant data to allow for technical analysis of their existing facilities to demonstrate replacement of fossil fuel by renewable biomass with reasonable costs and maximum efficiencies. Applicants in existence on or before June 18, 2008 with more than 24 months of actual operating data must provide data for the most recent 24-month period. Applicants in existence on or before June 18, 2008 with less than 24 months of actual operating data must provide data supported by engineering and design calculations, and site plans, prepared by the construction engineering firm. All applicants must submit the information specified in paragraphs (c)(1) through (c)(9) of this section as part of their application package.

(1) Contact data. Contact information for the primary technical contact for the biorefinery.

(2) Biorefinery data. Basic information on facility operations over time (hours/day, days/year).

(3) Electric use data. Information on existing electric service to the facility, data on consumption, peak and average demand, and monthly/seasonal use patterns.

(4) Fuel use data. Information on natural gas and current fuel use for boilers and heaters, including fuel type, costs, and use patterns.

(5) Thermal loads. Information on existing thermal loads, including type (steam, hot water, direct heat), conditions (temperature, pressure) and use patterns.

(6) Existing equipment. Information on existing heating and cooling equipment, including type, capacities, efficiencies and emissions.

(7) Site-specific data. Information on other site-specific issues, such as expansion plans or neighborhood considerations that might impact the proposed new system design or operation; or environmental impacts.
(8) Biofuel and biobased product production. Information on biofuel and biobased product production, including quantity and units of production.

(9) Feasibility study. The applicant must submit a feasibility study by an independent qualified consultant, which has no financial interest in the biorefinery, and demonstrates that the renewable biomass system of the biorefinery is feasible, taking into account the economic, technical and environmental aspects of the system. The feasibility study must include the components specified in paragraphs (c)(9)(i) through (c)(9)(x) of this section.

(i) An executive summary, including resume of the consultant, and an introduction/project overview (brief general overview of project location, size, etc.).

(ii) An economic feasibility determination, including:

(A) Information regarding the project site;

(B) Information on the availability of trained or trainable labor; and

(C) Information on the availability of infrastructure and rail and road service to the site.

(iii) A technical feasibility determination, including a report that:

(A) Describes the repowering project, including:

(1) Information on heating and cooling equipment, including type, capacities, efficiencies and emissions;

(2) Anticipated impacts of the repowering project on the information requested above relating to electric use data, fuel use data, thermal loads and biofuel and biobased product production; and

(3) A project development schedule as more fully described in §4288.21(b)(4)(iv);

(B) Is based upon verifiable data and contains sufficient information and analysis so that a determination may be made on the technical feasibility of achieving the levels of energy production that are projected in the statements. The report must provide the information in a format that is responsive to the scoring criteria specified in §4288.21(b)(1) through (5) and applicants should identify in their report the information that corresponds to each of the scoring criteria; and

(C) Identifies and estimates project operation and development costs and specifies the level of accuracy of these estimates and the assumptions on which these estimates have been based.

(iv) A financial feasibility determination that discusses the following:

(A) Repowering project construction funding, including repayment terms and security arrangements. Attach any documents relating to the project financing;

(B) The reliability of the financial projections and assumptions on which the project is based including all sources of project capital, both private and public, such as Federal funds;

(C) Projected balance sheets and costs associated with project operations;

(D) Cash flow projections for 3 years;

(E) The adequacy of raw materials and supplies;

(F) A sensitivity analysis, including feedstock and energy costs, product/co-product prices;

(G) Risks related to the project; and

(H) The continuity, maintenance and availability of records.

(v) A management feasibility determination.

(vi) Recommendations for implementation.

(vii) The environmental concerns and issues of the system.

(viii) The availability of feedstock, including discussions of:

(A) Feedstock source management;

(B) Estimates of feedstock volumes and costs;

(C) Collection, pre-treatment, transportation, and storage; and

(D) Impacts on existing manufacturing plants or other facilities that use similar feedstock.

(ix) The feasibility/plans of project to work with producer associations or cooperatives including estimated amount of annual feedstock from those entities.

(x) If woody biomass from National forest system lands or public lands is proposed as the feedstock, documentation must be provided that it cannot be used as a higher value wood-based product.
RBS and RUS, USDA § 4288.21

§ 4288.21 Application review and scoring.

The Agency will evaluate projects based on the cost, cost-effectiveness, and capacity of projects to reduce fossil fuels. The cost of the project will be taken into consideration in the context of each project’s ability to economically produce energy from renewable biomass to replace its dependence on fossil fuels. Projects with higher costs that are less efficient will not score well. The scoring criteria are designed to evaluate projects on simple payback as well as the percentage of fossil fuel reduction.

(a) Review. The Agency will evaluate each application and make a determination as to whether the applicant is eligible, whether the proposed project is eligible, and whether the proposed payment request complies with all applicable statutes and regulations. This evaluation will be conducted by experts in the Agency and other Federal agencies, including the U.S. Department of Energy based on the information provided by the applicant.

(b) Scoring. The Agency will score each application in order to prioritize each proposed project. The maximum number of points awardable to any applicant will be 100. The evaluation criteria that the Agency will use to score these projects are specified in paragraphs (b)(1) through (b)(6) of this section.

(1) Cost-effectiveness. Cost-effectiveness will be scored based on the anticipated simple payback period, or “simple payback.” Anticipated simple payback will be demonstrated by calculating documented base energy use costs for the 24-month period prior to submission of the application or at least 12 months of data supported by engineering and design calculations, and site plans, prepared by the construction engineering firm.

(i) The simple payback period is calculated as follows:

\[ \text{Simple payback} = \frac{C}{S} \]

Where:

- \( C \) = eligible capital expenses of the repowering project
- \( S \) = savings in annual operating costs.

Example: Eligible capital expenses of the repowering project, including handling equipment, biomass boiler, piping improvements and plant modifications, are equal to $5,300,500. The annual difference in fossil fuel cost versus the cost for renewable biomass is $990,500. Assume these costs and uses are based on a yearly operating cycle, which may include handling, storage and treatment costs. In this example, \( C = 5,300,500 \); \( S = 990,500 \); simple payback = 5.35 years (\( C/S \) = simple payback).

(ii) A maximum of 20 points will be awarded as follows:

(A) If the anticipated simple payback is less than or equal to 4 years, award 20 points.

(B) If the anticipated simple payback is greater than 4 years but less than or equal to 6 years, award 10 points.

(C) If the anticipated simple payback will be greater than 6 years but less than or equal to 10 years, award 5 points.

(D) If the anticipated simple payback will be greater than 10 years, award 0 points.

(2) Percentage of reduction of fossil fuel use. The anticipated percent reduction in the use of fossil fuels will be measured using the same evidence provided by the applicant for measuring cost-effectiveness. However, this set of criteria will measure actual fossil fuel use for the 24-month period prior to submission of the application or for at least 12 months of data supported by engineering and design calculations, and site plans, prepared by the construction engineering firm. All fossil fuel use, for thermal loads as well as for electric use, will be evaluated by using information provided by the Energy Information Agency (EIA). The Agency will determine the percentage reduction of fossil fuel use based on and in cooperation with the applicant’s submission of electric power provider contracts, power agreements, and utility billings in relation to available information from the EIA. A maximum of 35 points will be awarded as follows:

(i) Applicant demonstrates an anticipated annual reduction in fossil fuel use of 100 percent, award 35 points.

(ii) Applicant demonstrates an anticipated annual reduction in fossil fuel use of at least 80 percent but less than 100 percent, award 25 points.

(iii) Applicant demonstrates an anticipated annual reduction in fossil fuel use of at least 60 percent but less than 80 percent, award 15 points.
§4288.22 Ranking of applications.

All scored applications will be ranked by the Agency as soon after the application deadline as possible. The Agency will consider the score an application has received compared to the proposed project. The Design and Engineering documents shall demonstrate that they meet the intended purpose, ensure public safety, and comply with all applicable laws, regulations, agreements, permits, codes, and standards. Award 0–4 points.

(iv) Project development schedule. The applicant must provide a detailed plan for project development including a proposed schedule of activities, a description of each significant task, its beginning and end, and its relationship to the time needed to initiate and carry the project through to successful completion. This description must address the applicant’s project development cash flow requirements. Award 0–3 points.

(v) Equipment procurement. The applicant must describe the equipment needed, and the availability of the equipment needed, to complete installation and activation of the new system. The description supports that the required equipment is available, and can be procured and delivered within the proposed project development schedule. Award 0–3 points.

(vi) Equipment installation. The applicant must provide a satisfactory description of the plan for site development and system installation that reflects the soundness of the project plan. Award 0–3 points.

(vii) Operations and maintenance. The applicant must describe the operations and maintenance requirements of the system necessary for the system to operate as designed and provide the savings and efficiencies as described. The description and requirements noted must be supportable by the technical review. Award 0–3 points.

(5) Liquid transportation fuels. If the biorefinery primarily produces liquid transportation fuels, award 10 points.

(6) Rural area. If the biorefinery is located in a Rural Area, award 5 points.

§4288.22 Ranking of applications.

All scored applications will be ranked by the Agency as soon after the application deadline as possible. The Agency will consider the score an application has received compared to the
scores of other applications in the priority list, with higher scoring applications receiving first consideration for payments.

(a) Selection of applications for payments. Using the application scoring criteria point values specified in §4288.21 of this subpart, the Agency will select applications for payments.

(b) Availability of funds. As applications are funded, if insufficient funds remain to pay the next highest scoring application, the Agency may elect to pay a lower scoring application. Before this occurs, the Agency will provide the applicant of the higher scoring application the opportunity to reduce the amount of its payment request to the amount of funds available. If the applicant agrees to lower its payment request, it must certify that the purposes of the project can be met, and the Agency must determine the project is feasible at the lower amount.

§4288.23 Notifications.

(a) Successful applicants. Successful applicants will receive an award letter notifying them of the award, including the terms and conditions, and Form RD 4288–5. Each funded project is unique, and, therefore, conditions of Form RD 4288–5 may vary among projects. Successful applicants must execute and return the Form RD 4288–5, accompanied by any additional items identified in the award letter.

(b) Unsuccessful applicants. Unsuccessful applicants will receive a letter notifying them of their application score and ranking and the score necessary to qualify for payments.

§4288.24 Program payment provisions.

The procedure the Agency will use to make payments to eligible biorefineries is specified in paragraphs (a) through (e) of this section.

(a) Payment applications. The Agency shall make payments based on the biorefinery’s expenditures on eligible project costs. To request payments under this program during a fiscal year, an eligible biorefinery must:

(1) Submit an original, validly signed and completed SF 271 to the Agency not more frequently than once a month with the following supporting documentation:

(i) Evidence of expenditure of funds on eligible project costs which shall include paid third party invoices, receipts, bills of sale, and/or payroll records. Such records must be adequate to identify that funds to be reimbursed were spent on eligible project costs; and

(ii) Evidence that construction of the repowering project is in compliance with the project development schedule.

(2) Certify that the request is accurate.

(3) Furnish the Agency such certifications as required in Form RD 4288–4, Part C, and access to records that verify compliance with program provisions.

(b) Clarifying information. After payment applications are submitted, eligible biorefineries may be required to submit additional supporting clarification if their original submittal is not sufficient to verify eligibility for payment.

(c) Notification. The Agency will notify the biorefinery, in writing, whenever the Agency determines that a payment request is ineligible and why the request was determined ineligible.

(d) Refunds and interest payments. An eligible biorefinery that has received a payment under this program may be required to refund such payment as specified in paragraphs (d)(1) through (d)(5) of this section.

(1) An eligible biorefinery receiving payment under this program will become ineligible for payments if the Agency determines the biorefinery has:

(i) Made any material fraudulent representation;

(ii) Misrepresented any material fact affecting a program determination; or

(iii) Upon completion of the repowering project, failed to reduce its fossil fuel consumption, produce energy from renewable biomass or otherwise operate as described in its Agency approved application.

(2) All payments made to a biorefinery determined by the Agency to be ineligible must be refunded to the Agency with interest and other such sums as may become due, including, but not limited to, any interest, penalties, and administrative costs, as determined appropriate under 31 CFR 901.9.
§ 4288.25 Succession and control of facilities and production.

Any party obtaining a biorefinery that is participating in this program must request permission to participate in this program as a successor. The Agency may grant such request if it is determined that, the party is eligible, and permitting such succession would serve the purposes of the program. If appropriate, the Agency will require the consent of the previous party to such succession. Also, the Agency may terminate payments and demand full refund of payments made if a party loses control of a biorefinery whose production of heat or power from renewable biomass is the basis of a program payment, or otherwise fails to retain the ability to assure that all program obligations and requirements will be met.

§ 4288.26 Fiscal Year 2009 and Fiscal Year 2010 applications.

Any entity that submitted an application for payment to the Agency under this program prior to March 14, 2011 will have their payments made and serviced in accordance with the provisions specified in this subpart.

§§ 4288.27–4288.100 [Reserved]

Subpart B—Advanced Biofuel Payment Program General Provisions

AUTHORITY: 5 U.S.C. 301.

SOURCE: 76 FR 7967, Feb. 11, 2011, unless otherwise noted.

§ 4288.101 Purpose and scope.

(a) Purpose. The purpose of this subpart is to support and ensure an expanding production of advanced biofuels by providing payments to eligible advanced biofuel producers.

(b) Scope. This subpart sets forth, subject to the availability of funds as provided herein, or as may be limited by law, the terms and conditions an advanced biofuel producer must meet to obtain payments under this Program from the United States Department of Agriculture for eligible advanced biofuel production. Additional terms and conditions may be set forth in the Program contract and payment agreement prescribed by the Agency.

§ 4288.102 Definitions.

The definitions set forth in this section are applicable for all purposes of program administration under this subpart.

Advanced biofuel. A fuel that is derived from renewable biomass, other than corn kernel starch, to include:

1. Biofuel derived from cellulose, hemicellulose, or lignin;
2. Biofuel derived from sugar and starch (other than ethanol derived from corn kernel starch);
3. Biofuel derived from waste material, including crop residue, other vegetative waste material, animal waste, food waste, and yard waste;
(4) Diesel-equivalent fuel derived from renewable biomass, including vegetable oil and animal fat;
(5) Biogas (including landfill gas and sewage waste treatment gas) produced through the conversion of organic matter from renewable biomass;
(6) Butanol or other alcohols produced through the conversion of organic matter from renewable biomass; or
(7) Other fuel derived from cellulosic biomass.

Advanced biofuel producer. An individual, corporation, company, foundation, association, labor organization, firm, partnership, society, joint stock company, group of organizations, or non-profit entity that produces and sells an advanced biofuel. An entity that blends or otherwise combines advanced biofuels into a blended biofuel is not considered an advanced biofuel producer under this Program.

Agency. The USDA Rural Development, Rural Business-Cooperative Service or its successor organization.

Alcohol. Anhydrous ethyl alcohol manufactured in the United States and its territories and sold either:
(1) For fuel use, rendered unfit for beverage use, produced at a biofuel facility and in a manner approved by the Bureau of Alcohol, Tobacco, Firearms, and Explosives for the production of alcohol for fuel; or
(2) As denatured alcohol used by blenders and refiners and rendered unfit for beverage use.

Alcohol producer. An advanced biofuel producer authorized by ATF to produce alcohol.

ATF. The Bureau of Alcohol, Tobacco, Firearms, and Explosives of the United States Department of Justice.

Biodiesel. A mono alkyl ester, manufactured in the United States and its territories, that meets the requirements of the appropriate ASTM International standard.

Biofuel. Fuel derived from renewable biomass.

Biofuel facility. A facility (including equipment and processes) that converts renewable biomass into biofuels and biobased products and may produce electricity.

Blender. A blender is a processor of fuels who combines two or more fuels, one of which must be an advanced biofuel, for distribution and sale. Producers who blend one or more of their own fuels are not blenders under this definition.

Certificate of analysis. A document approved by the Agency that certifies the quality and purity of the advanced biofuel being produced. The document must be from a qualified, independent third party.

Contract. Form RD 4288–2, “Advanced Biofuel Payment Program Contract,” signed by the eligible advanced biofuel producer and the Agency, that defines the terms and conditions for participating in and receiving payment under this Program.

Eligible advanced biofuel producer. A producer of advanced biofuels that meets all requirements of §4288.110 of this subpart.

Eligible renewable biomass. Renewable biomass, as defined in this section, excluding corn kernel starch.

Eligible renewable energy content. That portion of an advanced biofuel’s energy content derived from eligible renewable biomass feedstock. The energy content from any portion of the biofuel, whether from, for example, blending with another fuel or a denaturant, that is derived from a non-eligible renewable biomass feedstock (e.g., corn kernel starch) is not eligible for payment under this Program.

Enrollment application. Form RD 4288–1, “Advanced Biofuel Payment Program Annual Application,” which is submitted by advanced biofuel producers for participation in this Program.

Ethanol. Anhydrous ethyl alcohol manufactured in the United States and its territories and sold either:
(1) For fuel use, and which has been rendered unfit for beverage use and produced at an advanced biofuel facility approved by the ATF for the production of ethanol for fuel, or
(2) As denatured ethanol used by blenders and energy refiners, which has been rendered unfit for beverage use.

Ethanol producer. An advanced biofuel producer authorized by ATF to produce ethanol.
Fiscal Year. A 12-month period beginning each October 1 and ending September 30 of the following calendar year.

Flared gas. The burning of unwanted gas through a pipe (also called a flare). Flaring is a means of disposal used when the operator cannot transport the gas to market or convert to electricity and cannot use the gas for any other purpose.

Forest biomass. Any plant or tree material produced by forest growth, such as trees, wood, brush, thinning, chips, and slash.

Incremental production. The quantity of eligible advanced biofuel produced at an advanced biofuel biorefinery in the fiscal year for which payment is sought that exceeds the quantity of advanced biofuel produced at the biorefinery over the prior fiscal year.

Larger producer. An eligible advanced biofuel producer with a refining capacity as determined for the prior fiscal year, based on all of the advanced biofuel facilities in which the producer has 50 percent or more ownership, exceeding:

(1) 150,000,000 gallons of liquid advanced biofuel per year; or
(2) 15,900,000 MMBTU of biogas and solid advanced biofuel per year.

Payment application. Form RD 4288-3, “Advanced Biofuel Payment Program—Payment Request,” which is submitted by an eligible advanced producer to the Agency in order to receive payment under this Program.

Quarter. The Federal fiscal time period for any fiscal year as follows:

(1) 1st Quarter: October 1 through December 31;
(2) 2nd Quarter: January 1 through March 31;
(3) 3rd Quarter: April 1 through June 30; and
(4) 4th Quarter: July 1 through September 30.

Renewable biomass.

(1) Materials, pre-commercial thinnings, or invasive species from National Forest System land and public lands (as defined in section 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702)) that:

(ii) Would not otherwise be used for higher-value products; and
(iii) Are harvested in accordance with applicable law and land management plans and the requirements for old-growth maintenance, restoration, and management direction of paragraphs (e)(2), (e)(3), and (e)(4) and large-tree retention of paragraph (f) of section 102 of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6512); or
(2) Any organic matter that is available on a renewable or recurring basis from non-Federal land or land belonging to an Indian or Indian Tribe that is held in trust by the United States or subject to a restriction against alienation imposed by the United States, including:

(i) Renewable plant material, including feed grains; other agricultural commodities; other plants and trees; and algae; and
(ii) Waste material, including crop residue; other vegetative waste material (including wood waste and wood residues); animal waste and byproducts (including fats, oils, greases, and manure); and food waste and yard waste.

Sign-up period. The time period during which the Agency will accept enrollment applications.

Smaller producer. An eligible advanced biofuel producer with a refining capacity as determined for the prior fiscal year, based on all of the advanced biofuel facilities in which the producer has 50 percent or more ownership, equal to or less than:

(1) 150,000,000 gallons of liquid advanced biofuel per year; or
(2) 15,900,000 MMBTU of biogas and solid advanced biofuel per year.

State. Any of the 50 States of the United States, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands.

USDA. The United States Department of Agriculture.
§ 4288.103 Review or appeal rights.
A person may seek a review of an Agency decision or appeal to the National Appeals Division in accordance with 7 CFR part 11 of this title.

§ 4288.104 Compliance with other laws and regulations.
(a) Advanced biofuel producers must comply with other applicable Federal, State, and local laws, including, but not limited to, the Equal Employment Opportunity Act, Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, The Age Discrimination Act of 1975, the Americans with Disabilities Act of 1990, and 7 CFR part 1901, subpart E. This includes collection and maintenance of race, sex, and national origin data of the recipient’s employee.

(b) Producers must comply with equal opportunity and nondiscriminatory requirements in accordance with 7 CFR 15d. Rural Development will not discriminate against an applicant on the bases of race, color, religion, national origin, sex, sexual orientation, marital status, familial status, disability, or age (provided that the applicant has the capacity to contract); to the fact that all or part of the applicant’s income derives from public assistance program; or to the fact that the applicant has in good faith exercised any right under the Consumer Credit Protection Act.

§ 4288.105 Oversight and monitoring.
(a) Verification. The Agency reserves the right to verify all payment applications and subsequent payments made under this subpart, as frequently as necessary, to ensure the integrity of the Program. The Agency will conduct site visits as necessary.

(1) Production and feedstock verification. The Agency will review producer records to verify the type and amount of biofuel produced and the type and amount of feedstocks used.

(2) Blending verification. The Agency will review the producer’s certificates of analysis and feedstock records to verify the portion of the advanced biofuel eligible for payment.

(3) Certificate of Analysis. The Agency will review the producer records for quarterly payments to ensure that each certificate of analysis has been issued by a qualified, independent third party, which may include the blender only if the blender is not associated with the facility.

(b) Records. For the purpose of verifying compliance with the requirements of this subpart, each eligible advanced biofuel producer shall make available at one place at a reasonable time for examination by representatives of USDA, all books, papers, records, contracts, scale tickets, settlement sheets, invoices, written price quotations, and other documents related to the Program that is within the control of such advanced biofuel producer for not less than 3 years from each Program payment date.

§ 4288.106 Forms, regulations, and instructions.
Copies of all forms, regulations, instructions, and other materials related to this Program may be obtained from the USDA Rural Development State Office, Rural Energy Coordinator and the USDA Rural Development Web site at http://www.rurdev.usda.gov.

§ 4288.107 Exception authority.
The Administrator of the Agency (“Administrator”) may, with the concurrence of the Secretary of Agriculture, make an exception, on a case-by-case basis, to any requirement or provision of this subpart that is not inconsistent with any authorizing statute or applicable law, if the Administrator determines that application of the requirement or provision would adversely affect the Federal government’s interest.

§§ 4288.108–4288.109 [Reserved]

ELIGIBILITY PROVISIONS

§ 4288.110 Applicant eligibility.
Sections 4288.110 through 4288.119 present the requirements associated with advanced biofuel producer eligibility, biofuel eligibility, eligibility notifications, and payment record requirements. To be eligible for this Program, the applicant must meet the requirements specified in paragraph (a) of this section and must provide additional information as may be requested.
by the Agency under paragraph (b) of this section. Public bodies and educational institutions are not eligible for this Program.

(a) Eligible producer. The applicant must be an advanced biofuel producer, as defined in this subpart.

(b) Eligibility determination. The Agency will determine an applicant’s eligibility for participation in this Program. If an applicant’s original submittal is not sufficient to verify an applicant’s eligibility, the Agency will notify the applicant, in writing, as soon as practicable after receipt of the application. This notification will identify, at a minimum, the additional information being requested to enable the Agency to determine the applicant’s eligibility and a timeframe in which to supply the information.

(1) If the applicant provides the requested information to the Agency within the specified timeframe, the Agency will determine the applicant’s eligibility for the upcoming fiscal year.

(2) If the applicant does not provide the requested information to the Agency within the specified timeframe, the Agency will not consider the applicant any further for participation in the upcoming fiscal year. Such applicants may elect to enroll during the next sign-up period.

(c) Ineligibility determination. An otherwise eligible producer will be determined to be ineligible if the producer:

(1) Refuses to allow the Agency to verify any information provided by the advanced biofuel producer under this subpart, including information for determining applicant eligibility, advanced biofuel eligibility, and application payments;

(2) Fails to meet any of the conditions set out in this subpart, in the contract, or in other Program documents; or

(3) Fails to comply with all applicable Federal, State, or local laws.

§ 4288.111 Biofuel eligibility.

To be eligible for this Program, a biofuel must meet the requirements specified in paragraph (a) of this section and the biofuel’s producer must provide additional information as may be requested by the Agency under paragraph (b) of this section. Notwithstanding the provisions of paragraph (a) of this section, for the purposes of this subpart, flared gases are not eligible.

(a) Eligible advanced biofuel. For an advanced biofuel to be eligible, each of the following conditions must be met, as applicable:

(1) The advanced biofuel must meet the definition of advanced biofuel and be produced in a State;

(2) The advanced biofuel must be a solid, liquid, or gaseous advanced biofuel;

(3) The advanced biofuel must be a final product; and

(4) The advanced biofuel must be sold as an advanced biofuel through an arm’s length transaction to a third party.

(b) Eligibility determination. The Agency will determine a biofuel’s eligibility for payment under this Program. If an applicant’s original submittal is not sufficient to verify a biofuel’s eligibility, the Agency will notify the applicant, in writing, as soon as practicable after receipt of the application. This notification will identify, at a minimum, the additional information being requested to enable the Agency to determine the biofuel’s eligibility and a timeframe in which to supply the information.

(1) If the applicant provides the requested information to the Agency within the specified timeframe, the Agency will determine the biofuel’s eligibility for the upcoming fiscal year.

(2) If the applicant does not provide the requested information to the Agency within the specified timeframe, the biofuel will not be eligible for payment under this Program in the upcoming fiscal year. Applicants may elect to include such biofuels in the application form submitted during the next sign-up period.

§ 4288.112 Eligibility notifications.

(a) Applicant eligibility. If an applicant is determined by the Agency to be eligible for participation, the Agency will notify the applicant, in writing, as soon as practicable after receipt of the application and will assign the applicant a contract number.

(b) Ineligibility notifications. If an applicant or a biofuel is determined by
the Agency to be ineligible, the Agency will notify the applicant, in writing, as soon as practicable after receipt of the application, as to the reason(s) the applicant or biofuel was determined to be ineligible. Such applicant will have appeal rights as specified in this subpart.

(c) Subsequent ineligibility determinations. If at any time a producer or an advanced biofuel is determined to be ineligible, the Agency will notify the producer in writing of its determination.

§ 4288.113 Payment record requirements.

To be eligible for Program payments, an advanced biofuel producer must maintain records for all relevant fiscal years and fiscal year quarters for each advanced biofuel facility indicating:

(a) The type of eligible renewable biomass used in the production of advanced biofuel;
(b) The quantity of advanced biofuel produced from eligible renewable biomass at each advanced biofuel facility; and
(c) The quantity of eligible renewable biomass used at each advanced biofuel facility to produce the advanced biofuel.

(d) All other records required to establish Program eligibility and compliance.

§§ 4288.114–4288.119 [Reserved]

§ 4288.120 Enrollment.

In order to participate in the Program, a producer of advanced biofuels must be approved by the Agency and enter into a contract with the Agency. The process for enrolling in the Program is presented in this section. Advanced biofuel producers who expect to produce eligible advanced biofuels at any time during a fiscal year must enroll in the Program as described in this section.

(a) Enrollment. To enroll in the Program, an advanced biofuel producer must submit to the Agency a completed enrollment application during the applicable sign-up period, as specified in paragraph (b) of this section. An original, signed hard copy of the enrollment application must be submitted as specified in the annual Federal Register notice for this program. All applicants, except those that are individuals, are required to have a Dun and Bradstreet Universal Numbering System (DUNS) number, which can be obtained online at http://fedgov.dnb.com/webform.

(b) Eligible advanced biofuel producers must submit enrollment applications during each sign-up period in order to continue participating in this Program. If a participating producer fails to submit the enrollment application during a fiscal year’s applicable sign-up period, the producer’s contract will be terminated and the producer will be ineligible to receive payments for that fiscal year. Such a producer must reapply, and sign a new contract, to participate in the Program for future fiscal years.

(c) Eligible advanced biofuel producers may submit an enrollment application during a fiscal year’s sign-up period even if the advanced biofuel facility is not currently producing, but is scheduled to start producing advanced biofuel in that fiscal year.

(d) The producer must furnish the Agency all required certifications before acceptance into the Program, and furnish access to the advanced biofuel producer’s records required by the Agency to verify compliance with Program provisions. The required certifications depend on the type of biofuel produced. Certifications specified in paragraphs (a)(3)(i) through (a)(3)(iv) of this section are to be completed and provided by an accredited independent third party.

(i) Alcohol. For alcohol producers with authority from ATF to produce alcohol, copies of either

(A) The Alcohol Fuel Producers Permit (TTB F 5110.74) or

(B) The registration of Distilled Spirits Plant (TTB F 5110.41) and Operating Permit (TTB F 5110.25).

(ii) Hydrous ethanol. For hydrous ethanol that is upgraded by another distiller to anhydrous ethyl alcohol, the increased ethanol production is eligible for payment one time only. If the advanced biofuel producer entering into this agreement is:

(A) The hydrous ethanol producer, then the advanced biofuel producer
shall include with the contract an affidavit, acceptable to the Agency, from
the distiller stating that the:

(1) Applicable hydrous ethanol produced is distilled and denatured for
fuel use according to ATF requirements, and

(2) Distiller will not include the applicable ethanol in any payment re-
quests that the distiller may make under this Program.

(B) The distiller that upgrades hy-
drous ethanol to anhydrous ethyl alco-
hol, then the advanced biofuel producer
shall include with the contract an affi-
davit, acceptable to the Agency, from
the hydrous ethanol producer stating
that the hydrous ethanol producer will
not include the applicable ethanol in
any payment requests that may be
made under this Program.

(iii) Biodiesel, biomass-based diesel, and liquid hydrocarbons derived from biomass.
For these fuels, the advanced biofuel producer shall certify that the pro-
ducer, the advanced biofuel facility,
and the biofuel meet the definitions of
these terms as defined in §4288.102, the
applicable registration requirements
under the Energy Independence and Se-
curity Act and the Clean Air Act and
under the applicable regulations of the
U.S. Environmental Protection Agency
and Internal Revenue Service, and the
quality requirements per applicable
ASTM International standards (e.g.,
ASTM D6751) and commercially accept-
able quality standards of the local mar-
ket. If a Renewable Identification
Number has been established, the ad-
vanced biofuel producer shall also pro-
vide documentation of the most recent
Renewable Identification Number for a
typical gallon of each type of advanced
biofuel produced.

(iv) Gaseous advanced biofuel. For gase-
ous advanced biofuel producers, cer-
tification that the biofuel meets com-
mercially acceptable pipeline quality
standards of the local market; that the
flow meters used to determine the
quantity of advanced biofuel produced
are industry standard and properly
calibrated by a third-party profes-
sional; and that the readings have been
taken by a qualified individual.

(v) Woody biomass feedstock. If the
feedstock is from National Forest sys-
tem land or public lands, documenta-
tion must be provided that it cannot be
used as a higher value wood-based
product.

(4) Supporting documentation. Each ad-
vanced biofuel producer participating
in this program for the first time must
submit documentation to support the
actual production and capacity re-
ported in the enrollment application.

(5) Additional forms. Applicants must
submit the forms specified in this para-
graph with the enrollment application
when applying for participation under
this subpart and as needed when re-en-
rolling in the program.

(i) RD Instruction 1940-Q, Exhibit A-
1, “Certification for Contracts, Grants
and Loans.”

(ii) SF–LLL, “Disclosure of Lobbying
Activities.”

(iii) Form RD 400–4, “Assurance
Agreement.”

(b) Sign-up period. The sign-up period
is October 1 to October 31 of the fiscal
year for which payment is sought, un-
less otherwise announced by the Agen-
cy in a FEDERAL REGISTER notice.

§ 4288.121 Contract.

Advanced biofuel producers deter-
mined to be eligible to receive pay-
ments must then enter into a contract
with the Agency in order to participate
in this Program.

(a) Contract. The Agency will forward
the contract to the advanced biofuel
producer. The advanced biofuel pro-
ducer must agree to the terms and con-
ditions of the contract, sign, date, and
return it to the Agency within the
time provided by the Agency.

(b) Length of contract. Once signed, a
contract will remain in effect until ter-
minated as specified in paragraph (d) of
this section.

(c) Contract review. All contracts will
be reviewed at least annually to ensure
compliance with the contract and en-
sure the integrity of the program.

(d) Contract termination. Contracts
under this Program will be terminated
in writing by the Agency. Contracts
may be terminated under any one of
the following conditions:

(1) At the mutual agreement of the
parties;

(2) In accordance with applicable
Program notices and regulations;
(3) The advanced biofuel producer withdraws from the Program and so notifies the Agency, in writing;

(4) The advanced biofuel producer fails to submit the enrollment application during a sign-up period;

(5) The Program is discontinued or not funded;

(6) All of a participating advanced biofuel producer’s advanced biofuel facilities no longer exist or no longer produce any eligible advanced biofuel;

(7) The Agency determines that the advanced biofuel producer is ineligible for participation.

§§ 4288.122–4288.129 [Reserved]

PAYMENT PROVISIONS

§ 4288.130 Payment applications.

Sections 4288.130 through 4288.189 identify the process and procedures the Agency will use to make payments to eligible advanced biofuel producers. In order to receive payments under this Program, eligible advanced biofuel producers with valid contracts must submit a payment application, as required under paragraph (a) of this section. The Agency will review the payment application and, if necessary, may request additional information, as specified under paragraph (b) of this section.

(a) Applying for payment. To apply for payments under this subpart for a fiscal year, an eligible advanced biofuel producer must:

(1) After a quarter has been completed, submit a payment application covering the quarter;

(2) Certify that the request is accurate;

(3) Furnish the Agency such certification, and access to such records, as the Agency considers necessary to verify compliance with Program provisions; and

(4) Provide documentation as requested by the Agency of the net production of advanced biofuel at all advanced biofuel facilities during the relevant quarter.

(b) Review of payment applications. The Agency will review each payment application it receives to determine if it is eligible for payment.

(c) Payment application eligibility. The Agency will notify the advanced biofuel producer, in writing, as soon as practicable after the payment application, whenever the Agency determines that a payment application, or any portion thereof, is ineligible for payment and the basis for the Agency’s determination of ineligibility.

(d) Submittal information. Eligible advanced biofuel producers must submit payment applications as specified in the annual FEDERAL REGISTER notice for this program no later than 4:30 p.m. local time on the last day of the calendar month following the quarter for which payment is being requested. Neither complete nor incomplete payment applications received after this date and time will be considered, regardless of the postmark on the application.

(1) Any payment application form that is received by the Agency after October 31 of the calendar year for the preceding fiscal year is ineligible for payment.

(2) If the actual deadline falls on a weekend or a Federally-observed holiday, the deadline is the next Federal business day.

§ 4288.131 Payment provisions.

Payments to advanced biofuel producers for eligible advanced biofuel
production will be determined in accordance with the provisions of this section.

(a) Types of payments. The Agency will make available each fiscal year an actual production payment and an incremental production payment to participating producers, as specified in paragraphs (a)(1) and (a)(2), respectively, of this section. As provided in paragraph (a)(2) of this section, not all participating producers will receive an incremental production payment.

(1) Actual production. Participating producers will be paid on a quarterly basis for the actual quantity of eligible advanced biofuel produced during the quarter. Payment for actual production will be determined according to paragraph (c) of this section.

(2) Incremental production. For each participating advanced biofuel facility, the Agency will make an end-of-the-year payment for that facility’s incremental production, if any, during the fiscal year provided the advanced biofuel facility has fewer than 20 days (excluding weekends) of non-production of eligible advanced biofuels during the previous fiscal year. Payment for incremental production will be determined according to paragraph (d) of this section.

(b) Amount of payment funds available. Based on the amount of funds made available to this program each fiscal year, the Agency will allocate available program funds according to paragraphs (b)(1) and (b)(2) of this section.

(1) Actual versus incremental production. The Agency will determine the amount of funds for actual production payments and for incremental production payments as follows:

(i) For fiscal year 2010, 80 percent of the funds will be allocated for actual production payments and 20 percent of the funds will be allocated for incremental production payments.

(ii) For fiscal year 2011, 70 percent of the funds will be allocated for actual production payments and 30 percent of the funds will be allocated for incremental production payments.

(iii) For fiscal year 2012, 60 percent of the funds will be allocated for actual production payments and 40 percent of the funds will be allocated for incremental production payments.

(iv) For fiscal year 2013 and beyond, 50 percent of the funds will be allocated for actual production payments and 50 percent of the funds will be allocated for incremental production payments.

(2) Quarterly allocations. For each fiscal year, the Agency will allocate in each quarter one-fourth of the funds allocated to actual production for the entire fiscal year.

(c) Determination of payment for actual production. Each quarter, the Agency will establish an actual production payment rate using the procedures specified in paragraphs (c)(1) through (c)(5) of this section. This rate will be applied to the actual quantity of eligible advanced biofuel produced to determine payments to eligible advanced biofuel producers, as described in paragraph (c)(6) of this section.

(1) Based on the information provided in each payment application, the Agency will determine the eligible advanced biofuel production. If the Agency determines that the amount of advanced biofuel production reported in a payment application is not supported by the documentation submitted with the payment application, the Agency may reduce the production reported in the payment application.

(2) For each producer, the Agency will convert the production determined to be eligible under paragraph (c)(1) of this section into British Thermal Unit (BTU) equivalent using factors published by the Energy Information Administration (or successor organization). If the Energy Information Administration does not publish such conversion factor for a specific type of advanced biofuel, the Agency will use a conversion factor developed by another appropriate entity. If no such conversion factor exists, the Agency will, in consultation with other Federal agencies, establish and use a conversion formula as appropriate, that it publishes in the Federal Register, until such time as the Energy Information Administration or other appropriate entity publishes a conversion factor for said advanced biofuel. The Agency will then calculate the total eligible BTUs across all eligible applications.

(i) If the advanced biofuel is a liquid or gaseous advanced biofuel produced...
from forest biomass, the BTUs will be discounted 10 percent.

(ii) If the advanced biofuel is a solid advanced biofuel produced from forest biomass, the BTUs will be discounted 85 percent.

(iii) If the advanced biofuel meets an applicable renewable fuel standard, the BTUs will be increased by 10 percent.

(3) For each quarter, the Agency will determine the actual production payment rate ($/BTU) based on paragraphs (b) and (c)(2) of this section. The rate will be calculated such that all of the quarterly funds for actual production will be distributed.

(4) Using the actual production payment rate determined above and the actual production for each type of advanced biofuel produced at an advanced biofuel facility, the Agency will calculate each quarter a payment for each eligible advanced biofuel producer for that quarter.

(d) Determination of payment for incremental production. At the end of each fiscal year, the Agency will establish incremental production payment rate using the procedures specified in paragraphs (d)(1) through (d)(6) of this section. This rate will be applied to the quantity of eligible incremental advanced biofuel produced to determine payments to eligible advanced biofuel producers, as described in paragraph (d)(7) of this section.

(1) For each participating advanced biofuel facility that produced eligible advanced biofuels during the fiscal year prior to the fiscal year for which payment is sought provided the advanced biofuel facility has fewer than 20 days (excluding weekends) of non-production of eligible advanced biofuels during that previous fiscal year, the Agency will determine the quantity of eligible advanced biofuel produced in that prior fiscal year based on information provided by the producer.

(2) Using the information in the payment applications submitted for the fiscal year for which payment is sought, the Agency will determine the actual amount of eligible advanced biofuel produced in the fiscal year for which payment is sought.

(3) Using the results from paragraphs (d)(1) and (d)(2) of this section, the Agency will determine the quantity of advanced biofuel produced in excess of the previous year’s advanced biofuel production.

(4) For each advanced biofuel facility that shows incremental production under paragraph (d)(3) of this section, the Agency will convert the production into British Thermal Unit (BTU) equivalent using factors published by the Energy Information Administration (or successor organization). If the Energy Information Administration does not publish such conversion factor for a specific type of advanced biofuel, the Agency will use a conversion factor developed by another appropriate entity. If no such conversion factor exists, the Agency will establish and use a conversion formula as appropriate, that it publishes in the Federal Register, until such time as the Energy Information Administration or other appropriate entity publishes a conversion factor for said advanced biofuel. The Agency will then calculate the total eligible BTUs across all eligible applications.

(i) If the advanced biofuel is a liquid or gaseous advanced biofuel produced from forest biomass, the BTUs will be discounted 10 percent.

(ii) If the advanced biofuel is a solid advanced biofuel produced from forest biomass, the BTUs will be discounted 85 percent.

(iii) If the advanced biofuel meets an applicable renewable fuel standard, the BTUs will be increased by 10 percent.

(5) The Agency will sum all of the BTUs determined under paragraph (d)(4) of this section.

(6) Using the results from paragraph (d)(5) of this section and the amount of incremental funds available, the Agency will determine the incremental production payment rate ($/BTU). The rate will be calculated such that all of the incremental production funds will be distributed.

(7) Using the incremental production payment rate determined above and the incremental production for each advanced biofuel facility eligible for an incremental production payment, the Agency will calculate an incremental production payment for each eligible advanced biofuel producer.
(e) Other payment provisions. The following provisions apply.

(1) Notwithstanding any other provision, the Agency will provide payments to larger producers of not more than 5 percent of available program funds in any fiscal year. At any time during the year, if the limit on payments to larger producers would be reached, the Agency will pro-rate payments to larger producers based on the BTU content of their eligible advanced biofuel production so as not to exceed the limit.

(2) Notwithstanding any other provision, the Agency will provide payments to solid eligible advanced biofuels produced from forest biomass of not more than 5 percent of available program funds in any fiscal year. At any time during the year, if the limit on payments to such advanced biofuels would be reached, the Agency will pro-rate payments for such advanced biofuels based on the BTU content of the quantity of such advanced biofuels produced so as not to exceed the limit.

(3) Advanced biofuel producers will be paid on the basis of the amount of eligible renewable energy content of the advanced biofuels only if the producer provides documentation sufficient, including a Certificate of Analysis, for the Agency to determine the eligible renewable energy content for which payment is being requested, and quantity produced through such documentation, as but not limited to, records of sale and calibrated flow meter records.

(4) Payment will be made to only one eligible advanced biofuel producer per advanced biofuel facility.

(5) Subject to other provisions of this section, advanced biofuel producers shall be paid any sum due subject to the requirements and refund provisions of this subpart.

(6) Advanced biofuels produced under the situations identified in paragraphs (e)(6)(i) through (e)(6)(iii) of this section are ineligible for incremental production payment, but are still eligible for actual production payment.

(i) Advanced biofuels produced at an advanced biofuel facility that had 20 or more days (excluding weekends) of non-production of eligible advanced biofuels during the fiscal year immediately prior to the fiscal year in which payment is sought.

(ii) Advanced biofuels produced from forest biomass.

(iv) For larger producers only, when all of the funds available to larger producers have been distributed based on actual production.

(7) If an advanced biofuel producer transfers any production capacity for one advanced biofuel facility to another, such transferred production capacity shall be considered production for the advanced biofuel facility to which the production was transferred.

(8) A producer will only be paid for the advanced biofuels identified in the enrollment application submitted during the sign-up period and which are actually produced during the fiscal year. If the producer starts producing a new advanced biofuel or changes the type of advanced biofuel during the fiscal year, the producer will not receive any payments for those new advanced biofuels. However, during each sign-up period, a producer can identify new advanced biofuels and production levels compared to the previous year.

(9) When determining the quantity of eligible advanced biofuel, if an applicant is blending its advanced biofuel using ineligible feedstocks (e.g., fossil gasoline or methanol, corn kernel starch), only the quantity of advanced biofuel being produced from eligible feedstocks will be used in determining the payment rates and for which payments will be made.

§ 4288.132 Payment adjustments.

The Agency will adjust the payments otherwise payable to the advanced biofuel producer if there is a difference between the amount actually produced and the amount determined by the Agency to be eligible for payment.

§ 4288.133 Payment liability.

Any payment, or portion thereof, made under this subpart shall be made without regard to questions of title under State law and without regard to any claim or lien against the advanced
biofuel, or proceeds thereof, in favor of the owner or any other creditor except agencies of the U.S. Government.

§ 4288.134 Refunds and interest payments.

An eligible advanced biofuel producer who receives payments under this subpart may be required to refund such payments as specified in this section. If the Agency suspects fraudulent representation through its site visits and records inspections under § 4288.105(b), it will be referred to the Office of Inspector General for appropriate action.

(a) An eligible advanced biofuel producer receiving payments under this subpart shall become ineligible if the Agency determines the advanced biofuel producer has:

(1) Made any fraudulent representation; or

(2) Misrepresented any material fact affecting a Program determination.

(b) If an Agency determination that a producer is not eligible for participation under this subpart is appealed and overturned, the Agency will make appropriate and applicable payments to the producer from Program funds, to the extent such funds are available, that remain from the fiscal year in which the original adverse Agency decision was made.

(c) All payments made to an entity determined by the Agency to be ineligible shall be refunded to the Agency with interest and other sums due under this section, including, but not limited to, any interest, penalties, and administrative costs as determined appropriate under 31 CFR 901.9.

(d) When a refund is due, it shall be paid promptly. If a refund is not made promptly, the Agency may use all remedies available to it, including Treasury offset under the Debt Collection Improvement Act of 1996, financial judgment against the producer, and referral to the Department of Justice.

§ 4288.135 Unauthorized payments and offsets.

When unauthorized assistance has been made to an advanced biofuel producer under this Program, the Agency reserves the right to collect from the recipient the sum that is determined to be unauthorized. If the recipient fails to pay the Agency the unauthorized assistance plus other sums due under this section, the Agency reserves the right to offset that amount against Program payments.

(a) Unauthorized assistance. The Agency will seek to collect from recipients all unauthorized assistance made under this Program using the procedures specified in paragraphs (a)(1) through (a)(4) of this section.

(i) Notification to the producer. Upon determination that unauthorized assistance has been made to an advanced biofuel producer under this Program, the Agency will send a demand letter to the producer. Unless the Agency modifies the original demand, it will remain in full force and effect. The demand letter will:

(1) Specify the amount of unauthorized assistance, including any accrued interest to be repaid, and the standards for imposing accrued interest;

(2) State the amount of penalties and administrative costs to be paid, the standards for imposing them and the date on which they will begin to accrue;

(3) Provide detailed reason(s) why the assistance was determined to be unauthorized;

(iv) State the amount is immediately due and payable to the Agency;
(v) Describe the rights the producer has for seeking review or appeal of the Agency’s determination pursuant to 7 CFR part 11;

(vi) Describe the Agency’s available remedies regarding enforced collection, including referral of debt delinquent after due process for Federal salary, benefit and tax offset under the Department of Treasury Offset Program; and

(vii) Provide an opportunity for the producer to meet with the Agency and to provide to the Agency facts, figures, written records, or other information that might refute the Agency’s determination.

(A) If the producer meets with the Agency, the producer will be given an opportunity to provide information to refute the Agency’s findings.

(B) When requested by the producer, the Agency may grant additional time for the producer to assemble documentation. Such extension of time for payment will be valid only if the Agency documents the extension in writing and specifies the period in days during which period the payment obligation created by the demand letter (but not the ongoing accrual of interest) will be suspended. Interest and other charges will continue to accrue pursuant to the initial demand letter during any extension period unless the terms of the demand letter are modified in writing by the Agency.

(2) Payment in full. If the producer agrees with the Agency’s determination or will pay the amount in question, the Agency may allow a reasonable period of time (usually not to exceed 90 days) for the producer to arrange for repayment. The amount due will be the unauthorized payments made plus interest accrued beginning on the date of the demand letter at the interest rate stipulated until the date paid unless otherwise agreed, in writing, by the Agency.

(3) Promissory note. If the producer agrees with the Agency’s determination or is willing to pay the amount in question, but cannot repay the unauthorized assistance within a reasonable period of time, the Agency will convert the unauthorized assistance amount to a loan provided all of the conditions specified in paragraphs (a)(3)(i) through (a)(3)(iii) of this section are met. Loans established under this paragraph will be at the Treasury interest rate in effect on the date the financial assistance was provided and that is consistent with the term length of the promissory note. In all cases, the receivable will be amortized per a repayment schedule satisfactory to the Agency that has the producer pay the unauthorized assistance as quickly as possible, but in no event will the amortization period exceed fifteen (15) years. The producer will be required to execute a debt instrument to evidence this receivable, and the best security position practicable in a manner that will adequately protect the Agency’s interest during the repayment period will be taken as security.

(i) The producer did not provide false information;

(ii) It would be highly inequitable to require prompt repayment of the unauthorized assistance; and

(iii) Failure to collect the unauthorized assistance immediately will not adversely affect the Agency’s interests.

(4) Appeals. Appeals resulting from the demand letter prescribed in paragraph (a)(1) of this section will be handled according to the provisions of §4288.103. All appeal provisions will be concluded before proceeding with further actions.

(b) Offsets. Failure to make payment as determined under paragraph (a) of this section will be treated by the Agency as a debt that can be collected by an Administrative offset, unless written agreements to repay such debt as an alternative to administrative offset is agreed to between the Agency and the producer.

(1) Any debtor who wishes to reach a written agreement to repay the debt as an alternative to administrative offset must submit a written proposal for repayment of the debt, which must be received by the Agency within 20 calendar days of the date the notice was delivered to the debtor. In response, the Agency will notify the debtor in writing whether the proposed agreement is acceptable. In exercising its discretion, the Agency will balance the Government’s interest in collecting the debt against fairness to the debtor.
(2) When the Agency receives a debtor's proposal for a repayment agreement, the offset is stayed until the debtor is notified as to whether the initial agreement is acceptable. If a Government payment will be made before the end of the fiscal year and the review is not yet completed, payment will be deferred pending resolution of the review.

§ 4288.136 Remedies.

In addition to the steps available under the provisions of §§ 4288.134 and 4288.135, if the Agency has determined that a producer has misrepresented the information or defrauded the Government, the Agency will take one of the following steps in accordance to 7 CFR part 3017, Government-wide Debarment and Suspension:

(a) Suspend payments on the Contract until the violation has been reconciled;
(b) Terminate the Contract; or
(c) Debarment to participate in any Federal Government program.

§ 4288.137 Succession and loss of control of advanced biofuel facilities and production.

(a) Contract succession. An entity who becomes the eligible advanced biofuel producer for an advanced biofuel facility that is under contract under this subpart must request permission from the Agency to succeed to the Program contract and the Agency may grant such request if it is determined that the entity is an eligible producer and permitting such succession would serve the purposes of the Program. If appropriate, the Agency may require the consent of the previous eligible advanced biofuel producer to such succession.

(b) Loss of control. Payments will be made only for eligible advanced biofuels produced at an advanced biofuel facility owned or controlled by an eligible advanced biofuel producer with a valid contract. If payments are made to an advanced biofuel producer for production at an advanced biofuel facility no longer owned or controlled by said producer or to an otherwise ineligible advanced biofuel producer, the Agency will demand full refund of all such payments.

§§ 4288.138–4288.189 [Reserved]

§ 4288.190 Fiscal Year 2010 applications.

(a) General. This section provides the requirements associated with applying for funds under this subpart for Fiscal Year 2010.

(b) Applicability. The provisions specified in §§ 4288.101 through 4288.137 are applicable to applicants, applications, and awards made for Fiscal Year 2010, except as follows:

(1) Applications for participation in this program must be received by May 6, 2011. Applications received after this date will not be considered by the Agency for Fiscal Year 2010 funding.

(2) Payment applications for Fiscal Year 2010 funding are due by 4:30 p.m. local time May 12, 2011. Any application received after this date and time is ineligible for payment.

(3) Payment applications for Fiscal Year 2010 funding must contain actual production for October 1, 2009 through September 30, 2010.

(4) If an applicant has submitted an application for participation or payment in this program for Fiscal Year 2010 funding prior to March 14, 2011, the applicant must submit new applications in accordance with this subpart for Fiscal Year 2010 funding.

§§ 4288.191–4288.200 [Reserved]

PART 4290—RURAL BUSINESS INVESTMENT COMPANY (“RBIC”) PROGRAM

Subpart A—Introduction to Part 4290

Sec.
4290.10 Description of the Rural Business Investment Company Program.
4290.15 Leveraged and Non-leveraged Rural Business Investment Companies.
4290.20 Legal basis and applicability of this part 4290.
4290.30 Amendments to Act and regulations.
4290.40 How to read this part 4290.
4290.45 Responsibility for implementing this part 4290.
Pt. 4290

Subpart B—Definition of Terms Used in Part 4290

4290.50 Definition of terms.

Subpart C—Qualifications for the RBIC Program

ORGANIZING A RBIC

4290.100 Business form.
4290.110 Qualified management.
4290.120 Plan to invest in Rural Areas.
4290.130 Identified Rural Areas.
4290.140 Approval of initial Management Expenses.
4290.150 Management and ownership diversity requirement.
4290.160 Special rules for Partnership RBICs and LLC RBICs.
4290.165 Obligations of Control Persons.

CAPITALIZING A RBIC

4290.200 Adequate capital for RBICs.
4290.210 Minimum capital requirements for RBICs.
4290.230 Private Capital for RBICs.
4290.240 Limitations on non-cash capital contributions in Private Capital.

Subpart D—Application and Approval Process for RBIC Licensing

4290.300 When and how to apply for a RBIC License.
4290.310 Contents of application.
4290.320 Contents of comprehensive business plan.
4290.330 Grant and guarantee issuance fee.

Subpart E—Evaluation and Selection of RBICs

4290.350 Eligibility and completeness.
4290.360 Initial review of Applicant’s management team’s qualifications.
4290.370 Evaluation criteria.
4290.380 Selection.
4290.390 Licensing as a RBIC.

Subpart F—Changes in Ownership, Structure, or Control

CHANGES IN CONTROL OR OWNERSHIP OF A RBIC

4290.400 Changes in ownership of 10 percent or more of RBIC but no change of Control.
4290.410 Changes in Control of RBIC (through change in ownership or otherwise).
4290.420 Prohibition on exercise of ownership or Control rights in RBIC before approval.
4290.430 Notification of transactions that may change ownership or Control.

7 CFR Ch. XLII (1–1–14 Edition)

4290.440 Standards governing prior approval for a proposed transfer of Control.
4290.450 Notification of pledge of RBIC’s shares.

RESTRICTIONS ON COMMON CONTROL OR OWNERSHIP OF TWO OR MORE RBICs

4290.460 Restrictions on Common Control or ownership of two (or more) RBICs.

CHANGE IN STRUCTURE OF RBIC

4290.470 Prior approval of merger, consolidation, or reorganization of RBIC.
4290.480 Prior approval of changes to RBIC’s business plan.

Subpart G—Managing the Operations of a RBIC

GENERAL REQUIREMENTS

4290.500 Lawful operations under the Act.
4290.502 Representations to the public.
4290.503 RBIC’s adoption of an approved valuation policy.
4290.504 Equipment of USDA or SBA officials.
4290.506 Safeguarding the RBIC’s assets/Internal controls.
4290.507 Violations based on false filings and nonperformance of agreements with the Secretary or SBA.
4290.508 Compliance with non-discrimination laws and regulations applicable to federally-assisted programs.
4290.509 Employment of USDA or SBA officials.

MANAGEMENT AND COMPENSATION

4290.510 Approval of RBIC’s Investment Adviser/Manager.
4290.520 Management Expenses of a RBIC.

CASH MANAGEMENT BY A RBIC

4290.530 Restrictions on investments of idle funds by RBICs.

SECURED BORROWING BY RBICs

4290.550 Prior approval of secured third-party debt of RBICs.

VOLUNTARY DECREASE IN REGULATORY CAPITAL

4290.585 Voluntary decrease in RBIC’s Regulatory Capital.

Subpart H—Recordkeeping, Reporting, and Examination Requirements for RBICs

RECORDKEEPING REQUIREMENTS FOR RBICs

4290.600 General requirement for RBIC to maintain and preserve records.
4290.610 Required certifications for Loans and Investments.
4290.620 Requirement to obtain information from Portfolio Concerns.
REPORTING REQUIREMENTS FOR RBICs
4290.630 Requirement for RBICs to file financial statements and supplementary information with the Secretary.
4290.640 Requirement to file portfolio financing reports with the Secretary.
4290.650 Requirement to report portfolio valuations to the Secretary.
4290.660 Other items required to be filed by RBIC with the Secretary.
4290.680 Reporting changes in RBIC not subject to prior approval.

EXAMINATIONS OF RBICS BY THE SECRETARY FOR REGULATORY COMPLIANCE
4290.690 Examinations.
4290.691 Responsibilities of RBIC during examination.
4290.692 Examination fees.

Subpart I—Financing of Enterprises by RBICs
DETERMINING ELIGIBILITY OF AN ENTERPRISE FOR RBIC FINANCING
4290.700 Requirements concerning types of Enterprises to receive Financing.
4290.720 Enterprises that may be ineligible for Financing.
4290.730 Financings which constitute conflicts of interest.
4290.740 Portfolio diversification (“overline” limitation).
4290.760 How a change in size or activity of a Portfolio Concern affects the RBIC and the Portfolio Concern.

STRUCTURING RBIC FINANCING OF ELIGIBLE ENTERPRISES—TYPES OF FINANCINGS
4290.800 Financings in the form of Equity Securities.
4290.810 Financings in the form of Loans.
4290.815 Financings in the form of Debt Securities.
4290.820 Financings in the form of guarantees.
4290.825 Purchasing securities from an underwriter or other third party.
4290.830 Minimum term of Financing.
4290.835 Exception to minimum term of Financing.
4290.840 Maximum term of Financing.
4290.845 Maximum rate of amortization on Loans and Debt Securities.
4290.850 Restrictions on redemption of Equity Securities.
4290.860 Financing fees and expense reimbursements a RBIC may receive from an Enterprise.
4290.890 Assets acquired in liquidation of Portfolio securities.

LIMITATIONS ON DISPOSITION OF ASSETS
4290.885 Disposition of assets to RBIC's Associates or to competitors of Portfolio Concerns.
4290.900 Management fees for services provided to an Enterprise by RBIC or its Associate.

Subpart J—Financial Assistance for RBICs (Leverage)
GENERAL INFORMATION ABOUT OBTAINING LEVERAGE
4290.1100 Type of Leverage and application procedures.
4290.1120 General eligibility requirements for Leverage.
4290.1130 Leverage fees payable by RBIC.
4290.1140 RBIC's acceptance of remedies under § 4290.1810.

MAXIMUM AMOUNT OF LEVERAGE FOR WHICH A RBIC IS ELIGIBLE
4290.1150 Maximum amount of Leverage for a RBIC.

CONDITIONAL COMMITMENTS TO RESERVE LEVERAGE FOR A RBIC
4290.1200 Leverage commitment to a RBIC—application procedure, amount, and term.
4290.1220 Requirement for RBIC to file financial statements at the time of request for a draw.
4290.1230 Draw-downs by RBIC under Leverage commitment.
4290.1240 Funding of RBIC's draw request through sale to third party.

DISTRIBUTIONS BY RBICS WITH OUTSTANDING LEVERAGE
4290.1500 Restrictions on distributions to RBIC investors while RBIC has outstanding Leverage.

FUNDS LEVERAGE BY USE OF TRUST CERTIFICATES (“TCS”)
4290.1600 Secretary's authority to issue and guarantee Trust Certificates.
4290.1610 Effect of prepayment or early redemption of Leverage on a Trust Certificate.
4290.1620 Functions of agents, including Central Registration Agent, Selling Agent and Fiscal Agent.
4290.1630 Regulation of Brokers and Dealers and disclosure to purchasers of Leverage or Trust Certificates.
4290.1640 Secretary's access to records of the CRA, Brokers, Dealers and Pool or Trust assemblers.

MISCELLANEOUS
4290.1700 Secretary's transfer of interest in a RBIC's Leverage security.
§ 4290.10 Description of the Rural Business Investment Company Program.

The Rural Business Investment Company ("RBIC") Program is a Developmental Venture Capital program for the purpose of promoting economic development and the creation of wealth and job opportunities in Rural Areas and among individuals living in such Areas. To this end, the Secretary will select and license RBIC Applicants that will agree to address the unmet Equity Capital needs of Smaller Enterprises primarily located in Rural Areas.

§ 4290.15 Leveraged and Non-leveraged Rural Business Investment Companies.

The regulations in this part apply to rural business investment companies (RBICs) that seek leverage and to RBICs that do not seek leverage. The provisions of subparts A through N of this part apply to Leveraged RBICs and, except as indicated or otherwise modified by subpart O of this part, to Non-leveraged RBICs. The provisions in subpart O of this part apply to Non-leveraged RBICs and, in addition, modify certain provisions in subparts A through N of this part as they apply to Non-leveraged RBICs.

(76 FR 80221, Dec. 23, 2011)
§ 4290.20 Legal basis and applicability of this part 4290.

The regulations in this part implement Subtitle H of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 2009cc et seq.) ("Act"). All RBICs must comply with all applicable regulations, accounting guidelines and valuation guidelines for RBICs.

§ 4290.30 Amendments to Act and regulations.

A RBIC is subject to all existing and future provisions of the Act and part 4290 of title 7 of the Code of Federal Regulations.

§ 4290.40 How to read this part 4290.

(a) Center Headings. Center headings are descriptive and are used for convenience only. They have no regulatory effect.

(b) Capitalizing defined terms. Terms defined in § 4290.50 have initial capitalization in this part 4290.

(c) "You." The pronoun "you" as used in this part 4290 means a RBIC unless otherwise noted.

(d) Forms. All references in this part to forms, and instructions for their preparation, are to the current issue of such forms.

§ 4290.45 Responsibility for implementing this part 4290.

The Secretary has delegated to the U.S. Small Business Administration (SBA), pursuant to an agreement under the Economy Act (31 U.S.C. 1535), the authority to implement the RBIC program, including implementing and enforcing the regulations in this part 4290. Therefore, unless specifically stated otherwise, SBA will exercise on behalf of the Secretary all responsibilities and authorities assigned to the Secretary in this part 4290.

Subpart B—Definition of Terms Used in Part 4290

§ 4290.50 Definition of terms.

Act means Subtitle H of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 2009cc et seq.).

Administrator means the Administrator of SBA.

Affiliate or Affiliates has the meaning set forth in title 13 CFR 121.103.

Applicant means any entity submitting an application to be licensed as a RBIC.

Articles mean articles of incorporation or charter and bylaws for a Corporate RBIC, the certificate and limited partnership agreement for a Partnership RBIC, and the operating agreement or other organizational documents for an LLC RBIC.

Assistance or Assisted means Financing of or management services rendered to a Portfolio Concern by or through a RBIC pursuant to the Act and this part.

Associate of a RBIC means any of the following:

(1) An officer, director, employee or agent of a Corporate RBIC;

(2) A Control Person, employee or agent of a Partnership RBIC;

(3) A managing member of an LLC RBIC;

(4) An Investment Adviser/Manager of any RBIC, including any Person who contracts with a Control Person of a RBIC to be the Investment Adviser/Manager of such RBIC; or

(5) Any Person regularly serving a RBIC on retainer in the capacity of attorney at law.

(2) Any Person who owns or controls, or who has entered into an agreement to own or control, directly or indirectly, at least 10 percent of any class of stock of a Corporate RBIC or 10 percent of the membership interests of an LLC RBIC, or a limited partner's interest of at least 10 percent of the partnership capital of a Partnership RBIC. However, neither a limited partner in a Partnership RBIC nor a non-managing member in an LLC RBIC is considered an Associate if such Person is an Entity Institutional Investor whose investment in the Partnership, including commitments, represents no more than 33 percent of the capital of the RBIC and no more than five percent of such Person's net worth.

(3) Any officer, director, partner (other than a limited partner), manager, agent, or employee of any Associate described in paragraph (1) or (2) of this definition.
(4) Any Person that directly or indirectly Controls, or is Controlled by, or is under Common Control with, a RBIC.

(5) Any Person that directly or indirectly Controls, or is Controlled by, or is under Common Control with, any Person described in paragraphs (1) and (2) of this definition.

(6) Any Close Relative of any Person described in paragraphs (1), (2), (4), and (5) of this definition.

(7) Any Secondary Relative of any Person described in paragraphs (1), (2), (4), and (5) of this definition.

(8) Any concern in which—

(i) Any person described in paragraphs (1) through (6) of this definition is an officer; general partner, or managing member; or

(ii) Any such Person(s) singly or collectively Control or own, directly or indirectly, an equity interest of at least 10 percent (excluding interests that such Person(s) own indirectly through ownership interests in the RBIC).

(9) Any concern in which any Person(s) described in paragraph (7) of this definition singly or collectively own (including beneficial ownership) a majority equity interest, or otherwise have Control. As used in this paragraph (8), “collectively” means together with any Person(s) described in paragraphs (1) through (7) of this definition.

(10) For the purposes of this definition, any Associate relationship described in paragraphs (1) through (7) of this definition that exists at any time within six months before or after the date that a RBIC provides Financing, will be considered to exist on the date of the Financing.

Capital Impairment has the meaning set forth in §4290.1830(b).

Central Registration Agent or CRA means one or more agents appointed for the purpose of issuing Trust Certificates (TCs) and performing the functions enumerated in §4290.1620 and performing similar functions for Debentures funded outside the pooling process.

Close Relative of an individual means:

(1) A current or former spouse;

(2) A father, mother, guardian, brother, sister, son, daughter; or

Commitment means a written agreement between a RBIC and an Enterprise that obligates the RBIC to provide Financing (except a guarantee) to that Enterprise in a fixed or determinable sum, by a fixed or determinable future date. In this context the term “agreement” means that there has been agreement on the principal economic terms of the Financing. The agreement may include reasonable conditions precedent to the RBIC’s obligation to fund the Commitment, but these conditions must be outside the RBIC’s control.

Common Control means a condition such that two or more Persons, either through ownership, management, contract, or otherwise, are under the Control of one group or Person. Two or more RBICs are presumed to be under Common Control if they are Affiliates of each other by reason of common ownership or common officers, directors, or general partners; or if they are managed or their investments are significantly directed either by a common independent Investment Advisor/Manager or managerial contractor, or by two or more such advisors or contractors that are Affiliates of each other. This presumption may be rebutted by evidence satisfactory to the Secretary.

Community Development Finance means debt securities or equity-type investments in Rural Areas.

Control means the possession, direct or indirect, of the power to direct or cause, or the power to stop or hinder (also referred to as “negative Control”), the direction of the management and policies of a RBIC or other concern, whether through the ownership of voting securities, by contract, or otherwise.

Control Person means any Person that controls a RBIC, either directly or through an intervening entity. A Control Person includes:

(1) A general partner of a Partnership RBIC;

(2) Any Person serving as a general partner (in the case of a partnership), an officer or director (in the case of a corporation), or a manager (in the case of a limited liability company) of any
entity that controls a RBIC, either directly or through an intervening entity;

(3) Any Person that—
   (i) Controls or owns, directly or through an intervening entity, at least 10 percent of a Partnership RBIC, LLC RBIC, or any entity described in paragraphs (1) or (2) of this definition; and
   (ii) Participates in the investment decisions of a general partner of such Partnership RBIC or of a managing member of such LLC RBIC;

(4) Any Person that controls or owns, directly or through an intervening entity, at least 50 percent of a RBIC or any entity described in paragraphs (1) or (2) of this definition.

Corporate RBIC has the meaning set forth in the definition of RBIC in this section.

Debenture means a debt obligation issued by RBICs pursuant to section 384E of the Act and held or guaranteed by the Secretary. A Debenture may be prepaid at any time without penalty.

Debt Securities means instruments evidencing a loan with an option or any other right to acquire Equity Securities in an Enterprise or its Affiliates, or a loan which by its terms is convertible into an equity position. Consideration must be paid for all options acquired.

Developmental Venture Capital means Equity Capital invested in Rural Business Concerns, with an objective of fostering economic development in Rural Areas.

Distribution means any transfer of cash or non-cash assets to the Secretary, the Secretary’s agent or Trustee, or to partners in a Partnership RBIC, or to shareholders in a Corporate RBIC, or to members in an LLC RBIC. Capitalization of Retained Earnings Available for Distribution constitutes a Distribution to the RBIC’s partners, shareholders, or members.

Enterprise means a Person engaged in a business or commercial activity which charges for the goods and services it provides, whether such Person is operating for profit or is subject to any legal restrictions on the distribution of profits to its owners, members, or suppliers of its equity or quasi-equity capital. An Enterprise includes:

(1) A public, private, or cooperative for-profit or non-profit organization;
(2) A for-profit or nonprofit business controlled by an Indian tribe on a Federal or State reservation or other federally recognized Indian tribal group; or
(3) Any other Person.

Entity General Partner has the meaning set forth in §4290.160.

Entity Managing Member has the meaning set forth in §4290.160.

Equity Capital means Equity Securities or Subordinated Debt With Equity Features.

Equity Securities means stock of any class in a corporation, stock options, warrants, limited partnership interests in a limited partnership, membership interests in a limited liability company, or joint venture interests.

Farm Credit System Institution means an institution defined in section 1.2(a) of the Farm Credit Act of 1971 (12 U.S.C. 2002(a)).

Financing or Financed means outstanding financial assistance provided to a Portfolio Concern by a RBIC, whether through:

(1) Loans, with or without a right to acquire Equity Securities;
(2) Debt Securities;
(3) Equity Securities;
(4) Subordinated Debt With Equity Features;
(5) Guarantees; or
(6) Purchases of securities of an Enterprise through or from an underwriter as permitted by §4290.825.

Guaranty Agreement means the contract entered into by the Secretary which is a guarantee backed by the full faith and credit of the United States Government as to timely payment of principal and interest on Debentures and the Secretary’s rights in connection with such guarantee.

Includible Non-Cash Gains means those non-cash gains (as reported on SBA Form 468 or other USDA-approved form(s)) that are realized in the form of Publicly Traded and Marketable securities or investment grade debt instruments. For purposes of this definition, investment grade debt instruments means those instruments that are rated “BBB” or “Baa”, or better, by Standard & Poor’s Corporation or
Moody’s Investors Service, respectively. Non-rated debt may be considered to be investment grade if a RBIC obtains a written opinion from an investment banking firm acceptable to the Secretary stating that the non-rated debt instrument is equivalent in risk to the issuer’s investment grade debt.

_Institutional Investor_ means Entity Institutional Investor or Individual Institutional Investor, each defined as follows:

(1) **Entity Institutional Investors.** Any of the following entities if the entity has a net worth (exclusive of unfunded commitments from investors) of at least $1 million, or such higher amount as is specified in this paragraph (1). (See also §4290.230(c)(4) for limitations on the amount of an Entity Institutional Investor’s commitment that may be included in Private Capital.)

(i) A State or National bank, Farm Credit System Institution, trust company, savings bank, or savings and loan association, including an investment pool created entirely by such bank or savings association, the deposits of which are insured under the Federal Deposit Insurance Act.

(ii) An insurance company.

(iii) A 1940 Act Investment Company or Business Development Company (each as defined in the Investment Company Act of 1940, as amended (15 U.S.C. 80a–1 et seq.).

(iv) A holding company of any entity described in paragraph (1)(i), (ii) or (iii) of this definition.

(v) An employee benefit or pension plan established for the benefit of employees of the Federal government, any State or political subdivision of a State, or any agency or instrumentality of such government unit.

(vii) A trust, foundation or endowment exempt from Federal income taxation under the Internal Revenue Code of 1986, 26 U.S.C. 1, as amended.

(viii) A corporation, partnership or other entity with a net worth (exclusive of unfunded commitments from investors) of more than $10 million.

(ix) A State, a political subdivision of a State, or an agency or instrumentality of a State or its political subdivision.

(x) An entity whose primary purpose is to manage and invest non-Federal funds on behalf of at least three Institutional Investors described in paragraphs (1)(i) through (ix) of this definition, each of whom must have at least a 10 percent ownership interest in the entity.

(xi) Any other entity that the Secretary determines to be an Institutional Investor.

(2) **Individual Institutional Investor.**

(i) Any of the following individuals if he/she is also a permanent resident of the United States:

(A) An individual who is an Accredited Investor (as defined in the Securities Act of 1933, as amended (15 U.S.C. 77a–77aa)) and whose commitment to the RBIC is backed by a letter of credit from a State or National bank acceptable to the Secretary.

(B) An individual whose personal net worth is at least $2 million and at least ten times the amount of his or her commitment to the RBIC. The individual’s personal net worth must not include the value of any equity in his or her most valuable residence.

(C) An individual whose personal net worth, not including the value of any equity in his or her most valuable residence, is at least $10 million.

(ii) Any individual who is not a permanent resident of the United States but who otherwise satisfies paragraph (2)(i) of this definition provided such individual has irrevocably appointed an agent within the United States for the service of process.

**Investment Adviser/Manager** means any Person who furnishes advice or assistance with respect to operations of a RBIC under a written contract executed in accordance with the provisions of §4290.510.

**Lending Institution** means a concern that is operating under regulations of a state or Federal licensing, supervising, or examining body, or whose shares are publicly traded and listed on a recognized stock exchange or is listed in the Automated Quotation System of the
RBS and RUS, USDA

National Association of Securities Dealers (NASDAQ) and which has assets in excess of $500 million; and which, in either case, holds itself out to the public as engaged in the making of commercial and industrial loans and whose lending operations are not for the purpose of financing its own or an Associate’s sales or business operations.

Leverage means financial assistance provided to a RBIC by the Secretary either through the purchase or guaranty of a RBIC’s Debentures and any other SBA financial assistance evidenced by a security of the RBIC.

Leverageable Capital means Regulatory Capital, excluding unfunded commitments.

Leveraged RBIC means a RBIC that received financial assistance under this part.

LLC RBIC has the meaning set forth in the definition of RBIC in this section.

Loan means a transaction evidenced by a debt instrument with no provision for you to acquire Equity Securities.

Loans and Investments means Portfolio securities, assets acquired in liquidation of Portfolio securities, operating Enterprises acquired, and notes and other securities received, as set forth in the Statement of Financial Position on SBA Form 468 or other USDA-approved form(s).

Management Expenses has the meaning set forth in §4290.520.

1940 Act Company means a RBIC which is registered under the Investment Company Act of 1940.

1980 Act Company means a RBIC which is registered under the Small Business Investment Incentive Act of 1980.

Non-leveraged RBIC means a RBIC that has not received financial assistance under this part.

Operational Assistance means management, marketing, and other technical assistance that assists a Smaller Enterprise with its business development.

Original Issue Price means the price paid by the purchaser for securities at the time of issuance.

Participation Agreement means an agreement between the Secretary and an Applicant licensed as a RBIC pursuant to §4290.390 of this part, that details the RBIC’s operating plan and investment criteria and requires the RBIC to operate pursuant to the Act and this part.

Partnership RBIC has the meaning set forth in the definition of RBIC in this section.

Person means a natural person or legal entity.

Pool means an aggregation of guaranteed Debentures approved by the Secretary.

Portfolio means the securities representing a RBIC’s total outstanding Financings of Enterprises. It does not include idle funds or assets acquired in liquidation of Portfolio securities.

Portfolio Concern means any Enterprise Assisted by a RBIC.

Principal Office means the location where the greatest number of the Enterprise’s employees at any one location perform their work. However, for those Enterprises whose “primary industry” (see 13 CFR 121.107) is service or construction (see 13 CFR 121.201), the determination of principal office excludes the Enterprise’s employees who perform the majority of their work at job-site locations to fulfill specific contract obligations.

Private Capital has the meaning set forth in §4290.230.

Publicly Traded and Marketable means securities that are salable without restriction or that are salable within 12 months pursuant to Rule 144 (17 CFR 230.144) of the Securities Act of 1933, as amended, by the holder thereof, and are of a class which is traded on a regulated stock exchange, or is listed in NASDAQ, or has, at a minimum, at least two market makers as defined in the relevant sections of the Securities Exchange Act of 1934, as amended (15 U.S.C. 77b et seq.), and in all cases the quantity of which can be sold over a reasonable period of time without having an adverse impact upon the price of the stock.
Qualified Non-private Funds means:

(1) Funds directly or indirectly invested in any RBIC or Applicant on or after May 13, 2002 by any Federal agency other than USDA under a provision of law explicitly mandating the inclusion of those funds in the definition of "Private Capital;" and

(2) The aggregate amount of funds invested in any Applicant or RBIC by one or more States, or any political subdivisions, agencies or instrumentalities thereof, including any guarantee extended by such entities.

Regulatory Capital means Private Capital, excluding non-cash assets contributed to a RBIC or an Applicant unless such assets have been converted to cash or have been approved by the Secretary for inclusion in Regulatory Capital. For purposes of this definition, sales of contributed non-cash assets with recourse or borrowings against such assets shall not constitute a conversion to cash.

Relevant Venture Capital Finance means Equity Capital in Rural Business Concerns or benefiting Rural Areas.

Retained Earnings Available for Distribution means Undistributed Net Realized Earnings less any Unrealized Depreciation on Loans and Investments (as reported on SBA Form 468 or other USDA-approved form(s)), and represents the amount that a RBIC may distribute to investors as a profit Distribution, or transfer to Private Capital.

Rural Area means any area of a State not in a city or town that has a population of more than 50,000 inhabitants, according to the latest decennial census of the United States, or in the urbanized area contiguous and adjacent to a city or town that has a population of more than 50,000 inhabitants, and any area that has been determined to be "rural in character" by the Under Secretary for Rural Development, or as otherwise identified in this definition.

(1) An area that is attached to the urbanized area of a city or town with more than 50,000 inhabitants by a contiguous area of urbanized census blocks that is not more than 2 census blocks wide. Applicants from such an area should work with their Rural Development State Office to request a determination of whether their project is located in a rural area under this provision.

(2) For the purposes of this definition, cities and towns are incorporated population centers with definite boundaries, local self government, and legal powers set forth in a charter granted by the State.

(3) For the Commonwealth of Puerto Rico, the island is considered rural and eligible for Business Programs assistance, except for the San Juan Census Designated Place (CDP) and any other CDP with greater than 50,000 inhabitants. CDPs with greater than 50,000 inhabitants, other than the San Juan CDP, may be determined to be eligible if they are "not urban in character."

(4) For the State of Hawaii, all areas within the State are considered rural and eligible for Business Programs assistance, except for the Honolulu CDP within the County of Honolulu.

(5) For the purpose of defining a rural area in the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands, the USDA shall determine what constitutes rural and rural area based on available population data.

(6) The determination that an area is "rural in character" will be made by the Under Secretary of Rural Development. The process to request a determination under this provision is outlined in paragraph (6)(ii) of this definition.

(i) The determination that an area is "rural in character" under this definition will apply to areas that are within:

(A) An urbanized area that has two points on its boundary that are at least 40 miles apart, which is not contiguous or adjacent to a city or town that has a population of greater than 150,000 inhabitants or the urbanized area of such a city or town; or

(B) An urbanized area contiguous and adjacent to a city or town of greater than 50,000 inhabitants that is within one-quarter mile of a rural area.

(ii) Units of local government may petition the Under Secretary of Rural Development for a "rural in character" designation by submitting a petition to both the appropriate Rural Development State Director and the Rural
RBS and RUS, USDA

§ 4290.50

Secondary Relative of an individual means:
(1) A grandparent, grandchild, or any other ancestor or lineal descendent who is not a Close Relative;
(2) An uncle, aunt, nephew, niece, or first cousin; or
(3) A spouse of any person described in paragraph (1) or (2) of this definition.

Secretary means the Secretary of Agriculture or his or her designee.

Small Business Concern means a for-profit Smaller Enterprise that meets the definition of “business concern” in 13 CFR 121.105 and that, together with its Affiliates, meets the small business size standards set forth in 13 CFR 121.201 or 13 CFR 121.301(c) for the industry in which it is primarily engaged on the date the Financing is made (the term “primarily engaged” for purposes of this definition is defined in 13 CFR 121.107).

Small Business Concern Investment means a Financing in the form of Equity Capital in an Enterprise that qualified as both a Smaller Enterprise and a Small Business Concern at the time of the initial Financing.

Small Business Investment Company or SBIC means a Licensee, as that term is defined in 13 CFR 107.50.

Smaller Enterprise means any Rural Business Concern that, together with its Affiliates and by itself—
(1) Meets the size standard established by SBA in 13 CFR 121.201, corresponding to each type of economic activity or industry described in the NAICS Manual for the industry in which it is primarily engaged on the date on which the Financing is made (the term “primarily engaged” for purposes of this definition is defined in 13 CFR 121.107); or
(2) Has—
   (i) A net financial worth of not more than $6,000,000 as of the date on which the Financing is made; and
   (ii) An average net income for the two year period preceding the date on which the Financing is made of not more than $2,000,000, after Federal income taxes (excluding any carryover losses), except that, for purposes of this clause, if the Rural Business Concern is not required by law to pay Federal income taxes at the enterprise level, but
is required to pass income through to the shareholders, partners, beneficiaries, or other equitable owners of the Rural Business Concern, its net income is determined by allowing a deduction in an amount equal to the total of—

(A) If it is not required by law to pay State (and local, if any) income taxes at the enterprise level, the net income (determined without regard to this paragraph (2)(ii)(A)) multiplied by the marginal State income tax rate (or by the combined State and local income tax rates, as applicable) that would have applied if the Rural Business Concern were a corporation; and

(B) The net income (so determined) less any deduction for State (and local) income taxes calculated under paragraph (2)(ii)(A) of this definition multiplied by the marginal Federal income tax rate that would have applied if the Rural Business Concern were a corporation.

Smaller Enterprise Investment means a Financing in the form of Equity Capital in an Enterprise that qualified as a Smaller Enterprise at the time of the initial Financing.

State means each of the 50 states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the U.S. Virgin Islands, American Samoa, the Commonwealth of the Northern Marianas Islands, the Trust Territory of the Pacific Islands, and the Federated States of Micronesia.

Subordinated Debt means a debt of a debtor, common to more than one creditor, that is the subject of an agreement between two groups of creditors (whose claims would otherwise be in parity) setting forth the circumstances under which the claims of one group (senior creditors) shall be satisfied out of the resources of the common debtor that would otherwise be available for the payment of the claims of the other group (junior creditors).

Subordinated Debt With Equity Features means a Subordinated Debt obligation that gives to the junior creditor such additional compensation as warrants, conversion rights, any other interest in the debtor's equity, profits, increased future revenue, or a royalty interest.

Trust means a legal entity created for the purpose of holding guaranteed Debentures and the guaranty agreement related thereto, receiving, holding and making any related payments, and accounting for such payments.

Trust Certificate Rate means a fixed rate determined at the time Debentures are pooled.

Trust Certificates (TCs) means certificates issued by the Secretary, the Secretary's agent or Trustee and representing ownership of all or a fractional part of a Trust or Pool of Debentures.

Trustee means the trustee or trustees of a Trust.

Undistributed Net Realized Earnings means Undistributed Realized Earnings less Non-cash Gains/Income, each as reported on SBA Form 468 or other USDA-approved form(s).

Unrealized Appreciation means the amount by which a RBIC's valuation of each of its Loans and Investments, as determined by its board of directors, general partner(s), or managing member(s) in accordance with the RBIC's valuation policies, exceeds the cost basis thereof.

Unrealized Depreciation means the amount by which a RBIC's valuation of each of its Loans and Investments, as determined by its board of directors, general partner(s), or managing member(s) in accordance with the RBIC's valuation policies, is below the cost basis thereof.

Unrealized Gain (Loss) on Securities Held means the sum of the Unrealized Appreciation and Unrealized Depreciation on all of a RBIC's Loans and Investments, less estimated future income tax expense or estimated realizable future income tax benefit, as appropriate.

Urban Area means an area containing a city (or its equivalent), or any equivalent geographic area determined by the Census Bureau and adopted by the Secretary for purposes of this definition (about which the Secretary will publish a document in the Federal Register from time to time), which had a population of over 150,000 in the last decennial census and the urbanized areas containing or adjacent to that city, both as determined by the Census Bureau for the last decennial census.
Subpart C—Qualifications for the RBIC Program

ORGANIZING A RBIC

§ 4290.100 Business form.

(a) Newly-formed for-profit. An Applicant for a RBIC license must be a newly formed for-profit entity or, subject to § 4290.150, a newly formed for-profit subsidiary of an existing entity. It must be organized under the law of a State. An Applicant may be organized as a corporation ("Corporate RBIC"), a limited partnership ("Partnership RBIC"), or a limited liability company ("LLC RBIC").

(b) Purpose. An Applicant must be organized solely for the purpose of performing the functions and conducting the activities contemplated under the Act: making Developmental Venture Capital investments and providing Operational Assistance to eligible Smaller Enterprises.

(c) Articles. The RBIC's Articles—

(1) Must specify in general terms:

(i) The purposes for which the RBIC is formed;

(ii) The name of the RBIC;

(iii) The Rural Area or Areas in which it will operate;

(iv) The place where the RBIC's headquarters will be located; and

(v) The amount and classes of the RBIC's ownership interests.

(2) May contain any other provisions consistent with the Act that the RBIC may determine is appropriate to adopt to regulate its business and the conduct of its affairs.

(3) Are subject to the Secretary's approval.

(d) Duration—(1) Partnership RBICs. If you are a Partnership RBIC:

(i) You must have a minimum duration of 10 years, or two years following the maturity of your last-maturing Leverage security, whichever is longer. After 10 years, if all Leverage has been repaid or redeemed and all amounts due the Secretary, his or her agent, or Trustee have been paid, the Partnership RBIC may be terminated by a vote of your partners;

(ii) None of your general partner(s) may be removed or replaced by your limited partners without prior written approval of the Secretary;

(iii) Any transferee of, or successor in interest to, your general partner shall have only the rights and liabilities of a limited partner prior to the Secretary's written approval of such transfer or succession; and

(iv) You must incorporate all the provisions in this paragraph (d) in your limited partnership agreement.

(2) LLC RBICs. If you are a LLC RBIC, you must have a minimum duration of 10 years, or two years following the maturity of your last-maturing Leverage security, whichever is longer. After 10 years, if all Leverage has been repaid or redeemed and all amounts due the Secretary, his or her agent, or Trustee have been paid, the LLC RBIC may be terminated by a vote of your members.

(3) Corporate RBICs. If you are a Corporate RBIC, you must have a duration of not less than 30 years unless earlier dissolved by the shareholders, except that the Corporate RBIC must not dissolve until at least two years following the maturity of your last-maturing Leverage security.

§ 4290.110 Qualified management.

An Applicant must show, to the satisfaction of the Secretary, that its current or proposed management team is qualified and has the knowledge, experience, and capability in Community Development Finance or Relevant Venture Capital Finance, necessary for investing in the types of Enterprises contemplated by the Act, regulations in this part, and its business plan. In determining whether an Applicant's current or proposed management team has sufficient qualifications, the Secretary will consider information provided by
the Applicant and third parties concerning the background, capability, education, training and reputation (and any other managerial aspect identified by the USDA in a Federal Register notice) of its general partners, managers, officers, key personnel, and investment committee and governing board members. The Applicant must designate at least one individual as the official responsible for contact with the Secretary.

[76 FR 80222, Dec. 23, 2011]

§ 4290.120 Plan to invest in Rural Areas.
An Applicant must agree that if licensed as a RBIC, it will make Developmental Venture Capital investments in Enterprises that will create wealth and job opportunities in Rural Areas and among individuals living in those areas.

§ 4290.130 Identified Rural Areas.
A RBIC must identify the specific Rural Area or Areas in which it intends to make Developmental Venture Capital investments and provide Operational Assistance under the RBIC program. The scope of the identified areas must be consistent with Applicant’s business plan, especially as the plan relates to the Applicant’s ability to operate actively, soundly, and profitably in such areas.

§ 4290.140 Approval of initial Management Expenses.
A RBIC must have its Management Expenses approved by the Secretary at the time it is licensed. (See §4290.520 for the definition of Management Expenses.)

§ 4290.150 Management and ownership diversity requirement.
(a) Diversity requirement. You must have diversity between management and ownership in order to be licensed as a RBIC and to maintain your license. To establish diversity, you must meet the requirements in paragraphs (b) and (c) of this section.
(b) Percentage ownership requirement. No Person or group of Persons who are Affiliates of one another may own or control, directly or indirectly, more than 70 percent of your Regulatory Capital or your Leverageable Capital.
(c) Non-affiliation requirement. At least 30 percent of your Regulatory Capital and Leverageable Capital must be owned and controlled by Persons unaffiliated with your management and unaffiliated with each other, and whose investments are significant in dollar and percentage terms as determined by the Secretary. Such Persons must not be your Associates (except for their status as your shareholders, limited partners or members) and must not Control, be Controlled by, or be under Common Control with any of your Associates. A single “acceptable” Institutional Investor may be substituted for two or three of the three investors who are otherwise required. The following Institutional Investors are “acceptable” for this purpose:
(1) Entities whose overall activities are regulated and periodically examined by State, Federal or other governmental authorities satisfactory to the Secretary;
(2) Entities listed on the New York Stock Exchange;
(3) Entities that are publicly-traded and that meet both the minimum numerical listing standards and the corporate governance listing standards of the New York Stock Exchange;
(4) Public or private employee pension funds;
(5) Trusts, foundations, or endowments, but only if exempt from Federal income taxation; and
(6) Other Institutional Investors satisfactory to the Secretary.
(d) Voting requirement. The investors relied upon to satisfy the diversity requirement may not delegate their voting rights to any Person who is your Associate, or who Controls, is Controlled by, or is under Common Control with any of your Associates, without prior approval by the Secretary.
(e) Requirement to maintain diversity. You must maintain management-ownership diversity while you are a RBIC. If, at any time, you no longer have the required management-ownership diversity, you must:
(1) Notify the Secretary within 10 days; and
(2) Re-establish diversity within six months after loss of diversity.
§ 4290.160 Special rules for Partnership RBICs and LLC RBICs.

(a) Entity General Partner or Entity Managing Member. (1) A general partner of a Partnership RBIC which is a corporation, limited liability company or partnership (an “Entity General Partner”), or a managing member of an LLC RBIC which is a corporation, limited liability company, or partnership (an “Entity Managing Member”) shall be organized under State law solely for the purpose of serving as the general partner or managing member of one or more RBICs, and shall be organized for profit.

(2) The Secretary must approve any person who will serve as an officer, director, manager, or general partner of the Entity General Partner or Entity Managing Member. This provision must be stated in an Entity General Partner’s or Entity Managing Member’s articles of incorporation or charter and bylaws if a corporation, operating agreement if a limited liability company, or partnership agreement if a partnership.

(3) An Entity General Partner or Entity Managing Member is subject to the same examination and reporting requirements as a RBIC under sections 384K and 384L of the Act. The restrictions and obligations imposed upon a RBIC by §§4290.1810, 4290.30, 4290.410 through 4290.450, 4290.470, 4290.500, 4290.510, 4290.585, 4290.600, 4290.690, 4290.690 through 4290.692, and 4290.1910 apply also to an Entity General Partner or Entity Managing Member of a RBIC.

(4) The general partner(s) of your Entity General Partner(s) or Entity Managing Member(s) will be considered your general partner.

(5) If your Entity General Partner or Entity Managing Member is a limited partnership, its limited partners may be considered your Control Person(s) if they meet the definition for Control Person in §4290.50.

(b) Liability of general partner of Partnership RBIC. Subject to section 384O(b) of the Act, your general partner(s) is not liable solely by reason of its status as a general partner for repayment of any Leverage or debts you owe to the Secretary unless the Secretary, in the exercise of reasonable investment prudence, and with regard to your financial soundness, determines otherwise prior to the purchase or guaranty of your Leverage. The conditions specified in §4290.1810 and §4290.1910 apply to all general partners.

(c) Special Leverage requirement for Partnership RBICs and LLC RBICs. Before your first issuance of Leverage, you must furnish the Secretary with evidence that you qualify as a partnership for tax purposes, either by a ruling from the Internal Revenue Service or by an opinion of counsel.

§ 4290.165 Obligations of Control Persons.

All Control Persons are bound by the provisions of sections 384O and 384P of the Act and by the conflict-of-interest rules under §4290.730. The term RBIC, as used in §§4290.30, 4290.460, and 4290.680, includes all of the RBIC’s Control Persons.

CAPITALIZING A RBIC

§ 4290.200 Adequate capital for RBICs.

You must meet the requirements of §§4290.210 through 4290.230 in order to qualify as a RBIC.

[76 FR 80222, Dec. 23, 2011]

§ 4290.210 Minimum capital requirements for RBICs.

(a) General Rule. Unless otherwise specified in a FEDERAL REGISTER notice, you must have Regulatory Capital of at least $10,000,000, or such lesser amount (but not less than $5,000,000) and Leverageable Capital of at least $500,000, to become a RBIC.

(b) Exception. (1) The Secretary in his or her sole discretion and based on a showing of special circumstances and good cause may license an Applicant with Regulatory Capital of at least $10,000,000, or such lesser amount (but not less than $5,000,000) and Leverageable Capital of at least $500,000, to become a RBIC.

(2) Capitalization. (1) The Secretary in his or her sole discretion and based on a showing of special circumstances and good cause may license an Applicant with Regulatory Capital of at least $10,000,000, or such lesser amount (but not less than $5,000,000) and Leverageable Capital of at least $500,000, to become a RBIC.

(2) Has satisfied all eligibility criteria for licensing as a RBIC as described in §4290.390(a) of this part, except the capital requirement specified in paragraph (a)(1) of that section, as determined solely by the Secretary;

(3) Has a viable business plan reasonably projecting profitable operations; and
(iii) Has a reasonable timetable for achieving Regulatory Capital of at least $10,000,000.

(2) A RBIC licensed under this exception is not eligible to receive Leverage until it has complied with paragraph (a) of this section.

(c) Time frame. Each RBIC shall have a period of 2 years to meet the capital requirements set forth in this section.

§ 4290.230 Private Capital for RBICs.

(a) General. Private Capital means the contributed capital of a RBIC, plus unfunded binding commitments by Institutional Investors (including commitments evidenced by a promissory note) to contribute capital to a RBIC.

(b) Contributed capital. For purposes of this section, contributed capital means the paid-in capital and paid-in surplus of a Corporate RBIC, the members’ contributed capital of a LLC RBIC, or the partners’ contributed capital of a Partnership RBIC, in each case subject to the limitations in paragraph (c) of this section.

(c) Exclusions from Private Capital. Private Capital does not include:

(1) Funds borrowed by an Applicant or a RBIC from any source.

(2) Funds obtained through the issuance of Leverage.

(3) Funds obtained directly or indirectly from the Federal government or any State (including by a political subdivision, agency or instrumentality of the Federal government or a State), except that the following categories of such funds are not excluded from Private Capital—

(i) Funds obtained directly or indirectly from the business revenues (excluding any governmental appropriation) of any federally-chartered or government-sponsored enterprise established prior to May 13, 2002;

(ii) Funds invested by an employee welfare benefit plan or pension plan;

and

(iii) Qualified Non-private Funds in an amount not to exceed 33 percent of the total Private Capital of any Applicant or RBIC, provided, however, that in no event may any investor or investors of Qualified Non-private Funds have the power to Control, directly or indirectly, the management, board of directors, general partners, or members of the RBIC.

(4) Any portion of an unfunded commitment from an Institutional Investor with a net worth of less than $10 million that exceeds 10 percent of such Institutional Investor’s net worth.

(5) An unfunded commitment from an investor if the Secretary determines that the collectibility of the commitment is questionable.

(d) Non-cash capital contributions. Capital contributions in a form other than cash are subject to the limitations in § 4290.240 of this part.

(e) Contributions with borrowed funds. You may not accept any capital contribution made with funds borrowed by a Person seeking to own an equity interest (whether direct or indirect, beneficial or of record) of at least 10 percent of your Private Capital. This exclusion does not apply if:

(1) Such Person’s net worth is at least twice the amount borrowed; or

(2) The Secretary gives his or her prior written approval of the capital contribution.

§ 4290.240 Limitations on non-cash capital contributions in Private Capital.

Non-cash capital contributions to a RBIC or Applicant are included in Private Capital only if they are approved by the Secretary and they fall into one of the following categories:

(a) Direct obligations of, or obligations guaranteed as to principal and interest by, the United States having a term of no more than one year.

(b) Services rendered or to be rendered to you, priced at no more than their fair market value.

(c) Other non-cash assets approved by the Secretary.

Subpart D—Application and Approval Process for RBIC Licensing

§ 4290.300 When and how to apply for a RBIC License.

(a) Notice of Funds Availability ("NOFA"). The Secretary will publish a NOFA in the Federal Register advising potential applicants of the availability of funds for the RBIC program.
and inviting the submission of applications. The NOFA may specify limitations, special rules, procedures, and restrictions for a particular funding round. When submitting its application, an Applicant must comply with both this part 4290 and any requirements specified in the NOFA, including the opening and closing dates for submission of an application.

(b) Application form. An Applicant must apply for a RBIC license using an appropriate application packet provided by the Secretary. Upon receipt of a completed application packet, the Secretary may request clarifying or technical information on the materials submitted as part of the application.

§ 4290.310 Contents of application.

Each Applicant must submit a complete application, including the following:

(a) Management team experience. The Applicant must provide information generally as to the background, capability, education, reputation and training of its management team, including general partners, managers, officers, key personnel, and investment committee and governing board members. The Applicant also must provide information specifically on these individuals’ qualifications and reputation in the areas of Community Development Finance and/or Relevant Venture Capital Finance, including the impact of these individuals’ activities in these areas.

(b) Amount of Regulatory Capital. The Applicant must indicate the amount of Regulatory Capital it has raised or proposes to raise, which amount must satisfy the requirements of §4290.210(a) of this part, unless the Applicant indicates that it has raised or proposes to raise at least $2,500,000 and is applying for an exception pursuant to §4290.210(b) of this part and includes in its application—

(1) A showing of special circumstances and good cause for the exception;

(2) Will satisfy all eligibility criteria for licensing as a RBIC as set forth in §4290.390(a) of this part, except the capital requirement specified in paragraph (a)(1) of that section, as determined solely by the Secretary;

(3) Has a viable business plan reasonably projecting profitable operations; and

(4) Has a reasonable timetable for achieving Regulatory Capital in an amount that satisfies the requirements of §4290.210(a) of this part.

(c) Comprehensive business plan. The Applicant must submit a comprehensive business plan covering at least a five-year period, addressing the specific items described in §4290.320, and which demonstrates that the Applicant has the capacity to operate successfully as a RBIC.

§ 4290.320 Contents of comprehensive business plan.

(a) Plan for Developmental Venture Capital investing. The Applicant must describe its plans and strategies for how it proposes to make successful Developmental Venture Capital investments in identified Rural Areas.

(b) Working with Rural Area community-based organizations. The Applicant must describe how it intends to work with community-based organizations and local entities (including local economic development companies, local lenders, and local investors) in order to facilitate its Developmental Venture Capital investments.

(c) Market analysis. The Applicant must provide an analysis of the Rural Areas in which it intends to focus its Developmental Venture Capital investments and Operational Assistance to Smaller Enterprises, demonstrating that the Applicant understands the market and the unmet Equity Capital needs in such areas and how its activities will meet these unmet needs and will have a positive economic impact on those areas. The Applicant also must analyze the extent of the demand in such areas for Developmental Venture Capital investments and any factors or trends that may affect the Applicant’s ability to make effective Developmental Venture Capital investments.

(d) Operational capacity and investment strategies. The Applicant must submit information concerning its
§ 4290.330 Grant and guarantee issuance fee.  

The Applicant must pay to the Secretary an issuance fee for each grant or debenture guarantee of $500. If both a grant and debenture guarantee are issued for the same RBIC, the issuance fee for both is $500. An Applicant must submit this fee in advance, at the time of application submission.

Subpart E—Evaluation and Selection of RBICs

The Secretary on behalf of USDA and the Administrator on behalf of SBA, in their sole discretion, will evaluate and select an Applicant to participate in the RBIC program based on a review of the Applicant’s application materials, interviews or site visits with the Applicant (if any), and background investigations conducted by the Secretary and other Federal agencies. The Secretary’s evaluation and selection process is intended to—

(a) Ensure that Applicants are evaluated on a competitive basis and in a fair and consistent manner;

(b) Take into consideration the unique proposals presented by Applicants;

(c) Ensure that each Applicant licensed as a RBIC can fulfill successfully the goals of its comprehensive business plan; and
(d) Ensure that the Secretary selects Applicants in such a way as to promote nationwide geographic distribution of Developmental Venture Capital investments.

§ 4290.350 Eligibility and completeness.

The Secretary will not consider any application that is not complete or that is submitted by an Applicant that does not meet the eligibility criteria described in subpart C of this part. The Secretary at his or her sole discretion, may request from an Applicant additional information concerning eligibility criteria or easily completed portions of the application in order to facilitate consideration of its application.

§ 4290.360 Initial review of Applicant’s management team’s qualifications.

The Secretary will review the information submitted by the Applicant concerning the qualifications of the Applicant’s management team to determine in his or her sole discretion whether the team meets the minimum requirements deemed by the Secretary to be critical to successful venture capital investing. In making this determination, the Secretary will consider, among other things, the general business reputation of the owners and managers of the Applicant. Only those Applicants considered to have a management team qualified for venture capital investing will be further considered for selection as a RBIC.

§ 4290.370 Evaluation criteria.

Of those Applicants whose management team is considered qualified for venture capital investing and who have submitted an eligible and complete application, the Secretary on behalf of USDA and the Administrator on behalf of SBA, in their sole discretion, will evaluate and select an Applicant for participation in the RBIC program by considering the following criteria—

(a) Whether the Applicant’s management team has the knowledge, experience, and capability necessary to manage a sound, economically viable RBIC and to comply with the Act;

(b) The quality of the Applicant’s comprehensive business plan in terms of meeting the objectives of the RBIC program;

(c) The likelihood that the Applicant will achieve the goals described in its comprehensive business plan;

(d) The strength and likelihood for success of the Applicant’s operations and investment strategies, including whether the Applicant has projected adequate profitability and financial soundness;

(e) Whether the Applicant will be able to operate soundly and profitably over the long term;

(f) Whether the Applicant will be able to operate actively in its identified Rural Areas in accordance with its business plan;

(g) The need for Developmental Venture Capital Investments in the Rural Areas in which the Applicant intends to invest;

(h) The extent to which the Applicant will concentrate its activities on serving Smaller Enterprises and Small Business Concerns located in the Rural Areas in which it intends to invest, including the ratio of resources that it proposes to invest in such Enterprises as compared to other Enterprises;

(i) The Applicant’s demonstrated understanding of the markets in the Rural Areas in which it intends to focus its activities;

(j) The likelihood that and the timeframe within which the Applicant will be able to raise the Regulatory Capital it proposes to raise for its investments;

(k) The strength of the Applicant’s proposal to provide Operational Assistance to Smaller Enterprises in which it plans to invest;

(l) The extent to which the activities proposed by the Applicant will promote economic development and the creation of wealth and job opportunities in the Rural Areas in which it intends to invest and among individuals living in such Areas; and

(m) The strength of the Applicant’s application compared to applications submitted by other Applicants intending to invest in the same or proximate Rural Areas.

§ 4290.380 Selection.

From among the Applicants that have submitted eligible and complete applications, the Secretary on behalf of
USDA and the Administrator on behalf of SBA, in their sole discretion, will select some, all, or none of such Applicants to participate in the RBIC program. Selection will entitle the Applicant to proceed with obtaining a license as a RBIC but only if the Applicant also meets the conditions set forth in § 4290.390.

§ 4290.390 Licensing as a RBIC.

(a) Eligibility criteria for licensing as a RBIC. Each selected Applicant must meet the following conditions before it is eligible to be licensed as a RBIC:

1. Raise the specific amount of Regulatory Capital that the Applicant had projected in its application that it would raise (see § 4290.210 for additional information).
2. Raise $500,000 in Leverageable Capital as required by § 4290.210;
3. Complete and submit to the Secretary all legal and other documentation concerning the RBIC, including but not limited to its Articles and updated financial information concerning the RBIC in order to qualify for a Leverage commitment; and
4. Enter into a Participation Agreement with the Secretary.

(b) Licensing as a RBIC. If the selected Applicant has satisfactorily met all the conditions specified in paragraph (a) of this section, as determined within the sole discretion of the Secretary, then the Secretary on behalf of USDA and the Administrator on behalf of SBA will license the Applicant as a RBIC.

(c) Failure to meet eligibility criteria for licensing. Each selected Applicant that does not meet the eligibility criteria for licensing described in paragraph (a) of this section, within a time period specified by the Secretary, will not be licensed as a RBIC. Failure to meet any of those conditions, including but not limited to failure to raise the projected Regulatory Capital within the required time period, will cause the Applicant’s selection to lapse. The Secretary will not restore the selection of such an Applicant after the expiration of that time period. After the expiration of that time period, an Applicant that is not licensed as a RBIC must cease to represent itself as a participant or potential participant in the RBIC program.

(d) Effect of a RBIC license. The Participation Agreement executed by the Secretary with each Applicant licensed as a RBIC will include the following:

1. Approval to operate as a RBIC under the Act;
2. A commitment of Leverage; and
3. An Operational Assistance grant award.

§ 4290.400 Changes in ownership of 10 percent or more of RBIC but no change of Control.

You must obtain the Secretary’s prior written approval for any proposed transfer or issuance of ownership interests that results in the ownership (beneficial or of record) by any Person, or group of Persons acting in concert, of at least 10 percent of any class of your stock, partnership capital or membership interests.

§ 4290.410 Changes in Control of RBIC (through change in ownership or otherwise).

You must obtain the Secretary’s prior written approval for any proposed transaction or event that results in Control by any Person(s) not previously approved by the Secretary.

§ 4290.420 Prohibition on exercise of ownership or Control rights in RBIC before approval.

Without the Secretary’s prior written approval, no change of ownership or Control may take effect and no officer, director, employee or other Person acting on your behalf shall:

(a) Register on your books any transfer of ownership interest to the proposed new owner(s);
(b) Permit the proposed new owner(s) to exercise voting rights with respect to such ownership interest (including directly or indirectly procuring or voting any proxy, consent or authorization as to such voting rights at any
§ 4290.430 Notification of transactions that may change ownership or Control.

You must promptly notify the Secretary as soon as you have knowledge of transactions or events that may result in a transfer of Control or ownership of at least 10 percent of your Regulatory Capital. If the effect of a particular transaction or event is unclear, you must report all pertinent facts to the Secretary.

§ 4290.440 Standards governing prior approval for a proposed transfer of Control.

The Secretary’s approval of a proposed transfer of Control is contingent upon full disclosure of the real parties in interest, the source of funds for the new owners’ interest, and other data requested by the Secretary. As a condition of approving a proposed transfer of control, the Secretary may:

(a) Require an increase in your Regulatory Capital;

(b) Require the new owners or the transferee’s Control Person(s) to assume, in writing, personal liability for your Leverage, effective only in the event of their direct or indirect participation in any transfer of Control not approved by the Secretary; or

(c) Require compliance with any other conditions set by the Secretary, including compliance with the requirements for minimum capital and management-ownership diversity in effect at such time for new RBICs.

§ 4290.450 Notification of pledge of RBIC’s shares.

(a) You must notify the Secretary in writing, within 30 calendar days, of the terms of any transaction in which:

(1) Any Person, or group of Persons acting in concert, pledges shares of your stock (or equivalent ownership interests) as collateral for indebtedness; and

(2) The shares pledged constitute at least 10 percent of your Regulatory Capital.

(b) If the transaction creates a change of ownership or Control, you must comply with § 4290.400 or § 4290.410, as appropriate.

RESTRICTIONS ON COMMON CONTROL OR OWNERSHIP OF TWO OR MORE RBICS

§ 4290.460 Restrictions on Common Control or ownership of two (or more) RBICs.

Without the Secretary’s prior written approval, you must not have an officer, director, manager, Control Person, or owner (with a direct or indirect ownership interest of at least 10 percent) who is also:

(a) An officer, director, manager, Control Person, or owner (with a direct or indirect ownership interest of at least 10 percent) of another RBIC; or

(b) An officer or director of any Person that directly or indirectly controls, or is controlled by, or is under Common Control with, another RBIC.

CHANGE IN STRUCTURE OF RBIC

§ 4290.470 Prior approval of merger, consolidation, or reorganization of RBIC.

You may not merge, consolidate, change form of organization (corporation, limited liability company, or limited partnership) or reorganize without the Secretary’s prior written approval. Any such merger, consolidation, or change of form is subject to § 4290.440.

§ 4290.480 Prior approval of changes to RBIC’s business plan.

Without the Secretary’s prior written approval, no change in your business plan, upon which you were selected and licensed as a RBIC, may take effect.
§ 4290.500  Lawful operations under the Act.
You must engage only in the activities permitted by the Act and in no other activities.

§ 4290.502  Representations to the public.
You may not represent or imply to anyone that the Secretary, the U.S. Government, or any of its agencies or officers has approved any ownership interests you have issued, obligations you have incurred, or Financings you have made. You must include a statement to this effect in any solicitation provided to investors. Example: You may not represent or imply that “USDA stands behind the RBIC” or that “Your capital is safe because the Secretary’s experts review proposed investments to make sure they are safe for the RBIC.”

§ 4290.503  RBIC’s adoption of an approved valuation policy.
(a) Valuation guidelines. You must prepare, document and report the valuations of your Loans and Investments in accordance with the Valuation Guidelines for SBICs issued by SBA. These guidelines may be obtained from SBA’s Investment Division or at http://www.sba.gov/sites/default/files/files/inv_valuation.pdf.
(b) The Secretary’s approval of valuation policy. You must have a written valuation policy approved by the Secretary for use in determining the value of your Loans and Investments. You must either:
(1) Adopt without change the model valuation policy set forth in section III of the Valuation Guidelines for SBICs; or
(2) Obtain the Secretary’s prior written approval of an alternative valuation policy.
(c) Responsibility for valuations. Your board of directors, managing member(s), or general partner(s) will be solely responsible for adopting your valuation policy and for using it to prepare valuations of your Loans and Investments for submission to the Secretary. If the Secretary reasonably believes that your valuations, individually or in the aggregate, are materially misstated, he or she reserves the right to require you to engage, at your expense, an independent third party acceptable to the Secretary to substantiate the valuations.

(d) Frequency of valuations. (1) You must value your Loans and Investments at the end of the second quarter of your fiscal year, and again at the end of your fiscal year.
(2) On a case-by-case basis, the Secretary may require you to perform valuations more frequently.
(3) You must report material adverse changes in valuations at least quarterly, within 30 days following the close of the quarter.
(e) Review of valuations by independent public accountant. (1) For valuations performed as of the end of your fiscal year, your independent public accountant must review your valuation procedures and the implementation of such procedures, including adequacy of documentation.
(2) The independent public accountant’s report on your audited annual financial statements (SBA Form 468 or other USDA-approved form(s)) must include a statement that your valuations were prepared in accordance with your approved valuation policy.

§ 4290.504  Equipment of USDA or SBA officials.
(a) Computer capability. You must have a personal computer with access to the Internet and be able to use this equipment to prepare reports and transmit such reports to the Secretary. In addition, you must have the capability to send and receive electronic mail.
(b) Facsimile capability. You must be able to receive facsimile messages 24 hours per day at your primary office.
(c) Accessible office. You must maintain an office that is convenient to the public and is open for business during normal working hours.

§ 4290.506 Safeguarding the RBIC’s assets/Internal controls.
You must adopt a plan to safeguard your assets and monitor the reliability of your financial data, personnel, Portfolio, funds and equipment. You must provide your bank and custodian with a certified copy of your resolution or other formal document describing your control procedures.

§ 4290.507 Violations based on false filings and nonperformance of agreements with the Secretary or SBA.
The following shall constitute a violation of this part:
(a) Nonperformance. Failure to perform any of the requirements of any Debenture or of any written agreement with the Secretary or SBA.
(b) False statement. In any document submitted to the Secretary or SBA:
(1) Any false statement knowingly made; or
(2) Any misrepresentation of a material fact; or
(3) Any failure to state a material fact.
(4) A material fact is any fact that is necessary to make a statement not misleading in light of the circumstances under which the statement was made.

§ 4290.508 Compliance with non-discrimination laws and regulations applicable to federally-assisted programs.
In conducting your operations and providing Assistance to your Portfolio Concerns, you must comply with Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d-1 et seq.), the Age Discrimination Act of 1975 (Pub. L. 94-135, Title III), and Title V of the Equal Credit Opportunity Act (15 U.S.C. 1691 et seq.) and the following regulations promulgated by USDA to implement and enforce such laws: 7 CFR part 15.

§ 4290.509 Employment of USDA or SBA officials.
(a) Without the Secretary’s prior written approval, for a period of two years after the date of your most recent issuance of Leverage or after the receipt of any assistance as defined in paragraph (b) of this section, whichever is later, you are not permitted to employ, offer employment to, or retain for professional services, any person who:
(1) Served as an officer, attorney, agent, or employee of SBA or USDA within one year before such date; and
(2) In that capacity, occupied a position or engaged in activities which, in SBA’s or the Secretary’s determination, involved discretion with respect to the issuing of Leverage or the granting of such assistance.
(b) For purposes of this section, “assistance” means financial, contractual, grant, managerial, or other aid, including licensing, certifications, and other eligibility determinations made by USDA or SBA, and any express decision to compromise or defer possible litigation or other adverse action.

§ 4290.510 Approval of RBIC’s Investment Adviser/Manager.
(a) General. You may employ an Investment Adviser/Manager who will be subject to the supervision of your board of directors, managing member(s), or general partner(s). If you have Leverage or plan to seek Leverage, you must obtain the Secretary’s prior written approval of the management contract. Approval of an Investment Adviser/Manager for one RBIC does not indicate approval of that manager for any other RBIC.
(b) Management contract. The contract must:
(1) Specify the services the Investment Adviser/Manager will render to you and to your Portfolio Concerns; and
(2) Indicate the basis for computing Management Expenses.
(c) Material change to approved management contract. Any proposed material change must be approved by both you and the Secretary in advance. If you are uncertain whether the change is material, submit the proposed revision to the Secretary.

§ 4290.520 Management Expenses of a RBIC.
The Secretary must approve your initial Management Expenses and any increases in your Management Expenses.
§ 4290.530  Restrictions on investments of idle funds by RBICs.

(a) Permitted investments of idle funds. Funds not invested in Portfolio Concerns must be maintained in:

(1) Direct obligations of, or obligations guaranteed as to principal and interest by, the United States, which mature within 15 months from the date of the investment; or

(2) Repurchase agreements with federally insured institutions, with a maturity of seven days or less. The securities underlying the repurchase agreements must be direct obligations of, or obligations guaranteed as to principal and interest by, the United States. The securities must be maintained in a custodial account at a federally insured institution; or

(3) Certificates of deposit with a maturity of one year or less, issued by a federally insured institution; or

(4) A deposit account in a federally insured institution, subject to a withdrawal restriction of one year or less; or

(5) A checking account in a federally insured institution; or

(6) A reasonable petty cash fund.

(b) Deposit of funds in excess of the insured amount—(1) General rule. You are permitted to deposit in a federally insured institution funds in excess of the institution’s insured amount, but only if the institution is “well capitalized” in accordance with the definition set forth in regulations of the Federal Deposit Insurance Corporation (12 CFR 325.103).

(2) Exception. You may make a temporary deposit (not to exceed 30 days) in excess of the insured amount, in a transfer account established to facilitate the receipt and disbursement of funds or to hold funds necessary to honor Commitments issued.

(c) Deposit of funds in Associate institution. A deposit in, or a repurchase agreement with, a federally insured institution that is your Associate is not considered a Financing of such Associate under § 4290.730, provided the terms of such deposit or repurchase agreement are no less favorable than those available to the general public.

SECURED BORROWING BY RBICS

§ 4290.550  Prior approval of secured third-party debt of RBICs.

(a) Definition. For the purposes of this section, “secured third-party debt” means any debt that is secured by any of your assets and not guaranteed by the Secretary, including secured guarantees and other contingent obligations that you voluntarily assume and secured lines of credit.

(b) General rule. You must get the Secretary’s written approval before you incur any secured third-party debt or refinance any debt with secured third-party debt, including any renewal of a secured line of credit, increase in the maximum amount available under a secured line of credit, or expansion of the scope of a security interest or lien. For purposes of this paragraph (b), “expansion of the scope of a security interest or lien” does not include the substitution of one asset or group of assets for another, provided the asset values (as reported on your most recent annual SBA Form 468 or other USDA-approved form(s)) are comparable.

(c) Conditions for approval. As a condition of granting its approval under this section, the Secretary may impose such restrictions or limitations as he or she deems appropriate, taking into account your historical performance, current financial position, proposed terms of the secured debt and amount of aggregate debt you will have outstanding (including Leverage). The
Secretary will not favorably consider any requests for approval which include a blanket lien on all your assets, or a security interest in your investor commitments in excess of 125 percent of the proposed borrowing.

(d) Thirty-day approval. Unless the Secretary notifies you otherwise within 30 days after he or she receives your request, you may consider your request automatically approved if:

(1) You are in regulatory compliance;

(2) The security interest in your assets is limited to either those assets being acquired with the borrowed funds or an asset coverage ratio of no more than 2:1; and

(3) Your request is for approval of a secured line of credit that would not cause your total outstanding borrowings (not including Leverage) to exceed 50 percent of your Leverageable Capital.

VOLUNTARY DECREASE IN REGULATORY CAPITAL

§ 4290.585 Voluntary decrease in RBIC’s Regulatory Capital.

You must obtain the Secretary’s prior written approval to reduce your Regulatory Capital by more than two percent in any fiscal year. At all times, you must retain sufficient Regulatory Capital to meet the minimum capital requirements in the Act and § 4290.210, and sufficient Leverageable Capital to avoid having excess Leverage in violation of section 384E(d) of the Act.

Subpart H—Recordkeeping, Reporting, and Examination Requirements for RBICs

RECORDKEEPING REQUIREMENTS FOR RBICs

§ 4290.600 General requirement for RBIC to maintain and preserve records.

(a) Maintaining your accounting records. You must establish and maintain your accounting records using SBA’s standard chart of accounts for SBICs, unless the Secretary approves otherwise. You may obtain this chart of accounts from SBA or at http://www.sba.gov/sites/default/files/files/inv_charts_of_accounts.pdf.

(b) Location of records. You must keep the following records at your principal place of business or, in the case of paragraph (b)(3) of this section, at the branch office that is primarily responsible for the transaction:

(1) All your accounting and other financial records;

(2) All minutes of meetings of directors, stockholders, executive committees, partners, members, or other officials; and

(3) All documents and supporting materials related to your business transactions, except for any items held by a custodian under a written agreement between you and a Portfolio Concern or lender, or any securities held in a safe deposit box, or by a licensed securities broker in an amount not exceeding the broker’s per-account insurance coverage.

(c) Preservation of records. You must retain all the records that are the basis for your financial reports. Such records must be preserved for the periods specified in this paragraph (c) and must remain readily accessible for the first two years of the preservation period:

(1) You must preserve for at least 15 years or, in the case of a Partnership RBIC or LLC RBIC, at least two years beyond the date of liquidation:

(i) All your accounting ledgers and journals, and any other records of assets, asset valuations, liabilities, equity, income, and expenses;

(ii) Your Articles, bylaws, minute books, and RBIC application; and

(iii) All documents evidencing ownership of the RBIC including ownership ledgers and ownership transfer registers.

(2) You must preserve for at least six years all supporting documentation (such as vouchers, bank statements, or canceled checks) for the records listed in paragraph (b)(1) of this section.

(3) After final disposition of any item in your Portfolio, you must preserve for at least six years:

(i) Financing applications and Financing instruments;

(ii) All loan, participation, and escrow agreements;

(iii) All certifications listed in § 4290.610 of this part;
(iv) Any capital stock certificates and warrants of the Portfolio Concern that you did not surrender or exercise; and
(v) All other documents and supporting material relating to the Portfolio Concern, including correspondence.

(4) You may substitute a microfilm or computer-scanned or generated copy for the original of any record covered by this paragraph (c).

(d) Additional requirement. You must comply with the recordkeeping and record retention requirements set forth in Circular A–110 of the Office of Management and Budget. (OMB Circulars are available from the addresses listed in 5 CFR 1310.3 and at http://www.whitehouse.gov/omb/circulars.)

§ 4290.600 Requirements to obtain information from Portfolio Concerns.

All the information required by this section is subject to the requirements of §4290.600 and must be in English.

(a) Information for initial Financing decision. Before extending any Financing, you must require the Enterprise to submit such financial statements, plans of operation (including intended use of financing proceeds), cash flow analyses, projections, and such economic development information about the Enterprise, as are necessary to support your investment decision. The information submitted must be consistent with the size and type of the Enterprise and the amount of the proposed Financing.

(b) Updated financial and economic development information. (1) The terms of each Financing must require the Portfolio Concern to provide, at least annually, sufficient financial and economic development information to enable you to perform the following required procedures:

(i) Evaluate the financial condition of the Portfolio Concern for the purpose of valuing your investment;
(ii) Determine the continued eligibility of the Portfolio Concern;
(iii) Verify the use of Financing proceeds;
(iv) Evaluate the economic development impact of the Financing; and
(v) In the case of any Portfolio Concern that is not a Rural Business Concern, the number and percentage of its employees residing in Rural Areas.

(2) The president, chief executive officer, treasurer, chief financial officer, general partner, or proprietor of the Portfolio Concern must certify the information submitted to you.

(3) For financial and valuation purposes, you may accept a complete copy of the Federal income tax return filed by the Portfolio Concern (or its proprietor) in lieu of financial statements, but only if appropriate for the size and type of the Enterprise involved.

§ 4290.610 Required certifications for Loans and Investments.

For each of your Loans and Investments, you must have the documents listed in this section. You must keep these documents in your files and make them available to the Secretary upon request.

(a) For each Financing made to a Rural Business Concern or Smaller Enterprise, a certification by the Portfolio Concern stating the basis for its qualification as a Rural Business Concern or Smaller Enterprise.

(b) For each Financing made to a Small Business Concern, Size Status Declaration (SBA Form 480 or other USDA-approved form(s)), executed both by you and by the Portfolio Concern certifying that the concern is a Small Business Concern. For securities purchased from an underwriter in a public offering, you may substitute a prospectus indicating the intended use of proceeds.

(c) A certification by the Portfolio Concern that it will not discriminate in violation of Title VI of the Civil Rights Act of 1964, the Age Discrimination Act of 1975, and Title V of the Equal Credit Opportunity Act.

(d) A certification by the Portfolio Concern of the intended use of the proceeds. For securities purchased from an underwriter in a public offering, you may substitute a prospectus indicating the intended use of proceeds.

(4) The requirements in this paragraph (b) do not apply when you acquire securities from an underwriter in a public offering (see §4290.825). In that case, you must keep copies of all reports furnished by the Portfolio Concern to the holders of its securities.

(c) Information required for examination purposes. You must obtain any information requested by the Secretary’s examiners for the purpose of verifying the certifications made by a Portfolio Concern under §4290.610. In this regard, your Financing documents must contain provisions requiring the Portfolio Concern to give you and/or the Secretary’s examiners access to its books and records for such purpose.

REPORTING REQUIREMENTS FOR RBICS

§ 4290.630 Requirement for RBICs to file financial statements and supplementary information with the Secretary.

(a) Annual filing. For each fiscal year, you must submit financial statements and supplementary information prepared on SBA Form 468 or other USDA-approved form(s). You must file SBA Form 468 (or other USDA-approved form(s)) on or before the last day of the third month following the end of your fiscal year, except for the information required under paragraphs (e) and (f) of this section, which must be filed on or before the last day of the fifth month following the end of your fiscal year.

(1) Audit of annual filing form. An independent public accountant acceptable to the Secretary must audit the annual form submitted under paragraph (a) of this section.

(2) Insurance requirement for public accountant. Unless the Secretary approves otherwise, your independent public accountant must carry at least $1,000,000 of Errors and Omissions insurance, or be self-insured and have a net worth of at least $1,000,000.

(b) Interim filings. When requested by the Secretary, you must file interim reports on SBA Form 468 or other USDA-approved form(s). The Secretary may require you to file the entire form or only certain statements and schedules. You must file such reports on or before the last day of the month following the end of the reporting period. When you submit a request for a draw under a Leverage commitment, you must also comply with any applicable filing requirements set forth in §4290.1220.

(c) Standards for preparation. You must prepare SBA Form 468 or other USDA-approved form(s) in accordance with SBA’s Accounting Standards and Financial Reporting Requirements for SBICs, which you may obtain from SBA or at http://www.sba.gov/content/accounting-standards-sbic.

(d) Where to file. Unless otherwise identified in a notice published in the Federal Register, submit all filings of forms under this section to the Investment Division of SBA.

(e) Reporting of economic development impact information for each Financing. Your annual filing of SBA Form 468 or other USDA-approved form(s) must include an assessment of the economic development impact of each Financing. This assessment must specify the fulltime equivalent jobs created, the impact of the Financing on the revenues and profits of the business and on taxes paid by the business and its employees, and a listing of the number and percentage of employees who reside in Rural Areas.

(f) Reporting of economic development information for certain financings. For each Rural Business Concern Investment and each Smaller Enterprise Investment, your SBA Form 468 or other USDA-approved form(s) must include an assessment of each such Financing with respect to:

(1) The economic development benefits achieved as a result of the Financing;

(2) How and to what extent such benefits fulfilled the goals of your comprehensive business plan and Participation Agreement; and

(3) Whether you consider the Financing or the results of the Financing to have fulfilled the objectives of the RBIC program.

§ 4290.640 Requirement to file portfolio financing reports with the Secretary.

For each Financing you make (excluding guarantees), you must submit a Portfolio Financing Report on SBA
Form 1031 or other USDA-approved form(s) within 30 days of the closing date.

[76 FR 80223, Dec. 23, 2011]

§ 4290.650 Requirement to report portfolio valuations to the Secretary

You must determine the value of your Loans and Investments in accordance with § 4290.503. You must report such valuations to the Secretary within 90 days of the end of the fiscal year in the case of annual valuations, and within 30 days following the close of other reporting periods. You must report material adverse changes in valuations at least quarterly, within 30 days following the close of the quarter.

§ 4290.660 Other items required to be filed by RBIC with the Secretary.

(a) Reports to owners. You must give the Secretary a copy of any report you furnish to your investors, including any prospectus, letter, or other publication concerning your financial operations or those of any Portfolio Concern.

(b) Documents filed with SEC. You must give the Secretary a copy of any report, application or document you file with the Securities and Exchange Commission.

(c) Litigation reports. When you become a party to litigation or other proceedings, you must give the Secretary a report within 30 days that describes the proceedings and identifies the other parties involved and your relationship to them.

(1) The proceedings covered by this paragraph (c) include any action by you, or by your security holder(s) in a personal or derivative capacity, against an officer, director, Investment Adviser/Manager or other Associate of yours for alleged breach of official duty.

(2) The Secretary may require you to submit copies of the pleadings and other documents he or she may specify.

(3) Where proceedings have been terminated by settlement or final judgment, you must promptly advise the Secretary of the terms.

(4) This paragraph (c) does not apply to collection actions or proceedings to enforce your ordinary creditors’ rights.

(d) Notification of criminal charges. If any officer, director, general partner, or managing member of the RBIC, or any other person who was required by the Secretary to complete a personal history statement, is charged with or convicted of any criminal offense other than a misdemeanor involving a minor motor vehicle violation, you must report the incident to the Secretary within 5 calendar days. Such report must fully describe the facts that pertain to the incident.

(e) Reports concerning Operational Assistance grant funds. You must comply with all reporting requirements set forth in Circular A–110 of the Office of Management and Budget and any grant award document executed between you and the Secretary.

(f) Other reports. You must file any other reports the Secretary may require in writing.

§ 4290.680 Reporting changes in RBIC not subject to prior approval.

(a) Changes to be reported for post-approval. This section applies to any changes in your Articles, ownership, capitalization, management, operating area, or investment policies that do not require the Secretary’s prior approval. You must report such changes to the Secretary within 30 days after the change, for post approval.

(b) Approval by the Secretary. You may consider any change submitted under this § 4290.680 to be approved unless the Secretary notifies you to the contrary within 90 days after receiving it. Approval is contingent upon your full disclosure of all relevant facts and is subject to any conditions the Secretary may prescribe.

EXAMINATIONS OF RBICS BY THE SECRETARY FOR REGULATORY COMPLIANCE

§ 4290.690 Examinations.

All RBICs must submit to annual examinations by or at the direction of the Secretary for the purpose of evaluating regulatory compliance.
§ 4290.691 Responsibilities of RBIC during examination.

You must make all books, records and other pertinent documents and materials available for the examination, including any information required by the examiner under § 4290.620(c). In addition, the agreement between you and the independent public accountant performing your audit must provide that any information in the accountant’s working papers be made available to the examiners upon request.

§ 4290.692 Examination fees.

(a) General. The Secretary will assess fees for examinations in accordance with this § 4290.692. Unless the Secretary determines otherwise on a case by case basis, he or she will not assess fees for special examinations to obtain specific information.

(b) Base fee. A base fee of $9,200 + 0.015 percent of your assets will be assessed, subject to adjustment in accordance with paragraph (c) of this section.

(c) Adjustments to base fee. The base fee will be decreased based on the following criteria:

(1) If you have no outstanding regulatory violations at the time of the commencement of the examination or the Secretary did not identify any violations as a result of the most recent prior examination, you will receive a 15% discount on your base fee; and

(2) If you were fully responsive to the letter of notification of examination (that is, you provided all requested documents and information within the time period stipulated in the notification letter in a complete and accurate manner, and you prepared and had available all information requested by the examiner for on-site review), you will receive a 10% discount on your base fee.

(d) Examination delay fee. If, in the sole discretion of the Secretary, the time required to complete your examination is delayed due to your lack of cooperation or the condition of your records, the Secretary may assess an additional examination fee of up to $500 per day.

Subpart I—Financing of Enterprises by RBICs

Determining Eligibility of an Enterprise for RBIC Financing

§ 4290.700 Requirements concerning types of Enterprises to receive Financing.

(a) Rural Business Concern Investments. At the close of each of your fiscal years—

(1) At least 75 percent of your Portfolio Concerns must have received a Rural Business Concern Investment; and

(2) For all Financings you have extended, you must have invested at least 75 percent (in total dollars) in Rural Business Concern Investments.

(b) Smaller Enterprise Investments. At the close of each of your fiscal years—

(1) More than 50 percent of your Portfolio Concerns must be Smaller Enterprises that, at the time of the initial Financing to such Enterprise, meet either the net worth/net income test or the size standard set forth in the "Smaller Enterprise" definition in § 4290.50 of this part; and

(2) For all Financings that you have extended, you must have invested more than 50 percent (in total dollars) in Financings in the form of Equity Capital in such Enterprises.

(c) Small Business Concern Investments. At the close of each of your fiscal years—

(1) At least 50 percent of the Portfolio Concerns referenced in paragraph (b)(1) of this section must be Small Business Concerns; and

(2) For all Financings referenced in paragraph (b)(2) of this section, you must have invested at least 50 percent (in total dollars) in Small Business Concerns.

(d) Urban Area Investments. At the close of each of your fiscal years—

(1) No more than 10 percent of your Portfolio Concerns must have received Urban Area Investments; and

(2) For all Financings you have extended, you must not have invested more than 10 percent (in total dollars) in Urban Area Investments.

(e) Non-compliance with this section. If you have not met the percentages required in paragraphs (a), (b), (c), or (d)
of this section at the end of any fiscal year, then you must be in compliance by the end of the following fiscal year. However, you will not be eligible for additional Leverage until such time as you meet the required percentages (see §4290.1120).

§ 4290.720 Enterprises that may be ineligible for Financing.

(a) Re-lenders or re-investors. You are not permitted to finance any Enterprise that is a re-lender or re-investor. The primary business activity of re-lenders or re-investors involves, directly or indirectly, providing funds to others, purchasing debt obligations, factoring, or long-term leasing of equipment with no provision for maintenance or repair.

(b) Passive Enterprises. You are not permitted to finance a passive Enterprise.

(1) Definition. An Enterprise is passive if:

(i) It is not engaged in a regular and continuous business operation (for purposes of this paragraph (b), the mere receipt of payments such as dividends, rents, lease payments, or royalties is not considered a regular and continuous business operation); or

(ii) Its employees are not carrying on the majority of day to day operations, and the Enterprise does not provide effective control and supervision, on a day to day basis, over persons employed under contract; or

(iii) It passes through substantially all of the proceeds of the Financing to another entity.

(2) Exception for pass-through of proceeds to subsidiary. With the prior written approval of the Secretary, you may finance a passive Enterprise if it passes substantially all of the proceeds through to one or more subsidiary companies, each of which is an eligible Enterprise that is not passive. For the purpose of this paragraph (b)(2), “subsidiary company” means a company in which at least 50 percent of the outstanding voting securities are owned by the Financed passive Enterprise.

(3) Exception for certain Partnership RBICs or LLC RBICs. With the prior written approval of the Secretary, if you are a Partnership RBIC or LLC RBIC, you may form one or more wholly owned corporations in accordance with this paragraph (b)(3). The sole purpose of such corporation(s) must be to provide Financing to one or more eligible, unincorporated Enterprise. You may form such corporation(s) only if a direct Financing to such Enterprise would cause any of your investors to incur unrelated business taxable income under section 511 of the Internal Revenue Code of 1986, as amended (26 U.S.C. 511). Your investment of funds in such corporation(s) will not constitute a violation of §4290.730(a).

(c) Real Estate Enterprises. (1) You are not permitted to finance:

(i) Any Enterprise classified under sector 233 (Building, Developing, and General Contracting) of the NAICS Manual, or

(ii) Any Enterprise listed under sector 531 (Real Estate) unless at least 80 percent of its revenue is derived from non-Affiliate sources.

(2) You are not permitted to finance an Enterprise, regardless of NAICS classification, if the Financing is to be used to acquire or refinance real property, unless the Enterprise:

(i) Is acquiring an existing property and will use at least 51 percent of the usable square footage for an eligible business or commercial purpose; or

(ii) Is constructing or renovating a building and will use at least 67 percent of the usable square footage for an eligible business or commercial purpose; or

(iii) Occupies the subject property and uses at least 67 percent of the usable square footage for an eligible business or commercial purpose.

(d) Project Financing. You are not permitted to finance an Enterprise if:

(1) The assets of the Enterprise are to be reduced or consumed, generally without replacement, as the life of the Enterprise progresses, and the nature of the Enterprise requires that a stream of cash payments be made to the Enterprise’s financing sources, on a basis associated with the continuing sale of assets. Examples include real estate development projects and oil and gas wells; or

(2) The primary purpose of the Financing is to fund production of a single item or defined limited number of
items, generally over a defined production period, and such production will constitute the majority of the activities of the Enterprise. Examples include motion pictures.

(e) Farm land purchases. You are not permitted to finance the acquisition of farmland. Farmland means land which is or is intended to be used for agricultural or forestry purposes such as the production of food, fiber, or wood, or is so taxed or zoned.

(f) Public interest. You are not permitted to finance any business if the proceeds are to be used for purposes contrary to the public interest, including but not limited to or activities which are in violation of law, or inconsistent with free competitive enterprise.

(g) Foreign investment—(1) General rule. You are not permitted to finance an Enterprise if:
   (i) The funds will be used substantially for a foreign operation; or
   (ii) At the time of the Financing or within one year thereafter, more than 49 percent of the employees or tangible assets of the Enterprise are located outside the United States (unless you can show, to the Secretary’s satisfaction, that the Financing was used for a specific domestic purpose).

   (2) Exception. This paragraph (g) does not prohibit a Financing used to acquire foreign materials and equipment or foreign property rights for use or sale in the United States.

(h) Financing RBICs, SBICs, or New Markets Venture Capital Companies (NMVC Companies). (1) You are not permitted to provide funds, directly or indirectly:
   (i) To purchase stock in or otherwise provide capital to a RBIC, SBIC or NMVC Company; or
   (ii) To repay an indebtedness incurred for the purpose of investing in a RBIC, SBIC, or NMVC Company.

   (2) “NMVC Company” is defined in 13 CFR 108.9.

(i) Entities ineligible for Farm Credit System Assistance. If one or more Farm Credit System Institutions or their Affiliates owns more than 25 percent of the ownership interests of a Rural Business Investment Company, either alone or in conjunction with other Farm Credit System Institutions (or affiliates), the Rural Business Investment Company may not provide Financing to any entity that is not otherwise eligible to receive Financing from a Farm Credit System Institution under the Farm Credit Act of 1971 (12 U.S.C. 2001 et seq.).

(k) Change of ownership of an Enterprise. You are not permitted to Finance a change of ownership of an Enterprise unless otherwise approved by the Secretary.

§4290.730   Financings which constitute conflicts of interest.

(a) General rule. You must not self-deal to the prejudice of an Enterprise, the RBIC, its shareholders, partners or, members, or the Secretary. Unless you obtain a prior written exemption from the Secretary for special instances in which a Financing may further the purposes of the Act despite presenting a conflict of interest, you must not directly or indirectly:
   (1) Provide Financing to any of your Associates, except for an Enterprise that satisfies all of the following conditions:
      (i) Your Associate relationship with the Enterprise is described by paragraph (8) or (9) of the definition of Associate in §4290.50,
      (ii) No Person triggering the Associate relationship identified in paragraph (a)(1)(i) of the definition of Associate in §4290.50 is a Close Relative or Secondary Relative of any Person described in paragraphs (1), (2), (4), or (5) of the definition of Associate in §4290.50, and
      (iii) No single Associate of yours has either a voting interest or an economic interest in the Enterprise exceeding 20 percent, and no two or more of your Associates have either a voting interest or an economic interest exceeding 33 percent. Economic interests shall be computed on a fully diluted basis, and both voting and economic interests shall exclude any interest owned through the RBIC.
(2) Provide Financing to an Associate of another RBIC if one of your Associates has received or will receive any direct or indirect Financing or a Commitment from that RBIC or any other RBIC (including Financing or Commitments received under any understanding, agreement, or cross dealing, reciprocal or circular arrangement).

(3) Borrow money from:
   (i) An Enterprise Financed by you;
   (ii) An officer, director, or owner of at least a 10 percent equity interest in such Enterprise; or
   (iii) A Close Relative of any such officer, director, or equity owner.

(4) Provide Financing to an Enterprise to discharge an obligation to your Associate or free other funds to pay such obligation. This paragraph (a)(4) does not apply if the obligation is to an Associate Lending Institution and is a line of credit or other obligation incurred in the normal course of business.

(b) Rules applicable to Associates. Without the Secretary’s prior written approval, your Associates must not, directly or indirectly:
   (1) Borrow money from any Person described in paragraph (a)(3) of this section.
   
(2) Receive from an Enterprise any compensation or anything of value in connection with Assistance you provide (except as permitted under §4290.825(c)), or anything of value for procuring, attempting to procure, or influencing your action with respect to such Assistance.

(c) Applicability of other laws. You are also bound by Federal or State laws applicable to you that govern conflicts of interest and fiduciary obligations.

(d) Financings with Associates—(1) Financings with Associates requiring prior approval. Without the Secretary’s prior written approval, you may not Finance any Enterprise in which your Associate has either a voting equity interest or total equity interests (including potential interests) of at least five percent, or effective control, except as otherwise permitted under paragraph (a)(1) of this section.

(2) Other Financings with Associates. If you and an Associate provide Financing to the same Enterprise, either at the same time or at different times, you must be able to demonstrate to the Secretary’s satisfaction that the terms and conditions are (or were) fair and equitable to you, taking into account any differences in the timing of each party’s financing transactions.

(3) Exceptions to paragraphs (d)(1) and (d)(2) of this section. A Financing that falls into one of the following categories is exempt from the prior approval requirement in paragraph (d)(1) of this section or is presumed to be fair and equitable to you for the purposes of paragraph (d)(2) of this section, as appropriate:
   (i) Your Associate is a Lending Institution that is providing financing under a credit facility in order to meet the operational needs of the Enterprise and the terms of such financing are usual and customary.
   (ii) Your Associate invests in the Enterprise on the same terms and conditions and at the same time as you.
   (iii) Both you and your Associate are RBICs.

(e) Use of Associates to manage Portfolio Concerns. To protect your investment, you may designate an Associate to serve as an officer, director, or other participant in the management of a Portfolio Concern. You must identify any such Associate in your records available for the Secretary’s review under §4290.600. Without the Secretary’s prior written approval, such Associate must not:
   (1) Have any other direct or indirect financial interest in the Portfolio Concern that exceeds, or has the potential to exceed, the percentages of the Portfolio Concern’s equity set forth in paragraph (a)(1) of this section.
   (2) Receive any income or anything of value from the Portfolio Concern unless it is for your benefit, with the exception of director’s fees, expenses, and distributions based upon the Associate’s ownership interest in the Concern.

(5) 1940 and 1980 Act Companies: SEC exemptions. If you are a 1940 or 1980 Act Company and you receive an exemption from the Securities and Exchange Commission for a transaction described in this §4290.730, you need not obtain the Secretary’s approval of the transaction. However, you must promptly
§ 4290.760 How a change in size or activity of a Portfolio Concern affects the RBIC and the Portfolio Concern.

(a) Effect on RBIC of a change in size of a Portfolio Concern. If a Portfolio Concern was a Smaller Enterprise or Small Business Concern at the time of the initial Financing but no longer qualifies as such under the size standard applicable to such entity, you may keep your investment in the Portfolio Concern and:

1. Subject to the overline limitations of §4290.740, you may provide additional Financing to the Portfolio Concern up to the time it makes a public offering of its securities.

2. Even after the Portfolio Concern makes a public offering, you may exercise any stock options, warrants, or other rights to purchase Equity Securities which you acquired before the public offering, or fund Commitments you made before the public offering.

(b) Effect of a change in business activity occurring within one year of RBIC’s initial Financing—(1) Retention of Financing. Unless you receive the Secretary’s written approval, you may not keep your Financing in a Portfolio Concern which becomes ineligible for financing by a RBIC by reason of a change in its business or commercial activity or for any other reason within one year of your initial Financing in the Portfolio Concern.

(2) Request for approval to retain Financing. If you request that the Secretary approve the retention of your investment, your request must include sufficient evidence to demonstrate that the change in business or commercial activity was caused by an unforeseen change in circumstances and was not contemplated at the time the Financing was made.

(3) Additional Financing. If the Secretary approves your request to retain a Financing under paragraph (b)(2) of this section, you may provide additional Financing to the Portfolio Concern to the extent necessary to protect against the loss of the amount of your original investment, subject to the overline limitations of §4290.740.

(c) Effect of a change in business activity occurring more than one year after the initial Financing. If a Portfolio Concern
becomes ineligible because of a change in business activity more than one year after your initial Financing you may:

(1) Retain your investment; and

(2) Provide additional Financing to the Portfolio Concern to the extent necessary to protect against the loss of the amount of your original investment, subject to the overline limitations of § 4290.740.

STRUCTURING RBIC FINANCING OF ELIGIBLE ENTERPRISES—TYPES OF FINANCINGS

§ 4290.800 Financings in the form of Equity Securities.

You may purchase the Equity Securities of an Enterprise. You may not, inadvertently or otherwise:

(a) Become a general partner in any unincorporated business; or

(b) Become jointly or severally liable for any obligations of an unincorporated business.

§ 4290.810 Financings in the form of Loans.

You are permitted to make Loans to an Enterprise only if:

(a) The maturity or term of the Loan is five years or less; and

(b) You determine that making the Loan is necessary to preserve an existing Financing (other than a Loan) in that same Enterprise.

§ 4290.815 Financings in the form of Debt Securities.

(a) General rule. You may purchase Debt Securities from an Enterprise.

(b) Restriction of options obtained by RBIC’s management and employees. Your employees, officers, directors, general partners, or managing members, or the general partners or managing members of your Investment Advisor/Manager, may obtain options in a Portfolio Concern only if:

(1) They participate in the Financing on a pari passu basis with you; or

(2) The Secretary gives its prior written approval; or

(3) The options received are compensation for services as a member of the board of directors of the Enterprise, and such compensation does not exceed that paid to other outside directors. In the absence of such directors, fees must be reasonable when compared with amounts paid to outside directors of similar Enterprises.

§ 4290.820 Financings in the form of guarantees.

(a) General rule. At the request of an Enterprise or where necessary to protect your existing Financing in a Portfolio Concern, you may guarantee the monetary obligation of an Enterprise to any non-Associate creditor.

(b) Exception. You may not issue a guaranty if:

(1) You would become subject to State regulation as an insurance, guaranty or surety business; or

(2) The amount of the guaranty plus any direct Financings to the Enterprise exceed the overline limitations of § 4290.740, except that a pledge of the Equity Securities of the issuer or a subordination of your lien or creditor position does not count toward your overline.

(c) Pledge of RBIC’s assets as guaranty. For purposes of this section, a guaranty with recourse only to specific asset(s) you have pledged is equal to the fair market value of such asset(s) or the amount of the debt guaranteed, whichever is less.

§ 4290.825 Purchasing securities from an underwriter or other third party.

(a) Securities purchased through or from an underwriter. You may purchase the securities of an Enterprise through or from an underwriter if:

(1) You purchase such securities within 90 days of the date the public offering is first made; and

(2) Your purchase price is no more than the original public offering price; and

(3) The amount paid by you for the securities (less ordinary and reasonable underwriting charges and commissions) has been, or will be, paid to the issuer, and the underwriter certifies in writing that this requirement has been met.

(b) Recordkeeping requirements. You must keep records available for the Secretary’s inspection which show the relevant details of the transaction, including but not limited to, date, price,
commissions, and the underwriter’s certifications required under paragraphs (a)(3) and (c) of this section.

(c) Underwriter’s requirements. The underwriter must certify whether it is your Associate. You may pay reasonable and customary commissions and expenses to an Associate underwriter for the portion of an offering that you purchase.

(d) Securities purchased from another RBIC. You may purchase from, or exchange with, another RBIC, Portfolio securities (or any interest therein). Such purchase or exchange may only be made on a non-recourse basis. You may not have more than one-third of your total assets (valued at cost) invested in such securities. If you have previously sold Portfolio securities (or any interest therein) on a recourse basis, you must include the amount for which you may be contingently liable in your overline computation.

(e) Purchases of securities from other non-issuers. You may purchase securities of an Enterprise from a nonissuer not previously described in this § 4290.825 if such acquisition is a reasonably necessary part of the overall sound Financing of the Enterprise.

§ 4290.830 Minimum term of Financing.

(a) General rule. The minimum term of each of your MedCAs is one year.

(b) Restrictions on mandatory redemption of Equity Securities. If you have acquired Equity Securities, options, or warrants on terms that include redemption by the Portfolio Concern, you must not require redemption by the Portfolio Concern within the first year of your acquisition except as permitted in §4290.830.

(c) Special rules for Loans and Debt Securities—(1) Term. The minimum term for Loans and Debt Securities starts with the first disbursement of the Financing.

Prepayment. You must permit voluntary prepayment of Loans and Debt Securities by the Portfolio Concern. You must obtain the Secretary’s prior written approval of any restrictions on the ability of the Portfolio Concern to prepay other than the imposition of a reasonable prepayment penalty under paragraph (c)(3) of this section.

(3) Prepayment penalties. You may charge a reasonable prepayment penalty which must be agreed upon at the time of the Financing. If the Secretary determines that a prepayment is unreasonable, you must refund the entire penalty to the Portfolio Concern. A prepayment penalty equal to five percent of the outstanding balance during the first year of any Financing, declining by one percentage point per year through the fifth year, is considered the maximum reasonable amount.

§ 4290.835 Exceptions to minimum term of Financing.

You may make a Financing with a term of less than one year but only if such Financing is in contemplation of another Financing, with a term of one year or more, to the same Enterprise.

§ 4290.840 Maximum term of Financing.

The maximum term of any Debt Security must be no longer than 20 years.

§ 4290.845 Maximum rate of amortization on Loans and Debt Securities.

The principal of any Loan, or the loan portion of any Debt Security, with a term of one year or less, cannot be amortized faster than straight line. If the term is greater than one year, the principal cannot be amortized faster than straight line for the first year.

§ 4290.850 Restrictions on redemption of Equity Securities.

(a) Restriction on redemption. A Portfolio Concern cannot be required to redeem Equity Securities earlier than one year from the date of the first closing unless:

(1) The Portfolio Concern makes a public offering, or has a change of management or control, or files for protection under the provisions of the Bankruptcy Code, or materially breaches your Financing agreement; or

(2) You make a follow-on Financing, in which case the new securities may be redeemed in less than one year, but no earlier than the redemption date associated with your earliest Financing of the Portfolio Concern.

(b) Redemption price. The redemption price must be either:
§ 4290.860 Financing fees and expense reimbursements a RBIC may receive from an Enterprise.

(a) General rule. You may collect Financing fees and receive expense reimbursements from an Enterprise only as permitted under this § 4290.860.

(b) Application fee. You may collect a nonrefundable application fee from an Enterprise to review its Financing application. The application fee may be collected at the same time as the closing fee under paragraph (d) or (e) of this section, or earlier. The fee must be:

(1) No more than one percent of the amount of Financing requested (or, if two or more RBICs participate in the Financing, their combined application fees are no more than one percent of the total Financing requested); and

(2) Agreed to in writing by the Financing applicant.

(c) The Secretary's review of application fees. For any fiscal year, if the number of application fees you collect is more than twice the number of financings closed, the Secretary in its sole discretion may determine that you are engaged in activities not contemplated by the Act, in violation of § 4290.500.

(d) Closing fee—Loans. You may charge a closing fee on a Loan if:

(1) The fee is no more than two percent of the Financing amount (or, if two or more RBICs participate in the Financing, their combined closing fees are no more than two percent of the total Financing amount); and

(2) You charge the fee no earlier than the date of the first disbursement.

(e) Closing fee—Debt or Equity financings. You may charge a Closing Fee on a Debt Security or Equity Security Financing if:

(1) The fee is no more than four percent of the Financing amount (or, if two or more RBICs participate in the Financing, their combined closing fees are no more than four percent of the total Financing amount); and

(2) You charge the fee no earlier than the date of the first disbursement.

(f) Limitation on dual fees. If another RBIC or an Associate of yours collects a transaction fee under § 4290.900(e) in connection with your Financing of an Enterprise, the sum of the transaction fee and your application and closing fees cannot exceed the maximum application and closing fees permitted under this § 4290.860.

(g) Expense reimbursements. You may charge an Enterprise for the reasonable out-of-pocket expenses, other than Management Expenses, that you incur to process its Financing application. If the Secretary determines that any of your reimbursed expenses are unreasonable or are Management Expenses, the Secretary will require you to refund them to the Enterprise.

(h) Breakup fee. If an Enterprise accepts your Commitment and then fails to close the Financing because it has accepted funds from another source, you may charge a “breakup fee” equal to the closing fee that you would have been permitted to charge under paragraph (d) or (e) of this section.

§ 4290.880 Assets acquired in liquidation of Portfolio securities.

(a) General rule. You may acquire assets in full or partial liquidation of a Portfolio Concern’s obligation to you under the conditions permitted by this § 4290.880. The assets may be acquired from the Portfolio Concern, a guarantor of its obligation, or another party.

(b) Timely disposition of assets. You must dispose of assets acquired in liquidation of a Portfolio security within a reasonable period of time.
(c) Permitted expenditures to preserve assets. (1) You may incur reasonably necessary expenditures to maintain and preserve assets acquired.

(2) You may incur reasonably necessary expenditures for improvements to render such assets saleable.

(3) You may make payments of mortgage principal and interest (including amounts in arrears when you acquired the asset), pay taxes when due, and pay for necessary insurance coverage.

(d) The Secretary’s approval of expenditures. This paragraph (d) applies if you have outstanding Leverage or are applying for Leverage. Any application for the Secretary’s approval under this paragraph must specify all expenses estimated to be necessary pending disposal of the assets. Without the Secretary’s prior written approval:

(1) Your total expenditures under paragraphs (c)(1) and (c)(2) of this section plus your total Financing(s) to the Portfolio Concern must not exceed your overline limit under §4290.740; and

(2) Your total expenditures under paragraph (b) of this section plus your total Financing(s) to the Portfolio Concern must not exceed 35 percent of your Regulatory Capital.

LIMITATIONS ON DISPOSITION OF ASSETS

§ 4290.885 Disposition of assets to RBIC’s Associates or to competitors of Portfolio Concerns.

Except with the Secretary’s prior written approval, you are not permitted to dispose of assets (including assets acquired in liquidation) to any Associate or to competitors of Portfolio Concerns if you have outstanding Leverage. As a prerequisite to such approval, you must demonstrate that the proposed terms of disposal are at least as favorable to you as the terms obtainable elsewhere.

§ 4290.900 Management fees for services provided to an Enterprise by RBIC or its Associate.

(a) General. This §4290.900 applies to management services that you or your Associate provide to a Portfolio Concern during the term of a Financing or prior to Financing. It does not apply to management services that you or your Associate provide to an Enterprise that you do not finance.

(b) The Secretary’s approval. You must obtain the Secretary’s prior written approval of any management services fees and other fees described in this section that you or your Associate charge.

(c) Permitted management fees. You or your Associate may provide management services to a Portfolio Concern financed by you if:

(1) You or your Associate have entered into a written contract with the Portfolio Concern;

(2) The fees charged are for services actually performed;

(3) Services are provided on an hourly fee, project fee, or other reasonable basis;

(4) You can demonstrate to the Secretary, upon request, that the rate does not exceed the prevailing rate charged for comparable services by other organizations in the geographic area of the Portfolio Concern; and

(5) All of the management services fees paid to your Associate by a Portfolio Concern for management services provided by the Associate are allocated back to you for your benefit.

(d) Fees for service as a board member. You or your Associate may receive fees in the form of cash, warrants, or other payments, for services provided as members of the board of directors of a Portfolio Concern Financed by you. The fees must not exceed those paid to other outside board members. In the absence of such board members, fees must be reasonable when compared with amounts paid to outside directors of similar companies. At least 50 percent of any board member services fees paid to your Associate by a Portfolio Concern for board member services provided by the Associate must be allocated back to you for your benefit.

(e) Approval required. You must obtain the Secretary’s prior written approval of any management contract that does not satisfy paragraphs (c) or (d) of this section.

(f) Transaction fees. (1) You or your Associate may charge reasonable transaction fees for work performed preparing an Enterprise for a public offering, private offering, or sale of all or part of the business, and for assisting with the transaction. Compensation may be in the form of cash, notes,
All of the transaction services fees paid to your Associate by a Portfolio Concern for transaction services provided by the Associate must be allocated back to you for your benefit.

(2) Your Associate may charge market rate investment banking fees to a Portfolio Concern on that portion of a Financing that you do not provide.

(g) Recordkeeping Requirements. You must keep a record of hours spent and amounts charged to the Portfolio Concern, including expenses charged.

Subpart J—Financial Assistance for RBICs (Leverage)

GENERAL INFORMATION ABOUT OBTAINING LEVERAGE

§ 4290.1100 Type of Leverage and application procedures.

(a) Type of Leverage available. You may apply for Leverage from the Secretary in the form of a guarantee of your Debentures.

(b) Applying for Leverage. The Leverage application process has two parts. You must first apply for the Secretary’s conditional commitment to reserve a specific amount of Leverage for your future use. You may then apply to draw down Leverage against the commitment. See §§ 4290.1200 through 4290.1240.

(c) Where to send your application. Send all Leverage draw-down applications to Funding Control Officer, Investment Division, U.S. Small Business Administration, 409 Third Street, SW., Suite 6300, Mail Code 7050, Washington, DC 20416.

§ 4290.1120 General eligibility requirements for Leverage.

To be eligible for Leverage, you must be in compliance with the Act, the regulations in this part, and your Participation Agreement.

§ 4290.1130 Leverage fees payable by RBIC.

(a) Leverage fee. You must pay the Secretary a non-refundable leverage fee for each issuance of a Debenture. The fee is 3 percent of the face amount of the Debenture issued, and will be deducted from the proceeds remitted to you.

(b) Additional charge. You must pay the Secretary an additional annual charge of 1 percent of the outstanding amount of your Debenture.

(c) Other Leverage fees. The Secretary may establish a fee structure for services performed by the Central Registration Agent (CRA). The Secretary will not collect any fee for its guarantee of TCs.

§ 4290.1140 RBIC’s acceptance of remedies under § 4290.1810.

If you issue Leverage, you automatically agree to the terms and conditions in §4290.1810 as it exists at the time of issuance. The effect of these terms and conditions is the same as if they were fully incorporated in the terms of your Leverage.

MAXIMUM AMOUNT OF LEVERAGE FOR WHICH A RBIC IS ELIGIBLE

§ 4290.1150 Maximum amount of Leverage for a RBIC.

The face amount of a RBIC’s outstanding Debentures may not exceed the lesser of 200 percent of its Leverageable Capital or $105,000,000.

CONDITIONAL COMMITMENTS TO RESERVE LEVERAGE FOR A RBIC

§ 4290.1200 Leverage commitment to a RBIC—application procedure, amount, and term.

(a) General. Under the provisions in §§ 4290.1200 through 4290.1240, you may apply for the Secretary’s conditional commitment to reserve a specific amount of Leverage and type of Debenture (standard or discounted) for your future use. You may then apply to draw down Leverage against the commitment.

(b) Applying for a Leverage commitment. The Secretary will notify you when requests for Leverage commitments are being accepted, and upon receipt of your request, will send you a complete application package.

(c) Limitations on the amount of a Leverage commitment. The amount of a Leverage commitment must be a multiple of $5,000. The Secretary in his or her discretion may determine a minimum
§ 4290.1230 Requirement for RBIC to file financial statements at the time of request for a draw.

(a) If you submit a request for a draw against your Leverage commitment more than 90 days following your submission of an annual SBA Form 468 or a SBA Form 468 (Short Form) or other USDA-approved form(s), you must:

(1) Give the Secretary a financial statement on Form 468 (Short Form) or other USDA-approved form(s), and

(2) File a statement of no material adverse change in your financial condition since your last filing of SBA Form 468 or other USDA-approved form(s).

(b) You will not be eligible for a draw if you are not in compliance with this §4290.1220.

§ 4290.1230 Draw-downs by RBIC under Leverage commitment.

(a) RBIC’s authorization of the Secretary to guarantee securities. By submitting a request for a draw against the Leverage commitment, you authorize the Secretary, or the Secretary’s designated agent or trustee, to guarantee your Debenture and to sell it with the Secretary’s guarantee.

(b) Limitations on amount of draw. The amount of a draw must be a multiple of $5,000. The Secretary, in his or her discretion, may determine a minimum dollar amount for draws against Leverage commitments. Any such minimum amounts will be published in Notices in the FEDERAL REGISTER from time to time.

(c) Effect of regulatory violations on RBIC’s eligibility for draws—(1) General rule. You are eligible to make a draw against your Leverage commitment only if you are in compliance with all applicable provisions of the Act and this part (i.e., no unresolved statutory or regulatory violations) and your Participation Agreement.

(2) Exception to general rule. If you are not in compliance, you may still be eligible for draws if:

(i) The Secretary determines that your outstanding violations are of non-substantive provisions of the Act or this part or your Participation Agreement and that you have not repeatedly violated any non-substantive provisions; or

(ii) You have agreed with the Secretary in writing on a course of action to resolve your violations and such agreement does not prevent you from issuing Leverage.

(d) Procedures for funding draws. You may request a draw at any time during the term of the commitment. With each request, submit the following documentation:

(1) A statement certifying that there has been no material adverse change in your financial condition since your last filing of SBA Form 468 or other USDA-approved form(s) (see also §4290.1220 for filing requirements).

(2) If your request is submitted more than 30 days following the end of your fiscal year, but before you have submitted your annual filing of SBA Form 468 or other USDA-approved form(s) in accordance with §4290.630(a), a preliminary unaudited annual financial statement on SBA Form 468 (Short Form) or other USDA-approved form(s).

(3) A statement certifying that to the best of your knowledge and belief, you are in compliance with all provisions of the Act and this part (i.e., no unresolved regulatory or statutory violations) and your Participation Agreement, or a statement listing any specific violations you are aware of. Either statement must be executed by one of the following:

(i) An officer of the RBIC;

(ii) An officer of a corporate general partner or managing member of the RBIC;

(iii) An individual who is authorized to act as or for a general partner of the RBIC; or
§ 4290.1240 Funding of RBIC’s draw request through sale to third-party.

(a) RBIC’s authorization of the Secretary to arrange sale of Debentures to third-party. By submitting a request for a draw of Debenture Leverage, you authorize the Secretary, or any agent or trustee the Secretary designates, to enter into any agreements (and to bind you to such agreements) necessary to accomplish:

1. The sale of your Debenture to a third-party at a price approved by the Secretary; and

2. The purchase of your Debenture from the third-party and the pooling of your Debenture with other Debentures with the same maturity date.

(b) Sale of Debentures to a third-party. If the Secretary arranges for the sale of your Debenture to a third-party, the sale price may be an amount discounted from the face amount of the Debenture.

§ 4290.1500 Restrictions on distributions to RBIC investors while RBIC has outstanding Leverage.

(a) Restriction on distribution. If you have outstanding Leverage, whenever you make a distribution to your investors you must make, at the same time, a prepayment to or for the benefit of the third-party holder of the Debenture sold pursuant to § 4290.1240 of this part, accrued unpaid interest and the principal, in whole or in part, of one or more of your Debentures outstanding as of the date of the distribution (subject to the terms of such Debentures).

(b) Amount of prepayment. You must calculate the amount due the third-party holder by multiplying the total amount you intend to distribute by a fraction whose numerator is the outstanding principal of your Debenture(s) immediately preceding your distribution, and whose denominator is the sum of your Leverageable Capital as of that time plus the outstanding principal amount of your Debentures. For purposes of the preceding sentence “principal” means both the net proceeds and interest accrued to date of a discounted Debenture. The amount of any payment received under this section will be credited first against unpaid interest accrued to the date of distribution and then to the principal in whole or in part of the first Debenture you select to prepay and then to the interest and principal in whole or in part of such other Debenture(s) as you select to prepay. You may elect to prepay in whole any discounted Debenture under this section only within five years of its maturity date. Payments under this section must be made on the next occurring March 1 or September 1.

(c) Effect of prepayment. Subject to the terms of the Debenture(s), you may voluntarily prepay additional principal, but neither mandatory nor voluntary prepayment will increase your future Leverage eligibility.
FUNDING LEVERAGE BY USE OF GUARANTEED TRUST CERTIFICATES ("TCs")

§ 4290.1600 Secretary's authority to issue and guarantee Trust Certificates.

(a) Authorization. Section 384F of the Act authorizes the Secretary to issue TCs and to guarantee the timely payment of the principal and interest thereon. Any such guarantee of such TC is limited to the principal and interest due on the Debentures in any Trust or Pool backing such TC. The full faith and credit of the United States is pledged to the payment of all amounts due under the guarantee of any TC.

(b) Authority to arrange public or private fundings of Leverage. The Secretary in his or her discretion may arrange for public or private financing under his or her guarantee authority. Such financing may be accomplished by the sale of individual Debentures, aggregations of Debentures, or Pools or Trusts of Debentures.

(c) Pass-through provisions. TCs shall provide for a pass-through to their holders of all amounts of principal and interest paid on the Debentures in the Pool or Trust against which they are issued.

(d) Formation of a Pool or Trust holding Leverage Securities. The Secretary shall approve the formation of each Pool or Trust. The Secretary may, in his or her discretion, establish the size of the Pools and their composition, the interest rate on the TCs issued against Trusts or Pools, discounts, premiums and other charges made in connection with the Pools, Trusts, and TCs, and any other characteristics of a Pool or Trust he or she deems appropriate. Notwithstanding § 4290.1130(c), any agent of the Secretary may collect a fee for the functions described in 7 U.S.C. 2009cc-5(e)(2) that does not exceed $500.

§ 4290.1610 Effect of prepayment or early redemption of Leverage on a Trust Certificate.

(a) The rights, if any, of a RBIC to prepay any Debenture is established by the terms of such security, and no such right is created or denied by the regulations in this part.

(b) The Secretary's rights to purchase or prepay any Debenture without premium are established by the terms of the Guaranty Agreement relating to the Debenture.

(c) Any prepayment of a Debenture pursuant to the terms of the Guaranty Agreement relating to such security shall reduce the Secretary's guarantee of timely payment of principal and interest on a TC in proportion to the amount of principal that such prepaid Debenture represents in the Trust or Pool backing such TC.

(d) The Secretary shall be discharged from his or her guarantee obligation to the holder or holders of any TC, or any successor or transferee of such holder, to the extent of any such prepayment, whether or not such successor or transferee shall have notice of any such prepayment.

(e) Interest on prepaid Debentures shall accrue only through the date of prepayment.

(f) In the event that all Debentures constituting a Trust or Pool are prepaid, the TCs backed by such Trust or Pool shall be redeemed by payment of the unpaid principal and interest on the TCs; provided, however, that in the case of the prepayment of a Debenture pursuant to the provisions of the Guaranty Agreement relating to the Debenture, the Central Registration Agent (CRA) shall pass through pro rata to the holders of the TCs any such prepayment including any prepayment penalty paid by the obligor RBIC pursuant to the terms of the Debenture.

§ 4290.1620 Functions of agents, including Central Registration Agent, Selling Agent and Fiscal Agent.

(a) Agents. The Secretary may appoint or cause to be appointed agent(s) to perform functions necessary to market and service Debentures or TCs pursuant to this part.

(i) Selling Agent. As a condition of guaranteeing a Debenture, the Secretary may cause each RBIC to appoint a Selling Agent to perform functions that include, but are not limited to:

(1) Selecting qualified entities to become pool or Trust assemblers ("Poolers").
(i) Receiving guaranteed Debentures as well as negotiating the terms and conditions of sales or periodic offerings of Debentures and/or TCs on behalf of RBICs.

(ii) Directing and coordinating periodic sales of Debentures and/or TCs.

(iv) Arranging for the production of Offering Circulars, certificates, and such other documents as may be required from time to time.

(2) Fiscal Agent. The Secretary shall appoint a Fiscal Agent to:

(i) Establish performance criteria for Poolers.

(ii) Monitor and evaluate the financial markets to determine those factors that will minimize or reduce the cost of funding Debentures.

(iii) Monitor the performance of the Selling Agent, Poolers, CRA, and the Trustee.

(iv) Perform such other functions as the Secretary, from time to time, may prescribe.

(3) Central Registration Agent. Pursuant to a contract entered into with the Secretary, the CRA, as the Secretary’s agent, will do the following with respect to the Pools or Trust Certificates for the Debentures:

(i) Form an approved Pool or Trust;

(ii) Issue the TCs in the prescribed form;

(iii) Transfer the TCs upon the sale of original issue TCs in any secondary market transaction;

(iv) Receive payments from RBICs;

(v) Make periodic payments as scheduled or required by the terms of the TCs, and pay all amounts required to be paid upon prepayment of Debentures;

(vi) Hold, safeguard, and release all Debentures constituting Trusts or Pools upon instructions from the Secretary;

(vii) Remain custodian of such other documentation as the Secretary shall direct by written instructions;

(viii) Provide for the registration of all pooled Debentures, all Pools and Trusts, and all TCs; and

(ix) Perform such other functions as the Secretary may deem necessary to implement the provisions of this section.

(b) Functions. Either the Secretary or an agent appointed by the Secretary may perform the function of locating purchasers, and negotiating and closing the sale of Debentures and TCs. Nothing in the regulations in this part shall be interpreted to prevent the CRA from acting as the Secretary’s agent for this purpose.

§ 4290.1630 Regulation of Brokers and Dealers and disclosure to purchasers of Leverage or Trust Certificates.

(a) Brokers and Dealers. Each broker, dealer, and Pool or Trust assembler approved by the Secretary pursuant to these regulations shall either be regulated by a Federal financial regulatory agency, or be a member of the National Association of Securities Dealers (NASD), and shall be in good standing in respect to compliance with the financial, ethical, and reporting requirements of such body. It also shall be in good standing with the Secretary as determined by the SBA official with delegated authority to make this determination (see paragraph (c) of this section) and shall provide a fidelity bond or insurance in such amount as the Secretary may require.

(b) Suspension and/or termination of Broker or Dealer. The Secretary shall exclude from the sale and all other dealings in Debentures or TCs any broker or dealer:

(1) If such broker’s or dealer’s authority to engage in the securities business has been revoked or suspended by a supervisory agency. When such authority has been suspended, the Secretary will suspend such broker or dealer for the duration of such suspension by the supervisory agency.

(2) If such broker or dealer has been indicted or otherwise formally charged with a misdemeanor or felony bearing on its fitness, such broker or dealer may be suspended while the charge is pending. Upon conviction, participation may be terminated.

(3) If such broker or dealer has suffered an adverse final civil judgment holding that such broker or dealer has committed a breach of trust or violation of law or regulation protecting the integrity of business transactions or relationships, participation in the market for Debentures or TCs may be terminated.
(c) Termination/suspension proceedings. A broker’s or dealer’s participation in the market for Debentures or TCs will be conducted in accordance with 7 CFR part 11. The Secretary may, for any of the reasons stated in paragraphs (b)(1) through (3) of this section, suspend the privilege of any broker or dealer to participate in this market. The Secretary shall give written notice at least ten business days prior to the effective date of such suspension. Such notice shall inform the broker or dealer of the opportunity for a hearing pursuant to 7 CFR part 11.

§ 4290.1640 Secretary’s access to records of the CRA, Brokers, Dealers and Pool or Trust assemblers.

The CRA and any broker, dealer and Pool or Trust assembler operating under the regulations in this part shall make all books, records and related materials associated with Debentures and TCs available to the Secretary for review and copying purposes. Such access shall be at such party’s primary place of business during normal business hours.

MISCELLANEOUS

§ 4290.1700 Secretary’s transfer of interest in a RBIC’s Leverage security.

Upon such conditions and for such consideration as he or she deems reasonable, the Secretary may sell, assign, transfer, or otherwise dispose of any Debenture held by or on behalf of the Secretary. Upon notice by the Secretary, a RBIC will make all payments of principal and interest as shall be directed by the Secretary. A RBIC will be liable for all damage or loss which the Secretary may sustain by reason of the RBIC’s failure to follow such payment instructions, up to the amount of the RBIC’s liability under such security, plus court costs and reasonable attorney’s fees incurred by the Secretary.

§ 4290.1710 Secretary’s authority to collect or compromise claims.

The Secretary may, upon such conditions and for such consideration as he or she deems reasonable, collect or compromise all claims relating to obligations he or she holds or has guaranteed, and all legal or equitable rights accruing to him or her.

§ 4290.1720 Characteristics of Secretary’s guarantee.

If the Secretary agrees to guarantee a RBIC’s Debentures, such guarantee will be unconditional, irrespective of the validity, regularity or enforceability of the Debentures or any other circumstances that might constitute a legal or equitable discharge or defense of a guarantor. Pursuant to its guarantee, the Secretary will make timely payments of principal and interest on the Debentures.

Subpart K—RBIC’s Noncompliance With Terms of Leverage

§ 4290.1810 Events of default and the Secretary’s remedies for RBIC’s noncompliance with terms of Debentures.

(a) Applicability of this section. Upon acceptance of a license to operate as an RBIC, you automatically agree to the terms, conditions and remedies in this section, as in effect at the time of issuance of the license and as fully set forth in all documents relating to the license, including, without limitation, the Participation Agreement and Debentures.

(b) Automatic events of default. The occurrence of one or more of the events in this paragraph (b) causes the remedies in paragraph (c) of this section to take effect immediately.

1. Insolvency. You become equitably or legally insolvent.

2. Voluntary assignment. You make a voluntary assignment for the benefit of creditors without the Secretary’s prior written approval.

3. Bankruptcy. You file a petition to begin any bankruptcy or reorganization proceeding, receivership, dissolution or other similar creditors’ rights proceeding, or such action is initiated against you and is not dismissed within 60 days.

(c) Remedies for automatic events of default. Upon the occurrence of one or more of the events in paragraph (b) of this section:

1. Without notice, presentation or demand, the entire indebtedness evidenced by your Debentures, including
accrued interest, and any other amounts owed with respect to your Debentures, is immediately due and payable; and

(2) You automatically consent to the appointment of the Secretary or his or her designee, as your receiver under section 384M of the Act.

(d) Events of default with notice. For any occurrence (as determined by the Secretary) of one or more of the events in this paragraph (d), the Secretary may avail him or herself of one or more of the remedies in paragraph (e) of this section.

(1) Fraud. You commit a fraudulent act that causes detriment to the Secretary’s position as a creditor or guarantor.

(2) Fraudulent transfers. You make any transfer or incur any obligation that is fraudulent under the terms of 11 U.S.C. 548.

(3) Willful conflicts of interest. You willfully violate §4290.730.

(4) Willful non-compliance. You willfully violate one or more of the substantive provisions of the Act or any substantive regulation promulgated under the Act or any substantive provision of your Participation Agreement.

(5) Repeated Events of Default. At any time after being notified of the occurrence of an event of default under paragraph (f) of this section, you engage in similar behavior that results in another occurrence of the same event of default.

(e) Remedies for events of default with notice. Upon written notice to you of the occurrence (as determined by the Secretary) of one or more of the events in paragraph (d) of this section:

(1) The Secretary may declare the entire indebtedness evidenced by your Debentures, including accrued interest and/or any other amounts owed the Secretary with respect to your Debentures, immediately due and payable:

and

(2) The Secretary may avail himself or herself of any remedy available under the Act, specifically including institution of proceedings for his or her, or his or her designee’s appointment as your receiver under section 384M(c) of the Act.

(f) Events of default with opportunity to cure. For any occurrence (as determined by the Secretary) of one or more of the events in this paragraph (f), the Secretary may avail him or herself of one or more of the remedies in paragraph (g) of this section.

(1) Excessive Management Expenses. Without the Secretary’s prior written consent, you incur Management Expenses in excess of those permitted under §§4290.510 and 4290.520.

(2) Improper Distributions. You make any Distribution to your shareholders or partners, except with the Secretary’s prior written consent, other than:

(i) Distributions permitted under §4290.585; and

(ii) Payments from Retained Earnings Available for Distribution based on either the shareholders’ or members’ pro-rata interests or the provisions for profit distributions in your partnership agreement, as appropriate.

(3) Failure to make payment. Unless otherwise approved by the Secretary, you fail to make timely payment of any amount due under any security or obligation of yours that is issued to, held or guaranteed by the Secretary.

(4) Failure to maintain Regulatory Capital. You fail to maintain the minimum Regulatory Capital required under these regulations or, without the Secretary’s prior written consent, you reduce your Regulatory Capital except as permitted by §4290.585.
(5) **Capital Impairment.** You have a condition of Capital Impairment as determined under §4290.1830.

(6) **Cross-default.** An obligation of yours that is greater than $100,000 becomes due or payable (with or without notice) before its stated maturity date, for any reason including your failure to pay any amount when due. This provision does not apply if you pay the amount due within any applicable grace period or contest the payment of the obligation in good faith by appropriate proceedings.

(7) **Nonperformance.** You violate or fail to perform one or more of the terms and conditions of any security or obligation of yours that is issued to, held or guaranteed by the Secretary, or of any agreement (including your Participation Agreement) with or conditions imposed by the Secretary in the administration of the Act and the regulations promulgated under the Act.

(8) **Noncompliance.** Except as otherwise provided in paragraph (d)(5) of this section, the Secretary determines that you have violated one or more of the substantive provisions of the Act or any substantive regulation promulgated under the Act.

(9) **Failure to maintain diversity.** You fail to maintain diversity between management and ownership as required by §4290.150.

(g) **Remedies for events of default with opportunity to cure.** (1) Upon written notice to you of the occurrence (as determined by the Secretary) of one or more events of default in paragraphs (f) of this section, and subject to the conditions in paragraph (g)(2) of this section:

(i) The Secretary may declare the entire indebtedness evidenced by your Debentures, including accrued interest, and/or any other amounts owed the Secretary with respect to your Debentures, immediately due and payable; and

(ii) The Secretary may avail himself or herself of any remedy available under the Act, specifically including institution of proceedings for the appointment of the Secretary or a designee as your receiver under §348M of the Act.

(2) The Secretary may invoke the remedies in paragraph (g)(1) of this section only if:

(i) You have been given at least 15 days to cure the default(s); and

(ii) You fail to cure the default(s) to the Secretary’s satisfaction within the allotted time.

(h) **Repeated non-substantive violations.** If you repeatedly fail to comply with one or more of the non-substantive provisions of the Act or any non-substantive regulation promulgated under the Act, the Secretary, after written notification to you and until you cure such condition to the Secretary’s satisfaction, may deny you additional Leverage and/or require you to take such actions as the Secretary may determine to be appropriate under the circumstances.

(i) **Consent to removal of officers, directors, or general partners and/or appointment of receiver.** The Articles of each RBIC must include the following provisions as a condition to the purchase or guarantee of Leverage. Upon the occurrence of any of the events specified in paragraphs (d)(1) through (d)(6) or (f)(1) through (f)(3) of this section as determined by the Secretary, the Secretary shall have the right, and you consent to the Secretary’s exercise of such right:

(1) With respect to a Corporate RBIC, upon written notice, to require you to replace, with individuals approved by the Secretary, one or more of your officers and/or such number of directors of your board of directors as is sufficient to constitute a majority of such board; or

(2) With respect to a Partnership RBIC or an LLC RBIC, upon written notice, to require you to remove the person(s) responsible for such occurrence and/or to remove the general partner or manager of the RBIC, which general partner or manager shall then be replaced in accordance with the RBIC’s Articles by a new general partner or manager approved by the Secretary; and/or

(3) With respect to a Corporate RBIC, Partnership RBIC, or LLC RBIC, to obtain the appointment of the Secretary or his or her designee as your receiver under section 348M of the Act for the purpose of continuing your operations.

[1135]
The appointment of a receiver to liquidate an RBIC is not within such consent, but is governed instead by the relevant provisions of the Act.

COMPUTATION OF RBIC’S CAPITAL IMPAIRMENT

§ 4290.1830 RBIC’s Capital Impairment definition and general requirements.

(a) Significance of Capital Impairment condition. If you have a condition of Capital Impairment, you are not in compliance with the terms of your Leverage. As a result, the Secretary has the right to impose the applicable remedies you for noncompliance in § 4290.1810(g).

(b) Definition of Capital Impairment condition. You have a condition of Capital Impairment if your Capital Impairment Percentage, as computed pursuant to the procedures set forth in § 4290.1840, exceeds 70 percent.

(c) Quarterly computation requirement and procedure. You must determine whether you have a condition of Capital Impairment as of the end of each fiscal quarter. You must notify the Secretary promptly if you are Capitally Impaired.

(d) The Secretary’s right to determine RBIC’s Capital Impairment condition. The Secretary may make his or her own determination of your Capital Impairment condition at any time.

§ 4290.1840 Computation of RBIC’s Capital Impairment Percentage.

(a) General. This section contains the procedures you must use to determine your Capital Impairment Percentage. You must compare your Capital Impairment Percentage to the maximum permitted under § 4290.1830(b) to determine whether you have a condition of Capital Impairment.

(b) Preliminary impairment test. If you satisfy the preliminary impairment test, your Capital Impairment Percentage is zero and you do not have to perform any more procedures in this § 4290.1840. Otherwise, you must continue with paragraph (c) of this section. You satisfy the test if each of the following amounts is zero or greater:

(1) The sum of Undistributed Net Realized Earnings, as reported on SBA Form 468 or other USDA-approved form(s) and Includible Non-Cash Gains.

(2) Unrealized Gain (Loss) on Securities Held.

(c) How to compute your Capital Impairment Percentage. (1) If you have an Unrealized Gain on Securities Held, compute your Adjusted Unrealized Gain using paragraph (d) of this section. If you have an Unrealized Loss on Securities Held, continue with paragraph (c)(2) of this section.

(2) Add together your Undistributed Net Realized Earnings, your Includible Non-cash Gains, and either your Unrealized Loss on Securities Held or your Adjusted Unrealized Gain.

(3) If the sum in paragraph (c)(2) of this section is zero or greater, your Capital Impairment Percentage is zero.

(4) If the sum in paragraph (c)(2) of this section is less than zero, drop the negative sign, divide by your Regulatory Capital (excluding Treasury Stock), and multiply by 100. The result is your Capital Impairment Percentage.

(d) How to compute your Adjusted Unrealized Gain. (1) Subtract Unrealized Depreciation from Unrealized Appreciation. This is your “Net Appreciation”.

(2) Determine your Unrealized Appreciation on Publicly Traded and Marketable securities. This is your “Class I Appreciation”.

(3) Determine your Unrealized Appreciation on securities that are not Publicly Traded and Marketable and meet the following criteria, which must be substantiated to the Secretary’s satisfaction (this is your “Class 2 Appreciation”):

(i) The Portfolio Concern that issued the security received a significant subsequent equity financing by an investor whose objectives were not primarily strategic and at a price that conclusively supports the Unrealized Appreciation;

(ii) Such financing represents a substantial investment in the form of an arm’s-length transaction by a sophisticated new investor in the issuer’s securities; and

(iii) Such financing occurred within 24 months of the date of the Capital
Impairment computation, or the Portfolio Concern’s pre-tax cash flow from operations for its most recent fiscal year was at least 10 percent of its average contributed capital for such fiscal year. (4) Perform the appropriate computation from the table in 13 CFR 107.1840(d)(4).

(5) Reduce the gain computed in paragraph (d)(4) of this section by your estimate of related future income tax expense. Subject to any adjustment required by paragraph (d)(6) of this section, the result is your Adjusted Unrealized Gain for use in paragraph (c)(2) of this section.

(6) If any securities that are the source of either Class 1 or Class 2 Appreciation are pledged or encumbered in any way, you must reduce the Adjusted Unrealized Gain computed in paragraph (d)(5) of this section by the amount of the related borrowing or other obligation, up to the amount of the Unrealized Appreciation on the securities.

§ 4290.1920 RBIC’s application for exemption from a regulation in this part 4290.

(a) General. You may file an application in writing with the Secretary to have a proposed action exempted from any procedural or substantive requirement, restriction, or prohibition to which it is subject under this part, unless the provision is mandated by the Act. The Secretary may grant an exemption for such applicant, conditionally or unconditionally, provided the exemption would not be contrary to the purposes of the Act.

(b) Contents of application. Your application must be accompanied by supporting evidence that demonstrates to the Secretary’s satisfaction that:

(1) The proposed action is fair and equitable; and

(2) The exemption requested is reasonably calculated to advance the best interests of the RBIC program in a manner consistent with the policy objectives of the Act and the regulations in this part.

§ 4290.1930 Effect of changes in this part 4290 on transactions previously consummated.

The legality of a transaction covered by the regulations in this part is governed by the regulations in this part in effect at the time the transaction was consummated, regardless of later changes. Nothing in this part bars enforcement action with respect to any transaction consummated in violation of provisions applicable at the time, but no longer in effect.

§ 4290.1940 Integration of this part with other regulations applicable to USDA’s programs.

(a) Intergovernmental review. To the extent applicable to this part, the Secretary will comply with subpart V of 7 CFR part 3015, “Intergovernmental Review of Department of Agriculture Programs and Activities.”
has not delegated this responsibility to SBA pursuant to §4290.45 of this part.

(b) National flood insurance. To the extent applicable to this part, the Secretary will comply with subpart B of 7 CFR part 1806. The Secretary has not delegated this responsibility to SBA pursuant to §4290.45 of this part.

(c) Clean Air Act and Water Pollution Control Act requirements. To the extent applicable to this part, the Secretary will comply with the requirements of the Clean Air Act, section 306; the Clean Water Act, section 508; Executive Order 11738; and 40 CFR part 32. The Secretary has not delegated this responsibility to SBA pursuant to §4290.45 of this part.

(d) Historic preservation requirements. To the extent applicable to this part, the Secretary will comply with subpart F of 7 CFR part 1901. The Secretary has not delegated this responsibility to SBA pursuant to §4290.45 of this part.

(e) Lead-based paint requirements. To the extent applicable to this part, the Secretary will comply with subpart A of 7 CFR part 1924. The Secretary has not delegated this responsibility to SBA pursuant to §4290.45 of this part.

(f) Conflict of interest. To the extent applicable to this part, the Secretary will comply with subpart D of 7 CFR part 1900 and RD Instruction 2045– BB. The Secretary has not delegated this responsibility to SBA pursuant to §4290.45 of this part.

(g) Civil rights impact analysis. To the extent applicable to this part, the Secretary will comply with RD Instruction 2006– P, “Civil Rights Impact Analysis.” The Secretary has not delegated this responsibility to SBA pursuant to §4290.45 of this part.

(h) Environmental requirements. To the extent applicable to this part, the Secretary will comply with subpart G of 7 CFR part 1940. The Secretary has not delegated this responsibility to SBA pursuant to §4290.45 of this part.

(i) Appeals to the National Appeals Division for review of adverse decisions. Applicants and RBICs have the right to request review by the National Appeals Division within the USDA of adverse decisions, as defined in 7 CFR 11.1, pursuant to 7 CFR part 11.

Subpart N—Requirements for Operational Assistance Grants to RBICs

§4290.2000 Operational Assistance Grants to RBICs.

(a) Regulations governing. Regulations governing Operational Assistance grants to RBICs may be found in subparts D and E of this part 4290 and in this §4290.2000.

(b) Restrictions on use. A RBIC must use Operational Assistance grant funds only to provide Operational Assistance to Smaller Enterprises to which it either has made, or expects to make, a Financing.

(c) Amount of grant. Each RBIC will receive an Operational Assistance grant award equal to the lesser of 10 percent of the Regulatory Capital raised by the RBIC at the time of licensing or $1,000,000.

(d) Term. Operational Assistance grants made under this part will be made for a multiyear period (not to exceed 10 years) under such terms as the Secretary may require.

(e) Reporting and recordkeeping requirements. Policies governing reporting, record retention, and recordkeeping requirements applicable to RBICs may be found in subpart H of this part 4290.

Subpart O—Additional Requirements for Non-Leveraged Licensees and Exceptions to Regulations

SOURCE: 76 FR 80225, Dec. 23, 2011, unless otherwise noted.

§4290.3000 Non-leveraged RBICs—General.

This subpart identifies provisions specific to RBICs seeking a non-leveraged license, including exceptions and additions to provisions associated with subparts A through N of this part.

§§4290.3001–4290.3002 [Reserved]

§4290.3003 Responsibilities for implementing Non-leveraged RBICs.

Section 4290.45 does not apply to Non-leveraged RBICs. Instead, for the purposes of this part as it applies to Non-
leveraged RBICs, all authorities and responsibilities assigned to the Secretary under this part shall be carried out by the Secretary. Thus, when applying subparts A through N of this part to Non-leveraged RBICs, all references to the Small Business Administration (SBA) or Administrator on behalf of USDA shall be read as the Secretary. All forms shall be submitted to USDA or its designee.

§ 4290.3004 [Reserved]

§ 4290.3005 Qualifications for the Non-leveraged RBIC Program.

(a) Business form. In addition to complying with the applicable provisions of §4290.100 not otherwise modified by this section, paragraphs (a)(1) through (a)(4) of this section apply.

1. For RBICs applying for non-leveraged status, the types of investors eligible to invest in a RBIC must have been approved by the Secretary. Investors seeking approval must submit a request to the Secretary with sufficient documentation to support their request. The USDA will announce such approved categories and types of investors in a public notice published in the Federal Register from time to time. Subsequent notices that modify the types of investors eligible to invest in a RBIC will not be applied retroactively.

2. In lieu of complying with §4290.100(d)(1)(i), you must have a minimum duration of 10 years. After 10 years, the Partnership RBIC may be terminated by a vote of your partners.

3. In lieu of complying with §4290.100(d)(2), if you are a LLC RBIC, you must have a minimum duration of 10 years. After 10 years, the LLC RBIC may be terminated by a vote of your members.

4. In lieu of complying with §4290.100(d)(3), if you are a Corporate RBIC, you must have a duration of not less than 30 years unless earlier dissolved by the shareholders.

(b) Approval of initial Management Expenses. Section 4290.140 does not apply to Non-leveraged RBICs. However, the Secretary will provide a cap on these expenses in each Federal Register notice soliciting applications for Non-leveraged RBICs.

(c) Management and ownership diversity requirements. A Non-leveraged RBIC is subject to the provisions of §4290.150 unless it is exempted from these provisions by the Secretary. Exemptions will only be granted when the applicant establishes, to the satisfaction of the Secretary, that granting the exemption will not unduly impair the integrity and soundness of the Non-leveraged RBIC.

(d) Special rules for Partnership RBICs and LLC RBICs. Paragraph (c) of §4290.160 does not apply to Non-leveraged RBICs.

§§ 4290.3006–4290.3009 [Reserved]

§ 4290.3010 Application and Approval Process for RBIC licensing without Leverage.

(a) The provisions of §4290.300 notwithstanding, the Secretary will accept, at any time, applications for consideration as a Non-leveraged RBIC. The number of applications that the Agency will receive each year, and any fees and conditions, will be announced annually in a Federal Register notice.

(b) The provision for evaluating applicants on a competitive basis, as specified in §4290.340(a), does not apply to this subpart.

(c) The provisions specified in §4290.370(m) do not apply to this subpart.

§§ 4290.3011–4290.3014 [Reserved]

§ 4290.3015 Evaluation and selection of Non-leveraged RBICs.

(a) General. Notwithstanding any other provision in this part, when selecting applications for non-leveraged status, the Secretary may select one or more applications, or none, for further consideration based on the evaluation criteria of this part.

(b) Eligibility and completeness. In addition to the requirements specified in §4290.350, an Applicant under this subpart must complete a written application that includes information not otherwise exempted by the Secretary, in
his or her sole discretion. The Secretary may, on his or her own initiative, exempt material from a Non-leveraged RBIC application where the Secretary determines it impedes an expedited process without a commensurate benefit to the program. To the extent that the Secretary’s exemption applies to the entire program, an announcement of the exemption will be published in the FEDERAL REGISTER. The Secretary shall make a decision as to licensing an Applicant after the receipt of a complete application and will enter into a Participation Agreement with the RBIC if approved.

(c) Effect of a RBIC license. Paragraphs (d)(2) and (d)(3) of §4290.390 do not apply to Non-leveraged RBICs.

§§ 4290.3016–4290.3019 [Reserved]

§ 4290.3020 Changes in Ownership, Structure, or Control.
Paragraph (b) in §4290.440 does not apply to Non-leveraged RBICs.

§§ 4290.3021–4290.3024 [Reserved]

§ 4290.3025 Managing the Operations of a RBIC.

(a) Nonperformance. In addition to the provisions specified in §4290.507, failure of an approved Non-leveraged RBIC to maintain sound investment practice, as determined by the Secretary, may result in loss of approval for participating in this program.

(b) Employment of USDA or SBA officials. Paragraph (a)(2) of §4290.509 does not apply to Non-leveraged RBICs.

(c) Approval of RBIC’s Investment Adviser/Manager. In addition to complying with §4290.510, a Non-leveraged RBIC must notify the Secretary of the Management Expenses to be incurred under such contract, or of any subsequent material changes in such Management Expenses, within 30 days of execution.

(d) Management Expenses of a RBIC. When complying with §4290.520, Non-leveraged RBICs do not need prior approval of initial Management Expenses and any increases in those expenses.

(e) Restrictions on investments of idle funds by RBICs. The provisions of §4290.530 apply to Non-leveraged RBICs only when the Non-leveraged RBIC engages in activities not contemplated by the Act.

(f) Prior approval of secured third-party debt of RBICs. The provisions of §4290.550 do not apply to Non-leveraged RBICs.

(g) Voluntary decrease in Regulatory Capital. When complying with §4290.585, Non-leveraged RBICs do not need to obtain prior approval for decreases in Regulatory Capital of more than 2 percent (but not below the minimum required under this Act or these regulations). However, Non-leveraged RBICs must report the reduction to the Secretary within 30 days.

§§ 4290.3026–4290.3029 [Reserved]

§ 4290.3030 Financing of Enterprises by RBICs.

(a) Non-compliance with this section. The last sentence of §4290.700(e) does not apply to Non-leveraged RBICs.

(b) Enterprises that may be ineligible for Financing. The provisions associated with real estate enterprises found in §4290.720(c) apply to Non-leveraged RBICs unless the Non-leveraged RBIC requests, and has received, an irrevocable exemption from the Secretary in accordance with §4290.1920.

(c) Farmland purchases. The provisions associated with farmland purchases found in §4290.720(e) apply to Non-leveraged RBICs unless the Non-leveraged RBIC requests, and has received, an irrevocable exemption from the Secretary in accordance with §4290.1920.

(d) Purchasing securities from an underwriter or other third party. Non-leveraged RBICs are exempt from the recordkeeping requirements and fee limitations in §4290.825(b) and (c), respectively, for securities purchased through or from an underwriter.

(e) Assets acquired in liquidation of Portfolio securities. The provisions of §4290.880 do not apply to Non-leveraged RBICs.

§§ 4290.3031–4290.3034 [Reserved]

§ 4290.3035 Recordkeeping, Reporting, and Examination Requirements for RBICs.

Except for §4290.600(d), Subpart H, Recordkeeping, Reporting, and Examination Requirements for RBICs, of this part applies to Non-leveraged RBICs.
§ 4290.3040 Financial Assistance for RBICs.

Subpart J, Financial Assistance for RBICs (Leveraged), of this part does not apply to Non-leveraged RBICs.

§ 4290.3041 Events of default and the Secretary's remedies for RBIC's noncompliance with terms of licensure.

In addition to complying with the provisions of § 4290.1810, a RBIC's failure to comply with the terms of this part may result in the Secretary revoking the Non-leveraged RBIC's license issued under this part.

§§ 4290.3042–4290.3044 [Reserved]

§ 4290.3045 Computation of RBIC's Capital Impairment.

The provisions specified in §§ 4290.1830 and 4290.1840 do not apply to Non-leveraged RBICs.

§§ 4290.3046–4290.3049 [Reserved]

§ 4290.3050 Operational Assistance Grants for RBICs.

Subpart N, Requirements for Operational Assistance Grant to RBICs, of this part does not apply to Non-leveraged RBICs. All other references to Operational Assistance in this part do not apply to Non-leveraged RBICs.

§§ 4290.3051–4290.3099 [Reserved]
