the initial crop year in which you wish to insure sweet corn under this option, and pay the additional premium indicated in the actuarial documents for this optional coverage; and

(2) You have not elected coverage under the Catastrophic Risk Protection Endorsement.

(b) In lieu of the provisions contained in section 14(c)(3) of these Crop Provisions, the total value of harvested production that is not sold by direct marketing will be determined as follows:

(1) The dollar amount obtained by multiplying the average net value per container from all sweet corn sold (this result may not be less than the minimum value option amount if such amount is provided in the Special Provisions) by the total number of all containers of sweet corn sold.

(2) For marketable sweet corn production that is not sold, the value of such production will be the dollar amount obtained by multiplying the total number of containers of such sweet corn by the minimum value for the planting period. Harvested production that is damaged or defective due to insurable causes and is not marketable will not be included as production to count.

(c) If all the requirements of insurability are met, the value of insurable production that is sold by direct marketing will be the greater of:

(1) The actual value received by you for direct marketed production; or

(2) The dollar amount obtained by multiplying the total number of containers of sweet corn sold by direct marketing by the minimum value.

(d) This option may be canceled by either you or us for any succeeding crop year by giving written notice on or before the cancellation date preceding the crop year for which the cancellation of this option is to be effective.

§ 457.130 Macadamia tree crop insurance provisions.

The macadamia tree crop insurance provisions for the 2011 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider).

Both FCIC and reinsured policies:

Macadamia Tree Crop Provisions

1. Definitions

Age. The number of complete 12-month periods that have elapsed since the month the trees were set out or were grafted, whichever is later. Age determination will be made for each unit, or portion thereof, as of January 1 of each crop year.

Crop year. A period beginning with the date insurance attaches to the macadamia tree crop extending through December 31 of the same calendar year. The crop year is designated by the calendar year in which insurance attaches.

Destroyed. Trees damaged to the extent that we determine replacement, including grafts, is required.

Good farming practices. The cultural practices generally in use in the county for the crop to have normal growth and vigor, and are those recognized by the National Institute of Food and Agriculture as compatible with agronomic and weather conditions in the area.

Graft. The uniting of a macadamia shoot to an established macadamia tree rootstock for future production of macadamia nuts.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Irrigated practice. A method by which the normal growth and vigor of the insured trees is maintained by artificially applying adequate quantities of water during the growing season by appropriate systems and at the proper times.

Rootstock. The root and stem portion of a macadamia tree to which a macadamia shoot can be grafted.

2. Unit Division

(a) Sections 34(b)(1), (3), and (4) of the Basic Provisions are not applicable.

(b) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Unless otherwise allowed by written agreement, optional units may be established only if each optional unit:

(1) Contains at least 80 acres of insurable age macadamia trees; or

(2) Is located on non-contiguous land.

(c) You must have provided records, which can be independently verified, of acreage and age of trees for each unit for at least the last crop year.

3. Insurance Guarantees, Coverage Levels, and Dollar Amounts for Determining Indemnities

(a) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8):
§ 457.130

(1) You may select only one dollar amount of insurance for all the macadamia trees in the county in each age group contained in the actuarial table that are insured under this policy. The dollar amount of insurance you choose for each age group must have the same percentage relationship to the maximum dollar amount offered by us for each age group. For example, if you choose 100 percent of the maximum dollar amount of insurance for one age group, you must also choose 100 percent of the maximum dollar amount of insurance for all other age groups.

(2) If the stand is less than 90 percent, based on the original planting pattern, the dollar amount of insurance will be reduced 1 percent for each percent below 90 percent. For example, if the dollar amount of insurance you selected is $2,000 and the stand is 85 percent of the original stand, the dollar amount of insurance on which any indemnity will be based is $1,900 ($2,000 multiplied by 0.95).

(3) You must report, by the sales closing date contained in the Special Provisions, by type if applicable:

(i) Any damage, removal of trees, change in practices, or any other circumstance that may reduce the dollar amount of insurance and the number of affected acres;

(ii) The number of trees on insurable and uninsurable acreage;

(iii) The age of the interplanted crop, and the planting pattern;

(iv) For the first year of insurance following replacement, the month and year of replacement if more than 10 percent of the trees on any unit have been replaced in the previous five crop years; and

(v) For the first year of insurance for acreage interplanted with another perennial crop, and any time the planting pattern of such acreage is changed:

(A) The age of the interplanted crop, and type if applicable.

(B) The planting pattern; and

(C) Any other information that we request in order to establish your dollar amount of insurance.

We will reduce the dollar amount of insurance as necessary, based on our estimate of the effect of interplanted perennial crop, removal of trees, damage, change in practices, and any other circumstance that adversely affects the insured crop. If you fail to notify us of any circumstance that may reduce your dollar amount of insurance from previous levels, we will reduce your dollar amount of insurance as necessary at any time we become aware of the circumstance.

(b) The production reporting requirements contained in section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), do not apply to macadamia trees.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§457.8), the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§457.8), the cancellation and termination dates are December 31.

6. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§457.8), the crop insured will be all macadamia trees in the county for which a premium rate is provided by the actuarial table:

(a) In which you have a share;

(b) That are grown for the production of macadamia nuts;

(c) For which the rootstock is adapted to the area;

(d) That are at least one year of age when the insurance period begins; and

(e) That, if the orchard is inspected, is considered acceptable by us.

7. Insurable Acreage

In lieu of the provisions in section 9 (Insurable Acreage) of the Basic Provisions (§457.8), that prohibit insurance attaching to a crop planted with another crop, macadamia trees interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(1) Coverage begins on January 1 of each crop year, except that for the year of application, if your application is received after December 22 but prior to January 1, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the orchard.

(2) The calendar date for the end of the insurance period for each crop year is December 31.

(b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance
