§ 652.6 Department delivery of technical services.

(a) The Department may enter into a procurement contract, contribution agreement, cooperative agreement, or other appropriate instrument to assist the Department in providing technical assistance when implementing the conservation programs covered by this part.

(b) The Department may enter into a procurement contract, contribution agreement, cooperative agreement, or other appropriate instrument with TSPs to provide related technical assistance services that accelerate conservation program delivery. Related technical assistance services may include activities or services that facilitate the development, processing, or implementation of a program contract, such as recording conservation planning decisions and specifications.

(c) NRCS may enter into agreements with other agencies or with a non-Federal entity to provide technical services to eligible participants.

(d) The Department will ensure that such legal instruments contain qualification and performance criteria necessary to ensure quality implementation of these conservation programs. When the Department obtains assistance from a TSP through a procurement contract, contribution agreement, cooperative agreement, or other similar instrument, the TSP is authorized to provide technical services and receive payment even if such TSP is not certified in accordance with subpart B of this part nor identified on the approved list.
§ 652.21 Certification criteria and requirements.

(a) To qualify for certification an individual must:

(1) Have the required technical training, education, and experience to perform the level of technical assistance for which certification is sought;

(2) Meet any applicable professional or business licensing or similar qualification standards established by State or Tribal law;

(3) Demonstrate, through documentation of training or experience, familiarity with NRCS guidelines, criteria, standards, and specifications as set forth in the applicable NRCS manuals, handbooks, and technical guidance for the technical services provided, and provide this documentation to NRCS and the participant when the particular technical service is completed. NRCS may utilize information obtained through its quality assurance process, documentation submitted by the TSP, and other relevant information in determining how to improve the quality of technical service, as well as determining whether to decertify a TSP under subpart C of this part.

(b) Upon discovery of a deficiency in the provision of technical service through its quality assurance process or other means, NRCS will, to the greatest extent practicable, send a notice to the TSP detailing the deficiency and requesting remedial action by the TSP. Failure by the TSP to promptly remedy the deficiency, or the occurrence of repeated deficiencies in providing technical services, may trigger the decertification process set forth in subpart C of this part. A failure by NRCS to identify a deficiency does not affect any action under the decertification process. TSPs are solely responsible for providing technical services that meet all NRCS standards and specifications.

Subpart B—Certification

§ 652.21 Certification criteria and requirements.

(a) To qualify for certification an individual must:

(1) Have the required technical training, education, and experience to perform the level of technical assistance for which certification is sought;

(2) Meet any applicable professional or business licensing or similar qualification standards established by State or Tribal law;

(3) Demonstrate, through documentation of training or experience, familiarity with NRCS guidelines, criteria, standards, and specifications as set forth in the applicable NRCS manuals, handbooks, field office technical guides, and supplements thereto for the planning and applying of specific conservation practices and management systems for which certification is sought; and

(4) Not be decertified in any State under subpart C of this part at the time of application for certification.

(b) Upon discovery of a deficiency in the provision of technical service through its quality assurance process or other means, NRCS will, to the greatest extent practicable, send a notice to the TSP detailing the deficiency and requesting remedial action by the TSP. Failure by the TSP to promptly remedy the deficiency, or the occurrence of repeated deficiencies in providing technical services, may trigger the decertification process set forth in subpart C of this part. A failure by NRCS to identify a deficiency does not affect any action under the decertification process. TSPs are solely responsible for providing technical services that meet all NRCS standards and specifications.

Subpart B—Certification

§ 652.21 Certification criteria and requirements.

(a) To qualify for certification an individual must:

(1) Have the required technical training, education, and experience to perform the level of technical assistance for which certification is sought;

(2) Meet any applicable professional or business licensing or similar qualification standards established by State or Tribal law;

(3) Demonstrate, through documentation of training or experience, familiarity with NRCS guidelines, criteria, standards, and specifications as set forth in the applicable NRCS manuals, handbooks, field office technical guides, and supplements thereto for the planning and applying of specific conservation practices and management systems for which certification is sought; and

(4) Not be decertified in any State under subpart C of this part at the time of application for certification.

(b) Upon discovery of a deficiency in the provision of technical service through its quality assurance process or other means, NRCS will, to the greatest extent practicable, send a notice to the TSP detailing the deficiency and requesting remedial action by the TSP. Failure by the TSP to promptly remedy the deficiency, or the occurrence of repeated deficiencies in providing technical services, may trigger the decertification process set forth in subpart C of this part. A failure by NRCS to identify a deficiency does not affect any action under the decertification process. TSPs are solely responsible for providing technical services that meet all NRCS standards and specifications.

(c) A technical service provider, as part of the certification by NRCS, must enter into a Certification Agreement with NRCS specifying the terms and conditions of the certification, including adherence to the requirements of this part, and acknowledging that failure to meet these requirements may result in ineligibility to receive payments from the Department, either directly or through the participant, for
