PART 400—GENERAL ADMINISTRATIVE REGULATIONS

Subparts A-B [Reserved]

Subpart C—General Administrative Regulations; Mutual Consent Cancellation

Sec.
400.27 Applicability.
400.28 Mutual consent criteria.
400.29-400.36 [Reserved]

Subparts D-E [Reserved]

Subpart F—Food Security Act of 1985, Implementation; Denial of Benefits

400.45 Applicability.
400.46 Definitions.
400.47 Denial of crop insurance.
400.48 Protection of interests of tenants, landlords or producers.
400.49-400.50 [Reserved]

Subpart G—Actual Production History

400.51 Availability of actual production history program.
400.52 Definitions.
400.53 Yield certification and acceptability.
400.54 Submission and accuracy of production reports.
400.55 Qualifications for actual production history coverage program.
400.56 Administrative appeal exhaustion.
400.57 [Reserved]

Subpart H—Information Collection Requirements Under the Paperwork Reduction Act; OMB Control Numbers

400.65-400.66 [Reserved]

Subpart J—Appeal Procedure

400.90 Definitions.
400.91 Applicability.
400.92 Appeals.
400.93 Administrative review.
400.94 Mediation.
400.95 Time limitations for filing and responding to requests for administrative review.
400.96 Judicial review.
400.97 Reservations of authority.
400.98 Reconsideration process.

Subpart K—Debt Management—Regulations for the 1986 and Succeeding Crop Years

400.115 Purpose.
400.116 Definitions.
400.117 Determination of delinquency.
400.118 Demand for payment.
400.119 Notice to debtor; credit reporting agency.
400.120 Subsequent disclosure and verification.
400.121 Information disclosure limitations.
400.122 Attempts to locate debtor.
400.123 Request for review of the indebtedness.
400.124 Disclosure to credit reporting agencies.
400.125 Notice to debtor, collection agency.
400.126 Referral of delinquent debts to contract collection agencies.
400.127 [Reserved]
400.128 Definitions.
400.129 Salary offset.
400.130 Notice requirements before offset.
400.131 Request for a hearing and result if an employee fails to meet deadlines.
400.132 Hearings.
400.133 Written decision following a hearing.
400.134 Review of FCIC record related to the debt.
400.135 Written agreement to repay debt as an alternative to salary offset.
400.136 Procedures for salary offset; when deductions may begin.
400.137 Procedures for salary offset; types of collection.
400.138 Procedures for salary offset; methods of collection.
400.139 Nonwaiver of rights.
400.140 Refunds.
400.141 Internal Revenue Service (IRS) Tax Refund Offset.
400.142 Past-due legally enforceable debt eligible for refund offset.

Subpart L—Reinsurance Agreement—Standards for Approval; Regulations for the 1997 and Subsequent Reinsurance Years

400.151 Definitions.
400.152 Qualification ratios.
400.153 Applicability.
400.154 Availability of the Standard Reinsurance Agreement.
400.155 Eligibility for Standard Reinsurance Agreements.
400.156 Obligations of the Corporation.
400.157 Limitations on Corporation’s obligations.
400.158 Obligations of participating insurance company.
400.159 Disputes.
400.160 General qualifications.
400.161 Qualifying when a state does not require that an Annual Statutory Financial Statement be filed.
400.162 Qualifying with less than two of the required ratios or ten of the analytical ratios meeting the specified requirements.
400.163 [Reserved]
Pt. 400

400.174 Notification of deviation from financial standards.
400.175 Revocation and non-acceptance.
400.176 State action preemptions.
400.177 [Reserved]

Subpart M—Agency Sales and Service Contract—Standards for Approval

400.201 Applicability of standards.
400.202 Definitions.
400.203 Financial statement and certification.
400.204 Notification of deviation from standards.
400.205 Denial or termination of contract and administrative reassignment of business.
400.206 Financial qualifications for acceptability.
400.207 Representative licensing and certification.
400.208 Term of the contract.
400.209 Electronic transmission and receiving system.
400.210 [Reserved]

Subpart N [Reserved]

Subpart O—Non-Standard Underwriting Classification System Regulations for the 1991 and Succeeding Crop Years

400.301 Basic, purpose, and applicability.
400.302 Definitions.
400.303 Initial selection criteria.
400.304 Nonstandard Classification determinations.
400.305 Assignment of Nonstandard Classifications.
400.306 Spouses and minor children.
400.307 Discontinuance of participation.
400.308 Notice of Nonstandard Classification.
400.309 Requests for reconsideration.

Subpart P—Preemption of State Laws and Regulations

400.351 Basis and applicability.
400.352 State and local laws and regulations preempted.

Subpart Q—General Administrative Regulations; Collection and Storage of Social Security Account Numbers and Employer Identification Numbers

400.401 Basis and purpose and applicability.
400.402 Definitions.
400.403 Required system of records.
400.404 Policyholder responsibilities.
400.405 Agent and loss adjuster responsibilities.
400.406 Insurance provider responsibilities.
400.407 Restricted access.
400.408 Safeguards and storage.
400.409 Unauthorized disclosure.
400.410 Penalties.
400.411 Obtaining personal records.
400.412 Record retention.
400.413 [Reserved]

Subpart R—Administrative Remedies for Non-Compliance

400.451 General.
400.452 Definitions.
400.453 Exhaustion of administrative remedies.
400.454 Disqualification and civil fines.
400.455 Governmentwide debarment and suspension (procurement).
400.456 Governmentwide debarment and suspension (nonprocurement).
400.457 Program Fraud Civil Remedies Act.
400.458 Scheme or device.
400.459-400.500 [Reserved]

Subpart S [Reserved]

Subpart T—Federal Crop Insurance Reform, Insurance Implementation

400.650 Purpose.
400.651 Definitions.
400.652 Insurance availability.
400.653 Determining crops of economic significance.
400.654 Application and acreage report.
400.655 Eligibility for other program benefits.
400.656-400.657 [Reserved]

Subpart U—Ineligibility for Programs Under the Federal Crop Insurance Act

400.675 Purpose.
400.676 [Reserved]
400.677 Definitions.
400.678 Applicability.
400.679 Criteria for ineligibility.
400.680 Determination and notification of ineligibility.
400.681 Effect of ineligibility.
400.682 Criteria for reinstatement of eligibility.
400.683 Administration and maintenance.

Subpart V—Submission of Policies, Provisions of Policies and Rates of Premium

400.700 Basis, purpose, and applicability.
400.701 Definitions.
400.702 Confidentiality of submission and duration of confidentiality.
400.703 Timing of submission.
400.704 Type of submission.
400.705 Contents required for a new submission or changes to a previously approved submission.
400.706 Review of submission.
400.707 Presentation to the Board for approval or disapproval.
Federal Crop Insurance Corporation, USDA

§ 400.45

Applicability.

(a) The regulations in this subpart implement Chapter XII and section 1764 of the Food Security Act of 1985 (Pub. L. 99-198) (the Act) requiring the denial of crop insurance to persons who are determined to have performed certain practices prohibited by the Act or who have violated certain federal or State statutes or the regulations implementing the Act. The provisions of this subpart are applicable to all crop insurance policies written by the Federal Crop Insurance Corporation (the Corporation) or reinsured by the Corporation.

(1) Insurance was not a condition of eligibility for disaster payment, based on one or more of the statutory criteria; or

(2) the producer withdrew his application for disaster payments with prejudice or it was rejected by Commodity Credit Corporation;

(b) Cancellation requests must be received in writing no later than three weeks after the date:

(1) The disaster payment check is issued; or

(2) The producer is notified that an application for disaster payment has been rejected; or

(3) The producer withdraws from the disaster payment program.

(c) Carryover policies are not available for mutual consent cancellation. Crop insurance applications dated before the disaster cancellation date (available in the insureds' service office) are not eligible for mutual consent cancellations.

57 FR 56438, Nov. 30, 1992, as amended at 58 FR 67304, Dec. 21, 1993

§§ 400.29-400.36 [Reserved]

Subparts D-E [Reserved]
§ 400.46 Definitions.

For the purpose of this regulation and in addition to the definitions included at 7 CFR 12.2, the following definitions are applicable:

(a) **Controlled substance** means any prohibited drug-producing plants including, but not limited to, cacti of the genus *lophophora*, coca bushes (*erythroxylum coca*), marijuana (*cannabis sativa*), opium poppies (*papaver somniferum*), and other drug-producing plants, the planting and harvesting of which is prohibited by Federal or State law.

(b) **Person** means any producer, tenant, or landlord, insured under a policy of crop insurance issued by FCIC, or by a multi-peril insurance company whose crop insurance policy is reinsured by FCIC.

(c) **State** means each of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Trust Territory of the Pacific.

§ 400.47 Denial of crop insurance.

(a) Any person convicted under Federal or State law of planting, cultivating, growing, producing, harvesting or storing a controlled substance in any crop year will be ineligible for crop insurance during that crop year and the four succeeding crop years.

1. The insurance of such person insured by FCIC who found to be ineligible under paragraph (a) of this section will be null and void, and any indemnity paid on such insurance must be returned in full to FCIC. Any premium paid for insurance coverage declared null and void will be returned, less a reasonable amount for expenses and handling not to exceed 20 percent of the premium paid.

2. The application and policy of insurance will be voided, or the person will be removed from the policy and the policyholder share reduced in accordance with 7 CFR 400.681(b), when any person becomes ineligible for crop insurance under the provisions of paragraph (a) of this section. To obtain crop insurance coverage following the period of ineligibility, the person must submit a new application for crop insurance.

(b) Any insurance written by a multi-peril crop insurance company to any person who is ineligible under the provisions of this subpart is not eligible for reinsurance under the Corporation's standard reinsurance agreement. Any premium subsidy and expense allowance or loss paid by the Corporation because of such agreement will be immediately refunded to the Corporation. Notwithstanding any other provision of law, policies written by multi-peril crop insurance companies to any person ineligible under the provisions of this subpart are null and void. Premium paid for such policies will be refunded to the person applying for insurance, less a reasonable amount for expenses and handling not to exceed 20 percent of the premium paid, and no indemnity will be paid unless the multi-peril company expressly agrees to continue such policy in effect without FCIC reinsurance. However, if the reinsured company follows the procedure of the Corporation and the requirements of the regulations, reinsurance will continue to be provided under the reinsurance agreement on the policy unless it is shown that the agent or company had knowledge of facts which would indicate ineligibility on the part of the insured and failed to act on that knowledge.

(c) FCIC employees or contractors are required to report all suspected cases of violation of the Act or the regulations to the appropriate agency for a determination of violation. Benefits shall not be paid in such cases pending a determination from the appropriate agency.

(d) Notwithstanding any other provision of this subpart, any crop insurance policy where insurance attached to a crop prior to August 15, 1986, will continue in effect for that crop until the
next termination date following August 15, 1986.

§ 400.48 Protection of interests of tenants, landlords or producers.

Any tenant, landlord or producer on the farm separate from the person declared ineligible for crop insurance under the provisions of §400.47 of this part, will remain eligible for crop insurance on their insurable share in the crop, unless such tenant, landlord, or producer on the farm is:

(a) Also convicted of planting, cultivating, growing, producing, or storing a controlled substance;

(b) Otherwise determined by FCIC to be ineligible for crop insurance.

§§ 400.49-400.50 [Reserved]

Subpart G—Actual Production History

SOURCE: 59 FR 47787, Sept. 19, 1994, unless otherwise noted.

§ 400.51 Availability of actual production history program.

An Actual Production History (APH) Coverage Program is offered under the provisions contained in the following regulations:

7 CFR part 457—Common Crop Insurance Regulations; and all special provisions thereto unless specifically excluded by the special provisions.

The APH program operates within limits prescribed by, and in accordance with, the provisions of the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), only on those crops identified in this section in those areas where the Actuarial Table provides coverage. Except when in conflict with this subpart, all provisions of the applicable crop insurance contract for these crops apply.

§ 400.52 Definitions.

In addition to the definitions contained in the crop insurance contract, the following definitions apply for the purposes of the APH Coverage Program:

(a) APH. Actual Production History.

(b) Actual yield. The yield per acre for a crop year calculated from the production records or claims for indemnities. The actual yield is determined by dividing total production (which includes harvested and appraised production) by planted acres for annual crops or by insurable acres for perennial crops.

(c) Adjusted yield. The transitional or determined yield reduced by the applicable percentage for lack of records. The adjusted yield will equal 65 percent of the transitional or determined yield, if no producer records are submitted; 80 percent, if records for one year are submitted; and 90 percent, if two years of records are submitted.

(d) Appraised production. Production determined by the Agricultural Stabilization and Conservation Service (ASCS), the FCIC, or a company reinsured by the FCIC, that was unharvested but which reflected the crop's yield potential at the time of the appraisal. For the purpose of APH “appraised production” specifically excludes production lost due to uninsurable causes.

(e) Approved APH yield. A yield, calculated and approved by the verifier, used to determine the production guarantee and determined by the sum of the yearly actual, assigned, and adjusted or unadjusted transitional or determined yields divided by the number of yields contained in the database. The database may contain up to 10 consecutive crop years of actual and or assigned yields. At least four yields will always exist in the database.

(f) Assigned yield. A yield assigned by FCIC in accordance with the crop insurance contract, if the insured does not file production reports as required by the crop insurance contract. Assigned yields are used in the same manner as actual yields when calculating APH yields except for purposes of the Nonstandard Classification System (NCS).

(g) Base period. Ten consecutive crop years (except peaches, which have a
five-year base period) immediately preceding the crop year defined in the insurance contract for which the approved APH yield is being established (except for sugarcane, which begins the calendar year preceding the immediate previous crop year defined in the insurance contract).

(h) Continuous production reports. Reports submitted by a producer for each crop year that the unit was planted to the crop and for the most recent crop year in the base period.

(i) Crop year. Defined in the crop insurance contract, however, for APH purposes the term does not include any year when the crop was not planted or when the crop was prevented from being planted by an insurable cause. For example, if an insured plants acreage in a county to wheat one year, that year is a crop year in accordance with the policy definition. If the land is summerfallowed the next calendar year, that calendar year is not a crop year for the purpose of APH.

(j) Database. A minimum of four years up to a maximum of ten crop years of production data used to calculate the approved APH yield.

(k) Determined yield (D-yield). An estimated yield for certain crops, which can be determined by multiplying an average yield for the crop (attained by using data available from The National Agricultural Statistics Service (NASS) or comparable sources) by a percentage established by the FCIC for each county.

(l) Master yields. Approved APH yields, for certain crops and counties as initially designated by the FCIC, based on a minimum of four crop years of production records for a crop within a county.

(m) New producer. A person who has not been actively engaged in farming for a share of the production of the insured crop for more than two crop years.

(n) Production report. A written record showing the insured crop’s annual production and used to determine the insured’s yield for insurance purposes. The report contains yield history by unit, if applicable, including planted acreage for annual crops, insurable acreage for perennial crops, and harvested and appraised production for the previous crop years. This report must be supported by written verifiable records, measurement of farm stored production, or by other records of production approved by FCIC on an individual basis. Information contained in a claim for indemnity is considered a production report for the crop year for which the claim was filed.

(o) Production Reporting Date (PRD). The PRD is contained in the crop insurance contract and is the last date production reports will be accepted for inclusion in the database for the current crop year.

(p) Transitional yield (T-Yield). An estimated yield, for certain crops, generally determined by multiplying the ASCS program yield by a percentage determined by the FCIC for each county and provided on the actuarial table to be used in the APH yield calculation process when less than four consecutive crop years of actual or assigned yields are available.

(q) Verifiable records. Contemporaneous records of acreage and production provided by the insured, which may be verified by FCIC through an independent source, and which are used to substantiate the acreage and production that have been reported on the production report.

(r) Verifier. A person authorized by the FCIC to calculate approved APH yields.

(s) Yield variance tables. Tables for certain crops that indicate unacceptable yield variations and yield trends which will require determination of the APH yield by the FCIC.
planted to a practice, type, or variety requiring an APH yield will not be considered a break in continuity. Assigned yields, at the discretion of the FCIC, may be used to maintain continuity of yield data of file. Production on uninsured (for those years a crop insurance policy under the Federal Crop Insurance Act is in effect) or uninsurable acreage (for other years of the period) will not be used to determine APH yield unless production from such acreage is commingled with production from insured or insurable acreage.

(b) Production reports and supporting records are subject to audit or review to verify the accuracy of the information certified. Production and supporting records may be reviewed and verified if a claim for indemnity is submitted on the insured crop. The reported yield is subject to revision, if needed, so that the claim conforms to the records submitted at that time.

(1) Inaccurate production reports or failure to retain acceptable records shall result in the verifier combining optional farm units and recomputing the approved APH yield. These actions shall be taken at any time after reporting or record discrepancies are identified and may result in reduction of the approved APH yield for any calendar year.

(2) Records must be provided by the insured at the time of an audit, review, or as otherwise requested, to verify that the acreage and production certified are accurate. Records of any other person having shares in the insured crop, which are used by the insured to establish the approved APH yield, must also be provided upon request.

(3) In the event acreage or production data certified by two or more persons sharing in the crop on the same acreage is different, the verifier shall, at the verifier’s discretion, determine which acreage and production data, if any, will be used to determine the approved APH yield. If the correct acreage and production cannot be determined, the data submitted will be considered unacceptable by the verifier for APH purposes.

(4) Failure of the producer to report acreage and production completely and accurately may result in voidance of the crop insurance contract, as well as criminal or civil false claims penalties pursuant to applicable Federal criminal or civil statutes.

§ 400.54 Submission and accuracy of production reports.

(a) The insured is solely responsible for the timely submission and certification of accurate, complete production reports to the agent. Production reports must be provided for all planted units.

(b) Records may be requested by the FCIC, or an insurance company reinsured by the FCIC, or by anyone acting on behalf of the FCIC or the insurance company. The insured must provide such records upon request.

(c) The agent will explain the APH Program to insureds and prospective insureds. When necessary, the agent will assist the insured in preparation of production reports. The agent will determine the adjusted or unadjusted transitional or determined yields in accordance with §400.54(b). The agent will review the production reports and forward them to the verifier, along with any requested and required supporting records for determination of an approved APH yield.

(d) The verifier will determine if the certified production reports are acceptable and calculate the approved APH yield.

§ 400.55 Qualification for actual production history coverage program.

(a) The approved APH yield is calculated from a database containing a minimum of four yields and will be updated each subsequent crop year. The database may contain a maximum of the 10 most recent crop years and may include actual, assigned, and adjusted or unadjusted T or D-Yields. T or D-Yields, adjusted or unadjusted, will only occur in the database when there are less than four years of actual and/or assigned yields.

(b) The insured may be required to provide production records to determine the approved APH yield, if production records for the most recent crop year are available. If acceptable records of actual production are provided, the records must be continuous.
and contain at least the most recent crop year’s actual yield.

(1) If no acceptable production records are available, the approved APH yield is the adjusted T or D-Yield (65 percent of T or D-Yield).

(2) If acceptable production records containing information for only the most recent crop year are provided, the three T or D-Yields adjusted by 80 percent will be used to complete the minimum database and calculate the approved APH yield.

(3) If acceptable production records containing information for only the two most recent crop years are provided, the two T or D-Yields adjusted by 90 percent will be used to complete the database and calculate the approved APH yield.

(4) If acceptable production records containing information for only the three most recent crop years are provided, the three actual yields and one unadjusted T or D-Yield are used to complete the database and calculate the approved APH yield.

(5) When the database contains four or more (up to ten) continuous actual yields, the approved APH yield is a simple average of the actual yields.

(6) New producers may have their approved APH yields based on unadjusted T or D-Yields or a combination of actual and unadjusted T or D-Yields.

(7) Producers who add land or new practice, types and varieties to their farming operations and who do not have available records for the added land, practice, types or varieties may have approved APH yields for the added land, practice, types or varieties that are based on adjusted or unadjusted T or D-Yields as determined by FCIC.

(8) If the producer’s crop is destroyed or if it produces a low actual yield due to insured causes of loss, the resulting average yield may qualify for catastrophic yield adjustment according to FCIC guidelines. APH yields qualifying for catastrophic yield adjustment may be adjusted to mitigate the effect of catastrophic years. Premium rates for approved APH yields, which are adjusted for catastrophic years, may be based on the producer’s APH average yield prior to the catastrophic adjustment or such other basis as determined appropriate by FCIC.

(c) If no insurable acreage of the insured crop is planted for a year, a production report indicating zero planted acreage will maintain the continuity of production reports for APH record purposes and that calendar year will not be included in the APH yield calculations.

(d) Actual yields calculated from the claim for indemnity will be entered in the database. The resulting average yield will be used to determine the premium rate and approved APH yield, at the discretion of FCIC.

(e) Optional units are not available to an insured who does not provide acceptable production reports for at least the most recent crop year with which to calculate an approved APH yield.

(f) FCIC may determine approved APH yields for designated crops in the following situations:

(1) If less than four years of yield history is certified and T or D-Yields are not provided in the actuarial documents.

(2) If actual yields exceed tolerances specified in yield variance tables, and

(3) For perennial crops:

(i) If significant upward or downward yield trends are indicated;

(ii) If tree or vine damage, or cultural practices will reduce the production level;

(iii) If more than two percent of the trees or vines have been removed within the last two years; or

(iv) If yield trends are evident and yields greater than the average yield are requested by the insured.

(g) APH yields will not be approved the first insurance year on perennial crops until an inspection acceptable to FCIC has been performed and the acreage is accepted for insurance purposes in accordance with the crop insurance contract.

(h) APH Master Yields may be established whenever crop rotation requirements and land leasing practices limit the yield history available. FCIC will establish crops and locations for which Master Yields are available. To qualify, the producer must have at least four recent continuous crop years’ annual production reports and must certify
§ 400.90 Definitions.

Administrative review. A review within the Department of Agriculture of an adverse decision.

Adverse decision. A decision by an employee or Director of the Agency that is adverse to the participant. The term includes the denial of program benefits, written agreements, eligibility, etc. that results in the participant receiving less funds than the participant believes should have been paid or not receiving a benefit to which the participant believes he or she was entitled.

Agency. RMA or FCIC, including the RO, FAOB or any other division within the Agency with decision making authority.

Appellant. Any participant who requests an administrative review or mediation, or both, of an adverse decision of the Agency in accordance with this subpart. Unless otherwise specified in this subpart, the term “appellant” includes an authorized representative.

Authorized representative. Any person, whether or not an attorney, who has obtained a Privacy Act waiver and is authorized in writing by a participant to act for the participant in the administrative review, mediation, or appeal process.

Certified State. A State with a mediation program, approved by the Secretary, that meets the requirements of 7 CFR part 1946, subpart A, or a successor regulation.

FAOB. Financial and Accounting Operations Branch.

FCIC. The Federal Crop Insurance Corporation, a wholly owned Government corporation within USDA.

FSA. The Farm Service Agency, an agency within USDA, or its successor agency.

Good farming practices. For agricultural commodities insured under the terms contained in 7 CFR part 457 and all other crop insurance policies authorized under the Act, except as provided herein, means the good farming practices as defined at 7 CFR 457.9. For agricultural commodities insured under the terms contained in 7 CFR part 407, means the good farming practices as defined at 7 CFR 407.9.

Insured. An individual or entity that has applied for crop insurance or who holds a crop insurance policy that was in effect for the previous crop year and continues to be in effect for the current crop year.

Mediation. A process in which a trained, impartial, neutral third party (the mediator), meets with the disputing parties, facilitates discussions,
and works with the parties to mutually resolve their disputes, narrow areas of disagreement, and improve communication.

NAD. The USDA National Appeals Division. See 7 CFR part 11.

Non-certified State. A State that is not approved by the Secretary of Agriculture to participate in the USDA Mediation Program under 7 CFR part 1946, subpart A, or its successor regulation.

Participant. An individual or entity that has applied for crop insurance or who holds a valid crop insurance policy that was in effect for the previous crop year and continues to be in effect for the current crop year. The term does not include individuals or entities whose claims arise under the programs excluded in the definition of participant published at 7 CFR 11.1.

Reinsured company. A private insurance company, including its agents, that has been approved and reinsured by FCIC to provide insurance to participants.

Reviewing authority. A person assigned the responsibility by the Agency of making a decision on a request for administrative review by the participant in accordance with this subpart.

RMA. The Risk Management Agency, an agency within USDA, or its successor agency.

RO. The Regional Office established by the agency for the purpose of providing program and underwriting services for private insurance companies reinsured by FCIC under the Act and for FCIC insurance contracts delivered through FSA offices.

Secretary. The Secretary of Agriculture.

USDA. United States Department of Agriculture.

§ 400.91 Applicability.

(a) This subpart applies to:

(1) Adverse decisions made by personnel of the Agency with respect to:

(i) Contracts of insurance insured by FCIC; and

(ii) Contracts of insurance of private insurance companies and reinsured by FCIC under the provisions of the Act.

(2) Determinations of good farming practices made by personnel of the Agency or the reinsured company (see §400.98).

(b) This subpart is not applicable to any decision:

(1) Made by the Agency with respect to any matter arising under the terms of the Standard Reinsurance Agreement with the reinsured company; or

(2) Made by any private insurance company with respect to any contract of insurance issued to any producer by the private insurance company and reinsured by FCIC under the provisions of the Act, except for determinations of good farming practices specified in §400.91(a)(2).

(c) With respect to matters identified in §400.91(a)(1), participants may request an administrative review, mediation, or both, or appeal of adverse decisions by the Agency made with respect to:

(1) Denial of participation in the crop insurance program;

(2) Compliance with terms and conditions of insurance;

(3) Issuance of payments or other program benefits to a participant in the crop insurance program; and

(4) Issuance of payments or other benefits to an individual or entity who is not a participant in the crop insurance program.

(d) Only a participant may seek an administrative review and mediation under this subpart, as applicable.

(e) Notwithstanding any other provision, this subpart does not apply to any decision made by the Agency that is generally applicable to all similarly situated program participants. Such decisions are also not appealable to NAD. If the Agency determines that a decision is not appealable because it is a matter of general applicability, the participant must obtain a review by the Director of NAD in accordance with 7 CFR 11.6(a) of the Agency’s determination that the decision is not appealable before the participant may file suit against the Agency.

§ 400.92 Appeals.
(a) Except for determinations of good farming practices, nothing in this subpart prohibits a participant from filing an appeal of an adverse decision directly with NAD in accordance with part 11 of this title without first requesting administrative review or mediation under this subpart.
(b) If the participant has timely requested administrative review or mediation, the participant may not participate in a NAD hearing until such administrative review or mediation is concluded. The time for appeal to NAD is suspended from the date of receipt of a request for administrative review or mediation until the conclusion of the administrative review or mediation. The participant will have only the remaining time to appeal to NAD after the conclusion of the administrative review or mediation.

§ 400.93 Administrative review.
(a) With respect to adverse decisions, an appellant may seek one administrative review or seek mediation under § 400.94.
(b) If the appellant seeks an administrative review, the appellant must file a written request for administrative review with the reviewing authority in accordance with § 400.94. The written request must state the basis upon which the appellant relies to show that:
(1) The decision was not proper and not made in accordance with applicable program regulations and procedures; or
(2) All material facts were not properly considered in such decision.
(c) The reviewing authority will issue a written decision that will not be subject to further administrative review by the Agency.

§ 400.94 Mediation.
For adverse decisions only:
(a) Appellants have the right to seek mediation or other forms of alternative dispute resolution in addition to an administrative review under § 400.93.
(b) All requests for mediation under this subpart must be made after issuance of the adverse decision by the Agency and before the appellant has a NAD hearing on the adverse decision.
(c) An appellant who chooses mediation must request mediation not later than 30 calendar days from receipt of the written notice of the adverse decision. A request for mediation will be considered to have been “filed” when personally delivered in writing to the appropriate decision maker or when the properly addressed request, postage paid, is postmarked.
(d) An appellant will have any balance of the days remaining in the 30-day period to appeal to NAD if mediation is concluded without resolution. If a new adverse decision that raises new matters or relies on different grounds is issued as a result of mediation, the participant will have a new 30-day period for appeals to NAD.
(e) An appellant is responsible for contacting the Certified State Mediation Program in States where such mediation program exists. The State mediation program will make all arrangements for the mediation process. A list of Certified State Mediation Programs is available at http://www.act.fcic.usda.gov.
(f) An appellant is responsible for making all necessary contacts to arrange for mediation in non-certified States or in certified States that are not currently offering mediation on the subject in dispute. An appellant needing mediation in States without a certified mediation program may request mediation by contacting the RSO, which will provide the participant with a list of acceptable mediators.
(g) An appellant may only mediate an adverse decision once.
(h) If the dispute is not completely resolved in mediation, the adverse decision that was the subject of the mediation remains in effect and becomes the adverse decision that is appealable to NAD.
(i) If the adverse decision is modified as a result of the mediation process, the modified decision becomes the new adverse decision for appeal to NAD.

§ 400.95 Time limitations for filing and responding to requests for administrative review.

(a) A request for administrative review must be filed within 30 days of receipt of written notice of the adverse decision. A request for an administrative review will be considered to have been “filed” when personally delivered in writing to the appropriate decision maker or when the properly addressed request, postage paid, is postmarked.

(b) Notwithstanding paragraph (a) of this section, an untimely request for administrative review may be accepted and acted upon if the participant can demonstrate a physical inability to timely file the request for administrative review.

§ 400.96 Judicial review.

Except as provided in § 400.98, with respect to adverse determinations:

(a) A participant must exhaust administrative remedies before seeking judicial review of an adverse decision. This requires the participant to appeal an Agency adverse decision to NAD in accordance with 7 CFR part 11 prior to seeking judicial review of the adverse decision.

(b) If the adverse decision involves a matter determined by the Agency to be not appealable, the appellant must request a determination of non-appealability from the Director of NAD, and appeal the adverse decision to NAD if the Director determines that it is appealable, prior to seeking judicial review.

(c) A participant with a contract of insurance reinsured by the Agency may bring suit against the Agency if the suit involves an adverse action in a United States district court after exhaustion of administrative remedies as provided in this section. Nothing in this section can be construed to create privity of contract between the Agency and a participant.

§ 400.97 Reservations of authority.

(a) Representatives of the Agency may correct all errors in entering data on program contracts and other program documents, and the results of computations or calculations made pursuant to the contract.

(b) Nothing contained in this subpart precludes the Secretary, the Manager of FCIC, or the Administrator of RMA, or a designee, from determining at any time any question arising under the programs within their respective authority or from reversing or modifying any adverse decision.

§ 400.98 Reconsideration process.

(a) This reconsideration process only applies to determinations of good farming practices under § 400.91(a)(2).

(b) There is no appeal to NAD of determinations or reconsideration decisions regarding good farming practices.

(c) Only reconsideration is available for determinations of good farming practices. Mediation is not available for determinations of good farming practices.

(d) If the insured seeks reconsideration, the insured must file a written request for reconsideration to the following: USDA/RMA/Deputy Administrator for Insurance Services/Stop 0805, 1400 Independence Avenue SW., Washington, DC 20250-0801.

(1) A request for reconsideration must be filed within 30 days of receipt of written notice of the determination regarding good farming practices. A request for reconsideration will be considered to have been “filed” when personally delivered in writing to FCIC or when the properly addressed request, postage paid, is postmarked.

(2) Notwithstanding paragraph (d)(1) of this section, an untimely request for reconsideration may be accepted and acted upon if the insured can demonstrate a physical inability to timely file the request for reconsideration.

(3) The written request must state the basis upon which the insured relies to show that:

(i) The decision was not proper and not made in accordance with applicable program regulations and procedures; or

(ii) All material facts were not properly considered in such decision.

(e) With respect to determinations of good farming practices, the insured is
not required to exhaust the administrative remedies in 7 CFR part 11 before bringing suit against FCIC in a United States district court. However, regardless of whether the Agency or the reinsured company makes the determination, the insured must seek reconsideration under §400.98 before bringing suit against FCIC in a United States District Court. The insured cannot file suit against the reinsured company for determinations of good farming practices.

(f) Any reconsideration decision by the Agency regarding good farming practices shall not be reversed or modified as a result of judicial review unless the reconsideration decision is found to be arbitrary or capricious.

(68 FR 37720, June 25, 2003)

Subpart K—Debt Management—Regulations for the 1986 and Succeeding Crop Years

SOURCE: 51 FR 17316, May 12, 1986, unless otherwise noted.

§400.115 Purpose.

This subpart sets forth procedures that will be followed, and the rights afforded to debtors, in connection with the reporting by the Federal Crop Insurance Corporation (FCIC) to credit reporting agencies of information with respect to current and delinquent debts owed to FCIC, and in connection with referral of delinquent debts to contract collection agencies.

§400.116 Definitions.

(a) Credit reporting agency means (1) a reporting agency as defined at 4 CFR 102.5(a), or (2) any entity which has entered into an agreement with USDA concerning the referral of credit information.

(b) Collection agency means a private debt collection contractor under Federal Supply Schedule contract with the General Services Administration (GSA) for professional debt collection services.

(c) Comptroller means the employee of FCIC filling that position or the person designated by the Comptroller to perform that function.

(d) Debt and claim are deemed synonymous and are used interchangeably herein. The debt or claim is an amount of money which has been determined by an appropriate agency official to be owed to FCIC by any individual, organization or entity, except another Federal agency; State, local or foreign government or agencies thereof; Indian tribal governments; or other public institutions.

The debt or claim may have arisen from overpayment, premium non-payment, interest, penalties, reclamations resulting from payments under good faith reliance provisions, or other causes.

(e) Delinquent debt means (1) any debt owed to FCIC that has not been paid by the termination date specified in the applicable contract of insurance, or other due date for payment contained in any other agreement, or notification of indebtedness, and (2) any overdue amount owed to FCIC by a debtor which is the subject of an installment payment agreement which the debtor has failed to satisfy under the terms of such agreement.

(f) System of records means a group of any records under the control of FCIC from which information is retrieved by the name of the individual by some identifying number, symbol, or other identification assigned to the individual.

(g) Request for review means that request submitted to FCIC by a debtor for a review of the facts resulting in the determination of indebtedness to FCIC. FCIC allows 45 days for such request and any request submitted within that period is considered a timely request.

§400.117 Determination of delinquency.

Prior to disclosing information about a debt to a credit reporting agency in accordance with this subpart, the FCIC claims official, designated as the Comptroller, FCIC, or the designee of the Comptroller who has jurisdiction over the claim, shall review the claim and determine that the claim is valid and overdue.
§ 400.118 Demand for payment.

The Comptroller who is responsible for carrying out the provisions of this subpart with respect to the debt shall send to the debtor appropriate written demands for payment in terms which inform the debtor of the consequences of failure to make payment, in accordance with guidelines established by the Manager, FCIC, the Federal Claims Collection Standards at 4 CFR 102.2, or the contract between the General Services Administration (GSA) and the collection agency.

§ 400.119 Notice to debtor; credit reporting agency.

(a) In accordance with guidelines established by the Manager, FCIC, the Comptroller who is responsible for disclosure of information with respect to delinquent debts to a credit reporting agency shall send written notice to the delinquent debtors that FCIC intends to disclose credit information to a credit reporting agency on a regular basis. In addition, delinquent debtors are to be informed:
1. Of the basis for the indebtedness;
2. That the payment is overdue;
3. That FCIC intends to disclose to a credit reporting agency that the debtor is responsible for the debt and with respect to an individual, that such disclosure shall be made not less than 60 days after notification to such debtor;
4. Of the specific information intended to be disclosed to the credit reporting agency;
5. Of the rights of such debtor to a full explanation of the claim and to dispute any information in the system of records of FCIC concerning the claim;
6. Of the debtor’s right to administrative appeal or review with respect to the claim and how such review shall be obtained; and
7. Of the date after which the information will be reported to the credit reporting agency.
(b) The content and standards for demand letters and notices sent under this section shall be consistent with the Federal Claims Collection Standards at 4 CFR 102.2.

§ 400.120 Subsequent disclosure and verification.

(a) FCIC shall promptly notify each credit reporting agency to which the original disclosure of debt information was made of any substantial change in the condition or amount of the claim. A substantial change in condition may include, but is not limited to, notice of death, cessation of business, or relocation of the debtor. A substantial change in the amount may include, but is not limited to, payments received, additional amounts due, or offsets made with respect to the debt.
(b) FCIC shall promptly verify or correct, as appropriate, information about the claim or request of such credit reporting agency for verification of any or all information so disclosed. The records of the debtor shall reflect any correction resulting from such request.
(c) FCIC shall obtain satisfactory assurances from each reporting agency to which information will be provided that the agency is in compliance with the provisions of all laws and regulations of the United States relating to providing credit information.

§ 400.121 Information disclosure limitations.

FCIC shall limit delinquent debt information disclosed to credit reporting agencies to:
(a) The name, address, taxpayer identification number, and other information necessary to establish the identity of the debtor;
(b) The amount, status, and history of the claim; and
(c) The FCIC program under which the claim arose.

§ 400.122 Attempts to locate debtor.

Before disclosing delinquent debt information to a credit reporting agency, FCIC shall take reasonable action to locate a debtor for whom FCIC does not have a current address in order to send the notification in accordance with § 400.119 of this subpart.

§ 400.123 Request for review of the indebtedness.

(a) Before disclosing delinquent debt information to a credit reporting agency, FCIC shall, upon request of the debtor, provide for a review of the
claim, including an opportunity for reconsideration of the initial decision concerning the existence or amount of the claim, in accordance with applicable administrative appeal procedures.

(b) Upon receipt of a timely request for review, FCIC shall suspend its schedule for disclosure of delinquent debt information to a credit reporting agency until such time as a final decision is made on the request.

(c) Upon completion of the review, the reviewing office shall transmit to the debtor a written notification of the decision. If appropriate, notification shall inform the debtor of the scheduled date on or after which information concerning the debt will be provided to the credit reporting agency. The notification shall, if appropriate, also indicate any changes in the information to be disclosed to the extent such information differs from that provided in the initial notification.

§ 400.124 Disclosure to credit reporting agencies.

(a) In accordance with guidelines established by the Manager, FCIC, the Comptroller or designated manager of the systems of records shall disclose to credit reporting agencies the information specified in § 400.121.

(b) Disclosure of information to credit reporting agencies shall be made on or after the date specified in §§ 400.119(a)(3) and 400.125 and shall be comprised of the information set forth in the initial determination or any modification thereof.

(c) This section shall not apply to disclosure of delinquent debts when:

(1) The debtor has agreed to a repayment agreement for such debt and such agreement is still valid; or

(2) The debtor has filed for review of the debt and the reviewing official or designee has not issued a decision on the review.

§ 400.125 Notice to debtor, collection agency.

FCIC shall provide 30 days written notice to the debtor, mailed to the debtor’s last known address, of FCIC’s intent to forward the debt to a collection agency for further collection action.

§ 400.126 Referral of delinquent debts to contract collection agencies.

(a) FCIC shall use the services of a contract collection agency which has entered into a contract with the General Services Administration to recover debts owed to FCIC.

(b) If FCIC’s collection efforts have been unsuccessful on a delinquent debt, and the delinquent debt remains unpaid, FCIC may refer the debt to a contract collection agency for collection.

(c) FCIC shall retain the authority to resolve disputes, compromise claims, suspend or terminate collection action, and refer the matter for litigation.

§ 400.127 [Reserved]

§ 400.128 Definitions.

(a) Agency means (1) An Executive Agency as defined by 5 U.S.C. 105, the United States Postal Service, and the United States Postal Rate Commission, or (2) A Military Department, as defined by section 102 of Title 5 U.S.C.

(b) Debt means:

(1) An amount owed to the United States from sources including, but not limited to, insured or guaranteed loans, fees, leases, insurance premiums, interest (except where prohibited by law), rents, royalties, services, sale of real or personal property, overpayments, penalties, damages, fines and forfeitures (except those arising under the Uniform Code of Military Justice).

(2) An amount owed to the United States by an employee for pecuniary losses where the employee has been determined to be liable because of such employee’s negligent, willful, unauthorized or illegal acts, including but not limited to:

(i) Theft, misuse, or loss of Government funds;

(ii) False claims for services and travel reimbursement;

(iii) Illegal, unauthorized obligations and expenditures of Government appropriations;

(iv) Using or authorizing the use of Government owned or leased equipment, facilities, supplies and services for other than official or approved purposes;

(v) Lost, stolen, damaged, or destroyed Government property;
§ 400.129 Salary offset.

(a) Debt collection by salary offset is feasible if: the cost to the Government of collection by salary offset does not exceed the amount of the debt; there are no legal restrictions to the debt, such as the debtor being under the jurisdiction of a bankruptcy court or the expiration of a statute of limitations; or, other such legal restrictions. The Debt Collection Act permits collections of debts by offset for claims that have not been outstanding for more than 10 years.

(b) The salary offset provisions contained herein provide procedures which must be followed before FCIC may request another Federal agency to offset any amount from the debtor’s salary. Decisions made under the provisions of this section are not appealable under the provisions of the Appeal Regulations in part 400, subpart J of this title.

(c) These regulations will not apply to any case where collection of a debt by salary offset is explicitly provided for by another statute as noted by the Comptroller General in 64 Comp. Gen. 142 (1984), including 5 U.S.C. 5512(a), 5 U.S.C. 5513, 5 U.S.C. 5522(a) (1), 5 U.S.C. 5705 (1) and (2), and 5 U.S.C. 5724(f).

(d) Salary offset may be used by FCIC to collect debts which arise from delinquent FCIC premium payments or delinquent repayment plans and other debts arising from, but not limited to, such sources as program theft, embezzlement, fraud, salary overpayments, underwithholding of any amounts due and payable for life and health insurance benefits, advance travel payments, overpaid indemnities, and any amount owed by present or former employees from loss of federal funds through negligence and other matters. The debt does not have to be reduced to judgment and does not have to be covered by a security instrument.

(e) FCIC may use salary offset against one of its employees who is indebted to another agency if requested to do so by that agency. Salary offset will not be initiated until after other servicing options available to the requesting agency have been utilized, and due process has been afforded to the FCIC employee. When salary offset is utilized, payment for the debt will be deducted from the employee’s salary and sent directly to the creditor agency. Not more than fifteen percent (15%) of the employee’s disposable salary can be offset in any one pay period, unless the employee agrees in writing to the deduction of a larger amount.

(f) When FCIC is owed a debt by an employee of another agency, the other agency shall not initiate the requested offset until FCIC provides the agency with a written certification that the debtor owes FCIC a debt (including the amount and basis of the debt and the due date of the payment), and that
Federal Crop Insurance Corporation, USDA

§ 400.130 Notice requirements before offset.

Salary offset will not be made unless the employee receives 30 calendar days written notice. The notice of intent to offset salary (notice of intent) will state:

(a) That FCIC has reviewed the records relating to the debt and has determined that the debt is owed, and has verified the amount of the debt, and the facts giving rise to the debt;

(b) That FCIC intends to deduct an amount not to exceed 15% of the employee's current disposable salary until the debt and all accumulated interest are paid in full;

(c) The amount, frequency, approximate beginning date, and duration of the intended deductions;

(d) An explanation of the requirements concerning interest, penalties, and administrative costs, including a statement that these assessments will be made unless waived in accordance with 31 U.S.C. 3717 and 7 CFR 3.34;

(e) That FCIC's records concerning the debt are available to the employee for inspection and that the employee may request a copy of such records;

(f) That the employee has a right to voluntarily enter into a written agreement with FCIC for a repayment schedule with FCIC, which may be different from that proposed by FCIC, if the terms of the repayment agreement are agreed to by FCIC;

(g) That the employee has the right to a hearing conducted by an Administrative Law Judge of USDA, or a hearing official not under the control of USDA, concerning the determination of the debt, the amount of the debt, or the percentage of disposable salary to be deducted each pay period, if the petition for a hearing is filed by the employee as prescribed by FCIC;

(h) The method and time period allowable for a petition for a hearing;

(i) That the timely filing of a hearing petition will stay the offset collection proceedings;

(j) That a final decision on the hearing will be issued at the earliest practical date, but not later than 60 calendar days after the filing of the petition, unless the employee requests, and the hearing officer grants, a delay in the proceedings;

(k) That any knowingly false or frivolous statement, representation, or evidence may subject the employee to:

(1) Disciplinary procedures appropriate under 5 U.S.C. Chapter 75, 5 CFR part 752, or any other applicable Statutes or regulations;

(2) Penalties under the False Claims Act, 31 U.S.C. 3729-3731, or any other applicable statutory authority; or

(3) Criminal penalties under 18 U.S.C. 286, 287, 1001, and 1002, or any other applicable statutory authority;

(l) Any other rights or remedies available to the employee under any statute or regulations governing the program for which collection is being made;

(m) That the employee may request waiver of salary overpayment under applicable statutory authority, (5 U.S.C. 5584, 10 U.S.C. 2774, 32 U.S.C 716, or 5 U.S.C. 8346(b)), or may request waiver in the case of general debts and if waiver is available under any statutory provision pertaining to the particular debt being collected. The employee may question the amount or validity of the salary overpayment or general debt by submitting a claim to the Comptroller General in accordance with General Accounting Officer procedure;

(n) That amounts paid on or deducted for the debt which are later waived or
found not to be owed to the United States will be promptly refunded to the employee, unless there are applicable contractual or statutory provisions to the contrary; and

(o) The name and address of an official of FCIC to whom the employee should direct any communication with respect to the debt.

[53 FR 4, Jan. 4, 1988]

§ 400.131 Request for a hearing and result if an employee fails to meet deadlines.

(a) Except as provided in paragraph (c) of this section, an employee must file a petition for hearing that is received by the FCIC Official not later than 30 calendar days from the date of the notice of intent to collect a debt by salary offset, if the employee wants a hearing concerning:

(1) The existence or amount of the debt; or

(2) The FCIC Official’s proposed offset schedule, including the percentage of deduction.

(b) The petition must be signed by the employee and should clearly identify and explain with reasonable specificity and brevity the facts, evidence and witnesses which the employee believes support his or her position. If the employee objects to the percentage of disposable salary to be deducted from each check, the petition should state the objection and the reasons for it.

(c) If the employee files a petition for hearing later than the 30 days provided in paragraph (a) of this section, the FCIC Official may accept the petition if the employee is able to show that the delay caused by conditions beyond his or her control, or because the employee failed to receive the notice of the filing deadline (unless the employee has actual notice of the deadline).

(d) An employee will not be granted a hearing and will have his or her disposable salary offset in accordance with the FCIC Official’s announced schedule if the employee:

(1) Fails to file a petition for hearing as set forth in this subsection; or

(2) Is scheduled to appear and fails to appear at the hearing.

[53 FR 4, Jan. 4, 1988]
§ 400.134 Review of FCIC record related to the debt.

An employee who intends to inspect or copy FCIC records related to the debt must send a letter to the FCIC official (designated in the notice of intent) stating his or her intentions. The letter must be received by the FCIC official within 30 calendar days of the date of the notice of intent. In response to the timely notice submitted by the debtor, the FCIC official will notify the employee of the location and time when the employee may inspect and copy FCIC records related to the debt. [53 FR 5, Jan. 4, 1988]

§ 400.135 Written agreement to repay debt as an alternative to salary offset.

The employee may propose, in response to a notice of intent, a written agreement to repay the debt as an alternative to salary offset. The proposed written agreement to repay the debt must be received by the FCIC official within 30 calendar days of the date of the notice of intent. The FCIC official will notify the employee whether the employee’s proposed written agreement for repayment is acceptable. The FCIC official may accept a repayment agreement instead of proceeding by offset. In making this determination, the FCIC official will balance the FCIC interest in collecting the debt against hardship to the employee. If the debt is delinquent and the employee has not disputed its existence or amount, the FCIC official will accept a repayment agreement, instead of offset, for good cause such as, if the employee establishes that offset would result in undue financial hardship, or would be against equity and good conscience. [53 FR 5, Jan. 4, 1988]

§ 400.136 Procedures for salary offset; when deductions may begin.

(a) Deductions to liquidate an employee’s debt will be made by the method and in the amount outlined in the Notice of Intent to collect from the employee’s salary, as provided for in § 400.130.

(b) If the employee files a petition for a hearing before the expiration of the period provided for in § 400.130, then deductions will begin after the hearing officer has provided the employee with a final written decision in favor of FCIC.

(c) If an employee retires or resigns before collection of the amount of the indebtedness is completed, the remaining indebtedness will be collected in accordance with procedures for administrative offset. [53 FR 5, Jan. 4, 1988]

§ 400.137 Procedures for salary offset; types of collection.

A debt will be collected in a lump-sum or in installments. Collection will be by lump-sum collection unless the employee is financially unable to pay in one lump-sum, or if the amount of the debt exceeds 15 percent of the disposable pay for an ordinary pay period. In these cases, deduction will be by installments as set forth in § 400.138. [53 FR 5, Jan. 4, 1988]

§ 400.138 Procedures for salary offset; methods of collection.

(a) General. A debt will be collected by deductions at officially-established pay intervals from an employee’s current pay account, unless the employee and the hearing official agree to alternative arrangements for repayment under § 400.135.

(b) Installment deductions. Installment deductions will be made over a period not greater than the anticipated period of employment. The size and frequency of the installment deductions will bear a reasonable relation to the size of the debt and the employee’s ability to pay. If possible, the installment payment will be sufficient in size and frequency to liquidate the debt in no more than three years. Installment payments of less than $25.00 per pay period, or $50.00 per month, will be accepted only in the most unusual circumstances. [53 FR 5, Jan. 4, 1988]

§ 400.139 Nonwaiver of rights.

So long as there are no statutory or contractual provisions to the contrary, no employee payment (or all or portion of a debt) collected under these regulations will be interpreted as a waiver of
§ 400.140 Refunds.

FCIC will promptly refund to the appropriate individual amounts offset under these regulations when:
(a) A debt is waived or otherwise found not owing to the United States (unless expressly prohibited by statute or regulation); or
(b) FCIC is directed by an administrative or judicial order to refund amounts deducted from an employee’s current pay.

[53 FR 5, Jan. 4, 1988]

§ 400.141 Internal Revenue Service (IRS) Tax Refund Offset.

Under the provisions of 31 U.S.C. 3720A, the (IRS) may be requested to collect a legally enforceable debt owing to any Federal agency by offset against a taxpayer’s Federal income tax refund. This section provides policies and procedures to implement IRS tax refund offsets in accordance with the provisions set forth in §301.6402-6T of 26 CFR chapter I.

(a) Any person who is indebted to the Federal Crop Insurance Corporation (FCIC) is entitled to the extent of FCIC’s administrative due process including review and appeal of the debt under the Appeal Regulations in 7 CFR part 400, subpart J.

(b) If, after such administrative due process is exhausted, the debt is still outstanding with no other means of collection, the debtor will be notified by letter of FCIC’s intention to refer such debt to the IRS for collection by tax refund offset. The notification letter will inform the debtor that their account is delinquent and that IRS will be requested to reduce the amount of any tax refund check due the debtor by the amount of the delinquency. The debtor will be given 60 days in which to write to the Manager, FCIC, providing written evidence that the debt is not legally enforceable. FCIC will refer the debt to IRS for collection by offset after the 60-day period if no response is received from the debtor. Decisions made under the provisions of this section are not appealable under the provisions of the Appeal Regulations in 7 CFR part 400, subpart J.

(c) If the debtor has requested a review, and has provided written evidence that the debt is not legally enforceable, the Manager, with the assistance of the Office of General Counsel, USDA, will review the debtor’s reasons for believing that the debt is not legally enforceable. The debtor will then be notified of the results of the review.

(d) FCIC will notify IRS of those accounts against which offset action is to be taken.

(e) If, during the period of review, the debtor pays the debt in full, the collection of the debt by tax refund offset procedure will be halted. Changes in debtor status that eliminate the debtor from IRS offset will be reported to IRS by FCIC and the debtor’s refund will not be offset.

(f) Amounts offset for delinquent debt which are later found to be not owed to FCIC, will be promptly refunded.

(g) Debtors will not be subject to IRS offset for any of the following reasons:
(1) Debtors who are discharged in bankruptcy or who are under the jurisdiction of a bankruptcy court;
(2) Debtors who are employed by the Federal Government;
(3) Debtors whose cases are in suspense because of actions pending by or taken by FCIC;
(4) Debtors who have not provided a Social Security Number (SSN) and no SSN can be obtained;
(5) Debtors whose indebtedness is less than $25;
(6) Debtors whose account is more than ten (10) years delinquent; except in the case of a judgment debt; or
(7) Debtors whose account has not been first reported to a consumer credit reporting agency.

[53 FR 5, Jan. 4, 1988]

§ 400.142 Past-due legally enforceable debt eligible for refund offset.

For purposes of this section, a past-due, legally enforceable debt which may be referred by FCIC to IRS for offset is a debt which:
(a) Except in the case of a judgement debt, has been delinquent for at least
Federal Crop Insurance Corporation, USDA

three months but has not been delinquent for more than 10 years at the time the offset is made;

(b) Cannot be currently collected pursuant to the salary offset provisions of 5 U.S.C. 5514(a)(1);

(c) Is ineligible for administrative offset under 31 U.S.C. 3716(a) by reason of 31 U.S.C. 3716(c)(2), or cannot be collected by administrative offset under 31 U.S.C. 3716(a) by the referring agency against amounts payable to the debtor by the referring agency;

(d) With respect to which the agency has given the employee at least 60 days to present evidence that all or part of the debt is not past-due or legally enforceable, has considered evidence presented by such employee, and has determined that an amount of such debt is past-due and legally enforceable;

(e) Has been disclosed by FCIC to a consumer reporting agency as authorized by 31 U.S.C. 3711(f), in the case of a debt to be referred to IRS after June 30, 1986;

(f) With respect to which that FCIC has notified, or has made a reasonable attempt to notify, the employee that:

1. The debt is past due; and

2. Unless repaid within 60 days thereafter, will be referred to IRS for offset against any overpayment of tax; and

3. Which is at least $25.00.

[53 FR 6, Jan. 4, 1988]

§ 400.161 Definitions.

In addition to the terms defined in the Standard Reinsurance Agreement, the following terms as used in this rule are defined to mean:

(a) Annual Statutory Financial Statement means the annual financial statement of an insurer prepared in accordance with Statutory Accounting Principles and submitted to the state insurance department if required by any state in which the insurer is licensed.

(b) Company means the company reinsured by FCIC or apply to FCIC for a Standard Reinsurance Agreement.

(c) Corporation means the Federal Crop Insurance Corporation.

(d) FCIC means the Federal Crop Insurance Corporation.

(e) Financial statement means any documentation submitted by a company as required by this subpart.

(f) Guaranty fund assessments means the state administered program utilized by some state insurance regulatory agencies to obtain funds with which to discharge unfunded obligations of insurance companies licensed to do business in that state.

(g) Insurer means an insurance company that is licensed or admitted as such in any State, Territory, or Possession of the United States.

(h) MPUL means the maximum possible underwriting loss that an insurer can sustain on policies it intends to reinsure with FCIC, after adjusting for the effect of any reinsurance agreement with FCIC, and any outside reinsurance agreements, as evaluated by FCIC.

(i) Obligations mean crop or indemnity for crop loss on policies reinsured under the Standard Reinsurance Agreement.

(j) Plan of operation means a statement submitted to FCIC each year in which a reinsured or a prospective reinsured specifies the reinsurance options it wishes to use, its marketing plan, and similar information as required by the Corporation.

(k) Quarterly Statutory Financial Statement means the quarterly financial statement of an insurer prepared in accordance with Statutory Accounting Principles and submitted to the state insurance department if required by any state in which the insurer is licensed.

(l) Reinsurance agreement means an agreement between two parties by which an insurer cedes to a reinsurer certain liabilities arising from the insurer’s sale of insurance policies.

(m) Reinsured means the insurer which is a party to the Standard Reinsurance Agreement with FCIC.
§ 400.162 Qualification ratios.

The sixteen qualification ratios include:

(a) Eleven National Association of Insurance Commissioner’s (NAIC’s) Insurance Regulatory Information System (IRIS) ratios found in §§ 400.170(d)(1)(i) and 400.170(d)(2)(i), (ii), (iii), (vi), (vii), (ix), (x), (xi), (xii), (xiii), and (xiv) and referenced in “Using the NAIC Insurance Regulatory Information System” distributed by NAIC, 120 West 12th St., Kansas City, MO 64105-1925;

(b) Three ratios used by A.M. Best Company found in §400.170(d)(2) (v), (viii), and (x) and referenced in Best’s Key Rating Guide, A.M. Best, Ambest Road, Oldwick, N.J. 08858-0700;

(c) One ratio found in §400.170(d)(1)(i) is calculated the same as the Gross Premium to Surplus IRIS ratio, with Gross Premium adjusted to exclude the MPCI premium assumed by FCIC; and

(d) One ratio found in §400.170(d)(2)(iv) which is formulated by FCIC and is calculated the same as the One-Year Change to Surplus IRIS ratio but for a two-year period.

§ 400.163 Applicability.

The standards contained herein shall be applicable to insurers who apply for or enter into a Standard Reinsurance Agreement effective for the 1997 and subsequent reinsurance years or who continue with a prior years Standard Reinsurance Agreement into the 1997 and subsequent reinsurance years.

§ 400.164 Availability of the Standard Reinsurance Agreement.

Federal Crop Insurance Corporation will offer Standard Reinsurance Agreements to eligible Companies under which the Corporation will reinsure policies which the Companies issue to producers of agricultural commodities.

The Standard Reinsurance Agreement will be consistent with the requirements of the Federal Crop Insurance Act, as amended, and provisions of the regulations of the Corporation found at chapter IV of title 7 of the Code of Federal Regulations.

§ 400.165 Eligibility for Standard Reinsurance Agreements.

A Company will be eligible to participate in an Agreement if the Corporation determines the Company meets the standards and reporting requirements of this subpart.

§ 400.166 Obligations of the Corporation.

The Agreement will include the following among the obligations of the Corporation.

(a) The Corporation will reinsure policies written on terms, including premium rates, approved by the Corporation, on crops and in areas approved by the Corporation, and in accordance with the provisions of the Federal Crop Insurance Act, as amended, and the provisions of these regulations.

(b) The Corporation will pay a portion of each producer’s premium on the policies reinsured under the Agreement, as authorized by the Federal Crop Insurance Act, as amended.

(c) The Corporation will assume all obligations for unpaid losses on policies reinsured under the Agreement in the event any company reinsured under the Agreement is unable to fulfill its obligations to any holder of a Multiple Peril Crop Insurance Policy reinsured by the Corporation by reason of a directive or order issued by any State Department of Insurance, State Commissioner of Insurance, any court of law having competent jurisdiction or any other similar authority of any jurisdiction to which the Company is subject.

(d) Each policy reinsured by the Corporation must be clearly identified by including in bold face or large type the following statement as item number 1 in its General Provisions:

This insurance policy is reinsured by the Federal Crop Insurance Corporation under the provisions of the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), and all terms of the policy and rights
and responsibilities of the parties are specifically subject to the Act and the regulations under the Act published in chapter IV of 7 CFR.

§ 400.167 Limitations on Corporation’s obligations.

The Agreement will include the following among the limitations on the obligations of the Corporation.

(a) The Corporation may, at any time, suspend its obligation to accept additional liability from the Company by providing written notice to that effect.

(b) The obligations of the Corporation under the Agreement are contingent upon the availability of appropriations.

(c) The Corporation will not reinsure any policy sold by the Company to a producer after the date Company receives notice that the Corporation has determined that the producer is ineligible to receive Federal Crop Insurance.

§ 400.168 Obligations of participating insurance company.

The Agreement will include the following among the obligations of the Company.

(a) The Company shall follow all applicable Corporation procedures in its administration of the crop insurance policies reinsured.

(b) The Company shall make available to all eligible producers in the areas designated in its plan of operations as approved by the Corporation:

(1) The crop insurance plans for the crops designated in its plan of operation in those counties within a State, or a portion of a State, where the Secretary of Agriculture has determined that insurance is available through local offices of the United States Department of Agriculture; and

(2) Catastrophic risk protection, limited, and additional coverage plans of insurance for all crops, for which such insurance is made available by the Corporation, in all counties within a state, or a portion of State, where the Secretary of Agriculture has determined that insurance is no longer available through local offices of the United States Department of Agriculture.

(c) The Company shall provide the Corporation, on forms approved by the Corporation all information that the Corporation may deem relevant in the administration of the Agreement, including a list of all applicants determined to be ineligible for crop insurance coverage and all insured producers cancelled or terminated from insurance, along with the reason for such action, the crop program, and the amount of coverage for each.

(d) The Company shall utilize only loss adjustment procedures and methods that are approved by the Corporation.

(e) The Company shall sell the policies covered under the Agreement through licensed agents or brokers who have successfully completed a training course approved by the Corporation.

(f) The Company shall not discriminate against any employee, applicant for employment, insured or applicant for insurance because of race, color, religion, sex, age, handicap, or national origin.

§ 400.169 Disputes.

(a) If the company believes that the Corporation has taken an action that is not in accordance with the provisions of the Standard Reinsurance Agreement or any reinsurance agreement with FCIC, except compliance issues, it may request the Deputy Administrator of Insurance Services to make a final administrative determination addressing the disputed action. The Deputy Administrator of Insurance Services will render the final administrative determination of the Corporation with respect to the applicable actions. All requests for a final administrative determination must be in writing and submitted within 45 days after receipt after the disputed action.

(b) With respect to compliance matters, the Compliance Field Office renders an initial finding, permits the company to respond, and then issues a final finding. If the company believes that the Compliance Field Office’s final finding is not in accordance with the applicable laws, regulations, custom or practice of the insurance industry, or FCIC approved policy and procedure, it
may request, the Deputy Administrator of Compliance to make a final administrative determination addressing the disputed final finding. The Deputy Administrator of Compliance will render the final administrative determination of the Corporation with respect to these issues. All requests for a final administrative determination must be in writing and submitted within 45 days after receipt of the final finding.

(c) A company may also request reconsideration by the Deputy Administrator of Insurance Services of a decision of the Corporation rendered under any Corporation bulletin or directive which bulletin or directive does not interpret, explain, or restrict the terms of the reinsurance agreement. The company, if it disputes the Corporation’s determination, must request a reconsideration of that determination in writing, within 45 days of the receipt of the determination. Such determinations will not be appealable to the Civilian Board of Contract Appeals.

(d) Appealable final administrative determinations of the Corporation under paragraph (a) or (b) of this section may be appealed to the Civilian Board of Contract Appeals in accordance with 48 CFR part 6102.

§ 400.170 General qualifications.

To qualify initially or thereafter for a Standard Reinsurance Agreement with FCIC, an insurer must:

(a) Be licensed or admitted in any state, territory, or possession of the United States;

(b) Be licensed or admitted, or use as a policy-issuing Company an insurer that is licensed or admitted, in each state from which the insurer will cede policies to FCIC for reinsurance;

(c) Have surplus, as reported in its most recent Annual or Quarterly Statutory Financial Statement, that is at least equal to the MPUL for the company’s estimated retained premium proposed to be reinsured, multiplied by the appropriate Minimum Surplus Factor found in the Minimum Surplus Table. For the purposes of the Minimum Surplus Table, an insurer is considered to issue policies in a state if at least two and one-half percent (2.5%) of all its reinsured retained premium is written in that state;

<table>

</tbody>
</table>

(e) Submit to FCIC all of the following statements:

(1) Annual and Quarterly Statutory Financial Statements;

(2) Statutory Management Discussion & Analysis;

(3) Most recent State Insurance Department Examination Report;

(4) Actuarial Opinion of Reserves;
§ 400.171 Qualifying when a state does not require that an Annual Statutory Financial Statement be filed.

An insurer exempt by the insurance department of the states where they are licensed from filing an Annual Statutory Financial Statement must, in addition to the requirements of § 400.170 (a), (b), (c) and (d), submit an Annual Statutory Financial Statement audited by a Certified Public Accountant in accordance with generally accepted auditing standards, which if not exempted, would have been filed with the insurance department of any state in which it is licensed.

[60 FR 57904, Nov. 24, 1995]

§ 400.172 Qualifying with less than two of the required ratios or ten of the analytical ratios meeting the specified requirements.

An insurer with less than two of the required ratios or ten of the analytical ratios meeting the specified requirements in § 400.170(d) may qualify if, in addition to the requirements of § 400.170 (a), (b), (c) and (e), the insurer:

(a) Submits a financial management plan acceptable to FCIC to eliminate each deficiency indicated by the ratios, or an acceptable explanation why a failed ratio does not accurately represent the insurer’s insurance operations; or

(b) Has a binding agreement with another insurer that qualifies such insurer under this subpart to assume financial responsibility in the event of the reinsured company’s failure to meet its obligations on FCIC reinsured policies.

[60 FR 57904, Nov. 24, 1995]

§ 400.173 [Reserved]

§ 400.174 Notification of deviation from financial standards.

An insurer must immediately advise FCIC if it deviates from compliance with any of the requirements of this chapter. FCIC may require the insurer to update its financial statements during the year. FCIC may terminate the reinsurance agreement if the Company is out of compliance with the requirements of this chapter.

[60 FR 57904, Nov. 24, 1995]

§ 400.175 Revocation and non-acceptance.

(a) FCIC will deny reinsurance to any insurer or will terminate any existing reinsurance agreement if any false or misleading statement is made in the financial statements or any other document submitted by the insurer in connection with its qualification for FCIC reinsurance.

(b) No policy issued by an insurer subsequent to revocation of a reinsurance agreement will be reinsured by FCIC. Policies in effect at the time of revocation will continue to be reinsured by FCIC for the balance of the crop year then in effect for the applicable crop. However, if materially false information is made to the Corporation and that information directly affects the ability of the Company to perform under the Agreement, or if the Company commits any fraudulent or criminal act in relation to the Standard Reinsurance Agreement or any policy reinsured under the Agreement, FCIC may require that the Company transfer the servicing and contractual right to all business in effect and reinsured by the Corporation to the Corporation.

§ 400.176 State action preemptions.

(a) No policyholder shall have recourse to any state guaranty fund or similar state administered program for crop or premium losses reinsured under such Standard Reinsurance Agreement. No assessments for such State funds or programs shall be computed or levied on companies for or on account of any premiums payable on policies of Multiple Peril Crop Insurance reinsured by the Corporation.

(b) No policy of insurance reinsured by the Corporation and no claim, settlement, or adjustment action with respect to any such policy shall provide a basis for a claim of punitive or compensatory damages or an award of attorney fees or other costs against the Company issuing such policy, unless a determination is obtained from the Corporation that the Company, its employee, agent or loss adjuster failed to comply with the terms of the policy or procedures issued by the Corporation and such failure resulted in the insured receiving a payment in an amount that is less than the amount to which the insured was entitled.

§ 400.177 [Reserved]

Subpart M—Agency Sales and Service Contract—Standards for Approval

Source: 53 FR 24015, June 27, 1988, unless otherwise noted.

§ 400.201 Applicability of standards.

Federal Crop Insurance Corporation will offer an Agency Sales and Service Contract (the Contract) to private entities meeting the requirements set forth in this subpart under which the Corporation will insure producers of agricultural commodities. The Contract will be consistent with the requirements of the Federal Crop Insurance Act, as amended, and the provisions of the regulations of the Corporation found at chapter IV of title 7 of the Code of Federal Regulations. The Standards contained herein are required for an entity to be a contractor under the Contract.

§ 400.202 Definitions.

For the purpose of these Standards:

(a) Agency Sales and Service Contract or the Contract means the written agreement between the Federal Crop Insurance Corporation (Corporation) and a private entity (Contractor) for the purpose of selling and servicing Federal Crop Insurance policies and includes, but is not limited to, the following:

(1) The Agency Sales and Service Contract;

(2) Any Appendix to the Agency Sales and Service Contract issued by the Corporation;

(3) The annual approved Plan or Operation; and

(4) Any amendment adopted by the parties.

(b) BELL 208B (or compatible) modem means a modem meeting the standards developed by BELL Laboratories for dial-up, half-duplex, 4800 or 9600 bits per second (bps) transmission of data utilizing 3780 (or 2780) protocol.

(c) Contract, the see Agency Sales and Service Contract.

(d) Contractor’s electronic system (system) means the data processing hardware and software, data communications hardware and software, and printers utilized with the system.

(e) CPA means a Certified Public Accountant who is licensed as such by the State in which the CPA practices.

(f) CPA Audit means a professional examination conducted by a CPA in accordance with generally accepted auditing standards of a Financial Statement on the basis of which the CPA expresses an independent professional opinion respecting the fairness of presentation of the Financial Statement.

(g) Current Assets means cash and other assets that are reasonably expected to be realized in cash or sold or consumed during the normal operation cycle of the business or within one year if the operation cycle is shorter than one year.

(h) Current Liabilities means those liabilities expected to be satisfied by either the use of assets classified as current in the same balance sheet, or the creation of other current liabilities, or those expected to be satisfied within a relatively short period of time, usually one year.

(i) Financial Statement means the documents submitted to the Corporation by a private entity which portray the financial information of the entity. The financial statement must be prepared in accordance with Generally Accepted Accounting Principles (GAAP) and reflect the financial position in the Statement of Financial Condition or...
§ 400.203 Financial statement and certification.

(a) An entity desiring to become or continue as a contractor shall submit to the Corporation a financial statement which is as of a date not more than eighteen (18) months prior to the date of submission.

(b) The financial statement submitted shall be audited by a CPA (CPA Audit); or if a CPA audited financial statement is not available, the statement submitted to the Corporation must be accompanied by a certification of:

(1) The owner, if the business entity is a sole proprietorship; or
(2) At least one of the general partners, if the business entity is a partnership; or
(3) The Chief Executive Officer and Treasurer, if the business entity is a Corporation, that said statement fairly represents the financial condition of the entity on the date of such certification to the Corporation. If the financial statement as certified by the Chief Executive Officer and Treasurer, partner, or owner is submitted, a CPA audited financial statement must be submitted if subsequently available.

§ 400.204 Notification of deviation from standards.

A Contractor shall advise the Corporation immediately if the Contractor deviates from the requirements of these standards. The Corporation may require the Contractor to show compliance with these standards during the contract year if the Corporation determines that such submission is necessary. If the Corporation determines that the deviation is temporary, the Corporation may grant a temporary waiver pending compliance within a specified period of time. A waiver of any provision of these standards will not be granted to an applicant for a contract.

§ 400.205 Denial or termination of contract and administrative reassignment of business.

Non-compliance with these standards will result in:

(a) The denial of a Contract; or
(b) Termination of an existing Contract.

In the event of denial or termination of the Contract, all crop insurance policies of the Corporation sold by the Contractor and all business pertaining thereto may be assumed by the Corporation and may be administratively reassigned by the Corporation to another Contractor.

§ 400.206 Financial qualifications for acceptability.

The financial statement of an entity must show total allowable assets in excess of liabilities and the ability of the entity to meet current liabilities by the use of current assets.

§ 400.207 Representative licensing and certification.

(a) A Contractor must maintain twenty-five (25) licensed and certified Contractor Representatives.

(b) A Contractor's Representative who solicits, sells and services FCIC policies or represents the Contractor in solicitation, sales or service of such policies must hold a license as issued by the State or States in which the policies are issued, which license authorizes the sales of insurance in any one or more of the following lines:

(1) Multiple peril crop insurance;
§ 400.208 Term of the contract.

(a) The term of the Contract shall commence on July 1 or when signed. The contract will continue from year to year with an annual renewal date of July 1 for each succeeding year unless the Corporation or the Contractor gives at least ninety (90) days advance notice in writing to the other party that the contract is not to be renewed. Any breach of the contract, or failure to comply with these Standards, by the Contractor, may result in termination of the contract by the Corporation upon written notice of termination to the Contractor. That termination will be effective thirty (30) days after mailing of the notice and termination to the Contractor.

(b) A Contractor who elects to continue under the Contract for a subsequent year must, prior to the month of June, submit a completed Plan of Operation which includes the Certifications as required by § 400.203 of this subpart. The Contractor may not perform under the contract until the Plan of Operation is approved by the Corporation.

§ 400.209 Electronic transmission and receiving system.

Any Contractor under the Contract is required to:

(a) Adopt a plan for the purpose of transmitting and receiving electronically, information to and from the Corporation concerning the original executed crop insurance documents;

(b) Maintain an electronic system which must be tested and approved by the Corporation;

(c) Maintain Corporation approval of the electronic system as a condition to the electronic transmission and reception of data by the Contractor;

(d) Utilize the Corporation approved automated data processing and electronic data transmission capabilities to process crop insurance documents as required herein; and

(e) Establish and maintain the electronic equipment and computer software program capability to:

1. Receive and store actuarial data electronically via telecommunications utilizing 3780 protocol and utilizing a BELL 208B or compatible modem at 4800 bits per second (bps);

2. Enter and store information from original crop insurance documents into electronic format;

3. Verify electronically stored information recorded from crop insurance documents with electronically stored actuarial information;

4. Compute and print the data elements in the Summary of Protection;

5. Transmit crop insurance data electronically, via 3780 protocol utilizing a BELL 208B or compatible modem at 4800 bps, and relate error messages to original crop insurance documents; and

6. Receive electronic acknowledgement, error messages, and other data via 3780 protocol utilizing a BELL 208B or compatible modem at 4800 bps, and

7. Store backup data and physical documents.

(The Corporation may approve other compatible specifications if accepted by the Corporation and if requested by the Contractor)

§ 400.210 [Reserved]
§ 400.301 Basis, purpose, and applicability.

The regulations contained in this subpart are issued pursuant to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), to prescribe the procedures for nonstandard determinations and the assignment of assigned yields or premium rates in conformance with the intent of section 508 of the Act (7 U.S.C. 1508). These regulations are applicable to all policies of insurance insured or reinsured by the Corporation under the Act and on those policies where the insurance coverage or indemnities are based on determinations applicable to the individual insured. These regulations will not be applicable to any policy where the amount of coverage or indemnities are based on the experience of the area.

§ 400.302 Definitions.

Actively engaged in farming means a person who, in return for a share of profits and losses, makes a contribution to the production of an insurable crop in the form of capital, equipment, land, personal labor, or personal management.

Actual yield means total harvested production of a crop divided by the number of acres on which the crop was planted. For insured acres, actual yield is the total production to count as defined in the insurance policy, divided by insured acres.

Assigned yield means units of crop production per acre administratively assigned by the Corporation for the purpose of determining insurance coverage.

Corporation means the Federal Crop Insurance Corporation.

Cumulative earned premium rate is the total premium earned for all years in the base period, divided by the total liability for all years in the base period with the result expressed as a percentage.

Cumulative loss ratio means the ratio of total indemnities to total earned premiums during the base period expressed as a decimal.

Earned premium means premium earned (both the amount subsidized and the amount paid by the producer, but excluding any amount of the subsidy attributed to the operating and administrative expenses of the insurance provider) for a crop under a policy insured or reinsured by the Corporation.

Earned premium rate—means premium earned divided by liability and expressed as a percentage.

Entity—means a person as defined in this subpart other than an individual.

Indemnified loss means a loss applicable for the policy for any year during the NCS base period for which the total indemnity exceeds the total earned premium. If the person has insurance for the crop in more than one county for any crop year, indemnities and premiums will be accumulated for all counties for each crop year to determine an indemnified loss.

Insurance experience means earned premiums, indemnities paid (but not including replant payments), and other data for the crop (after applicable adjustments), resulting from all of the insured’s crop insurance policies insured or reinsured by the Corporation for one or more crop years and will include all information from all counties in which the person was insured.

Loss ratio—means the ratio of indemnity to earned premium expressed as a decimal.

NCS means nonstandard classification system.

NCS base period means the 10 consecutive crop years (as defined in the crop policy) ending 2 crop years prior to the crop year in which the NCS classification becomes effective for all crops, except those specified on the Special Provisions. For these excepted crops, the NCS base period means the 10 consecutive crop years ending 3 crop years prior to the crop year in which the NCS classification becomes effective. For example: An NCS classification effective for the 1996 crop year against a producer of citrus production in Arizona, California, and Texas, or sugar cane would have a NCS base period that includes the 1984 through 1993 crop years. An NCS classification effective for the 1996 crop year against a producer of all other crops would have a
§ 400.303 Initial selection criteria.

(a) Nonstandard classification procedures in this subpart initially apply when all of the following insurance experience criteria (including any applicable adjustment in § 400.303(d)) for the crop have been met:

1. Three (3) or more indemnified losses during the NCS base period;

2. Cumulative indemnities in the NCS base period that exceed cumulative premiums during the same period by at least $500;

3. The result of dividing the number of indemnified losses during the NCS base period by the number of years premium is earned for that period equals .30 or greater; and

4. Either of the following apply:
   (i) The natural logarithm of the cumulative earned premium rate multiplied by the square root of the cumulative loss ratio equals 2.00 or greater; or
   (ii) Five (5) or more indemnified losses have occurred during the NCS base period and the cumulative loss ratio equals or exceeds 1.50.

(b) The minimum standards provided in paragraphs (a) (2), (3), and (4) of this section may be increased in a specific county if that county’s overall insurance experience for the crop is substantially different from the insurance experience for which the criteria was determined. The increased standard will apply until the conditions requiring the increase no longer apply. Any change in the standards will be contained in the Special Provisions for the crop.

(c) Selection criteria may be applied on the basis of insurance experience of a person, insured acreage, or the combination of both.

1. Insurance experience of a person will include:
   (i) Insurance experience of the person;
   (ii) Insurance experience of other insured entities in which the person had substantial beneficial interest if the person was actively engaged in farming of the insured crop by virtue of the person’s interest in those insured entities;
   (iii) Insurance experience of a spouse and minor children if the person is an individual and the spouse and minor children are considered the same as the individual under § 400.306.

2. Insurance experience of insured acreage includes all insurance experience during the base period resulting from the production of the insured crop on the acreage.

3. Where insurance experience is based on a combination of person and insured acreage, the insurance experience will include the experience of the person as defined in paragraph (b) of this section (1) only on the specific insured acreage during the base period.

(d) Insurance experience for the crop will be adjusted, by county and crop year, to discount the effect of indemnities caused by widespread adverse growing conditions. Adjustments are determined as follows:

1. Determine the average yield for the county using the annual county crop yields for the previous 20 crop years, unless such data is not available;

2. Determine the normal variability in the average yield for the county, expressed as the standard deviation;

3. Subtract the result of § 400.303(d)(2) from § 400.303(d)(1);

4. Divide the annual crop yield for the county for each crop year in the NCS base period by the result of § 400.303(d)(3), the result of which may not exceed 1.0;

5. Subtract the result of § 400.303(d)(4) for each crop year from 1.0;
§ 400.305 Assignment of Nonstandard Classifications.

(a) Assignment of a Nonstandard Classification of assigned yields, assigned yield factors, or premium rates shall be made on forms approved by the Corporation and included in the actuarial tables for the county.
the Corporation for that year when included in the actuarial tables for the county, except as a result of a request for reconsideration as provided in section 400.309, or as the result of appeals under 7 CFR part 11.

(c) A nonstandard classification may be assigned to identified insurable acreage; a person; or to a combination of person and identified acreage for a crop or crop practice, type, variety, or crop option or amendment whereby:

(1) Classifications assigned to identified insurable acreage apply to all acres of the insured crop grown on the identified acreage;

(2) Classifications assigned to a person apply to all insurable acres of the insured crop on which the person and any entity in which the person has substantial beneficial interest is actively engaged in farming; and

(3) Classifications assigned to a combination of a person and identified insurable acreage will only apply to those acres of the insured crop grown on the identified acreage on which the named person is actively engaged in producing such crop.

§ 400.306 Spouses and minor children.

(a) The spouse and minor children of an individual are considered to be the same as the individual for purposes of this subpart except that:

(1) The spouse who was actively engaged in farming in a separate farming operation prior to their marriage will be a separate person with respect to that separate farming operation so long as that operation remains separate and distinct from any farming operation conducted by the other spouse;

(2) A minor child who is actively engaged in farming in a separate farming operation will be a separate person with respect to that separate farming operation if:

(i) The parent or other entity in which the parent has a substantial beneficial interest does not have any interest in the minor’s separate farming operation or in any production from such operation;

(ii) The minor has established and maintains a separate household from the parent;

(iii) The minor personally carries out the farming activities with respect to the minor’s farming operation; and

(iv) The minor establishes separate accounting and recordkeeping for the minor’s farming operation.

(b) An individual shall be considered to be a minor until the age of 18 is reached. Court proceedings conferring majority on an individual under 18 years of age will not change such individual’s status as a minor.

§ 400.307 Discontinuance of participation.

If the person has discontinued participation in the crop insurance program, the person will still be included on the NCS list in the county until the person has discontinued participation as a policyholder or a person with a substantial beneficial interest in a policyholder for at least 10 consecutive crop years. The most recent nonstandard classification assigned will be continued from year to year until participation has been renewed for at least one crop year and at least three years of insurance experience have occurred in the current base period. A nonstandard classification will no longer be applicable to the person or the person on identified acreage if the Corporation determines the person is deceased.

§ 400.308 Notice of Nonstandard Classification.

(a) The Corporation will give written notice to all persons to whom a Nonstandard Classification will be assigned. The notice will give the Nonstandard Classification and the person’s rights and responsibilities according to this subpart.

(b) The person, upon receiving notice from the Corporation, will be responsible for giving notice of the Nonstandard Classification to any other person with an insurable interest affected by the classification. The person will give notice to any other affected person:

(1) Prior to the sales closing date if the other affected person has an established insurable interest at the time the classified person is notified by the Corporation; or
§ 400.352 State and local laws and regulations preempted.

(a) No State or local governmental body or non-governmental body shall have the authority to promulgate rules or regulations, pass laws, or issue policies or decisions that directly or indirectly affect or govern agreements, contracts, or actions authorized by this part unless such authority is specifically authorized by this part or by the Corporation.

(b) The following is a non-inclusive list of examples of actions that State or local governmental entities or non-governmental entities are specifically prohibited from taking against the Corporation or any party that is acting pursuant to this part. Such entities may not:

1. Impose or enforce liens, garnishments, or other similar actions against proceeds obtained, or payments issued in accordance with the Federal Crop Insurance Act, these regulations, or contracts or agreements entered into pursuant to these regulations;

2. Tax premiums associated with policies issued hereunder;

3. Exercise approval authority over policies issued;

4. Levy fines, judgments, punitive damages, compensatory damages, or judgments for attorney fees or other costs against companies, employees of companies including agents and loss adjustors, or Federal employees arising out of actions or inactions on the part of such individuals and entities authorized or required under the Federal Crop Insurance Act, the regulations, any contract or agreement authorized by the Federal Crop Insurance Act or by regulations, or procedures issued by the Corporation (Nothing herein precludes such damages being imposed against the company if a determination is obtained from FCIC that the

Subpart P—Preemption of State Laws and Regulations

SOURCE: 55 FR 23069, June 6, 1990, unless otherwise noted.

§ 400.351 Basis and applicability.

The regulations contained in this subpart are issued pursuant to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.) (the Act), to prescribe the procedures for Federal preemption of State laws and regulations not consistent with the purpose, intent, or authority of the Act. These regulations are applicable to all policies of insurance, insured or reinsured by the Corporation, contracts, agreements, or actions authorized by the Act and entered into or issued by FCIC.

(2) Prior to the Classified person’s establishing an insurable interest of another person that will be affected by the classification.

§ 400.309 Requests for reconsideration.

(a) Any person to be assigned a non-standard classification under this subpart will be notified of and allowed not less that 30 days from the date notice is received to request reconsideration before the nonstandard classification becomes effective. The request will be considered to have been made when received, in writing, by the Corporation.

(b) Upon receipt of a timely request for reconsideration from the person to whom the classification will be assigned, the Corporation will:

1. Review all information supplied by, and respond to all questions raised by the individual, or

2. In the absence of information and questions, review insurance experience and determinations for compliance with this subpart and report review results to the individual requesting reconsideration.

(c) Upon review of a request for reconsideration, the classification to be assigned will be corrected for:

1. Errors and omissions in insurance experience;

2. Incorrect calculations under procedures in this subpart, and

3. Typographical errors.

(d) If the review finds no cause for change, the classification will be assigned and placed on file in the actuarial tables for the county.

(e) Any person not satisfied by a determination of the Corporation upon reconsideration may further appeal under the provisions of 7 CFR part 11.

§ 400.401 Basis and purpose and applicability.

(a) The regulations contained in this subpart are issued pursuant to the Act to prescribe procedures for the collection, use, and confidentiality of Social Security Numbers (SSN) and Employer Identification Numbers (EIN) and related records.

(b) These regulations are applicable to:

1. All holders of crop insurance policies issued by FCIC or any successor to FCIC and sold and serviced by local FSA offices.

2. All holders of crop insurance policies sold by insurance providers and all insurance providers, their contractors and subcontractors, including past and present officers and employees of such companies, their contractors and subcontractors.

3. Any agent, general agent, or company, or any past or present officer, employee, contractor or subcontractor of such agent, general agent, or company under contract to FCIC or an insurance provider for loss adjustment or any other purpose related to the crop insurance programs insured or reinsured by FCIC; and

4. All past and present officers, employees, elected officials, contractors, and subcontractors of FCIC and FSA.

§ 400.402 Definitions.

Applicant. A person who has submitted an application for insurance coverage under the Act.

Authorized person. Any current or past officer, employee, elected official, general agent, contractor, or loss adjuster of FCIC, the insurance provider, or any other government agency whose duties require access to administer the Act.

Disposition of records. The act of removing and disposing of records containing a participant’s SSN or EIN by FCIC, or the insurance provider.

FCIC. The Federal Crop Insurance Corporation of the United States Department of Agriculture or any successor agency.

FSA. The Farm Service Agency of the United States Department of Agriculture, or a successor agency.

Insurance provider. A private insurance company approved by FCIC, or a local FSA office providing crop insurance coverage to producers participating in any program administered under the Act.

Past officers and employees. Any officer or employee of FCIC or the insurance provider who leaves the employ of FCIC or the insurance provider subsequent to the effective date of this rule.

Person. An individual, partnership, association, corporation, estate, trust, or other legal entity, and whenever applicable, a state, political subdivision, or an agency of a state.

Policyholder. An applicant whose application for insurance under the crop insurance program has been accepted by FCIC or the insurance provider.

Retrieval of records. Retrieval of a person’s records by that person’s SSN or EIN.

Safeguards. Methods of security to be employed by FCIC or the insurance provider to protect a participant’s SSN or EIN from unlawful disclosure and access.
§ 400.405 Agent and loss adjuster responsibilities.

(a) The agent or loss adjuster shall provide his or her correct SSN to FCIC or the insurance provider, whichever is applicable, to be eligible to participate in the crop insurance program. The SSN will be used by FCIC and the insurance provider in establishing a database for the purposes of:

1. Identifying agents and loss adjusters on an individual basis;
2. Evaluating agents and loss adjusters to determine level of performance;
3. Determining eligibility for program participation; and
4. Collection of any amount which may be owed by the agent and loss adjuster to the United States.

(b) If the loss adjuster contracting with FCIC to participate in the crop insurance program does not provide his or her correct SSN on forms or contracts where such SSN is required, the loss adjuster’s contract will be cancelled effective on the date of refusal and the loss adjuster will be subject to suspension and debarment in accordance with the suspension and debarment regulations of the United States Department of Agriculture.

(c) If the agent or loss adjuster contracting with an insurance provider, who is also a private insurance company, to participate in the crop insurance program does not provide his or her correct SSN on forms or contracts

§ 400.404 Policyholder responsibilities.

(a) The policyholder or applicant for crop insurance must provide a correct SSN or EIN to FCIC or the insurance provider to be eligible for insurance. The SSN or EIN will be used by FCIC and the insurance provider in:

1. Determining the correct parties to the agreement or contract;
2. Collecting premiums or other amounts due FCIC or the insurance provider;
3. Determining the amount of indemnities;
4. Establishing actuarial data on an individual policyholder basis; and
5. Determining eligibility for crop insurance program participation or other United States Department of Agriculture benefits.

(b) If the policyholder or applicant for crop insurance does not provide the correct SSN or EIN on the application and other forms where such SSN or EIN is required, FCIC or the reinsured company shall reject the application.

(c) The policyholder or applicant is required to provide to FCIC or the insurance provider, the name and SSN or EIN of any individual or other entity:

1. Holding or acquiring a substantial beneficial interest in such policyholder or applicant; or
2. Having any interest in the policyholder or applicant and receiving separate benefits under another United States Department of Agriculture program as a direct result of such interest.

(d) If a policyholder or applicant is using an EIN for a policy in an individual person’s name, the SSN of the policyholder or applicant must also be provided.

§ 400.403 Required system of records.

Insurance providers are required to implement a system of records for obtaining, using, and storing documents containing SSN or EIN data before they accept or receive any applications for insurance. This data should include: name; address; city and state; SSN or EIN; and policy numbers which have been used by FCIC or the insurance provider.

§ 400.402 System of records. Records established and maintained by FCIC or the insurance provider containing SSN or EIN data, name, address, city and State, applicable policy numbers, and other information related to multiple peril crop insurance policies as required by FCIC, from which information is retrieved by a personal identifier including, but not limited to the SSN, EIN, or name.

VerDate Mar 15 2010 01:21 Mar 20, 2014 Jkt 232017 PO 00000 Frm 00051 Fmt 8010 Sfmt 8010 C:\SGML_OUT\232017.XXX 232017srobinson on DSKB307YQ1PROD with CFR
§ 400.406 Insurance provider responsibilities.

The insurance provider is required to collect and record the SSN or EIN on each application or on any other form required by FCIC.

§ 400.407 Restricted access.

The Manager, other officer, or employee of FCIC or an authorized person may have access to the SSNs and EINs obtained pursuant to this subpart, only for the purpose of establishing and maintaining a system of records necessary for the effective administration of the Act.

§ 400.408 Safeguards and storage.

Records must be maintained in secured storage with proper safeguards sufficient to enforce the restricted access provisions of this subpart.

§ 400.409 Unauthorized disclosure.

Anyone having access to the records identifying a participant’s SSN or EIN will abide by the provisions of section 203(c)(2)(C) of the Social Security Act (42 U.S.C. 405(c)(2)(C)), and section 6109(f), Internal Revenue Code of 1986 (26 U.S.C. 6109(f) and the Privacy Act of 1974 (5 U.S.C. 552a). All records are confidential, and are not to be disclosed to unauthorized personnel.

§ 400.410 Penalties.

Unauthorized disclosure of SSN’s or EIN’s by any person may subject that person, and the person soliciting the unauthorized disclosure, to civil or criminal sanctions imposed under various Federal statutes, including 26 U.S.C. 7613, 5 U.S.C. 552a, and 42 U.S.C. 408.

§ 400.411 Obtaining personal records.

Policyholders, agents, and loss adjusters in the crop insurance program will be able to review and correct their records as provided by the Privacy Act. Records may be requested by:

(a) Mailing a signed written request to the headquarters office of FCIC; the FCIC Regional Service Office, or the insurance provider; or

(b) Making a personal visit to the above mentioned establishments and showing valid identification.

§ 400.412 Record retention.

(a) FCIC or the insurance provider will retain all records of policyholders for a period of not less than 3 years from the date of final action on a policy for the crop year, unless further maintenance of specific records is requested by FCIC. Final actions on insurance policies include conclusion of insurance events, such as the latest of termination of the policy, completion of loss adjustment, or satisfaction of claim.

(b) The statute of limitations for FCIC contract claims may permit litigation to be instituted after the period of record retention. Destruction of records prior to the expiration of the statute of limitations will not provide a defense to any action by FCIC against any private insurance company.

§ 400.413 [Reserved]

Subpart R—Administrative Remedies for Non-Compliance

Authority: 7 U.S.C. 1506(l), 1506(o), and 7 U.S.C. 1515(h)

Source: 58 FR 53110, Oct. 14, 1993, unless otherwise noted.
§ 400.451  General.

(a) FCIC has implemented a system of administrative remedies in its efforts to ensure program compliance and prevent fraud, waste, and abuse within the Federal crop insurance program. Such remedies include civil fines and disqualifications under the authority of section 515(h) of the Act (7 U.S.C. 1515(h)); government-wide suspension and debarment under the authority of 48 CFR part 9, 48 CFR part 409, and 7 CFR part 3017; and civil fines and assessments under the authority of the Program Fraud Civil Remedies Act (31 U.S.C. 3801-3812).

(b) The provisions of this subpart apply to all participants in the Federal crop insurance program, including but not limited to producers, agents, loss adjusters, approved insurance providers and their employees or contractors, as well as any other persons who may provide information to a program participant and meet the elements for imposition of one or more administrative remedies contained in this subpart.

(c) Any remedial action taken pursuant to this subpart is in addition to any other actions specifically provided in applicable crop insurance policies, contracts, reinsurance agreements, or other applicable statutes and regulations.

(d) This rule is applicable to any violation occurring on and after January 20, 2009.

(e) The purpose of the remedial actions authorized in this subpart are for the protection of the public interest from potential harm from persons who have abused the Federal crop insurance program, maintaining program integrity, and fostering public confidence in the program.

[73 FR 76887, Dec. 18, 2008]

§ 400.452  Definitions.

For purposes of this subpart:

Act. Has the same meaning as the term in section 1 of the Common Crop Insurance Policy Basic Provisions (7 CFR 457.8).

Affiliate. Persons are affiliates of each other if, directly or indirectly, either one controls or has the power to control the other, or, a third person controls or has the power to control both. Indicia of control include, but are not limited to: interlocking management or ownership, identity of interests among family members, shared facilities and equipment, common use of employees, or a business entity organized following the disqualification, suspension or debarment of a person which has the same or similar management, ownership, or principal employees as the disqualified, suspended, debarred, ineligible, or voluntarily excluded person.

Agency. The person authorized by an approved insurance provider, or its designee, to sell and service a crop insurance policy under the Federal crop insurance program.

Agricultural commodity. Has the same meaning as the term in section 1 of the Common Crop Insurance Policy Basic Provisions (7 CFR 457.8).

Approved insurance provider. Has the same meaning as the term in 7 CFR 400.701.

Benefit. Any advantage, preference, privilege, or favorable consideration a person receives from another person in exchange for certain acts or considerations. A benefit may be monetary or non-monetary.

FCIC. Has the same meaning as the term in 7 CFR 400.701.

Key employee. Any person with primary management or supervisory responsibilities or who has the ability to direct activities or make decisions regarding the crop insurance program.

Knows or has reason to know. When a person, with respect to a claim or statement:

(i) Has actual knowledge that the claim or statement is false, fictitious, or fraudulent;

(ii) Acts in deliberate ignorance of the truth or falsity of the claim or statement; or

(iii) Acts in reckless disregard of the truth or falsity of the claim or statement; and

(2) No proof of specific intent is required.

Managing general agent. Has the same meaning as the term in 7 CFR 400.701.

Material. A violation that causes or has the potential to cause a monetary loss to the crop insurance program or
§ 400.453 Exhaustion of administrative remedies.

All administrative remedies contained herein or incorporated herein by reference must be exhausted before Judicial Review in the United States.
§ 400.454 Disqualification and civil fines.

(a) Before any disqualification or civil fine is imposed, FCIC will provide the affected participants and other persons with notice and an opportunity for a hearing on the record in accordance with 7 CFR part 1, subpart H.

(1) Proceedings will be initiated when the Manager of FCIC files a complaint with the Hearing Clerk, United States Department of Agriculture.

(2) Disqualifications become effective:

(i) On the date specified in the order issued by the Administrative Law Judge or Judicial Officer, as applicable, or if no date is specified in the order, the date that the order was issued.

(ii) With respect to a settlement agreement with FCIC, the date contained in the settlement agreement or, if no date is specified, the date that such agreement is executed by FCIC.

(3) Disqualification and civil fines may only be imposed if a preponderance of the evidence shows that the participant or other person has met the standards contained in § 400.454(b). FCIC has the burden of proving that the standards in § 400.454(b) have been met.

(4) Disqualification and civil fines may be imposed regardless of whether FCIC or the approved insurance provider has suffered any monetary losses. However, if there is no monetary loss, disqualification will only be imposed if the violation is material in accordance with § 400.454(c).

(b) Disqualification and civil fines may be imposed on any participant or person who willfully and intentionally:

(1) Provides any false or inaccurate information to FCIC or to any approved insurance provider with respect to a policy or plan of insurance authorized under the Act either through action or omission to act when there is knowledge that false or inaccurate information is or will be provided; or

(2) Fails to comply with a requirement of FCIC.

(c) When imposing any disqualification or civil fine:

(1) The gravity of the violation must be considered when determining:

(i) Whether to disqualify a participant or other person;

(ii) The amount of time that a participant or other person should be disqualified;

(iii) Whether to impose a civil fine; and

(iv) The amount of a civil fine that should be imposed.

(2) The gravity of the violation includes consideration of whether the violation was material and if it was material:

(i) The number or frequency of incidents or duration of the violation;

(ii) Whether there is a pattern or prior history of violation;

(iii) Whether and to what extent the person planned, initiated, or carried out the violation;

(iv) Whether the person has accepted responsibility for the violation and recognizes the seriousness of the misconduct that led to the cause for disqualification or civil fine;

(v) Whether the person has paid all civil and administrative liabilities for the violation;

(vi) Whether the person has cooperated fully with FCIC (in determining the extent of cooperation, FCIC may consider when the cooperation began and whether the person disclosed all pertinent information known to that person at the time);

(vii) Whether the violation was pervasive within the organization;

(viii) The kind of positions held by the persons involved in the violation;

(ix) Whether the organization took prompt, appropriate corrective action or remedial measures, such as establishing ethics training and implementing programs to prevent recurrence;

(x) Whether the principals of the organization tolerated the offense;

(xi) Whether the person brought the violation to the attention of FCIC in a timely manner;

(xii) Whether the organization had effective standards of conduct and internal control systems in place at the time the violation occurred;

(xiii) Whether the organization has taken appropriate disciplinary action
§ 400.454

against the persons responsible for the violation;

(xiv) Whether the organization had adequate time to eliminate the violation that led to the cause for disqualification or civil fine;

(xv) Other factors that are appropriate to the circumstances of a particular case.

(3) The maximum term of disqualification and civil fines will be imposed against:

(i) Participants and other persons, except insurance providers who:

(A) Commit multiple violations in the same crop year or over several crop years; or

(B) Commit a single violation but such violation results in an overpayment of more than $100,000;

(ii) Approved insurance providers who:

(A) Commit a single violation resulting in an overpayment in excess of $100,000; and

(B) Commit multiple acts of violations resulting in an overpayment in excess of $500,000; and

(iii) Any participant or person who commits such other action or omission of so serious a nature that imposition of the maximum is appropriate.

(d) With respect to the imputing of conduct:

(1) The conduct of any officer, director, shareholder, partner, employee, or other individual associated with an organization, in violation of § 400.454(b) may be imputed to that organization when such conduct occurred in connection with the individual’s performance of duties for or on behalf of that organization, or with the organization’s knowledge, approval or acquiescence. The organization’s acceptance of the benefits derived from the violation is evidence of knowledge, approval or acquiescence.

(2) The conduct of any organization in violation of § 400.454(b) may be imputed to an individual, or from one individual to another individual, if the individual to whom the improper conduct is imputed either participated in, knows, or had reason to know of such conduct.

(3) The conduct of one organization in violation of § 400.454(b) may be imputed to another organization when such conduct occurred in connection with a partnership, joint venture, joint application, association or similar arrangement, or when the organization to whom the improper conduct is imputed has the power to direct, manage, control or influence the activities of the organization responsible for the improper conduct. Acceptance of the benefits derived from the conduct is evidence of knowledge, approval or acquiescence.

(4) If such conduct is imputed, the person to whom the conduct is imputed may be subject to the same disqualification and civil fines as the person from whom the conduct is imputed. The factors contained in § 400.454(c)(2) will be taken into consideration with respect to the person to whom the conduct is being imputed.

(e) With respect to disqualifications:

(1) If a person is disqualified and that person is a:

(i) Producer, the producer will be precluded from receiving any monetary or non-monetary benefit provided under all of the following authorities, or their successors:

(A) The Act;

(B) The Farm Security and Rural Investment Act of 2002 (7 U.S.C. 7333 et seq.) or any successor statute;

(C) The Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) or any successor statute;

(D) The Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.) or any successor statute;

(E) The Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 et seq.) or any successor statute;

(F) Title XII of the Food Security Act of 1985 (16 U.S.C. 3801 et seq.) or any successor statute;

(G) The Consolidated Farm and Rural Development Act (7 U.S.C. 1921, et seq.) or any successor statute; and

(H) Any federal law that provides assistance to the producer of an agricultural commodity affected by a crop loss or decline in the prices of agricultural commodities.

(ii) Participant or other person, other than a producer, such participant or person will be precluded from participating in any way in the Federal crop insurance program and receiving any
monetary or non-monetary benefit under the Act.

(2) With respect to the term of disqualification:

(i) The minimum term will be not less than one year from the effective date determined in §400.454(a)(2);

(ii) The maximum term will be not more than five years from the effective date determined in §400.454(a)(2); and

(iii) Disqualification is to be imposed only in one-year increments, up to the maximum five years.

(3) Once a disqualification becomes final, the name, address, and other identifying information of the participant or other person shall be entered into the Ineligible Tracking System (ITS) maintained by FCIC in accordance with 7 CFR part 400, subpart U, and this information along with a list of the programs that the person is disqualified from shall be promptly reported to the General Services Administration for listing in the Excluded Parties List System (EPLS) in accordance with 7 CFR part 3017, subpart E.

(i) It is a participant’s responsibility to periodically review the ITS and EPLS to determine those participants and other persons who have been disqualified.

(ii) No participant may conduct business with a disqualified participant or other person if such business directly relates to the Federal crop insurance program, or if, through the business relationship, the disqualified participant or other person will derive any monetary or non-monetary benefit from a program administered under the Act.

(iii) If a participant or other person does business with a disqualified participant or other person, such participant may be subject to disqualification under this section.

(iv) Continuing to make payments to a disqualified person to fulfill pre-existing contractual or statutory obligations after the business relationship is terminated will not be considered as doing business with a disqualified person unless such payment is used as a means to circumvent the disqualification process.

(f) With respect to civil fines:

(1) A civil fine may be imposed for each violation.

(2) The amount of such civil fine shall not exceed the greater of:

(i) The amount of monetary gain, or value of the benefit, obtained as a result of the false or inaccurate information provided, or the amount obtained as a result of noncompliance with a requirement of FCIC; or

(ii) $10,000.

(3) Civil fines are debts owed to FCIC.

(i) A civil fine that is either imposed under this subpart, or agreed to through an executed settlement agreement with FCIC, must be paid by the specified due date. If the due date is not specified in the order issued by the Administrative Law Judge or Judicial Officer, as applicable, or the settlement agreement, it shall be 30 days after the date the order was issued or the settlement agreement signed by FCIC.

(ii) Any civil fine imposed under this section is in addition to any debt that may be owed to FCIC or to any approved insurance provider, such as an overpaid indemnity, underpaid premium, or other amounts owed.

(iii) FCIC, in its sole discretion, may reduce or otherwise settle any civil fine imposed under this section whenever it considers it appropriate or in the best interest of the USDA.

(4) The ineligibility procedures established in 7 CFR part 400, subpart U are not applicable to ineligibility determinations made under this section for nonpayment of civil fines.

(5) If a civil fine has been imposed and the person has not made timely payment for the total amount due, the person is ineligible to participate in the Federal crop insurance program until the amount due is paid in full.

(g) With respect to any person that has been disqualified or is otherwise ineligible due to non-payment of civil fines in accordance with §400.454(f):

(1) With respect to producers:

(i) All existing insurance policies will automatically terminate as of the next termination date that occurs during the period of disqualification and while the civil fine remains unpaid;

(ii) No new policies can be purchased, and no current policies can be renewed, between the date that the producer is disqualified and the date that the disqualification ends; and
§ 400.455 New application for insurance

(iii) New application for insurance cannot be made for any agricultural commodity until the next sales closing date after the period of disqualification has ended and the civil fine is paid in full.

(2) With respect to all other persons:

(i) Such person may not be involved in any function related to the Federal crop insurance program during the disqualification or ineligibility period (including the sale, service, adjustment, data transmission or storage, reinsurance, etc. of any crop insurance policy) or receive any monetary or non-monetary benefit from a program administered under the Act.

(ii) If the person is an agent or insurance agency, the producers may cancel their policies sold and serviced by the disqualified agent and rewrite the policy with another agent. If the producer does not cancel and rewrite the policy with another agent, the approved insurance provider must assign the policies to a different agent or agency to service during the period of disqualification or ineligibility. Policies that have been assigned to another agent or agency by the insurance provider will revert back to the disqualified agent or agency after the period of disqualification has ended provided all civil fines are paid in full and the producer does not cancel and rewrite the policy with a different agent or agency:

(iii) If the person is an approved insurance provider, the approved insurance provider shall not sell, or authorize to be sold, any new policies or may not renew, or authorize the renewal of, existing policies, as determined by FCIC, during the period of disqualification or ineligibility. Nothing in this provision affects the approved insurance provider’s responsibilities with respect to the service of existing policies.

(h) Imposition of disqualification or a civil fine under this section is in addition to any other administrative or legal remedies available under this section or other applicable law including, but not limited to, debarment and suspension.

[73 FR 76888, Dec. 18, 2008]

§ 400.455 Governmentwide debarment and suspension (procurement).

(a) For all transactions undertaken pursuant to the Federal Acquisition Regulations, FCIC will proceed under 48 CFR part 9, subpart 9.4 or 48 CFR part 409 when taking action to suspend or debar persons involved in such transactions, except that the authority to suspend or debar under these provisions will be reserved to the Manager of FCIC, or the Manager’s designee.

(b) Any person suspended or debarred under the provisions of 48 CFR part 9, subpart 9.4 or 48 CFR part 409 will not be eligible to contract with FCIC or the Risk Management Agency and will not be eligible to participate in or receive any benefit from any program under the Act during the period of ineligibility. This includes, but is not limited to, being employed by or contracting with any approved insurance provider that sells, services, or adjusts policies offered under the authority of the Act. FCIC may waive this provision if it is satisfied that the person who employs the suspended or debarred person has taken sufficient action to ensure that the suspended or debarred person will not be involved, in any way, with FCIC or receive any benefit from any program under the Act.

[73 FR 76890, Dec. 18, 2008]

§ 400.456 Governmentwide debarment and suspension (nonprocurement).

(a) FCIC will proceed under 7 CFR part 3017 when taking action to suspend or debar persons involved in nonprocurement transactions.

(b) Any person suspended or debarred under the provisions of 7 CFR part 3017, will not be eligible to contract with FCIC or the Risk Management Agency and will not be eligible to participate in or receive any benefit from any program under the Act during the period of ineligibility. This includes, but is not limited to, being employed by or contracting with any approved insurance provider, or its contractors, that sell, service, or adjust policies either insured or reinsured by FCIC. FCIC
Federal Crop Insurance Corporation, USDA § 400.651

may waive this provision if it is satisfied that the approved insurance provider or contractors have taken sufficient action to ensure that the suspended or debarred person will not be involved in any way with the Federal crop insurance program or receive any benefit from any program under the Act.

(c) The Manager, FCIC, shall be the debarring and suspending official for all debarment or suspension proceedings undertaken by FCIC under the provisions of 7 CFR part 3017.

[73 FR 76890, Dec. 18, 2008]

§ 400.457 Program Fraud Civil Remedies Act.

(a) This section is in accordance with the Program Fraud Civil Remedies Act of 1986 (31 U.S.C. 3801-U.S.C. 3831) which provides for civil penalties and assessments against persons who make, submit, or present, or cause to be made, submitted, or presented, false, fictitious, or fraudulent claims or written statements to Federal authorities or to their agents.

(b) Proceedings under this section will be in accordance with subpart L of 7 CFR part 1, "Procedures Related to Administrative Hearings Under the Program Fraud Civil Remedies Act of 1986."

(c) The Director, Appeals and Litigation Staff, FCIC, or the Director’s designee, is authorized to serve as Agency Fraud Claims Officer for the purpose of implementing the requirements of this section.

(d) Civil penalties and assessments imposed pursuant to this section are in addition to any other remedies that may be prescribed by law or imposed under this subpart.

§ 400.458 Scheme or device.

(a) In addition to the penalties specified in this part, if a person has knowingly adopted a material scheme or device to obtain catastrophic risk protection, other plans of insurance coverage, or noninsured assistance benefits to which the person is not entitled, has evaded the provisions of the Federal Crop Insurance Act, or has acted with the purpose of evading the provisions of the Federal Crop Insurance Act, the person shall be ineligible to receive any and all benefits applicable to any crop year for which the scheme or device was adopted.

(b) A scheme or device may include, but is not limited to, creating or using another entity, or concealing or providing false information with respect to your interest in the policyholder, to evade:

(1) Suspension, debarment, or disqualification from participation in the program; or

(2) Ineligibility for a delinquent debt owed to FCIC or the insurance company.

[60 FR 37324, July 20, 1995, as amended at 73 FR 76891, Dec. 18, 2008]

§§ 400.459-400.500 [Reserved]

Subpart S [Reserved]

Subpart T—Federal Crop Insurance Reform, Insurance Implementation

AUTHORITY: 7 U.S.C. 1506(l) and 1506(p).
SOURCE: 61 FR 42975, Aug. 20, 1996, unless otherwise noted.

§ 400.650 Purpose.

The Reform Act requires FCIC to implement a crop insurance program that offers several levels of insurance coverage for producers. These levels of protection include catastrophic risk protection, and additional coverage insurance. This subpart provides notice of the availability of these crop insurance options and establishes provisions and requirements for implementation of the insurance provisions of the Reform Act.

§ 400.651 Definitions.

Additional coverage. A level of coverage greater than catastrophic risk protection.

Administrative fee. An amount the producer must pay for catastrophic,
§ 400.651  
7 CFR Ch. IV (1-1-14 Edition)

and additional coverage each crop year on a per crop and county basis as specified in the Basic Provisions or the Catastrophic Risk Protection Endorsement.

Approved insurance provider. A private insurance company, including its agents, that has been approved and reinsured by FCIC to provide insurance coverage to producers participating in the Federal crop insurance program.

Approved yield. The actual production history (APH) yield, calculated and approved by the verifier, used to determine the production guarantee by summing the yearly actual, assigned, adjusted or unadjusted transitional yields and dividing the sum by the number of yields contained in the database, which will always contain at least four yields. The database may contain up to 10 consecutive crop years of actual or assigned yields. The approved yield may have yield adjustments elected under applicable policy provisions, or other limitations according to FCIC approved procedures applied when calculating the approved yield.

Catastrophic risk protection. The minimum level of coverage offered by FCIC which is required before a person may qualify for certain other USDA program benefits unless the producer executes a waiver of any eligibility for emergency crop loss assistance in connection with the crop. For the 1995 through 1998 crop years, such coverage will offer protection equal to fifty percent (50%) of the approved yield indemnified at sixty percent (60%) of the expected market price, or a comparable coverage as established by FCIC. For the 1999 and subsequent crop years, such coverage will offer protection equal to fifty percent (55%) of the approved yield indemnified at sixty percent (60%) of the expected market price, or a comparable coverage as established by FCIC.

Catastrophic Risk Protection Endorsement. The part of the crop insurance policy that contains provisions of insurance that are specific to catastrophic risk protection.

Crop of economic significance. A crop that has either contributed in the previous crop year, or is expected to contribute in the current crop year, ten percent (10%) or more of the total expected value of the producer’s share of all crops grown in the county. However, a crop will not be considered a crop of economic significance if the expected liability under the Catastrophic Risk Protection Endorsement is less than the administrative fee required for the crop.

Expected market price. (price election) The price per unit of production (or other basis as determined by FCIC) anticipated during the period the insured crop normally is marketed by producers. This price will be set by FCIC before the sales closing date for the crop. The expected market price may be less than the actual price paid by buyers if such price typically includes remuneration for significant amounts of post-production expenses such as conditioning, culling, sorting, packing, etc.

FCIC. The Federal Crop Insurance Corporation, a wholly owned Government Corporation within USDA.

FSA. The Farm Service Agency, an agency of the United States Department of Agriculture or any successor agency.

Insurable interest. The value of the producer’s interest in the crop that is at risk from an insurable cause of loss during the insurance period. The maximum indemnity payable to the producer may not exceed the indemnity due on the producer’s insurable interest at the time of loss.

Intended crop. A crop stated on the application as submitted on or before the sales closing date for the crop which the producer intended to plant in the crop year for which application is made.

Linkage requirement. The legal requirement that a producer must obtain at least catastrophic risk protection coverage for any crop of economic significance as a condition of receiving benefits for such crop from certain other USDA programs in accordance with § 400.655, unless the producer executes a waiver of any eligibility for emergency crop loss assistance in connection with the crop.

Person. An individual, partnership, association, corporation, estate, trust, or other legal entity, and wherever applicable, a state or a political subdivision or agency of a state.
Federal Crop Insurance Corporation, USDA

§ 400.653 Determining crops of economic significance.

To be eligible for certain other program benefits under § 400.655 the following conditions will apply with respect to crops of economic significance if the producer does not execute a waiver of any eligibility for emergency crop loss assistance in connection with the crop.

(a) If a producer planted a crop of economic significance in the preceding crop year, and does not intend to plant the same crop in the present crop year, the producer does not have to obtain insurance coverage or execute a waiver of any eligibility for emergency crop loss assistance in connection with the crop.

(b) The producer is initially responsible to determine the crops of economic significance in the county. The

§ 400.652 Insurance availability.

(a) If sufficient actuarial data are available, FCIC will offer catastrophic risk protection, and additional coverage plans of insurance to indemnify persons for FCIC insured or reinsured crop loss due to loss of yield or prevented planting, if the crop loss or prevented planting is due to an insured cause of loss specified in the applicable crop insurance policy.

(b) Catastrophic risk protection coverage may be offered through approved insurance providers and through local offices of the Farm Service Agency specified by the Secretary. Additional coverage will only be offered through approved insurance providers unless there is not a sufficient number of approved insurance providers that offer such insurance within a service area.

(c) A person must obtain at least catastrophic risk protection for the crop on all insurable acreage in the county in which the person has a share on or before the sales closing date designated by FCIC for the crop in the county in order to satisfy the linkage requirements unless the producer executes a waiver of any eligibility for emergency crop loss assistance in connection with the crop.

(d) For additional coverage, in areas where insurance is not available for a particular agricultural commodity that is insurable elsewhere, FCIC may enter into a written agreement with a person to insure the commodity, provided that the person has actuarially sound data relating to the production of the commodity that is acceptable to FCIC and that such written agreement is specifically allowed by the crop insurance regulations applicable to the crop.

(e) Failure to comply with all provisions of the policy constitutes a breach of contract and may result in ineligibility for certain other farm program benefits for that crop year and any benefit already received must be refunded. If a producer breaches the insurance contract, the execution of a waiver of eligibility for emergency crop loss assistance will not be effective for the crop year in which the breach occurred.

Secretary. The Secretary of the United States Department of Agriculture.

Substitute crop. An alternative crop whose sales closing date has passed and that is planted on acreage that is prevented from being planted to an intended crop or where an intended crop is planted and fails.

Zero acreage report. An acreage report filed by the producer that certifies that the producer does not have a share in the crop for that crop year.

§ 400.653 Determining crops of economic significance.

To be eligible for certain other program benefits under § 400.655 the following conditions will apply with respect to crops of economic significance if the producer does not execute a waiver of any eligibility for emergency crop loss assistance in connection with the crop.

(a) If a producer planted a crop of economic significance in the preceding crop year, and does not intend to plant the same crop in the present crop year, the producer does not have to obtain insurance coverage or execute a waiver of any eligibility for emergency crop loss assistance in connection with the crop.

(b) The producer is initially responsible to determine the crops of economic significance in the county. The
insurance provider may assist the producer in making these initial determinations. However, these determinations will not be binding on the insurance provider. To determine the percentage value of each crop:

(1) Multiply the acres planted to the crop times the producer’s share, times the approved yield, and times the price;

(2) Add the values of all crops grown by the producer (in the county); and

(3) Divide the value of the specific crop by the result of paragraph (b)(2).

(c) The producer may use the type of price, such as the current local market price, futures price, established price, highest amount of insurance, etc., for the price when calculating the value of each crop, provided that the producer uses the same type of price for all crops in the county.

(d) The producer may be required to justify the calculation and provide adequate records to enable the insurance provider to verify whether a crop is of economic significance.

§ 400.654 Application and acreage report.

(a) To participate in catastrophic risk protection, or additional coverage plans of insurance, a producer must submit an application for insurance on or before the applicable sales closing date.

(b) In order to remain eligible for certain farm programs, as specified in §400.655, a producer must obtain at least catastrophic risk protection on all crops of economic significance, if catastrophic risk protection is available in the county, unless the producer executes a waiver of any eligibility for emergency crop loss assistance in connection with the crop.

(c) Notwithstanding the requirements of §400.654(a) that applications for insurance be submitted on or before the applicable sales closing date, FCIC may permit a producer to insure crops other than those specified on the application under the following conditions:

(1) The producer must be unable to plant the intended crop or it is not practical to replant.

(2) Conditions must exist to warrant allowing a producer to insure crops other than the intended crop.

(3) The producer must submit an application for the substitute crop on or before the acreage reporting date for the substitute crop and pay any applicable administrative fee. A producer may not substitute a crop that the producer planted in the preceding crop year unless that crop was listed on a timely filed application for the current crop year.

(4) If the producer plants a substitute crop that is a crop of economic significance, the producer must obtain CAT coverage, if available, to comply with the linkage requirements specified in §400.655. The producer may not substitute a crop under this provision if the producer has signed or intends to sign a waiver for emergency crop loss assistance for the current crop year.

(5) The substitute crop must be planted on or before the final planting date or within the late planting period, if applicable, for the substitute crop.

(6) Under no circumstances may a producer submit an application for additional coverage after the sales closing date for the substitute crop.

(d) For all coverages, including catastrophic risk protection, and additional coverages, the producer must file a signed acreage report on or before the acreage reporting date. Any person may sign any document relative to crop insurance coverage on behalf of any other person covered by such a policy, provided that the person has a properly executed power of attorney or other legally sufficient document authorizing such person to sign.

(e) Under catastrophic risk protection, unless the other person with an insurable interest in the crop objects in writing prior to the acreage reporting date and provides a signed acreage report on their own behalf an operator may sign the acreage report for all other persons with an insurable interest in the crop without a power of attorney. All persons with an insurable interest in the crop, and for whom the
operator purports to sign and represent, are bound by the information contained in that acreage report.

§ 400.655 Eligibility for other program benefits.

The producer must obtain at least catastrophic coverage for each crop of economic significance in the county in which the producer has an insurable share, if insurance is available in the county for the crop, unless the producer executes a waiver of any eligibility for emergency crop loss assistance in connection with the crop, to be eligible for:

(a) Benefits under the Agricultural Market Transition Act;

(b) Loans or any other USDA provided farm credit, including: guaranteed and direct farm ownership loans, operating loans, and emergency loans under the Consolidated Farm and Rural Development Act provided after October 13, 1994; and

(c) Benefits under the Conservation Reserve Program derived from any new or amended application or contract executed after October 13, 1994.

[61 FR 42975, Aug. 20, 1996. Redesignated at 63 FR 40634, July 30, 1998]

§§ 400.656-400.657 [Reserved]

Subpart U—Ineligibility for Programs Under the Federal Crop Insurance Act

Authority: 7 U.S.C. 1506(l), 1506(p).

Source: 62 FR 42042, Aug. 5, 1997, unless otherwise noted.

§ 400.675 Purpose.

This rule prescribes conditions under which a person may be determined to be ineligible to participate in any program administered by FCIC under the Federal Crop Insurance Act, as amended. This rule also establishes the criteria for reinstatement of eligibility.

§ 400.676 [Reserved]

§ 400.677 Definitions.

Actively engaged in farming. Means a person who, in return for a share of profits and losses, makes a contribution to the production of an insurable crop in the form of capital, equipment, land, personal labor, or personal management.

Applicant. A person who has submitted an application for crop insurance coverage under the Act.

Authorized person. Any current or past officer, employee, elected official, general agent, agent, contractor, or loss adjuster of FCIC, the insurance provider, or any other government agency whose duties require access to the Ineligible Tracking System to administer the Act.

CAT. The catastrophic risk protection plan of insurance.

Controlled substance. Any prohibited drug-producing plants including, but not limited to, cacti of the genus (lophophora), coca bushes (erythroxylum coca), marijuana (cannabis sativa), opium poppies (papaver somniferum), and other drug-producing plants, the planting and harvesting of which is prohibited by Federal or state law.

Debt. An amount of money which has been determined by an appropriate agency official to be owed, by any person, to FCIC or an insurance provider under any program administered under the Act based on evidence submitted by the insurance provider. The debt may have arisen from an overpayment, premium or administrative fee non-payment, interest, penalties, or other causes.

Debtor. A person who owes a debt and that debt is delinquent.

Delinquent debt. Any debt owed to FCIC or the insurance provider, that arises under any program administered under the Act based on evidence submitted by the insurance provider. The debt may have arisen from an overpayment, premium or administrative fee non-payment, interest, penalties, or other causes.

VerDate Mar 15 2010 01:21 Mar 20, 2014 Jkt 232017 PO 00000 Frm 00063 Fmt 8010 Sfmt 8010 C:\SGML_OUT\232017.XXX 232017srobinson on DSKB307YQ1PROD with CFR
§ 400.678 Applicability.

This subpart applies to any program administered by FCIC under the Act, including:

(a) The catastrophic risk protection plan of insurance;

(b) The limited and additional coverage plans of insurance as authorized under sections 508(c) and 508(m) of the Act; and

(c) Private insurance products authorized under section 508(h) of the Act and reinsured by FCIC.

§ 400.679 Criteria for ineligibility.

Any person may be determined to be ineligible to participate in any program administered by FCIC under the authority of the Act, if the person meets one or more of the following criteria:

(a) Has a delinquent debt on a crop insurance policy, issued or reinsured by FCIC, or any delinquent debt due FCIC
under the Act. Any person with a delinquent debt owed to FCIC or to the insurance provider shall be ineligible to participate in any program administered under the authority of the Act. Such determinations will be in accordance with 7 CFR 400.459. The existence and delinquency of the debt must be verifiable.

(b) Has violated the controlled substance (7 CFR part 718) provisions of the Food Security Act of 1985, as amended. Any person who violates the controlled substance provisions of the Food Security Act of 1985, as amended, shall be ineligible to participate in any program administered under the Act.

(c) Has been disqualified under section 506(n) of the Act and 7 CFR part 400, subpart R. Any person who is disqualified in any administrative proceeding shall be ineligible to participate in any program administered under the Act. Ineligibility determinations resulting from administrative proceedings will not be stayed pending review. However, reversal of the determination will date back to the time of determination.

§ 400.680 Determination and notification of ineligibility.

(a) The insurance provider must send a written notice of the debt to the person, including the time frame in which the debt must be paid, and provide the person with a meaningful opportunity to contest the amount or existence of the debt. After the insurance provider has evaluated the person’s response, if any, and determined that the debt is owed and delinquent, the insurance provider should submit the documentation establishing the existence and amount of the debt to FCIC, including any response by the person.

(b) If an insurance provider or any other authorized person has evidence that a person meets any other criteria set forth in §400.679, they must submit the evidence to FCIC.

(c) After FCIC verifies that the person has met one or more of the criteria stated in §400.679, FCIC will issue a Notice of Ineligibility and mail such notice to the person’s last known address and to the insurance provider.

(d) The Notice of Ineligibility will state the criteria upon which the determination of ineligibility has been based, a brief statement of the facts to support the determination, the time period of ineligibility, and the persons right to an appeal of the ineligibility determination.

(e) Within 30 days of receiving the Notice of Ineligibility, any person receiving such a notice may appeal the determination of ineligibility to the National Appeals Division in accordance with 7 CFR part 11.

(f) If the person appeals the determination of ineligibility to the National Appeals Division, the insurance provider will be notified and provided with an opportunity to participate in the proceeding if permitted by 7 CFR part 11.

§ 400.681 Effect of ineligibility.

(a) The period of ineligibility will be effective:

(1) For ineligibility as a result of a delinquent debt, the date the debt has been determined to be delinquent until the debt has been paid in full, discharged in bankruptcy, or the person has executed a scheduled installment payment agreement;

(2) For ineligibility as a result of a violation of the controlled substance provisions of the Food Security Act of 1985, at the beginning of the crop year in which the producer was convicted and the four subsequent consecutive crop years; and

(3) For ineligibility as a result of a disqualification under section 506(n) of the Act, the date that the Administrative Law Judge signs the order disqualifying the person until the period specified in the order of disqualification has expired.

(b) Once the person has been determined to be ineligible:

(1) All policies in which the ineligible person is the sole insured will be void for the period specified in §400.681(a);

(2) If the ineligible person is a general partnership, all partners will be individually ineligible and any policy in which a partner has a 100 percent interest will be void for the period specified in §400.681(a). The partnership and all partners will be removed from any policy in which they have a substantial beneficial interest, and the policyholder share under the policies will be
reduced commensurate with the ineligible person’s share;
(3) If the applicant or policyholder is a corporation, partnership, or other business entity, and an ineligible person has a substantial beneficial interest in the applicant or policyholder, the application may be accepted or existing policies remain in effect, although the ineligible person will be removed from the policies and the policyholder share under the policies will be reduced commensurate with the ineligible person’s share;
(4) If the applicant or policyholder is a corporation, partnership, or other business entity that was created to conceal the interest of a person in the farming operation or to evade the ineligibility determination of a person with a substantial beneficial interest in the applicant or policyholder, the corporation, partnership or other business entity will be disregarded, the individual shareholders or partners will be personally responsible, and any shareholder or partner that is ineligible will be removed from the policy and the policies will be reduced commensurate with the ineligible person’s share;
(5) Any indemnities or payments made on a voided policy, or on the portion of the policy reduced because of ineligibility, will be declared overpayments and must be repaid; and
(6) If the policy is voided, all producer paid premiums may be refunded, or if an ineligible person is removed from a policy, the portion of the producer paid premium commensurate with the ineligible person’s share may be refunded, less a reasonable amount for expense and handling in accordance with 7 CFR 400.47.

§400.682 Criteria for reinstatement of eligibility.

A person who has been determined ineligible may have eligibility reinstated as follows:
(a) A delinquent debt owed on a crop insurance policy insured or reinsured by FCIC or any delinquent debt due FCIC. Eligibility may be reinstated after the debt is paid in full or discharged in bankruptcy, or the person has executed a scheduled installment payment agreement accepted by FCIC or the insurance provider. Eligibility may be reinstated as of the date the debt is paid, the date the agreement is accepted, or the date the debt is discharged in bankruptcy.
(b) Violations of the controlled substance provisions of the Food Security Act of 1985, as amended. Eligibility may be reinstated after the period of ineligibility stated in §400.681 has expired.
(c) Disqualification under section 506(n) of the Act. Eligibility may be reinstated when the period of disqualification determined in the administrative proceedings has expired and payment of all penalties and overpayments have been completed.
(d) Timing of reinstatement of eligibility. After eligibility has been reinstated, the person must complete a new application for crop insurance coverage
on or before the applicable sales closing date. If the date of reinstatement of eligibility occurs after the applicable sales closing date for the crop year, the person may not participate until the following crop year. If the National Appeals Division determines that the person should not have been placed on the Ineligible Tracking System, reinstatement will be effective at the beginning of the crop year for which the producer was listed on the Ineligible Tracking System and the person will be entitled to all applicable benefits under the policy.

§ 400.683 Administration and maintenance.

(a) Ineligible producer data will be maintained in a system of records in accordance with the Privacy Act, 5 U.S.C. 552a.

(1) The Ineligible Tracking System is a record of all persons who have been determined to be ineligible for participation in any program pursuant to this subpart. This system contains identifying information of the ineligible person including, but not limited to, name, address, telephone number, SSN or EIN, reason for ineligibility, and time period for ineligibility.

(2) Information in the Ineligible Tracking System may be used by Federal agencies, FCIC employees, contractors, and reinsured companies and their personnel who require such information in the performance of their duties in connection with any program administered under the Act. The information may be furnished to other users including, but not limited to, FCIC contracted agencies; credit reporting agencies and collection agencies; in response to judicial orders in the course of litigation; and other users as may be appropriate or required by law or regulation. The individual information will be made available in the form of various reports and notices produced from the Ineligible Tracking System, based on valid requests.

(3) Supporting documentation regarding the determination of ineligibility and reinstatement of eligibility will be maintained by FCIC and FSA, or its contractors, reinsured companies, and Federal and State agencies. This documentation will be maintained consistent with the electronic information contained within the Ineligible Tracking System.

(b) Information may be entered into the Ineligible Tracking System by FCIC or FSA personnel.

(c) All persons applying for or renewing crop insurance contracts issued or reinsured by FCIC will be subject to validation of their eligibility status against the Ineligible Tracking System. Applications or benefits approved and accepted are considered approved or accepted subject to review of eligibility status in accordance with this subpart.

Subpart V—Submission of Policies, Provisions of Policies and Rates of Premium

AUTHORITY: 7 U.S.C. 1506(1), 1506(p).

SOURCE: 66 FR 47951, Sept. 17, 2001, unless otherwise noted.

§ 400.700 Basis, purpose, and applicability.

This subpart establishes guidelines for the submission of policies, plans of insurance, and rates of premium to the Board as authorized under section 508(h) of the Act and for nonreinsured supplemental policies in accordance with the SRA, and the roles and responsibilities of FCIC and the applicant. It also specifies the procedures for requesting reimbursement for research and development costs, and maintenance costs for products and the approval process.

[74 FR 8705, Feb. 26, 2009]

§ 400.701 Definitions.

Actuarial documents. The material for the crop or insurance year which is available for public inspection in your agent’s office and published on RMA’s website at http://www.rma.usda.gov/, or a successor website, and which shows available coverage levels, information needed to determine premium rates, premium adjustment percentages, practices, particular types or varieties of the insurable crop or agricultural
commodity, insurable acreage or commodities, and other related information regarding crop insurance or other risk management plans of insurance in the county or state.

**Actuarially appropriate.** Premium rates expected to cover anticipated losses and a reasonable reserve based on valid reasoning, an examination of available risk data, which for new products may be scarce but must still be of sufficient quality and quantity to reasonably determine the anticipated losses, or thorough knowledge or experience of the expected value of future costs associated with the risk to be transferred.

**Administrative and Operating (A&O) subsidy.** The subsidy for the administrative and operating expenses authorized by the Act and paid by FCIC on behalf of the producer to the approved insurance provider. Loss adjustment expense reimbursement paid by FCIC for CAT eligible crop insurance contracts, and any ceding commission received for ceding any portion of the risk associated with any eligible crop insurance contract authorized under the authority of the Act with a reinsurer are not considered as A&O subsidy.

**Applicant.** Any person or entity that submits a policy, plan of insurance, provisions of a policy or plan of insurance, or rates of premium to the Board for approval under section 508(h) of the Act.

**Approved insurance provider.** A private insurance company that has been approved by FCIC to provide insurance coverage to producers participating in programs authorized by the Act.

**Board.** The Board of Directors of FCIC.

**Complete submission.** A submission determined by the Board to contain all necessary and appropriate documentation in accordance with §400.705 and is of sufficient quality to conduct a meaningful review.

**Complexity.** Complexity takes into consideration such factors as originality, the number and type of factual determinations necessary to establish insurable interest, evaluate risk, and determine whether an indemnity is payable, the number of commodities and areas to which the product is applicable, the rating methodology, the number of risks covered, unique policy provisions or endorsements, the delivery process of the submission, and the process of creating rules, policy terms and conditions, underwriting procedures, rating methodologies, administrative and operating procedures, and supporting materials.

**Development.** The process of drafting rules, new policy provisions, pricing and rating methodologies, administrative and operating procedures, systems and software, supporting materials, and documentation necessary to create and implement a proposed policy or coverage.

**Disinterested third party.** A person who does not have any familial relationship (parents, brothers, sisters, children, spouse, grandchildren, aunts, uncles, nieces, nephews, first cousins, or grandparents, related by blood, adoption or marriage, are considered to have a familial relationship) with anyone employed or contracted by the applicant or who will not benefit financially from the approval of the submission.

**Endorsement.** A document that amends a policy reinsured under the Act in a manner that supplements or amends the insurance coverage provided by that policy.

**FCIC.** The Federal Crop Insurance Corporation, a wholly owned government corporation within USDA.

**Maintenance.** For the purposes of this subpart only, the process of continual support and improvement, as needed, for a policy or plan of insurance, including the periodic review of setting prices, updating premium rates or the rating methodology, updating or modifying policy terms and conditions, and any other actions necessary to provide adequate and meaningful protection for producers, ensure actuarial soundness, or to respond to statutory or regulatory changes.

**Maintenance costs.** Specific expenses associated with the maintenance of a policy during the maintenance period.

**Maintenance period.** A period of time that begins on the date the Board approves the submission for maintenance and ends on the date that is not more than four reinsurance years after such approval.

**Manager.** The Manager of FCIC.
Marketable. A determination by the Board that a sufficient number of producers will purchase the product and approved insurance providers will sell the product to make it economical, based on credible evidence provided by the applicant and any other relevant information.

Marketing plan. A detailed, written plan that identifies, at a minimum, the expected number of potential buyers, premium, liability, a prescribed insurance year cycle, the data upon which such information is based, such data may include, but is not limited to, focus group results, market research studies, qualitative market estimates, effects upon the delivery system or ancillary participants, correspondence from producers expressing the need for such policy or plan of insurance, responses from a reasonable representative cross-section of producers to be effected by the policy or plan of insurance demonstrating the number of producers likely interested in purchasing the product, and a commitment from at least one approved insurance provider to sell and support such a policy or plan of insurance.

Multiple peril crop insurance (MPCI). All insurance policies reinsured by FCIC that offers coverage for loss of production, loss of revenue, or both.

National Agricultural Statistics Service (NASS). An agency of the United States Department of Agriculture, or a successor agency.

Nonreinsured supplemental policy (NRS). A policy, endorsement or other risk management tool that is not reinsured under the Act, or has not been submitted to FCIC under section 508(h) of the Act, that offers additional coverage, other than loss related to hail, to a policy or plan of insurance that is reinsured by FCIC.

Non-significant changes. Minor changes to the policy or plan of insurance, such as technical corrections, that do not affect the rating or pricing methodologies, the amount of subsidy owed, the amount or type of coverage, the interests of producers, FCIC’s reinsurance risk, or any condition that does not affect liability or the amount of loss to be paid under the policy. Statutory or regulatory requirements are included in this category regardless of impact.

Plan of insurance. A class of policies, such as MPCI or Group Risk Plan of Insurance, that offers a specific type of coverage to one or more agricultural commodities.

Policy. A contract for insurance that includes an accepted application, Basic Provisions, applicable Commodity Provisions, other applicable options and endorsements, the Special Provisions, related materials, and the applicable regulations published in 7 CFR chapter IV.

Rate of premium. The dollar amount per insured unit or percentage rate per dollar of liability that is needed to pay anticipated losses and provide a reasonable reserve.

Related material. The actuarial documents for the insured agricultural commodity and any underwriting or loss adjustment manual, handbook, form or other information needed to administer the policy.

Research. For the purposes of development, the gathering of information related to: Producer needs and interests; the marketability of the policy or plan of insurance; the appropriate policy terms, premium rates, price elections, administrative and operating procedures, supporting materials, and the documentation, systems and software necessary to implement a policy or plan of insurance. Gathering of information to determine whether it is feasible to expand a policy or plan of insurance to a new area or to cover a new commodity under the same policy terms and conditions, price, and premium rates is not considered research.

Research and development costs. Specific expenses incurred and directly related to the research and development of a submission, as initially approved by the Board.

Risk Management Agency (RMA). An agency of USDA responsible for the administration of all programs authorized under the Act and other authorities.

Risk subsidy. The portion of the approved premium paid by FCIC on behalf of the insured person.

Sales closing date. The final calendar date on which an approved insurance
provider may accept an application by a producer for insurance.

Secretary. The Secretary of the United States Department of Agriculture.

Significant change. Any change to the policy or plan of insurance that may affect the rating and pricing methodologies, the amount of subsidy owed, the amount of coverage, the interests of producers, FCIC's reinsurance risk, or any condition that may affect liability or the amount of loss to be paid under the policy.

Special Provisions. The part of the policy that contains specific provisions of insurance for each insured commodity that may vary by geographic area.

Submission. A policy, plan of insurance, provision of a policy or plan of insurance, or rates of premium provided by an applicant to FCIC in accordance with the requirements of this subpart.

USDA. The United States Department of Agriculture.

User fees. Fees, approved by the Board, that can be charged to approved insurance providers for use of a policy or plan of insurance.

§ 400.702 Confidentiality of submission and duration of confidentiality.

(a) Prior to approval by the Board, any submission made to the Board under section 508(h) of the Act, including any information generated from the submission, will be considered confidential commercial or financial information for purposes of 5 U.S.C. 552(b)(4) and will not be released by FCIC to the public, unless the applicant authorizes such release in writing.

(b) Once the Board approves a submission, all information provided with the submission, or generated in the approval process, may be released to the public, including any mathematical modeling and data, unless it remains confidential business information under 5 U.S.C. 552(b).

(c) Any submission disapproved by the Board will remain confidential commercial or financial information in accordance with 5 U.S.C. 552(b) and no information related to such submission will be released by FCIC unless authorized in writing by the applicant.

(d) In the submission, the applicant must state if the name of the submission may be used in Board documents including but not limited to the agenda, minutes, and Board memoranda. The applicant cannot use false names to mislead the public regarding the nature of the submission. If permission is not given to use the name of the submission, the submission will simply be referred to as a "Section 508(h) submission."

§ 400.703 Timing of submission.

(a) A submission may only be provided to FCIC, in either a hard copy or electronic format, during the first 5 business days of January, April, July, and October.

(b) Any submission not provided within the first 5 business days of a month stated in paragraph (a) of this section, will be considered to have been provided the next month stated in paragraph (a). For example, if an applicant provides a submission on January 10, it will be considered to have been received on April 1.

(c) Any submission must be provided to the Deputy Administrator, Research and Development (or any successor), Risk Management Agency, 6501 Beacon Drive, Stop 0812, Kansas City, MO 64133-4676, not later than 240 days prior to the earliest proposed sales closing date to be considered for sale in the requested crop year.

(d) The Board, or RMA if authorized by the Board, shall determine when sales can begin for a submission approved by the Board.

[70 FR 44236, Aug. 2, 2005]

§ 400.704 Type of submission.

(a) An applicant may submit to the Board in accordance with § 400.705:

(1) A policy or plan of insurance not currently reinsured by FCIC;

(2) One or more proposed revisions to a policy or plan of insurance authorized under the Act; or

(3) Rates of premium for any policy or plan of insurance authorized under the Act.
 § 400.705 Contents required for a new submission or changes to a previously approved submission.

(a) A complete submission must contain the following material, as applicable, in the order given, in a three ring binder, with a table of contents, page numbers, and section dividers clearly labeling each section or in an electronic format that when printed will be an exact duplicate of the information that would have been found in the three-ring binder with the exception of section dividers.

(1) If a hard copy of the submission is provided, it must include six identical copies provided to the Deputy Administrator, Research and Development (or successor), Risk Management Agency, 6501 Beacon Drive, Stop 0812, Kansas City, MO 64133-4676, and one identical copy of the submission provided to the Administrator, Risk Management Agency, 1400 Independence Ave., Stop 0801, Room 3053 South Building, Washington, DC 20250-0801.

(2) Electronic submissions must be sent to the Deputy Administrator, Research and Development (or successor) at DeputyAdministrator@rma.usda.gov and the Administrator at Administrator@rma.usda.gov.

(b) The first section will contain general information, including, as applicable:

(1) The applicant's name, address or primary business location, phone number, and e-mail address;

(2) The type of submission (see § 400.704);

(3) A statement of whether the applicant is requesting:

   (i) Reinsurance, which includes risk subsidy and A&O subsidy;

   (ii) Reimbursement for research and development costs, as applicable; or

   (iii) Reimbursement for maintenance costs, as applicable;

(4) The proposed agricultural commodities, including types, varieties, and practices covered by the submission;

(5) The crop and reinsurance years in which the submission is proposed to be available for purchase by producers;

(6) The proposed sales closing date, if applicable, or if not applicable, the earliest date the applicant expects to release the product to the public;

(7) The proposed duration and scope of the plan of insurance;

(8) A marketing plan;

(9) Any known or anticipated future expansion plans;

(10) Identification, including names, addresses, telephone numbers, and e-mail addresses, of the persons responsible for:

   (i) Addressing questions regarding the policy, underwriting rules, loss adjustment procedures, rate and price methodologies, data processing and record-keeping requirements, and any other questions that may arise in administering the program after it is approved; and

   (ii) Annual reviews to ensure compliance with all requirements of the Act, this subpart, and any agreements executed between the applicant and FCIC; and

(11) A statement of whether the submission will be filed with the applicable office responsible for regulating insurance in each state proposed for insurance coverage, and if not, reasons why the submission will not be filed for review.

(c) The second section must contain the benefits of the plan, including, as applicable, a statement about the plan that demonstrates:

(1) How the submission offers coverage or other benefits not currently available from existing public and private programs;

(2) The projected demand for the submission, which must be supported by information from market research, producers or producer groups, agents, lending institutions, and other interested parties that provide verifiable evidence of demand; and

(3) How the submission meets public policy goals and objectives consistent with the Act and other laws, as well as policy goals supported by USDA and the Federal Government.

(d) Except as provided in this section, the third section must contain the policy, including, as applicable:
§ 400.705  7 CFR Ch. IV (1-1-14 Edition)

(1) If the submission involves a new insurance policy or plan of insurance:
   (i) All applicable policy provisions; and
   (ii) A list and description of any additional coverage that may be elected by the insured, including how such coverage may be obtained; and

(2) If the submission involves a change to a previously approved policy, plan of insurance, or rates of premium, the proposed revisions, rationale for each change, data and analysis supporting each change, the impact of each change, and the impact of all changes in aggregate.

(e) The fourth section must contain the information related to the marketing of the policy or plan of insurance, including, as applicable:

   (1) A list of counties and states where the submission is proposed to be offered;
   (2) The amount of commodity (acres, head, board feet, etc.), the amount of production, and the value of each agricultural commodity proposed to be covered in each proposed county and state;
   (3) The expected liability and premium for each proposed county and state;
   (4) If available, any insurance experience for each year and in each proposed county and state in which the policy has been previously offered for sale including an evaluation of the policy’s performance and, if data are available, a comparison with other similar insurance policies reinsured under the Act;
   (5) Focus group results;
   (6) Market research studies;
   (7) Qualitative market estimates;
   (8) Affects upon the delivery system or ancillary participants;
   (9) Correspondence from producers expressing the need for such policy or plan of insurance;
   (10) Responses from a reasonable representative cross-section of producers to be affected by the policy or plan of insurance; and
   (11) Commitment in writing from at least one approved insurance provider to sell and support the policy or plan of insurance.

(f) The fifth section must contain the information related to the underwriting and loss adjustment of the submission, including as applicable:

   (1) Detailed rules for determining insurance eligibility, including all producer reporting requirements;
   (2) Relevant dates, if not included in the proposed policy;
   (3) Detailed examples of the data and calculations needed to establish the insurance guarantee, liability, and premium per acre or other unit of measure, including worksheets that provide the calculations in sufficient detail and in the same order as presented in the policy to allow verification that the premiums charged for the coverage are consistent with policy provisions;
   (4) Detailed examples of calculations used to determine indemnity payments for all probable situations where a partial or total loss may occur;
   (5) A detailed description of the causes of loss covered by the policy or plan of insurance and any causes of loss excluded;
   (6) Any statements to be included in the actuarial documents; and
   (7) The loss adjustment standards handbook for the policy or plan of insurance that includes:

      (i) A table of contents and introduction;
      (ii) A section containing abbreviations, acronyms, and definitions;
      (iii) A section containing insurance contract information (insurability requirements; crop provisions not applicable to catastrophic risk protection; specific unit division guidelines, if applicable; notice of damage or loss provisions; quality adjustment provisions; etc.);
      (iv) A section that thoroughly explains appraisal methods, if applicable;
      (v) Illustrative samples of all the applicable forms needed for insuring and adjusting losses in regards to the product plus detailed instructions for their use and completion;
      (vi) Instructions, examples of calculations, and loss adjustment procedures that are necessary to establish the amounts of coverage and loss;
      (vii) A section containing any special coverage information (i.e., replanting, tree replacement or rehabilitation, prevented planting, etc.), as applicable; and
§ 400.705

Federal Crop Insurance Corporation, USDA

(viii) A section containing all applicable reference material (i.e., minimum sample requirements, row width factors, etc.).

(g) The sixth section must contain information related to prices and rates of premium, including, as applicable:

(1) A list of all assumptions made in the premium rating and commodity pricing methodologies, and the basis for these assumptions;

(2) A detailed description of the pricing and rating methodologies, including supporting documentation, all mathematical formulas, equations, and data sources used in determining rates and prices and an explanation of premium components that detail how rates were determined for each component, that demonstrate the rate is appropriate;

(3) An example of both a rate calculation and a price calculation;

(4) A discussion of the applicant’s objective evaluation of the reliability of the data;

(5) An analysis of the results of simulations or modeling showing the performance of proposed rates and commodity prices, as applicable, based on one or more of the following (Such simulations must use all years of experience available to the applicant):

(i) A recalculation of total premium and losses compared to a similar or comparable insurance plan offered under the authority of the Act with modifications, as needed, to represent the components of the submission;

(ii) A simulation based on the probability distributions used to develop the rates and commodity prices, as applicable, including sensitivity tests that demonstrate price or yield extremes, and the impact of inappropriate assumptions; or

(iii) Any other comparable simulation that provides results indicating both aggregate and individual performance of the submission under various scenarios depicting good and poor actuarial experience; and

(6) A simulation of expected losses capturing both a probable loss and a total loss.

(h) The seventh section must contain an evaluation and certification from a disinterested third party who is an accredited associate or fellow of the Casualty Actuarial Society, or other similarly qualified professional, who certifies the submission is actuarially appropriate and consistent with appropriate insurance principles and practices.

(i) The eighth section must contain all forms applicable to the submission, including:

(1) An application for insurance and procedures for accepting the application; and

(2) All applicable policy forms, instructions and procedures that are necessary to establish the amounts of coverage or loss.

(j) The ninth section must contain the following:

(1) A statement specifying sales will not commence for any new or revised submission until at least 60 days after all policy provisions and related material are released to the public by RMA, unless otherwise specified by the Board;

(2) An explanation of any provision of the policy not authorized under the Act and identification of the portion of the rate of premium due to these provisions;

(3) Agent and loss adjuster training plans; and

(4) A certification from the applicant’s legal counsel that the submission meets and complies with all requirements of the Act, applicable regulations, and any reinsurance agreement.

(k) The tenth section must contain a written plan, including specifications and details for the systems and software development necessary for the implementation of the submission, if applicable, and the documents that demonstrate the submitter has the capability and resources to develop systems that comply in all respects with the standards established for processing and acceptance of data by the FCIC Data Acceptance System, or successor system, unless otherwise authorized by FCIC. Unless otherwise determined by FCIC, the applicant must consult with FCIC to determine whether their submission can be implemented and administered through the current system:

(1) If FCIC approves the submission and determines that its system has the
§ 400.706  Review of submission.

(a) Prior to providing the submission to the Board to determine whether it is a complete submission, RMA will:

(1) Review the submission to determine if all necessary and appropriate documentation is included in accordance with §400.705;

(2) Review the submission to determine whether the submission is of sufficient quality to conduct a meaningful review;

(3) Inform the applicant of the information RMA deems necessary for the submission to comply with paragraphs (a)(1) and (2) of this section; and

(4) Forward the submission and the results of RMA’s initial review to the Board.

(b) Upon the Board’s receipt of the submission, the Board will:

(1) Determine if the submission is a complete submission (The date the capacity to implement and administer the submission, the applicant must provide acceptable computer requirements, code and software, consistent with that used by FCIC, to facilitate the acceptance of producer applications and all related data;

(2) If FCIC approves the submission and determines that its system lacks the capacity to implement and administer the submission, the applicant must provide acceptable computer systems, requirements, code and software necessary to implement and administer the policy or plan of insurance;

(3) Any computer systems, requirements, code and software must be consistent with that used by FCIC, and comply with the standards established in Appendix III, or any successor document, of the Standard Reinsurance Agreement or other reinsurance agreement as specified by FCIC; and

(4) These requirements are available from the Risk Management Agency, 6501 Beacon Drive, Stop 0812, Kansas City, MO, 64133-4676 or on RMA’s Web site at http://www.rma.usda.gov/data/m13, or a successor website.

(l) The eleventh section must contain a training package. The training package must include a thorough discussion, explanations, written exercises, and examples covering the following topics:

(1) Basic and catastrophic risk protection policy provisions;

(2) The commodity provisions and any endorsements;

(3) Underwriting under the underwriting guide;

(4) Eligibility requirements;

(5) Guarantee, indemnity, and premium calculations;

(6) Special Provisions of Insurance;

(7) Actuarial documents;

(8) Loss adjustment under the loss adjustment standards handbook;

(9) Applicable additions to the Crop Insurance Handbook (CIH); and

(10) Applicable additions to the Loss Adjustment Manual (LAM).

(m) The twelfth section submitted on separate pages and in accordance with §400.712 must specify:

(1) On one page, the total estimated amount that will be requested for reimbursement of research and development costs (for new products only) or the estimated amount for maintenance costs for the year for which the submission will be effective (for products that are within the maintenance period); and

(2) On another page, a comprehensive estimate of maintenance costs for each future year of the maintenance period and the basis for which such maintenance costs will be incurred, including, but not limited to:

(i) Any anticipated expansion;

(ii) The generation of rates, Special Provisions, underwriting rules, etc;

(iii) The determination of prices; and

(iv) Any other costs that the applicant anticipates will be requested for reimbursement.

(n) The thirteenth section must contain executed certification statements in accordance with the following:

(1) “Applicant’s Name hereby claim that the amounts set forth in this section and §400.712 are correct and due and owing to Applicant’s Name by FCIC under the Federal Crop Insurance Act”; and

(2) “Applicant’s Name understands that, in addition to criminal fines and imprisonment, the submission of false or fraudulent statements or claims may result in civil and administrative sanctions.”

[70 FR 44236, Aug. 2, 2005]
Board votes to contract with independent reviewers in the date the submission is deemed to be a complete submission for the start of the 120 day time-period for approval;

(2) Forward the complete submission to at least five independent persons with underwriting or actuarial experience to review the submission:

(i) Of the five reviewers, no more than one will be employed by the Federal Government, and none may be employed by any approved insurance provider or their representative; and

(ii) The reviewers will each provide their assessment of whether the submission protects the interest of agricultural producers and taxpayers, is actuarially appropriate, follows appropriate insurance principles, meets the requirements of the Act, does not contain excessive risks, follows sound, reasonable, and appropriate underwriting principles, as well as other items the Board may deem necessary;

(3) Return to the applicant any submission the Board determines is not a complete submission, and provide documentation to the applicant explaining such. If the submission is resubmitted at a later date, it will be considered a new submission;

(4) For all complete submissions:

(i) Request review of the submission by RMA to provide its assessment of whether:

(A) The submission protects the interests of agricultural producers and taxpayers, is actuarially appropriate, follows appropriate insurance principles, meets the requirements of the Act, does not contain excessive risks, is consistent with USDA’s public policy goals, does not increase or shift risk to any other FCIC reinsured policy, offers coverage that is similar to another policy or plan of insurance and if the producer would further benefit from the submission and can be administered and delivered efficiently and effectively;

(B) The marketing plan is reasonable;

(C) RMA has the resources to consider, implement, and administer the submission; and

(D) The requested amount of government reinsurance, risk subsidy, and administrative and operating subsidies is reasonable and appropriate for the type of coverage provided by the policy submission; and

(ii) Seek review from the Office of the General Counsel (OGC) to determine if the submission conforms to the requirements of the Act and all applicable Federal regulations.

(c) All comments and evaluations will be provided to the Board by a date determined by the Board to allow the Board adequate time for review.

(d) The Board will consider all comments, evaluations, and recommendations in its review process. Prior to making a decision, the Board may request additional information from RMA, OGC, the independent reviewers, or the applicant.

(e) An applicant may request, at any time, a time delay before the Board provides a notice of intent to disapprove the submission. The Board is not required to agree to such an extension.

(1) Any requested time delay will not be limited in the length of time or the number of delays. However, delays may make implementation of the submission for the targeted crop year impractical or impossible.

(2) The time period during which the Board must make a decision to approve or disapprove shall be extended commensurately with any time delay requested by the applicant.

(3) If the Board agrees to an extension of time, the Board and the applicant must agree to a time period in which the Board must make its decision to approve or disapprove after the expiration of any requested time delay.

(f) The applicant may withdraw a submission or a portion of a submission at any time by written request to the Board. A withdrawn submission that is resubmitted will result in the submission being deemed a new submission for the purpose of determining the amount of time that the Board must act on such submission.

(g) The Board will render a decision to approve the submission with or without revision or give notice of intent to disapprove within 90 days after the date the submission is considered complete by the Board in accordance with paragraph (b)(1) of this section, unless the applicant and Board agree to
§ 400.706

a time delay in accordance with paragraph (e) of this section.

(h) The Board may disapprove a submission if it determines that:

(1) The interests of producers and taxpayers are not protected, including but not limited to:

(i) The submission does not provide adequate coverage or treats producers disparately;

(ii) The applicant has not presented sufficient documentation that the submission is marketable;

(iii) Coverage would be similar to another policy or plan of insurance and the producer would not further benefit from the submission; or

(iv) The resources of FCIC or RMA are not sufficient to support the review and implementation of the product;

(2) The premium rates are not actuarially appropriate;

(3) The submission does not conform to sound insurance and underwriting principles;

(4) The risks associated with the submission are excessive or it increases or shifts risk to any other FCIC reinsured policy;

(5) The submission does not meet the requirements of the Act or is not in accordance with USDA’s public policy goals; or

(6) There is insufficient time before the submission would become effective under section 508(h) of the Act for the Board to make an informed decision with respect to whether the interests of producers are protected, the premium rates are actuarially appropriate, or the risks associated with the submission are excessive;

(1) If the Board intends to disapprove the submission, the applicant will be notified in writing at least 30 days prior to the Board taking such action. The Board will provide the applicant with a written explanation for the intent to disapprove the submission.

(2) The Board may act on the modification immediately or seek further review within the 30-day period allowed.

(3) The Board will approve a modified submission if:

(i) All causes for disapproval stated by the Board in its notification of intent to disapprove the submission are not satisfactorily addressed;

(ii) Insufficient time is available for review of the modified submission to determine whether all causes for disapproval have been satisfactorily addressed; or

(iii) Modification is so substantial that the Board determines that additional independent review is required and a time delay can not be agreed upon to allow for such review.

(k) A submission will be disapproved if:

(i) If the Board fails to take action on a new submission within the prescribed 90-day period in paragraph (g) of this section, or within the time period in accordance with paragraph (e)(3) of this section after receiving the revised submission, such submission will be deemed approved by the Board for the initial reinsurance year designated for the submission. The Board must approve the submission for it to be available for any subsequent reinsurance year.

(70 FR 44238, Aug. 2, 2005)
§ 400.707 Presentation to the Board for approval or disapproval.

(a) The Board will inform the applicant of the date, time, and place of the Board meeting.
(b) The applicant will be given the opportunity and is encouraged to present the submission to the Board in person. The applicant must confirm, in writing, whether the applicant will present the submission to the Board.
(c) If the applicant elects, at any time, not to present the submission to the Board, the Board will make its decision based on the submission and the reviews provided in accordance with § 400.706(b).

§ 400.708 Approved submission.

(a) After a submission is approved by the Board, and prior to it being made available for sale to producers, the following items, as applicable, must be completed:
(1) If FCIC requires, an agreement between the applicant and FCIC that specifies:
   (i) The responsibilities of each with respect to the implementation, delivery and oversight of the submission; and
   (ii) That the property rights to the submission automatically transfers to FCIC if the applicant elects not to maintain the submission and FCIC has paid any amounts under § 400.712.
(2) A reinsurance agreement if terms and conditions differ from the available existing reinsurance agreements.
(b) A submission approved by the Board under this subpart will be made available to all approved insurance providers under the same reinsurance and subsidy terms and conditions as received by the applicant.
(c) Any solicitation, marketing, or advertising of the approved submission by the applicant before FCIC has made the submission and related materials available to all interested parties through its official issuance system will result in the denial of reinsurance, risk subsidy, and A&O subsidy for those policies affected.

§ 400.709 Roles and responsibilities.

(a) With respect to the applicant:
(1) The applicant is responsible for:
   (i) Preparing and ensuring that all policy documents, rates of premium, and supporting materials, including actuarial documents, are submitted to FCIC in the form approved by the Board;
   (ii) Annually updating and providing maintenance changes no later than 180 days prior to the earliest contract change date for the commodity in all counties or states in which the policy or plan of insurance is sold, unless FCIC assumes maintenance of the product;
   (iii) Addressing responses to procedural issues, questions, problems or clarifications in regard to a policy or plan of insurance (all such resolutions will be communicated to all approved insurance providers through FCIC’s official issuance system); and
   (iv) Annually reviewing the policy’s performance and providing a report on the policy’s performance to the Board by each anniversary date of when the product was first available to be purchased by the public;
(2) Only the applicant may make changes to the policy, plan of insurance, or rates of premium approved by the Board (Any changes, both non-significant and significant, must be submitted to FCIC no later than 180 days prior to the earliest contract change date for the commodity in all counties or states in which the policy of plan of insurance is sold. Significant changes must be submitted to the Board for review in accordance with this subpart and will be considered as a new submission);
(3) Except as provided in paragraph (a)(4) of this section, the applicant is solely liable for any mistakes, errors, or flaws in the submitted policy, plan of insurance, their related materials, or the rates of premium that have been approved by the Board unless the policy or plan of insurance is transferred to FCIC. The applicant remains liable for any mistakes, errors, or flaws that occurred prior to transfer of the policy or plan of insurance to FCIC;
§ 400.709

(4) If the mistake, error, or flaw in the policy, plan of insurance, their related materials, or the rates of premium is discovered not less than 45 days prior to the cancellation or termination date for the policy or plan of insurance, the applicant may request in writing that FCIC withdraw the approved policy, plan of insurance, or rates of premium:

(i) Such request must state the discovered mistake, error, or flaw in the policy, plan of insurance, or rates of premium, and the expected impact on the program; and

(ii) For all timely received requests for withdrawal, no liability will attach to such policies, plans of insurance, or rates of premium that have been withdrawn and no producer, approved insurance provider or any other person will have a right of action against the applicant; and

(5) Notwithstanding the policy provisions regarding cancellation, any policy, plan of insurance, or rates of premium that have been withdrawn by the applicant in accordance with paragraph (a)(4) of this section is deemed canceled and applications deemed not accepted as of the date that FCIC publishes the notice of withdrawal on its website at www.rma.usda.gov; and

(i) Approved insurance providers will be notified in writing by FCIC that the policy, plan of insurance, or premium rates have been withdrawn; and

(ii) Producers will have the option of selecting any other policy or plan of insurance authorized under the Act that is available in the area by the sales closing date for such policy or plan of insurance; and

(6) Failure of the applicant to perform the applicant's responsibilities may result in the denial of reinsurance for the policy or plan of insurance.

(b) With respect to FCIC:

(1) FCIC is responsible for:

(i) Conducting the best review of the submission possible in the time allowed;

(ii) Ensuring that all approved insurance providers receive the approved policy or plan of insurance, and related material, for sale to producers in a timely manner (All such information shall be communicated to all approved insurance providers through FCIC's official issuance system);

(iii) Ensuring that all approved insurance providers receive reinsurance under the same terms and conditions as the applicant (approved insurance providers should contact FCIC to obtain and execute a copy of the reinsurance agreement) if required; and

(iv) Reviewing the activities of approved insurance providers, agents, loss adjusters, and producers to ensure that they are in accordance with the terms of the policy or plan of insurance, the reinsurance agreement, and all applicable procedures;

(2) The Board may limit the availability of coverage, for any product developed under the authority of the Act and this regulation, on any farm or in any county or area;

(3) FCIC will not be liable for any mistakes, errors, or flaws in the policy, plan of insurance, their related materials, or the rates of premium and no cause of action will exist against FCIC as a result of such mistake, error, or flaw in a submission submitted under this subpart;

(4) If at any time prior to the cancellation date, FCIC discovers there is a mistake, error, or flaw in the policy, plan of insurance, their related materials, or the rates of premium, or any other reason for denial of reinsurance contained in § 400.706(h) exists, FCIC will deny reinsurance to such policy or plan of insurance. If reinsurance is denied, a written notice of the denial of reinsurance will be provided to the approved insurance providers;

(5) If reinsurance is denied under paragraph (b)(4) of this section, the approved insurance provider will have the option of:

(i) Selling and servicing the policy or plan of insurance at its own risk and without any subsidy; or

(ii) Canceling the policy or plan of insurance in accordance with its terms; and

(6) After maintenance of the policy or plan of insurance is transferred to FCIC, FCIC will be liable for any mistakes, errors, or flaws that occur after the date the policy or plan of insurance was transferred.

[70 FR 44239, Aug. 2, 2005]
§ 400.710 Preemption and premium taxation.

A policy or plan of insurance that is approved by the Board for FCIC reinsurance is preempted from state and local taxation.

§ 400.711 Right of review, modification, and the withdrawal of reinsurance.

At any time after approval, the Board may review any policy, plan of insurance, related material, and rates of premium approved under this subpart and request additional information to determine whether the policy, plan of insurance, related material, and rates of premium comply with statutory or regulatory changes or court orders, are still actuarially appropriate, and protect program integrity and the interests of producers. The Board will notify the applicant of any problem or issue that may arise and allow the applicant an opportunity to make any needed change. The Board may deny reinsurance for the applicable policy, plan of insurance or rate of premium if the applicant:

(a) Fails to perform the responsibilities stated under §400.709(a); or

(b) Does not satisfactorily provide materials or resolve any issue so that necessary changes can be made prior to the earliest contract change date.

[70 FR 44240, Aug. 2, 2005]

§ 400.712 Research and development reimbursement, maintenance reimbursement, and user fees.

(a) For submissions approved by the Board for reinsurance under section 508(h) of the Act:

(1) If it is determined to be marketable by the Board, the submission may be eligible for a one-time payment of research and development costs and reimbursement of maintenance costs for up to four reinsurance years, as determined by the Board, after the date such costs have been approved by the Board.

(2) Reimbursement of research and development costs or maintenance costs will be considered as payment in full by FCIC for the submission.

(3) If the applicant elects at any time not to continue to maintain the submission, it will automatically become the property of FCIC and the applicant will no longer have any property rights to the submission.

(b) For submissions submitted to the Board for reinsurance after publication of the interim rule on September 17, 2001, an estimated amount of the total cost for reimbursement of research and development costs and maintenance costs must be included with the original submission to the Board in accordance with this section. These estimates will be used by FCIC to evaluate if the interests of producers are protected and to track potential expenditures and will not provide a basis for making any reimbursements under this section.

(c) To be eligible for any reimbursement under this section, FCIC must determine that a submission is marketable.

(d) To be considered for reimbursement of:

(1) Research and development costs, the total of the amount requested, and all supporting documentation, must be submitted to FCIC by electronic method or by hard copy and received by FCIC by August 1 immediately following the date the submission was first available to be purchased by producers;

(2) Maintenance costs, the total of the amount requested, and all supporting documentation, must be submitted to FCIC by electronic method or by hard copy and received by FCIC by August 1 of each year of the maintenance period;

(3) The procedure and time-frame in paragraphs (d)(1) or (2) of this section, as applicable, must be followed or research and development costs and maintenance costs may not be reimbursed; and

(4) Given the limitation on funds, regardless of when the request is received, no payment will be made prior to September 15 of the applicable fiscal year.

(e) There are limited funds available on an annual fiscal year basis as contained in the Act. Therefore, requests for reimbursement will not be considered in the order in which they are received. Consistent with paragraphs (f),

[70 FR 44240, Aug. 2, 2005]
(g), (h), and (k) of this section, if all applicants’ requests for reimbursement of research and development costs and maintenance costs in any fiscal year:

(1) Do not exceed the maximum amount authorized by law, the applicants may receive the full amount of reimbursement authorized under these paragraphs; and

(2) Exceed the amount authorized by law, each applicant’s reimbursement will be determined by dividing the total amount of each individual applicants’ reimbursable costs authorized in paragraphs (f), (g), (h), and (k) of this section by the total amount of the aggregate of all applicants’ reimbursable costs authorized in paragraphs (f), (g), (h), and (k) of this section for that year and multiplying the result by the amount of reimbursement authorized under the Act.

(f) The amount of reimbursement for research and development costs, will be determined based on the amount of reimbursement authorized under paragraph (e) of this section, adjusted for the complexity of the policy, plan of insurance, or rates of premium, as determined by FCIC, and the size of the area in which the policy, plan of insurance, or rates of premium may be offered.

(1) Policies or plans of insurance that offer new and innovative coverages that are not currently available will be eligible for a higher reimbursement than policies or plans of insurance that are, or have components that are, based on existing policies or plans of insurance.

(2) Policies or plans of insurance that offer new premium rating or market price methodologies will be eligible for a higher reimbursement than policies or plans of insurance that use existing premium rating or market price methodologies.

(3) Policies or plans of insurance that cover new commodities that are not otherwise covered by crop insurance or that offer innovative coverage and original policy language will be eligible for a higher reimbursement than policies or plans of insurance for commodities for which insurance is currently available.

(4) Policies or plans of insurance that may be offered for sale nationwide or in large geographical regions will be eligible for higher reimbursement than those that are applicable to only a few counties or states or a small geographical region.

(5) Any reimbursement under this subpart will be scored as follows:

1. Complexity scores:
   - (A) Basic or Common Provisions:
     - (1) Uses existing policies or plans of insurance: 0.05
     - (2) Contains modifications to existing policies or plans of insurance: 0.10
     - (3) Original (See paragraph (f)(3) of this section): 0.20
   - (B) Commodity Provisions and Special Provisions:
     - (1) Uses existing policies or plans of insurance: 0.05
     - (2) Contains modifications to existing policies or plans of insurance: 0.10
     - (3) Original (See paragraph (f)(3) of this section): 0.20
   - (C) Market prices:
     - (1) Uses existing policies or plans of insurance: 0.05
     - (2) Contains modifications to existing policies or plans of insurance: 0.10
     - (3) Original (See paragraph (f)(3) of this section): 0.20
   - (D) Rates of Premium:
     - (1) Uses existing policies or plans of insurance: 0.05
     - (2) Contains modifications to existing policies or plans of insurance: 0.10
     - (3) Original (See paragraph (f)(3) of this section): 0.20
   - (E) Underwriting:
     - (1) Uses existing policies or plans of insurance: 0.05
     - (2) Contains modifications to existing policies or plans of insurance: 0.10
     - (3) Original (See paragraph (f)(3) of this section): 0.20

2. Geographic scope scores:
   - (A) Potential national availability: 0.10
   - (B) Potential county, state or regional availability: 0.05

3. The sum score of both complexity and geographic scope is: 0.60

   (i) Equal to or greater than 0.6 may receive the full amount of reimbursement approved by the Board under paragraph (g) of this section;
   (ii) Greater than 0.25 but lower than 0.60 will receive a reimbursement that
is not greater than 75 percent of the full amount of reimbursement approved by the Board under paragraph (g) of this section; and

(iii) Equal to or less than 0.25 will receive a reimbursement that is not greater than 50 percent of the full amount of reimbursement approved by the Board under paragraph (g) of this section.

(g) For those submissions submitted to the Board for approval after September 17, 2001, research and development costs must be supported by itemized statements and supporting documentation (copies of contracts, billing statements, time sheets, travel vouchers, accounting ledgers, etc.). Actual costs submitted will be examined for reasonableness and may be adjusted at the sole discretion of the Board.

(i) Allowable research and development expense items (directly related to research and development of the submission only) may include the following:

(i) Straight-time hourly wage, exclusive of bonuses, overtime pay, or shift differentials (One line per employee, include job title, total hours, and total dollars. Compensation amounts will be compared with the Occupational Employment Statistics Survey (published each January by the U.S. Department of Labor, Bureau of Labor Statistics) or other substantial wage information as deemed appropriate by the Board);

(ii) Benefit cost per employee (Benefit costs are considered overhead and will be compared with the Employment Cost Index Annual Employer Cost Survey published each March by the U.S. Department of Labor, Bureau of Labor Statistics); and

(iii) Contracted expenses if fully disclosed, documented, and:

(A) The applicant provides a copy of the contract, billing statements, accounting records, etc;

(B) The applicant provides the relationship, if any, between the applicant and the contractor, such as parent company, subsidiary, etc. (Reimbursement may be limited or denied if the contractor is closely associated to the applicant so that they could be considered as one and the same, such as a separate entity being created by the applicant to conduct research and development);

(C) The applicant provides any and all other involvement of the contractor with the applicant, such as being a director, officer, employee, etc., or having common directors, officers, employees, etc. (Reimbursement may be reduced or denied if the contractor is paid a salary or other compensation from the applicant based on this other involvement); and

(D) The professional fees are broken out by line item (including all persons who make up the contracted party who had a substantive involvement in the development of the submission), such as:

(1) Individual names;

(2) Rate of pay;

(3) Hours allocated to the submission;

(4) Benefit rate; and

(5) Overhead;

(iv) Professional fees if fully disclosed, documented, and:

(A) The applicant provides the job title, straight-time hourly wage, total hours, and total dollars;

(B) The applicant provides the relationship, if any, between the applicant and the professional, such as parent company, subsidiary, etc. (Reimbursement may be limited or denied if the contractor is closely associated to the applicant so that they could be considered as one and the same, such as a separate entity being created by the applicant to conduct research and development);

(C) The applicant provides any other involvement of the professional with the applicant, such as being a director, officer, employee, etc., or having common directors, officers, employers, employees, etc. (Reimbursement may be reduced or denied if the contractor is paid a salary or other compensation from the applicant based on this other involvement); and

(D) The professional fees are broken out by line item (including all persons who make up the professional party who had a substantive involvement in the development of the submission), such as:

(1) Individual names;

(2) Rate of pay;

(3) Hours allocated to the submission;

(4) Benefit rate; and
§ 400.712

(5) Overhead;

(v) Travel and transportation (One line per event, include the job title, destination, purpose of travel, lodging cost, mileage, air or other identified transportation costs, food and miscellaneous expenses, other costs, and the total cost);

(vi) Software and computer programming developed specifically to determine appropriate rates, prices, or coverage amounts (Identify the item, include the purpose, and provide receipts or contract or straight-time hourly wage, hours, and total cost.) Software developed to send or receive data between the producer, agent, approved insurance provider or RMA or such other similar software may not be included as an allowable cost); and

(vii) Miscellaneous expenses such as postage, telephone, express mail, and printing (Identify the item, cost per unit, number of items, and total dollars); and

(2) The following expenses are specifically not eligible for research and development and maintenance cost reimbursement:

(i) Copyright or patent fees;

(ii) Training costs;

(iii) State filing fees and expenses;

(iv) Normal ongoing administrative expenses;

(v) Paid or incurred losses;

(vi) Loss adjustment expenses;

(vii) Sales commission;

(viii) Marketing costs;

(ix) Indirect overhead costs;

(x) Lobbying costs;

(xi) Product or applicant liability resulting from the research, development, preparation or marketing of the policy;

(xii) Copyright infringement claims resulting from the research, development, preparation or marketing of the policy;

(xiii) Costs of making program changes as a result of any mistakes, errors or flaws in the policy or plan of insurance; and

(xiv) Costs associated with building rents or space allocation.

(h) Requests for reimbursement of maintenance costs for submissions approved after September 17, 2001, must be supported by itemized statements and supporting documentary evidence for each reinsurance year in the maintenance period. Actual costs submitted will be examined for reasonableness and may be adjusted at the sole discretion of the Board. Maintenance costs for the following activities may be reimbursed:

(1) Expansion of the original submission into additional counties or states;

(2) Non-significant changes to the policy and any related material;

(3) Non-significant or significant changes to the policy as necessary to protect program integrity or as required by Congress; and

(4) Any other activity that qualifies as maintenance.

(i) If the applicant does not reasonably demonstrate that the submission meets the marketing plan or does not follow the criteria set forth in this regulation, the product may be withdrawn at the discretion of the Board and no further maintenance reimbursement will be paid.

(j) Not later than six months prior to the end of the last reinsurance year in which a maintenance reimbursement will be paid, as approved by the Board, the applicant must notify FCIC regarding its election of the treatment of the policy or plan of insurance for subsequent reinsurance years.

(1) The applicant must notify FCIC whether it intends to:

(i) Continue to maintain the policy or plan of insurance and charge approved insurance providers a user fee to cover maintenance expenses for all policies earning premium. It is the sole responsibility of the applicant to collect such fees from the approved insurance providers and any indebtedness for such fees must be resolved by the applicant and approved insurance provider. Applicants may request that FCIC provide the number of policies sold by each approved insurance provider. Such information will be provided not later than 90 days after such request is made or not later than 90 days after the requisite information has been provided to FCIC by the approved insurance provider, whichever is later; or

(ii) Transfer responsibility for maintenance to FCIC.

(2) If the applicant elects to:
Federal Crop Insurance Corporation, USDA

§ 400.713

(i) Continue to maintain the policy or plan of insurance, the applicant must submit a request for approval of the user fee by the Board at the time of the election; or

(ii) Transfer the policy or plan of insurance to FCIC, FCIC may at its sole discretion, continue to maintain the policy or plan of insurance or elect to withdraw the availability of the policy or plan of insurance.

(3) Requests for approval of the user fee must be accompanied by written documentation to support that the amount requested will only cover maintenance costs.

(4) The Board will approve the amount of user fee that is payable to the applicant by approved insurance providers unless the Board determines that the user fee charged:

(i) Is unreasonable in relation to the maintenance costs associated with the policy or plan of insurance; or

(ii) Unnecessarily inhibits the use of the policy or plan of insurance by other approved insurance providers.

(5) Reasonableness of the user fees will be determined by the Board based on a comparison with the amount of reimbursement previously received, the number of policies, the number of approved insurance providers, and the expected total amount of user fees to be received in any reinsurance year.

(6) A user fee unnecessarily inhibits the use of a policy or plan of insurance if it is so high that other approved insurance providers are unable to pay such fees because of the volume of business currently underwritten by the approved insurance provider.

(k) The Board may consider information from the Equal Access to Justice Act, 5 U.S.C. 504, the Bureau of Labor Statistic’s Occupational Employment Statistics Survey, the Bureau of Labor Statistic’s Employment Cost Index, and any other information determined applicable by the Board, in making a determination whether to approve a submission for reimbursement of research and development costs, or maintenance costs under this section or the amount of reimbursement.

(l) For the purposes of this section, rights to, or obligations of, research and development cost reimbursement, maintenance cost reimbursement, or user fees cannot be transferred from any individual or entity unless specifically approved in writing by the Board.

(m) Notwithstanding the definition in § 400.701, the maintenance period ends for an approved submission once the applicant no longer performs the maintenance responsibilities, as determined by FCIC, or the applicant gives FCIC notice they no longer wish to maintain the submission.

(n) Applicants requesting reimbursement for research and development costs, maintenance costs, or user fees, may present their request in person to the Board prior to consideration for approval.

§ 400.713 Nonreinsured supplemental (NRS) policy.

(a) Unless notified by FCIC, three hard copies, or an electronic copy in a format approved by RMA, of the new or revised NRS policy and related materials must be submitted to the Deputy Administrator, Research and Development (or successor), Risk Management Agency, 6501 Beacon Drive, Stop 0812, Kansas City, MO 64133-4676, at least 120 days prior to the first sales closing date applicable to the policy.

(b) FCIC will review the NRS policy to determine that it does not materially increase or shift risk to the underlying policy or plan of insurance reinsured by FCIC, reduce or limit the rights of the insured with respect to
§ 400.765 Basis and applicability.

(a) The regulations contained in this subpart prescribe the rules and criteria for obtaining a final agency determination of the interpretation of any provision of the Act or the regulations promulgated thereunder.

(b) Requesters may seek interpretations of those provisions of the Act and the regulations promulgated thereunder that are in effect for the crop year in which the request under this subpart is being made and the three previous crop years.

(c) All final agency determinations issued by FCIC, and published in accordance with §400.768(f), will be binding on all participants in the Federal crop insurance program.

Federal Crop Insurance Corporation, USDA § 402.2

(5) State the name, address, and telephone number of a contact person affiliated with the request; and

(6) Contain the requester’s detailed interpretation of the regulation.

(b) The requestor must advise FCIC if the request for a final agency determination will be used in a lawsuit or the settlement of a claim.

(c) Each request for final agency determination under this subpart must contain no more than one request for an agency interpretation.

§ 400.768 FCIC obligations.

(a) FCIC will not interpret any specific factual situation or case, such as actions of any participant under the terms of a policy or any reinsurance agreement.

(b) If, in the sole judgement of FCIC, the request is unclear, ambiguous, or incomplete, FCIC will not provide an interpretation, but will notify the requester that the request is unclear, ambiguous or incomplete, within 30 days of such request.

(c) FCIC will provide a final determination of the interpretation to a request that meets all the conditions stated herein to the requester in writing, and at FCIC’s discretion in the format in which it was received, within 90 days of the date of receipt by FCIC.

(d) If a requestor is notified that a request is unclear, ambiguous or incomplete under section 400.768(b), the time to respond will be tolled from the date FCIC notifies the requestor until the date that FCIC receives a clear, complete, and unambiguous request.

(e) If a response is not provided within 90 days, the requestor may assume the interpretation provided is correct for the applicable crop year.

(f) All agency final determinations will be published by FCIC as specially numbered documents on the RMA Internet website.

(g) All final agency determinations are considered matters of general applicability that are not appealable to the National Appeals Division on the issue of whether the final agency determination is a matter of general applicability.

PART 401 [RESERVED]

PART 402—CATASTROPHIC RISK PROTECTION ENDORSEMENT

Sec. 402.1 General statement.

402.2 Applicability.

402.3 OMB control numbers.

402.4 Catastrophic Risk Protection Endorsement Provisions.

AUTHORITY: 7 U.S.C. 1506(l), 1506(o).

SOURCE: 61 FR 42985, Aug. 20, 1996, unless otherwise noted.

§ 402.1 General statement.

The Federal Crop Insurance Act, as amended by the Federal Crop Insurance Reform Act of 1994, requires the Federal Crop Insurance Corporation to implement a catastrophic risk protection plan of insurance that provides a basic level of insurance coverage to protect producers in the event of a catastrophic crop loss due to loss of yield or prevented planting, if provided by the Corporation, provided the crop loss or prevented planting is due to an insured cause of loss specified in the crop insurance policy. This Catastrophic Risk Protection Endorsement is a continuous endorsement that is effective in conjunction with a crop insurance policy for the insured crop. Catastrophic risk protection coverage will be offered through approved insurance providers if there are a sufficient number available to service the area. If there are an insufficient number available, as determined by the Secretary, local offices of the Farm Service Agency will provide catastrophic risk protection coverage.

§ 402.2 Applicability.

This Catastrophic Risk Protection Endorsement is applicable to each crop for which catastrophic risk protection coverage is available and for which the producer elects such coverage.
§ 402.3 OMB control numbers.

The information collection activity associated with this rule has been approved by the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35) under OMB control number 0583-0053.

§ 402.4 Catastrophic Risk Protection Endorsement Provisions.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Catastrophic Risk Protection Endorsement

(This is a continuous endorsement)

If a conflict exists among the policy, the order of priority is: (1) This Endorsement; (2) Special Provisions; (3) actuarial documents; (4) the Commodity Exchange Price Provisions, if applicable; and (5) any of the policies specified in section 2, with (1) controlling (2), etc.

Terms and Conditions

1. Definitions

Insurance provider. A private insurance company that has been approved by FCIC to provide insurance coverage to producers participating in programs authorized by the Federal Crop Insurance Act.

Zero acreage report. An acreage report filed by you that certifies you do not have a share in the crop for that crop year.

2. Eligibility, Life of Policy, Cancellation, and Termination

(a) You must have one of the following policies in force to elect this Endorsement:

(1) The Common Crop Insurance Policy Basic Provisions (7 CFR 407.8) and applicable Crop Provisions (catastrophic risk protection coverage is not available under individual revenue plans of insurance such as Revenue Protection and Revenue Protection with Harvest Price Exclusion);

(2) The Area Risk Protection Insurance Basic Provisions (7 CFR 407.9) and applicable Crop Provisions (catastrophic risk protection coverage is not available under area revenue plans of insurance such as Area Revenue Protection or Area Revenue Protection with the Harvest Price Exclusion); or

(3) Other crop policies only if catastrophic risk protection coverage is provided in the applicable crop policy.

(b) You must have made application for catastrophic risk protection on or before the sales closing date for the crop in the county.

(c) You must be a “person” as defined in the crop policy to be eligible for catastrophic risk protection coverage.

3. Unit Division

(a) This section is not applicable if you are insured under the Area Risk Protection Insurance Basic Provisions (7 CFR 407.9) and applicable Crop Provisions.

(b) This section is in lieu of the unit provisions specified in the applicable crop policy. For catastrophic risk protection coverage, a unit will be all insurable acreage of the insured crop in the county on the date coverage begins for the crop year:

(1) In which you have one hundred percent (100%) crop share; or

(2) Which is owned by one person and operated by another person on a share basis.

(Example: If, in addition to the land you own, you rent land from five landlords, three on a crop share basis and two on a cash basis, you would be entitled to four units; one for each crop share lease and one that combines the two cash leases and the land you own.)

(c) Further division of the units described in paragraph (b) above is not allowed under this Endorsement.

4. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) Unless otherwise specified in the Special Provisions, catastrophic risk protection coverage will offer protection equal to:

(1) Fifty percent (50%) of your approved yield indemnified at fifty-five percent (55%) of the price election or projected price, as applicable, if you are insured under the Common Crop Insurance Policy Basic Provisions (7 CFR 457.8) and applicable Crop Provisions;

(2) Sixty-five percent (65%) of the expected county yield indemnified at forty-five percent (45%) of the maximum protection per acre if you are insured under the Area Risk Protection Insurance Basic Provisions (7 CFR 457.9) and applicable Crop Provisions; or

(3) A comparable coverage as established by FCIC for other crop policies only if catastrophic risk protection coverage is provided in the applicable crop policy.

(b) If the crop policy denominates coverage in dollars per acre or other measure, or any other alternative method of coverage, such coverage will be converted to the amount of coverage that would be payable at fifty percent (50%) of your approved yield indemnified at fifty-five percent (55%) of the price election.

(c) You may elect catastrophic coverage for any crop insured or reinsured by FCIC on either an individual yield and loss basis or an area yield and loss basis, if both options are offered as set out in the Special Provisions.
5. Report of Acreage

(a) The report of crop acreage that you file in accordance with the crop policy must be signed on or before the acreage reporting date. For catastrophic risk protection, unless the other person with an insurable interest in the crop objects in writing prior to the acreage reporting date and provides a signed acreage report on their own behalf, the operator may sign the acreage report for all other persons with an insurable interest in the crop without a power of attorney. All persons with an insurable interest in the crop, and for whom the operator purports to sign and represent, are bound by the information contained in that acreage report.

(b) For the purpose of determining the amount of indemnity only, your share will not exceed your insurable interest at the earlier of the time of loss or the beginning of harvest. Unless the accepted application clearly indicates that insurance is requested for a partnership or joint venture, insurance will only cover the crop share of the person completing the application. The share will not extend to any other person having an interest in the crop except as may otherwise be specifically allowed in this endorsement.

Any acreage or interest reported by or for your spouse, child or any member of your household may be considered your share. A lease containing provisions for both a minimum payment (such as a specified amount of cash, bushels, pounds, etc.,) and a crop share will be considered a cash lease. A lease containing provisions for a crop share only will be considered a cash share lease. A lease containing provisions for either a minimum payment (such as a specified amount of cash, bushels, pounds, etc.,) or a crop share will be considered a cash lease. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the insured crop on such land will be considered as owned by the lessee.

6. Annual Premium and Administrative Fees

(a) Notwithstanding any provision contained in any other policy document, you will not be responsible to pay a premium, nor will the policy be terminated because the premium has not been paid. FCIC will pay a premium subsidy equal to the premium established for the coverage provided under this endorsement.

(b) In return for catastrophic risk protection coverage, you must pay an administrative fee to us within 30 days after you have been billed, unless otherwise authorized in the annual premium provisions of the applicable crop policy. The administrative fee will be waived if you meet the definition of a limited resource farmer specified in the applicable crop policy.

(c) When a crop policy has provisions to allow you the option to separately insure individual crop types or varieties, you must pay a separate administrative fee in accordance with paragraph (b) of this section for each type or variety you elect to separately insure.

(d) If the administrative fee is not paid when due, you, and all persons with an insurable interest in the crop under the same contract, may be ineligible for certain other USDA program benefits.

7. Insured Crop

The crop insured is specified in the applicable crop policy; however, for policies other than those insured under the Area Risk Protection Insurance Basic Provisions, notwithstanding any other policy provision requiring the same insurance coverage on all insurable acreage of the crop in the county, if you purchase additional coverage for a crop, you may separately insure acreage designated as "high-risk" land by FCIC under catastrophic risk protection coverage, provided that you execute a High-Risk Land Exclusion Option and obtain a catastrophic risk protection coverage policy with the same insurance provider on or before the applicable sales closing date. You will be required to pay a separate administrative fee for both the additional coverage policy and the catastrophic risk protection coverage policy.

8. Replanting Payment

Notwithstanding any provision contained in any other crop insurance document, no replantment payment will be paid whether or not replanting of the crop is required under the policy.

9. Claim for Indemnity

If two or more insured crop types, varieties, or classes are insured within the same unit, and multiple price elections, projected prices, or amounts of insurance are applicable, the dollar amount of insurance and the dollar amount of production to be counted will be determined separately for each type, variety, class, etc., that have separate price elections, projected prices, or amounts of insurance and then totaled to determine the total liability or dollar amount of production to be counted for the unit.
10. Concealment or Fraud

Notwithstanding any provision contained in any other crop insurance document, your CAT policy may be voided by us on all crops without waiving any of our rights, including the right to collect any amounts due:

(a) If at any time you conceal or misrepresent any material fact or commit fraud relating to this or any other contract issued under the authority of the Federal Crop Insurance Act with any insurance provider; and

(b) The voidance will be effective for the crop year during which any such act or omission occurred.

11. Exclusion of Coverage

(a) Options or endorsements that extend the coverage available under any crop policy offered by FCIC will not be available under this endorsement. Written agreements are not available for any crop insured under this endorsement.

(b) Notwithstanding any provision contained in any other crop policy, hail and fire coverage and high-risk land may not be excluded under catastrophic risk protection.

AUTHORITY: 7 U.S.C. 1506(l), 1506(o).

SOURCE: 78 FR 38507, June 26, 2013, unless otherwise noted.

§ 407.1 Applicability.

The provisions of this part are applicable only to those crops for which a Crop Provision is contained in this part and the crop years specified.

§ 407.2 Availability of Federal crop insurance.

(a) Insurance shall be offered under the provisions of this part on the insured crop in counties within the limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act (7 U.S.C. 1501-1524) (Act). The crops and counties shall be designated by the Manager of the Federal Crop Insurance Corporation (FCIC) from those approved by the Board of Directors of FCIC.

(b) The insurance is offered through insurance providers reinsured by the FCIC that offer contracts containing the same terms and conditions as the contract set out in this part. These contracts are clearly identified as being reinsured by FCIC. FCIC may offer the contract for coverage contained in this part and part 402 of this chapter directly to the insured through the Department of Agriculture if the Secretary determines that the availability of local agents is not adequate. Those contracts are specifically identified as being offered by FCIC.

(c) No person may have in force more than one insurance policy issued or reinsured by FCIC on the same crop for the same crop year, in the same county, unless specifically approved in writing by FCIC.

(d) Except as specified in paragraph (c) of this section, if a person has more than one contract authorized under the Act that provides coverage for the same loss on the same crop for the same crop year in the same county, all such contracts shall be voided for that crop year and the person will be liable for the premium on all contracts, unless the person can show to the satisfaction of the FCIC that the multiple contracts of insurance were without the fault of the person.
§ 407.7 The contract.

(a) The insurance contract shall become effective upon the acceptance by FCIC or the insurance provider of a complete, duly executed application for insurance on a form prescribed or approved by FCIC.

(b) The contract shall consist of the accepted application, Area Risk Protection Insurance Basic Provisions, Crop Provisions, Special Provisions, Actuarial Documents, and any amendments, endorsements, or options thereeto.

(c) Changes made in the contract shall not affect its continuity from year to year.

(d) No indemnity shall be paid unless the person complies with all terms and conditions of the contract.

(e) The forms required under this part and by the contract are available at the office of the insurance provider,
§ 407.8 The application and policy.

(a) Application for insurance, developed in accordance with standards established by FCIC, must be made by any person who wishes to participate in the program in order to cover such person’s share in the insured crop as landlord, owner-operator, tenant, or other crop ownership interest.

(1) No other person’s interest in the crop may be insured under the application.

(2) To obtain coverage, the application must be submitted to the insurance provider on or before the applicable sales closing date on file in the insurance provider’s local office.

(b) FCIC or the insurance provider may reject, no longer accept applications, or cancel existing insurance contracts upon the FCIC’s determination that the insurance risk is excessive. Such determination must be made not later than 15 days before the cancellation date for the crop and may be made on an area, county, state, or crop basis.

§ 407.9 Area risk protection insurance policy.

This insurance is available for the 2014 and succeeding years.

Federal Crop Insurance Act (7 U.S.C. 1501-1524) (Act). All provisions of the policy and rights and responsibilities of the parties are specifically subject to the Act. The provisions of the policy may not be waived or modified in any way by us, your insurance agent or any employee of USDA. Procedures (handbooks, underwriting rules, manuals, memoranda, and bulletins), issued by us and published on the Risk Management Agency’s (RMA) Web site at http://www.rma.usda.gov/ or a successor Web site, will be used in the administration of this policy, including the adjustment of any loss or claim submitted hereunder. Throughout this policy, “you” and “your” refer to the insured shown on the accepted application and “we,” “us,” and “our” refer to FCIC. Unless the context indicates otherwise, the use of the plural form of a word includes the singular and the singular form of the word includes the plural.

AGREEMENT TO INSURE: In return for the commitment to pay a premium, and subject to all of the provisions of this policy, we agree with you to provide the insurance as stated in this policy. If there is a conflict among the Act, the regulations published at 7 CFR chapter IV, and the procedures as issued by us, the order of priority is: (1) the Act; (2) the regulations; and (3) the procedures as issued by us, with (1) controlling (2), etc. If there is a conflict between the policy provisions published at 7 CFR part 407 and the administrative regulations published at 7 CFR part 400, the policy provisions published at 7 CFR part 407 control. The order of priority among the policy is: (1) the Catastrophic Risk Protection Endorsement, as applicable; (2) Special Provisions; (3) actuarial documents; (4) the applicable Commodity Exchange Price Provisions; (5) the Crop Provisions; and (6) these Basic Provisions, with (1) controlling (2), etc.
yield and not receive an indemnity under ARPI.

This insurance policy is reinsured by the FCIC under the provisions of Subtitle A of the Federal Crop Insurance Act (7 U.S.C. 1501-1524) (Act). All provisions of the policy and rights and responsibilities of the parties are specifically subject to the Act. The provisions of the policy may not be waived or varied in any way by us, our insurance agent or any other contractor or employee of ours or any employee of USDA. We will use the procedures (handbooks, underwriting rules, manuals, memoranda, and bulletins), as issued by FCIC and published on the Risk Management Agency (RMA’s) Web site at http://www.rma.usda.gov/ or a successor Web site, in the administration of this policy, including the adjustment of any loss or claim submitted hereunder. In the event that we cannot pay your loss because we are insolvent or are otherwise unable to perform our duties under our reinsurance agreement with FCIC, FCIC will become your insurer, make all decisions in accordance with the provisions of this policy, including any loss payments, and be responsible for any amounts owed. No state guarantee fund will be liable for your loss.

Throughout this policy, “you” and “your” refer to the insured shown on the accepted application and “we,” “us,” and “our” refer to the insurance provider providing insurance. Unless the context indicates otherwise, the use of the plural form of a word includes the singular and the singular form of the word includes the plural.

AGREEMENT TO INSURE: In return for the commitment to pay a premium, and subject to all of the provisions of this policy, we agree with you to provide the insurance as stated in this policy. If there is a conflict among the Act, the regulations published at 7 CFR chapter IV, and the procedures as issued by FCIC, the order of priority is: (1) the Act; (2) the regulations; and (3) the procedures as issued by FCIC, with (1) controlling (2), etc. If there is a conflict between the policy provisions published at 7 CFR part 407 and the administrative regulations published at 7 CFR part 400, the policy provisions published at 7 CFR part 407 control.

The order of priority among the policy is: (1) the Catastrophic Risk Protection Endorsement, as applicable; (2) Special Provisions; (3) actuarial documents; (4) Commodity Exchange Price Provisions; (5) the Crop Provisions; and (6) these Basic Provisions, with (1) controlling (2), etc.

Terms and Conditions

Basic Provisions

1. Definitions

Abort. Failure to continue to care for the crop, or providing care so insignificant as to provide no benefit to the crop.

Acreage report. A report required by section 8 of these Basic Provisions that contains, in addition to other required information, your report of your share of all acreage of an insured crop in the county, whether insurable or not insurable.

Acreage reporting date. The date contained in the actuarial documents by which you are required to submit your acreage report.

Actuarial documents. The part of the policy that contains information for the crop year which is available for public inspection in your agent’s office and published on RMA’s Web site, http://www.rma.usda.gov/, and which shows available plans of insurance, coverage levels, information needed to determine amounts of insurance, prices, premium rates, premium adjustment percentages, type (commodity types, classes, subclasses, intended uses), practice (irrigated practices, cropping practices, organic practices, intervals), insurable acreage, and other related information regarding crop insurance in the county.

Additional coverage. A level of coverage greater than catastrophic risk protection.

Administrative fee. An amount you must pay for catastrophic risk protection, and additional coverage for each crop year as specified in section 7 of these provisions, the Catastrophic Risk Protection Endorsement, or the Special Provisions, as applicable.

Agricultural experts. Persons who are employed by the Cooperative Extension...
§ 407.9 7 CFR Ch. IV (1-1-14 Edition)

System or the agricultural departments of universities, or other persons approved by FCIC, whose research or occupation is related to the specific crop or practice for which such expertise is sought. Persons who have a personal or financial interest in you or the crop will not qualify as an agricultural expert. For example, contracting with a person for consulting would be considered to have a financial interest and a person who is a neighbor would be considered to have a personal interest.

Application. The form required to be completed by you and accepted by us before insurance coverage will commence. This form must be completed and filed in your agent’s office not later than the sales closing date of the initial insurance year for each crop for which insurance coverage is requested.

Area. The general geographical region in which the insured acreage is located, designated generally as a county but may be a smaller or larger geographical area as specified in the actuarial documents.

Area Revenue Protection. A plan of insurance that provides protection against loss of revenue due to a county level production loss, a price decline, or a combination of both. This plan also includes upside harvest price protection, which increases your policy protection at the end of the insurance period if the harvest price is greater than the projected price and if there is a production loss.

Area Revenue Protection with the Harvest Price Exclusion. A plan of insurance that provides protection against loss of revenue due to a county level production loss, price decline, or a combination of both. This plan does not provide upside harvest price protection.

Area Risk Protection Insurance (ARPI). Insurance coverage based on an area, not an individual, yield or revenue amount. There are three plans of insurance available under ARPI: Area Revenue Protection, Area Revenue Protection with the Harvest Price Exclusion, and Area Yield Protection.

Area Yield Protection. A plan of insurance that provides protection against loss of yield due to a county level production loss. This plan does not provide protection against loss of revenue or upside harvest price protection.

Assignment of indemnity. A transfer of policy rights, made on our form, and effective when approved by us in writing, whereby you assign your right to an indemnity payment for the crop year only to creditors or other persons to whom you have a financial debt or other pecuniary obligation.

Buffer zone. A parcel of land, as designated in your organic plan, that separates commodities grown under organic practices from commodities grown under non-organic practices, and used to minimize the possibility of unintended contact by prohibited substances or organisms.

Cancellation date. The calendar date specified in the Crop Provisions on which coverage for the crop will automatically renew unless canceled in writing by either you or us or terminated in accordance with the policy terms.

Catastrophic risk protection (CAT). Coverage equivalent to 65 percent of yield coverage and 45 percent of price coverage, unless otherwise specified in the Special Provisions, and is the minimum level of coverage offered by FCIC, as specified in the actuarial documents for the crop, type, and practice. CAT is not available with Area Revenue Protection or Area Revenue Protection with the Harvest Price Exclusion.

Catastrophic Risk Protection Endorsement. The part of the crop insurance policy that contains provisions of insurance that are specific to CAT.

Certified organic acreage. Acreage in the certified organic farming operation that has been certified by a certifying agent as conforming to organic standards in accordance with 7 CFR part 205.

Certifying agent. A private or governmental entity accredited by the USDA Secretary of Agriculture for the purpose of certifying a production, processing or handling operation as organic.

Class. A specific subgroup of commodity type.

Commodity. An agricultural good or product that has economic value.

Commodity Exchange Price Provisions (CEPP). A part of the policy that is used for crops for which ARPI is available, unless otherwise specified. This document includes the information necessary to derive the projected and harvest price for the insured crop, as applicable.

Commodity type. A specific subgroup of a commodity having a characteristic or set of characteristics distinguishable from other subgroups of the same commodity.

Consent. Approval in writing by us allowing you to take a specific action.

Contract. (See “Policy”)

Contract change date. The calendar date, as specified in the Crop Provisions, by which changes to the policy, if any, will be made available in accordance with section 3 of these Basic Provisions.

Conventional farming practice. A system or process that is necessary to produce a commodity, excluding organic farming practices.

Cooperative Extension System. A nationwide network consisting of a state office located at each state’s land-grant university, and local or regional offices. These offices are staffed by one or more agricultural experts who work in cooperation with the National Institute of Food and Agriculture, and who provide information to agricultural producers and others.

County. Any county, parish, political subdivision of a state, or other area specified on the actuarial documents shown on your accepted application, including acreage in a field that extends into an adjoining county if the county boundary is not readily discernible.

Cover crop. A crop generally recognized by agricultural experts as agronomically sound for the area for erosion control or other purposes related to conservation or soil improvement. A cover crop may be considered to be a second crop.

Credible data. Data of sufficient quality and quantity to be representative of the county.

Crop. The insurable commodity as defined in the Crop Provisions.

Cropping practice. A method of using a combination of inputs such as fertilizer, herbicide, and pesticide, and operations such as planting, cultivation, etc. to produce the insured crop. The insurable cropping practices are specified in the actuarial documents.

Crop Provisions. The part of the policy that contains the specific provisions of insurance for each insured crop.

Crop year. The period within which the insured crop is normally grown and designated by the calendar year in which the crop is normally harvested.

Days. Calendar days.

Delinquent debt. Has the same meaning as the term defined in 7 CFR part 400, subpart U.

Dollar amount of insurance per acre. The guarantee calculated by multiplying the expected county yield by the projected price and by the protection factor. Your dollar amount of insurance per acre is shown on your Summary of Protection. Following release of the harvest price, your dollar amount of insurance may increase if Area Revenue Protection was purchased and the harvest price is greater than the projected price.

Double crop. Producing two or more crops for harvest on the same acreage in the same crop year.

Expected county revenue. The expected county yield multiplied by the projected price.

Expected county yield. The yield, established in accordance with section 15, contained in the actuarial documents on which your coverage for the crop year is based.

FCIC. The Federal Crop Insurance Corporation, a wholly owned corporation within USDA.

Final county revenue. The revenue determined by multiplying the final county yield by the harvest price with the result used to determine whether an indemnity will be due for Area Revenue Protection and Area Revenue Protection with the Harvest Price Exclusion, and released by FCIC at a time specified in the Crop Provisions.

Final county yield. The yield, established in accordance with section 15,
for each insured crop, type, and practice, used to determine whether an indemnity will be due for Area Yield Protection, and released by FCIC at a time specified in the Crop Provisions.

Final planting date. The date contained in the actuarial documents for the insured crop by which the crop must be planted in order to be insured.

Final policy protection. For Area Revenue Protection only, the amount calculated in accordance with section 12(e).

First insured crop. With respect to a single crop year and any specific crop acreage, the first instance that a commodity is planted for harvest or prevented from being planted and is insured under the authority of the Act. For example, if winter wheat that is not insured is planted on acreage that is later planted to soybeans that are insured, the first insured crop would be soybeans. If the winter wheat was insured, it would be the first insured crop.

FSA. The Farm Service Agency, an agency of the USDA, or a successor agency.

FSA farm number. The number assigned to the farm by the local FSA office.

Generally recognized. When agricultural experts or organic agricultural experts, as applicable, are aware of the production method or practice and there is no genuine dispute regarding whether the production method or practice allows the crop to make normal progress toward maturity.

Good farming practices. The production methods utilized to produce the insured crop, type, and practice and allow it to make normal progress toward maturity, which are: (1) for conventional or sustainable farming practices, those generally recognized by agricultural experts for the area; or (2) for organic farming practices, those generally recognized by organic agricultural experts for the area or contained in the organic plan. We may, or you may request us to, contact FCIC to determine whether or not production methods will be considered to be “good farming practices.”

Harvest price. A price determined in accordance with the CEPP and used to determine the final county revenue.

Household. A domestic establishment including the members of a family (parents, brothers, sisters, children, spouse, grandchildren, aunts, uncles, nieces, nephews, first cousins, or grandparents, related by blood, adoption or marriage, are considered to be family members) and others who live under the same roof.

Insurable interest. Your percentage of the insured crop that is at financial risk.

Insurable loss. Damage for which coverage is provided under the terms of your policy, and for which you accept an indemnity payment.

Insurance provider. A private insurance company that has been approved by FCIC to provide insurance coverage to producers participating in programs authorized by the Act.

Insured. The named person as shown on the application accepted by us. This term does not extend to any other person having an insurable interest in the crop (e.g., a partnership, landlord, or any other person) unless specifically indicated on the accepted application.

Insured crop. The crop in the county for which coverage is available under your policy as shown on the application accepted by us.

Intended use. The expected end use or disposition of the commodity at the time the commodity is reported.

Interval. A period of time designated in the actuarial documents.

Irrigated practice. A method of producing a crop by which water, from an adequate water source, is artificially applied in sufficient amounts by appropriate and adequate irrigation equipment and facilities and at the proper times necessary to produce at least the (1) yield expected for the area; (2) yield used to establish the production guarantee or amount of insurance/coverage on the irrigated acreage planted to the commodity; or (3) producer’s established approved yield, as applicable. Acreage adjacent to water, such as but not limited to a pond, lake, river, stream, creek or brook, shall not be considered irrigated based solely on the proximity to the water. The insurable irrigation practices are specified in the actuarial documents.

Liability. (See “Policy protection.”)

84
Limited resource farmer. Has the same meaning as the term defined by USDA at http://www.lrftool.sc.egov.usda.gov or a successor Web site.

Loss limit factor. Unless otherwise specified in the Special Provisions a factor of .18 is used to calculate the payment factor. This factor represents the percentage of the expected county yield or expected county revenue at which no additional indemnity amount is payable. For example, if the expected county yield is 100 bushels and the final county yield is 18 bushels, then no additional indemnity is due even if the yield falls below 18 bushels. The total indemnity will never be more than 100 percent of the final policy protection.

NASS: National Agricultural Statistics Service, an agency within USDA, or its successor, that publishes the official United States Government yield estimates.

Native sod. Acreage that has no record of being tilled (determined in accordance with FSA or other verifiable records acceptable to us) for the production of an annual crop on or before May 22, 2008, and on which the plant cover is composed principally of native grasses, grass-like plants, forbs, or shrubs suitable for grazing and browsing.

Offset. The act of deducting one amount from another amount.

Organic agricultural experts. Persons who are employed by the following organizations: Appropriate Technology Transfer for Rural Areas, Sustainable Agriculture Research and Education or the Cooperative Extension System, the agricultural departments of universities, or other persons approved by FCIC, whose research or occupation is related to the specific organic crop or practice for which such expertise is sought.

Organic farming practice. A system of plant production practices used to produce an organic crop that is approved by a certifying agent in accordance with 7 CFR part 205.

Organic plan. A written plan, in accordance with the National Organic Program published in 7 CFR part 205, that describes the organic farming practices that you and a certifying agent agree upon annually or at such other times as prescribed by the certifying agent.

Organic practice. The insurable organic farming practices specified in the actuarial documents.

Payment factor. A factor no greater than 1.0 used to determine the amount of indemnity to be paid in accordance with section 12(g).

Perennial crop. A plant, bush, tree or vine crop that has a life span of more than one year.

Person. An individual, partnership, association, corporation, estate, trust, or other legal entity, and wherever applicable, a State or a political subdivision or agency of a State. "Person" does not include the United States Government or any agency thereof.

Planted acreage. Except as otherwise specified in the Special Provisions, land in which seed, plants, or trees have been placed, appropriate for the insured crop and planting method, at the correct depth, into a seedbed that has been properly prepared for the planting method and production practice in accordance with good farming practices for the area.

Policy. The agreement between you and us to insure a commodity and consisting of the accepted application, these Basic Provisions, the Crop Provisions, the Special Provisions, the CEPP, other applicable endorsements or options, the actuarial documents for the insured commodity, the CAT Endorsement, if applicable, and the applicable regulations published in 7 CFR chapter IV. Insurance for each commodity in each county will constitute a separate policy.

Policy protection. The liability amount calculated in accordance with section 6(f) unless otherwise specified in the Special Provisions.

Practice. Production methodologies used to produce the insured crop consisting of unique combinations of irrigated practice, cropping practice, organic practice, and interval as shown
on the actuarial documents as insurable.

Prairie Pothole National Priority Area. Consists of specific counties within the States of Iowa, Minnesota, Montana, North Dakota, South Dakota, or any other county as specified on the RMA’s Web site at http://www.rma.usda.gov, or a successor Web site, or the Farm Service Agency, Agricultural Resource Conservation Program 2-CRP (Revision 4), dated April 28, 2008, or a subsequent publication.

Premium billing date. The earliest date upon which you will be billed for insurance coverage based on your acreage report. The premium billing date is contained in the actuarial documents.

Production report. A written record showing your annual production in accordance with section 8. The report contains yield information for the current year, including acreage and production. This report must be supported by written verifiable records from a warehouseman or buyer of the insured crop, by measurement of farm-stored production, or by other records of production approved by us in accordance with FCIC approved procedures.

Production reporting date. The date contained in the actuarial documents by which you are required to submit your production report.

Prohibited substance. Any biological, chemical, or other agent that is prohibited from use or is not included in the organic standards for use on any certified organic, transitional or buffer zone acreage. Lists of such substances are contained at 7 CFR part 205.

Projected price. A price for each crop, type, and practice as shown in the actuarial documents, as applicable, determined in accordance with the CEPP, Special Provisions or the Crop Provisions, as applicable.

Protection factor (PF). The percentage you choose that is used to calculate the dollar amount of insurance per acre and policy protection.

Replanted crop. The same commodity replanted on the same acreage as the first insured crop for harvest in the same crop year. ARPI does not have a replant provision, therefore, it is only used for first and second crop determinations.

RMA. Risk Management Agency, an agency within USDA.

Sales closing date. The date contained in the actuarial documents by which an application must be filed and the last date by which you may change your crop insurance coverage for a crop year.

Second crop. With respect to a single crop year, the next occurrence of planting any commodity for harvest following a first insured crop on the same acreage. The second crop may be the same or a different commodity as the first insured crop, except the term does not include a replanted crop. A cover crop, planted after a first insured crop and planted for the purpose of haying, grazing or otherwise harvesting in any manner or that is hayed or grazed during the crop year, or that is otherwise harvested is considered to be a second crop. A cover crop that is covered by FSA’s noninsured crop disaster assistance program (NAP) or receives other USDA benefits associated with forage crops will be considered as planted for the purpose of haying, grazing or otherwise harvesting. A crop meeting the conditions stated herein will be considered to be a second crop regardless of whether or not it is insured.

Share. Your insurable interest in the insured crop as an owner, operator, or tenant.

Special Provisions. The part of the policy that contains specific provisions of insurance for each insured crop that may vary by geographic area, and is available for public inspection in your agent’s office and published on RMA’s Web site.

State. The state shown on your accepted application.

Subclass. A specific subgroup of class.

Subsidy. The portion of the total premium that FCIC will pay in accordance with the Act.

Subsidy factor. The percentage of the total premium paid by FCIC as a subsidy.

Substantial beneficial interest. An interest held by any person of at least 10
percent in you (e.g., there are two partnerships that each have a 50 percent interest in you and both the partnerships and the individuals would have a substantial beneficial interest in you. The spouses of the individuals would not be considered to have a substantial beneficial interest unless the spouse was one of the individuals that made up the partnership. However, if each partnership is made up of six individuals with equal interests, then each would only have an 8.33 percent interest in you and although the partnership would still have a substantial beneficial interest in you, the individuals would not for the purposes of reporting in section 2). The spouse of any individual applicant or individual insured will be presumed to have a substantial beneficial interest in the applicant or insured unless the spouses can prove they are legally separated or otherwise legally separate under the applicable state dissolution of marriage laws. Any child of an individual applicant or individual insured will not be considered to have a substantial beneficial interest in the applicant or insured unless the child has a separate legal interest in such person.

Summary of protection. Our statement to you specifying the insured crop, dollar amount of insurance per acre, policy protection, premium and other information obtained from your accepted application, acreage report, and the actuarial documents.

Sustainable farming practice. A system or process for producing a commodity, excluding organic farming practices, that is necessary to produce the crop and is generally recognized by agricultural experts for the area to conserve or enhance natural resources and the environment.

Tenant. A person who rents land from another person for a share of the crop or a share of the proceeds of the crop (see the definition of “share” above).

Termination date. The calendar date contained in the Crop Provisions upon which your insurance ceases to be in effect because of nonpayment of any amount due us under the policy.

Tilled. The termination of existing plants by plowing, diskng, burning, application of chemicals, or by other means to prepare acreage for the production of an annual crop.

Total premium. The amount of premium before subsidy, calculated in accordance with section 7(e)(1).

Transitional acreage. Acreage on which organic farming practices are being followed that does not yet qualify to be designated as organic acreage.

Trigger revenue. The revenue amount calculated in accordance with section 12(b).

Trigger yield. The yield amount calculated in accordance with section 12(c).

Type. Categories of the insured crop consisting of unique combinations of commodity type, class, subclass, and intended use as shown on the actuarial documents as insurable.

Upside harvest price protection. Coverage provided automatically under the Area Revenue Protection plan of insurance. This coverage increases your final policy protection when the harvest price is greater than the projected price. This coverage is not available under either the Area Revenue Protection with the Harvest Price Exclusion or the Area Yield Protection plans of insurance.

USDA. United States Department of Agriculture.

Verifiable records. Has the same meaning as the term defined in 7 CFR part 400, subpart G.

Void. When the policy is considered not to have existed for a crop year.

Volatility factor. A measure of variation of price over time found in the actuarial documents.

2. Life of Policy, Cancellation, and Termination

(a) This is a continuous policy and will remain in effect for each crop year following the acceptance of the original application until canceled by you in accordance with the terms of the policy or terminated by operation of the terms of the policy or by us. In accordance with section 3, FCIC may change the coverage provided from year to year.
(b) The following information must be included on your application for insurance or your application will not be accepted and no coverage will be provided:

(1) Your election of Area Revenue Protection, Area Revenue Protection with the Harvest Price Exclusion, or Area Yield Protection;

(2) The crop with all type and practice combinations insured as shown on the actuarial documents;

(3) Your elected coverage level;

(4) Your elected protection factor;

(5) Identification numbers for you as follows:

(i) You must include your social security number (SSN) if you are an individual (if you are an individual applicant operating as a business, you must provide an employer identification number (EIN) and you must also provide your SSN); or

(ii) You must include your EIN if you are a person other than an individual;

(6) Identification numbers for all persons who have a substantial beneficial interest in you:

(i) The SSN for individuals; or

(ii) The EIN for persons other than individuals and the SSNs for all individuals that comprise the person with the EIN if such individuals also have a substantial beneficial interest in you; and

(7) All other information required on the application to insure the crop.

(c) With respect to SSNs or EINs required on your application:

(1) Your application will not be accepted and no insurance will be provided for the year of application if the application does not contain your SSN or EIN. If your application contains an incorrect SSN or EIN for you, your application will be considered not to have been accepted, no insurance will be provided for the year of application and for any subsequent crop years, as applicable, and such policies will be void if:

(i) Such number is not corrected by you; or

(ii) You correct the SSN or EIN but:

(A) You cannot prove that any error was inadvertent (Simply stating the error or omission was inadvertent is not sufficient to prove the error or omission was inadvertent); or

(B) Even after the correct SSN or EIN is provided by you, it is determined that the incorrect or omitted SSN or EIN would have allowed you to obtain disproportionate benefits under the crop insurance program, the person with a substantial beneficial interest in you is determined to be ineligible for insurance, or you or the person with a substantial beneficial interest in you could avoid an obligation or requirement under any State or Federal law; or

(iii) Except as provided in sections 2(c)(2)(ii)(B) and (C), your policies will not be voided if you subsequently provide the correct SSN or EIN for persons with a substantial beneficial interest in you and the persons are eligible for insurance;

(d) When any of your policies are void under section 2(c):

(1) You must repay any indemnity that may have been paid for all applicable crops and crop years;
(2) Even though the policies are void, you will still be required to pay an amount equal to 20 percent of the premium that you would otherwise be required to pay; and

(3) If you previously paid premium or administrative fees, any amount in excess of the amount required in section 2(d)(2) will be returned to you.

(e) Notwithstanding any of the provisions in this section, you may be subject to civil, criminal or administrative sanctions if you certify to an incorrect SSN or EIN or any other information under this policy.

(f) If any of the information regarding persons with a substantial beneficial interest in you, changes:

(1) After the sales closing date for the previous crop year, you must revise your application by the sales closing date for the current crop year to reflect the correct information; or

(2) Less than 30 days before the sales closing date for the current crop year, you must revise your application by the sales closing date for the next crop year;

(3) And you fail to provide the required revisions, the provisions in section 2(c)(2) will apply; and

(g) If you are, or a person with a substantial beneficial interest in you, not eligible to obtain an SSN or EIN, whichever is required, you must request an assigned number for the purposes of this policy from us:

(1) A number will be provided only if you can demonstrate you are, or a person with a substantial beneficial interest in you, eligible to receive Federal benefits;

(2) If a number cannot be provided for you in accordance with section 2(g)(1), your application will not be accepted; or

(3) If a number cannot be provided for any person with a substantial beneficial interest in you in accordance with section 2(g)(1), the amount of coverage for all crops on the application will be reduced proportionately by the percentage interest of such person in you.

(h) After acceptance of the application, you may not cancel this policy for the initial crop year unless you choose to insure the entire crop under another Federally reinsured plan of insurance with the same insurance provider on or before the sales closing date. After the first year, the policy will continue in force for each succeeding crop year unless canceled, voided or terminated as provided in this section.

(i) Either you or we may cancel this policy after the initial crop year by providing written notice to the other on or before the cancellation date shown in the Crop Provisions.

(j) Any amount due to us for any policy authorized under the Act will be offset from any indemnity due you for this or any other crop insured with us under the authority of the Act.

(1) Even if your claim has not yet been paid, you must still pay the premium and administrative fee on or before the termination date for you to remain eligible for insurance.

(2) If we offset any amount due us from an indemnity owed to you, the date of payment for the purpose of determining whether you have a delinquent debt will be the date FCIC publishes the final county yield for the applicable crop year.

(k) A delinquent debt for any policy will make you ineligible to obtain crop insurance authorized under the Act for any subsequent crop year and result in termination of all policies in accordance with section 2(k)(2).

(1) With respect to ineligibility:

(i) Ineligibility for crop insurance will be effective on:

(A) The date that a policy was terminated in accordance with section 2(k)(2) for the crop for which you failed to pay premium, an administrative fee, or any related interest owed, as applicable;

(B) The date contained in any notification of indebtedness for overpaid indemnity and any other amounts due, including but not limited to, premium billed with a due date after the termination date for the crop year in which premium is earned, if you fail to pay the amount owed, including any related interest owed, as applicable, by such due date;

(C) The termination date for the crop year prior to the crop year in which a scheduled payment is due under a written payment agreement if you fail to pay the amount owed by any payment
§ 407.9

Date in any agreement to pay the debt; or

(D) The termination date the policy was or would have been terminated under section 2(k)(2)(i)(A), (B) or (C) if your bankruptcy petition is dismissed before discharge.

(ii) If you are ineligible and a policy has been terminated in accordance with section 2(k)(2), you will not receive any indemnity, and such ineligibility and termination of the policy may affect your eligibility for benefits under other USDA programs. Any indemnity that may be owed for the policy before it has been terminated will remain owed to you, but may be offset in accordance with section 2(j), unless your policy was terminated in accordance with sections 2(k)(2)(i)(A), (B), (D), or (E).

(2) With respect to termination:

(i) Termination will be effective on:

(A) For a policy with unpaid administrative fees or premiums, the termination date immediately subsequent to the premium billing date for the crop year (For policies for which the sales closing date is prior to the termination date, such policies will terminate for the current crop year even if insurance attached prior to the termination date. Such termination will be considered effective as of the sales closing date and no insurance will be considered to have attached for the crop year and no indemnity will be owed);

(B) For a policy with other amounts due, including but not limited to, premium billed with a due date after the termination date for the crop year in which premium is earned, the termination date immediately following the date you have a delinquent debt (For policies for which the sales closing date is prior to the termination date, such policies will terminate for the current crop year even if insurance attached prior to the termination date. Such termination will be considered effective as of the sales closing date and no indemnity will be owed);

(C) For all other policies that are issued by us under the authority of the Act, the termination date that coincides with the termination date for the policy with the delinquent debt, or if there is no coincidental termination date, the termination date immediately following the date you become ineligible;

(D) For execution of a written payment agreement and failure to make any scheduled payment, the termination date for the crop year prior to the crop year in which you failed to make the scheduled payment (for this purpose only, the crop year will start the day after the termination date and end on the next termination date, e.g., if the termination date is November 30 and you fail to make a payment on November 15, 2011, your policy will terminate on November 30, 2010, for the 2011 crop year); or

(E) For dismissal of a bankruptcy petition before discharge, the termination date the policy was or would have been terminated under section 2(k)(2)(i)(A), (B), (D), or (E).

(ii) For all policies terminated under section 2(k)(2)(i)(A), (B), (D), or (E), any indemnities paid subsequent to the termination date must be repaid.

(iii) Once the policy is terminated, it cannot be reinstated for the current crop year unless the termination was in error. Failure to timely pay because of illness, bad weather, or other such extenuating circumstances is not grounds for reinstatement in the current crop year.

(3) To regain eligibility, you must:

(i) Repay the delinquent debt in full;

(ii) Execute a written payment agreement and make payments in accordance with the agreement (we will not enter into a written payment agreement with you if you have previously failed to make a scheduled payment under the terms of any other payment agreement with us or any other insurance provider); or

(iii) File a petition to have your debts discharged in bankruptcy (Dismissal of the bankruptcy petition before discharge will terminate all policies in effect retroactive to the date your policy would have been terminated in accordance with section 2(k)(2)(i)).

(4) If you are determined to be ineligible under section 2(k), persons with a substantial beneficial interest in you may also be ineligible until you become eligible again.
(l) In cases where there has been a
death, disappearance, judicially de-
clared incompetence, or dissolution of
any insured person:

(1) If any married insured dies, dis-
appears, or is judicially declared in-
competent, the insured on the policy
will automatically convert to the name
of the spouse if:

(i) The spouse was included on the
policy as having a substantial ben-
eficial interest in the insured; and

(ii) The spouse has a share of the
crop.

(2) The provisions in section 2(l)(3)
will only be applicable if:

(i) Any partner, member, share-
holder, etc., of an insured entity dies,
disappears, or is judicially declared in-
competent, and such event automati-
cally dissolves the entity; or

(ii) An individual whose estate is left
to a beneficiary other than a spouse or
left to the spouse and the criteria in
section 2(l)(1) are not met, dies, dis-
appears, or is judicially declared in-
competent.

(3) If the death, disappearance, or ju-
dicially declared incompetence oc-
curred:

(i) More than 30 days before the can-
cellation date, the policy is automati-
cally canceled as of the cancellation
date and a new application must be
submitted; or

(ii) Thirty days or less before the can-
cellation date, or on or after the can-
cellation date, the policy will continue
in effect through the crop year imme-
diately following the cancellation date
and be automatically canceled as of the can-
cellation date immediately following
the end of the insurance period for the
crop year, unless canceled by the can-
cellation date prior to the start of the
insurance period:

(A) A new application for insurance
must be submitted on or before the
sales closing date for coverage for the
subsequent crop year; and

(B) Any indemnity will be paid to the
person or persons determined to be
beneficially entitled to the payment
provided such person or persons comply
with all policy provisions and timely
pays the premium.

(4) If any insured entity is dissolved
for reasons other than death, dis-
appearance, or judicially declared in-
competence:

(i) Before the cancellation date, the
policy is automatically canceled as of
the cancellation date and a new appli-
cation must be submitted; or

(ii) On or after the cancellation date,
the policy will continue in effect
through the crop year immediately fol-
lowing the cancellation date and be
automatically canceled as of the can-
cellation date immediately following
the end of the insurance period for the
crop year, unless canceled by the can-
cellation date prior to the start of the
insurance period.

(5) If section 2(k)(2) or (4) applies, a
remaining member of the insured per-
on or the beneficiary is required to re-
port to us the death, disappearance, ju-
dicial incompetence, or other event
that causes dissolution of the entity
not later than the next cancellation
date, except if section 2(k)(3)(ii) ap-
plies, notice must be provided by the
cancellation date for the next crop
year.

(m) We may cancel your policy if no
premium is earned for 3 consecutive
years.

(n) The cancellation and termination
dates are contained in the Crop Provi-
sions.

(o) Any person may sign any docu-
ment relative to crop insurance cov-
erage on behalf of any other person
covered by such a policy, provided that
the person has a properly executed
power of attorney or such other legally
sufficient document authorizing such
person to sign. You are still responsible
for the accuracy of all information pro-
vided on your behalf and may be sub-
ject to the consequences in section 8(g),
and any other consequences, including
administrative, criminal or civil sanc-
tions, if any information has been mis-
reported.
§ 407.9 7 CFR Ch. IV (1-1-14 Edition)

(p) If voidance, cancellation or termination of insurance coverage occurs for any reason, including but not limited to indebtedness, suspension, debarment, disqualification, cancellation by you or us or your policy is voided due to a conviction of the controlled substance provisions of the Food Security Act of 1985 or Title 21, a new application must be filed for the crop.

(1) Insurance coverage will not be provided if you are ineligible under the contract or under any Federal statute or regulation.

(2) Since applications for crop insurance cannot be accepted after the sales closing date, if you make any payment, or you otherwise become eligible, after the sales closing date, you cannot apply for insurance until the next crop year. For example, for the 2012 crop year, if crop A, with a termination date of October 31, 2012, and crop B, with a termination date of March 15, 2013, are insured and you do not pay the premium for crop A by the termination date, you are ineligible for crop insurance as of that date. Crop B’s policy does not terminate until March 15, 2013, and an indemnity for the 2012 crop year may still be owed. You will not be eligible to apply for crop insurance for any crop until after the amounts owed are paid in full or you file a petition to discharge the debt in bankruptcy.

3. Contract Changes

(a) We may change the terms and conditions of this policy from year to year.

(b) Any changes in policy provisions, the CEPP, amounts of insurance, expected county yields, premium rates, and program dates can be viewed on RMA’s Web site not later than the contract change date contained in the Crop Provisions. We may only revise this information after the contract change date to correct obvious errors (e.g., the expected county revenue for a county was announced at $2,500 per acre instead of $250 per acre).

(c) After the contract change date, all changes specified in section 3(b) will also be available upon request from your crop insurance agent.

(d) Not later than 30 days prior to the cancellation date for the insured crop you will be provided, in accordance with section 20, a copy of the changes to the Basic Provisions, Crop Provisions, CEPP, if applicable, and Special Provisions.

(e) Acceptance of all the changes will be conclusively presumed in the absence of notice from you to change or cancel your insurance coverage.

4. Insured Crop

(a) The insured crop will be that shown on your accepted application and as specified in the Crop Provisions or Special Provisions, and must be grown on insurable acreage.

(b) A crop which will NOT be insured will include, but will not be limited to, any crop:

(1) That is not grown on planted acreage;

(2) That is a type not generally recognized for the area;

(3) For which the information necessary for insurance (projected price, expected county yield, premium rate, etc.) is not included in the actuarial documents;

(4) That is a volunteer crop;

(5) Planted following the same crop on the same acreage and the first planting of the crop has been harvested in the same crop year unless specifically permitted by the Crop Provisions or the Special Provisions (For example, the second planting of grain sorghum would not be insurable if grain sorghum had already been planted and harvested on the same acreage during the crop year);

(6) That is planted for experimental purposes;

(7) That is used solely for wildlife protection or management. If the lease states that specific acreage must remain unharvested, only that acreage is uninsurable. If the lease specifies that a percentage of the crop must be left unharvested, your share will be reduced by such percentage.

(c) Although certain policy documents may state that a specific crop, type, or practice is not insurable, it does not mean all other crops, types, or practices are insurable. To be insurable, the use of such crop, type, or...
practice must be a good farming practice, have been widely used in the county, and meet all the conditions in the Basic Provisions, the Crop Provisions, Special Provisions, and the actuarial documents.

5. Insurable Acreage

(a) Except as provided in section 5(c), the insurable acreage is all of the acreage of the insured crop for which a premium rate is provided by the actuarial documents, in which you have a share, and which is planted in the county listed on your accepted application. The dollar amount of insurance per acre, amount of premium, and indemnity will be calculated separately for each crop, type, and practice shown on the actuarial documents.

(1) The acreage must have been planted and harvested (grazing is not considered harvested for the purposes of this section) or insured (excluding pasture, rangeland, and forage, vegetation and rainfall insurance or any other specific policy listed in the Special Provisions) in at least one of the three previous crop years unless:

(A) Such acreage was not planted:

(i) In at least two of the three previous crop years to comply with any other USDA program;

(ii) Due to the crop rotation, the acreage would not have been planted in the previous three years (e.g., a crop rotation of corn, soybeans, and alfalfa; and the alfalfa remained for four years before the acreage was planted to corn again); or

(C) Because a perennial crop was on the acreage in at least two of the previous three crop years;

(ii) Such acreage constitutes five percent or less of the insured planted acreage of the crop, type and practice as shown on the actuarial documents in the county;

(iii) Such acreage was not planted or harvested because it was pasture or rangeland and the crop to be insured is also pasture or rangeland;

(iv) The Crop Provisions or Special Provisions specifically allow insurance for such acreage.

(b) Only the acreage planted to the insured crop on or before the final planting date, as shown in the actuarial documents, and reported by the acreage reporting date and physically located in the county shown on your accepted application will be insured.

(c) We will not insure any acreage (and any uninsured acreage and production from uninsured acreage will not be included for the purposes of establishing the final county yield):

(1) Where the crop was destroyed or put to another use during the crop year for the purpose of conforming with, or obtaining a payment under, any other program administered by the USDA;

(2) Where we determine you have failed to follow good farming practices for the insured crop;

(3) Where the conditions under which the crop is planted are not generally recognized for the area (for example, where agricultural experts determine that planting a non-irrigated corn crop after a failed small grain crop on the same acreage in the same crop year is not appropriate for the area);

(4) Of a second crop, if you elect not to insure such acreage when an indemnity for a first insured crop may be subject to reduction in accordance with the provisions of section 13 and you intend to collect an indemnity payment that is equal to 100 percent of the insurable loss for the first insured crop acreage. This election must be made for all first insured crop acreage that may be subject to an indemnity reduction if the first insured crop is insured under this policy, or on a first insured crop unit basis if the first insured crop is not insured under this policy (e.g., if the first insured crop under this policy consists of 40 acres, or the first insured crop unit insured under another policy contains 40 planted acres, then no second crop can be insured on any of the 40 acres). In this case:

(i) If the first insured crop is insured under ARPI, you must provide written notice to us of your election not to insure acreage of a second crop by the acreage reporting date for the second crop if it is insured under ARPI, or before planting the second crop if it is insured under any other policy;

(ii) If the first insured crop is not insured under ARPI, at the time the first insured crop acreage is released by us...
or another insurance provider who insures the first insured crop (if no acreage in the first insured crop unit is released, this election must be made by the earlier of acreage reporting date for the second crop or when you sign the claim for the first insured crop);

(iii) If you fail to provide a notice as specified in section 5(c)(5)(i) or 5(c)(5)(ii), the second crop acreage will be insured in accordance with applicable policy provisions and you must repay any overpaid indemnity for the first insured crop;

(iv) In the event a second crop is planted and insured with a different insurance provider, or planted and insured by a different person, you must provide written notice to each insurance provider that a second crop was planted on acreage on which you had a first insured crop; and

(v) You must report the crop acreage that will not be insured on the applicable acreage report; and

(5) Of a crop planted following a second crop or following an insured crop that is prevented from being planted after a first insured crop, unless it is a practice that is generally recognized by agricultural experts or organic agricultural experts for the area to plant three or more crops for harvest on the same acreage in the same crop year, and additional coverage insurance provided under the authority of the Act is offered for the third or subsequent crop in the same crop year. Insurance will only be provided for a third or subsequent crop as follows:

(i) You must provide records acceptable to us that show:

(A) You have produced and harvested the insured crop following two other crops harvested on the same acreage in the same crop year in at least two of the last four years in which you produced the insured crop; or

(B) The applicable acreage has had three or more crops produced and harvested on it in the same crop year in at least two of the last four years in which the insured crop was grown on the acreage; and

(ii) The amount of insurable acreage will not exceed 100 percent of the greatest number of acres for which you provide the records required in section 5(c)(5)(i).

(d) If the Governor of a State designated within the Prairie Pothole National Priority Area elects to make section 508(o) of the Act effective for the State, any native sod acreage greater than five acres located in a county contained within the Prairie Pothole National Priority Area that has been tilled after May 22, 2008, is not insurable for the first five crop years of planting following the date the native sod acreage is tilled.

(1) If the Governor makes this election after you have received an indemnity or other payment for native sod acreage, you will be required to repay the amount received and any premium for such acreage will be refunded to you.

(2) If we determine you have tilled less than five acres of native sod a year for more than one crop year, we will add all the native sod acreage tilled after May 22, 2008, and all such acreage will be ineligible for insurance for the first five crop years of planting following the date the cumulative native sod acreage tilled exceeds five acres.

6. Coverage, Coverage Levels, Protection Factor, and Policy Protection

(a) For all acreage of the insured crop in the county, you must select the same plan of insurance (e.g., all Area Revenue Protection, all Area Revenue Protection with the Harvest Price Exclusion, or all Area Yield Protection), if such plans are available on the actuarial documents.

(b) You must choose a protection factor:

(1) Unless otherwise specified in the Special Provisions from a range of 80 percent to 120 percent;

(2) As a whole percentage from amounts specified; and

(3) For each crop, type, and practice (you may choose a different protection factor for each crop, type, and practice).

(c) You may select any coverage level shown on the actuarial documents for each crop, type, and practice.

(1) For Area Revenue Protection and Area Revenue Protection with the Harvest Price Exclusion:

(i) CAT level of coverage is not available; and
(ii) With respect to additional level of coverage, you may select any coverage level specified in the actuarial documents for each crop, type, and practice. For example: You may choose a 75 percent coverage level for one crop, type, and practice (such as corn irrigated practice) and a 90 percent coverage level for another crop, type, and practice (corn non-irrigated practice).

(2) For Area Yield Protection:
   (i) CAT level of coverage is available, and you may select the CAT level of coverage for any crop, type, and practice;
   (ii) With respect to additional level of coverage, you may select any coverage level specified in the actuarial documents for each crop, type, and practice. For example: You may choose a 75 percent coverage level for one crop, type, and practice (corn irrigated practice) and a 90 percent coverage level for another crop, type, and practice (corn non-irrigated practice); and
   (iii) You may have CAT level of coverage on one type and practice shown on the actuarial documents for the crop, and additional coverage on another type and practice for the same crop. You may also have different additional levels of coverage by type and practice.

(d) You may change the plan of insurance, protection factor, or coverage level, for the following crop year by giving written notice to us not later than the sales closing date for the insured crop.

(e) Since this is a continuous policy, if you do not select a new plan of insurance, protection factor, and coverage level on or before the sales closing date, we will assign the same plan of insurance, protection factor, and coverage level as the previous year.

(f) Policy protection for ARPI plans of insurance is calculated as follows:
   (1) Multiply the dollar amount of insurance per acre for each crop, type, and practice by the number of acres insured for such crop, type and practice; and
   (2) Multiply the result of paragraph (1) by your share.

(g) If the projected price cannot be calculated for the current crop year under the provisions contained in the CEPP and you previously chose Area Revenue Protection or Area Revenue Protection with the Harvest Price Exclusion:
   (1) Area Revenue Protection and Area Revenue Protection with the Harvest Price Exclusion will not be provided and you will automatically be covered under the Area Yield Protection plan of insurance for the current crop year unless you cancel your coverage by the cancellation date or change your plan of insurance by the sales closing date;
   (2) Notice of availability of the projected price will be provided on RMA’s Web site by the date specified in the applicable projected price definition contained in the CEPP;
   (3) The projected price will be determined by FCIC and will be released by the date specified in the applicable projected price definition contained in the CEPP; and
   (4) Your coverage will automatically revert back to Area Revenue Protection or Area Revenue Protection with the Harvest Price Exclusion, whichever is applicable, for the next crop year that revenue protection is available unless you cancel your coverage by the cancellation date or change your plan of insurance by the sales closing date.

7. Annual Premium and Administrative Fees

(a) The administrative fee:
   (1) For CAT level of coverage will be an amount specified in the CAT Endorsement or the Special Provisions, as applicable;
   (2) For additional levels of coverage is $30, or an amount specified in the Special Provisions, as applicable;
   (3) Is payable to us on the premium billing date for the crop;
   (4) Must be paid no later than the time premium is due or the amount will be considered a delinquent debt;
   (5) If you select coverage in accordance with section 6(c)(2)(iii):
      (i) Will be charged for both CAT and additional level of coverage if a producer elects both for the crop in the county; but
      (ii) Will not be more than one additional and one CAT administrative fee no matter how many different coverage levels you choose for different type and practice.
practice combinations you insure for the crop in the county;
   (6) Will be waived if you request it and:
      (i) You qualify as a limited resource farmer; or
      (ii) You were insured prior to the 2005
crop year or for the 2005 crop year and
your administrative fee was waived for
one or more of those crop years be-
cause you qualified as a limited re-
source farmer under a policy definition
previously in effect, and you remain
qualified as a limited resource farmer
under the definition that was in effect
at the time the administrative fee was
waived;
(7) Will not be required if you file a
bona fide zero acreage report on or be-
fore the acreage reporting date for the
crop. If you falsely file a zero acreage
report you may be subject to criminal,
civil and administrative sanctions; and
(8) If not paid when due, may make
you ineligible for crop insurance and
certain other USDA benefits.
(b) The premium is based on the pol-
icy protection calculated in section
6(f).
(c) The information needed to deter-
mine the premium rate and any pre-
mium adjustment percentages that
may apply are contained in the actuar-
ial documents.
(d) To calculate the premium and
subsidy amounts for ARPI plans of in-
surance:
   (1) Multiply your policy protection
from section 6(f) by the applicable pre-
mium rate and any premium adjust-
ment percentages that may apply;
   (2) Multiply the result of paragraph
(1) by the applicable subsidy factor
(This is the amount of premium FCIC
will pay);
   (3) Subtract the result of paragraph
(2) from the result of paragraph (1) to
calculate the amount of premium you
will pay.
   (e) The amount of premium cal-
culated in accordance with section
7(d)(3) and administrative fees you are
required to pay for any acreage exceeds
the amount of policy protection for the
acreage, coverage for those acres will
not be provided (No premium or admin-
istrative fee will be due and no indem-
nity will be paid for such acreage).
   (g) Premium or administrative fees
owed by you will be offset from an in-
demnity due you in accordance with
section 2(j).
8. Report of Acreage and Production
   (a) An annual acreage report must be
submitted to us on our form for each
insured crop (separate lines for each
type and practice) in the county on or
before the acreage reporting date con-
tained in the actuarial documents.
   (b) If you do not have a share in an
insured crop in the county for the crop
year, you must submit an acreage re-
port, on or before the acreage reporting
date, so indicating.
   (c) Your acreage report must include
the following information, if applica-
able:
      (1) The amount of acreage of the crop
in the county (insurable and not insur-
able) in which you have a share, the
last date any acreage of the insured
crop was planted, and the number of
acres planted by such date (Acreage
initially planted after the final plant-
ing date must be reported as uninsur-
able);
      (2) Your share at the time coverage
begins;
      (3) The practice;
      (4) The type; and
      (5) The land identifier for the crop
acreage (e.g., legal description, FSA
farm number or common land unit
number if provided to you by FSA,
etc.) as required on our form.
   (d) We will not insure any acreage of
the insured crop planted after the final
planting date.
   (e) Regarding the ability to revise an
acreage report you have submitted to
us:
      (1) You cannot revise any informa-
tion pertaining to the planted acreage
after the acreage reporting date with-
out our consent;
      (2) Consent may only be provided if
the information on the acreage report
is clearly transposed, or you provide
adequate evidence that we have or
someone from USDA has committed an error regarding the information on your acreage report; and

(3) The provisions in section 8(e)(1) and (2) also pertain to land acquired after the acreage reporting date, and we may choose to insure or not insure the acreage, provided the crop meets the requirements in section 5 and section 8. This requirement does not apply to any acreage acquired through a transfer of coverage in accordance with section 17.

(f) Except as provided in section 8(h), your premium and indemnity, if any, will be based on your insured acreage and share on your acreage report or section 8(e), if applicable.

(g) We may elect to determine all premiums and indemnities based on the information you submit on the acreage report or upon the factual circumstances we determine to have existed, subject to the provisions contained in section 8.

(h) You must provide all required reports and you are responsible for the accuracy of all information contained in those reports. You should verify the information on all such reports prior to submitting them to us.

(1) Except as provided in section 8(h)(2), if you submit information on any report that is different than what is determined to be correct and the information reported on the acreage report results in:

(i) A lower liability than the actual, correct liability determined, the policy protection will be reduced to an amount consistent with the information reported on the acreage report; or

(ii) A higher liability than the actual, correct liability determined, the information contained in the acreage report will be revised to be consistent with the correct information.

(2) If your share is misreported and the share is:

(i) Under-reported at the time of the acreage report, any claim will be determined using the share you reported; or

(ii) Over-reported at the time of the acreage report, any claim will be determined using the share we determine to be correct.

(i) If we discover you have incorrectly reported any information on the acreage report for any crop year, you may be required to provide documentation in subsequent crop years substantiating your report of acreage for those crop years, including, but not limited to, an acreage measurement service at your own expense. If the correction of any misreported information would affect an indemnity that was paid in a prior crop year, such claim will be adjusted and you will be required to repay any overpaid amounts.

(j) You may request an acreage measurement from FSA or a business that provides such measurement service prior to the acreage reporting date, submit documentation of such request and an acreage report with estimated acreage by the acreage reporting date, and if the acreage measurement shows the estimated acreage was incorrect, we will revise your acreage report to reflect the correct acreage:

(1) If an acreage measurement is only requested for a portion of the insured crop, type, and practice, you must separately designate the acreage for which an acreage measurement has been requested;

(2) If an acreage measurement is not provided to us by the time the final county revenue or final county yield, as applicable, is calculated, we may:

(i) Elect to measure the acreage, and finalize your claim in accordance with applicable policy provisions;

(ii) Defer finalization of the claim until the measurement is completed with the understanding that if you fail to provide the measurement prior to the termination date, your claim will not be paid; or

(iii) Finalize the claim in accordance with applicable policy provisions after you provide the acreage measurement to us; and

(3) Premium will still be due in accordance with sections 2(k) and 7 (If the acreage is not measured as specified in section 8(j) and the acreage measurement is not provided to us at least 15 days prior to the premium billing date, your premium will be based on the estimated acreage and will be revised, if necessary, when the acreage measurement is provided);

(4) If the acreage measurement is not provided by the termination date, you will be precluded from providing any
(5) If there is an irreconcilable difference between:
(i) The acreage measured by FSA or a measuring service and our on-farm measurement, our on-farm measurement will be used; or
(ii) The acreage measured by a measuring service, other than our on-farm measurement, and FSA, the FSA measurement will be used; and

(6) If the acreage report has been revised in accordance with sections 8(g) and 8(j), the information on the initial acreage report will not be considered misreported for the purposes of section 8(h).

(k) If you do not submit an acreage report by the acreage reporting date, or if you fail to report all acreage, we may elect to determine the insurable acreage, by crop, type, practice, and share, or to deny liability on such acreage. If we deny liability for the unreported acreage, no premium will be due on such acreage and no indemnity will be paid.

(l) An annual production report must be submitted, unless otherwise specified in the Special Provisions, to us on our form for each insured crop (separate lines for each type and practice) in the county by the production reporting date specified in the actuarial documents.

(m) Unless otherwise authorized by FCIC, if you do not submit a production report to us by the production reporting date specified in the actuarial documents, your protection factor for your policy in the following crop year will be limited to the lowest protection factor available.

(n) You must certify to the accuracy of the information on your production report and if you fail to accurately report your production, you will be subject to the provisions in 8(m), unless the information is corrected:
(1) On or before the production reporting date; or
(2) Because the incorrect information was the result of our error or the error of someone from USDA.

(o) If you do not have records to support the information on your production report, you will be subject to the provisions in 8(m).

(p) At any time we discover you have misreported any material information on your production report, you will be subject to the provisions in 8(m).

(q) If you do not submit a production report or you misreported your production report and you switch to another plan of insurance in the following crop year, you will be subject to having a yield assigned in accordance with FCIC procedures.

(r) Errors in reporting acreage, share, and other information required in this section, may be corrected by us at the time we become aware of such errors. However, the provisions regarding incorrect information in this section will apply.

9. Share Insured

(a) Insurance will attach:
(1) Only if the person completing the application has a share in the insured crop; and
(2) Only to that person’s share, except that insurance may attach to another person’s share of the insured crop if the other person has a share of the crop and:
(i) The application clearly states the insurance is requested for a person other than an individual (e.g., a partnership or a joint venture); or
(ii) The application clearly states you as a landlord will insure your tenant’s share, or you as a tenant will insure your landlord’s share. If you as a landlord will insure your tenant’s share, or you as a tenant will insure your landlord’s share, you must provide evidence of the other party’s approval (lease, power of attorney, etc.) and such evidence will be retained by us:
(A) You also must clearly set forth the percentage shares of each person on the acreage report; and
(B) For each landlord or tenant, you must report the landlord’s or tenant’s SSN, EIN, or other identification number we assigned for the purposes of this policy, as applicable.

(b) With respect to your share:
(1) We will consider included in your share under your policy, any acreage or interest reported by or for:
(i) Your spouse, unless such spouse can prove he/she has a separate farming operation, which includes, but is
Federal Crop Insurance Corporation, USDA § 407.9

not limited to, separate land (transfers of acreage from one spouse to another is not considered separate land), separate capital, separate inputs, separate accounting, and separate maintenance of proceeds; or

(ii) Your child who resides in your household or any other member of your household, unless such child or other member of the household can demonstrate such person has a separate share in the crop (Children who do not reside in your household are not included in your share); and

(2) If it is determined that the spouse, child or other member of the household has a separate policy but does not have a separate farming operation or share of the crop, as applicable:

(i) The policy for the spouse or child or other member of the household will be void and the policy remaining in effect will be determined in accordance with section 18(c)(1) and (2);

(ii) The acreage or share reported under the policy that is voided will be included under the remaining policy; and

(iii) No premium will be due and no indemnity will be paid for the voided policy.

(c) Acreage rented for a percentage of the crop, or a lease containing provisions for both a minimum payment (such as a specified amount of cash, bushels, pounds, etc.) and a crop share will be considered a crop share lease.

(d) Acreage rented for cash, or a lease containing provisions for either a minimum payment or a crop share (such as a 50/50 share or $100.00 per acre, whichever is greater) will be considered a cash lease.

10. Insurance Period

Unless specified otherwise in the Crop Provisions, coverage begins at the later of:

(a) The date we accept your application (For the purposes of this paragraph, the date of acceptance is the date that you submit a properly executed application in accordance with section 2); or

(b) The date the insured crop is planted.

11. Causes of Loss

(a) ARPI provides protection against loss of revenue or against loss of yield in a county resulting from natural causes of loss that cause the final county yield or the final county revenue to be less than the trigger yield or the trigger revenue.

(b) Failure to follow good farming practices, or planting or producing a crop using a practice that has not been widely recognized as used to establish the expected county yield, is not an insurable cause of loss under ARPI.

12. Triggers, Final Policy Protection, Payment Factor, and Indemnity Calculations

(a) Individual farm revenues and yields are not considered when calculating losses under ARPI. It is possible that your individual farm may experience reduced revenue or reduced yield and you do not receive an indemnity under ARPI.

(b) To calculate the trigger revenue:

(1) For Area Revenue Protection, multiply the expected county yield by the greater of the projected or harvest price and by the coverage level.

(2) For Area Revenue Protection with the Harvest Price Exclusion, multiply the expected county yield by the projected price and by the coverage level.

(c) To calculate the Trigger Yield for Area Yield Protection, multiply the expected county yield by the coverage level.

(d) If the harvest price cannot be calculated for the current crop year under the provisions contained in the CEPP:

(1) Revenue protection will continue to be available; and

(2) The harvest price will be determined and announced by FCIC.

(e) The final policy protection for:

(1) Area Revenue Protection is calculated by:

(i) Multiplying the expected county yield by the greater of the harvest price or the projected price;

(ii) Multiplying the result of subparagraph (i) by your protection factor; and

(iii) Multiplying the result of subparagraph (ii) by your acres and by your share.

(2) Area Revenue Protection with the Harvest Price Exclusion and Area Yield
Protection are equal to the policy protection and are calculated by:

(i) Multiplying the expected county yield by the projected price;

(ii) Multiplying the result of subparagraph (i) by your protection factor; and

(iii) Multiplying the result of subparagraph (ii) by your acres and by your share.

(f) An indemnity is due for:

(1) Area Revenue Protection and Area Revenue Protection with the Harvest Price Exclusion if the final county revenue is less than the trigger revenue.

(2) Area Yield Protection if the final county yield is less than the trigger yield.

(g) The payment factor is calculated for:

(1) Area Revenue Protection by:

(i) Subtracting the final county revenue from the trigger revenue to determine the amount of loss;

(ii) Multiplying the expected county yield by the greater of the projected or harvest price and by the loss limit factor;

(iii) Subtracting the result of subparagraph (ii) from the trigger revenue;

(iv) Dividing the result of subparagraph (i) by the result of subparagraph (iii) to obtain the payment factor.

(2) Area Revenue Protection with the Harvest Price Exclusion by:

(i) Subtracting the final county revenue from the trigger revenue to determine the amount of loss;

(ii) Multiplying the projected county yield by the projected price and by the loss limit factor;

(iii) Subtracting the result of subparagraph (ii) from the trigger revenue;

(iv) Dividing the result of subparagraph (i) by the result of subparagraph (iii) to obtain the payment factor.

(3) Area Yield Protection by:

(i) Subtracting the final county yield from the trigger yield to determine the amount of loss;

(ii) Multiplying the expected county yield by the loss limit factor;

(iii) Subtracting the result of subparagraph (ii) from the trigger yield;

(iv) Dividing the result of subparagraph (i) by the result of subparagraph (iii) to obtain the payment factor.

(h) Indemnities for all three ARPI plans of insurance are calculated by multiplying the final policy protection by the payment factor.

(1) Indemnities for all three ARPI plans of insurance are calculated following release of the final county yield and harvest price as specified in the Crop Provisions.

13. Indemnity and Premium Limitations

(a) With respect to acreage where you are due an indemnity for your first insured crop in the crop year, except in the case of double cropping described in section 13(c):

(1) You may elect to not plant or to plant and not insure a second crop on the same acreage for harvest in the same crop year and collect an indemnity payment that is equal to 100 percent of the insurable loss for the first insured crop; or

(2) You may elect to plant and insure a second crop on the same acreage for harvest in the same crop year (you will pay the full premium and if there is an insurable loss to the second crop, receive the full amount of indemnity that may be due for the second crop, regardless of whether there is a subsequent crop planted on the same acreage) and:

(i) Collect an indemnity payment that is 35 percent of the insurable loss for the first insured crop;

(ii) Be responsible for a premium that is 35 percent of the premium that you would otherwise owe for the first insured crop; and

(iii) If the second crop does not suffer an insurable loss:

(A) Collect an indemnity payment for the other 65 percent of insurable loss that was not previously paid under section 13(a)(2)(i); and

(B) Be responsible for the remainder of the premium for the first insured crop that you did not pay under section 13(a)(2)(ii).

(b) In lieu of the priority contained in the Agreement to Insure section, which states that the Crop Provisions have priority over the Basic Provisions, the reduction in the amount of
indemnity and premium specified in section 13(a) of these Basic Provisions, as applicable, will apply to any premium owed or indemnity paid in accordance with the Crop Provisions, and any applicable endorsement. This will apply:

(1) Even if another person plants the second crop on any acreage where the first insured crop was planted; or
(2) If you fail to provide any records we require to determine whether an insurable loss occurred for the second crop.

(c) You may receive a full indemnity for a first insured crop when a second crop is planted on the same acreage in the same crop year, regardless of whether or not the second crop is insured or sustains an insurable loss, if each of the following conditions are met:

(1) It is a practice that is generally recognized by agricultural experts or organic agricultural experts for the area to plant two or more crops for harvest in the same crop year;
(2) The second or more crops are customarily planted after the first insured crop for harvest on the same acreage in the same crop year in the area;
(3) Additional coverage insurance offered under the authority of the Act is available in the county on the two or more crops that are double cropped; and
(4) You provide records acceptable to us of acreage and production that show you have double cropped acreage in at least two of the last four crop years in which the first insured crop was planted, or that show the applicable acreage was double cropped in at least two of the last four crop years in which the first insured crop was grown on it.

(d) The receipt of a full indemnity on both crops that are double cropped is limited to the number of acres for which you can demonstrate you have double cropped or that have been historically double cropped as specified in section 13(c).

(e) If any Federal or State agency requires destruction of any insured crop or crop production, as applicable, because it contains levels of a substance, or has a condition, that is injurious to human or animal health in excess of the maximum amounts allowed by the Food and Drug Administration, other public health organizations of the United States or an agency of the applicable State, you must destroy the insured crop or crop production, as applicable, and certify that such insured crop or crop production has been destroyed prior to receiving an indemnity payment. Failure to destroy the insured crop or crop production, as applicable, will result in you having to repay any indemnity paid and you may be subject to administrative sanctions in accordance with section 515(h) of the Act and 7 CFR part 400, subpart R, and any applicable civil or criminal sanctions.

14. Organic Farming Practices

(a) Insurance will be provided for a crop grown using an organic farming practice for only those acres of the crop that meet the requirements for an organic crop on the acreage reporting date.

(b) If an organic type or practice is shown on the actuarial documents, the projected price, dollar amount of insurance, policy protection, premium rate, etc., for such organic crop, type and practice will be used unless otherwise
specified in the actuarial documents. If an organic type or practice is not shown on the actuarial documents, the projected price, dollar amount of insurance, policy protection, premium rate, etc., for the non-organic crop, type and practice will be used.

(c) If insurance is provided for an organic farming practice as specified in section 14(a) and (b), only the following acreage will be insured under such practice:

(1) Certified organic acreage;
(2) Transitional acreage being converted to certified organic acreage in accordance with an organic plan; and
(3) Buffer zone acreage.

(d) On the date you report your acreage, you must have:

(1) For certified organic acreage, a written certification in effect from a certifying agent indicating the name of the entity certified, effective date of certification, certificate number, types of commodities certified, and name and address of the certifying agent (A certificate issued to a tenant may be used to qualify a landlord or other similar arrangement);
(2) For transitional acreage, a certificate as described in section 14(d)(1), or written documentation from a certifying agent indicating an organic plan is in effect for the acreage; and
(3) Records from the certifying agent showing the specific location of each field of certified organic, transitional, buffer zone, and acreage not maintained under organic management.

15. Yields

(a) The data source used for the county yields will be based on the best available data and will be specified in the actuarial documents.

(b) Except as otherwise provided in this section, the data source used to establish the expected county yield will be the data source used to establish the final county yield.

(c) If the data source used to establish the expected county yield is not able to provide credible data to establish the final county yield because the data is no longer available, credible, or reflect changes that may have occurred after the yield was established:

(1) FCIC will determine the final county yield based on the most accurate data available from subsection (g), as determined by FCIC; or
(2) To the extent that practices used during the crop year change from those upon which the expected county yield is based, the final county yield may be adjusted to reflect the yield that would have resulted but for the change in practice. For example, if the county is traditionally 90 percent irrigated and 10 percent non-irrigated, but this year the county is now 50 percent irrigated and 50 percent non-irrigated, the final county yield will be adjusted, to an amount as if the county had 90 percent irrigated acreage.

(d) If the final county yield is established from a data source other than that used to establish the expected county yield, FCIC will provide notice of the data source and the reason for the change at the time the final county yield is published.

(e) If yields are based on NASS data, the final county yield will be the most current NASS yield at the time FCIC determines the yield in accordance with the payment dates section of the applicable Crop Provisions.

(f) The final county yield determined by FCIC is considered final for the purposes of establishing whether an indemnity is due and will not be revised for any reason.

(g) Yields used under this insurance program for a crop, may be based on:

(1) Data collected by NASS, if elected by FCIC, regardless of whether such data is published or unpublished; or
(2) Crop insurance data, other USDA data, or other data sources, if elected by FCIC.

16. Assignment of Indemnity

(a) You may assign your right to an indemnity for the crop year only to creditors or other persons to whom you have a financial debt or other pecuniary obligation. You may be required to provide proof of the debt or other pecuniary obligation before we will accept the assignment of indemnity.

(b) All assignments must be on our form and must be provided to us. Each assignment form may contain more than one creditor or other person to whom you have a financial debt or other pecuniary obligation.
Federal Crop Insurance Corporation, USDA § 407.9

(c) Unless you have provided us with a properly executed assignment of indemnity, we will not make any payment to a lienholder or other person to whom you have a financial debt or other pecuniary obligation even if you may have a lien or other assignment recorded elsewhere. Under no circumstances will we be liable:

(1) To any lienholder or other person to whom you have a financial debt or other pecuniary obligation where you have failed to include such lienholder or person on a properly executed assignment of indemnity provided to us; or

(2) To pay to all lienholders or other persons to whom you have a financial debt or other pecuniary obligation any amount greater than the total amount of indemnity owed under the policy.

(d) If we have received the properly executed assignment of indemnity form:

(1) Only one payment will be issued jointly in the names of all assignees and you; and

(2) Any assignee will have the right to submit all notices and forms as required by the policy.

17. Transfer of Coverage and Right to Indemnity

If you transfer any part of your share during the crop year, you may transfer your coverage rights, if the transferee is eligible for crop insurance.

(a) We will not be liable for any more than the liability determined in accordance with your policy that existed before the transfer occurred.

(b) The transfer of coverage rights must be on our form and will not be effective until approved by us in writing.

(c) Both you and the transferee are jointly and severally liable for the payment of the premium and administrative fees.

(d) The transferee has all rights and responsibilities under this policy consistent with the transferee’s interest.

18. Other Insurance

(a) Nothing in this section prevents you from obtaining other insurance not authorized under the Act. However, unless specifically required by policy provisions, you must not obtain any other crop insurance authorized under the Act on your share of the insured crop.

(b) If you cannot demonstrate that you did not intend to have more than one policy in effect, you may be subject to the consequences authorized under this policy, the Act, or any other applicable statute.

(c) If you can demonstrate that you did not intend to have more than one policy in effect (for example, an application to transfer your policy or written notification to an insurance provider that states you want to purchase, or transfer, insurance and you want any other policies for the crop canceled would demonstrate you did not intend to have duplicate policies) and:

(1) One is an additional coverage policy and the other is a CAT policy:

(i) The additional coverage policy will apply if both policies are with the same insurance provider or, if not, both insurance providers agree; or

(ii) The policy with the earliest date of application will be in force if both insurance providers do not agree; or

(2) Both are additional coverage policies or both are CAT policies, the policy with the earliest date of application will be in force and the other policy will be void, unless both policies are with:

(i) The same insurance provider and the insurance provider agrees otherwise; or

(ii) Different insurance providers and both insurance providers agree otherwise.

19. Crops as Payment

You must not abandon any crop to us. We will not accept any crop as compensation for payments due us.

20. Notices

(a) All notices required to be given by you must be in writing and received by your crop insurance agent within the designated time unless otherwise provided by the notice requirement.

(1) Notices required to be given immediately may be by telephone or in person and confirmed in writing.

(2) The time the notice is provided will be determined by the time of our receipt of the written notice.

(3) If the date by which you are required to submit a report or notice
falls on Saturday, Sunday, or a Federal holiday, or if your agent’s office is, for any reason, not open for business on the date you are required to submit such notice or report, such notice or report must be submitted on the next business day.

(b) All policy provisions, notices, and communications required to be sent by us to you will be:
   (1) Provided by electronic means, unless:
      (i) We do not have the ability to transmit such information to you by electronic means; or
      (ii) You elect to receive a paper copy of such information;
   (2) Sent to the location specified in your records with your crop insurance agent; and
   (3) Will be conclusively presumed to have been received by you.

21. Access to Insured Crop and Records, and Record Retention
   (a) We, and any employee of USDA authorized to investigate or review any matter relating to crop insurance (authorized employee of USDA), have the right to examine the insured crop and all records related to the insured crop and this policy, and any mediation, arbitration or litigation involving the insured crop as often as reasonably required during the record retention period.
   (b) You must retain, and provide upon our request, or the request of any authorized employee of USDA, complete records pertaining to the planting, acres, share, replanting, inputs, production, harvesting and disposition of the insured crop for a period of three years after the end of the crop year or three years after the date of final payment of indemnity, whichever is later. This requirement also applies to all such records for acreage that is not insured.
   (c) We, or any authorized employee of USDA, may extend the record retention period beyond three years by notifying you of such extension in writing.
   (d) By signing the application for insurance authorized under the Act or by continuing insurance for which you have previously applied, you authorize us or USDA, or any person acting for us or USDA authorized to investigate or review any matter relating to crop insurance, to obtain records relating to the planting, acres, share, replanting, inputs, production, harvesting, and disposition of the insured crop from any person who may have custody of such records, including but not limited to, FSA offices, banks, warehouses, gins, cooperatives, marketing associations, and accountants. You must assist in obtaining all records we or any authorized employee of USDA request from third parties.
   (e) Failure to provide access to the insured crop or the farm, authorize access to the records maintained by third parties, or assist in obtaining all such records will result in a determination that no indemnity is due for the crop year in which such failure occurred.

22. Amounts Due Us
   (a) Any amount illegally or erroneously paid to you or that is owed to us but is delinquent may be recovered by us through offset by deducting it from any loan or payment due you under any Act of Congress or program administered by any United States Government Agency, or by other collection action.
   (b) Interest will accrue at the rate of 1.25 percent simple interest per calendar month, or any part thereof, on any unpaid premium amount or administrative fee due us. With respect to any premiums or administrative fees owed, interest will start to accrue on the first day of the month following the premium billing date specified in the actuarial documents, provided a minimum of 30 days have passed from the premium billing date.
   (c) For the purpose of any other amounts due us, such as repayment of indemnities found not to have been earned:
      (1) Interest will start on the date that notice is issued to you for the collection of the unearned amount;
      (2) Amounts found due under this paragraph will not be charged interest if payment is made within 30 days of issuance of the notice by us;
      (3) The amount will be considered delinquent if not paid within 30 days of the date the notice is issued by us;
(4) Penalties and interest will be charged in accordance with 31 U.S.C. 3717 and 4 CFR part 102; and
(5) The penalty for accounts more than 90 days delinquent is an additional 6 percent per annum.

(d) Interest on any amount due us found to have been received by you because of fraud, misrepresentation or presentation by you of a false claim will start on the date you received the amount with the additional 6 percent penalty beginning on the 31st day after the notice of amount due is issued to you. This interest is in addition to any other amount found to be due under any other federal criminal or civil statute.

(e) If we determine that it is necessary to contract with a collection agency, refer the debt to government collection centers, the Department of Treasury Offset Program, or to employ an attorney to assist in collection, you agree to pay all the expenses of collection.

(f) All amounts paid will be applied first to expenses of collection if any, second to the reduction of any penalties which may have been assessed, then to reduction of accrued interest, and finally to reduction of the principal balance.

[Reinsured policies]

22. Amounts Due Us
(a) Interest will accrue at the rate of 1.25 percent simple interest per calendar month, or any portion thereof, on any unpaid amount owed to us or on any unpaid administrative fees owed to FCIC.
(1) For the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the premium billing date specified in the actuarial documents, provided a minimum of 30 days have passed from the premium billing date.
(2) We will collect any unpaid amounts owed to us and any interest owed thereon and, prior to the termination date, we will collect any administrative fees and interest owed thereon to FCIC. After the termination date, FCIC will collect any unpaid administrative fees and any interest owed thereon for any CAT policy and we will collect any unpaid administrative fees and any interest owed thereon for additional coverage policies.
(b) For the purpose of any other amounts due us, such as repayment of indemnities found not to have been earned, interest will start to accrue on the date that notice is issued to you for the collection of the unearned amount.
(1) Amounts found due under this paragraph will not be charged interest if payment is made within 30 days of issuance of the notice by us.
(2) The amount will be considered delinquent if not paid within 30 days of the date the notice is issued by us.
(c) All amounts paid will be applied first to expenses of collection (see subsection (d) of this section), if any, second to the reduction of accrued interest, and then to the reduction of the principal balance.
(d) If we determine that it is necessary to contract with a collection agency or to employ an attorney to assist in collection, you agree to pay all of the expenses of collection.
(e) The portion of the amounts owed by you for a policy authorized under the Act that are owed to FCIC may be collected in part through administrative offset from payments you receive from United States government agencies in accordance with 31 U.S.C. chapter 37. Such amounts include all administrative fees, and the share of the overpaid indemnities and premiums retained by FCIC plus any interest owed thereon.

[FCIC Policies]

23. Appeal, Reconsideration, and Administrative and Judicial Review
(a) All determinations required by the policy will be made by us. All expected county yields and final county yields are calculated by us in accordance with section 15. However, calculations of expected county yields and final county yields are matters of general applicability.
(1) Any matter of general applicability is not subject to appeal under 7 CFR part 400, subpart J or 7 CFR part 11.
(2) Your only remedy is judicial review but if you want to seek judicial review of any determination by us that is a matter of general applicability,
(a) All expected county yields and final county yields are calculated by FCIC in accordance with section 15. However, calculations of expected county yields and final county yields are matters of general applicability.

(1) Any matter of general applicability is not subject to appeal under 7 CFR part 400, subpart J or 7 CFR part 11.

(2) Your only remedy is judicial review but if you want to seek judicial review of any FCIC determination that is a matter of general applicability, you must request a determination of non-appealability from the Director of the National Appeals Division in accordance with 7 CFR 11.6 before seeking judicial review.

(3) The timeframe to request a determination of non-appealability from the Director of the National Appeals Division is not later than 30 days after the date the yields are published on RMA’s Web site.

(b) With respect to good farming practices:

(1) We will make preliminary decisions regarding what constitutes a good farming practice.

(2) If you disagree with our decision of what constitutes a good farming practice, you must request a determination from FCIC of what constitutes a good farming practice.

(3) If you do not agree with any determination made by FCIC regarding what constitutes a good farming practice:

   (i) You may request reconsideration by FCIC of this determination in accordance with the reconsideration process established for this purpose and published at 7 CFR part 400, subpart J; or

   (ii) You may file suit against FCIC as follows:

   (A) You are not required to request reconsideration from FCIC before filing suit;

   (B) Any suit must be brought against FCIC in the United States district court for the district in which the insured acreage is located; and

   (C) Suit must be filed against FCIC not later than one year after the date:
(1) Of the determination made by FCIC regarding what constitutes a good farming practice; or
(2) Reconsideration is completed, if reconsideration was requested under section 23(b)(2)(i).
(c) If you elect to bring suit against FCIC after seeking a Director’s Review in accordance with section 23(a), such suit must be filed against FCIC in the United States district court for the district in which the insured acreage is located not later than one year after the date of the decision rendered by the Director. Under no circumstances can you recover any punitive, compensatory or any other damages from FCIC.
(d) With respect to any other determination under this policy:
(1) If you and we fail to agree on any determination not covered by sections 23(a) and (c), the disagreement may be resolved through mediation. To resolve any dispute through mediation, you and we must both:
(i) Agree to mediate the dispute;
(ii) Agree on a mediator; and
(iii) Be present or have a designated representative who has authority to settle the case present, at the mediation.
(2) If resolution cannot be reached through mediation, or you and we do not agree to mediation, the disagreement must be resolved through arbitration in accordance with the rules of the American Arbitration Association (AAA), unless otherwise stated in this subsection or rules are established by FCIC for this purpose. Any mediator or arbitrator with a familial, financial or other business relationship to you or us, or our agent or loss adjuster, is disqualified from hearing the dispute.
(3) If the dispute in any way involves a policy or procedure interpretation, regarding whether a specific policy provision or procedure is applicable to the situation, how it is applicable, or the meaning of any policy provision or procedure, either you or we must obtain an interpretation from FCIC in accordance with 7 CFR part 400, subpart X or such other procedures as established by FCIC.
(i) Any interpretation by FCIC will be binding in any mediation or arbitration.
(ii) Failure to obtain any required interpretation from FCIC will result in the nullification of any agreement or award.
(iii) An interpretation by FCIC of a policy provision is considered a determination that is a matter of general applicability. However, before such interpretation may be challenged in the courts, you must request a determination of non-appealability from the Director of the National Appeals Division not later than 30 days after the date the interpretation was published on RMA’s Web site.
(4) Unless the dispute is resolved through mediation, the arbitrator must provide to you and us a written statement describing the issues in dispute, the factual findings, the determinations and the amount and basis for any award and breakdown by claim for any award.
(i) The statement must also include any amounts awarded for interest.
(ii) Failure of the arbitrator to provide such written statement will result in the nullification of all determinations of the arbitrator.
(iii) All agreements reached through settlement, including those resulting from mediation, must be in writing and contain at a minimum a statement of the issues in dispute and the amount of the settlement.
(5) Regardless of whether mediation is elected:
(i) The initiation of arbitration proceedings must occur within one year of the date we denied your claim or rendered the determination with which you disagree, whichever is later;
(ii) If you fail to initiate arbitration in accordance with section 23(d)(5)(i) and complete the process, you will not be able to resolve the dispute through judicial review;
(iii) If arbitration has been initiated in accordance with section 23(d)(5)(i) and completed, and judicial review is sought, suit must be filed not later than one year after the date the arbitration decision was rendered; and
(iv) In any suit, if the dispute in any way involves a policy or procedure interpretation, regarding whether a specific policy provision or procedure is applicable to the situation, how it is
applicable, or the meaning of any policy provision or procedure, an interpretation must be obtained from FCIC in accordance with 7 CFR part 400, subpart X or such other procedures as established by FCIC. Such interpretation will be binding on all parties.

(6) Any decision rendered in arbitration is binding on you and us unless judicial review is sought in accordance with section 23(d)(3)(i). Notwithstanding any provision in the rules of the AAA, you and we have the right to judicial review of any decision rendered in arbitration.

(e) In any mediation, arbitration, appeal, administrative review, reconsideration or judicial process, the terms of this policy, the Act, and the regulations published at 7 CFR chapter IV, including the provisions of 7 CFR part 400, subpart P, are binding. Conflicts between this policy and any state or local laws will be resolved in accordance with section 27. If there are conflicts between any rules of the AAA and the provisions of your policy, the provisions of your policy will control.

(f) Except as provided in section 23(g), no award or settlement in mediation, arbitration, appeal, administrative review or reconsideration process or judicial review can exceed the amount of liability established or which should have been established under the policy, except for interest awarded in accordance with section 24.

§407.9

24. Interest Limitations

We will pay simple interest computed on the net indemnity ultimately found to be due by us or by a final judgment of a court of competent jurisdiction, from and including the 61st day after the final county yield or final county revenue release date as specified in the applicable Crop Provision.

(a) Interest will be paid only if the reason for our failure to timely pay is not due to your failure to provide information or other material necessary for the computation or payment of the indemnity.

(b) The interest rate will be that established by the Secretary of the Treasury under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611) and published in the Federal Register semiannually on or about January 1 and July 1 of each year, and may vary with each publication.

25. Descriptive Headings

The descriptive headings of the various policy provisions are formulated for convenience only and are not intended to affect the construction or meaning of any of the policy provisions.

26. Conformity to Food Security Act

Although your violation of a number of federal statutes, including the Act, may cause cancellation, termination, or voidance of your insurance contract, you should be specifically aware that your policy will be canceled if you are determined to be ineligible to receive benefits under the Act due to violation of the controlled substance provisions (title XVII) of the Food Security Act of 1985 (Pub. L. 99-198) and the regulations promulgated under the Act by USDA.

(a) Your insurance policy will be canceled if you are determined, by the appropriate Agency, to be in violation of these provisions.

(b) We will recover any and all monies paid to you or received by you during your period of ineligibility, and your premium will be refunded, less an amount for expenses and handling equal to 20 percent of the premium paid or to be paid by you.

27. Applicability of State and Local Statutes

If the provisions of this policy conflict with statutes of the State or locality in which this policy is issued,
28. Concealment, Misrepresentation, or Fraud

(a) If you have falsely or fraudulently concealed the fact that you are ineligible to receive benefits under the Act or if you or anyone assisting you has intentionally concealed or misrepresented any material fact relating to this policy:
   (1) This policy will be voided; and
   (2) You may be subject to remedial sanctions in accordance with 7 CFR part 400, subpart R.

(b) Even though the policy is void, you will still be required to pay 20 percent of the premium that you would otherwise be required to pay to offset costs incurred by us in the service of this policy. If previously paid, the balance of the premium will be returned.

(c) Voidance of this policy will result in you having to reimburse all indemnities paid for the crop year in which the voidance was effective.

(d) Voidance will be effective on the first day of the insurance period for the crop year in which the act occurred and will not affect the policy for subsequent crop years unless a violation of this section also occurred in such crop years.

(e) If you willfully and intentionally provide false or inaccurate information to us or FCIC, or you fail to comply with a requirement of FCIC, in accordance with 7 CFR part 400, subpart R, FCIC may impose on you:
   (1) A civil fine for each violation in an amount not to exceed the greater of:
      (i) The amount of the pecuniary gain obtained as a result of the false or inaccurate information provided or the noncompliance with a requirement of this title; or
      (ii) $10,000; and
   (2) A disqualification for a period of up to 5 years from receiving any monetary or nonmonetary benefit provided under each of the following:
      (i) Any crop insurance policy offered under the Act;
      (iv) The Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.);
      (v) The Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 et seq.);
      (vi) Title XII of the Food Security Act of 1985 (16 U.S.C. 3801 et seq.);
      (vii) The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.); and
      (viii) Any federal law that provides assistance to a producer of a commodity affected by a crop loss or a decline in the prices of commodities.

29. Multiple Benefits

(a) If you are eligible to receive an indemnity under an additional coverage plan of insurance and are also eligible to receive benefits for the same loss under any other USDA program, you may receive benefits under both programs, unless specifically limited by the crop insurance contract or by law.

(b) Any amount received for the same loss from any USDA program, in addition to the crop insurance payment, will not exceed the difference between the crop insurance payment and the amount of the loss, unless otherwise provided by law. The amount of loss is the difference between the total value of the insured crop before the loss and the total value of the insured crop after the loss.

(c) FSA or another USDA agency, as applicable, will determine and pay the additional amount due you for any applicable USDA program, after first considering the amount of any crop insurance indemnity.

30. Examples

The following are examples of the calculation of the premium, amount of insurance and indemnity for each of the three plans of insurance under ARPI. Your information will likely be different and you should consult the actuarial documents in your county and the policy information. The following facts are for illustration purposes only and apply to each of the examples.
§ 407.9

Producer A farms 100 acres in county X and has a 100 percent share, or 1.000, in those acres. From the actuarial documents in county X, Producer A elects the 75 percent coverage level and a protection factor of 110 percent or 1.10. The actuarial documents in county X also show that the expected county yield is 141.4 bushels per acre, the projected price is $4.00, and the expected county revenue is $565.60. The subsidy factor for the 75 percent coverage level is .55 for revenue coverage and .59 for yield coverage. The loss limit factor is 18 percent or .18. At the end of the insurance period, for county X, FCIC releases a harvest price of $4.57 and a final county yield for county X of 75.0 bushels.

The premium rate is based on the published volatility factor and for this example is .0166 for Area Revenue Protection, .0146 for Area Revenue Protection with Harvest Price Exclusion, and .0116 for Area Yield Protection.

Area Revenue Protection example:

Step 1: Calculate the Dollar Amount of Insurance per Acre
Formula: Expected county yield times projected price times protection factor equals dollar amount of insurance 141.4 bushels x $4.00 x 1.10 = $622.16 dollar amount of insurance per acre

Step 2: Calculate the Policy Protection
Formula: Dollar amount of insurance per acre times acres times share equals policy protection $622.16 x 100.0 x 1.000 = $62,216 policy protection

Step 3: Calculate the Total Premium
Formula: Policy protection times premium rate equals total premium $62,216 x .0166 = $1,033 total premium

Step 4: Calculate the Subsidy amount
Formula: Total premium times subsidy factor equals subsidy $1,033 x .55 = $568 subsidy

Step 5: Calculate the Producer Premium
Formula: Total premium minus subsidy equals producer premium $1,033 - $568 = $465 producer premium

Step 6: Calculate the Final Policy Protection
Formula: Expected county yield times (greater of projected price or harvest price) times protection factor times acres times share equals Final Policy Protection 141.4 bushels x $4.57 x 1.10 x 100.0 x 1.000 = $71,082 final policy protection

Step 7: Calculate the Final County Revenue
Formula: Final county yield times harvest price equals final county revenue 75.0 bushels x $4.57 = $342.75 final county revenue

Step 8: Calculate the Trigger Revenue
Formula: Expected county yield times (greater of projected price or harvest price) times coverage level equals trigger revenue 141.4 bushels x $4.57 x .75 = $484.65 trigger revenue

Step 9: Calculate the Payment Factor
Formula: (Trigger revenue minus final county revenue) divided by (trigger revenue minus (expected county yield times the greater of projected or harvest price times loss limit factor)) equals payment factor $(484.65 - 342.75) / (484.65-(141.4 x $4.57 x .18)) = .385 payment factor

Step 10: Calculate the Indemnity
Formula: Final policy protection times payment factor equals indemnity $71,082 x .385 = $27,367 indemnity

Area Revenue Protection with Harvest Price Exclusion example:

Step 1: Calculate the Dollar Amount of Insurance per Acre
Formula: Expected county yield times projected price times protection factor equals dollar amount of insurance 141.4 bushels x $4.00 x 1.10 = $622.16 dollar amount of insurance per acre

Step 2: Calculate the Policy Protection
Formula: Dollar amount of insurance per acre times acres times share equals policy protection $622.16 x 100.0 x 1.000 = $62,216 policy protection

Step 5: Calculate the Producer Premium
Formula: Total premium minus subsidy equals producer premium $1,033 - $568 = $465 producer premium

Step 6: Calculate the Final Policy Protection
Formula: Expected county yield times (greater of projected price or harvest price) times protection factor times acres times share equals Final Policy Protection 141.4 bushels x $4.57 x 1.10 x 100.0 x 1.000 = $71,082 final policy protection

Step 7: Calculate the Final County Revenue
Formula: Final county yield times harvest price equals final county revenue 75.0 bushels x $4.57 = $342.75 final county revenue

Step 8: Calculate the Trigger Revenue
Formula: Expected county yield times (greater of projected price or harvest price) times coverage level equals trigger revenue 141.4 bushels x $4.57 x .75 = $484.65 trigger revenue

Step 9: Calculate the Payment Factor
Formula: (Trigger revenue minus final county revenue) divided by (trigger revenue minus (expected county yield times the greater of projected or harvest price times loss limit factor)) equals payment factor $(484.65 - 342.75) / (484.65-(141.4 x $4.57 x .18)) = .385 payment factor

Step 10: Calculate the Indemnity
Formula: Final policy protection times payment factor equals indemnity $71,082 x .385 = $27,367 indemnity

Area Revenue Protection with Harvest Price Exclusion example:
Federal Crop Insurance Corporation, USDA \(\S 407.9\)

Step 3: Calculate the Total Premium

Formula: Policy protection times rate equals total premium

\[ \$62,216 \times .0146 \text{ rate} = \$908 \text{ total premium} \]

Step 4: Calculate the Subsidy Amount

Formula: Total premium times subsidy factor equals subsidy

\[ \$908 \times .55 = \$499 \text{ subsidy} \]

Step 5: Calculate the Producer Premium

Formula: Total premium minus subsidy equals producer premium

\[ \$908 - \$499 = \$409 \text{ producer premium} \]

Step 6: Calculate the Final Policy Protection

Use the policy protection amount calculated at the beginning of the insurance period in Step 2

\[ \$62,216 \text{ policy protection} \]

Step 7: Calculate the Final County Revenue

Formula: Final county yield times harvest price equals final county revenue

75.0 bushels \(\times\) \$4.57 = \$342.75 final county revenue

Step 8: Calculate the Trigger Revenue

Formula: Expected county yield times projected price times coverage level equals trigger revenue

141.4 bushels \(\times\) \$4.00 \(\times\) .75 = \$424.20 trigger revenue

Step 9: Calculate the Payment Factor

Formula: (Trigger revenue minus final county revenue) divided by (trigger revenue minus (expected county yield times loss limit factor)) equals payment factor

\[ \frac{\$424.20 - \$342.75}{\$424.20 - (141.4 \times \$4.00 \times .18)} = .253 \]

Step 10: Calculate the Indemnity

Formula: Final policy protection times payment factor equals indemnity

\[ \$62,216 \times .253 = \$15741 \text{ indemnity} \]

Step 1: Calculate the Dollar Amount of Insurance per Acre

Formula: Expected county yield times projected price times protection factor equals dollar amount of insurance per acre

141.4 bushels \(\times\) \$4.00 \(\times\) 1.10 = \$622.16 dollar amount of insurance per acre

Step 2: Calculate the Policy Protection

Formula: Dollar amount of insurance per acre times acres times share = policy protection

\[ \$622.16 \times 100.0 \times 1.00 = \$62,216 \text{ policy protection} \]

Step 3: Calculate the Total Premium

Formula: policy protection times premium rate equals total premium

\[ \$62,216 \times .0116 \text{ rate} = \$722 \text{ total premium} \]

Step 4: Calculate the Subsidy amount

Formula: Total premium times subsidy factor equals subsidy

\[ \$722 \times .59 \text{ subsidy factor} = \$426 \text{ subsidy} \]

Step 5: Calculate the Producer Premium

Formula: Total premium minus subsidy equals producer premium

\[ \$722 - \$426 = \$296 \text{ producer premium} \]

Step 6: Calculate the Final Policy Protection

Use the policy protection amount calculated at the beginning of the insurance period in Step 2

\[ \$62,216 \text{ policy protection} \]

Step 7: Calculate the Trigger Yield

Formula: Expected county yield times coverage level equals trigger yield

141.4 bushels \(\times\) .75 = 106.1 bushels

Step 8: Calculate the Payment Factor

Formula: (Trigger yield minus final county yield) divided by (trigger yield minus (expected county yield times loss limit factor)) equals payment factor

\[ \frac{106.1 \text{ bushels} - 75.0 \text{ bushels}}{106.1 \text{ bushels} - (141.4 \text{ bushels} \times .18)} = .386 \]
§ 407.10

Step 9: Calculate the Indemnity

Formula: Final policy protection times payment factor equals indemnity

\[
62,216 \times 0.386 = 24,015
\]

Indemnity

§ 407.10 Area risk protection insurance for barley.

The barley crop insurance provisions for Area Risk Protection Insurance for the 2014 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

FEDERAL CROP INSURANCE CORPORATION

Area Risk Protection Insurance

Barley Crop Insurance Provisions

1. Definitions

Harvest. Combining or threshing the barley for grain.

Planted acreage. In addition to the definition contained in the Area Risk Protection Insurance Basic Provisions, land on which seed is initially spread onto the soil surface by any method and which subsequently is mechanically incorporated into the soil in a timely manner and at the proper depth will also be considered planted.

2. Insured Crop

The insured crop will be all barley:

(a) Grown on insurable acreage in the county listed on the accepted application;

(b) Properly planted by the final planting date and reported on or before the acreage reporting date;

(c) Planted with the intent to be harvested;

(d) Not planted into an established grass or legume;

(e) Not interplanted with another crop; and

(f) Not planted as a nurse crop, unless seeded at the normal rate and intended for harvest as grain.

3. Payment Dates

(a) Unless otherwise specified in the Special Provisions the final county revenues and final county yields will be determined prior to April 1 following the crop year.

(b) If an indemnity is due, unless otherwise specified in the Special Provisions we will issue any payment to you prior to May 1 following the crop year and following the determination of the final county revenue or the final county yield, as applicable.

4. Program Dates

§ 407.11 Area risk protection insurance for corn.

The corn crop insurance provisions for Area Risk Protection Insurance for the 2014 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

FEDERAL CROP INSURANCE CORPORATION

Area Risk Protection Insurance

Corn Crop Insurance Provisions

1. Definitions

Harvest. Combining or picking corn for grain or cutting for hay, silage, fodder, or earlage.

Planted acreage. In addition to the definition contained in the Area Risk Protection Insurance Basic Provisions, corn seed that is broadcast and subsequently mechanically incorporated will not be considered planted.

2. Insured Crop

(a) The insured crop will be all field corn that is:

(1) Yellow dent or white corn, including mixed yellow and white, waxy or high-lysine corn, high-oil corn blends containing mixtures of at least 90 percent high yielding yellow dent female plants with high-oil male pollinator plants, or commercial varieties of high-protein hybrids.

(2) Grown on insurable acreage in the county listed on the accepted application;

(3) Properly planted by the final planting date and reported on or before the acreage reporting date;

(4) Planted with the intent to be harvested; and

(5) Not planted into an established grass or legume or interplanted with another crop.

(b) Corn other than that specified in section 2(a)(1) including but not limited to high-amylose, high-oil or high-protein (except as authorized in section 2(a)(1)), flint, flour, hybrid seed corn, Indian, or blue corn, or a variety genetically adapted to provide forage for wildlife or any other open pollinated corn may be insurable under this policy if specified in the Special Provisions:

(1) The insurability requirements in 2(a) apply to this other corn and additional requirements for insurability may be stated for this other corn in the Special Provisions; and

(2) This other corn will be insured using the yields, rates, and prices for field corn unless otherwise specified in the actuarial documents.

3. Payment Dates

(a) Unless otherwise specified in the Special Provisions the final county revenues and final county yields will be determined prior to April 16 following the crop year.

(b) If an indemnity is due, unless otherwise specified in the Special Provisions we will issue any payment to you prior to May 16 following the crop year and following the determination of the final county revenue or the final county yield, as applicable.

§ 407.12 Area risk protection insurance for cotton.

The cotton crop insurance provisions for Area Risk Protection Insurance for the 2014 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

FEDERAL CROP INSURANCE CORPORATION

Area Risk Protection Insurance

Cotton Crop Insurance Provisions

1. Definitions

Harvest. Removal of the seed cotton from the stalk.

Planted acreage. In addition to the definition contained in the Area Risk Protection Insurance Basic Provisions, cotton seed broadcast and subsequently mechanically incorporated will not be considered planted.

2. Insured Crop

(a) The insured crop will be all upland cotton:

(1) Grown on insurable acreage in the county listed on the accepted application;

(2) Properly planted by the final planting date and reported on or before the acreage reporting date;

(3) Planted with the intent to be harvested.

(b) That is not (unless allowed by the Special Provisions):

(1) Colored cotton lint;

(2) Planted into an established grass or legume;

(3) Interplanted with another spring planted crop;

(4) Grown on acreage in which a hay crop was harvested in the same calendar year unless the acreage is irrigated;

(5) Grown on acreage on which a small grain crop reached the heading stage in the same calendar year unless the acreage is irrigated or adequate measures are taken to terminate the small grain crop prior to heading and less than 50 percent of the small grain plants reach the heading stage.

(c) Cotton other than upland cotton may be insurable under this policy if specified in the Special Provisions:

(1) The insurability requirements in 2(a) apply to other cotton and additional requirements for insurability may be stated for other cotton in the Special Provisions; and

(2) Other cotton will be insured using the yields, rates, and prices for cotton unless otherwise specified in the actuarial documents.

3. Payment Dates

(a) Unless otherwise specified in the Special Provisions the final county revenues and final county yields will be determined prior to July 16 following the crop year.

(b) If an indemnity is due, unless otherwise specified in the Special Provisions we will issue any payment to you prior to August 15 following the crop year and following the determination of the final county revenue or the final county yield, as applicable.

§ 407.13 Area risk protection insurance for forage.

The forage crop insurance provisions for Area Risk Protection Insurance for the 2014 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

FEDERAL CROP INSURANCE CORPORATION

Area Risk Protection Insurance

Forage Crop Insurance Provisions

1. Definitions

Forage. Planted perennial alfalfa, perennial red clover, perennial grasses, or a mixture thereof, or other species as shown in the actuarial documents.

Harvest. Removal of the forage from the field, and rotational grazing.

Rotational grazing. The defoliation of the insured forage by livestock, within a pasturing system whereby the forage field is subdivided into smaller parcels and livestock are moved from one area to another, allowing a period for grazing followed by a period for forage regrowth.

2. Insured Crop

The insured crop will be the forage types shown on the actuarial documents:

(a) Grown on insurable acreage in the county listed on the accepted application;
(b) Properly planted by the final planting date and reported on or before the acreage reporting date;
(c) Intended for harvest; and
(d) Not grown with another crop.

3. Insurable Acreage

In addition to section 5 of the Area Risk Protection Insurance Basic Provisions, acreage seeded to forage after July 1 of the previous crop year will not be insurable.

4. Payment Dates

(a) Unless otherwise specified in the Special Provisions the final county yields will be determined prior to May 1 following the crop year.
(b) If an indemnity is due, unless otherwise specified in the Special Provisions we will issue any payment to you prior to May 31 following the crop year and following the determination of the final county yield.

5. Program Dates

November 30 is the cancellation and termination date for all states, or as specified in the Special Provisions. The contract change date is August 31 for all states, or as specified in the Special Provisions.

6. Annual Premium

In lieu of section 7(e) of the Area Risk Protection Insurance Basic Provisions, the annual premium is earned and payable on the acreage reporting date. You will be billed for premium due on the date shown in the actuarial documents. The premium will be determined based on the rate shown on the actuarial documents.

§ 407.14 Area risk protection insurance for peanuts

The peanut crop insurance provisions for Area Risk Protection Insurance for the 2014 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

FEDERAL CROP INSURANCE CORPORATION

Area Risk Protection Insurance

Peanut Crop Insurance Provisions

1. Definitions

Harvest. The completion of digging and threshing and removal of peanuts from the field.

Planted acreage. In addition to the definition contained in the Area Risk Protection Insurance Basic Provisions, peanuts must initially be planted in a row pattern which permits mechanical cultivation, or that allows the peanuts to be cared for in a manner recognized by agricultural experts as a good farming practice. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions.
2. Insured Crop

(a) The insured crop will be all peanuts:
   (1) Grown on insurable acreage in the county listed on the accepted application;
   (2) Properly planted by the final planting date and reported on or before the acreage reporting date;
   (3) Planted with the intent to be harvested as peanuts; and
   (4) Not planted into an established grass or legume or interplanted with another crop.

3. Payment Dates

(a) Unless otherwise specified in the Special Provisions the final county revenues and or final county yields will be determined prior to June 16 following the crop year.

(b) If an indemnity is due, unless otherwise specified in the Special Provisions we will issue any payment to you prior to July 16 and following the determination of the final county revenue or the final county yield, as applicable.

The soybean crop insurance provisions for Area Risk Protection Insurance for the 2014 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE
FEDERAL CROP INSURANCE CORPORATION
Area Risk Protection Insurance
Soybean Crop Insurance Provisions

1. Definitions

Harvest. Combining or threshing the soybeans.

Planted acreage. In addition to the definition contained in the Area Risk Protection Insurance Basic Provisions, land on which seed is initially spread onto the soil surface by any method and which subsequently is mechanically incorporated into the soil in a timely manner and at the proper depth, will also be considered planted, unless specified otherwise in the Special Provisions.

2. Insured Crop

The insured crop will be all soybeans:
(a) Grown on insurable acreage in the county listed on the accepted application;
(b) Properly planted by the final planting date and reported on or before the acreage reporting date;
(c) Planted with the intent to be harvested; and
(d) Not planted into an established grass or legume or interplanted with another crop.

3. Payment Dates

(a) Unless otherwise specified in the Special Provisions final county revenue and final county yields will be determined prior to April 16 following the crop year.
(b) If an indemnity is due, unless otherwise specified in the Special Provisions we will issue any payment to you prior to May 16 following the crop year and following the determination of the final county revenue or the final county yield, as applicable.

PARTS 408-411 [RESERVED]

PART 412—PUBLIC INFORMATION—FREEDOM OF INFORMATION

Sec. 412.1 General statement.
412.2 Public inspection and copying.
412.3 Index.
412.4 Requests for records.
412.5 Appeals.
412.6 Timing of responses to requests.

§412.1 General statement.

This part is issued in accordance with the regulations of the Secretary of Agriculture published at 7 CFR 1.1-1.23, and appendix A, implementing the Freedom of Information Act (5 U.S.C. 552). The Secretary’s regulations, as implemented by this part, and the Risk Management Agency (RMA) govern availability of records of the Federal Crop Insurance Corporation (FCIC) as administration of the crop insurance program for FCIC.

§412.2 Public inspection and copying.

(a) Members of the public may request access to the information specified in §412.2(d) for inspection and copying.

(b) To obtain access to specified information, the public should submit a written request, in accordance with 7 CFR 1.6, to the Appeals, Litigation and Legal Liaison Staff, Risk Management Agency, United States Department of Agriculture, 1400 Independence Avenue, SW, STOP 0807, room 6618-S, Washington, DC 20250-0807, from 9:00 a.m.-4:00 p.m., EDT Monday through Friday, except holidays.

(c) When the information requested is not located at the office of the Appeals, Litigation and Legal Liaison Staff, the Appeals, Litigation and Legal Liaison Staff will direct the request to the appropriate office where the information can be obtained. The requester will be informed that the request has been forwarded to the appropriate office.

(d) FCIC will make available for inspection and copying unless otherwise exempt from publication under sections 552(a)(2)(C) and 552(b):

(1) Final opinions, including concurring and dissenting opinions and orders made in the adjudication of cases; and

(2) Those statements of policy and interpretations that have been adopted by FCIC and RMA and are not published in the FEDERAL REGISTER; and

(3) Administrative staff manuals and instructions to staff that affect a member of the public.

§412.3 Index.

5 U.S.C. 552(a)(2) requires that each agency publish, or otherwise make available, a current index of all materials available for public inspection and copying. RMA and FCIC will maintain a current index providing identifying information for the public as to any material issued, adopted, or promulgated by the Agency since July 4, 1967, and required by section 552(a)(2). Pursuant to the Freedom of Information Act provisions, RMA and FCIC have determined that in view of the small number of public requests for such index, publication of such an index would be unnecessary and impracticable. Copies of the index will be available upon request in person or by mail at the address stated in §412.2(b).

§412.4 Requests for records.

The Director of the Appeals, Litigation and Legal Liaison staff, RMA located at the above stated address, is
§ 412.5 Appeals.

Any person whose request under § 412.4 is denied shall have the right to appeal such denial. This appeal shall be submitted in accordance with 7 CFR 1.13 and addressed to the Manager, Federal Crop Insurance Corporation, United States Department of Agriculture, 1400 Independence Avenue, SW., STOP 0807, room 6618-S, Washington, DC 20250-0807.

§ 412.6 Timing of responses to requests.

(a) In general, FCIC will respond to requests according to their order of receipt.

(b) Existing responsive documents or information may be maintained in RMA’s field offices. Therefore, extra time may be necessary to search and collect the documents.

PARTS 413-456 [RESERVED]

PART 457—COMMON CROP INSURANCE REGULATIONS

Sec.
457.1 Applicability.
457.2 Availability of Federal crop insurance.
457.3 Premium rates, production guarantees or amounts of insurance, coverage levels, and prices at which indemnities shall be computed.
457.4 OMB control numbers.
457.5 Creditors.
457.6 [Reserved]
457.7 The contract.
457.8 The application and policy.
457.9 Appropriation contingency.
457.10-457.100 [Reserved]
457.101 Small grains crop insurance.
457.102 Wheat or barley winter coverage endorsement.
457.103 [Reserved]
457.104 Cotton crop insurance provisions.
457.105 Extra long staple cotton crop insurance provisions.
457.106 Texas citrus tree crop insurance provisions.
457.107 Florida citrus fruit crop insurance provisions.
457.108 Sunflower seed crop insurance provisions.
457.109 Sugar beet crop insurance provisions.
457.110 Fig crop insurance provisions.
457.111 Pear crop insurance provisions.
457.112 Hybrid sorghum seed crop insurance provisions.
457.113 Coarse grains crop insurance provisions.
457.114-457.115 [Reserved]
457.115 Nursery frost, freeze, and cold damage exclusion option.
457.116 Sugarcane crop insurance provisions.
457.117 Forage production crop insurance provisions.
457.118 Malting barley price and quality endorsement.
457.119 Texas citrus fruit crop insurance provisions.
457.120 [Reserved]
457.121 Arizona-California citrus crop insurance provisions.
457.122 Walnut crop insurance provisions.
457.123 Almond crop insurance provisions.
457.124 Raisin crop insurance provisions.
457.125 Safflower crop insurance provisions.
457.126 Popcorn crop insurance provisions.
457.127 [Reserved]
457.128 Guaranteed production plan of fresh market tomato crop insurance provisions.
457.129 Fresh market sweet corn crop insurance provisions.
457.130 Macadamia tree crop insurance provisions.
457.131 Macadamia nut crop insurance provisions.
457.132 Cranberry crop insurance provisions.
457.133 Prune crop insurance provisions.
457.134 Peanut crop insurance provisions.
457.135 Onion crop insurance provisions.
457.136 Tobacco crop insurance provisions.
457.137 Green pea crop insurance provisions.
457.138 Grape crop insurance provisions.
457.139 Fresh market tomato (dollar plan) crop insurance provisions.
457.140 Dry pea crop insurance provisions.
457.141 Rice crop insurance provisions.
457.142 Northern potato crop insurance provisions.
457.143 Northern potato crop insurance—quality endorsement.
457.144 Northern potato crop insurance—processing quality endorsement.
457.145 Potato crop insurance—certified seed endorsement.
457.146 Northern potato crop insurance—storage coverage endorsement.
457.147 Central and Southern potato crop insurance provisions.
457.148 Fresh market pepper crop insurance provisions.
457.149 Table grape crop insurance provisions.
457.150 Dry bean crop insurance provisions.
457.151 Forage seeding crop insurance provisions.
457.152 Hybrid seed corn crop insurance provisions.
§ 457.1 Applicability.

The provisions of this part are applicable only to crops for which a crop provision is published as a section to 7 CFR part 457 and then only for the crops and crop year designated by the application section.

§ 457.2 Availability of Federal crop insurance.

(a) Insurance shall be offered under the provisions of this section on the insured crop in counties within the limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended (the Act). The crops and counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation.

(b) The insurance is offered through companies reinsured by the Federal Crop Insurance Corporation (FCIC) that offer contracts containing the same terms and conditions as the contract set out in this part. These contracts are clearly identified as being reinsured by FCIC. FCIC may offer the contract for the catastrophic level of coverage contained in this part and part 402 directly to the insured through local offices of the Department of Agriculture only if the Secretary determines that the availability of local agents is not adequate. Those contracts are specifically identified as being offered by FCIC.

(c) Except as specified in the Crop Provisions, the Catastrophic Risk Protection Endorsement (part 402 of this chapter) and part 400, subpart T of this chapter, no person may have in force more than one contract on the same crop for the same crop year in the same county.

(d) Except as specified in paragraph (c) of this section, if a person has more than one contract authorized under the Act that provides coverage for the same loss on the same crop for the same crop year in the same county, all such contracts shall be voided for that crop year and the person will be liable for the premium on all contracts, unless the person can show to the satisfaction of the Corporation that the multiple contracts of insurance were without the fault of the person.

1. If the multiple contracts of insurance are shown to be without the fault of the person and:
   (i) One contract is an additional coverage policy and the other contract is a Catastrophic Risk Protection policy, the additional coverage policy will apply if both policies are with the same insurance provider, or if not, both insurance providers agree, and the Catastrophic Risk Protection policy will be canceled (If the insurance providers do not agree, the policy with the earliest date of application will be in force and the other contract will be canceled); or
   (ii) Both contracts are additional coverage policies or both are Catastrophic Risk Protection policies, the contract with the earliest signature date on the application will be valid and the other contract on that crop in the county for that crop year will be canceled, unless both policies are with the same insurance provider and the insurance provider agrees otherwise or both policies are with different insurance providers and both insurance providers agree otherwise.
(2) No liability for any indemnity, prevented planting payment, replanting payment or premium will attach to the contracts canceled as specified in paragraphs (d)(1)(i) and (ii) of this section.

(e) The person must repay all amounts received in violation of this section with interest at the rate contained in the contract (see §457.8, paragraph 24).

(f) An insured whose contract with the Corporation or with a company reinsured by the Corporation under the Act has been terminated because of violation of the terms of the contract is not eligible to obtain multiple peril crop insurance under the Act with the Corporation or with a company reinsured by the Corporation unless the insured can show that the default in the prior contract was cured prior to the sales closing date of the contract applied for or unless the insured can show that the termination was improper and should not result in subsequent ineligibility.

(g) All applicants for insurance under the Act must advise the agent, in writing, at the time of application, of any previous applications for insurance or policies of insurance under the Act and the present status of any such applications or insurance.

$457.3 Premium rates, production guarantees or amounts of insurance, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees or amounts of insurance, coverage levels, and prices at which indemnities shall be computed for the insured crop which will be included in the actuarial table on file in the applicable agents' office for the county and which may be changed from year to year.

(b) At the time the application for insurance is made, the applicant will elect an amount of insurance or a coverage level and price from among those contained in the actuarial table for the crop year.

$457.4 OMB control numbers.

The information collection requirements contained in these regulations have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. chapter 35 and have been assigned OMB number 0563-0053.

$457.5 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, involuntary transfer or other similar interest shall not entitle the holder of the interest to any benefit under the contract.

$457.6 [Reserved]

$457.7 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation or the reinsured company of a duly executed application for insurance on a form prescribed by the Corporation. Changes made in the contract shall not affect its continuity from year to year. No indemnity shall be paid unless the insured complies with all terms and conditions of the contract, except as provided in the policy. The forms referred to in the contract are available at the offices of the crop insurance agent.

$457.8 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation, or approved by the Corporation, must be made by any person who wishes to participate in the program, to cover such person’s share in the insured crop as landlord, owner-operator, crop ownership interest, or tenant. No other person’s interest in the crop may be insured under an application unless that person’s interest is clearly shown on the application and unless that other person’s interest is insured in accordance with the procedures of the Corporation. The application must be submitted to the Corporation or the reinsured company through the crop insurance agent and must be submitted on
or before the applicable sales closing date on file.

(b) FCIC or the reinsured company may reject or discontinue the acceptance of applications in any county or of any individual application upon FCIC’s determination that the insurance risk is excessive.

(c) If the producer had a Crop Revenue Coverage, Revenue Assurance, Income Protection, or Indexed Income Protection crop insurance policy in effect for the 2010 crop year and has not canceled or changed such coverage in accordance with such policy, revenue protection will continue in effect under the Common Crop Insurance Policy Basic Provisions and no new application is required. Revenue protection will be at the same coverage level, 100 percent of price, with any applicable options, endorsements, and enterprise or whole-farm unit structures that were in effect the previous year still in effect, as long as all qualifications are met and such coverage remains available.

(1) If the producer had revenue coverage under the Revenue Assurance crop insurance policy for the 2010 crop year and:

(i) The producer had the fall harvest price option, for the 2011 crop year the producer will have revenue protection under the Common Crop Insurance Policy Basic Provisions based on the greater of the projected price or the harvest price; or

(ii) The producer did not have the fall harvest price option, for the 2011 crop year the producer will have revenue protection under the Common Crop Insurance Policy Basic Provisions and the harvest price exclusion.

(2) If the producer had revenue coverage under the Income Protection or Indexed Income Protection crop insurance policy for the 2010 crop year, for the 2011 crop year the producer will have revenue protection under the Common Crop Insurance Policy Basic Provisions and the harvest price exclusion.

(3) If the producer has revenue protection under paragraph (c) of this section, the producer may exclude coverage for hail and fire if the requirements are met.

(d) If the producer had coverage under an Actual Production History crop insurance policy for a crop under the Common Crop Insurance Policy Basic Provisions for the 2010 crop year, and that crop now has revenue protection available, the producer will have yield protection for the crop under the Common Crop Insurance Policy Basic Provisions in effect for the 2011 crop year at the same coverage level, and percentage of price, any applicable options or endorsements, and enterprise or whole-farm unit structures that were in effect the previous year continue in effect, as long as all qualifications are met and such coverage remains available.

(e) If the producer had coverage under Actual Production History or another crop insurance policy for a crop under the Common Crop Insurance Policy Basic Provisions for the 2010 crop year and that crop does not have revenue protection available for the 2011 crop year, the producer will continue with the same crop insurance policy (e.g., Actual Production History or amount of insurance) until canceled or terminated.

(f) With respect to any crop insurance policy specified in paragraphs (c) through (e) of this section:

(1) The producer may change their coverage (coverage level, percent of price, etc.) in accordance with section 3 of the Common Crop Insurance Policy Basic Provisions or the producer may cancel such coverage in accordance with section 2 of the Common Crop Insurance Policy Basic Provisions. If the producer changes their crop insurance policy (e.g., Actual Production History, yield protection, revenue protection, amount of insurance, etc.) for any crop year, the producer must elect the coverage level, percentage of price, any applicable options, endorsements, and unit structure (enterprise or whole-farm) that will be in effect under the new crop insurance policy.

(2) If a producer has a properly executed Power of Attorney on file with the insurance provider, such Power of Attorney will remain in effect under the Common Crop Insurance Policy Basic Provisions until it is terminated.

(3) If the producer has a current written agreement in effect for the crop for multiple crop years, such written
agreement will remain in effect if the terms of the written agreement are still applicable, the conditions under which the written agreement was provided have not changed, and the crop insurance policy remains with the same insurance provider.

DEPARTMENT OF AGRICULTURE
Federal Crop Insurance Corporation
(or policy issuing company name)

Common Crop Insurance Policy
(This is a continuous policy. Refer to section 2.)

FCIC Policies
This is an insurance policy issued by the Federal Crop Insurance Corporation (FCIC), a United States government agency. The provisions of the policy may not be waived or modified in any way by us, your insurance agent or any employee of USDA unless the policy specifically authorizes a waiver or modification by written agreement. Procedures (handbooks, manuals, memoranda, and bulletins), issued by us and published on the RMA’s Web site at http://www.rma.usda.gov/ or a successor Web site will be used in the administration of this policy, including the adjustment of any loss or claim submitted hereunder.

Throughout this policy, ‘you’ and ‘your’ refer to the named insured shown on the accepted application and ‘we,’ ‘us,’ and ‘our’ refer to the Federal Crop Insurance Corporation. Unless the context indicates otherwise, use of the plural form of a word includes the singular and use of the singular form of the word includes the plural.

AGREEMENT TO INSURE: In return for the payment of the premium, and subject to all of the provisions of this policy, we agree with you to provide the insurance as stated in this policy. If there is a conflict between the Act, the regulations published at 7 CFR chapter IV, and the procedures as issued by FCIC, your claim will be settled in accordance with the provisions of this policy and FCIC will be responsible for any amounts owed. No state guarantee fund will be liable for your loss.

Throughout this policy, ‘you’ and ‘your’ refer to the named insured shown on the accepted application and ‘we,’ ‘us,’ and ‘our’ refer to the insurance company providing insurance. Unless the context indicates otherwise, use of the plural form of a word includes the singular and use of the singular form of the word includes the plural.

AGREEMENT TO INSURE: In return for the payment of the premium, and subject to all of the provisions of this policy, we agree with you to provide the insurance as stated in this policy. If there is a conflict between the Act, the regulations published at 7 CFR part 457 and the administrative regulations published at 7 CFR part 400, the policy provisions published at 7 CFR part 457 control. If a conflict exists among the policy provisions, the order of priority is: (1) The Catastrophic Risk Protection Endorsement, as applicable; (2) the Special Provisions; (3) the Commodity Exchange Price Provisions, as applicable; (4) the Crop Provisions; and (5) these Basic Provisions, with (1) controlling (2), etc.

TERMS AND CONDITIONS

Basic Provisions
1. Definitions

Abandon. Failure to continue to care for the crop, providing care so insignificant as to provide no benefit to the crop, or failure
to harvest in a timely manner, unless an insured cause of loss prevents you from properly caring for or harvesting the crop or causes damage to it to the extent that most agricultural commodities grown under organic practices from agricultural commodities grown similar characteristics in the area would not normally further care for or harvest it.

Acreage report. A report required by section 6 of these Basic Provisions that contains, in addition to other required information, your report of your share of all acreage of an insured crop in the county, whether insurable or not insurable.

Acreage reporting date. The date contained in the Special Provisions or as provided in section 6 by which you are required to submit your acreage report.

Actual Production History (APH). A process used to determine production guarantees in accordance with 7 CFR part 400, subpart (G).

Actual yield. The yield per acre for a crop year calculated from the production records or claims for indemnities. The actual yield is determined by dividing total production (which includes harvested and appraised production) by planted acres.

Actuarial documents. The information for the crop year which is available for public inspection in your agent’s office and published on RMA’s Web site and which shows available crop insurance policies, coverage levels, information needed to determine amounts of insurance, prices, premium rates, premium adjustment percentages, practices, particular types or varieties of the insurable crop, insurable acreage, and other related information regarding crop insurance in the county.

Additional coverage. A level of coverage greater than catastrophic risk protection.

Administrative fee. An amount you must pay for catastrophic risk protection, and additional coverage for each crop year as specified in section 7 and the Catastrophic Risk Protection Endorsement.

Agricultural commodity. Any crop or other commodity produced, regardless of whether or not it is insurable.

Agricultural experts. Persons who are employed by the Cooperative Extension System or the agricultural departments of universities, or other persons approved by FCIC, whose research or occupation is related to the specific crop or practice for which such expertise is sought.

Annual crop. An agricultural commodity that normally must be planted each year.

Application. The form required to be completed by you and accepted by us before insurance coverage will commence. This form must be completed and filed in your agent’s office not later than the sales closing date of the initial insurance year for each crop for which insurance coverage is requested. If cancellation or termination of insurance coverage occurs for any reason, including but not limited to indebtedness, suspension, debarment, disqualification, cancellation by you or us or violation of the controlled substance provisions of the Federal Food, Drug, and Cosmetic Act of 1938, a new application must be filed for the crop. Insurance coverage will not be provided if you are ineligible under the contract or under any Federal statute or regulation.

Approved yield. The actual production history (APH) yield, calculated and approved by the verifier, used to determine the production guarantee by summing the yearly actual, assigned, adjusted or unadjusted transitional yields and dividing the sum by the number of yields contained in the database, which will always contain at least four yields. The database may contain up to 10 consecutive crop years of actual or assigned yields. The approved yield may have yield adjustments elected under section 36, revisions according to section 3, or other limitations according to FCIC approved procedures applied when calculating the approved yield.

Area. Land surrounding the insured acreage with geographic characteristics, topography, soil types and climatic conditions similar to the insured acreage.

Assignment of indemnity. A transfer of policy rights, made on our form, and effective when approved by us in writing, whereby you assign your right to an indemnity payment for the crop year only to creditors or other persons to whom you have a financial debt or other pecuniary obligation.

Average yield. The yield calculated by totaling the yearly actual yields, assigned yields in accordance with sections 3(f)(1) (failure to provide production report), 3(h)(1) (excessive yields), and 3(i) (second crop planted without double cropping history on prevented planting acreage), and adjusted or unadjusted transitional yields, and dividing the total by the number of yields contained in the database.

Basic unit. All insurable acreage of the insured crop in the county on the date coverage begins for the crop year:

(1) In which you have 100 percent crop share; or

(2) Which is owned by one person and operated by another person on a share basis. (Example: If, in addition to the land you own, you rent land from five landlords, three on a crop share basis and two on a cash basis, you would be entitled to four units; one for each crop share lease and one that combines the two cash leases and the land you own.) Land which would otherwise be one unit may, in certain instances, be divided according to guidelines contained in section 34 of these Basic Provisions and in the applicable Crop Provisions.

Buffer zone. A parcel of land, as designated in your organic plan, that separates agricultural commodities grown under organic practices from agricultural commodities grown...
under non-organic practices, and used to minimize the possibility of unintended contact by prohibited substances or organisms.

Cancellation date. The calendar date specified in section 11 of these Basic Provisions on which coverage for the crop will automatically renew unless canceled in writing by either you or us or terminated in accordance with the policy terms.

Catastrophic risk protection. The minimum level of coverage offered by FCIC. Catastrophic risk protection is not available with revenue protection.

Catastrophic Risk Protection Endorsement. The part of the crop insurance policy that contains provisions of insurance that are specific to catastrophic risk protection.

Certified organic acreage. Acreage in the certified organic farming operation that has been certified by a certifying agent as conforming to organic standards in accordance with 7 CFR part 205.

Certifying agent. A private or governmental entity accredited by the USDA Secretary of Agriculture for the purpose of certifying a production, processing or handling operation as organic.

Claim for indemnity. A claim made on our form that contains the information necessary to pay the indemnity, as specified in the applicable FCIC issued procedures, and complies with the requirements in section 14.

Commodity Exchange Price Provisions (CEPP). A part of the policy that is used for all crops for which revenue protection is available, regardless of whether you elect revenue protection or yield protection for such crops. This document includes the information necessary to derive the projected price and the harvest price for the insured crop, as applicable.

Consent. Approval in writing by us allowing you to take a specific action.

Contract. (See "policy").

Contract change date. The calendar date by which changes to the policy, if any, will be made available in accordance with section 4 of these Basic Provisions.

Conventional farming practice. A system or process that is necessary to produce an agricultural commodity, excluding organic farming practices.

Cooperative Extension System. A nationwide network consisting of a State office located at each State’s land-grant university, and local or regional offices. These offices are staffed by one or more agricultural experts, who work in cooperation with the Cooperative State Research, Education and Extension Service, and who provide information to agricultural producers and others.

County. Any county, parish, or other political subdivision of a state shown on your accepted application, including acreage in a field that extends into an adjoining county if the county boundary is not readily discernible.

Coverage. The insurance provided by this policy, against insured loss of production or value, by unit as shown on your summary of coverage.

Coverage begins, date. The calendar date insurance begins on the insured crop, as contained in the Crop Provisions, or the date planting begins on the unit (see section 11 of these Basic Provisions for specific provisions relating to prevented planting).

Cover crop. A crop generally recognized by agricultural experts as agronomically sound for the area for erosion control or other purposes related to conservation or soil improvement. A cover crop may be considered to be a second crop (see the definition of "second crop").

Crop Provisions. The part of the policy that contains the specific provisions of insurance for each insured crop.

Crop year. The period within which the insured crop is normally grown, regardless of whether or not it is actually grown, and designated by the calendar year in which the insured crop is normally harvested, unless otherwise specified in the Crop Provisions.

Damage. Injury, deterioration, or loss of production of the insured crop due to insured or uninsured causes.

Days. Calendar days.

Deductible. The amount determined by subtracting the coverage level percentage you choose from 100 percent. For example, if you elected a 65 percent coverage level, your deductible would be 35 percent (100% - 65% = 35%).

Delinquent debt. Has the same meaning as the term defined in 7 CFR part 400, subpart U.

Disinterested third party. A person that does not have any familial relationship (parents, brothers, sisters, children, spouse, grandchildren, aunts, uncles, nieces, nephews, first cousins, or grandparents, related by blood, adoption or marriage, are considered to have a familial relationship) with you or who will not benefit financially from the sale of the insured crop. Persons who are authorized to conduct quality analysis in accordance with the Crop Provisions are considered disinterested third parties unless there is a familial relationship.

Double crop. Producing two or more crops for harvest on the same acreage in the same crop year.

Earliest planting date. The initial planting date contained in the Special Provisions, which is the earliest date you may plant an
insured agricultural commodity and qualify for a replanting payment if such payments are authorized by the Crop Provisions.

End of insurance period. The date upon which your crop insurance coverage ceases for the crop year (see Crop Provisions and section 11).

Enterprise unit. All insurable acreage of the same insured crop in the county in which you have a share on the date coverage begins for the crop year, provided the requirements of section 34 are met.

Yield. All acreage of tillable land within a natural or artificial boundary (e.g., roads, waterways, fences, etc.). Different planting patterns or planting different crops do not create separate fields.

Final planting date. The date contained in the Special Provisions for the insured crop by which the crop must initially be planted in order to be insured for the full production guarantee or amount of insurance per acre.

First insured crop. With respect to a single crop year and any specific crop acreage, the first instance that an agricultural commodity is planted for harvest or prevented from being planted and is insured under the authority of the Act. For example, if winter wheat that is not insured is planted on acreage that is later planted to soybeans that are insured, the first insured crop would be soybeans. If the winter wheat was insured, it would be the first insured crop.

FSA. The Farm Service Agency, an agency of the USDA, or a successor agency.

FSA farm serial number. The number assigned to the farm by the local FSA office.

Generally recognized. When agricultural experts or organic agricultural experts, as applicable, are aware of the production method or practice and there is no genuine dispute regarding whether the production method or practice allows the crop to make normal progress toward maturity and produce at least the yield used to determine the production guarantee or amount of insurance.

Good farming practices. The production methods utilized to produce the insured crop and allow it to make normal progress toward maturity and produce at least the yield used to determine the production guarantee or amount of insurance, including any adjustments for late planted acreage, which are: (1) For conventional or sustainable farming practices, those generally recognized by agricultural experts for the area or contained in the organic plan. We may, or you may request us to, contact FCIC to determine whether or not production methods will be considered to be “good farming practices.”

Harvest price. A price determined in accordance with the Commodity Exchange Price Provisions and used to value production to count for revenue protection.

Harvest price exclusion. Revenue protection with the use of the harvest price excluded when determining your revenue protection guarantee. This election is continuous unless canceled by the cancellation date.

Household. A domestic establishment including the members of a family (parents, brothers, sisters, children, spouse, grandchildren, aunts, uncles, nieces, nephews, first cousins, or grandparents, related by blood, adoption or marriage, are considered to be family members) and others who live under the same roof.

Insurable interest. Your percentage of the insured crop that is at financial risk.

Insurable loss. Damage for which coverage is provided under the terms of your policy, and for which you accept an indemnity payment.

Insured. The named person as shown on the application accepted by us. This term does not extend to any other person having a share or interest in the crop (for example, a partnership, landlord, or any other person) unless specifically indicated on the accepted application.

Insured crop. The crop in the county for which coverage is available under your policy as shown on the application accepted by us.

Intended acreage report. A report of the acreage you intend to plant, by crop, for the current crop year and used solely for the purpose of establishing eligible prevented planting acreage, as required in section 17.

Interplanted. Acreage on which two or more crops are planted in a manner that does not permit separate agronomic maintenance or harvest of the insured crop.

Irrigated practice. A method of producing a crop by which water is artificially applied during the growing season by appropriate systems and at the proper times, with the intention of providing the quantity of water needed to produce at least the yield used to establish the irrigated production guarantee or amount of insurance on the irrigated acreage planted to the insured crop.

Late planted. Acreage initially planted to the insured crop after the final planting date.

Late planting period. The period that begins the day after the final planting date for the insured crop and ends 25 days after the final planting date, unless otherwise specified in the Crop Provisions or Special Provisions.

Liability. Your total amount of insurance, value of your production guarantee, or revenue protection guarantee for the unit determined in accordance with the Settlement of Claim provisions of the applicable Crop Provisions.

Limited resource farmer. Has the same meaning as the term defined by USDA at http://www.lrftool.sc.egov.usda.gov/LRP-D.htm.

Native sod. Acreage that has no record of being tilled (determined in accordance with
FSA or other verifiable records acceptable to us) for the production of an annual crop on or before May 22, 2008, and on which the plant cover is composed principally of native grasses, grass-like plants, forbs, or shrubs suitable for grazing and browsing.

Negligence. The failure to use such care as a reasonably prudent and careful person would use under similar circumstances.

Non-contiguous. Acreage of an insured crop that is separated from other acreage of the same insured crop by land that is neither owned by you nor rented by you for cash or a crop share. However, acreage separated by only a public or private right-of-way, waterway, or an irrigation canal will be considered as contiguous.

Offset. The act of deducting one amount from another amount.

Organic agricultural experts. Persons who are employed by the following organizations: Appropriate Technology Transfer for Rural Areas, Sustainable Agriculture Research and Education or the Cooperative Extension System, the agricultural departments of universities, or other persons approved by FCIC, whose research or occupation is related to the specific organic crop or practice for which such expertise is sought.

Organic farming practice. A system of plant production practices used to produce an organic crop that is approved by a certifying agent in accordance with 7 CFR part 205.

Organic plan. A written plan, in accordance with the National Organic Program published in 7 CFR part 205, that describes the organic farming practices that you and a certifying agent agree upon annually or at such other times as prescribed by the certifying agent.

Perennial crop. A plant, bush, tree or vine crop that has a life span of more than one year.

Person. An individual, partnership, association, corporation, estate, trust, or other legal entity, and wherever applicable, a State or a political subdivision or agency of a State. “Person” does not include the United States Government or any agency thereof.

Planted acreage. Land in which seed, plants, or trees have been placed, appropriate for the insured crop and planting method, at the correct depth, into a seedbed that has been properly prepared for the planting method and production practice.

Policy. The agreement between you and us to insure an agricultural commodity and consisting of the accepted application, these Basic Provisions, the Crop Provisions, the Special Provisions, the Commodity Exchange Price Provisions, if applicable, other applicable endorsements or options, the actuarial documents for the insured agricultural commodity, the Catastrophic Risk Protection Endorsement, if applicable, and the applicable regulations published in 7 CFR chapter IV. Insurance for each agricultural commodity in each county will constitute a separate policy.

Practical to replant. Our determination, after loss or damage to the insured crop, based on all factors, including, but not limited to moisture availability, marketing window, condition of the field, and time to crop maturity, that replanting the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period. It will be considered to be practical to replant regardless of availability of seed or plants, or the input costs necessary to produce the insured crop such as those that would be incurred for seed or plants, irrigation water, etc.

Prairie Pothole National Priority Area. Consists of specific counties within the States of Iowa, Minnesota, Montana, North Dakota or South Dakota as specified on the RMA’s Web site at http://www.rma.usda.gov/, or a successor Web site, or the Farm Service Agency, Agricultural Resource Conservation Program 2-CRP (Revision 4), dated April 29, 2008, or a subsequent publication.

Premium billing date. The earliest date upon which you will be billed for insurance coverage based on your acreage report. The premium billing date is contained in the Special Provisions.

Prevented planting. Failure to plant the insured crop by the final planting date designated in the Special Provisions for the insured crop in the county, or within any applicable late planting period, due to an uninsured cause of loss that is general to the surrounding area and that prevents other producers from planting acreage with similar characteristics. Failure to plant because of uninsured causes such as lack of proper equipment or labor to plant the acreage, or use of a particular production method, is not considered prevented planting.

Price election. The amounts contained in the Special Provisions, or in an addendum thereto, that is the value per pound, bushel, ton, carton, or other applicable unit of measure for the purposes of determining premium and indemnity under the policy. A price election is not applicable for crops for which revenue protection is available.

Production guarantee (per acre). The number of pounds, bushels, tons, cartons, or other applicable units of measure determined by multiplying the approved yield per acre by the coverage level percentage you elect.

Production report. A written record showing your annual production and used by us to determine your yield for insurance purposes in
Federal Crop Insurance Corporation, USDA § 457.8

accordance with section 3. The report contains yield information for previous years, including planted acreage and production. This report must be supported by written verifiable records from a warehouseman or buyer of the insured crop, by measurement of farm-stored production, or by other records of production approved by us on an individual case basis in accordance with FCIC approved procedures.

Prohibited substance. Any biological, chemical, or other agent that is prohibited from use or is not included in the organic standards for use on any certified organic, transitional or buffer zone acreage. Lists of such substances are contained at 7 CFR part 205.

Projected price. The price for each crop determined in accordance with the Commodity Exchange Price Provisions. The applicable projected price is used for each crop for which revenue protection is available, regardless of whether you elect to obtain revenue protection or yield protection for such crop.

Replanted crop. The same agricultural commodity replanted on the same acreage as the first insured crop for harvest in the same crop year if the replanting is specifically made optional by the policy and you elect to replant the crop and insure it under the policy covering the first insured crop, or replanting is required by the policy.

Replanting. Performing the cultural practices necessary to prepare the land to replace the seed or plants of the damaged or destroyed insured crop and then replacing the seed or plants of the same crop in the same insured acreage. The same crop does not necessarily mean the same type or variety of the crop unless different types or varieties constitute separate crops or it is otherwise specified in the policy.

Representative sample. Portions of the insured crop that must remain in the field for examination and review by our loss adjuster when making a crop appraisal, as specified in the Crop Provisions. In certain instances we may allow you to harvest the crop and require only that samples of the crop residue be left in the field.

Revenue protection. A plan of insurance that provides protection against loss of revenue due to a production loss, price decline or increase, or a combination of both. If the harvest price exclusion is elected, the insurance coverage provides protection only against loss of revenue due to a production loss, price decline, or a combination of both.

Revenue protection guarantee (per acre). For revenue protection only, the amount determined by multiplying the production guarantee (per acre) by the greater of your projected price or your harvest price. If the harvest price exclusion is elected, the production guarantee (per acre) is only multiplied by your projected price.

Sales closing date. A date contained in the Special Provisions by which an application must be filed. The last date by which you may change your crop insurance coverage for a crop year.

Second crop. With respect to a single crop year, the next occurrence of planting any agricultural commodity for harvest following a first insured crop on the same acreage. The second crop may be the same or a different agricultural commodity as the first insured crop, except the term does not include a replanted crop. A cover crop, planted after a first insured crop and planted for the purpose of haying, grazing or otherwise harvesting in any manner or that is hayed or grazed during the crop year, or that is otherwise harvested is considered to be a second crop. A cover crop that is covered by FSA’s noninsured crop disaster assistance program (NAP) or receives other USDA benefits associated with forage crops will be considered as planted for the purpose of haying, grazing or otherwise harvesting. A crop meeting the conditions stated herein will be considered to be a second crop regardless of whether or not it is insured. Notwithstanding the references to haying and grazing as harvesting in these Basic Provisions, for the purpose of determining the end of the insurance period, harvest of the crop will be as defined in the applicable Crop Provisions.

Section. For the purposes of unit structure, a unit of measure under a rectangular survey system describing a tract of land usually one mile square and usually containing approximately 640 acres.

Share. Your insurable interest in the insured crop as an owner, operator, or tenant at the time insurance attaches. However, only for the purpose of determining the amount of indemnity, your share will not exceed your share at the earlier of the time of loss or the beginning of harvest.

Special Provisions. The part of the policy that contains specific provisions of insurance for each insured crop that may vary by geographic area.

State. The state shown on your accepted application.

Substantial beneficial interest. An interest held by any person of at least 10 percent in you (e.g., there are two partnerships that each have a 50 percent interest in you and each partnership is made up of two individuals, each with a 50 percent share in the partnership. In this case, each individual would be considered to have a 25 percent interest in you, and both the partnerships and the individuals would have a substantial beneficial interest in you. The spouses of the individuals would not be considered to have a substantial beneficial interest unless the spouse was one of the individuals that made

129
§457.8

up the partnership. However, if each partnership is made up of six individuals with equal interests, then each would only have an 8.33 percent interest in you and although the partnership would still have a substantial beneficial interest in you, the individuals would not for the purposes of reporting in section 2. The spouse of any individual applicant or individual insured will be presumed to have a substantial beneficial interest in the applicant or insured unless the spouses can prove they are legally separated or otherwise legally separate under the applicable State dissolution of marriage laws. Any child of an individual applicant or individual insured will not be considered to have a substantial beneficial interest in the applicant or insured unless the child has a separate legal interest in such person.

Summary of coverage. Our statement to you, based upon your acreage report, specifying the insured crop and the guarantee or amount of insurance coverage provided by unit.

Sustainable farming practice. A system or process for producing an agricultural commodity, excluding organic farming practices, that is necessary to produce the crop and is generally recognized by agricultural experts for the area to conserve or enhance natural resources and the environment.

Tenant. A person who rents land from another person for a share of the crop or a share of the proceeds of the crop (see the definition of “share” above).

Termination date. The calendar date contained in the Crop Provisions upon which your insurance ceases to be in effect because of nonpayment of any amount due us under the policy, including premium.

Tillage. The existing or new crops being grown on a sustainable farming basis to the extent that the new planting is necessary to assure conservation of natural resources.

Timely planted. Planted on or before the calendar date designated in the Special Provisions for the insured crop in the county.

Transitional acreage. Acreage on which organic farming practices are being followed that does not yet qualify to be designated as organic acreage.

USDA. United States Department of Agriculture.

Verifiable records. Has the same meaning as the term defined in 7 CFR part 400, subpart G.

Void. When the policy is considered not to have existed for a crop year.

Whole-farm unit. All insurable acreage of all the insured crops planted in the county in which you have a share on the date coverage begins for each crop for the crop year and for which the whole-farm unit structure is available in accordance with section 34.

Written agreement. A document that alters designated terms of a policy as authorized under these Basic Provisions, the Crop Provisions, or the Special Provisions for the insured crop (see section 18).

Yield protection. A plan of insurance that only provides protection against a production loss and is available only for crops for which revenue protection is available.

Yield protection guarantee (per acre). When yield protection is selected for a crop that has revenue protection available, the amount determined by multiplying the production guarantee by your projected price.

2. Life of Policy, Cancellation, and Termination

(a) This is a continuous policy and will remain in effect for each crop year following the acceptance of the original application until canceled by you in accordance with the terms of the policy or terminated by operation of the terms of the policy or by us. In accordance with section 4, FCIC may change the coverage provided from year to year.

(b) With respect to your application for insurance:

(1) You must include your social security number (SSN) if you are an individual (if you are an individual applicant operating as a business, you may provide an employer identification number (EIN) but you must also provide your SSN); or

(2) You must include your EIN if you are a person other than an individual;

(3) In addition to the requirements of section 2(b)(1) or (2), you must include the following for all persons who have a substantial beneficial interest in you:

(i) The SSN for individuals; or

(ii) The EIN for persons other than individuals that comprise the person with the EIN if such individuals also have a substantial beneficial interest in you;

(4) You must include:

(i) Your election of revenue protection, yield protection, or other available plan of insurance; coverage level; percentage of price election or percentage of projected price, as applicable; crop, type, variety, or class; and any other material information required on the application to insure the crop; and

(ii) All the information required in section 2(b)(4)(i) or your application will not be accepted and no coverage will be provided;

(5) Your application will not be accepted and no insurance will be provided for the year of application if the application does not contain your SSN or EIN. If your application contains an incorrect SSN or EIN for you, your application will be considered not to have been accepted, no insurance will be provided for the year of application and for any subsequent crop years, as applicable, and such policies will be void if:

(i) Such number is not corrected by you; or

(ii) You correct the SSN or EIN but:
Federal Crop Insurance Corporation, USDA

§ 457.8

(A) You cannot prove that any error was inadvertent (simply stating the error was inadvertent is not sufficient to prove the error was inadvertent); or

(B) It is determined that the incorrect number would have allowed you to obtain disproportionate benefits under the crop insurance program, you are determined to be ineligible for insurance or you could avoid an obligation or requirement under any State or Federal law.

(6) With respect to persons with a substantial beneficial interest in you:

(i) The insurance coverage for all crops included on your application will be reduced proportionately by the percentage interest in you of persons with a substantial beneficial interest in you (presumed to be 50 percent for spouses of individuals) if the SSNs or EINs of such persons are included on your application, the SSNs or EINs are correct, and the persons with a substantial beneficial interest in you are ineligible for insurance;

(ii) Your policies for all crops included on your application, and for all applicable crop years, will be void if the SSN or EIN of any person with a substantial beneficial interest in you is incorrect or is not included on your application and:

(A) Such number is not corrected or provided by you, as applicable;

(B) You cannot prove that any error or omission was inadvertent (simply stating the error or omission was inadvertent is not sufficient to prove the error or omission was inadvertent); or

(C) Even after the correct SSN or EIN is provided by you, it is determined that the incorrect or omitted SSN or EIN would have allowed you to obtain disproportionate benefits under the crop insurance program, the person with a substantial beneficial interest in you is determined to be ineligible for insurance, or you or the person with a substantial beneficial interest in you could avoid an obligation or requirement under any State or Federal law or

(iii) Except as provided in sections 2(b)(6)(i)(B) and (C), your policies will not be voided if you subsequently provide the correct SSN or EIN for persons with a substantial beneficial interest in you and the persons are eligible for insurance;

(7) When any of your policies are void under sections 2(b)(5) or (6):

(i) You must repay any indemnity, prevented planting payment or replant payment that may have been paid for all applicable crops and crop years;

(ii) Even though the policies are void, you will still be required to pay an amount equal to 20 percent of the premium that you would otherwise be required to pay; and

(iii) If you previously paid premium or administrative fees, any amount in excess of the amount required in section 2(b)(7) will be returned to you;

(8) Notwithstanding any of the provisions in this section, if you certify to an incorrect SSN or EIN, or receive an indemnity, prevented planting payment or replant payment and the SSN or EIN was not correct, you may be subject to civil, criminal or administrative sanctions;

(9) If any of the information regarding persons with a substantial beneficial interest in you changes after the sales closing date for the previous crop year, you must revise your application by the sales closing date for the current crop year to reflect the correct information. However, if such information changed less than 30 days before the sales closing date for the current crop year, you must revise your application by the sales closing date for the next crop year. If you fail to provide the required revisions, the provisions in section 2(b)(6) will apply; and

(10) If you are, or a person with a substantial beneficial interest in you, is not eligible to obtain a SSN or EIN, whichever is required, you must request an assigned number for the purposes of this policy from us:

(i) A number will be provided only if you can demonstrate you are, or a person with a substantial beneficial interest in you is, eligible to receive Federal benefits;

(ii) If a number cannot be provided for you in accordance with section 2(b)(10)(i), your application will not be accepted; or

(iii) If a number cannot be provided for any person with a substantial beneficial interest in you in accordance with section 2(b)(10)(i), the amount of coverage for all crops on the application will be reduced proportionately by the percentage interest of such person in you.

(c) After acceptance of the application, you may not cancel this policy for the initial crop year. Thereafter, the policy will continue in force for each succeeding crop year unless canceled or terminated as provided below.

(d) Either you or we may cancel this policy after the initial crop year by providing written notice to the other on or before the cancellation date shown in the Crop Provisions.

(e) Any amount due to us for any policy authorized under the Act will be offset from any indemnity or prevented planting payment due you for this or any other crop insured with us under the authority of the Act.

(f) If your claim has not yet been paid, you must still pay the premium and administrative fee on or before the termination date for you to remain eligible for insurance.

(g) If we offset any amount due us from an indemnity or prevented planting payment owed to you, the date of payment for the purpose of determining whether you have a delinquent debt will be the date that you submit the claim for indemnity in accordance with section 14(e) (Your Duties).

(h) A delinquent debt for any policy will make you ineligible to obtain crop insurance
§ 457.8  7 CFR Ch. IV (1-1-14 Edition)

authorized under the Act for any subsequent crop year and result in termination of all policies in accordance with section 2(f)(2).

(1) With respect to ineligibility:

(i) Ineligibility for crop insurance will be effective on:

(A) The date that a policy was terminated in accordance with section 2(f)(2) for the crop for which you failed to make the scheduled payment, an administrative fee, or any related interest owed, as applicable;

(B) The payment due date contained in any notification of indebtedness for any overpaid indemnity, prevented planting payment or replanting payment, if you fail to pay the amount owed, including any related interest owed, as applicable, by such due date;

(C) The termination date for the crop year prior to the crop year in which a scheduled payment is due under a written payment agreement if you fail to pay the amount owed by any payment date in any agreement to pay the debt; or

(D) The termination date the policy was or would have been terminated under sections 2(f)(2)(i)(A), (B) or (C) if your bankruptcy petition is dismissed before discharge.

(ii) If you are ineligible and a policy has been terminated in accordance with section 2(f)(2), you will not receive any indemnity, prevented planting payment or replanting payment, if applicable, and such ineligibility and termination of the policy may affect your eligibility for benefits under other USDA programs. Any indemnity, prevented planting payment or replanting payment that may be owed for the policy before it has been terminated will remain owed to you, but may be offset in accordance with section 2(e), unless your policy was terminated in accordance with sections 2(f)(2)(i)(A), (B), (D), or (E).

(ii) For all policies terminated under sections 2(f)(2)(i)(A), (B), (D), or (E), any indemnities, prevented planting payments or replanting payments paid subsequent to the termination date must be repaid.

(iii) Once the policy is terminated, it cannot be reinstated for the current crop year unless the termination was in error. Failure to timely pay because of illness, bad weather, or other such extenuating circumstances is not grounds for reinstatement in the current year.

(3) To regain eligibility, you must:

(i) Repay the delinquent debt in full;

(ii) Execute a written payment agreement and make payments in accordance with the agreement (We will not enter into a written payment agreement with you if you have previously failed to make a scheduled payment under the terms of any other payment agreement with us or any other insurance provider); or

(iii) File a petition to have your debts discharged in bankruptcy (Dismissal of the bankruptcy petition before discharge will terminate all policies in effect retroactive to the date your policy would have been terminated in accordance with section 2(f)(2)(i)).

(4) After you become eligible for crop insurance, if you want to obtain coverage for your crops, you must submit a new application on or before the sales closing date for the crop (Since applications for crop insurance cannot be accepted after the sales closing date, you cannot apply for insurance until the next crop year).

(5) For example, for the 2011 crop year, if crop A, with a termination date of October 31, 2010, and crop B, with a termination date
of March 15, 2011, are insured and you do not pay the premium for crop A by the termination date, you are ineligible for crop insurance as of October 31, 2010, and crop A’s policy is terminated as of that date. Crop B’s policy does not terminate until March 15, 2011, and an indemnity for the 2010 crop year may still be owed. If you enter into a written payment agreement on September 25, 2011, the earliest date by which you can obtain crop insurance for crop A is to apply for crop insurance by the October 31, 2011, sales closing date and for crop B is to apply for crop insurance by the March 15, 2012, sales closing date. If you fail to make a payment that was scheduled to be made on April 1, 2012, your policy will terminate as of October 31, 2011, for crop A and March 15, 2012, for crop B, and no indemnity, prevented planting payment or replant payment will be due for that crop year for either crop. You will not be eligible to apply for crop insurance for any crop until after the amounts owed are paid in full or you file a petition to discharge the debt in bankruptcy.

(b) If you are determined to be ineligible under section 2(f), persons with a substantial beneficial interest in you may also be ineligible until you become eligible again.

(g) In cases where there has been a death, disappearance, judicially declared incompetence, or dissolution of any insured person:

(1) If any married individual insured dies, disappears, or is judicially declared incompetent, the named insured on the policy will automatically convert to the name of the spouse if:

(i) The spouse was included on the policy as having a substantial beneficial interest in you in the named insured; and

(ii) The spouse has a share of the crop.

(2) The provisions in section 2(g)(3) will be applicable if:

(i) Any partner, member, shareholder, etc., of an insured entity dies, disappears, or is judicially declared incompetent, and such event automatically dissolves the entity; or

(ii) An individual, whose estate is left to a beneficiary other than a spouse or left to the spouse and the criteria in section 2(g)(1) are not met, dies, disappears, or is judicially declared incompetent.

(3) If section 2(g)(2) applies and the death, disappearance, or judicially declared incompetence occurred:

(i) More than 30 days before the cancellation date, the policy is automatically canceled as of the cancellation date and a new application must be submitted; or

(ii) Thirty days or less before the cancellation date, or after the cancellation date, the policy will continue in effect through the crop year immediately following the cancellation date and be automatically canceled as of the cancellation date immediately following the end of the insurance period for the crop year, unless canceled by the cancellation date prior to the start of the insurance period:

(A) A new application for insurance must be submitted prior to the sales closing date for coverage for the subsequent crop year; and

(B) Any indemnity, replant payment or prevented planting payment will be paid to the person or persons determined to be beneficially entitled to the payment and such person or persons must comply with all policy provisions and pay the premium.

(4) If any insured entity is dissolved for reasons other than death, disappearance, or judicially declared incompetence:

(i) Before the cancellation date, the policy is automatically canceled as of the cancellation date and a new application must be submitted;

(ii) On or after the cancellation date, the policy will continue in effect through the crop year immediately following the cancellation date and be automatically canceled as of the cancellation date immediately following the end of the insurance period for the crop year, unless canceled by the cancellation date prior to the start of the insurance period:

(A) A new application for insurance must be submitted prior to the sales closing date for coverage for the subsequent crop year; and

(B) Any indemnity, replant payment or prevented planting payment will be paid to the person or persons determined to be beneficially entitled to the payment and such person or persons must comply with all policy provisions and pay the premium.

(5) If section 2(g)(2) or (4) applies, a remaining member of the insured person or the beneficiary is required to report to us the death, disappearance, judicial incompetence, or other event that causes dissolution not later than the next cancellation date, except if section 2(g)(3)(i) applies, notice must be provided by the cancellation date for the next crop year. If notice is not provided timely, the provisions of section 2(g)(2) or (4) will apply retroactive to the date such notice should have been provided and any payments made after the date the policy should have been canceled must be returned.

(h) We may cancel your policy if no premium is earned for 3 consecutive years.

(i) The cancellation and termination dates are contained in the Crop Provisions.

(j) When obtaining catastrophic, or additional coverage, you must provide information regarding crop insurance coverage on any crop previously obtained at any other local FSA office or from an approved insurance provider, including the date such insurance was obtained and the amount of the administrative fee.

(k) Any person may sign any document relative to crop insurance coverage on behalf of any other person covered by such a policy.
§ 457.8

(1) You may change to another plan of insurance and change your coverage level or elect the harvest price exclusion by giving written notice to us not later than the sales closing date for the insured crop; and

(2) Your projected price and harvest price will be 100 percent of the projected price and harvest price issued by FCIC; and

(3) If the harvest price exclusion is: (i) Not elected, your projected price is used to initially determine the revenue protection guarantee (per acre), and if the harvest price is greater than the projected price, the revenue protection guarantee (per acre) will be recomputed using your harvest price; or (ii) Elected, your projected price is used to compute your revenue protection guarantee (per acre); and

(4) Your projected price is used to calculate your premium, any replant payment, and any prevented planting payment; and

(5) If the projected price or harvest price cannot be calculated for the current crop year under the provisions contained in the Commodity Exchange Price Provisions:

(a) Unless adjusted or limited in accordance with your policy, the production guarantee or amount of insurance, coverage level, and price at which an indemnity will be determined for each unit will be those used to calculate your summary of coverage for each crop year.

(b) With respect to the insurance choices:

(i) You may change to another plan of insurance and change your coverage level or elect the harvest price exclusion by giving written notice to us not later than the sales closing date; or

(ii) For the harvest price:

(A) Revenue protection will continue to be available; and

(B) The harvest price will be determined and announced by FCIC.

(c) With respect to revenue protection, if available for the crop:

(1) You may change to another plan of insurance and change your coverage level or elect the harvest price exclusion by giving written notice to us not later than the sales closing date for the insured crop; and

(2) The percentage of the projected price selected by you multiplied by the projected
price issued by FCIC is your projected price that is used to compute the value of your production guarantee (per acre) and the value of the production to count; and

(3) Since the projected price may change each year, if you do not select a new percentage of the projected price on or before the sales closing date, we will assign a percentage of the projected price that was in effect for the preceding year (e.g., if you selected 100 percent of the projected price for the previous crop year and you do not select a new percentage for the current crop year, we will assign 100 percent for the current crop year).

(4) You may change to another plan of insurance other than revenue protection and yield protection (e.g., APH, dollar amount plans of insurance, etc.):

(i) In addition to the price election or amount of insurance available on the contract change date, we may provide an additional price election or amount of insurance no later than 15 days prior to the sales closing date.

(ii) You must select the additional price election or amount of insurance on or before the sales closing date for the insured crop.

(iii) If you elect the additional price election or amount of insurance, any claim settlement and amount of premium will be based on your additional price election or amount of insurance.

(2) You may change to another plan of insurance or change your coverage level, amount of insurance or percentage of the price election, as applicable, for the following crop year by giving written notice to us no later than 15 days prior to the sales closing date.

(ii) These additional price elections or amounts of insurance will not be less than those available on the contract change date.

(iii) If you elect the additional price election or amount of insurance, any claim settlement and amount of premium will be based on your additional price election or amount of insurance.

(3) Production and acreage for the prior crop year must be reported for each proposed optional unit by the production reporting date. If you do not provide the information stated above, the optional units will be combined into the basic unit.

(4) Appraisals obtained from only a portion of the acreage in a field that remains unharvested after the remainder of the crop within the field has been destroyed or put to another use will not be used to establish your actual yield unless representative samples are required to be left by you in accordance with the Crop Provisions.

(5) It is your responsibility to accurately report all information that is used to determine your approved yield.

(1) You must certify to the accuracy of this information on your production report.

(2) If you fail to accurately report any information or if you do not provide any required records, you will be subject to the provisions regarding misreporting contained in section 6(g), unless the information is corrected:

(i) On or before the production reporting date;

(ii) Because the incorrect information was the result of our error or the error of someone from USDA.

(3) If you do not have written verifiable records to support the information on your production report, you will receive an assigned yield in accordance with section 3(f)(1) and 7 CFR part 400, subpart G for those crop years for which you do not have such records.

(4) At any time we discover you have misreported any material information used to determine your approved yield or your approved yield is not correct, the following actions will be taken, as applicable:

(i) We will correct your approved yield for the crop year such information is not correct, and all subsequent crop years;

(ii) We will correct the unit structure, if necessary;
§ 457.8

(1) By including an assigned yield determined in accordance with section 3(f)(1) and 7 CFR part 400, subpart G, if the actual yield reported in the database is excessive for any crop year, as determined by FCIC under its procedures, and you do not provide verifiable records to support the yield in the database (If there are verifiable records for the yield in your database, the yield is significantly different from the other yields in the county or your other yields for the crop and you cannot prove there is a valid basis to support the differences in the yields, the yield will be the average of the yields for the crop or the applicable county transitional yield if you have no other yields for the crop); and

(2) By reducing it to an amount consistent with the average of the approved yields for other databases for your farming operation with the same crop, type, and practice or the county transitional yield, as applicable, if:

(i) The approved APH yield is greater than 115 percent of the average of the approved yields of all applicable databases for your farming operation that have actual yields in them or it is greater than 115 percent of the county transitional yield if no applicable databases exist for comparison;

(ii) The current year’s insurable acreage (including applicable prevented planting acreage) is greater than 400 percent of the average number of acres in the database or the acres contained in two or more individual years in the database are each less than 10 percent of the current year’s insurable acreage; and

(iii) The current year is a high-risk land, a written agreement may be requested to change such transitional yield or premium rate.

4. Contract Changes

(a) We may change the terms of your coverage under this policy from year to year.

(b) Any changes in policy provisions, amounts of insurance, premium rates, program dates, price elections or the Commodity Exchange Price Provisions, if applicable, can be viewed on RMA’s Web site not later than the contract change date contained in the Crop Provisions (except as allowed herein or as specified in section 5). We may only revise this information after the
contract change date to correct clear errors (e.g., the price for oats was announced at $25.00 per bushel instead of $2.50 per bushel or the final planting date should be May 10 but the final planting date in the Special Provisions states August 10).

(c) After the contract change date, all changes specified in section 4(b) will also be available upon request from your crop insurance agent. You will be provided, in writing, a copy of the changes to the Basic Provisions, Crop Provisions, Commodity Exchange Price Provisions, if applicable, and Special Provisions not later than 30 days prior to the cancellation date for the insured crop. If available from us, you may elect to receive these documents and changes electronically. Acceptance of the changes will be conclusively presumed in the absence of notice from you to change or cancel your insurance coverage.

5. [Reserved]

6. Report of Acreage

(a) An annual acreage report must be submitted to us on our form for each insured crop in the county on or before the acreage reporting date contained in the Special Provisions, except as follows:

(1) If you insure multiple crops with us that have final planting dates on or after August 15 but before December 31, you must submit an acreage report for each crop on or before the latest applicable acreage reporting date for such crop; and

(2) If you insure multiple crops with us that have final planting dates on or after December 31 but before August 15, you must submit an acreage report for each crop on or before the latest applicable acreage reporting date for such crops.

(3) Notwithstanding the provisions in sections 6(a)(1) and (2):

(i) If the Special Provisions designate separate planting periods for a crop, you must submit an acreage report for each planting period on or before the acreage reporting date contained in the Special Provisions for the planting period; and

(ii) If planting of the insured crop continues after the final planting date or you are prevented from planting during the late planting period, the acreage reporting date will be the later of:

(A) The acreage reporting date contained in the Special Provisions;

(B) The date determined in accordance with sections (a)(1) or (2); or

(C) Five (5) days after the end of the late planting period for the insured crop, if applicable.

(b) If you do not have a share in an insured crop in the county for the crop year, you must submit an acreage report, on or before the acreage reporting date, so indicating.

(c) Your acreage report must include the following information, if applicable:

(1) The amount of acreage of the crop in the county (insurable and not insurable) in which you have a share and the date the insured crop was planted on the unit as follows:

(i) The last date any timely planted acreage was planted and the number of acres planted by such date; and

(ii) The date of planting and the number of acres planted per day for acreage planted during the late planting period (If you fail to report the number of acres planted on a daily basis, all acreage planted in the late planting period will be presumed to have been planted on the last day planting took place in the late planting period for the purposes of section 16);

(2) Your share at the time coverage begins;

(3) The practice; and

(4) The type; and

(5) The land identifier for the crop acreage (e.g., legal description, FSA farm serial number or common land unit number if provided by you to FSA, etc.) as required on our form.

(d) Regarding the ability to revise an acreage report you have submitted to us:

(1) For planted acreage, you cannot revise any information pertaining to the planted acreage after the acreage reporting date without our consent (Consent may only be provided when no cause of loss has occurred; our appraisal has determined that the insured crop will produce at least 90 percent of the yield used to determine your guarantee or the amount of insurance for the unit (including reported and unreported acreage), except when there are unreported units (see section 6(f)); the information on the acreage report is clearly transposed; you provide adequate evidence that we or someone from USDA have committed an error regarding the information on your acreage report; or if expressly permitted by the policy);

(2) For prevented planting acreage:

(i) On or before the acreage reporting date, you can change any information on any initially submitted acreage report, except as provided in section 6(d)(2)(i) (e.g., you can correct the reported share, add acreage of the insured crop that was prevented from being planted, etc.);

(ii) After the acreage reporting date, you cannot revise any information on the acreage report (e.g., if you have failed to report prevented planting acreage on or before the acreage reporting date, you cannot revise it after the acreage reporting date to include prevented planting acreage) but we will revise information that is clearly transposed or if you provide adequate evidence that we or someone from USDA have committed an error regarding the information on your acreage report; and

(iii) You cannot revise your initially submitted acreage report at any time to change
the insured crop, or type, that was reported as prevented from being planted;

(3) You may request an acreage measurement from FSA or a business that provides such a service prior to the acreage reporting date, submit documentation of such request and an acreage report with estimated acreage by the acreage reporting date, and if the acreage measurement shows the estimated acreage was incorrect, we will revise your acreage report to reflect the correct acreage:

(i) If an acreage measurement is only requested for a portion of the acreage within a unit, you must separately designate the acreage for which an acreage measurement has been requested;

(ii) If an acreage measurement is not provided to us by the time we receive a notice of loss, we may:

(A) Defer finalization of the claim until the measurement is completed, and:

(1) Make all necessary loss determinations, except the acreage measurement; and

(2) Finalize the claim in accordance with applicable policy provisions after you provide the acreage measurement to us (If you fail to provide the measurement, your claim will not be paid); or

(B) Elect to measure the acreage, and:

(1) Finalize your claim in accordance with applicable policy provisions; and

(2) Estimated acreage under this section will not be accepted from you for any subsequent acreage report; and

(iii) Premium will still be due in accordance with sections 2(e) and 7. If the acreage is not measured as specified in section 6(d)(1) and the acreage measurement is not provided to us at least 15 days prior to the premium billing date, your premium will be based on the estimated acreage and will be revised, if necessary, when the acreage measurement is provided. If the acreage measurement is not provided by the termination date, you will be precluded from providing any estimated acreage for all subsequent crop years.

(4) If there is an irreconcilable difference between:

(i) The acreage measured by FSA or a measuring service and our on-farm measurement, our on-farm measurement will be used; or

(ii) The acreage measured by a measuring service, other than our on-farm measurement, and FSA, the FSA measurement will be used; and

(e) We may elect to determine all premiums and indemnities based on the information you submit on the acreage report or upon the factual circumstances we determine to have existed, subject to the provisions contained in section 6(g).

(f) If you do not submit an acreage report by the acreage reporting date, or if you fail to report all units, we may elect to determine by unit the insurable crop acreage, share, type and practice, or to deny liability on such units. If we deny liability for the unreported units, your share of any production from the unreported units will be allocated, for loss purposes only, as production to count to the reported units in proportion to the liability on each reported unit. However, such production will not be allocated to prevented planting acreage or otherwise affect any prevented planting payment.

(g) You must provide all required reports and you are responsible for the accuracy of all information contained in those reports. You should verify the information on all such reports prior to submitting them to us.

(1) Except as provided in section 6(g)(2), if you submit information on any report that is different than what is determined to be correct and such information results in:

(i) A lower liability than the actual liability determined, the production guarantee or amount of insurance on the unit will be reduced to an amount consistent with the reported information (In the event the insurable acreage is under-reported for any unit, all production or value from insurable acreage in that unit will be considered production or value to count in determining the indemnity); or

(ii) A higher liability than the actual liability determined, the information contained in the acreage report will be revised to be consistent with the correct information.

(2) If your share is misreported and the share is:

(i) Under-reported, any claim will be determined using the share you reported; or

(ii) Over-reported, any claim will be determined using the share we determine to be correct.

(h) If we discover you have incorrectly reported any information on the acreage report for any crop year, you may be required to provide documentation in subsequent crop years substantiating your report of acreage for those crop years, including, but not limited to, an acreage measurement service at your own expense. If the correction of any misreported information would affect an indemnity, prevented planting payment or re-plant payment that was paid in a prior crop year, such claim will be adjusted and you will be required to repay any overpaid amounts.

(i) Errors in reporting units may be corrected by us at the time of adjusting a loss to reduce our liability and to conform to applicable unit division guidelines.
7. Annual Premium and Administrative Fees
   (a) The annual premium is earned and payable at the time coverage begins. You will be billed for the premium and administrative fee not earlier than the premium billing date specified in the Special Provisions.
   (b) Premium or administrative fees owed by you will be offset from an indemnity or prevented planting payment due you in accordance with section 2(e).
   (c) The annual premium amount is determined, as applicable, by either:
      (1) Multiplying the production guarantee per acre times your price election or your projected price, as applicable, times the premium rate, times any premium adjustment percentages that may apply; or
      (2) Multiplying your amount of insurance per acre times the premium rate, times the insured acreage, times your share at the time coverage begins, and times any premium adjustment percentages that may apply;
   (d) The information needed to determine the premium rate and any premium adjustment percentages that may apply are contained in the actuarial documents or an approved written agreement.
   (e) In addition to the premium charged:
      (1) You, unless otherwise authorized in 7 CFR part 400, must pay an administrative fee each crop year of $30 per crop per county for all levels of coverage in excess of catastrophic risk protection.
      (2) The administrative fee must be paid no later than the time that premium is due.
      (3) Payment of an administrative fee will not be required if you file a bona fide zero acreage report on or before the acreage reporting date for the crop. If you falsely file a zero acreage report you may be subject to criminal and administrative sanctions.
      (4) The administrative fee will be waived if you request it and:
         (i) You qualify as a limited resource farmer; or
         (ii) You were insured prior to the 2005 crop year or for the 2005 crop year and your administrative fee was waived for one or more of those crop years because you qualified as a limited resource farmer under a policy definition previously in effect, and you remain qualified as a limited resource farmer under the definition that was in effect at the time the administrative fee was waived.
      (5) Failure to pay the administrative fees when due may make you ineligible for certain other USDA benefits.
      (6) If the amount of premium (gross premium less premium subsidy paid on your behalf by FCIC) and administrative fee you are required to pay for any acreage exceeds the liability for the acreage, coverage for those acres will not be provided (no premium or administrative fee will be due and no indemnity will be paid for such acreage).

8. Insured Crop
   (a) The insured crop will be that shown on your accepted application and as specified in the Crop Provisions or Special Provisions and must be grown on insurable acreage.
   (b) A crop which will NOT be insured will include, but will not be limited to, any crop:
      (1) That is not grown on planted acreage (except for the purposes of prevented planting coverage), or that is a type, class or variety or where the conditions under which the crop is planted are not generally recognized for the area (For example, where agricultural experts determine that planting a non-irrigated corn crop after a failed small grain crop on the same acreage in the same crop year is not appropriate for the area);
      (2) For which the information necessary for insurance (price election, amount of insurance, projected price and harvest price, as applicable, premium rate, etc.) is not included in the actuarial documents, unless such information is provided by a written agreement in accordance with section 18;
      (3) That is a volunteer crop;
      (4) Planted following the same crop on the same acreage and the first planting of the crop has been harvested in the same crop year unless specifically permitted by the Crop Provisions or the Special Provisions (For example, the second planting of grain sorghum would not be insurable if grain sorghum had already been planted and harvested on the same acreage during the crop year);
      (5) That is planted for the development or production of hybrid seed or for experimental purposes, unless permitted by the Crop Provisions or by written agreement to insure such crop; or
      (6) That is used solely for wildlife protection or management. If the lease states that specific acreage must remain unharvested, your share will be reduced by such percentage.

(c) Although certain policy documents may state that a crop type, class, variety or practice is not insurable, it does not mean all other crop types, classes, varieties or practices are insurable. To be insurable the crop type, class, variety or practice must meet all the conditions in this section.

9. Insurable Acreage
   (a) All acreage planted to the insured crop in the county in which you have a share:
      (1) Except as provided in section 9(a)(2), is insurable if the acreage has been planted and harvested or insured (including insured acreage that was prevented from being planted) in any one of the three previous crop years.
§ 457.8 7 CFR Ch. IV (1-1-14 Edition)

Acreage that has not been planted and harvested (grazing is not considered harvested for the purposes of section 9(a)(1)) or insured in at least one of the three previous crop years may still be insurable if:

(i) Such acreage was not planted:
(A) In at least two of the three previous crop years to comply with any other USDA program;
(B) Due to the crop rotation, the acreage would not have been planted in the previous three years (e.g., a crop rotation of corn, soybeans, and alfalfa; and the alfalfa remained for four years before the acreage was planted to corn again); or
(C) Because a perennial tree, vine, or bush crop was on the acreage in at least two of the previous three crop years;

(ii) Such acreage constitutes five percent or less of the insured planted acreage in the unit;

(iii) Such acreage was not planted or harvested because it was pasture or rangeland, the crop to be insured is also pasture or rangeland, and the Crop Provisions, Special Provisions, or a written agreement specifically allow insurance for such acreage; or

(iv) The Crop Provisions, Special Provisions, or a written agreement specifically allow insurance for such acreage; or

(v) The acreage is interplanted, unless it was pasture or rangeland, and the Crop Provisions specifically allow insurance for such acreage; or

(B) A written agreement specifically allows insurance for such acreage;

(vi) The acreage is otherwise restricted by the Crop Provisions or Special Provisions;

(vii) The acreage is planted in any manner other than as specified in the policy provisions for the crop unless a written agreement specifically allows insurance for such planting;

(viii) The acreage is of a second crop, if you elect not to insure such acreage when an indemnity for a first insured crop may be subject to reduction in accordance with the provisions of section 15 and you intend to collect an indemnity payment that is equal to 100 percent of the insurable loss for the first insured crop acreage. This election must be made on a first insured crop unit basis (e.g., if the first insured crop unit contains 40 planted acres that may be subject to an indemnity reduction, then no second crop can be insured on any of the 40 acres). In this case:

(A) If the first insured crop is insured under this policy, you must provide written notice to us of your election not to insure acreage of a second crop at the time the first insured crop acreage is released by us (if no acreage in the first insured crop unit is released, this election must be made by the earlier of the acreage reporting date for the second crop or when you sign the claim for indemnity for the first insured crop) or, if the first insured crop is insured under the Group Risk Protection Plan of Insurance or successor provisions (7 CFR part 407), this election must be made before the second crop insured under this policy is planted, and if you fail to provide such notice, the second crop acreage will be insured in accordance with the applicable policy provisions and you must repay any overpaid indemnity for the first insured crop;

(B) In the event a second crop is planted and insured with a different insurance provider, or planted and insured by a different person, you must provide written notice to each insurance provider that a second crop was planted on acreage on which you had a first insured crop; and

(C) You must report the crop acreage that will not be insured on the applicable acreage report; or

(D) You have produced and harvested the insured crop following a second crop or following an insured crop that is prevented from being planted after a first insured crop, unless it is a practice that is generally recognized by agricultural experts or organic agricultural experts for the area to plant three or more crops for harvest on the same acreage in the same crop year, and additional coverage insurance provided under the authority of the Act is offered for the third or subsequent crop in the same crop year. Insurance will only be provided for a third or subsequent crop as follows:

(A) You must provide records acceptable to us that show:

(i) You have produced and harvested the insured crop following two other crops harvested on the same acreage in the same crop year in at least two of the last four years in which you produced the insured crop; or
(2) The applicable acreage has had three or more crops produced and harvested on it in the same crop year in at least two of the last four years in which the insured crop was grown on the acreage; and

(B) The amount of insurable acreage will not exceed 100 percent of the greatest number of acres for which you provide the records required in section 9(a)(2)(A).

(b) If insurance is provided for an irrigated practice, you must report as irrigated only that acreage for which you have adequate facilities and adequate water, or the reasonable expectation of receiving adequate water at the time coverage begins, to carry out a good irrigation practice. If you knew or had reason to know that your water may be reduced before coverage begins, no reasonable expectation exists.

(c) Notwithstanding the provisions in section 9(b)(2), if acreage is irrigated and a premium rate is not provided for an irrigated practice, you may either report and insure the irrigated acreage as “non-irrigated,” or report the irrigated acreage as not insured. (If you elect to insure such acreage under a non-irrigated practice, your irrigated yield will only be used to determine your approved yield if you continue to use a good irrigation practice. If you do not use a good irrigation practice, you will receive a yield determined in accordance with section 9(b)(3)).

(d) We may restrict the amount of acreage that we will insure to the amount allowed under any acreage limitation program established by the United States Department of Agriculture if we notify you of that restriction prior to the sales closing date.

(e) Notwithstanding the provisions in section 9(a)(1), if the Governor of a State designated within the Prairie Pothole National Priority Area elects to make section 508(o) of the Act effective for the State, any native sod acreage greater than five acres located in a county contained within the Prairie Pothole National Priority Area that has been tilled after May 22, 2008, is not insurable for the first five crop years of planting following the date the native sod acreage is tilled.

(1) If the Governor makes this election after you have received an indemnity or other payment for native sod acreage, you will be required to repay the amount received and any premium for such acreage will be refunded to you.

(2) If we determine you have tilled less than five acres of native sod a year for more than one crop year, we will add all the native sod acreage tilled after May 22, 2008, and all such acreage will be ineligible for insurance for the first five crop years of planting following the date the cumulative native sod acreage tilled exceeds five acres.

10. Share Insured

(a) Insurance will attach:

(1) Only if the person completing the application has a share in the insured crop; and

(2) Only to that person's share, except that insurance may attach to another person's share of the insured crop if the other person has a share of the crop and:

(i) The application clearly states the insurance is requested for a person other than an individual (e.g., a partnership or a joint venture); or

(ii) The application clearly states you as a landlord will insure your tenant's share, or you as a tenant will insure your landlord's share. If you as a landlord will insure your tenant's share, or you as a tenant will insure your landlord's share, you must provide evidence of the other party's approval (lease, power of attorney, etc.) and such evidence will be retained by us:

(A) You also must clearly set forth the percentage shares of each person on the acreage report; and

(B) For each landlord or tenant, you must report the landlord's or tenant's social security number, employer identification number, or other identification number we assigned for the purposes of this policy, as applicable.

(b) With respect to your share:

(1) We will consider to be included in your share under your policy, any acreage or interest reported by or for:

(i) Your spouse, unless such spouse can prove he/she has a separate farming operation, which includes, but is not limited to, separate land (transfers of acreage from one spouse to another is not considered separate land), separate capital, separate inputs, separate accounting, and separate maintenance of proceeds; or

(ii) The application clearly states you as a landlord will insure your tenant's share, or you as a landlord will insure your tenant's share, or you as a tenant will insure your landlord's share, you must provide evidence of the other party's approval (lease, power of attorney, etc.) and such evidence will be retained by us:

(A) You also must clearly set forth the percentage shares of each person on the acreage report; and

(B) For each landlord or tenant, you must report the landlord's or tenant's social security number, employer identification number, or other identification number we assigned for the purposes of this policy, as applicable.

(c) Acreage rented for a percentage of the crop, or a lease containing provisions for both a minimum payment (such as a specified amount of cash, bushels, pounds, etc.,)
and a crop share will be considered a crop share lease.

(d) Acreage rented for cash, or a lease containing provisions for either a minimum payment or a crop share (such as a 50/50 share or $100.00 per acre, whichever is greater) will be considered a cash lease.

11. Insurance Period

(a) Except for prevented planting coverage (see section 17), coverage begins on each unit or part of a unit at the later of:

(1) The date we accept your application;

(For the purposes of this paragraph, the date of acceptance is the date that you submit a properly executed application in accordance with section 2);

(2) The date the insured crop is planted; or

(3) The calendar date contained in the Crop Provisions for the beginning of the insurance period.

(b) Coverage ends on each unit or part of a unit at the earliest of:

(1) Total destruction of the insured crop;

(2) Harvest of the insured crop;

(3) Final adjustment of a loss on a unit;

(4) The calendar date contained in the Crop Provisions or Special Provisions for the end of the insurance period;

(5) Abandonment of the insured crop; or

(6) As otherwise specified in the Crop Provisions.

(c) Except as provided in the Crop Provisions or applicable endorsement, in addition to the requirements of section 11(b), coverage ends on any acreage within a unit once any event specified in section 11(b) occurs on that acreage. Coverage only remains in effect on acreage that has not been affected by an event specified in section 11(b).

12. Causes of Loss

Insurance is provided only to protect against unavoidable, naturally occurring events. A list of the covered naturally occurring events is contained in the applicable Crop Provisions. All other causes of loss, including but not limited to the following, are not covered:

(a) Any act by any person that affects the yield, quality or price of the insured crop (e.g., chemical drift, fire, terrorism, etc.);

(b) Failure to follow recognized good farming practices for the insured crop;

(c) Water that is contained by or within structures that are designed to contain a specific amount of water, such as dams, locks or reservoir projects, etc., on any acreage when such water stays within the designed limits (For example, a dam is designed to contain water to an elevation of 1,200 feet but you plant a crop on acreage at an elevation of 1,100 feet. A storm causes the water behind the dam to rise to an elevation of 1,200 feet. Under such circumstances, the resulting damage would not be caused by an insurable cause of loss. However, if you planted on acreage that was above 1,200 feet elevation, any damage caused by water that exceeded that elevation would be caused by an insurable cause of loss);

(d) Failure or breakdown of the irrigation equipment or facilities, or the inability to prepare the land for irrigation using your established irrigation method (e.g., furrow irrigation), unless the failure, breakdown or inability is due to a cause of loss specified in the Crop Provisions.

(1) You must make all reasonable efforts to restore the equipment or facilities to proper working order within a reasonable amount of time unless we determine it is not practical to do so.

(2) Cost will not be considered when determining whether it is practical to restore the equipment or facilities;

(e) Failure to carry out a good irrigation practice for the insured crop, if applicable;

(f) Any cause of loss that results in damage that is not evident or would not have been evident during the insurance period, including, but not limited to, damage that only becomes evident after the end of the insurance period unless expressly authorized in the Crop Provisions. Even though we may not inspect the damaged crop until after the end of the insurance period, damage due to insured causes that would have been evident during the insurance period will be covered.

13. Replanting Payment

(a) If allowed by the Crop Provisions, a replanting payment may be made on an insured crop replanted after we have given consent and the acreage replanted is at least the lesser of 20 acres or 20 percent of the insured planted acreage for the unit (as determined on the final planting date or within the late planting period if a late planting period is applicable). If the crops to be replanted are in a whole-farm unit, the 20 acres or 20 percent requirement is to be applied separately to each crop to be replanted in the whole-farm unit.

(b) No replanting payment will be made on acreage:

(1) On which our appraisal establishes that production will exceed the level set by the Crop Provisions;

(2) Initially planted prior to the earliest planting date established by the Special Provisions; or

(3) On which one replanting payment has already been allowed for the crop year.

(c) The replanting payment per acre will be:

(1) The lesser of your actual cost for replanting or the amount specified in the Crop Provisions or Special Provisions; or

(2) If the Crop Provisions or Special Provisions specify that your actual cost will not be used to determine your replant payment,
the amount determined in accordance with the Crop Provisions or Special Provisions.

(d) No replanting payment will be paid if we determine it is not practical to replant.

14. Duties in the Event of Damage, Loss, Abandonment, Destruction, or Alternative Use of Crop or Acreage

Your Duties—

(a) In the case of damage or loss of production or revenue to any insured crop, you must protect the crop from further damage by providing sufficient care.

(b) Notice provisions:

(1) For a planted crop, when there is damage or loss of production, you must give us notice, by unit, within 72 hours of your initial discovery of damage or loss of production (but not later than 15 days after the end of the insurance period, even if you have not harvested the crop).

(2) For crops for which revenue protection is elected, if there is no damage or loss of production, you must give us notice not later than 45 days after the latest date the harvest price is released for any crop in the unit where there is a revenue loss.

(3) In the event you are prevented from planting an insured crop that has prevented planting coverage, you must notify us within 72 hours after:

(i) The final planting date, if you do not intend to plant the insured crop during the late planting period or if a late planting period is not applicable; or

(ii) You determine you will not be able to plant the insured crop within any applicable late planting period.

(d) Consent:

(1) Except as otherwise provided in your policy, you must submit a claim declaring the amount of your loss by the dates shown in section 14(e)(3), unless you:

(i) Request an extension in writing by such date and we agree to such request (Extensions will only be granted if the amount of the loss can not be determined within such time period because the information needed to determine the amount of the loss is not available); or

(ii) Have harvested farm-stored grain production and elect, in writing, to delay measurement of your farm-stored production and settlement of any potential associated claim for indemnity (Extensions will be granted for this purpose up to 180 days after the end of the insurance period).

(A) For policies that require APH, if such extension continues beyond the date you are required to submit your production report, you will be assigned the previous year’s approved yield as a temporary yield in accordance with applicable procedures.

(B) Any extension does not extend any date specified in the policy by which premiums, administrative fees, or other debts owed must be paid.
(C) Damage that occurs after the end of the insurance period (for example, while the harvested crop production is in storage) is not covered; and
(ii) Failure to timely submit a claim or provide the required information necessary to determine the amount of the claim will result in no indemnity, prevented planting payment or replant payment:
(i) Even though no indemnity or replant payment is due, you will still be required to pay the premium due under the policy for the unit; or
(ii) Failure to timely submit a prevented planting claim will result in no prevented planting coverage and no premium will be due.
(3) You must submit a claim not later than:
(i) For policies other than revenue protection, 60 days after the date the insurance period ends for all acreage in the unit (When there is acreage in the unit where the insurance period ended on different dates, it is the last date the insurance period ends on the unit. For example, if a unit has corn acreage that was put to another use on July 15 and corn acreage where harvest was completed on September 30, the claim must be submitted not later than 60 days after September 30); or
(ii) For revenue protection, the later of:
(A) 60 days after the last date the harvest price is released for any crop in the unit; or
(B) The date determined in accordance with section 14(e)(3)(i).
(4) To receive any indemnity (or receive the rest of an indemnity in the case of acreage that is planted to a second crop), prevented planting payment or replant payment, you must, if applicable:
(i) Provide:
(A) A complete harvesting, production, and marketing record of each insured crop by unit including separate records showing the same information for production from any acreage not insured.
(B) Records as indicated below if you insure any acreage that may be subject to an indemnity reduction as specified in section 15(e)(2):
(1) Separate records of production from such acreage for all insured crops planted on the acreage (e.g., if you have an insurable loss on 10 acres of wheat and subsequently plant cotton on the same 10 acres, you must provide records of the wheat and cotton production on the 10 acres separate from any other wheat and cotton production that may be planted in the same unit). If you fail to provide separate records for such acreage, we will allocate the production of each crop to the acreage in proportion to our liability for the acreage;
(2) If there is no loss on the unit that includes acreage of the second crop, no separate records need to be submitted for the second crop and you can receive the rest of the indemnity for the first insured crop.
(ii) We recognize and apply the loss adjustment procedures established or approved by the Federal Crop Insurance Corporation.
(5) Any other information we may require to settle the claim.
(i) Cooperate with us in the investigation or settlement of the claim, and, as often as we reasonably require:
(A) Show us the damaged crop;
(B) Allow us to remove samples of the insured crop; and
(C) Provide us with records and documents we request and permit us to make copies.
(ii) Establish:
(A) The total production or value received for the insured crop on the unit;
(B) That any loss occurred during the insurance period;
(C) That the loss was caused by one or more of the insured causes specified in the Crop Provisions; and
(D) That you have complied with all provisions of this policy.
(iv) Upon our request, or that of any USDA employee authorized to conduct investigations of the crop insurance program, submit to an examination under oath.
(5) Failure to comply with any requirement contained in section 14(e)(4) will result in denial of the claim and any premium will still be owed, unless the claim denied is for prevented planting.
Our Duties—
(f) If you have complied with all the policy provisions, we will pay your loss within 30 days after the later of:
(1) We reach agreement with you;
(2) Completion of arbitration, reconsideration of determinations regarding good farming practices or any other appeal that results in an award in your favor, unless we exercise our right to appeal such decision;
(3) Completion of any investigation by USDA, if applicable, of your current or any past claim for indemnity if no evidence of wrongdoing has been found (If any evidence of wrongdoing has been discovered, the amount of any indemnity, prevented planting or replant overpayment as a result of such wrongdoing may be offset from any indemnity or prevented planting payment owed to you; or
(4) The entry of a final judgment by a court of competent jurisdiction.
(g) In the event we are unable to pay your loss within 30 days, we will give you notice of our intentions within the 30-day period.
(h) We may defer the adjustment of a loss until the amount of loss can be accurately determined. We will not pay for additional damage resulting from your failure to provide sufficient care for the crop during the deferral period.
(i) We recognize and apply the loss adjustment procedures established or approved by the Federal Crop Insurance Corporation.
(j) For revenue protection, we may make preliminary indemnity payments for crop
production losses prior to the release of the harvest price if you have not elected the harvest price exclusion.

(1) First, we may pay an initial indemnity based on your projected price, in accordance with the applicable Crop Provisions provided that your production to count and share have been established; and

Second, if the harvest price is released, and if it is not equal to the projected price, we will recalculate the indemnity payment and pay any additional indemnity that may be due.

15. Production Included in Determining an Indemnity and Payment Reductions.

(a) The total production to be counted for a unit will include all production determined in accordance with the policy.

(b) Appraised production will be used to calculate your claim if you are not going to harvest your acreage. Such appraisals may be conducted after the end of the insurance period. If you harvest the crop after the crop has been appraised:

(i) You must provide us with the amount of harvested production (If you fail to provide verifiable records of harvested production, no indemnity will be paid and you will be required to return any previously paid indemnity for the unit that was based on an appraised amount of production); and

(ii) If the harvested production exceeds the appraised production, claims will be adjusted using the harvested production, and you will be required to repay any overpaid indemnity; or

(iii) If the harvested production is less than the appraised production, and:

(A) You harvest after the end of the insurance period, your appraised production will be used to adjust the loss unless you can prove that no additional causes of loss or deterioration of the crop occurred after the end of the insurance period; or

(B) You harvest before the end of the insurance period, your harvested production will be used to adjust the loss.

(c) If you elect to exclude hail and fire as insured causes of loss and the insured crop is damaged by hail or fire, appraisals will be made as described in our form used to exclude fire and hail.

(d) The amount of an indemnity that may be determined under the applicable provisions of your policy may be reduced by an amount, determined in accordance with the Crop Provisions or Special Provisions, to reflect out-of-pocket expenses that were not incurred by you as a result of not planting, caring for, or harvesting the crop. Indemnities paid for acreage prevented from being planted will be based on a reduced guarantee as provided for in the policy and will not be further reduced to reflect expenses not incurred.

(e) With respect to acreage where you have suffered an insurable loss to planted acreage of your first insured crop in the crop year, except in the case of double cropping described in section 15(h):

(1) You may elect to not plant or to plant and not insure a second crop on the same acreage for harvest in the same crop year and collect an indemnity payment that is equal to 100 percent of the insurable loss for the first insured crop; or

(ii) Be responsible for premium that is 35 percent of the premium that you would otherwise owe for the first insured crop; and

(iii) If the second crop does not suffer an insurable loss:

(A) Collect an indemnity payment for the other 65 percent of insurable loss that was not previously paid under section 15(e)(2)(i); and

(B) Be responsible for the remainder of the premium for the first insured crop that you did not pay under section 15(e)(2)(i).

(f) With respect to acreage where you were prevented from planting the first insured crop in the crop year, except in the case of double cropping described in section 15(h):

(1) If a second crop is not planted on the same acreage for harvest in the same crop year, you may collect a prevented planting payment that is 35 percent of the prevented planting payment for the acreage for the first insured crop;

(ii) If a second crop is planted on the same acreage for harvest in the same crop year (you will pay the full premium and, if there is an insurable loss to the second crop, receive the full amount of indemnity that may be due for the second crop, regardless of whether there is a subsequent crop planted on the same acreage) and:

(A) If the second crop is not planted on or before the final planting date or during the late planting period (as applicable) for the first insured crop, you may collect a prevented planting payment that is 35 percent of the prevented planting payment for the first insured crop; and

(B) Be responsible for premium that is 35 percent of the premium that you would otherwise owe for the first insured crop.

(g) The reduction in the amount of indemnity or prevented planting payment and premium specified in sections 15(e) and 15(f), as applicable, will apply:
§ 457.8 7 CFR Ch. IV (1-1-14 Edition)

(1) Notwithstanding the priority contained in the Agreement to Insure section, which states that the Crop Provisions have priority over the Basic Provisions when a conflict exists, the records you provided are from being planted, as applicable.
(2) If the records you provided are from acreage that another producer double cropped in at least two of the last four crop years, you may only use the history of double cropping to any acreage of the insured crop in the county (e.g., if you have double cropped 100 acres of wheat in the county and you acquire an additional 100 acres in the county, you can apply that history of double cropped acreage to any of the 200 acres in the county as long as it does not exceed 100 acres); or
(3) If the records you provided are from acreage that another neighbor double cropped in at least two of the last four crop years, you may only use the history of double cropping to any acreage of the insured crop in the county (e.g., if a neighbor has double cropped 100 acres of wheat and soybeans in the county and you acquire your neighbor's 100 double cropped acres and an additional 100 acres in the county, you can only apply your neighbor's history of double cropped acreage to the same 100 acres that your neighbor double cropped).

16. Late Planting

Unless limited by the Crop Provisions, insurance will be provided for acreage planted to the insured crop after the final planting date in accordance with the following:
(a) The production guarantee or amount of insurance for each acre planted to the insured crop during the late planting period will be reduced by 1 percent per day for each day planted after the final planting date.
(b) Acreage planted after the late planting period (or after the final planting date for crops that do not have a late planting period) may be insured as follows:
(1) The production guarantee or amount of insurance for each acre planted to the insured crop that is timely planted is reduced by 1 percent per day for each day planted after the final planting date and, if applicable, prior to the end of the late planting period for the first insured crop.
(2) The second or more crops are customarily planted after the first insured crop for harvest on the same acreage in the same crop year;
(3) Additional coverage insurance offered under the authority of the Act is available in the county on the two or more crops that are double cropped;
(4) You provide records acceptable to us of acreage and production that show you have double cropped acreage for at least two or the last four crop years in which the first insured crop was planted, or that show the applicable acreage was double cropped in at least two of the last four crop years in which the first insured crop was grown on it; and
(5) In the case of prevented planting, the prevent, the second crop is not planted on or prior to the final planting date or, if applicable, prior to the end of the late planting period for the first insured crop.
(6) The receipt of a full indemnity or prevented planting payment on both crops that are double cropped is limited to the number of acres for which you can demonstrate you have double cropped or that have been historically double cropped as specified in section 15(h).
(1) If the records you provided are from acreage you double cropped in at least two of the last four crop years, you may apply your history of double cropping to any acreage of the insured crop in the county (e.g., if you have double cropped 100 acres of wheat and soybeans in the county and you acquire an additional 100 acres in the county, you can apply that history of double cropped acreage to any of the 200 acres in the county as long as it does not exceed 100 acres); or
(2) If the records you provided are from acreage that another producer double cropped in at least two of the last four crop years, you may only use the history of double cropping to any acreage of the insured crop in the county (e.g., if you have double cropped 100 acres of wheat and soybeans in the county and you acquire an additional 100 acres in the county, you can apply that history of double cropped acreage to any of the 200 acres in the county as long as it does not exceed 100 acres); or
(3) If the records you provided are from acreage that another neighbor double cropped in at least two of the last four crop years, you may only use the history of double cropping to any acreage of the insured crop in the county (e.g., if a neighbor has double cropped 100 acres of wheat and soybeans in the county and you acquire your neighbor's 100 double cropped acres and an additional 100 acres in the county, you can only apply your neighbor's history of double cropped acreage to the same 100 acres that your neighbor double cropped).
Federal Crop Insurance Corporation, USDA § 457.8

prevented planting coverage level percentage;

(2) Planting on such acreage must have been prevented by the final planting date (or during the late planting period, if applicable) by an insurable cause occurring within the insurance period for prevented planting coverage; and

(c) The premium amount for insurable acreage specified in this section will be the same as that for timely planted acreage. If the amount of premium you are required to pay (gross premium less our subsidy) for such acreage exceeds the liability, coverage for those acres will not be provided (no premium will be due and no indemnity will be paid).

(d) Any acreage on which an insured cause of loss is a material factor in preventing completion of planting, as specified in the definition of “planted acreage” (e.g., seed is broadcast on the soil surface but cannot be incorporated) will be considered as acreage planted after the final planting date and the production guarantee will be calculated in accordance with section 16(b)(1).  

17. Prevented Planting

(a) Unless limited by the policy provisions, a prevented planting payment may be made to you for eligible acreage if:

(1) You are prevented from planting the insured crop on insurable acreage by an insured cause of loss that occurs:

(i) On or after the sales closing date contained in the Special Provisions for the insured crop in the county for the crop year the application for insurance is accepted; or

(ii) For any subsequent crop year, on or after the sales closing date for the previous crop year for the insured crop in the county, provided insurance has been in force continuously since that date. Cancellation for the purpose of transferring the policy to a different insurance provider for the subsequent crop year will not be considered a break in continuity for the purpose of the preceding sentence;

(2) You include on your acreage report any insurable acreage of the insured crop that was prevented from being planted; and

(3) You did not plant the insured crop during or after the late planting period. Acreage planted to the insured crop during or after the late planting period is covered under the late planting provisions.

(b) The actuarial documents may contain additional levels of prevented planting coverage that you may purchase for the insured crop:

(1) Such purchase must be made on or before the sales closing date.

(2) If you do not purchase one of those additional levels by the sales closing date, you will receive the prevented planting coverage specified in the Crop Provisions.

(3) If you have a Catastrophic Risk Protection Endorsement for any crop, the additional levels of prevented planting coverage will not be available for that crop.

(d) Prevented planting coverage will be provided against:

(1) Drought, failure of the irrigation water supply, failure or breakdown of irrigation equipment or facilities, or the inability to prepare the land for irrigation using your established irrigation method, due to an insured cause of loss only if, on the final planting date (or within the late planting period if you elect to try to plant the crop), you provide documentation acceptable to us to establish:

(i) For non-irrigated acreage, the area that is prevented from being planted has insufficient soil moisture for germination of seed or progress toward crop maturity due to a prolonged period of dry weather. The documentation for prolonged period of dry weather must be verifiable using information collected by sources whose business it is to record and study the weather, including, but not limited to, local weather reporting stations of the National Weather Service; or

(ii) For irrigated acreage:

(A) Due to an insured cause of loss, there is not a reasonable expectation of having adequate water to carry out an irrigated practice or you are unable to prepare the land for irrigation using your established irrigation method;

(B) You knew or had reason to know on the final planting date or during the late planting period that your water will be reduced, no reasonable expectation exists; and

(2) Available water resources will be verified using information from State Departments of Water Resources, U.S. Bureau of Reclamation, Natural Resources Conservation Service or other sources whose
business includes collection of water data or regulation of water resources; or
(B) The irrigation equipment or facilities have failed or broken down if such failure or breakdown was to an insured cause of loss specified in section 12(d).

(2) Causes other than drought, failure of the irrigation water supply, failure or breakdown of the irrigation equipment or facilities, or your inability to prepare the land for irrigation using your established irrigation method, provided the cause of loss is specified in the Crop Provisions. However, if it is possible for you to plant on or prior to the final planting date when other producers in the area are planting and you fail to plant, no prevented planting payment will be made.

(e) The maximum number of acres that may be eligible for a prevented planting payment for any crop will be determined as follows:

(1) The total number of acres eligible for prevented planting coverage for all crops cannot exceed the number of acres of crop land in your farming operation for the crop year, unless you are eligible for prevented planting coverage on double cropped acreage in accordance with section 17(f)(4). The eligible acres for each insured crop will be determined as follows:

(i) If you have planted any crop in the county for which prevented planting insurance was available (you will be considered to have planted if your APH database contains actual planted acres) or have received a prevented planting insurance guarantee in any one or more of the four most recent crop years, the insured crop is not required to be contracted with a processor to be insured;

(A) The number of eligible acres will be the maximum number of acres certified for APH purposes, or insured acres reported, for the crop in any one of the four most recent crop years (not including reported prevented planting acreage that was planted to a second crop unless you meet the double cropping requirements in section 17(f)(12)).

(B) If you acquire additional land for the current crop year, the number of eligible acres determined in section 17(e)(1)(i)(A) for a crop may be increased by multiplying it by the ratio of the total cropland acres that you are farming this year (if greater) to the total cropland acres that you farmed in the previous year, provided the conditions in sections 17(e)(1)(ii)(B)(2) and (3) are met. If there were no irrigated acres in the previous year, the eligible irrigated acres for a crop will be limited to the lesser of the number of eligible non-irrigated acres of the crop or the number of acres on which adequate irrigation facilities were added.

(ii) If you have not planted any crop in the county for which prevented planting insurance was available (you will be considered to have planted if your APH database contains actual planted acres) or have not received a prevented planting insurance guarantee in all of the four most recent crop years, and the insured crop is not required to be contracted with a processor to be insured:

(A) The number of eligible acres will be:

1. The number of acres specified on your intended acreage report, which must be submitted to us by the sales closing date for all crops you insure for the crop year and that is accepted by us; or

2. The number of acres specified on your intended acreage report, which must be submitted to us within 10 days of the time you acquire the acreage and that is accepted by us, if, on the sales closing date, you do not have any acreage in a county and you subsequently acquire acreage through a method described in section 17(f)(12) in time to plant it using good farming practices.

(B) The total number of acres listed on the intended acreage report may not exceed the number of acres of cropland in your farming operation at the time you submit the intended acreage report.

(C) If you acquire additional acreage after we accept your intended acreage report, the number of acres determined in section 17(e)(1)(ii)(A) may be increased in accordance with section 17(e)(1)(ii)(B) and (C).

(D) Prevented planting coverage will not be provided for any acreage included on the intended acreage report or any increased amount of acreage determined in accordance with section 17(e)(1)(ii)(C) if a cause of loss that may prevent planting occurred before the acreage was acquired, as determined by us.

(iii) For any crop that must be contracted with a processor to be insured:

1. The number of acres specified on your intended acreage report, which must be submitted to us by the sales closing date for all crops you insure for the crop year and that is accepted by us; or

2. The number of acres specified on your intended acreage report, which must be submitted to us within 10 days of the time you acquire the acreage and that is accepted by us, if, on the sales closing date, you do not have any acreage in a county and you subsequently acquire acreage through a method described in section 17(f)(12) in time to plant it using good farming practices.

3. The number of acres specified on your intended acreage report if you operate on a block schedule and you submit the report no later than the date specified in section 17(e)(3).

4. The number of acres specified on your intended acreage report if you operate on a field schedule and you submit the report no later than the date specified in section 17(e)(3) except that

(A) The number of eligible acres will be:

(i) If you have planted any crop in the county for which prevented planting insurance was available (you will be considered to have planted if your APH database contains actual planted acres) or have received a prevented planting insurance guarantee in any one or more of the four most recent crop years, the insured crop is not required to be contracted with a processor to be insured:

1. The number of acres specified on your intended acreage report, which must be submitted to us by the sales closing date for all crops you insure for the crop year and that is accepted by us; or

2. The number of acres specified on your intended acreage report, which must be submitted to us within 10 days of the time you acquire the acreage and that is accepted by us, if, on the sales closing date, you do not have any acreage in a county and you subsequently acquire acreage through a method described in section 17(f)(12) in time to plant it using good farming practices.

(B) If you acquire additional land for the current crop year, the number of eligible acres determined in section 17(e)(1)(i)(A) for a crop may be increased by multiplying it by the ratio of the total cropland acres that you are farming this year (if greater) to the total cropland acres that you farmed in the previous year, provided the conditions in sections 17(e)(1)(ii)(B)(2) and (3) are met. If there were no irrigated acres in the previous year, the eligible irrigated acres for a crop will be limited to the lesser of the number of eligible non-irrigated acres of the crop or the number of acres on which adequate irrigation facilities were added.

(ii) If you have not planted any crop in the county for which prevented planting insurance was available (you will be considered to have planted if your APH database contains actual planted acres) or have not received a prevented planting insurance guarantee in all of the four most recent crop years, and the insured crop is not required to be contracted with a processor to be insured:

(A) The number of eligible acres will be:

1. The number of acres specified on your intended acreage report, which must be submitted to us by the sales closing date for all crops you insure for the crop year and that is accepted by us; or

2. The number of acres specified on your intended acreage report, which must be submitted to us within 10 days of the time you acquire the acreage and that is accepted by us, if, on the sales closing date, you do not have any acreage in a county and you subsequently acquire acreage through a method described in section 17(f)(12) in time to plant it using good farming practices.

(B) The total number of acres listed on the intended acreage report may not exceed the number of acres of cropland in your farming operation at the time you submit the intended acreage report.

(C) If you acquire additional acreage after we accept your intended acreage report, the number of acres determined in section 17(e)(1)(ii)(A) may be increased in accordance with section 17(e)(1)(ii)(B) and (C).

(D) Prevented planting coverage will not be provided for any acreage included on the intended acreage report or any increased amount of acreage determined in accordance with section 17(e)(1)(ii)(C) if a cause of loss that may prevent planting occurred before the acreage was acquired, as determined by us.

(iii) For any crop that must be contracted with a processor to be insured:

1. The number of acres specified on your intended acreage report, which must be submitted to us by the sales closing date for all crops you insure for the crop year and that is accepted by us; or

2. The number of acres specified on your intended acreage report, which must be submitted to us within 10 days of the time you acquire the acreage and that is accepted by us, if, on the sales closing date, you do not have any acreage in a county and you subsequently acquire acreage through a method described in section 17(f)(12) in time to plant it using good farming practices.

3. The number of acres specified on your intended acreage report if you operate on a block schedule and you submit the report no later than the date specified in section 17(e)(3).

4. The number of acres specified on your intended acreage report if you operate on a field schedule and you submit the report no later than the date specified in section 17(e)(3) except that
(2) The result of dividing the quantity of production stated in the processor contract by your approved yield, if the processor contract specifies a quantity of production that will be accepted (for the purposes of establishing the number of prevented planting acres, any reductions applied to the transitional yield for failure to certify acreage and production for four prior years will not be used); or

(3) Notwithstanding sections 17(e)(1)(ii) and (2), if a minimum number of acres or amount of production is specified in the processor contract, this amount will be used to determine the eligible acres.

(B) If a processor cancels or does not provide contracts, or reduces the contracted acreage or production from what would have otherwise been allowed, solely because the acreage was prevented from being planted due to an insured cause of loss, we will determine the number of eligible acres based on the number of acres or amount of production you had contracted in the county in the previous crop year. If the applicable Crop Provisions require that the price election be based on a contract price, and a contract is not in force for the current year, the price election will be based on the contract price in place for the previous crop year. If you did not have a processor contract in place for the previous crop year, you will not have any eligible prevented planting acreage for the applicable processor crop. The total eligible prevented planting acres in all counties cannot exceed the total number of acres or amount of production contracted in all counties in the previous crop year.

(2) Any eligible acreage determined in accordance with section 17(e)(1) will be reduced by subtracting the number of acres of the crop (insured and uninsured) that are timely and late planted, including acreage specified in section 16(b).

(4) Regardless of the number of eligible acres determined in section 17(e), prevented planting coverage will not be provided for any acreage:

(i) That does not constitute at least 20 acres or 20 percent of the total prevented planting acreage in the unit, whichever is less (If the crop is in a whole-farm unit, the 20 acre or 20 percent requirement will be applied separately to each crop in the whole-farm unit).

Any prevented planting acreage within a field that contains planted acreage will be considered to be acreage of the same crop, type, and practice that is planted in the field unless:

(1) The acreage that was prevented from being planted constitutes at least 20 acres or 20 percent of the total prevented planting acreage in the field and you produced both crops, crop types, or followed both practices in the same field in the same crop year within any one of the four most recent crop years;

(ii) You were prevented from planting a first insured crop and you planted a second crop in the field (There can only be one first insured crop in a field unless the requirements in section 17(f)(1)(i) or (iii) are met); or

(iii) The insured crop planted in the field would not have been planted on the remaining prevented planting acreage (e.g., if you have rotation requirements would not be met or you already planted the total number of acres specified in the processor contact);

(2) For which the actuarial documents do not provide the information needed to determine the premium rate, unless a written agreement designates such premium rate;

(3) Used for conservation purposes, intended to be left unplanted under any program administered by the USDA or other government agency, or required to be left unharvested under the terms of the lease or any other agreement (The number of acres eligible for prevented planting will be limited to the number of acres specified in the lease for which you are required to pay either cash or share rent);

(4) On which the insured crop is prevented from being planted, if you or any other person receives a prevented planting payment for any crop for the same acreage in the same crop year, excluding share arrangements, unless:

(i) It is a practice that is generally recognized by agricultural experts or organic agricultural experts in the area to plant the insured crop for harvest following harvest of the first insured crop, and additional coverage insurance offered under the authority of the Act is available in the county for both crops in the same crop year;

(ii) For the insured crop that is prevented from being planted, you provide records acceptable to us of acreage and production that show, in at least two of the last four crop years:

(A) You have double cropped acreage on which the insured crop that is prevented from being planted in the current crop year was grown (You may apply your history of double cropping to any acreage of the insured crop in the county (e.g., if you have double cropped 100 acres of wheat and soybeans in the county and you acquire an additional 100 acres in the county, you can apply that history of double cropped acreage to any of the 200 acres in the county as long as it does not exceed 100 acres)); or

(B) The acreage you are prevented from planting in the current crop year was double cropped with the insured crop that is prevented from being planted (You may only use the history of double cropping for the same physical acres from which double cropping records were provided (e.g., if a neighbor has double cropped 100 acres of wheat and soybeans in the county and you acquire your neighbor’s 100 double cropped acres and an
§ 457.8

additional 100 acres in the county, you can only apply your neighbor’s history of double cropped acreage to the same 100 acres that your neighbor double cropped (i); and

(iii) The amount of acreage you are double cropping in the current crop year does not exceed the number of acres for which you provided the records required in section 17(f)(4)(i): (5) On which the insured crop is prevented from being planted, if:

(i) Any crop is planted within or prior to the late planting period or on or prior to the final planting date if no late planting period is applicable, unless:

(A) You meet the double cropping requirements in section 17(f)(4);
(B) The crop planted was a cover crop; or
(C) No benefit, including any benefit under any USDA program, was derived from the crop; or
(ii) Any volunteer or cover crop is hayed, grazed or otherwise harvested within or prior to the late planting period or on or prior to the final planting date if no late planting period is applicable;

(6) For which planting history or conservation plans indicate the acreage would have remained fallow for crop rotation purposes or on which any pasture or forage crop is in place on the acreage during the time planting of the insured crop generally occurs in the area. Cover plants that are seeded, transplanted, or that volunteer;

(i) More than 12 months prior to the final planting date for the insured crop that was prevented from being planted will be considered pasture or a forage crop that is in place (e.g., the cover crop is planted 15 months prior to the final planting date and remains in place during the time the insured crop would normally be planted); or

(ii) Less than 12 months prior to the final planting date for the insured crop that was prevented from being planted will not be considered pasture or a forage crop that is in place;

(7) That exceeds the number of acres eligible for a prevented planting payment;

(8) That exceeds the number of eligible acres physically available for planting;

(9) For which you cannot provide proof that you had the inputs (including, but not limited to, sufficient equipment and manpower) available to plant and produce a crop with the expectation of producing at least the yield used to determine your production guarantee or amount of insurance. Evidence that you previously had planted the crop on the unit will be considered adequate proof unless:

(i) There has been a change in the availability of inputs since the crop was last planted that could affect your ability to plant and produce the insured crop;

(ii) We determine you have insufficient inputs to plant the total number of insured crop acres (e.g., you will not receive a prevented planting payment if you have sufficient inputs to plant only 80 acres but you have already planted 80 acres and are claiming prevented planting on an additional 100 acres); or

(iii) Your planting practices or rotational requirements show the acreage would have remained fallow or been planted to another crop;

(10) Based on an irrigated practice production guarantee or amount of insurance unless adequate irrigation facilities were in place to carry out an irrigated practice on the acreage prior to the insured cause of loss that prevented you from planting. Acreage with an irrigated practice production guarantee will be limited to the number of acres allowed for that practice under sections 17(e) and (f);

(11) Based on a crop type that you did not plant, or did not receive a prevented planting insurance guarantee for, in at least one of the four most recent crop years:

(i) Types for which separate projected prices or price elections, as applicable, amounts of insurance, or production guarantees are available must be included in your APH database in at least one of the four most recent crop years (Crops for which the insurance guarantee is not based on APH must be reported on your acreage report in at least one of the four most recent crop years) except as allowed in section 17(e)(1)(ii) or (iii); and

(ii) We will limit prevented planting payments based on a specific crop type to the number of acres allowed for that crop type as specified in sections 17(e) and (f);

(12) If a cause of loss has occurred that may prevent planting at the time:

(i) You lease the acreage (except acreage you leased the previous crop year and continue to lease in the current crop year);

(ii) You buy the acreage;

(iii) The acreage is released from a USDA program which prohibits harvest of a crop;

(iv) You request a written agreement to insure the acreage; or

(v) You acquire the acreage through means other than lease or purchase (such as inherited or gifted acreage).

(g) If you purchased an additional coverage policy for a crop, and you executed a High Risk Land Exclusion Option that separately insures acreage which has been designated as “high-risk” land by FCIC under a Catastrophic Risk Protection endorsement for that crop, the maximum number of acres eligible for a prevented planting payment will be limited for each policy as specified in sections 17(e) and (f).

(h) If you are prevented from planting a crop for which you do not have an adequate base of eligible prevented planting acreage, as determined in accordance with section 17(e)(1), we will use acreage from another...
crop insured for the current crop year for which you have remaining eligible prevented planting acreage.

1) The crop first used for this purpose will be the insured crop that would have a prevented planting payment most similar to the payment for the crop that was prevented from being planted.

If there are still insufficient eligible prevented planting acres, the next crop used will be the insured crop that would have the next closest prevented planting payment.

(ii) The crop from which eligible acres are being used if the insured crop with remaining eligible acreage will result in a lower prevented planting payment than would have been paid for the crop that was prevented from being planted.

(ii) The crop from which eligible acres are being used if the insured crop with remaining eligible acreage will result in a lower prevented planting payment than would have been paid for the crop that was prevented from being planted.

(iii) The crop from which eligible acres are being used if the insured crop with remaining eligible acreage will result in a lower prevented planting payment than would have been paid for the crop that was prevented from being planted.

(3) For example, assume you were prevented from planting 200 acres of corn and you have 100 acres eligible for a corn prevented planting guarantee that would result in a payment of $40 per acre. You also had 50 acres of potato eligibility that would result in a $50 per acre payment and 90 acres of grain sorghum eligibility that would result in a $30 per acre payment. Your prevented planting coverage will be based on 100 acres of corn ($40 per acre), 90 acres of grain sorghum ($30 per acre), and an additional 10 acres of corn (using potato eligible acres and paid as corn at $40 per acre). Your prevented planting payment would be $7,100 ($4,000 + $2,700 + $400).

(4) Prevented planting coverage will be allowed as specified in section 17(h) only if the crop that was prevented from being planted meets all the policy provisions, except for having an adequate base of eligible prevented planting acreage. Payment may be made based on crops other than those that were prevented from being planted even though other policy provisions, including but not limited to, processor contract and rotation requirements, have not been met for the crop whose eligible acres are being used.

(5) An additional administrative fee will not be due as a result of using eligible prevented planting acreage as specified in section 17(h).

(i) The prevented planting payment for any eligible acreage within a unit will be determined by:

(1) Multiplying the prevented planting coverage level percentage you elected, or that is contained in the Crop Provisions if you did not elect a prevented planting coverage level percentage, by:

(i) Your amount of insurance per acre; or

(ii) The amount determined by multiplying the production guarantee (per acre) for timely planted acreage of the insured crop (or type, if applicable) by your price election or your projected price, whichever is applicable;

(2) Multiplying the result of section 17(i)(1) by the number of eligible prevented planting acres in the unit; and

(3) Multiplying the result of section 17(i)(2) by your share.

18. Written Agreements

Terms of this policy which are specifically designated for the use of written agreements may be altered by written agreement in accordance with the following:

(a) You must apply in writing for each written agreement (including renewal of a written agreement) no later than the sales closing date, except as provided in section 18(e):

(b) The application for a written agreement must contain all variable terms of the contract between you and us that will be in effect if the written agreement is not approved;

(c) If approved by FCIC, the written agreement will include all variable terms of the contract, including, but not limited to, the crop; practice, type or variety; guarantee; premium rate; and projected price, harvest price, price election or amount of insurance, as applicable, or the information needed to determine such variable terms. If the written agreement is for a county:

(1) That has a price election or amount of insurance stated in the Special Provisions, or an addendum thereto, for the crop, practice, type or variety, the written agreement will contain the price election or amount of insurance stated in the Special Provisions, or an addendum thereto, for the crop, practice, type or variety;

(2) That does not have price elections or amounts of insurance stated in the Special Provisions, or an addendum thereto, for the crop, practice, type or variety, the written agreement will contain a price election or amount of insurance that does not exceed the price election or amount of insurance contained in the Special Provisions, or an addendum thereto, for the county that is used to establish the other terms of the written agreement, unless otherwise authorized by the Crop Provisions;

(3) For which revenue protection is not available for the crop, but revenue protection is available in the State for the crop, the written agreement will contain the information used to establish the projected price...
§ 457.8

and harvest price, as applicable, for that State; or

(4) In a State for which revenue protection is not available for the crop, but revenue protection is available for the crop in another State, the written agreement is available for yield protection only, and will contain the information needed to determine the projected price for the crop from another State as determined by FCIC;

(d) Each written agreement will only be valid for the number of crop years specified in the written agreement, and a multi-year written agreement:

(1) Will only apply for any particular crop year designated in the written agreement if all terms and conditions in the written agreement are still applicable for the crop year and the conditions under which the written agreement has been provided have not changed prior to the beginning of the insurance period (If conditions change during or prior to the crop year, the written agreement will not be effective for that crop year but may still be effective for a subsequent crop year if conditions under which the written agreement has been provided exist for such year);

(2) May be canceled in writing by:

(i) FCIC not less than 30 days before the cancellation date if it discovers that any term or condition of the written agreement, including the premium rate, is not appropriate for the crop; or

(ii) You or us on or before the cancellation date;

(iii) That is not renewed in writing after it expires, is not applicable for a crop year, or is canceled, then insurance coverage will be in accordance with the terms and conditions stated in this policy, without regard to the written agreement; and

(iv) Will be automatically canceled if you transfer your policy to another insurance provider (No notice will be provided to you and for any subsequent crop year, for a written agreement to be effective, you must timely request renewal of the written agreement in accordance with this section);

(e) A request for a written agreement may be submitted:

(1) After the sales closing date, but on or before the acreage reporting date, if you demonstrate your physical inability to submit the request on or before the sales closing date (e.g., you have been hospitalized or a blizzard has made it impossible to submit the written agreement request in person or by mail); or

(2) For the first year the written agreement is requested:

(i) On or before the acreage reporting date to:

(A) Insure unrated land, or an unrated practice, type or variety of a crop; although, if required by FCIC, such written agreements may be approved only after appraisal of the acreage by us and:

(1) The crop's potential is equal to or exceeds 90 percent of the yield used to determine your production guarantee or amount of insurance; and

(2) You sign the written agreement no later than the date the first field is appraised or by the expiration date for you to accept the offer, whichever comes first; or

(B) Establish optional units in accordance with FCIC procedures that otherwise would not be allowed, change the premium rate or transitional yield for designated high-risk land, or insure acreage that is greater than five percent of the planted acreage in the unit where the acreage has not been planted and harvested or insured in any of the three previous crop years;

(ii) On or before the cancellation date to insure a crop in a county that does not have actuarial documents for the crop (If the Crop Provisions do not provide a cancellation date for the county, the cancellation date for other insurable crops in the same State that have similar final planting and harvesting dates will be applicable); or

(iii) On or before the date specified in the Crop Provisions or Special Provisions; or

(3) For adding land or a crop to either an existing written agreement or a request for a written agreement, provided the request is submitted by the applicable deadline specified in section 18;

(f) A request for a written agreement must contain:

(1) For all written agreement requests:

(i) A completed “Request for Actuarial Change” form;

(ii) An APH form (except for policies that do not require APH) containing all the information needed to determine the approved yield for the current crop year (completed APH form), signed by you, or an unsigned, completed APH form with the applicable production reports signed and dated by you that are based on verifiable records of actual yields for the crop and county for which the written agreement is being requested (the actual yields do not necessarily have to be from the same physical acreage for which you are requesting a written agreement) for at least the most recent crop year in which the crop was planted during the base period and verifiable records of actual yields if required by FCIC;

(iii) Evidence from agricultural experts or organic agricultural experts, as applicable, that the crop can be produced in the area if the request is to provide insurance for practices, types, or varieties that are not insurable, unless we are notified in writing by FCIC that such evidence is not required by FCIC;

(iv) The legal description of the land (in areas where legal descriptions are available) and the FSA farm serial number including
tract and field numbers, if available. The submission must also include an FSA aerial photograph, or field boundaries derived by a Geographic Information System or Global Positioning System, or other legible maps delineating field boundaries where you intend to plant the crop for which insurance is requested;

(c) For any perennial crop, an inspection report completed by us; and

(vi) All other information that supports your request for a written agreement (including but not limited to records pertaining to levees, drainage systems, flood frequency data, soil types, elevation, etc.);

(2) For written agreement requests for counties without actuarial documents for the crop, the requirements in section 18(f)(1) (except section 18(f)(1)(ii)) and:

(i) For a crop you have previously planted in the county or area for at least three years:

(A) A completed APH form signed by you (only for crop policies that require APH) based on verifiable production records for at least the three most recent crop years in which the crop was planted; and

(B) Verifiable production records for at least the three most recent crop years in which the crop was planted:

(j) The verifiable production records do not necessarily have to be from the same physical acreage for which you are requesting a written agreement; and

(2) Verifiable production records do not have to be submitted if you have insured the crop in the county or area for at least the previous three crop years and have certified the yields on the applicable production reports or the yields are based on your insurance claim (although you are not required to submit production records, you still must maintain production records in accordance with section 21);

(ii) For a crop you have not previously planted in the county or area for at least three years:

(A) A completed APH form signed by you (only for crop policies that require APH) based on verifiable production records for at least the three most recent crop years for a similar crop in the county or area such that the combination of both sets of records results in at least three years of production records, you must provide the information required in sections 18(f)(2)(i)(A) & (B) for the years you grew the crop in the county or area and the information required in sections 18(1)(2)(ii)(A) & (B) regarding the similar crop for the remaining years; and

(D) A similar crop to the crop for which a written agreement is being requested must:

(j) Be included in the same category of crops, e.g., row crops (including, but not limited to, small grains, coarse grains, and oil seed crops), vegetable crops grown in rows, tree crops, vine crops, bush crops, etc., as defined by FCIC;

(2) Have substantially the same growing season (i.e., normally planted around the same dates and harvested around the same dates);

(3) Require comparable agronomic conditions (e.g., comparable needs for water, soil, etc.); and

(4) Be subject to substantially the same risks (frequency and severity of loss would be expected to be comparable from the same cause of loss);

(iii) The dates you and other growers in the area normally plant and harvest the crop, if applicable;

(iv) The name, location of, and approximate distance to the place the crop will be sold or used by you;

(v) For any irrigated practice, the water source, method of irrigation, and the amount of water needed for an irrigated practice for the crop; and

(vi) All other information that supports your request for a written agreement (such as publications regarding yields, practices, risks, climatic data, etc.); and

(3) Such other information as specified in the Special Provisions or required by FCIC;

(g) A request for a written agreement will not be accepted if:

(1) The request is submitted to us after the applicable deadline contained in sections 18(a) or (e);

(2) All the information required in section 18(f) is not submitted to us with the request for a written agreement (The request for a written agreement may be accepted if any missing information is available from other acceptable sources);

(3) The request is to add land to an existing written agreement or to add land to a request for a written agreement and the request to add the land is not submitted by the
§ 457.8

applicable deadline specified in sections 18(a) or (e); or
(4) The request is not authorized by the policy;

(b) A request for a written agreement will be denied if:

(1) FCIC determines the risk is excessive;
(2) Your APH history demonstrates you have not produced at least 50 percent of the transitional yield for the crop, type, and practice obtained from a county with similar agronomic conditions and risk exposure;
(3) There is not adequate information available to establish an actuarially sound premium rate and insurance coverage for the crop and acreage;
(4) The crop was not previously grown in the county or there is no evidence of a market for the crop based on sales receipts, contemporaneous feeding records or a contract for the crop (applicable only for counties without actuarial documents); or
(5) Agricultural experts or organic agricultural experts determine the crop is not adapted to the county;

(i) A written agreement will be denied unless:

(1) FCIC approves the written agreement;
(2) The original written agreement is signed by you and delivered to us, or postmarked, not later than the expiration date for you to accept the offer;
(3) We accept the written agreement offer; and
(4) The crop meets the minimum appraisal amount specified in section 18(e)(2)(i)(A)(1), if applicable;

(j) Multi-year written agreements may be canceled and requests for renewal may be rejected if the severity or frequency of your loss experience under the written agreement is significantly worse than expected based on the information provided by you or used to establish your premium rate and the loss experience of other crops with similar risks in the area;

(k) With respect to your and our ability to reject an offer for a written agreement:

(1) When a single Request for Actuarial Change form is submitted, regardless of how many requests for changes are contained on the form, you and we can only accept or reject the written agreement in its entirety (you cannot reject specific terms of the written agreement and accept others);
(2) When multiple Request for Actuarial Change forms are submitted, regardless of when the forms are submitted, for the same condition or for the same crop (i.e., to insure corn on ten legal descriptions where there are no actuarial documents in the county or the request is to change the premium rates from the high-risk rates) all these forms may be treated as one request and you and we will only have the option of accepting or rejecting the written agreement in its entirety (you cannot reject specific terms of the written agreement and accept others);
(3) When multiple Request for Actuarial Change forms are submitted, regardless of whether the forms are submitted, for different conditions or for different crops, separate agreements may be issued and you and we will have the option to accept or reject each written agreement; and
(4) If we reject an offer for a written agreement approved by FCIC, you may seek arbitration or mediation of our decision to reject the offer in accordance with section 20;

(l) Any information that is submitted by you after the applicable deadlines in sections 18(a) and (e) will not be considered, unless such information is specifically requested in accordance with section 18(f)(3);

(m) If the written agreement or the policy is canceled for any reason, or the period for which an existing written agreement is in effect ends, a request for renewal of the written agreement must contain all the information required by this section and be submitted in accordance with section 18(a), unless otherwise specified by FCIC;

(n) If a request for a written agreement is not approved by FCIC, a request for a written agreement for any subsequent crop year that fails to address the stated basis for the denial will not be accepted (if the request for a written agreement contains the same information that was previously rejected or denied, you will not have any right to arbitrate, mediate or appeal the non-acceptance of your request); and

(o) If you disagree with any determination made by FCIC under section 18, you may obtain administrative review in accordance with 7 CFR part 400, subpart J (administrative review) or appeal in accordance with 7 CFR part 11, unless you have failed to comply with the provisions contained in section 18(g) or section 18(i)(2) or (4).

19. Crops as Payment

You must not abandon any crop to us. We will not accept any crop as compensation for payments due us.

[For FCIC Policies]

20. Appeal, Reconsideration, Administrative and Judicial Review

(a) All determinations required by the policy will be made by us.

(b) If you disagree with our determinations:

(1) Except for determinations specified in section 18(g), section 18(i)(2) or section 20(b)(2) or (3), you may obtain an administrative review in accordance with 7 CFR part 400, subpart J (administrative review) or appeal in accordance with 7 CFR part 11 (appeal);

(2) Regarding whether you have used good farming practices (excluding determinations
of the amount of assigned production for uninsured causes for your failure to use good farming practices), you may request reconsideration in accordance with the reconsideration process established for this purpose and published at 7 CFR part 400, subpart J (reconsideration). To appeal or request administrative review of determinations of the amount of assigned production, you must use the appeal or administration review process; or

(3) Any determination made by us that is a matter of general applicability is not subject to administrative review under 7 CFR part 400, subpart J or appeal under 7 CFR part 11. If you fail to exhaust your right to appeal, you will not be able to resolve the dispute through judicial review.

(d) You are not required to exhaust your right to reconsideration prior to seeking judicial review. If you do not request reconsideration and you elect to file suit, such suit must be brought in accordance with section 20(b)(1) and must be filed not later than one year after the date the determination regarding whether you used good farming practices was made.

(e) If reconsideration or appeal has been initiated within the time frames specified in those sections and judicial review is sought, any suit against us must be:

(1) Filed not later than one year after the date of the decision rendered in the reconsideration or appeal; and

(2) Brought in the United States district court for the district in which the insured farm involved in the decision is located.

(f) You may only recover contractual damages from us. Under no circumstances can you recover any attorney fees or other expenses, or any punitive, compensatory or any other damages from us in administrative review, appeal, reconsideration or litigation.

[For Reinsured Policies]

20. Mediation, Arbitration, Appeal, Reconsideration, and Administrative and Judicial Review

(a) If you and we fail to agree on any determination made by us except those specified in section 20(d) or (e), the disagreement may be resolved through mediation in accordance with section 20(g). If resolution cannot be reached through mediation, or you and we do not agree to mediation, the disagreement must be resolved through arbitration in accordance with the rules of the American Arbitration Association (AAA), except as provided in sections 20(c) and (f), and unless rules are established by FCIC for this purpose. Any mediator or arbitrator with a familial, financial or other business relationship to you or us, or our agent or loss adjuster, is disqualified from hearing the dispute.

(1) All disputes involving determinations made by us, except those specified in section 20(d) or (e), are subject to mediation or arbitration. However, if the dispute in any way involves a policy or procedure interpretation, regarding whether a specific policy provision or procedure is applicable to the situation, how it is applicable, or the meaning of any policy provision or procedure, either you or we must obtain an interpretation from FCIC in accordance with 7 CFR part 400, subpart X or such other procedures as established by FCIC.

(i) Any interpretation by FCIC will be binding in any mediation or arbitration.

(ii) Failure to obtain any required interpretation from FCIC will result in the nullification of any agreement or award.

(iii) An interpretation by FCIC of a policy provision is considered a determination that is a matter of general applicability.

(iv) An interpretation by FCIC of a procedure may be appealed to the National Appeals Division in accordance with 7 CFR part 11.

(2) Unless the dispute is resolved through mediation, the arbitrator must provide to you and us a written statement describing the issues in dispute, the factual findings, the determinations and the amount and basis for any award. The statement must also include any amounts awarded for interest. Failure of the arbitrator to provide such written statement will result in the nullification of all determinations of the arbitrator. All agreements reached through settlement, including those resulting from mediation, must be in writing and contain at a minimum a statement of the issues in dispute and the amount of the settlement.

(b) Regardless of whether mediation is elected:

(1) The initiation of arbitration proceedings must occur within one year of the date we denied your claim or rendered the determination with which you disagree, whichever is later;

(2) If you fail to initiate arbitration in accordance with section 20(b)(1) and complete the process, you will not be able to resolve the dispute through judicial review;

(3) If arbitration has been initiated in accordance with section 20(b)(1) and completed, and judicial review is sought, suit must be filed not later than one year after the date the arbitration decision was rendered; and

(4) In any suit, if the dispute in any way involves a policy or procedure interpretation, regarding whether a specific policy provision or procedure is applicable to the situation,
§ 457.8

how it is applicable, or the meaning of any policy provision or procedure, an interpretation must be obtained from FCIC in accordance with 7 CFR part 400, subpart X or such other procedures as established by FCIC. Such interpretation will be binding.

(c) Any decision rendered in arbitration is binding on you and us unless judicial review is sought in accordance with section 20(b)(3). Notwithstanding any provision in the rules of the AAA, you and we have the right to judicial review of any decision rendered in arbitration.

(d) With respect to good farming practices:

(1) We will make decisions regarding what constitutes a good farming practice and determinations of assigned production for uninsured causes for your failure to use good farming practices.

(2) FCIC will make determinations regarding what constitutes a good farming practice. If you do not agree with any determination made by FCIC:

(i) You may request a determination from FCIC of what constitutes a good farming practice before filing any suit against FCIC.

(ii) If you disagree with our determination of the amount of assigned production, you must use the arbitration or mediation process contained in this section.

(iii) You may not sue us for our decisions regarding whether good farming practices were used by you.

(2) FCIC will make determinations regarding what constitutes a good farming practice. If you do not agree with any determination made by FCIC:

(i) You may request reconsideration by FCIC of this determination in accordance with the reconsideration process established for this purpose and published at 7 CFR part 400, subpart J; or

(ii) You may file suit against FCIC.

(A) You are not required to request reconsideration from FCIC before filing suit.

(B) Any suit must be brought against FCIC in the United States district court of the district in which the insured acreage is located.

(C) Suit must be filed against FCIC not later than one year after the date:

(i) Of the determination; or

(ii) Reconsideration is completed, if reconsideration was requested under section 20(d)(2)(i).

(e) Except as provided in sections 18(m) or (o), or 20(d) or (k), if you disagree with any other determination made by FCIC or any claim where FCIC is directly involved in the claim process directs us in the resolution of the claim, you may obtain an administrative review in accordance with 7 CFR part 400, subpart J (administrative review) or appeal in accordance with 7 CFR part 11 (appeal).

(f) Except as provided in section 20(e), no award or settlement in mediation, arbitration, appeal, administrative review or reconsideration process or judicial review can exceed the amount of liability established or which should have been established under the policy, except for interest awarded in accordance with section 26.

(g) To resolve any dispute through mediation, you and we must both:

(1) Agree to mediate the dispute;

(2) Agree on a mediator; and

(3) Be present, or have a designated representative who has authority to settle the case present, at the mediation.

(h) Except as provided in section 20(1), no award or settlement in mediation, arbitration, appeal, administrative review or reconsideration process or judicial review can exceed the amount of liability established or which should have been established under the policy, except for interest awarded in accordance with section 26.

(i) In a judicial review only, you may recover attorney fees or other expenses, or any punitive, compensatory or any other damages from us only if you obtain a determination from FCIC that we, our agent or loss adjuster failed to comply with the terms of this policy or procedures issued by FCIC and such failure resulted in you receiving a payment in an amount that is less than the amount to which you were entitled. Requests for such a determination should be addressed to the following: USDA/RMA/Deputy Administrator of Compliance/Stop 0806, 1400 Independence Avenue, SW., Washington, DC 20250-0806.

(j) If FCIC elects to participate in the adjustment of your claim, or modifies, revises or corrects your claim, prior to payment, you may not bring an arbitration, mediation or litigation action against us. You must request administrative review or appeal in accordance with section 20(e).

(k) Any determination made by FCIC that is a matter of general applicability is not subject to administrative review under 7 CFR part 400, subpart J or appeal under 7 CFR part 11. If you want to seek judicial review of any FCIC determination that is a matter of general applicability, you must request a determination of non-appealability from the Director of the National Appeals.
Division in accordance with 7 CFR 11.6 before seeking judicial review.

21. Access to Insured Crop and Records, and Record Retention

(a) We, and any employee of USDA authorized to investigate or review any matter relating to crop insurance, have the right to examine the insured crop and all records related to the insured crop and any mediation, arbitration or litigation involving the insured crop as often as reasonably required during the record retention period.

(b) You must retain, and provide upon our request, or the request of any employee of USDA authorized to investigate or review any matter relating to crop insurance:

(1) Complete records of the planting, replanting, inputs, production, harvesting, and disposition of the insured crop on each unit for three years after the end of the crop year.

(2) All records used to establish the amount of production you certified on your production reports used to compute your apportioned payment for each crop year for three years after the end of the crop year.

(3) While you are not required to maintain records beyond the record retention period, if you certify APH database determined to be incorrect with the lesser of an assigned yield determined in accordance with section 3 or the yield determined to be correct:

(i) If an overpayment has been made to you, you will be required to repay the overpaid amount; and

(ii) Replacement of yields in accordance with section 21(b)(3) does not exempt you from other sanctions applicable under the terms of the policy or any applicable law.

(c) We, or any employee of USDA authorized to investigate or review any matter relating to crop insurance, may extend the record retention period beyond three years by notifying you of such extension in writing.

(d) By signing the application for insurance authorized under the Act or by continuing insurance for which you have previously applied, you authorize us or USDA, or any person acting for us or USDA authorized to investigate or review any matter relating to crop insurance, to obtain records relating to the planting, replanting, inputs, production, harvesting, and disposition of the insured crop from any person who may have custody of such records, including but not limited to, FSA offices, banks, warehouses, gins, cooperatives, marketing associations, and accountants.

22. Other Insurance

(a) Other Like Insurance—Nothing in this section prevents you from obtaining other insurance not authorized under the Act. However, unless specifically required by policy provisions, you must not obtain any other crop insurance authorized under the Act on your share of the insured crop. If you cannot demonstrate that you did not intend to have more than one policy in effect, you may be subject to the consequences authorized under this policy, the Act, or any other applicable statute. If you can demonstrate that you did not intend to have more than one policy in effect (for example, an application to transfer your policy or written notification to an insurance provider that states
§ 457.8

you want to purchase, or transfer, insurance and you want any other policies for the crop canceled would demonstrate you did not intend to have duplicate policies, and:

(1) One is an additional coverage policy and the other is a Catastrophic Risk Protection policy;

(2) The additional coverage policy will apply if both policies are with the same insurance provider or, if not, both insurance providers agree; or

(3) The policy with the earliest date of application will be in force if both insurance providers do not agree; or

(4) Both are additional coverage policies or both are Catastrophic Risk Protection policies, the policy with the earliest date of application will be in force and the other policy will be void, unless both policies are with:

(i) The same insurance provider and the insurance provider agrees otherwise; or

(ii) Different insurance providers and both insurance providers agree otherwise.

(b) Other Insurance Against Fire. If you have other insurance, whether valid or not, against damage to the insured crop by fire during the insurance period, and you have not excluded coverage for fire from this policy, we will be liable for loss due to fire caused by a naturally occurring event only for the smaller of:

(1) The amount of indemnity determined pursuant to this policy without regard to such other insurance; or

(2) The amount by which the loss from fire is determined to exceed the indemnity paid or payable under such other insurance.

(c) For the purpose of section 22(b), the amount of loss from fire will be the difference between the total value of the insured crop before the fire and the total value of the insured crop after the fire. This amount will be determined in accordance with the provisions in section 35.

23. Conformity to Food Security Act

Although your violation of a number of federal statutes, including the Act, may cause cancellation, termination, or voidance of your insurance contract, you should be specifically aware that your policy will be canceled if you are determined to be ineligible to receive benefits under the Act due to violation of the controlled substance provisions (title XVII) of the Food Security Act of 1985 (Pub. L. 99-198) and the regulations promulgated under the Act by USDA. Your insurance policy will be canceled if you are determined, by the appropriate Agency, to be in violation of these provisions. We will recover any and all monies paid to you or received by you during your period of ineligibility, and your premium will be refunded, less an amount for expenses and handling equal to 20 percent of the premium paid or to be paid by you.

7 CFR Ch. IV (1-1-14 Edition)

For FCIC policies

24. Amounts Due Us

(a) Any amount illegally or erroneously paid to you or that is owed to us but is delinquent may be recovered by us through offset by deducting it from any loan or payment due you under any Act of Congress or program administered by any United States Government Agency, or by other collection action.

(b) Interest will accrue at the rate of 1.25 percent simple interest per calendar month, or any part thereof, on any unpaid premium amount or administrative fee due us. With respect to any premiums or administrative fees owed, interest will start to accrue on the first day of the month following the premium billing date specified in the Special Provisions.

(c) For the purpose of any other amounts due us, such as repayment of indemnities found not to have been earned:

(1) Interest will start on the date that notice is issued to you for the collection of the unearned amount;

(2) Amounts found due under this paragraph will not be charged interest if payment is made within 30 days of issuance of the notice by us;

(3) The amount will be considered delinquent if not paid within 30 days of the date the notice is issued by us;

(4) Penalties and interest will be charged in accordance with 31 U.S.C. 3717 and 4 CFR part 102 and

(5) The penalty for accounts more than 90 days delinquent is an additional 6 percent per annum.

(d) Interest on any amount due us found to have been received by you because of fraud, misrepresentation or presentation by you of a false claim will start on the date you received the amount with the additional 6 percent penalty beginning on the 31st day after the notice of amount due is issued to you. This interest is in addition to any other amount found to be due under any other federal criminal or civil statute.

If we determine that it is necessary to contract with a collection agency, refer the debt to government collection centers, the Department of Treasury Offset Program, or to employ an attorney to assist in collection, you agree to pay all the expenses of collection.

(f) All amounts paid will be applied first to expenses of collection if any, second to the reduction of any penalties which may have been assessed, then to reduction of accrued interest, and finally to reduction of the principal balance.
Federal Crop Insurance Corporation, USDA §457.8

For reinsured policies

24. Amounts Due Us

(a) Interest will accrue at the rate of 1.25 percent simple interest per calendar month, or any portion thereof, on any unpaid amount owed to us or on any unpaid administrative fees owed to FCIC. For the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the premium billing date specified in the Special Provisions. We will collect any unpaid amounts owed to us and any interest owed thereon and, prior to the termination date, we will collect any administrative fees and interest owed thereon to FCIC. After the termination date, FCIC will collect any unpaid administrative fees and any interest owed thereon for any catastrophic risk protection policy and we will collect any unpaid administrative fees and any interest owed thereon for additional coverage policies.

(b) For the purpose of any other amounts due us, such as repayment of indemnities found not to have been earned, interest will start to accrue on the date that notice is issued to you for the collection of the unearned amount. Amounts found due under this paragraph will not be charged interest if payment is made within 30 days of issuance of the notice by us. The amount will be considered delinquent if not paid within 30 days of the date the notice is issued by us.

(c) All amounts paid will be applied first to expenses of collection (see subsection (d) of this section) if any, second to the reduction of accrued interest, and then to the reduction of the principal balance.

(d) If we determine that it is necessary to contract with a collection agency or to employ an attorney to assist in collection, you agree to pay all of the expenses of collection.

(e) The portion of the amounts owed by you for a policy authorized under the Act that are owed to FCIC may be collected in part through administrative offset from payments you receive from United States government agencies in accordance with 31 U.S.C. chapter 37. Such amounts include all administrative fees, and the share of the overpaid indemnities and premiums retained by FCIC plus any interest owed thereon.

25. [Reserved]

26. Interest Limitations

We will pay simple interest computed on the net indemnity ultimately found to be due by us or by a final judgment of a court of competent jurisdiction, from and including the 61st day after the date you sign, date, and return the completed claim on our form. Interest will be paid only if the reason for our failure to timely pay is NOT due to your failure to provide information or other material necessary for the computation or payment of the indemnity. The interest rate will be that established by the Secretary of the Treasury under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611) and published in the Federal Register semiannually on or about January 1 and July 1 of each year, and may vary with each publication.

27. Concealment, Misrepresentation or Fraud

(a) If you have falsely or fraudulently concealed the fact that you are ineligible to receive benefits under the Act or if you or any one assisting you has intentionally concealed or misrepresented any material fact relating to this policy:

(1) This policy will be voided; and

(2) You may be subject to remedial sanctions in accordance with 7 CFR part 400, subpart R.

(b) Even though the policy is void, you will still be required to pay 20 percent of the premium that you would otherwise be required to pay to offset costs incurred by us in the service of this policy. If previously paid, the balance of the premium will be returned.

(c) Voidance of this policy will result in you having to reimburse all indemnities paid for the crop year in which the voidance was effective.

(d) Voidance will be effective on the first day of the insurance period for the crop year in which the act occurred and will not affect the policy for subsequent crop years unless a violation of this section also occurred in such crop years.

(e) If you willfully and intentionally provide false or inaccurate information to us or FCIC or you fail to comply with a requirement of FCIC, in accordance with 7 CFR part 400, subpart R, FCIC may impose on you:

(1) A civil fine for each violation in an amount not to exceed the greater of:

(i) The amount of the pecuniary gain obtained as a result of the false or inaccurate information provided or the noncompliance with a requirement of FCIC; or

(ii) $10,000; and

(2) A disqualification for a period of up to 5 years from receiving any monetary or nonmonetary benefit provided under each of the following:

(i) Any crop insurance policy offered under the Act;

(ii) The Farm Security and Rural Investment Act of 2002 (7 U.S.C. 7373 et seq.);

(iii) The Agricultural Act of 1949 (7 U.S.C. 1221 et seq.);

(iv) The Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.);

(v) The Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 et seq.);

(vi) Title XII of the Food Security Act of 1985 (16 U.S.C. 3801 et seq.);

(vii) The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.); and

159
§ 457.8

(viii) Any federal law that provides assistance to a producer of an agricultural commodity affected by a crop loss or a decline in the prices of agricultural commodities.

28. Transfer of Coverage and Right to Indemnity

If you transfer any part of your share during the crop year, you may transfer your coverage rights, if the transferee is eligible for crop insurance. We will not be liable for any more than the liability determined in accordance with your policy that existed before the transfer occurred. The transfer of coverage rights must be on our form and will not be effective until approved by us in writing. Both you and the transferee are jointly and severally liable for the payment of the premium and administrative fees. The transferee has all rights and responsibilities under this policy consistent with the transferee’s interest.

29. Assignment of Indemnity

(a) You may assign your right to an indemnity for the crop year only to creditors or other persons to whom you have a financial debt or other pecuniary obligation. You may be required to provide proof of the debt or other pecuniary obligation before we will accept the assignment of indemnity.

(b) All assignments must be on our form and must be provided to us. Each assignment form may contain more than one creditor or other person to whom you have a financial debt or other pecuniary obligation.

(c) Unless you have provided us with a properly executed assignment of indemnity, we will not make any payment to a lienholder or other person to whom you have a financial debt or other pecuniary obligation.

(d) If we have received the properly executed assignment of indemnity form:

(1) Only one payment will be issued jointly in the names of all assignees and you; and

(2) Any assignee will have the right to submit all loss notices and forms as required by the policy.

(e) If you have suffered a loss from an insurable cause and fail to file a claim for indemnity within the period specified in section 14(e), the assignee may submit the claim for indemnity not later than 30 days after the period for filing a claim has expired. We will honor the terms of the assignment only if we can accurately determine the amount of the claim. However, no action will lie against us for failure to do so.

30. [Reserved]

31. Applicability of State and Local Statutes

If the provisions of this policy conflict with statutes of the State or locality in which this policy is issued, the policy provisions will prevail. State and local laws and regulations in conflict with federal statutes, this policy, and the applicable regulations do not apply to this policy.

32. Descriptive Headings

The descriptive headings of the various policy provisions are formulated for convenience only and are not intended to affect the construction or meaning of any of the policy provisions.

33. Notices

(a) All notices required to be given by you must be in writing and received by your crop insurance agent within the designated time unless otherwise provided by the notice requirement. Notices required to be given immediately may be by telephone or in person and confirmed in writing. Time of the notice will be determined by the time of our receipt of the written notice. If the date by which you are required to submit a report or notice falls on Saturday, Sunday, or a Federal holiday, or if your agent’s office is, for any reason, not open for business on the date you are required to submit such notice or report, such notice or report must be submitted on the next business day.

(b) All notices and communications required to be sent by us to you will be mailed to the address contained in your records located with your crop insurance agent. Notice sent to such address will be conclusively presumed to have been received by you. You should advise us immediately of any change of address.

34. Units

(a) You may elect an enterprise unit or whole-farm unit in accordance with the following:

(i) For crops for which revenue protection is available, you may elect:

(1) An enterprise unit if you elected revenue protection or yield protection; or

(ii) A whole-farm unit if you elected:

(A) Revenue protection and revenue protection is provided unless limited by the Special Provisions; or

(B) Yield protection only if whole-farm units are allowed by the Special Provisions;
(2) For crops for which revenue protection is not available, enterprise units or whole-farm units are available only if allowed by the Special Provisions;

(iii) You must elect an enterprise unit for any crop included in such election on or before the earliest sales closing date for the insured crops in the unit and report such unit structure on your acreage report;

(iv) For sections in which the actuarial documents specify a fall or winter sales closing date and a spring sales closing date, you may change your unit election on or before the spring sales closing date (earliest spring sales closing date for crops in the unit if electing a whole-farm unit) if you do not have any insured fall planted acreage of the insured crop:

(ii) Your unit selection will remain in effect from year to year unless you notify us in writing by the earliest sales closing date for the crop year for which you wish to change this election; and

(iii) These units may not be further divided except as specified herein;

(b) For an enterprise unit:

(i) To qualify, an enterprise unit must contain all of the insurable acreage of the same insured crop in:

(A) Two or more sections, if sections are the basis for optional units where the insured acreage is located;

(B) Two or more section equivalents determined in accordance with FCIC issued procedures, if section equivalents are the basis for optional units where the insured acreage is located or are applicable to the insured acreage;

(C) Two or more FSA farm serial numbers, if FSA farm serial numbers are the basis for optional units where the insured acreage is located;

(D) Any combination of two or more sections, section equivalents, or FSA farm serial numbers, if more than one of these are the basis for optional units where the acreage is located or are applicable to the insured acreage is located and you have any insured fall planted acres of the insured crop;

(iii) These units may not be further divided except as specified herein;

(c) For a whole-farm unit:

(i) All crops in the whole-farm unit must be insured;

(ii) At least two of the sections, section equivalents, FSA farm serial numbers, or units established by written agreement in section 34(a)(4)(i)(A), (B), (C), (D), or (F) must each have planted acreage that constitutes at least the lesser of 20 acres or 20 percent of the insured crop acreage in the enterprise unit. If there is planted acreage in more than two sections, section equivalents, FSA farm serial numbers or units established by written agreement in section 34(a)(4)(i)(A), (B), (C), (D), or (F), these can be aggregated to form at least two parcels to meet this requirement. For example, if sections are the basis for optional units where the insured acreage is located and you have 80 planted acres in section one, 10 planted acres in section two, and 10 planted acres in section three, you may aggregate sections two and three to meet this requirement;

(v) If you do not comply with the production reporting provisions in section 3(f) for the enterprise unit, your yield for the enterprise unit will be determined in accordance with section 3(f)(1);

(vi) You must separately designate on the acreage report each section or other basis in section 34(a)(4)(i) you used to qualify for an enterprise unit and such discovery is made:

(A) On or before the acreage reporting date, your unit division will be based on the basic or optional units, whichever you report on your acreage report and qualify for; or

(B) At any time after the acreage reporting date, we will assign the basic unit structure; and

(vii) If we discover you do not qualify for an enterprise unit and such discovery is made:

(A) The crop must be insured under revenue protection or yield protection, unless otherwise specified in the Special Provisions; and

(B) For optional units, to qualify for optional units and to be eligible to use such records to establish the production guarantee for the optional units;

(C) You must maintain separate records of acreage and production:

(A) For each basic unit, to be eligible to use records to establish the production guarantee for the basic unit; or

(B) For optional units, to qualify for optional units and to be eligible to use such records to establish the production guarantee for the optional units;

(D) At any time after the acreage reporting date, we will assign the basic unit structure; and
canola for which you have elected yield protection, the corn, soybeans and canola would be assigned the unit structure in accordance with section 34(a)(5)(v));

(2) With respect to corn and canola, if you insure your corn and canola with us and your soybeans with a different insurance provider, the corn, soybeans and canola would be assigned the unit structure in accordance with section 34(a)(5)(v)); and

(3) At the same coverage level (e.g., if you elect to insure your corn and canola at the 65 percent coverage level and your soybeans at the 75 percent coverage level, the corn, soybeans and canola would be assigned the unit structure in accordance with section 34(a)(5)(v));

(B) A whole-farm unit must contain all of the insurable acreage of at least two crops; and

(C) At least two of the insured crops must each have planted acreage that constitutes 10 percent or more of the total planted acreage liability of all insured crops in the whole-farm unit (For crops for which revenue protection is available, liability will be based on the applicable projected price only for the purpose of section 34(a)(5)(i));

(ii) You will be required to pay separate administrative fees for each crop included in the whole-farm unit;

(iii) You must separately designate on the acreage report each basic unit for each crop in the whole-farm unit;

(iv) If you want to change your unit structure from a whole-farm unit to basic or optional units in any subsequent crop year, you must maintain separate records of acreage and production;

(A) For each basic unit, to be eligible to use such records to establish the production guarantee for the basic units;

(B) For optional units, to qualify for optional units and to be eligible to use such records to establish the production guarantee for the optional units; and

(iv) If we discover you do not qualify for a whole-farm unit for at least one insured crop because, even though you elected revenue protection for all your crops;

(A) You do not meet all of the other requirements in section 34(a)(5)(i), and such discovery is made;

(i) On or before the acreage reporting date, your unit division for all crops for which you elected a whole-farm unit will be based on basic or optional units, whichever you report on your acreage report and qualify for; or

(2) At any time after the acreage reporting date, we will assign the basic unit structure for all crops for which you elected a whole-farm unit; or

(B) It was not possible to establish a projected price for at least one of your crops, your unit division will be based on the unit structure you report on your acreage report and qualify for only for the crop for which a projected price could not be established, unless the remaining crops in the unit would no longer qualify for a whole-farm unit, in such case your unit division for the remaining crops will be based on the unit structure you report on your acreage report and qualify for.

(b) Unless limited by the Crop Provisions or Special Provisions, a basic unit as defined in section 1 of the Basic Provisions may be divided into optional units if, for each optional unit, you meet the following:

(1) You must plant the crop in a manner that results in a clear and discernible break in the planting pattern at the boundaries of each optional unit;

(2) All optional units you select for the crop year are identified on the acreage report for that crop year (Units will be determined when the acreage is reported but may be adjusted or combined to reflect the actual unit structure when adjusting a loss. No further unit division may be made after the acreage reporting date for any reason);

(3) You have records, that are acceptable to us, for at least the previous crop year for all optional units that you will report in the current crop year (You may be required to produce the records for all optional units for the previous crop year); and

(4) You have records of marketed or stored production from each optional unit, or the production from each optional unit is kept separate until loss adjustment is completed by us.

(c) Each optional unit must meet one or more of the following, unless otherwise specified in the Crop Provisions or allowed by written agreement:

(1) Optional units may be established if each optional unit is located in a separate section where the boundaries are readily discernible:

(i) In the absence of sections, we may consider parcels of land legally identified by other methods of measure, such as Spanish grants, provided the boundaries are readily discernible, if such parcels can be considered as the equivalent of sections for unit purposes in accordance with FCIC issued procedures; or

(ii) In the absence of sections as described in section 34(c)(1) or other methods of measure used to establish section equivalents as described in section 34(c)(1)(i), optional units may be established if each optional unit is located in a separate FSA farm serial number in accordance with FCIC issued procedures;

(2) In additional to, or in stead of, establishing optional units by section, section equivalent or FSA farm serial number, optional units may be based on irrigated and non-irrigated acreage. To qualify as separate irrigated and non-irrigated optional units,
35. Multiple Benefits

(a) If you are eligible to receive an indemnity and are also eligible to receive benefits for the same loss under any other USDA program, you may receive benefits under both programs, unless specifically limited by the crop insurance contract or by law.

(b) Any amount received for the same loss from any USDA program, in addition to the crop insurance payment, will not exceed the difference between the crop insurance payment and the actual amount of the loss, unless otherwise provided by law. The amount of the actual loss is the difference between the total value of the insured crop before the loss and the total value of the insured crop after the loss.

(1) For crops for which revenue protection is not available:

(i) If you have an approved yield, the total value of the crop before the loss is your approved yield times the highest price election for the crop; and

(ii) If you have an approved yield, the total value of the crop after the loss is your production to count times the highest price election for the crop; or

(iii) If you have an amount of insurance, the total value of the crop before the loss is the highest amount of insurance available for the crop; and

(iv) If you have an amount of insurance, the total value of the crop after the loss is your production to count times the price contained in the Crop Provisions for valuing production to count.

(2) For crops for which revenue protection is available and:

(i) You elect yield protection:

(A) The total value of the crop before the loss is your approved yield times the applicable projected price (at the 100 percent price level) for the crop; and

(B) The total value of the crop after the loss is your production to count times the applicable projected price (at the 100 percent price level) for the crop; or

(ii) If you have an approved yield, the total value of the crop before the loss is your production to count times the applicable projected price (at the 100 percent price level) for the crop; and

(iii) If you have an amount of insurance, the total value of the crop after the loss is your production to count times the price contained in the Crop Provisions for valuing production to count.

36. Substitution of Yields

(a) When you have actual yields in your production history database that, due to an insurable cause of loss, are less than 60 percent of the applicable transitional yield you may elect, on an individual actual yield basis, to exclude and replace one or more of any such yields within each database.

(b) Each election made in section 36(a) must be made on or before the production reporting date for the insured crop and each such election will remain in effect for succeeding years unless canceled by the production reporting date for the succeeding crop year. If you cancel an election, the actual yield will be used in the database. For example, if you elected to substitute yields in your database for the 1998 and 2000 crop year, for any subsequent crop year, you can elect to cancel the substitution for either or both years.

(c) Each excluded actual yield will be replaced with a yield equal to 60 percent of the applicable transitional yield for the crop year in which the yield is being replaced.
example, if you elect to exclude a 2001 crop year actual yield, the transitional yield in effect for the 2001 crop year in the county will be used. If you also elect to exclude a 2002 crop year actual yield, the transitional yield in effect for the 2002 crop year in the county will be used. The replacement yields will be used in the same manner as actual yields for the purpose of calculating the approved yield.

(d) Once you have elected to exclude an actual yield from the database, the replacement yield will remain in effect until such time as that crop year is no longer included in the database unless this election is canceled in accordance with section 36(b).

(e) Although your approved yield will be used to determine your amount of premium owed, the premium rate will be increased to cover the additional risk associated with the substitution of higher yields.

(a) In accordance with section 8(b)(2), insurance will not be provided for any crop grown using an organic farming practice, unless the information needed to determine a premium rate for an organic farming practice is specified on the actuarial table, or insurance is allowed by a written agreement.

(b) If insurance is provided for an organic farming practice as specified in section 8(a), only the following acreage will be insured under such practice:

(1) Certified organic acreage;
(2) Transitional acreage being converted to certified organic acreage in accordance with an organic plan; and
(3) Buffer zone acreage.

(c) On the date you report your acreage, you must have:

(1) For certified organic acreage, a written certification in effect from a certifying agent indicating the name and address of the certifying agent (a certificate issued to a tenant may be used to qualify a landlord or other similar arrangement);
(2) For transitional acreage, a certificate as described in section 8(c)(1), or written documentation from a certifying agent indicating an organic plan is in effect for the acreage; and
(3) Records from the certifying agent showing the specific location of each field of certified organic, transitional, buffer zone, and acreage not maintained under organic management.

(d) If you claim a loss on any acreage insured under an organic farming practice, you must provide us with copies of the records required in section 8(c).

(e) If any acreage qualifies as certified organic or transitional acreage on the date you report such acreage, and such certification is subsequently revoked by the certifying agent, or the certifying agent no longer considers the acreage as transitional acreage for the remainder of the crop year, that acreage will remain insured under the reported practice for which it qualified at the time the acreage was reported. Any loss due to failure to comply with organic standards will be considered an uninsured cause of loss.

(f) Contamination by application or drift of prohibited substances onto land on which crops are grown using organic farming practices will not be an insured peril on any certified organic, transitional or buffer zone acreage.

(g) In addition to the provisions contained in section 17(f), prevented planting coverage will not be provided for any acreage based on an organic farming practice in excess of the number of acres that will be grown under an organic farming practice and shown as such in the records required in section 37(c).

(h) In lieu of the provisions contained in section 17(f)(1) that specify prevented planting acreage within a field that contains planted acreage will be considered to be acreage of the same practice that is planted in the field, prevented planting acreage will be considered as organic practice acreage if it is identified as certified organic, transitional, or buffer zone acreage in the organic plan.

[56 FR 1351, Jan. 14, 1991]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §457.8, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 457.9 Appropriation contingency.

Notwithstanding the cancellation date stated in the policy, if there are insufficient funds appropriated by the Congress to deliver the crop insurance program, the policy will automatically terminate without liability.

[59 FR 45972, Sept. 6, 1994]

§§ 457.10-457.100 [Reserved]

§ 457.101 Small grains crop insurance.

The small grains crop insurance provisions for the 2011 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Small Grains Crop Provisions

1. Definitions

Adequate stand. A population of live plants per unit of acreage which will produce at
least the yield used to establish your production guarantee.

Harvest. Combining or threshing the insured crop for grain or cutting for hay or silage on any acreage. A crop which is swathed prior to combining is not considered harvested.

Initially planted. The first occurrence of planting the insured crop on insurable acreage for the crop year.

Khorasan. The common name for a variety of wheat (Triticum turanicum) that is marketed under trademarks such as Kamut. Khorasan is considered to be spring wheat for the purposes of this policy.

Latest final planting date—
(1) The final planting date for spring-planted acreage in all counties for which the Special Provisions designate a final planting date for spring-planted acreage only;
(2) The final planting date for fall-planted acreage in all counties for which the Special Provisions designate a final planting date for fall-planted acreage only; or
(3) The final planting date for spring-planted acreage in all counties for which the Special Provisions designate final planting dates for both spring-planted and fall-planted acreage.

Local market price. The cash grain price per bushel for the applicable quality level indicated below and offered by buyers in the area in which you normally market the insured crop. The local market price will reflect the maximum limits of quality deficiencies allowable for the applicable quality level indicated below. Factors not associated with the specified quality levels, including but not limited to protein, oil or moisture content, or milling quality will not be considered.

(1) U.S. No. 2 for Wheat (subclass hard amber durum for durum wheat and subclass northern spring for hard red spring wheat), except Khorasan; barley (including hull-less barley); oats (including hull-less oats); rye; and flax.
(2) The quality factor levels required for durum wheat to grade U.S. No. 2 for Khorasan.
(3) No. 2 grade buckwheat determined in accordance with the applicable state grading standards.

Nurse crop (companion crop). A crop planted into the same acreage as another crop, that is intended to be harvested separately, and which is planted to improve growing conditions for the crop with which it is grown.

Planted acreage. In addition to the definition contained in the Basic Provisions, except for flax, land on which seed is initially spread onto the soil surface by any method and subsequently is mechanically incorporated into the soil in a timely manner and at the proper depth will be considered planted. Flax seed must initially be planted in rows to be considered planted, unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Prevented planting. As defined in the Basic Provisions, except that the references to “final planting date” contained in the definition in the Basic Provisions are replaced with the “latest final planting date.”

Small grains. Wheat, including only common wheat (Triticum aestivum), club wheat (T. compactum), durum wheat (T. durum) and Khorasan (T. turanicum); barley (Hordeum vulgare), including hull-less barley and excluding black barley; oats (Avena sativa, and A. byzantina), and hull-less oats (A. Nuda); rye (Secale cereale); flax (Linum usitatissimum); and buckwheat (Fagopyrum esculentum).

Swathed—Severance of the stem and grain head from the ground without removal of the seed from the head and placing into a windrow.

2. Unit Division

In addition to the requirements of section 34(b) of the Basic Provisions, for wheat only, in addition to, or instead of, establishing optional units by section, section equivalent or FSA farm serial number and by irrigated and non-irrigated practices, optional units may be established if each optional unit contains only initially planted winter wheat, only initially planted spring wheat, only initially planted club wheat or only initially planted durum wheat. Separate optional units for initially planted winter wheat and initially planted spring wheat may be established only in counties having both winter and spring type final planting dates as designated in the Special Provisions. A separate optional unit for club wheat may be established only in counties for which the Special Provisions designate club wheat as a wheat type (separate optional units may be established for initially planted winter club and initially planted spring club wheat if the Special Provisions specify both as wheat types). A separate optional unit for durum wheat may be established only in counties for which the Special Provisions designate durum wheat as a separate wheat type (separate optional units may be established for initially planted winter durum wheat and initially planted spring durum wheat if the Special Provisions specify both as wheat types).

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:
(a) Revenue protection is not available for your oats, rye, flax, or buckwheat. Therefore, if you elect to insure such crops by the sales closing date, they will only be protected against a loss in yield;
(b) Revenue protection is available for wheat and barley. Therefore, if you elect to insure your wheat or barley:

(1) You must elect to insure your wheat or barley with either revenue protection or yield protection by the sales closing date; and

(2) In counties with both fall and spring sales closing dates for the insured crop:

(i) If you do not have any insured fall planted acreage of the insured crop, you may change your coverage level, or your percentage of projected price (if you have yield protection), or elect revenue protection or yield protection, until the spring sales closing date; or

(ii) If you have any insured fall planted acreage of the insured crop, you may not change your coverage level, or your percentage of projected price (if you have yield protection), or elect revenue protection or yield protection, after the fall sales closing date.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date for counties with a March 15 cancellation date and June 30 preceding the cancellation date for all other counties.

5. Cancellation and Termination Dates

The cancellation and termination dates are as follows, unless otherwise specified in the Special Provisions:

<table>
<thead>
<tr>
<th>Crop, state and county</th>

6. Insured Crop

(a) The crop insured will be each small grain you elect to insure, that is grown in the county on insurable acreage, and for which premium rates are provided by the actuarial documents:

(1) In which you have a share;

(2) That is planted for harvest as grain (a grain mixture in which barley or oats is the predominate grain may also be insured if allowed by the Barley or Oat Special Provisions, or if a written agreement allows insurance for such mixture. The production from such mixture will be considered as the predominate grain on a weight basis); and

(3) That is not, unless insurance is allowed by a written agreement:

(i) Interplanted with another crop except as allowed in section 6(a)(2);

(ii) Planted into an established grass or legume; or

(iii) Planted as a nurse crop, unless planted as a nurse crop for new forage seeding, but only if seeded at a normal rate and intended for harvest as grain.

(b) Buckwheat will be insured only if it is produced under a contract with a business enterprise equipped with facilities appropriate to handle and store buckwheat production. The contract must be executed by you and the business enterprise, in effect for the crop year, and a copy provided to us no later than the acreage reporting date. To be considered a contract, the executed document must contain:

(1) A requirement that you plant, grow and deliver buckwheat to the business enterprise;

(2) The amount of production that will be accepted or a statement that all production from a specified number of acres will be accepted;

(3) The price to be paid for the contracted production or a method to determine such price; and

(4) Other such terms that establish the obligations of each party to the contract.

(c) If you anticipate destroying any acreage prior to harvest you:

(1) May report all planted acreage when you report your acreage for the crop year and specify any acreage to be destroyed as uninsurable acreage (by doing so, no coverage will be considered to have attached on the specified acreage and no premium will be due for such acreage. If you do not destroy such acreage, you will be subject to the under-reporting provisions contained in section 6 of the Basic Provisions); or

(2) May report all planted acreage as insurable when you report your acreage for the crop year. Premium will be due on all the acreage except as set forth herein. If the Special Provisions allow a reduced premium amount for acreage intentionally destroyed prior to harvest, you may qualify for such reduction only if you notify us in writing on or before the date designated in the Special Provisions of the intended destruction, and do not claim an indemnity on the acreage. No premium reduction will be allowed if the required notice is not given or if you claim an indemnity for the acreage. Upon receiving timely notice, insurance coverage on the acreage you do not intend to harvest will cease and we will revise your acreage report to indicate the applicable reduction in premium. If you do not destroy the crop as intended, you will be subject to the under-reporting provisions contained in section 6 of the Basic Provisions.

(d) In counties for which the actuarial table provides premium rates for the Wheat or Barley Winter Coverage Endorsement (7 CFR 457.102), coverage is available for winter barley or wheat damaged before the time coverage begins and the spring final planting date. Coverage under the endorsement is effective only if you qualify under the terms of the endorsement and you execute the endorsement by the sales closing date.

(e) In counties for which the actuarial table provides premium rates for malting barley coverage, an endorsement is available (7 CFR 457.118) that provides additional insurance protection for malting barley. This endorsement provides coverage for producers who grow malting barley under contract and for those who do not have a contract. Coverage under the endorsement is effective only if you qualify under the terms of the endorsement and you execute the endorsement by the sales closing date.

7. Insurance Period

In accordance with section 11 of the Basic Provisions, and subject to any provisions provided by the Wheat or Barley Winter Coverage Endorsement (if elected by you):

(a) Insurance attaches on each unit or part thereof on the later of the date we accept your application or the date the insured crop is planted.

(b) The acreage must be planted on or before the final planting date designated in the Special Provisions for the insured crop except as allowed in section 12 of these Crop Provisions and section 16 of the Basic Provisions.

(ii) Any acreage of the insured crop damaged before the final planting date, to the extent that producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant.

(2) For barley and wheat, the following limitations apply:

(i) The acreage must be planted on or before the final planting date designated in the Special Provisions for the insured crop except as allowed in section 12 of these Crop Provisions and section 16 of the Basic Provisions.

(ii) Whenever the Special Provisions designate only a fall final planting date, any acreage of winter barley or wheat damaged before such final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a winter type of the insured crop unless we agree that replanting is not practical.

(iii) Whenever the Special Provisions designate both fall and spring final planting dates:

(A) Any winter barley or winter wheat that is damaged before the spring final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a winter type of the insured crop.

(B) Any winter barley or winter wheat acreage that is replanted to a spring type of the same crop when it was practical to replant the winter type will be insured as the spring type and the production guarantee, premium, projected price, and harvest price applicable to the spring type will be used. In this case, the acreage will be considered to be initially planted to the spring type.

(C) Notwithstanding sections 7(a)(2)(i)(1)(A) and (B), if you have elected coverage under a barley or wheat winter coverage endorsement (if available in the county), insurance will be in accordance with the endorsement.

(iv) Whenever the Special Provisions designate a spring final planting date, any acreage of spring barley or wheat damaged before such final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a spring type of the insured crop unless we agree that replanting is not practical.
(y) Whenever the Special Provisions designate only a spring final planting date, any acreage of fall planted barley or fall planted wheat is not insured unless you request such coverage on or before the spring sales closing date, and we determine, in writing, that the acreage has an adequate stand in the spring to produce the yield used to determine your production guarantee. However, if we fail to inspect the acreage by the spring final planting date, insurance will attach as specified in section 7(a)(2)(v)(C).

(A) Your request for coverage must include the location and number of acres of fall planted barley or wheat.

(B) The fall planted barley or fall planted wheat will be insured as a spring type for the purpose of the production guarantee, premium, projected price, and harvest price, if applicable.

(C) Insurance will attach to such acreage on the date we determine an adequate stand exists or on the spring final planting date if we do not determine adequacy of the stand by the spring final planting date.

(D) Any acreage of such fall planted barley or fall planted wheat that is damaged after it is accepted for insurance but before the spring final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a spring type of the insured crop unless we agree it is not practical to replant.

(E) If fall planted acreage is not to be insured it must be recorded on the acreage report as uninsured fall planted acreage.

(b) The calendar date for the end of the insurance period is the following applicable date:

(1) September 25 in Alaska;
(2) July 31 in Alabama, Arizona, Arkansas, Connecticut, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, New Jersey, North Carolina, South Carolina and Tennessee; or
(3) October 31 in all other states.

8. Causes of Loss

In addition to the provisions under section 12 of the Basic Provisions, any loss covered by this policy must occur within the insurance period.

The specific causes of loss for small grains are:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage allowed because of insufficient or improper application of pest control measures;
(d) Plant disease, but not damage allowed because of insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption;
(h) Failure of the irrigation water supply due to a cause of loss specified in sections 8(a) through (g) that also occurs during the insurance period; or

(i) For revenue protection, a change in the harvest price from the projected price, unless FCIC can prove the price change was the direct result of an uninsured cause of loss specified in section 12(a) of the Basic Provisions.

9. Replanting Payments

(a) A replanting payment is allowed as follows:

(1) In lieu of provisions in section 13 of the Basic Provisions that limit the amount of a replant payment to the actual cost of replanting, the amount of any replanting payment will be determined in accordance with these crop provisions;

(2) You must comply with all requirements regarding replanting payments contained in section 13 of the Basic Provisions (except as allowed in section 9(a)(1)(i)) and in any winter coverage endorsement for which you are eligible and which you have elected;

(3) The insured crop must be damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage;

(4) The acreage must have been initially planted to a spring type of the insured crop in those counties with only a spring final planting date;

(5) Damage must occur after the fall final planting date in those counties where both a fall and spring final planting date are designated (If the Special Provisions provide more than one fall final planting date, the fall final planting date applicable to policies with the Wheat or Barley Winter Coverage Endorsement will be used for this purpose, regardless of whether or not the endorsement is actually in effect.); and

(6) The replanted crop must be seeded at a rate sufficient to achieve a total (undamaged and new seeding) plant population that is considered appropriate by agricultural experts for the insured crop, type and practice.

(b) No replanting payment will be made for acreage initially planted to a winter type of the insured crop (including rye) in any county for which the Special Provisions contain only a fall final planting date (including final planting dates in December, January and February).

(c) Unless otherwise specified in the Special Provisions, the amount of the replanting payment per acre will be:

(1) The lesser of 20 percent of the production guarantee or the number of bushels for the applicable crop specified below:

(i) Two bushels for flax or buckwheat;
(ii) Four bushels for wheat; or
(iii) Five bushels for barley or oats;

(2) Multiplied by:

(i) Your price election for oats, flax or buckwheat; or

(ii) Multiplied by:

(iii) Five bushels for barley or oats; or

(iv) Six bushels for flax or buckwheat; or

(v) The lesser of:

(1) The yield used to determine your production guarantee;
(2) The yield used to determine your production guarantee plus 50 percent; or

(3) The yield used to determine your production guarantee plus 100 percent.
§ 457.101

(ii) Your projected price for wheat or barley; and

(3) Multiplied by your share.

(d) When the crop is replanted using a practice that is uninsurable for an original planting, the liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

(e) Replanting payments will be calculated using your price election or your projected price, as applicable, and your production guarantee for the crop type that is replanted and insured. For example, if damaged spring wheat is replanted to durum wheat, your projected price applicable to durum wheat will be used to calculate any replanting payment that may be due. A revised acreage report will be required to reflect the replanted type. Notwithstanding the previous two sentences, the following will have a replanting payment based on your production guarantee and your price election or your projected price, as applicable, for the crop type initially planted:

(1) Any damaged winter crop type that is replanted to a spring crop type, but that retains insurance based on the winter crop type; and

(2) Any acreage replanted at a reduced seeding rate into a partially damaged stand of the insured crop.

10. Duties in the Event of Damage or Loss

Representative samples are required in accordance with section 14 of the Basic Provisions.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:

(1) Optional unit, we will combine all optional units for which acceptable records of production were not provided; or for any

(2) Basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the number of insured acres of each insured crop or type, as applicable by your respective:

(i) Yield protection guarantee (per acre) if you elected yield protection for barley or wheat;

(ii) Production guarantee (per acre) and your price election for oats, rye, flax, or buckwheat; or

(iii) Revenue protection guarantee (per acre) if you elected revenue protection for barley or wheat;

(2) Totaling the results of section 11(b)(1)(i), (ii), or (iii), whichever is applicable;

(3) Multiplying the production to count of each insured crop or type, as applicable, by your respective:

(i) Projected price for wheat or barley if you elected yield protection;

(ii) Price election for oats, rye, flax, or buckwheat; or

(iii) Harvest price if you elected revenue protection;

(4) Totaling the results of section 11(b)(3)(i), (ii), or (iii), whichever is applicable;

(5) Subtracting the result of section 11(b)(4) from the result of section 11(b)(2); and

(6) Multiplying the result of section 11(b)(5) by your share.

For example:

You have 100 percent share in 50 acres of wheat in the unit with a production guarantee (per acre) of 45 bushels, your projected price is $3.40, your harvest price is $3.45, and your production to count is 2,000 bushels.

If you elected yield protection:

(1) 50 acres x (45 bushel production guarantee x $3.40 projected price) = $7,650.00 value of the production guarantee

(3) 2,000 bushel production to count x $3.40 projected price = $6,800.00 value of the production to count

(5) $7,650.00-$6,800.00 = $850.00

(6) $850.00 x 1.000 share = $850.00 indemnity; or

If you elected revenue protection:

(2) Totaling the results of section 11(b)(1)(i), (ii), or (iii), whichever is applicable;

(3) Multiplying the production to count of each insured crop or type, as applicable, by your respective:

(i) Projected price for wheat or barley if you elected yield protection;

(ii) Price election for oats, rye, flax, or buckwheat; or

(iii) Harvest price if you elected revenue protection;

(4) Totaling the results of section 11(b)(3)(i), (ii), or (iii), whichever is applicable;

(5) Subtracting the result of section 11(b)(4) from the result of section 11(b)(2); and

(6) Multiplying the result of section 11(b)(5) by your share.

For example:

You have 100 percent share in 50 acres of wheat in the unit with a production guarantee (per acre) of 45 bushels, your projected price is $3.40, your harvest price is $3.45, and your production to count is 2,000 bushels.

If you elected yield protection:

(1) 50 acres x (45 bushel production guarantee x $3.40 projected price) = $7,650.00 value of the production guarantee

(3) 2,000 bushel production to count x $3.40 projected price = $6,800.00 value of the production to count

(5) $7,650.00-$6,800.00 = $850.00

(6) $850.00 x 1.000 share = $850.00 indemnity; or

If you elected revenue protection:

(1) 50 acres x (45 bushel production guarantee x $3.45 harvest price) = $7,762.50 revenue protection guarantee

(3) 2,000 bushel production to count x $3.45 harvest price = $6,900.00 value of the production to count

(5) $7,762.50-$6,900.00 = $862.50

(6) $862.50 x 1.000 share = $862.50 indemnity.

(c) The total production to count (in bushels) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) For oats, rye, flax, or buckwheat, and barley or wheat under yield protection, not less than the amount of production that when multiplied by the harvest price equals the revenue protection guarantee (per acre) for acreage:

(A) Which is abandoned;

(B) Put to another use without our consent;

(C) Damaged solely by uninsured causes; or

(D) For which you fail to provide records of production that are acceptable to us;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production (mature unharvested production may be adjusted for...
quality deficiencies and excess moisture in accordance with subsection 11(d));

(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(2) All harvested production from the insurable acreage.

(d) Mature wheat, barley, oat, rye, and buckwheat production may be adjusted for excess moisture and quality deficiencies. Flax production may be adjusted for quality deficiencies only. If a moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(1) Production will be reduced by .12 percent for each .1 percentage point of moisture in excess of:

(i) 13.5 percent for wheat;

(ii) 14.5 percent for barley;

(iii) 14.0 percent for oats; and

(iv) 16.0 percent for rye and buckwheat.

We may obtain samples of the production to determine the moisture content.

(2) Production will be eligible for quality adjustment if:

(i) Deficiencies in quality, in accordance with the Official United States Standards for Grain including the definition of terms used in section 11(d), result in:

(A) Wheat, except Khorasan, not meeting the grade requirements for U.S. No. 4 (grades U.S. No. 5 or worse) because of test weight; percentage of sound barley (heat-damaged kernels will not be considered to be damaged); shrunken or broken kernels; defects (foreign material and heat damage will not be considered to be defects); a musty, sour, or commercially objectionable foreign odor (except smut or garlic odor); or grading garlicky, light smutty, smutty or ergoty; or grading light smutty, smutty, light garlicky, garlicky, or ergoty;

(B) Barley, except hull-less barley, not meeting the grade requirements for U.S. No. 4 (grades U.S. No. 5 or worse) because of test weight; percentage of sound barley (heat-damaged kernels will not be considered to be damaged); thin barley; black barley; a musty, sour, or commercially objectionable foreign odor (except smut or garlic odor); or grading smutty, thin, garlicky or ergoty;

(C) Oats, except hull-less oats, not meeting the grade requirements for U.S. No. 4 (grade U.S. sample grade) because of test weight; percentage of sound oats (heat-damaged kernels will be considered to be sound oats); a musty, sour, or commercially objectionable foreign odor (except smut or garlic odor); or grading smutty, thin, garlicky or ergoty;

(D) Rye not meeting the grade requirements for U.S. No. 3 (grades U.S. No. 4 or worse) because of test weight; percent damaged kernels (heat-damaged kernels will not be considered to be damaged); thin rye; a musty, sour, or commercially objectionable foreign odor (except smut or garlic odor); or grading light smutty, smutty, light garlicky, garlicky, or ergoty;

(E) Flaxseed not meeting the grade requirements for U.S. No. 2 (grades U.S. sample grade) due to test weight; damaged kernels (heat-damaged kernels will not be considered to be damaged); or a musty, sour, or commercially objectionable foreign odor (except smut or garlic odor);

(ii) Deficiencies in the quality of buckwheat, determined in accordance with applicable state grading standards, result in it not meeting No. 3 grade requirements due to test weight; a musty, sour or commercially objectionable foreign odor (except smut or garlic odor); or grading garlicky, smutty or ergoty if such grades are provided for by the applicable state grading standards;

(iii) Quality factors for Khorasan fall below the levels contained in the Official United States Standards for Grain that cause durum wheat to grade less than U.S. No. 4. For example, if durum wheat grades less than U.S. No. 4 when its test weight falls below 54.0 pounds per bushel, Khorasan would be eligible for quality adjustment if its test weight falls below 54.0 pounds per bushel. The same quality factors considered for quality adjustment of durum wheat will be applicable and determination of deficiencies will be made in accordance with the Federal Grain Inspection Service directive that establishes procedures for quality factor analysis of Khorasan seed. Quality adjustment discount factors for U.S. grades specified in the Special Provisions will also apply to Khorasan at the same levels applicable to durum wheat;

(iv) Quality factors for hull-less barley fall below the levels contained in the Official United States Standards for Grain that
cause barley to grade less than U.S. No. 4. For example, if barley grades less than U.S. No. 4 when its test weight falls below 40.0 pounds per bushel, hull-less barley would be eligible for quality adjustment if its test weight falls below 40.0 pounds per bushel. The same quality factors considered for quality adjustment of barley will be applicable and determination of deficiencies will be made in accordance with the Federal Grain Inspection Service directive that establishes procedures for quality factor analysis of hull-less barley. Quality adjustment discount factors for U.S. grades specified in the Special Provisions will also apply to hull-less barley at the same levels applicable to barley:

(v) Quality factors for hull-less oats fall below the levels contained in the Official United States Standards for Grain that cause oats to grade less than U.S. No. 4. For example, if oats grade less than U.S. No. 4 when its test weight falls below 27.0 pounds per bushel, hull-less oats would be eligible for quality adjustment if the test weight falls below 27.0 pounds per bushel. The same quality factors considered for quality adjustment of oats will be applicable and determination of deficiencies will be made in accordance with the Federal Grain Inspection Service directive that establishes procedures for quality factor analysis of hull-less oats. Quality adjustment discount factors for U.S. grades specified in the Special Provisions will also apply to hull-less oats at the same levels applicable to oats; or

(vi) Substances or conditions are present, including mycotoxins, that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(3) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these crop provisions;

(ii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us;

(iii) With regard to deficiencies in quality (except test weight, which may be determined by our loss adjustor), the samples are analyzed by:

(A) A grain grader licensed under the United States Warehouse Act;

(B) A grain grader licensed under State law and employed by a warehouse operator who has a commodity storage agreement with the Commodity Credit Corporation; or

(C) A grain grader not licensed under State law, but who is employed by a warehouse operator who has a commodity storage agreement with the Commodity Credit Corporation and is in compliance with State law regarding warehouses;

(iv) With regard to substances or conditions injurious to human or animal health, the samples are analyzed by a laboratory approved by us.

(4) Small grain production that is eligible for quality adjustment, as specified in sections 11(d)(2) and (3), will be reduced by the quality adjustment factor contained in the Special Provisions.

(e) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on a weight basis.

12. Late Planting

A late planting period is applicable to small grains, except to any barley or wheat acreage covered under the terms of the Wheat or Barley Winter Coverage Endorsement. Barley or wheat covered under the terms of the Winter Coverage Endorsement must be planted on or prior to the applicable final planting date specified in the Special Provisions. In counties having one fall final planting period, the fall late planting period will begin after the final planting date for acreage not covered under the endorsement.

13. Prevented Planting

(a) In addition to the provisions contained in section 17 of the Basic Provisions, in counties for which the Special Provisions designate a spring final planting date, your prevented planting production guarantee will be based on your approved yield for spring-planted acreage of the insured crop.

(b) Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

Federal Crop Insurance Corporation, USDA § 457.102

1. In return for payment of the additional premium designated in the actuarial documents, this endorsement is attached to and made part of the Small Grains Crop Provisions subject to the terms and conditions described herein.

2. This endorsement is available only in counties for which the Special Provisions for the insured crop designate both a fall final planting date and a spring final planting date, and for which the actuarial documents provide a premium rate for this coverage.

3. You must have a Small Grains Crop Insurance Policy in force and elect to insure barley or wheat under that policy.

4. You must select this coverage, by crop, on your application for insurance. Failure to do so means you have rejected this coverage for both wheat and barley and this endorsement is void.

5. In addition to the requirements of section 34(b) of the Basic Provisions and section 2 of the Small Grains Crop Provisions, optional units may be established for barley if each optional unit contains only initially planted winter barley or only initially planted spring barley.

6. If you elect this endorsement for winter barley, the contract change, cancellation, and termination dates applicable to wheat in the county will be applicable to all your spring and winter barley.

7. Coverage under this endorsement begins on the later of the date we accept your application for coverage or on the fall final planting date designated in the Special Provisions. Coverage ends on the spring final planting date designated in the Special Provisions.

8. The provisions of section 14 of the Basic Provisions are amended to require that all notices of damage be provided to us by the spring final planting date designated in the Special Provisions.

9. All eligible acreage of each crop covered under this endorsement must be insured.

10. The amount of any indemnity paid under the terms of this endorsement will be subject to any reduction specified in the Basic Provisions for multiple crop benefits in the same crop year.

11. Whenever any winter wheat or barley is damaged during the insurance period (see section 3, above), and at least 20 acres or 20 percent of the insured planted acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the production guarantee for the acreage, you may, at your option, take one of the following actions:

(a) Continue to care for the damaged crop. By doing so, coverage will continue under the terms of the Basic Provisions, the Small Grains Crop Insurance Provisions and this endorsement.

(b) Replant the acreage to an appropriate variety of the insured crop, if it is practical, and receive a replanting payment in accordance with the terms of section 9 (Replanting Payments) of the Small Grains Crop Insurance Provisions. By doing so, coverage will continue under the terms of the Basic Provisions, the Small Grains Crop Insurance Provisions and this endorsement, and the production guarantee for winter wheat or barley will remain in effect.

(c) Destroy the remaining crop on such acreage. By doing so, you agree to accept an appraisal amount of production determined in accordance with section 11(c)(1) of the Small Grains Crop Insurance Provisions to count against the unit production guarantee. This amount will be considered production to count in determining any final indemnity on the unit and will be used to settle your claim as described in section 11 (Settlement of Claim) of the Small Grains Crop Insurance Provisions. You may use such acreage for any purpose, including planting and separately insuring any other crop if such insurance is available. If you elect to plant and continue to care for the damage crop, you must elect whether or not you want insurance on the spring type of the same crop at the time we release the winter type acreage, you must pay additional premium for the insurance. Such acreage will be insured in accordance with the policy provisions that are applicable to acreage that is initially planted to a spring type of the insured crop, and you must:

(1) Plant the spring type in a manner which results in a clear and discernable break in the planting pattern at the boundary between it and any remaining acreage of the winter type; and

(2) Store or market the production in a manner which permits us to verify the amount of spring type production separately from any winter type production. In the event you are unable to provide records of production that are acceptable to us, the spring type acreage will be considered to be a part of the original winter type unit.

Option A (30 Percent Coverage and Acreage Release)

Whenever any winter wheat is damaged during the insurance period (see section 3, above), and at least 20 acres or 20 percent of the acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the production guarantee for the acreage, you may take any one of the following actions:

(a) Destroy the remaining crop on such acreage. By doing so, you agree to accept an amount of production to count against the unit production guarantee equal to 70 percent of the production guarantee for the damaged acreage, or an appraisal determined in accordance with paragraph 11.(c)(1) of the Small Grains Crop Insurance Provisions (§ 457.101) if such an appraisal results in a greater amount of production. This amount
§ 457.103 will be considered production to count in determining any final indemnity on the unit and will be used to settle your claim as described in the provisions under section 11. (Settlement of Claim) of the Small Grains Crop Insurance Provisions (§ 457.101). You may use such acreage for any purpose, including planting and separately insuring any other crop. If you elect to utilize such acreage for the production of spring wheat, you must:

(1) Plant the spring wheat in a manner which results in a clear and discernible break in the planting pattern at the boundary between it and any remaining winter wheat; and

(2) Store or market the production from such acreage in a manner which permits us to verify the amount of spring wheat production separately from any winter wheat production.

In the event you are unable to provide records of production that are acceptable to us, the spring wheat acreage will be considered to be a part of the original winter wheat unit. If you elected to insure the spring wheat acreage as a separate optional unit, any premium amount for such acreage will be considered earned and payable to us.

(b) Continue to care for the damaged crop. By doing so, coverage will continue under the terms of the Common Crop Insurance Policy (§ 457.8), the Small Grains Crop Insurance Provisions (§ 457.101), and this Option.

(c) Replant the acreage to an appropriate variety of wheat, if it is practical, and receive a replanting payment in accordance with the terms of section 9. (Replanting Payments) of the Small Grains Crop Provisions (§ 457.101). By doing so, coverage will continue under the terms of the Common Crop Insurance Policy (§ 457.8), the Small Grains Crop Insurance Provisions (§ 457.101), and this Option, and the production guarantee for winter wheat will remain in effect.

Option B (With Full Winter Damage Coverage)

Whenever any winter wheat is damaged during the insurance period and at least 20 acres or 20 percent of the acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the production guarantee for the acreage, you may, at your option, take one of the following actions:

(a) Continue to care for the damaged crop. By doing so, coverage will continue under the terms of the Common Crop Insurance Policy (§ 457.8), the Small Grains Crop Insurance Provisions (§ 457.101), and this Option.

(b) Replant the acreage to an appropriate variety of wheat, if it is practical, and receive a replanting payment in accordance with the terms of section 9. (Replanting Payments) of the Small Grains Crop Provisions (§ 457.101). By doing so, coverage will continue under the terms of the Common Crop Insurance Policy (§ 457.8), the Small Grains Crop Insurance Provisions (§ 457.101), and this Option, and the production guarantee for winter wheat will remain in effect.

(1) Plant the spring wheat in a manner which results in a clear and discernible break in the planting pattern at the boundary between it and any remaining winter wheat; and

(2) Store or market the production from such acreage in a manner which permits us to verify the amount of spring wheat production separately from any winter wheat production.

In the event you are unable to provide records of production that are acceptable to us, the spring wheat acreage will be considered to be a part of the original winter wheat unit. If you elected to insure the spring wheat acreage as a separate optional unit, any premium amount for such acreage will be considered earned and payable to us.

§ 457.104 Cotton crop insurance provisions.

The cotton crop insurance provisions for the 2011 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Cotton Crop Provisions

1. Definitions

Cotton. Varieties identified as American Upland Cotton.

Growth area. A geographic area designated by the Secretary of Agriculture for the purpose of reporting cotton prices.
Harvest. The removal of the seed cotton from the open cotton boll, or the severance of the open cotton boll from the stalk by either manual or mechanical means.

Planted acreage. In addition to the definition contained in the Basic Provisions, cotton must be planted in rows, unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement. The yield conversion factor normally applied to non-irrigated skip-row cotton acreage will not be used if the land between the rows of cotton is planted to any other spring planted crop.

Production guarantee (per acre). In lieu of the definition contained in the Basic Provisions, the number of pounds determined by multiplying the approved yield per acre by any applicable yield conversion factor for non-irrigated skip-row planting patterns, and multiplying the result by the coverage level percentage you elect.

Skip-row. A planting pattern that:

1. Consists of alternating rows of cotton and fallow land or land planted to another crop the previous fall; and
2. Qualifies as a skip-row planting pattern as defined by the Farm Service Agency (FSA) or a successor agency.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions, you must elect to insure your cotton with either revenue protection or yield protection by the sales closing date.

3. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

4. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alabama; Arizona; Arkansas; California; Florida; Georgia; Louisiana; Mississippi; Nevada; North Carolina; South Carolina; El Paso, Hudspeth, Culberson, Reeves, Loving, Ector, Upton, Reagan, Sterling, Coke, Tom Green, Concho, McCulloch, San Saba, Mills, Hamilton, Bosque, Johnson, Tarrant, Wise, and Coke counties, Texas, and all Texas counties lying south and east thereof to and including Terrell, Crockett, Sutton, Kimble, Gillespie, Blanco, Comal, Guadalupe, Gonzales, De Witt, Lavaca, Colorado, Wharton, Matagorda Counties, Texas.</td>
<td>February 28.</td>
</tr>
<tr>
<td>All other Texas counties and all other States</td>
<td>March 15.</td>
</tr>
</tbody>
</table>

5. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the cotton lint, in the county for which premium rates are provided by the actuarial documents:

(a) In which you have a share; and
(b) That is not (unless allowed by the Special Provisions or by written agreement):
   1. Colored cotton lint;
   2. Planted into an established grass or legume; or
   3. Interplanted with another spring planted crop.

6. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

(a) The acreage insured will be only the land occupied by the rows of cotton when a skip row planting pattern is utilized; and
(b) Any acreage of the insured crop damaged before the final planting date, to the extent that a majority of the producers in the area would not normally further care for the crop, must be replanted unless we agree that it is not practical to replant.

7. Insurance Period

(a) In lieu of section 11(b)(2) of the Basic Provisions, insurance will end upon the removal of the cotton from the field.
(b) In accordance with the provisions under section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the date immediately following planting as follows:
   1. September 30 in Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson Counties, Texas, and all Texas counties lying south thereof;
   2. January 31 in Arizona, California, New Mexico, Oklahoma, and all other Texas counties; and
   3. December 31 in all other states.

8. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss which occur within the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption;
(h) Failure of the irrigation water supply due to a cause of loss specified in sections 8(a) through (g) that also occurs during the insurance period or:
(1) For revenue protection, a change in the harvest price from the projected price, unless FCIC can prove the price change was the direct result of an uninsured cause of loss specified in section 12(a) of the Basic Provisions.

9. Duties in the Event of Damage or Loss

(a) In addition to your duties under section 14 of the Basic Provisions, in the event of damage or loss, the cotton stalks must remain intact for our inspection. The stalks must not be destroyed, and required samples must not be harvested, until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed and written notice of probable loss given to us.

(b) Representative samples are required in accordance with section 14 of the Basic Provisions.

10. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:
(1) Optional unit, we will combine all optional units for which acceptable records of production were not provided; or
(2) Basic unit, we will allocate any mingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the number of insured acres by your respective:
(i) Yield protection guarantee (per acre) if you elected yield protection; or
(ii) Revenue protection guarantee (per acre) if you elected revenue protection;
(2) Totaling the results of section 10(b)(1)(i) or 10(b)(1)(ii), whichever is applicable;
(3) Multiplying the production to count by your:
(i) Projected price if you elected yield protection; or
(ii) Harvest price if you elected revenue protection;
(4) Totaling the results of section 10(b)(3)(i) or 10(b)(3)(ii), whichever is applicable;
(5) Subtracting the result of section 10(b)(4) from the result of section 10(b)(3); and
(6) Multiplying the result of section 10(b)(5) by your share.

For example:
You have 100 percent share in 50 acres of cotton in the unit with a production guarantee (per acre) of 525 pounds, your projected price is $65, your harvest price is $70, and your production to count is 25,000 pounds.

If you elected yield protection:

(1) 50 acres x (525 pound production guarantee x $.65 projected price) = $17,062.50 value of the production guarantee
(3) 25,000 pound production to count x $.65 projected price = $16,250.00 value of production to count
(5) $17,062.50-$16,250.00 = $812.50
(6) $812.50 x 1.00 share = $812.50 indemnity;

If you elected revenue protection:

(1) 50 acres x (525 pound production guarantee x $.70 harvest price) = $18,375.00 revenue protection guarantee
(3) 25,000 pound production to count x $.70 harvest price = $17,500.00 value of the production to count
(5) $18,375.00-$17,500.00 = $875.00
(6) $875.00 x 1.00 share = $875.00 indemnity.

(c) The total production to count (in pounds) from all insurable acreage on the unit will include:

(i) All appraised production as follows:
(1) All appraised production, not less than the production guarantee and for revenue protection, not less than the amount of production that when multiplied by the harvest price equals the revenue protection guarantee (per acre) for acreage:
(A) That is abandoned;
(B) Put to another use without our consent;
(C) Damaged solely by uninsured causes;
(D) For which you fail to provide records of production that are acceptable to us;
(E) On which the cotton stalks are destroyed, in violation of section 9;
(ii) Production lost due to uninsured causes;
(iii) Unharvested production (mature unharvested production of white cotton may be adjusted for quality deficiencies in accordance with subsection 10(d)); and
(iv) Potential production on insured acreage you want to put to another use or you wish to abandon but are not willing to do so at the time a final settlement is made.

If agreement on the appraised amount of production is not reached:
(A) If you do not elect to continue to care for the crop we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be...
based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count; or

(b) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(2) All harvested production from the insurable acreage, including any mature cotton retrieved from the ground.

(d) Mature white cotton may be adjusted for quality when production has been damaged by insured causes. Such production to count will be reduced if the price quotation for cotton of like quality (price quotation “A”) for the applicable growth area is less than 85 percent of price quotation “B.”

(1) Price B is defined as the Upland Cotton National Average Loan Rate determined by FSA, or as specified in the Special Provisions.

(2) Price A is defined as the loan value per pound for the bale determined in accordance with the FSA Schedule of Premiums and Discounts for the applicable crop year, or as specified in the Special Provisions.

(3) If eligible for adjustment, the amount of production to count will be determined by multiplying the number of pounds of such production by the factor derived from dividing price quotation “A” by 85 percent of price quotation “B.”

(e) Colored cotton lint will not be eligible for quality adjustment.

11. Prevented Planting

(a) In addition to the provisions contained in section 17 of the Basic Provisions, your prevented planting production guarantee will be based on your approved yield without adjustment for skip-row planting patterns.

(b) Your prevented planting coverage will be 50 percent of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.105 Extra long staple cotton crop insurance provisions.

The extra long staple cotton crop insurance provisions for the 2014 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

ELS Cotton Crop Provisions

1. Definitions

Cotton. Varieties identified as Extra Long Staple (ELS) cotton and American Upland (AUP) cotton if ELS cotton is destroyed by an insured cause and acreage is replanted to AUP cotton.

ELS cotton. Extra Long Staple cotton (also called Pima cotton, American-Egyptian cotton, and American Pima cotton).

Harvest. The removal of the seed cotton from the open cotton boll, or the severance of the open cotton boll from the stalk by either manual or mechanical means.

Mature ELS cotton. ELS cotton that can be harvested either manually or mechanically.

Planted acreage. In addition to the definition contained in the Basic Provisions, cotton must be planted in rows, unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement. The yield conversion factor normally applied to non-irrigated skip-row cotton acreage will not be used if the land between the rows of cotton is planted to any other spring planted crop.

Production guarantee. The number of pounds determined by multiplying the approved yield per acre by any applicable yield conversion factor for non-irrigated skip-row planting patterns, and multiplying the result by the coverage level percentage you elect.

Replanting. Performing the cultural practices necessary to replace the ELS cotton seed, and replacing the seed with either ELS or AUP cotton seed in the insured acreage with the expectation of growing a successful crop.

Skip-row. A planting pattern that:

(1) Consists of alternating rows of cotton and fallow land or land planted to another crop the previous fall; and

(2) Qualifies as a skip-row planting pattern as defined by the Farm Service Agency (FSA) or a successor agency.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions (§457.8) you may select only one price election for all the cotton in the county insured under this policy.
3. Contract Changes
The contract change date is November 30 (December 17 for the 1998 crop year only) preceding the cancellation date (see the provisions of section 4 of the Basic Provisions).

4. Cancellation and Termination Dates
In accordance with section 2 of the Basic Provisions (§457.8), the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>States</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>New Mexico</td>
<td>March 15</td>
</tr>
<tr>
<td>All other States</td>
<td>Feb. 28</td>
</tr>
</tbody>
</table>

5. Insured Crop
In accordance with section 8 of the Basic Provisions (§457.8), the crop insured will be all the cotton lint in the county for which premium rates are provided by the actuarial documents:
(a) In which you have a share; and
(b) That is not (unless allowed by the Special Provisions or by a written agreement):
(1) Planted into an established grass or legume;
(2) Interplanted with another spring planted crop;
(3) Grown on acreage from which a hay crop was harvested in the same calendar year unless the acreage is irrigated or adequate measures are taken to terminate the small grain prior to heading and less than fifty percent (50%) of the small grain plants reach the heading stage.

6. Insurable Acreage
In addition to the provisions of section 9 of the Basic Provisions (§457.8):
(a) The acreage insured will be only the land occupied by the rows of cotton when a skip row planting pattern is utilized; and
(b) Any acreage of the insured crop damaged before the final planting date, to the extent that a majority of producers in the area would not be replanted unless we agree that it is not practical to replant.

7. Insurance Period
(a) In lieu of section 11(b)(b)(2) of the Basic Provisions, insurance will end upon the removal of the cotton from the field.
(b) In accordance with the provisions of section 11 of the Basic Provisions (§457.8), the calendar date for the end of the insurance period is January 31 immediately following planting.

8. Causes of Loss
In accordance with the provisions of section 12 of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss which occur within the insurance period:
(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of irrigation water supply, if applicable, due to an unavoidable cause of loss occurring within the insurance period.

(a) In addition to your duties under section 14 of the Basic Provisions, in the event of damage or loss:
(1) You must give us notice if you intend to replant any acreage originally planted to ELS cotton to AUP cotton.
(2) The cotton stalks must remain intact for our inspection. The stalks must not be destroyed, and required samples must not be harvested, until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed and written notice of probable loss is given to us.
(b) Representative samples are required in accordance with section 14 of the Basic Provisions.

10. Settlement of Claim
(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production:
(1) For any optional unit, we will combine all optional units for which acceptable records of production were not provided; or
(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.
(b) In the event of loss or damage covered by this policy, we will settle your claim on any unit by:
(1) Multiplying the insured acreage by the production guarantee;
(2) Subtracting from this the total production to count;
(3) Multiplying the remainder by your price election; and
(4) Multiplying this result by your share.
(c) The total production to count (in pounds) from all insurable acreage on the unit will include:
(1) All appraised production as follows:
(A) That is abandoned;
(B) Put to another use without our consent;
Federal Crop Insurance Corporation, USDA

§ 457.106

(C) Damaged solely by uninsured causes;
(D) For which you fail to provide records of production that are acceptable to us; or
(E) On which the cotton stalks are destroyed in violation of section 9;
(ii) Production lost due to uninsured causes;
(iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies in accordance with subsection:
(A) 10(d) and (e) if it is mature ELS cotton; or
(B) 10(f) if it is AUP cotton insured under these crop provisions); and
(iv) Potential production on insured acreage you want to put to another use or you wish to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement the insurance period for that acreage will end if you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
(2) All harvested production from the insurable acreage, including any mature cotton retained from the ground.

(d) Mature ELS cotton production may be adjusted for quality when production has been damaged by insured causes. Such production to count will be reduced if Price A is less than 85 percent of Price B.

1. Price B is defined as the Extra Long Staple Cotton National Average Loan Rate determined by FSA, or as specified in the Special Provisions.
2. Price A is defined as the loan value per pound for the bale determined in accordance with the FSA Schedule of Premiums and Discounts for the applicable crop year, or as specified in the Special Provisions.
3. If eligible for quality adjustment, the amount of production to be counted will be determined by multiplying the number of pounds of such production by the factor derived from dividing Price A by 85 percent of Price B.

(e) For ELS cotton to be eligible for quality adjustment as shown in subsection 10(d), ginning must have been completed at a gin using roller equipment.

(f) Mature AUP cotton harvested or appraised from acreage originally planted to ELS cotton in the same growing season will be reduced by the factor obtained by dividing the price per pound for AUP cotton by the price per pound for ELS cotton. The prices used for AUP and ELS cotton will be calculated using the Upland Cotton National Average Loan Rate determined by FSA and the Extra Long Staple Cotton National Average Loan Rate determined by FSA, or as specified in the Special Provisions.

11. Late Planting.

(a) A late planting period is applicable to ELS cotton, if allowed by the Special Provisions.

(b) If the Special Provisions do not provide for a late planting period, any ELS cotton that is planted after the final planting date will not be insured unless you were prevented from planting it by the final planting date. Such acreage will be insurable, and the production guarantee and premium for the acreage will be determined in accordance with section 16 of the Basic Provisions.

12. Prevented Planting

(a) In addition to the provisions contained in section 17 of the Basic Provisions, your prevented planting production guarantee will be based on your approved yield without adjustment for skip-row planting patterns.

(b) Your prevented planting coverage will be 50 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

179

§ 457.106 Texas citrus tree crop insurance provisions.

The Texas Citrus Tree Crop Insurance Provisions for the 2011 and succeeding crop years are as follows:
United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Texas Citrus Tree Crop Provisions

1. Definitions

Bud union. The location on the tree trunk where a bud from one tree variety is grafted onto root stock of another variety.

Crop. Specific groups of citrus fruit trees as listed in the Special Provisions.

Crop year. For the 1998 crop year only, a period of time that begins on June 1, 1997, and ends on November 20, 1998. For all other crop years, a period of time that begins on November 21 of the calendar year prior to the year the trees normally bloom, and ends on November 20 of the following calendar year.

The crop year is designated by the year in which the insurance period ends.

Dehorning. Cutting all scaffold limbs to a length not longer than 1/4 the height of the tree before such cutting.

Destroyed. Trees damaged to the extent that removal is necessary.

Excess precipitation. An amount of precipitation sufficient to directly damage the tree.

Excess wind. A natural movement of air that has sustained speeds in excess of 58 miles per hour recorded at the U.S. Weather Service reporting station nearest to the crop at the time of crop damage.

Freeze. The formation of ice in the cells of the trees caused by low air temperatures.

Good farming practices. The cultural practices generally in use in the county for the trees to have normal growth and vigor and recognized by the National Institute of Food and Agriculture as compatible with agronomic and weather conditions in the county.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Irrigated practice. A method by which the normal growth and vigor of the insured trees is maintained by artificially applying adequate quantities of water during the growing season using the appropriate irrigation systems at the proper times.

Root stock. A root or a piece of a root of one tree variety onto which a bud from another tree variety is grafted.

Scaffold limbs. Major limbs attached directly to the trunk.

Set out. Transplanting the tree into the grove.

2. Unit Division

(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by each citrus crop designated in the Special Provisions.

(b) Sections 34(b)(1), (3), and (4) of the Basic Provisions are not applicable.

(c) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

(d) Instead of establishing optional units by section, section equivalent, or FSA farm serial number optional units may be established if each optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In lieu of the requirement of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

(b) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

1. Definitions

(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by each citrus crop designated in the Special Provisions.

(b) Sections 34(b)(1), (3), and (4) of the Basic Provisions are not applicable.

(c) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

(d) Instead of establishing optional units by section, section equivalent, or FSA farm serial number optional units may be established if each optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In lieu of the requirement of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

(b) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

1. Definitions

(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by each citrus crop designated in the Special Provisions.

(b) Sections 34(b)(1), (3), and (4) of the Basic Provisions are not applicable.

(c) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

(d) Instead of establishing optional units by section, section equivalent, or FSA farm serial number optional units may be established if each optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In lieu of the requirement of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

(b) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

1. Definitions

(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by each citrus crop designated in the Special Provisions.

(b) Sections 34(b)(1), (3), and (4) of the Basic Provisions are not applicable.

(c) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

(d) Instead of establishing optional units by section, section equivalent, or FSA farm serial number optional units may be established if each optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In lieu of the requirement of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

(b) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

1. Definitions

(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by each citrus crop designated in the Special Provisions.

(b) Sections 34(b)(1), (3), and (4) of the Basic Provisions are not applicable.

(c) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

(d) Instead of establishing optional units by section, section equivalent, or FSA farm serial number optional units may be established if each optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In lieu of the requirement of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.

(b) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), that prohibits you from selecting more than one coverage level for each insured crop, you may select a different coverage level for each crop designated in the Special Provisions that you elect to insure.
Federal Crop Insurance Corporation, USDA § 457.106

year following dehorning, or the third year following grafting of a set out tree; or

(iv) Ninety percent (0.90) for the third growing season after being set out, the fourth year following dehorning, or the fourth year following grafting of a set out tree.

(3) The amount of insurance per acre for each population density, or factor as appropriate, will be multiplied by the applicable number of insured acres. These results will then be added together to determine the amount of insurance for the unit.

(4) The amount of insurance will be reduced proportionately for any unit on which the stand is less than 90 percent, based on the original planting pattern. For example, if the amount of insurance you selected is $2,000 and the remaining stand is 85 percent of the original stand, the amount of insurance on which the premium and any indemnity will be based is $1,700 ($2,000 multiplied by 0.85).

(5) If any insurable acreage of trees is set out after the first day of the crop year, and you elect to insure such acreage during that crop year, you must report the acreage, practice, crop, number of trees, date set out is completed, and your share to us within 72 hours after set out is completed for the unit.

(6) Production reporting requirements contained in section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8), are not applicable.

(7) You must report, by the sales closing date contained in the Special Provisions, by type if applicable:

(i) Any damage, removal of trees, change in practices, or any other circumstance that may reduce the amount of insurance, and the number of affected acres;

(ii) The number of trees on insurable and uninsurable acreage;

(iii) The date of original set out and the planting pattern;

(iv) The date of replacement or dehorning, if more than 10 percent of the trees on any unit have been replaced or dehorned in the previous 5 years; and

(v) For the first year of insurance for acreage interplanted with another perennial crop, and anytime the planting pattern of such acreage is changed:

(A) The age of the interplanted crop, and type if applicable;

(B) The planting pattern; and

(C) Any other information that we request in order to establish your amount of insurance.

We will reduce the amount of insurance as necessary, based on our estimate of the effect of interplanting a perennial crop, removal of trees; damage; change in practices and any other circumstance on the potential of the insured crop. If you fail to notify us of any circumstance that may reduce the potential for the insured crop, we will reduce your amount of insurance as necessary at any time we become aware of the circumstance.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§ 457.8), the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§ 457.8), the cancellation and termination dates are November 20.

6. Annual Premium

In addition to the provisions of section 7 of the Basic Provisions (§ 457.8), for the 1998 crop year, the premium amount otherwise payable for the 1998 crop year will be increased by 46 percent as a result of the additional six months of coverage for that crop year.

7. Insured Crop

(a) In accordance with section 8 (Insured Crop) of the Basic Provisions (§ 457.8), the crop insured will be all of each citrus tree crop designated in the Special Provisions in the county for which a premium rate is provided by the actuarial documents and that you elect to insure:

(1) In which you have an ownership share;

(2) That is adapted to the area;

(3) That is set out for the purpose of growing fruit to be harvested for the commercial production of fresh fruit or for juice;

(4) That is irrigated; and

(5) That have the potential to produce at least 70 percent of the county average yield for the crop and age, unless a written agreement is approved to insure the trees with lesser potential.

(b) In addition to section 8 (Insured Crop) of the Basic Provisions (§ 457.8), we do not insure any citrus trees:

(1) During the crop year the application for insurance is filed, unless we inspect the acreage and consider it acceptable; or

(2) That have been grafted onto existing root stock or nursery stock within the one-year period prior to the date insurance attaches.

(c) We may exclude from insurance or limit the amount of insurance on any acreage that was not insured the previous year.

8. Insurable Acreage

In lieu of the provisions in section 9 (Insurable Acreage) of the Basic Provisions (§ 457.8), that prohibit insurance attaching to a crop planted with another crop, citrus trees interplanted with another perennial crop are insurable, unless we inspect the
§ 457.106

9. Insurance Period

In lieu of the provisions of section 11 (Insurance Period) of the Basic Provisions (§ 457.8):

(a) The insurance period is as follows:

(1) For the 1998 crop year only, coverage will begin on June 1, 1997, and will end on November 20, 1998.

(2) For all subsequent crop years, coverage begins on November 21 of the calendar year prior to the year the insured crop normally blooms, except that for the year of application, if your application is received after November 11 but prior to November 21, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10 day period and determine that it does not meet the requirements for insurability contained in your policy. You must provide any information that we require for the crop or to determine the condition of the grove.

(3) The calendar date for the end of the insurance period for each crop year is November 20.

(b) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.

(c) If you relinquish your insurable share on any insurable acreage of citrus trees on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to and no premium or indemnity will be due for such acreage for that crop year unless:

(1) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;

(2) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(3) The transferee is eligible for crop insurance.

10. Causes of Loss

In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), insurance is provided only against the following causes of loss that occur within the insurance period:

(a) Excess precipitation;

(b) Excess wind;

(c) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the grove;

(d) Freeze;

(e) Hall;

(f) Tornado; or

(g) Failure of the irrigation water supply if caused by an insured peril or drought that occurs during the insurance period.

11. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§ 457.8), in case of damage or probable loss, if you intend to claim an indemnity on any unit, you must allow us to inspect all insured acreage before pruning, dehorning, or removal of any damaged trees.

12. Settlement of Claim

(a) In the event of damage covered by this policy, we will settle your claim on a unit basis by:

(1) Determining the actual percent of damage for the unit in accordance with sections 12(b), (c), and (d);

(2) Subtracting your deductible from the percent of damage for the unit (this result must be greater than zero to receive an indemnity);

(3) Dividing the result of section 12(a)(2) by your coverage level percentage;

(4) Multiplying the result of section 12(a)(3) by the amount of insurance per acre determined in accordance with section 3(b)(2);

(5) Multiplying the result of section 12(a)(4) by the number of insured acres; and

(6) Multiplying the result of section 12(a)(5) by your share.

(b) The percent of damage for any tree will be determined as follows:

(1) For damage occurring during the year of set out (trees that have not been set out for at least one year at the time insurance attaches):

(i) One-hundred percent (100%) whenever there is no live wood above the bud union;

(ii) Ninety percent (90%) whenever there is less than 12 inches of live wood above the bud union; or

(iii) The tree will be considered undamaged whenever there is more than 12 inches of live wood above the bud union; or

(2) For damage occurring in any year following the year of set out:

(i) The percentage of damage will be determined by dividing the number of scaffold limbs damaged in an area from the trunk to a length equal to one-fourth (1⁄4) the height of the tree, by the total number of scaffold limbs before damage occurred. Whenever this percentage exceeds 80 percent, the tree will be considered as 100 percent damaged.

(ii) The percent of damage for the unit will be determined by computing the average of the determinations made for the individual trees. If this percent of damage exceeds 80 percent, the unit will be considered 100 percent damaged.
The percent of damage on the unit will be reduced by the percentage of damage due to uninsured causes.

13. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

(a) The late and prevented planting provisions of the Special Provisions are not applicable.

§ 457.107 Florida citrus fruit crop insurance provisions.

The Florida Citrus Fruit Crop Insurance Provisions for the 2014 and succeeding crop years are as follows:

FCIC POLICIES: UNITED STATES DEPARTMENT OF AGRICULTURE, FEDERAL CROP INSURANCE CORPORATION

Reinsured policies: (Appropriate title for insurance provider)

Both FCIC and reinsured policies: Florida Citrus Fruit Crop Insurance Provisions

1. Definitions

Age class. Trees in the unit are grouped by age, with each insurable age group of a particular citrus fruit commodity, commodity type, and intended use receiving a Reference Maximum Dollar Amount shown in the actuarial documents that is used to calculate the amount of insurance for the unit.

Amount of insurance (per acre). The dollar amount determined by multiplying the Reference Maximum Dollar Amount shown on the actuarial documents for each applicable combination of commodity type, intended use, and age class of trees, within a citrus fruit commodity, times the coverage level percent that you elect, times your share.

Box. A standard field box as prescribed in the State of Florida Citrus Fruit Laws or contained in standards issued by FCIC.

Buckhorn. To prune any limb at a diameter of at least three inches for citrus.

Citrus fruit commodity. Citrus fruit as follows:

(a) Oranges;
(b) Grapefruit;
(c) Tangelos;
(d) Mandarins/Tangerines;
(e) Tangors;
(f) Lemons;
(g) Limes; and

(h) Any other citrus fruit commodity designated in the actuarial documents.

Citrus fruit group. A designation in the Special Provisions used to identify combinations of commodity types and intended uses within a citrus fruit commodity that may be grouped together for the purposes of electing coverage levels and identifying the insured crop.

Commodity type. A specific subgroup of a commodity having a characteristic or set of characteristics distinguishable from other subgroups of the same commodity.

Excess wind. A natural movement of air that has sustained speeds exceeding 58 miles per hour (50 knots) recorded at the U.S. National Weather Service (NWS) reporting station (reported as MAX SUST (KT)), the Florida Automated Weather Network (FAWN) reporting station (reported as 10m Wind (mph)), or any other weather reporting station identified in the Special Provisions operating nearest to the insured acreage at the time of damage.

Freeze. The formation of ice in the cells of the fruit caused by low air temperatures.

Harvest. The severance of mature citrus fruit from the tree by pulling, picking, shacking, or any other means, or collecting the marketable citrus fruit from the ground.

Hurricane. A windstorm classified by the U.S. Weather Service as a hurricane.

Intended use. The producer’s expected end use or disposition of the commodity at the time the commodity is reported. Insurable intended uses will be specified in the Special Provisions.

Interstock. The area of the tree that is grafted to a rootstock. For example, the rootstock may be Sour Orange, and the interstock grapefruit, and the grafted scion Valencia orange.

Potential production. The amount, converted to boxes, of citrus fruit that would have been produced had damage not occurred.

(a) Including citrus fruit that:
(1) Was harvested before damage occurred;
(2) Remained on the tree after damage occurred;
(3) Except as provided in (b), was missing, damaged, or destroyed from either an insured or uninsured cause;
(4) Was marketed or could be marketed as fresh citrus fruit;
(5) Was harvested prior to inspection by us; or
(6) Was harvested within 7 days after a freeze;
(b) Not including citrus fruit that:
(1) Was missing, damaged, or destroyed before insurance attached for any crop year;
(2) Was damaged or destroyed by normal dropping; or
(3) Any tangerines that would not meet the 210 pack size (2 and 3/16 inch minimum diameter) under United States Standards by the end of the insurance period for tangerines.

Scion. A detached living portion of a plant joined to a stock in grafting.

Top worked. A buckhorned citrus tree with a new scion grafted onto the interstock.
§ 457.107

Unmarketable. Citrus fruit that cannot be processed into products for human consumption.

2. Unit Division

(a) Basic units will be established in accordance with section 1 of the Basic Provisions.
(b) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.
(c) In addition to establishing optional units by section, section equivalent, or FSA farm serial number, optional units may be established if each optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:
(a) You may select only one coverage level for each citrus fruit group that you elect to insure. If different amounts of insurance are available for commodity types within a citrus fruit group, you must select the same coverage level for each commodity type. For example, if you choose the 75 percent coverage level for one commodity type, you must also choose the 75 percent coverage level for all other commodity types within that citrus fruit group.
(b) The production reporting requirements contained in section 3 of the Basic Provisions are not applicable.
(c) You must report, by the acreage reporting date designated in the actuarial documents:
   (1) Any event or action that could reduce the yield per acre of the insured citrus fruit commodity (including but not limited to removal of trees, any damage, disease, change in cultural practices, or any other circumstance that may reduce the productive capacity of the trees) and the number of affected acres;
   (2) The number of trees on insurable and uninsurable acreage, including interplanted trees;
   (3) The age of the trees and the planting pattern; and
   (4) Any other information we request in order to establish your amount of insurance.
(d) We will reduce insurable acreage or the amount of insurance or both, as necessary:
   (1) Based on our estimate of the effect of the interplanted trees on the insured commodity type;
   (2) Following a decrease in plant stand;
   (3) If cultural practices are performed that may reduce the productive capacity of the trees;
   (4) If disease or damage occurs to the trees that may reduce the productive capacity of the trees; or
   (5) Any other circumstance that may reduce the productive capacity of the trees or that may reduce the yield per acre from previous levels.
(e) If you fail to notify us of any circumstance that may reduce the acreage, the productive capacity of the trees, or the yield per acre from previous levels, we will reduce the acreage or amount of insurance or both as necessary any time we become aware of the circumstance.
(f) For carryover policies:
   (1) Any changes to your coverage must be requested on or before the sales closing date;
   (2) Requested changes will take effect on May 1, the first day of the crop year, unless we reject the requested increase based on our inspection, or because a loss occurs on or before April 30 (Rejection can occur at any time we discover loss has occurred on or before April 30); and
   (3) If the increase is rejected, coverage will remain at the same level as the previous crop year.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is January 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are April 30.

6. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the insured crop will be all acreage of each citrus fruit group that you elect to insure, in which you have a share, that is grown in the county shown on the application, and for which a premium rate is quoted in the actuarial documents.
(b) In addition to the citrus fruit not insurable in section 8 of the Basic Provisions, we do not insure any citrus fruit:
   (1) That cannot be expected to mature each crop year within the normal maturity period for the commodity type;
   (2) Produced by citrus trees that have not reached the fifth growing season after being set out, unless otherwise provided in the Special Provisions or by a written agreement to insure such citrus fruit (In order for the year of set out to be considered a growing season, citrus trees must be set out on or before April 15 of the calendar year);
   (3) Of "Meyer Lemons," "Sour Oranges," or "Clementines";
   (4) Of the Robinson tangerine variety, for any crop year in which you have elected to exclude such tangerines from insurance (You must elect this exclusion prior to the crop year for which the exclusion is to be effective, except that for the first crop year you must elect this exclusion by the later of the
Federal Crop Insurance Corporation, USDA

§ 457.107

(5) That is produced on citrus trees that have been topworked until the third crop year after topworking. The Special Provisions will specify the appropriate rate class for trees insurable following topworking, but that have not reached full production; or
(b) Of any commodity type not specified as insurable in the Special Provisions.
(c) Prior to the date insurance attaches, and upon our approval, you may elect to insure or exclude from insurance any insurable citrus acreage that has a potential production of less than 100 boxes per acre. If you elect to:
(1) Insure such acreage, we will consider the potential production to be 100 boxes per acre when determining the amount of loss; or
(2) Exclude such acreage, we will disregard the acreage for all purposes related to this policy.
(d) In addition to the provisions in section 6 of the Basic Provisions, if you fail to notify us of your election to insure or exclude citrus acreage, and the potential production from such acreage is 100 or more boxes per acre, we will determine the percent of damage on all of the insurable citrus acreage for the unit, but will not allow the percent of damage for the unit to be increased by including such acreage.
(e) Potential production will be determined during loss adjustment.
(f) For citrus fruit for which fresh fruit coverage is available as designated in the actuarial documents:
(1) Management records must be available upon request to verify good fresh citrus fruit production practices were followed from the beginning of bloom stage until harvest; and
(2) Unless otherwise provided in the Special Provisions:

7. Insurable Acreage

(a) In lieu of the provisions in section 9 of the Basic Provisions that prohibit insurance attaching to interplanted acreage:
(1) Citrus fruit from trees interplanted with another commodity type or another agricultural commodity is insurable unless we inspect the acreage and determine it does not meet the requirements contained in your policy.
(2) If the citrus fruit is from trees interplanted with another commodity type or another agricultural commodity, acreage will be prorated according to the percentage of the acres occupied by each of the interplanted commodity types or agricultural commodities. For example, if grapefruit have been interplanted with oranges on 100 acres and the grapefruit trees are on 50 percent of the acreage, grapefruit will be considered planted on 50 acres and oranges will be considered planted on 50 acres.
(3) The combination of the citrus fruit acreage and the interplanted acreage cannot exceed the physical amount of acreage.

8. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions:
(1) Coverage begins on May 1 of each crop year, unless:

(i) For new or carryover policies, as applicable, we inspect the acreage and determine it does not meet the requirements for insurability contained in your policy (You must provide any information we require, so we may determine the condition of the acreage to be insured); or
(ii) For carryover policies, you report additional citrus acreage, or a greater share, such that the amount of insurance will increase by more than 10 percent and we notify you all or a part of your citrus acreage is not insurable.
(2) The calendar date for the end of the insurance period for each crop year, unless specified otherwise in the Special Provisions, is:

(i) February 7 for navel oranges, Orlando tangelos and tangerines;
(ii) February 28 for early-season oranges and all other tangelos;
(iii) March 31 for mid-season oranges and temples;
(iv) April 30 for lemons and limes;
(v) May 15 for murcotts; and
(vi) June 30 for grapefruit and late-season oranges.
(b) In addition to the provisions of section 11 of the Basic Provisions:
(1) Acreage acquired after the acreage reporting date for the crop year is not insurable unless a transfer of coverage and right to indemnity is executed in accordance with section 28 of the Basic Provisions.
(2) If you relinquish your insurable share on any insurable acreage of citrus fruit on or before the acreage reporting date of the crop year, insurance will not attach, no premium will be due, and no indemnity payable, for such acreage for that crop year.

9. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes
§457.107  7 CFR Ch. IV (1-1-14 Edition)

of loss to citrus fruit that occur within the insurance period:

1. Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the grove;
2. Freeze;
3. Hail;
4. Hurricane;
5. Tornado;
6. Excess wind; or
7. Diseases, but only if specified in the Special Provisions.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to:

1. Damage to the blossoms or trees; or
2. Inability to market the citrus fruit for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

10. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

1. For any optional units, we will combine all optional units for which such production records were not provided; or
2. For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) If any citrus fruit within a unit is damaged by an insurable cause of loss, we will settle your claim by:

1. Calculating the amount of insurance for the unit by multiplying the number of acres by the respective dollar amount of insurance per acre for each applicable combination of commodity type, intended use, and age class of trees in the unit and multiplying that result by your share;
2. Calculating the average percent of damage to the fruit within each respective combination of commodity type, intended use, and age class of trees, rounded to the nearest tenth of a percent (0.1%) (To determine the percent of damage, the amount of citrus fruit damaged from an insured cause must be converted to boxes and divided by the potential production);
3. Subtracting the deductible from the result of section 10(b)(2);
4. If the result of section 10(b)(3) is positive, dividing this result by the coverage level percentage (If the result of section 10(b)(3) is negative, no indemnity will be due);
5. Multiplying the result of section 10(b)(4) by the amount of insurance for the unit for the respective combination of commodity type, intended use, and age class of trees, to determine the value of all damage; and
6. Totaling all such results of section 10(b)(5) for all applicable combinations of commodity types, intended uses, and age classes of trees in the unit and subtracting any indemnities paid for the current crop year to determine the amount payable for the unit. For example, assume a 55-acre unit sustains late season damage. No previous damage has occurred on the unit during the crop year and no fruit has been harvested. The producer elected the 75 percent coverage level and has a 100 percent share. The amount of insurance is $1,180 per acre, based on the 75 percent coverage level, for the commodity type, intended use, and age class of trees. The amount of potential production is 24,530 boxes and the amount of damaged production is 17,171 boxes. The loss would be calculated as follows:
   1. 55 acres x $1,180 = $64,900 amount of insurance for the unit;
   2. 17,171 / 24,530 = 70 percent average percent of damage;
   3. 70 percent damage -25 percent deductible (100 percent -75 percent) = 45 percent;
   4. 45 percent / 75 percent = 60 percent adjusted damage; and
   5. 60 percent x $64,900 = $38,940 indemnity.
(c) Any individual citrus fruit will be considered 100 percent damaged, if due to an insurable cause of loss it is:

1. On the ground and unmarketable; or
2. Unmarketable because it is immature, unwholesome, decomposed, adulterated, or otherwise unfit for human consumption.
(d) Any citrus fruit that can be processed into products for human consumption will be considered marketable. The percent of damage for the marketable citrus fruit (excluding citrus fruit sold as fresh or damaged due to uninsured causes) will be determined by:

1. Subtracting the juice content of the marketable citrus fruit (excluding citrus fruit sold as fresh or damaged due to uninsured causes) from:
   (i) The average juice content of the fruit produced on the unit for the three previous crop years based on your records, if they are acceptable to us; or
   (ii) The default juice content provided in the Special Provisions, if at least three years of acceptable juice records are not furnished or the citrus fruit is insured as fresh;
2. Subtracting the juice content of the marketable citrus fruit (excluding citrus fruit sold as fresh or damaged due to uninsured causes) from the official weight per box for the applicable commodity type provided in the Special Provisions;
3. Dividing the result of section 10(d)(1) by the result of 10(d)(2);
4. Dividing the official weight per box for the applicable commodity type provided in the Special Provisions by:
5. Subtracting the deductible from the result of section 10(b)(2);
6. Multiplying the result of section 10(b)(3) by the amount of insurance for the unit for the respective combination of commodity type, intended use, and age class of trees, to determine the value of all damage; and
7. Totaling all such results of section 10(b)(5) for all applicable combinations of commodity types, intended uses, and age classes of trees in the unit and subtracting any indemnities paid for the current crop year to determine the amount payable for the unit.
§ 457.108 Sunflower seed crop insurance provisions.

The sunflower seed crop insurance provisions for the 2011 and succeeding crop years are as follows:

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Sunflower Seed Crop Provisions

1. Definitions

Harvest. Combining or threshing the sunflowers for seed.

Local market price. The cash seed price per pound for oil type sunflower seed grading U.S. No. 2, or non-oil type sunflower seed with a test weight of at least 22 pounds per bushel and less than five percent (5%) kernel damage, offered by buyers in the area in which you normally market the sunflower seed. The local market price for oil type sunflower seed will reflect the maximum limits of quality deficiencies allowable for the U.S. No. 2 grade of sunflower seed. Factors not associated with grading of sunflower seed under the Official United States Standards for Grain including, but not limited to, oil or moisture content will not be considered.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

3. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

4. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

5. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the oil and non-oil type sunflower seed in the county for which a premium rate is provided by the actuarial documents:

(a) in which you have a share;

(b) that is planted for harvest as sunflower seed; and

(c) that is not (unless a written agreement allows otherwise):

(1) interplanted with another crop; or

(2) planted into an established grass or legume.

6. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

(a) We will not insure any acreage which does not meet the rotation requirements shown in the Special Provisions; and

(b) any acreage of the insured crop damaged before the final planting date, to the extent that a majority of producers in the area would not normally further care for the crop, must be replanted unless we agree that it is not practical to replant.

7. Insurance Period

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is November 30, immediately following planting.
§ 457.108

8. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss which occur within the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption;
(h) Failure of the irrigation water supply due to a cause of loss specified in sections 8(a) through (g) that also occurs during the insurance period; or
(i) For revenue protection, a change in the harvest price from the projected price, unless FCIC can prove the price change was the direct result of an uninsured cause of loss specified in section 12(a) of the Basic Provisions.

9. Replanting Payments

(a) A replanting payment is allowed as follows:

(1) In lieu of provisions in section 13 of the Special Provisions that limit the amount of a replant payment to the actual cost of replanting, the amount of any replanting payment will be determined in accordance with these Crop Provisions:

(2) Except as specified in section 9(a)(1), you must comply with all requirements regarding replanting payments contained in section 13 of the Basic Provisions; and

(3) The insured crop must be damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage.

(b) Unless otherwise specified in the Special Provisions, the amount of the replanting payment per acre will be the lesser of 20 percent of the production guarantee or 157 pounds, multiplied by your projected price, multiplied by your share.

(c) When the crop is replanted using a practice that is uninsured for an original planting, the liability for the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

(d) If the acreage is replanted to an insured crop type that is different than the insured crop type originally planted on the acreage:

(1) The production guarantee, premium, and projected price and harvest price, as applicable, will be adjusted based on the replanted type;

(2) Replanting payments will be calculated using your projected price and production guarantee for the crop type that is replanted and insured; and

(3) A revised acreage report will be required to reflect the replanted type, as applicable.

10. Duties in the Event of Damage or Loss

Representative samples are required in accordance with section 14 of the Basic Provisions.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:

(1) Optional unit, we will combine all optional units for which acceptable records of production were not provided; or

(2) Basic unit, we will allocate any mingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the number of insured acres by your respective:

(i) Yield protection guarantee (per acre) if you elected yield protection; or

(ii) Revenue protection guarantee (per acre) if you elected revenue protection;

(2) Totaling the results of section 11(b)(1)(i) or 11(b)(2)(i), whichever is applicable;

(3) Multiplying the production to count by your:

(i) Projected price if you elected yield protection; or

(ii) Harvest price if you elected revenue protection;

(4) Totaling the results of section 11(b)(3)(i) or 11(b)(3)(ii), whichever is applicable;

(5) Subtracting the result of section 11(b)(4) from the result of section 11(b)(2); and

(6) Multiplying the result of section 11(b)(5) by your share.

For example:

You have 100 percent share in 50 acres of sunflowers in the unit with a production guarantee (per acre) of 1,250 pounds, your projected price is $1.11, your harvest price is $1.12, and your production to count is 54,000 pounds.

If you elected yield protection:

(1) 50 acres x (1,250 pound production guarantee x $.11 projected price) = $6,875.00 value of the production guarantee

(2) 54,000 pound production to count x $.11 projected price = $5,940.00 value of production to count

(3) $6,875.00 - $5,940.00 = $935.00

If you elected revenue protection:

(1) 50 acres x (1,250 pound production guarantee x $.12 harvest price) = $7,500.00 revenue protection guarantee

188
(3) 54,000 pound production to count x $.12 harvest price = $6,480.00 value of the production to count.
(4) $7,500.00 - $6,480.00 = $1,020.00 indemnity.
(c) The total production to count (in pounds) from all insurable acreage on the unit will include:
(1) All appraised production as follows:
(i) For yield protection, not less than the production guarantee, and for revenue protection, not less than the amount of production that when multiplied by the harvest price equals the revenue protection guarantee (per acre) for acreage:
(A) That is abandoned;
(B) Put to another use without our consent;
(C) Damaged solely by uninsured causes; or
(D) For which you fail to provide records of production that are acceptable to us;
(ii) Production lost due to uninsured causes;
(iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with subsection 11(d)); and
(iv) Potential production on insured acreage you want to put to another use or you wish to abandon and no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end if you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us. (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count.);
(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
(2) All harvested production from the insurable acreage.
(d) Mature sunflower seed production may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.
(1) Production will be reduced by 0.12 percent for each 0.1 percentage point of moisture in excess of ten percent (10%). We may obtain samples of the production to determine the moisture content.
(2) Production will be eligible for quality adjustment if:
(i) Deficiencies in quality result in:
(A) Oil type sunflower seed not meeting the grade requirements for U.S. No. 2 (grades U.S. sample grade) because of test weight, kernel damage (excluding heat damage), or a musty, sour or commercially objectionable foreign odor; or
(B) Non-oil type sunflower seed having a test weight below 22 pounds per bushel or kernel damage (excluding heat damage) in excess of five percent (5%) or a musty, sour or commercially objectionable foreign odor; or
(ii) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.
(3) Quality will be a factor in determining your loss only if:
(i) The deficiencies, substances, or conditions, resulted from a cause of loss against which insurance is provided under these crop provisions and within the insurance period;
(ii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us;
(iii) With regard to deficiencies in quality (except test weight, which may be determined by our loss adjustor), the samples are analyzed by:
(A) A grain grader licensed under the United States Grain Standards Act or the United States Warehouse Act;
(B) A grain grader licensed under State law and employed by a warehouse operator who has a storage agreement with the Commodity Credit Corporation; or
(C) A grain grader not licensed under State law, but who is employed by a warehouse operator who has a commodity storage agreement with the Commodity Credit Corporation and is in compliance with State law regarding warehouses; and
(iv) With regard to substances or conditions injurious to human or animal health, the samples are analyzed by a laboratory approved by us.
(e) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on a weight basis.

The Sugar Beet Crop Insurance Provisions for the 1998 and succeeding crop years in countries with a contract change date of November 30, and for the 1999 and succeeding crop years in countries with a contract change date of April 30, are as follows:

FCIC Policies

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Sugar Beet Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Crop year. In Imperial, Lassen, Modoc, Shasta and Siskiyou counties, California and all other States, the period within which the sugar beets are normally grown, which is designated by the calendar year in which the sugar beets are normally harvested. In all other California counties, the period from planting until the applicable date for the end of the insurance period which is designated by:

(a) The calendar year in which planted if planted on or before July 15; or

(b) The following calendar year if planted after July 15.

Harvest. Topping and lifting of sugar beets in the field.

Initially planted. The first occurrence that beet plants to attain a desired plant population.

Local market price. The price per pound for raw sugar offered by buyers in the area in which you normally market the sugar beets.

Planted acreage. In addition to the definition contained in the Basic Provisions, sugar beets must initially be planted in rows, unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Practical to replant. In lieu of the definition of “Practical to replant” contained in section 1 of the Basic Provisions (§457.8), practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors, including but not limited to moisture availability, condition of the field, time to crop maturity, and marketing window, that replanting the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period. It will not be considered practical to replant if production from the replanted acreage cannot be delivered under the terms of the processor contract, or 30 days after the initial planting date for all counties where a late planting period is not applicable, unless replanting is generally occurring in the area.

Processor. Any business enterprise regularly engaged in processing sugar beets for sugar that possesses all licenses and permits for processing sugar beets required by the State in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process the contracted sugar beets within a reasonable amount of time after harvest.

Production guarantee (per acre):

(a) First stage production guarantee—The final stage production guarantee multiplied by 60 percent.

(b) Final stage production guarantee—The number of tons determined by multiplying the approved yield per acre by the coverage level percentage you elect.

Raw sugar. Sugar that has not been extracted from the sugar beet.

Standardized ton. A ton of sugar beets containing the percentage of raw sugar specified in the Special Provisions.

Sugar beet processor contract. A written contract between the producer and the processor, containing at a minimum:

(1) The producer’s commitment to plant and grow sugar beets, and to deliver the sugar beet production to the processor;

(2) The processor’s commitment to purchase the production stated in the contract; and

(3) A price or formula for a price based on third party data that will be paid to the processor for the production stated in the contract.

Thinning. The process of removing, either by machine or hand, a portion of the sugar beet plants to attain a desired plant population.

Ton. Two thousand (2,000) pounds avoirdupois.
Federal Crop Insurance Corporation, USDA § 457.109

2. Unit Division

In addition to the requirements of section 34 of the Basic Provisions, basic units may be divided into optional units only if you have a sugar beet processor contract that requires the processor to accept all production from a number of acres specified in the sugar beet processor contract. Acreage insured to fulfill a sugar beet contract which provides that the processor will accept a designated amount of production or a combination of acreage and production will not be eligible for optional units.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8), you may select only one price election for all the sugar beets in the county insured under this policy.

(b) The production guarantees are progressive by stages, and increase at specified intervals to the final stage. The stages are:

(i) First stage, with a guarantee of 60 percent (60%) of the final stage production guarantee, extends from planting until:

(ii) The earlier of thinning or 90 days after planting in Arizona and all other California counties.

(ii) Final stage, with a guarantee of 100 percent (100%) of the final stage production guarantee, applies to all insured sugar beets that complete the first stage.

(c) The production guarantee will be expressed in standardized tons.

(d) Any acreage of sugar beets damaged in the first stage to the extent that growers in the area would not normally further care for the sugar beets will be deemed to have been destroyed, even though you may continue to care for it. The production guarantee for such acreage will not exceed the first stage production guarantee.

4. Contract Changes

In accordance with the provisions of section 4 (Contract Changes) of the Basic Provisions, the contract change date is April 30 preceding the cancellation date for counties with a July 15 or August 31 cancellation date and November 30 (December 17 for the 1998 crop year only) preceding the cancellation date for all other counties.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§ 457.8), the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and County</th>
<th>Cancellation date</th>
<th>Termination date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arizona; and Imperial County, California</td>
<td>August 31</td>
<td>August 31</td>
</tr>
<tr>
<td>All California counties, except Imperial, Lassen, Modoc, Shasta and Siskiyou</td>
<td>July 15</td>
<td>November 30</td>
</tr>
<tr>
<td>All Other States, and Lassen, Modoc, Shasta and Siskiyou Counties, California</td>
<td>March 15</td>
<td>March 15</td>
</tr>
</tbody>
</table>

6. Annual Premium

In lieu of the premium computation method contained in section 7 (Annual Premium) of the Basic Provisions (§ 457.8), the annual premium amount is computed by multiplying the final stage production guarantee by the price election, the premium rate, the insured acreage, your share at the time of planting, and any applicable premium adjustment factors contained in the Actuarial Table.

7. Insured Crop

(a) In accordance with section 8 (Insured Crop) of the Basic Provisions (§ 457.8), the crop insured will be all the sugar beets in the county for which a premium rate is provided by the actuarial documents:

(i) In which you have a share;

(ii) That are planted for harvest as sugar beets;

(iii) That are grown under a sugar beet processor contract executed before the acreage reporting date and are not excluded from the processor contract at any time during the crop year; and

(iv) That are not (unless allowed by the Special Provisions or by written agreement):

(i) Interplanted with another crop;

(ii) Planted into an established grass or legume; or

(iii) Planted prior to submitting a properly completed application.

(b) Sugar beet growers who are also processors may establish an insurable interest if they meet the following requirements:

(1) The processor must meet the definition of a “processor” in section 1 of these crop provisions and have a valid insurable interest in the sugar beet crop;

(2) The Board of Directors or officers of the processor must have duly promulgated a resolution that sets forth essentially the same terms as a sugar beet processor contract. Such resolution will be considered a sugar beet processing contract under the terms of the sugar beet crop insurance policy;

(3) The sales records of the processor showing the amount of sugar produced the previous year must be supplied to us to confirm the processor has produced and sold sugar in the past; and

191
8. Insurable Acreage

In addition to the provisions of section 9 (Insurable Acreage) of the Basic Provisions (§457.8):

(a) We will not insure any acreage planted to sugar beets:
   (1) The preceding crop year, unless otherwise specified in the Special Provisions for the county;
   (2) In any crop year following the discovery of rhizomania on the acreage, unless allowed by the Special Provisions or by written agreement; or
   (3) That does not meet the rotation requirements shown in the Special Provisions;

(b) Any acreage of the insured crop damaged before the final planting date, (or within 30 days of initial planting for those counties without a final planting date) to the extent that growers in the area would normally not further care for the crop, must be replanted unless we agree that replanting is not practical.

9. Insurance Period

(a) In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8), the calendar date for the end of the insurance period is:
   (1) July 15 in Arizona and in Imperial County, California;
   (2) The last day of the 12th month after the insured crop was initially planted in all California counties except Imperial, Lassen, Modoc, Shasta and Siskiyou;
   (3) October 31 in Lassen, Modoc, Shasta and Siskiyou Counties, California, and in Klamath County, Oregon;
   (4) November 25 in Ohio;
   (5) December 31 in New Mexico and Texas; and
   (6) November 15 in all other States and counties.

(b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8), regarding the end of the insurance period, the insurance period ends for all units when the production delivered to the processor equals the amount of production stated in the sugar beet processor contract.

10. Causes of Loss

In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur within the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period.

11. Replanting Payments

(a) In accordance with section 13 (Replanting Payment) of the Basic Provisions (§457.8), a replanting payment is allowed if the crop is damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent (90%) of the final stage production guarantee for the acreage and it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be the lesser of 10 percent (10%) of the final stage production guarantee or one ton, multiplied by your price election, multiplied by your insured share.

(c) When sugar beets are replanted using a practice that is uninsurable for an original planting, our liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

12. Duties in the Event of Damage or Loss

In accordance with the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§457.8):

(a) Representative samples of the unharvested crop must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be harvested or destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed; and

(b) You must provide a copy of your sugar beet processor contract or corporate resolution if you are the processor.

13. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
   (1) For any optional unit, we will combine all optional units for which acceptable production records were not provided; or
   (2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim on any unit by:
   (1) Multiplying the insured acreage by its respective production guarantee;
(2) Subtracting the total production to count from the result in paragraph (b)(1);
(3) Multiplying the result of paragraph (b)(2) by your price election; and
(4) Multiplying the result of paragraph (b)(3) by your share.

(c) The total production to count (in standardized tons) from all insurable acreage on the unit will include:
(1) All appraised production as follows:
   (i) Not less than the production guarantee for acreage;
   (A) That is abandoned;
   (B) Put to another use without our consent;
   (C) That is damaged solely by uninsured causes; or
   (D) For which you fail to provide acceptable production records that are acceptable to us;
   (ii) Production lost due to uninsured causes;
   (iii) Unharvested production (unharvested production that is appraised prior to the earliest delivery date that the processor accepts harvested production will not be eligible for a conversion to standardized tons in accordance with section 13 (d) and (e));
   (iv) Only appraised production in excess of the difference between the first and final stage production guarantee for acreage that does not qualify for the final stage guarantee will be counted, except that all production from acreage subject to section 13(c)(1) (i) and (ii) will be counted; and
   (v) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end if you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
      (A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
      (B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
   (2) All harvested production from the insurable acreage.

(d) Harvested production or unharvested production that is appraised after the earliest delivery date that the processor accepts harvested production and that meets the minimum acceptable standards contained in the sugar beet processor contract or corporate resolution will be converted to standardized tons by:
(1) Dividing the average percentage of raw sugar in such sugar beets by the raw sugar content percentage shown in the Special Provisions; and
(2) Multiplying the result (rounded to three places) by the number of tons of such sugar beets.

The average percentage of raw sugar will be determined from tests performed by the processor at the time of delivery. If individual tests of raw sugar content are not made at the time of delivery, the average percent of raw sugar may be based on the results of previous tests performed by the processor during the crop year if it is determined that such results are representative of the total production. If not representative, the average percent of raw sugar will equal the raw sugar content percent shown in the Special Provisions.

(e) Harvested production or unharvested production that is appraised after the earliest delivery date that the processor accepts harvested production and that does not meet the minimum acceptable standards contained in the sugar beet processor contract due to an insured peril will be converted to standardized tons by:
(1) Dividing the gross dollar value of all of the damaged sugar beets on the unit (including the value of cooperative stock, patronage refunds, etc.) by the local market price per pound on the earlier of the date such production is sold or the date of final inspection for the unit;
(2) Multiplying that result by 2,000; and
(3) Dividing that result by the county average raw sugar factor contained in the Special Provisions for this purpose.

For example, assume that the total dollar value of the damaged sugar beets is $6,000.00; the local market price is $0.10; and the county average raw sugar factor is 0.15. The amount of production to count would be calculated as follows: (($6,000.00 / $0.10) / 2,000) / 0.15 = 200 tons.

14. Late and Prevented Planting

The late planting provisions contained in section 16 of the Basic Provisions are not applicable in California counties with a July 15, cancellation date.

15. Prevented Planting

(a) The prevented planting provision contained in section 17 of the Basic Provisions are not applicable in California counties with a July 15, cancellation date.
§ 457.110 Fig crop insurance provisions.

The Fig Crop Insurance Provisions for the 2001 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Fig Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Harvest. The picking of the figs from the trees or ground by hand or machine for the purpose of removal from the orchard.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Manufacturing grade production. Production that meets the minimum grade standards and is defined as “manufacturing grade” by the Marketing Order for Dried Figs, as amended, which is in effect on the date insurance attaches.

Marketable figs. Figs that grade manufacturing grade or better in accordance with the Marketing Order for Dried Figs, as amended, which is in effect on the date insurance attaches.

Substandard production. Production that does not meet minimum grade standards and is defined as “substandard” by the Marketing Order for Dried Figs, as amended, which is in effect on the date insurance attaches.

2. Unit Division

(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by each fig type designated in the Special Provisions.

(b) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units may be established only if each optional unit is located on non-contiguous land, unless otherwise allowed by written agreement.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements under section 3 of the Basic Provisions, you may select only one price election for each fig type designated in the Special Provisions and insured in the county under this policy.

(b) You may not increase your elected or assigned coverage level or the price election to the maximum price election if a cause of loss that could or would reduce the yield of the insured crop has occurred prior to the time you request the increase.

(c) You must report, by the production reporting date designated in section 3 of the Basic Provisions, by type if applicable:

(1) Any damage, removal of trees, change in practices, or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres;

(2) The number of bearing trees on insurable and uninsurable acreage;

(3) The age of the trees and the planting pattern;

(4) For the first year of insurance for acreage interplanted with another perennial crop, and anytime the planting pattern of such acreage is changed, the age of the crop that is interplanted with the figs, and type if applicable, and the planting pattern; and

(5) Any other information that we request in order to establish your approved yield. We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the following: Interplanted perennial crop; removal of trees; damage; change in practices and any other circumstance on the yield potential of the insured crop. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee as necessary at any time we become aware of the circumstance.

4. Contract Changes

The contract change date is October 31 preceding the cancellation date (see the provisions under section 4 (Contract Changes) of the Basic Provisions (§ 457.8)).

5. Cancellation and Termination Dates

The cancellation and termination dates are February 28.

6. Report of Acreage

By applying for fig crop insurance, you authorize us to have access to and to determine or verify your production and acreage from...
Federal Crop Insurance Corporation, USDA § 457.110

7. Insured Crop

The crop insured will be all the commercially grown dried figs that are grown in the county on insurable acreage, and for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That are grown for harvest as dried figs;
(c) That are irrigated;
(d) That have reached the seventh growing season after being set out; and
(e) For which acceptable production records for at least the previous crop year are provided;
(f) That are not figs:
(1) Grown on acreage with less than 90 percent of a stand based on the original planting pattern unless we agree, in writing, to insure such figs;
(2) Which we inspect and consider not acceptable;
(3) Grown for the crop year the application is filed unless inspected and accepted by us; or
(4) Grown on acreage acquired for the crop year unless such acreage has been inspected and accepted by us.

8. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions, that prohibit insurance attaching to a crop planted with another crop, figs interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

9. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions:
(1) Coverage begins on March 1, except that for the year of application, if your application is received after February 19 but prior to March 1, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10 day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the orchard.
(2) The calendar date for the end of the insurance period for each crop year is October 31 or the date harvest of the figs (by type) should have started on any acreage that will not be harvested (Exceptions, if any, for specific counties or varieties or varietal group are contained in the Special Provisions).
(b) Notwithstanding paragraph (a)(1) of this section, for each subsequent crop year that the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.
(c) If your fig policy is canceled or terminated for any crop year, in accordance with the terms of the policy, after insurance attached for that crop year but on or before the cancellation and termination dates whichever is later, insurance will not be considered to have attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.

10. Causes of Loss

(a) In addition to the provisions under section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), any loss covered by this policy must occur within the insurance period. The specific causes of loss for figs are:
(1) Adverse weather conditions;
(2) Earthquake;
(3) Fire;
(4) Volcanic eruption;
(5) Wildlife; or
(6) Failure of the irrigation water supply.
(b) In addition to the causes of loss not insured against contained in section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), we will not insure against:
(1) Any loss of production due to fire, where weeds and other forms of undergrowth have not been controlled or tree pruning debris has not been removed from the grove; or
(2) The inability to market the fruit as a direct result of quarantine, boycott, or refusal of any entity to accept production.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:
(1) Optional unit, we will combine all optional units for which acceptable records of production were not provided; or
(2) Basic unit, we will allocate any mingled production to such units in proportion to our liability on the harvested acreage for each unit.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insured acreage by the production guarantee;
(2) Subtracting from this the total production to count;
(3) Multiplying the remainder by your price election; and
(4) Multiplying this result by your share.
(c) The total production (pounds) to count from all insurable acreage on the unit will include all harvested and appraised marketable figs.
§ 457.111 Pear Crop Provisions

1. Definitions

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper, or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Harvest. The picking of mature pears from the trees or the collecting of marketable pears from the ground.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

 Marketable. Pear production acceptable for processing or other human consumption even if failing to meet any U.S. or applicable state grading standard. Ten. Two thousand (2,000) pounds avoided-
poids.

Varietal group. Types of pears with similar characteristics that are grouped for insurance purposes as specified in the Special Provisions.

2. Unit Division

(a) Provisions in the Basic Provision that allow optional units by irrigated and non-irrigated practices are not applicable.

(b) Instead of establishing optional units by section, section equivalents, or FSA farm serial number optional units may be established if each optional unit is located on non-contiguous land, optional units may be established by varietal group when provided
for in the Special Provisions. The requirements of section 3(b)(1) of the Basic Provisions are not applicable for this method of unit division.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8):

(a) You may select only one price election for all the pears in the county insured under this policy unless the Special Provisions provide different price elections by varietal group, in which case you may select one price election for each varietal group designated in the Special Provisions. The price elections you choose for each varietal group must have the same percentage relationship to the maximum price offered by us for each varietal group. For example, if you choose one hundred percent (100%) of the maximum price election for one varietal group, you must also choose one hundred percent (100%) of the maximum price election for all other varietal groups.

(b) You must report, by the production reporting date designated in section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), by varietal group:

(1) Any damage, removal of trees, change in practices or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres;

(2) The number of bearing trees on insurable and uninsurable acreage;

(3) The age of the trees and the planting pattern; and

(4) For the first year of insurance for acreage interplanted with another perennial crop, and any time the planting pattern of such acreage is changed:

(i) The age of the interplanted crop, and type if applicable;

(ii) The planting pattern; and

(iii) Any other information that we request in order to establish your approved yield. We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the following: interplanted perennial crop; removal of trees; damage; change in practices or any other circumstance on the yield potential of the insured crop. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee as necessary at any time that we become aware of the circumstance.

(c) You may not increase your elected or assigned coverage level or the ratio of your price election to the maximum price election if a cause of loss that could or would reduce the yield of the insured crop has occurred prior to the time that you request the increase.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§457.8), the contract change date is October 31 preceding the cancellation date for states with a January 31 cancellation date and August 31 preceding the cancellation date for all other states.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§457.8), the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>States</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>California</td>
<td>January 31</td>
</tr>
<tr>
<td>All other states</td>
<td>November 20</td>
</tr>
</tbody>
</table>

6. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§457.8), the crop insured will be all the pears in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;

(b) That are of varieties adapted to the area;

(c) That are grown on trees that have produced an average of at least five (5) tons of pears per acre in at least one of the four previous crop years unless the Special Provisions or a written agreement establishes a lower production level; and

(d) That are grown in an orchard that, if inspected, is considered acceptable by us.

7. Insurable Acreage

In lieu of the provisions in section 9 (Insurable Acreage) of the Basic Provisions (§457.8), that prohibit insurance attaching to a crop planted with another crop, pears interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(i) Coverage begins:

(1) In California, on February 1 of each crop year, except that for the year of application, if your application is received after January 22 but prior to February 1, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10 day period and determine that it does not meet insurability requirements.
You must provide any information that we require for the crop or to determine the condition of the orchard; or

(ii) In all other states, on November 21 of each crop year, except that for the year of application, if your application is received after November 11 but prior to November 21, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10 day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the orchard.

(b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date for any unit, you must notify us at least 15 days before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

You may not sell the pear crop before the end of the insurance period for that crop year, unless:

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions;

(ii) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the orchard;

(3) Earthquake;

(4) Volcanic eruption;

(iv) Causes disease or insect infestation for which no effective control mechanism is available.

(2) Failure of the fruit to color properly; or

(3) Inability to market the pears for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

10. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§457.8), the following will apply:

You must notify us at least 15 days before any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine your production to count for production that is sold by direct marketing. If damage occurs after this appraisal, we will conduct an additional appraisal. These appraisals, and any acceptable records provided by you, will be used to determine your production to count.

Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count of not less than the production guarantee per acre. If such failure results in our inability to make the required appraisal:

(c) If you intend to claim an indemnity on any unit, you must notify us at least 15 days prior to the beginning of harvest if you previously gave notice in accordance with section 14 of the Basic Provisions (§457.8), so
that we may inspect the damaged production. You must not sell or dispose of the damaged crop until after we have given you written consent to do so. If you fail to meet the requirements of this section, and such failure results in our inability to inspect the damaged production, all such production will be considered undamaged and included as production to count.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate, acceptable production records:

(1) For any optional unit, we will combine all optional units for which such production records were not provided; or

(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage for each varietal group if applicable, by its respective production guarantee;

(2) Multiplying the results of section 11(b)(1) by the respective price election for each varietal group, if applicable;

(3) Totaling the results of section 11(b)(2);

(4) Multiplying the total production to be counted of each varietal group, if applicable, by the respective price election;

(5) Totaling the results of section 11(b)(4);

(6) Subtracting this result of section 11(b)(5) from the result of section 11(b)(3); and

(7) Multiplying the result of section 11(b)(6) by your share.

(c) The total production to count (in tons) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) Not less than the production guarantee per acre for acreage:

(A) That is abandoned;

(B) That is sold by direct marketing if you fail to meet the requirements contained in section 10;

(C) That is damaged solely by uninsured causes; or

(D) For which you fail to provide production records that are acceptable to us;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production; and

(iv) Potential production on insured acreage that you intend to abandon or no longer care for. If you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count; and

(2) For all states except California, all harvested and appraised marketable pear production from the insurable acreage.

(3) For California, all harvested and appraised production that:

(i) Meets the standards for first grade canning as defined by the California Pear Advisory Board or for U.S. Number 1 as defined by the United States Standards for Grades of Summer and Fall Pears, or Pears for Processing, or for U.S. Extra Number 1 or U.S. Number 1 as defined by the United States Standards for Grades of Winter Pears;

(ii) Is accepted by a processor for canning or packing; or

(iii) Is marketable for any purpose. However, if the pears are damaged by an insured cause, the production to count will be reduced by the greater of the following amounts:

(A) The excess over ten percent (10%) of pears that are size 180 or smaller for varieties other than Forelle, Seckel or Winter Nelis; or

(B) The result of dividing the value per ton of such pears by the highest price election for the insured varietal group, subtracting this result from 1,000, and multiplying this difference (if positive) by the number of tons of such pears.

12. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

13. Pear Quality Adjustment Endorsement

(a) This endorsement applies to any crop year: Provided,

(1) The insured pears are located in a State other than California and the actuarial documents designate a premium rate for this endorsement;

(2) You have not elected to insure your pears under the Catastrophic Risk Protection (CAT) Endorsement;

(3) You elected it on your application or other form approved by us, and did so on or before the sales closing date for the initial crop year for which you wish it to be effective. By doing so, you agreed to pay the additional premium designated in the actuarial documents for this optional coverage; and

(4) You or we did not cancel it in writing on or before the cancellation date. Your election of CAT coverage for any crop year after this endorsement is effective will be considered as notice of cancellation by you.

(b) If the pear production is damaged by hail and if eleven percent (11%) or more of the harvested and appraised production does not grade at least U.S. No. 2 in accordance
with applicable United States Standards for Grades of Summer and Fall Pears, United States Standards for Grades of Winter Pears, or United States Standards for Grades of Pears for Processing, as applicable, due solely to hail, the amount of production to count will be reduced as follows:

(1) By two percent (2%) for each full one percent (1%) in excess of ten percent (10%), when eleven percent (11%) through sixty percent (60%) of the pears fail the grade standard; or

(2) By one hundred percent (100%) when more than sixty percent (60%) of the pears fail the grade standard.

The difference between the reduced production determined in section 13(b) and the total production will be considered as cull production.

(c) Pears that are knocked to the ground by wind or that are frozen and cannot be packed or marketed as fresh pears will be considered one hundred percent (100%) cull production.

(d) Marketable production that grades less than U.S. No. 2 due to causes not covered by this endorsement will not be reduced.

(e) Fifteen percent (15%) of all production with section 13(b) and (c) will be production to count.

§ 457.112 Hybrid sorghum seed crop insurance provisions.

The Hybrid Sorghum Seed Crop Insurance Provisions for the 1998 and succeeding crop years are as follows:

FCIC policies:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Hybrid Sorghum Seed Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows:

(1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions, (§ 457.8) with (1) controlling (2), etc.

1. Definitions

Adjusted yield. An amount determined by multiplying the county yield by the coverage level factor.
Hybrid sorghum seed processor contract. An agreement executed in writing between the hybrid sorghum seed crop producer and a seed company containing, at a minimum:

(a) The producer’s promise to plant and grow male and female parent plants, and to deliver all commercial hybrid sorghum seed produced from such plants to the seed company;

(b) The seed company’s promise to purchase the commercial hybrid sorghum seed produced by the producer; and

(c) Either a fixed price per unit of measure (bushels, hundredweight, etc.) of the commercial hybrid sorghum seed or a formula to determine the value of such seed. Any formula for establishing the value must be based on data provided by a public third party that establishes or provides pricing information to the general public, based on prices paid in the open market (e.g., commodity futures exchanges), to be acceptable for the purpose of this policy.

Inadequate germination. Germination of less than 80 percent of the commercial hybrid sorghum seed as determined by using a certified seed test.

Insurable interest. Your share of the financial loss that occurs in the event seed production is damaged by a cause of loss specified in section 10.

Local market price. The cash price offered by buyers for any production from the female parent plants that is not considered commercial hybrid sorghum seed under the terms of this policy.

Male parent plants. Sorghum plants grown for the purpose of pollinating female parent plants.

Minimum guaranteed payment. A minimum amount (usually stated in dollars or bushels) specified in your hybrid sorghum seed processor contract that will be paid or credited to you by the seed company regardless of the quantity of seed produced.

Non-seed production. Production that does not qualify as seed production because of inadequate germination.

Planted acreage. In addition to the definition contained in the Basic Provisions, the insured crop must be planted in rows wide enough to permit mechanical cultivation, unless provided by the Special Provisions or by written agreement.

Planting pattern. The arrangement of the rows of the male and female parent plants in a field. An example of a planting pattern is four consecutive rows of female parent plants followed by two consecutive rows of male parent plants.

Practical to replant. In addition to the definition contained in the Basic Provisions, practical to replant applies to either the female or male parent plant. It will not be considered practical to replant unless production from the replanted acreage can be delivered under the terms of the hybrid sorghum seed processor contract, or the seed company agrees that it will accept the production from the replanted acreage.

Prevented planting. In addition to the definition contained in the Basic Provisions, prevented planting applies to the female and male parent plants. The male parent plants must be planted in accordance with the requirements of the hybrid sorghum seed processor contract to be considered planted.

Sample. For the purpose of the certified seed test, at least 3 pounds of randomly selected field run sorghum seed for each type or variety of commercial hybrid sorghum seed grown on the unit.

Seed company. A business enterprise that possesses all licenses for marketing commercial hybrid sorghum seed required by the state in which it is domiciled or operates, and which possesses facilities with enough storage and drying capacity to accept and process the insured crop within a reasonable amount of time after harvest. If the seed company is the insured, it must also be a corporation.

Seed production. All seed produced by female parent plants with a germination rate of at least 80 percent as determined by a certified seed test.

Type. Grain sorghum, forage sorghum, or sorghum sudan parent plants.

Variety. The name, number or code assigned to a specific genetic cross by the seed company or the Special Provisions for the insured crop in the county.

2. Unit Division

(a) For any processor contract that stipulates the amount of production to be delivered:

(1) In lieu of the definition of “basic unit” contained in the Basic Provisions, a basic unit will consist of all acreage planted to the insured crop in the county that will be used to fulfill a hybrid sorghum seed processor contract;

(2) There will be no more than one basic unit for all production contracted with each processor contract;

(3) In accordance with section 12, all production from any basic unit in excess of the amount under contract will be included as production to count if such production is applied to any other basic unit for which the contracted amount has not been fulfilled; and

(4) Optional units will not be established.

(b) For any processor contract that stipulates a number of acres to be planted, the provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.
3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 of the Basic Provisions, you may select only one price election for all the hybrid sorghum seed in the county insured under this policy unless the Special Provisions provide different price elections by type or variety, in which case you may elect one price election for each hybrid sorghum seed type or variety designated in the Special Provisions. The price election you choose for each type or variety must have the same percentage relationship to the maximum price offered by us for each type or variety. For example, if you choose 100 percent of the maximum price election for one specific type or variety, you must also choose 100 percent of the maximum price election for all other types or varieties.

(b) The production reporting requirements contained in section 3 of the Basic Provisions are not applicable to this contract.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

6. Report of Acreage

In addition to the requirements of section 6 of the Basic Provisions, you must:

(a) Report by type and variety, the location and insurable acreage of the insured crop;

(b) Report any acreage that is uninsured, including that portion of the total acreage occupied by male parent plants; and

(c) Certify that you have a hybrid sorghum seed processor contract and report the amount, if any, of any minimum guaranteed payment.

7. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the female parent plants in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share;

(2) That are grown under a hybrid sorghum seed processor contract executed before the acreage reporting date;

(3) That are planted for harvest as commercial hybrid sorghum seed in accordance with the requirements of the hybrid sorghum seed processor contract and the production management practices of the seed company; and

(b) That are not (unless allowed by the Special Provisions or by written agreement):

(i) Planted with a mixture of female and male parent seed in the same row;

(ii) Planted for any purpose other than for commercial hybrid sorghum seed;

(iii) Interplanted with another crop; or

(iv) Planted into an established grass or legume.

(b) An instrument in the form of a “lease” under which you retain control of the acreage on which the insured crop is grown and that provides for delivery of the crop under substantially the same terms as a hybrid sorghum seed processor contract will be treated as a contract under which you have an insurable interest in the crop.

(c) A commercial hybrid sorghum seed producer who is also a commercial hybrid sorghum seed company may be able to insure the hybrid sorghum seed crop if the following requirements are met:

(1) The seed company has an insurable interest in the hybrid sorghum seed crop;

(2) Prior to the sales closing date, the Board of Directors of the seed company has executed and adopted a corporate resolution containing the same terms as an acceptable hybrid sorghum seed processor contract. This corporate resolution will be considered a contract under the terms of this policy;

(3) Sales records for at least the previous years’ seed production must be provided to confirm that the seed company has produced and sold seed. If such records are not available, the crop may be insured under the Coarse Grains Crop Provisions with a written agreement; and

(d) Our inspection reveals that the storage and drying facilities satisfy the definition of a seed company.

(d) Any of the insured crop that is under contract with different insurance providers may be insured under separate policies with different insurance providers provided all acreage of the insured crop in the county is insured. If you elect to insure the insured crop with different insurance providers, you agree to pay separate administrative fees for each insurance policy.

8. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions, we will not insure any acreage of the insured crop:

(a) Planted and occupied exclusively by male parent plants;

(b) Not in compliance with the rotation requirements contained in the Special Provisions or, if applicable, required by the hybrid sorghum seed processor contract; or

(c) If either the female or male parent plants are damaged before the final planting date and we determine that insured crop is practical to replant but it is not replanted.
9. Insurance Period
(a) In addition to the provisions of section 11 of the Basic Provisions, insurance attaches upon completion of planting of:
   (1) The female parent plant seed on or before the final planting date designated in the Special Provisions, except as allowed in section 16 of the Basic Provisions; and
   (2) The male parent plant seed.
(b) In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the November 30 immediately following planting.

10. Causes of Loss
(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:
   (1) Adverse weather conditions;
   (2) Fire;
   (3) Insects, but not damage due to insufficient or improper application of pest control measures;
   (4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
   (5) Wildlife;
   (6) Earthquake;
   (7) Volcanic eruption; or
   (8) Failure of the irrigation water supply.
(b) In addition to the causes of loss excluded by section 12 of the Basic Provisions, we will not insure against any loss of production due to:
   (1) The use of unadapted, incompatible, or genetically deficient male or female parent plant seed;
   (2) Frost or freeze after the date set by the Special Provisions;
   (3) Failure to follow the requirements stated in the hybrid sorghum seed processor contract and production management practices of the seed company;
   (4) Inadequate germination, even if resulting from an insured cause of loss, unless you have provided adequate notice as required by section 11(b)(1); or
   (5) Failure to plant the male parent plant seed at a time or in a manner sufficient to assure adequate pollination of the female parent plants, unless you are prevented from planting the male parent plant seed by an insured cause of loss.

11. Duties in the Event of Damage or Loss
(a) In accordance with the requirements of section 14 of the Basic Provisions, you must leave representative samples of at least one complete planting pattern of the male and female parent plant rows that extend the entire length of each field in the unit. If you are going to destroy any acreage of the insured crop that will not be harvested, the samples must not be destroyed until after our inspection.
(b) In addition to the requirements of section 14 of the Basic Provisions:
   (1) You must give us notice of probable loss at least 15 days before the beginning of harvest if you anticipate inadequate germination on any unit; and
   (2) You must provide a completed copy of your hybrid sorghum seed processor contract unless we have determined it has already been provided by the seed company, and the seed company certifies that such contract is used for all its producers without any waivers or amendments.

12. Settlement of Claim
(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
   (1) For any optional units, we will combine all optional units for which such production records were not provided; or
   (2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
(b) You will not receive an indemnity payment on a unit if the seed company refuses to provide us with records we require to determine the dollar value per bushel of production for each variety.
(c) In the event of loss or damage covered by this policy, we will settle your claim on any unit by:
   (1) Multiplying the insured acreage by its respective amount of insurance per acre, by type and variety if applicable;
   (2) For any basic units, we will allocate any commingled production to count (see section 12(d)) for each type and variety of commercial hybrid sorghum seed by the applicable dollar value per bushel for that type or variety;
   (3) Multiplying the total seed production to count (see section 12(e)) for each type and variety by the applicable local market price determined on the earlier of the date the non-seed production is sold or the date of final inspection;
   (4) Subtracting the result of section 12(c)(5) from the result of section 12(c)(1) if there is only one type or variety, or subtracting the result of section 12(c)(5) from the result of section 12(c)(2) if there are more than one type or variety; and
   (5) Multiplying the result of section 12(c)(6) by your share.
For example:
You have a 100 percent share in 50 acres insured for the development of type "A" hybrid sorghum seed in the unit, with an amount of insurance per acre guarantee of $361 (county yield of 170 bushels times a coverage level factor of .867 for the 65 percent coverage level, times a price election of $2.45 per bushel, minus the minimum guaranteed payment of zero). Your seed production was 1,400 bushels and the dollar value per bushel was $3.47. Your non-seed production was 100 bushels with a local market value of $2.00 per bushel. Your indemnity would be calculated as follows:

- (1) 50 acres x $361 = $18,050 amount of insurance guarantee;
- (2) 1,400 bushels x $3.47 = $4,858 value of seed production;
- (3) 100 bushels of non-seed x $2.00 = $200 of non-seed production;
- (4) $4,858 + $200 = $5,058;
- (5) $18,050 - $5,058 = $12,992; and
- (6) $12,992 x 100 percent share = $12,992 indemnity payment.

You also have a 100 percent share in 50 acres insured for the development of type "B" hybrid sorghum seed in the unit, with an amount of insurance per acre guarantee of $340 (county yield of 160 bushels times a coverage level factor of .867 for the 65 percent coverage level, times a price election of $2.45 per bushel, minus the minimum guaranteed payment of zero). You harvested 1,200 bushels and the dollar value per bushel for the harvested amount was $4.63. You also harvested 200 bushels of non-seed with a market value of $2.00 per bushel. Your indemnity would be calculated as follows:

- (1) 50 acres x $340 = $17,000 amount of insurance guarantee for type "A" and 50 acres x $340 = $17,000 amount of insurance guarantee for type "B";
- (2) $18,050 + $17,000 = $35,050 amount of insurance guarantee;
- (3) 1,400 bushels x $3.47 = $4,858 value of seed production for type "A" and 1,200 bushels x $4.63 = $5,556 value of seed production for type "B";
- (4) 100 bushels of non-seed x $2.00 = $200 of non-seed production for type "A" and 200 bushels of non-seed x $2.00 = $400 of non-seed production for type "B";
- (5) $4,858 + $200 + $5,556 + $400 = $11,014 value of production to count;
- (6) $35,050 - $11,014 = $24,036; and
- (7) $24,036 x 100 percent share = $24,036 indemnity payment.

(d) Production to be counted as non-seed production will include all harvested or mature appraised production that does not qualify as seed production to count as specified in section 12(f).

(D) For which you fail to provide acceptable production records;
(ii) Production lost due to uninsured causes;
(iii) Mature unharvested production with a germination rate of at least 80 percent of the commercial hybrid sorghum seed as determined by a certified seed test. Any such production may be adjusted in accordance with section 12(f);
(iv) Immature appraised production;
(v) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

- (2) Harvested production that you deliver as commercial hybrid sorghum seed to the seed company stated in your hybrid sorghum seed processor contract, regardless of quality, unless the production has inadequate germination.

(e) Production to be counted as non-seed production will include all harvested or mature appraised production that does not qualify as seed production to count as specified in section 12(d). Any such production may be adjusted in accordance with section 12(f).

(f) For the purpose of determining the quantity of mature production:

- (1) Commercial hybrid sorghum seed production will be:
  (i) Increased 0.12 percent for each 0.1 percentage point of moisture below 13.0 percent; or
  (ii) Decreased 0.12 percent for each 0.1 percentage point of moisture in excess of 13.0 percent.
- (2) When records of commercial hybrid sorghum seed production provided by the seed company have been adjusted to a basis of 13.0 percent.
percent moisture and 56 pound avoirdupois bushels, section 12(f)(1) above will not apply to harvested production. In such cases, records of the seed company will be used to determine the amount of production to count, provided that the moisture and weight of such production are calculated on the same basis as that used to determine the approved yield.

13. Prevented Planting

Your prevented planting coverage will be 60 percent of your amount of insurance for timely planted acreage. If you have limited or additional levels of coverage as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.113 Coarse grains crop insurance provisions.

The coarse grains crop insurance provisions for the 2011 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE
Federal Crop Insurance Corporation

Coarse Grains Crop Provisions

1. Definitions

Coarse grains. Corn, grain sorghum, and soybeans.

Grain sorghum. The crop defined as sorghum under the United States Grain Standards Act.

Harvest. Combining, threshing, or picking the insured crop for grain, or cutting for hay, silage, or fodder.

Local market price. The cash grain price per bushel for the U.S. No. 2 yellow corn, U.S. No. 2 grain sorghum, or U.S. No. 1 soybeans, offered by buyers in the area in which you normally market the insured crop. The local market price will reflect the maximum limits of quality deficiencies allowable for the U.S. No. 2 grade for yellow corn and grain sorghum, or U.S. No. 1 grade for soybeans. Factors not associated with grading under the Official United States Standards for Grain, including but not limited to protein and oil, will not be considered.

Planted acreage. In addition to the definition contained in the Basic Provisions, the number of bushels (tons for corn insured as silage) determined by multiplying the approved yield per acre by the coverage level percentage you elect.

Silage. A product that results from severing the plant from the land and chopping it for the purpose of livestock feed.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions, you must elect to insure your corn, grain sorghum, or soybeans with either revenue protection or yield protection by the sales closing date.

3. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

4. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) For corn and grain sorghum:</td>
<td></td>

</tbody>
</table>
5. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be each coarse grain crop you elect to insure for which premium rates are provided by the actuarial documents:

(1) In which you have a share;
(2) That is adapted to the area based on days to maturity and is compatible with agronomic and weather conditions in the area; and
(3) That is not (unless allowed by the Special Provisions or by written agreement):
   (i) Interplanted with another crop except as allowed in section 5(b)(1); or
   (ii) Planted into an established grass or legume.

(b) For corn only, in addition to the provisions of section 5(a), the corn crop insured will be all corn that is:

(1) Planted for harvest either as grain or as silage (see section 5(g)). A mixture of corn and sorghum (grain or forage-type) will be insured as corn silage if the sorghum does not constitute more than twenty percent (20%) of the plants;
(2) Yellow dent or white corn, including mixed yellow and white, waxy or high-lysine corn, high-oil corn blends containing mixtures of at least 90 percent high yielding yellow dent female plants with high-oil male pollinator plants, or commercial varieties of high-protein hybrids, and excluding:
   (i) High-amylose, high-oil or high-protein (except as authorized in section 5(b)(2)), flint, flour, Indian, or blue corn, or a variety genetically adapted to provide forage for wildlife or any other open pollinated corn, unless a written agreement allows insurance of such excluded crops.
   (ii) A variety of corn adapted for silage use only when the corn is reported for insurance as grain;
(c) For corn only, if the actuarial documents for the county provide a premium rate for:

(1) Both grain and silage, all insurable acreage will be insured as the type or types reported by you on or before the acreage reporting date;
(2) Grain but not silage, all insurable acreage will be insured as grain unless a written agreement allows insurance on all or a portion of the insurable acreage as silage; or
(3) Silage but not grain, all insurable corn acreage will be insured as silage unless a written agreement allows insurance on all or a portion of the insurable acreage as grain.

(d) For grain sorghum only, in addition to the provisions of section 5(a), the grain sorghum crop insured will be all of the grain sorghum in the county:

(1) That is planted for harvest as grain;
(2) That is a combine-type hybrid grain sorghum (grown from hybrid seed); and
(3) That is not a dual-purpose type of grain sorghum (a type used for both grain and forage), unless a written agreement allows insurance of such grain sorghum.

(e) For soybeans only, in addition to the provisions of section 5(a), the soybean crop insured will be all of the soybeans in the county that are planted for harvest as beans.

6. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions, any acreage of the insured crop damaged before the final planting date, to the extent that a majority of producers in the area would not normally further care for the crop, must be replanted unless we agree that it is not practical to replant.

7. Insurance Period

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the date immediately following planting as follows:

(a) For corn insured as grain:

(1) Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson Counties, Texas, and all Texas counties lying south thereof.
   September 30.
   October 31.
(3) All other counties and states .................................................................
   December 10.
Federal Crop Insurance Corporation, USDA §457.113

(b) For corn insured as silage:
2. All other states 

(c) For grain sorghum:
1. Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson Counties, Texas, and all Texas counties lying south thereof. 
2. All other states 
(d) For soybeans: All states

8. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss which occur within the insurance period:
(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption;
(h) Failure of the irrigation water supply due to a cause of loss specified in sections 8(a) through (g) that also occurs during the insurance period; or
(i) For revenue protection, a change in the harvest price from the projected price, unless FCIC can prove the price change was the direct result of an uninsured cause of loss specified in section 12(a) of the Basic Provisions.

9. Replanting Payments

(a) A replanting payment is allowed as follows:
1. In lieu of provisions in section 13 of the Basic Provisions that limit the amount of a replanting payment to the actual cost of replanting, the amount of any replanting payment will be determined in accordance with these Crop Provisions;
2. Except as specified in section 9(a)(1), you must comply with all requirements regarding replanting payments contained in section 13 of the Basic Provisions; and
3. The insured crop must be damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage.
(b) Unless otherwise specified in the Special Provisions, the amount of the replanting payment per acre will be the lesser of 20 percent of the production guarantee or the number of bushels (tons for corn insured as silage) for the applicable crop specified below, multiplied by your projected price, multiplied by your share:
1. 8 bushels for corn grain;
2. 1 ton for corn silage;
3. 7 bushels for grain sorghum; and
4. 3 bushels for soybeans.
(c) When the crop is replanted using a practice that is uninsurable for an original planting, the liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.
(d) If the acreage is replanted to an insured crop type that is different than the insured crop type originally planted on the acreage:
1. The production guarantee, premium, and projected price and harvest price, as applicable, will be adjusted based on the replanted type;
2. Replanting payments will be calculated using your projected price and production guarantee for the crop type that is replanted and insured; and
3. A revised acreage report will be required to reflect the replanted type, as applicable.

10. Duties in the Event of Damage or Loss

(a) Representative samples are required in accordance with section 14 of the Basic Provisions.
(b) For any corn unit that has separate dates for the end of the insurance period (grain and silage), in lieu of the requirement contained in section 14 of the Basic Provisions to provide notice within 72 hours of your initial discovery of damage (but not later than 15 days after the end of the insurance period), you must provide notice within 72 hours of your initial discovery of damage (but not later than 15 days after the latest end of the insurance period applicable to the unit).
(c) If you will harvest any acreage in a manner other than as you reported it for coverage (e.g., you reported planting it to harvest as grain but will harvest the acreage for silage, or you reported planting it to harvest as silage but will harvest the acreage for grain), you must notify us before harvest begins. Failure to timely provide notice will result in production to count determined in accordance with section 11(c)(1)(E).

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide
records of production that are acceptable to us for any:
   (1) Optional unit, we will combine all optional units for which acceptable records of production were not provided; or
   (2) Basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:
   (1) Multiplying the number of insured acres of each insured crop or type, as applicable, by your respective:
      (i) Yield protection guarantee (per acre) if you elected yield protection; or
      (ii) Revenue protection guarantee (per acre) if you elected revenue protection;
   (2) Totaling the results of section 11(b)(1)(i) or 11(b)(1)(ii), whichever is applicable;
   (3) Multiplying the production to count of each insured crop or type, as applicable, by your respective:
      (i) Projected price if you elected yield protection; or
      (ii) Harvest price if you elected revenue protection;
   (4) Totaling the results of section 11(b)(3)(i) or 11(b)(3)(ii), whichever is applicable;
   (5) Subtracting the result of section 11(b)(4) from the result of section 11(b)(2); and
   (b) Multiplying the result of section 11(b)(5) by your share.

For example:

You have 100 percent share in 50 acres of corn in the unit with a production guarantee (per acre) of 115 bushels, your projected price is $2.25, your harvest price is $2.20, and your production to count is 5,000 bushels.

If you elected yield protection:
   (1) 50 acres x (115 bushel production guarantee x $2.25 projected price) = $12,937.50 value of the production guarantee
   (2) 5,000 bushel production to count x $2.25 projected price = $11,250.00 value of the production to count
   (3) $12,937.50 - $11,250.00 = $1,687.50 indemnity (if you elected revenue protection)

If you elected revenue protection:
   (1) 50 acres x (115 bushel production guarantee x $2.25 projected price) = $12,937.50 revenue protection guarantee
   (2) 5,000 bushel production to count x $2.20 harvest price = $11,000.00 value of the production to count
   (3) $12,937.50 - $11,000.00 = $1,937.50
   (4) $1,937.50 x 1.000 share = $1,938.00 indemnity

(c) The total production to count (in bushels for corn insured as grain or in tons for corn insured as silage) from all insurable acreage on the unit will include:
   (1) All appraised production as follows:
      (i) For yield protection, not less than the production guarantee, or for revenue protection, not less than the amount of production that when multiplied by the harvest price equals the revenue protection guarantee (per acre) for acreage:
         (A) That is abandoned;
         (B) Put to another use without our consent;
         (C) Damaged solely by uninsured causes;
         (D) For which you fail to provide records of production that are acceptable to us; or
         (E) For which you fail to give us notice before harvest begins if you report planting the corn to harvest as grain but harvest it as silage or you report planting the corn to harvest as silage but harvest it as grain.
      (ii) Production lost due to uninsured causes;
      (iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with section 11(d)); and
      (iv) Potential production on insured acreage you will put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
         (A) If you do not elect to continue to care for the crop we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
         (B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
   (2) All harvested production from the insurable acreage.

(d) Mature coarse grain production (excluding corn insured as silage) may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable it will be made prior to any adjustment for quality. Corn insured as silage will be adjusted for excess moisture and quality only as specified in section 11(e).

(1) Production will be reduced by 0.12 percent for each 0.1 percentage point of moisture in excess of:
   (i) Fifteen percent (15%) for corn (If moisture exceeds 30 percent (30%), production will be reduced 0.2 percent for each 0.1 percentage point above 30 percent (30%));
The Sugarcane Crop Insurance Provisions for the 2011 and succeeding crop years are as follows:

1. Definitions

**Crop year.** The period within which the insured sugarcane is normally grown and designated by the calendar year in which the harvest of sugarcane normally begins in the county.
§ 457.116 7 CFR Ch. IV (1-1-14 Edition)

Harvest. Cutting and removing the mature sugarcane from the field.

Irrigated practice. A method of producing a crop by which water is artificially applied during the growing season by appropriate systems and at the proper times, with the intention of providing the quantity of water needed to produce at least the yield used to establish the irrigated production guarantee on the irrigated acreage planted to the insured crop.

Local market price. The price per pound for raw sugar offered by buyers in the area in which you normally market the sugarcane.

Plant cane. The insured crop which grows from seed planted for the crop year.

Stubble cane. The insured crop which grows from the stubble of sugarcane that was harvested the previous crop year.

Sugarcane. The grass, Saccharum officinarum, that is grown to produce sugar.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8), you may select only one price election for all the sugarcane in the county insured under this policy. (b) Instead of reporting your sugarcane production for the previous crop year as required by subsection 3(f) of the Basic Provisions (§ 457.8), there is a lag period of one year and you are required to report production from two crop years previously, e.g., 1994 crop year production must be reported by the required date for the 1996 crop year.

3. Contract Changes

In accordance with section 4 of the Basic Provisions (§ 457.8), the contract change date is June 30 preceding the cancellation date.

4. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions (§ 457.8), the cancellation and termination dates are September 30.

5. Insured Crop

(a) In accordance with section 8 of the Basic Provisions (§ 457.8), the crop insured will be all the sugarcane in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share;

(2) That is grown for processing for sugar or for seed; and

(3) That is not interplanted with another crop, unless allowed by a written agreement.

(b) In addition to the crop listed as not insured in section 8(b) of the Basic Provisions (§ 457.8), we will not insure any sugarcane:

(1) That was damaged the previous crop year to the extent the sugarcane is unable to produce the yield used to establish the production guarantee for the unit for the current crop year; or

(2) That exceeds the age limitations (by variety, if applicable) contained in the Special Provisions , unless we agree in writing to insure such acreage. An agreement in writing will not be provided unless, after an appraisal, we determine that the crop is able to produce at least the yield used to establish the production guarantee for the unit for the current crop year.

6. Insurable Acreage

Section 9(a)(2)(IV) of the Basic Provisions (§ 457.8), is not applicable to the Sugarcane Crop Insurance Provisions.

7. Insurance Period

(a) In addition to the provisions of section 11 of the Basic Provisions (§ 457.8), insurance attaches:

(1) On the later of the day we accept your application or at the time of planting for plant cane;

(2) On the first day following harvest of the previous crop for stubble cane except as contained in sections 7(a)(3) and (4);

(3) On the later of April 15 or 30 days following harvest of the previous crop for stubble cane damaged during the previous crop year in Louisiana; and

(4) On the later of April 30 or 30 days following harvest of the previous crop for stubble cane damaged during the previous crop year in Louisiana.

(b) In accordance with the provisions of section 11 of the Basic Provisions (§ 457.8), the calendar date for the end of the insurance period is:

(1) January 31 in Louisiana; and

(2) April 30 in all other states.

8. Causes of Loss

In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), insurance is provided only against the following causes of loss that occur within the insurance period:

(a) Adverse weather conditions;

(b) Fire;

(c) Insects, but not damage due to insufficient or improper application of pest control measures;

(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(e) Wildlife;

(f) Earthquake;

(g) Volcanic eruption; or

(h) Failure of the irrigation water supply, if applicable, due to an unavoidable cause of loss occurring within the insurance period.
9. Duties in the Event of Damage or Loss or
Cutting the Sugarcane for Seed

(a) In addition to your duties under section 14
of the Basic Provisions (§ 457.8), in the
event of damage or loss:

(1) All sugarcane stubble must remain in-
tact for our inspection; and

(2) You must give us notice at least 15 days
before you begin cutting any sugarcane for
seed. Your notice must include the unit
number and the number of acres you intend
to harvest as seed. Failure to give us timely
notice will cause the acreage cut for seed to
be counted as put to another use without
consent. The production to count for such
acreage will not be less than the production
guarantee.

(b) In accordance with the requirements of
section 14 (Duties in the Event of Damage or
Loss) of the Basic Provisions (§ 457.8), if you
initially discover damage to any insured
crop within 15 days of, or during harvest, you
must leave representative samples of the
unharvested crop for our inspection. The rep-
resentative samples of the unharvested crop
must be at least 10 feet wide and extend the
entire length of each field in the unit. The
stubble must not be destroyed and the re-
quired samples must not be harvested until
the earlier of our inspection or 15 days after
harvest of the balance of the unit is com-
pleted.

10. Settlement of Claim

(a) We will determine your loss on a unit
basis. In the event you are unable to provide
records of production:

(1) For any optional unit, we will combine
all optional units for which acceptable
records of production were not provided; or

(2) For any basic unit, we will allocate any
commingled production to such units in pro-
portion to our liability on the harvested
acreage for each unit.

(b) In the event of loss or damage covered
by this policy, we will settle your claim on
any unit by:

(1) Multiplying the insured acreage by the
production guarantee;

(2) Subtracting from this the total produc-
tion to count;

(3) Multiplying the remainder by your
price election; and

(4) Multiplying this result by your share.

Example 1: Assume you have a 100 percent
share in a unit of 100 acres of sugarcane, an
approved yield of 6,000 pounds of raw sugar
per acre, a coverage election of 65 percent,
and a price election of $0.12 a pound. The pro-
duction guarantee would be 3,900 pounds of
raw sugar per acre (6,000 x 65%). Further assu-
me that you are only able to harvest
200,000 pounds of raw sugar because the unit
was damaged by an insurable cause of loss.
Your indemnity would be calculated as fol-
lows:

(1) 100 acres x 3,900 pound production guar-
antee = 390,000 pound production guarantee;

(2) 390,000 pound production guarantee-
200,000 pounds harvested production = 190,000
pound production loss;

(3) 190,000 pound production loss x $0.12
price election = $22,800 loss; and

(4) $22,800 loss x 100 percent share = $22,800
indemnity payment.

Example 2: Assume the same set of facts.
Also, assume that you cut 20 acres of this
unit for seed without giving notice that you
were cutting this acreage for seed and that
you are only able to harvest 200,000 pounds
from the remaining 80 acres. Your indemnity
would be calculated as follows:

(1) 100 acres x 3,900 pound production guar-
antee = 390,000 pound production guarantee;

(2) 390,000 pound production guarantee-
278,000 (200,000 pounds harvested production +
78,000 pounds production for putting acreage
to another use without consent, (20 acres x
3,900 pound production guarantee per acre)) =
112,000 pound production loss;

(3) 112,000 pound production loss x $0.12
price election = $13,440 loss; and

(4) $13,440 loss x 100 percent share = $13,440
indemnity payment.

(c) The total production (pounds of sugar)
to count from all insurable acreage on the
unit will include:

(1) All appraised production as follows:

(i) Not less than the production guarantee
for acreage:

(A) That is abandoned;

(B) Put to another use without our con-
sent;

(C) Damaged solely by uninsured causes;

(D) For which you fail to provide records of
production that are acceptable to us; or

(E) On which the sugarcane stubble is de-
stroyed within 15 days after harvest is com-
pleted without our consent;

(ii) Production lost due to uninsured
causes;

(iii) Unharvested production;

(iv) Potential production on insured acre-
age harvested for seed (see section 9(a)(3));

(v) Potential production on insured acre-
age you want to put to another use or you
wish to abandon and no longer care for. If
you and we agree on the appraised amount of
production. Upon such agreement, the insur-
ance period for that acreage will end if you
put the acreage to another use or abandon
the crop. If agreement on the appraised
amount of production is not reached:

(A) If you do not elect to continue to care
for the crop, we may give you consent to put

(1) 100 acres x 3,900 pound production guar-
antee = 390,000 pound production guarantee;

(2) 390,000 pound production guarantee-
200,000 pounds harvested production = 190,000
pound production loss;

(3) 190,000 pound production loss x $0.12
price election = $22,800 loss; and

(4) $22,800 loss x 100 percent share = $22,800
indemnity payment.
the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us. (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count.;) or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(d) Harvested sugarcane may be adjusted for low quality if it is damaged by one or more freezes occurring within the insurance period to the extent that it cannot be processed for sugar by the boiling house operation. The amount of production to count for such sugarcane will be determined by dividing the dollar value of the damaged production by the local market price per pound for raw sugar. The prices used for this adjustment will be determined on the earlier of the date such quality-adjusted production is sold or the date of final inspection for the unit.

11. Late and Prevented Planting

§ 457.117 Forage production crop insurance provisions.

The Forage Production Crop Insurance Provisions for the 2001 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Forage Production Crop Insurance Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Adequate stand. A population of live forage plants that equals or exceeds the minimum required number of plants per square foot as shown in the Special Provisions.

Air-dry forage. Forage that has dried in windrows by natural means to less than 13 percent moisture before being put into stacks or bales.

Crop year. The period from the date insurance attaches until harvest is normally completed, which is designated by the calendar year in which the majority of the forage is normally harvested.

Cutting. The severance of the forage plant from its roots.

Direct marketing. Sale of the forage crop directly to consumers without the intervention of an intermediary such as a wholesaler, shipper, buyer, or broker. An example of direct marketing is selling directly to other producers.

Fall planted. A forage crop seeded after June 30.

Forage. Planted perennial alfalfa, perennial red clover, perennial grasses, or a mixture thereof, or other species as shown in the Actuarial Documents.

Harvest. Removal of forage from the windrow or field. Grazing will not be considered harvested.

Spring planted. A forage crop seeded before July 1.

Ton. Two thousand (2,000) pounds avoirdupois.

Windrow. Forage that is cut and placed in a row.

Year of establishment. The period between seeding and when the forage crop has developed an adequate stand. Insurance during the year of establishment may be available under the forage seeding policy. Insurance under this policy does not attach until after the year of establishment. The year of establishment is determined by the date of seeding. The year of establishment for spring planted forage is designated by the calendar year in which seeding occurred. The year of establishment for fall planted forage is designated by the calendar year after the year in which the crop was planted.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8):

(a) You may only select one price election for all the forage in the county insured under
this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each forage type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for a specific type, you must also choose 100 percent of the maximum price election for all other types.

(b) You must report the total production harvested from insurable acreage for each cutting for each type by the production reporting date.

(c) Separate guarantees will be determined by forage type, as applicable.

3. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§457.8), the contract change date is June 30 preceding the cancellation date.

4. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State</th>
<th>Cancellation/termination date</th>
</tr>
</thead>
<tbody>
<tr>
<td>California, Nevada and Utah</td>
<td>October 31</td>
</tr>
<tr>
<td>All other states</td>
<td>September 30</td>
</tr>
</tbody>
</table>

5. Report of Acreage

In lieu of the provisions of section 6(a) of the Basic Provisions, a report of all insured acreage of forage production must be submitted on or before each forage production acreage reporting date specified in the Special Provisions.

6. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the forage in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share; and
(2) That is grown during one or more years after the year of establishment.

(b) In addition to the crop listed as not insured in section 8 (Insured Crop) of the Basic Provisions (§457.8), we will not insure any forage that:

(1) Does not have an adequate stand at the beginning of the insurance period;
(2) Is grown with a non-forage crop; or
(3) Exceeds the age limitations for forage stands contained in the Special Provisions.

7. Insurance Period

In lieu of the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(a) Insurance attaches on acreage with an adequate stand on the following dates:

(1) For the calendar year following the year of seeding for:
   (i) Spring planted forage in Lassen, Modoc, Mono, Shasta and Siskiyou Counties California, Colorado, Idaho, Nebraska, Nevada, Oregon, Utah and Washington—April 15;
   (ii) Spring planted forage in Iowa, Minnesota, Montana, New Hampshire, New York, North Dakota, Pennsylvania, Wisconsin, Wyoming and all other states—May 22;
   (iii) Fall planted forage in Lassen, Modoc, Mono, Shasta and Siskiyou Counties California, and all other states—October 16;

   (iv) Fall planted forage in all California counties except Lassen, Modoc, Mono, Shasta and Siskiyou—December 1.

(2) For the calendar year of seeding for spring planted acreage in all California counties except Lassen, Modoc, Mono, Shasta and Siskiyou—December 1.

(3) For calendar years subsequent to the calendar year following the year of seeding for:

   (i) Lassen, Modoc, Mono, Shasta and Siskiyou Counties California, and all other states—October 16;
   (ii) All California counties except Lassen, Modoc, Mono, Shasta and Siskiyou—December 1.

(b) Insurance ends at the earliest of:

(1) Total destruction of the forage crop;
(2) Removal from the windrow or the field for each cutting;
(3) Final adjustment of a loss;
(4) The date grazing commences on the forage crop;
(5) Abandonment of the forage crop; or
(6) The following dates of the crop year:

   (i) For Lassen, Modoc, Mono, Shasta, and Siskiyou Counties California and all other states—October 15;
   (ii) For all California counties except Lassen, Modoc, Mono, Shasta, and Siskiyou—November 30.

(c) In order to obtain year-round coverage for a calendar year, you must purchase the Forage Production Winter Coverage Endorsement (§457.127).

8. Causes of Loss

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions;
(2) Fire;
(3) Insects, but not damage due to insufficient or improper application of pest control measures;
§ 457.117

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(b) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period.

In addition to the causes of loss specifically excluded in section 12 of the Basic Provisions, we will not insure against damage of loss of production that occurs after removal from the windrow.

9. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 of the Basic Provisions, the following will apply:

(a) You must notify us within 3 days of the date harvest should have started if the insured crop will not be harvested;

(b) You must notify us at least 15 days before any production from any unit will be sold by direct marketing unless you have records verifying that the forage was direct marketed. Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count of not less than the production guarantee per acre if such failure results in our inability to make the required appraisal;

(c) If you intend to claim an indemnity on any unit, you must notify us at least 15 days prior to the beginning of harvest if you previously gave notice in accordance with section 14 of the Basic Provisions so that we may inspect the damaged production. You must not destroy the damaged crop until after we have given you written consent to do so. If you fail to meet the requirements of this section, and such failure results in our inability to inspect the damaged production, all such production will be considered undamaged and will be included as production to count; and

(d) You must notify us at least 5 days before grazing of insured forage begins so we can conduct an appraisal to determine production to count. Failure to give timely notice that the acreage will be grazed will result in an appraised amount of production to count of not less than the production guarantee per acre.

10. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage for each type, by its respective production guarantee;

(2) Multiplying each result in section 11(b)(1) by the respective price election you selected;

(3) Totaling the results of each crop type in section 11(b)(2);

(4) Multiplying the total production to be counted of each type, if applicable, (see section 11(c)) by the respective price election you selected;

(5) Totaling the results of each crop type in section 11(b)(4);

(6) Subtracting the result in section 11(b)(5) from the result in section 11(b)(3); and

(7) Multiplying the result in section 11(b)(6) by your share.

Example 1

Assume you have a 100 percent share in 100 acres of type A forage in the unit, with a guarantee of 3.0 tons per acre and a price election of $50.00 per ton. Due to adverse weather you were only able to harvest 50.0 tons. Your indemnity would be calculated as follows:

1. 100 acres x 3 tons = 300 ton guarantee;

2. 300 tons x $65 price election = $19,500 total value guarantee;

3. $19,500 + $5,000 = $24,500 total value of the guarantee;

4. 50 tons x $65 price election = $3,250 total value of production to count;

5. 100 ton guarantee x $50 price election = $5,000 total value of the guarantee for type A;

6. $19,500 value guarantee—$3,250 = $16,250 loss; and

7. $16,250 x 100 percent share = $16,250 indemnity payment.

Example 2

Assume you also have a 100 percent share in 100 acres of type B forage in the same unit, with a guarantee of 1.0 ton per acre and a price election of $50.00 per ton. Due to adverse weather you were only able to harvest 5.0 tons. Your total indemnity for forage production for both types A and B in the same unit would be calculated as follows:

1. 100 acres x 3 tons = 300 ton guarantee for type A; and 100 acres x 1 ton = 100 ton guarantee for type B;

2. 300 ton guarantee x $65 price election = $19,500 total value of the guarantee for type A; and 100 ton guarantee x $50 price election = $5,000 total value of the guarantee for type B;

3. $19,500 + $5,000 = $24,500 total value of the guarantee;

4. 50 tons x $65 price election = $3,250 total value of production to count for type A; and 5 tons x $50 price election = $250 total value of production to count for type B;

5. $24,500 — ($3,250 + $250) = $20,900 total value of the guarantee;

6. $20,900 x 100 percent share = $20,900 indemnity payment.
Federal Crop Insurance Corporation, USDA  § 457.118

5. $3,250 + $250 = $3,500 total value of production to count for types A and B;
6. $21,500–$3,500 = $21,000 loss; and
7. $21,000 × 100 percent share = $21,000 indemnity payment.
(c) The total production to count (in tons) from all insurable acreage on the unit will include:
   (i) All appraised production as follows:
       (A) That is abandoned;
       (B) Put to another use without our consent;
       (C) Damaged solely by uninsured causes; or
       (D) For which you fail to provide production records that are acceptable to us;
   (ii) Production lost due to uninsured causes;
   (iii) Unharvested production;
   (iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraisal amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached and:
       (A) You do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
       (B) You elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
   (2) All harvested production from the insurable acreage.
   (d) When forage is harvested as other than air-dry forage, the production to count will be adjusted to the equivalent of air-dry forage.
   (e) Any harvested production from plants growing in the forage will be counted as forage on a weight basis.
   (f) In addition to the provisions of section 15 (Production Included in Determining Indemnities) of the Basic Provisions (§ 457.8), we may determine the amount of production of any unharvested forage on the basis of our field appraisals conducted after the normal time for each cutting for the area.

11. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

§ 457.118 Malting barley price and quality endorsement.

The malting barley price and quality endorsement provisions for the 2011 and succeeding crop years are as follows:

FCIC policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation.

Reinsured policies:

(Appropriate title for insurance provider).

Both FCIC and reinsured policies:

Small Grains Crop Insurance Malting Barley Price and Quality Endorsement

(This is a continuous endorsement. Refer to section 2 of the Basic Provisions.) In return for your payment of premium for the coverage contained herein, this endorsement will be attached to and made part of the Basic Provisions and Small Grains Crop Provisions, subject to the terms and conditions described herein.

1. Definitions

Additional value price. The value per bushel determined in accordance with section 3 of Option A or section 3 of Option B, as applicable.

Approved malting variety. A variety of barley specified in the Special Provisions.

Brewery. A facility where malt beverages are commercially produced for human consumption.

Contracted production. A quantity of barley the producer agrees to grow and deliver, and the buyer agrees to accept, under the terms of the malting barley contract.

Crop year. In addition to the definition in the Basic Provisions and only for APH purposes under the terms of this endorsement, the period within which the crop is actually grown and designated by the calendar year in which the insured crop is normally harvested.

Licensed grain grader. A person authorized by the U.S. Department of Agriculture to inspect and grade barley in accordance with the U.S. Standards for malt barley.

Malt. A substance produced by germinating barley under controlled conditions and then drying it.

Malt extract. A substance made by adding warm water to ground malt and separating the liquid from the solid. In some cases, the
liquid extract may be condensed or evaporated to a syrup or powder.

*Malting barley contract.* An agreement in writing:
(a) Between the producer and a brewery or a business enterprise that produces or sells malt or malt extract to a brewery, or a business enterprise owned by such brewery or business;
(b) That specifies the amount of contracted production, the purchase price or a method to determine such price; and
(c) That establishes the obligations of each party to the agreement.

*Malting barley price agreement.* An agreement that meets all conditions required for a malting barley contract except that it is executed with a business enterprise that is not described in the definition of a malting barley contract, but that normally contracts to purchase malting barley production and has facilities appropriate to handle and store malting barley production.

**Objective test.** A determination made by a qualified person using standardized equipment that is widely used in the malting industry that follows a procedure approved by the:
(a) American Society of Brewing Chemists when determining percent germination;
(b) Federal Grain Inspection Service when determining quality factors other than percent germination;
(c) Food and Drug Administration (FDA) when determining concentrations of mycotoxins or other substances or conditions identified by the FDA as being injurious to human or animal health.

**Subjective test.** A determination:
(a) Made by a person using olfactory, visual, touch or feel, masticatory, or other senses unless performed by a licensed grain grader;
(b) That uses non-standardized equipment;
or
(c) That does not follow a procedure approved by the American Society of Brewing Chemists, the Federal Grain Inspection Service, or the Food and Drug Administration.

2. This endorsement provides coverage for malting barley production and quality losses at a price per bushel greater than that offered under the Small Grains Crop Provisions.

3. You must have the Basic Provisions and the Small Grains Crop Provisions in force to elect to insure malting barley under this endorsement.

4. You may elect either Option A or Option B on or before the sales closing date:
(a) No coverage will be provided under:
(1) Either Option A or Option B of this endorsement if you fail to elect either Option A or Option B, or if you elect Option B but fail to have a malting barley contract in effect by the acreage reporting date; or
(2) Option B of this endorsement if you have not met the production requirements specified in section 1(a) of Option B (in such case, you will only have coverage under the Small Grains Crop Provisions unless you elect coverage under Option A on or before the sales closing date);
(b) If you elect coverage under Option A, and subsequently enter into a malting barley contract, your coverage will continue under the terms of Option A;
(c) Your election (Option A or Option B) will continue from year to year unless you cancel or change your election on or before the sales closing date, or your coverage is otherwise canceled or terminated under the terms of your policy; and
(d) In counties with both fall and spring sales closing dates, you may elect this endorsement until the spring sales closing date only if you do not have any fall planted acreage of approved malting barley varieties.

5. All acreage in the county planted to approved malting varieties that is insurable under the Small Grains Crop Provisions for feed barley and your elected Option will be insured under this endorsement, except any acreage on which you produce seed under the terms of the seed contract.

6. In lieu of the definitions and provisions regarding units and unit division in the Basic Provisions and the Small Grains Crop Provisions, all malting barley acreage in the county insured under this endorsement will be considered as one basic unit regardless of whether such acreage is owned, rented for cash, or rented for a share of the crop. Your share in the malting barley acreage insured under this endorsement must be designated separately on the acreage report. For example, if you have 100 percent share in 50 acres and 75 percent share in 10 acres you must list the 50 acres separately from the 10 acres on your acreage report and include the percent share for each.

7. You must select a percentage of the additional value price on or before the sales closing date (you can select only one percentage even if more than one additional value price is applicable, and this percentage must be 100 percent or less). In the event you choose a percentage less than 100 percent of the additional value price, we will multiply that percentage by the additional value price specified in Option A or Option B, as applicable, to determine the additional value price applicable to this endorsement.

8. The additional premium amount for this coverage will be determined by multiplying your malting barley production guarantee (per acre) by your additional value price, by the premium rate, by the acreage planted to approved malting barley varieties, by your share at the time coverage begins. The premium rate you pay will be adjusted by a malting barley factor contained in the actuarial documents, as applicable.
9. In addition to the reporting requirements contained in section 6 of the Basic Provisions, you must provide all the information required by the Option you elect.

10. In accordance with section 14 of the Basic Provisions:
   (a) We will settle your claim within 30 days if all production:
      (1) Meets the quality criteria specified in section 14(a)(2) of this endorsement; or
      (2) Grades U.S. No. 4 or worse in accordance with the grades and grade requirements for the subclasses six-rowed and two-rowed barley, or for the class barley in accordance with the Official United States Standards for Grain; and
   (3) Is not accepted by a buyer for malting purposes;
   (b) Whenever any production fails one or more of the quality criteria specified in section 14(a)(2) of this endorsement and grades U.S. No. 3 or better, we will not agree upon the amount of loss until the earlier of:
      (1) The date you sell, feed, donate, or otherwise utilize such production for any purpose; or
      (2) May 31 of the calendar year immediately following the calendar year in which the insured malting barley is normally harvested. If you still retain any insured production on or after this date, we will:
      (i) Defer completion of your claim if you agree to such deferment; or
      (ii) If you do not agree to defer your claim, we will complete your claim; however, no adjustment for quality deficiencies will be made and all remaining unsold insured production will be considered to have met the quality standards specified in this endorsement.

11. This endorsement for malting barley does not provide prevented planting coverage. Such coverage is only provided in accordance with the provisions of the Small Grains Crop Provisions for feed barley.

12. Production from all acreage insured under this endorsement and any production of feed barley varieties must not be commingled prior to our making all determinations under section 14. Failure to keep production separate as required herein will result in denial of your claim for indemnity.

13. In the event of loss or damage covered by this endorsement, we will settle your claim by:
   (a) Multiplying the insured acreage by your malting barley production guarantee (per acre) determined in accordance with section 2 of Option A or Option B, as applicable;
   (b) Multiplying the result in section 13(a) by your respective additional value price per bushel;
   (c) Multiplying the number of bushels of production to count determined in accordance with section 14 by your additional value price per bushel (if more than one additional value price is applicable, the highest additional value price will be used until the number of bushels covered at the higher additional value price is reached and the remainder of the production will be multiplied by the lower additional value price. For example, if variety A is grown under a malting barley price agreement and 1000 bushels of variety A are insured using an additional value price of $0.68 per bushel but only 500 bushels of variety A are produced, the 500 bushels would be valued at $0.68 per bushel and all other production of other varieties will be valued at the lower additional value price unless such production is acceptable under the terms of the malting barley price agreement, in which case 500 bushels of the other varieties would also be valued at $0.68 per bushel);
   (d) Subtracting the result of section 13(c) from the result in section 13(b); and
   (e) Multiplying the result of section 13(d) by your share.

14. The amount of production to be counted against your malting barley production guarantee will be determined as follows:
   (a) Production to count will include all:
      (1) Appraised production determined in accordance with sections 11(c)(1)(i), (ii) and (iv) of the Small Grains Crop Provisions;
      (2) Harvested production and unharvested production that meets, or would meet if properly handled, either the acceptable percentage or parts per million standard contained in any applicable malting barley contract or malting barley price agreement for protein, plump kernels, thin kernels, germination, blight damaged, injured by mold, mold damaged, injured by sprout, injured by frost, frost damaged, and mycotoxins or other substances or conditions identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human health, or the following quality standards (additional or different quality standards may be specified or made available in the Special Provisions), whichever is less stringent:

<table>

217
(3) Harvested production that does not meet the quality standards contained in section 14(a)(2), but is accepted by a buyer. If the price received is less than the total of the additional value price and the feed barley projected price announced by FCIC, the production to count may be reduced or the values used to settle the claim may be adjusted in accordance with sections 14(b), (c), and (d).

(b) For the quantity of production that qualifies under section 14(a)(3), the amount of production to count will be determined by:

(1) Subtracting the projected price for feed barley from the sale price per bushel of the damaged production. If the sale price is less than the market value of the damaged production, the sale price will be the market value;

(2) Subtracting the weighted average cost per bushel for conditioning the production, if any, not to exceed the discount you would have received had you sold the barley without conditioning, for example, if the price per bushel of the production without conditioning is $2.80 and the price for such production after conditioning is $2.90, the discount is $0.10 and the cost of conditioning can not exceed $0.10 per bushel from the result of section 14(b)(1);

(3) Dividing the result of section 14(b)(1) or (2), as applicable, by 100 percent of the additional value price (The weighted average additional value price will be used in the event more than one additional value price is applicable, for example, if 1000 bushels of variety A are insured with an additional value price of $0.68 and 500 bushels are insured with an additional value price of $0.40, the weighted average additional value price would be $0.59); and

(4) Multiplying the result of section 14(b)(3) (if less than zero, no production will be counted; or, if more than 1,000, no adjustment will be made) by the number of bushels of damaged production.

(c) No reduction in the amount of production to count will be allowed for:

(1) Moisture content;

(2) Damage due to uninsured causes;

(3) Costs or reduced value associated with drying, handling, processing, or quality factors other than those contained in section 14(a)(2); or

(4) Any other costs associated with normal handling and marketing of malting barley.

(d) All grade and quality determinations must be based on the results of objective tests. No indemnity will be paid for any loss established by subjective tests. We may obtain one or more samples of the insured crop and have tests performed at an official grain inspection location established under the U.S. Grain Standards Act or laboratory of our choice to verify the results of any test. In the event of a conflict in the test results, our results will determine the amount of production to count.

OPTION A (FOR MALTING BARLEY PRODUCTION, REGARDLESS OF WHETHER GROWN UNDER A MALTING BARLEY CONTRACT OR PRICE AGREEMENT)

1. To be eligible for coverage under this option:

(a) You must provide us with acceptable records of your sales of malting barley and the number of acres planted to malting varieties for at least the four crop years in your APH database prior to the crop year immediately preceding the current crop year (for example, to determine your production guarantee for the 2011 crop year, records must be provided for the 2006 through the 2009 crop years, if malting barley varieties were planted in each of those crop years);

(1) Failure to provide acceptable records or reports as required herein will make you ineligible for coverage under this endorsement; and

(2) You must provide these records to us no later than the production reporting date specified in the Basic Provisions; and

(b) If you produce malting barley under a malting barley contract or malting barley price agreement, you must provide us with a copy of your current crop year contract or agreement on or before the acreage reporting date.

2. Your malting barley production guarantee (per acre) will be the lesser of:

(a) The production guarantee (per acre) for feed barley for acreage planted to approved malting varieties calculated in accordance with the Basic Provisions; or

(b) A yield per acre calculated by:

(1) Dividing the number of bushels of malting barley sold each year by the number of acres planted to approved malting barley varieties in each respective year;

(2) Adding the results of section 2(b)(1);
Federal Crop Insurance Corporation, USDA § 457.118

(3) Dividing the result of section 2(b)(2) by the number of years approved malting barley varieties were planted; and
(4) Multiplying the result of section 2(b)(3) by your coverage level.

3. The additional value price per bushel will be determined as follows:

(a) For production grown under a malting barley contract or a malting barley price agreement, the additional value price per bushel will be the following amount, as applicable:
   (1) The sale price per bushel established in the malting barley contract or malting barley price agreement (not including discounts or incentives that may apply) minus the projected price for barley;
   (2) The amount per bushel for malting barley (not including discounts or incentives that may apply) above a feed barley price that is determined at a later date, provided the method of determining the price is specified in the malting barley contract or malting barley price agreement; or
   (3) If your malting barley contract or malting barley price agreement has a variable price option, you must select a price or a method of determining a price that will be treated as the sale price and your additional value price per bushel will be calculated under section 3(a)(1) or (2), as applicable.

(b) The additional value price per bushel designated in the actuarial documents will be used if:
   (1) Production is not grown under a malting barley contract or malting barley price agreement; or
   (2) The malting barley contract or malting barley price agreement is not provided to us by the acreage reporting date.

(c) Under no circumstances will the additional value price exceed $1.25 per bushel.

(d) The number of bushels eligible for coverage using an additional value price determined in section 3(a) will be the lesser of:
   (1) The amount determined by multiplying the number of acres planted to an approved malting barley variety by your malting barley production guarantee (per acre) determined in accordance with section 2; or
   (2) The amount determined by multiplying the number of bushels specified in the malting barley contract or malting barley price agreement by your coverage level.

(e) Under no circumstances will the number of bushels determined in section 3(d) that will receive an additional value price determined in accordance with section 3(a) exceed the amount determined by multiplying 125 percent of the greatest number of acres that you certified for malting barley APH purposes in any crop year contained in your malting barley APH database by your malting barley production guarantee (per acre) determined in accordance with section 2. Any bushels in excess of this amount will be insured using the additional value price designated in the actuarial documents.

4. Loss Example

In accordance with section 13, your loss will be calculated as follows:

(a) Assume the following:
   (1) A producer has:
      (i) 400 acres of barley insured under the Small Grains Crop Provisions, of which 200 acres are planted to feed barley and 200 acres are planted to an approved malting barley variety;
      (ii) 100 percent share;
      (iii) A feed barley approved yield of 55 bushels per acre;
      (iv) A malting barley approved yield, based on malting barley sales records and the number of acres planted to approved malting barley varieties, of 52 bushels per acre;
      (v) Selected the 75 percent coverage level; and
   (v) The total production from the 200 acres of malting barley is 7,250 bushels, all of which fails to meet the quality standards specified in section 14(a) and in the malting barley price agreement.

(b) The additional value price per bushel from the actuarial documents is $0.40;

(c) In accordance with section 3(a)(1), the additional value price per bushel for production grown under a malting barley price agreement is $0.80 ($2.72 malting barley price agreement price minus $1.92 projected price); and

(d) The total production from the 200 acres of malting barley is 7,250 bushels, all of which fails to meet the quality standards specified in section 14(a) and in the malting barley price agreement.

(1) The sale price per bushel established in the malting barley contract or malting barley price agreement x .75 coverage level) malting barley production guarantee = $3,432.00 amount of insurance protection for the bushels grown under the malting barley price agreement;

(2) The additional value price per bushel for coverage using the additional value price from the actuarial documents (7,800 bushel total malting barley production guarantee - 4,290 bushels covered using the additional value price from the
Under Malting Barley Contracts

1. To be eligible for coverage under this option:
   (a) On or before the sales closing date, for at least one of the three crop years you planted malting barley immediately preceding the previous crop year:
      (1) You must have had a malting barley contract and produced and sold at least 7,500 bushels of 2009 crop year malting barley contract to produce 10,000 bushels of 2009 crop year malting barley and you had a malting barley contract for the current crop year; and
      (2) You must provide us a copy of your prior malting barley contract and acceptable records of sales of malting barley required to establish compliance with section 1(a)(1) of Option B;
   (b) The maximum amount of production that may be insured under Option B will be limited to the lesser of the amount of malting barley contained in the current crop year’s malting barley contract or 200 percent of the amount contracted for the crop year used to demonstrate compliance with section 1(a)(1) of Option B; and
   (c) In accordance with section 14, the total amount of production to count is determined as follows:
      (1) Damaged production that is not reconditioned:
         (i) $2.20 price per bushel - $1.92 projected price for feed barley = $0.28;
         (ii) $0.39 / $0.62 weighted average additional value price per bushel (4,836.00 total insurance protection x 7,800 bushel production guarantee = $0.62 weighted average additional value price) = 0.63; and
         (iii) 0.63 x 4,750 bushels of damaged production sold at $2.20 = 2,993 bushels of production to count;
      (2) Damaged production that is reconditioned:
         (i) $2.20 price per bushel - $1.92 projected price for feed barley = $0.28;
         (ii) $0.28 - $0.05 reconditioning cost = $0.23;
         (iii) $0.23 / $0.62 weighted average additional value price = 0.37; and
         (iv) 0.37 x 2,500 bushels of damaged production sold at $2.20 = 925 bushels of production to count; and
      (3) Total production to count is 3,918 bushels (2,993 + 925);
      (d) The value of production to count is $3,134.00 (3,918 bushels x $0.80 additional value price (all production to count is valued at the higher additional value price since the amount of production to count did not exceed the number of bushels covered at the higher additional value price)); and
      (e) The indemnity amount is $1,702.00 ($4,836.00 total amount of insurance protection for the unit - $3,134.00 value of production to count).

OPTION B (FOR PRODUCTION GROWN UNDER MALTING BARLEY CONTRACTS ONLY)

1. To be eligible for coverage under this option:
   (a) On or before the sales closing date, for at least one of the three crop years you planted malting barley immediately preceding the previous crop year:
      (1) You must have had a malting barley contract and produced and sold at least 7,500 bushels of 2009 crop year malting barley and you had a malting barley contract for the current crop year; and
      (2) You must provide us a copy of your prior malting barley contract and acceptable records of sales of malting barley required to establish compliance with section 1(a)(1) of Option B;
   (b) The maximum amount of production that may be insured under Option B will be limited to the lesser of the amount of malting barley contained in the current crop year’s malting barley contract or 200 percent of the amount contracted for the crop year used to demonstrate compliance with section 1(a)(1) of Option B; and
   (c) In accordance with section 14, the total amount of production to count is determined as follows:
      (1) Damaged production that is not reconditioned:
         (i) $2.20 price per bushel - $1.92 projected price for feed barley = $0.28;
         (ii) $0.39 / $0.62 weighted average additional value price per bushel (4,836.00 total insurance protection x 7,800 bushel production guarantee = $0.62 weighted average additional value price) = 0.63; and
         (iii) 0.63 x 4,750 bushels of damaged production sold at $2.20 = 2,993 bushels of production to count;
      (2) Damaged production that is reconditioned:
         (i) $2.20 price per bushel - $1.92 projected price for feed barley = $0.28;
         (ii) $0.28 - $0.05 reconditioning cost = $0.23;
         (iii) $0.23 / $0.62 weighted average additional value price = 0.37; and
         (iv) 0.37 x 2,500 bushels of damaged production sold at $2.20 = 925 bushels of production to count; and
      (3) Total production to count is 3,918 bushels (2,993 + 925);
      (d) The value of production to count is $3,134.00 (3,918 bushels x $0.80 additional value price (all production to count is valued at the higher additional value price since the amount of production to count did not exceed the number of bushels covered at the higher additional value price)); and
      (e) The indemnity amount is $1,702.00 ($4,836.00 total amount of insurance protection for the unit - $3,134.00 value of production to count).

Loss Example

In accordance with section 13, your loss will be calculated as follows:

(a) Assume the following:
Federal Crop Insurance Corporation, USDA

§ 457.119

(1) A producer has:

(i) 400 acres of barley insured under the Small Grains Crop Provisions, of which 200 acres are planted to feed barley and 200 acres are planted to an approved malting barley variety;

(ii) 100 percent share;

(iii) A feed barley approved yield of 55 bushels per acre;

(iv) A malting barley approved yield, based on contracted production and the number of acres planted to approved malting barley varieties of 52 bushels per acre;

(v) Selected the 75 percent coverage level; and

(vi) A malting barley contract for the sale of 10,000 bushels of malting barley at $2.60 per bushel;

(2) The projected price for feed barley is $1.92 per bushel;

(3) In accordance with section 3, the additional value price per bushel for production grown under the malting barley contract is $0.68 ($2.60 malting barley contract price minus $1.92 projected price); and

(4) The total production from the 200 acres of malting barley is 7,250 bushels, all of which fails to meet the quality standards specified in section 14(a) and in the malting barley contract:

(i) 4,750 bushels are sold for $2.31 per bushel; and

(ii) After conditioning at a cost of $0.05 per bushel, an additional 2,500 bushels are sold for $2.20 per bushel.

(b) In accordance with section 2, the amount of insurance protection is determined as follows:

(1) The lesser of 41.3 bushels per acre production guarantee (55 bushels x 75 percent coverage level) for feed barley or 37.5 bushels per acre (10,000 bushels contracted / 200 acres = 50.0 bushels per acre and 50.0 x 75 percent coverage level = 37.5);

(2) 37.5 bushels per acre x 200 acres = 7,500 bushels total malting barley production guarantee; and

(i) 7,500 bushels x $0.68 additional value price = $5,100.00 total amount of insurance protection for the unit;

(ii) In accordance with section 14, the total amount of production to count is determined as follows:

(1) Damaged production that is not reconditioned:

(i) $2.31 price per bushel - $1.92 projected price for feed barley = $0.39;

(ii) $0.39 / $0.68 additional value price = 0.57; and

(iii) 0.57 x 4,750 bushels of damaged production sold at $2.31 = 2,708 bushels of production to count; and

(2) Damaged production that is reconditioned:

(i) $2.20 price per bushel-$1.92 projected price for feed barley = $0.28;

(ii) $0.28-$0.05 reconditioning cost = $0.23; and

(iii) $0.23 / $0.68 additional value price = 0.34; and

(iv) 0.34 x 2,500 bushels of damaged production sold at $2.20 = 850 bushels of production to count; and

(3) Total production to count is 3,558 bushels (2,708 + 850); and

(d) The value of production to count is $2,419.00 (3,558 bushels x $0.68 additional value price); and

(e) The indemnity amount is $2,681.00 ($5,100.00 total amount of insurance protection for the unit - $2,419.00 value of production to count).

(75 FR 15883, Mar. 30, 2010)

§ 457.119 Texas citrus fruit crop insurance provisions.

The Texas citrus fruit crop insurance provisions for the 2000 and succeeding crop years are as follows:

United States Department of Agriculture

Federal Crop Insurance Corporation

Texas Citrus Fruit Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Crop. Specific groups of citrus fruit as listed in the Special Provisions.

Crop year. The period beginning with the date insurance attaches to the citrus crop and extending through the normal harvest time. It is designated by the calendar year following the year in which the bloom is normally set.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper, or buyer.

Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Excess rain. An amount of precipitation that damages the crop.

Excess wind. A natural movement of air that has sustained speeds exceeding 58 miles per hour recorded at the U. S. Weather Service reporting station operating nearest to the grove at the time of damage.

Freeze. The formation of ice in the cells of the tree, its blossoms, or its fruit caused by low air temperatures.

Harvest. The severance of mature citrus fruit from the tree by pulling, picking, or any other means, or by collecting marketable fruit from the ground.
Hedged. A process of trimming the sides of the citrus trees for better or more fruitful growth of the citrus fruit.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Local market price. The applicable citrus price per ton offered by buyers in the area in which you normally market the insured crop.

Production guarantee (per acre):
(a) First stage production guarantee. The second stage production guarantee multiplied by forty percent (40%).
(b) Second stage production guarantee. The quantity of citrus (in tons) determined by multiplying the yield determined in accordance with section 3 by the coverage level percentage you elect.

Ton. Two thousand (2,000) pounds avoirdupois.

Topped. A process of trimming the uppermost portion of the citrus trees for better and more fruitful growth of the citrus fruit.

Varieties. Subclasses of crops as listed in the Special Provisions.

2. Unit Division
(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by each citrus crop designated in the Special Provisions.
(b) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.
(c) Instead of establishing optional units by section, section equivalent, or FSA farm serial number, optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities
In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.6):
(a) You may select only one price election and coverage level for each citrus fruit crop designated in the Special Provisions that you elect to insure. The price election you choose for each crop need not bear the same percentage relationship to the maximum price offered by us for each crop. For example, if you choose one hundred percent (100%) of the maximum price election for early oranges, you may choose seventy-five percent (75%) of the maximum price election for late oranges. However, if separate price elections are available by variety within each crop, the price elections you choose within the crop must have the same percentage relationship to the maximum price offered by us for each variety within the crop.
(b) The production guarantee per acre is progressive by stage and increases at specific intervals to the final stage production guarantee. The stages and production guarantees per acre are:
(1) The first stage extends from the date insurance attaches through April 30 of the calendar year of normal bloom. The production guarantee will be forty percent (40%) of the yield calculated in section 3(e) multiplied by your coverage level.
(2) The second or final stage extends from May 1 of the calendar year of normal bloom until the end of the insurance period. The production guarantee will be the yield calculated in section 3(e) multiplied by your coverage level.
(3) Any acreage of citrus damaged in the first stage to the extent that the majority of producers in the area would not further maintain it will be limited to the first stage production guarantee even though you may continue to maintain it.
(d) In addition to the reported production, each crop year you must report by type:
(1) The number of trees damaged, topped, hedged, pruned or removed; any change in practices or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based; and the number of affected acres;
(2) The number of bearing trees on insurable and uninsurable acreage;
(3) The age of the trees and the planting pattern; and
(4) For the first year of insurance for acreage interplanted with another perennial crop, and anytime the planting pattern of such acreage is changed:
(i) The age of the interplanted crop, and type if applicable;
(ii) The planting pattern; and
(iii) Any other information that we request in order to establish your approved yield.

We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the following: interplanted perennial crop; removal, topping, hedging, or pruning of trees; damage; change in practices and any other circumstance on the yield potential of the insured crop. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee as necessary at any time we become aware of the circumstance.
(e) The yield used to compute your production guarantee will be determined in accordance with Actual Production History (APH) regulations, 7 CFR part 400, subpart G, and applicable policy provisions unless damage or changes to the grove or trees, require establishment of the yield by another method. In the event of such damage or changes, the yield will be based on our appraisal of the potential of the insured acreage for the crop year.
(f) Instead of reporting your citrus production for the previous crop year, as required by section 3 of the Basic Provisions (§457.6),
there is a one year lag period. Each crop year you must report your production from two crop years ago, e.g., on the 1998 crop year production report, you will provide your 1996 crop year production.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§457.8), the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§457.8), the cancellation and termination dates are November 20.

6. Annual Premium

In lieu of the premium computation method in section 7 (Annual Premium) of the Basic Provisions (§457.8), the annual premium amount is computed by multiplying the second stage production guarantee per acre by the price election, the premium rate, the insured acreage, your share at the time coverage begins, and by any applicable premium adjustment percentages contained in the Special Provisions.

7. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§457.8), the crop insured will be all the acreage in the county of each citrus crop designated in the Special Provisions that you elect to insure and for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That are adapted to the area;
(c) That are irrigated;
(d) That has produced an average yield of at least three tons per acre the previous year, or we have appraised the yield potential of at least three tons per acre;
(e) That is grown in a grove that, if inspected, is considered acceptable by us; and
(f) That is not sold by direct marketing, unless allowed by the Special Provisions or by written agreement.

8. Insurable Acreage

In lieu of the provisions in section 9 (Insurable Acreage) of the Basic Provisions (§457.8), that prohibit insurance attaching to a crop planted with another crop, citrus interplanted with another perennial crop is insurable unless we inspect the acreage and determine it does not meet the requirements contained in your policy.

9. Insurance Period

(a) In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(1) Coverage begins on November 21 of each crop year, except that for the year of application, if your application is received after November 11 but prior to November 21, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10 day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the grove.

(2) The calendar date for the end of the insurance period for each crop year is the second May 31st of the crop year.

(b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(1) If you acquire an insurable share in any insurable acreage after coverage begins, but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.

(2) If you relinquish your insurable share on any insurable acreage of citrus on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium will be due, and no indemnity paid for such acreage for that crop year unless:

(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

10. Causes of Loss

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Excess rain;
(2) Excess wind;
(3) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the grove;
(4) Freeze;
(5) Hail;
(6) Tornado;
(7) Wildlife; or
(8) Failure of the irrigation water supply if caused by an insured peril or drought that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§457.8), we will not insure against damage or loss of production due to:

(1) Disease or insect infestation, unless a cause of loss specified in section 19(a):
§ 457.119

11. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§ 457.8), the following will apply:

(a) If the Special Provisions permit or a written agreement authorizing direct marketing exists, you must notify us at least 15 days before any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine your production to count for production that is sold by direct marketing. If damage occurs after this appraisal, we will conduct an additional appraisal. These appraisals, and any acceptable records provided by you, will be used to determine your production to count. Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count of not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.

(b) If you intend to claim an indemnity on any unit, you must notify us before beginning to harvest any damaged production so we may have an opportunity to inspect it. You must not sell or dispose of the damaged crop until after we have given you written consent to do so. If you fail to meet the requirements of this section all such production will be considered undamaged and included as production to count.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide acceptable production records:

(1) For any optional unit, we will combine all optional units for which such production records were not provided; or

(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim on a unit basis by:

(1) Multiplying the insured acreage for each crop, or variety if applicable, by its respective production guarantee (see sections 1 and 3);

(2) Multiplying the results of section 12(b)(1) by the respective price election for each crop or variety, if applicable;

(3) Totaling the results of section 12(b)(2);

(4) Multiplying the total production to count of each variety, if applicable (see section 12(c)) by the respective price election;

(5) Totaling the results of section 12(b)(4);

(6) Subtracting this result of section 12(b)(5) from the result of section 12(b)(3); and

(7) Multiplying the result of section 12(b)(6) by your share.

(c) The total production to count (in tons) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(A) Not less than the production guarantee per acre for acreage:

(i) That is abandoned;

(ii) For which you fail to provide acceptable production records;

(iii) That is damaged solely by uninsured causes; or

(iv) From which production is sold by direct marketing, if direct marketing is specifically permitted by the Special Provisions or a written agreement, and you fail to meet the requirements contained in section 11;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production; and

(iv) Potential production on insured acreage you intend to abandon or no longer care for, if you and we agree on the appraised amount of production to count of not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.

(d) Any citrus fruit that is not marketed as fresh fruit and, due to uninsured causes, does not contain 120 or more gallons of juice per ton, will be adjusted by:

(1) Dividing the gallons of juice per ton obtained from the damaged citrus by 120; and

(2) Multiplying the result by the number of tons of such citrus.

If individual records of juice content are not available, an average juice content from the nearest juice plant will be used, if available. If not available, a field appraisal will be made to determine the average juice content.
(e) Where the actuarial documents provide, and you elect, the fresh fruit option, citrus fruit that is not marketable as fresh fruit due to insurable causes will be adjusted by:

(1) Dividing the value per ton of the damaged citrus by the price of undamaged citrus fruit; and

(2) Multiplying the result by the number of tons of such citrus fruit. The applicable price for undamaged citrus fruit will be the local market price the week before damage occurred.

(f) Any production will be considered marketed or marketable as fresh fruit unless, due solely to insured causes, such production was not marketed as fresh fruit.

(g) In the absence of acceptable records of disposition of harvested citrus fruit, the disposition and amount of production to count for the unit will be the guarantee on the unit.

(h) Any citrus fruit on the ground that is not harvested will be considered totally lost if damaged by an insured cause.

13. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

United States Department of Agriculture

Federal Crop Insurance Corporation

Arizona-California Citrus Crop Provisions

1. Definitions

Citrus fruit commodity. Citrus fruit as follows:

(1) Oranges;
(2) Lemons;
(3) Grapefruit;
(4) Mandarins/Tangerines;
(5) Tangelos; and
(6) Any other citrus fruit commodity designated in the actuarial documents.

Citrus fruit group. A designation in the Special Provisions used to identify commodity types within a citrus fruit commodity that may be grouped together for the purposes of electing coverage levels and identifying the insured crop.

Commodity type. A specific subgroup of a citrus fruit commodity having a characteristic or set of characteristics distinguishable from other subgroups of the same citrus fruit commodity.

Crop year. The period beginning with the date insurance attaches to the insured crop and extending through normal harvest time. It is designated by the calendar year following the year in which the bloom is normally set.

Dehorning. Cutting of any scaffold limb to a length that is not greater than one-fourth (1/4) the height of the tree before cutting.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the insured crop.

Graft. To unite a bud or scion with a rootstock or interstock in accordance with recommended practices to form a living union.

Harvest. The severance of mature citrus from the tree by pulling, picking, or any other means, or by collecting marketable fruit from the ground.

Interplanted. Acreage on which two or more agricultural commodities are planted in any form of alternating or mixed pattern.

Interstock. The area of the tree that is grafted to the rootstock.
§ 457.121 7 CFR Ch. IV (1-1-14 Edition)

Rootstock. The root and stem portion of a tree to which a scion can be grafted.

Scaffold limb. A major limb attached directly to the trunk.

Scion. A detached living portion of a plant joined to a rootstock or interstock in grafting.

Set out. Transplanting a tree into the grove.

Topwork. Grafting a scion onto a pruned scaffold limb.

2. Unit Division

(a) Basic units will be established in accordance with section 1 of the Basic Provisions.

(b) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Unless otherwise allowed by written agreement, optional units may only be established if each optional unit meets one or more of the following:

(1) The optional unit is located on non-contiguous land; and

(2) In addition to or instead of establishing optional units by non-contiguous land, optional units may be established by commodity type if allowed by the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 of the Basic Provisions, you may select only one price election and coverage level for each citrus fruit group you elect to insure. The price election you choose for each citrus fruit group need not bear the same percentage relationship to the maximum price offered by us for each citrus fruit group. For example, if you choose one hundred percent (100%) of the maximum price election for the citrus fruit group for Valencias oranges, you may choose seventy-five percent (75%) of the maximum price election for the citrus fruit group for Navel oranges. However, if separate price elections are available by commodity type within each citrus fruit group, the price elections you choose for each commodity type must have the same percentage relationship to the maximum price offered by us for each commodity type within the citrus fruit group.

(b) In lieu of reporting your citrus production of marketable fresh fruit for the previous crop year, as required by section 3 of the Basic Provisions (§457.8), there is a lag period of one year. Each crop year, you must report your production from two crop years ago, e.g., on the 2015 crop year production report, you will provide your 2013 crop year production.

(c) In addition, you must report, by the production reporting date designated in section 3 of the Basic Provisions (§457.8), by commodity type, if applicable:

(1) The number of trees damaged, dehorned or removed; any change in practices or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based; and the number of affected acres;

(2) The number of bearing trees on insurable and uninsurable acreage;

(3) The age of the trees and the planting pattern; and

(4) For the first year of insurance for acreage interplanted with another perennial agricultural commodity and any time the planting pattern of such acreage is changed:

(i) The age of the interplanted agricultural commodity and commodity type, if applicable;

(ii) The planting pattern; and

(iii) Any other information that we request in order to establish your approved yield.

(d) We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of any situation listed in section 3(c) that may occur. If you fail to notify us of any situation in section 3(c), we will reduce your production guarantee as necessary, at any time we become aware of the circumstance. If the situation in 3(c) occurred:

(1) Before the beginning of the insurance period, the yield used to establish your production guarantee will be reduced for the current crop year regardless of whether the situation was due to an insured or uninsured cause of loss;

(2) After the beginning of the insurance period and you notify us by the production reporting date, the yield used to establish your production guarantee will be reduced for the current crop year only if the potential reduction in the yield used to establish your production guarantee is due to an uninsured cause of loss; or

(3) After the beginning of the insurance period and you fail to notify us by the production reporting date, an amount equal to the reduction in the yield will be added to the production to count calculated in section 1(c) due to uninsured causes. We may reduce the yield used to establish your production guarantee for the subsequent crop year to reflect any reduction in the productive capacity of the trees.

4. Contract Changes

In accordance with section 4 of the Basic Provisions (§457.8), the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions (§457.8), the cancellation and termination dates are November 20.
Federal Crop Insurance Corporation, USDA

§ 457.121

6. Insured Crop

In accordance with section 8 of the Basic Provisions, the insured crop will be all the acreage in the county of each citrus fruit group you elect to insure and for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That is grown on rootstock and trees adapted to the area;
(c) That is irrigated;
(d) That is grown in a grove that, if inspected, is considered acceptable by us;
(e) That is not sold by direct marketing, unless allowed by the Special Provisions or by written agreement; and
(f) That, unless otherwise provided in the Special Provisions or if we inspect and approve a written agreement to insure such acreage, is grown on trees that have reached at least:
   (1) The sixth growing season after being set out; or
   (2) The fifth growing season after topwork or grafting, if topwork or grafting occurs after set out.

7. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions that prohibit insurance attaching to interplanted acreage, citrus interplanted with another perennial agricultural commodity is insurable unless we inspect the acreage and determine it does not meet the requirements contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions (§ 457.8):
   (1) Coverage begins on November 21 of each crop year, except that for the year of application, if your application is received after November 11 but prior to November 21, insurance will attach on the 10th day after your properly completed application is received in our local office unless we inspect the acreage during the 10-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the insured crop or to determine the condition of the grove.
   (2) The calendar date for the end of the insurance period for each crop year is:
      (i) August 31 for:
         (A) Navel oranges; and
         (B) Lemons in the Southern California counties of Imperial, Orange, Riverside, San Bernardino, San Diego, and Ventura;
      (ii) November 20 for Valencia oranges; and
      (iii) July 31 for lemons in all other counties and for all other citrus fruit commodities.
(b) In addition to the provisions of section 11 of the Basic Provisions (§ 457.8):
   (1) If you acquire an insurable share in any insurable acreage after coverage begins, but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.
   (2) If you relinquish your insurable share on any insurable acreage of citrus on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to and no premium will be due, and no indemnity paid, for such acreage for that crop year unless:
      (i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;
      (ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and
      (iii) The transferee is eligible for crop insurance.

9. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions (§ 457.8), insurance is provided only against the following causes of loss that occur during the insurance period:
   (1) Adverse weather conditions;
   (2) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the grove;
   (3) Wildlife;
   (4) Earthquake;
   (5) Volcanic eruption;
   (6) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period;
   (7) Insects, but not damage due to insufficient or improper application of pest control measures; or
   (8) Plant disease, but not damage due to insufficient or improper application of disease control measures.
(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to the inability to market the citrus for any reason other than actual physical damage from an insurable cause of loss specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

10. Duties in the Event of Damage or Loss

(a) In accordance with the requirements of section 14 of the Basic Provisions, you must leave representative samples. In lieu of section 14(c)(3) of the Basic Provisions, we will determine which trees must remain unharvested as your representative sample so that we may inspect them in accordance with procedures.
§ 457.121

(b) In addition to the requirements of section 14 of the Basic Provisions (§ 457.8), the following will apply:

(1) If the Special Provisions permit or a written agreement authorizing direct marketing exists, you must notify us at least 15 days before any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine your production to count for production that is sold by direct marketing. If damage occurs after this appraisal, we will conduct an additional appraisal. These appraisals, and any acceptable records provided by you, will be used to determine your production to count. Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count of not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.

(2) If you intend to claim an indemnity on any unit, you must notify us at least 15 days prior to the beginning of harvest or immediately if damage is discovered during harvest so that we may have an opportunity to inspect unharvested trees. You must not sell or dispose of the damaged insured crop until after we have given you written consent to do so. If you fail to meet the requirements of this section, all such production will be considered undamaged and included as production to count.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide acceptable production records:

(1) For any optional unit, we will combine all optional units for which such production records were not provided; or

(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) All appraised production as follows:

(i) Not less than the production guarantee per acre for acreage:

(A) That is abandoned;

(B) For which you fail to provide acceptable production records;

(C) That is damaged solely by uninsured causes; or

(D) From which production is sold by direct marketing, if direct marketing is specifically permitted by the Special Provisions or a written agreement, and you fail to meet the requirements contained in section 10;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production determined to be marketable as fresh packed fruit; and

(iv) Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the insured crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the insured crop, in which case we will use the harvested production. If you do not continue to care for the insured crop, our appraisal made prior to deferring the claim will be used to determine the production to count;

(2) All harvested production marketed as fresh packed fruit from the insurable acreage; and

(3) All citrus that was disposed of or sold without an inspection or written consent.

(d) Any production will be considered marketed or marketable as fresh packed fruit unless, due solely to insured causes, such production was not marketed or marketable as fresh packed fruit.

(e) Citrus that cannot be marketed as fresh packed fruit due to insurable causes will not be considered production to count.

(f) If you elect the frost protection option and we determine that frost protection equipment, as specified in the Special Provisions, was not properly utilized or not properly reported, the indemnity for the unit will be reduced by the percentage of premium reduction allowed for frost protection equipment. You must, at our request, provide us records showing the start-stop times by date for each period the frost protection equipment was used.

12. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

§ 457.122 Walnut crop insurance provisions.

The Walnut Crop Insurance Provisions for the 2008 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Walnut Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Harvest. Removal of the walnuts from the orchard.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Net delivered weight. Delivered weight (pounds) of dry, hulled, in-shell walnuts, excluding foreign material.

Pound. A unit of weight equal to 16 ounces avoirdupois.

Production guarantee (per acre). The number of pounds (whole in-shell walnuts), determined by multiplying the approved APH yield per acre by the coverage level percentage you elect.

2. Unit Division

Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units may be established only if each optional unit is located on non-contiguous land, unless otherwise allowed by written agreement.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions (§457.8):

(a) You may select only one price election for all the walnuts in the county insured under this policy unless the Special Provisions provide different price elections by variety or varietal group, in which case you may select one price election for each walnut variety or varietal group designated in the Special Provisions. The price elections you choose for each variety or varietal group must have the same percentage relationship to the maximum price offered by us for each variety or varietal group. For example, if you choose 100 percent of the maximum price election for a specific variety or varietal group, you must also choose 100 percent of the maximum price election for all other varieties or varietal groups.

(b) You must report, by the production reporting date designated in section 3 of the Basic Provisions (§457.8), by variety or varietal group if applicable:

(1) Any damage, removal of trees, change in practices, or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres;

(2) The number of bearing trees on insurable and uninsurable acreage;

(3) The age of the trees and the planting pattern;

(4) For the first year of insurance for acre-age interplanted with another perennial crop, and anytime the planting pattern of such acreage is changed, the age of the crop that is interplanted with the walnuts, and type if applicable, and the planting pattern; and

(5) Any other information that we request in order to establish your approved yield.

We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the following: interplanted perennial crop; removal of trees; damage; change in practices and any other circumstance on the yield potential of the insured crop. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee as necessary at any time we become aware of the circumstances.

(c) You may not increase your elected or assigned coverage level or the ratio of your price election to the maximum price election if a cause of loss that could or would reduce the yield of the insured crop has occurred prior to the time that you request the increase.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change dates are October 31 for California and August 31 preceding the cancellation date for all other states.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are January 31 for California and November 20 for all other states.

6. Insured Crop

In accordance with section 8 of the Basic Provisions (§457.8), the crop insured will be all the commercially grown English Walnuts.
(excluding black walnuts) in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That are grown on tree varieties that:
   (1) Were commercially available when the trees were set out;
   (2) Are adapted to the area; and
   (3) Are grown on a root stock that is adapted to the area;
(c) That are grown in an orchard that, if inspected, are considered acceptable by us;
(d) On acreage where at least 90 percent of the trees have reached at least the seventh growing season after being set out, unless otherwise provided in the Special Provisions.
(e) That are in a unit that consists of at least five acres, unless we agree in writing to insure a smaller unit.

7. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions (§ 457.8), that prohibit insurance attaching to a crop planted with another crop, walnuts interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions:
   (1) Coverage begins on February 1 in California and November 21 in all other states of each crop year, except that for the year of application, if your application is received after January 22 but prior to February 1 in California or after November 11 but prior to November 21 in all states, insurance will attach for the crop year, and after an inspection we consider the acreage acceptable, insurance will be due for such acreage on the calendar date for the beginning of the insurance period. Acreage acquired after the acreage reporting date will not be insured.
   (2) If you relinquish your insurable share on any insurable acreage of walnuts on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:
      (i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;
      (ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and
      (iii) The transferee is eligible for crop insurance.

9. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions (§ 457.8), insurance is provided only against the following causes of loss that occur during the insurance period:
   (1) Adverse weather conditions;
   (2) Fire, unless weeds and undergrowth have not been controlled or pruning debris has not been removed from the orchard;
   (3) Insects, but not damage due to insufficient or improper application of pest control measures;
   (4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
   (5) Wildlife;
   (6) Earthquake;
   (7) Volcanic eruption; or
   (8) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period.
(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), we will not insure against any damage or loss of production due to the inability to market the walnuts for any reason other than actual physical damage to the walnuts from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott,
or refusal of any person to accept produc-

tion.

10. Duties in the Event of Damage or Loss

(a) In addition to the requirements of sec-
tion 14 of the Basic Provisions, if you intend

to claim an indemnity on any unit:

(1) You must notify us prior to the begin-
ning of harvest so that we may inspect the

damaged production;

(2) You must give notice when knowledge

is obtained of any mold damage or 15 days

prior to harvest so that we may inspect the

mold damaged production; and

(3) You must not sell or dispose of the dam-
aged crop until we have given you written

consent to do so.

(b) If you fail to meet the requirements of

this section, all such production will be con-

sidered undamaged and included as produc-

tion to count.

11. Settlement of Claim

(a) We will determine your loss on a unit

basis. In the event you are unable to provide

separate acceptable production records:

(1) For any optional units, we will combine

all optional units for which such production

records were not provided; or

(2) For any basic units, we will allocate

any commingled production to such units in

proportion to our liability on the harvested

acreage for the units.

(b) In the event of loss or damage covered

by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by the

respective production guarantee;

(2) Multiplying each result in section

11(b)(1) by the respective price election for

each variety or varietal group;

(3) Totaling the results in section 11(b)(2);

(4) Multiplying the total production to be

counted of each variety or varietal group, if

applicable, (see section 11(c)) by the respec-

tive price election;

(5) Totaling the results in section 11(b)(4);

(6) Subtracting the result in section

11(b)(5) from the result in section 11(b)(3); and

(7) Multiplying the result in section 11(b)(6)

by your share.

For example:

You have a 100 percent share in 100 acres of

walnuts in the unit, with a guarantee of 2,500

pounds per acre and a price election of $0.61

per pound. You are only able to harvest

200,000 pounds. Your indemnity would be cal-
culated as follows:

(1) 100 acres x 2,500 pounds = 250,000 pound

insurance guarantee;

(2 & 3) 250,000 pounds x $0.61 price election

= $152,500 total value of insurance guarantee;

(4 & 5) 200,000 pounds production to count x

$0.61 price election = $122,000 total value of

production to count;

(6) $152,500 total value guarantee — $122,000

total value of production to count = $30,500

loss; and

(7) $30,500 x 100 percent share = $30,500 in-
demnity payment.

c) The total production to count (whole

in-shell pounds) from all insurable acreage

on the unit will include:

(1) All appraised production as follows:

(i) Not less than the production guarantee

per acre for acreage:

(A) That is abandoned;

(B) That is damaged solely by uninsured

causes; or

(C) For which you fail to provide accept-

able production records;

(ii) Production lost due to uninsured

causes;

(iii) Unharvested production; and

(iv) Potential production on insured acre-

age that you intend to abandon or no longer

care for, if you and we agree on the appraised

amount of production. Upon such agreement,

the insurance period for that acreage will

end. If you do not agree with our appraisal,

we may defer the claim only if you agree to

continue to care for the crop. We will then

make another appraisal when you notify us

of further damage or that harvest is general

in the area unless you harvested the crop, in

which case we will use the harvested produc-

tion. If you do not continue to care for the

crop, our appraisal made prior to deferring

the claim will be used to determine the pro-
duction to count; and

(2) All harvested production from the in-
surable acreage.

d) Mature walnut production damaged due

to an insurable cause of loss which occurs

within the insurance period may be adjusted

for quality based on an inspection by the

Dried Fruit Association or during our loss

adjustment process. Walnut production that

has mold damage greater than 8 percent,

based on the net delivered weight, will be re-
duced by the quality adjustment factors con-
tained in the Special Provisions. Walnut pro-
duction that exceeds 30 percent mold damage

and will not be sold, the production to count

will be zero.

12. Late and Prevented Planting

The late and prevented planting provisions

of the Basic Provisions are not applicable.

FR 65170, Dec. 10, 1997; 65 FR 47837, Aug. 4,

2000; 72 FR 10909, Mar. 12, 2007]

§ 457.123 Almond Crop Insurance Provi-
sions.

The Almond Crop Insurance Provi-
sions for the 2008 and succeeding crop

years are as follows:

FCIC Policies
Basic Provisions (§457.8), by type if applicable:

1. Any damage, removal of trees, change in practices, or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres;

2. The number of bearing trees on insurable and uninsurable acreage;

3. The age of the trees and the planting patterns;

4. For the first year of insurance for acreage interplanted with another perennial crop, and anytime the planting pattern of such acreage is changed, the age of the crop that is interplanted with the almonds, and type if applicable, and the planting pattern;

5. Any other information that we request in order to establish your approved yield.

We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the following: interplanted perennial crop; removal of trees; damage; change in practices and any other circumstance on the yield potential of the insured crop. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee as necessary at any time we become aware of the circumstance.

(c) You may not increase your elected or assigned coverage level or the ratio of your price election to the maximum price election if a cause of loss that would or could reduce the yield of the insured crop has occurred prior to the time that you request the increase.

4. Contract Changes

In accordance with section 4 of the Basic Provisions (§457.8), the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions (§457.8), the cancellation and termination dates are December 31.

6. Insured Crop

In accordance with section 8 of the Basic Provisions (§457.8), the crop insured will be all the almonds in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share unless allowed otherwise by section 8(b);

(b) That are grown for harvest as almonds;

(c) That are irrigated;

(d) That are grown in an orchard that, if inspected, is considered acceptable to us; and

(e) On acreage where at least 90 percent of the trees have reached at least the sixth growing season after being set out, unless otherwise provided in the Special Provisions.
Federal Crop Insurance Corporation, USDA § 457.123

7. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions (§ 457.8), that prohibit insurance attaching to a crop planted with another crop, almonds interplanted with another perennial crop are insurable unless we inspect and determine that it does not meet the requirements contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions (§ 457.8):

(1) Coverage begins on January 1 of each crop year, except that for the year of application, if your application is received after December 21, but prior to January 1, insurance will attach on the 10th day after your application is received in our local office unless we inspect the acreage during the 10 day period and determine that it does not meet insurability requirements.

(b) In addition to the provisions of section 11 of the Basic Provisions (§ 457.8), if you acquire an insurable share in any crop year, it is completed by all affected parties;

(c) In addition to the provisions of section 11 of the Basic Provisions (§ 457.8), if you relinquish your insurable share on or before the acreage reporting date for the crop year, insurance will not be considered for such crop year unless:

(i) A transfer of coverage and right to an indemnity will be due for such acreage for that crop year unless:

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Earthquake;

(6) Volcanic eruption;

(7) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period, or

(8) Wildlife, unless control measures have not been taken.

(b) In addition to the provisions of section 11 of the Basic Provisions (§ 457.8), we will not insure against damage or loss of production due to the inability to market the almonds for any reason other than actual physical damage to the almonds from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

10. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 of the Basic Provisions (§ 457.8), if you intend to claim an indemnity on any unit, you must notify us prior to the beginning of harvest so that we may inspect the damaged production. You must not sell or dispose of the damaged crop until after we have given you written consent to do so. If you fail to meet the requirements of this section, all such production will be considered undamaged and included as production to count.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
(l) For any optional units, we will combine all optional units for which such production records were not provided; or
(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insured acreage by its respective production guarantee;
(2) Multiplying each result in section 11(b)(1) by the respective price election for the type;
(3) Totaling the results in section 11(b)(2);
(4) Multiplying the total production to be counted of each type, if applicable, (see subsection 11(c)) by the respective price election;
(5) Totaling the results in section 11(b)(4);
(6) Subtracting the result in section 11(b)(5) from the result in section 11(b)(3); and
(7) Multiplying the result in section 11(b)(6) by your share.

For example:
You have a 100 percent share in 100 acres of almonds in the unit, with a guarantee of 1,200 pounds per acre and a price election of $1.70 per pound. You are only able to harvest 100,000 pounds. Your indemnity would be calculated as follows:

1. Definitions

Crop year. In lieu of the definition of “Crop year” contained in section 1 of the Basic Provisions (§457.8), the calendar year in which the raisins are placed on trays for drying.
Delivered ton. A ton of raisins delivered to a packer, processor, buyer or a reconditioner, before any adjustment for U. S. Grade B and better maturity standards, and after adjustments for moisture over 16 percent and substandard raisins over 5 percent.

RAC. The Raisin Administrative Committee, which operates under an order of the United States Department of Agriculture (USDA).
Raisins. The sun-dried fruit of varieties of grapes designated insurable by the actuarial documents. These grapes will be considered raisins for the purpose of this policy when laid on trays in the vineyard to dry.

§457.124 Raisin crop insurance provisions.

The raisin crop insurance provisions for the 1998 and succeeding crop years are as follows:
FCIC Policies
DEPARTMENT OF AGRICULTURE
Federal Crop Insurance Corporation

Reinsured Policies
(Appropriate title for insurance provider)
Both FCIC and Reinsured Policies

Raisin Crop Provisions
If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

"Crop year." In lieu of the definition of “Crop year” contained in section 1 of the Basic Provisions (§457.8), the calendar year in which the raisins are placed on trays for drying.
"Delivered ton." A ton of raisins delivered to a packer, processor, buyer or a reconditioner, before any adjustment for U. S. Grade B and better maturity standards, and after adjustments for moisture over 16 percent and substandard raisins over 5 percent.
"RAC." The Raisin Administrative Committee, which operates under an order of the United States Department of Agriculture (USDA).
"Raisins." The sun-dried fruit of varieties of grapes designated insurable by the actuarial documents. These grapes will be considered raisins for the purpose of this policy when laid on trays in the vineyard to dry.
Federal Crop Insurance Corporation, USDA § 457.124

Reference maximum dollar amount. The value per ton established by FCIC and shown in the actuarial documents.

Substandard. Raisins that fail to meet the requirements of U.S. Grade C, or layer (cluster) raisins with seeds that fail to meet the requirements of U.S. Grade B.

Table grapes. Grapes grown for commercial sale as fresh fruit or for processing where appropriate cultural practices were followed.

Ton. Two thousand (2,000) pounds avoirdupois.

Tonnage report. A report used to annually report, by unit, all the tons of raisins produced in the county in which you have a share.

2. Unit Division

(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by grape variety.

(b) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units may be established only if each optional unit is located on non-contiguous land, unless otherwise allowed by written agreement.

3. Amounts of Insurance and Production Reporting

In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8):

(a) You may select only one coverage level percentage for all the raisins in the county insured under this policy.

(b) The amount of insurance for the unit will be determined by multiplying the insured tonnage by the reference maximum dollar amount, by the coverage level percentage you elect, and by your share.

(c) Insured tonnage is determined as follows:

(1) For units not damaged by rain—The delivered tons; or

(2) For units damaged by rain—By adding the delivered tons to any verified loss of production due to rain damage. When production from a portion of the acreage within a unit is removed from the vineyard and production from the remaining acreage is lost in the vineyard, the amount of production lost in the vineyard will be determined based on the number of tons of raisins produced on the acreage from which production was removed. When no production has been removed from the vineyard, the amount of production lost in the vineyard will be determined based on an appraisal.

(3) Insured tonnage will be adjusted as follows:

(i) The insured tonnage will be reduced 0.12 percent for each 0.10 percent of moisture in excess of 16.0 percent. For example, 10.0 tons of raisins containing 18.0 percent moisture will be reduced to 9.760 tons of raisins;

(ii) Insured tonnage used for dry edible fruit will be reduced by 0.10 percent for each 0.10 percent of substandard raisins in excess of 5.0 percent; and

(iii) When raisins contain moisture in excess of 24.3 percent at the time of delivery and are released for a use other than dry edible fruit (e.g. distillery material), they will be considered to contain 24.3 percent moisture.

(d) If any raisins are delivered, the moisture content will be determined at the time of delivery.

(e) Section 3(c) of the Basic Provisions is not applicable to this crop.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§ 457.8), the contract change date is April 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation and Termination) of the Basic Provisions (§ 457.8), the cancellation and termination dates are July 31.

6. Acreage Report and Tonnage Report

In lieu of the provisions contained in section 6 of the Basic Provisions (§ 457.8):

(a) You must report by unit, and on our form, the acreage on which you intend to produce raisins for the crop year. This acreage report must be submitted to us on or before the sales closing date, and contain the following information:

(1) All acreage of the crop (insurable and non-insurable) in which you will have a share;

(2) Your anticipated share at the time coverage will begin;

(3) The variety; and

(4) The location of each vineyard.

(b) Acreage of the crop acquired after the acreage was reported, may be included on the acreage report if we agree to accept the additional acreage. Such additional acreage will not be added to the acreage report after you first place raisins from the additional acreage on trays for drying. Failure to report any acreage in which you have a share will result in denial of liability. If you elect not to produce raisins on any part of the acreage included on your acreage report, you must notify us in writing on or before September 21, and provide any records we may require to verify that raisins were not produced on that acreage.

(c) If you fail to file an acreage report in a timely manner, or if the information reported is incorrect, we may deny liability on any unit.
§ 457.124

(d) In addition to the acreage report, you must annually submit a tonnage report, on our form, which includes by unit the number of delivered tons of raisins, and, if damage has occurred, the amount of any tonnage we determined was lost due to rain damage in the vineyard for each unit designated in the acreage report. 

(e) The tonnage report must be submitted to us as soon as the information is available, but not later than March 1 of the year following the crop year. Indemnities may be determined on the basis of information you submitted on this report. If you do not submit this report by the reporting date, we may, at our option, either determine the insured tonnage and share by unit or we may deny liability on any unit. This report may be revised only upon our approval. Errors in reporting units may be corrected by us at any time we discover the error.

7. Annual Premium

In lieu of the premium computation method contained in section 7 (Annual Premium) of the Basic Provisions (§ 457.8), the annual premium amount is determined by multiplying the amount of insurance for the unit at the time insurance attaches by the premium rate and then multiplying that result by any applicable premium adjustment factors that may apply.

8. Insured Crop

(a) In accordance with section 8 (Insured Crop) of the Basic Provisions (§ 457.8), the crop insured will be all the raisins in the county of grape varieties for which a premium rate is provided by the actuarial documents and in which you have a share.

(b) In addition to the raisins not insurable under section 8 (Insured Crop) of the Basic Provisions (§ 457.8), we do not insure any raisins:

(1) Laid on trays after September 8 in vineyards with north-south rows in Merced or Stanislaus Counties, or after September 20 in all other counties;

(2) From table grape strippings; or

(3) From vines that received manual, mechanical, or chemical treatment to produce table grape sizing.

9. Insurance Period

In lieu of the provisions of section 11 (Insurance Period) of the Basic Provisions (§ 457.8), insurance attaches on each unit at the time the raisins are placed on trays for drying and ends the earlier of:

(a) October 20;

(b) The date the raisins are removed from the trays;

(c) The date the raisins are removed from the vineyard;

(d) Total destruction of all raisins on a unit;

(e) Final adjustment of a loss on a unit; or

(f) Abandonment of the raisins.

10. Causes of Loss

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), insurance is provided only against unavoidable loss of production resulting from rain that occurs during the insurance period and while the raisins are on trays or in rolls in the vineyard for drying.

(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), we will not insure against damage or loss of production due to inability to market the raisins for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of a person to accept production.

11. Reconditioning Requirements and Payment

(a) We may require you to recondition a representative sample of not more than 10 tons of damaged raisins to determine if they meet standards established by the RAC once reconditioned. If such standards are met, we may require you to recondition all the damaged production. If we determine that it is possible to recondition any damaged production and, if you do not do so, we will value the damaged production at the reference maximum dollar amount, except if your damaged production undergoes a USDA inspection and is stored by your packer with other producer’s production to be reconditioned at a later date. If we agree, in writing, that it is not practical to recondition the damaged production, we will determine the number of tons meeting RAC standards that could be obtained if the production were reconditioned.

(b) If the representative sample of raisins that we require you to recondition does not meet RAC standards for marketable raisins after reconditioning, the reconditioning payment will be the actual cost you incur to recondition the sample, not to exceed an amount that is reasonable and customary for such reconditioning, regardless of the coverage level selected.

(c) A reconditioning payment, based on the actual (unadjusted) weight of the raisins, will be made if:

(1) Insured raisin production:

(i) Is damaged by rain within the insurance period;

(ii) Is reconditioned by washing with water and then drying;

(iii) Is insured at a coverage level greater than that applicable to the catastrophic risk protection plan of insurance; and either
(2) The damaged production undergoes an inspection by USDA and is found to contain mold, embedded sand, or other rain-caused contamination determined by micro-analysis in excess of standards established by the RAC, or is found to contain moisture in excess of 18 percent; or

(3) We give you consent to recondition the damaged production.

(d) Your request for consent to any wash-and-dry reconditioning must identify the acreage on which the production to be reconditioned was damaged in order to be eligible for a reconditioning payment.

(e) The reconditioning payment for raisins that meet RAC standards for marketable raisins after reconditioning will be the lesser of your actual cost for reconditioning or the amount determined by:

1. Multiplying the greater of $125.00 or the reconditioning dollar amount per ton contained in the Special Provisions by your coverage level;

2. Multiplying the result of section 11(e)(1) by the actual number of tons of raisins (unadjusted weight) that are wash-and-dry reconditioned; and

3. Multiplying the result of section 11(e)(2) by your share.

(f) Only one reconditioning payment will be made for any lot of raisins damaged during the crop year. Multiple reconditioning payments for the same production will not be made.

12. Duties in the Event of Damage or Loss

(a) In addition to the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§ 457.8), the following will apply:

1. If you intend to claim an indemnity on any unit, you must give us notice within 5 hours of the time the rain fell on the raisins. We may reject any claim for indemnity if such notice is later. You must provide us the following information when you give us this notice:

   (i) The grape variety;

   (ii) The location of the vineyard and number of acres; and

   (iii) The number of vines from which the raisins were harvested.

2. We will not pay any indemnity unless you:

   (i) Authorize us in writing to obtain all relevant records from any raisin packer, reconditioner, the RAC, or any other person who may have such records. If you fail to meet the requirements of this subsection, all insured production will be considered undamaged and valued at the reference maximum dollar value.

   (ii) Upon our request, provide us with records of previous years’ production and acreage. This information may be used to establish the amount of insured tonnage when insurable damage results in discarded production.

(b) In lieu of the provisions in section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§ 457.8) that require you to submit a claim for indemnity not later than 60 days after the end of the insurance period, any claim for indemnity must be submitted to us not later than March 31 following the date for the end of the insurance period.

13. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

1. For any optional unit, we will combine all optional units for which such production records were not provided; or

2. For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the acreage from which raisins were removed for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

1. Multiplying the insured tonnage of raisins by the reference maximum dollar amount and your coverage level percentage;

2. Subtracting from the total in section 13(b)(1) the total value of all insured damaged and undamaged raisins; and

3. Multiplying the result of section 13(b)(2) by your share.

(c) For the purpose of determining the amount of indemnity, your share will not exceed the lesser of your share at the time insurance attaches or at the time of loss.

(d) Undamaged raisins or raisins damaged solely by uninsured causes will be valued at the reference maximum dollar amount.

(e) Raisins damaged partially by rain and partially by uninsured causes will be valued at the highest prices obtainable, adjusted for any reduction in value due to uninsured causes.

(f) Raisins that are damaged by rain, but that are reconditioned and meet RAC standards will be valued at the reference maximum dollar amount.

(g) The value to count for any raisins produced on the unit that are damaged by rain and not removed from the vineyard will be the larger of the appraised salvage value or $35.00 per ton, except that any raisins that are damaged and discarded from trays or are lost from trays scattered in the vineyard as part of normal handling will not be considered to have any value. You must box and deliver any raisins that can be removed from the vineyard.

(h) At our sole option, we may acquire all the rights and title to your share of any raisins damaged by rain. In such event, the raisins will be valued at zero in determining the amount of loss and we will have the right of ingress and egress to the extent necessary to
§ 457.125

1. Definitions

Harvest. Collecting the safflower seed by combining or threshing.

Local market price. The cash price per pound for undamaged safflower (test weight of 35 pounds per bushel or higher and seed damage less than 25 percent) offered by buyers.

Nurse crop (companion crop). A crop planted into the same acreage as another crop, that is intended to be harvested separately, and which is planted to improve growing conditions for the crop with which it is grown.

Planted acreage. In addition to the definition contained in the Basic Provisions, safflowers must initially be planted in rows, unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Pound. Sixteen ounces avoirdupois.

Value per pound. The cash price per pound for damaged safflower (test weight below 35 pounds per bushel, seed damage in excess of 25 percent, or both).

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8), you may select only one price election for all the safflower in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each safflower type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

3. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§ 457.8), the contract change date is August 31 preceding the cancellation date for California, and December 31 preceding the cancellation date for all other states.

4. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§ 457.8), the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>California</td>
<td>December 31</td>
</tr>
<tr>
<td>All other states</td>
<td>March 15</td>
</tr>
</tbody>
</table>

5. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§ 457.8), the crop insured will be all safflower in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That is planted for harvest as safflower seed;
(c) That is not (unless allowed by the Special Provisions or by written agreement):
   (1) Interplanted with another crop; or
   (2) Planted into an established grass or legume.

6. Insurable Acreage

In addition to the provisions of section 9 (Insurable Acreage) of the Basic Provisions (§ 457.8), we will not insure:

(a) Safflower planted on land on which safflower, sunflower seed, any variety of dry
beans, soybeans, mustard, rapeseed, or lentils were grown the preceding crop year, unless other rotation requirements are specified in the Special Provisions or we agree in writing to insure such acreage; or

(b) Any acreage of safflower damaged before the final planting date, to the extent that the majority of producers in the area would normally not further care for the crop, unless the crop is replanted or we agree that it is not practical to replant.

7. Insurance Period

In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8), the calendar date for the end of the insurance period is October 31 immediately following planting.

8. Causes of Loss

In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur during the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife, unless proper measures to control wildlife have not been taken;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of the irrigation water supply, if caused by an insured cause of loss that occurs during the insurance period.

9. Replanting Payment

(a) In accordance with section 13 (Replanting Payment) of the Basic Provisions (§457.8), a replanting payment is allowed if the crop is damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage and it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be the lesser of 20 percent of the production guarantee or 100 pounds, multiplied by your price election, multiplied by your insured share.

(c) When safflower is replanted using a practice that is uninsurable as an original planting, the liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

10. Duties in the Event of Damage or Loss

In accordance with the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§457.8), the representative samples of the unharvested crop must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be harvested or destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
(1) For any optional unit, we will combine all optional units for which such production records were not provided; or
(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insured acreage by its respective production guarantee;
(2) Multiplying each result in section 11(b)(1) by the respective price election;
(3) Totaling the results in section 11(b)(2);
(4) Multiplying the total production to be counted of each type if applicable, (see section 11(c)) by the respective price election;
(5) Totaling the results in section 11(b)(4);
(6) Subtracting the results from the total in section 11(b)(5) from the results in section 11(b)(3); and
(7) Multiplying the result in section 11(b)(6) by your share.

(c) The total production to count (in pounds) from all insurable acreage on the unit will include:
(1) All appraised production as follows:
   (i) Not less than the production guarantee per acre for the acreage:
      (A) That is abandoned;
      (B) Put to another use without our consent;
      (C) That is damaged solely by uninsured causes; or
      (D) For which you fail to provide acceptable production records;
   (ii) Production lost due to uninsured causes;
   (iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with section 11(d)); and
   (iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
      (A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for,
representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(2) All harvested production from the insurable acreage.

(d) Mature safflower may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(1) Production will be reduced by 0.12 percent for each 0.1 percentage point of moisture in excess of 8 percent. We may obtain samples of the production to determine the moisture content.

(2) Production will be eligible for quality adjustment if such production:

(i) Has a test weight below 35 pounds per bushel;

(ii) Has seed damage in excess of 25 percent; or

(iii) Contains substances or conditions that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(d) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these crop provisions and that occurred within the insurance period;

(ii) The deficiencies, substances, or conditions result in a value per pound that is less than the local market price;

(iii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us;

(iv) With regard to deficiencies in quality (except test weight, which may be determined by our loss adjuster), the samples are analyzed by:

(A) A grader licensed under the United States Agricultural Marketing Act or the United States Warehouse Act;

(B) A grader licensed under State law and employed by a warehouse operator who has a storage agreement with the Commodity Credit Corporation; or

(C) A grader not licensed under State law, but who is employed by a warehouse operator who has a commodity storage agreement with the Commodity Credit Corporation and is in compliance with State law regarding warehouses; and

(v) With regard to substances or conditions injurious to human or animal health, the samples are analyzed by a laboratory approved by us.

(4) Safflower production that is eligible for quality adjustment, as specified in sections 11(d) (2) and (3), will be reduced as follows:

(i) In accordance with the quality adjustment factors contained in the Special Provisions; or

(ii) If quality adjustment factors are not contained in the Special Provisions:

(A) By determining the value per pound and the local market price on the earlier of the date such quality adjusted production is sold or the date of final inspection for the unit. Discounts used to establish the value per pound will be limited to those which are usual, customary, and reasonable. The value per pound will not be reduced for:

(1) Moisture content;

(2) Damage due to uninsured causes; or

(3) Drying, handling, processing, or any other costs associated with normal harvesting, handling, and marketing of safflower. We may obtain values per pound from any buyer of our choice. If we obtain values per pound from one or more buyers located outside your local market area, we will reduce such values per pound by the additional costs required to deliver the production to those buyers.

(B) Divide the value per pound by the local market price to determine the quality adjustment factor; and

(C) Multiply the adjustment factor by the number of pounds of the damaged production remaining after any reduction due to excessive moisture to determine the net production to count.

(e) Any production harvested from other plants growing in the insured crop may be counted as production of the insured crop on a weight basis.

12. Prevented Planting

Your prevented planing coverage will be 60 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart F, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.126 Popcorn crop insurance provisions.

The Popcorn Crop Insurance Provisions for the 1999 and succeeding crop years are as follows:

FCIC Policies

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Popcorn Crop Insurance Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Base contract price. The price stipulated on the contract executed between you and the processor before any adjustments for quality.

Harvest. Removing the grain or ear from the stalk either by hand or by machine.

Merchantable popcorn. Popcorn that meets the provisions of the processor contract.

Planted acreage. In addition to the definition contained in the Basic Provisions, popcorn must initially be planted in rows far enough apart to permit mechanical cultivation, unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Pound. Sixteen (16) ounces avoirdupois.

Practical to replant. In addition to the definition contained in the Basic Provisions, it will not be considered practical to replant unless production from the replanted acreage can be delivered under the terms of the popcorn processor contract, or the processor agrees in writing that it will accept the production from the replanted acreage.

Processor. Any business enterprise regularly engaged in processing popcorn that possesses all licenses, permits or approved inspections for processing popcorn required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process the contracted popcorn within a reasonable amount of time after harvest.

Processor contract. A written agreement between the producer and a processor, containing at a minimum:

(a) The producer’s commitment to plant and grow popcorn, and to deliver the popcorn production to the processor;

(b) The processor’s commitment to purchase all the production stated in the processor contract;

(c) A date, if specified on the processor’s contract, by which the crop must be harvested to be accepted; and

(d) A base contract price.

Multiple contracts with the same processor, each of which stipulates a specific amount of production to be delivered under the terms of the processor contract, will be considered as a single processor contract.

2. Unit Division

(a) For processor contracts that stipulate the amount of production to be delivered:

(1) In lieu of the definition contained in the Basic Provisions, a basic unit will consist of all the acreage planted to the insured crop in the county that will be used to fulfill contracts with each processor;

(2) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable.

(b) For any processor contract that stipulates only the number of acres to be planted, the provisions contained in section 31 of the Basic Provisions will apply.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions, you may select only one price election for all the popcorn in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each popcorn type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.
5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Val Verde</td>
<td>January 15.</td>

</tr>
</tbody>
</table>

6. Report of Acreage

In addition to the provisions of section 6 of the Basic Provisions, you must provide a copy of all processor contracts to us on or before the acreage reporting date.

7. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the popcorn in the county for which a premium rate is provided by the actuarial documents:

1. In which you have a share;
2. That is planted for harvest as popcorn;
3. That is grown under, and in accordance with the requirements of, a processor contract executed on or before the acreage reporting date and is not excluded from the processor contract at any time during the crop year; and
4. That is not (unless allowed by the Special Provisions or by written agreement):
   i. Interplanted with another crop; or
   ii. Planted into an established grass or legume.

(b) You will be considered to have a share in the insured crop if, under the processor contract, you retain control of the acreage on which the popcorn is grown, you have a risk of loss, and the processor contract provides for delivery of popcorn under specified conditions and at a stipulated base contract price.

(c) A popcorn producer who is also a processor may be able to establish an insurable interest if the following requirements are met:
1. The producer must comply with these Crop Provisions;
2. The Board of Directors or officers of the processor must, prior to the sales closing date, execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and
3. Our inspection reveals that the processing facilities comply with the definition of a processor contained in these Crop Provisions.

8. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions, any acreage of the insured crop damaged before the final planting date, to the extent that the majority of producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant.

9. Insurance Period

In lieu of the provisions contained in section 11 of the Basic Provisions, regarding the end of the insurance period, insurance ceases on each unit or part of a unit at the earliest of:

(a) The date the popcorn:
   1. Was destroyed;
   2. Should have been harvested but was not harvested;
   3. Was abandoned; or
   4. Was harvested;
   (b) When the processor contract stipulates a specific amount of production to be delivered, the date the production accepted by the processor equals the contracted amount of production;
   (c) Final adjustment of a loss; or
   (d) December 10 immediately following planting.

10. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:

1. Adverse weather conditions;
2. Fire;
3. Insects, but not damage due to insufficient or improper application of pest control measures;
4. Plant disease, but not damage due to insufficient or improper application of disease control measures;
5. Wildlife;
6. Earthquake;
7. Volcanic eruption; or
8. Failure of the irrigation water supply, if caused by a cause of loss specified in sections 10(a)(1) through (7) that occurs during the insurance period.
(b) In addition to the causes of loss excluded by section 12 of the Basic Provisions, we do not insure against any loss of production due to:
1. Damage resulting from frost or freeze after the date designated in the Special Provisions; or
2. Failure to follow the requirements contained in the processor contract.

11. Replanting Payment

(a) In accordance with section 13 of the Basic Provisions, a replanting payment is allowed if the crop is damaged by an insurable
cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage and it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be the lesser of 20 percent of the production guarantee or 150 pounds, multiplied by your price election, multiplied by your insured share.

(c) When popcorn is replanted using a practice that is uninsurable as an original planting, our liability for the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

12. Duties in the Event of Damage or Loss

In accordance with the requirements of section 14 of the Basic Provisions, the representative samples of the unharvested crop must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed.

13. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide acceptable production records:

1. For any optional unit, we will combine all optional units for which such production records were not provided; or
2. For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

1. Multiplying the insured acreage for each type, if applicable, by its respective production guarantee;
2. Multiplying the result of section 13(b)(1) by the respective price election for each type, if applicable;
3. Totaling the results of section 13(b)(2) if there is more than one type;
4. Multiplying the total production to count (see section 13(c)), of each type if applicable, by its respective price election;
5. Totaling the results of section 13(b)(4) if there is more than one type;
6. Subtracting the result of section 13(b)(4) from the result in section 13(b)(2) if there is only one type or subtracting the result of section 13(b)(5) from the result of section 13(b)(3) if there is more than one type; and
7. Multiplying the result of section 13(b)(6) by your share.

For example:

You have a 100 percent share in 100 acres of Type A popcorn in the unit, with a guarantee of 2,500 pounds per acre and a price election of $.12 per pound. You are only able to harvest 150,000 pounds. Your indemnity would be calculated as follows:

1. 
2. 
3. 
4. 
5. 
6. 
7. 

You also have a 100 percent share in 150 acres of Type B popcorn in the same unit, with a guarantee of 2,250 pounds per acre and a price election of $.10 per pound. You are only able to harvest 70,000 pounds. Your total indemnity for both popcorn types A and B would be calculated as follows:

1. 
2. 
3. 
4. 
5. 
6. 
7. 

(c) The total production to count (in pounds) from all insurable acreage on the unit will include:

1. All appraised production as follows:
2. Not less than the production guarantee for acreage:
   (A) That is abandoned;
   (B) Put to another use without our consent;
   (C) Damaged solely by uninsured causes; or
   (D) For which you fail to provide production records;
3. Unharvested production (mature unharvested production may be adjusted for
quality deficiencies and excess moisture in accordance with section 13(d));

(iii) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested;

(2) All harvested production from the insurable acreage in the unit;

(3) All harvested and appraised production lost or damaged by uninsured causes; and

(4) For processor contracts that stipulate your production; (3) these Crop Provisions; and (4) the production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count; or

(5) Any ear production for which we cannot determine a shelling factor will be considered to have an 80 percent shelling factor.

(d) Mature popcorn may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(i) Dividing the value per pound of the damaged popcorn by the base contract price per pound for undamaged popcorn; and

(ii) Multiplying the result by the number of pounds of such popcorn.

14. Late Planting

Late planting provisions in the Basic Provisions are applicable for popcorn if you provide written approval from the processor by the acreage reporting date that it will accept the production from the late planted acres when it is expected to be ready for harvest.

15. Prevented Planting

Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

[63 FR 33838, June 22, 1998]

§ 457.127 [Reserved]

§ 457.128 Guaranteed production plan of fresh market tomato crop insurance provisions.

The Guaranteed Production Plan of Fresh Market Tomato Crop Insurance

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Guarantee Production Plan of Fresh Market Tomato Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Acres. Forty-three thousand five hundred sixty (43,560) square feet of land when row widths exceed six feet, the land area on which at least 7,260 linear feet of rows are planted.

Carton. A container that contains 25 pounds of fresh tomatoes unless otherwise provided in the Special Provisions.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler;
retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

First fruit set. The date when 30 percent of the plants on the unit have produced fruit that has reached a minimum size of one inch in diameter.

Harvest. Picking of marketable tomatoes.

Mature green tomato. A tomato that:

(a) Has a heightened gloss due to a waxy skin that cannot be torn by scraping;
(b) Has a well-formed jelly-like substance in the locules;
(c) Has seeds that are sufficiently hard so they are pushed aside and not cut by a sharp knife in slicing; and
(d) Shows no red color.

Planting. Transplanting the tomato plants into the field.

Planting period. The time period designated in the Special Provisions during which the tomatoes must be planted to be insured as either spring- or fall-planted tomatoes.

Plant stand. The number of live plants per acre before any damage occurs.

Potential production. The number of cartons per acre of mature green or ripe tomatoes that the tomato plants would have produced by the end of the insurance period:

(a) With a classification size of 6x7 (2-8/32 inch minimum diameter) or larger for all types except cherry, roma, or plum;
(b) Meeting the criteria specified in the Special Provisions for cherry, roma, or plum types.

Practical to replant. In lieu of the definition of “Practical to replant” contained in section 1 of the Basic Provisions (§ 457.8), practical to replant is defined as our determination after loss or damage to the insured crop, based on factors, including but not limited to moisture availability, condition of the field, time to crop maturity, and marketing windows that replanting the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period. In counties that do not have both spring and fall planting periods, it will not be considered practical to replant after the final planting date unless replanting is generally occurring in the area. In counties that have spring and fall planting periods, it will not be considered practical to replant after the final planting date for the planting period in which the crop was initially planted.

Ripe tomato. A tomato that meets the definition of a mature green tomato, except the tomato shows some red color and can still be packed for fresh market under the agreement or contract with the packer.

Row width. The distance in feet from the center of one row of plants to the center of an adjacent row.

2. Unit Division

(a) A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by planting period, if separate planting periods are provided for in the Special Provisions.

(b) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8):

(a) You may select only one price election for all the tomatoes in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each tomato type designated in the Special Provisions. The price election you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(b) The production guarantees per acre are progressive by stages and increase at specified intervals to the final stage production guarantee. The stages and production guarantees are as follows:

(1) For California:

<table>
<thead>
<tr>
<th>Stage</th>
<th>Percent of stage 3 (final stage) production guarantee</th>
<th>Length of time</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>50</td>
<td>From planting until first fruit set.</td>
</tr>
<tr>
<td>2</td>
<td>70</td>
<td>From first fruit set until harvested.</td>
</tr>
<tr>
<td>3</td>
<td>100</td>
<td>Harvested acreage.</td>
</tr>
</tbody>
</table>

(2) For all other states, except California:

<table>
<thead>
<tr>
<th>Stage</th>
<th>Percent of stage 4 (final stage) production guarantee</th>
<th>Length of time</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>50</td>
<td>From planting until qualifying for stage 2.</td>
</tr>
<tr>
<td>2</td>
<td>75</td>
<td>From the earlier of stakes driven, one tie and pruning, or 30 days after planting until qualifying for stage 3.</td>
</tr>
<tr>
<td>3</td>
<td>90</td>
<td>From the earlier of the end of stage 2 or 60 days after planting until qualifying for stage 4.</td>
</tr>
<tr>
<td>4</td>
<td>100</td>
<td>From the earlier of 75 days after planting or the beginning of harvest.</td>
</tr>
</tbody>
</table>
(c) Any acreage of tomatoes damaged to the extent that producers in the area generally would not further care for the tomatoes will be deemed to have been destroyed even though you continue to care for the tomatoes. The production guarantee for such acreage will be the guarantee for the stage in which such damage occurs.

(d) Any production guarantees for cherry, roma, or plum type tomatoes will be specified in the Special Provisions.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§ 457.8), the contract change date is September 30 preceding the cancellation date for counties with a January 15 cancellation date and December 31 preceding the cancellation date for all other counties.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§ 457.8), the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State</th>
<th>Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>California, Florida, Georgia, and South Carolina</td>
<td>January 15.</td>
</tr>
<tr>
<td>All other states</td>
<td>March 15.</td>
</tr>
</tbody>
</table>

6. Report of Acreage

(a) In addition to the provisions of section 6 (Report of Acreage) of the Basic Provisions (§ 457.8), you must report the row width.

(b) If spring and fall planting periods are allowed in the Special Provisions you must report all the information required by section 6 (Report of Acreage) of the Basic Provisions (§ 457.8) and these Crop Provisions by the acreage reporting date for each planting period.

7. Annual Premium

In lieu of provisions contained in the Basic Provisions (§ 457.8), for determining premium amounts, the annual premium is determined by multiplying the final stage production guarantee by the price election, by the premium rate, by the insured acreage, by your share at the time coverage begins, and by any applicable premium adjustment factor contained in the Special Provisions.

8. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§ 457.8), the crop insured will be all the tomatoes in the county for which a premium rate is provided by the actuarial documents.

(a) In which you have a share;

(b) That are transplanted tomatoes that have been planted for harvest as fresh market tomatoes;

(c) That are planted within the spring or fall planting periods, as applicable, specified in the Special Provisions;

(d) That, on or before the acreage reporting date, are subject to any agreement in writing (packing contract) executed between you and a packer, whereby the packer agrees to accept and pack the production specified in the agreement, unless you control a packing facility or an exception exists in the Special Provisions; and

(e) That are not (unless allowed by the Special Provisions):

1. Grown for direct marketing;

2. Interplanted with another crop;

3. Planted into an established grass or legume; or

4. Cherry, roma, or plum type tomatoes.

9. Insurable Acreage

(a) In addition to the provisions of section 9 (Insurable Acreage) of the Basic Provisions (§ 457.8):

1. Any acreage of the insured crop damaged before the final planting date, to the extent that the majority of growers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant. Unavailability of plants will not be considered a valid reason for failure to replant.

2. We do not insure any acreage of tomatoes:

   (i) Grown by any person if the person had not previously:

   (A) Grown fresh market tomatoes for commercial sales; or

   (B) Participated in the management of a fresh market tomato farming operation, in at least one of the three previous years.

   (ii) That does not meet the rotation requirements contained in the Special Provisions;

   (iii) On which tomatoes, peppers, eggplants, or tobacco have been grown within the previous two years unless the soil was fumigated or nematicide was applied before planting the tomatoes, except that this limitation does not apply to a first planting in Pennsylvania or if otherwise specified in the Special Provisions; or

   (b) In lieu of the provisions of section 9 (Insurable Acreage) of the Basic Provisions (§ 457.8), that prohibit insurance from attaching if a crop has not been planted and harvested in at least one of the three previous calendar years, we will insure newly cleared land or former pasture land planted to fresh market tomatoes.
10. Insurance Period

In lieu of the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8): (a) Coverage begins on each unit or part of a unit on the later of the date you submit your application or when the tomatoes are planted.

(b) Coverage will end on any insured acreage at the earliest of:
   (1) Total destruction of the tomatoes;
   (2) Discontinuance of harvest;
   (3) The date harvest should have started on any acreage that was not harvested;
   (4) 120 days after the date of transplanting or replanting;
   (5) Completion of harvest;
   (6) Final adjustment of a loss; or
   (7) October 15 of the crop year in Delaware, Maryland, New Jersey, North Carolina, and Virginia; October 31 of the crop year in California; November 10 of the crop year in Florida, Georgia, and South Carolina; and September 20 of the crop year in all other States.

11. Causes of Loss

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur during the insurance period:
   (1) Adverse weather conditions;
   (2) Fire;
   (3) Insects, but not damage due to insufficient or improper application of pest control measures;
   (4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
   (5) Wildlife;
   (6) Earthquake;
   (7) Volcanic eruption; or
   (8) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§457.8), we will not insure against damage or loss of production that occurs or becomes evident after the tomatoes have been harvested.

12. Replanting Payment

(a) In accordance with section 13 (Replanting Payment) of the Basic Provisions (§457.8), a replanting payment is allowed if the crop is damaged by an insurable cause of loss and the acreage to be replanted has sustained a loss in excess of 50 percent of the plant stand.

(b) The maximum amount of the replanting payment per acre will be:
   (1) Seventy (70) cartons multiplied by your price election, multiplied by your insured share for all insured tomatoes except cherry, roma, or plum types; and
   (2) As specified in the Special Provisions for cherry, roma, or plum types.

(c) In lieu of the provisions contained in section 13 (Replanting Payment) of the Basic Provisions (§457.8) that permit only one replanting payment each crop year, when both spring and fall planting periods are contained in the Special Provisions, you may be eligible for one replanting payment for acreage planted during each planting period within the crop year.

13. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate, acceptable production records:
   (1) For any optional units, we will combine all optional units for which such production records were not provided; or
   (2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:
   (1) Multiplying the insured acreage for each type, if applicable, by its respective production guarantee for the stage in which the damage occurred;
   (2) Multiplying the results of section 13(b)(1) by the respective price election for each type, if applicable;
   (3) Totaling the results of section 13(b)(2);
   (4) Multiplying the total production to be counted of each type, if applicable, (see section 13(c)) by the respective price election;
   (5) Totaling the results of section 13(b)(4);
   (6) Subtracting this result of section 13(b)(5) from the results in section 13(b)(3); and
   (7) Multiplying the result of section 13(b)(6) by your share.

(c) The total production to count (in cartons) from all insurable acreage on the unit will include:
   (1) All appraised production as follows:
      (i) Not less than the production guarantee for acreage:
         (A) That is abandoned;
         (B) Put to another use without our consent;
         (C) That is damaged solely by uninsured causes;
         (D) For which you fail to provide production records that are acceptable to us;
      (ii) Potential production lost due to uninsured causes;
      (iii) Unharvested production of mature green and ripe tomatoes remaining after harvest has ended:
         (A) With a classification size of 6 x 7 (2½ inch minimum diameter) or larger and that would grade eighty-five percent (85%) or better U.S. No. 1 for types other than cherry, roma, or plum; or
§ 457.129 Fresh market sweet corn crop insurance provisions.

The fresh market sweet corn crop insurance provisions for the 2008 and succeeding crop years for all counties with a contract change date on or after the effective date of this rule and for the 2009 and succeeding crop years for all counties with a contract change date prior to the effective date of this rule, as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Fresh Market Sweet Corn Crop Provisions

1. Definitions

Allowable cost. The dollar amount per container for harvesting, packing, and handling as shown in the Special Provisions.

Amount of insurance (per acre). The dollar amount of coverage per acre obtained by multiplying the reference maximum dollar amount shown on the actuarial documents by the coverage level percentage you elect.

Average net value per container. The dollar amount obtained by totaling the net values of all containers of sweet corn sold and dividing the result by the total number of containers of all sweet corn sold.

Container. The unit of measurement for the insured crop as specified in the Special Provisions for cherry, roma, or plum types.

Crop year. In lieu of the definition of “crop year” contained in section 1 of the Basic Provisions, for counties with fall, winter, and spring planting periods or counties with fall and spring planting periods, the period of time that begins on the first day of the earliest planting period for fall planted sweet corn and continues through the last day of the insurance period for spring planted sweet corn. For counties with only spring planting periods, the period of time that begins on the earliest planting period for spring planted sweet corn and continues through the last day of the insurance period for spring planted sweet corn.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling...
through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Harvest. Separation of ears of sweet corn from the plant by hand or machine.

 Marketable sweet corn. Sweet corn that is sold for any purpose or grades U.S. No. 1 or better in accordance with the requirements of the United States Standards for Grades of Sweet Corn.

 Minimum value. The dollar amount per container shown in the Special Provisions we will use to value marketable production to count.

 Net value. The dollar value of packed and sold sweet corn obtained by subtracting the allowable cost and any additional charges specified in the Special Provisions from the gross value per container of sweet corn sold. This result may not be less than zero.

 Plant stand. The number of live plants per acre prior to the occurrence of an insurable cause of loss.

 Planted acreage. In addition to the definition contained in the Basic Provisions, for each planting period, sweet corn seed must be planted in rows far enough apart to permit mechanical cultivation, unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

 Planting period. The period of time designated in the actuarial documents in which sweet corn must be planted to be considered fall, winter, or spring-planted sweet corn.

 Potential production. The number of containers of sweet corn that the sweet corn plants will or would have produced per acre by the end of the insurance period, assuming normal growing conditions and practices.

 Practical to replant. In lieu of the definition in section 1 of the Basic Provisions, our determination, after loss or damage to the insured crop, based on factors, including but not limited to moisture availability, condition of the field, marketing windows, and time to crop maturity, that replanting to the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period (inability to obtain seed will not be considered when determining if it is practical to replant).

 Sweet corn. A type of corn with kernels containing a high percentage of sugar that is adapted for human consumption as a vegetable.

2. Unit Division

A basic unit, as defined in section 1 of the Basic Provisions, will also be established for each planting period.

3. Amounts of Insurance and Production Stages

(a) In addition to the requirements of section 3 of the Basic Provisions, you may select only one coverage level (and the corresponding amount of insurance designated in the actuarial documents for the applicable planting period and practice) for all the sweet corn in the county insured under this policy.

(b) The amount of insurance you choose for each planting period and practice must have the same percentage relationship to the maximum price offered by us for each planting period and practice. For example, if you choose 100 percent of the maximum amount of insurance for a specific planting period and practice, you must also choose 100 percent of the maximum amount of insurance for all other planting periods and practices.

(c) The production reporting requirements contained in section 3 of the Basic Provisions do not apply to sweet corn.

(d) If specified in the Special Provisions, we will limit your amount of insurance per acre if you have not produced the minimum amount of production of sweet corn contained in the Special Provisions in at least one of the three most recent crop years.

(e) The amounts of insurance are progressive by stages as follows:

<table>
<thead>
<tr>
<th>Stage</th>
<th>Percent of the amount of insurance per acre that you select</th>
<th>Length of time</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>65</td>
<td>From planting through the beginning of tasseling (which is when the tassel becomes visible above the whorl).</td>
</tr>
<tr>
<td>Final</td>
<td>100</td>
<td>From tasseling until the acreage is harvested.</td>
</tr>
</tbody>
</table>

(f) The indemnity payable for any acreage of sweet corn will be based on the stage the plants had achieved when damage occurred. Any acreage of sweet corn damaged in the first stage to the extent that the majority of producers in the area would not normally further care for it will have an amount of insurance based on the first stage for the purposes of establishing an indemnity even if you continue to care for the damaged sweet corn.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date shown
below is the date preceding the cancellation
date:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Florida counties; and all Georgia counties for which the Special Provisions designate a fall planting period.</td>
<td>April 30.</td>
</tr>
<tr>
<td>All Georgia counties for which the Special Provisions do not designate a fall planting period; and all other States.</td>
<td>November 30.</td>
</tr>
</tbody>
</table>

5. Cancellation and Termination dates

In accordance with section 2, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Cancellation and termination Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Florida; Atkinson, Baker, Berrien, Brantley, Camden, Colquitt, Cook, Early, Mitchell, and Ware Counties Georgia and all counties south thereof for which the Special Provisions designate a fall planting period.</td>
<td>July 31.</td>
</tr>
<tr>
<td>Alabama; South Carolina; and all Georgia Counties for which the Special Provisions do not designate a fall planting period.</td>
<td>February 15.</td>
</tr>
<tr>
<td>All other States</td>
<td>March 15.</td>
</tr>
</tbody>
</table>

6. Report of Acreage

In addition to the requirements of section 6 of the Basic Provisions, you must report on or before the acreage reporting date contained in the Special Provisions for each planting period, all the acreage of sweet corn in the county insured under this policy in which you have a share.

7. Annual Premium

In lieu of the premium amount determinations contained in section 7 of the Basic Provisions, the annual premium amount for each cultural practice (e.g., fall-planted irrigated) is determined by multiplying the final stage amount of insurance per acre by the premium rate for the cultural practice as established in the Actuarial Table, by the insured acreage, by your share at the time coverage begins, and by any applicable premium adjustment factors contained in the actuarial documents.

8. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the sweet corn in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That is:
(1) Planted to be harvested and sold as fresh market sweet corn;
(2) Planted within the planting periods designated in the actuarial documents;
(3) Grown under an irrigated practice, unless otherwise provided in the Special Provisions;
(4) Grown by a person who in at least one of the three previous crop years:
   (i) Grew sweet corn for commercial sale;
   (ii) Participated in managing a sweet corn farming operation;
   (c) That is not:
   (1) Interplanted with another crop;
   (2) Planted into an established grass or legume;
   (3) Grown for direct marketing, unless otherwise provided in the Special Provisions or by written agreement.

9. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions any acreage of sweet corn damaged during the planting period in which initial planting took place:

(a) Must be replanted if:
   (1) Less than 75 percent of the plant stand remains;
   (2) It is practical to replant; and
   (3) The final day of the planting period has not passed at the time the crop was damaged.

(b) Whenever sweet corn is initially planted during the fall or winter planting periods and the final planting date for the planting period has passed, but it is considered practical to replant, you may elect:
   (1) To replant such acreage and collect any replant payment due as specified in section 12. The initial planting period coverage will continue for such replanted acreage; or
   (2) Not to replant such acreage and receive an indemnity based on the stage of growth the plants had attained at the time of damage. However, such an election will result in the acreage being uninsurable in the subsequent planting period.

10. Insurance Period

In lieu of the provisions of section 11 of the Basic Provisions, coverage begins on each unit or part of a unit the later of the date we accept your application, or when the sweet corn is planted in each planting period. Coverage ends at the earliest of:

(a) Total destruction of the sweet corn on the unit;
(b) Abandonment of the sweet corn on the unit;
(c) The date harvest should have started on the unit on any acreage which will not be harvested;
(d) Final adjustment of a loss on the unit;
(e) Final harvest; or
(f) 100 days after the date of planting or replanting, unless otherwise provided in the Special Provisions.
11. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions;
(2) Fire;
(3) Wildlife;
(4) Volcanic eruption;
(5) Earthquake;
(6) Insects, but not damage due to insufficient or improper application of pest control measures;
(7) Plant disease, but not damage due to insufficient or improper application of disease control measures; or

(b) Failure of the irrigation water supply, if caused by an insured cause of loss that occurs during the insurance period.

(c) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss due to:

(1) Failure to harvest in a timely manner unless harvest is prevented by one of the insurable causes of loss specified in section 11(a); or
(2) Failure to market the sweet corn unless such failure is due to actual physical damage caused by an insured cause of loss as specified in section 11(a). For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

12. Replanting Payments

(a) In accordance with section 13 of the Basic Provisions, a replanting payment is allowed if, due to an insured cause of loss, more than 25 percent of the plant stand will not produce sweet corn and it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be the lesser of your actual cost of replanting or the result obtained by multiplying the per acre replanting payment amount contained in the Special Provisions by your insured share.

(c) In lieu of the provisions contained in section 13 of the Basic Provisions, limiting a replanting payment to one each crop year, only one replanting payment will be made for acreage planted during each planting period within the crop year.

13. Duties in the Event of Damage or Loss

In addition to the requirements contained in section 14 of the Basic Provisions, if you intend to claim an indemnity on any unit:

(a) You also must give us notice not later than 72 hours after the earliest of:

(1) The time you discontinue harvest of any acreage on the unit;
(2) The date harvest normally would start if any acreage on the unit will not be harvested; or
(3) The calendar date for the end of the insurance period.

(b) If insurance is permitted by the Special Provisions or by written agreement on acreage with production that will be sold by direct marketing, you must notify us at least 15 days before any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine the value of your production to count for production that is sold by direct marketing. If damage occurs after this appraisal, we will conduct an additional appraisal if you notify us that additional damage has occurred. These appraisals, and/or any acceptable production records provided by you, will be used to determine the value of your production to count.

(c) Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count for not less than the dollar amount of insurance (per acre) for the applicable stage if such failure results in our inability to accurately determine the value of production.

14. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional unit, we will combine all optional units for which such production records were not provided; or

(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage in each stage by the amount of insurance per acre for the final stage;

(2) Multiplying each result in section 14(b)(1) by the percentage for the applicable stage (see section 3(e));

(3) Totaling the results of section 14(b)(2);

(4) Subtracting either of the following values from the result of section 14(b)(3):

(i) For other than catastrophic risk protection coverage, the total value of production to be counted (see section 14(c)); or

(ii) For catastrophic risk protection coverage, the result of multiplying the total value of production to be counted (see section 14(c)) by fifty-five percent; and

(5) Multiplying the result of section 14(b)(4) by your share.

For example:
You have a 100 percent share in 65.3 acres of fresh market sweet corn in the unit (15.0 acres in stage 1 and 50.3 acres in the final stage), with a dollar amount of insurance of $600 per acre. The 15.0 acre field was damaged by flood and appraisals of the crop determined there was no potential production to be counted. From the 50.3 acre field, you are only able to harvest 5,627 containers of sweet corn. The net value of all sweet corn production sold ($3.11 per container) is greater than the Minimum Value per container ($2.50). The 5,627 containers sold x $3.11 average net value per container = $17,500 value of your production to count. Your indemnity would be calculated as follows:

1. 15.0 acres x $600 amount of insurance = $9,000 and
2. 50.3 acres x $600 amount of insurance = $30,180;
3. $9,000 x .65 (percent for stage 1) = $5,850 and
4. $30,180 x 1.00 (percent for final stage) = $30,180;
5. $5,850 + $30,180 = $36,030 amount of insurance for the unit;
6. $36,030-$17,500 value of production to count = $18,530 loss;
7. $18,530 x 100 percent share = $18,530 indemnity payment.

(c) The total value of production to count from all insurable acreage on the unit will include:
1. Not less than the amount of insurance per acre for the stage for any acreage:
   (i) That is abandoned;
   (ii) Put to another use without our consent;
   (iii) That is damaged solely by uninsured causes;
   (iv) For which you fail to provide acceptable production records; or
   (v) From which insurable production is sold by direct marketing and you fail to meet the requirements contained in section 13(b) of these Crop Provisions;
2. The value of the following appraised sweet corn production will not be less than the dollar amount obtained by multiplying the number of containers of appraised sweet corn by the minimum value for the planting period:
   (i) Unharvested marketable sweet corn production (unharvested production that is damaged or defective due to uninsured causes is not marketable and will not be counted as production to count unless such production is later harvested and sold for any purpose);
   (ii) Production lost due to uninsured causes; and
   (iii) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
   (A) We may require you to continue to care for the crop so that a subsequent appraisal may be made or the crop harvested to determine actual production (if we require you to continue to care for the crop and you do not do so, the original appraisals will be used); or
   (B) You may elect to continue to care for the crop, in which case the amount of production to count for the acreage will be the harvested production, or our reappraisal if the crop is not harvested.
(3) The value of all harvested production of sweet corn from the insurable acreage, except production that is sold by direct marketing as specified in section (c)(4) below:
   (i) For sold production, will be the greater of:
   (A) The dollar amount obtained by multiplying the total number of containers of sweet corn sold by the minimum value; or
   (B) The dollar amount obtained by multiplying the average net value per container from all sweet corn sold by the total number of all containers of sweet corn sold.
   (ii) For marketable sweet corn production that is not sold, will be the dollar amount obtained by multiplying the number of containers of such sweet corn by the minimum value for the planting period. Harvested production that is damaged or defective due to uninsured causes and is not marketable will not be counted as production to count unless such production is sold.
4. If all the requirements of insurability are met, the value of insurable production that is sold by direct marketing will be the greater of:
   (i) The actual value received by you for direct marketed production; or
   (ii) The dollar amount obtained by multiplying the total number of containers of appraised sweet corn sold by direct marketing by the minimum value.
15. Late and Prevented Planting
The late and prevented planting provisions of the Basic Provisions are not applicable.
16. Minimum Value Option
(a) The provisions of this option are continuous and will be attached to and made a part of your insurance policy, if:
   (1) You elect the Minimum Value Option on your application, or on a form approved by us, on or before the sales closing date for
the initial crop year in which you wish to insure sweet corn under this option, and pay the additional premium indicated in the actuarial documents for this optional coverage; and
(2) You have not elected coverage under the Catastrophic Risk Protection Endorsement.

(b) In lieu of the provisions contained in section 14(c)(3) of these Crop Provisions, the total value of harvested production that is not sold by direct marketing will be determined as follows:
(1) The dollar amount obtained by multiplying the average net value per container from all sweet corn sold (this result may not be less than the minimum value option amount if such amount is provided in the Special Provisions) by the total number of all containers of sweet corn sold;
(2) For marketable sweet corn production that is not sold, the value of such production will be the dollar amount obtained by multiplying the total number of containers of such sweet corn by the minimum value for the planting period. Harvested production that is damaged or defective due to insurable causes and is not marketable will not be included as production to count.
(c) If all the requirements of insurability are met, the value of insurable production that is sold by direct marketing will be the greater of:
(1) The actual value received by you for direct marketed production; or
(2) The dollar amount obtained by multiplying the total number of containers of sweet corn sold by direct marketing by the minimum value.
(d) This option may be canceled by either you or us for any succeeding crop year by giving written notice on or before the cancellation date preceding the crop year for which the cancellation of this option is to be effective.

§ 457.130 Macadamia tree crop insurance provisions.

The macadamia tree crop insurance provisions for the 2011 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider).
Both FCIC and reinsured policies:

Macadamia Tree Crop Provisions

1. Definitions

Age. The number of complete 12-month periods that have elapsed since the month the trees were set out or were grafted, whichever is later. Age determination will be made for each unit, or portion thereof, as of January 1 of each crop year.

CROP YEAR. A period beginning with the date insurance attaches to the macadamia tree crop extending through December 31 of the same calendar year. The crop year is designated by the calendar year in which insurance attaches.

Destroyed. Trees damaged to the extent that we determine replacement, including grafts, is required.

Good farming practices. The cultural practices generally in use in the county for the crop to have normal growth and vigor, and are those recognized by the National Institute of Food and Agriculture as compatible with agronomic and weather conditions in the area.

Graft. The uniting of a macadamia shoot to an established macadamia tree rootstock for future production of macadamia nuts.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Irrigated practice. A method by which the normal growth and vigor of the insured trees is maintained by artificially applying adequate quantities of water during the growing season by appropriate systems and at the proper times.

Rootstock. The root and stem portion of a macadamia tree to which a macadamia shoot can be grafted.

2. Unit Division

(a) Sections 34(b)(1), (3), and (4) of the Basic Provisions are not applicable.

(b) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Unless otherwise allowed by written agreement, optional units may be established only if each optional unit:
(1) Contains at least 80 acres of insurable age macadamia trees; or
(2) Is located on non-contiguous land.

(c) You must have provided records, which can be independently verified, of acreage and age of trees for each unit for at least the last crop year.

3. Insurance Guarantees, Coverage Levels, and Dollar Amounts for Determining Indemnities

(a) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8):
§ 457.130

1. You may select only one dollar amount of insurance for all the macadamia trees in the county in each age group contained in the actuarial table that are insured under this policy. The dollar amount of insurance you choose for each age group must have the same percentage relationship to the maximum dollar amount offered by us for each age group. For example, if you choose 100 percent of the maximum dollar amount of insurance for one age group, you must also choose 100 percent of the maximum dollar amount of insurance for all other age groups.

2. If the stand is less than 90 percent, based on the original planting pattern, the dollar amount of insurance will be reduced 1 percent for each percent below 90 percent. For example, if the dollar amount of insurance you selected is $2,000 and the stand is 85 percent of the original stand, the dollar amount of insurance on which any indemnity will be based is $1,900 ($2,000 multiplied by 0.95).

3. You must report, by the sales closing date contained in the Special Provisions, by type if applicable:
   (i) Any damage, removal of trees, change in practices, or any other circumstance that may reduce the dollar amount of insurance and the number of affected acres;
   (ii) The number of trees on insurable and uninsurable acreage;
   (iii) The month and year on which the trees were set out or grafted and the planting pattern;
   (iv) For the first year of insurance following replacement, the month and year of replacement if more than 10 percent of the trees on any unit have been replaced in the previous five crop years; and
   (v) For the first year of insurance for acreage interplanted with another perennial crop, and any time the planting pattern of such acreage is changed:
      (A) The age of the interplanted crop, and type if applicable;
      (B) The planting pattern; and
      (C) Any other information that we request in order to establish your dollar amount of insurance.

We will reduce the dollar amount of insurance as necessary, based on our estimate of the effect of interplanted perennial crop, removal of trees, damage, change in practices, and any other circumstance that adversely affects the insured crop. If you fail to notify us of any circumstance that may reduce your dollar amount of insurance from previous levels, we will reduce your dollar amount of insurance as necessary at any time we become aware of the circumstance.

4. Contract Changes
   In accordance with section 4 (Contract Changes) of the Basic Provisions (§457.8), the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates
   In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§457.8), the cancellation and termination dates are December 31.

6. Insured Crop
   In accordance with section 8 (Insured Crop) of the Basic Provisions (§457.8), the crop insured will be all macadamia trees in the county for which a premium rate is provided by the actuarial table:
   (a) In which you have a share;
   (b) That are grown for the production of macadamia nuts;
   (c) For which the rootstock is adapted to the area;
   (d) That are at least one year of age when the insurance period begins; and
   (e) That, if the orchard is inspected, is considered acceptable by us.

7. Insurable Acreage
   In lieu of the provisions in section 9 (Insurable Acreage) of the Basic Provisions (§457.8), the crop insured will be all macadamia trees in the county that we require for the crop or to determine the insurance, if your application is received after December 22 but prior to January 1, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

8. Insurance Period
   (a) In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):
      (1) Coverage begins on January 1 of each crop year, except that for the year of application, if your application is received after December 22 but prior to January 1, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the orchard.
      (2) The calendar date for the end of the insurance period for each crop year is December 31.
   (b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):
      (1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance...
Federal Crop Insurance Corporation, USDA

§457.131  Macadamia nut crop insurance provisions.

The macadamia nut crop insurance provisions for the 2012 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Macadamia Nut Crop Provisions

1. Definitions

Age. The number of complete 12-month periods that have elapsed since the month the trees were set out or were grafted, whichever is later. An age determination will be made for each unit, or portion thereof, as of January 1 of each crop year.

Crop year. A period beginning with the date insurance attaches to the macadamia nut crop and extending through the normal harvest time. The crop year is designated by the

§457.131  

calendar year in which the insurance period ends.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the orchard for the purpose of picking all or a portion of the crop.

Graft. The uniting of a macadamia shoot to an established macadamia tree rootstock for future production of macadamia nuts.

Harvest. Picking of mature macadamia nuts from the ground.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Pound. A unit of weight equal to 16 ounces avoirdupois.

Production guarantee (per acre). The number of wet, in-shell pounds determined by multiplying the approved APH yield per acre by the coverage level percentage you elect.

Rootstock. The root and stem portion of a macadamia tree to which a macadamia shoot can be grafted.

Wet in-shell. The weight of the macadamia nuts as they are removed from the orchard with the nut meats in the shells after removal of the husk but prior to being dried.

2. Unit Division

(a) Section 34(b)(1) of the Basic Provisions is not applicable.

(b) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Unless otherwise allowed by written agreement, optional units may be established only if each optional unit:

(i) Contains at least 80 acres of bearing macadamia trees; or

(ii) Is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), you must also choose 100 percent of the maximum price election for all other types.

(b) You must report, by the production reporting date designated in section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), by type if applicable:

(1) Any damage, removal of trees, change in practices, or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based and the number of affected acres;

(2) The number of bearing trees on insurable and uninsurable acreage;

(3) The age of the trees and the planting pattern; and

(4) For the first year of insurance for acreage interplanted with another perennial crop, and anytime the planting pattern of such acreage is changed:

(i) The age of the interplanted crop, and type if applicable;

(ii) The planting pattern; and

(iii) Any other information that we request in order to establish your approved yield.

We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the following: interplanted perennial crop; removal of trees; damage; change in practices and any other circumstance on the yield potential of the insured crop. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee as necessary at any time we become aware of the circumstance.

(c) The yield used to compute your production guarantee will be determined in accordance with Actual Production History (APH) regulations, 7 CFR part 400, subpart G, and applicable policy provisions unless damage or changes to the orchard or trees require establishment of the yield by another method. In the event of such damage or changes, the yield will be based on our appraisal of the potential of the insured acreage for the crop year.

(d) Instead of reporting your macadamia nut production for the previous crop year, as required by section 3 of the Basic Provisions (§457.8), there is a one year lag period. Each crop year you must report your production from two crop years ago, e.g., on the 2001 crop year production report, you will provide your 1999 crop year production.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§457.8), the contract change date is August 31 preceding the cancellation date.
5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§457.8), the cancellation and termination dates are December 31.

6. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§457.8), the crop insured will be all macadamia nuts in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That are grown on tree varieties that:
(1) Were commercially available when the trees were set out;
(2) Are adapted to the area; and
(3) Are grown on a rootstock that is adapted to the area;
(c) That are grown in an orchard that, if inspected, is considered acceptable by us;
(d) That are grown on trees that have reached at least the fifth growing season after being set out or grafted. However, we may agree in writing to insure acreage that has not reached this age if it has produced at least 200 pounds of (wet, in-shell) macadamia nuts per acre in a previous crop year; and
(e) That are produced from blooms that normally occur during the calendar year in which insurance attaches and that are normally harvested prior to the end of the insurance period.

7. Insurable Acreage

In lieu of the provisions in section 9 (Insurable Acreage) of the Basic Provisions (§457.8), that prohibit insurance attaching to a crop planted with another crop, macadamia nuts interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):
(1) Coverage begins on January 1 of each crop year, except that for the year of application, if your application is received after December 22 but prior to January 1, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the orchard.
(2) The calendar date for the end of the insurance period for each crop year is the second June 30th after insurance attaches.

(b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):
(1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.
(2) If you relinquish your insurable share on any insurable acreage of macadamia nuts on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:
(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;
(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and
(iii) The transferee is eligible for crop insurance.

9. Causes of Loss

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur during the insurance period:
(1) Adverse weather conditions;
(2) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the orchard;
(3) Earthquake;
(4) Volcanic eruption;
(5) Wildlife, unless proper measures to control wildlife have not been taken; or
(6) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period.
(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§457.8), we will not insure against damage or loss of production due to:
(1) Disease or insect infestation, unless adverse weather:
   (i) Prevents the proper application of control measures or causes properly applied control measures to be ineffective; or
   (ii) Causes disease or insect infestation for which no effective control mechanism is available;
(2) Inability to market the macadamia nuts for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

10. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 (Duties in the Event of Damage or Loss) of
§ 457.132 Cranberry crop insurance provisions.

The cranberry crop insurance provisions for the 1999 and succeeding crop years are as follows:

FCIC Policies

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Cranberry Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.
Federal Crop Insurance Corporation, USDA

§457.132

1. Definitions

Barrel. 100 pounds of cranberries.

Harvest. Removal of the cranberries from the bog.

Market price. The cash price per barrel of cranberries offered by buyers in the area in which you normally market the cranberries.

2. Unit Division

Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units may be established only if each optional unit is located on non-contiguous land, unless otherwise allowed by written agreement.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8):

(a) You may select only one price election for all the cranberries in the county insured under this policy.

(b) You must report, by the production reporting date designated in section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8):

(1) Any damage, removal of vines, change in practices, or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres;

(2) The age of the vines; and

(3) Any other information that we request in order to establish your approved yield.

We will adjust the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the removal of vines, damage, change in practices, and any other circumstance that may affect the yield potential of the insured crop. If you fail to notify us of any circumstance that may affect your yields from previous levels, we will adjust your production guarantee as necessary at any time we become aware of the circumstance.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§457.8), the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§457.8), the cancellation and termination dates are November 20.

6. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§457.8), the crop insured will be all the cranberries in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;

(b) That are grown for harvest as cranberries;

(c) That are grown in a bog that, if inspected, is considered acceptable by us; and

(d) That are grown on vines that have completed four growing seasons after the vines were set out, unless otherwise provided by the actuarial table or by written agreement.

7. Insurance Period

(a) In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(1) Coverage begins on November 21 of each crop year, except that for the year of application, if your application is received after November 11, but prior to November 21, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10 day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the bog.

(2) The calendar date for the end of the insurance period for each crop year is November 20.

(b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8):

(1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.

(2) If you relinquish your insurable share on any insurable acreage of cranberries on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for, such acreage for that crop year unless:

(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

8. Causes of Loss

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only...
§457.132  7 CFR Ch. IV (1-1-14 Edition)

against the following causes of loss that occur during the insurance period:

1. Adverse weather conditions;
2. Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the bog;
3. Wildlife;
4. Earthquake;
5. Volcanic eruption;
6. Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period; or
7. Failure or breakdown of irrigation equipment or facilities due to direct damage to the irrigation equipment or facilities from an insurable cause of loss if the cranberry crop is damaged by freezing temperatures within 72 hours of such failure or breakdown and repair or replacement was not possible before damage occurred.

(b) In addition to the causes of loss excluded in section 12 (Cause of Loss) of the Basic Provisions (§457.8), we will not insure against damage or loss of production due to:

1. Disease or insect infestation, unless adverse weather:
   i. Prevents the proper application of control measures or causes properly applied control measures to be ineffective; or
   ii. Causes disease or insect infestation for which no effective control mechanism is available; or
2. Inability to market the cranberries for any reason other than actual physical damage from an insurable cause of loss specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

9. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§457.8):

(a) If you discover damage, or if you intend to claim an indemnity on any insured unit, you must give us notice of probable loss:

1. At least 15 days before the beginning of any harvesting; or
2. Immediately if probable loss is discovered after harvesting has begun.

(b) You must not sell or dispose of any damaged production until the earlier of 15 days from the date of notice of loss or when we give you written consent to do so.

(c) If you fail to meet the requirements of this section, and such failure results in our inability to inspect the damaged production, all such production will be considered undamaged and included as production to count.

10. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

1. For any optional unit, we will combine all optional units for which such production records were not provided; or
2. For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

1. Multiplying the insured acreage by its respective production guarantee;
2. Multiplying the result of section 10(b)(1) by the price election;
3. Multiplying the total production to be counted, (see section 10(c)) by the price election;
4. Subtracting the total in section 10(b)(3) from the total in section 10(b)(2); and
5. Multiplying the result in section 10(b)(4) by your share.

(c) The total production to count (in barrels) from all insurable acreage on the unit will include:

1. All appraised production as follows:
   i. Not less than the production guarantee per acre for acreage:
      A. That is abandoned;
      B. Damaged solely by insured causes;
      C. For which you fail to provide acceptable production records; or
      D. Destroyed or put to another use without our consent;
   ii. Production lost due to uninsured causes;
   iii. Unharvested production; and
   iv. Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we will use the appraised amount of production or defer the claim if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general to the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count; and
   2. All harvested production from the insurable acreage.

(3) Harvested production which, due to insurable causes, is determined not to meet the United States Standards for Fresh Cranberries if available, or would not meet these standards if properly handled, or does not meet the quality requirements of the receiving handler if the United States Standards for Fresh Cranberries, if not available, and
such harvested production has a value less than 75 percent of the market price for cranberries meeting the minimum requirements will be adjusted by:

(i) Dividing the value per barrel of such cranberries by the market price per barrel for cranberries meeting the minimum requirements; and

(ii) Multiplying the result by the number of barrels of such cranberries.

11. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

§ 457.133 Prune crop insurance provisions.

The Prune Crop Insurance Provisions for the 2013 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Prune Crop Provisions

1. Definitions

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include: selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Harvest. Picking of mature prunes from the trees or ground either by hand or machine.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Natural condition prunes. The condition of prunes in which they are normally delivered from a dehydrator or dry yard.

Prunes. Any type or variety of plums that is grown in the area for the production of prunes and that meets the requirements defined in the applicable Federal Marketing Agreement Dried Prune Order.

Standard prunes. Any natural condition prunes:

(a) That grade “C” or better in accordance with the United States Standards for Grades of Fresh Plums and Prunes; or

(b) That meet or exceed the grade standards in effect for the crop year if a Federal Marketing Agreement Dried Prune Order has been established for the area in which the insured crop is grown.

Ton. Two thousand (2,000) pounds avoirdupois.

2. Unit Division

Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable. Instead of establishing optional units by section, section equivalent, or FSA farm serial number optional units may be established if each optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one price election for all the prunes in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(b) You must report, by the production reporting date designated in section 3 of the Basic Provisions, by type if applicable:

1. Any damage, removal of trees, change in practices, or any other circumstance that may reduce the expected yields below the yield upon which the insurance guarantee is based, and the number of affected acres;

2. The number of bearing trees on insurable and uninsurable acreage;

3. The age of the trees and the planting pattern; and

4. For the first year of insurance for acreage interplanted with another perennial crop, and any time the planting pattern of such acreage is changed:

(i) The age of the interplanted crop, and type, if applicable;

(ii) The planting pattern; and

(iii) Any other information that we request in order to establish your approved yield.

(c) We will reduce the yield used to establish your production guarantee, as necessary, based on our estimate of the effect of any such situation listed in section 3(b) that may occur. If you fail to notify us of any situation in section 3(b), we will reduce the yield used to establish your production guarantee at any time we become aware of the circumstance. If the situation in section 3(b) occurred:
(1) Before the beginning of the insurance period, the yield used to establish your production guarantee will be reduced for the current crop year regardless of whether the situation was due to an insured or uninsured cause of loss;

(2) After the beginning of the insurance period and you notify us by the production reporting date, the yield used to establish your production guarantee will be reduced for the current crop year only if the potential reduction in the yield used to establish your production guarantee is due to an uninsured cause of loss; or

(3) After the beginning of the insurance period and you fail to notify us by the production reporting date, an amount equal to the reduction in the yield will be added to the production to count calculated in section 11(c) due to uninsured causes when determining any indemnity. We may reduce the yield used to establish your production guarantee for the subsequent crop year to reflect any reduction in the productive capacity of the trees.

(d) You may not increase your elected or assigned coverage level or the ratio of your price election to the maximum price election if a cause of loss that could or would reduce the yield of the insured crop has occurred prior to the time that you request the increase.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is October 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are January 31.

6. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the prunes in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;

(b) That are grown for the production of natural condition prunes;

(c) That are grown on trees that:

(1) Are listed as insurable types in the Special Provisions;

(2) Are grown on rootstock that is adapted to the area;

(3) Are irrigated (except where otherwise provided in the Special Provisions);

(4) Are grown in an orchard that, if inspected, is considered acceptable by us; and

(5) Have reached at least the seventh growing season after being set out.

7. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions that prohibit insurance attaching to a crop planted with another crop, prunes interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the insurability requirements contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions:

(1) For the year of application, coverage begins on March 1. For each subsequent crop year the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.

(2) The calendar date for the end of the insurance period for each crop year is:

(i) October 1 for California; or

(ii) October 15 for Oregon.

(b) In addition to the provisions of section 11 of the Basic Provisions:

(1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.

(2) If you relinquish your insurable share on any insurable acreage of prunes on or before the acreage reporting date for the crop year and if the acreage was insured by you the previous crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:

(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

(c) If your prune policy is canceled or terminated for any crop year, in accordance with the terms of the policy, after insurance attached for that crop year but on or before the cancellation and termination dates, whichever is later, insurance will not be considered to have attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.

9. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:
§ 457.133

(1) Adverse weather conditions;
(2) Fire, unless weeds and undergrowth have not been controlled or pruning debris has not been removed from the orchard;
(3) Wildlife;
(4) Earthquake;
(5) Volcanic eruption;
(6) Failure of the irrigation water supply, if due to a cause specified in section 9(a)(1) through (5) that occurs during the insurance period;
(7) Insects, but not damage due to insufficient or improper application of pest control measures; or
(8) Plant disease, but not damage due to insufficient or improper application of disease control measures.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to inability to market the prunes for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

10. Duties in the Event of Damage or Loss

(a) In accordance with the requirements of section 14 of the Basic Provisions, you must leave representative samples in accordance with our procedures.

(b) In addition to the requirements of section 14 of the Basic Provisions, the following will apply:

(1) You must notify us within 3 days of the date harvest should have started if the crop will not be harvested.
(2) You must notify us at least 15 days before any production from any unit will be sold by direct marketing or sold as fresh fruit. We will conduct an appraisal that will be used to determine your production to count for production that is sold by direct marketing or is sold as fresh fruit production. If damage occurs after this appraisal, we will conduct an additional appraisal. These appraisals, and any acceptable records provided by you, will be used to determine your production to count. Failure to give timely notice that production will be sold by direct marketing or sold as fresh fruit will result in an appraised amount of production to count of not less than the production guarantee per acre if such failure results in our inability to inspect the damaged production.
(3) If you intend to claim an indemnity on any unit, you must notify us at least 15 days prior to the beginning of harvest, or immediately if damage is discovered during harvest, so that we may inspect the damaged production.
(4) You must not destroy the damaged crop until after we have given you written consent to do so. If you fail to meet the requirements of this section and such failure results in our inability to inspect the damaged production, all such production will be considered undamaged and included as production to count.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or
(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage for each type, if applicable, by its respective production guarantee;
(2) Multiplying the result of 11(b)(1) by the respective price election for each type, if applicable;
(3) Totaling the results of section 11(b)(2);
(4) Multiplying the total production to count (see section 11(c)), of each type, if applicable, by its respective price election;
(5) Totaling the results of section 11(b)(4);
(6) Subtracting the result of section 11(b)(5) from the result of section 11(b)(3); and
(7) Multiplying the result of section 11(b)(6) by your share.

Example 1: You select 75 percent coverage level, 100 percent of the price election, and have a 100 percent share in 50.0 acres of type A prunes in the unit. The production guarantee is 2.5 tons per acre and your price election is $630.00 per ton. You harvest 10.0 tons. Your indemnity would be calculated as follows:

(1) 50.0 acres x 2.5 tons = 125.0-ton production guarantee;
(2) 125.0-ton guarantee x $630.00 price election = $78,750 value of production guarantee;
(3) Totaling the results of section 11(b)(2);
(4) Multiplying the total production to count (see section 11(c)), of each type, if applicable, by its respective price election;
(5) Totaling the results of section 11(b)(4);
(6) Subtracting the result of section 11(b)(5) from the result of section 11(b)(3); and
(7) Multiplying the result of section 11(b)(6) by your share.

Example 2: In addition to the information in the first example, you have an additional 50.0 acres of type B prunes with 100 percent share in the same unit. The production guarantee is 2.0 tons per acre and the price election is $550.00 per ton. You harvest 5.0 tons. Your total indemnity for both types A and B would be calculated as follows:

(1) 50.0 acres x 2.5 tons = 125.0-ton production guarantee for type A and 50.0 acres x 2.0 tons = 100.0-ton production guarantee for type B;
(2) 125.0-ton guarantee x $630.00 price election = $78,750 value of production guarantee for type A and 100.0-ton guarantee x $550.00 value of production guarantee for type B;
§ 457.134 Peanut crop insurance provisions.

The Peanut Crop Insurance Provisions for the 2007 and succeeding crop years are as follows:

Reinsured policies: (Appropriate title for insurance provider).

Both FCIC and reinsured policies.

1. Definitions

Base contract price. The price for farmers’ stock peanuts stipulated in the sheller contract, without regard to discounts or incentives that may apply, not to exceed the price election times the price factor specified in the Special Provisions.

Farmers’ stock peanuts. Picked or threshed peanuts produced in the United States, which are not shelled, crushed, cleaned, or otherwise changed (except for removal of foreign material, loose shelled kernels and excess moisture) from the condition in which peanuts are customarily marketed by producers.

Green peanuts. Peanuts that are harvested and marketed prior to maturity without drying or removal of moisture either by natural or artificial means.

Handler. A person who is a sheller, a buying point, a marketing association, or has a contract with a sheller or a marketing association to accept all of the peanuts marketed through the marketing association for the crop year. The handler acquires peanuts for resale, domestic consumption, processing, exportation, or crushing through a business involved in buying and selling peanuts or peanut products.

Harvest. The completion of digging and threshing and removal of peanuts from the field.

Marketing association. A cooperative approved by the Secretary of the United States Department of Agriculture to administer payment programs for peanuts.

Planted acreage. In addition to the requirements in the definition in the Basic Provisions, peanuts must initially be planted in a row pattern which permits mechanical cultivation, or that allows the peanuts to be cared for in a manner recognized by agricultural experts as a good farming practice. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions or by written agreement.

Price election. In addition to the definition in the Basic Provisions, the price election for peanuts insured in accordance with a sheller
contract will be the base contract price specified in the shelter contract.

**Price factor.** The factor specified in the Special Provisions that places limits on the base contract price.

**Sheller.** Any business enterprise regularly engaged in processing peanuts for human consumption; that possesses all licenses and permits for processing peanuts required by the state in which it operates; and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process contracted peanuts within a reasonable amount of time after harvest.

**Sheller contract.** A written agreement between the producer and a sheller, or the producer and a handler, containing at a minimum:

(a) The producer's commitment to plant and grow peanuts, and to deliver the peanut production to the sheller or handler;

(b) The sheller's or handler's commitment to purchase all the production stated in the sheller contract (an option to purchase is not a commitment); and

(c) A base contract price.

If the agreement fails to contain any of these terms, it will not be considered a shelter contract.

2. Unit Division

In accordance with the Basic Provisions, basic and optional units are applicable, unless limited by the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) The price election percentage you choose for peanuts which are not insured in accordance with a sheller contract (may also include peanuts in excess of the amount required to fulfill your sheller contract) and for peanuts insured in accordance with a shelter contract must have the same percentage relationship to the maximum price election offered by us for peanuts not insured in accordance with a sheller contract. For example, if you choose 100 percent of the maximum price election for peanuts not insured in accordance with a shelter contract, you must also choose 100 percent of the applicable price election for peanuts insured in accordance with a sheller contract.

(b) You may not insure more pounds of peanuts than your production guarantee (per acre) multiplied by the number of acres that will be planted to peanuts. For the purposes of determining the guarantee, premiums, indemnities, replant payments, and prevented planting payments:

(i) Where all production of peanuts is grown under one or more shelter contracts, you may elect a price election to cover all insurable peanuts that is the base contract price contained in such shelter contracts or the price contained in the Special Provisions.

(ii) Where some peanuts are grown under one or more shelter contracts but some peanuts are not grown under a shelter contract, you may elect:

(a) The price election contained in the Special Provisions to cover all insurable peanuts; or

(b) The price election using the base contract price for peanuts grown under a shelter contract and the price contained in the Special Provisions for peanuts not grown under a shelter contract.

(c) Where none of the peanuts are grown under a shelter contract, the price election will be the price contained in the Special Provisions.

(d) Any peanuts excluded from the shelter contract at any time during the crop year will be insured at the price election specified in the Special Provisions.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jackson, Victoria, Goliad, Bee, Live Oak, McMullen, La Salle, and Dimmit Counties, Texas and all Texas Counties lying south, thereof.</td>
<td>January 15.</td>
</tr>
<tr>
<td>El Paso, Hudspeth, Culberson, Reeves, Loving, Winkler, Ector, Upton, Reagan, Sterling, Coke, Tom Green, Concho, McCulloch, San Saba, Mills, Hamilton, Bosque, Johnson, Tarrant, Wise, Cooke Counties, Texas, and all Texas counties south and east thereof; and all other states, except New Mexico, Oklahoma, and Virginia.</td>
<td>February 28.</td>
</tr>
<tr>
<td>New Mexico; Oklahoma; Virginia; and all other Texas counties</td>
<td>March 15.</td>
</tr>
</tbody>
</table>

6. Report of Acreage

In addition to the requirements of section 6 of the Basic Provisions, you must provide a copy of all shelter contracts to us on or before the acreage reporting date if you wish to insure your peanuts in accordance with your shelter contract.
§457.134

7 CFR Ch. IV (1-1-14 Edition)

7. [Reserved]

8. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the peanuts grown in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share;
(2) That are planted for the purpose of marketing as farmers' stock peanuts;
(3) That are a type of peanut designated in the Special Provisions as being insurable;
(4) That are not (unless allowed by the Special Provisions or by written agreement):
   (i) Planted for the purpose of harvesting as green peanuts;
   (ii) Interplanted with another crop; or
   (iii) Planted into an established grass or legume; and
(5) Whether or not the peanuts are grown in accordance with a sheller contract (if not grown in accordance with the sheller contract, the peanuts will be valued at the price election issued by FCIC for the purposes of determining the production guarantee, premium, and indemnity).
(b) You will be considered to have a share in the insured crop if, under the sheller contract, you retain control of the acreage on which the peanuts are grown, you are at risk of a production loss, and the sheller contract provides for delivery of the peanuts to the sheller or handler for and for a stipulated base contract price.
(c) A peanut producer who is also a sheller or handler may establish an insurable interest if the following requirements are met:
   (1) The producer must comply with these Crop Provisions;
   (2) Prior to the sales closing date, the Board of Directors or officers of the sheller or handler must execute and adopt a resolution that contains the same terms as a sheller contract. Such resolution will be considered a sheller contract under this policy; and
   (3) Our inspection reveals that the processing facilities comply with the definition of a sheller contained in these Crop Provisions.

9. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

(a) Any acreage of the insured crop damaged before the final planting date, to the extent that the majority of producers in the area would normally not further care for the crop, must be replanted unless we agree that replanting is not practical.
(b) We will not insure any acreage:
   (1) On which peanuts are grown using no-till or minimum tillage farming methods unless allowed by the Special Provisions or written agreement; or
   (2) Which does not meet the rotation requirements, if any, contained in the Special Provisions.

10. Insurance Period

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the date immediately following planting as follows:

(a) November 30 in all states except New Mexico, Oklahoma, and Texas; and
(b) December 31 in New Mexico, Oklahoma, and Texas.

11. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of the irrigation water supply, if due to a cause of loss contained in section 11(a) through (g) that occurs during the insurance period.

12. Replanting Payments

(a) A replanting payment is allowed as follows:
   (1) In lieu of provisions in section 13 of the Basic Provisions that limit the amount of a replanting payment to the actual cost of replanting, the amount of any replanting payment will be determined in accordance with these Crop Provisions;
   (2) Except as specified in section 12(a)(1), you must comply with all requirements regarding replanting payments contained in section 13 of the Basic Provisions; and
   (3) The insured crop must be damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage and it is practical to replant.
   (b) The maximum amount of the replanting payment per acre will be the lesser of:
      (1) 20.0 percent of the production guarantee, multiplied by your price election, multiplied by your share; or
      (2) $80.00 multiplied by your insured share.
   (c) If there are different base contract prices or you also have insurable peanuts not grown under a contract:
      (1) If the sheller contracts are for different types of peanuts or one type of peanut is grown under a sheller contract and another...
is not, replanting payments will be valued using the price election elected by you for the planted acreage, as applicable (For an example, you have two sheller contracts and the contracted contract price is $0.23 per pound for Runner type peanuts, then $0.23 per pound will be used for the value of any replanted Runner type peanut acreage. If the base contract prices were replaced, the liability will be used for the value of any replanted Spanish type peanut acreage.

(2) If the sheller contracts are for the same type of peanuts but they have different base contract prices:
(i) If the peanuts under each sheller contract are insured in separate optional units, each respective price election from each sheller contract will apply to each respective unit; or
(ii) If all or some of peanuts under both sheller contracts are insured in the same unit, then the replanted acreage will be prorated to each contract based on the number of acres needed to fulfill each contract (For example, if there are 20 acres in the unit and 10 were replanted, the production guarantee per acre for the unit is 2,000 pounds per acre, and the contract for $0.23 was for 25,000 pounds and the contract for $0.21 was for 15,000 pounds, then the acreage under the $0.23 contract constitutes 62.5 percent of the acreage in the unit (25,000/40,000) and the other sheller contract 37.5 percent of the acreage (15,000/40,000). Of the 10 acres replanted, 6.25 acres (10 x .625) would be paid at the $0.23 price election and 3.75 acres (10 x .375) would be paid at the $0.21 price election).

(3) If the peanuts are not grown under a contract, the replanting payments will be valued using the price election as specified in the Special Provisions. If the unit has peanuts grown under a sheller contract and peanuts not grown under a sheller contract, the replanted acreage must be prorated between the contract and non-contract acreage by determining the acreage grown under a contract and the remaining acreage in the unit (For example, if there are 20 acres in the unit and 10 were replanted, the production guarantee per acre for the unit is 2,000 pounds per acre, there is a sheller contract for $0.23 for 25,000 pounds, the remaining peanuts are not grown under a sheller contract, and the price election in the Special Provisions is for $0.20. The peanuts under the sheller contract constitute 62.5 percent (25,000/40,000) of the acreage in the unit and remaining peanuts constitute 37.5 percent (40,000-25,000/40,000) of the acreage. Of the 10 acres replanted, 6.25 acres (10 x .625) would be paid with the liability based on the $0.23 price election and 3.75 acres (10 x .375) would be paid with the liability based on the $0.20 price election).

(d) When the crop is replanted using a practice that is uninsurable for an original planting, the liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

(e) Replanting payments will be calculated using your price election and production guarantee for the crop type that is replanted and insured. A revised acreage report will be required to reflect the replanted type, if applicable.

13. Duties in the Event of Damage or Loss
Representative samples are required in accordance with section 14 of the Basic Provisions.

14. Settlement of Claim
(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:
(1) Optional unit, we will combine all optional units for which acceptable records of production were not provided; or
(2) Basic unit, we will allocate any mingled production to such units in proportion to our liability for the harvested acreage for the unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the number of insured acres by the respective production guarantee (per acre) for peanuts insured under a sheller contract or not insured under a sheller contract, as applicable;
(2) Multiplying each result of section 14(b)(1) by the applicable price election for peanuts insured at the base contract price or the price election specified in the Special Provisions, as applicable;
(3) Totaling the results of section 14(b)(2);
(4) Multiplying the production to count by the respective price election (If you have one or more sheller contracts, we will value your production to count by using your highest price election first and will continue in decreasing order to your lowest price election based on the amount of peanuts insured at each price election);
(5) Totaling the results of section 14(b)(4);
(6) Subtracting the result of section 14(b)(5) from the result of section 14(b)(3); and
(7) Multiplying the result in section 14(b)(6) by your share.

Example 1 (without a sheller contract):
You have 100 percent share in 25 acres of Valencia peanuts in the unit, with a production guarantee (per acre) of 2,000 pounds, the price election specified in the Special Provisions is $0.17 per pound, and your production to count is 43,000 pounds.
(1) 25 acres x 2,000 pounds = 50,000 pound guarantee;
(2) 50,000 pound guarantee x $0.17 price election specified in the Special Provisions = $8,500.00 guarantee;
(3) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with section 14(e));

(4) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for the acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(i) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(ii) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(5) All harvested production from the insurable acreage.

e) Mature peanuts may be adjusted for quality when production has been damaged by an insured cause of loss.

(1) To enable us to determine the number of pounds, price per pound, and the quality of production for any peanuts that qualify for quality adjustment, we must be given the opportunity to have such peanuts inspected and graded before you dispose of them.

(2) If you dispose of any production without giving us the opportunity to have the peanuts inspected and graded, the gross weight of such production will be used in determining total production to count unless you submit a marketing record satisfactory to us which clearly shows the number of pounds, price per pound, and quality of such peanuts.

(3) Such production to count will be reduced if the price per pound received for damaged peanuts is less than 85 percent of the price election by:

(1) Dividing the price per pound for the damaged peanuts, as determined by us in accordance with section 14(e)(1), received for the insured type of peanuts by the applicable price election; and

(ii) Multiplying this result by the number of pounds of such production.
§457.135 Onion crop insurance provisions.

The onion crop insurance provisions for the 2013 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE
Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)
Both FCIC and reinsured policies:

Onion Crop Provisions

1. Definitions

Damaged onion production. Storage type onions that do not grade U.S. No. 1 or do not satisfy any other standards that may be contained in the Special Provisions; or non-storage type onions which do not satisfy standards contained in any applicable marketing order or other standards that may be contained in the Special Provisions.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of harvesting all or a portion of the crop.

Direct seeded. Onions planted by placing onion seed by machine or by hand at the correct depth, into a seedbed that has been prepared.
§457.135 7 CFR Ch. IV (1-1-14 Edition)

properly prepared for the planting method and production practice.

Harvest. Removal of the onions from the field after topping and lifting or digging.

Lifting or digging. A pre-harvest process in which the onion roots are severed from the soil and the onion bulbs laid on the surface of the soil for drying in the field.

Non-storage onions. Onions of a Bermuda, Granex, or Grano variety, or hybrids developed from these varieties, that are harvested as a bulb and dried to a lower moisture content, are firmer, have more outer layers of paper-like skin, and are darker in color than non-storage onions. They are more pungent, have a lower sugar content, and can be stored for several months under proper conditions prior to use without deterioration.

Storage onions. Onions, other than a Bermuda, Granex, or Grano variety, or hybrids developed from these varieties, that are harvested as a bulb and dried to a lower moisture content, are firmer, have more outer layers of paper-like skin, and are darker in color than non-storage onions. They are more pungent, have a lower sugar content, and can be stored for several months under proper conditions prior to use without deterioration.

Topping. A pre-harvest process to initiate curing, in which onion foliage is removed or broken.

Transplanted. Onions planted by placing of the onion plant or sets, by machine or by hand at the correct depth, into a seedbed that has been properly prepared for the planting method and production practice.

2. Unit Division.

In addition to the requirements of section 34 of the Basic Provisions, optional units may be established by type, if separate types are designated in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 of the Basic Provisions (§457.8), you may select only one price election for all the onions in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each onion type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(b) Your production guarantee progresses, in stages, to the final stage production guarantee. Stages will be determined on an acre basis. At least 75 percent (75%) of the plants on such acreage must be at the same stage to qualify for the first and second stages. The stages are as follows:

(1) First stage extends:
   (i) For direct seeded storage and non-storage onions, from planting until the emergence of the fourth leaf; and
   (ii) For transplanted storage and non-storage onions, from transplanting of onion plants or sets through the 30th day after transplanting.

(2) Second stage extends:

In accordance with section 4 of the Basic Provisions, the contract change date is:

(a) June 30 preceding the cancellation date for counties with an August 31, September 30, or November 30 cancellation date;
(b) November 30 preceding the cancellation date for counties with a February 1 cancellation date; or
(c) As designated in the Special Provisions.

5. Cancellation and Termination Dates.

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are as follows, unless otherwise designated in the Special Provisions:

<table>
<thead>
<tr>
<th>State &amp; County</th>
<th>Cancellation date</th>
<th>Termination date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arizona; Georgia; Kinney, Uvalde, Medina, Bexar, Wilson, Karnes, Bee, and San Patricio Counties, Texas, and all Texas Counties lying south thereof.</td>
<td>August 31</td>
<td>August 31.</td>
</tr>
<tr>
<td>Umatilla County, Oregon; and Walla Walla County, Washington.</td>
<td>August 31</td>
<td>September 30.</td>
</tr>
<tr>
<td>All California Counties, except Lassen, Modoc, Shasta and Siskiyou.</td>
<td>September 30</td>
<td>September 30.</td>
</tr>
<tr>
<td>Hawaii</td>
<td>September 30</td>
<td>November 30.</td>
</tr>
<tr>
<td>All other states and counties</td>
<td>February 1</td>
<td>February 1.</td>
</tr>
</tbody>
</table>

In addition to the provisions of section 6 of the Basic Provisions, if the Special Provisions require a processor contract to insure your onions, you must provide a copy of all your processor contracts to us on or before the acreage reporting date.

7. Annual Premium

In lieu of the provisions of section 7(c) of the Basic Provisions (§457.8), the annual premium amount is computed by multiplying the final stage production guarantee by the price election, the premium rate, the insured acreage, your share at the time of planting, and any applicable premium adjustment factors contained in the actuarial documents.

8. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the storage and non-storage onions (excluding green (bunch) or seed onions, chives, garlic, leeks, shallots, and scallions) in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That are planted for harvest as either storage onions or non-storage onions;
(c) That are not (unless allowed by the Special Provisions or by written agreement):
(1) Interplanted with another crop, unless the onions are interplanted with a windbreak crop and the windbreak crop is destroyed within 70 days after completion of seeding or transplanting; or
(2) Planted into an established grass or legume.

9. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions (§457.8), we will not insure any acreage of the insured crop that:

(a) Was planted the previous year to storage or non-storage onions, green (bunch) onions, seed onions, chives, garlic, leeks, shallots, or scallions unless different rotation requirements are designated in the Special Provisions or we agree in writing to insure such acreage; or
(b) Is damaged before the final planting date to the extent that the majority of producers in the area would normally not further care for the crop and is not replanted, unless we agree that it is not practical to replant.

10. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions (§457.8), the acreage must be planted on or before the final planting date designated in the Special Provisions except as allowed in section 16 of the Basic Provisions.
(b) In accordance with the provisions of section 11 of the Basic Provisions, unless
otherwise designated in the Special Provisions, the insurance period ends at the earliest of:

(1) The calendar date for the end of the insurance period as follows:
   (i) May 20 for 1015 Super Sweets, and any other non-storage onions in Cameron, Hidalgo, Starr, and Willacy Counties, Texas;
   (ii) June 1 for Vidalia, and any other non-storage onions planted in the state of Georgia;
   (iii) June 30 for all storage and non-storage onions in Arizona;
   (iv) July 15 for 1015 Super Sweets, and any other non-storage onions for all Texas counties except Cameron, Hidalgo, Starr, and Willacy;
   (v) July 31 for fall planted non-storage onions in Oregon and Washington;
   (vi) August 31 for all non-storage onions not otherwise specified;
   (vii) October 15 for all storage onions not otherwise specified;

(2) In addition to the requirements of section 11(b) of the Basic Provisions, fourteen days after lifting or digging.

11. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur within the insurance period:
   (1) Adverse weather conditions;
   (2) Fire;
   (3) Insects, but not damage due to insufficient or improper application of pest control measures;
   (4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
   (5) Wildlife, unless control measures have not been taken;
   (6) Earthquake;
   (7) Volcanic eruption; or
   (8) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period.

(b) In addition to the causes of loss not insured against as listed in section 12 of the Basic Provisions (§457.8), we will not insure against any loss of production due to damage that occurs or becomes evident after the end of the insurance period, including, but not limited to, loss of production that occurs after onions have been placed in storage.

12. Replanting Payment

(a) In accordance with section 13 of the Basic Provisions (§457.8), a replanting payment is allowed if the crop is damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the final stage production guarantee for the acreage and we determine that it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be your actual cost for replanting, but will not exceed the lesser of:
   (1) 7 percent of the final stage production guarantee multiplied by your price election for the type originally planted and by your insured share; or
   (2) 18 hundredweight multiplied by your price election for the type originally planted and by your insured share.

(c) When onions are replanted using a practice that is uninsurable as an original planting, the liability for the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

13. Duties in the Event of Damage or Loss

(a) In accordance with the requirements of section 14 of the Basic Provisions, any representative samples of the crop that may be required must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be topped, lifted, dug, harvested or destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed.

(b) You must notify us at least 15 days before any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine your production to count for production that is sold by direct marketing. If damage occurs after this appraisal, we will conduct an additional appraisal. These appraisals, and any acceptable records provided by you, will be used to determine your production to count. Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count that is not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.

14. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide production records:
   (1) For any optional units, we will combine all optional units for which acceptable production records were not provided; or
   (2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:
   (1) Multiplying the insured acreage by the respective production guarantee;
   (2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
   (3) Totaling the results in section 14(b)(2);
   (4) Multiplying the total production to be counted (see section 14(c)) by the respective price elections you chose;
   (5) Totaling the results of section 14(b)(4);
Federal Crop Insurance Corporation, USDA  §457.135

(6) Subtracting the result in section 14(b)(5) from the result in 14(b)(3); and
(7) Multiplying the result in section 14(b)(6) by your share.

For Example:
You have a 100 percent share in 100 acres of a unit of transplanted storage onions with a production guarantee of 200 hundredweight per acre, and you select 100 percent of the price election of $8.00 per hundredweight.

Your crop suffers a covered cause of loss on 25 acres during the second stage which has a second stage production guarantee of 60 percent of the final stage production guarantee which equals 120 hundredweight per acre. The appraised production on the 25 acres was 2,500 hundredweight of onion production. Your harvested onion production on the remaining 75 acres is 16,000 hundredweight of harvested production to count. Your indemnity will be calculated as follows:

1) 25 acres x 120 hundredweight (200 x .60) second stage production guarantee = 3,000 hundredweight, and 75 acres x 200 hundredweight final stage production guarantee = 15,000 hundredweight;

2) 3,000 hundredweight second stage production guarantee x $8.00 price election = $24,000 value of second stage production guarantee, and 15,000 hundredweight final stage production guarantee x $8.00 price election = $120,000 value of final stage production guarantee;

3) $24,000 value of second stage production guarantee + $120,000 value of final stage production guarantee = $144,000 total value of production guarantee;

4) 500 hundredweight second stage production to count (from step 4 of the section 14(c)(1)(iv) example) x $8.00 price election = $4,000 value of second stage production to count, and 16,000 hundredweight final stage production to count x 8.00 price election = $128,000 value of final stage production to count;

5) $4,000 value of second stage production to count + $128,000 value of final stage production to count = $132,000 total value of production to count;

6) $144,000 total value of production guarantee - $132,000 total value of production to count = $12,000 value of loss; and

7) $12,000 x 100 percent share = $12,000 indemnity payment;

(c) The total production (in hundredweight) to count from all insurable acreage on the unit will include:

1) All appraised production as follows:
   (A) That is abandoned;
   (B) That is direct marketed to consumers if you fail to meet the requirements contained in section 13;
   (C) Put to another use without our consent;
   (D) That is damaged solely by uninsured causes; or
   (E) For which you fail to provide production records that are acceptable to us;

   (ii) Production lost due to uninsured causes;

   (iii) Unharvested onion production (mature unharvested production may be adjusted based on the percent of damaged onion production in accordance with section 14(d));

   (iv) For acreage that does not qualify for the final stage production guarantee, and is not subject to section 14(c)(1)(i) and (ii), the appraised production is reduced by the difference between the first or second stage (as applicable) and the final stage production guarantee; and

For Example:
You have 100 acres of a unit of transplanted storage onions with a production guarantee of 200 hundredweight per acre. Your crop suffers a covered cause of loss on 25 acres during the second stage which has a second stage production guarantee of 60 percent of the final stage production guarantee. The appraised production on the 25 acres was 2,500 hundredweight of onion production. Your second stage production to count on the 25 acres will be calculated as follows:

1) 25 acres x 200 hundredweight final stage production guarantee = 5,000 hundredweight final stage production guarantee;

2) 5,000 hundredweight final stage production guarantee x 60 percent second stage production guarantee = 3,000 hundredweight second stage production guarantee;

3) 5,000 hundredweight final stage production guarantee - 3,000 hundredweight second stage production guarantee = 2,000 hundredweight second stage production guarantee difference between second stage and final stage production guarantee, and

4) 2,500 hundredweight appraised - 2,000 hundredweight difference = 500 hundredweight second stage production to count (for step 4 of the section 14(b) example).

(v) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end if you put the acreage to another use or abandon the crop.

(vi) If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us. (The amount of production to count for such acreage will be based on the harvested onion production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent.
§ 457.136 Tobacco crop insurance provisions.

The Tobacco Crop Insurance Provisions for the 2010 and succeeding crop years are as follows:

FCIC policies:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured policies:

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Tobacco Crop Insurance Provisions

1. Definitions.

Average value. For appraised production, the value of such production divided by the appraised pounds for the tobacco types. For harvested production, the value of such production divided by the harvested pounds for the tobacco type.

Basic unit. In lieu of the definition in the Basic Provisions, a basic unit is all insurable acreage of an insurable type of tobacco in the county in which you have a share on the date of planting for the crop year and that is identified by a single FSA farm serial number at the time insurance first attaches under these provisions for the crop year.

Harvest. Cutting or priming and removing all insured tobacco from the unit.

Hydroponic plants. Seedlings grown in liquid nutrient solutions.

Late planting period. In lieu of the definition in section 1 of the Basic Provisions, the period that begins the day after the final planting date for the insured crop and ends 15 days after the final planting date, unless otherwise specified in the Special Provisions.

Planted acreage. In addition to the definition contained in the Basic provisions, land in which tobacco seedlings, including hydroponic plants, have been transplanted by hand or machine from the tobacco bed to the field.

Pound. Sixteen ounces avoirdupois.

Priming. A method of harvesting tobacco by which one or more leaves are removed from the stalk as they mature.

Tobacco bed. An area protected from adverse weather in which tobacco seed are sown and seedlings are grown until transplanted into the tobacco field by hand or machine.

Tobacco types. Insurable tobacco as shown on the Special Provisions of Insurance.

2. Unit Division.

A basic unit will be determined in accordance with the definition of basic unit contained in section 1 of these Crop Provisions. Optional and enterprise units may be allowed by the Special Provisions of Insurance.

In addition to the requirements of section 3 of the Basic Provisions, you must select only one price election percentage and coverage level for each tobacco type designated in the Special Provisions of Insurance that you elect to insure.

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates.

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

In addition to the requirements of section 6 of the Basic Provisions, you must provide a copy of any written lease agreement, if applicable, between you and any landlord or tenant. The written lease agreement must:
(1) Identify all other persons sharing in the crop; and
(2) Be submitted to us on or before the acreage reporting date.

7. Insured Crop.

(a) In accordance with section 8 of the Basic Provisions, the insured crop will be each tobacco type you elect to insure and for which a premium rate is provided by the actuarial documents:
   (1) In which you have a share;
   (2) That meets all rotation requirements on the Special Provisions of Insurance.
(b) You will be considered to have a share in the insured crop if you retain control of the acreage on which the tobacco is grown and you are at risk of loss.

8. Insurable Acreage.

In addition to the provisions of section 9 of the Basic Provisions, we will not insure any acreage that is:
(a) Planted in any manner other than as provided in the definition of "planted acreage" in section 1 of these Crop Provisions, unless otherwise provided by the Special Provisions of Insurance or by written agreement; or
(b) Damaged before the final planting date to the extent that the majority of producers in the area would normally not further care for the tobacco crop, unless such crop is replanted or we agree that replanting is not practical.

In lieu of the provisions of section 11 of the Basic Provisions, coverage ends at the earlier of:
(a) Total destruction of the tobacco on the unit;
(b) Removal of the tobacco from the unit where grown, except for curing, grading, and packing;
(c) Abandonment of the crop on the unit;
(d) Final adjustment of the loss on the unit; or
(e) The calendar date for the end of the insurance period, which is the date immediately following planting and designated by tobacco types and states (or as otherwise stated on the Special Provisions of Insurance) as follows:
   (i) Flue cured—November 30 in North Carolina and Virginia;
   (ii) Flue cured—October 31 in Alabama, Florida, Georgia, and South Carolina;
   (iii) Burley—February 28 in all states;
   (iv) Dark air cured—March 15 in Kentucky, Tennessee, and Virginia;
   (v) Fire cured—April 15 in Kentucky, Tennessee, and Virginia;
   (vi) Cigar Binder, Cigar Filler, and Cigar Wrapper—April 30 in Connecticut, Massachusetts, Pennsylvania, and Wisconsin; and
   (vii) Maryland type—May 15 in Maryland and Pennsylvania.

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:
(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of the irrigation water supply due to a cause of loss specified in sections 10(a) through (g) that also occurs during the insurance period.

11. Duties In The Event of Damage or Loss.

(a) In accordance with section 14 of the Basic Provisions, you must maintain representative samples of each unharvested tobacco crop (type) for our inspection. The representative samples must be at least 5 feet wide (at least two rows), and extend the entire length of each field in the unit. The samples must not be harvested or destroyed until after our inspection.
(b) If you have filed a notice of damage, you must leave all tobacco stalks and stubble in the unit intact for our inspection. The stalks and stubble must not be destroyed until we give you written consent to do so or until 30 days after the end of the insurance period, whichever is earlier.

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
   (1) For any optional unit, we will combine all optional units for which such production records were not provided; or
   (2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
   (1) Multiplying the number of insured acres by your applicable production guarantee (per acre);
   (2) Multiplying the result of section 12(b)(1) by your price election;
   (3) Multiplying the total production to count determined in section 12(b)(1) by your price election;
   (4) Subtracting the result of section 12(b)(3) from the result of section 12(b)(2); and...
§457.136

(a) Late planting—In lieu of late planting provisions in the Basic Provisions of the Crop Provisions, if we have conducted an appraisal of your insured crop and we determine that the harvested production you report is inconsistent with the appraised production and you cannot prove that an insurable cause of loss occurred between the appraisal and the end of the insurance period that can account for the reduction in production, your claim will be settled based on the appraised production on insured acreage, even if you have harvested the acreage. If we settle your claim based on your appraised production, section 12(f) regarding quality adjustment is not applicable.

(b) Mature tobacco may be adjusted for quality deficiencies when production has been damaged by insurable causes.

(1) You must contact us before any tobacco is disposed of so we can inspect the tobacco to determine the extent of the damage.

(2) Our inspection will be used to determine whether the average value is reasonable. Based on amount of damage determined during the inspection, if the average value is:

(i) Reasonable, such average value will be used to determine the quality adjustment in section 12(f)(5);

(ii) Unreasonable, we may adjust the average value used to calculate the quality adjustment in section 12(f)(5).

(3) If you dispose of any production without giving us the opportunity to have the tobacco inspected, you will not receive a quality adjustment for such tobacco, regardless of the average value of the production.

(4) Production to count will only be reduced if the average value for damaged tobacco is less than 75 percent of your tobacco price election. You must provide us with records that are acceptable to us which clearly shows the number of pounds, price per pound, and the quality of such tobacco.

(5) Any reduction in the production to count will be determined by

(i) Dividing the average value per pound as determined by us in accordance with section 12(f)(2) of these Crop Provisions by your applicable price election; and

(ii) Multiplying this result by the number of pounds of damaged production.

13. Late Planting

In lieu of late planting provisions in the Basic Provisions regarding acreage initially...
planted after the final planting date, insurance will be provided for acreage planted to the insured crop after the final planting date as follows:

(a) The production guarantee (per acre) for acreage planted during the late planting period will be reduced by:
   (1) One percent per day for the 1st through the 10th day; and
   (2) Two percent per day for the 11th through the 15th day;

(b) The premium amount for insurable acreage planted to the insured crop after the final planting date will be the same as that for timely planted acreage. If the amount of premium you are required to pay (gross premium less our subsidy) for acreage planted after the final planting date exceeds the liability on such acreage, coverage for those acres will not be provided (no premium will be due and no indemnity will be paid for such acreage).

14. Prevented Planting

Your prevented planting coverage will be 35 percent of your production guarantee for timely planted acreage. Additional prevented planting coverage levels are not available for tobacco.

[74 FR 13059, Mar. 26, 2009]

§ 457.137 Green pea crop insurance provisions.

The Green Pea Crop Insurance Provisions for the 1998 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies

Green Pea Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Base contract price. The price stipulated in the processor contract for the tenderometer reading, grade factor, or sieve size that is designated in the Special Provisions, if applicable, without regard to discounts or incentives that may apply.

Bypassed acreage. Land on which production is ready for harvest but the processor elects not to accept such production so it is not harvested.

Combining (vining). Separating pods from the vines and, in the case of shell peas, separating the peas from the pod for delivery to the processor.

Dry peas. Green peas that have matured to the dry form for use as food, feed, or seed.

Good farming practices. The cultural practices generally in use in the county for the crop to make normal progress toward maturity and produce at least the yield used to determine the production guarantee and are those required by the green pea processor contract with the processing company, and recognized by the National Institute of Food and Agriculture as compatible with agronomic and weather conditions in the county.

Green peas. Shell type and pod type peas that are grown under a processor contract to be canned or frozen and sold for human consumption.

Harvest. Combining (vining) of the peas.

Nurse crop (companion crop). A crop planted into the same acreage as another crop, that is intended to be harvested separately, and which is planted to improve growing conditions for the crop with which it is grown.

Peas. Green or dry peas.

Planted acreage. In addition to the definition contained in the Basic Provisions, peas must initially be placed in rows to be considered planted. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions or by written agreement.

Pod type. Green peas genetically developed to be eaten without shelling (e.g., snap peas, snow peas, and Chinese peas).

Practical to replant. In lieu of the definition of “practical to replant” contained in section 1 of the Basic Provisions, practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors including, but not limited to, moisture availability, condition of the field, time to crop maturity, and marketing window, that replanting the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period. It will not be considered practical to replant unless the replanted acreage can produce at least 75 percent of the approved yield, and the processor agrees in writing that it will accept the production from the replanted acreage.

Price election. In lieu of the definition of “Price election” contained in section 1 of the Basic Provisions, price election is defined as the price per pound stated in the processor contract (contracted price) for the tenderometer reading, grade factor, or sieve size contained in the Special Provisions.

Processor. Any business enterprise regularly engaged in canning or freezing green peas for human consumption, that possesses all licenses and permits for processing green
peas required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process contracted green peas within a reasonable amount of time after harvest.

*Processor contract.* A written agreement between the producer and a processor, containing at a minimum:

(a) The producer’s commitment to plant and grow green peas, and to deliver the green pea production to the processor;

(b) The processor’s commitment to purchase all the production stated in the processor contract; and

(c) A base contract price.

Multiple contracts with the same processor that specify amounts of production will be considered as a single processor contract unless the contracts are for different types of green peas.

*Production guarantee (per acre).* The number of pounds determined by multiplying the approved actual production history yield per acre by the coverage level percentage you elect. For shell type peas, the weight will be determined after shelling.

*Shell type.* Green peas genetically developed to be shelled prior to eating, canning or freezing.

2. Unit Division

(a) For any processor contract that stipulates the amount of production to be delivered:

(1) In lieu of the definition contained in the Basic Provisions, a basic unit will consist of all acreage planted to the insured crop in the county that will be used to fulfill contracts with each processor;

(2) There will be no more than one basic unit for all production contracted with each processor;

(3) In accordance with section 12, all production from any basic unit in excess of the amount under contract will be included as production to count if such production is applied to any other basic unit for which the contracted amount has not been fulfilled; and

(b) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units may only be established based on shell type and pod type green peas if the shell type acreage does not continue into the pod type acreage in the same rows or planting pattern.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one price election for all the green peas in the county insured under this policy unless the Special Provisions provide different price elections by type. The percentage of the maximum price election you choose for one type will be applicable to all other types insured under this policy.

(b) The appraised production from bypassed acreage that could have been accepted by the processor will be included when determining your approved yield.

(c) Acreage that is bypassed because it was damaged by an insurable cause of loss will be considered to have a zero yield when determining your approved yield.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State</th>
<th>Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delaware and Maryland</td>
<td>Feb. 15.</td>
</tr>
<tr>
<td>and other states</td>
<td>Mar. 15.</td>
</tr>
</tbody>
</table>

6. Report of Acreage

In addition to the provisions of section 6 of the Basic Provisions, you must provide a copy of all processor contracts to us on or before the acreage reporting date.

7. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the shell type and pod type green peas in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share;

(2) That are grown under, and in accordance with, the requirements of a processor contract executed on or before the acreage reporting date and are not excluded from the processor contract at any time during the crop year; and

(3) That are not (unless allowed by the Special Provisions or by written agreement):

(i) Interplanted with another crop;

(ii) Planted into an established grass or legume; or

(iii) Planted as a nurse crop.
(b) You will be considered to have a share in the insured crop if, under the processor contract, you retain control of the acreage on which the green peas are grown, you are at risk of loss, and the processor contract provides for delivery of green peas under specified conditions and at a stipulated base contract price.

(c) A commercial green pea producer who also is a processor may establish an insurable interest if the following requirements are met:

1. The producer must comply with these Crop Provisions;
2. Prior to the sales closing date, the Board of Directors or officers of the processor must execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and
3. Our inspection reveals that the processing facilities comply with the definition of a processor contained in these Crop Provisions.

8. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:
(a) Any acreage of the insured crop that is damaged before the final planting date, to the extent that the majority of producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant; and
(b) We will not insure any acreage that does not meet the rotation requirements, if applicable, contained in the Special Provisions.

9. Insurance Period

In lieu of the provisions contained in section 11 of the Basic Provisions, regarding the end of the insurance period, insurance ceases at the earlier of:
(a) The date the green peas:
   1. Were destroyed;
   2. Should have been harvested but were not harvested;
   3. Were abandoned; or
   4. Were harvested;
(b) The date you harvest sufficient production to fulfill your processor contract if the processor contract stipulates a specific amount of production to be delivered;
(c) Final adjustment of a loss; or
(d) September 15 of the calendar year in which the insured green peas would normally be harvested; or
(e) September 30 of the calendar year in which the insured peas would normally be harvested if you provide notice to us that the insured crop will be harvested as dry peas (see section 11(d)).

10. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions:
(a) Insurance is provided only against the following causes of loss that occur during the insurance period:
1. Adverse weather conditions, including:
   1. Excessive moisture that prevents harvesting equipment from entering the field or that prevents the timely operation of harvesting equipment; and
   2. Abnormally hot or cold temperatures that cause an unexpected number of acres over a large producing area to be ready for harvest at the same time, affecting the timely harvest of a large number of such acres or the processing of such production is beyond the capacity of the processor, either of which causes the acreage to be bypassed.
2. Fire;
3. Insects, but not damage due to insufficient or improper application of pest control measures;
4. Plant disease but only on acreage not planted to peas the previous crop year. (In certain instances, contained in the Special Provisions or in a written agreement, acreage planted to peas the previous year may be covered. Damage due to insufficient or improper application of disease control measures is not covered);
5. Wildlife;
6. Earthquake;
7. Volcanic eruption; or
8. Failure of the irrigation water supply, if due to a cause of loss contained in section 10(a)(1) through (7) that occurs during the insurance period.
(b) In addition to the causes of loss excluded by section 12 of the Basic Provisions, we will not insure any loss of production due to:
1. Bypassed acreage because of:
   1. The breakdown or non-operation of equipment or facilities; or
   2. The availability of a crop insurance payment. We may deny any indemnity immediately in such circumstance or, if an indemnity has been paid, require you to repay it to us with interest at any time acreage was bypassed due to the availability of a crop insurance payment or;
2. Your failure to follow the requirements contained in the processor contract.

11. Duties in the Event of Damage or Loss

In addition to the notices required by section 14 of the Basic Provisions, you must give us notice:
(a) Not later than 48 hours after:
1. Total destruction of the green peas on the unit; or
2. Discontinuance of harvest on a unit on which unharvested production remains.
(b) Within 3 days after the date harvest should have started on any acreage that will
§ 457.137

7 CFR Ch. IV (1-1-14 Edition)

not be harvested unless we have previously released the acreage. You must also provide acceptable documentation of the reason the acreage was bypassed. Failure to provide such documentation will result in our determination that the acreage was bypassed due to an uninsured cause of loss. If the crop will not be harvested and you wish to destroy the crop, you must leave representative samples of the unharvested crop for our inspection. The samples must be at least 10 feet wide and extend the entire length of each field in each unit. The samples must not be destroyed until the earlier of our inspection or 15 days after notice is given to us;

(c) At least 15 days prior to the beginning of harvest if you intend to claim an indemnity on any unit, or immediately if damage is discovered during the 15 day period or during harvest, so that we may inspect any damaged production. If you fail to notify us and such failure results in our inability to inspect the damaged production, we will consider all such production to be unamaged and include it as production to count. You are not required to delay harvest; and

(d) Prior to the time the green peas would normally be harvested if you intend to harvest the green peas as dry peas.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate, acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by its respective production guarantee, by type if applicable;

(2) Multiplying each result of section 12(b)(1) by the respective price election, by type if applicable;

(3) Totaling the results of section 12(b)(2) if there are more than one type;

(4) Multiplying the total production to count (see section 12(c)), for each type if applicable, by its respective price election;

(5) Totaling the results of section 12(b)(4) if there are more than one type;

(6) Subtracting the results of section 12(b)(4) from the results of section 12(b)(2) if there is only one type or subtracting the results of section 12(b)(5) from the result of section 12(b)(3) if there are more than one type; and

(7) Multiplying the result of section 12(b)(6) by your share.

For example:

You have a 100 percent share in 100 acres of shell type green peas in the unit, with a guarantee of 4,000 pounds per acre and a price election of $0.09 per pound. You are only able to harvest 200,000 pounds. Your indemnity would be calculated as follows:

(1) 100 acres x 4,000 pounds = 400,000 pounds guarantee for the shell type, and 100 acres x 5,000 pounds = 500,000 pounds guarantee for the pod type;

(2) 400,000 pounds guarantee x $0.09 price election = $36,000.00 value of guarantee for the shell type, and 500,000 pounds guarantee x $0.13 price election = $65,000.00 value of guarantee for the pod type;

(3) $36,000.00 + $65,000.00 = $101,000.00 total value of guarantee;

(4) 200,000 pounds x $0.09 price election = $18,000.00 value of production to count for the shell type, and 445,000 pounds x $0.13 = $58,500.00 value of production to count for the pod type;

(5) $18,000.00 + $58,500.00 = $76,500.00 total value of production to count;

(6) $101,000.00 - $76,500.00 = $24,500.00 loss; and

(7) $24,500.00 loss x 100 percent = $24,500.00 indemnity payment.

You also have a 100 percent share in 100 acres of pod type green peas in the same unit, with a guarantee of 5,000 pounds per acre and a price election of $0.13 per pound. You are only able to harvest 450,000 pounds. Your total indemnity for both shell type and pod type green peas would be calculated as follows:

(1) 100 acres x 4,000 pounds = 400,000 pounds guarantee for the shell type, and 100 acres x 5,000 pounds = 500,000 pounds guarantee for the pod type;

(2) 400,000 pounds guarantee x $0.09 price election = $36,000.00 value of guarantee for the shell type, and 500,000 pounds guarantee x $0.13 price election = $65,000.00 value of guarantee for the pod type;

(3) $36,000.00 + $65,000.00 = $101,000.00 total value of guarantee;

(4) 200,000 pounds x $0.09 price election = $18,000.00 value of production to count for the shell type, and 445,000 pounds x $0.13 = $58,500.00 value of production to count for the pod type;

(5) $18,000.00 + $58,500.00 = $76,500.00 total value of production to count;

(6) $101,000.00 - $76,500.00 = $24,500.00 loss; and

(7) $24,500.00 loss x 100 percent = $24,500.00 indemnity payment.

(c) The total production to count, specified in pounds, from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) Not less than the production guarantee for acreage:

(A) That is abandoned;

(B) That is put to another use without our consent;

(C) That is damaged solely by uninsured causes or;

(D) For which you fail to provide production records that are acceptable to us.

(ii) Production lost due to uninsured causes.

(iii) Production on acreage that is bypassed unless the acreage was bypassed due to an insured cause of loss which resulted in production which would not be acceptable under the terms of the processor contract.

(iv) Potential production on insured acreage that you intend to put to another use or...
§ 457.138 Grape crop insurance provisions.

The grape crop insurance provisions for the 2010 and succeeding crop years are as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Grape Crop Provisions

1. Definitions

Graft. To unite a shoot or bud (scion) with a rootstock or an existing vine in accordance with recommended practices to form a living union.

Harvest. Removing the mature grapes from the vines either by hand or machine.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Set out. Physically planting the grape plants in the vineyard.

Ton. Two thousand (2,000) pounds avoirdupois.

Type. A category of grapes (one or more varieties) identified as a type in the Special Provisions.

 Variety. A kind of grape that is distinguished from any other by unique characteristics such as, but not limited to, size, color, skin thickness, acidity, flavors and aromas. In Arizona and California each variety is identified as a separate type in the Special Provisions except for type 065 (other varieties). Type 065 is used to designate varieties not listed as a separate type.

2. Unit Division

(a) In Arizona and California only:

(1) A basic unit as defined in section 1 of the Basic Provisions will be divided into additional basic units by each variety that you insure; and

(2) Provisions in the Basic Provisions that provide for optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Unless otherwise allowed by written agreement, optional units may only be established if each optional unit is located on non-contiguous land or grown and insured under an organic farming practice.
(b) In all states except Arizona and California, in addition to, or instead of, establishing optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated acreage and for acreage grown and insured under an organic farming practice as provided in the unit division provisions contained in the Basic Provisions, a separate optional unit may be established if each optional unit:

(1) Is located on non-contiguous land; or
(2) Consists of a separate type when separate types are specified in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) In Arizona and California, you may select only one coverage level and price election for each grape variety you elect to insure in the county.

(b) In all states except Arizona and California, you may select only one coverage level and price election for each grape type in the county as specified in the Special Provisions. The coverage level you choose for each grape type is not required to have the same percentage relationship to the maximum price election offered by us for each type. For example, if you choose 75 percent coverage level and 100 percent of the maximum price election for one type, you may choose 65 percent coverage level and 75 percent of the maximum price election for another type. If you elect the Catastrophic Risk Protection (CAT) level of insurance for any grape type, the CAT level of coverage will be applicable to all insured grape acreage in the county.

(c) In all states except Arizona and California, if you acquire a share in any grape acreage after you submit your application, such acreage is insurable under the terms of the policy and you did not include the grape type on your application, we will assign the grape type in accordance with section 3(f) and (g) to reflect the reduced production potential.

(d) In Arizona and California only, if the Special Provisions do not provide a price election for a specific variety you wish to insure, you may apply for a written agreement to establish a price election. Your application for the written agreement must include:

(1) The number of tons sold for at least the two most recent crop years; and
(2) The price received for all production of the grape variety in the years for which production records are provided.

(e) If you fail to notify us of any circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres; (2) The number of bearing vines on insurable and uninsurable acreage;

(f) The age of the vines and the planting pattern; and

(g) For the first year of insurance for acreage interplanted with another perennial crop, and any time the planting pattern of such acreage is changed:

(i) The age of the interplanted crop, and the grape type or variety, if applicable;
(ii) The planting pattern; and
(iii) Any other information that we request in order to establish your approved yield.

(h) We will reduce the yield used to establish your production guarantee, based on our estimate of the effect on yield potential of any of the items listed in section 3(f)(1) through (4). If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee at any time we become aware of the circumstance.

(i) Your request to increase the coverage level or price election percentage will not be accepted if a cause of loss that could or would reduce the yield of the insured crop is evident when your request is made.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is October 31 preceding the cancellation date for Arizona and California and August 31 preceding the cancellation date for all other states.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are January 31 in Arizona and California, and November 20 for all other states.
6. Report of Acreage

In addition to the requirements of section 6 of the Basic Provisions, you must report your acreage:
(a) In Arizona and California, by each grape variety you insure; or
(b) In all other states, by each grape type.

7. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be any insurable variety that you elect to insure in Arizona and California, or in all other states all insurable types, in the county for which a premium rate is provided by the actuarial documents:
(a) In which you have a share;
(b) That are grown for wine, juice, raisins, or canning (if such grapes are put to another use (i.e. table grapes), the production to count will be in accordance with section 12(c)(2)(i));
(c) That are grown in a vineyard that, if inspected, is considered acceptable by us;
(d) That, after being set out or grafted, have reached the number of growing seasons designated by the Special Provisions; and
(e) That have produced an average of at least two tons of grapes per acre (or as otherwise provided in the Special Provisions) in at least one of the three crop years immediately preceding the insured crop year, unless we inspect and allow insurance on acreage that has not produced this amount.

8. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions that prohibit insurance attaching to a crop planted with another crop, grapes interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

9. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions:
(1) For the year of application, coverage begins on February 1 in Arizona and California, and November 21 in all other states. Notwithstanding the previous sentence, if your application is received by us after January 12 but prior to February 1 in Arizona or California, or after November 1 but prior to November 21 in all other states, insurance will attach on the 20th day after your properly completed application is received in our local office, unless we inspect the acreage during the 20-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the vineyard.
(2) For each subsequent crop year that the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.
(3) If in accordance with the terms of the policy, your grape policy is cancelled or terminated for any crop year after insurance attached for that crop year, but on or before the cancellation and termination dates, whichever is later, insurance will not be considered to have attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.
(4) The calendar date for the end of the insurance period for each crop year is as follows, unless otherwise specified in the Special Provisions:

(i) October 10 in Mississippi and Texas;
(ii) November 10 in Arizona, California, Idaho, Oregon and Washington; and
(iii) November 20 in all other states.

(b) In addition to the provisions of section 11 of the Basic Provisions:
(1) If you acquire an insurable share in any insurable acreage after coverage begins, but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period. Acreage acquired after the acreage reporting date will not be insured.
(2) If you relinquish your insurable share on any insurable acreage of grapes on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:

(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;
(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and
(iii) The transferee is eligible for crop insurance.

10. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:
(1) Adverse weather conditions;
(2) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the vineyard;
(3) Insects, except as excluded in 10(b)(1), but not damage due to insufficient or improper application of pest control measures;
§ 457.138  

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(5) Wildlife;
(6) Earthquake;
(7) Volcanic eruption; or
(8) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period.
(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§ 437.8), we will not insure against damage or loss of production due to:
(1) Phylloxera, regardless of cause; or
(2) Inability to market the grapes for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

11. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 of the Basic Provisions, the following will apply:
(a) You must notify us within 3 days of the date harvest should have started if the crop will not be harvested.
(b) If the crop has been damaged during the growing season and you previously gave notice in accordance with section 14 of the Basic Provisions (§ 437.8), you must also provide notice at least 15 days prior to the beginning of harvest if you intend to claim an indemnity as a result of the damage previously reported. You must not destroy the damaged crop that is marketed in normal commercial channels, until after we have given you written consent to do so. If you fail to meet the requirements of this section, all such production will be considered undamaged and included as production to count.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide acceptable production records:
(1) For any optional units, we will combine all optional units for which such production records were not provided; or
(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insured acreage by its respective production guarantee;
(2) Multiplying each result in section 12(b)(1) by the respective price election you selected for each type or variety;
(3) Totaling the results in section 12(b)(2);
(4) Multiplying the total production to count of each type or variety, if applicable.

(see section 12 (c) through (e)) by the respective price election you selected;
(5) Totaling the results in section 12(b)(4);
(6) Subtracting the result in section 12(b)(5) from the result in section 12(b)(3); and
(7) Multiplying the result in section 12(b)(6) by your share.
(c) The total production to count (in tons) from all insurable acreage on the unit will include:
(1) All appraised production as follows:
(i) Not less than the production guarantee per acre for acreage:
(A) That is abandoned or destroyed by you without our consent;
(B) That is damaged solely by uninsured causes; or
(C) For which you fail to provide production records;
(ii) Production lost due to uninsured causes;
(iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies in accordance with subsection 12(e)); and
(iv) Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count; and
(2) All harvested production from the insurable acreage:
(i) Grape production that is harvested and dried for raisins will be converted to a fresh weight basis by multiplying the number of tons of raisin production by 4.5.
(ii) Grapes grown for wine, juice, raisins or canning and put to another use, will be counted as production to count on a tonnage basis. No quality adjustment other than that specifically provided for in your policy is available.
(d) If any grapes are harvested before normal maturity or for a special use (such as Champagne or Botrytis-affected grapes), the production of such grapes will be increased by the factor obtained by dividing the price per ton received for such grapes by the price per ton for fully matured grapes of the type for which the claim is being made.
(e) Mature marketable grape production may be adjusted for quality deficiencies as follows:
(1) Production will be eligible for quality adjustment if, due to insurable causes, it has
Federal Crop Insurance Corporation, USDA

§ 457.139  Fresh market tomato (dollar plan) crop insurance provisions.

The fresh market tomato (dollar plan) crop insurance provisions for the 2013 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Fresh market tomato (dollar plan) crop provisions

1. Definitions

Acre. 43,560 square feet of planted acreage when row widths do not exceed six feet. If row widths exceed six feet, the land area on which at least 7,260 linear feet of rows are planted.

Allowable cost. The dollar amount per carton for harvesting, packing, and handling as stated in the Special Provisions.

Amount of insurance per acre. The dollar amount of insurance per acre obtained by multiplying the reference maximum dollar amount shown in the actuarial documents by the coverage level percentage you elect.

Carton. Twenty-five (25) pounds of the insured crop.

Crop year. In lieu of the definition contained in the Basic Provisions (§ 457.8), crop year is a period of time that begins on the first day of the earliest planting period for fall planted tomatoes and continues through the last day of the insurance period for spring planted tomatoes. The crop year is designated by the calendar year in which spring planted tomatoes are harvested.

Direct marketing. The sale of the insured crop directly to consumers without the intervention of an intermediary such as a registered handler, wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Excess rain. An amount of precipitation sufficient to directly damage the crop.

Freeze. The formation of ice in the cells of the plant or its fruit, caused by low air temperatures.

Fresh market tomatoes. Field grown mature green or ripe fresh market tomatoes that meet the Agricultural Marketing Service United States Standards for Grades of Fresh Tomatoes; and the applicable Federal Marketing Order and Florida Tomato Committee Regulations, or their successors.

Harvest. The picking of fresh market tomatoes from the plants, excluding tomatoes salvaged by penhookers.

 Mature green tomato. A tomato that:

   (1) Has a glossy waxy skin that cannot be torn by scraping;

   (2) Has well-formed, jelly-like substance in the locules;

   (3) Has seeds that are sufficiently hard so as to be pushed aside and not cut by a sharp knife in slicing; and

   (4) Shows no red color.

Minimum value. The dollar amount per carton shown in the Special Provisions we will use to value appraised and unsold harvested production to count.

Penhookers. Individuals who purchase the right to salvage tomatoes remaining in the field after commercial harvests are completed.

Plant stand. The number of live plants per acre prior to the occurrence of an insured cause of loss.

Planting period. The period of time designated in the actuarial documents in which the tomatoes must be planted to be considered fall, winter or spring-planted tomatoes.

Potential production. The number of cartons of field grown mature green or ripe fresh market tomatoes that the tomato plants will or would have produced per acre assuming
normal growing conditions and practices by the end of the insurance period.

**Price received.** The gross dollar amount per carton received by the producer before deductions of allowable costs.

**Registered handler.** A person or entity officially certified by the Florida Tomato Committee, or successor entity, to inspect and enforce all the handling regulations for fresh market tomatoes, and report the required packout data to the Florida Tomato Committee.

**Ripe tomato.** A tomato that has a definite break in color from green to tannish-yellow, pink or red.

**Row width.** The widest distance from the center of one row of plants to the center of an adjacent row of plants.

**Tropical depression.** A system identified by the U.S. Weather Service as a tropical depression, and for the period of time so designated, including tropical storms, gales, and hurricanes.

2. **Unit Division**

   (a) A basic unit, as defined in section 1 of the Basic Provisions, will also be divided into additional basic units by planting period.

   (b) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

3. **Amounts of Insurance and Production Stages**

   (a) In addition to the requirements of section 3 of the Basic Provisions you may select only one coverage level (and the corresponding amount of insurance designated in the actuarial documents for the applicable planting period and practice) for all the tomatoes in the county insured under this policy.

   (b) The amount of insurance you choose for each planting period and practice must have the same percentage relationship to the maximum price offered by us for each planting period and practice. For example, if you choose 100 percent of the maximum amount of insurance for a specific planting period and practice, you must also choose 100 percent of the maximum amount of insurance for all other planting periods and practices.

   (c) The production reporting requirements contained in section 3 of the Basic Provisions do not apply to fresh market dollar plan tomatoes.

   (d) The amounts of insurance per acre are progressive by stages as follows:

<table>
<thead>
<tr>
<th>Stage</th>
<th>Percent of the amount of insurance per acre that you selected</th>
<th>Length of time if transplanted</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>50</td>
<td>From planting through the 29th day after planting.</td>
</tr>
<tr>
<td>2</td>
<td>75</td>
<td>From the 30th day after planting until the beginning of stage 3.</td>
</tr>
<tr>
<td>3</td>
<td>90</td>
<td>From the 60th day after planting until the beginning of the final stage.</td>
</tr>
<tr>
<td>Final</td>
<td>100</td>
<td>Begins the earlier of 75 days after planting, or the beginning of harvest.</td>
</tr>
</tbody>
</table>

   (e) Any acreage of fresh market tomatoes damaged in the first, second, or third stage to the extent that the majority of producers in the area would not normally further care for the crop, the indemnity payable for such acreage will be based on the stage the plants had achieved when the insured damage occurred, even if the producer continues to care for the damaged tomatoes.

4. **Contract Changes**

   In accordance with section 4 of the Basic Provisions, the contract change date is April 30 preceding the cancellation date.

5. **Cancellation and Termination Dates**

   In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are July 31.

6. **Report of Acreage**

   In addition to the requirements of section 6 of the Basic Provisions, you must report on or before the acreage reporting date contained in the Special Provisions for each planting period:

   (a) All the acreage of tomatoes in the county insured under this policy in which you have a share;

   (b) The dates the acreage was planted within each planting period; and

   (c) The row width.

7. **Annual Premium**

   In lieu of the premium amount determinations contained in section 7 of the Basic Provisions, the annual premium amount for each cultural practice (e.g., fall transplanted irrigated) is determined by multiplying the final stage amount of insurance per acre by the premium rate for the cultural practice as
established in the Actuarial Table, by the insured acreage, by your share at the time coverage begins, and by any applicable premium adjustment factors contained in the actuarial documents.

8. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the field grown mature green or ripe fresh market tomato types in the county as specified in the Special Provisions for which a premium rate is provided in the actuarial documents:

(a) In which you have a share;
(b) That are:
   (1) Planted to be harvested and sold as fresh market tomatoes;
   (2) Planted within the planting periods designated in the actuarial documents;
   (3) Grown under an irrigated practice;
   (4) Grown on acreage covered by plastic mulch except where the Special Provisions allows otherwise;
   (5) Grown by a person who in at least one of the three previous crop years:
      (i) Grew tomatoes for commercial sale; or
      (ii) Participated in managing a fresh market tomato farming operation;

(c) That are not:
   (1) Interplanted with another crop;
   (2) Planted into an established grass or legume;
   (3) Grown for direct marketing;
   (4) Direct seeded fresh market tomatoes, unless insured by written agreement.

9. Insurable Acreage

(a) In lieu of the provisions of section 9 of the Basic Provisions, that prohibit insurance attaching if a crop has not been planted in at least one of the three previous crop years, we will insure newly cleared land and former pasture land planted to fresh market tomatoes.

(b) In addition to the provisions of section 9 of the Basic Provisions:
   (1) You must replant any acreage of tomatoes damaged during the planting period in which initial planting took place whenever less than 50 percent of the plant stand remains: and
   (i) It is practical to replant;
   (ii) If, at the time the crop was damaged, the final day of the planting period has not passed; and
   (iii) The damage occurs within 30 days of transplanting.
   (2) Whenever tomatoes initially are planted during the fall or winter planting periods and the conditions specified in sections 9(b)(1) (ii) and (iii) are not met, you may elect:
      (i) To replant such acreage and collect any replant payment due as specified in section

12. The initial planting period coverage will continue for such replanted acreage.

(ii) Not to replant such acreage and receive an indemnity based on the stage of growth the plants had attained at the time of damage. However, such an election will result in the acreage being uninsurable in the subsequent planting period.

(3) We will not insure any acreage on which tomatoes (except for replanted tomatoes in accordance with sections 9(b)(1) and (2)), peppers, eggplants, strawberries or tobacco have been grown and the soil was not fumigated or otherwise properly treated before planting the insured tomatoes.

10. Insurance Period

In lieu of section 11 of the Basic Provisions, coverage begins on each unit or part of a unit the later of the date we accept your application, or when the tomatoes are planted in each planting period. Coverage ends on each unit at the earliest of:

(a) Total destruction of the tomatoes on the unit;
(b) Abandonment of the tomatoes on the unit;
(c) The date harvest should have started on the unit on any acreage which will not be harvested;
(d) Final adjustment of a loss on the unit;
(e) Final harvest on the unit; or
(f) The calendar date for the end of the insurance period that is 125 days after the date of transplanting or replanting with transplants.

11. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Excess rain;
(2) Fire;
(3) Freeze;
(4) Hail;
(5) Tornado;
(6) Tropical depression; or
(7) Failure of the irrigation water supply, if caused by an insured cause of loss that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against any loss of production due to:

(1) Disease or insect infestation, unless no effective control measure exists for such disease or insect infestation; or
(2) Failure to harvest in a timely manner or failure to sell the tomatoes, unless such failure is due to actual physical damage caused by an insured cause of loss that occurs during the insurance period. For example, we will not pay an indemnity if you are
unable to sell the insured crop due to quarantine, boycott, or refusal of any person to accept production.

12. Replanting Payments

(a) In accordance with section 13 of the Basic Provisions, a replanting payment is allowed if, due to an insured cause of loss, more than 50 percent of the plant stand will not produce tomatoes and it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be the lesser of your actual cost of replanting or the result obtained by multiplying the per acre replanting payment amount contained in the Special Provisions by your insured share.

(c) In lieu of the provisions contained in section 13 of the Basic Provisions, that limit a replanting payment to one each crop year, only one replanting payment will be made for acreage planted during each planting period within the crop year.

13. Duties in the Event of Damage or Loss

In addition to the requirements contained in section 14 of the Basic Provisions, if you intend to claim an indemnity on any unit you must also give us notice not later than 72 hours after the earliest of:

(a) The time you discontinue harvest of any acreage on the unit;
(b) The date harvest normally would start if any acreage on the unit will not be harvested; or
(c) The calendar date for the end of the insurance period.

14. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional unit, we will combine all optional units for which such production records were not provided; or

(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage in each stage by the amount of insurance per acre for the final stage;

(2) Multiplying each result in section 14(b)(1) by the percentage for the applicable stage (see section 3(d));

(3) Total the results of section 14(b)(2);

(4) Subtracting either of the following values from the result of section 14(b)(3):

(i) For other than catastrophic risk protection coverage, the total value of production to be counted (see section 14(c)); or

(ii) For catastrophic risk protection coverage, the result of multiplying the total value of production to count determined in accordance with section 14(c) by the percentage contained in the Special Provisions.

(5) Multiplying the result of section 14(b)(5) by your share.

For Example: You have a 100 percent share in 10.0 acres of fresh market tomatoes. You select a 70% coverage level of the reference maximum dollar amount of $7,500 per acre. The average price received is $10.00 per carton of tomatoes. Allowable costs are $4.25 per carton. Minimum value is $5.00 per carton.

Your total sold production is 5,000 cartons (5,000 / 10.0 = 500 cartons per acre) and you have an additional 1,000 cartons of unsold harvested production (1,000 / 10.0 = 100 cartons per acre). Your loss occurred in the final stage of production. Your total indemnity is calculated as follows:

<table>
<thead>
<tr>
<th>Section</th>
<th>Formula</th>
<th>Calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>14(c)(3)</td>
<td>$7,500 x 70% = dollar amount of insurance per acre</td>
<td>$5,250</td>
</tr>
<tr>
<td>14(c)(4)</td>
<td>500 cartons x $5.75 = value of sold production ($10 selling price minus $4.25 allowable cost)</td>
<td>2,875</td>
</tr>
<tr>
<td>14(b)(5)</td>
<td>100 cartons of unsold harvested production x $5 minimum value per carton.</td>
<td>+500</td>
</tr>
<tr>
<td>14(b)(5)</td>
<td>Total value of production to count</td>
<td>3,375</td>
</tr>
<tr>
<td>14(b)(5)</td>
<td>Indemnity per acre = ($5,250 - $3,375) x 100% share</td>
<td>1,875</td>
</tr>
<tr>
<td>14(b)(5)</td>
<td>$1,875 x 10.0 acres = $18,750 total indemnity payment</td>
<td>18,750</td>
</tr>
</tbody>
</table>

(c) The total value of production to count from all insurable acreage on the unit will include:

(1) Not less than the amount of insurance per acre for the stage for any acreage:

(1) That is abandoned;

(2) Put to another use without our consent;

(3) That is damaged solely by uninsured causes; or

(4) For which you fail to provide acceptable production records;

(2) The value of the following appraised production will not be less than the dollar amount obtained by multiplying the number of cartons of appraised tomatoes by the minimum value per carton shown in the Special Provisions for the planting period:

(i) Potential production on any fresh market tomato acreage that has not been harvested the required number of times as specified in the Special Provisions.

(ii) Unharvested mature green tomatoes (unharvested production that is damaged or...
defective due to insurable causes and is not marketable will not be counted as production to count; 
(iii) Production lost due to uninsured causes; and 
(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached: 
(A) You may require you to continue to care for the crop so that a subsequent appraisal may be made or the crop harvested to determine actual production. (If we require you to continue to care for the crop and you do not do so, the original appraisal will be used); or 
(B) You may elect to continue to care for the crop, in which case the amount of production to count for the acreage will be the harvested production, or our reappraisal if the crop is not harvested. 
(3) The total value of all sold harvested production from the insurable acreage will be the dollar amount obtained by subtracting the allowable cost contained in the Special Provisions from the price received for each carton of fresh market tomatoes in the load (this result may not be less than the minimum value shown in the Special Provisions for any carton of tomatoes), and multiplying this result by the number of cartons of fresh market tomatoes harvested. 
(4) The total value of all unsold harvested production will be the dollar amount obtained by multiplying the number of cartons of such tomatoes on the unit by the minimum value shown in the Special Provisions for the planting period. Harvested production that is damaged or defective due to an insured cause of loss and is not sold will not be counted as production to count. 
(5) Any penhooker salvage value paid to you will be added to the total dollar value of production to count. 

Example with Minimum Value Option: You have a 100 percent share in 10.0 acres of fresh market tomatoes. You select a 70% coverage level of the reference maximum dollar amount of $7,500 per acre. The average price received is $6.00 per carton of tomatoes. Allowable costs are $4.25 per carton. Minimum value is $5.00 per carton. The Minimum Value Option price is $2.00 per carton. Your total sold production is 5,000 cartons (5,000 / 10.0 = 500 cartons per acre) and you have an additional 1,000 cartons of unsold harvested production (1,000 / 10.0 = 100 cartons per acre). Your loss occurred in the final stage of production. Your total indemnity is calculated as follows:

<table>
<thead>
<tr>
<th>Calculation</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>$7,500 x 70% = dollar amount of insurance per acre</td>
<td>$5,250</td>
</tr>
<tr>
<td>500 cartons x $2 = value of sold production ($6 price received minus $4.25 allowable costs = $1.75. $2.00 minimum value option price is greater than $1.75).</td>
<td>1,000</td>
</tr>
<tr>
<td>100 cartons of unsold harvested production x $5 minimum value per carton.</td>
<td>500</td>
</tr>
<tr>
<td>Total value of production to count</td>
<td>1,500</td>
</tr>
</tbody>
</table>
§ 457.140 Dry pea crop insurance provisions.

The dry pea crop insurance provisions for the 2011 and succeeding crop years are as follows:

**FCIC policies:**

**DEPARTMENT OF AGRICULTURE**

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

**Dry Pea Crop Provisions**

1. Definitions

**Adequate stand.** A population of live plants per acre that will produce at least the yield used to establish your production guarantee.

**Base contract price.** The price per pound stipulated in the processor/seed company contract without regard to discounts or incentives that may apply, and that will be paid to the producer for at least 50 percent of the total production under contract with the processor/seed company.

**Combining.** A mechanical process that separates the peas from the pods and other vegetative matter and places the peas into a temporary storage receptacle.

**Conditioning.** A process that improves the quality of production by screening or any other operation commonly used in the dry pea industry to remove dry peas that are deficient in quality.

**Contract seed peas.** Peas (Pisum sativum L.) grown under the terms of a processor/seed company contract for the purpose of producing seed to be used in planting a future year’s crop.

**Dry peas.** Peas (Pisum sativum L.), Austrian Peas (Pisum sativum spp arvense), Lentils (Lens culinaris Medik.), Chickpeas (Cicer arietinum L.), and other types as listed on the Special Provisions.

**Harvest.** Combining of dry peas. Dry peas that are swathed prior to combining are not considered harvested.

**Local market price.** The cash price per pound for the U.S. No. 1 grade of dry peas as determined by us. Such price will be the prevailing dollar amount these buyers are willing to pay for dry peas containing the maximum limits of quality deficiencies allowable for the U.S. No. 1 grade. Factors not associated with grading under the United States Standards for Whole Dry Peas, Split Peas and Lentils will not be considered, unless otherwise specified in the Special Provisions.

**Nurse crop (companion crop).** A crop planted into the same acreage as another crop to improve the growing conditions for the crop with which it is grown, and that is intended to be harvested separately.

**Planted acreage.** In addition to the definition contained in the Basic Provisions, dry peas must initially be planted in rows to be considered planted. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions or by written agreement.

**Practical to replant.** In addition to the definition contained in the Basic Provisions, it will not be considered practical to replant:

(a) Contract seed peas unless the processor/seed company will accept the production under the terms of the processor/seed company contract.

(b) Fall-planted dry peas more than 25 days after the final planting date for the corresponding spring-planted type of dry peas.

(c) All other dry peas more than 25 days after the final planting date unless replanting is generally occurring in the area.

**Price election.** In addition to the provisions of the definition contained in the Basic Provisions, the price election for contract seed peas will be the percentage you elect (not to exceed 100 percent) of the base contract price and used for the purpose of determining premium and indemnity for contract seed peas under this policy.

**Processor/seed company.** Any business enterprise regularly engaged in the processing of contract seed peas, that possesses all licenses and permits for marketing contract seed peas required by the state in which it operates, and that owns, or has contracted, sufficient drying, screening, and bagging or packaging equipment to accept and process the contract seed peas within a reasonable amount of time after harvest.

**Processor/seed company contract.** A written agreement between the producer and the processor/seed company, executed by the acreage reporting date, containing at a minimum:

(a) The producer’s promise to plant and grow one or more specific varieties of contract seed peas, and deliver the production from those varieties to the processor/seed company;

<table>
<thead>
<tr>
<th>16(b)</th>
<th>Indemnity per acre = $5,250 - $1,500 = $3,750 x 100% share</th>
</tr>
</thead>
<tbody>
<tr>
<td>$3,750 x 10.0 acres = $37,500 total indemnity payment ..........</td>
<td>37,500</td>
</tr>
</tbody>
</table>
(b) The processor/seed company’s promise to purchase all the production stated in the contract; and

(c) A fixed price, or a method to determine such price based on published information compiled by a third party, that will be paid to the producer for at least 50 percent of the production stated in the contract.

Special Provisions. Severance of the stem and pods from the ground without removal of the seeds from the pods and placing them into windrows.

Type. A category of dry peas identified as a type in the Special Provisions.

Windrow. Dry peas where the plants are cut and placed in a row.

2. Unit Division

In addition to, or instead of, establishing optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated acreage as provided in the unit division provisions contained in the Basic Provisions, separate optional units may be established for each dry pea type as specified on the Special Provisions. Contract seed peas and dry pea types not grown under a processor/seed company contract may qualify for separate optional units even if they share a common variety provided each dry pea type is grown on separate acreage and the production is kept separate.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In accordance with the requirements of section 3(b) of the Basic Provisions, you may select only one coverage level for each type listed on the Special Provisions. However, if you elect the Catastrophic Risk Protection (CAT) level of insurance for any dry pea type, the CAT level of coverage will be applicable to all insured dry pea acreage in the county.

(b) In addition to the requirements of section 3 of the Basic Provisions:

(1) If the Special Provisions do not designate separate price elections by type, you may select only one price election for all dry peas in the county insured under this policy.

(2) If the Special Provisions designate separate price elections by type, you may select one price election for each dry pea type so designated in the Special Provisions even if the prices for each type are the same. The price elections you choose for each type are not required to have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you may choose 75 percent of the maximum price election for another type.

(c) In addition to the requirements of section 3 of the Basic Provisions, in counties with both a fall and spring sales closing date for the insured crop:

(1) If you do not have any insured fall-planted dry pea acreage covered under the Winter Coverage Option, you may change your coverage level or percentage of price election until the spring sales closing date; or

(2) If you have any insured fall-planted dry pea acreage covered under the Winter Coverage Option, you may not change your coverage level or percentage of price election after the fall sales closing date.

(d) If a dry pea type is added after the sales closing date, we will assign:

(i) 100 percent of the price election if you elected additional coverage; and

(ii) 55 percent of the price election if you elected catastrophic level of coverage.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

6. Report of Acreage

In addition to the provisions of section 6 of the Basic Provisions, you must submit a copy of the processor/seed company contract to us on or before the acreage reporting date if you are insuring contract seed peas.

7. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the dry pea types in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share;

(2) That are planted for harvesting once maturity is reached as:

(i) Dry peas; or

(ii) Contract seed peas, if the processor/seed company contract is executed on or before the acreage reporting date; and

(3) That are not (unless allowed by the Special Provisions or by written agreement):

(i) Interplanted with another crop;

(ii) Planted into an established grass or legume;

(iii) Planted as a nurse crop; or

(iv) Planted to plow down, graze, harvest as hay, or otherwise not harvest as a mature dry pea crop.

(b) You will be considered to have a share in the insured crop if, under the processor/seed company contract, you retain control of
the acreage on which the dry peas are grown, you are at risk of loss (i.e., if there is a reduction in quantity or quality of your dry pea production, you will receive less income under the contract), and the processor/seed company contract is in effect for the entire insurance period.

(c) In counties for which the actuarial documents provide premium rates for the Winter Coverage Option (see section 15), coverage is available for dry peas between the time coverage begins and the spring final planting date. Coverage under the option is effective only if you qualify under the terms of the option and you elect the option by the sales closing date.

§ 457.140

8. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

(a) We will not insure any acreage that does not meet the rotation requirements, if applicable, contained in the Special Provisions; or

(b) Any acreage of the insured crop damaged before the final planting date, to the extent that producers in the surrounding area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant.

(c) Whenever the Special Provisions designate both fall and spring final planting dates:

(1) Any fall-planted dry peas that is damaged before the spring final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a fall-planted type of dry pea unless we agree that replanting is not practical. If it is not practical to replant a fall-planted type of dry peas but it is practical to replant to a spring-planted type to keep your insurance coverage based on the fall-planted type in force.

(2) Any fall-planted dry pea acreage that is replanted to a spring-planted type when it was practical to replant the fall-planted type will be insured as the spring-planted type and the production guarantee, premium and price election applicable to the spring-planted type will be used. In this case, the acreage will be considered to be initially planted to the spring-planted type.

(3) Notwithstanding section 8(d)(1) and (2), if you have elected coverage under the Winter Coverage Option (if available in the county), insurance will be in accordance with the option.

(d) Whenever the Special Provisions designate only a spring final planting date, any acreage of a fall-planted dry pea crop is not insured unless you request such coverage on or before the spring sales closing date, and we agree in writing that the acreage has an adequate stand in the spring to produce the yield used to determine your production guarantee.

(1) The fall-planted dry pea crop will be insured as a spring-planted type for the purpose of the production guarantee, premium and price election.

(2) Insurance will attach to such acreage on the date we determine an adequate stand exists or on the spring final planting date if we do not determine adequacy of the stand prior to the spring final planting date.

(3) Any acreage of such fall-planted dry peas that is damaged after it is accepted for insurance but before the spring final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a spring-planted type of dry pea unless we agree it is not practical to replant. No replanting payment will be made.

(4) If fall-planted acreage is not to be insured it must be recorded on the acreage report as uninsured fall-planted acreage.

9. Insurance Period

9. Insurance Period

In accordance with the provisions of section 11 of the Basic Provisions, and subject to the provisions provided by the Winter Coverage Option (see section 15) if you elect such option, the insurance period is as follows:

(a) Coverage for fall-planted dry peas not covered by the Winter Coverage Option will begin on the earlier of April 15 or the date we agree to accept the acreage for insurance, but not before March 1, unless otherwise specified in the Special Provisions.

(b) The calendar date for the end of the insurance period for all insurable types of dry peas in the county is September 30 of the crop year in which the crop is normally harvested unless otherwise specified in the Special Provisions.

10. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:

(a) Adverse weather conditions;

(b) Fire;

(c) Insects, but not damage due to insufficient or improper application of pest control measures;

(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(e) Wildlife;

(f) Earthquake;

(g) Volcanic eruption; or

(h) Failure of the irrigation water supply, if due to a cause of loss contained in section 10(a) through (g) that occurs during the insurance period.
11. Replanting Payments

(a) A replanting payment is allowed as follows:

(1) In lieu of provisions in section 13 of the Basic Provisions that limit the amount of a replant payment to the actual cost of replanting, the amount of any replanting payment will be determined in accordance with these Crop Provisions;

(2) You must comply with all requirements regarding replanting payments contained in section 13 of the Basic Provisions (except as allowed in section 11(a)(1)) and in the Winter Coverage Option (see section 15), if applicable;

(3) The insured crop must be damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage;

(4) The acreage must have been initially planted to a spring type of the insured crop in those counties with only a spring final planting date;

(5) When the Winter Coverage Option is in effect for the acreage, damage must occur after the fall final planting date in those counties where both a fall and spring final planting date are designated;

(6) Replanting payments are not available for damaged fall planted dry pea acreage if you have not elected to cover such acreage under the Winter Coverage Option; and

(7) The replanted crop must be seeded at a rate sufficient to achieve a total (undamaged and new seeding) plant population that will produce at least the yield used to determine your production guarantee.

(b) The maximum amount of the replanting payment per acre will be the lesser of 20.0 percent of the production guarantee or 200 pounds, multiplied by your price election, multiplied by your share, unless otherwise stated in the Special Provisions.

(c) When the crop is replanted using a practice that is uninsurable for an original planting, the liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

(d) Replanting payments will be calculated using the price election and production guarantee for the dry pea type that is replanted and insured. For example, if damaged smooth green and yellow pea acreage is replanted to lentils, the price election and production guarantee applicable to lentils will be used to calculate any replanting payment that may be due. A revised acreage report will be required to reflect the replanted type. Notwithstanding the previous two sentences, the following will have a replanting payment based on the guarantee and price election for the crop type initially planted:

(1) Any damaged fall-planted type of dry peas replanted to a spring-planted type that retains insurance based on the production guarantee and price election for the fall-planted type; and

(2) Any acreage replanted at a reduced seeding rate into a partially damaged stand of the insured crop.

12. Duties in the Event of Damage or Loss

Representative samples are required in accordance with section 14 of the Basic Provisions.

13. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:

(1) Optional units, we will combine all optional units for which acceptable records of production were not provided; or

(2) Basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage to your dry pea crop covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage of each dry pea type, if applicable, excluding contract seed peas, by its respective production guarantee;

(2) Multiplying each result of section 13(b)(1) by the respective price election;

(3) Totaling the results of section 13(b)(2);

(4) Multiplying the insured acreage of each contract seed pea variety by its respective production guarantee;

(5) Multiplying each result of section 13(b)(4) by the applicable base contract price;

(6) Multiplying each result of section 13(b)(5) by your selected price election percentage;

(7) Totaling the results of section 13(b)(6);

(8) Totaling the results of section 13(b)(3) and section 13(b)(7);

(9) Multiplying the total production to be counted of each dry pea type, excluding contract seed peas, if applicable (see section 13(d)), by the respective price elections;

(10) Totaling the value of all contract seed pea production (see section 13(e));

(11) Totaling the results of section 13(b)(9) and section 13(b)(10);

(12) Subtracting the result of section 13(b)(11) from the result in section 12(b)(8); and

(13) Multiplying the result of section 13(b)(12) by your share.

For example:

In this example, you have not elected optional units by type. You have a 100 percent share in 100 acres of spring-planted smooth green dry edible peas in the unit, with a 70 percent guarantee of 4,000 pounds per acre and a price election of $0.09 per pound. Your selected price election percentage is 100 percent. You are only able to harvest 200,000

293
§ 457.140

(1) 100 acres x 4,000 pounds = 400,000-pound guarantee;

(2) 400,000-pound guarantee x $0.09 price election = $36,000.00 value of guarantee;

(3) 200,000-pound production to count x $0.09 price election = $18,000.00 value of production to count;

(4) $36,000.00 value of guarantee - $18,000.00 value of production to count = $18,000.00 loss;

and

(5) $18,000.00 x 100 percent share = $18,000.00 indemnity payment.

You also have a 100 percent share in 100 acres of contract seed peas in the same unit, with a 65 percent guarantee of 5,000 pounds per acre and a base contract price of $0.40 per pound. Your selected price election percentage is 75 percent. You are only able to harvest 450,000 pounds. Your total indemnity for both spring-planted smooth green dry edible peas and contract seed peas would be calculated as follows:

(1) 100 acres x 4,000 pounds = 400,000-pound guarantee for the spring-planted smooth green dry edible pea type;

(2) 400,000-pound guarantee x $0.09 price election = $36,000.00 value of guarantee for the spring-planted smooth green dry edible pea type;

(3) 200,000 x .75 price election percentage = $150,000.00 net value of guarantee for the contract seed pea type;

(4) 500,000-pound guarantee x $0.09 base contract price = $200,000.00 gross value of guarantee for the contract seed pea type;

(5) 500,000-pound guarantee x $0.09 base contract price = $200,000.00 gross value of guarantee for the contract seed pea type;

(6) $200,000 x .75 price election percentage = $150,000.00 net value of guarantee for the contract seed pea type;

(7) $36,000.00 + $150,000.00 = $186,000.00 total value of guarantee;

(8) 200,000-pound production to count x $0.09 price election = $18,000.00 value of production to count for the spring-planted smooth green dry edible pea type;

(9) 200,000 x .75 price election percentage = $150,000.00 net value of guarantee for the contract seed pea type;

(10) 450,000-pound production to count x $0.30 = $135,000.00 value of production to count for the contract seed pea type;

(11) $18,000.00 + $135,000.00 = $153,000.00 total value of production to count;

(12) $186,000.00 - $153,000.00 = $33,000.00 loss; and

(13) $33,000.00 loss x 100 percent share = $33,000.00 indemnity payment.

(c) The value of contract seed pea production to count for each variety in the unit will be determined as follows:

(i) Multiplying the local market price or base contract price per pound, whichever is greater, by the price election percentage you selected; and

(ii) Multiplying the result by the number of pounds of such production.

(2) For mature production not meeting the objective, measurable minimum quality requirements (e.g., size, germination percentage) contained in the processor/seed company contract, due to insurable causes, and immature production that is appraised:

(i) Multiplying the highest local market price available for such dry peas by the price election percentage you selected; and

(ii) Multiplying the result by the number of pounds of such production.

(d) The total dry pea production to count (in pounds) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) Not less than the production guarantee per acre for acreage:

(A) That is abandoned;

(B) That is put to another use without our consent;

(C) That is damaged solely by uninsured causes; or

(D) For which you fail to provide production records that are acceptable to us;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production (mature unharvested production of dry peas may be adjusted for quality deficiencies in accordance with section 12 (c) or (e), if applicable); and

(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if the crop is not harvested; and

(2) All harvested production from the insurable acreage.
(e) Mature dry pea production that does not qualify as contract seed peas under the policy terms or does not meet the objective, measurable minimum quality requirements (e.g., test weight, germination percentage) contained in the processor/seed company contract, may be adjusted for quality deficiencies.

(1) Production will be eligible for quality adjustment in accordance with the following, unless otherwise specified in the Special Provisions:

(i) Deficiencies in quality, in accordance with the United States Standards for Whole Dry Peas, Split Peas, and Lentils, result in production grading U.S. No. 2 or worse because of defects, color, skinned production (lentils only), odor, material weathering, or distinctly low quality; or

(ii) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(2) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these Crop Provisions and which occurs within the insurance period;

(ii) The deficiencies, substances, or conditions result in a net price for the damaged production that is less than the local market price;

(iii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us;

(iv) With regard to deficiencies in quality (except test weight, which may be determined by our loss adjuster), the samples are analyzed by:

(A) A grader licensed under the United States Agricultural Marketing Act or the United States Warehouse Act;

(B) A grader licensed under State law, who has a storage agreement with the Commodity Credit Corporation; or

(C) A grader not licensed under State law, but who is employed by a warehouse operator who has a storage agreement with the Commodity Credit Corporation and is in compliance with State law regarding warehouses; and

(v) With regard to substances or conditions injurious to human or animal health, the samples are analyzed by a laboratory approved by us.

(d) Dry Pea production that is eligible for quality adjustment, as specified in sections 12(e) (1) and (2), will be reduced as follows:

(i) The highest local market price for the qualifying damaged production will be determined on the earlier of the date such damaged production is sold or the date of final inspection for the unit. The highest local market price for the qualifying damaged production will be determined in the local area to the extent feasible. We may obtain prices from any buyer of our choice. If we obtain prices from one or more buyers located outside your local market area, we will reduce such prices by the additional costs required to deliver the dry peas to those buyers. Discounts used to establish the net value of the damaged production will be limited to those that are usual, customary, and reasonable.

The value will not be reduced for:

(A) Moisture content;

(B) Damage due to uninsured causes; or

(C) Drying, handling, processing, and any other costs associated with normal harvesting, handling, and marketing of the dry peas, except if the value of the damaged production can be increased by conditioning, we may reduce the value of the production after it has been conditioned by the cost of conditioning but not lower than the value of the production before conditioning;

(ii) The value per pound of the damaged or conditioned production will be divided by the local market price to determine the quality adjustment factor;

(iii) The number of pounds of the damaged or conditioned production will then be multiplied by the quality adjustment factor to determine the production count to be included in section 13(d); and

(iv) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on a weight basis.

14. Prevented Planting

Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have additional levels of coverage as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

15. Winter Coverage Option

(a) In the event of a conflict between this section and sections 1 through 14 of these Crop Provisions, this section will control.

(b) You must have purchased additional coverage under the Dry Pea Crop Provisions in order to select this option.

(c) In return for payment of the additional premium designated in the actuarial documents, this option is available in counties for which the actuarial documents provide premium rates for the Winter Coverage Option.

(d) This option is available only in counties for which the Special Provisions designate both a fall final planting date and a spring final planting date.
§ 457.140

(e) You must select this option on your application for insurance, or on a form approved by us, on or before the sales closing date for the initial year in which you wish to insure dry peas under this option.

(1) Failure to do so means you have rejected this coverage for the dry pea crop planted in the fall and this option is void.

(b) This option will continue in effect until canceled or coverage under the Dry Pea Crop Provisions is canceled or terminated.

(3) This option may be canceled by you or us for any succeeding crop year by giving written notice to the other party on or before the cancellation date contained in section 15(g) preceding the crop year for which the cancellation of this option is to be effective.

(4) You may change your coverage level or percentage of price election for dry pea types until the spring sales closing date if you have selected this option, but do not have any insured fall planted acreage or your fall planted acreage is not eligible for this option.

(1) Contract change date is June 30 preceding the cancellation date;

(2) Cancellation date is September 30, and

(3) Termination date is November 30. For a policy with amounts due, when the sales closing date is prior to the previous crop year termination date, such policies will terminate for the current crop year even if insurance attached prior to the termination date. Such termination will be considered effective as of the sales closing date and no insurance will be considered to have attached for the crop year and no indemnity, prevented planting or replant payment will be owed.

(b) All notices of damage must be provided to us not later than 15 days after the spring final planting date designated in the Special Provisions.

(1) All insurable acreage of each fall planted dry pea type covered under this option must be insured.

(2) The amount of any indemnity paid under the terms of this option will be subject to any reduction specified in the Basic Provisions for multiple crop benefits in the same crop year.

(3) Whenever any acreage of dry peas planted in the fall is damaged during the insurance period and at least 20 acres or 20 percent of the insured planted acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the production guarantee for the acreage you may, at your option, take one of the following actions:

(1) Continue to care for the damaged dry peas. By doing so, coverage will continue under the terms of the Basic Provisions, these Crop Provisions and this option;

(2) Replant the acreage to an appropriate type of insured dry peas. If it is practical, and receive a replanting payment in accordance with the terms of section 11. By doing so, coverage will continue under the terms of the Basic Provisions, these Crop Provisions and this option, and the production guarantee for the dry pea type planted in the fall will remain in effect; or

(3) Destroy the remaining crop on such acreage:

(i) By destroying the remaining crop, you agree to accept an appraised amount of production determined in accordance with section 13(d)(1) of these Crop Provisions to count against the unit production guarantee. This amount will be considered production to count in determining any final indemnity on the unit and will be used to settle your claim as described in section 13.

(ii) You may use such acreage for any purpose, including planting and separately insuring any other crop if such insurance is available.

(iii) If you elect to plant and elect to insure spring-planted dry pea acreage of the same dry pea type (you must elect whether or not you want insurance on the spring-planted acreage of the same dry pea type at the time we release the fall-planted acreage), you must pay additional premium for insurance. Such acreage will be insured in accordance with the policy provisions that are applicable to acreage that is initially planted in the spring to the same dry pea type, and you must:

(A) Plant the spring-planted acreage in a manner which results in a clear and discernable break in the planting pattern at the boundary between it and any remaining acreage of the fall-planted dry pea acreage; and

(B) Store or market the production in a manner which permits us to verify the amount of spring-planted production separately from any fall-planted production. In the event you are unable to provide records of production that are acceptable to us, the spring-planted acreage will be considered to be a part of the original fall-planted unit.

§ 457.141 Rice crop insurance provisions.

The rice crop insurance provisions for the 2011 and succeeding crop years are as follows:

**FCIC Policies**

**UNITED STATES DEPARTMENT OF AGRICULTURE**

Federal Crop Insurance Corporation

**Reinsured Policies**

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

**Rice Crop Provisions**

1. Definitions

- **Flood irrigation.** An irrigated practice commonly used for rice production whereby the planted acreage is intentionally covered with water that is maintained at a uniform and shallow depth throughout the growing season.

- **Harvest.** Combining or threshing the rice for grain. A crop that is swathed prior to combining is not considered harvested.

- **Local market price.** The cash price per pound for the U.S. No. 3 grade of rough rice offered by buyers in the area in which you normally market the rice. Factors not associated with grading under the United States Standards for Rice including, but not limited to, protein and oil content or milling quality will not be considered.

- **Planted acreage.** In addition to the definition in section 1 of the Basic Provisions, land on which there is uniform placement of an adequate amount of rice seed into a prepared seedbed by one of the following methods (Acreage seeded in any other manner will not be insurable unless otherwise provided by the Special Provisions or by written agreement):

  - (a) Drill seeding—Using a grain drill to incorporate the seed to a proper soil depth;
  - (b) Broadcast seeding—Distributing seed evenly onto the surface of an un-flooded seedbed followed by either timely mechanical incorporation of the seed to a proper soil depth in the seedbed or flushing the seedbed with water; or
  - (c) Broadcast seeding into a controlled flood—Distributing the rice seed onto a prepared seedbed that has been intentionally covered to a proper depth by water. The water must be free of movement and be completely contained on the acreage by properly constructed levees and gates.

- **Saline water.** Water that contains a concentration of salt sufficient to cause damage to the insured crop.

- **Second crop rice.** The regrowth of a stand of rice following harvest of the initially insured rice crop that can be harvested in the same crop year.

- **Swathed.** Severance of the stem and grain head from the ground without removal of the rice kernels from the plant and placing in a windrow.

- **Total milling yield.** Rice production consisting of heads, second heads, screenings, and brewer's rice as defined by the official United States Standards for Rice.

2. Unit Division

Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions, you must elect to insure your rice with either revenue protection or yield protection by the sales closing date.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Cancellation and termination date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jackson, Victoria, Goliad, Bee, Live Oak, McMullen, La Salle, and Dimmit Counties, Texas; and all Texas counties south thereof.</td>
<td>January 31.</td>
</tr>
<tr>
<td>Florida</td>
<td>February 15.</td>
</tr>
<tr>
<td>All other Texas counties and all other states.</td>
<td>February 28.</td>
</tr>
</tbody>
</table>

6. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the rice in the county for which a premium rate is provided by the actuarial documents or by written agreement:

- (a) In which you have a share;
- (b) That is planted for harvest as grain;
- (c) That is flood irrigated; and
- (d) That is not wild rice.

7. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

- (a) We will not insure any acreage planted to rice:
  - (1) The preceding crop year unless allowed by the Special Provisions; or
  - (2) That does not meet the rotation requirements shown in the Special Provisions; and
§ 457.141  

(b) Any acreage of the insured crop damaged before the final planting date, to the extent that producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant.

8. Insurance Period

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is October 31 immediately following planting.

9. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions (except drought);
(2) Fire;
(3) Insects, but not damage due to insufficient or improper application of pest control measures;
(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(5) Wildlife;
(6) Earthquake;
(7) Volcanic eruption;
(8) Failure of the irrigation water supply if caused by an insured cause of loss specified in sections 9(a)(1) through (7), drought, or the intrusion of saline water; or
(9) For revenue protection, a change in the harvest price from the projected price, unless FCIC can prove the price change was the direct result of an uninsured cause of loss specified in section 12(b)(2); and

(b) Unless otherwise specified in the Special Provisions, the amount of the replanting payment per acre will be the lesser of 20 percent of the production guarantee or 400 pounds, multiplied by your projected price, multiplied by your share.

(c) When the crop is replanted using a practice that is uninsured for an original planting, the liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

11. Duties in the Event of Damage or Loss

Representative samples are required in accordance with section 14 of the Basic Provisions.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:

(1) Optional unit, we will combine all optional units for which acceptable records of production were not provided; or

(2) Basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the number of insured acres by your respective:

(i) Yield protection guarantee (per acre) if you elected yield protection; or

(ii) Revenue protection guarantee (per acre) if you elected revenue protection;

(2) Totaling the results of section 12(b)(1)(i) or 12(b)(1)(ii), whichever is applicable;

(3) Multiplying the production to count by your:

(i) Projected price if you elected yield protection; or

(ii) Harvest price if you elected revenue protection;

(4) Totaling the results of section 12(b)(3)(i) or 12(b)(3)(ii), whichever is applicable;

(5) Subtracting the result of section 12(b)(4) from the result of section 12(b)(2); and

(6) Multiplying the result of section 12(b)(5) by your share.

For example:

You have 100 percent share in 50 acres of rice in the unit with a production guarantee (per acre) of 3,750 pounds, your harvested price is $.0700, and your production to count is 150,000 pounds.

If you elected yield protection:

...
Federal Crop Insurance Corporation, USDA  § 457.141

(1) 50 acres x (3,750 pound production guarantee x $0.0750 projected price) = $14,062.50 value of the production guarantee

(3) 150,000 pound production to count x $0.0750 projected price = $11,250.00 value of the production to count

(5) $14,062.50 - $11,250.00 = $2,812.50

(6) $2,812.50 x 1.000 share = $2,812.50 indemnity; or

If you elected revenue protection:

(1) 50 acres x (3,750 pound production guarantee x $0.0750 projected price) = $14,062.50 revenue protection guarantee

(3) 150,000 pound production to count x $0.0750 harvest price = $10,500.00 value of the production to count

(5) $14,062.50 - $10,500.00 = $3,562.50

(6) $3,562.50 x 1.000 share = $3,563.00 indemnity.

(c) The total production to count (in pounds) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) For yield protection, not less than the production guarantee and for revenue protection, not less than the amount of production that when multiplied by the harvest price equals the revenue protection guarantee (per acre) for acreage:

(A) That is abandoned;

(B) Put to another use without our consent;

(C) That is damaged solely by uninsured causes; or

(D) For which you fail to provide acceptable production records;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with section 12(d));

(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(2) All harvested production from the insurable acreage, including any production from a second rice crop harvested in the same crop year.

(d) Mature rough rice may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(1) Production will be reduced by 0.12 percent for each 0.1 percentage point of moisture in excess of 12 percent. We may obtain samples of the production to determine the moisture content.

(2) Production will be eligible for quality adjustment if:

(i) Deficiencies in quality, in accordance with the Official United States Standards for Rice, result in rice not meeting the grade requirements for U.S. No. 3 (grades U.S. No. 4 or worse) because of red rice, chalky kernels or damaged kernels; or

(ii) The rice has a total milling yield of less than 68 pounds per hundredweight;

(iii) The whole kernel weight is less than 55 pounds per hundredweight of milled rice for medium and short grain varieties;

(iv) The whole kernel weight is less than 48 pounds per hundredweight of milled rice for long grain varieties; or

(v) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(3) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions specified in section 12(d)(2) resulted from a cause of loss against which insurance is provided under these crop provisions and which occurs within the insurance period;

(ii) The deficiencies, substances, or conditions specified in section 12(d)(2) result in a net price for the damaged production that is less than the local market price;

(iii) All determinations of these deficiencies, substances, or conditions specified in section 12(d)(2) are made using samples of the production obtained by us or by a disinterested third party approved by us;

(iv) With regard to deficiencies in quality (except test weight, which may be determined by our loss adjuster), the samples are analyzed by:

(A) A grader licensed under the United States Agricultural Marketing Act or the United States Warehouse Act;

(B) A grader licensed under State law and employed by a warehouse operator who has a storage agreement with the Commodity Credit Corporation; or
(C) A grader not licensed under State law, but who is employed by a warehouse operator who has a commodity storage agreement with the Commodity Credit Corporation and is in compliance with State law regarding warehouses; and
(v) With regard to substances or conditions injurious to human or animal health, the samples are analyzed by a laboratory approved by us.
(i) Rice production that is eligible for quality adjustment, as specified in sections 12(d)(2) and (3), will be reduced as follows:
(ii) In accordance with quality adjustment factors contained in the Special Provisions; or
(iii) If quality adjustment factors are not contained in the Special Provisions, as follows:
(A) The market price of the qualifying damaged production and the local market price will be determined on the earlier of the date such quality adjusted production is sold or the date of final inspection for the unit. The price for the qualifying damaged production will be the market price for the local area to the extent feasible. Discounts used to establish the net price of the damaged production will be limited to those that are usual, customary, and reasonable. The price will not be reduced for:
(f) Moisture content;
(g) Damage due to uninsured causes; or
(h) Drying, handling, processing, or any other costs associated with normal harvesting, handling, and marketing of the rice; except, if the price of the damaged production can be increased by conditioning, we may reduce the price of the production after it has been conditioned by the cost of conditioning but not lower than the value of the production before conditioning.
(We may obtain prices from any buyer of our choice. If we obtain prices from one or more buyers located outside your local market area, we will reduce such prices by the additional costs required to deliver the rice to those buyers.);
(B) The value of the damaged or conditioned production will be divided by the local market price to determine the quality adjustment factor; and
(C) The number of pounds remaining after any reduction due to excessive moisture (the moisture-adjusted gross pounds (if appropriate)) of the damaged or conditioned production will then be multiplied by the quality adjustment factor to determine the net production to count.
(e) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on a weight basis.

13. Prevented Planting

Your prevented planting coverage will be 45 percent of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.142 Northern potato crop insurance provisions.

The Northern Potato Crop Insurance Provisions for the 2008 and succeeding crop years are as follows:

FCIC Policies

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured Policies

(Propriate title for insurance provider)

Both FCIC and reinsured policies:

Northern Potato Crop Provisions

These provisions will be applicable in: Alaska; Humboldt, Modoc, and Siskiyou Counties, California; Colorado; Connecticut; Idaho; Indiana; Iowa; Kansas; Maine; Massachusetts; Michigan; Minnesota; Montana; Nebraska; Nevada; San Juan County, New Mexico; New York; North Dakota; Ohio; Oregon; Pennsylvania; Rhode Island; South Dakota; Utah; Washington; Wisconsin; and Wyoming; and any other states or counties if allowed by the Special Provisions.

1. Definitions

Buyer. A business entity in the business of buying or processing potatoes, that possesses all the licenses and permits required by the state in which it operates, and has the facilities to accept the potatoes purchased.

Certified seed. Potatoes that were entered into the potato certified seed program and that meet all requirements for production to be used to produce a seed crop for the next crop year or a potato crop for harvest for commercial uses in the next crop year.

Discard. Disposal of production by you, or a person acting for you, without receiving any value for it.

Disposed. Any disposition of the crop including but not limited to sale or discard.

Grade inspection. An inspection in which samples of production are obtained by us, or a party approved by us, prior to the sale, storage, or disposal of any lot of potatoes, or any portion of a lot and the potatoes are evaluated and quality (grade) determinations are made by us, a laboratory approved by us, or a potato grader licensed or certified by the applicable State or the United States...
Federal Crop Insurance Corporation, USDA §457.142

Department of Agriculture, in accordance with the United States Standards for Grades of Potatoes. The United States standards used to determine the quality (grade) deficiencies will be: For potatoes produced for chipping, the United States Standards for Grades of Potatoes for Chipping; for potatoes produced for processing, the United States Standards for Grades of Potatoes for Processing; for potatoes produced for seed, the United States Standards for Grades of Seed Potatoes; and for all other potatoes, the United States Standards for Grades of Potatoes. The quantity and number of samples required will be determined in accordance with procedure issued by FCIC.

Harvest. Lifting potatoes from within the soil to the soil surface.

Hundredweight. One hundred (100) pounds avoirdupois.

Lot. A quantity of production that can be separated from other quantities of production by grade characteristics, load, location or other distinctive features.

Potato certified seed program. The state program administered by a public agency responsible for the seed certification process within the state in which the seed is produced.

Tuber rot. Any soft, mushy, or leaky condition of potato tissue (soft rot or wet breakdown as defined in the United States Standards for Grades of Potatoes), including, but not limited to, breakdown caused by Southern Bacterial Wilt, Ring Rot, or Late Blight.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 of the Basic Provisions, you may select only one price election for all the potatoes in the county insured under this policy unless the Special Provisions provide different price elections by type. If the Special Provisions provide for different price elections by type, you may select one price election for each potato type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price election offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(b) If the production from any acreage of the insured crop is not harvested, the price used to determine your indemnity will be 90 percent of your price election. This requirement is not applicable to the certified seed endorsement price election.

(c) The price election for unharvested acreage will apply to any acreage of potatoes damaged to the extent that similarly situated producers in the area would not normally care for the potatoes even if you choose to continue to care for or harvest them. Potatoes that are lifted to the soil surface and not removed from the field will also receive the price election for unharvested acreage.

3. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

4. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

5. Annual Premium

In lieu of the premium computation method contained in section 7 of the Basic Provisions, the annual premium amount (y) is computed by multiplying (a) the production guarantee by (b) the price election for harvested acreage, by (c) the premium rate, by (d) the insured acreage, by (e) your share at the time of planting, and by (f) any applicable premium adjustment factors contained in the actuarial documents (axbxcxdxexf=y).

6. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the potatoes in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) Planted with certified seed (unless otherwise permitted by the Special Provisions);
(c) Planted for harvest as certified seed stock, or for human consumption, (unless specified otherwise in the Special Provisions);
(d) That are not (unless allowed by the Special Provision or by written agreement):
   (1) Interplanted with another crop; or
   (2) Planted into an established grass or legume.

7. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions, we will not insure any acreage that:

(a) Does not meet the rotation requirements contained in the Special Provisions for the crop; or
(b) Is damaged before the final planting date to the extent that similarly situated producers in the area would normally not further care for the crop, unless it is replanted or we agree that it is not practical to replant.

8. Insurance Period

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is
the date immediately following planting as follows (exceptions, if any, for specific counties, varieties or types are contained in the Special Provisions):
(a) October 1, in Alaska;
(b) October 10 in Nebraska and Wyoming;
(c) October 15 in Colorado; Indiana; Iowa; Michigan; Minnesota; Montana; Nevada; North Dakota; South Dakota; Utah; and Wisconsin;
(d) October 20 in Maine;
(e) October 25 in Kansas; and
(f) October 31 in Humboldt, Modoc, and Siskiyou Counties, California; Connecticut; Idaho; Massachusetts; San Juan County, New Mexico; New York; Ohio; Oregon; Pennsylvania; Rhode Island; and Washington.

9. Causes of Loss
(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur within the insurance period:
(1) Adverse weather conditions;
(2) Fire;
(3) Insects, but only if sufficient and proper pest control measures are used;
(4) Plant disease, but only if sufficient and proper disease control measures are used;
(5) Wildlife;
(6) Earthquake;
(7) Volcanic eruption; or
(8) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period (see section 9(a)(1) through (7)).
(b) In addition to the causes of loss not insured against as contained in section 12 of the Basic Provisions, we will not insure against any loss of production due to:
(1) Damage that occurs or becomes evident after the end of the insurance period, including, but not limited to, damage that occurs or becomes evident in storage; or
(2) Causes, such as freeze after certain dates, as limited by the Special Provisions.

10. Duties in the Event of Damage or Loss
(a) In accordance with the requirements of section 14 of the Basic Provisions, you must leave representative samples at least 10 feet wide and extending the entire length of each field in the unit if you are going to destroy any acreage of the insured crop that will not be harvested.
(b) We must be given the opportunity to perform a grade inspection on the production from any unit for which you have given notice of damage.

11. Settlement of Claim
(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
(1) For any optional units, we will combine all optional units for which acceptable production records were not provided; and
(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insured acreage by its respective production guarantee (If there is unharvested acreage in the unit, the harvested and unharvested acreage will be determined separately);
(2) Multiplying each result in section 11(b)(1) by the respective price election (The price election may be limited as specified in section 3);
(3) Totaling the results of section 11(b)(2);
(4) Multiplying the total production to be counted of each type, if applicable (see section 11(d)), by the respective price election;
(5) Totaling the results of section 11(b)(4);
(6) Subtracting the results of section 11(b)(5) from the result in section 11(b)(3); and
(7) Multiplying the result of section 11(b)(6) by your share.
For example:
You have a 100 percent share in 100 harvested acres of potatoes in the unit, with a guarantee of 150 hundredweight per acre and a price election of $4.00 per hundredweight. You are only able to harvest 10,000 hundredweight. Your indemnity would be calculated as follows:
(1) 100 acres x 150 hundredweight = 15,000 hundredweight guarantee;
(2) 15,000 hundredweight x $4.00 price election = $60,000.00 value of guarantee;
(3) Totaling the results of section 11(b)(2);
(4) 10,000 hundredweight x $4.00 price election = $40,000.00 value of production to count;
(5) $60,000.00 - $40,000.00 = $20,000.00 loss; and
(6) $20,000.00 x 100 percent = $20,000.00 indemnity payment.
You also have a 100 percent share in 100 unharvested acres of potatoes in the same unit, with a guarantee of 150 hundredweight per acre and a price election of $3.60 per hundredweight. (The price election for unharvested acreage is 90.0 percent of your elected price election ($4.00 x 0.90 = $3.60.)) This unharvested acreage was appraised at 35 hundredweight per acre for a total of 3500 hundredweight as production to count. Your total indemnity for the harvested and unharvested acreage would be calculated as follows:
(1) 100 acres x 150 hundredweight = 15,000 hundredweight guarantee for the harvested acreage, and
(2) 100 acres x 150 hundredweight = 15,000 hundredweight guarantee for the unharvested acreage;
Federal Crop Insurance Corporation, USDA

§ 457.142

(2) 15,000 hundredweight guarantee x $4.00 price election = $60,000.00 value of guarantee for the harvested acreage, and
15,000 hundredweight guarantee x $3.60 price election = $54,000.00 value of guarantee for the unharvested acreage;

(3) $60,000.00 + $54,000.00 = $114,000.00 total value of guarantee;

(4) 10,000 hundredweight x $4.00 price election = $40,000.00 value of production to count for the harvested acreage, and 3500 hundredweight x $3.60 = $12,600.00 value of production to count for the unharvested acreage;

(5) $40,000.00 + $12,600.00 = $52,600.00 total value of production to count;

(6) $114,000.00 - $52,600.00 = $61,400.00 loss; and

(7) $61,400.00 loss x 100 percent = $61,400.00 indemnity payment.

(c) The extent of any quality loss must be determined based on samples obtained no later than the time the potatoes are placed in storage, if the production is stored prior to sale, or the date they are delivered to a buyer, wholesaler, packer, broker, or other handler if production is not stored.

(d) The total production to count (in hundredweight) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(A) That is abandoned;

(B) That is put to another use without our consent;

(C) That is damaged solely by uninsured causes;

(D) From which any production is disposed of without a grade inspection;

(E) For which you fail to provide acceptable production records;

(ii) Production lost due to uninsured causes;

(iii) Production lost due to harvest prior to full maturity. Production to count from such acreage will be determined by increasing the amount of harvested production by 2 percent per day for each day the potatoes were harvested prior to the date the potatoes would have reached full maturity. The date the potatoes would have reached full maturity will be considered to be 45 days prior to the calendar date for the end of the insurance period, unless otherwise specified in the Special Provisions. This adjustment will not be made if the potatoes are damaged by an insurable cause of loss, and leaving the crop in the field would either reduce production or decrease quality;

(iv) Unharvested production, including unharvested production on insured acreage you intend to put to another use or abandon, or acreage damaged by uninsured causes and for which you cease to provide further care, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or cease providing care for the crop. This unharvested production may be adjusted in accordance with sections 11(e), (f), and (g); and the value of all unharvested production will be calculated using the reduced price election determined in section 2(b). If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The price used to determine the amount of any indemnity will be limited as specified in section 2 even if the representative samples are harvested. The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(2) All harvested production from the insurable acreage (the amount of production prior to the sorting or discarding of any production).

(e) Potato production is eligible for quality adjustment if:

(1) The potatoes have freeze damage or tuber rot that is evident at, or prior to, the end of the insurance period; and

(2) A grade inspection is completed no later than 21 days after the end of the insurance period (if the Northern Potato Storage Coverage Endorsement is applicable, samples must be obtained within 60 days after the end of the insurance period and quality (grade) determinations must be completed with 21 days of sampling); and

(3) Prior to any grade inspection, you must notify us of the intended use of the potatoes so the appropriate United States standards will be applied (We may request previous sales records to verify your claimed intended use or base the intended use on the type of potato grown if such potatoes are not usually grown for the intended use you reported).

(f) Potato production to count that is eligible for quality adjustment, as specified in section 11(e), with 5 percent damage or less (by weight) will be adjusted 0.1 percent for each 0.1 percent of damage through 5.0 percent.

(g) Potato production to count that is eligible for quality adjustment, as specified in
§ 457.143

section 11(e), with 5.1 percent damage or more (by weight) will be determined as follows:

1. If a price is agreed upon between you and a buyer within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, or the production is delivered to a buyer within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production will be determined by:

   (i) Dividing the price per hundredweight received or that will be received by the highest price election designated in the Special Provisions or addendum thereto for the insured potato type (if the production is sold for a price lower than the value appropriate to and representative of the local market, we will determine the value of the production based on the price you could have received in the local market); and

   (ii) Multiplying the result (not to exceed 1.0) by the number of hundredweight of sold or to be sold production (We may verify this after the production has actually been sold); or

2. If a price is not agreed upon between you and a buyer and the production is not delivered within 21 days (60 days if the Northern Storage Coverage Endorsement is applicable) after the end of the insurance period, and that remain in storage 22 or more days (61 or more days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production will be the greater of:

   (i) The amount determined by:

   (A) Dividing the price per hundredweight that is received, or will be received after the end of the applicable insurance period, by the highest price election designated in the Special Provisions or addendum thereto for the insured potato type (if the production is sold for a price lower than the value appropriate to and representative of the local market, we will determine the value of the production based on the price you could have received in the local market); and

   (B) Multiplying the result of section 11(g)(2)(i)(A) (not to exceed 1.0) by the number of hundredweight of sold or to be sold production (We may verify this after the production has actually been sold); or

   (ii) The amount of production determined by:

   (A) Reducing any harvested or appraised production:

   (1) By 0.1 percent for each 0.1 percent damage through 5.0 percent;

   (2) By 0.5 percent for each 0.1 percent of damage from 5.1 percent through 6.0 percent;

   (3) By 1.0 percent for each 0.1 percent of damage from 6.1 through 13.5 percent; or

   (B) Including 15 percent of the production when damage is in excess of 13.5 percent.

3. For any production discarded:

   (A) Within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production to count will be:

   (i) Zero if we determine the production could not have been sold; or

   (2) Determined in accordance with section 11(g)(2)(i) if we determine the production could have been sold; or

   (B) Later than 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production to count will be adjusted in accordance with section 11(g)(2)(ii).

12. Prevented Planting

Your prevented planting coverage will be 25 percent of your production guarantee for timely planted acreage. If you have limited or additional coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.143 Northern potato crop insurance—quality endorsement.

The Northern Potato Crop Insurance Quality Endorsement Provisions for the 2008 and succeeding crop years are as follows:

FCIC policies

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Northern Potato Crop Insurance Quality Endorsement

1. Definitions

Percentage factor. The historical average percentage of potatoes grading U.S. No. 2 or better, by type, determined from your records. If at least 4 continuous years of records are available, the percentage factor will be the simple average of the available records not to exceed 10 years. If less than 4 years of records are available, the percentage factor will be determined based on a combination of your records and the percentage factor contained in the Special Provisions so that such a combination would be
the functional equivalent of 4 years of records.

2. In return for payment of the additional premium designated in the actuarial document, this endorsement is attached to and made part of your Northern Potato Crop Provisions subject to the terms and conditions described herein. In the event of a conflict between the Northern Potato Crop Provisions and this endorsement, this endorsement will control.

3. You must elect this endorsement on or before the sales closing date for the initial crop year in which you wish to insure your potatoes under this endorsement. This endorsement will continue in effect until canceled. It may be canceled by either you or us for any succeeding crop year by giving written notice to the other party on or before the cancellation date.

4. All acreage of potatoes insured under the Northern Potato Crop Provisions will be insured under this endorsement except:
   (a) Any acreage specifically excluded by the actuarial document; and
   (b) Any acreage grown for seed.

5. We will adjust the production to count determined in accordance with section 15 of the Basic Provisions and section 11 of the Northern Potato Crop Provisions for potatoes that do not meet U.S. No. 2 grade requirements from unharvested acreage or harvested acreage that is stored or is市场营销 after a grade inspection due to:
   (a) Internal defects as long as the number of potatoes with such defects are in excess of the tolerances allowed for the U.S. No. 2 grade potatoes on a lot basis and are not separable from undamaged production using methods used by the packers or processors to whom you normally deliver your potato production as follows:
     (1) If a price is agreed upon between you and a buyer within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable) after the end of the insurance period, or the production is delivered to a buyer within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable) after the end of the insurance period, the amount of production will be determined by (adjustment in accordance with section 5(a)(1) or 5(a)(2)(i) will not be performed if it already has been performed under the terms of section 11(g) of the Northern Potato Crop Provisions):
        (I) Dividing the price received or that will be received per hundredweight by the highest price election designated in the Special Provisions or addendum thereto for the insured potato type (if the production is sold for a price lower than the value appropriate to and representative of the local market, we will determine the value of the production based on the price you could have received in the local market); and
        (ii) Multiplying the result (not to exceed 1.0) by the number of hundredweight of sold or to be sold production (We may verify this after the production has actually been sold); or
     (2) If a price is not agreed upon between you and a buyer and the production is not delivered within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable) after the end of the insurance period, and the potatoes remain in storage 22 or more days (61 or more days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production will be the greater of:
        (I) The amount of production determined by:
            (A) Dividing the price per hundredweight that is received, or will be received after the end of the applicable insurance period, by the highest price election designated in the Special Provisions or addendum thereto for the insured potato type (if the production is sold for a price lower than the value appropriate to and representative of the local market, we will determine the value of the production based on the price you could have received in the local market); and
            (B) Dividing the price per hundredweight that is received, or will be received after the end of the applicable insurance period, by the highest price election designated in the Special Provisions or addendum thereto for the insured potato type (if the production is sold for a price lower than the value appropriate to and representative of the local market, we will determine the value of the production based on the price you could have received in the local market); and
        (ii) The amount of production determined as follows:
            (A) The combined weight of sampled potatoes grading U.S. No. 2 or better (the amount of potatoes grading U.S. No. 2 will be based on a grade inspection completed no later than 21 days after the end of the insurance period (if the Northern Potato Storage Coverage Endorsement is applicable), samples must be obtained within 60 days after the end of the insurance period and a grade inspection completed within 21 days of sampling) and are damaged by freeze or tuber rot will be divided by the total sample weight;
            (B) The percentage determined in section 5(a)(2)(ii)(A) will be divided by the applicable percentage factor; and
            (C) The result of section 5(a)(2)(ii)(B) will be multiplied by the amount of production to count determined in accordance with section 15 of the Basic Provisions and section 11 of the Northern Potato Crop Provisions.
     (b) Factors other than those specified in section 5(a), in accordance with section 5(a)(2)(ii).
   6. For any production that qualifies for adjustment in accordance with section 5(a) and that is discarded:
      (a) Within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production to count will be:
§ 457.144 Northern potato crop insurance—processing quality endorsement.

The Northern Potato Crop Insurance Processing Quality Endorsement Provisions for the 2008 and succeeding crop years are as follows:

1. Definitions

Broker. Any business enterprise regularly engaged in the buying and selling of processing potatoes, that possesses all licenses and permits as required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process processing potatoes grown under a processing contract within a reasonable amount of time after harvest or the typical storage period.

Processor. Any business enterprise regularly engaged in processing potatoes for human consumption, that possesses all licenses and permits for processing potatoes required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process processing potatoes grown under a processing contract within a reasonable amount of time after harvest or the typical storage period.

2. To be eligible for coverage under this endorsement, you must have:

(a) Northern Potato Quality Endorsement in place and elect this endorsement on or before the sales closing date for the initial crop year in which you wish to insure your potatoes under this endorsement:

(1) Cancellation of your Northern Potato Quality Endorsement will automatically result in cancellation of this endorsement;

(2) Later than 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production to count will be adjusted in accordance with section 5(a)(2)(ii).

Potatoes harvested or appraised prior to full maturity that do not grade U.S. No. 2 due solely to size will be considered to have met U.S. No. 2 standards unless the potatoes are damaged by an insurable cause of loss and leaving the field would either reduce production or decrease quality.

Production to count for potatoes destroyed, stored or marketed without a grade inspection will be 100 percent of the gross weight of such potatoes.

All determinations must be based upon a grade inspection.

The actuarial documents may provide "U.S. No. 1 grade" in place of "U.S. No. 2 grade" as used in this endorsement.

(a) If both U.S. No.1 and U.S. No. 2 grades are available in the actuarial documents, you may elect U.S. No. 1 or 2 grade by potato type or group, if separate types or groups are specified in the Special Provisions.

(b) If both fresh and processing types are specified in the actuarial documents, you cannot elect the fresh type for any potatoes grown for processing or chipping.

3. In return for payment of the additional premium designated in the actuarial documents, this endorsement is attached to and made part of your Northern Potato Crop Provisions and Northern Potato Quality Endorsement subject to the terms and conditions described herein. In the event of a conflict between the Northern Potato Crop Provisions or Northern Potato Quality Endorsement and this endorsement, this endorsement will control.

4. All terms of the Northern Potato Quality Endorsement not modified by this endorsement will be applicable to acreage covered under this endorsement.

5. If you elect this endorsement, all insurable acreage of production under contract with the processor or broker must be insured under this endorsement; however:
Federal Crop Insurance Corporation, USDA § 457.144

(a) When the processor contract requires the processor or broker to purchase a stated amount of production, rather than all of the production from a stated number of acres, the amount will be determined by dividing the stated amount of production by the approved yield for the acreage; and

(b) The number of acres insured under this endorsement will not exceed the actual number of acres planted to the potato types needed to fulfill the contract.

6. Potato lots may be adjusted in accordance with section 8 if such potatoes:

(a) Fail to meet the applicable U.S. No. 2 grade requirements due to internal defects as long as the number of potatoes with such defects are in excess of the tolerance allowed for U.S. No. 2 grade potatoes;

(b) Have a specific gravity lower than 1.074;

(c) Have a fry color of No. 3 or darker due to either sugar exceeding 10 percent or sugar ends exceeding 19 percent; or

(d) Have an Atrgon rating lower than 58.

7. To qualify for a quality reduction under this endorsement, the potatoes must:

(a) Fail to meet the applicable standards and are not separable from undamaged production using methods used by processors to whom you normally deliver your potato production.

(b) The result of section 8(b)(2)(i)(A) will not exceed 1.0 by the number of hundredweight of sold or to be sold production

(1) Dividing the price per hundredweight that is received, or that will later be received after the end of the applicable insurance period, by the highest price election designated in the Special Provisions or addendum thereto for the insured potato type if the production is sold for a price lower than the value appropriate to and representative of the local market, we will determine the value of the production based on the price you could have received in the local market; and

(ii) Multiplying the result of section 8(b)(2)(i) (not to exceed 1.0) by the number of hundredweight of sold or to be sold production (We may verify this after the production has actually been sold); or

(b) If a price is not agreed upon between you and a buyer and the production is not delivered within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period and the production remains in storage 22 or more days (61 or more days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production will be the greater of:

(1) The amount of production determined by:

(i) Dividing the price per hundredweight that is received, or that will later be received after the end of the applicable insurance period, by the highest price election designated in the Special Provisions or addendum thereto for the insured potato type if the production is sold for a price lower than the value appropriate to and representative of the local market, we will determine the value of the production based on the price you could have received in the local market; and

(ii) Multiplying the result of section 8(b)(1)(i) (not to exceed 1.0) by the number of hundredweight of sold or to be sold production (We may verify this after the production has actually been sold); or

(2) The amount of production determined as follows:

(i) The combined weight of sampled potatoes that grade U.S. No. 2 or better (the amount of potatoes grading U.S. No. 2 or better will be based on a grade inspection completed no later than 21 days after the end of the insurance period, if the Northern Potato Storage Coverage Endorsement is applicable; samples must be obtained within 60 days after the end of the insurance period and grade inspection completed within 21 days of sampling and are damaged by freeze or tuber rot will be divided by the total sample weight;

(ii) The percentage determined in section 8(b)(2)(i) will be divided by the applicable percentage factor; and

(iii) The result of section 8(b)(2)(i)(A) will be multiplied by the amount of production to count determined in accordance with section 15 of the Basic Provisions and section 11 of the Northern Potato Crop Provisions.

(c) The production to count for potatoes that have a value less than the maximum price election due to factors other than those
specified in section 7 will be adjusted in accordance with section 8(b)(2).

9. For any production that qualifies for adjustment in accordance with section 7 and that is discarded:

(a) Within 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production to count will be:

(1) Zero if we determine the production could not have been sold; or

(2) Determined in accordance with section 8(b)(2) if we determine the production could have been sold; or

(b) Later than 21 days (60 days if the Northern Potato Storage Coverage Endorsement is applicable), after the end of the insurance period, the amount of production to count will be adjusted in accordance with section 8(b)(2).

10. All quality determinations must be based upon a grade inspection using the United States Standards for Grades of Potatoes for Processing or the United States Standards for Grades of Potatoes for Chipping.

11. The actuarial documents may provide "U.S. No. 1 grade" in place of "U.S. No. 2 grade" as used in this endorsement. If both U.S. No. 1 and 2 grades are available in the actuarial documents, you may elect U.S. No. 1 or 2 grade by potato type or group, if separate types or groups are specified in the Special Provisions.

[72 FR 61284, Oct. 30, 2007]

§ 457.145 Potato crop insurance—certified seed endorsement.

The Potato Crop Insurance Certified Seed Endorsement Provisions for the 2008 and succeeding crop years are as follows:

FCIC policies:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Potato Crop Insurance Certified Seed Endorsement

1. In return for payment of the additional premium designated in the actuarial documents, this endorsement is attached to and made part of your Northern Potato Crop Provisions subject to the terms and conditions described herein. In accordance with section 8, since your insurance period is not extended in this endorsement, any additional premium paid for coverage under the Northern Potato Storage Coverage Endorsement will not apply to the additional coverage provided under the terms of this endorsement. In the event of a conflict between the Northern Potato Crop Provisions and this endorsement, this endorsement will control.

2. You must elect this endorsement on or before the sales closing date for the initial crop year you wish to insure your potatoes under this endorsement. This endorsement will continue in effect until canceled. It may be canceled by either you or us for any succeeding crop year by giving written notice to the other party on or before the cancellation date.

3. All potatoes grown on insurable acreage and that are entered into the potato seed certification program administered by the state in which the seed is grown must be insured unless limited by section 4 below.

4. Your certified seed production guarantee per-acre will be the per-acre production guarantee used to cover the same acreage under the terms of the Northern Potato Crop Provisions. However, unless a written agreement provides otherwise, if the total amount of insurable certified seed acreage you have for the current crop year is greater than 125 percent of your average number of acres entered into and passed certification in the potato certified seed program in the three previous calendar years, your certified seed production guarantee for each unit will be reduced as follows:

(a) Multiply the average number of your acres entered into and passing certification in the potato certified seed program the 3 previous calendar years by 1.25 and divide this result by the number of acres grown by you for certified seed in the current crop year; and

(b) Multiply the result of section 4(a) (not to exceed 1.0) by the production guarantee for certified seed for the current crop year.

5. You must provide acceptable records of your certified seed potato acreage and production for the previous three years. These records must clearly indicate the number of your acres entered into the potato seed certification program administered by the state in which the seed is grown.

6. All potatoes insured for certified seed production must be produced and managed in accordance with the regulations, standards, practices, and procedures required for certification under the potato certified seed program. Any production that does not qualify as certified seed because of varietal mixing or your failure to meet any requirement under the potato certified seed program will be considered as lost due to uninsured causes.

7. If, due to uninsured causes occurring within the insurance period, the amount of certified seed you produce is less than your certified seed production guarantee, we will settle your claim by:
Northern Potato Crop Insurance Storage Coverage Endorsement

The Northern Potato Crop Insurance Storage Coverage Endorsement Provisions for the 2008 and succeeding crop years are as follows:

FCIC Policies

1. In return for payment of the required additional premium as contained in the actuarial documents, this endorsement is attached to and made part of your Northern Potato Crop Provisions subject to the terms and conditions described herein. In the event of a conflict between the Northern Potato Crop Provisions and this endorsement, this endorsement will control.

2. You must elect this endorsement on or before the sales closing date for the initial crop year in which you wish to insure your potatoes under this endorsement. This endorsement will continue in effect until canceled. It may be canceled by either you or us for any succeeding crop year by giving written notice to the other party on or before the cancellation date.

3. Potato production grown under a contract that requires the production to be delivered to a buyer within three days of harvest will not be insured under this endorsement. When such contract requires delivery of a stated amount of production, rather than all of the production from a stated amount of acres, the number of acres not insured under this endorsement will be determined by dividing the stated amount of production by the approved yield for the acreage. All other potato production insured...
§ 457.147 Central and Southern potato crop insurance provisions.

The Central and Southern Potato Crop Insurance Provisions for the 2009 and succeeding crop years are as follows:

**FCIC Policies**

**United States Department of Agriculture**

**Federal Crop Insurance Corporation**

**Reinsured Policies**

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

**Central and Southern Potato Crop Provisions**

These provisions will be applicable in Alabama; Arizona; all California counties except Humboldt, Modoc, and Siskiyou; Delaware; Florida; Georgia; Maryland; Missouri; New Jersey; all New Mexico counties except San Juan; North Carolina; Oklahoma; Texas; and Virginia; and other states or counties if allowed by the Special Provisions.

1. Definitions

**Certified seed.** Potatoes that were entered into the potato certified seed program and that meet all requirements for production to be used to produce a seed crop for the next...
crop year or a potato crop for harvest for commercial uses in the next crop year.

Discard. Disposal of production by you, or a person acting for you, without receiving any value for it.

Disposed. Any disposition of the crop including but not limited to sale or discard.

Grade inspection. An inspection in which samples of production are obtained by us, or a party approved by us, prior to the sale, storage, or disposal of any lot of potatoes, or any portion of a lot and the potatoes are evaluated and quality (grade) determinations are made by us, a laboratory approved by us, or a potato grader licensed or certified by the applicable State or the United States Department of Agriculture, in accordance with the United States Standards for Grades of Potatoes. The United States standards used to determine the quality (grade) deficiencies will be: For potatoes produced for chipping, the United States Standards for Grades of Potatoes for Chipping; for potatoes produced for processing, the United States Standards for Grades of Potatoes for Processing; for potatoes produced for seed, the United States Standards for Grades of Seed Potatoes; and for all other potatoes, the United States Standards for Grades of Potatoes. The quantity and number of samples required will be determined in accordance with procedure issued by FCIC.

Harvest. Lifting potatoes from within the soil to the soil surface.

Hundredweight. One hundred (100) pounds avoirdupois.

Lot. A quantity of production that can be separated from other quantities of production by grade characteristics, load, location or other distinctive features.

Planting period. The period of time between the calendar dates designated in the Special Provisions for the planting of spring-planted, summer-planted, fall-planted, or winter-planted potatoes.

Potato certified seed program. The state program administered by a public agency responsible for the seed certification process within the state in which the seed is produced.

Practical to replant. In lieu of the definition of ‘Practical to replant’ contained in section one of the Basic Provisions, practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors including, but not limited to, moisture availability, condition of the field, marketing windows, and time to crop maturity, that replanting to the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insured period. It will be considered practical to replant after the end of the late planting period, or the end of the planting period in which initial planting took place in counties for which the Special Provisions designate separate planting periods, unless replanting is generally occurring in the area.

2. Unit Division

A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by planting period.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 2 of the Basic Provisions, you may select only one price election for all the potatoes in the county insured under this policy unless the Special Provisions provide different price elections by type. If the Special Provisions provide for different price elections by type, you may select one price election for each potato type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price election offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(b) If the production from any acreage of the insured crop is not harvested, the price used to determine your indemnity will be 90 percent of your price election.

(c) The price election for unharvested acreage will apply to any acreage of potatoes damaged to the extent that similarly situated producers in the area would not normally care for the potatoes even if you choose to continue to care for or harvest them. Potatoes that are lifted to the soil surface and not removed from the field will also receive the price election for unharvested acreage.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is:

(a) June 30 preceding the cancellation date for counties with a September 30 cancellation date;

(b) September 30 preceding the cancellation date for counties with a November 30, December 31, or January 31 cancellation date; and

(c) November 30 preceding the cancellation date for counties with a February 28 or March 15 cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:
6. Annual Premium

In lieu of the premium computation method contained in section 7 of the Basic Provisions, the annual premium amount \( y \) is computed by multiplying (a) the production guarantee by (b) the price election for harvested acreage, by (c) the premium rate, by (d) the harvested acreage, by (e) your share at the time of planting, and by (f) any applicable premium adjustment factors contained in the actuarial documents \((axbxcxdxexf = y)\).

7. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the potatoes in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) Planted with certified seed (unless otherwise permitted by the Special Provisions);
(c) Planted for harvest as certified seed stock, or for human consumption, (unless specified otherwise in the Special Provisions);
(d) That are not (unless allowed by the Special Provisions or by written agreement):
   (1) Interplanted with another crop; or
   (2) Planted into an established grass or legume.

8. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions, we will not insure any acreage that:

(a) Does not meet the rotation requirements contained in the Special Provisions for the crop; or
(b) Is damaged before the final planting date or before the end of the applicable planting period in counties for which the Special Provisions designate separate planting periods, to the extent that similarly situated producers in the area would normally not further care for the crop, unless it is replanted or we agree that it is not practical to replant.

9. Insurance Period

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the date immediately following planting as follows (exceptions, if any, for specific counties, varieties or types are contained in the Special Provisions):

(a) July 15 in Missouri; and all Texas counties except Bailey, Castro, Dallam, Deaf Smith, Floyd, Gaines, Hale, Hartley, Knox, Lamb, Parmer, Swisher, and Yoakum.
(b) July 25 in Arizona.
(c) August 15 in North Carolina; Oklahoma; and Haskell and Knox Counties, Texas.
(d) August 31 in Virginia.
(e) In Alabama; California; Florida; and Georgia; the dates established by the Special Provisions for each planting period; and
(f) October 15 in Bailey, Castro, Dallam, Deaf Smith, Floyd, Gaines, Hale, Hartley, Knox, Lamb, Parmer, Swisher, and Yoakum Counties, Texas; Delaware; Maryland; New Jersey; and all counties in New Mexico except San Juan.

10. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss which occur within the insurance period:
(1) Adverse weather conditions;
(2) Fire;
(3) Insects, but only if sufficient and proper pest control measures are used;
(4) Plant disease, but only if sufficient and proper disease control measures are used;
(5) Wildlife;
(6) Earthquake;
(7) Volcanic eruption; or
(8) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period (see section 10(a) (1) through (7)).
(b) In addition to the causes of loss not insured against as contained in section 12 of the Basic Provisions, we will not insure against any loss of production due to:
(1) Damage that occurs or becomes evident after the end of the insurance period, including, but not limited to, damage that occurs or becomes evident in storage; or
(2) Causes, such as freeze after certain dates, as limited by the Special Provisions.
11. Duties in the Event of Damage or Loss

(a) In accordance with the requirements of section 14 of the Basic Provisions, you must leave representative samples at least 10 feet wide and extending the entire length of each field in the unit if you are going to destroy any acreage of the insured crop that will not be harvested.

(b) We must be given the opportunity to perform a grade inspection on the production from any unit for which you have given notice of damage.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which acceptable production records were not provided; and

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by its respective production guarantee (if there is unharvested acreage in the unit, the harvested and unharvested acreage will be determined separately);

(2) Multiplying each result in section 12(b)(1) by the respective price election (the price election may be limited as specified in section 3.);

(3) Totaling the results of section 12(b)(2);

(4) Multiplying the total production to be counted of each type, if applicable, (see section 12(d)) by the respective price election;

(5) Totaling the results of section 12(b)(4);

(6) Subtracting the results of section 12(b)(4) from the result in section 12(b)(3); and

(7) Multiplying the result of section 12(b)(6) by your share.

For example: You have a 100 percent share in 100 harvested acres of potatoes in the unit, with a guarantee of 150 hundredweight per acre and a price election of $4.00 per hundredweight. You are only able to harvest 10,000 hundredweight. Your indemnity would be calculated as follows:

(1) 100 acres x 150 hundredweight = 15,000 hundredweight guarantee;

(2) 15,000 hundredweight x $4.00 price election = $60,000.00 value of guarantee;

(3) $60,000.00 + $54,000.00 = $114,000.00 total value of guarantee;

(4) 10,000 hundredweight x $4.00 price election = $40,000.00 value of production to count for the harvested acreage, and 3500 hundredweight x $3.60 = $12,600.00 value of production to count for the unharvested acreage;

(5) $60,000.00 + $54,000.00 = $114,000.00 total value of production to count;

(6) $114,000.00 - $52,600.00 = $61,400.00 loss; and

(7) $61,400.00 x 100 percent = $61,400.00 indemnity payment.

(c) The extent of any quality loss must be determined based on samples obtained no later than the time potatoes are placed in storage, if the production is stored prior to sale, or the date they are delivered to a buyer, wholesaler, packer, broker, or other handler if production is not stored.

(d) The total production to count (in hundredweight) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) Not less than the production guarantee per acre for acreage: 

(A) That is abandoned;

(B) That is put to another use without our consent;

(C) That is damaged solely by uninsured causes;

(D) From which any production is disposed of without a grade inspection; or

(E) For which you fail to provide acceptable production records;

(ii) Production lost due to uninsured causes;

(iii) Production lost due to harvest prior to full maturity. Production to count from such acreage will be determined by increasing the amount of harvested production by 2 percent per day for each day the potatoes were harvested prior to the date the potatoes would have reached full maturity. The date the potatoes would have reached full maturity will
be considered to be 45 days prior to the calendar date for the end of the insurance period, unless otherwise specified in the Special Provisions. This adjustment will not be made if the potatoes are damaged by an insurable cause of loss, and leaving the crop in the field would either reduce production or decrease quality.

(iv) Unharvested production, including unharvested production on insured acreage you intend to put to another use or abandon, or acreage damaged by insurable causes and for which you cease to grade or to sell, will be determined on an individual basis for grading U.S. No. 2 due to external defects, and it is not practical to separate the damaged production.

(a) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use or cease providing care for the crop. This unharvested production may be adjusted in accordance with sections 12(e), and the value of all unharvested production will be calculated using the reduced price election determined in section 3(b). If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use or cease providing care for the crop. This unharvested production may be adjusted in accordance with sections 12(e), and the value of all unharvested production will be calculated using the reduced price election determined in section 3(b). If agreement on the appraised amount of production is not reached:

(B) If you elect to continue to care for the crop, the amount of production to count for the appraisal of marketable lots of potatoes that we determine:

(i) Partially damaged, and is salvageable only for starch, alcohol, or livestock feed;

(ii) Were disposed of without our prior written consent and such disposition prevented our determination of marketability.

(v) Marketable lots of potatoes will include:

(i) Stored;

(ii) Sold as seed;

(iii) Sold for human consumption; or

(iv) Harvested and not sold or that is appraised if such lots meet the standards for grading U.S. No. 2 grade or better on a sample basis.

(vi) Marketable lots will also include any potatoes that we determine:

(i) Could have been sold for seed or human consumption in the general marketing area;

(ii) Were not sold as a result of uninsured causes including, but not limited to, failure to meet chipper or processor standards for fry color or specific gravity; or

(iii) Were disposed of without our prior written consent and such disposition prevented our determination of marketability.

(vii) Unless included in section 12(e) or (5), a potato lot will not be considered marketable if, due to insured causes of damage, it:

(i) Is partially damaged, and is salvageable only for starch, alcohol, or livestock feed;

(ii) Does not meet the standards for grading U.S. No. 2 grade or better due to internal defects; or

(iii) Does not meet the standards for grading U.S. No. 2 grade or better due to external defects, and it is not practical to separate the damaged production.

13. Prevented Planting

Your prevented planting coverage will be 25 percent of your production guarantee for timely planted acreage. If you have limited or additional coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

1. Definitions

Acre. 43,560 square feet of land when row widths do not exceed six feet, or if row widths exceed six feet, the land area on which at least 7,200 linear feet of rows are planted.

Bell pepper. An annual pepper (of the capsicum annuum species, grossum group), widely cultivated for its large, crisp, edible fruit.

Box. One and one-ninth (1¾) bushels of the insured crop.

Crop year. In lieu of the definition of “crop year” contained in section 1 (Definitions) of the Basic Provisions (§457.8), crop year is a period of time that begins on the first day of the earliest planting period for fall planted peppers and continues through the last day of the insurance period for spring planted peppers. The crop year is designated by the calendar year in which spring planted peppers are harvested.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Excess rain. An amount of precipitation sufficient to directly damage the crop.

Freeze. The formation of ice in the cells of the plant or its fruit, caused by low air temperatures.

Harvest. The picking of peppers on the unit.

Mature bell pepper. A pepper that has reached the stage of development that will withstand normal handling and shipping.

Plant stand. The number of live plants per acre prior to the occurrence of an insurable cause of loss.

Planted acreage. In addition to the definition contained in the Basic Provisions, for each planting period, pepper seed or transplants must initially be planted in rows, unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Planting period. The period of time designated in the actuarial documents in which the peppers must be planted to be considered fall, winter or spring-planted peppers.

Potential production. The number of boxes of mature bell peppers that the pepper plants will or would have produced per acre by the end of the insurance period, assuming normal growing conditions and practices.

Practical to replant. In lieu of the definition of “Practical to replant” contained in section 1 of the Basic Provisions (§457.8), practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors, including but not limited to moisture availability, condition of the field, marketing windows, and time to crop maturity, that replanting to the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period (inability to obtain plants or seed will not be considered when determining if it is practical to replant).

Row width. The widest distance from the center of one row of plants to the center of an adjacent row of plants.

Tropical depression. A system identified by the U.S. Weather Service as a tropical depression, and for the period of time so designated, including tropical storms, gales, and hurricanes.

2. Unit Division

(a) A basic unit, as defined in section 1 of the Basic Provisions, will also be divided into additional basic units by planting period.

(b) Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

3. Amounts of Insurance and Production Stages

(a) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), you may select only one coverage level (and the corresponding amount of insurance designated in the actuarial documents for the applicable planting period and practice) for all the peppers in the county insured under this policy.

(b) The amount of insurance you choose for each planting period and practice must have the same percentage relationship to the maximum price offered by us for each planting period and practice. For example, if you choose 100 percent of the maximum amount of insurance for a specific planting period and practice, you must also choose 100 percent of the maximum amount of insurance for all other planting periods and practices.
(c) The production reporting requirements contained in section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8) do not apply to fresh market peppers.

(d) The amounts of insurance per acre are progressive by stages as follows:

<table>
<thead>
<tr>
<th>Stage</th>
<th>Percent of the amount of insurance per acre that you selected</th>
<th>Length of time if direct-seeded</th>
<th>Length of time if transplanted</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>65 From planting through the 74th day after planting.</td>
<td>From planting through the 44th day after planting.</td>
<td></td>
</tr>
<tr>

(e) Any acreage of peppers damaged in the first or second stage to the extent that the majority of producers in the area would not normally further care for it, will be deemed to have been destroyed. The indemnity payable for such acreage will be based on the stage the plants had achieved when the damage occurred.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§ 457.8), the contract change date is April 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§ 457.8), the cancellation and termination dates are July 31.

6. Report of Acreage

In addition to the requirements of section 6 (Report of Acreage) of the Basic Provisions (§ 457.8), you must report on or before the acreage reporting date contained in the Special Provisions for each planting period:

(a) All the acreage of peppers in the county insured under this policy in which you have a share;

(b) The dates the acreage was planted within each planting period; and

(c) The row width.

7. Annual Premium

In lieu of the premium amount determinations contained in section 7 (Annual Premium) of the Basic Provisions (§ 457.8), the annual premium amount for each cultural practice (e.g., fall direct-seeded irrigated) is determined by multiplying the third stage amount of insurance per acre by the premium rate for the cultural practice as established in the Actuarial Table, by the insured acreage, by your share at the time coverage begins, and by any applicable premium adjustment factors contained in the actuarial documents.

8. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§ 457.8), the crop insured will be all the bell peppers in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;

(b) That are:

(1) Planted to be harvested and sold as mature fresh market bell peppers;

(2) Planted within the planting periods designated in the actuarial documents;

(3) Grown under an irrigated practice;

(4) Grown on acreage covered by plastic mulch except where the Special Provisions allow otherwise;

(5) Grown by a person who in at least one of the three previous crop years:

(i) Grew bell peppers for commercial sale; or

(ii) Participated in managing a bell pepper farming operation;

(c) That are not:

(1) Interplanted with another crop;

(2) Planted into an established grass or legume;

(3) Pimento peppers; or

(4) Grown for direct marketing.

9. Insurable Acreage

(a) In lieu of the provisions of section 9 (Insurable Acreage) of the Basic Provisions (§ 457.8), that prohibit insurance attaching if a crop has not been planted in at least one of the three previous crop years, we will insure newly cleared land or former pasture land planted to fresh market peppers.

(b) In addition to the provisions of section 9 (Insurable Acreage) of the Basic Provisions (§ 457.8):

(1) You must replant any acreage of peppers damaged during the planting period in which initial planting took place whenever less than 50 percent of the plant stand remains; and

316
Federal Crop Insurance Corporation, USDA

§457.148

(i) It is practical to replant;
(ii) If, at the time the crop was damaged, the final day of the planting period has not passed; and
(iii) The damage occurs within 30 days of transplanting or 60 days of direct-seeding.

(2) Whenever peppers initially are planted during the fall or winter planting periods and the conditions specified in sections 9(b)(1) (ii) and (iii) are not satisfied, you may elect:
(i) To replant such acreage and collect any replant payment due as specified in section 12. The initial planting period coverage will continue for such replanted acreage.
(ii) Not to replant such acreage and receive an indemnity based on the stage of growth the plants had attained at the time of damage. However, such an election will result in the acreage being uninsurable in the subsequent planting period.

(3) We will not insure any acreage on which peppers (except for replanted peppers in accordace with sections 9(b)(1) and (2)), tomatoes, eggplants, or tobacco have been grown and the soil was not fumigated or otherwise properly treated before planting peppers.

10. Insurance Period

In lieu of the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8), coverage begins on each unit or part of a unit the later of the date we accept your application, or when the peppers are planted in each planting period. Coverage ends at the earliest of:

(a) Total destruction of the peppers on the unit;
(b) Abandonment of the peppers on the unit;
(c) The date harvest should have started on the unit on any acreage which will not be harvested;
(d) Final adjustment of a loss on the unit;
(e) Final harvest;
(f) The calendar date for the end of the insurance period as follows:
   (1) 165 days after the date of direct-seeding or replanting with seed; and
   (2) 150 days after the date of transplanting or replanting with transplants.

11. Causes of Loss

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur during the insurance period:
   (1) Excess rain;
   (2) Fire;
   (3) Freeze;
   (4) Hail;
   (5) Tornado;
   (6) Tropical depression; or
   (7) Failure of the irrigation water supply, if caused by an insured cause of loss that occurs during the insurance period.
(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§457.8), we will not insure against any loss of production due to:
   (1) Disease or insect infestation, unless no effective control measure exists for such disease or insect infestation; or
   (2) Failure to market the peppers, unless such failure is due to actual physical damage caused by an insured cause of loss that occurs during the insurance period.

12. Replanting Payments

(a) In accordance with section 13 (Replanting Payment) of the Basic Provisions (§457.8), a replanting payment is allowed if, due to an insured cause of loss, more than 50 percent of the plant stand will not produce peppers and it is practical to replant.
(b) The maximum amount of the replanting payment per acre will be the lesser of your actual cost of replanting or the result obtained by multiplying the per acre replanting payment amount contained in the Special Provisions by your insured share.
(c) In lieu of the provisions contained in section 13 (Replanting Payment) of the Basic Provisions (§457.8), that limit a replanting payment to one each crop year, only one replanting payment will be made for acreage planted during each planting period within the crop year.

13. Duties in the Event of Damage or Loss

In addition to the requirements contained in section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§457.8), if you intend to claim an indemnity on any unit you also must give us notice not later than 72 hours after the earliest of:

(a) The time you discontinue harvest of any acreage on the unit;
(b) The date harvest normally would start if any acreage on the unit will not be harvested;
(c) The calendar date for the end of the insurance period.

14. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
   (1) For any optional unit, we will combine all optional units for which such production records were not provided; or
   (2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
§ 457.148

(1) Multiplying the insured acreage in each stage by the amount of insurance per acre for the final stage;

(2) Multiplying each result in section 14(b)(1) by the percentage for the applicable stage (see section 3(d));

(3) Total the results of section 14(b)(2);

(4) Subtracting either of the following values from the result of section 14(b)(3):
   (i) For other than catastrophic risk protection coverage, the total value of production to be counted (see section 14(c)); or
   (ii) For catastrophic risk protection coverage, the result of multiplying the total value of production to be counted (see section 14(c)) by:
      (A) Sixty percent for the 1998 crop year; or
      (B) Fifty-five percent for 1999 and subsequent crop years; and
   (5) Multiplying the result of section 14(b)(4) by your share.

(c) The total value of production to count from all insurable acreage on the unit will include:

(1) Not less than the amount of insurance per acre for the stage for any acreage:
   (i) That is abandoned;
   (ii) Put to another use without our consent;
   (iii) That is damaged solely by uninsured causes; or
   (iv) For which you fail to provide acceptable production records;

(2) The value of the following appraised production will not be less than the dollar amount obtained by multiplying the number of boxes of appraised peppers by the minimum value per box shown in the Special Provisions for the planting period:
   (i) Potential production on any acreage that has not been harvested the third time;
   (ii) Unharvested mature bell peppers (unharvested production that is damaged or defective due to insurable causes and is not marketable will not be counted as production to count);
   (iii) Production lost due to uninsured causes; and
   (iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
      (A) We may require you to continue to care for the crop so that a subsequent appraisal may be made or the crop harvested to determine actual production (If we require you to continue to care for the crop and you do not do so, the original appraisal will be used); or
      (B) You may elect to continue to care for the crop, in which case the amount of production to count for the acreage will be the harvested production, or our reappraisal if the crop is not harvested.

(3) The total value of all harvested production from the insurable acreage will be the dollar amount obtained by subtracting the allowable cost contained in the Special Provisions from the price received for each box of peppers (this result may not be less than the minimum value shown in the Special Provisions for any box of peppers), and multiplying this result by the number of boxes of peppers harvested. Harvested production that is damaged or defective due to insurable causes and is not marketable, will not be counted as production to count.

15. Late and Prevented Planting
The late and prevented planting provisions of the Basic Provisions are not applicable.

16. Minimum Value Option
(a) The provisions of this option are continuous and will be attached to and made a part of your insurance policy, if:
   (1) You elect either Option I or Option II of the Minimum Value Option on your application, or on a form approved by us, on or before the sales closing date for the initial crop year in which you wish to insure fresh market peppers under this option, and pay the additional premium indicated in the actuarial documents for this optional coverage; and
   (2) You have not elected coverage under the Catastrophic Risk Protection Endorsement.

(b) In lieu of the provisions contained in section 16(c)(3), the total value of harvested production will be determined as follows:
   (1) If you selected Option I of the Minimum Value Option, the total value of harvested production will be as follows:
      (i) For sold production, the dollar amount obtained by subtracting the allowable cost contained in the Special Provisions from the price received for each box of peppers (this result may not be less than the minimum value option price contained in the Special Provisions for any box of peppers), and multiplying this result by the number of boxes of peppers sold; and
      (ii) For marketable production that is not sold, the dollar amount obtained by multiplying the number of boxes of such peppers on the unit by the minimum value shown in the Special Provisions for the planting period (harvested production that is damaged or defective due to insurable causes and is not marketable will not be counted as production).
   (2) If you selected Option II of the Minimum Value Option, the total value of harvested production will be as provided in section 16(b)(1), except that the dollar amount specified in section 16(b)(1)(i) may not be less than zero.
§ 457.149 Table grape crop insurance provisions.

The Table Grape Crop Insurance Provisions for the 2010 and succeeding crop years are as follows:

For:

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

For Reinsured Policies

(Insurance provider’s name or other appropriate heading)

For both FCIC and reinsured policies:

Table Grape Crop Provisions

1. Definitions

Adapted. Varieties that are recognized by the National Institute of Food and Agriculture as compatible with agronomic and weather conditions in the county.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Graft. To unite a shoot or bud (scion) with a rootstock or an existing vine in accordance with recommended practices to form a living union.

Harvest. Removing the mature grapes from the vines either by hand or machine.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Lug. Twenty (20) pounds of table grapes in the Coachella Valley, California district, and all other States.

(2) Twenty-one (21) pounds in all other California districts.

(3) Or as otherwise specified in the Special Provisions.

Set out. Physically planting the grape plants in the vineyard.

Table grapes. Grapes that are grown for commercial sale for human consumption as fresh fruit on acreage where the cultural practices to produce fresh marketable grapes are carried out.

Type. A category of grapes (one or more varieties) identified as a type in the Special Provisions.

USDA grade standard. (1) United States standard used to determine the minimum quality grade will be:

(i) The United States Standards for Grades of Table Grapes (European or Vinifera Type);

(ii) The United States Standards for Grades of American (Eastern Type Bunch Grapes); and

(iii) The United States Standards for Grades of Muscadine (Vitis rotundifolia) Grapes.

(2) The quantity and number of samples required will be determined in accordance with procedures issued by FCIC or as provided on the Special Provisions of Insurance.

Variety. A kind of grape that is distinguished from any other by unique characteristics such as, but not limited to, size, color, skin thickness, acidity, flavors and aromas. In Arizona and California each variety is identified as a separate type in the Special Provisions except for type 095 (other varieties). Type 095 is used to designate varieties not listed as a separate type.

2. Unit Division

(a) In Arizona and California only:

(1) A basic unit as defined in section 1 of the Basic Provisions will be divided into additional basic units by each table grape variety that you insure; and

(2) Provisions in the Basic Provisions that provide for optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Unless otherwise allowed by written agreement, optional units may only be established if each optional unit is located on non-contiguous land or grown and insured under an organic farming practice.

(b) In all states except Arizona and California, in addition to, or instead of, establishing optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated acreage and for acreage grown and insured under an organic farming practice as provided in the unit division provisions contained in the Basic Provisions, a separate optional unit may be established if each optional unit:

(1) Is located on non-contiguous land; or

(2) Consists of a separate type when separate types are specified in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) In Arizona and California, you may select only one coverage level and price election for each table grape variety you elect to insure in the county.
§ 457.149 7 CFR Ch. IV (1-1-14 Edition)

(b) In all states except Arizona and California, you may select only one coverage level and price election for each table grape type in the county as specified in the Special Provisions. The coverage level you choose for each table grape type is not required to have same percentage relationship. The price election you choose for each type is not required to have the same percentage relationship to the maximum price election offered by us for each type. For example, if you choose 75 percent coverage level and 100 percent of the maximum price election for one type, you may choose 65 percent coverage level and 75 percent of the maximum price election for another type. If you elect the Catastrophic Risk Protection (CAT) level of insurance for any grape type, the CAT level of coverage will be applicable to all insured grape acreage in the county.

c) In all states except Arizona and California, if you acquire a share in any grape acreage after you submit your application, such acreage is insurable under the terms of the policy and you did not include the grape type on your application, we will assign the following:

(1) A coverage level equal to the lowest coverage level you selected for any other grape type; and
(2) A price election percentage equal to the type with the lowest coverage level you selected, if you elected additional coverage; or 55 percent of the maximum price election, if you elected CAT.

d) You must report by the production reporting date designated in section 3 of the Basic Provisions, by type or variety if applicable:

(1) Any damage, removal of bearing vines, change in practices or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres;
(2) The number of bearing vines on insurable and uninsurable acreage;
(3) The age of the vines and the planting pattern; and
(4) For the first year of insurance for acreage interplanted with another perennial crop, and any time the planting pattern of such acreage is changed:

(i) The age of the interplanted crop, and the table grape type or variety, if applicable;
(ii) The planting pattern; and
(iii) Any other information that we request in order to establish your approved yield.

(e) We will reduce the yield used to establish your production guarantee, based on our estimate of the effect on yield potential of any of the items listed in section 3(d)(1) through (4). If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee at any time we become aware of the circumstance.

(f) Your request to increase the coverage level or price election percentage will not be accepted if a cause of loss that could or would reduce the yield of the insured crop is evident when your request is made.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is October 31 preceding the cancellation date for Arizona and California and August 31 preceding the cancellation date for all other states.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are January 31 in Arizona and California, and November 20 for all other states.

6. Report of Acreage

In addition to the requirements of section 6 of the Basic Provisions, you must report your acreage:

(a) In Arizona and California, by each table grape variety you insure; or
(b) In all other states, by each table grape type.

7. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be any insurable variety of table grapes that you elect to insure in Arizona and California, or in all other states all insurable types, in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That are grown for harvest as table grapes;
(c) That are adapted to the area;
(d) That are grown in a vineyard that, if inspected, is considered acceptable by us;
(e) That, after being set out or grafted, have reached the number of growing seasons designated by the Special Provisions; or
(f) That have produced an average of at least 150 lugs of table grapes per acre (or as otherwise provided in the Special Provisions) in at least one of the three crop years immediately preceding the insured crop year, unless we inspect and allow insurance on acreage that has not produced this amount.

8. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions that prohibit insurance attaching to a crop planted with another crop, table grapes interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.
9. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions

(1) For the year of application, coverage begins on February 1 in Arizona and California, and November 21 in all other states. Notwithstanding the previous sentence, if your application is received by us after January 12 but prior to February 1 in Arizona or California, or after November 1 but prior to November 21 in all other states, insurance will attach on the 20th day after your properly completed application is received in our local office, unless we inspect the acreage during the 20-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the vineyard.

(2) For each subsequent crop year that the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.

(3) If in accordance with the terms of the policy, your table grape policy is cancelled or terminated for any crop year after insurance attached for that crop year, but on or before the cancellation and termination dates, whichever is later, insurance will not be considered to have attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.

(b) In addition to the provisions of section 11 of the Basic Provisions:

(1) If you acquire an insurable share in any insurable acreage after coverage begins, but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period. Acreage acquired after the acreage reporting date will not be insured.

(2) If you relinquish your insurable share on any insurable acreage of table grapes on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium will be due or indemnity paid for such acreage for that crop year unless:

(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

10. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions;

(2) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the vineyard;

(3) Insects, except as excluded in 10(b)(1), but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(8) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to:

(1) Phylloxera, regardless of cause; or

(2) Inability to market the table grapes for any reason other than the actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

11. Duties In the Event of Damage or Loss

In addition to the requirements of section 14 of the Basic Provisions, the following will apply:

(a) You must notify us within 3 days after the date harvest should have started if the crop will not be harvested.

(b) You must notify us at least 15 days before any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine your production to count for production that is sold by direct marketing. If damage occurs during this appraisal, we will conduct an additional appraisal. These appraisals, and any acceptable records provided by you, will be used to determine your production to count. Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count of not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.

(c) If the crop has been damaged during the growing season and you previously gave notice in accordance with section 14 of the
§ 457.150

Basic Provisions, you must also provide notice at least 15 days prior to the beginning of harvest if you intend to claim an indemnity as a result of the damage previously reported. You must not destroy the damaged crop until the earlier of 15 days from the date you gave notice of loss, or our written consent to do so. If you fail to meet requirements of this section all such production will be considered undamaged and included as production to count.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional unit, we will combine all optional units for which such production records were not provided; or

(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by its respective production guarantee;

(2) Multiplying each result in section 12(b)(1) by the respective price election you selected for each type or variety;

(3) Totaling the results in section 12(b)(2);

(4) Multiplying the total production to count of each type or variety, if applicable, (see section 12(c)) by the respective price election you selected;

(5) Totaling the results in section 12(b)(4);

(6) Subtracting the result of section 12(b)(5) from the result in section 12(b)(3); and

(7) Multiplying the result of section 12(b)(6) by your share.

(c) The total production to count (in lugs) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) Not less than the production guarantee per acre for acreage:

(A) That is abandoned;

(B) That is sold by direct marketing if you fail to meet the requirements in section 11(b);

(C) That is damaged solely by uninsured causes; or

(D) For which you fail to provide acceptable production records;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production that meets, or would meet if properly handled, the state quality standards, if specified in the Special Provisions, or the appropriate USDA grade standard (if no state standard is specified); and

(iv) Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count; and

(2) All harvested production from insurable acreage regardless of condition or disposition. The quantity of production to count for table grape production damaged by insurable causes within the insurance period that is marketed for any use other than table grapes will be determined by multiplying the greater of (1) the value of the table grapes per ton or (2) $50, by the number of tons and dividing that result by the highest price election available for the insured unit. This result will be the number of lugs to count.

13. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

§ 457.150 Dry bean crop insurance provisions.

The dry bean crop insurance provisions for the 2003 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(8) [Appropriate title for insurance provider]

Both FCIC and Reinsured Policies

Dry Bean Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Actual value. The dollar value received, or that could be received, for contract seed beans under a seed bean processor contract if the contract seed bean production is properly handled in accordance with the requirements of such contract.

Base price. The price per pound (excluding any discounts or incentives that may apply)
that is stated in the seed bean processor contract and that will be paid to the producer for at least 50 percent of the total production under contract with the seed company.

**Seed bean processor contract.** A written agreement between the contract seed bean producer and the seed company, containing at a minimum:

(a) The contract seed bean producer’s promise to plant and grow one or more specific varieties of contract seed beans, and deliver the production from those varieties to the seed company;

(b) The seed company’s promise to purchase all the production stated in the contract; and

(c) A base price, or a method to determine such price based on published independent information, that will be paid to the contract seed bean producer for the production stated in the contract.

**Seed company.** Any business enterprise regularly engaged in the processing of seed beans, that possesses all licenses and permits for marketing seed beans required by the State in which it operates, and that possesses or has contracted for facilities, with enough drying, screening and bagging or packaging equipment to accept and process the seed beans within a reasonable amount of time after harvest.

**Swathing or knifeing.** Severance of the bean plant from the ground, including the pods and beans, and placing them into windrows.

**Type.** A category of beans identified as a type in the Special Provisions.

### 2. Unit Division

(a) In addition to the definition of basic unit in section 1 of the Basic Provisions, all acreage of contract seed beans qualifies as a separate basic unit. For production based seed bean processor contracts, the basic unit will consist of all the acreage needed to produce the amount of production under contract, based on the actual production history of the acreage. For acreage based seed bean processor contracts, the basic unit will consist of all acreage specified in the contract.

(b) In addition to, or instead of, establishing optional units by section, section equivalent, or PSA farm serial number and by irrigated and non-irrigated acreage as provided in the unit division provisions contained in the Basic Provisions, a separate optional unit may be established for each bean type shown in the Special Provisions.

(c) Contract seed beans may qualify for optional units only if the seed bean processor contract specifies the number of acres under contract. Contract seed beans produced under a seed bean processor contract that specifies only an amount of production or a combination of acreage and production, are not eligible for optional units.

### 3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3(b) (Insurance Guarantees, Coverage
Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), you may select only one price election for all the dry beans in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each dry bean type designated in the Special Provisions. The price elections you choose for each type are not required to have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you may also choose 75 percent of the maximum price election for another type.

(b) For contract seed beans only, the dollar amount of insurance is obtained by multiplying the production guarantee per acre for each variety in the unit by the insured acreage of that variety, times the applicable base price, and times the price election percentage you selected. The total of these results will be the amount of insurance for contract seed beans in the unit.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions, the contract change date is November 30 (December 17 for the 1998 crop year only) preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§457.8), the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>California</td>
<td>February 28.</td>
</tr>
<tr>
<td>All other States</td>
<td>March 15.</td>
</tr>
</tbody>
</table>

6. Report of Acreage

For contract seed beans only, in addition to the requirements of section 6 (Report of Acreage) of the Basic Provisions (§457.8), you must submit a copy of the seed bean processor contract on or before the acreage reporting date.

7. Insured Crop

(a) In accordance with section 8 (Insured Crop) of the Basic Provisions (§457.8), the crop insured will be all the beans in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share;
(2) That are planted for harvest as:
   (i) Dry beans; or
   (ii) If applicable, contract seed beans, if the seed bean processor contract is executed on or before the acreage reporting date; and
(3) That are not (unless allowed by the Special Provisions or by written agreement):
   (i) Interplanted with another crop; or
   (ii) Planted into an established grass or legume.

(b) For contract seed beans only:

(1) An instrument in the form of a “lease” under which you retain control of the acreage on which the insured crop is grown and that provides for delivery of the crop under substantially the same terms as a seed bean processor contract may be treated as a contract under which you have an insurable interest in the crop; and
(2) We will not insure any acreage of contract seed beans produced by a seed company.

(c) In addition to the types of dry beans designated in the Special Provisions, we will insure other types if:

(1) The type you intend to plant has been demonstrated to be adapted to the area. Evidence of adaptability must include:
   (i) Results of test plots for 2 years and recommendations by a university or seed company; or
   (ii) Two years of production reports that indicate your experience producing the type in your production area;
(2) You submit on or before the sales closing date your production reports and prices received, or the test plot results, and evidence of market potential, including the price buyers are willing to pay for the type; and
(3) Both parties (you and us) enter into a written agreement allowing insurance on the type in accordance with section 18 of the Basic Provisions.

(d) Any acreage of beans that is destroyed and replanted to a different insurable type of beans will be considered insured acreage in accordance with section 11.

8. Insurable Acreage

In addition to the provisions of section 9 (Insurable Acreage) of the Basic Provisions (§457.8):

(a) We will not insure any acreage that does not meet the rotation requirements contained in the Special Provisions; or
(b) Any acreage of the insured crop damaged before the final planting date, to the extent that the majority of growers in the area would normally not further care for the crop,
Federal Crop Insurance Corporation, USDA

§ 457.150

must be replanted unless we agree that replanting is not practical. We will not require you to replant if it is not practical to replant to the same type of beans as originally planted.

9. Insurance Period

In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8), the calendar date for the end of the insurance period is the date immediately following planting as follows:

(a) October 15 in Oklahoma, New Mexico, and Texas;
(b) November 15 in California; and
(c) October 31 in all other States.

10. Causes of Loss

In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes of loss that occur during the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period.

11. Replanting Payments

(a) In accordance with section 13 (Replanting Payment) of the Basic Provisions (§457.8), a replanting payment is allowed if the bean crop is damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage and it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be the lesser of 10 percent of the production guarantee for the type to be replanted or 120 pounds multiplied by your price election for the type to be replanted and by your insured share.

(c) When beans are replanted using a practice that is uninsurable as an original planting, the liability for the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

(d) The guarantee and premium for acreage replanted to a different insurable type will be based on the replanted type and will be calculated in accordance with sections 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) and 7 (Annual Premium) of the Basic Provisions (§457.8) and section 3 of these Crop Provisions.

12. Duties in the Event of Damage or Loss

In accordance with the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§457.8), representative samples of the unharvested crop must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be harvested or destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed.

13. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or
(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the unit.

(b) In the event of loss or damage to your bean crop covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage of each dry bean type by its respective production guarantee;
(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the unit.

(3) Totaling the results in section 13(b)(2);
(4) Multiplying the insured acreage of each contract seed bean type by its respective production guarantee;
(5) Multiplying each result in section 13(b)(4) by the applicable base price;
(6) Multiplying each result in section 13(b)(5) by your selected price election percentage;
(7) Totaling the results in section 13(b)(6);
(8) Totaling the results in section 13(b)(3) and section 13(b)(6);
(9) Multiplying the total production to be counted of each dry bean type if applicable, (see section 13(d)) by the respective price election;
(10) Totaling the value of all contract seed bean production (see section 13(c));
(11) Totaling the results in section 13(b)(9) and section 13(b)(10);
(12) Subtracting the total in section 13(b)(11) from the total in section 13(b)(8); and
(13) Multiplying the result by your share.

(c) The value of contract seed bean production to count for each type in the unit will be determined as follows:

(1) For production meeting the minimum quality requirements contained in the seed bean processor contract and for production
that does not meet such requirements due to uninsured causes:

(i) Multiplying the actual value or base price per pound, whichever is greater, by the price election percentage you selected; and

(ii) Multiplying the result by the number of pounds of such production.

(2) For production not meeting the minimum quality requirements contained in the seed bean processor contract due to insurable causes:

(i) Multiplying the actual value by the price election percentage you selected; and

(ii) Multiplying the result by the number of pounds of such production.

(d) The total bean production to count (in pounds) from all insurable acreage on the unit will include:

(i) All appraised production as follows:

(A) That is abandoned;

(B) That is put to another use without our consent;

(C) That is damaged solely by uninsured causes; or

(D) For which you fail to provide production records that are acceptable to us;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production (mature unharvested production of dry beans may be adjusted for quality deficiencies and excess moisture in accordance with section 13(e)); and

(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(ii) All harvested production from the insurable acreage.

(e) Mature dry bean production to count may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality. Adjustment for excess moisture and quality deficiencies will not be applicable to contract seed beans.

(1) Production will be reduced by 0.12 percent for each 0.1 percentage point of moisture in excess of 18 percent. We may obtain samples of the production to determine the moisture content.

(2) Production will be eligible for quality adjustment if:

(i) A pick is designated in the Special Provisions and the pick of the damaged production exceeds this designation; or

(ii) A pick is not designated in the Special Provisions and deficiencies in quality, in accordance with the United States Standards for Beans, result in dry beans not meeting the grade requirements for U.S. No. 2 (grades U.S. No. 3 or worse) because the beans are damaged or badly damaged; or

(iii) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(3) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these crop provisions and which occurs within the insurance period;

(ii) The deficiencies, substances, or conditions result in a net price for the damaged production that is less than the local market price;

(iii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us;

(iv) With regard to deficiencies in quality (except test weight, which may be determined by our loss adjuster), the samples are analyzed by:

(A) A grader licensed under the United States Agricultural Marketing Act or the United States Warehouse Act;

(B) A grader licensed under State law and employed by a warehouse operator who has a storage agreement with the Commodity Credit Corporation; or

(C) A grader not licensed under State law, but who is employed by a warehouse operator who has a commodity storage agreement with the Commodity Credit Corporation and is in compliance with State law regarding warehouses; and

(v) With regard to substances or conditions injurious to human or animal health, the samples are analyzed by a laboratory approved by us.
Federal Crop Insurance Corporation, USDA

§ 457.151

Forage seeding crop insurance provisions.

1. Definitions

Crop year. The period within which the planting is or normally would become established and shall be designated by the calendar year in which the planting is made for spring planted acreage and the next succeeding calendar year for fall planted acreage.

Fall planted. A forage crop seeded after June 30.

Forage. Planted perennial alfalfa, perennial red clover, perennial grasses, or a mixture thereof, or other species, as shown in the actuarial documents.

Good farming practices. The cultural practices generally in use in the county for the crop to make normal progress toward maturity and produce a normal stand, and are those recognized by the National Institute of Food and Agriculture as compatible with agronomic and weather conditions in the county.

Harvest. Severance of the forage plant from its roots. Acreage that is only grazed will not be considered harvested.

Normal stand. A population of live plants per square foot that meets the minimum required number of plants as shown in the Special Provisions.

Nurse Crop (companion crop). A crop seeded into the same acreage as another crop, that is intended to be harvested separately, and...
that is planted to improve growing conditions for the crop with which it is grown.

Planted acreage. In addition to the provisions in section 1 of the Basic Provisions, land on which seed is initially spread onto the soil surface by any method and subsequently is mechanically incorporated into the soil in a timely manner and at the proper depth will be considered planted, unless otherwise provided by the Special Provisions, actuarial documents, or written agreement.

Replanting. Performing the cultural practices necessary to prepare the land for replacing the forage seed and then replacing the forage seed in the insured acreage with the expectation of producing a normal stand. Replacing new seed into an existing damaged stand, which results in a reduced seeding rate from the original seeding rate, will not be considered replanting.

Sales closing date. In lieu of the definition contained in the Basic Provisions, a date contained in the Special Provisions by which an application must be filed and by which you may change your crop insurance coverage for a crop year. If the Special Provisions provide a sales closing date for both fall seeded and spring seeded practices for the insured crop and you plant any insurable fall seeded acreage, you may not change your crop insurance coverage after the fall sales closing date for the fall seeded practice.

Spring planted. A forage crop seeded before July 1.

2. Unit Division

A basic unit, as defined in section 1 of the Basic Provisions, will also be divided into additional basic units by spring planted and fall planted acreage.

3. Amounts of Insurance

(a) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), you may only select one coverage level and the corresponding amount of insurance designated in the actuarial documents for the applicable type and practice for all the forage seeding in the county that is insured under this policy. The amount of insurance you choose for each type and practice must have the same percentage relationship to the maximum amount of insurance offered by us for each type and practice. For example, if you choose 100 percent of the maximum amount of insurance for a specific type and practice, you must also choose 100 percent of the maximum amount of insurance for all other types and practices.

(b) The production reporting requirements contained in section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§457.8), do not apply to forage seeding.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date for counties with a March 15 cancellation date and April 30 preceding the cancellation date for all other counties.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>South Dakota counties for which the Special Provisions designate only a spring final planting date, and all other states.</td>
<td>March 15.</td>
</tr>
</tbody>
</table>

6. Report of Acreage

In lieu of the provisions of section 6(a) of the Basic Provisions, a report of all insured acreage of forage seeding must be submitted on or before each forage seeding acreage report date specified in the Special Provisions.

7. Insured Crop

In accordance with section 8 (Insured Crop) of the Basic Provisions (§457.8), the crop insured will be all the forage in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;

(b) That is planted during the current crop year, or replanted during the calendar year following planting, to establish a normal stand of forage;

(c) That is not grown with the intent to be grazed, or not grazed at any time during the insurance period; and

(d) That is not interplanted with another crop, except nurse crops, unless allowed by the Special Provisions or by written agreement.

8. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:
Federal Crop Insurance Corporation, USDA § 457.151

(a) In California counties Lassen, Modoc, Mono, Shasta, Siskiyou and all other states, any acreage of the insured crop damaged before the final planting date, to the extent that such acreage has less than 75 percent of a normal stand, must be replanted unless we agree that it is not practical to replant; and
(b) In California, unless otherwise specified in the Special Provisions, any acreage of the insured crop damaged anytime during the crop year to the extent that such acreage has less than 75 percent of a normal stand must be replanted unless it cannot be replanted and reach a normal stand within the insurance period.

9. Insurance Period

In lieu of the provisions of section 11 (Insurance Period) of the Basic Provisions (§457.8) regarding when insurance ends, forage seeding insurance will end at the earliest of:
(a) Total destruction of the insured crop on the unit;
(b) The initial harvest of the unit, if a late harvest date is not listed in the Special Provisions;
(c) The first harvest after the late harvest date, if a late harvest date is specified in the Special Provisions. You may harvest the crop as often as practical in accordance with good farming practices on or before the late harvest date.
(d) Final adjustment of a loss on a unit;
(e) Abandonment of the insured crop;
(f) The date grazing commences on the insured crop; or
(g) The following calendar dates:
(1) During the calendar year following the year of seeding for:
   (i) Fall planted acreage in all California counties except Lassen, Modoc, Mono, Shasta and Siskiyou—November 30;
   (ii) Spring planted acreage in Lassen, Modoc, Mono, Shasta and Siskiyou Counties California, Colorado, Idaho, Nebraska, Nevada, Oregon, Utah and Washington—April 14;
   (iii) Spring planted acreage in all other states—May 21;
   (iv) Fall planted acreage in Lassen, Modoc, Mono, Shasta and Siskiyou Counties California and all other states—October 15;
(2) During the calendar year of seeding for spring planted acreage in all California counties except Lassen, Modoc, Mono, Shasta and Siskiyou—November 30.

10. Causes of Loss

In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§457.8), insurance is provided only against the following causes that result in loss of, or failure to establish, a stand of forage that occur during the insurance period:
(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period.

11. Replanting Payment

In lieu of the provisions contained in section 13 of the Basic Provisions:
(a) A replanting payment is allowed if:
   (1) In California, unless specified otherwise in the Special Provisions, acreage planted to the insured crop is damaged by an insurable cause of loss occurring within the insurance period to the extent that less than 75 percent of a normal stand remains and the crop can reach maturity before the end of the insurance period;
   (2) In Lassen, Modoc, Mono, Shasta, Siskiyou Counties, California, and all other states:
      (i) A replanting payment is allowed only whenever the Special Provisions designate both fall and spring final planting dates;
      (ii) The insured fall planted acreage is damaged by an insurable cause of loss to the extent that less than 75 percent of a normal stand remains;
      (iii) It is practical to replant;
      (iv) We give written consent to replant; and
      (v) Such acreage is replanted the following spring by the spring planting date.
(b) The amount of the replanting payment will be equal to 50 percent of the amount of indemnity determined in accordance with section 13 unless otherwise specified in the Special Provisions.
(c) No replanting payment will be made on acreage for which one replanting payment has been allowed.
(d) If the information reported by you on the acreage report results in a lower premium than the actual premium determined to be due based on the acreage, share, practice, or type determined actually to have existed, the replanting payment will be reduced proportionately.

12. Duties in the Event of Damage or Loss

(a) In accordance with the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions (§457.8), the representative samples of the crop must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be harvested or destroyed until the
§ 457.152 Hybrid seed corn crop insurance provisions.

The Hybrid Seed Corn Crop Insurance Provisions for the 1998 and succeeding crop years are as follows:

FCIC Policies

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured Policies

Both FCIC and Reinsured policies

Hybrid Seed Corn Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions, (§ 457.8) with (1) controlling (2), etc.

1. Definitions

Adjusted yield. An amount determined by multiplying the county yield by the coverage level factor.

Amount of insurance per acre. A dollar amount determined by multiplying the adjusted yield by the price election you select and subtracting any minimum guaranteed payment, not to exceed the total compensation specified in the hybrid seed corn processor contract. If your hybrid seed corn processor contract contains a minimum guaranteed payment that is stated in bushels, we will convert that value to dollars by multiplying it by the price election you selected. Approved yield. In lieu of the definition contained in the Basic Provisions, an amount FCIC determines to be representative of the yield that the female parent plants are expected to produce when grown under a specific production practice. FCIC will establish the approved yield based upon records provided by the seed company and other information it deems appropriate.

Bushel. Fifty-six pounds avoirdupois of shelled corn, 70 pound avoirdupois of ear corn, or the number of pounds determined with section 13(a) will be reduced 50 percent if the stand is less than 75 percent but more than 55 percent of a normal stand.

14. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

(c) The amount of indemnity on any spring planted acreage that is damaged, you decide to replant the acreage by the spring final planting date.

Example: Assume you have 100 percent share in 30 acres of type A forage in the unit, with an amount of insurance of $100.00 per acre. At the time of loss, the following findings are established: 10 acres had a remaining stand of 75 percent or greater. You also have 20 acres of type B forage in the unit, with an amount of insurance of $90.00 per acre. 10 acres had a remaining stand of 75 percent or greater. Your indemnity would be calculated as follows:

1. 30 acres x $100.00 = $3,000 amount of insurance for type A; 20 acres x $90.00 = $1,800 amount of insurance for type B;
2. $3,000 + $1,800 = $4,800 total amount of insurance;
3. 10 acres with 75% stand or greater x $100.00 = $1,000 production to count for type A; 10 acres with 75% stand or greater x $90.00 = $900 production to count for type B; 4. $1,000 + $900 = $1,900 total production to count;
5. $4,800-$1,900 = $2,900 loss;
6. $2,900 x 100 percent share = $2,900 indemnity payment.
(b) The acres with an established stand will include:

1. Acreage that has at least 75 percent of a normal stand;
2. Acreage abandoned or put to another use without our prior written consent;
3. Acreage damaged solely by an uninsured cause; and
4. Acreage that is harvested and not reseeded.
(c) The amount of indemnity on any spring planted acreage determined in accordance
under the seed company’s normal conversion chart when that chart is used to determine the approved yield and the claim for indemnity.

Certified seed test. A warm germination test performed on clean seed according to specifications of the “Rules for Testing Seeds” of the Association of Official Seed Analysts.

Commercial hybrid seed corn. The offspring produced by crossing a male and female parent plant, each having a different genetic character. This offspring is the product intended for use by an agricultural producer to produce a commercial field corn crop for grain.

County yield. An amount contained in the actuarial documents that is established by FCIC to represent the yield that a producer of hybrid seed corn would be expected to produce if the acreage had been planted to commercial field corn.

Coverage level factor. A factor contained in the Special Provisions to adjust the county yield for commercial field corn to reflect the higher value of hybrid seed corn.

Dollar value per bushel. An amount that determines the value of any seed production to count. It is determined by dividing the amount of insurance per acre by the result of multiplying the approved yield by the coverage level percentage, expressed as a decimal.

Female parent plants. Corn plants that are grown for the purpose of producing commercial hybrid seed corn and have had the stamens removed or are otherwise male sterile.

Field run. Commercial hybrid seed corn production before it has been dried, screened, or processed.

Good farming practices. In addition to the definition contained in the Basic Provisions, good farming practices include those practices required by the hybrid seed corn processor contract.

Harvest. Combining, threshing or picking ears from the female parent plants to obtain commercial hybrid seed corn.

Hybrid seed corn processor contract. An agreement executed between the hybrid seed corn crop producer and a seed company containing, at a minimum: 

(a) The producer’s promise to plant and grow male and female parent plants, and to deliver all commercial hybrid seed corn produced from such plants to the seed company;

(b) The seed company’s promise to purchase the commercial hybrid seed corn produced by the producer; and

(c) Either a fixed price per unit of measure (bushels, hundredweight, etc.) of the commercial hybrid seed corn or a formula to determine the value of such seed. Any formula for establishing the value must be based on data provided by a public third party that establishes or provides pricing information to the general public, based on prices paid in the open market (e.g., commodity futures exchanges), to be acceptable for the purpose of this policy.

Inadequate germination. Germination of less than 80 percent of the commercial hybrid seed corn as determined by using a certified seed test.

Insurable interest. Your share of the financial loss that occurs in the event seed production is damaged by a cause of loss specified in section 10.

Local market price. The cash price offered by buyers for any production from the female parent plants that is not considered commercial hybrid seed corn under the terms of this policy.

Male parent plants. Corn plants grown for the purpose of pollinating female parent plants.

Minimum guaranteed payment. A minimum amount (usually stated in dollars or bushels) specified in your hybrid seed corn processor contract that will be paid or credited to you by the seed company regardless of the quantity of seed produced.

Non-seed production. Production that does not qualify as seed production because of inadequate germination.

Planted acreage. In addition to the definition contained in the Basic Provisions, the insured crop must be planted in rows wide enough to permit mechanical cultivation, unless otherwise provided by the Special Provisions or by written agreement.

Planted pattern. The arrangement of the rows of the male and female parent plants in a field. An example of a planting pattern is four consecutive rows of female parent plants followed by two consecutive rows of male parent plants.

Practical to replant. In addition to the definition contained in the Basic Provisions, practical to replant applies to either the female or male parent plant. It will not be considered practical to replant unless production from the replanted acreage can be delivered under the terms of the hybrid seed corn processor contract, or the seed company agrees that it will accept the production from the replanted acreage.

Sample. For the purpose of the certified seed test, at least 3 pounds of randomly selected field run shelled corn for each variety of commercial hybrid seed corn grown on the unit.

Seed company. A business enterprise that possesses all licenses for marketing commercial hybrid seed corn required by the state in which it is domiciled or operates, and which possesses facilities with enough storage and
§ 457.152

7 CFR Ch. IV (1-1-14 Edition)

drying capacity to accept and process the insured crop within a reasonable amount of time after harvest. If the seed company is the insured, it must also be a corporation.

Seed production. All seed produced by female parent plants with a germination rate of at least 80 percent as determined by a certified seed test.

Shelled corn. Kernels that have been removed from the cob.

Variety. The name, number or code assigned to a specific genetic cross by the seed company or the Special Provisions for the insured crop in the county.

2. Unit Division

For any processor contract that stipulates the amount of production to be delivered:

(a) In lieu of the definition of “basic unit” contained in the Basic Provisions, a basic unit will consist of all acreage planted to the insured crop in the county that will be used to fulfill a hybrid seed corn processor contract;

(b) There will be no more than one basic unit for all production contracted with each processor contract;

(c) In accordance with section 12, all production from any basic unit in excess of the amount under contract will be included as production to count if such production is applied to any other basic unit for which the contracted amount has not been fulfilled; and

(d) Optional units will not be established.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 of the Basic Provisions, you may select only one price election for all the hybrid seed corn in the county insured under this policy unless the Special Provisions provide different price elections by variety, in which case you may select one price election for each hybrid seed corn variety designated in the Special Provisions. The price election you choose for each variety must have the same percentage relationship to the maximum price offered by us for each variety. For example, if you choose 100 percent of the maximum price election for one specific variety, you must also choose 100 percent of the maximum price election for all other varieties.

(b) The production reporting requirements contained in section 3 of the Basic Provisions are not applicable to this contract.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

6. Report of Acreage

In addition to the requirements of section 6 of the Basic Provisions, you must:

(a) Report by type and variety, the location and insurable acreage of the insured crop; and

(b) Report any acreage that is uninsured, including that portion of the total acreage occupied by male parent plants; and

(c) Certify that you have a hybrid seed corn processor contract and report the amount, if any, of any minimum guaranteed payment.

7. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the female parent plants in the county for which a premium rate is provided by the actuarial documents:

1. In which you have a share;

2. That are grown under a hybrid seed corn processor contract executed before the acreage reporting date;

3. That are planted for harvest as commercial hybrid seed corn in accordance with the requirements of the hybrid seed corn processor contract and the production management practices of the seed company; and

4. That are not (unless allowed by the Special Provisions or by written agreement):

(i) Planted with a mixture of female and male parent seed in the same row;

(ii) Planted for any purpose other than for commercial hybrid seed corn;

(iii) Interplanted with another crop; or

(iv) Planted into an established grass or legume.

(b) An instrument in the form of a “lease” under which you retain control of the acreage on which the insured crop is grown and that provides for delivery of the crop under substantially the same terms as a hybrid seed corn processor contract will be treated as a contract under which you have an insurable interest in the crop.

(c) A commercial hybrid seed corn producer who is also a seed company may be able to insure the hybrid seed corn crop if the following requirements are met:

1. The seed company has an insurable interest in the hybrid seed corn crop;

2. Prior to the sales closing date, the Board of Directors of the seed company has executed and adopted a corporate resolution that contains the same terms as a hybrid seed corn processor contract. This corporate resolution will be considered a contract under this policy;

3. Sales records for at least the previous years’ seed production must be provided to
confirm that the seed company has produced and sold seed. If such records are not available, the crop may be insured under the Coarse Grains Crop Provisions with a written agreement; and

(d) Our inspection reveals that the storage and drying facilities satisfy the definition of a seed company.

The female parent plant seed on or before the final planting date designated in the Special Provisions, except as allowed in section 16 of the Basic Provisions; and

The use of unadapted, incompatible, or genetically deficient male or female parent plant seed;

Frost or freeze after the date established by the Special Provisions;

Failure to follow the requirements stated in the hybrid seed corn processor contract and production management practices of the seed company;

Inadequate germination, even if resulting from an insured cause of loss, unless you have provided adequate notice as required by section 11(b)(1); or

Failure to plant the male parent plant seed at a time or in a manner sufficient to assure adequate pollination of the female parent plants, unless you are prevented from planting the male parent plant seed by an insured cause of loss.

In addition to the provisions of section 9 of the Basic Provisions, we will not insure any acreage of the insured crop:

(a) Planted and occupied exclusively by male parent plants;

(b) Not in compliance with the rotation requirements contained in the Special Provisions or, if applicable, required by the hybrid seed corn processor contract; or

(c) If either the female or male parent plants are damaged before the final planting date and we determine that the insured crop is practical to replant but it is not replanted.

In addition to the requirements of section 11 of the Basic Provisions, insurance attaches upon completion of planting of:

(1) The female parent plant seed on or before the final planting date designated in the Special Provisions, except as allowed in section 16 of the Basic Provisions; and

(2) The male parent plant seed.

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the October 31 immediately following planting.

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions;

(2) Fire;

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(8) Failure of the irrigation water supply, if due to a cause of loss contained in section 10(a)(1) through (7) that occurs during the insurance period.

In addition to the causes of loss excluded by section 12 of the Basic Provisions, we will not insure against any loss of production due to:

(1) The use of unadapted, incompatible, or genetically deficient male or female parent plant seed;

(2) Frost or freeze after the date established by the Special Provisions;

(3) Failure to follow the requirements stated in the hybrid seed corn processor contract and production management practices of the seed company;

(4) Inadequate germination, even if resulting from an insured cause of loss, unless you have provided adequate notice as required by section 11(b)(1); or

(5) Failure to plant the male parent plant seed at a time or in a manner sufficient to assure adequate pollination of the female parent plants, unless you are prevented from planting the male parent plant seed by an insured cause of loss.

In addition to the provisions of section 9 of the Basic Provisions, we will not insure any acreage of the insured crop:

(a) Planted and occupied exclusively by male parent plants;

(b) Not in compliance with the rotation requirements contained in the Special Provisions or, if applicable, required by the hybrid seed corn processor contract; or

(c) If either the female or male parent plants are damaged before the final planting date and we determine that the insured crop is practical to replant but it is not replanted.

In addition to the requirements of section 11 of the Basic Provisions, insurance attaches upon completion of planting of:

(1) The female parent plant seed on or before the final planting date designated in the Special Provisions, except as allowed in section 16 of the Basic Provisions; and

(2) The male parent plant seed.

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the October 31 immediately following planting.

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions;

(2) Fire;

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(b) In addition to the causes of loss excluded by section 12 of the Basic Provisions, we will not insure against any loss of production due to:

(1) The use of unadapted, incompatible, or genetically deficient male or female parent plant seed;

(2) Frost or freeze after the date established by the Special Provisions;

(3) Failure to follow the requirements stated in the hybrid seed corn processor contract and production management practices of the seed company;

(4) Inadequate germination, even if resulting from an insured cause of loss, unless you have provided adequate notice as required by section 11(b)(1); or

(5) Failure to plant the male parent plant seed at a time or in a manner sufficient to assure adequate pollination of the female parent plants, unless you are prevented from planting the male parent plant seed by an insured cause of loss.

In addition to the provisions of section 9 of the Basic Provisions, we will not insure any acreage of the insured crop:

(a) Planted and occupied exclusively by male parent plants;

(b) Not in compliance with the rotation requirements contained in the Special Provisions or, if applicable, required by the hybrid seed corn processor contract; or

(c) If either the female or male parent plants are damaged before the final planting date and we determine that the insured crop is practical to replant but it is not replanted.

In addition to the requirements of section 11 of the Basic Provisions, insurance attaches upon completion of planting of:

(1) The female parent plant seed on or before the final planting date designated in the Special Provisions, except as allowed in section 16 of the Basic Provisions; and

(2) The male parent plant seed.

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the October 31 immediately following planting.

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions;

(2) Fire;

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(b) In addition to the causes of loss excluded by section 12 of the Basic Provisions, we will not insure against any loss of production due to:

(1) The use of unadapted, incompatible, or genetically deficient male or female parent plant seed;

(2) Frost or freeze after the date established by the Special Provisions;

(3) Failure to follow the requirements stated in the hybrid seed corn processor contract and production management practices of the seed company;

(4) Inadequate germination, even if resulting from an insured cause of loss, unless you have provided adequate notice as required by section 11(b)(1); or

(5) Failure to plant the male parent plant seed at a time or in a manner sufficient to assure adequate pollination of the female parent plants, unless you are prevented from planting the male parent plant seed by an insured cause of loss.

In addition to the provisions of section 9 of the Basic Provisions, we will not insure any acreage of the insured crop:

(a) Planted and occupied exclusively by male parent plants;

(b) Not in compliance with the rotation requirements contained in the Special Provisions or, if applicable, required by the hybrid seed corn processor contract; or

(c) If either the female or male parent plants are damaged before the final planting date and we determine that the insured crop is practical to replant but it is not replanted.

In addition to the requirements of section 11 of the Basic Provisions, insurance attaches upon completion of planting of:

(1) The female parent plant seed on or before the final planting date designated in the Special Provisions, except as allowed in section 16 of the Basic Provisions; and

(2) The male parent plant seed.

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is the October 31 immediately following planting.

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions;

(2) Fire;

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(b) In addition to the causes of loss excluded by section 12 of the Basic Provisions, we will not insure against any loss of production due to:

(1) The use of unadapted, incompatible, or genetically deficient male or female parent plant seed;

(2) Frost or freeze after the date established by the Special Provisions;

(3) Failure to follow the requirements stated in the hybrid seed corn processor contract and production management practices of the seed company;

(4) Inadequate germination, even if resulting from an insured cause of loss, unless you have provided adequate notice as required by section 11(b)(1); or

(5) Failure to plant the male parent plant seed at a time or in a manner sufficient to assure adequate pollination of the female parent plants, unless you are prevented from planting the male parent plant seed by an insured cause of loss.

11. Duties in the Event of Damage or Loss

(a) In accordance with the requirements of section 14 of the Basic Provisions, you must leave representative samples of at least one complete planting pattern of the female and male parent plant rows that extend the entire length of each field in the unit. If you are going to destroy any acreage of the insured crop that will not be harvested, the samples must not be destroyed until after our inspection.

(b) In addition to the requirements of section 14 of the Basic Provisions:

(1) You must give us notice of probable loss at least 15 days before the beginning of harvest if you anticipate inadequate germination on any unit; and

(2) You must provide a completed copy of your hybrid seed corn processor contract unless we have determined it has already been provided by the seed company, and the seed company certifies that such contract is used for all its growers without any waivers or amendments.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) You will not receive an indemnity payment on a unit if the seed company refuses
to provide us with records we require to determine the dollar value per bushel of production for each variety. 

(c) In the event of loss or damage covered by this policy, we will settle your claim on any unit by:

(1) Multiplying the insured acreage by its respective amount of insurance per acre, by type and variety if applicable;

(2) Totaling the results of section 12(c)(1) if there are more than one type or variety;

(3) Multiplying the total seed production to count (see section 12(d)) for each type and variety of commercial hybrid seed corn by the applicable dollar value per bushel for that type or variety;

(4) Multiplying the total non-seed production to count (see section 12(e)) for each type and variety by the applicable local market price determined on the earlier of the date the non-seed production is sold or the date of final inspection;

(5) Totaling the results of sections 12(c)(3) and 12(c)(4) by type and variety;

(6) Subtracting the result of section 12(c)(5) from the result of section 12(c)(1) if there is only one type or variety, or subtracting the result of 12(c)(5) from the result of section 12(c)(3) if there are more than one type or variety; and

(7) Multiplying the result of section 12(c)(6) by your share. For example:

You have a 100 percent share in 50 acres insured for the development of variety "A" hybrid seed corn in the unit, with an amount of insurance per acre guarantee of $340 (county yield of 160 bushels times a coverage level factor of .867 for the 65 percent coverage level, times a price election of $2.45 per bushel, minus the minimum guaranteed payment of zero). Your seed production was 1,400 bushels of non-seed x $8.56 = $12,072 value of seed production for type "B"; and 1,200 bushels x $8.56 = $10,272 value of seed production for type "B".

You also have a 100 percent share in 50 acres insured for the development of variety "B" hybrid seed corn in the unit, with an amount of insurance per acre guarantee of $340 (county yield of 140 bushels times a coverage level factor of .867 for the 65 percent coverage level, times a price election of $2.45 per bushel, minus the minimum guaranteed payment of zero). You harvested 1,200 bushels and the dollar value per bushel for the harvested amount was $8.56. You also harvested 200 bushels of non-seed with a market value of $2.00 per bushel. Your indemnity would be calculated as follows:

(1) 50 acres x $340 = $17,000 amount of insurance guarantee for type "A" and 50 acres x $297 = $14,850 amount of insurance guarantee for type "B";

(2) $17,000 + $14,850 = $31,850 amount of insurance guarantee;

(3) 1,400 bushels x $8.56 = $13,720 value of seed production for type "A" and 1,200 bushels x $8.56 = $10,272 value of seed production for type "B";

(4) 100 bushels of non-seed x $2.00 = $200 of non-seed production for type "A" and 200 bushels of non-seed x $2.00 = $400 of non-seed production for type "B";

(5) $13,720 + $200 = $13,920; $10,272 + $400 = $10,672; and

(6) $13,720 = $13,920; and

(7) $7,258 x 100 percent share = $7,258 indemnity payment.

(d) Production to be counted as seed production will include:

(1) All appraised production as follows:

Not less than the amount of insurance per acre for acreage:

That is abandoned;

Put to another use without our consent;

That is damaged solely by uninsured causes; or

For which you fail to provide acceptable production records;

Production lost due to uninsured causes;

(i) Not less than the amount of insurance for type "B";

(ii) Production lost due to uninsured causes;

(iii) Mature unharvested production with a germination rate of at least 80 percent of the commercial hybrid seed corn as determined by a certified seed test. Any such production may be adjusted in accordance with section 12(f);

(iv) Immature appraised production;

(v) Potential production on insured acreage that you intend to put to another use or abandon. If you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us. The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be
§ 457.153 Peach crop insurance provisions.

The Peach Crop Insurance Provisions for the 2013 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured policies:

(Propriate title for insurance provider)

Both FCIC and reinsured policies:

Peach Crop Provisions

1. Definitions

Bearing tree. A tree in at least the 4th growing season after set out.

Bushel. Fifty pounds of ungraded peaches.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, or permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Fresh peach production. Peach production from insurable acreage that:

(1) Is sold, or could be sold, for human consumption without undergoing any change in the basic form, such as peeling, juicing, crushing, etc.

(2) Grades at least U.S. Extra No. 1 or better, and consisting of a 2¼ inch minimum diameter, unless otherwise specified in the Special Provisions.

(3) Is from acreage that is designated as fresh peaches on the acreage report;

(4) Follows the recommended cultural practices generally in use for fresh peach acreage in the area in a manner generally recognized by agricultural experts;

(5) Is from acreage that you certify, and if requested by us, provide verifiable records to support, that at least 50 percent of the total production from acreage reported as fresh peach acreage was sold as fresh peaches in one or more of the four most recent crop years; and

(6) Is sold or could have been sold for a price that is not less than the applicable fresh peach price election for the applicable crop year in the actuarial documents. If the fresh peach production is sold or could have been sold for a price less than the applicable fresh peach price election for the applicable crop year in the actuarial documents, you must provide verifiable records to show that the price received was at least the amount paid by buyers for fresh peaches in the area in which you sell your peaches.
§ 457.153

Harvest. The picking or removal of mature peaches from the trees either by hand or machine.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Loss in quality. When the crop is damaged to the extent that the producer does not receive the average price for U.S. Extra No. 1 peach.

 Marketable. Peach production acceptable for processing or other human consumption even if failing to meet any U.S. or applicable state grading standard.

Packing shed. A facility at which peaches are graded, packed and cooled in preparation for shipment to a wholesale market.

Post production cost. The costs, as specified in the Special Provisions, associated with activities that occur during harvesting, packing, and marketing, as determined by FCIC using regional peach price data of peach production budgets from regional universities extension, other USDA agencies, and other third party resources.

Processing peach production. Peach production from insurable acreage that is:

(i) Sold, or could be sold, for the purpose of undergoing a change to its basic structure such as peeling, juicing, crushing, etc.; or

(ii) From acreage designated as processing peach acreage on the acreage report.

Set out. Transplanting the tree into the orchard.

2. Unit Division.

In addition to the requirements contained in section 34 of the Basic Provisions, optional units may be established if each optional unit is:

(a) Located on non-contiguous land; or

(b) By fresh and processing as specified in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions (§ 457.3):

(a) You may select a separate coverage level for all fresh peach acreage and for all processing peach acreage. For example, if you choose the 55 percent coverage level for all fresh peach acreage, you may choose the 75 percent coverage level for all processing peach acreage.

(i) Notwithstanding paragraph (a) of this section, if you elect the Catastrophic Risk Protection (CAT) level of coverage for fresh peach acreage or processing peach acreage, the CAT level of coverage will be applicable to all insured peach acreage in the county of both fresh and processing peaches.

(ii) If you only have fresh peach acreage designated on your acreage report and processing peach acreage is added after the sales closing date, we will assign a coverage level equal to the coverage level you selected for your fresh peach acreage.

(b) You may select only one price election for all the peaches in the county insured under this policy unless the Special Provisions provide different price elections by fresh and processing peaches. If the Special Provisions allow different price elections, you may select a separate price election for all your fresh peaches and for all your processing peaches. If the Special Provisions do not allow for different price elections, the price elections you choose for fresh peaches and processing peaches must have the same percentage relationship to the maximum price offered by us for fresh and processing peaches. For example, if you choose 100 percent of the maximum price election for fresh peaches, you must choose 100 percent of the maximum price election for processing peaches.

(c) You must report, not later than the production reporting date designated in section 3 of the Basic Provisions, separately by fresh and processing peach acreage, as applicable:

(1) Any event or action that could impact the yield potential of the insured crop including, interplanting of a perennial crop, removal of trees, any tree damage, change in practices, or any other circumstance that may reduce the expected yield upon which the insurance guarantee is based, and the number of affected acres;

(2) The number of bearing and non-bearing trees on insured and uninsurable acreage;

(3) The age of trees, variety, and the planting pattern; and

(4) For the first year of insurance, acreage interplanted with another perennial crop, and anytime the planting pattern of such acreage is changed:

(i) The age of the crop that is interplanted with the peaches;

(ii) The variety;

(iii) The planting pattern; and

(iv) Any other reasonable and pertinent information that we request in order to establish your approved yield.

(d) We will reduce the yield used to establish your production guarantee, as necessary, based on our estimate of the effect of any situation listed in sections 3(c)(1) through (4). If the situation occurred:

(1) Before the beginning of the insurance period, we will reduce the yield used to establish your production guarantee for the current crop year as necessary. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we

336
will reduce your production guarantee at any time we become aware of the circumstance;

(2) Or may occur after the beginning of the insurance period and you notify us by the production reporting date, the yield used to establish your production guarantee is due to an uninsured cause of loss;

(3) Or may occur after the beginning of the insurance period and you fail to notify us by the production reporting date, production lost due to uninsured causes equal to the amount of the reduction in yield used to establish your production guarantee will be applied in determining any indemnity (see section 12(c)(1)(ii)). We will reduce the yield used to establish your production guarantee for the subsequent crop year.

(c) You may not increase your elected or assigned coverage level or the ratio of your price election to the maximum price election if a cause of loss that could or would reduce the yield of the insured crop has occurred prior to the time that you request the increase.

4. Contract Changes

In accordance with section 4 of the Basic Provisions (§ 457.8), the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions (§ 457.8), the cancellation and termination dates are November 20.

6. Report of Acreage

In addition to the requirements contained in section 6 of the Basic Provisions, you must report and designate all acreage of peaches as fresh or processing peaches by the acreage reporting date. Any acreage not meeting all the requirements to qualify for fresh peach production must be designated on the acreage report as processing peach production.

7. Insured Crop

In accordance with section 8 of the Basic Provisions (§ 457.8), the crop insured will be all the peaches in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That are grown on tree varieties that:
(1) Were commercially available when the trees were set out;
(2) Are a variety having a chilling hour requirement that is appropriate for the area;
(3) Are grown on a root stock that is adapted to the area.
(c) That the crop insured will be any varieties of peaches that are grown for the production of Fresh or Processing Peaches.
(d) That are grown in an orchard that, if inspected, is considered acceptable by us;
(e) That has reached at least the fourth growing season after set out. However, we may agree in writing to insure acreage that has not reached this age if it has produced at least 150 bushels of peaches per acre; and
(f) That are grown for:
(1) Fresh peach production; or
(2) Processing peach production.

8. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions (§ 457.8), that prohibit insurance attaching to a crop planted with another crop, peaches interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

9. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions (§ 457.8): (1) Coverage begins on November 21 of each crop year, except that for the year of application, if your application is received after November 11 but prior to November 21, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop to determine the condition of the orchard.
(2) The calendar date for the end of the insurance period for each crop year is September 30.
(b) In addition to the provisions of section 11 of the Basic Provisions (§ 457.8):
(1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.
(2) If you relinquish your insurable interest on any acreage of peaches on or before the acreage reporting date for the crop year and if the acreage was insured by you the previous crop year, insurance will not be considered to have attached, and no premium or indemnity will be due for such acreage for that crop year unless:
(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;
(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and
(iii) The transferee is eligible for crop insurance.
(c) Notwithstanding section 9(a)(1) of this section, for each subsequent crop year that the policy remains continuously in force,
§ 457.153  7 CFR Ch. IV (1-1-14 Edition)

coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.

(d) If your peach policy is canceled or terminated for any crop year, in accordance with the terms of the policy, after insurance attached for that crop year but on or before the cancellation and termination dates, whichever is later, insurance will not be considered to have attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.

10. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions (§ 457.8), insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions;
(2) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the orchard;
(3) Earthquake;
(4) Insects, but not damage due to insufficient or improper application of pest control measures;
(5) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(6) Volcanic eruption;
(7) Wildlife, unless control measures have not been taken;
(8) An insufficient number of chilling hours to effectively break dormancy; or
(9) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions (§ 457.8), we will not insure against damage or loss of production due to:

(1) Split pits, regardless of cause; or
(2) Inability to market the peaches for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

11. Duties in the Event of Damage or Loss

(a) In accordance with the requirements of section 14 of the Basic Provisions, you must leave representative samples in accordance with our procedures.

(b) In addition to the requirements of section 14 of the Basic Provisions (§ 457.8), and unless the insurance period has ended prior to each of the following events, the following will apply:

(1) You must notify us within three days of the date that harvest of the damaged variety should have started if the crop will not be harvested.
(2) You must notify us at least 15 days before any production from any unit will be sold by direct marketing unless you have records verifying that the direct market peaches were “weighed and graded” through a packing shed. Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.
(3) If you previously gave notice in accordance with section 14 of the Basic Provisions (§ 457.8), and if you intend to claim an indemnity on any unit, you must notify us at least 15 days prior to the beginning of harvest of the damaged variety, so that we may inspect the damaged production. You must not sell or dispose of the damaged crop until we have given you written consent to do so.
(4) If you fail to meet the requirements of this section and such failure results in our inability to inspect the damaged production, all such production will be considered undamaged and included as production to count.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or
(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage for fresh and processing peaches, as applicable, by the respective production guarantee;
(2) Multiplying each result in section 12(b)(1) by the respective price election;
(3) Totaling the results in section 12(b)(2);
(4) Multiplying the total production of fresh and processing peaches to be counted, as applicable (see subsection 12(c)) by the respective price election;
(5) Totaling the results in section 12(b)(4);
(6) Subtracting the total in section 12(b)(5) from the total in section 12(b)(3); and
(7) Multiplying the result in section 12(b)(6) by your share.

Example: You have a 100 percent share in one basic unit with 10 acres of fresh peaches and 5 acres of processing peaches designated on your acreage report, with a 300 bushel per acre production guarantee for both fresh and
processing peaches, and you select 100 percent of the price election of $15.50 per bushel for fresh peaches and $6.50 per bushel for processing peaches. You harvest 2,500 bushels of fresh peaches and 500 bushels of processing peaches. Your indemnity will be calculated as follows:

- (A) 10 acres x 300 bushels = 3,000-bushel production guarantee of fresh peaches;
- 5 acres x 300 bushels = 1,500-bushel production guarantee of processing peaches;
- (B) 3,000-bushel production guarantee x $15.50 price election = $46,500 value of the production guarantee for fresh peaches; 1,500-bushel production guarantee x $6.50 price election = $9,750 value of the production guarantee for processing peaches;
- (C) $46,500 value of the production guarantee for fresh peaches + $9,750 value of the production guarantee for processing peaches = $56,250 total value of the production guarantee;
- (D) 2,500 bushels of fresh peach production to count x $15.50 price election = $38,750 value of the fresh peach production to count; 500 bushels of processing peach production to count x $6.50 price election = $3,250 value of the processing peach production to count;
- (E) $38,750 value of the fresh peach production to count + $3,250 value of the processing peach production to count = $42,000 total value of the production to count;
- (F) $56,250 total value of the production guarantee $42,000 total value of the production to count $14,250 value of loss; and
- (G) $14,250 value of loss x 100 percent share = $14,250 indemnity payment.

[End of Example]

(c) The total production to count (in bushels) from all insurable acreage on the unit will include:

- (1) All appraised production as follows:
- (i) Not less than the production guarantee per acre for acreage:
- (A) That is abandoned;
- (B) From which production is sold by direct marketing if you fail to meet the requirements contained in section 11.
- (C) That is damaged solely by uninsured causes;
- (D) For which you fail to provide production records that are acceptable to us;
- (ii) Production lost due to uninsured causes;
- (iii) Unharvested peach production that would be marketable if harvested;
- (iv) Potential production on insured acreage that you intend to abandon or no longer care for. If you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the crop, in which case we will use the harvested production.

If a conflict exists among the policy provisions, the order of priority is as follows: (1)
§ 457.154 7 CFR Ch. IV (1-1-14 Edition)

The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Base contract price. The price stipulated on the processor contract without regard to discounts or incentives that may apply.

Bypassed acreage. Land on which production is ready for harvest but the processor elects not to accept such production so it is not harvested.

Good farming practices. The cultural practices generally in use in the county for the crop to make normal progress toward maturity and produce at least the yield used to determine the production guarantee and are those required by the sweet corn processor contract with the processing company, and recognized by the National Institute of Food and Agriculture as compatible with agronomic and weather conditions in the county.

Harvest. The removal of the ears from the stalks for the purpose of delivery to the processor.

Planted acreage. In addition to the definition contained in the Basic Provisions, sweet corn must initially be placed in rows far enough apart to permit mechanical cultivation. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions or by written agreement.

Practical to replant. In lieu of the definition of Practical to replant contained in section 1 of the Basic Provisions, practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors including, but not limited to, moisture availability, condition of the field, time to crop maturity, and marketing window, that replanting the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period. It will not be considered practical to replant unless the replanted acreage can produce at least 75 percent of the approved yield, and the processor agrees in writing that it will accept the production from the replanted acreage.

Price election. In lieu of the definition of price election in the Basic Provisions, the price election will be the base contract price stated in your processor contract.

Processor. Any business enterprise regularly engaged in canning or freezing processing sweet corn for human consumption, that possesses all licenses and permits for processing sweet corn required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process contracted processing sweet corn within a reasonable amount of time after harvest.

Processor contract. A written agreement between the producer and a processor, containing at minimum:
(a) The producer's commitment to plant and grow sweet corn, and to deliver the sweet corn production to the processor;
(b) The processor's commitment to purchase all the production stated in the processor contract; and
(c) A base contract price.

Multiple contracts with the same processor that specify amounts of production will be considered as a single processor contract, unless the contracts are for different types. Your base contract price will be the weighted average of all applicable base contract prices.

Ton. Two thousand (2,000) pounds avoirdupois.

Unhusked ear weight. Weight of the seed-bearing spike of sweet corn including the membranous or green outer envelope.

Usable tons. The quantity of sweet corn for which the producer is compensated or should have been compensated by the processor.

2. Unit Division

(a) For processor contracts that stipulate the amount of production to be delivered:
(1) In lieu of the definition contained in the Basic Provisions, a basic unit will consist of all acreage planted to the insured crop in the county that will be used to fulfill contracts with each processor;
(2) In accordance with section 12, all production from any basic unit in excess of the amount under contract will be included as production to count if such production is applied to any other basic unit for which the contracted amount has not been fulfilled; and
(b) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable.

(b) For any processor contract that stipulates the number of acres to be planted, the provisions contained in section 34 of the Basic Provisions will apply.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:
(a) You may select only one price election percentage for all the processing sweet corn in the county insured under this policy. The percentage of the maximum price election you choose for one type will be applicable to all other types insured under this policy.
(b) The insurance guarantee per acre is expressed as tons of unhusked ear weight. Any
other measured production will be converted to an unhusked ear weight equivalent.
(c) The appraised production from bypassed acreage that could have been accepted by the processor will be included when determining your approved yield.
(d) Acreage that is bypassed because it was damaged by an insurable cause of loss will be considered to have a zero yield when determining your approved yield.

4. Contract Changes
In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates
In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

6. Report of Acreage
In addition to the provisions of section 6 of the Basic Provisions, you must provide a copy of all processor contracts to us on or before the acreage reporting date.

7. Insured Crop
(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the processing sweet corn in the county for which a premium rate is provided by the actuarial documents:
(1) In which you have a share;
(2) That is grown under, and in accordance with, the requirements of a processor contract executed on or before the acreage reporting date and not excluded from the processor contract at any time during the crop year; and
(3) That is not (unless allowed by the Special Provisions or by written agreement):
(i) Interplanted with another crop; or
(ii) Planted into an established grass or legume.
(b) You will be considered to have a share in the insured crop if, under the processor contract, you retain control of the acreage on which the sweet corn is grown, you are at risk of loss, and the processor contract provides for delivery of sweet corn under specified conditions and at a stipulated base contract price.
(c) A commercial sweet corn producer who is also a processor may establish an insurable interest if the following requirements are met:
(1) The processor must comply with these Crop Provisions;
(2) Prior to the sales closing date, the Board of Directors or officers of the processor must execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and
(3) Our inspection reveals that the processing facilities comply with the definition of a processor contained in these Crop Provisions.

8. Insurable Acreage
In addition to the provisions of section 9 of the Basic Provisions:
(a) Any acreage of the insured crop that is damaged before the final planting date, to the extent that the majority of producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant; and
(b) We will not insure any acreage that does not meet the rotation requirements, if applicable, contained in the Special Provisions.

9. Insurance Period
In lieu of the provisions contained in section 11 of the Basic Provisions, regarding the end of the insurance period, insurance ceases at the earlier of:
(a) The date the sweet corn:
(1) Was destroyed;
(2) Should have been harvested but was not harvested;
(3) Was abandoned; or
(4) Was harvested;
(b) The date you harvest sufficient production to fulfill your processor contract if the processor contract stipulates a specific amount of production to be delivered;
(c) Final adjustment of a loss; or
(d) Unless otherwise agreed to in writing, the calendar date for the end of the insurance period in which the sweet corn would normally be harvested as follows:
(1) September 30 in Malheur County, Oregon, all Idaho counties, and all Iowa counties;
(2) October 20 in all other Oregon counties, and in all Washington counties; or
(3) September 20 in all other states.

10. Causes of Loss
In accordance with the provisions of section 12 of the Basic Provisions:
(a) Insurance is provided only against the following causes of loss that occur during the insurance period:
(1) Adverse weather conditions, including:
(i) Excessive moisture that prevents harvesting equipment from entering the field or that prevents the timely operation of harvesting equipment; and
(ii) Abnormally hot or cold temperatures that cause an unexpected number of acres over a large producing area to be ready for harvest at the same time, affecting the timely harvest of a large number of such acres or the processing of such production is beyond the capacity of the processor, either of which causes the acreage to be bypassed.
(2) Fire;
§ 457.154

Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures or as otherwise limited by the Special Provisions;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(8) Failure of the irrigation water supply, if due to a cause of loss listed in section 12(b)(1) through (7) that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure any loss of production due to:

(1) Bypassed acreage because of:

(i) The breakdown or non-operation of equipment or facilities;

(ii) The availability of a crop insurance payment. We may deny any indemnity immediately in such circumstance or, if an indemnity has been paid, require you to repay it to us with interest at any time acreage was bypassed due to the availability of a crop insurance payment;

(2) Your failure to follow the requirements contained in the processor contract.

11. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 of the Basic Provisions, you must give us notice:

(a) Not later than 48 hours after:

(1) Total destruction of the sweet corn on the unit; or

(2) Discontinuance of harvest on a unit on which unharvested production remains.

(b) Within 3 days after the date harvest should have started on any acreage that will not be harvested unless we have previously released the acreage. You must also provide acceptable documentation of the reason the acreage was bypassed. Failure to provide such documentation will result in our determination that the acreage was bypassed due to an uninsured cause of loss. If the crop will not be harvested and you wish to destroy the crop, you must leave representative samples of the unharvested crop for our inspection. The samples must be at least 10 feet wide and extend the entire length of each field in each unit. The samples must not be destroyed until the earlier of our inspection or 15 days after notice is given to us; and

(c) At least 15 days prior to the beginning of harvest if you intend to claim an indemnity on any unit, or immediately if damage is discovered during the 15 day period or during harvest, so that we may inspect any damaged production. If you fail to notify us and such failure results in our inability to inspect the damaged production, we will consider such production to be undamaged and include it as production to count. You are not required to delay harvest.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate, acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by its respective production guarantee, by type if applicable;

(2) Multiplying each result of section 12(b)(1) by the respective price election, by type if applicable;

(3) Totaling the results of section 12(b)(2) if there are more than one type;

(4) Multiplying the total production to count (see section 12(c)), for each type if applicable, by its respective price election;

(5) Totaling the results of section 12(b)(4) if there are more than one type;

(6) Subtracting the results of section 12(b)(4) from the results of section 12(b)(2) if there is only one type or subtracting the results of section 12(b)(5) from the result of section 12(b)(3) if there are more than one type; and

(7) Multiplying the result of section 12(b)(6) by your share.

For example:

You have a 100 percent share in 100 acres of type A processing sweet corn in the unit, with a guarantee of 4.0 tons per acre and a price election of $50.00 per ton. You are only able to harvest 200 tons. Your indemnity would be calculated as follows:

(1) 100 acres x 4.0 tons = 400 tons guarantee for type A;

(2) 300 tons x $50.00 price election = $15,000.00 value of guarantee;

(3) Totaling the results of section 12(b)(2) if there are more than one type;

(4) Multiplying the total production to count by its respective price election;

(5) Totaling the results of section 12(b)(4) if there are more than one type;

(6) Subtracting the results of section 12(b)(4) from the results of section 12(b)(2) if there is only one type or subtracting the results of section 12(b)(5) from the result of section 12(b)(3) if there are more than one type; and

(7) Multiplying the result of section 12(b)(6) by your share.
Federal Crop Insurance Corporation, USDA § 457.155

(3) $15,000.00 + $18,000.00 = $33,000.00 total value of guarantee;
(4) 200 tons x $50.00 price election = $10,000.00 value of production to count for type A, and
350 tons x $45.00 price election = $15,750.00 value of production to count for type B;
(5) $10,000.00 + $15,750.00 = $25,750.00 total value of production to count;
(6) $33,000.00 - $25,750.00 = $7,250.00 loss;
(7) $7,250.00 loss x 100 percent = $7,250.00 indemnity payment.

(c) The total production to count, specified in tons of unhusked ear weight, from all insurable acreage on the unit will include:
(1) All appraised production as follows:
   (A) That is abandoned;
   (B) That is put to another use without our consent;
   (C) That is damaged solely by uninsured causes; or
   (D) For which you fail to provide production records that are acceptable to us.
   (ii) Production lost due to uninsured causes.
   (ii) Production on acreage that is bypassed unless the acreage was bypassed due to an insured cause of loss which resulted in production which would not be acceptable under the terms of the processor contract.
   (iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
   (A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
   (B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested.
   (2) All harvested processing sweet corn production from the insurable acreage. The amount of such production will be:

   (i) The usable tons of processing sweet corn shown on the processor settlement sheet, if available; or
   (ii) Determined by dividing the dollar amount paid, payable, or which should have been paid under the terms of the processor contract for the quantity of the sweet corn delivered to the processor by the base contract price per ton; and
   (3) All harvested processing sweet corn production from any other insurable units that have been used to fulfill your processor contract for this unit.

The total production to count will be expressed as an unhusked ear weight. Any other measure of production will be converted to an unhusked ear weight equivalent.

13. Late Planting

A late planting period is not applicable to processing sweet corn unless allowed by the Special Provisions and you provide written approval from the processor by the acreage reporting date that it will accept the production from the late planted acres when it is expected to be ready for harvest.

14. Prevented Planting

Your prevented planting coverage will be 40 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to the levels specified in the actuarial documents.

§ 457.155 Processing bean crop insurance provisions.

The Processing Bean Crop Insurance Provisions for the 1998 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Processing Bean Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.
1. Definitions

**Base contract price.** The price stipulated in the processor contract for the grade factor or sieve size that is designated in the Special Provisions, if applicable, without regard to discounts or incentives that may apply.

**Processor.** A business enterprise that has all the licenses and permits required by the state in which it operates, and has a long term agreement in writing with a processor to purchase and deliver processing beans.

**Bypassed acreage.** Land on which production is ready for harvest but the processor elects not to accept such production so it is not harvested.

**Good farming practices.** The cultural practices generally in use in the county for the crop to make normal progress toward maturity and produce at least the yield used to determine the production guarantee and are those required by the bean processor contract with the processing company, and recognized by the National Institute of Food and Agriculture as compatible with agronomic and weather conditions in the county.

**Harvest.** The mechanical picking of bean pods from the vines.

**Planted acreage.** In addition to the definition contained in the Basic Provisions, beans must initially be placed in rows far enough apart to permit mechanical cultivation to be considered planted. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions or by written agreement.

**Practical to replant.** In lieu of the definition of “Practical to replant” contained in section 1 of the Basic Provisions, practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors including, but not limited to, moisture availability, condition of the field, time to crop maturity, and marketing window, that replanting the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period. It will not be considered practical to replant unless the replanted acreage can produce at least 75 percent of the approved yield, and the processor agrees in writing that it will accept the production from the replanted acreage.

**Processing beans.** Lima, snap, or other bean types identified in the Special Provisions that are grown under a processor contract to be canned or frozen and sold for human consumption.

**Processor contract.** A written agreement between the producer and a processor, or between the producer and a broker, containing at a minimum:

(a) The producer’s commitment to plant and grow processing beans, and to deliver the bean production to the processor or broker;
(b) The processor’s, or broker’s, commitment to purchase all the production stated in the processor contract; and
(c) A base contract price.

Multiple contracts with the same processor that specify amounts of production will be considered as a single processor contract unless the contracts are for different types of processing beans.

**Ton.** Two thousand (2,000) pounds avoirdupois.

**Type.** A category of processing beans identified as a type in the Special Provisions.

2. Unit Division

(a) For any processor contract that stipulates the amount of production to be delivered:

(1) In lieu of the definition contained in the Basic Provisions, a basic unit will consist of all acreage planted to the insured crop in the county that will be used to fulfill contracts with each processor;
(i) There will be no more than one basic unit for all production contracted with each processor contract;
(ii) In accordance with section 12, all production from any basic unit in excess of the amount under contract will be included as production to count if such production is applied to any other basic unit for which the contracted amount has not been fulfilled; and

(2) Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units will not be established.

(b) For any processor contract that stipulates the number of acres to be planted, in addition to or instead of, establishing optional units by section, section equivalent or FSA farm serial number, or irrigated and non-irrigated acreage, optional units may be established by type if acreage of one type does not continue into acreage of another type in the same rows or planting pattern.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one price election for all the processing beans in the county insured under this policy unless the Special Provisions provide different price elections.
by type. The percentage of the maximum price elections you choose for one type will be applicable to all other types insured under this policy.

(b) The appraised production from bypassed acreage that could have been accepted by the processor will be included when determining your approved yield.

(c) Acreage that is bypassed because it was damaged by an insurable cause of loss will be considered to have a zero yield when determining your approved yield.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

6. Report of Acreage

In addition to the provisions of section 6 of the Basic Provisions, you must provide a copy of all processor contracts to us on or before the acreage reporting date.

7. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the processing beans in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share;

(2) That are grown under, and in accordance with, the requirements of a processor contract executed on or before the acreage reporting date and are not excluded from the processor contract at any time during the crop year; and

(3) That are not (unless allowed by the Special Provisions or by written agreement):

(i) Interplanted with another crop; or

(ii) Planted into an established grass or legume.

(b) You will be considered to have a share in the insured crop if, under the processor contract, you retain control of the acreage on which the processing beans are grown, you are at risk of loss, and the processor contract provides for delivery of the processing beans under specified conditions and at a stipulated base contract price.

(c) A commercial processing bean producer who is also a processor or broker may establish an insurable interest if the following requirements are met:

(1) The producer must comply with these Crop Provisions;

(2) Prior to the sales closing date, the Board of Directors or officers of the processor or the broker must execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and

(3) Our inspection reveals that the processing facilities comply with the definition of a processor contained in these Crop Provisions.

8. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

(a) Any acreage of the insured crop that is damaged before the final planting date, to the extent that the majority of producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant; and

(b) We will not insure acreage that does not meet any rotation requirements, if applicable, contained in the Special Provisions.

9. Insurance Period

In lieu of the provisions contained in section 11 of the Basic Provisions, regarding the end of the insurance period, insurance ceases at the earlier of:

(a) The date the processing beans:

(1) Were destroyed;

(2) Should have been harvested but were not harvested;

(3) Were abandoned; or

(4) Were harvested;

(b) The date you harvest sufficient production to fulfill your processor contract if the processor contract stipulates a specific amount of production to be delivered;

(c) Final adjustment of a loss; or

(d) The date shown below for the end of the insurance period in the calendar year in which the processing beans would normally be harvested, unless otherwise agreed to in writing, as follows:

(1) October 30 for all processing beans in the state of Arkansas;

(2) October 15 for all processing beans in the states of Delaware, Maryland, and New Jersey;

(3) October 5 for all processing beans in the states of Idaho, Oregon, and Washington;

(4) September 30 for snap beans in the state of New York;

(5) September 20 for snap beans in all other states; or

(6) October 5 for lima beans in all other states.

10. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions:

(a) Insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions, including:

(i) Excessive moisture that prevents the harvesting equipment from entering the field or that prevents the timely operation of harvesting equipment; and
§ 457.155

(11) Abnormally hot or cold temperatures that cause an unexpected number of acres over a large producing area to be ready for harvest at the same time, affecting the timely harvest of a large number of such acres or the processing of such production is beyond the capacity of the processor, either of which causes the acreage to be bypassed.

(12) Fire;

(13) Insects, but not damage due to insufficient or improper application of pest control measures;

(14) Plant disease on acreage not planted to processing beans the previous crop year. (In certain instances, contained in the Special Provisions or in a written agreement, acreage planted to processing beans the previous year may be covered. Damage due to insufficient or improper application of disease control measures is not covered);

(15) Wildlife;

(16) Earthquake;

(17) Volcanic eruption; or

(18) Failure of the irrigation water supply. If due to a cause of loss contained in section 10 (a)(1) through (7) that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure any loss of production due to:

(1) Bypassed acreage because of:

(i) The breakdown or non-operation of equipment or facilities; or

(ii) The availability of a crop insurance payment. We may deny any indemnity immediately in such circumstance or, if an indemnity has been paid, require you to repay it to us with interest at any time acreage was bypassed due to the availability of a crop insurance payment; or

(2) Your failure to follow the requirements contained in the processor contract.

11. Duties in the Event of Damage or Loss

In addition to the notice required by section 14 of the Basic Provisions, you must give us notice:

(a) Not later than 48 hours after:

(i) Total destruction of the processing beans on the unit; or

(ii) Discontinuance of harvest on a unit on which unharvested production remains.

(b) Within 3 days after the date harvest should have started on any acreage that will not be harvested unless we have previously released the acreage. You must also provide acceptable documentation of the reason the acreage was bypassed. Failure to provide such documentation will result in our determination that the acreage was bypassed due to an uninsured cause of loss. If the crop will not be harvested and you wish to destroy the crop, you must leave representative samples of the unharvested crop for our inspection. The samples must be at least 10 feet wide and extend the entire length of each field in each unit. The samples must not be destroyed until the earlier of our inspection or 15 days after notice is given to us; and

(c) At least 15 days prior to the beginning of harvest if you intend to claim an indemnity on any unit, or immediately if damage is discovered during the 15 day period or during harvest. If you fail to notify us and such failure results in our inability to inspect the damaged production, we will consider all such production to be undamaged and include it as production to count. You are not required to delay harvest.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate, acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by its respective production guarantee, by type if applicable;

(2) Multiplying each result of section 12(b)(1) by the respective price election, by type if applicable;

(3) Totaling the results of section 12(b)(2) if there are more than one type;

(4) Multiplying the total production to count (see section 12(c)), for each type if applicable, by its respective price election;

(5) Totaling the results of section 12(b)(4) if there are more than one type;

(6) Subtracting the results of section 12(b)(6) from the results of section 12(b)(5) if there is only one type or subtracting the results of section 12(b)(5) from the result of section 12(b)(3) if there are more than one type; and

(7) Multiplying the result of section 12(b)(6) by your share.

For example:

You have a 100 percent share in 100 acres of snap type processing beans in the unit, with a guarantee of 3.0 tons per acre and a price election of $110.00 per ton. You are only able to harvest 200 tons. Your indemnity would be calculated as follows:

(1) 100 acres x 3.0 tons = 300 tons guarantee;

(2) 300 tons x $110.00 price election = $33,000.00 value of guarantee;

(3) 200 tons x $110.00 price election = $22,000.00 value of production to count;

(4) $33,000.00 - $22,000.00 = $11,000.00 loss; and

(5) $11,000.00 x 100 percent = $11,000.00 indemnity payment.

You also have a 100 percent share in 100 acres of lima type processing beans in the same unit, with a guarantee of 1.0 ton per
acre and a price election of $225.00 per ton. You are only able to harvest 75 tons. Your total indemnity for both snap and lima types processing beans would be calculated as follows:

1. 100 acres x 3.0 tons = 300 tons guarantee for the snap type, and 100 acres x 1.0 ton = 100 tons guarantee for the lima type;
2. 300 tons x $110.00 price election = $33,000.00 value of guarantee for the snap type, and 100 tons x $225.00 price election = $22,500.00 value of guarantee for the lima type;
3. $33,000.00 + $22,500.00 = $55,500.00 total value of guarantee;
4. 200 tons x $110.00 price election = $22,000.00 value of production to count for the snap type, and 75 tons x $225.00 price election = $16,875.00 value of production to count for the lima type;
5. $22,000.00 + $16,875.00 = $38,875.00 total value of production to count;
6. $33,000.00 - $38,875.00 = $16,625.00 loss; and
7. $16,625.00 x 100 percent = $16,625.00 indemnity payment.

13. Late Planting

A late planting period is not applicable to processing beans unless allowed by the Special Provisions and you provide written approval from the processor by the acreage reporting date that it will accept the production from the late planted acres when it is expected to be ready for harvest.

14. Prevented Planting

Your prevented planting coverage will be 40 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§§ 457.156-457.157 [Reserved]

§ 457.158 Apple crop insurance provisions.

The apple crop insurance provisions for the 2011 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:
§ 457.158

Apple Crop Insurance Provisions

1. Definitions

Apple production. All fresh apple production and processing apple production from insurable acreage.

Area A. A geographic area that includes Montana, Wyoming, Utah, New Mexico, and all states west thereof.

Area B. A geographic area that includes all states not included in Area A, except Colorado.

Area C. Colorado.

Bin. A container that contains a minimum of 875 pounds of apples or another quantity as designated in the Special Provisions.

Box. A container that contains 35 pounds of apples or another quantity as designated in the Special Provisions.

Bushel. In all states except Colorado, 42 pounds of apples. In Colorado, 40 pounds of apples.

Damaged apple production. (1) With respect to losses calculated under section 12 only, the percentage of fresh or processing apple production that fails to grade U.S. No. 1 Processing or better in accordance with the grade standards due to an insurable cause of loss; or

(2) With respect to losses calculated under section 14, the percentage of fresh apple production that fails to grade U.S. Fancy or better in accordance with the grade standards due to an insurable cause of loss.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, processor, shipper, buyer, or broker. Examples of direct marketing include selling through an on-farm or roadside stand, or a farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Fresh apple production. (1) Apples:

(i) That are sold, or could be sold, for human consumption without undergoing any change in the basic form, such as peeling, juicing, crushing, etc.;

(ii) From acreage that is designated as fresh apples on the acreage report;

(iii) That follow the recommended cultural practices generally in use for fresh apple acreage in a manner generally recognized by agricultural experts; and

(iv) From acreage from which apples are harvested.

(2) Acreage with production not meeting all the requirements above must be designated on the acreage report as processing apple production.

Grade standards. The United States Standards for Grades of Apples, the United States Standards for Grades of Apples for Processing, or such other standards contained in the Special Provisions.

Harvest. The picking of mature apples from the trees or collecting of mature apples from the ground. Apples collected from the ground that cannot be sold for human consumption will not be considered harvested.

Marketable. Apple production that is not damaged apple production.

Mature. Apples defined as “mature” under the applicable grade standards.

Pounds. Sixteen (16) ounces avoirdupois.

Processing apple production. Apples from insurable acreage failing to meet the insurability requirements for fresh apple production that are:

(1) Sold, or could be sold for the purpose of undergoing a change to the basic structure such as peeling, juicing, crushing, etc.; or

(2) From acreage designated as processing apples on the acreage report.

Production guarantee (per acre). The quantity of apples in boxes or bushels determined by multiplying the approved APH yield per acre by the coverage level percentage you elect. If the production of apples has been measured in bins, the amount must be converted to boxes or bushels.

Russetting. A defect on the surface of the apple as described in the grade standards.

Sunburn. A defect as described in the grade standards.

Type. A category of apples as designated in the Special Provisions.

2. Unit Division

In addition to the requirements of section 3(a) of the Basic Provisions, optional units may be established if each optional unit is:

(a) Located on non-contiguous land; or

(b) By type as specified in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one coverage level for all fresh apple acreage and only one coverage level for all processing apple acreage.

For example, if you choose the 55 percent coverage level for all your processing apple acreage, the CAT level of coverage will be applicable to all insured apple acreage in the county. If you have fresh apple acreage designated on your acreage report and 若 processing apple acreage is added after the sales closing date,
we will assign a coverage level equal to the coverage level you selected for your fresh apple acreage. If you only have processing apple acreage designated on your acreage report, and fresh apple acreage is added after the sales closing date, we will assign a coverage level equal to the coverage level you selected for your processing apple acreage.

You may select only one price election for all the apples in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each apple type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered to us by each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(c) You must report, by the production reporting date designated in section 3 of the Basic Provisions, by type, if applicable:

(1) Any event or action that could impact the yield potential of the insured crop including interplanted perennial crop, removal of trees, any damage, change in practices, or any other circumstance that may reduce the expected yield upon which the insurance guarantee is based, and the number of affected acres;

(2) The number of bearing trees on insurable and uninsurable acreage;

(3) The age of the trees and the planting pattern; and

(4) For the first year of insurance for acreage interplanted with another perennial crop, any time the planting pattern of such acreage has changed:

(i) The age and type of the interplanted crop, if applicable;

(ii) The planting pattern; and

(iii) Any other information that we request in order to establish your approved yield.

(d) We will reduce the yield used to establish your production guarantee, as necessary, based on our estimate of the effect of any situation listed in sections 3(c)(1) through (c)(4), if the situation occurred:

(1) Before the beginning of the insurance period, the yield used to establish your production guarantee will be reduced for the current crop year regardless of whether the situation was due to an insured or uninsured cause of loss. If you fail to notify us of any circumstance that may reduce your yield, from previous levels, we will reduce the yield used to establish your production guarantee at any time we become aware of the circumstance;

(2) Or may occur after the beginning of the insurance period and you notify us by the production reporting date, the yield used to establish your production guarantee will be reduced for the current crop year only if the potential reduction in the yield used to establish your production guarantee is due to an uninsured cause of loss; or

(3) Or may occur after the beginning of the insurance period and you fail to notify us by the production reporting date, production lost due to uninsured causes equal to the amount of the reduction in the yield used to establish your production guarantee will be applied in determining any indemnity (see section 12(c)(1)(ii)). We will reduce the yield used to establish your production guarantee for the subsequent crop year.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is October 31 preceding the cancellation date for California and August 31 preceding the cancellation date for all other states.

5. Cancellation and Termination Dates

(a) In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are January 31 in California and November 20 in all other states.

(b) If, in accordance with the terms of the policy, your apple policy is canceled or terminated by us for any crop year after insurance attached for that crop year, but on or before the cancellation and termination dates, whichever is later, insurance will be considered not to have attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.

(c) We may not cancel your policy when an insured cause of loss has occurred after insurance attached, but prior to the cancellation date. However, your policy can be terminated if a cause for termination contained in sections 2 or 27 of the Basic Provisions exists.

6. Report of Acreage

In addition to the requirements contained in section 6 of the Basic Provisions, you must report and designate all acreage by type in the acreage reporting date. Any acreage not qualifying for fresh apple production is not eligible for the Optional Coverage for Fresh Fruit Quality Adjustment option contained in section 14 of these Crop Provisions. If you designate fresh apple acreage on the acreage report, you are certifying at least 50 percent of the production from acreage reported as fresh apple acreage, by unit, was sold as fresh apples in one or more of the four most recent crop years in accordance with the definition of “fresh apple production” and that you have the records to support such production.
7. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all apples in the county for which a premium rate is provided by the actuarial table:

(a) In which you have a share;
(b) That are grown on tree varieties that are adapted to the area and have, in at least one of the previous four years, produced:
   (1) 10 bins of apples per acre in Area A;
   (2) 150 bushels of apples per acre in Area B; or
   (3) 200 bushels of apples per acre in Area C;
(c) That are grown in an orchard that, if inspected, is considered acceptable by us; and
(d) That are grown for:
   (1) Fresh apple production; or
   (2) Processing apple production.

8. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions that prohibit insurance from attaching to a crop planted with another perennial crop, apples interplanted with another perennial crop are insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

9. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions:
   (1) For the year of application, coverage begins on February 1 of the calendar year the insured crop normally blooms in California and November 21 of the calendar year prior to the calendar year the insured crop normally blooms in all other States. Notwithstanding the previous sentence, if your application is received by us after January 12 but prior to February 1 in California, or after November 1 but prior to November 21 in all other States, insurance will attach on the 20th day after your properly completed application is received in our local office, unless we inspect the acreage during the 20-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the apple acreage.
   (2) For each subsequent crop year that the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring an existing policy to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.
   (3) The calendar date for the end of the insurance period for each crop year is November 5, or such other date as specified in the Special Provisions.

(b) In addition to the provisions of section 11 of the Basic Provisions:
   (1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period. There will be no coverage of any insurable interest acquired after the acreage reporting date.
   (2) If you relinquish your insurable share on any insurable acreage of apples on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:
      (i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;
      (ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and
      (iii) The transferee is eligible for crop insurance.
   (3) If you relinquish your insurable share on any insurable acreage of apples after the acreage reporting date for the crop year, insurance coverage will be provided for any loss due to an insurable cause of loss that occurred prior to the date that you relinquished your insurable share and the whole premium will be due for such acreage for that crop year.

10. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period and result in damaged apple production:
   (1) Adverse weather conditions;
   (2) Fire unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the orchard;
   (3) Insects, but not damage due to insufficient or improper application of pest control measures;
   (4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
   (5) Earthquake;
   (6) Volcanic eruption;
   (7) Failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period;
   (8) Wildlife; and
Federal Crop Insurance Corporation, USDA § 457.158

(9) All other natural causes of loss that cannot be prevented, including, but not limited to, hail, wind, excess sun causing sunburn, and frost and freeze causing russetting.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to your inability to market the apples for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

11. Duties in the Event of Damage or Loss

(a) In accordance with the requirements of section 14 of the Basic Provisions, you must leave representative samples in accordance with our procedures.

(b) In addition to the requirements of section 14 of the Basic Provisions, the following will apply:

(1) You must notify us at least 3 days prior to the date harvest should have started if the crop will not be harvested.

(2) You must notify us at least 15 days before any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine your production to count for production that is sold by direct marketing. If damage occurs after this appraisal, we will conduct an additional appraisal. These appraisals, and any acceptable records provided by you, will be used to determine your production to count. Failure to give timely notice that production will not be harvested may result in an appraised amount of production to count for production that is not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.

(3) If you intend to claim an indemnity on any unit, you must notify us at least 15 days prior to the beginning of harvest, or immediately if damage is discovered during harvest. You must not sell or dispose of the damaged crop until after we have given you written consent to do so. If you fail to meet the requirements of this section and such failure results in our inability to inspect the damaged production, all such production will be considered undamaged and included as production to count.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional unit, we will combine all optional units for which such production records were not provided; or

(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim on any unit by:

(1) Multiplying the insured acreage by its respective production guarantee, by type as applicable;

(2) Multiplying each result in section 12(b)(1) by the respective price election and by the percent of price election;

(3) Totaling the results in section 12(b)(2) if there are more than one type;

(4) Multiplying the total production to count (see section 12(c)), for each type as applicable, by the respective price election and by the percent of price election;

(5) Totaling the results in section 12(b)(4), if there are more than one type;

(6) Subtracting the total in section 12(b)(5) from the total in section 12(b)(3); and

(7) Multiplying the result in section 12(b)(6) by your share.

Basic Coverage Example:

You have a 100 percent share in one basic unit with 10 acres of fresh apples and 5 acres of processing apples designated on your acreage report, with a 600 bushel per acre production guarantee for both fresh and processing apples, and you select 100 percent of the price election on a price election of $9.10 per bushel for fresh apples and $2.50 per bushel for processing apples. You harvest 5,000 bushels of fresh apples and 1,000 bushels of processing apples, all grading U.S. No. 1 Processing or better. Your indemnity will be calculated as follows:

A. 10 acres x 600 bushels = 6,000-bushel production guarantee of fresh apples;

B. 6,000-bushel production guarantee x $9.10 price election x 100 percent of price election = $54,600 value of production guarantee for fresh apples;

C. 3,000-bushel production guarantee x $2.50 price election x 100 percent of price election = $7,500 value of production guarantee for processing apples;

D. $54,600 value of production guarantee for fresh apples + $7,500 value of production guarantee for processing apples = $62,100 total value of the production guarantee;

E. 5,000 bushels of fresh apple production to count x $9.10 price election x 100 percent of price election = $45,500 value of fresh apple production to count;

F. 1,000 bushels of processing apple production to count x $2.50 price election x 100 percent of price election = $2,500 value of processing apple production to count;

G. $45,500 value of fresh apple production to count + $2,500 value of processing apple production to count = $48,000 total value of production to count;
§ 457.158  

F. $62,100 total value of the production guarantee - $48,000 total value of production to count = $14,100.00 value of loss; and  
G. $14,100 value of loss x 100 percent share = $14,100 indemnity payment.

[End of Example]

(c) The total production to count (in boxes or bushels) from all insurable acreage on the unit will include:

(1) All appraised production as follows:
   (i) Not less than the production guarantee per acre for acreage:
      (A) That is abandoned;
      (B) That is sold by direct marketing if you fail to meet the requirements contained in section 11;
      (C) That is damaged solely by uninsured causes; or
      (D) For which you fail to provide production records that are acceptable to us;
   (ii) Production lost due to uninsured causes;
   (iii) Unharvested apple production that would be marketable if harvested; and
   (iv) Potential marketable apple production of the Basic Provisions are not applicable.

(d) Any apple production not graded or appraised prior to the earlier of the time apples are delivered to a packer, processor, or other handler will not be considered damaged apple production and will be considered production to count.

13. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

14. Optional Coverage for Fresh Fruit Quality Adjustment

(a) In the event of a conflict between the Apple Crop Insurance Provisions and this option, this option will control. Insureds who select this option cannot receive less than the indemnity due under section 12.

(b) In return for payment of the additional premium designated in the actuarial documents, this option provides for quality adjustment of fresh apple production as follows:

(1) To be eligible for this option, you must have elected to insure your apples at the additional coverage level. If you elect Catastrophic Risk Protection (CAT) after this option is effective, it will be considered as notice of cancellation of this option by you.

(2) You must elect this option on or before the sales closing date for the initial crop year for which you wish to insure your apples under this option. This option will continue in effect until canceled by either you or us for any succeeding crop year by written notice to the other party on or before the cancellation date.

(3) This option will apply to all your apple acreage designated in your acreage report as grown for fresh apple production and that meets the insurability requirements specified in the Apple Crop Insurance Provisions, except any acreage specifically excluded by the actuarial documents. Any acreage designated in your acreage report as grown for processing apple production is not eligible for coverage under this option.

(4) In lieu of sections 12(c)(1)(iii), (iv) and (2), the production to count will include all appraised and harvested production from all of the fresh apple acreage in the unit, adjusted in accordance with this option.

(5) If appraised or harvested fresh apple production for the block or unit, as applicable, is damaged to the extent that more than 20 percent of the apple production does not grade U.S. Fancy or better, the following adjustments to the production to count will apply:

(i) Fresh apple production to count with 21 percent through 40 percent damaged apple production will be reduced 2 percent for each full one percent in excess of 20 percent.

(ii) Fresh apple production to count with 41 percent through 50 percent damaged apple production will be reduced 4 percent plus an additional 3 percent for each full one percent in excess of 40 percent.

(iii) Fresh apple production to count with 51 percent through 64 percent damaged apple production will be reduced 7 percent plus an additional 2 percent for each full one percent in excess of 50 percent.

(iv) Fresh apple production to count with 65 percent or more damaged apple production will not be considered production to count.

(v) Notwithstanding sections 14(b)(5)(i) through (iv), if you sell any of your fresh apple production as U.S. Fancy or better, all such sold production will be included as production to count under this option.

(c) Any apple production not graded or appraised prior to the earlier of the time apples are delivered to a packer, processor, or other handler will not be considered damaged apple production and will be considered production to count under this option.

352
Optional Coverage for Fresh Fruit Quality Adjustment Example:

You have a 100 percent share in 10 acres of fresh apples designated on your acreage report, with a 600 bushel per acre guarantee, and you select 100 percent of the price election on a price election of $9.10 per bushel. You harvest 5,000 bushels of apples from your designated fresh apple acreage, but only 2,650 of those bushels grade U.S. Fancy or better. Assuming you do not sell any of your fresh apple production as U.S. Fancy or better, your indemnity would be calculated as follows:

A. 10 acres x 600 bushels per acre = 6,000-bushel production guarantee of fresh apples;
B. 5,000 bushels of fresh apple production not grading U.S. Fancy or better;
C. 2,650/5,000 = 53 percent of fresh apple production not grading U.S. Fancy or better;

iv. 53 percent x 5 = 265 percent; v. 40 percent + 265 percent = 295 percent; vi. 2,650 bushels of fresh apple production not grading U.S. Fancy or better;

vii. 2,650 bushels of adjusted fresh apple production to count x $9.10 price election x 100 percent of price election = $23,745 value of fresh apple production to count;

D. $23,745 value of production guarantee for fresh apples - $17,745 value of fresh apple production to count = $6,000 value of loss;
E. $6,000 value of loss x 100 percent share = $6,000 indemnity payment.

[End of Example]

§ 457.159 Stonefruit crop insurance provisions.

The Stonefruit Crop Insurance Provisions for the 2011 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE
Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Stonefruit Crop Insurance Provisions

1. Definitions

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as wholesaler, retailer, packer, processor, shipper, or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Grade standards. The United States Standards for Grades of Peaches, the United States Standards for Grades of Nectarines, the United States Standards for Grades of Apricots, and the United States Standards for Grades of Fresh Plums and Prunes, or other such standards specified in the Special Provisions.

Graft. To unite a shoot or bud with a rootstock in accordance with recommended practices to form a living union.

Harvest. The physical removal of mature stonefruit from the tree either by hand or machine.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Lug. A container of fresh stonefruit of specified weight. Lugs of varying sizes will be converted to standard lug equivalents on the basis of the following average net pounds of packed fruit, or as specified in the Special Provisions:

<table>
<thead>
<tr>
<th>Crop</th>
<th>Pounds per lug</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fresh Apricots</td>
<td>24</td>
</tr>
<tr>
<td>Fresh Nectarines</td>
<td>25</td>
</tr>
<tr>
<td>Fresh Freestone Peaches</td>
<td>25</td>
</tr>
<tr>
<td>Fresh Plums</td>
<td>28</td>
</tr>
</tbody>
</table>

Weight for Processing Apricots, Processing Cling Peaches, and Processing Freestone Peaches is specified in tons.

Marketable. Stonefruit production that meets or exceeds the quality standards for U.S. No. 1 in accordance with the applicable
§ 457.159 7 CFR Ch. IV (1-1-14 Edition)

grade standards or other standards as specified in the Special Provisions, or if stonefruit production fails to meet the applicable grade standards, stonefruit production that is accepted by a packer, processor or other handler.

Processor. A business enterprise regularly engaged in processing fruit for human consumption that possesses all licenses and permits for processing fruit required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process contracted fruit within a reasonable amount of time after harvest.

Stonefruit. Any of the following crops grown for fresh market or processing:
(a) Fresh Apricots;
(b) Fresh Freestone Peaches;
(c) Fresh Nectarines;
(d) Fresh Plums;
(e) Processing Apricots;
(f) Processing Cling Peaches;
(g) Processing Freestone Peaches; and
(h) Other crops listed in the Special Provisions.

Ton. Two thousand (2,000) pounds avoirdupois.

Type. A category of a stonefruit crop with similar characteristics that are grouped for insurance purposes, as listed in the Special Provisions.

2. Unit Division

In lieu of the provisions of section 34 of the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices, optional units will only be allowed as stated herein or by written agreement.

(a) Optional Units on Acreage Located on Non-contiguous Land: Optional units may be established if each optional unit is located on non-contiguous land.
(b) Optional Units by Type: Optional units may be established by type if allowed by the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:
(a) You may elect only one price election and coverage level for each crop grown in the county and listed in the Special Provisions that is insured under this policy. If separate price elections are available by type of a crop, the price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type of cling peach, you must choose 100 percent of the maximum price election for all other types of cling peaches.
(b) You must report, by the production reporting date designated in section 3 of the Basic Provisions, by type, if applicable, for each stonefruit crop:
(1) Any damage, removal of trees, change in practices, or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres;
(2) The number of bearing trees on insurable and uninsurable acreage;
(3) The age of the trees and the planting pattern; and
(4) For the first year of insurance for acreage interplanted with another perennial crop, and any time the planting pattern of such acreage is changed:
(i) The age of the interplanted crop, and type if applicable;
(ii) The planting pattern; and
(iii) Any other information that we request in order to establish your approved yield.
(c) We will reduce the yield used to establish your production guarantee, as necessary, based on our estimate of the effect of any situation listed in sections 3(b)(1) through (b)(4). If the situation occurred:
(1) Before the beginning of the insurance period, the yield used to establish your production guarantee will be reduced for the current crop year regardless of whether the situation was due to an insured or uninsured cause of loss. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce the yield used to establish your production guarantee at any time we become aware of the circumstance;
(2) Or may occur after the beginning of the insurance period and you notify us by the production reporting date, the yield used to establish your production guarantee will be reduced for the current crop year only if the potential reduction in the yield used to establish your production guarantee is due to an uninsured cause of loss; or
(3) Or may occur after the beginning of the insurance period and you fail to notify us by the production reporting date, production lost due to uninsured causes equal to the amount of the reduction in yield used to establish your production guarantee will be applied in determining any indemnity (see section 11(c)(1)(i)). We will reduce the yield used to establish your production guarantee for the subsequent crop year.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is October 31 for California and August 31 preceding the cancellation date for all other states, or as specified in the Special Provisions.
5. Cancellation and Termination Dates.

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are January 31 for California and November 20 for all other states, or as specified in the Special Provisions.

6. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all acreage of each stonefruit crop you elect to insure, that is grown in the county, and for which premium rates are provided in the actuarial documents:

(a) In which you have a share;
(b) That is grown on trees that:
   (1) Were commercially available when the trees were set out or have subsequently become commercially available;
   (2) Are adapted to the area;
   (3) Are grown on root stock that is adapted to the area;
   (4) Are in compliance with the applicable State’s Tree Fruit Agreement or related crop advisory board for the state (for each insured crop and type), when such regulations exist;
   (5) Have produced at least 200 lugs of fresh market production per acre, or at least 2.2 tons per acre for processing crops, in at least one of the four most recent actual production history crop years, unless we inspect such acreage and give our approval in writing;
   (6) Have, after being set out or grafted, reached at least the fifth growing season. However, we may give our approval in writing to insure acreage that has not reached this age if it meets the requirements of 6(b)(5); and
   (7) Are grown in an orchard that, if inspected, is considered acceptable by us.

7. Insurable Acreage

In lieu of the provisions of section 9 of the Basic Provisions that prohibit insurance attaching to a crop planted with another crop, stonefruit interplanted with another perennial crop is insurable unless we inspect the acreage and determine that it does not meet the requirements for insurability contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions:
   (1) Coverage begins on February 1 in California and November 21 for all other states of each crop year, except that for the year of application, if your application is received after January 22 but prior to February 1 in California or after November 11 but prior to November 21 in all other states, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10 day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the orchard.
   (2) The calendar date for the end of the insurance period for each crop year is:
      (i) July 31 for all apricots; and
      (ii) September 30 for all nectarines and peaches;
      (iii) In all states except California, September 30 for all fresh plums;
      (iv) In California only, October 20 for all fresh plums; or
      (v) As otherwise provided for specific counties or types in the Special Provisions.
   (b) In addition to the provisions of section 11 of the Basic Provisions:
      (1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date of acquisition.
      (2) If you lose or relinquish your insurable share on any insurable acreage of stonefruit on or before the acreage reporting date for the crop year and if the acreage was insured by you the previous crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:
         (i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;
         (ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and
         (iii) The transferee is eligible for crop insurance.
      (c) For each subsequent crop year that the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.
      (d) If your stonefruit policy is canceled or terminated for any crop year, in accordance with the terms of the policy, after insurance attached for that crop year but on or before the cancellation and termination dates, whichever is the later, insurance will not be considered to have attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.

9. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:
   (1) Adverse weather conditions;
11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage for each type by its respective production guarantee; and

(2) Multiplying each result of section 11(b)(1) by the respective price election for the type and by the percent of the price election.

(3) Totaling the results of section 11(b)(2);

(4) Multiplying the total production to count (see section 11(c)), for each type, by the respective price election and by the percent of the price election;

(5) Totaling the results of section 11(b)(4);

(6) Subtracting the result of section 11(b)(5) from the result of section 11(b)(3) (if there is only one type, the result of (5)) will be the same as the result of (5));

(7) Multiplying the result of section 11(b)(6) by your share.

Scenario 1:
You select 75 percent coverage level and 100 percent of the price election on 50.0 acres of Type A stonefruit with 100 percent share in the unit. The production guarantee is 500.0 lugs per acre and the price election is $6.00 per lug. You harvest 5,000 lugs. Your indemnity would be calculated as follows:

(1) 50.0 acres x 500.0 lugs = 25,000-lug production guarantee;

(2) 25,000 lugs x $6.00 price election x 100 percent of the price election = $150,000 value of production guarantee;

(3) Totaling the results of section 11(b)(2);

(4) Multiplying the total production to count (see section 11(c)), for each type, by the respective price election for the type and by the percent of the price election;

(5) Totaling the results of section 11(b)(4);

(6) Subtracting the result of section 11(b)(5) from the result of section 11(b)(3) (if there is only one type, the result of (5) will be the same as the result of (5));

(7) Multiplying the result of section 11(b)(6) by your share.

Scenario 2:
In addition to the above information in Scenario 1, you have an additional 50.0 acres of Type B stonefruit with 100 percent share in the unit. The production guarantee is 300.0 lugs per acre and the price election is $3.00 per lug. You harvest 3,000 lugs. Your indemnity would be calculated as follows:

(1) 50.0 acres x 500.0 lugs Type A = 25,000-lug guarantee; and 50.0 acres x 300.0 lugs Type B = 15,000-lug guarantee;

(2) 25,000 lugs x $6.00 price election x 100 percent of the price election = $150,000 value of production guarantee;
of guarantee for Type A; and 15,000 lugs x $3.00 price election x 100 percent of the price election = $45,000 value of guarantee for Type B;
(3) $150,000 + $45,000 = $195,000 total value of production guarantee;
(4) 5,000 harvested lugs Type A x $6.00 price election x 100 percent of the price election = $30,000 value of production to count; and 3,000 harvested lugs Type B x $3.00 price election x 100 percent of the price election = $9,000 total value of production to count;
(5) $30,000 + $9,000 = $39,000 total value of production to count;
(6) $195,000-$39,000 = $156,000 total loss; and
(7) $156,000 loss x 1.000 share = $156,000 indemnity payment.
(c) The total production to count (in lugs or tons) from all insurable acres on a unit will include:
(1) All appraised production as follows:
(i) Not less than the production guarantee per acre for acreage:
(A) That is abandoned;
(B) That is sold by direct marketing if you fail to meet the requirements contained in section 10;
(C) That is damaged solely by uninsured causes; or
(D) For which you fail to provide production records that are acceptable to us;
(ii) Production lost due to uninsured causes;
(iii) Unharvested production that would be marketable if harvested; and
(iv) Potential production on insured acreage that you intend to abandon or no longer care for. If you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the insured crop. We will then make another appraisal when you notify us if any further damage or that harvest is general in the area unless you harvested the crop. If you harvest the crop we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count; and
(2) All harvested production from the insurable acreage.
(3) The quantity of harvested production will be reduced if the following conditions apply:
(i) The value of the damaged production is less than 75 percent of the marketable value of undamaged production due to an insured cause of loss; and
(ii) For stonefruit insured as fresh fruit only, the stonefruit either is packed and sold as fresh fruit and meets only the utility grade requirements of the applicable grade standards, or fails to meet the applicable grade standards but is or could be sold for any use other than fresh packed stonefruit.
(4) Harvested fresh or processing stonefruit production that is eligible for quality adjustment as specified in section 11(c)(3) will be reduced as follows:
(i) When packed and sold as fresh fruit or when insured as a processing crop, by dividing the value per lug or ton of marketable production by the highest price election for the same type and multiplying the result (not to exceed 1.00) by the quantity of such production; or
(ii) For all other fresh stonefruit, by multiplying the number of tons that could be marketed by the value per ton and dividing that result by the highest price election available for the same type.

12. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions (§ 457.8) are not applicable.

§ 457.160 Processing tomato crop insurance provisions.

The Processing Tomato Crop Insurance Provisions for the 2005 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured polices:

Processing Tomato Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Acre. 43,560 square feet of land on which row widths do not exceed 6 feet, or the land on which at least 7,260 linear feet rows are planted if row widths exceed 6 feet.

Broker. An enterprise in the business of buying and selling tomatoes possessing all the licenses and permits required by the state in which it operates, and that has a written contract with a processor to purchase processing tomatoes on behalf of the processor and to deliver such tomatoes to the processor.
§ 457.160

Bypassed acreage. Land on which production is ready for harvest but the processor elects not to accept such production so it is not harvested.

First fruit set. The reproductive stage of the plant at which 30 percent of the plants have produced a fruit that has reached a minimum of one inch in diameter.

Good Farming Practices. In addition to the definition of “good farming practices” contained in section 1 of the Basic Provisions, good farming practices include the cultural practices required under the processor contract.

Harvest. The severance of tomatoes from the vines.

Plant stand. The number of plants per acre considered to be normal for the applicable tomato variety and growing area.

Planted acreage. In addition to the definition contained in the Basic Provisions, tomatoes must initially be placed in rows to be considered planted. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions or by written agreement.

Practical to replant. In lieu of the definition of “Practical to replant” contained in section 1 of the Basic Provisions, practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors, including but not limited to moisture availability, marketing window, condition of the field, and time to crop maturity, that replanting the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period. It will not be considered practical to replant unless the replanted acreage can produce at least 75% of the approved yield, and the processor agrees in writing that it will accept the production from the replanted acreage.

Processor. Any business enterprise regularly engaged in processing tomatoes for human consumption, that possesses all licenses and permits for processing tomatoes required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process contracted processing tomatoes within a reasonable amount of time after harvest.

Processor contract. A written agreement between the producer and a processor, or between the producer and a broker, containing at a minimum:

(a) The producer’s commitment to plant and grow processing tomatoes, and to deliver the tomato production to the processor or broker;

(b) The processor’s, or broker’s, commitment to purchase all the production stated in the processor contract; and

c) A price per ton that will be paid for the production.

Ten. Two thousand (2,000) pounds avoidu-pois.

2. Unit Division

(a) Notwithstanding the provisions of this section or any unit division provisions contained in the Basic Provisions, no indemnity will be paid for any loss of production on any unit if the insured produced a crop sufficient to fulfill the processor contracts forming the basis for the guarantee, and any indemnity will be limited to the amount necessary to compensate for loss in yield at the price elected between production to count and the contract requirements.

(b) In California only, in addition to, or instead of, establishing optional units by section, section equivalent or FSA farm serial number and by irrigated and non-irrigated acreage as provided in the unit division provisions contained in the Basic Provisions, optional units may be established if acreage planted to tomatoes is separated by a field that is not planted to tomatoes, or by a permanent boundary such as a permanent waterway, fence, public road or woodland. Such optional unit must consist of the minimum number of acres stated in the Special Provisions. Acreage planted to tomatoes that is less than the minimum number of acres required will attach to the closest unit within the section, section equivalent, or FSA farm serial number.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one price election for all the processing tomatoes in the county insured under this policy unless the Special Provisions provide different price elections by type. The percentage of the maximum price election you choose for one type will be applicable to all other types insured under this policy. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(b) Liability under this policy will not exceed the number of tons required to be accepted by the processor under a processor contract in effect on or before:

1. The earlier of August 20 or the date of damage to the insured crop in all counties with an acreage reporting date of July 15; or

2. The earlier of the acreage reporting date or the date of damage in all other counties. (Exclude indemnities that occur in stage one and replant payments.)

(c) The price election used to determine the amount of an indemnity is progressive by stage and increases, at specified intervals, to the price used for final stage losses.
Federal Crop Insurance Corporation, USDA § 457.160

Stages will be determined on an acre basis. The stages and applicable price elections are:

1. First stage is from planting until first fruit set. If any acreage of the insured crop is destroyed in this stage, the price used to establish the amount of any indemnity owed for such acreage will be 50 percent of your price election;

2. Second stage is from the first fruit set until harvest. If any acreage of the insured crop is destroyed in this stage, the price used to establish the amount of any indemnity owed for such acreage will be 80 percent of your price election; and

3. Third stage (final stage) is harvested acreage. The price election used in this stage to establish the amount of any indemnity owed will be 100 percent of your price election.

4. Any acreage of tomatoes damaged to the extent, that the majority of producers in the area would not normally further care for the tomatoes, will be deemed to have been destroyed even though you may continue to care for it. The price election used to determine the amount of an indemnity will be that applicable to the stage in which the tomatoes were destroyed.

5. The appraised production from bypassed acreage that could have been accepted by the processor will be included when determining your approved yield.

6. Acreage that is bypassed because it was damaged by an insurable cause of loss to the extent that the processor cannot use the product will be considered to have a zero yield when determining your approved yield.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is August 31 preceding the cancellation date for California and November 30 preceding the cancellation date for all other states.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are January 15 in California and March 15 in all other states.

6. Report of Acreage

In addition to the provisions of section 6 of the Basic Provisions, you must provide a copy of all processor contracts to us on or before the acreage reporting date in all counties, unless otherwise specified in the Special Provisions.

7. Annual Premium

In lieu of the premium amount determinations contained in section 7 of the Basic Provisions, the annual premium amount per acre is determined by multiplying the production guarantee per acre by the price election for the third (final) stage; by the premium rate; by the insured acreage; by the applicable share at the time of planting; and ultimately by any applicable premium adjustment factors contained in the actuarial documents.

8. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the tomatoes in the county for which a premium rate is provided by the actuarial documents:

1. In which you have a share;

2. That are planted for harvest as processing tomatoes;

3. That are grown under, and in accordance with, the requirements of a processor contract executed on or before August 29 in all counties with an acreage reporting date of July 15, or on or before the acreage reporting date in all other counties, and are not excluded from the processor contract for or during the crop year; and

4. That are not (unless allowed by the Special Provisions or by written agreement):

   (i) A tomato produced from a field that is not planted for harvest as processing tomatoes;

   (ii) That are planted for harvest as processing tomatoes;

   (iii) Interplanted with another crop;

   (b) You will be considered to have a share in the insured crop if, under the processor contract, you retain control of the acreage on which the tomatoes are grown, you are at risk of loss, and the processor contract provides for delivery of processing tomatoes under specified conditions and at a stipulated price.

   (c) A tomato producer who is also a processor or broker may establish an insurable interest if the following requirements are met:

1. The processor or broker, as applicable, must comply with these Crop Provisions;

2. Prior to the sales closing date, the Board of Directors or officers of the processor or the broker must execute and adopt a resolution that contains the same terms as an acceptable processor contract. (Such resolution will be considered a processor contract under this policy); and

3. As applicable, our inspection reveals that the processing facilities comply with the definition of a processor contained in these Crop Provisions.

9. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

(a) Any acreage of the insured crop that is damaged before the final planting date, to the extent that the majority of producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant; and
(b) We will not insure any acreage that does not meet the rotation requirements, if applicable, contained in the Special Provisions.

10. Insurance Period

In lieu of the provisions contained in section 11 of the Basic Provisions, regarding the end of the insurance period, insurance ceases at the earlier of the date:

(a) You harvest sufficient production to fulfill your processor contract if the processor contract stipulates a specific amount of production to be delivered;

(b) The tomatoes should have been harvested but was not harvested;

(c) The tomatoes were abandoned;

(d) Harvest was completed;

(e) Final adjustment of a loss was completed; or

11(a)(1) through (7) that occurs during the insurance period:

(i) The breakdown or non-operation of harvesting equipment; and

(ii) Abnormally hot or cold temperatures that cause an unexpected number of acres over a large producing area to be ready for harvest at the same time, affecting the timely harvest of a large number of such acres or the processing of such production being beyond the capacity of the processor, either of which causes the acreage to be bypassed;

(2) Fire;

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(8) Failure of the irrigation water supply, if due to a cause of loss contained in sections 11(a)(1) through (7) that occurs during the insurance period;

(b) In addition to the causes of loss excluded by section 12 of the Basic Provisions, we will not insure against any loss of production due to:

11(a)(1) through (7) that occurs during the insurance period:

(i) The breakdown or non-operation of equipment or facilities; or

(ii) The availability of a crop insurance payment. We may deny any indemnity immediately in such circumstance or, if an indemnity has been paid, require you to repay it to us with interest at any time acreage was bypassed due to the availability of a crop insurance payment;

(2) The processing tomatoes not being timely harvested, unless such delay in harvesting is solely and directly due to an insured cause of loss; or

(3) Your failure to follow the requirements contained in the processor contract.

12. Replanting Payment

(a) In accordance with section 13 of the Basic Provisions, a replanting payment is allowed if the crop sustained a loss exceeding 50 percent of the plant stand and it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be determined as follows:

1. The amount shown on the Special Provisions multiplied by your share; or

2. If an amount is not contained in the Special Provisions, the lesser of 20 percent of the production guarantee or three tons, multiplied by your third stage (final) price election, multiplied by your share; and

3. In no event will the replanting payment per acre exceed your actual cost of replanting.

13. Duties in the Event of Damage or Loss

In addition to the notice required by section 14 of the Basic Provisions, you must give us notice:

(a) Not later than 48 hours after:

(1) Total destruction of the tomatoes in the unit; or

(2) Discontinuance of harvest on a unit on which unharvested production remains;

(b) Within 3 days after the date harvest should have started on any acreage that will not be harvested. You must also provide acceptable documentation of the reason the acreage was bypassed. Failure to provide such documentation will result in our determination that the acreage was bypassed due to an uninsured cause of loss. If the crop will not be harvested and you wish to destroy the crop, you must leave representative samples of the unharvested crop for our inspection. The samples must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be destroyed until the earlier of our inspection or 15 days after notice is given to us; and

(c) At least 15 days prior to the beginning of harvest if you intend to claim an indemnity on any unit, or immediately if damage is discovered during the 15 day period or during harvest, so that we may inspect the damaged production. If you fail to notify us and
Federal Crop Insurance Corporation, USDA
§ 457.160

such failure results in our inability to inspect the damaged production, we will consider all such production to be undamaged and include it as production to count. You are not required to delay harvest.

14. Settlement of Claim
(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
(1) For any optional units, we will combine all optional units for which such production records were not provided; or
(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insured acreage by its respective production guarantee, by type if applicable;
(2) Multiplying each result of section 14(b)(1) by the respective price election, by type if applicable;
(3) Totaling the results of section 14(b)(2) if there are more than one type;
(4) Multiplying the total production to count (see section 14(c)), for each type if applicable, by its respective price election;
(5) Totaling the results of section 14(b)(4) if there are more than one type;
(6) Subtracting the result of section 14(b)(4) from the result of section 14(b)(5) if there is only one type or subtracting the result of section 14(b)(3) if there are more than one type; and
(7) Multiplying the result of section 14(b)(6) by your share.

For example:
You have a 100 percent share in 50 acres of type A processing tomatoes in the unit, with a guarantee of 18.8 tons per acre and a price election of $50.00 per ton. You are only able to harvest 10.0 tons. Your indemnity would be calculated as follows:
(1) 50.0 acres x 18.8 tons = 940.0 tons guaranteed;
(2) 940.0 tons x $50.00 price election = $47,000.00 value guarantee;
(3) 10.0 tons x $50.00 price election = $500.00 value of production to count;
(4) $47,000.00 + $500.00 = $47,500.00 total value of production to count;
(5) Multiplying the result of section 14(b)(6) by your share;
(6) $500.00 + $175.00 = $675.00 total value of production to count;
(7) $47,000.00 - $675.00 = $46,325.00 indemnity payment.
(c) The total production to count, specified in tons, from all insurable acreage on the unit will include:
(1) All production as follows:
   (i) Not less than the production guarantee for acreage:
      (A) That is abandoned;
      (B) Put to another use without our consent;
      (C) That is damaged solely by uninsured causes;
      (D) For which you fail to provide production records that are acceptable to us.
   (ii) Production lost due to uninsured causes;
   (iii) Production on acreage that is bypassed unless the acreage was bypassed due to an insured cause of loss which resulted in production which would not be acceptable under the terms of the processor contract;
   (iv) Potential production on insured acreage that you intend to put to another use or abandoned, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
      (A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us. (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
      (B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested.
(2) All harvested production (in tons) delivered to the processor which meets the quality requirements of the processor contract (expressed as usable or payable weight).
§ 457.161 Canola and rapeseed crop insurance provisions.

The canola and rapeseed crop insurance provisions for the 2011 and succeeding crop years are as follows:

FCIC policies:

DEPARTMENT OF AGRICULTURE
Federal Crop Insurance Corporation
Reinsured Policies

(Appropriate title for insurance provider)
Both FCIC and reinsured policies:

Canola and Rapeseed Crop Provisions

1. Definitions

Canola. A crop of the genus *Brassica* as defined in accordance with the Official United States Standards for Grain—Subpart C—U.S. Standards for Canola.

Harvest. Combining or threshing for seed. A crop that is swathed prior to combining is not considered harvested.

Local market price (Canola). The cash price per pound for U.S. No. 2 grade canola that reflects the maximum limits of quality deficiencies allowable for the U.S. No. 2 grade canola.

Planted acreage. In addition to the definition contained in the Basic Provisions, land on which seed is initially spread onto the soil surface by any method and subsequently is mechanically incorporated into the soil in a timely manner and at the proper depth will be considered planted. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Price of damaged production. The cash price per pound available if the production were sold for canola that qualifies for quality adjustment in accordance with section 12 of these crop provisions.

Rapeseed. A crop of the genus *Brassica* that contains at least 30 percent of an industrial type of oil as shown on the Special Provisions and that is measured on a basis free from foreign material.

Swathed. Severance of the stem and seed pods from the ground and placing into windrows without removal of the seed from the pod.

2. Unit Division

In addition to optional units by section, section equivalent or FSA farm serial number and by irrigated and non-irrigated practices, optional units may be by type if the type is designated on the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You must elect to insure your canola and rapeseed with either revenue protection or yield protection by the sales closing date; and

(b) In counties with both fall and spring sales closing dates for the insured crop:

(1) If you do not have any insured fall planted acreage of the insured crop, you may change your coverage level, or your percentage of projected price (if you have yield protection), or elect revenue protection or yield protection, until the spring sales closing date; or

(2) If you have any insured fall planted acreage of the insured crop, you may not change your coverage level, or your percentage of projected price (if you have yield protection), or elect revenue protection or yield protection, after the fall sales closing date.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date for counties with a March 15 cancellation date, and June 30 preceding the cancellation date for all other counties.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and county</th>
<th>Cancellation and Termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>All counties in Alabama and Georgia ..........</td>
<td>Sept. 30.</td>
</tr>
<tr>
<td>All other counties without fall planted types specified on the actuarial table.</td>
<td>Mar. 15.</td>
</tr>
<tr>
<td>All other counties with fall planted types specified on the actuarial table.</td>
<td>Aug. 31.</td>
</tr>
</tbody>
</table>
6. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all canola and rapeseed in the county for which a premium rate is provided by the actuarial table:

(a) In which you have a share;
(b) That is planted for harvest as seed; and
(c) That is not, unless allowed by Special Provisions or by written agreement:
   (1) Interplanted with another crop; or
   (2) Planted into an established grass or legume.

7. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

(a) We will not insure any acreage that does not meet the rotation requirements contained in the Special Provisions;
(b) Whenever the Special Provisions designate only a fall final planting date, any acreage of canola or rapeseed damaged before such final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a fall type of the insured crop unless we agree that replanting is not practical;
(c) Whenever the Special Provisions designate both fall and spring final planting dates:
   (1) Any fall canola or rapeseed that is damaged before the spring final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a fall type of the insured crop unless we agree that replanting is not practical;
   (2) Any fall canola or rapeseed acreage that is replanted to a spring type of the same crop when it was practical to replant the fall type will be insured as the spring type and the production guarantee, premium, projected price, and harvest price applicable to the spring type will be used. In this case, the acreage will be considered to be initially planted to the spring type; and
   (d) Whenever the Special Provisions designate only a spring final planting date, any acreage of fall planted canola or rapeseed that is damaged after it is accepted for insurance but before the spring final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a spring type of the insured crop unless we agree it is not practical to replant; and
   (5) If fail planted acreage is not to be insured it must be recorded on the acreage report as uninsured fail planted acreage.

8. Insurance Period

In accordance with the provisions of section 11 of the Basic Provisions, the calendar date for the end of the insurance period is October 31 of the calendar year in which the crop is normally harvested.

9. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss which occur during the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption;
(h) Failure of the irrigation water supply due to a cause of loss specified in sections 9(a) through (g) that also occurs during the insurance period; or
(i) For revenue protection, a change in the harvest price from the projected price, unless FCIC can prove the price change was the direct result of an uninsured cause of loss specified in section 12(a) of the Basic Provisions.
10. Replanting Payment

(a) A replanting payment is allowed as follows:

(1) In lieu of provisions in section 13 of the Basic Provisions that limit the amount of a replant payment to the actual cost of replanting, the amount of any replanting payment will be determined in accordance with these Crop Provisions;

(2) Except as specified in section 10(a)(1), you must comply with all requirements regarding replanting payments contained in section 13 of the Basic Provisions;

(3) The insured crop must be damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage; and

(4) The replanted crop must be seeded at a rate sufficient to achieve a total (undamaged and new seeding) plant population that is considered appropriate by agricultural experts for the insured crop, type and practice.

(b) Unless otherwise specified in the Special Provisions, the amount of the replanting payment per acre will be the lesser of 20 percent of the production guarantee or 175 pounds, multiplied by your projected price, multiplied by your share.

(c) When the crop is replanted using a practice that is uninsurable for an original planting, the liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

(1) If the acreage is replanted to an insured crop type that is different than the insured crop type originally planted on the acreage:

(a) The production guarantee, premium, and projected price and harvest price, as applicable, will be adjusted based on the replanted type;

(b) Replanting payments will be calculated using your projected price and production guarantee for the crop type that is replanted and insured; and

(c) A revised acreage report will be required to reflect the replanted type, as applicable.

11. Duties in the Event of Damage or Loss

Representative samples are required in accordance with section 14 of the Basic Provisions.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:

(1) Optional unit, we will combine all optional units for which acceptable records of production were not provided; or

(2) Basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the number of insured acres of each type, as applicable, by your respective:

(i) Yield protection guarantee (per acre) if you elected yield protection;

(ii) Revenue protection guarantee (per acre) if you elected revenue protection;

(2) Totaling the results of section 12(b)(1)(i) or 12(b)(1)(ii), whichever is applicable;

(3) Multiplying the production to count of each type, as applicable, by your respective:

(i) Projected price if you elected yield protection;

(ii) Harvest price if you elected revenue protection;

(4) Totaling the results of section 12(b)(3)(i) or 12(b)(3)(ii), whichever is applicable;

(5) Subtracting the result of section 12(b)(4) from the result of section 12(b)(2); and

(6) Multiplying the result of section 12(b)(5) by your share.

For example:

You have 100 percent share in 50 acres of canola in the unit with a production guarantee (per acre) of 650 pounds, your projected price is $1.12, your harvest price is $1.110, and your production to count is 31,000 pounds.

If you elected yield protection:

(1) 50 acres x (650 pound production guarantee x $1.220 projected price) = $3,965.00 value of the production guarantee;

(2) 31,000 pound production to count x $.1220 projected price = $3,782.00 value of the production to count;

(3) $3,965.00-$3,782.00 = $183.00

Multiplying the result of section 12(b)(5) by your share:

6) Multiplying the result of section 12(b)(5) by your share.

(6) $183.00 x 1.000 share = $183.00 indemnity; or

If you elected revenue protection:

(1) 50 acres x (650 pound production guarantee x $1.220 projected price) = $3,965.00 revenue protection guarantee;

(2) 31,000 pound production to count x $.1220 harvest price = $3,441.00 value of the production to count;

(3) $3,965.00-$3,441.00 = $524.00

(6) $524.00 x 1.000 share = $524.00 indemnity.

(c) The total production to count (pounds) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) For yield protection, not less than the production guarantee and for revenue protection, not less than the amount of production that when multiplied by the harvest price equals the revenue protection guarantee (per acre) for acreage:

(A) That is abandoned;

(B) That is put to another use without our consent;

(C) That is damaged solely by uninsured causes; or

(D) For which you fail to provide acceptable production records;
(ii) Production lost due to uninsured causes;
(iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with section 12(d)); and
(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count; or
(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
(2) All harvested production from the insurable acreage.
(d) Mature canola may be adjusted for excess moisture and quality deficiencies. Mature rapeseed may be adjusted for excess moisture only. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.
(1) Canola and rapeseed production will be reduced by 0.12 percent for each 0.1 percent-point of moisture in excess of 8.5 percent. We must be permitted to obtain samples of the production to determine the moisture content.
(2) Canola production will be eligible for quality adjustment if:
(i) Deficiencies in quality, in accordance with the Official United States Standards for Grain, result in the canola not meeting the grade requirements for U.S. No. 3 or better (U.S. Sample grade) because of kernel damage (excluding heat damage), or a musty, sour, or commercially objectionable foreign odor; or
(ii) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.
(d) Quality will be a factor in determining your loss in canola production only if:
(i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these Crop Provisions and which occurs within the insurance period;
(ii) The deficiencies, substances, or conditions result in a net price for the damaged production that is less than the local market price;
(iii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us;
(iv) With regard to deficiencies in quality, the samples are analyzed by:
(A) A grain grader licensed under the United States Grain Standards Act or the United States Warehouse Act;
(B) A grain grader licensed under State law and employed by a warehouse operator who has a storage agreement with the Commodity Credit Corporation; or
(C) A grain grader not licensed under State law, but who is employed by a warehouse operator who has a commodity storage agreement with the Commodity Credit Corporation and is in compliance with State law regarding warehouses; and
(v) With regard to substances or conditions injurious to human or animal health, the samples analyzed by a laboratory approved by us.
(e) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on an unadjusted weight basis.

13. Late Planting
In lieu of section 16(a) of the Basic Provisions, the production guarantee for each acre planted to the insured crop during the late planting period will be reduced by 1 percent per day for each day planted after the final planting date unless otherwise specified in the Special Provisions.

14. Prevented Planting
Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.162 Nursery crop insurance provisions.

The Nursery Crop Insurance Provisions for the 2006 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Nursery Crop Insurance Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

American Standard for Nursery Stock. A publication of the American Nursery and Landscape Association, or a subsequent successor organization, issued in accordance with the rules of the American National Standards Institute, Inc. that provides common terminology and standards for nurseries.

Amount of insurance. For each basic unit, your basic unit value multiplied by the coverage percentage you elect and multiplied by your share.

Basic unit value. The full value of all insurable plants in each basic unit as shown on your PIVR, including any revision that increases the value of your insurable plant inventory.

Container grown. Nursery plants planted and grown in standard nursery containers either above ground or that are placed in the ground, either directly or when placed in another pot in the ground (i.e., pot-in-pot).

Crop year. The period beginning the day insurance attaches and extending until the following May 31. Crop year is designated by the year in which the insurance period ends.

Crop year deductible. The deductible percentage multiplied by the sum of all plant inventory values for each basic unit. The crop year deductible will be increased for any increases in the inventory value on the PIVR or through the purchase of a Peak Inventory Endorsement. If in effect at the time of loss, the crop year deductible will be reduced by any previously incurred deductible, except any incurred under the Rehabilitation Endorsement, if you timely report each loss to us.

Deductible percentage. An amount equal to 100 percent minus the percent of coverage you select.

Eligible Plant List. A list that includes the botanical and common names of insurable plants, the winter protection requirements for container grown material and the areas in which they apply, the hardiness zone to which field grown material is insurable, the designated hardiness zone for each county, and the unit classification for each plant on the list, published by FCIC on RMA’s Web site at http://www.rma.usda.gov. It is also available on compact disk from your crop insurance agent.

Fabric grow bag. A fabric bag (including a woven or matted bag with a plastic or fabric bottom) used for growing woody plants in-ground or as an above-ground nursery plant container that provides adequate drainage and is appropriate in size for the plant.

Field grown. Nursery plants planted and grown in the ground without the use of an artificial root containment device. Plants grown in in-ground fabric grow bags, plants that are balled and burlapped or plants grown in containers that allow the plants to root (excluding fibrous roots) into the ground (for example, a container without a bottom) are also considered field grown.

Field market value A. The value of undamaged insurable plants, based on the lesser of: (1) The prices contained in the Plant Price Schedule; or (2) the prices contained in your catalog or price list in the basic unit immediately prior to the occurrence of any loss, as determined by our appraisal. This allows the amount of insurance under the policy to be divided among the individual units in accordance with the actual value of the plants in the unit at the time of loss to determine whether you are entitled to an indemnity for insured losses in the basic unit. This value is also used to calculate the actual value of the plants in the basic unit at the time of loss to ensure that you have not under-reported your plant values. For liners, the total value of undamaged liners is multiplied by the survival factor to determine the value of undamaged insurable plants.

Field market value B. The value of insurable plants, based on the lesser of: (1) The prices contained in the Plant Price Schedule; or (2) the prices contained in your catalog or price list in the basic unit following the occurrence of a loss, as determined by our appraisal, plus any reduction in value due to uninsured causes. This is used to determine the loss of value for each individual unit so that losses can be paid on an individual unit basis.

Good nursery practices. In lieu of the definition of “good farming practices” contained
in section 1 of the Basic Provisions, the horticultural practices generally in use in the area for nursery plants to make normal progress toward the stage of growth at which marketable plants are offered for sale in the market. The occurrence deductible is the lesser of: (1) The deductible percentage multiplied by field market value A minus field market value B; or (2) the crop year deductible to be used when the inventory value is less than the reported basic unit value of the Basic Provisions, but less than 3 inches in diameter at the widest point of the container or cell interior, have an established root system, and meet all other conditions specified in the Special Provisions.

Loss. Field market value A minus field market value B.

Marketable. Of a condition that it may be offered for sale in the market.

Monthly proration factors. Factors contained in the actuarial documents that are used to calculate premium when you do not insure the nursery plants for an entire crop year.

Nursery. A business enterprise that grows the nursery plants and derives at least 50 percent of its gross income from the wholesale marketing of such plants.

Occurrence deductible. This deductible allows a smaller deductible than the crop year deductible to be used when the inventory value is less than the reported basic unit value. The occurrence deductible is the lesser of: (1) The deductible percentage multiplied by field market value A multiplied by the under-report factor; or (2) the crop year deductible.

PIVR. The plant inventory value report, your report that declares the value of insurable plants in accordance with section 6.

Plant Price Schedule. A schedule of insurable plant prices that establishes the maximum insurable value of undamaged insurable plants, published by FCIC as an actuarial document available on RMA’s Web site at http://www.rma.usda.gov. It is also available on compact disk from your crop insurance agent.

Practice. A cultural method of producing plants. Container grown and field grown are considered separate insurable practices.

Sales closing date. In lieu of the definition in section 1 of the Basic Provisions, the date shown in the Special Provisions. New-policy applications may be filed at any time. However, all applications, including those for new or amended coverage, are subject to a 30-day waiting period before commencement of coverage as specified in sections 3(d) and 9(a).

Standard nursery containers. Rigid containers not less than 1 inch in diameter at the widest point of the container interior (including trays that contain 200 or fewer individual cells, unless specifically provided by the Special Provisions), above-ground fabric grow bags, and other types of containers specified in the Special Provisions that are appropriate in size and provide adequate drainage for the plant. In-ground fabric grow bags, balled and burlapped, and trays (flats) without individual cells are not considered standard nursery containers.

Stock plants. Plants used solely for propagation during the insurance period.

Survival factor. A factor shown on the Special Provisions that specifies the expected percentage of liners that normally survive the period from insurance attachment to market.

Under-report factor. The factor that adjusts your indemnity for under-reporting of inventory values. The factor is always used in determining indemnities. For each basic unit, the under-report factor is the lesser of: (1) 1.00; or (2) the basic unit value, including a Peak Inventory Value Report during the coverage term of a Peak Inventory Endorsement, minus the total of all previous losses, as adjusted by any previous under-report factor, divided by field market value A. Payments made under the Rehabilitation Endorsement will not be considered a previous loss when calculating the under-report factor.

Wholesale. To sell nursery plants in large quantities at a price below that offered on low-quantity sales to retailers, commercial users, governmental end-users, or other end-users for business purposes (e.g., sales to landscape contractors and commercial fruit producers). This determination will be based on a county-by-county basis.

2. Unit Division

(a) If you elect additional coverage for a practice, a basic unit, as defined in section 1 of the Basic Provisions, may be divided into additional basic units by each insurable plant type designated in section 2(b) for which a premium rate is provided by the actuarial documents.
§ 457.162

(b) Only the following plant types contained on the Eligible Plant List are insurable:

(1) Deciduous Trees (Shade and Flower);
(2) Broad-leaf Evergreen Trees;
(3) Coniferous Evergreen Trees;
(4) Fruit and Nut Trees;
(5) Deciduous Shrubs;
(6) Broad-leaf Evergreen Shrubs;
(7) Coniferous Evergreen Shrubs;
(8) Small Fruits;
(9) Herbaceous Perennials;
(10) Roses;
(11) Ground Cover and Vines;
(12) Annuals;
(13) Foliage;
(14) Palms and Cycads;
(15) Liners (container grown only and inclusive of all insurable plant types); and
(16) Other plant types listed in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) The production reporting requirements, including the misreporting provisions, contained in section 3 of the Basic Provisions are not applicable.

(b) In addition to the requirements of section 3 of the Basic Provisions, you may select either catastrophic risk protection or additional coverage for each insured practice. An administrative fee established in accordance with section 7(e) of the Basic Provisions will be owed for each practice insured.

(c) In lieu of section 3(b) of the Basic Provisions:

(1) If you select additional coverage for a practice:
   (i) You may select one coverage level for each plant type insured in that practice if you elect basic units by plant type;
   (ii) You will receive 100 percent of the price election for all plant types in that practice;
   (iii) You must provide on the application a coverage level percentage for each plant type that will be insured; and
   (iv) You must select a coverage level if:
      (A) A new plant is added under a revised PIVR or Peak Inventory Endorsement; and
      (B) The plant is not categorized under a plant type reported on the initial PIVR.

(2) If you select catastrophic risk protection for a practice, all plant types under the practice must be insured at the catastrophic risk protection level.

(d) In lieu of section 3(d) of the Basic Provisions, you may request changes to the coverage level for a plant type by submitting them in writing to us as follows:

(1) For new policies, changes cannot be made for the crop year after the date of the application; and
(2) For carryover policies:

(i) For the 2006 crop year only, changes must be requested on or before September 30th prior to the start of the crop year; and
(ii) For all subsequent crop years, changes must be requested on or before the sales closing date; and
(iii) Unless we reject the proposed increase because a loss occurs within 30 days of the date the request is made (Rejection can occur at any time we discover such loss has occurred), requested changes will take effect:
(A) For the 2006 crop year, 30 days after the date you submitted your request; and
(B) For all subsequent crop years, on the date of the start of the crop year.

(e) Your amount of insurance will be reduced by the amount of any indemnity paid under this policy. For losses occurring when a Peak Inventory Endorsement is in effect, to determine the amount of insurance remaining after the loss you must subtract the amount of the indemnity from the peak amount of insurance, then subtract any remaining amount of indemnity from the amount of insurance.

(f) If you restock your nursery plant inventory, you may increase your amount of insurance in accordance with section 6(g).

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is January 31 of each crop year.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are May 31 preceding the crop year.

6. PIVR

(a) Section 6 of the Basic Provisions is not applicable.

(b) You must submit a PIVR for each insured practice, as applicable, and two copies of your most recent wholesale catalogs or price lists in accordance with subsection (k) to us with your application on or before the sales closing date for each crop year following the year of application.

(1) You will be notified in writing if an application for insurance is refused because the inventory or wholesale catalog or price list is not acceptable.

(2) If you fail to provide a PIVR or applicable catalog or price list on or before the sales closing date for any crop year, insurance will not attach until 30 days after all such documents have been received by your crop insurance agent and we will not be liable for any losses that occur before insurance has attached.

(c) The PIVR must include, by basic unit, all growing locations, basic unit value, coverage level selected, as applicable, and your share.

(1) If you do not elect additional basic units by plant type or you elect CAT coverage, the plant inventory values for each
Federal Crop Insurance Corporation, USDA

§ 457.162

Plant type in the basic unit must be separately reported on the PIVR and totaled to determine the basic unit value.

(2) At our option, you will be required to provide documentation in support of your PIVR, including, but not limited to, a detailed plant inventory listing that includes the name, the number, and the size of each plant; acceptable records of sales and purchases of plants for the three previous crop years in the amount of detail we require; and your ability to properly obtain and maintain nursery stock. Acceptable records must contain the name and telephone number of the purchaser or seller, as applicable, names of the plants, the number of each plant sold or purchased, and the sales price for each plant.

(3) Failure to provide documentation when requested or providing inadequate documentation will result in denial of insurance for the crop year for any basic unit for which such documentation was not provided. This provision does not apply to:

(i) Plant varieties you have not previously grown; or

(ii) New nurseries where an inspection has determined you have the ability to properly obtain and maintain the nursery stock.

(d) Your PIVR, including any revised report, and your Peak Inventory Value Report will be used to determine your premium and amount of insurance.

(e) Your PIVR must reflect your insurable nursery plant inventory value by basic unit.

(i) The price for each plant and size listed on your PIVR will be the lower of the Plant Price Schedule price or the lowest wholesale price in your nursery catalog or price list submitted in accordance with section 6(k).

(ii) In no instance will we be liable for plant values greater than those contained in the Plant Price Schedule.

(iii) If you have previously made a claim and the loss adjuster is unable to determine whether a plant was damaged prior to submission of your PIVR for the current crop year, the plant will be insurable at full value based on the lesser of the Eligible Plant List price or the catalog or price list price. The value of the plant may be reduced at any time during the crop year if the extent of damage is discovered.

(f) For catastrophic level policies only, you must report, on the PIVR for each practice insured, your greatest plant sales in any of the previous 3 years and the actual inventory value on the date insurance attaches.

(1) You may be required to provide documentation to support the above reporting requirements. To be considered adequate, sales documents must contain the name and telephone number of the purchaser, names of the plants, the number of each plant sold, and the sales price for each plant.

(2) For each applicable practice, the total of your basic unit values cannot exceed 110 percent of the higher of your:

(i) GREATEST amount of plant sales in any of the previous 3 years; or

(ii) Actual inventory value on the date insurance attaches.

(3) Failure to provide documentation when requested or providing inadequate documentation will result in denial of insurance for the crop year for any basic unit for which such documentation was not provided. This provision does not apply to:

(i) Plant varieties you have not previously grown; or

(ii) New nurseries where an inspection has determined you have the ability to properly obtain and maintain the nursery stock.

(g) You may increase your reported inventory value for each basic unit no more than twice during the crop year by submitting a revised PIVR prior to 30 days before the end of such crop year.

(1) Any requested increase must be made in writing and contain the same information as required in section 6(c). The limitations in section 3(d) regarding making changes to the coverage level after a specified date are not applicable to a revised PIVR that adds new plant types. The limitations continue to apply if plants are added for a specific plant type.

(2) An inspection will be performed when the total of all the basic unit values contained on the revised PIVRs is increased 50 percent or more from the previous total of all the basic unit values on the PIVR, and the increase is not due to restocking subsequent to an insured loss.

(3) At our discretion, we may inspect the inventory if an increase of less than 50 percent is reported on the revised PIVR.

(h) Your revised PIVR will be considered accepted by us and insurance will attach on any proposed increase in inventory value 30 days after your written request is received unless we reject the proposed increase in your plant inventory value in writing.

(5) We will reject any requested increase if a loss occurs within 30 days of the date the request is made.

(6) You cannot revise your PIVR to decrease the plant inventory value after the start of the insurance period specified in section 9.

(h) For insurable plants that were damaged prior to the attachment of insurance coverage:

(1) The applicable price, as determined in accordance with section 6(e), will be reduced for inventory reporting purposes if we accept such plants for insurance coverage;

(2) The plants will be removed from the PIVR if they are not accepted;

(3) The procedure for calculating the insurable value of damaged plants that are accepted for coverage is contained in the Special Provisions.

(i) You must report the full value of each basic unit value in accordance with section 9.
6(e). Failure to report the full value of each basic unit value will result in the reduction of any claim in accordance with section 12(d).

Insurable plants in over-sized containers will be valued for purposes of reporting inventory and loss adjustment as if the plants were in appropriate-sized containers in accordance with the standards contained in the current American Standard for Nursery Stock. Each cell in a multiple-cell container is considered a separate container. (See the Eligible Plant List at http://www.rma.usda.gov/ for additional information and requirements on container specifications and volume calculation.)

(k) At a minimum, your wholesale catalog or price list must:
   (1) Be type-written and legible;
   (2) Show an issue date on the cover page (may be handwritten);
   (3) Contain the name, address, and phone number of your nursery;
   (4) Be provided to customers and used in the sale of your plants; and
   (5) List each plant’s name (scientific or common), plant or container size, and wholesale price.

7. Premium

(a) In lieu of section 7(c) of the Basic Provisions, we will determine your premium by multiplying the amount of insurance by the appropriate premium rate, any premium adjustment factor, and the monthly proration factor contained in the actuarial documents, if applicable.

(b) In addition to the provisions in section 7 of the Basic Provisions, we will prorate your premium based on:
   (1) The time remaining in the crop year after insurance attaches:
      (i) If you have made application after the start of the insurance period specified in section 9; or
      (ii) If you submit a PIVR or wholesale catalog or price list after the sales closing date;
   (2) The time remaining in the crop year after insurance attaches and the additional amount of inventory reported, if you submit a revised PIVR to report an increase in inventory value for a basic unit; and
   (3) The time period for which insurance is provided under the Peak Inventory Endorsement.

(c) If your premium is prorated, premium will be charged for the entire month for any calendar month during which any amount of coverage is provided under these provisions or the Peak Inventory Endorsement.

(d) In lieu of section 7(a) of the Basic Provisions:
   (1) If you apply for insurance before April 1st, the annual premium is earned and payable at the time coverage begins. You will be billed for the premium and administrative fee not earlier than the premium billing date specified in the Special Provisions.

   (2) If you apply for insurance, or submit your PIVR or wholesale catalog or price list, on or after April 1st, the premium for the partial crop year will be due and must be paid at the time of application.

   (3) Failure to pay the premium at the time of application, or when you submit your PIVR or wholesale catalog or price list, will result in no insurance and no indemnity being owed for the crop year.

8. Insured Crop and Plants

In lieu of the provisions of sections 8 and 9 of the Basic Provisions, the crop insured will be all nursery plants and plant types in each practice, contained on the Eligible Price List, in which you have a share, that you elect to insure, and that:

(a) Are shown on the Eligible Plant List and meet all the requirements for insurability (plant types, species and cultivars not insurable under the eligible plant list may be insured by written agreement, subject to FCIC’s determination that the proper storage requirements and an accurate insurable price for the plant can be determined, and provided all other requirements, such as plant and container size, are met);

(b) Are determined by us to be acceptable;

(c) Are grown in a county for which a premium rate is provided in the actuarial documents;

(d) Are grown in a nursery inspected by us and determined to be acceptable;

(e) Are irrigated unless otherwise provided by the Special Provisions (You must have adequate irrigation equipment and water to irrigate all insurable nursery plants at the time coverage begins and throughout the insurance period);

(f) Are grown in accordance with the production practices for which premium rates have been established;

(g) Are grown in an appropriate medium;

(h) Are not grown for sale as Christmas trees;

(i) Are not stock plants or plants being grown solely for harvest of buds, flowers, or greenery;

(j) May produce edible fruits or nuts provided the plants are made available for sale (Harvest of the edible fruit or nuts does not affect insurability); and

(k) Are not produced in nursery containers that contain two or more different genera, species, subspecies, varieties or cultivars.

9. Insurance Period

(a) In lieu of section 11 of the Basic Provisions:

   (1) For the year of application, if you apply for coverage:

   (i) On or before August 31, 2005, for the 2006 crop year, coverage begins on October 1, 2005,
Federal Crop Insurance Corporation, USDA

§ 457.162

10. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided for unavoidable damage caused only by the following causes of loss that occur within the insurance period:

1. Adverse weather conditions, except as specified in section 10(c) or the Special Provisions;
2. Fire, provided weeds and undergrowth in the vicinity of the plants or buildings on your insured site are controlled by chemical or mechanical means;
3. Wildlife;
4. Earthquake; or
5. Volcanic eruption.

(b) Insurance is also provided against the following if due to a cause of loss specified in section 10(a) that occurs within the insurance period:

1. A loss in plant values because of an inability to market such plants, provided such plants would have been marketed during the crop year (e.g. poinsettias that are not marketed during their usual and recognized marketing period of November 1st through December 25th);
2. Failure of the irrigation water supply; or
3. Failure of, or reduction in, the power supply.

(c) In addition to the causes of loss excluded in sections 12(a) and (c) through (f) of the Basic Provisions, we do not insure against any loss caused by:

1. Disease or insect infestation, unless:
   (i) A disease or insect infestation occurs for which no effective control measure exists; or
   (ii) Coverage is specifically provided by the Special Provisions.
2. The inability to market the nursery plants as a result of:
   (i) The refusal of a buyer to accept production;
   (ii) Boycott; or
   (iii) An order from a public official prohibiting sales including, but not limited to, a stop sales order, quarantine, or phytosanitary restriction on sales;
3. Cold temperatures, if cold protection is required in the eligible plant list, unless:
   (i) You have installed adequate cold protection equipment or facilities and there is a failure or breakdown of the cold protection equipment or facilities resulting from an insurable cause of loss specified in section 10(a) and the insured plants must be damaged by cold temperatures and the damage must occur within 72 hours of the failure of such equipment or facilities unless we establish that repair or replacement was not possible between the time of failure or breakdown and the time the damaging temperatures occurred; or
   (ii) The lowest temperature or its duration exceeded the ability of the required cold protection equipment to keep the insured plants from sustaining cold damage;
4. Collapse or failure of buildings or structures, unless the damage to the building or structures results from a cause of loss specified in section 10(a);
5. Any cause of loss, including those specified in section 10(a), if the only damage suffered is a failure of plants to grow to an expected size; or
6. In lieu of section 12(b) of the Basic Provisions, failure to follow recognized good nursery practices.

11. Duties in the Event of Damage or Loss

(a) In addition to your duties contained in section 14 of the Basic Provisions, you must:

(1) Obtain our written consent prior to:
   (i) Destroying, selling or otherwise disposing of any plant inventory that is damaged; or
   (ii) Changing or discontinuing your normal growing practices with respect to care and maintenance of the insured plants.

(2) Submit a claim for indemnity to us on our form, not later than 60 days after the date of your loss, but in no event later than 60 days after the end of the insurance period. This requirement will be waived by us if the final adjustment of your claim is totally or partially deferred because we are unable to make an accurate determination.
§ 457.162

7 CFR Ch. IV (1-1-14 Edition)

of the amount of damage to the insured plants. If within the time frame specified we notify you that we are unable to make an accurate determination of damage on all or some of your damaged plants:

(i) For those damaged plants on which the loss adjustment and claim have not been deferred, you must submit a partial claim within the time frame specified in section 11(a)(2) and we will settle your claim on such plants;

(ii) For those damaged plants on which the loss adjustment and claim have been deferred, we will determine the amount of damage at the earliest possible date but no later than one year after the end of the insurance period for the crop year in which the damage occurred; and

(iii) You must maintain the identity of the plants on which loss adjustment is deferred throughout the deferral period.

(b) Failure to obtain our written consent as required by section 11(a)(1) will result in the denial of your claim.

12. Settlement of Claim

We will determine indemnities for any unit as follows:

(a) Determine the under-report factor for the basic unit;

(b) Determine the occurrence deductible;

(c) Subtract field market value B from field market value A;

(d) Multiply the result of 12(c) by the under-report factor;

(e) Subtract the occurrence deductible from the result in section 12(d); and

(f) If the result of section 12(e) is greater than zero, and subject to the limit of section 12(e):

(1) You demonstrate your physical inability to have applied timely; and

(2) After physical examination of the nursery plant inventory, we determine the inventory will be marketable at the value shown on the PIVR.

15. Examples

Single Unit Example

Assume you have a 100 percent share and the plant inventory value reported by you is $100,000, and your coverage level is 75 percent. Your amount of insurance is $75,000 ($100,000 x .75). At the time of loss, field market value A is $125,000, and field market value B is $80,000. The under-report factor is .80 ($100,000 divided by $125,000). The deductible percentage is 25 percent (100 - 75), the crop year deductible is $25,000 (.25 x $100,000) and the occurrence deductible is $25,000 (.25 x $125,000 x .80). Your indemnity would be calculated as follows:

Step (1) Determine the under-report factor

$100,000 / $125,000 = .80;

Step (2) Field market value A minus field market value B

$125,000 - $80,000 = $45,000;

Step (3) The result of step (2) multiplied by the result of step (1)

$45,000 x .80 = $36,000;

Step (4) The result of step (3) minus the occurrence deductible

$36,000 - $25,000 = $11,000;

Step (5) Result of step (4) multiplied by your share $11,000 x 1.000 = $11,000 indemnity payment.

Peak Inventory Value Report Example

Assume you have a second loss on the same basic unit. Your amount of insurance has been reduced by subtracting your previous indemnity payment of $11,000 from your amount of insurance ($75,000 - $11,000 = $64,000). Your crop year deductible has been reduced to zero by the previous loss ($25,000 - $36,000, but not less than zero). You purchase a Peak Inventory Endorsement and report $60,000 in inventory. Your peak amount of insurance is your reported inventory times your coverage level ($60,000 x .75 = $45,000). The combined amount of insurance for the coverage term of the peak endorsement is $64,000 + $45,000 = $109,000. Your crop year deductible is increased by $15,000 ($60,000 x .25). At the time of loss, field market value A is $124,000, and field market value B is $58,000. The under-report factor is
Federal Crop Insurance Corporation, USDA

§ 457.163 Nursery peak inventory endorsement.

Nursery Crop Insurance

Peak Inventory Endorsement

This endorsement is not continuous and must be purchased for each crop year to be effective for that crop year.

In return for payment of premium for the coverage contained herein, this endorsement will be attached to and made part of the Nursery Crop Insurance Provisions, subject to the terms and conditions described herein.

1. Definitions

Coverage commencement date. The later of the date you declare as the beginning of the coverage or 30 days after a properly completed Peak Inventory Value Report is received by us.

Coverage term. A period of time that begins on the coverage commencement date and ends on the coverage termination date.

Coverage termination date. The date you declare that the peak amount of insurance will cease. This date cannot be after the end of the crop year.

Peak amount of insurance. The additional inventory value reported on the Peak Inventory Value Report for each basic unit multiplied by your coverage level and by your share.

Peak Inventory Value Report. A report that increases the value of insurable plants over the value reported on the PIVR, declares the coverage commencement and coverage termination dates, and the other requirements of section 6 of the Nursery Crop Insurance Provisions.

Peak inventory premium adjustment factor. A factor calculated by subtracting the monthly proration factor for the month following the month containing the coverage termination date from the proration factor for the month in which coverage commenced. Peak Inventory Endorsements with a coverage termination date during the month of May will have a premium adjustment factor equal to the proration factor for the month containing the coverage commencement date.

Restock. Replacement of lost or damaged plants that increase the value of your insurable inventory to an amount greater than your remaining amount of insurance.

2. Eligibility

(a) You must have insurance under the Nursery Crop Insurance Provision in effect for the crop year that this endorsement applies;

(b) You must have elected an additional level of coverage.

(c) You must submit a Peak Inventory Value Report, which will serve as the application for coverage under this endorsement.

(1) The Peak Inventory Value Report may contain one or more plant type basic units and each plant type basic unit will be considered a separate Peak Inventory Endorsement.

(2) We may reject the Peak Inventory Value Report if all requirements in this endorsement and the Nursery Crop Insurance Provisions are not met.

(d) You may purchase no more than one Peak Inventory Endorsement for each basic unit during the crop year unless you have suffered insured losses and have restocked your nursery, in which case an additional Peak Inventory Endorsement may be purchased after each insured loss.

3. Coverage

(a) The amount of insurance provided under the Nursery Crop Provisions for each basic unit is increased by the peak amount of insurance, $64,000 - ($51,000 - 45,000) = $64,000 - $6,000 = $58,000.

§ 457.164 Nursery rehabilitation endorsement.

NURSERY CROP INSURANCE REHABILITATION ENDORSEMENT

If you elect this endorsement and pay the additional premium designated in the actuarial documents, this endorsement is attached to and made a part of your Nursery Crop Insurance Provisions subject to the terms and conditions herein. In the event of a conflict between the Nursery Crop Insurance Provisions and this endorsement, this endorsement will control.

1. Eligibility

(a) You must have purchased additional coverage under the Nursery Crop Insurance Provisions, and you must comply with all terms and conditions contained in the applicable Nursery Crop Insurance Provisions and endorsements.

(b) All field grown nursery plants insured under the Nursery Crop Insurance Provisions must be insured under this endorsement. Nursery plants produced in standard nursery containers are not covered under this endorsement.

(c) You must elect this endorsement:

(1) At the time of application for the initial crop year your field grown nursery plants will be insured under the Nursery Crop Insurance Provisions; or

(2) By October 1, 2005, for the 2006 crop year and by the sales closing date for each subsequent crop year if your field grown plants are already insured under the Nursery Crop Insurance Provisions.

2. Coverage

(a) This endorsement is only applicable to field grown plants damaged by an insured cause of loss specified in section 10 of the Nursery Crop Insurance Provisions.

(b) Rehabilitation costs paid under this endorsement are limited to expenditures for labor and materials for pruning and setup (righting, propping, and staking).

(c) To be eligible for a rehabilitation payment:

(1) The damaged plants must have a reasonable expectation of recovery based on:

(i) The type of damage (e.g., broken limbs from high winds, trees uprooted by hurricane, etc.);

(ii) The extent of damage (e.g., twenty percent of the limbs broken, half the canopy removed, etc.); and

(iii) Whether the plant can recover to the point it is marketable;

(2) Verifiable records must be provided showing actual expenditures for rehabilitation and such expenditures must be reasonable and customary for the type and extent of damage sustained by the plants;

(3) Rehabilitation procedures must be performed directly following the occurrence of damage and before additional deterioration of the damaged plants occurs;

(4) We must determine it is practical to rehabilitate the damaged plants (It is not practical if the costs of rehabilitation are greater than the value of the plant); and

(5) The total actual rehabilitation costs for each loss occurrence on the basic unit must be at least the lesser of 2.0 percent of field market value A or $5,000.

(d) The maximum amount of each rehabilitation payment for each basic unit will be the lesser of:

(1) Your total actual rehabilitation costs multiplied by the under-report factor contained in the Nursery Crop Insurance Provisions; or

(2) An amount equal to 7.5 percent of the value (based on insurable plant prices determined in accordance with section 6 of the Nursery Crop Insurance Provisions) of all your insurable field grown plants that were rehabilitated subsequent to an insured cause of loss, multiplied by the under-report factor described in the Nursery Crop Insurance Provisions, multiplied by the coverage level percentage you elect, and multiplied by your share. Insurable, rehabilitated plants that

Example of Peak Inventory Endorsement Total Premium Calculation

Assume a grower reports a peak amount of insurance on a basic unit of $100,000 with a 65 percent coverage level and a share of 1.00.

The base premium rate is $0.051. The proration factors for the Peak Inventory Endorsement are 0.68 for the month that coverage commenced and 0.52 for the month following the month containing the coverage termination date, as stated in the actuarial documents. The peak premium adjustment factor is 0.16 (0.68 - 0.52). The total premium amount for the Peak Inventory Endorsement is $350.40 ($100,000 x 0.65 x 1.000 x $0.051 x 0.16).

(b) The premium for this endorsement is due and payable in accordance with section 7 of the Nursery Crop Insurance Provisions.
§ 457.165 Millet crop insurance provisions.

The millet crop insurance provisions for 2008 and succeeding crop years are as follows:

FCIC policies:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured policies:

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Millet Crop Insurance Provisions

1. Definitions

Bushel. Fifty pounds of millet, or any other quantity which is designated in the Special Provisions for that purpose.

Harvest. Combining or threshing the millet for grain. A crop that is swathed prior to combining is not considered harvested.

Late planting period. In lieu of the definition contained in the Basic Provisions, the period that begins the day after the final planting date for the insured crop and ends 20 days after the final planting date.

Local market price. The cash price for millet with a 50-pound test weight adjusted to zero percent foreign material content basis offered by buyers in the area in which you normally market the millet. Factors not associated with grading, including, but not limited to, moisture content, will not be considered.

Millet. Proso millet produced for grain to be used primarily as bird and livestock feed.

Nurse crop (companion crop). A crop planted into the same acreage as another crop, that is intended to be harvested separately, and that is planted to improve growing conditions for the crop with which it is grown.

Planted acreage. In addition to the definition contained in the Basic Provisions, land on which seed is initially spread onto the soil surface by any method and is subsequently mechanically incorporated into the soil in a timely manner and at the proper depth. Acreage planted in any manner not contained in this definition will not be insurable unless otherwise provided by the Special Provisions.

Swathed. Severance of the stem and grain head from the ground without removal of the seed from the head and placing into a row.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions, you may select only one price election for all the millet in the county insured under this policy.

3. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

4. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

5. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the millet in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;
(b) That is planted for harvest as grain;
(c) That is not planted as a nurse crop; and
(d) That is not (unless allowed by Special Provisions or written agreement):
   (1) Interplanted with another crop; or
   (2) Planted into an established grass or legume.

6. Insurable Acreage

In addition to section 9 of the Basic Provisions, any acreage of the insured crop damaged before the final planting date, to the extent that a majority of producers in the area would not normally further care for the crop, must be replanted unless we agree that it is not practical to replant.

7. Insurance Period

In accordance with section 11 of the Basic Provisions, the calendar date for the end of
§ 457.165

the insurance period is the date immediately following planting (unless otherwise specified in the Special Provisions) as follows:

(a) October 10 for North Dakota, South Dakota, and Wyoming; and
(b) October 31 for all other states.

8. Causes of Loss

In accordance with section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur within the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of the irrigation water supply due to a cause of loss specified in sections 8(a) through (g) that also occurs during the insurance period.

9. Duties In the Event of Damage or Loss

In accordance with section 14 of the Basic Provisions, the representative samples of the unharvested crop must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be harvested or destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed.

(b) In the event of loss or damage covered by this policy, we will settle your claim on any unit by:

(1) Multiplying the insured acreage by the production guarantee;
(2) Subtracting the total production to count (See section 10(c)) from the result of section 10(b)(1);
(3) Multiplying the result of section 10(b)(2) by your price election; and
(4) Multiplying the result of section 10(b)(3) by your share.

For example:

You have a 100 percent share in 100 acres of millet in the unit, with a guarantee of 15 bushels per acre and a price election of $4.00 per bushel. You are only able to harvest 800 bushels. Your indemnity would be calculated as follows:

(1) 100 acres x 15 bushel = 1,500 bushel guarantee;
(2) 1,500 bushel guarantee - 800 bushel production to count = 700 bushel loss;
(3) 700 bushels x $4.00 price election = $2,800 loss; and
(4) $2,800 x 100 percent share = $2,800 indemnity payment.

(c) The total production (bushels) to count from all insurable acreage on the unit will include:

(1) All appraised production as follows:
   (i) Your appraised production will not be less than the production guarantee for acreage:
      (A) That is abandoned;
      (B) Put to another use without our consent;
      (C) Damaged solely by uninsured causes; or
      (D) For which you fail to provide records of production that are acceptable to us;
   (ii) Production lost due to uninsured causes;
   (iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with subsection 10(d));
   (iv) Potential production on insured acreage you want to put to another use or you wish to abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end if you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
      (A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us. (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
      (B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
   (2) All harvested production from the insurable acreage.

(d) Mature millet may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(1) Production will be reduced by .12 percent for each .1 percent point of moisture in
excess of 12 percent. We may obtain samples of the production to determine the moisture content.

(2) Production will be eligible for quality adjustment if:

(i) Deficiencies in quality, result in the millet weighing less than 50 pounds per bushel;

or

(ii) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(3) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions result from a cause of loss against which insurance is provided under these crop provisions and within the insurance period;

(ii) The deficiencies, substances, or conditions result in a net price for the damaged production that is less than the local market price;

(iii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us; and

(iv) The samples are analyzed by a grader or by a laboratory approved by us with regard to substances or conditions injurious to human or animal health (test weight for quality adjustment purposes may be determined by our loss adjuster).

(4) Millet production that is eligible for quality adjustment, as specified in sections 10(d)(2) and (3), will be reduced by the quality adjustment factor contained in the Special Provisions if quality adjustment factors are not available in the county, the eligible millet production will be reduced as follows:

(i) The market price of the qualifying damaged production and the local market price will be determined on the earlier of the date such quality adjusted production is sold or the date of final inspection for the unit.

(ii) The price for the qualifying damaged production will be the market price for the local area to the extent feasible. Discounts used to establish the net price of the damaged production will be limited to those that are usual, customary, and reasonable. The price will not be reduced for:

(A) Moisture content;

(B) Damage due to uninsured causes; or

(C) Drying, handling, processing, or any other costs associated with normal harvesting, handling, and marketing of the millet; except, if the value of the damaged production can be increased by conditioning, we may reduce the value of the production after it has been conditioned by the cost of conditioning but not lower than the value of the production before conditioning. We may obtain prices from any buyer of our choice. If we obtain prices from one or more buyers located outside your local market area, we will reduce such prices by the additional costs required to deliver the millet to those buyers.

(iii) The value of the damaged or conditioned production determined in section 10(d)(4)(ii) will be divided by the local market price to determine the quality adjustment factor.

(iv) The number of bushels remaining after any reduction due to excessive moisture (the moisture-adjusted gross bushels, if appropriate) of the damaged or conditioned production under section 10(d)(1) will then be multiplied by the quality adjustment factor from section 10(d)(4)(iii) to determine the production to count.

(e) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on a weight basis.

11. Late Planting

In lieu of the provisions contained in section 16(a) of the Basic Provisions, the production guarantee for each acre planted to the insured crop during the late planting period, unless otherwise specified in the Special Provisions, will be reduced by:

(a) One percent per day for the first through the tenth day; and

(b) Three percent per day for the eleventh through the twentieth day.

12. Prevented Planting

Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.166 Blueberry crop insurance provisions.

The Blueberry Crop Insurance Provisions for the 2005 and succeeding crop years are as follows:

FCIC policies:

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured policies

(Proper title for insurance provider)

Both FCIC and reinsured policies:

Blueberry Crop Insurance Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1)
§ 457.166 7 CFR Ch. IV (1-1-14 Edition)

The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Damaged blueberries. Blueberries ready to harvest that due to an insurable cause of loss as shown in section 8 of these Crop Provisions do not meet the United States Standards for Grades of Blueberries, U.S. No. 1, or such other applicable grading standards specified in the Special Provisions.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, or permitting the general public to enter the field for the purpose of picking the crop.

Harvest. Picking mature blueberries from the bushes either by hand or machine.

Mature blueberry production. Blueberries ready to harvest that meet or exceed the United States Standards for Grades of Blueberries, U.S. No. 1, or such other applicable grading standards contained in the Special Provisions.

Pound. Sixteen ounces avoirdupois.

Production guarantee (per acre). The number of pounds determined by multiplying the approved yield per acre by the coverage level percentage you elect.

Prune. A cultural practice performed to increase blueberry production as follows:

(a) For lowbush blueberries, a process by which the acreage is either burned or mowed; and

(b) For all other blueberries, a process by which parts of the bush are cut off or the bush is cut back.

2. Unit Division

The enterprise, whole-farm, and optional unit provisions in the Basic Provisions are not applicable, and blueberry acreage is limited to basic units as defined in section 1 of the Basic Provisions, unless otherwise specified in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one price election percentage for each blueberry type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(b) You must report (by type, if applicable) by the production reporting date designated in section 3 of the Basic Provisions:

(1) For all types of blueberries: any damage; removal of bushes; change in practices; or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based; and the number of affected acres; and

(2) For highbush and rabbiteye blueberry types:

(i) The number of bearing bushes on insurable and uninsurable acreage; and

(ii) The age of the bushes and the planting pattern.

(c) We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the following: Removal of bushes; damage to bushes; changes in practices; and any other circumstance that may affect the yield potential of the insured crop. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee as necessary at any time we become aware of the circumstance.

(d) You may not increase your elected or assigned coverage level or the ratio of your price election to the maximum price election we offer for the next year if a cause of loss that could or would reduce the yield of the insured crop is evident prior to the time you request the increase.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates

(a) In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are November 20.

(b) If your blueberry policy is canceled or terminated by us for any crop year, in accordance with the terms of the policy, after insurance attached for that crop year but on or before the cancellation and termination dates whichever is later, insurance will be considered to have not attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.

(c) We may not cancel your policy when an insured cause of loss has occurred after insurance attached, but prior to the cancellation date. However, your policy can be terminated if a cause for termination contained in sections 2 or 27 of the Basic Provisions exists.

6. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the blueberries in the county for which a
premium rate is provided in the actuarial documents:

(1) In which you have a share;
(2) That are grown on bush varieties that:
   (i) Are varieties adapted to the area of the following types:
       (A) Highbush blueberries;
       (B) Lowbush blueberries;
       (C) Rabbiteye blueberries; or
       (D) Other blueberry types listed on the Special Provisions.
   (3) That are produced on bushes that have reached the minimum insurable age or have produced the minimum yield per acre designated in the Special Provisions; and
   (4) That, if inspected, are considered acceptable by us.
   (b) Lowbush blueberry plants (or other types as specified in the Special Provisions) must be pruned every other year to be eligible for insurance.

7. Insurance Period

(a) In accordance with the provisions of section 11 of the Basic Provisions:
   (1) For the year of application, coverage begins on November 21 of the calendar year prior to the year the insured crop normally blooms, except that, if your application is received by us after November 1, insurance will attach on the twentieth day after your properly completed application is received in our local office unless we inspect the acreage during the 20-day period and determine that it does not meet insurability requirements. You must provide any information that we require for the crop or to determine the condition of the blueberry acreage.
   (2) For each subsequent crop year that the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring an existing policy to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.
   (3) The calendar date for the end of insurance period for each crop year is September 30 for Michigan and September 15 for all other states, unless specified otherwise in the Special Provisions.
   (4) Notwithstanding the provisions in this section, coverage may not begin for a crop year if the policy is cancelled or terminated in accordance with section 5(b).
   (b) In addition to the provisions of section 11 of the Basic Provisions:
      (1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period. There will be no coverage of any insurable interest acquired after the acreage reporting date.
      (2) If you relinquish your insurable share on any insurable acreage of blueberries on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:
         (i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;
         (ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and
         (iii) The transferee is eligible for crop insurance.
      (3) If you relinquish your insurable share on any insurable acreage of blueberries after the acreage reporting date for the crop year, insurance coverage will be provided for any loss due to an insurable cause of loss that occurred prior to the date that you relinquished your insurable share and the whole premium will be due for such acreage for that crop.

8. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:
   (1) Adverse weather conditions;
   (2) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the unit;
   (3) Insects, but not damage due to insufficient or improper application of pest control measures;
   (4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
   (5) Earthquake;
   (6) Volcanic eruption;
   (7) An insufficient number of chilling hours to effectively break dormancy;
   (8) Wildlife, unless appropriate control measures have not been taken; and
   (9) Failure of the irrigation water supply, if caused by a cause of loss specified in this section that occurs during the insurance period.
   (b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to:
      (1) Failure to install and maintain a proper drainage system;
      (2) Failure to harvest in a timely manner;
      (3) Inability to market the blueberries for any reason other than actual physical damage to the blueberries from an insurable cause specified in this section (for example,
§ 457.166  

we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production; or  

(4) Mechanical damage.  

9. Duties in the Event of Damage or Loss  

In addition to the requirements of section 14 of the Basic Provisions, the following will apply:  

(a) You must notify us:  

(1) Within 3 days of the date harvest should have started if the crop will not be harvested.  

(2) Within 24 hours if any cause of loss occurs:  

(i) Within 15 days of harvest;  

(ii) When the blueberries are mature and ready for harvest; or  

(iii) During harvest.  

(3) At least 15 days before any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine your production to count sold by direct marketing. If damage occurs after this appraisal, we will conduct an additional appraisal. These appraisals and acceptable records provided by you will be used to determine your production to count. Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production to count that is not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.  

(4) At least 15 days prior to the beginning of harvest if you intend to claim an indemnity on any unit as a result of previously reported damage, so that we may inspect the damaged production.  

(b) You must not sell or dispose of the damaged crop until after we have given you written consent to do so. If you fail to meet the requirements of this section, and such failure results in our inability to inspect the damaged production, all such production will be considered undamaged and included as production to count.  

(c) You may be required to harvest a sample, selected by us, to be used for appraisal purposes.  

10. Settlement of Claim  

(a) We will determine your loss on a unit basis. In the event you are unable to provide acceptable production records for any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.  

(b) In the event of loss or damage covered by this policy, we will settle your claim by:  

(1) Multiplying the insured acreage for each type, if applicable, by its respective production guarantee;  

(2) Multiplying each result in section 10(b)(1) by the respective price election, by type if applicable;  

(3) Totaling the results in section 10(b)(2) if there is more than one type;  

(4) Multiplying the total production to count for each blueberry type, if applicable, by the respective price election;  

(5) Totaling the results in section 10(b)(4), if there is more than one type;  

(6) Subtracting the result in section 10(b)(5) from the result in section 10(b)(3); and  

(7) Multiplying the result in section 10(b)(6) by your share.  

Example For Section 10(b)  

You have 100 percent share in 25 acres of highbush blueberries with a production guarantee of 4,000 pounds per acre and a price election of $0.45 per pound. You are only able to harvest 62,500 total pounds because adverse weather reduced the yield. Your indemnity would be calculated as follows:  

A. 25 acres x 4,000 pound production guarantee/acre = 100,000 pound total production guarantee;  

B. 100,000 pounds x $0.45 price election = $45,000 guarantee;  

C. One type only, so same as (2) above, $45,000;  

D. 62,500 pounds production to count x $0.45 price election = $28,125 value of production to count;  

E. One type only, so same as (4) above, $28,125;  

F. $45,000-$28,125 = $16,875 loss; and  

G. $16,875 x 100 percent share = $16,875 indemnity payment.  

End of Example  

(c) The total production to count (in pounds) from all insurable acreage on the unit will include:  

(1) All appraised blueberry production as follows:  

(i) Not less than the production guarantee per acre for acreage:  

(A) That is abandoned;  

(B) That is sold by direct marketing if you fail to meet the requirements contained in section 9;  

(C) That is damaged solely by uninsured causes; or  

(D) For which you fail to provide production records;  

(ii) Production lost due to uninsured causes; and  

(iii) Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us.
of further damage or that harvest is general in the area unless you harvest the crop, in which case we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count.

(2) All harvested mature blueberry production from the insurable acreage.

(d) If you have harvested or unharvested damaged blueberries and the percent of damaged blueberries exceeds that shown in the Special Provisions for that type, production to count for the damaged unit or portion of a unit will be determined as follows:

(1) The blueberries from the specific acreage will not be considered production to count if no blueberries are harvested and sold from such acreage;

(2) For damaged blueberries that are harvested and sold, the production to count for such damaged blueberries will be determined by:

(i) Subtracting the harvest costs contained in the Special Provisions from the price received for the damaged blueberries;

(ii) Dividing the result in section 10(d)(2)(i) by the blueberries purchased from the Special Provisions for that type, the production to count for the damaged unit or portion of a unit will be the appraised or harvested production of blueberries;

(e) If you have harvested or unharvested damaged blueberries and the percent of damaged blueberries does not exceed that shown in the Special Provisions for that type, the production to count for the damaged unit or portion of a unit will be the appraised or harvested production of blueberries.

(f) If we determine that frost protection equipment, as shown on your accepted application, was not properly utilized, the indemnity for the affected acreage in the unit will be reduced by the percentage reduction allowed for frost protection equipment as specified in the Special Provisions. You must, at our request, provide us records by date for each period the frost protection equipment was used.

11. Late and Prevented Planting

The late and prevented planting provisions in the Basic Provisions are not applicable.

[69 FR 52155, Aug. 25, 2004]

§ 457.167 Pecan revenue crop insurance provisions.

The Pecan Revenue Crop Insurance Provisions for the 2014 and succeeding crop years are as follows:

FCIC policies:

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured policies: (Appropriate title for insurance provider)

Both FCIC and reinsured policies: Pecan Revenue Crop Insurance Provisions

1. Definitions

AMS. The Agricultural Marketing Service of the United States Department of Agriculture.

Amount of insurance per acre. The amount determined by multiplying your approved average revenue per acre by the coverage level percentage you elect.

Approved average revenue per acre. The total of your average gross sales per acre based on the most recent consecutive four years of sales records building to six years and dividing that result by the number of years of average gross sales per acre. If you provide more than four years of sales records, they must be the most recent consecutive six years of sales records. If you do not provide at least four years of gross sales records, your approved average revenue will be:

(1) The average of the two most recent consecutive years of your gross sales per acre and two years of the T-revenue; or

(2) If you do not provide any gross sales records, the T-revenue.

Average gross sales per acre. Your gross sales of pecans for a crop year divided by your net acres of pecans grown during that crop year. For example, if for the crop year your gross sales were $100,000 and your net acres of pecans were 100, then your average gross sales per acre for the crop year would be $1,000.

Crop year. The period beginning February 1 of the calendar year in which the pecan trees bloom and extending through January 31 of the year following such bloom, and will be designated by the calendar year in which the pecan trees bloom.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shelter, shipper, buyer or broker. Examples of direct marketing include selling through an on-farm or roadside stand, or a farmer’s market, or permitting the general public to enter the field for the purpose of harvesting all or a portion of the crop, or shelling and packing your own pecans.

Gross sales. Total value of in-shell pecans grown in a crop year.

Harvest. Collecting mature pecans from the orchard.

Hedge. The removal of vegetative growth from the tree to prevent overcrowding of pecan trees.

In-shell pecans. Pecans as they are removed from the orchard with the nut-meats in the shell.
Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Market price. The market price is:

1. The average of the AMS prices for the nearest location for similar quality, quantity, and variety of in-shell pecans published during the week you sell any of your pecans, you harvest your pecans if they are not sold, or your pecans are appraised if you are not harvesting them, unless otherwise provided in the Special Provisions. For example, if you harvest production on November 14 but do not sell the production, the average of the AMS prices for the week containing November 14 will be used to determine the market price for the production harvested on November 14; or

2. If AMS prices are not published for the week, the average price per pound for in-shell pecans of the same variety or varieties insured offered by buyers on the day you sell any of your pecans, you harvest any of your pecans if they are not sold, or your pecans are appraised if you are not harvesting them, in the area in which you normally market the pecans (if buyers are not available in your immediate area, we will use the average in-shell price per pound offered by buyers nearest to your area).

Net acres. The insured acreage of pecans multiplied by your share.

Pound. A unit of weight equal to sixteen ounces avoirdupois of in-shell pecans.

Scion—Twig or portion of a pecan variety used in top work.

Sequentially thinned. A method of systematically removing pecan trees for the purpose of improving sunlight penetration and maintaining the proper spacing necessary for continuous production.

Top work. To graft scions of one pecan variety onto the tree or branch of another pecan variety.

Transitional revenue (T-revenue). A value determined by FICIC and published in the actuarial documents.

Two-year coverage module. A two-crop-year subset of a continuous policy in which you agree to insure the crop for both years of the module, and we agree to offer the same premium rate, amount of insurance per acre, coverage level, terms and conditions of insurance for each year of coverage except for legislatively mandated changes, as long as all policy terms and conditions are met for each year of the coverage module, including the timely payment of premium, and you have not done anything that would result in a revision to these terms, as specified in this policy.

2. Unit Division.

Except as provided in these Crop Provisions, for both years of the two-year coverage module a unit will be:

(a) In addition to the requirements of section 3(k)(4) of the Basic Provisions, an enterprise unit if the insured crop is located on at least two parcels of non-contiguous land and at least two of the parcels must contain at least the lesser of 20 acres or 20 percent of the insured crop acreage in the enterprise unit;

(b) A basic unit as defined in section 1 of the Basic Provisions; or

(c) In lieu of the requirements contained in sections 3(k)(b) and (c) of the Basic Provisions, basic units may be divided into optional units if, for each optional unit, the following criteria are met:

1. Each optional unit you select must be located on non-contiguous land;

2. Separate records of production are provided for at least the most recent consecutive two crop years. The records will be used to verify that trees from each unit meet the minimum production requirement contained in section 8(d) and to establish the approved average revenue per acre for the optional units selected; and

3. Optional units are selected and identified on the acreage report by the acreage reporting date of the first year of the two-year coverage module. Units will be determined when the acreage is reported, but may be adjusted or combined to reflect the actual unit structure when adjusting a loss. No further unit division may be made after the acreage reporting date for any reason.

3. Insurance Guarantees and Coverage Levels for Determining Indemnities

In lieu of section 3 of the Basic Provisions, the following applies:

(a) You may select only one coverage level for both years of the two-year coverage module for all pecans in the county. By giving us written notice, you may change the coverage level for the preceding two-year coverage module not later than the sales closing date of the next two-year coverage module.

(b) For coverage in excess of catastrophic risk protection, your insurance guarantee for the unit will be determined by multiplying your amount of insurance per acre by the net acres.

(c) For coverage under the Catastrophic Risk Protection Endorsement, your insurance guarantee for each unit equals your approved average revenue per acre multiplied by the percentage listed in the Special Provisions and multiplied by the net acres.

(d) Your amount of insurance per acre will remain the same as stated in the Summary of Coverage on each unit for each year of the two-year coverage module unless:

1. You fail to provide acceptable records necessary to determine a loss for optional units. This will result in optional units being adjusted or combined to reflect the actual unit structure at the time of discovery. Your
Federal Crop Insurance Corporation, USDA § 457.167

(amount of insurance per acre will be recal-
culated for the current crop year and the
subsequent crop year of the two-year cov-
erage module (provided another year re-
mains to be included in the two-year cov-
erage module).
(2) You increase the previous year’s in-
sured acreage by more than 12.5 percent,
which will result in the recalculation of your
approved average revenue using the sales
records for the added acreage. If such sales
records are not available for the added acre-
age, the T-revenue will apply to the added
acreage.
(3) You take any other action that may re-
duce your gross sales below your approved
average revenue, which will result in an ad-
justment to your approved average revenue
conform to the amount of the reduction in
gross sales expected from the action.
(4) Your gross sales amount is assigned in
accordance with section 3(f).
(e) If you remove a contiguous block of
trees from the unit, you must report such re-
move on your acreage report in accordance
with section 6, or within 3 days if removal
has occurred after the acreage reporting
date, and your insurable acreage will be re-
duced by the number of acres of trees that
have been removed.
(f) You must report for each unit your
gross sales including the amount of har-
vested and appraised potential production to
us for each year of the two-year coverage
module on or before the acreage reporting
date for the first year of the next two-year
coverage module.
(1) If you do not report your gross sales in
accordance with this paragraph, we will as-
sign a gross sales amount for any year you
fail to report and you will not be eligible for
optional units for both years of the two-year
coverage module. The gross sales amount
assigned by us will be not greater than the T-
revenue for the current coverage module.
(2) If your gross sales are reported after the
acreage reporting date for the two-year cov-
erage module, we will readjust your average
gross sales per acre for the next crop year.
(3) The gross sales or your assigned gross
sales amount will be used to compute your
sales history for the next two-year coverage
module.
(4) If you filed a claim for any year, the
value of harvested production and appraised
potential production used to determine your
indemnity payment will be the gross sales
for that year.
(g) Hail and fire coverage may be excluded
from the covered causes of loss for your in-
sured crop only if you selected additional
coverage of not less than 65 percent of your
approved average revenue per acre, and you
have purchased the same or a higher dollar
amount of coverage for hail and fire from us
or any other source.
(h) If you have additional coverage for pe-
cans in the county and the acreage has been
designated as “high-risk” by FCIC, you will
be able to obtain a High-Risk Land Exclu-
sion Option for the high-risk land under the
additional coverage policy and insure the
high-risk acreage under a separate Cata-
Strophic Risk Protection Endorsement, pro-
vided that the Catastrophic Risk Protection
Endorsement is obtained from the same in-
surance provider from which the additional
coverage was obtained.
(i) Any person may sign any document re-
lated to pecan crop insurance coverage on
behalf of any other person covered by this
policy provided that person has a properly
executed power of attorney or such other le-
gally sufficient document authorizing such
person to sign.

4. Contract Changes

In lieu of the provisions contained in sec-
tion 4 of the Basic Provisions:
(a) We may change the terms of your cov-
erage under this policy for any two-year cov-
erage module. Any change to your policy
within a two-year coverage module may only
be done in accordance with this policy.
(b) Any changes in policy provisions,
amounts of insurance, premium rates, and
program dates (except as allowed herein or
as specified in section 3) can be viewed on
RMA’s Web site not later than the contract
change date contained in these Crop Provi-
sions. We may revise this information after
the contract change date to correct clerical
errors.
(c) The contract change date is October 31
preceding the next two-year coverage modu-
le.
(d) After the contract change date, all
changes specified in section 4(b) will also be
available upon request from your crop insur-
ance agent. You will be provided, in writing,
a copy of the changes to the Basic Provi-
sions, Crop Provisions, and a copy of the
Special Provisions. If changes are made that
will be effective for the second year of the
two-year coverage module, such copies will
be provided not later than 30 days prior to
the termination date. If changes are made
that will be effective for a subsequent two-
year coverage module, such copies will be
provided not later than 30 days prior to the
cancellation date. If available from us, you
may elect to receive these documents and
changes electronically. For changes effective
for subsequent two-year coverage modules,
acceptance of the changes will be conclu-
sively presumed in the absence of written no-
tice from you to change or cancel your insur-
ance coverage in accordance with the terms
of this policy.

5. Life of Policy, Cancellation and
Termination Dates

(a) In lieu of section 2(a) of the Basic Pro-
visions, this is a continuous policy with a
two-year coverage module and will remain in effect for each subsequent two-year coverage module until canceled by you in accordance with the terms of this policy or terminated by us or by the operation of the terms of this policy.

(b) In lieu of section 2(c) of the Basic Provisions, after acceptance of your application, you may not cancel or transfer your policy to a different insurance provider during the initial two-year coverage module. Thereafter, the policy will continue in force for each succeeding two-year coverage module unless canceled, terminated, or transferred to a different insurance provider in accordance with the terms of this policy.

(c) In lieu of section 2(d) of the Basic Provisions, this contract may be canceled by either you or us for the next two-year coverage module by giving written notice on or before the cancellation date.

(d) Your policy may be terminated before the end of the two-year coverage module if you are determined to be ineligible to participate in any crop insurance program authorized under the Act in accordance with section 2(e) of the Basic Provisions or 7 CFR part 400, subpart U.

(e) The cancellation date is January 31 of the second crop year of each two-year coverage module.

(f) The termination date is January 31 of each crop year.

6. Report of Acreage

(a) In addition to the requirements of section 6 of the Basic Provisions you must report, by the acreage reporting date designated in the Special Provisions:

(1) Any damage to trees, removal of trees, change in practices, sequential thinning, or any other action that may reduce the gross sales below the approved average revenue upon which the amount of insurance per acre is based and the number of affected acres;

(2) The number of bearing trees on insurable and uninsurable acreage;

(3) The age of the trees and the planting pattern;

(4) Any acreage that is excluded under sections 8 or 9; and

(5) Your gross sales receipts as required under section 3(f).

(b) We will reduce the amount of your insurable acreage based on our estimate of the removal of a contiguous block of trees or damage to trees of the insured crop. We will reduce your amount of insurance per acre based on our estimate of the expected reduction in gross sales from a change in practice or sequential thinning.

(c) If you fail to notify us of any circumstance stated in section 6(a)(1), we will reduce your insured acreage or your amount of insurance per acre to an amount to reflect the expected reduction of gross sales, as applicable, at any time we become aware of the circumstance.

7. Annual Premium and Administrative Fees

In addition to the requirements of section 7 of the Basic Provisions, the premium and administrative fees, as applicable, are due annually for each year of the two-year insurance period.

8. Insured Crop

In accordance with section 8 of the Basic Provisions, the crop insured will be all the pecans in the county for which a premium rate is provided by the actuarial documents:

(a) In which you have a share;

(b) That are grown for harvest as pecans;

(c) That are grown in an orchard that, if inspected, is considered acceptable by us;

(d) That are grown on trees that have produced at least 600 pounds of pecans in-shell per acre (or an amount provided in the Special Provisions) in at least one of the previous four crop years, unless we inspect and allow insurance by written agreement. This amount of production must be achieved subsequent to any top work that occurs within a unit;

(e) That are grown on varieties or a grouping of varieties within a unit that are not designated as uninsurable in the Special Provisions;

(f) That are in an orchard that consists of a minimum of one (1) contiguous acre, unless allowed by written agreement; and

(g) That are not (unless allowed by the Special Provisions or by written agreement):

(1) Grown on trees that are or have been hedged; or

(2) Direct marketed to consumers.

9. Insurable Acreage

In lieu of the provisions in section 9 of the Basic Provisions that prohibit insurance attaching to a crop planted with another crop, pecans interplanted with another perennial crop are insurable if allowed by the Special Provisions or by written agreement.

10. Insurance Period

(a) In accordance with the provisions of section II of the Basic Provisions:

(1) Coverage begins on February 1 of each crop year. However, for the year of application, we will inspect all pecan acreage and will notify you of the acceptance or rejection of your application not later than 30 days after the sales closing date. If we fail to notify you by that date, your application will be accepted unless other grounds exist to reject the application, as specified in section 2 of the Basic Provisions of the application. You must provide any information that we require for the crop or to determine the condition of the orchard.
(2) For each subsequent two-year coverage module that the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior two-year coverage module. Policy cancellation that results solely from transferring an existing policy to a different insurance provider for a subsequent two-year coverage module will not be considered a break in continuous coverage.

(3) The calendar date for the end of the insurance period is January 31 of the crop year.

(b) In addition to the provisions of section 11 of the Basic Provisions:

(1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period. Acreage acquired after the acreage reporting date will not be insured.

(2) If you relinquish your insurable share on any insurable acreage of pecans on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:

(i) A request for a transfer of right to an indemnity is submitted by all affected parties and approved by us;

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

(3) If you relinquish your insurable share on any insurable acreage of pecans after the acreage reporting date for the crop year, insurance coverage will be provided for any loss due to an insurable cause of loss that occurred prior to the date that you relinquished your insurable share and the whole premium will be due for such acreage for that crop year.

11. Causes of Loss

(a) In lieu of the first sentence of section 12 of the Basic Provisions, insurance is provided against an unavoidable decline in revenue due to the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions;

(2) Fire, unless weeds and other forms of undergrowth have not been controlled or unmulched pruning debris has not been removed from the orchard;

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption;

(8) Failure of the irrigation water supply, if caused by a cause of loss specified in sections 11(a)(1) through (7) that occurs during the insurance period; or

(9) Decline in market price;

(b) If damage occurs before the beginning of the crop year, coverage is only provided if and to the extent the crop was insured the previous crop year;

(c) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to the inability to market the pecans for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

12. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 of the Basic Provisions, the following will apply:

(a) You must notify us within 3 days of the date harvest should have started if the crop will not be harvested.

(b) If damage occurs before the beginning of the crop year, coverage is only provided if and to the extent the crop was insured the previous crop year;

(c) In addition to the causes of loss excluded in section 12 of the Basic Provisions, the following will apply:

(1) You must notify us at least 15 days prior to the beginning of harvest if any production from any unit will be sold by direct marketing. We will conduct an appraisal that will be used to determine your production to count for production that is sold by direct marketing. If damage occurs after this appraisal, we will conduct an additional appraisal. These appraisals, and any acceptable records provided by you, will be used to determine the dollar value of your production to count.

(d) You must not sell, destroy or dispose of the damaged crop until after we have given you written consent to do so.

(e) If you fail to meet the requirements of this section, and such failure results in our inability to inspect the damaged production, all such production will be considered undamaged and included as production to count.
§ 457.167

(f) You may be required to harvest a sample, selected by us, to be used for appraisal purposes.

13. Settlement of Claim

(a) Indemnities will be calculated separately for each year in the two-year coverage module.

(b) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable records for any:

(1) Optional unit, we will combine all optional units for which such records were not provided and this will be the unit structure of the current crop year and the subsequent crop year of the two-year coverage module (provided another year remains in the two-year coverage module); or

(2) Basic unit, we will allocate commingled production or revenue to each basic unit in proportion to our liability on the harvested acreage for each unit.

(c) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the amount of insurance per acre by the net acres of the insured pecans;

(2) Subtracting the dollar value of the total production to count as determined in section 13(d) from the result of section 13(c)(1);

(i) For additional coverage, the total dollar value of the total production to count determined in accordance with section 13(d); or

(ii) For catastrophic risk protection coverage, the result of multiplying the total dollar value of the total production to count determined in accordance with section 13(d) by the catastrophic risk protection factor contained in the Special Provisions; and

(d) The dollar value of the total production to count from all insurable acreage will include:

(1) The value of all appraised production as follows:

(A) That is abandoned;

(B) That is sold by direct marketing if you fail to meet the requirements contained in section 12;

(C) That is damaged solely by uninsured causes;

(D) For which no sales records or unacceptable sales records are provided to us;

(ii) Production lost due to uninsured causes;

(iii) Unharvested production;

(iv) Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurable period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the value of production to count; and

(v) The market price will be used to value all appraised production in section 13(d)(1); and

(2) The value of all harvested production from the insurable acreage determined as follows:

(i) The dollar amount obtained by multiplying the number of pounds of pecans sold by the price received for each day the pecans were sold. If the price received is not verifiable by sales receipts or if the pecan production was direct marketed, the market price will be used. Unless otherwise provided in the Special Provisions, and excluding pecans sold under contract, the price received will be not less than 95 percent of the lowest AMS price for the nearest location for similar quality, quantity, and variety of in-shell pecans published during the week you sell your pecans. If AMS prices are not published for the week the pecans were sold, the price received will be not less than 95 percent of the lowest price per pound for in-shell pecans of the same variety or varieties offered by buyers in the area you normally market the pecans or the area nearest to you if prices are not available in your immediate area on the day you sell your pecans.);

(ii) Totaling the results of section 13(d)(2)(i), as applicable;

(iii) The dollar amount obtained by multiplying the number of pounds of pecans harvested, but not sold production, by the market price;

(iv) Totaling the result of section 13(d)(2)(iii), as applicable; and

(v) Totaling the results of section 13(d)(2)(i) and (iv).

<table>
<thead>
<tr>
<th>PECAN REVENUE EXAMPLE</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Year</strong></td>
</tr>
<tr>
<td>4</td>
</tr>
<tr>
<td>3</td>
</tr>
<tr>
<td>2</td>
</tr>
<tr>
<td>1</td>
</tr>
<tr>
<td><strong>Total Average Gross Sales Per Acre = $2,675</strong></td>
</tr>
</tbody>
</table>

The approved average revenue equals the total average gross sales per acre divided by the number of years ($2,675 / 4 = $669).

The amount of insurance per acre equals the approved average revenue multiplied by the coverage level percent ($669 x .65 = $435).

Assume pecan trees in the unit experienced damage to blooms due to a late freeze causing low production. You produced, harvested,
and sold 300 pounds per acre of pecans from 70 acres and received an actual price of $0.75 per pound. On the other 30 acres, the pecans suffered damage due to drought. You elected not to harvest the other 30 acres of pecans. The 30 acres were appraised at 100 pounds per acre and on the day of the appraisal the average AMS price was $0.65. The total dollar value of production to count is (300 pounds of pecans x 70 net acres x $0.75) + (100 pounds x 30 net acres x $0.65) = $15,750 + $1,950 = $17,700.

The indemnity would be:

The amount of insurance per acre multiplied by the net acres minus the dollar value of the total production to count equals the dollar amount of indemnity ($435 x 100 = $43,500.00 - $17,700.00 = $25,800).

14. Late and Prevented Planting
The late and prevented planting provisions of the Basic Provisions are not applicable.

15. Substitution of Yields
The substitution of yield provisions of the Basic Provisions are not applicable.

16. Written Agreements
Notwithstanding the provisions of section 18 of the Basic Provisions, for counties with actuarial documents for pecans, you must have at least two years of production and gross sales records and for counties without actuarial documents, you must have at least four years of production and gross sales records to qualify for a written agreement.

§ 457.168 Mustard crop insurance provisions.

The Mustard Crop Insurance Provisions for the 2009 and succeeding crop years are as follows:

FCIC policies:

UNITED STATES DEPARTMENT OF AGRICULTURE
Federal Crop Insurance Corporation

Reinsured policies:

(Appropriate title for insurance provider)
Both FCIC and reinsured policies:
Mustard Crop Insurance Provisions.

1. Definitions

Base contract price. The price per pound (U.S. dollars) stipulated in the processor contract (without regard to discounts or incentives) that will be used to determine your price election.

Harvest. Combining or threshing for seed. A crop that is swathed prior to combining is not considered harvested.

Mustard. A crop of the family Cruciferae.

Planted acreage. In addition to the definition contained in the Basic Provisions, mustard seed must be planted in rows. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Processor. Any business enterprise regularly engaged in buying and processing mustard, that possesses all licenses and permits for processing mustard required by the State in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process contracted mustard within a reasonable amount of time after harvest.

Processor contract. A written agreement between the producer and a processor, containing at a minimum:

(a) The producer’s commitment to plant and grow mustard of the types specified in the Special Provisions and to deliver the production to the processor;
(b) The processor’s commitment to purchase all the production stated in the processor contract; and
(c) A base contract price (U.S. dollars).

Salvage price. The cash price per pound (U.S. dollars) for mustard qualifying for quality adjustment in accordance with section 13 of these Crop Provisions.

Swathed. Severance of the stem and seed pods from the ground and placing into windrows without removal of the seed from the pod.

Type. A category of mustard identified as a type in the Special Provisions.

Windrow. Mustard that is swathed and placed in a row.

2. Unit Division
In addition to the requirements of section 34 of the Basic Provisions, optional units may also be established by type, if types are designated on the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 of the Basic Provisions, you may select only one base contract price percentage for all the mustard in the county insured under this policy unless the Special Provisions allow different base contract prices by type.

(b) If base contract prices are allowed by type, you can select one base contract price for each type designated in the Special Provisions. The base contract prices you choose must have the same percentage relationship to the base contract price (maximum price) offered for each type. For example, if you
choose 100 percent of the maximum price for a specific type, you must also choose 100 percent of the maximum price for all other types. (c) If there are multiple base contract prices within the same unit, each will be considered a separate price election that will be multiplied by the number of insurable acres under applicable processor contract. These amounts will be totaled to determine the premium, liability, and indemnity for the unit.

(d) To determine the total production guarantee, apply the lesser of the:
(1) Contracted acres multiplied by the production guarantee (per acre);
(2) Planted acres multiplied by the production guarantee (per acre);
(3) Total production stated in the contract; or
(4) For acreage and production contracts only, the contracted acres multiplied by the contracted production (per acre).

4. Contract Changes
In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates
In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

6. Report of Acreage
In addition to the provisions in section 6 of the Basic Provisions, you must provide a copy of all processor contracts to us on or before the acreage reporting date.

7. Insured Crop
(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all mustard in the county for which a premium rate is provided by the actuarial table:
(1) In which you have a share;
(2) That is planted for harvest as seed;
(3) That is grown under, and in accordance with, the requirements of a processor contract executed on or before the acreage reporting date and is not excluded from the processor contract at any time during the crop year; and
(4) That is not, unless allowed by the Special Provisions or by written agreement:
(i) Interplanted with another crop; or
(ii) Planted into an established grass or legume; or
(iii) Planted following the harvest of any other crop in the same crop year.
(b) You will be considered to have a share in the insured crop if, under the processor contract, you retain control of the acres on which the mustard is grown, your income from the insured crop is dependent on the amount of production delivered, and the processor contract provides for delivery of the mustard under specified conditions and at a stipulated base contract price.

(c) A commercial mustard producer who is also a processor may establish an insurable interest if the following requirements are met:
(1) The producer must comply with these Crop Provisions;
(2) Prior to the sales closing date, the Board of Directors or officers of the processor must execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and
(3) Our inspection reveals that the processing facilities comply with the definition of a processor contained in these Crop Provisions.

8. Insurable Acreage
In addition to the provisions of section 9 of the Basic Provisions:
(a) Any acreage of the insured crop that is damaged before the final planting date, to the extent that a majority of producers in the area would not normally further care for the crop, must be replanted unless we agree that it is not practical to replant.
(b) We will not insure any acreage that does not meet the rotation requirements, if applicable, contained in the Special Provisions.

(c) Insurable acreage will be:
(1) For acreage only based processor contracts and acreage and production based processor contracts which specify a maximum number of acres, the lesser of:
(i) The planted acres; or
(ii) The maximum number of acres specified in the contract;
(2) For production only based processor contracts, the lesser of:
(i) The number of acres determined by dividing the production stated in the processor contract by the approved yield; or
(ii) The planted acres.

9. Insurance Period
In accordance with the provisions of section 11 of the Basic Provisions, the end of the insurance period is October 31 of the calendar year in which the crop is normally harvested unless otherwise stated in the Special Provisions.

10. Causes of Loss
In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss which occur during the insurance period:
(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; and
(h) Failure of the irrigation water supply, if applicable, caused by a cause of loss specified in section 18(a) through (g) that occurs during the insurance period.

11. Replanting Payment
(a) In accordance with section 13 of the Basic Provisions, a replanting payment is allowed if the insured crop is damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage, and it is practical to replant or we require you to replant in accordance with section 8(a).
(b) The maximum amount of the replanting payment per acre will be the lesser of 20 percent of the production guarantee (per acre) or 175 pounds, multiplied by the base contract price applicable to the acreage to be replanted, multiplied by your insured share.
(c) When the mustard is replanted using a practice that is uninsurable as an original planting, the liability for the unit will be reduced by the amount of the replanting payment that is attributable to your share. The premium amount will not be reduced.

12. Duties In The Event of Damage or Loss
In accordance with the requirements of section 14 of the Basic Provisions, the representative samples of the unharvested crop that we may require must be at least 10 feet wide and extend the entire length of each field in the unit. The samples must not be harvested or destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed.

13. Settlement of Claim
(a) We will determine your loss on a unit basis.
(1) In the event you are unable to provide separate acceptable production records:
(i) For any optional units, we will combine all optional units for which acceptable production records were not provided; or
(ii) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
(b) For any processor contract that stipulates only the amount of production to be delivered, and not withstanding the provisions of this section or any unit division provisions contained in the Basic Provisions, no indemnity will be paid for any loss of production on any unit if the insured produced a crop sufficient to fulfill the processor contract(s) forming the basis of the insurance guarantee.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insurable acreage of each type, if applicable, determined in accordance with section 8(c), by its respective production guarantee (per acre);
(2) Multiplying each result in section 13(b)(1) by the respective base contract price for each type, if applicable;
(3) Totaling the results in section 13(b)(2);
(4) Subtracting the total in section 13(b)(3) from the total in section 13(b)(2); and
(5) Multiplying the result in section 13(b)(6) by your share.
Example 1 (with one base contract price for the unit):
You have 100 percent share in 20 acres of mustard in a unit with a 650-pound production guarantee (per acre) and a base contract price of $0.15 per pound. Due to insurable causes, you are only able to harvest 10,000 pounds and there is no appraised production. Your indemnity would be calculated as follows:
(1) 20 acres x 650 pounds = 13,000 pound production guarantee;
(2) 13,000 pounds x $0.15 base contract price = $1,950 value of guarantee;
(3) $1,950 total value of guarantee;
(4) 10,000 pounds x $0.15 base contract price = $1,500 value of production to count;
(5) $1,500 total value of production to count;
(6) $1,950-$1,500 = $450 loss; and
(7) $450 x 100 percent = $450 indemnity payment.
Example 2 (with two base contract prices for the same unit):
You have 100 percent share in 20 acres of mustard in a unit with a 650-pound production guarantee (per acre), 10 acres with a base contract price of $0.15 per pound, and 10 acres with a base contract price of $0.10 per pound. Due to insurable causes, you are only able to harvest 6,500 pounds and there is no appraised production. Your indemnity would be calculated as follows:
(1) 10 acres x 650 pounds = 6,500-pound production guarantee x $0.15 base contract price = $975 value guarantee;
The acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested;

(2) All harvested production from the insurable acreage; and

(3) Any other uninsurable mustard production that is delivered to fulfill the processor contract.

(d) Mature mustard may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(1) Mustard production will be reduced by 0.12 percent for each 0.1 percentage point of moisture in excess of 10.0 percent. We may obtain samples of the production to determine the moisture content.

(2) Mustard production will be eligible for quality adjustment only if:

(i) Deficiencies in quality result in the mustard not meeting the requirements for acceptance under the processor contract because of damaged seeds (excluding heat damage), or a musty, sour, or commercially objectionable foreign odor; or

(ii) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(3) Quality will be a factor in determining your loss in mustard production only if:

(i) The deficiencies, substances, or conditions specified in section 13(d)(2) result in a salvage price less than the base contract price; and

(ii) The deficiencies, substances, or conditions specified in section 13(d)(2) resulted from a cause of loss specified in section 10 that occurs within the insurance period; and

(iii) All determinations of these deficiencies, substances, or conditions specified in section 13(d)(2) are made using samples of the production obtained by us, by the processor identified in the processor contract for the insured acreage, or by a disinterested third party approved by us; and

(iv) The samples are analyzed by a grader in accordance with the Directive for Inspection of Mustard Seed, provided by the Federal Grain Inspection Service or such other directive or standards that may be issued by FCIC.

(4) Mustard production that is eligible for quality adjustment, as specified in sections 13(d)(2) and (3), will be reduced by multiplying the quality adjustment factors contained in the Special Provisions (if quality adjustment factors are not contained in the Special Provisions, the quality adjustment factor is determined by dividing the salvage price by the base contract price (not to exceed 1.000)) by the number of pounds remaining after any reduction due to excessive moisture (the moisture-adjusted gross pounds) of the damaged or conditioned production.
(i) The salvage price will be determined at the earlier of the date such quality adjusted production is sold or the date of final inspection for the unit subject to the following conditions:

(A) Discounts used to establish the salvage price will be limited to those that are usual, customary, and reasonable.

(B) The salvage price will not include any reductions for:

1. Moisture content;
2. Damage due to uninsured causes;
3. Drying, handling, processing, or any other costs associated with normal harvesting, handling, and marketing of the mustard; except, if the salvage price can be increased by conditioning, we may reduce the salvage price, after the production has been conditioned, by the cost of conditioning but not lower than the salvage price before conditioning; and

(ii) We may obtain salvage prices from any buyer of our choice. If we obtain salvage prices from one or more buyers located outside your local market area, we will reduce such price by the additional costs required to deliver the mustard to those buyers.

(iii) Factors not associated with grading under the Directive for Inspection of Mustard Seed, provided by the Federal Grain Inspection Service or such other directive or standards that may be issued by FCIC including, but not limited to, protein and oil will not be considered.

(e) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on an unadjusted weight basis.

14. Late Planting

In lieu of section 16(a) of the Basic Provisions, the production guarantee (per acre) for each acre planted to the insured crop during the late planting period will be reduced by 1 percent per day for each day planted after the final planting date, unless otherwise specified in the Special Provisions.

15. Prevented Planting

In addition to the provisions contained in section 17 of the Basic Provisions, your prevented planting coverage will be 60 percent of your production guarantee (per acre) for timely planted acreage. When a portion of the insurable acreage within the unit is prevented from being planted, and there is more than one base contract price applicable to acreage in the unit, the lowest base contract price will be used in calculating any prevented planting payment. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to the levels specified in the actuarial documents.

[73 FR 11320, Mar. 3, 2008; 73 FR 17243, Apr. 1, 2008]

§ 457.169 Mint crop insurance provisions.

The Mint Crop Insurance Provisions for the 2008 and succeeding crop years are as follows:

FCIC policies:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured policies:

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Mint Crop Insurance Provisions

1. Definitions

Adequate Stand. A population of live mint plants that equals or exceeds the minimum required number of plants or percentage of ground cover, as specified in the Special Provisions.

Appraisal. A method of determining potential production by harvesting and distilling a representative sample of the mint crop.

Cover crop. A small grain crop seeded into mint acreage to reduce soil erosion and wind damage.

Cutting. Severance of the upper part of the mint plant from its stalk and roots.

Distillation. A process of extracting mint oil from harvested mint plants by heating and condensing.

Existing mint. Mint planted for harvest during a previous crop year.

Ground cover. Mint plants, including mint foliage and stolons, grown on insured acreage.

Harvest. Removal of mint from the windrow.

Mint. A perennial spearmint or peppermint plant of the family Labiatae and the genus Mentha grown for distillation of mint oil.

Mint oil. Oil produced by the distillation of harvested mint plants.

New mint. Mint planted for harvest for the first time.

Planted acreage. In addition to the definition in the Basic Provisions, land in which mint stolons have been placed in a manner appropriate for the planting method and at the correct depth into a seedbed that has been properly prepared.

Pound. 16 ounces avoirdupois.

Sales closing date. In lieu of the definition contained in the Basic Provisions, if you select the Winter Coverage Option, application for the Winter Coverage Option will include application for the spring insurance period.
and must be submitted by the sales closing date for the Winter Coverage Option contained in the Special Provisions. Coverage may not be changed between the end of the Winter Coverage Option insurance period and the beginning of the spring insurance period. If you do not elect the Winter Coverage Option, application must be made by the spring sales closing date contained in the Special Provisions and all policy changes must be made by that date. If you later elect the Winter Coverage Option, you may select your coverage under the Winter Coverage Option.

**Stolon.** A stem at or just below the surface of the ground that produces new mint plants at its tips or nodes.

**Type.** A category of mint identified as a type in the Special Provisions.

**Windrow.** Mint that is cut and placed in a row.

### 2. Unit Division

A basic unit, as defined in section 1 of the Basic Provisions, will be divided into additional basic units by each mint type designated in the Special Provisions.

### 3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 of the Basic Provisions, you may only select one price election for all the mint in the county insured under this policy unless the actuarial documents provide different price elections by type, in which case you may only select one price election for each type designated in the actuarial documents. The price elections you choose for each type must have the same percentage relationship to the maximum price election offered by us for each type. For example, if you choose 100 percent of the maximum price election for one specific type, you must also choose 100 percent of the maximum price election for other types.

(b) In addition to the provisions in section 3 of the Basic Provisions, you must report:

1. The total amount of mint oil produced from insurable acreage for all cuttings for each unit;
2. Any damage to or removal of mint plants or stolons; any change in practices; or any other circumstance that may reduce the expected yield below the yield upon which the production guarantee is based, and the number of affected acres;
3. The stand age;
4. The date existing mint acreage was planted;
5. The date new mint acreage was initially planted; and
6. The type of mint.

(c) If you fail to notify us of any circumstance that may reduce your yields or insurable acres from previous levels, we will reduce your production guarantee and insurable acres at any time we become aware of the circumstance based on our estimate of the effect of damage to or removal of mint plants or stolons; stand age; change in practices; and any other circumstance that may affect the yield potential or insurable acres of the insured crop.

### 4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is June 30 preceding the cancellation date.

### 5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation date is September 30 and the termination date is November 30. If your policy is terminated after insurance has attached for the subsequent crop year, coverage will be deemed not to have attached to the acreage for the subsequent crop year.

### 6. Insured Crop

(a) In accordance with the provisions of section 8 of the Basic Provisions, the crop insured will be all mint types in the county for which a premium rate is provided by the actuarial documents:

1. In which you have a share;
2. That are planted for harvest and distillation for mint oil;
3. That have an adequate stand by the date coverage begins; and
4. That have been:
   (i) Inspected and accepted by us for the first crop year you are insured; or
   (ii) Certified by you as having an adequate stand on the date coverage begins after the first crop year you are insured unless an inspection is required under section 8(b).

(b) In lieu of the provisions of section 8 of the Basic Provisions that prohibit insurance of a second crop harvested following the same crop in the same crop year, multiple harvests of mint on the same acreage will be considered as one mint crop.

(c) In addition to the coverages provided in these Crop Provisions, you may also elect the Winter Coverage Option in accordance with section 13.

### 7. Insurable Acreage

(a) Mint interplanted with a cover crop will not be considered interplanted for the purposes of section 9 of the Basic Provisions if the cover crop is destroyed prior to its maturity and is not harvested as grain.

(b) In addition to the provisions of section 9 of the Basic Provisions, unless allowed by written agreement, we will not insure any acreage that:

1. Does not meet rotation requirements contained in the Special Provisions; or
Federal Crop Insurance Corporation, USDA

§ 457.169

8. Insurance Period

In lieu of the provisions of section 11 of the Basic Provisions:
(a) Coverage begins on each unit or part of a unit for acreage with an adequate stand on the following calendar dates:
   (1) June 16 in Indiana, Montana, and Wisconsin;
   (2) May 16 in Washington; and
   (3) For all other states, the date as provided in the Special Provisions.
(b) For the year of application, for when you have reported planting mint during the Winter Coverage Option insurance period, or for any insurance period following the payment of an indemnity or a reported loss where the crop was determined to not have an adequate stand, we will inspect all mint acreage within the two-week period before coverage begins (If you have elected the Winter Coverage Option, such inspection will occur not later than November 15).
   (1) Insurance will attach on the date coverage begins, as specified in section 8(a), unless we inspect the acreage during the two-week period and determine it does not meet insurability requirements as specified in section 2 of the Basic Provisions, the application, or these Crop Provisions.
   (2) You must provide any information we require for the crop or to determine the condition of the crop.
   (c) Coverage ends for each unit or part of a unit at the earliest of:
      (1) Total destruction of the insured crop on the unit;
      (2) Final adjustment of a loss;
      (3) The final cutting for the crop year;
      (4) Abandonment of the crop; or
      (5) The following calendar date:
         (i) September 30 in Indiana and Wisconsin;
         (ii) October 15 in Montana;
         (iii) October 31 in Washington; and
         (iv) For all other states, the date as provided in the Special Provisions.

9. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:
   (1) Adverse weather conditions;
   (2) Fire;
   (3) Insects or plant disease (except Verticillium Wilt disease), but not damage due to insufficient or improper application of control measures;
   (4) Wildfire;
   (5) Earthquake;
   (6) Volcanic eruption; or
   (7) Failure of the irrigation water supply, if caused by an insured cause of loss listed in sections 9(a)(1) through (6) that occurs during the insurance period.
(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against any loss of production that:
   (1) Occurs after harvest;
   (2) Is due to your failure to distill the crop, unless such failure is due to actual physical damage to the crop caused by an insured cause of loss that occurs during the insurance period; or
   (3) Is due to Verticillium Wilt disease.

10. Duties In The Event of Damage or Loss

In addition to your duties contained in section 14 of the Basic Provisions, if you discover that any insured mint is damaged, or if you intend to claim an indemnity on any unit:
(a) You must give us notice of probable loss at least 15 days before the beginning of any cutting or immediately if probable loss is discovered after cutting has begun or when cutting should have begun; and
(b) You must timely harvest and completely distill a sample of the crop on any acreage you do not intend to harvest, as designated by us, to determine if an indemnity is due.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate, acceptable production records:
   (1) For any optional units, we will combine all optional units for which such production records were not provided; or
   (2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
(b) We may defer appraisals until the crop reaches maturity or the date mint harvest is general in the area.
(c) In the event of loss or damage covered by this policy, we will settle your claim by:
   (1) Multiplying the insured acreage for each type, if applicable, by its respective production guarantee;
   (2) Multiplying the result of section 11(c)(1) by the respective price election for each type, if applicable;
   (3) Totaling the results of section 11(c)(2);
   (4) Multiplying the total production to be counted (see section 11(d)) of each type, if applicable, by its respective price election;
   (5) Totaling the results of section 11(c)(4);
   (6) Subtracting the result in section 11(c)(5) from the result of section 11(c)(3); and
   (7) Multiplying the result in section 11(c)(6) by your share.

For example:
Assume that you have a 100 percent share in 100 acres of peppermint in the unit, with a production guarantee of 50 pounds of oil.
per acre and a price election of $12 per pound. Because an insured cause of loss has reduced production, you only harvest and distill 2,500 pounds of peppermint oil. Your indemnity would be calculated as follows:

1. 100 acres x 50 pounds = 5,000 pound production guarantee;
2. 5,000 pound production guarantee x $12 price election = $60,000 value of production guarantee;
3. 2,500 pounds production to count x $12 price election = $30,000 value of production to count;
4. $60,000 - $30,000 = $30,000 loss; and
5. $30,000 x 100 percent share = $30,000 indemnity payment.

(d) The total production to count (in pounds of oil) from all insurable acreage on the unit will include:
1. All appraised production as follows:
   (i) Not less than the production guarantee per acre for acreage:
   (A) That is abandoned;
   (B) That is put to another use without our consent;
   (C) For which you fail to meet the requirements contained in section 10 of these Crop Provisions;
   (D) That is damaged solely by uninsured causes; or
   (E) For which you fail to provide production records that are acceptable to us;
   (ii) All production lost due to uninsured causes;
   (iii) All unharvested production;
   (iv) All potential production on insured acreage that you intend to put to another use or abandon with our consent:
   (A) If you do not elect to continue to care for the crop, we may give you our consent to put the acreage to another use if you agree to leave intact and provide sufficient care for representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisal from the samples at the time harvest should have occurred. If you do not leave the required samples intact or fail to provide sufficient care for the samples, the amount of production to count will be not less than the production guarantee per acre); or
   (B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or the appraised production at the time the crop reaches maturity.
2. All harvested production from the insurable acreage.
3. Harvested production must be distilled to determine production to count.
4. Any oil distilled from plants growing in the mint will be counted as mint oil on a weight basis.
5. You are responsible for the cost of distilling samples for loss adjustment purposes.

12. Late and Prevented Planting
The late and prevented planting provisions of the Basic Provisions are not applicable.

13. Winter Coverage Option
(a) The provisions of this option are continuous and will be attached to and made part of your insurance policy if:
1. You elect the Winter Coverage Option on your application, or on a form approved by us, and either before the fall sales closing date for the crop year in which you wish to insure mint under this option, or pay the additional premium indicated in the actuarial documents for this optional coverage; and
2. You have not elected coverage under the Catastrophic Risk Protection Endorsement.
(b) This option provides a production guarantee equal to 60 percent of the production guarantee determined under section 3 of these Crop Provisions.
(c) If you elect this option, all of the insurable acreage in the county will be insured by this option.
(d) In addition to the requirements of section 6 of the Basic Provisions, any acreage of new mint planted after the applicable acreage reporting date must be certified by you and reported to us within two weeks of planting;
(e) In lieu of section 6(a) of these Crop Provisions, the crop insured will be all mint types in the county for which a premium rate is provided by the actuarial documents:
1. In which you have a share;
2. That are planted for harvest and distillation as mint oil;
3. That have an adequate stand on the date coverage begins (newly planted mint types must be reported in accordance with section 8(b) but they must be reported as uninsured unless they have an adequate stand by the date coverage begins); and
4. That has been:
   (i) Inspected and accepted by us for the first crop year you are insured (We will inspect all mint acreage and will notify you of the acceptance or rejection of your application not later than November 15. If we fail to notify you by that date, your application will be accepted unless other grounds exist to reject the application, as specified in the Basic Provisions, the application, or these Crop Provisions);
   (ii) Inspected and accepted by us not later than November 15 for the crop year following the payment of an indemnity or a reported loss unless the crop was determined to have an adequate stand (If we determined there was an adequate stand after the loss was reported, no inspection is necessary); or
   (iii) Certified by you as having an adequate stand on the date coverage begins unless an inspection is required under section 13(e)(4)(ii).
§ 457.170 Cultivated wild rice crop insurance provisions.

The Cultivated Wild Rice Crop Insurance Provisions for the 2009 and succeeding crop years are as follows:

Reinsured policies: (Appropriate title for insurance provider).

Both FCIC and reinsured policies: Cultivated Wild Rice Crop Provisions.

(f) Coverage under this option begins:
(1) On existing mint acreage with an adequate stand at 12:01 a.m. on the calendar date listed below:
   (i) October 1 in Indiana and Wisconsin;
   (ii) October 16 in Montana;
   (iii) November 1 in Washington; and
   (iv) For all other states, the date as provided in the Special Provisions.
(2) On new mint acreage, that has an adequate stand by the date coverage begins as specified in section 13(f)(1).

(g) Coverage under this option ends on the unit or part of the unit at 11:59 p.m. on the calendar date listed below:
(1) June 15 in Indiana, Montana, and Wisconsin;
(2) May 15 in Washington; and
(3) For all other states, the date as provided in the Special Provisions.
(h) In lieu of section 10(a) of these Crop Provisions, you must give notice of probable loss within 72 hours after you discover any insured mint is damaged and does not have an adequate stand, but no later than the date coverage ends for this option.

(i) In addition to the requirements of section 10 of these Crop Provisions, you must give us notice if you want our consent to put any mint acreage to another use before a determination can be made if there is an adequate stand on the acreage. We will inspect the acreage and you must agree in writing no payment or indemnity will be made for the acreage put to another use. The total production to be counted for acreage put to another use with our consent in accordance with this section will not be less than the approved yield.

(j) In addition to section 11(a) of these Crop Provisions we will make a Winter Coverage Option payment only on acreage that had an adequate stand on the date that insurance attached if the adequate stand was lost due to an insured cause of loss occurring within the Winter Coverage Option insurance period and the acreage consists of at least 20 acres or 20 percent of the insurable planted acres in the unit.

(k) In lieu of section 11(b) of these Crop Provisions, we may defer appraisals until the date coverage ends under this option.

(l) In lieu of section 11(c) of these Crop Provisions, in the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying 60 percent by your production guarantee per acre;
(2) Multiplying the result in section 13(l)(1) by the number of acres that do not have an adequate stand;
(3) Multiplying the result in section 13(l)(2) by the price election; and
(4) Multiplying the result in section 13(l)(3) by your share.

For example: Assume that you have a 100 percent share in 100 acres of mint with a production guarantee of 50 pounds of oil per acre and a price election of $12 per pound. Also assume that you do not have an adequate stand on 50 acres by the date coverage ends for this option because an insured cause has damaged the stand. Your Winter Coverage Option payment would be calculated as follows:

(1) 60 percent x 50 pound production guarantee x 50 acres without an adequate stand = 1,500 pounds;
(2) 30 pound production guarantee per acre x 50 acres without an adequate stand = 1,500 pounds;
(3) 1,500 pounds x $12 price election = $18,000; and
(4) $18,000 x 100 percent share = $18,000 Winter Coverage Option payment.

(m) In lieu of section 11(d) of these Crop Provisions, the population of live mint plants to be counted from insurable acreage on the unit will be not less than the population of live mint plants in an adequate stand for acreage:
(1) That is abandoned;
(2) That is put to another use without our consent;
(3) For which you fail to meet the requirements contained in section 13(h); or
(4) That is damaged solely by uninsured causes.

(n) Acreage for which a Winter Coverage Option payment has been made is no longer insurable under the Crop Provisions for the current crop year. Any mint production subsequently harvested from uninsured acreage for the crop year and not kept separate from production from insured acreage will be considered production to count.

(o) Acreage for which a Winter Coverage Option payment has been made will receive an amount of production of zero when computing subsequent year’s approved yield.

(p) Sections 11(e), (f), and (g) of these Crop Provisions do not apply to this option.

1. Definitions

Approved laboratory. A testing facility approved by us to determine the recovery percentage from samples of cultivated wild rice. 

Cultivated Wild Rice. A member of the grass family Zizania Palustris L., adapted for growing in man-made flood irrigated fields known as paddies.

Finished weight. (a) The green weight delivered to a processor multiplied by the determined recovery percentage; 
(b) The green weight stored for seed multiplied by either the determined recovery percentage or the standard recovery percentage in accordance with section 11(d); or 
(c) The appraised green weight multiplied by either the determined recovery percentage or the standard recovery percentage in accordance with section 11(d).

Flood irrigation. Intentionally covering the planted acreage with water and maintaining it at a proper depth throughout the growing season.

Green weight. The total weight in pounds of the green cultivated wild rice production that was appraised, delivered to a processor, or stored for seed.

Harvest. Combining or threshing the cultivated wild rice for grain or seed.

Initially planted. The first occurrence of planting the insured crop on insurable acreage for the crop year.

Planted acreage. In addition to the definition contained in the Basic Provisions, land on which an adequate amount of seed is initially spread onto the soil surface by any appropriate method (including shattering for the second and succeeding years) and subsequently is mechanically incorporated into the soil at the proper depth, will be considered planted, unless otherwise provided by the Special Provisions or actuarial documents.

Processor. A business that converts green weight to a product ready for commercial sale using appropriate equipment and methods such as separating immature kernels, fermenting or curing, parching, de-hulling, and scarifying.

Recovery percentage. The ratio of finished weight to green weight of the cultivated wild rice. As specified in section 11(d), the recovery percentage is either:
(a) The determined recovery percentage for a sample as determined by an approved laboratory; or 
(b) The standard recovery percentage provided in the Special Provisions.

Shatter. The act of mature seeds naturally falling to the ground from a cultivated wild rice plant.

2. Unit Division

Provisions in the Basic Provisions that allow optional units by irrigated and non-irrigated practices are not applicable.

3. Insurance Guarantee, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:
(a) You may select only one percentage of the maximum price election for all the cultivated wild rice insured under this policy in the county.
(b) The insurance guarantee per acre is expressed as pounds of finished weight.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is:
(a) November 30 preceding the cancellation date for counties with a February 28 cancellation date; and 
(b) June 30 preceding the cancellation date for counties with a September 30 cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State</th>
<th>Cancellation date</th>
<th>Termination date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mendocino, Glenn, Butte, and Sierra Counties, California; and all California Counties south thereof; Minnesota; All Other California Counties; and All Other States</td>
<td>February 28</td>
<td>September 30</td>
</tr>
<tr>
<td></td>
<td></td>
<td>November 30</td>
</tr>
</tbody>
</table>

6. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the cultivated wild rice in the county grown on insurable acreage for which premium rates are provided by the actuarial documents:
(1) In which you have a share; 
(2) That is planted for harvest as grain; and 
(3) That is grown in man-made flood irrigated fields.
(b) Section 8(b)(3) of the Basic Provisions is not applicable to the cultivated wild rice seed that naturally shatters and is subsequently mechanically incorporated into the soil.
Federal Crop Insurance Corporation, USDA

§ 457.170

7. Insurance Period

In accordance with section 11 of the Basic Provisions, the calendar date for the end of the insurance period is:

(a) For Minnesota, September 30 of the calendar year the crop is normally harvested;
(b) For California, October 15 of the calendar year the crop is normally harvested; and
(c) For all other states, the date provided in the Special Provisions.

8. Causes of Loss

(a) In accordance with section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:
(1) Adverse weather conditions;
(2) Fire;
(3) Insects, but not damage due to insufficient or improper application of pest control measures;
(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(5) Wildlife;
(6) Earthquake;
(7) Volcanic eruption; or
(b) Failure of the irrigation water supply, if caused by a cause of loss specified in sections 8(a)(1) through (7) that occurs during the insurance period, drought, or the intrusion of saline water.

(b) In addition to the causes not insured against in section 12 of the Basic Provisions, we will not insure against any loss of production due to:

(1) The crop not being timely harvested unless such delay in harvesting is solely and directly due to adverse weather conditions which preclude harvesting equipment from entering and moving about the field; or
(2) The application of saline water, except as specified in section 8(a) of these crop provisions.

9. Replanting Payments

The provisions of section 13 of the Basic Provisions are not applicable.

10. Duties in the Event of Damage or Loss

Representative samples are required in accordance with section 14 of the Basic Provisions.

11. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:
(1) Optional unit, we will combine all optional units for which such production records were not provided; or
(2) Basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insured acreage by its respective production guarantee;
(2) Multiplying the result in section 11(b)(1) by the respective price election;
(3) Totaling the results of section 11(b)(2);
(4) Multiplying the total production to be counted, (see section 11(c) through (d)) by the respective price election;
(5) Totaling the results of section 11(b)(4);
(6) Subtracting the result of section 11(b)(5) from the result of section 11(b)(3); and
(7) Multiplying the result of section 11(b)(6) by your share.

For example:
You have a 100 percent share in 100 acres of cultivated wild rice in the unit, with a guarantee of 400 pounds per acre and a price election of $1.00 per pound. You are only able to harvest 20,000 pounds. Your indemnity would be calculated as follows:

(1) 100 acres x 400 pounds = 40,000 pound guarantee;
(2) 40,000 pounds x $1.00 per pound price election = $40,000 value of guarantee;
(3) 20,000 pounds x $1.00 per pound price election = $20,000 value of production to count;
(4) $40,000 - $20,000 = $20,000 loss; and
(5) $20,000 x 100 percent share = $20,000 indemnity payment.

(c) The total production to count (finished weight) from all insurable acreage on the unit will include:

(1) All appraised production as follows:
(2) That is abandoned;
(3) Put to another use without our consent;
(4) Damaged solely by uninsured causes; or
(5) For which you fail to provide records of production that are acceptable to us;
(ii) Production lost due to uninsured causes;
(iii) Unharvested production (mature unharvested green weight production must be adjusted in accordance with section 11(d)); and
(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for,
§ 457.171 Cabbage crop insurance provisions.

The Cabbage Crop Insurance Provisions for the 2011 and succeeding crop years are as follows:

Reinsured policies: (Appropriate title for insurance provider).

Both FCIC and reinsured policies: Cabbage Crop Insurance Provisions.

1. Definitions

Cabbage. Plants of the family Brassicaceae and the genus Brassica, grown for their compact heads and used for human consumption.

Crop Year. In lieu of the definition contained in section 1 of the Basic Provisions, a period of time that begins on the first day of the earliest planting period and continues through the last day of the insurance period for the latest planting period. The crop year is designated by the calendar year in which the cabbage planted in the latest planting period is normally harvested.

Damaged cabbage production. Fresh market cabbage that fails to grade U.S. Commercial or better in accordance with the United States Standards for Grades of Cabbage, or processing cabbage that fails to grade U.S. No. 2 or better in accordance with the United States Standards for Grades of Cabbage for Processing due to an insurable cause of loss.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper, or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Harvest. Cutting of the cabbage plant to sever the head from the stalk.

Hundredweight. One hundred pounds avoirdupois.

Inspected transplants. Cabbage plants that have been found to meet the standards of the public agency responsible for the inspection process within the State in which they are grown.

 Marketable cabbage. Cabbage that is sold or grades at least:

(a) U.S. Commercial for fresh market cabbage; or
(b) U.S. No. 2 for processing cabbage.

Planted acreage. In addition to the definition contained in section 1 of the Basic Provisions, cabbage plants and seeds must initially be planted in rows wide enough to permit mechanical cultivation. Cabbage planted or seeds planted in any other manner will not be insurable unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Processor. Any business enterprise regularly engaged in processing cabbage for human consumption, that possesses all licenses and permits for processing cabbage required by the State in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process the contracted cabbage within a reasonable amount of time after harvest.

Processor contract. A written contract between the producer and the processor, containing at a minimum:

(a) The producer’s commitment to plant and grow cabbage, and to sell and deliver the cabbage production to the processor; and

(b) The processor’s commitment to purchase all the production stated in the processor contract; and
(c) A price per hundredweight that will be paid for the production.

Timely planted. In lieu of the definition contained in section 1 of the Basic Provisions, cabbage planted during a planting period designated in the Special Provisions.

Type. A category of cabbage as designated in the Special Provisions.

2. Unit Division

(a) A basic unit, as defined in section 1 of the Basic Provisions, will also be divided into additional basic units by planting period if separate planting periods are designated in the Special Provisions.

(b) In addition to the requirements of section 34 of the Basic Provisions, optional units may also be established by type if separate planting periods are designated in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one price election for all the cabbage in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each cabbage type designated in the Special Provisions.

(b) The price elections you choose for each type must bear the same percentage relationship to the maximum price election offered by us for each type. For example, if you selected 100 percent of the maximum price election for one type, you must also select 100 percent of the maximum price election for all other types.

4. Contract Changes

In accordance with the provisions of section 4 of the Basic Provisions, the contract change dates are the following calendar dates preceding the cancellation dates:

(a) April 30 in Florida; Brooks, Colquitt, Tift, and Toombs Counties, Georgia; Texas;

(b) November 30 in Alaska; Rabun County, Georgia; Illinois; Michigan; New York; North Carolina; Ohio; Oregon; Pennsylvania; Virginia; Washington; and Wisconsin; or

(c) As designated in the Special Provisions for all other states and counties.

5. Cancellation and Termination Dates

In accordance with the provisions of section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and counties</th>
<th>Cancellation and termination dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brooks, Colquitt, Tift, and Toombs Counties, Georgia; Texas</td>
<td>July 1</td>
</tr>
<tr>
<td>Florida</td>
<td>August 15.</td>
</tr>
<tr>
<td>Oregon, Washington</td>
<td>February 1.</td>
</tr>
<tr>
<td>Rabun County, Georgia; North Carolina</td>
<td>February 28.</td>
</tr>
<tr>
<td>All other states and counties</td>
<td>As designated in the Special Provisions.</td>
</tr>
</tbody>
</table>

6. Report of Acreage

In addition to the provisions of section 6 of the Basic Provisions, to insure your processing cabbage, you must provide a copy of all your processor contracts to us on or before the acreage reporting date.

7. Insured Crop

(a) In accordance with the provisions of section 8 of the Basic Provisions, the crop insured will be all the cabbage types in the county for which a premium rate is provided by the actuarial documents, in which you have a share, and that are:

(i) Planted with inspected transplants, if such transplants are required by the Special Provisions;

(ii) Planted to be:

(i) Harvested and sold as fresh cabbage; or

(ii) Grown and sold as processing cabbage in accordance with the requirements of a processor contract executed on or before the acreage reporting date and not excluded from the processor contract at any time during the crop year; and

(iii) Unless allowed by the Special Provisions:

(i) Not interplanted with another crop; and

(iii) Not sold by direct marketing.

(b) Under the processor contract, you will be considered to have a share in the insured crop to the extent you retain control of the acreage on which the cabbage is grown, your income from the insured crop is dependent on the amount of production delivered, and the processor contract provides for delivery of the cabbage under specified conditions and at a stipulated price.

(c) A processing cabbage producer who is also a processor may establish an insurable interest if the following additional requirements are met:
§ 457.171  
(1) The producer must comply with these Crop Provisions;  
(2) Prior to the sales closing date, the Board of Directors or officers of the processor must execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and  
(3) Our inspection reveals that the processing facilities comply with the definition of “processor” contained in these Crop Provisions. 

8. Insurable Acreage  
In addition to the provisions of section 9 of the Basic Provisions:  
(a) We will not insure any acreage that does not meet the rotation requirements contained in the Special Provisions.  
(b) Any acreage of the insured crop damaged before the end of the planting period, to the extent that a majority of producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant.  
(c) For processing cabbage, insurable acreage will be:  
(1) For acreage only based processor contracts, and acreage and production based processor contracts which specify a maximum number of acres, the lesser of:  
(i) The planted acres; or  
(ii) The maximum number of acres specified in the contract;  
(2) For production only based processor contracts, the lesser of:  
(i) The number of acres determined by dividing the production stated in the processor contract by the approved yield; or  
(ii) The planted acres.  

9. Insurance Period  
(a) In lieu of the provisions of section 11 of the Basic Provisions, coverage begins on each unit or part of a unit the later of:  
(1) The date we accept your application; or  
(2) When the cabbage is planted in each planting period.  
(b) In addition to the provisions of section 11 of the Basic Provisions, the end of the insurance period will be the earlier of:  
(1) The date the crop should have been harvested; or  
(2) The following applicable calendar date after planting;  
(i) Alaska: October 1;  
(ii) Florida:  
(A) February 15 for the fall planting period;  
(B) April 15 for the winter planting period; and  
(C) May 31 for the spring planting period;  
(iii) Brooks, Colquitt, Tift, and Toombs Counties, Georgia:  
(A) January 15 for the fall planting period; and  
(B) June 15 for the spring planting period;  
(iv) Rabun County, Georgia:  
(A) September 15 for the spring planting period; and  
(B) October 31 for the summer planting period;  
(v) Illinois, Michigan, New York, Ohio, and Pennsylvania:  
(A) September 30 for the spring planting period; and  
(B) November 25 for the summer planting period;  
(vi) North Carolina:  
(A) July 10 for the spring planting period; and  
(B) December 31 for the fall planting period;  
(vii) Oregon: December 31;  
(viii) Texas:  
(A) December 31 for the summer planting period;  
(B) February 15 for the fall planting period; and  
(C) April 30 for the winter planting period;  
(ix) Virginia:  
(A) July 31 for the early spring planting period;  
(B) September 15 for the spring planting period; and  
(C) November 15 for the summer planting period;  
(x) Washington: December 31;  
(xi) Wisconsin: November 6; and  
(xii) All other states and counties as provided in the Special Provisions.  

10. Causes of Loss  
(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:  
(1) Adverse weather conditions;  
(2) Fire;  
(3) Wildlife;  
(4) Insects or plant disease, but not damage due to insufficient or improper application of control measures;  
(5) Earthquake;  
(6) Volcanic eruption; or  
(7) Failure of the irrigation water supply, if caused by a cause of loss specified in sections 10(a)(1) through (6) that occurs during the insurance period.  
(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to:  
(1) Failure to market the cabbage for any reason other than actual physical damage from an insured cause of loss that occurs during the insurance period (for example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production, etc.); or
11. Replanting Payments

(a) In accordance with the provisions of section 13 of the Basic Provisions, a replanting payment is allowed if the crop is damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 80 percent of the production guarantee for the acreage and it is practical to replant.

(b) No replanting payment will be made on acreage planted prior to the initial planting date or after the end of the final planting period as designated by the Special Provisions.

(c) In accordance with the provisions of section 13(c) of the Basic Provisions, the maximum amount of the replanting payment per acre is the number of hundredweight specified in the Special Provisions multiplied by your price election, multiplied by your insured share. The fresh market cabbage price election will be used to determine processing cabbage replanting payments in counties where both fresh market and processing cabbage are insurable.

(d) When the insured crop is replanted using a practice that is uninsurable as an original planting, the liability for the unit will be reduced by the amount of the replanting payment attributable to your share. The premium will not be reduced.

(e) In lieu of the provisions contained in section 13 of the Basic Provisions that limit a replanting payment to one crop year, only one replanting payment will be made for acreage replanted during each planting period within the crop year, if separate planting periods are allowed by the Special Provisions.

12. Duties In The Event of Damage or Loss

(a) Failure to meet the requirements of this section will result in an appraised amount of production to count of not less than the production guarantee per acre if such failure results in our inability to make the required appraisal.

(b) In lieu of the provisions of section 14(b)(1) of the Basic Provisions, so that we may inspect the insured crop, you must give us notice within 72 hours of your initial discovery of damage if such discovery occurs more than 15 days prior to harvest of the acreage.

(c) In addition to the provisions of section 14 of the Basic Provisions, so that we may inspect the insured crop, you must give us notice:

(1) Immediately if damage is discovered 15 days or less prior to the beginning of harvest or during harvest.

(2) At least 15 days prior to the beginning of harvest, if direct marketing of the insured crop is allowed by the Special Provisions, and you intend to direct market any of the crop.

(3) At least 15 days before the earlier of:

(i) The date harvest would normally start if any acreage on the unit will not be harvested; or

(ii) The beginning of harvest, if any production will be harvested for a use other than as indicated on the acreage report.

(d) After you have provided the applicable notice required by sections 12(b) and (c), we will conduct an appraisal to determine your production to count for the purposes of section 13(d).

(1) Except as provided in section 12(e), you must not dispose of or sell the damaged crop, or store the insured crop, until after we have appraised it and given you written consent to do so.

(2) If additional damage occurs after this appraisal, except for stored cabbage, we will conduct another appraisal.

(3) These appraisals, and any acceptable records provided by you, will be used to determine your production to count in accordance with section 13(d).

(e) In accordance with the requirements of section 14(c) of the Basic Provisions, if you initially discover damage to any insured cabbage within 15 days of or during harvest, you must leave representative samples of the unharvested crop for our inspection. The samples must be at least 3 rows wide and extend the entire length of each field in the unit and must not be harvested or destroyed until the earlier of our inspection or 15 days after completion of harvest on the unit.

13. Settlement of Claim

(a) We will determine your loss on a unit basis.

(1) In the event you are unable to provide separate acceptable production records:

(i) For any optional units, we will combine all optional units for which such production records were not provided; and

(ii) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(2) For any processor contract that stipulates only the amount of production to be delivered, and notwithstanding the provisions of this section or any unit division provisions contained in the Basic Provisions, no indemnity will be paid for any loss of production on any unit if you produced a crop sufficient to fulfill the processor contract(s) forming the basis of the insurance guarantee.

(b) The extent of any damaged cabbage production must be determined not later than the date the cabbage is placed in storage if the production is stored prior to sale,
or the date the cabbage is delivered to a buyer, wholesaler, packer, processor, or other handler if production is not stored.

(c) In the event of loss or damage covered by this policy we will settle your claim by:

(1) Multiplying the insurable acreage by its respective production guarantee (per acre), by type if applicable;

(2) Multiplying each result in section 13(c)(1) by the respective price election, by type if applicable;

(3) Totaling the results in section 13(c)(2); and

(4) Multiplying the total production to count of each type, if applicable (see section 13(d)), by its respective price election;

(5) Totaling the results in section 13(c)(4);

(6) Subtracting the results in section 13(c)(5) from the results of section 13(c)(3); and

(7) Multiplying the result in section 13(c)(6) by your share.

For example:

For a basic unit you have 100 percent share in 100 acres of cabbage, 50 acres for fresh market and 50 acres for processing as sauerkraut, with a production guarantee (per acre) of 400 hundredweight per acre for fresh market and 400 hundredweight per acre for processing as sauerkraut and a price election of $5.00 per hundredweight for fresh market and $1.90 per hundredweight for processing as sauerkraut. You are only able to harvest 9,000 hundredweight of fresh market cabbage and 9,000 hundredweight of cabbage for sauerkraut because an insured cause of loss has reduced production. Your total indemnity would be calculated as follows:

(1) 50 acres x 400 hundredweight = 20,000 hundredweight guarantee for the fresh market acreage.

(2) 20,000 hundredweight guarantee x $5.00 price election = $100,000 value of guarantee for processing as sauerkraut.

(3) $100,000 + $38,000 = $138,000 total value of guarantee.

(4) 9,000 hundredweight x $5.00 price election = $45,000 value of production to count for the fresh market acreage.

(5) $45,000 + $17,100 = $62,100 total value of production to count.

(6) $138,000 - $62,100 = $75,900 loss.

(7) $75,900 x 10 percent share = $7,590 indemnity payment.

(8) The total production to count (in hundredweight) of marketable cabbage from all insurable acreage on the unit will include:

(A) That is abandoned;

(B) That is damaged solely by uninsured causes; or

(C) That is put to another use without our consent;

(D) That is damaged solely by uninsured causes; or

(E) For which you fail to provide production records that are acceptable to us.

(1) Multiplying the total production to count by the number of hundredweight of such damaged cabbage production by the applicable price election.

(f) Mature production that is considered damaged cabbage production but is sold will be adjusted for quality as follows:

(1) Dividing the amount received per hundredweight of such damaged cabbage production by the applicable price election.

(2) Multiplying the result by the number of hundredweight of damaged cabbage production.

14. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.
2. CEO is only available for insured crops where the actuarial documents contain a CEO coverage level. If there is a conflict between the terms of CEO and any other provision of your policy, the terms of the CEO will control.

3. To be eligible for CEO coverage on the insured crop, you must:
   (a) Have an MPCI policy in force for the insured crop (or for citrus fruit, citrus trees, and stone fruit or other crops, as applicable, the insured type) and comply with all terms and conditions of such policy.
   (b) Elect CEO in writing and choose a CEO coverage level (at least 5 percent higher than the MPCI coverage level), by the sales closing date for the insured crop.
   (c) Elect a level of coverage greater than the Catastrophic Risk Protection (CAT) coverage level and a 100 percent price election. CEO is not available for the CAT level of coverage.

4. CEO is continuous and will remain in effect for as long as you continue to have a MPCI policy in effect for the insured crop, the actuarial documents contain a CEO coverage level, or until it is canceled by you or terminated by us on or before the cancellation or termination date, as applicable.

5. The premium for your policy will be determined by:
   (a) Totaling the MPCI dollar amount of insurance and the CEO dollar amount of insurance; and
   (b) Multiplying the result of section 5(a) by the premium rate for the insured crop applicable to your MPCI coverage level.

6. With respect to the coverage provided under CEO:
   (a) All acreage of the insured crop insured under your MPCI policy will be covered under the CEO;
   (b) The amount of any replant or prevented planting payment that is payable under the MPCI policy will not be affected by the CEO;
   (c) An indemnity will be payable under the CEO only after the underlying MPCI deductible is met and an MPCI indemnity is paid; and
   (d) The total indemnity for each unit (MPCI coverage plus CEO) cannot exceed the combination of both the MPCI and CEO dollar amounts of insurance.

7. If you elect CEO and a MPCI indemnity is paid on any unit, CEO will pay a portion of the loss not paid under the deductible of the MPCI policy depending on the CEO coverage level you select. (For example, if you selected a 50 percent MPCI coverage level, selected an 85 percent CEO coverage level, and had 60 percent loss of the insured crop, the total amount of indemnity paid under both the MPCI policy and the CEO would be equal to approximately 51 percent of the total value of the insured crop by unit.) See the example in section 8.
§ 457.173 Florida Avocado crop insurance provisions.

The Florida Avocado Crop Insurance Provisions for the 2011 and succeeding crop years are as follows:

FCIC policies:

United States Department of Agriculture Federal Crop Insurance Corporation

Reinsured policies: (Appropriate title for insurance provider)

Both FCIC and reinsured policies: Florida Avocado Crop Insurance Provisions.

1. Definitions.

Bushel. A unit of measure equal to 55 pounds of avocados, unless otherwise specified in the Special Provisions.

Buckhorn. To prune any limb at a diameter of at least four inches.

Crop year. A period beginning with the date insurance attaches to the avocado crop and extending through the normal harvest time. The crop year is designated by the calendar year after insurance attaches.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer's market, and permitting the general public to enter the fields for the purpose of picking all or a portion of the crop.

Harvest. Picking of the avocados from the trees or ground by hand or machine.

Pound. A unit of weight equal to sixteen ounces avoirdupois.

Set out. Transplanting a tree into the grove.

Type. Either early varieties or late varieties of avocados, as specified in the Special Provisions.

2. Unit Division.

Provisions in section 34 of the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units may be established by type when provided for in the Special Provisions.

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one coverage level for all the avocados in the county insured under this policy unless the Special Provisions provide that you may select a different coverage level for each avocado type designated in the Special Provisions. However, if you elect the Catastrophic Risk Protection (CAT) level of coverage, the CAT level of coverage will be applicable to all types of avocados you produce in the county.

(b) You may select only one price election for all the avocados in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each avocado type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must choose 100 percent of the maximum price election for the other type. However, if you elect the CAT level of coverage, the price election will be equal to 50 percent of the applicable price election for each type of avocado you produce in the county.

(c) You must report, by the production reporting date designated in section 3 of the Basic Provisions, by type, if applicable:

1. Any damage, removal of trees, trees that have been buckhorned, change in grove practices, or any other circumstance that may reduce the expected yield per acre to
Federal Crop Insurance Corporation, USDA

§ 457.173

less than the yield upon which the production guarantee per acre is based, and the number of affected acres;

(2) The number of trees on insurable and uninsurable acreage;

(3) The age of the trees;

(4) Any acreage that is excluded under section 6 of these Crop Provisions; and

(5) For acreage interplanted with another crop:

(i) The age of the interplanted crop, and type, if applicable;

(ii) The planting pattern; and

(iii) Any other information that we request in order to establish your production guarantee per acre.

(d) We will reduce the yield used to establish your production guarantee as necessary, based on the effect of interplanting a perennial crop; removal of trees; trees that have been buckhorned; damage; or a change in practices on the yield potential of the insured crop. If you fail to notify us of any circumstance as set out in paragraph (c) of this section, we will reduce your production guarantee as necessary at any time we become aware of the circumstance.

In accordance with section 4 of the Basic Provisions, the contract change date is August 31 preceding the cancellation date.

5. Cancellation and Termination Dates.

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are the first November 30th after insurance attaches.

6. Insured Crop.

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the commercially grown avocado types for which a premium rate is provided by the actuarial documents for the county:

(1) In which you have a share;

(2) That are grown for harvest as avocados; and

(3) That are grown on trees that, if inspected, are considered acceptable to us.

(b) In addition to the avocados not insurable in section 8 of the Basic Provisions, we do not insure any avocados produced on trees that have not:

(1) Reached the fourth growing season after set out; and

(2) Produced the minimum production per acre as specified in the Special Provisions in at least one of the previous three crop years.

7. Insurable Acreage.

In lieu of the provisions in section 9 of the Basic Provisions that prohibits insurance attaching to a crop planted with another crop, avocados interplanted with another perennial crop are insurable unless we inspect the acreage and determine it does not meet the requirements of insurability contained in these Crop Provisions.

8. Insurance Period.

(a) In accordance with the provisions of section 11 of the Basic Provisions:

(1) For the year of application:

(i) If you apply for coverage on or before November 21st, coverage begins for the crop year on December 1 of the calendar year; or

(ii) If you apply for coverage after November 21 but prior to December 1, insurance will attach on the 10th day after your properly completed application is received in our local office, unless we inspect the acreage during the 10-day period and determine that it does not meet the requirements for insurability contained in your policy.

(iii) You must provide any information we require so we may determine the condition of the grove to be insured.

(2) For continuous policies, coverage begins for the crop year on December 1 of the calendar year. Policy cancellation that results solely from transferring an existing policy to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.

(3) The calendar date for the end of the insurance period, unless otherwise specified in the Special Provisions, is:

(i) The first November 30th after insurance attaches for early varieties of avocados.

(ii) The second March 31st after insurance attaches for late varieties of avocados.

(b) In addition to the provisions of section 11 of the Basic Provisions:

(1) If you acquire an insurable share in any insurable acreage of avocados after coverage begins, but on or before the acreage reporting date of any crop year, and if after inspection we consider the acreage acceptable, then insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.

(2) If you relinquish your insurable share on any acreage of avocados on or before the acreage reporting date of any crop year, insurance will not be considered to have attached to such acreage for that crop year unless:

(i) A transfer of coverage and right to an indemnity or a similar form approved by us is completed by all affected parties; and

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

(a) In accordance with the provisions of section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Adverse weather conditions;

(2) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the grove;
(3) Wildlife, unless control measures have not been taken;
(4) Earthquake;
(5) Volcanic eruption;
(6) Failure of the irrigation water supply caused by an insured peril specified in section 9(a)(1) through (5) that occurs during the insurance period.
(7) Insects, but not damage due to insufficient or improper application of pest control measures; and
(8) Plant disease, but not due to insufficient or improper application of disease control measures.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure against damage or loss of production due to:

(1) Theft; or
(2) Inability to market the avocados for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production, etc.

In addition to the requirements of section 14 of the Basic Provisions, the following will apply:

(a) You must notify us at least 15 days before any production from any unit will be sold by direct marketing.

(1) We will conduct a preharvest appraisal that will be used to determine your production. If damage occurs after the preharvest appraisal, and you can provide acceptable records to us that account for all production removed from the unit after our appraisal, we will conduct an additional appraisal that will be used to determine your production.

(2) Failure to give timely notice that production will be sold by direct marketing will result in an appraised production to count of not less than the production guarantee per acre if such failure results in an inability to make an accurate appraisal.

(b) If you intend to claim an indemnity on any unit, you must notify us 15 days prior to the beginning of harvest or immediately if damage is discovered during harvest so that we may inspect the damaged production.

(1) You must not destroy the damaged crop until after we have given you written consent to do so.

(2) If you fail to meet the requirements of this subsection, and such failure results in our inability to inspect the damaged production, we may consider all such production to be undamaged and include it as production to count.

(a) We will determine your loss on a unit basis. In the event you are unable to provide production records:

(1) For any optional unit, we will combine all optional units for which acceptable production records were not provided; or
(2) For any basic unit, we will combine any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage for each type, if applicable, by its respective production guarantee;
(2) Multiplying each result in section 11(b)(1) by the respective price election for each type, if applicable;
(3) Totaling the results in section 11(b)(2);
(4) Multiplying the total production to be counted (see section 11(c)) by type, if applicable, by the respective price election;
(5) Totaling the results in section 11(b)(4);
(6) Subtracting the results in section 11(b)(5) from the results in section 11(b)(3); and
(7) Multiplying the result in section 11(b)(6) by your share.

For example:
You have a 100 percent share in 50 acres of early variety A in the unit, with a guarantee of 140 bushels per acre and a price election of $16.00 per bushel. You are only able to harvest 6,000 bushels due to an insured cause of loss. Your indemnity would be calculated as follows:

(1) 50 acres x 140 bushels = 7,000 bushel guarantee;
(2) 7,000 bushels x $16.00 price election = $112,000.00 value of guarantee;
(3) 6,000 bushels x $16.00 price election = $96,000.00 value of production to count;
(4) $112,000.00 - $96,000.00 = $16,000 loss; and
(5) $16,000 x 100 percent = $16,000 indemnity.

(c) The total production to count from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(i) Not less than the production guarantee for acreage:
(1) That is abandoned;
(2) That is sold by direct marketing if you fail to meet the requirements contained in section 10 of these Crop Provisions;
(3) That is damaged solely by uninsured causes; or
(4) For which you fail to provide production records that are acceptable to us;
(5) Production lost due to uninsured causes;
(iii) Unharvested production;
(iv) Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general.
in the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to adequately care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count; and

(2) All harvested production from the insurable acreage.

12. Late and Prevented Planting.
The late and prevented planting provisions of the Basic Provisions are not applicable.

PART 500—NATIONAL ARBORETUM

Subpart A—Conduct on U.S. National Arboretum Property

Sec. 500.1 General.
500.2 Recording presence.
500.3 Preservation of property.
500.4 Conformity with signs and emergency directions.
500.5 Nuisances.
500.6 Gambling.
500.7 Intoxicating beverages and narcotics.
500.8 Soliciting, vending, debt collection, and distribution of handbills.
500.9 Photographs for news or advertising.
500.10 Pets.
500.11 Vehicular and pedestrian traffic.
500.12 Weapons and explosives.
500.13 Nondiscrimination.
500.14 Exceptions.
500.15 Penalties and other law.

Subpart B—Fee Schedule for Certain Uses of National Arboretum Facilities and Grounds

500.20 Scope.
500.21 Fee schedule for tram and tours.
500.22 Fees and conditions for use of facilities and grounds.
500.23 Fees for commercial photography and cinematography on grounds.
500.24 Fee schedule.
500.25 Payment of fees.

AUTHORITY: 20 U.S.C. 196(a); sub secs. 2, 4, 5; 40 U.S.C. 121(d); 40 U.S.C. 1315(c).
SOURCE: 70 FR 55708, Sept. 23, 2005, unless otherwise noted.

Subpart A—Conduct on U.S. National Arboretum Property

§ 500.1 General.

The rules and regulations in this part apply to the buildings and grounds of the U.S. National Arboretum (USNA), Washington, DC, and to all persons entering in or on such property. The Administrator, General Services Administration, has delegated to the Secretary of Agriculture, with authority to further delegate, the authority to make all the needful rules and regulations for the protection of the buildings and grounds of the USNA (34 FR 6406). The Secretary of Agriculture has in turn delegated such authority to the Administrator, Agricultural Research Service (34 FR 7389). The rules and regulations in this part are issued pursuant to such delegations.

§ 500.2 Recording presence.

Admission to the USNA during periods when it is closed to the public will be limited to authorized individuals who may be required to sign the register or display identification documents when requested by the Security Staff, or other authorized individuals.

§ 500.3 Preservation of property.

(a) While at the USNA, it is unlawful to:
(1) Willfully destroy, damage, or remove USNA property or any part thereof;
(2) Set or maintain any open fire on the property of the USNA; however, the use of small candles may be approved at the discretion of the Director, USNA; or
(3) Apply any type of insecticide or herbicide on the grounds of the USNA, except for USNA employees in the course of their official duties or other persons authorized by the Director, USNA.

(b) Persons not employed by USNA are not permitted to bring biological agents of any kind, including but not limited to disease and pest agents of plants, onto the property without written permission of the Director, USNA.

§ 500.4 Conformity with signs and emergency directions.

Persons in and on property of the USNA shall comply with official signs of prohibitory or directive nature and with the directions of authorized individuals.

§ 500.5 Nuisances.

(a) The use of loud, abusive, or otherwise improper language; unwarranted loitering, sleeping, or assembly; the creation of any hazard to persons or things; improper disposal of rubbish; spitting; prurient prying; the commission of any obscene or indecent act, or any other unseemly or disorderly conduct; throwing articles of any kind from a building, and climbing upon any part of a building is prohibited.

(b) Playing of music or creation of other noises of a decibel level high
enough to be heard outside of the USNA is prohibited.

§ 500.6 Gambling.

Participating in games for money or other personal property, or the operation of gambling devices, the conduct of a lottery or pool, or the selling or purchasing of numbers tickets, in or on USNA property, is prohibited.

§ 500.7 Intoxicating beverages and narcotics.

(a) Entering USNA property or the operation of a motor vehicle thereon, by a person under the influence of intoxicating beverages or a narcotic drug, is prohibited.

(b) Except as provided in subpart B of this part, possession of or consumption of intoxicating beverages on USNA property is prohibited.

(c) The sale of alcoholic beverages on the grounds of the USNA is prohibited.

(d) The possession of or use of narcotic drugs on the grounds of the USNA is prohibited.

§ 500.8 Soliciting, vending, debt collection, and distribution of handbills.

(a) The following activities are prohibited on USNA grounds:

(1) Soliciting of alms or contributions;

(2) Display or distribution of commercial advertising;

(3) Collecting private debts;

(4) Campaigning for election to any office;

(5) Soliciting and vending for commercial purposes (including, but not limited to, the vending of newspapers and other publications);

(6) Soliciting signatures on petitions, polls, or surveys (except as authorized by the USNA); and

(7) Impeding ingress to or egress from the USNA.

(b) Distribution to USNA general public visitors of material such as pamphlets, handbills, and flyers is prohibited without prior approval of the Director, USNA.

(c) The prohibitions in paragraphs (a) and (b) of this section do not apply to:

(1) Commercial or nonprofit activities performed under contract or concession with the USNA or pursuant to the provisions of the Randolph Sheppard Act;

(2) The solicitation of USNA personnel for contributions for the Combined Federal Campaign (CFC);

(3) National or local drives for funds for welfare, health, and other purposes sponsored or approved by the Agricultural Research Service; or

(4) Personal notices posted by employees on authorized bulletin boards.

§ 500.9 Photographs for news or advertising.

Photographs for news purposes may be taken at the USNA without prior permission. Photographs for advertising and other commercial purposes may be taken, but only with the prior approval of the Director, USNA and fees may be charged pursuant to § 500.23.

§ 500.10 Pets.

Pets brought upon USNA property must have proper vaccinations and, except assistance trained animals, must be kept on leash at all times. The release or abandonment of fish, plants, and animals of any kind on USNA grounds is prohibited.

§ 500.11 Vehicular and pedestrian traffic.

(a) Drivers of all vehicles in or on USNA property shall drive only on established roads, shall drive in a careful and safe manner at all times, and shall comply with the signals and directions of the Security Staff and all posted traffic signs.

(b) The blocking of entrances, driveways, walks, loading platforms, or fire hydrants, and parking in designated no parking areas in or on USNA property is prohibited.

(c) Except in emergencies, parking in or on USNA property in other than designated areas is not allowed without a permit. Parking without authority, parking in unauthorized locations or in locations reserved for other persons, or contrary to the direction of posted signs, is prohibited.

(d) USNA approval is required for all vehicles needed for access setup and
breakdown activities relating to special events, ceremonies, or related activities. Off-road routes will be determined by the USNA.

(e) In addition to the penalties provided in §500.15, vehicles parked in violation of this section are subject to being towed and the cost of such towing being assessed to the owner of such vehicle.

(f) This section may be supplemented from time to time, by the issuance and posting of specific traffic directives as may be required, and when so issued and posted such directives shall have the same force and effect as if incorporated in this subpart.

§ 500.12 Weapons and explosives.

(a) No person while in or on USNA property shall carry firearms, other dangerous or deadly weapons, or explosives, either openly or concealed, except for authorized official purposes.

(b) No person while in or on the USNA shall ignite fireworks or other pyrotechnical devices.

§ 500.13 Nondiscrimination.

The USNA is subject to the policy of nondiscrimination in programs or activities conducted by the United States Department of Agriculture as set forth in 7 CFR part 15d.

§ 500.14 Exceptions.

The Administrator, Agricultural Research Service, may in individual cases make prior, written exceptions to the rules and regulations in this part if it is determined to be not adverse to the public interest.

§ 500.15 Penalties and other law.

Whoever shall be found guilty of violating the rules and regulations in this subpart is subject to fine under title 18, United States Code, or imprisonment of not more than 30 days, or both (see 40 U.S.C. 1315(c)). Nothing contained in the rules and regulations in this part shall be construed as abrogating or authorizing the abrogation of any other regulations or any Federal law or any laws and regulations of the District of Columbia that may be applicable.

Subpart B—Fee Schedule for Certain Uses of National Arboretum Facilities and Grounds

§ 500.20 Scope.

This subpart sets forth schedules of fees for temporary use by individuals or groups of United States National Arboretum (USNA) facilities and grounds. This subpart also sets forth schedules of fees for the use of the USNA for commercial photography and cinematography. Fees generated will be used to offset costs of services or for the purposes of promoting the mission of the USNA. All rules and regulations noted in 7 CFR 500, subpart A—Conduct on the U.S. National Arboretum Property, will apply to individuals or groups granted approval to use the facilities and grounds for the purposes specified in this subpart.

§ 500.21 Fee schedule for tram and tours.

The USNA provides tours of the USNA grounds in a 48-passenger tram (accommodating 2 wheelchairs). The fee is as follows: $4.00 per adult, $3.00 per senior citizen or Friend of the National Arboretum, and $2.00 per child under the age 17. Children under 4 sharing a seat with an adult will not be charged. Pre-scheduled tram tours for groups may be arranged for a set fee of $125.00. Additionally, a tour guide may be pre-arranged to provide a non-tram tour for the fee of $50 per hour. Promotional programs offering discounted fees for these programs may be instituted at the discretion of the USNA. Payment for use of the tram is due at the time of ticket purchase. Payment for pre-scheduled tram tours must be made at least one week in advance. Payment for pre-scheduled, non-tram guided tours must be made at least one week in advance of the tour date.

§ 500.22 Fees and conditions for use of facilities and grounds.

(a) Fee requirement. (1) The USNA will charge a fee for temporary use by individuals or groups of USNA facilities and grounds. Fees for specific sites are listed in §500.24.

(2) Non-profit scientific or educational organizations whose purposes and interests are complementary to
the mission of the USNA and which substantially support the mission and purpose of the USNA (e.g., Friends of the National Arboretum, National Bonsai Foundation, National Capital Area Federation of Garden Clubs, Herb Society of America) may be exempted from the fee for use of USNA facility or grounds requirement of this subpart by the Director, but still must reimburse the USNA for its costs, including setup, clean-up, security, and other costs as applicable.

(3) A Half Day usage is defined as 4 hours or less; a Whole Day usage is defined as more than 4 hours in a day. In all cases, usage includes all time during which a venue is committed, including time used to set up before and clean up after an event. For after-hours usage of sites or facilities, an additional $40/hour will be added for supervision for each required staff member or security officer, with higher amounts required for sites or facilities that are more sensitive.

(b) Reservations.

(1) Facilities and grounds are available by reservation at the discretion of the Director of the USNA and may be available to individuals or groups for uses that are consistent with the mission of the USNA. Agency initiatives may be granted first priority. Offices and hallways inside secured doors will not be available for use.

(2) Reservations to use USNA facilities and grounds may be made directly with the USNA. To ensure consideration, reservation requests should be made as far in advance as possible with a minimum of 15 calendar days prior to the date of use required for all reservations. This advanced notice will provide the USNA adequate time to prepare sites and assign staff and supervision as necessary.

(3) The USNA will make every effort to respond to requests in a quick and timely fashion. The USNA will respond to reservation requests within 5 working days with information as to whether the requested site is available for use. The USNA will also give notice to the prospective user of any planned activities (construction, maintenance, pesticide applications, and any similar activities) that might affect the planned use or event.

(4) A Half Day usage is defined as 4 hours or less; a Whole Day usage is defined as more than 4 hours in a day. In all cases, usage includes all time during which a venue is committed, including time used to set up before and clean up after an event. For after-hours usage of sites or facilities, an additional $40/hour will be added for supervision for each required staff member or security officer, with higher amounts required for sites or facilities that are more sensitive.

(b) Reservations.

(1) Facilities and grounds are available by reservation at the discretion of the Director of the USNA and may be available to individuals or groups for uses that are consistent with the mission of the USNA. Agency initiatives may be granted first priority. Offices and hallways inside secured doors will not be available for use.

(2) Reservations to use USNA facilities and grounds may be made directly with the USNA. To ensure consideration, reservation requests should be made as far in advance as possible with a minimum of 15 calendar days prior to the date of use required for all reservations. This advanced notice will provide the USNA adequate time to prepare sites and assign staff and supervision as necessary.

(3) The USNA will make every effort to respond to requests in a quick and timely fashion. The USNA will respond to reservation requests within 5 working days with information as to whether the requested site is available for use. The USNA will also give notice to the prospective user of any planned activities (construction, maintenance, pesticide applications, and any similar activities) that might affect the planned use or event.

(4) A 50 percent non-refundable deposit will be due at the time of a booking in order to reserve a specific date and location. The remaining 50 percent is due five working days prior to the event.

(c) Terms and conditions of use.

(1) The USNA provides space, water, and electrical hookup when available, and restrooms where available. Users must provide all tents, tables, chairs, trash receptacles, or other property required for the scheduled event. Users must remove all trash from the property at the conclusion of the event. Users must remove all tents, tables and chairs, and other property no later than 5:00 p.m. of the day following the event. The USNA will charge a facility use and break down fee of $500.00 per day for each day following the deadline to remove temporary facilities and equipment. The USNA will not store temporary facilities or equipment for users.

(2) Users must abide by USNA vehicle regulations in §500.11 including the requirement to obtain USNA approval whenever off road access is required for setup.

(3) The USNA will not assume any responsibility for last minute changes due to failure of current mechanical systems, severe storms and other weather events, emergencies relating to security and safety.

(4) Some events that involve bringing animals and certain plants onto the USNA property may not be compatible with the plant research, display, and education mission of the USNA. Such events will be evaluated on a case-by-case basis and exceptions may be made by the Director of the USNA.

(5) Music and bands will be permitted but the decibel level of music should not be loud enough to be heard outside the boundaries of the USNA.

(6) (i) A refundable deposit as specified in paragraph (c)(6)(i) of this section for use of the facility, excluding the classroom, will be collected in advance. In the event of building, property, or grounds damage or excessive cleaning requirements, the deposit will be used for repair and remediation and the balance will be refunded within 30 days of the event date.
In the event that cleaning requirements or damage to the building, property or grounds exceeds the amount of the refundable deposit, the deposit will be used in full, with additional charges billed and due within 30 days of billing. Damages to plants, grounds, facilities, or equipment will be assessed on a value based on replacement costs, including labor.

(ii) *Refundable Deposit Schedule.*

(7) Upon prior request, the Director may approve the consumption of beer and wine during uses of USNA pursuant to this section. Such permission generally will not be granted during times when USNA is open to the public. Director approval shall be conditioned upon compliance by users and by any of their agents or contractors, with all applicable provisions of the District of Columbia Code governing sale and consumption of alcoholic beverages, including the rules of the District of Columbia Department of Consumer Affairs, Alcoholic Beverage Regulation Administration.

(8) All users of the USNA pursuant to this subpart, as well as all those contracting with such users of the USNA, shall comply with all Federal and local laws.

(9) The USNA is a Federal property under the jurisdiction of the United States Department of Agriculture. All activities are subject to Federal rules and regulations governing the use of public buildings and grounds.

(10) The USNA will not be responsible for any damage or loss suffered by an individual, group, or their contractor during a permitted event at the USNA.

(11) The Director may impose additional incidental terms and conditions concerning the use of the USNA facilities consistent with this part.

(12) Marriage ceremonies and accompanying receptions may only be held in the Dogwood Collection.

§ 500.23 *Fees for commercial photography and cinematography on grounds.*

The USNA may charge a fee for the use of the facility or grounds for purposes of commercial photography or cinematography as specified in §500.24. Facilities and grounds are available for use for commercial photography or cinematography at the discretion of the USNA Director. Requests for use should be made a minimum of two weeks in advance of the required date. The USNA will charge for supervision costs at the rate of $40.00 per hour per security officer, in addition to the fees listed below. The USNA Director may waive fees for photography or cinematography conducted for the purpose of disseminating information to the public regarding the USNA and its mission or for the purpose of First Amendment activity. The USNA will charge a non-refundable application fee of $30 for commercial photography or cinematography activities that use models, sets or props that are not part of the natural, cultural resources, or administrative facilities features of the site; take place where members of the public are generally not allowed; or take place at a location where additional administrative costs are likely. If the application is approved and fees will be incurred, the application fee will be applied to the total fee due. No other credits will be given for the application fee. Fee payments for use of facilities or grounds or for commercial photography and cinematography must be made in advance of services being rendered. These payments are to be made in the form of a check or money order.

* Fees include only access to sites; additional security charges may be necessary depending upon the site and the number of people participating.

### §500.25 Payment of fees.

(a) Unless provided otherwise, all payments due under this subpart must be made by cash, check, or money order (in U.S. funds). Checks and money orders for payment of any fees imposed under this part are to be made payable, in U.S. funds, to the "U.S. National Arboretum." Upon request, the USNA shall provide receipts to requesters for their records or billing purposes. If the USNA enters into an agreement to allow USNA visitors and users to make payment in the form of a credit card, USNA visitors and users who are assessed user fees may pay those fees with a credit card subject to the terms and conditions of such agreement.

(b) Any fees that become past due shall be collected in accordance with 7 CFR part 3.

Agricultural Research Service, USDA

§ 501.7 Intoxicating beverages and narcotics.

Entering Research Center property will be limited to authorized individuals who may be required to sign a register and display identification documents when requested by a guard or other authorized individual.

§ 501.8 Soliciting, vending, debt collection, and distribution of handbills.

§ 501.9 Photographs for news, advertising, or commercial purposes.

§ 501.10 Pets.

§ 501.11 Mobile equipment and pedestrian traffic.

§ 501.12 Weapons and explosives.

§ 501.13 Non-Federal law enforcement.

§ 501.14 Exceptions.

§ 501.15 Penalties and other law.

SOURCE: 37 FR 2423, Feb. 1, 1972, unless otherwise noted.

§ 501.1 General.

The rules and regulations in this part apply to all property of or under the charge or control of the U.S. Meat Animal Research Center, Clay Center, Nebr. (hereinafter referred to as the Research Center), and to all persons entering in or on such property. The Administrator, General Services Administration, has delegated to the Secretary of Agriculture, with authority to redelegate, the authority to make all the needful rules and regulations for the protection of the Research Center (36 FR 1293). The Secretary of Agriculture has delegated this authority to the Director of Science and Education (36 FR 21706) who in turn has delegated such authority to the Administrator, Agricultural Research Service (36 FR 21706). The rules and regulations in this part are issued pursuant to such delegations. It is the responsibility of occupant or cooperating agency to require observance of these rules and regulations.

§ 501.2 Admission.

Admission to the Research Center during “off duty” hours shall be restricted to the main arteries and any deviation therefrom by individuals shall be limited to authorized individuals who may be required to sign a register and display identification documents when requested by a guard or other authorized individuals. “Off duty” hours will be posted at the Research Center. Admission during “duy” hours when the Center is closed to the public in emergency situations
thereon, by a person under the influence of intoxicating beverages or narcotic drug, hallucinogen, marijuana, barbiturate, or amphetamine (unless prescribed by a physician) or the consumption of such beverages, or the use of any such drug or substance in or on the Research Center property, is prohibited.

§501.8 Soliciting, vending, debt collection, and distribution of handbills.

The soliciting of alms and contributions, commercial soliciting and vending of all kinds, the display or distribution of commercial advertising, or the collecting of private debts, in or on Research Center property, is prohibited. This section does not apply to national or local drives for funds for welfare, health, and other purposes sponsored or approved by the Agricultural Research Service, concessions, or personal notices posted by employees on authorized bulletin boards. Distribution of material such as pamphlets, handbills, and flyers or the posting of materials on bulletin boards or elsewhere, is prohibited without prior approval of authorized individuals.

§501.9 Photographs for news, advertising, or commercial purposes.

Except where security regulations apply, or a Federal court order or rules prohibit it, photographs for news purposes may be taken in entrances, lobbies, foyers or auditoriums when used for public meetings without prior permission. Photographs for advertising and commercial purposes may be taken only with the prior written permission of the Director, Research Center. Photographs for news, advertising, or commercial purposes may be taken in space or areas occupied by a cooperator only with the consent of the cooperator concerned and the Director, Research Center.

§501.10 Pets.

Animals shall be brought or allowed, as applicable, upon the Research Center only with the prior written approval of the Director, Research Center, except seeing eye dogs may be brought to the reception area serving the offices of the Director, Research Center, without prior approval.

§501.11 Mobile equipment and pedestrian traffic.

(a) Drivers, operators, or pilots of all equipment whether or not motorized in or on Research Center property, or within the scope of Research Center activity, shall operate in a careful and safe manner at all times and shall comply with the signals and directions of guards, special policemen, or other authorized individuals, and all posted traffic signs;

(b) The blocking of entrances, driveways, walks, railways, runways, loading platforms, or fire hydrants in or on Research Center property is prohibited;

(c) Except in emergencies, parking or landing in or on Research Center property in other than designated areas is not allowed without a permit. Parking without authority, parking in unauthorized locations or in locations reserved for other persons, or parking continuously in excess of ten hours without permission, or contrary to the direction of posted signs is prohibited. This section may be supplemented from time to time by the issuance and posting of specific traffic directives as may be required, and when so issued and posted such directives shall have the same force and effect as if made a part hereof;

(d) The operation of unlicensed gasoline powered vehicles is prohibited.

§501.12 Weapons and explosives.

No person while in or on Research Center property shall carry firearms, bows and arrows, darts, other dangerous or deadly weapons, or explosives, either openly or concealed, except as officially authorized, for official purposes.

§501.13 Nondiscrimination.

There shall be no discrimination by segregation or otherwise against any person or persons because of race, sex, religion, color, or national origin, in furnishing, or by refusing to furnish to such person or persons the use of any facility of a public nature, including all service, privileges, accommodations, and activities provided thereby on Research Center property.
Agricultural Research Service, USDA

§ 501.14 Non-Federal law enforcement.
Research Center special policemen may be deputized by State or local law enforcement agencies to exercise police power on property outside the Research Center. With the consent of any State or local law enforcement agency, the facilities or services of such State or local law enforcement agency may be utilized by the Research Center.

§ 501.15 Exceptions.
The Administrator, Agricultural Research Service, may in individual cases make prior, written exceptions to the rules and regulations in this part if he determines it to be not adverse to the public interest.

§ 501.16 Penalties and other law.
Whoever shall be found guilty of violating the rules and regulations in this part where the United States has and exercises exclusive or concurrent legislative jurisdiction, is subject to fine of not more than $50 or imprisonment or not more than 30 days, or both (see 40 U.S.C. 318c). Nothing contained in the rules, regulations, or penalties in this part shall be construed as abrogating or authorizing the abrogation of any other rules, regulations, penalties, or any Federal law, or any State and local laws and regulations which may be applicable.

SOURCE: 37 FR 2424, Feb. 1, 1972, unless otherwise noted.

§ 502.1 General.
The rules and regulations in this part apply to the buildings and grounds of the Beltsville Agricultural Research Center (BARC), Beltsville, MD, and to any persons entering in or on such property. The Administrator, General Services Administration, has delegated to the Secretary of Agriculture, with authority to delegate, the authority to make all the needful rules and regulations for the protection of the buildings, grounds, equipment, and experimental plants and animals of BARC (36 FR 18440). The Secretary of Agriculture has delegated this authority to the Under Secretary for Research, Education, and Economics (60 FR 56392) who in turn has delegated such authority to the Administrator, Agricultural Research Service (60 FR 56392). The rules and regulations in this part are issued pursuant to such delegations.

[61 FR 51211, Oct. 1, 1996]

§ 502.2 Admission.
Admission to BARC during “off duty” hours shall be restricted to the main arteries and any deviation therefrom by individuals shall be limited to authorized individuals who may be required to sign a register and display identification documents when requested by BARC Security or other authorized individual. “Off duty” hours will be posted at BARC. Admission during “duty” hours when BARC is closed to the public in emergency situations will be limited to authorized individuals who may be required to sign a register and display identification documents when requested by BARC Security or other authorized individual.

[61 FR 51211, Oct. 1, 1996]

§ 502.3 Preservation of property.
It is unlawful to willfully destroy, damage, or remove property or any part thereof.
§ 502.4 Conformity with signs and emergency directions.

Persons in and on property of BARC shall comply with official signs of a prohibitory or directory nature, and with the directions of authorized individuals.

[61 FR 51211, Oct. 1, 1996]

§ 502.5 Nuisances.

The use of loud, abusive or otherwise improper language, unwarranted loitering, sleeping, or assembly, the creating of any hazard to persons or things, improper disposal of rubbish, spitting, prurient prying, the commission of any obscene or indecent act, or any other unseemly or disorderly conduct, throwing articles of any kind from a building, or climbing upon any part of a building is prohibited. Further, conduct which obstructs the usual use of entrances, foyers, corridors, office elevators, stairways and parking lots, or which otherwise tends to impede or disturb BARC employees in the performance of their duties or which otherwise impedes the general public from obtaining the administrative services provided by BARC is prohibited.

[61 FR 51211, Oct. 1, 1996]

§ 502.6 Hunting, fishing, camping, horseback riding.

The use of BARC grounds for any form of hunting, fishing, camping, or horseback riding is prohibited. Further, the use of these grounds for unauthorized picnicking is also prohibited.

[61 FR 51211, Oct. 1, 1996]

§ 502.7 Gambling.

Participating in games for money or other personal property, or the operation of gambling devices, the conduct of a lottery or pool, or the selling or purchasing of numbers tickets, in or on BARC property, is prohibited.

[61 FR 51211, Oct. 1, 1996]

§ 502.8 Intoxicating beverages and narcotics.

Entering BARC property or the operation of a motor vehicle thereon, by a person under the influence of intoxicating beverages or narcotic drug, hallucinogen, marihuana, barbiturate, or amphetamine (unless prescribed by a physician) or the consumption of such beverages, or the use of any such drug or substance in or on BARC property, is prohibited.

[61 FR 51211, Oct. 1, 1996]

§ 502.9 Soliciting, vending, debt collection, and distribution of handbills.

The soliciting of alms and contributions, commercial soliciting and vending of all kinds or the display or distribution of commercial advertising, or the collecting of private debts, in or on BARC property, is prohibited. This section does not apply to national or local drives for funds for welfare, health, and other purposes sponsored or approved by the Agricultural Research Service, concessions, or personal notices posted by employees on authorized bulletin boards. Distribution of material such as pamphlets, handbills, and flyers or the posting of materials on bulletin boards or elsewhere is prohibited without prior approval of the Director, Beltsville Area.

[61 FR 51211, Oct. 1, 1996]

§ 502.10 Photographs by visitors or for news, advertising, or commercial purposes.

Photographs may be taken by visitors or for news purposes without prior permission. Photographs for advertising and commercial purposes may be taken at BARC only with the prior written approval of the Director, Beltsville Area.

[61 FR 51212, Oct. 1, 1996]

§ 502.11 Pets.

Pets, except assistance trained animals, brought upon BARC property must be kept on a leash and have proper vaccinations. Pets that are the property of employees residing on BARC must be up to date on their vaccinations, in accordance with State or local laws, and be kept on a leash or similarly restrained. The abandonment of unwanted animals on BARC grounds is prohibited.

[61 FR 51212, Oct. 1, 1996]
§ 502.12 Vehicular and pedestrian traffic.

(a) Drivers of all vehicles whether or not motorized in or on BARC property shall drive in a careful and safe manner at all times and shall comply with the signals and directions of the security staff and all posted traffic signs;

(b) The blocking of entrances, drives, walks, loading platforms, or fire hydrants in or on BARC property is prohibited;

(c) Except in emergencies, parking in or on BARC property in other than designated areas is not allowed without a permit. Parking without authority, parking in unauthorized locations or in locations reserved for other persons, or contrary to the direction of posted signs is prohibited. This section may be supplemented from time to time, by the issuance and posting of specific traffic directives as may be required, and when so issued and posted such directives shall have the same force and effect as if made a part hereof.

(d) The operation of unlicensed gasoline powered vehicles is prohibited.

§ 502.13 Weapons and explosives.

No person while in or on BARC property shall carry firearms, other dangerous or deadly weapons, or explosives, either openly or concealed, except as officially authorized for official purposes.

[61 FR 51212, Oct. 1, 1996]

§ 502.14 Nondiscrimination.

There shall be no discrimination by segregation or otherwise against any person or persons because of race, religion, color, sex, age, disability or national origin, in furnishing, or by refusing to furnish to such person or persons the use of any facility of a public nature, including all services, privileges, accommodations, and activities provided thereby on BARC property.

[61 FR 51212, Oct. 1, 1996]

§ 502.15 Exceptions.

The Administrator, Agricultural Research Service, may in individual cases, make prior, written exceptions to the rules and regulations in this part, if a determination is made that the exception is not adverse to the public interest.

[61 FR 51212, Oct. 1, 1996]

§ 502.16 Penalties and other law.

Whoever shall be found guilty of violating the rules and regulations in this part is subject to fine of not more than $50 or imprisonment of not more than 30 days, or both (see 40 U.S.C. 318c). Nothing contained in the rules and regulations in this part shall be construed as abrogating or authorizing the abrogation of any other regulations or any Federal law or any laws and regulations of the State of Maryland.

General Services Administration, has delegated to the Secretary of Agriculture authority to make all needful rules and regulations, and to annex to such rules and regulations such reasonable penalties (not to exceed those prescribed in 40 U.S.C. 318c) as will ensure their enforcement for the protection of persons and property at Plum Island, New York. The Secretary of Agriculture has redelegated this authority to the Assistant Secretary for Conservation, Research, and Education, who in turn has delegated it to the Administrator, Agricultural Research Service (38 FR 31166).

§ 503.2  Admission.

No person will be admitted to PIADC, into animal holding areas, specified restricted areas, laboratory compounds, or into laboratories without having in his or her possession a specific approved pass or permit authorized by the Director, PIADC, to enter such areas. The pass must be presented at the request of the guard or other authorized PIADC safety representative.

§ 503.3  Preservation of property.

The willful destruction, damage to or removal of property or any part thereof from the Government-owned buildings, grounds, and vessels in or on the PIADC is prohibited.

§ 503.4  Conformity with Plum Island regulations.

Persons in and on PIADC shall at all times comply with official signs of a prohibitory or directory nature and with the directions of law enforcement or other authorized officials.

§ 503.5  Nuisances.

The use of loud, abusive or otherwise improper language, unwarranted littering, sleeping or assembly, the creation of any hazard to persons or things, improper disposal of rubbish, spitting, prurient prying, or the commission of any obscene or indecent act in or on the PIADC is prohibited.

§ 503.6  Camping, boating, and fishing.

The use of PIADC as a recreational area for camping, boating, fishing, and picnicking is prohibited. The use of Plum Island beaches for unauthorized landings and sightseeing is prohibited.

§ 503.7  Gambling.

Participating in games for money or other personal property, or the operation of gambling devices, the conduct of a lottery or pool, or the selling or purchasing of numbers tickets in or on the PIADC is prohibited.

§ 503.8  Intoxicating beverages and narcotics.

Entering the PIADC or operating a motor vehicle thereon by a person under the influence of intoxicating beverages or narcotic drugs, or the consumption of such beverages or the use of such drugs in or on the PIADC, is prohibited.

§ 503.9  Soliciting, vending, debt collection, and distribution of handbills.

The soliciting of alms and contributions, commercial soliciting and vending of all kinds, the display or distribution of commercial advertising, or the collecting of private debts, in or on PIADC is prohibited. This section does not apply to national or local drives for funds for welfare, health, and other purposes, sponsored or approved by the PIADC, or concessions or personal notices posted by employees on authorized bulletin boards. Unauthorized distribution of materials such as pamphlets, handbills, and flyers is prohibited.

§ 503.10  Photographs for news, advertising, commercial purposes or for personal use.

Photographs on the PIADC for news, advertising, commercial purposes, or personal use may be taken only with prior written permission of Director, PIADC.

§ 503.11  Pets.

No pets or animals of any kind may be brought to the PIADC.

§ 503.12  Vehicular and pedestrian traffic.

Drivers of all vehicles on the PIADC Government-owned parking areas in PIADC shall drive in a careful and safe manner at all times and shall comply with the signals and directions of...
guards and all posted traffic signs. Pedestrians will also observe specific safety directives as may be issued and posted from time to time by the Director, PIADC, or his authorized representative.

§ 503.13 Weapons and explosives.

No person while in or on the PIADC shall carry firearms or other dangerous or deadly weapons or explosives either openly or concealed, except when authorized to do so for official purposes by the Director, PIADC, or his authorized representative.

§ 503.14 Nondiscrimination.

There shall be no discrimination by segregation or otherwise against any person or persons because of race, religion, sex, color, or national origin in furnishing or refusing to furnish to such person or persons the use of any facility of a public nature, including all services, privileges, accommodations and activities provided by the PIADC.

§ 503.15 Exceptions.

The Director, PIADC, may, in specific cases, make prior written exceptions to the rules and regulations in this part if he determines it to be in the best interest of the Government.

§ 503.16 Penalties and other law.

Whoever shall be found guilty of violating any rule or regulation in this part while in or on the PIADC is subject to a fine of not more than $50 or imprisonment of not more than 30 days, or both. (See 40 U.S.C. 318c.) Nothing contained in these rules and regulations shall be construed to abrogate any other Federal laws or regulations, or any State and local laws and regulations, applicable to the PIADC.

PART 504—USER FEES

§ 504.1 General statement.

This part sets forth fees to be charged for the deposit and distribution of microbial patent cultures. The fees set forth in this part are applicable to the Agricultural Research Service (ARS) Patent Culture Collection, Northern Regional Research Center, Peoria, Illinois.

§ 504.2 Fees for deposit and requisition of microbial cultures.

(a) Depositors of microbial cultures must pay a one-time $500 user fee for each culture deposited on or after November 1, 1983.

(b) For cultures deposited on or after November 1, 1983, requesters must pay a $20 user fee for each culture distributed. Cultures which were deposited on or after November 1, 1983 have an identification number greater than 15,722.

§ 504.3 Payment of fees.

(a) Payment of user fees must accompany a culture deposit or request.

(b) Payment shall be made by check, draft, or money order payable to USDA, National Finance Center.

§ 504.4 Exemptions from user fee charges.

(a) USDA laboratories and ARS cooperators designated by the Curator of the ARS Patent Culture Collection are exempt from fee assessments.

(b) The Curator of the ARS Patent Culture Collection is delegated the authority to approve and revoke exemptions from fee assessments.

§ 504.5 Address.

Deposits of and requests for microbial patent cultures should be directed to the Curator, ARS Patent Culture Collection, Northern Regional Research Center, USDA-ARS, 1815 N. University St., Peoria, Illinois 61604; (309) 685-4011.

PART 505—NATIONAL AGRICULTURAL LIBRARY FEES FOR LOANS AND COPYING

§ 505.1 Scope and purpose.
§ 505.1 Scope and purpose.

These regulations establish fees for loans, copying, or reproduction of materials in the collections of the National Agricultural Library (NAL) within the United States Department of Agriculture (USDA).

§ 505.2 Fees for loans, copying, and reproduction of materials in library collections.

(a) NAL will provide interlibrary loan service (including loans of original materials from its collections and copies of portions of documents with copyright compliance) and charge fees for such service to other non-Federal and non-USDA libraries and institutions. Loans will be provided within the United States and Canada only. Copies will be provided within the United States and internationally.

(b) Interlibrary loan service will be provided at a flat fee of $18 per request for libraries paying electronically through the Online Computer Library Center’s (OCLC) Interlibrary Loan Fee Management (IFM) program and at a flat rate of $25 per request for libraries paying by other methods.

(c) Cost for replacement of lost or damaged items will be the actual cost to purchase a replacement plus a $50.00 processing fee; or if replacement cost cannot be determined, a flat rate of $75.00 for monographs or $150.00 for audiovisuals per item plus a $50.00 processing fee.

(d) Photographic services from NAL Special Collections will be charged at cost for reproduction of the photo product (slides, transparencies, etc.) plus a preparation fee of $25.00 per half hour or fraction thereof.

§§ 505.3-505.5 [Reserved]

§ 505.6 Payment of fees.

NAL charges for interlibrary loans through OCLC’s IFM Program (an electronic debit/credit payment program for libraries using OCLC’s resource sharing service) or by invoice through the National Technical Information Service (NTIS) of the United States Department of Commerce. Payment for invoiced services will be made by check, money order, or credit card in U.S. funds directly to NTIS upon receipt of invoice from NTIS. NAL encourages users to establish deposit accounts with NTIS for payment of interlibrary loan fees. Subject to a reduction for the actual costs of performing the invoicing service by NTIS, all funds will be returned to NAL for credit to the appropriations account charged with the cost of processing the interlibrary loan request.
Agricultural Research Service, USDA

§ 520.1 General statement.

These procedures assure that research and other activities of the Agricultural Research Service (ARS) comply with the intent of the National Environmental Policy Act of 1969 (NEPA) and appropriate regulations implementing this Act. These procedures incorporate and supplement, and are not a substitute for, CEQ regulations under 40 CFR parts 1500-1508, and Department of Agriculture NEPA Policies and Procedures under 7 CFR part 1b. ARS conducts and supports research as authorized by legislation to support one of the USDA goals of assuring adequate supplies of high quality food and fiber. Information generated through such research often forms the basic data

§ 520.5 Denials.

If the FOIA Coordinator determines that a requested record is exempt from mandatory disclosure and that discretionary release would be improper, the FOIA Coordinator shall give written notice of denial in accordance with §1.7(a) of this title.

§ 520.6 Appeals.

Any person whose request is denied shall have the right to appeal such denial. Appeals shall be made in accordance with §1.14 of this title and should be addressed as follows: Administrator, ARS, U.S. Department of Agriculture, Washington, DC 20250.

PART 520—PROCEDURES FOR IMPLEMENTING NATIONAL ENVIRONMENTAL POLICY ACT

Sec. 520.1 General statement. 520.2 Definition. 520.3 Policy. 520.4 Responsibilities. 520.5 Categorical exclusions. 520.6 Preparation of an Environmental Assessment (EA). 520.7 Preparation of an Environmental Impact Statement (EIS).

SOURCE: 51 FR 34191, Sept. 25, 1986, unless otherwise noted.
needed to assess the impact of a new technology upon the environment. Large scale projects simulating commercial practices are normally implemented in cooperation with other agencies of the Federal or State Governments.

§ 520.2 Definition.
Control Agents mean biological material or chemicals which are intended to enhance the production efficiency of an agricultural crop or animal such as through elimination of a pest.

§ 520.3 Policy.
(a) It is ARS policy to comply with the provisions of NEPA and related laws and policies.
(b) Environmental documents should be concise, written in plain language, and address the issues pertinent to the decision being made.
(c) Environmental documents may be substituted or combined with other reports which serve to facilitate decisionmaking.
(d) Costs of analyses and environmental documents are to be planned for during the budgetary process for the plan, program, or project. Special provisions for financing NEPA process activities which are unanticipated and extraordinary may be made in the Office of the Administrator of ARS.
(e) ARS personnel will cooperate with other agencies, States, contractors, or other entities proposing to undertake activities involving the ARS to assure that NEPA considerations are addressed early in the planning process to avoid delays and conflicts as required by 40 CFR 1501.2.
(f) For some activities, project participants outside ARS may be required to provide data and documentation. When an applicant or contractor prepares an environmental assessment (EA) or a contractor prepares an environmental impact statement (EIS), the activities shall be carried out according to 40 CFR 1506.5.
(g) Environmental documents, decision notices, and records of decision must be made available for review by the public. There shall be an early and open process for determining the scope of issues to be addressed in the environmental analysis process (40 CFR 1501.7).
(h) The concepts of tiering to eliminate repetitive discussions applicable to EIS’s (40 CFR part 1502) are also applicable to EA’s.
(i) ARS personnel may adopt an existing EA or EIS when a proposed action is substantially the same as the action for which the existing EA or EIS was prepared (40 CFR 1506.3 (b)).
(j) ARS personnel may incorporate by reference any existing documents in order to reduce the bulk of an EA or EIS (40 CFR 1502.21).
(k) After prior consultation with the Council on Environmental Quality, ARS personnel may forego preparation of an EA or EIS in emergency situations (40 CFR 1506.11).

§ 520.4 Responsibilities.
(a) Administrator. The Administrator is responsible for environmental analysis and documentation required for compliance with the provisions of NEPA and related laws, policies, plans, programs, and projects. The ARS Deputy Administrator for Natural Resources has been delegated responsibility for the establishment of procedures and coordination necessary to carry out the policies and provisions of NEPA.
(b) Deputy Administrators and Area Directors. The Deputy Administrators and Area Directors are responsible to the Administrator for assuring that ARS programs are in compliance with the policies and procedures of NEPA.

§ 520.5 Categorical exclusions.
For the following categories of actions, the preparation of an EA or EIS is not required:
(a) Department of Agriculture categorical exclusions (7 CFR 1b.3). (1) Policy development, planning and implementation which are related to routine activities such as personnel, organizational changes or similar administrative functions;
(2) Activities which deal solely with the functions of programs, such as program budget proposals, disbursement, transfer or reprogramming of funds;
Agricultural Research Service, USDA

§ 520.7

(3) Inventories, research activities and studies, such as resource inventories and routine data collection when such actions are clearly limited in context and intensity;

(4) Educational and information programs and activities;

(5) Activities which are advisory and consultative to other agencies, public and private entities, and

(6) Activities related to trade representation and market development activities overseas.

(b) ARS categorical exclusions. ARS actions which, based on previous experience, have been found to have limited scope and intensity and produce little or no individual or cumulative impacts to the human environment. Some examples are:

(1) Repair, replacement of structural components or equipment, or other routine maintenance of facilities controlled in whole or in part by ARS;

(2) Research programs or projects of limited size and magnitude or with only short-term effects on the environment. Examples are:

(i) Research operations conducted within any laboratory, greenhouse or other contained facility where research practices and safeguards prevent environmental impacts such as the release of hazardous materials into the environment;

(ii) Inventories, studies or other such activities that have limited context and minimal intensity in terms of changes in the environment;

(iii) Testing outside of the laboratory, such as in small isolated field plots, which does not involve the use of control agents requiring containment precautions or either a special license or a permit from a regulatory agency.

(c) Exceptions to categorical exclusions. An environmental assessment shall be prepared for an activity which is normally within the purview of categorical exclusion if there are extraordinary circumstances which may cause such activity to have a significant environmental effect.

§ 520.6 Preparation of an Environmental Assessment (EA).

(a) Actions requiring EA. The following actions would normally require an EA:

(1) Programs, supported in the majority by ARS, which may assist in the transition of a particular technology from field evaluation stage to large-scale demonstration or simulated commercial phase;

(2) Field work having an impact on the local environment such as earth excavation, explosives, weather modifications, or other such techniques; and

(3) The testing outside the laboratory, such as small isolated field plots, of control agents which require containment precautions or either a special license or a permit from a regulatory agency.

(b) Multiple agencies actions. If more than one Federal agency participates in a program activity, the EA shall be prepared by the lead agency as provided in 40 CFR 1501.5.

(c) Format and conclusion. An EA can be in any format provided it covers in a logical and succinct fashion the information necessary for determining whether a proposed Federal action may have a significant environmental impact and thus warrant preparation of an EIS. The EA will contain the information required by 40 CFR 1508.9. This information will include brief discussions of the need for the project or other proposal, alternatives, environmental impacts of the proposed action and alternatives and a listing of agencies and persons consulted.

(d) Decision notice. Upon completion of an EA, the responsible official will consider the information it contains, decide whether an EIS is required or that no significant environmental impact will occur, and will document the decision and the reasons for it. The decision and the EA shall be available to the public in a manner appropriate to the situation. If there is a finding of no significant impact, the EA may be combined with the decision notice.

§ 520.7 Preparation of an Environmental Impact Statement (EIS).

(a) Actions requiring EIS. An EIS will normally be prepared for:

(1) Proposals for legislation which are determined to be a major Federal action significantly affecting the quality of the human environment; or,

(2) Other major Federal actions significantly affecting the quality of the
human environment. In the experience of ARS, an environmental impact statement shall normally be required in situations when a research project has advanced beyond the laboratory and small plot testing to full scale field testing over a very large area and involving the introduction of control agents.

(b) Notice of intent. If the responsible official recommends the preparation of an EIS, then the public shall be apprised of the decision. This notice shall be prepared according to 40 CFR 1508.22.

c) Draft and final EIS. The process of preparing the draft and final EIS, as well as the format, shall be according to 40 CFR parts 1502-1506.

(d) Decisionmaking and implementation. The responsible official may make a decision no sooner than thirty days after the notice of availability of the final EIS has been published in the FEDERAL REGISTER by the Environmental Protection Agency (40 CFR 1506.10). The decision will be documented in a Record of Decision required by 40 CFR 1502.2, and monitoring and mitigation activities will be implemented as required by 40 CFR 1505.3.

PART 550—GENERAL ADMINISTRATIVE POLICY FOR NON-ASSISTANCE COOPERATIVE AGREEMENTS

Subpart A—General

Sec.
550.1 Purpose and scope.
550.2 Definitions.
550.3 Applicability.
550.4 Eligibility.
550.5 Competition.
550.6 Duration.
550.7 Exceptions.
550.8 Conflicting policies and deviations.
550.9 Other applicable regulations.
550.10 Special Award Conditions.

Subpart B—Formation of Agreements

550.11 Purpose.
550.12 Statutory authorization required (REE Agency).
550.13 Mutuality of interest.
550.14 Indirect costs/tuition remission.
550.15 Resource contribution.
550.16 Project development.
550.17 Peer review.
550.18 Assurance/certifications.

Subpart C—Management of Agreements

FINANCIAL MANAGEMENT

550.19 Purpose.
550.20 Standards for financial management systems.
550.21 Funding availability.
550.22 Payment.
550.23 Program income.
550.24 Non-Federal audits.
550.25 Allowable costs.

PROGRAM MANAGEMENT

550.26 Monitoring program performance.
550.27 Prior approvals.
550.28 Publications and acknowledgement of support.
550.29 Press releases.
550.30 Advertising.
550.31 Questionnaires and survey plans.
550.32 Project supervision and responsibilities.
550.33 Administrative supervision.
550.34 Research misconduct.
550.35 Rules of the workplace.

EQUIPMENT/PROPERTY STANDARDS

550.36 Purpose of equipment/property standards.
550.37 Title to equipment.
550.38 Equipment.
550.39 Equipment replacement insurance.
550.40 Supplies and other expendable property.
550.41 Federally owned property.
550.42 Intangible property.

PROCUREMENT STANDARDS

550.43 Purpose of procurement standards.
550.44 Cooperator responsibilities.
550.45 Standards of conduct.
550.46 Competition.
550.47 Cost and price analysis.
550.48 Procurement records.
550.49 Contract administration.
550.50 Contract provisions.

REPORTS AND RECORDS

550.51 Purpose of reports and records.
550.52 Reporting program performance.
550.53 Financial reporting.
550.54 Invention disclosure and utilization reporting.
550.55 Retention and access requirements for records.

SUSPENSION, TERMINATION AND ENFORCEMENT

550.56 Purpose of suspension, termination, and enforcement.
550.57 Suspension and termination.
550.58 Enforcement.

Subpart D—Close Out

550.59 Purpose.
Agricultural Research Service, USDA

§ 550.2 Closeout procedures.
550.61 Subsequent adjustments and continuing responsibilities.
550.62 Collection of amounts due.

Authority: Section 1472(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3318(b)).

Source: 73 FR 54292, Sept. 19, 2008, unless otherwise noted.

Subpart A—General

§ 550.1 Purpose and scope.
This part establishes REE-wide standards of USDA’s award and administration of non-assistance cooperative agreements executed under the authority of Section 1472(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3318(b)). These agreements are neither procurement nor assistance in nature, and therefore, are not subject to the Federal Grant and Cooperative Agreements Act of 1977. Accordingly, proper use of these cooperative agreements will promote and facilitate partnerships between the REE Agency and the Cooperator in support of research, extension and education projects of mutual benefit to each party.

§ 550.2 Definitions.

Accrued expenditures means the charges incurred by the Cooperator during a given period requiring the provision of funds for:

(1) Goods and other tangible property received;
(2) Services performed by employees, contractors, subrecipients, and other payees; and
(3) Other amounts becoming owed under programs for which no current services or performance is required.

Acquisition cost of equipment means the net invoice price of the equipment, including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Other charges, such as the cost of installation, transportation, taxes, duty or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the Cooperator’s regular accounting practices.

Advance means a payment made to a Cooperator upon its request either before outlays are made by the Cooperator or through the use of predetermined payment schedules.

Authorized Departmental Officer (ADO) means the REE Agency’s official delegated authority to negotiate, award, administer, suspend, and terminate non-assistance cooperative agreements.

Authorized Departmental Officer’s Designated Representative (ADODR) means the REE Agency’s technical representative, acting within the scope of delegated authority, who is responsible for participating with the Cooperator in the accomplishment of a cooperative agreement’s objectives and monitoring and evaluating the Cooperator’s performance.

Award means a non-assistance cooperative agreement which provides money or in-kind services or property in lieu of money, to an eligible Cooperator. The term does not include: Financial assistance awards in the form of grants, cooperative agreements, loans, loan guarantees, interest subsidies, or insurance; direct payments of any kind to individuals; and contracts which are required to be entered into and administered under procurement laws and regulations.

Closeout means the process by which a REE Agency determines that all applicable administrative actions and all required work under the agreement has been completed by the Cooperator and REE Agency.

Contract means a procurement contract entered into by the cooperator or a subcontractor of the cooperator pursuant to the cooperative agreement.

Cooperator means any State agricultural experiment station, State cooperative extension service, all colleges and universities, other research or education institutions and organizations, Federal and private agencies and organizations, individuals, and any other party, either foreign or domestic, receiving an award from a REE Agency.
§ 550.2

Disallowed costs means those charges incurred under the cooperative agreement that REE determines to be unallowable, in accordance with the applicable Federal cost principles or other terms and conditions contained in the cooperative agreement.

Electronic Funds Transfer (EFT) means electronic payment methods used to transfer funds to a Cooperator’s bank account (including HHS/PMS).

Equipment means tangible nonexpendable personal property contributed or acquired by either an REE Agency or by the Cooperator, having a useful life of more than one year and an acquisition cost of $5000 or more per unit. However, consistent with Cooperator policy, lower limits may be established.

Funding period means the period of time when Federal funding is available for obligation by the Cooperator.

HHS-PMS means the Department of Health and Human Services/Payment Management System (also see EFT).

i-Edison (Interagency Edison) is a database, which provides Federal grantee/Cooperator organizations and participating Federal agencies with the technology to electronically manage extramural invention portfolios in compliance with Federal reporting requirements.

Intangible property means, trademarks, copyrights, patents and patent applications.

Obligations means the amounts of orders placed, contracts and grants awarded, services received and similar transactions during a given period that require payment by the Cooperator during the same or a future period.

OMB means the Office of Management and Budget.

Outlays or expenditures means charges made to the project or program. Outlays and expenditures also include cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase (or decrease) in the amounts owed by the Cooperator for goods and other property received, for services performed by employees, contractors, subrecipients, and other payees and other amounts becoming owed under programs for which no current services or performance are required.

Peer Review is a process utilized by REE Agencies to:

1. Determine if agency sponsored research projects have scientific merit and program relevance;
2. Provide peer input and make improvements to project design and technical approaches;
3. Provide insight on how to conduct the highest quality research in support of Agency missions and programs.

Personal property means property of any kind except real property. It may be tangible, having physical existence, or intangible, having no physical existence, such as copyrights, patents, or securities.

Principal Investigator (PI) means the individual, designated by the Cooperator, responsible for directing and monitoring the performance, the day-to-day activities, and the scientific and technical aspects of the Cooperator’s portion of a REE funded project. The PI works jointly with the ADODR in the development of project objectives and all other technical and performance related aspects of the program or project. See additional responsibilities of PI in § 550.32.

Prior approval means written approval by an ADO evidencing prior consent.

Program income means gross income earned by the Cooperator that is directly generated by a supported activity or earned as a result of the award. Program income includes, but is not limited to, income from fees for services performed, the use or rental of real or personal property acquired under federally funded projects, the sale of commodities or items fabricated under an award, and license fees and royalties on patents and copyrights. Program income does not include the receipt of principal on loans, rebates, credits, discounts, etc., or interest earned on any of them, or interest earned on advances of Federal funds.

Project costs means all allowable costs, incurred by the Cooperator and the REE Agency toward the completion of the project.

Project period means the period established in the cooperative agreement.
during which Federal contributions begin and end. 

Property means, unless otherwise stated, personal property, equipment, intangible property. 

Publications mean all types of paper based media including electronic and audio media. 

Real property means land, including land improvements, structures and appurtenances thereto, but excludes movable machinery and equipment. 

REE Agency means the USDA Agency that enters into a cooperative agreement with the cooperator. 

State Cooperative Institutions are defined in statute as institutions designated or receiving funds pursuant to: 

1. The First Morrill Act—The Land Grant Institutions. 
2. The Second Morrill Act—The 1890 Institutions. 
3. The Hatch Act of 1887—The State Agricultural Experiment Stations. 
6. Public Law 95-113, Section 1430—A college or university having an accredited college of veterinary medicine or a department of veterinary science or animal pathology or similar unit conducting animal health and disease research in a State Agricultural Experiment Station. 
7. Public Law 97-98, Section 1475b—Colleges, universities, and Federal laboratories having a demonstrated capacity in aquaculture research. 
8. Public Law 97-98, Section 1480—Colleges, universities, and Federal laboratories having a demonstrated capacity of rangeland research. 

Subaward means an award in the form of money or in-kind services or property in lieu of money, made under an award by a Cooperator to an eligible subrecipient or by a subrecipient to a lower tier subrecipient. 

Subrecipient means the legal entity to which a subaward is made and which is accountable to the Cooperator for the use of the funds provided. The term may include foreign or international organizations (such as agencies of the United Nations) at the discretion of the REE Agency. 

Suspension of an award is a separate action from suspension under Federal Agency regulations implementing Executive Orders 12549 and 12689, “Debarment and Suspension.” 

Suspension means an action by a REE Agency that temporarily withdraws Federal sponsorship under an award, pending corrective action by the Cooperator or pending a decision to terminate the award by the REE Agency. 

Termination means the cancellation of Federal sponsorship, in whole or in part, under an agreement at any time prior to the date of completion. 

Unliquidated obligations are the amount of obligations incurred by the Cooperator for which an outlay has not been recorded. 

Unobligated balance means the portion of the funds authorized by the REE Agency that has not been obligated by the Cooperator and is determined by deducting the cumulative obligations from the cumulative funds authorized. 

Unrecovered indirect cost means the difference between the amount awarded and the amount, which could have been awarded under the Cooperator’s approved negotiated indirect cost rate. 

USDA means the United States Department of Agriculture.
§ 550.5

State cooperative extension services, all colleges and universities, other research or education institutions and organizations, Federal and private agencies and organizations, individuals, and any other party, either foreign or domestic, to further research, extension, or teaching programs in the food and agricultural sciences. (7 U.S.C. 3318(b)(1)).

§ 550.5 Competition.

REE agencies may enter into non-assistance cooperative agreements, as authorized by this part, without regard to any requirements for competition. (7 U.S.C. 3318(e)).

§ 550.6 Duration.

REE may enter into non-assistance cooperative agreements for a period not to exceed five years.

§ 550.7 Exceptions.

This Part does not apply to:
(a) USDA Federal Financial Assistance agreements subject to 7 CFR 3015, 3016, or 3019.
(b) Procurement contracts or other agreements subject to the Federal Acquisition Regulation (FAR) or the Agriculture Acquisition Regulation (AgAR); or Agreements providing loans or insurance directly to an individual.

§ 550.8 Conflicting policies and deviations.

This part supersedes and takes precedence over any individual REE regulations and directives dealing with the award and administration of non-assistance cooperative agreements entered into under the delegated authority of 7 U.S.C. 3318(b). This part may only be superseded, in whole or in part, by either a specifically worded statutory provision or a waiver authorized by the USDA-REE-Administrative and Financial Management (AFM)-Extramural Agreements Division (EAD) or any successor organization. Responsibility for developing, interpreting, and updating this part is assigned to the USDA-REE-AFM-EAD or any successor organization.

§ 550.9 Other applicable regulations.

Related issuances are in other parts of the CFR and the U.S.C. as follows:
(a) 7 CFR Part 3017 “Governmentwide Debarment and Suspension”;
(b) 7 CFR Part 3018 “New Restrictions on Lobbying”;
(c) 7 CFR Part 3052 “Audits of States, Local Governments, and Nonprofit Organizations”;
(d) 7 CFR 3015.175(b) “Copyrights”;
(e) 37 CFR 401.14 “Standard Patent Rights Clause”;
(g) 42 U.S.C. 6962 “Resource Conservation and Recovery Act (RCRA)”.

§ 550.10 Special Award Conditions.

(a) REE Agencies may impose special conditions and/or additional requirements to a non-assistance agreement if a Cooperator:
(1) Has a history of poor performance,
(2) Is not financially stable,
(3) Has a management system that does not meet the standards prescribed in this Part,
(4) Has not conformed to the terms and conditions of a previous award, or
(5) Is not otherwise responsible.
(b) Special conditions and/or additional requirements may be added to an award provided that the Cooperator is notified in writing as to: the nature of the additional requirements, the reason why the additional requirements are being imposed, the nature of the corrective action needed, the time allowed for completing the corrective actions, and the method for requesting reconsideration of the additional requirements imposed. Any special conditions shall be promptly removed once the conditions that prompted them have been corrected.

Subpart B—Formation of Agreements

§ 550.11 Purpose.

Sections 550.12 through 550.18 prescribe instructions and other pre-award matters to be used in establishing a non-assistance cooperative agreement.

§ 550.12 Statutory authorization required (REE Agency).

REE Agencies must have programmatic statutory authority for the
proposed project prior to entering into any non-assistance cooperative agreement.

§ 550.13 Mutuality of interest.

The REE Agency shall document both parties interest in the project. Mutual interest exists when both parties benefit in the same qualitative way from the objectives of the agreement. If one party to the agreement would independently have an interest in the project, which is shared by the other party, and both parties pool resources to obtain the end result of the project, mutual interest exists.

§ 550.14 Indirect cost/tuition remission.

(a) Indirect cost—(1) State Cooperative Institutions. Payment of indirect costs to State Cooperative Institutions in connection with non-assistance cooperative agreements awarded under the authority of 7 U.S.C. 3318(b) is prohibited. This prohibition does not apply to funds for international agricultural programs conducted by a State cooperative institution and administered by the Secretary or to funds provided by a Federal agency for such cooperative program or project through a fund transfer, advance or reimbursement. (7 U.S.C. 3319.)

(2) Non-profit organizations. Payment of indirect costs to non-profit institutions in connection with USDA cooperative agreement, under the authority of 7 U.S.C. 3318(b), is limited to 10 percent of the total direct cost of the project. (Annual Appropriations Bill for Agriculture and Related agencies, General Provisions.)

(3) All other cooperating organizations. With the exception of paragraphs (a)(1) and (2) of this section, payment of indirect costs is allowable in connection with REE non-assistance cooperative agreements. Reimbursement of indirect costs is limited to the percentage established in the Cooperators negotiated indirect cost rate schedule.

(b) Tuition remission—(1) State Cooperative Institutions. Reimbursement of tuition expenses to State Cooperative Institutions in connection with REE non-assistance cooperative agreements is prohibited. (7 U.S.C. 3319)

(2) All other cooperating organizations. Except for paragraph (b)(1) of this section, tuition remission is an allowable expense as determined in accordance with the cost principles applicable to the Cooperator. REE agencies shall negotiate and approve such payments as related to the scope and objectives of the non-assistance agreement.

§ 550.15 Resource contribution.

Each party must contribute resources towards the successful completion of the project. Required resource contributions must be substantial enough to substantiate a true stake in the project as determined by the ADO.

(a) REE Agency’s contribution. The REE Agency’s contribution must consist of the total in-house costs to the REE Agency and the total amount to be reimbursed by the REE Agency to the Cooperator for all allowable costs agreed to in advance as reflected in the cooperative agreement.

(b) Cooperator’s contribution. (1) The Cooperator’s contribution must be no less than 20 percent of the total of the resource contributions under the cooperative agreement. Resource contributions of the Cooperator must consist of a sufficient amount of itemized direct costs to substantiate a true stake in the project as determined by the ADO. The Cooperator’s contribution must be maintained at 20 percent of Federal funding throughout the life of the cooperative agreement.

(2) Cooperators share of contributions may consist of “in-kind” contributions and may also include unrecoverable indirect costs. Such costs may be accepted as part of the Cooperator’s resource contribution when all of the following criteria are met:

(i) Costs are verifiable from the Cooperator’s records.

(ii) Costs are not included as contributions for any other federally assisted project or program.

(iii) Costs are necessary and reasonable for proper and efficient accomplishment of project or program objectives.

(iv) Costs are allowable under the applicable cost principles.
(v) Costs are not paid by the Federal Government under another award, except where authorized by Federal statute to be used for cost sharing or matching.

(vi) Costs conform to other provisions of this Part, as applicable.

(3) Volunteer services furnished by professional and technical personnel, consultants, and other skilled and unskilled labor may be counted as resource contributions if the service is an integral and necessary part of an approved project or program. Rates for volunteer services shall be consistent with those paid for similar work in the Cooperator’s organization. In those instances in which the required skills are not found in the Cooperator organization, rates shall be consistent with those paid for similar work in the labor market in which the Cooperator competes for the kind of services involved. In either case, paid fringe benefits that are reasonable, allowable, and allocable may be included in the valuation.

(4) When an employer other than the Cooperator furnishes the services of an employee, these services shall be valued at the employee’s regular rate of pay (plus an amount of fringe benefits that are reasonable, allowable, and allocable, but exclusive of overhead costs), provided these services are in the same skill for which the employee is normally paid.

(5) Donated supplies may include such items as expendable equipment, office supplies, laboratory supplies or workshop and classroom supplies. Value assessed to donated supplies included in the cost sharing or matching share shall be reasonable and shall not exceed the fair market value of the property at the time of the donation.

(6) The value of donated property shall be determined in accordance with the usual accounting policies of the Cooperator, with the following qualifications:

(i) The value of donated land and buildings shall not exceed its fair market value at the time of donation to the Cooperator as established by an independent appraiser (e.g., certified real property appraiser or General Services Administration representative) and certified by a responsible official of the Cooperator.

(ii) The value of donated equipment shall not exceed the fair market value of equipment of the same age and condition at the time of donation.

(iii) The value of donated space shall not exceed the fair rental value of comparable space and facilities in a privately owned building in the same locality.

(iv) The value of loaned equipment shall not exceed its fair rental value.

(v) The following requirements pertain to the Cooperator’s supporting records for in-kind contributions from third parties.

(A) Volunteer services shall be documented and, to the extent feasible, supported by the same methods used by the Cooperator for its own employees.

(B) The basis for determining the valuation for personal service, material, equipment, buildings, and land shall be documented.

§ 550.16 Project development.

REE provides partial funding to Cooperators to support research projects that contribute to REE program objectives and help carry out the REE mission. The Cooperator’s PI and the REE Agency’s ADODR shall jointly develop the following documentation:

(a) Project plan. A plan that shall be jointly developed by the REE ADODR and the Cooperator that is compliant with an REE program requirement. The project plan will utilize the REE provided format for external peer review.

(b) Statement of work. A detailed statement of work shall be jointly planned, developed and prepared by the Cooperator’s PI and the awarding Agency’s ADODR consisting of the following:

(1) Objective
(2) Approach
(3) Statement of Mutual Interest
(4) Performance Responsibilities
(5) Mutual Agreements

(c) Budget. A plan that shall be jointly developed by the REE ADODR and the Cooperator PI outlining the following resource contributions:

(1) Total amount to be reimbursed by the REE Agency to the Cooperator. (Direct and Indirect Costs as applicable)
§ 550.17 Peer review.

Upon request of the REE Agency, cooperators may be requested to provide documentation in support of peer review activities and cooperator personnel may be requested to participate in peer review forums to assist the REE Agency in their reviews.

§ 550.18 Assurances/certifications.

(a) Governmentwide Debarment and Suspension (Non procurement)—7 CFR 3017;

(b) Governmentwide requirements for Drug-Free Workplace—7 CFR 3021;

(c) Non-discrimination. The Cooperator assures compliance with the following requirement: No person in the United States shall, on the grounds of race, color, national origin, sex, age, religion, political beliefs, or disability, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any project or activity under a non-assistance cooperative agreement.

(d) Protection of human subjects requirements. The Cooperator assures compliance with the following provisions regarding the rights and welfare of human subjects:

(1) The Cooperator is responsible for safeguarding the rights and welfare of any human subjects involved in research, development, and related activities supported by this Agreement. The Cooperator may conduct research involving human subjects only as prescribed in the statement of work and as approved by the Cooperator’s Cognizant Institutional Review Board. Prior to conducting such research, the Cooperator shall obtain and document a legally sufficient informed consent from each human subject involved. No such informed consent shall include any exculpatory language through which the subject is made to waive, or to appear to waive, any of his or her legal rights, including any release of the Cooperator or its agents from liability for negligence.

(2) The Cooperator agrees to comply with U.S. Department of Health and Human Services’ regulations regarding human subjects, appearing in 45 CFR part 46 (as amended).

(3) It will comply with REE policy, which is to assure that the risks do not outweigh either potential benefits to the subjects or the expected value of the knowledge sought.

(4) Selection of subject or groups of subjects shall be made without regard to sex, race, color, religion, or national origin unless these characteristics are factors to be studied.

(e) Animal Welfare Act requirements. The Cooperator assures compliance with the Animal Welfare Act, as amended, 7 U.S.C. 2131, et seq., and the regulations promulgated thereunder by the Secretary of Agriculture (9 CFR, subchapter A) pertaining to the care, handling, and treatment of warm-blooded animals held or used for research, teaching, or other activities supported by Federal funds. The Cooperator may request registration of facilities and a current listing of licensed dealers from the Regional Office of the Animal and Plant Health Inspection Service (APHIS), USDA, for the Region in which their facility is located. The location of the appropriate APHIS Regional Office, as well as information concerning this requirement, may be obtained by contacting the Senior Staff Officer, Animal Care Staff, USDA/APHIS, 4700 River Road, Riverdale, Maryland 20737.

(f) Recombinant DNA research requirements. The Cooperator assures that it will assume primary responsibility for implementing proper conduct on recombinant DNA research and it will comply with the National Institute of Health Guidelines for Recombinant DNA Research, as revised.

(1) If the Cooperator wishes to send or receive registered recombinant DNA material which is subject to quarantine laws, permits to transfer this material into the U.S. or across state lines may be obtained by contacting USDA/APHIS/PPQ, Scientific Services—Biotechnology Permits, 4700 River Road, Unit 133, Riverdale, Maryland 20737. In the event that the Cooperator has not established the necessary biosafety committee, a request for guidance or assistance may be made to the USDA Recombinant DNA Research Officer.
§ 550.19

(2) [Reserved]

(g) Agriculture Bioterrorism Protection Act requirements. The Cooperator assures compliance with the Agriculture Bioterrorism Protection Act of 2002, as implemented at 7 CFR part 331 and 9 CFR part 121, by agreeing that it will not possess, use, or transfer any select agent or toxin without a certificate of registration issued by the Agency.

Subpart C—Management of Agreements

FINANCIAL MANAGEMENT

§ 550.19 Purpose.

Sections 550.20 through 550.25 of this subpart prescribe standards for financial management systems and program management requirements.

§ 550.20 Standards for financial management systems.

(a) REE agencies shall require Cooperators to relate financial data to performance data.

(b) Cooperators’ financial management systems shall provide for the following:

(1) Accurate, current, and complete disclosure of the financial results of each REE sponsored project or program in accordance with the reporting requirements set forth in § 550.53 of this part. REE requires financial reporting on an accrual basis; however, the Cooperator shall not be required to establish an accrual accounting system. These Cooperators shall develop such accrual data through best estimate for their reports on the basis of an analysis of the documentation on hand.

(2) Records that identify the source and application of funds for federally sponsored activities. These records shall contain information pertaining to Federal awards, authorizations, obligations, unobligated balances, assets, outlays, income and interest.

(3) Effective control over and accountability for all funds, property and other assets. Cooperators shall adequately safeguard all such assets and assure they are used solely for authorized purposes.

(4) Comparison of outlays with budget amounts for each award. Whenever appropriate, financial information should be related to performance and unit cost data.

(5) Written procedures to minimize the time elapsing between the transfer of funds to the Cooperator from the U.S. Treasury and the issuance or redemption of a check, warrant or payment by other means for program purposes by the Cooperator. To the extent that the provisions of the Cash Management Improvement Act (CMIA) (Pub. L. 101-453) govern, payment methods of State agencies, instrumentalities, and fiscal agents shall be consistent with CMIA Treasury-State Agreements or the CMIA default procedures codified at 31 CFR part 205, “Rules and procedures for efficient Federal State funds transfer.”

(6) Written procedures for determining the reasonableness, allocability and allowability of costs in accordance with the provisions of the applicable Federal cost principles and the terms and conditions of the award.

(c) Where bonds are required in the situations described above, the bonds shall be obtained from companies holding certificates of authority as acceptable sureties, as prescribed in 31 CFR part 223, “Surety Companies Doing Business with the United States.”

§ 550.21 Funding availability.

The funding period will begin on the date of final signature, unless otherwise stated on the agreement, and continue for the project period specified on the cover page of the cooperative agreement.

§ 550.22 Payment.

(a) Payment methods shall minimize the time elapsing between the transfer of funds from the U.S. Treasury and the issuance or redemption of a check, warrant, or payment by other means by the Cooperators. Payment methods of State agencies or instrumentalities shall be consistent with Treasury-State CMIA agreements or default procedures codified at 31 CFR part 205.

(b) Reimbursement is the preferred method of payment. All payments to the Cooperator shall be made via EFT.
Agricultural Research Service, USDA § 550.22

(1) When the reimbursement method is used, the REE Agency shall make payment within 30 days after receipt of the billing, unless the billing is improper.

(2) Cooperators shall be authorized to submit requests for payment not more than quarterly and not less frequently than annually.

(3) Content of Invoice.
   At a minimum, the Cooperator’s invoice shall state the following:
   (i) The name and address of the Cooperator;
   (ii) The name and address of the PI;
   (iii) The name and address of the financial officer to whom payments shall be sent;
   (iv) A reference to the cooperative agreement number;
   (v) The invoice date;
   (vi) The time period covered by the invoice; and
   (vii) Total dollar amount itemized by budget categories (labor, direct costs, and indirect costs, etc.).

(4) To facilitate the EFT process, the Cooperator shall provide the following information:
   (i) The name, addresses, and telephone number of the financial institution receiving payment;
   (ii) The routing transit number of the financial institution receiving payment;
   (iii) The account to which funds are to be deposited; and
   (iv) The type of depositor account (checking or savings).

(c) If the REE Agency has determined that reimbursement is not feasible because the Cooperator lacks sufficient working capital, the REE Agency may provide cash on an advance basis provided the Cooperator maintains or demonstrates the willingness to maintain: Written procedures that minimize the time elapsing between the transfer of funds and disbursement by the Cooperator, and financial management systems that meet the standards for fund control and accountability as established in § 550.20. Under this procedure, the REE Agency shall advance cash to the Cooperator to cover its estimated disbursement needs for an initial period. The timing and amount of cash advances shall be as close as is administratively feasible to the actual disbursements by the Cooperator organization for direct program or project costs and the proportionate share of any allowable indirect costs.

(1) Advance payment mechanisms include, but are not limited to, Treasury check and electronic funds transfer.

(2) Advance payment mechanisms are subject to the requirements of 31 CFR part 205.

(3) Requests for advance payment shall be submitted on SF-270, “Request for Advance or Reimbursement.” This form is not to be used when advance payments are made to the Cooperator automatically through the use of a predetermined payment schedule or if precluded by special REE Agency instructions for electronic funds transfer.

(4) Cooperators shall maintain advances of Federal funds in interest bearing accounts, unless § 550.22(c)(4)(i), (ii), or (iii) applies.

(i) The Cooperator receives less than $120,000 in Federal awards per year.

(ii) The best reasonably available interest bearing account would not be expected to earn interest in excess of $250 per year on Federal cash balances.

(iii) The depository would require an average or minimum balance so high that it would not be feasible within the expected Federal and non-Federal cash resources.

(5) For those entities where CMIA and its implementing regulations do not apply, interest earned on Federal advances deposited in interest bearing accounts shall be remitted annually to Department of Health and Human Services, Payment Management System, Rockville, MD 20852. The Cooper-ator for administrative expense may retain interest amounts up to $250 per year. State universities and hospitals shall comply with CMIA, as it pertains to interest. If an entity subject to CMIA uses its own funds to pay preaward costs for discretionary awards without prior written approval from the REE Agency, it waives its right to recover the interest under CMIA. Thereafter, the REE Agency shall reimburse the Cooperator for its actual cash disbursements.

(6) Whenever possible, advances shall be consolidated to cover anticipated cash needs for all awards made by the REE Agency to the Cooperator. The
§ 550.23 Program income.

(a) REE Agencies shall apply the standards set forth in this section in requiring Cooperating organizations to account for program income related to projects financed in whole or in part with Federal funds.

(b) Except as provided in § 550.23(f), program income earned during the project period shall be retained by the Cooperator and shall be added to funds committed to the project by the REE Agency and Cooperator and used to further eligible project or program objectives.

(c) Cooperators shall have no obligation to the Federal Government regarding program income earned after the end of the project period.

(d) Costs incident to the generation of program income may be deducted from gross income to determine program income, provided these costs have not been charged to the award.

(e) Proceeds from the sale of property shall be handled in accordance with the requirements of the Property Standards (See §§ 550.36 through 550.42).

(f) Cooperators shall have no obligation to the Federal Government with respect to program income earned from license fees and royalties for copyrighted material, patents, patent applications, trademarks, and inventions produced under an award. However, Patent and Trademark Amendments (35 U.S.C. Chapter 25) apply to inventions made under an experimental, developmental, or research award.

§ 550.24 Non-Federal audits.

(a) Cooperators and subrecipients that are institutions of higher education or other non-profit organizations (including hospitals) shall be subject to the audit requirements contained in the Single Audit Act Amendments of 1996 (31 U.S.C. 7501-7507) and revised OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations."

(b) State and local governments shall be subject to the audit requirements contained in the Single Audit Act Amendments of 1996 (31 U.S.C. 7501-7507) and revised OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations."

(c) For-profit hospitals not covered by the audit provisions of revised OMB Circular A-133 shall be subject to the audit requirements of the REE agencies.

(d) Commercial organizations shall be subject to the audit requirements of the REE Agency or the prime recipient as incorporated into the award document.
§ 550.25 Allowable costs.

For each kind of Cooperator, there is a set of Federal principles for determining allowable costs. Allowability of costs shall be determined in accordance with the cost principles applicable to the entity incurring the costs. Thus, allowability of costs incurred by State, local or federally recognized Indian tribal governments is determined in accordance with the provisions of OMB Circular A-87, “Cost Principles for State, Local, and Indian Tribal Governments” codified at 2 CFR part 225. The allowability of costs incurred by non-profit organizations is determined in accordance with the provisions of OMB Circular A-122, “Cost Principles for Non-Profit Organizations” codified at 2 CFR part 230. The allowability of costs incurred by institutions of higher education is determined in accordance with the provisions of OMB Circular A-21, “Cost Principles for Educational Institutions” codified at 2 CFR 220. The allowability of costs incurred by hospitals is determined in accordance with the provisions of subpart E of 45 CFR part 74. The allowability of costs incurred by commercial organizations and those non-profit organizations listed in appendix C to Circular A-122 (2 CFR part 230) is determined in accordance with the contract cost principles and procedures of the Federal Acquisition Regulation (FAR) at 48 CFR part 31.

§ 550.26 Monitoring program performance.

(a) Cooperators are responsible for managing the day-to-day operations of REE nonassistance awards using their established controls and policies, as long as they are consistent with REE requirements. However, in order to fulfill their role in regard to the stewardship of Federal funds, REE Agencies monitor their agreements to identify potential problems and areas where technical assistance might be necessary. This active monitoring is accomplished through review of reports and correspondence from the cooperator, audit reports, site visits, and other information available to the REE Agency. It is the responsibility of the Cooperator to ensure that the project is being performed in compliance with the terms and conditions of the award.

(b) Monitoring of a project or activity will continue for as long as the REE Agency retains a financial interest in the project or activity. REE agencies reserve the right to monitor a project after it has been administratively closed out and no longer providing active support in order to resolve issues of accountability and other administrative requirements. Additional requirements regarding reporting and program performance can be found in §§ 550.51 through 550.55 of this part.

(c) The REE Agency reserves the right to perform site visits at Cooperator locations. Access to project or program records shall be provided in accordance with the provisions of §550.55.

§ 550.27 Prior approvals.

(a) The budget is the financial expression of the project or program as approved during the award process. REE agencies require that all Federal costs be itemized on the approved budget. The budget shall be related to performance for program evaluation purposes.

(b) Cooperators are required to report deviations from budget and program plans, and request prior approvals for budget and program plan revisions.

(c) Cooperators shall request prior approvals from REE Agencies for one or more of the following program or budget related reasons.

(1) Incur pre-award costs up to 90 days prior to award date. All pre-award costs are incurred at the Cooperator’s risk (i.e., the REE Agency is under no obligation to reimburse such costs if for any reason the Cooperator does not receive an award or if the award is less than anticipated and inadequate to cover such costs).

(2) Change in the scope or the objective of the project or program (even if there is no associated budget revision requiring prior written approval).

(3) The absence for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.
§ 550.28 Publications and acknowledgment of support.

(a) Publications. REE Agencies and the Federal Government shall enjoy a royalty-free, nonexclusive, and irrevocable right to reproduce, publish or otherwise use, and to authorize others to use, any materials developed in conjunction with a nonassistance cooperative agreement or contract under such an agreement.

(b)(1) Cooperators shall acknowledge ARS, Economics Research Service (ERS), National Agricultural Statistics Service (NASS), and the National Institute of Food and Agriculture (NIFA) support, whether cash or in-kind, in any publications written or published with Federal support and, if feasible, on any publication reporting the results of, or describing, a Federally supported activity as follows:

“This material is based upon work supported by the U.S. Department of Agriculture, —— (insert Agency name) —— under Agreement No. (Cooperator should enter the applicable agreement number here).”

(2) All such material must also contain the following disclaimer unless the publication is formally cleared by the awarding agency:

“Any opinions, findings, conclusion, or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the view of the U.S. Department of Agriculture.”

(3) Any public or technical information related to work carried out under a non assistance cooperative agreement shall be submitted by the developing party to the other for advice and comment. Information released to the public shall describe the contributions of both parties to the work effort. In the event of a dispute, a separate publication may be made with effective statements of acknowledgment and disclaimer.

(c) Media. Cooperators shall acknowledge awarding Agency support, as indicated in §550.28(b) above, in any form of media (print, DVD, audio production, etc.) produced with Federal support that has a direct production cost to the Cooperator of over $5,000. Unless the terms of the Federal award provide otherwise, this requirement does not apply to:

(1) Media produced under mandatory or formula grants or under sub awards.

(2) Media produced as research instruments or for documenting experimentation or findings and intended for presentation or distribution to a USDA/REE audience.

§ 550.29 Press releases.

Press releases or other forms of public notification will be submitted to the REE agency for review prior to release to the public. The REE Agency will be given the opportunity to review, in advance, all written press releases and any other written information to be released to the public by the
Cooperator, and require changes as deemed necessary, if the material mentions by name the REE Agency or the USDA, or any USDA employee or research unit or location.

§ 550.30 Advertising.

The Cooperator will not refer in any manner to the USDA or agencies thereof in connection with the use of the results of the project without prior specific written authorization by the awarding Agency. Information obtained as a result of the project will be made available to the public in printed or other forms by the awarding Agency at its discretion. The Cooperator will be given due credit for its cooperation in the project. Prior approval is required.

§ 550.31 Questionnaires and survey plans.

The Cooperator is required to submit to the REE Agency copies of questionnaires and other forms for clearance in accordance with the Paperwork Reduction Act of 1980 and 5 CFR part 1320.

§ 550.32 Project supervision and responsibilities.

(a) The Cooperator is responsible and accountable for the performance and conduct of all Cooperator employees assigned to the project. The REE Agency does not have authority to supervise Cooperator employees or engage in the employer employee relationship.

(b) The PI shall:

(1) Work jointly with the ADODR in the development of the project statement of work;

(2) Work jointly with the ADODR in the development of the project budget;

(3) Report, and obtain approval for, any change in the project budget;

(4) Report, and obtain approval for, any change in the scope or objectives of the project;

(5) Assure that technical project performance and financial status reports are submitted on a timely basis in accordance with the terms and conditions of the award;

(6) Advise the ADODR of any issues that may affect the timely completion of the project;

(7) Assure that the Cooperator meets its commitments under the terms and conditions of the non-assistance agreement;

(8) Assure that appropriate acknowledgements of support are included in all publications, in accordance with §550.28 of this part;

(9) Assure that inventions are appropriately reported in accordance with §550.54 of this part; and

(10) Upon request, provide the REE Agency with a project plan for use for external peer review.

§ 550.33 Administrative supervision.

REE employees are prohibited from engaging in matters related to cooperator employer/employee relations such as personnel, performance and time management issues. The cooperator is solely responsible for the administrative supervision of its employees.

§ 550.34 Research misconduct.

(a) The Cooperator bears the primary responsibility for prevention and detection of research misconduct and for the inquiry, investigation and adjudication of research misconduct alleged to have occurred in association with their own institution.

(b) The Cooperator shall:

(1) maintain procedures for responding to allegations or instances of research misconduct that has the following components:

(i) Objectivity;

(ii) Due process;

(iii) Whistle blower protection;

(iv) Confidentiality;

(v) Timely resolution;

(2) Promptly conduct an inquiry into any allegation of research misconduct;

(3) Conduct an investigation if an inquiry determines that the allegation or apparent instance of research misconduct has substance;

(4) Provide appropriate separation of responsibilities between those responsible for inquiry and investigation, and those responsible for adjudication;

(5) Advise REE Agency of outcome at end of inquiries and investigations into allegations or instances of research misconduct; and

(6) Upon request, provide the REE Agency, upon request, hard copy (or website address) of their policies and
§ 550.35 Rules of the workplace.

Cooperator employees, while engaged in work at the REE Agency's facilities, will abide by the Agency's standard operating procedures regarding the maintenance of laboratory notebooks, dissemination of information, equipment operation standards, hours of work, conduct, and other incidental matters stated in the rules and regulations of the Agency.

EQUIPMENT/PROPERTY STANDARDS

§ 550.36 Purpose of equipment/property standards.

Sections 550.37 through 550.42 of this part set forth uniform standards governing management and disposition of property furnished by the Federal Government or acquired by the Cooperator with funds provided by the Federal Government. The Cooperator may use its own property management standards and procedures provided it observes other applicable provisions of this Part.

§ 550.37 Title to equipment.

(a) As authorized by 7 U.S.C. 3318(d), title to expendable and nonexpendable equipment, supplies, and other tangible personal property purchased with Federal funding in connection with a non-assistance cooperative agreement shall vest in the Cooperator from date of acquisition unless otherwise stated in the cooperative agreement.

(b) Notwithstanding any other provision of this rule the REE Agency may, at its discretion, retain title to equipment described in paragraph (a) of this section that is or may be purchased with Federal funds when the REE agency determines that it is in the best interest of the Federal Government.

§ 550.38 Equipment.

(a) The Cooperator shall not use equipment acquired with Federal funds to provide services to non-Federal outside organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute, for as long as the Federal Government retains an interest in the equipment.

(b) The Cooperator shall use the equipment in the project or program for which it was acquired as long as needed, whether or not the project or program continues to be supported by Federal funds and shall not encumber the property without approval of the REE Agency. When no longer needed for the original project or program, the Cooperator shall use the equipment in connection with its other federally-sponsored activities, in the following order of priority:

(1) Activities sponsored by the REE Agency which funded the original project, then
(2) Activities sponsored by other Federal awarding agencies.

(c) During the time that equipment is used on the project or program for which it was acquired, the Cooperator shall make it available for use on other projects or programs if such other use will not interfere with the work on the project or program for which the equipment was originally acquired as may be determined by the REE Agency. First preference for such other use shall be given to other projects or programs sponsored by the REE Agency which funded the original project, then other projects or programs sponsored by the REE Agency, then other projects or programs sponsored by other Federal awarding agencies. If equipment is owned by the Federal Government, use on other activities not sponsored by the Federal Government shall be permissible if authorized by the REE Agency. User charges shall be treated as program income.

(d) When acquiring replacement equipment, unless otherwise directed by the REE Agency, the Cooperator shall use the equipment to be replaced as trade-in or sell the equipment and
use the proceeds to offset the costs of the replacement equipment subject to the approval of the REE Agency.

(e) The Cooperator’s property management standards for equipment acquired with Federal funds and federally owned equipment shall include all of the following:

(1) Equipment records shall be maintained accurately and shall include the following information:
   (i) A description of the equipment;
   (ii) Manufacturer’s serial number, model number, Federal stock number, national stock number, or other identification number;
   (iii) Source of the equipment, including the award number;
   (iv) Whether title vests in the Cooperator or the Federal Government;
   (v) Acquisition date (or date received, if the equipment was furnished by the Federal Government) and cost;
   (vi) Information from which one can calculate the percentage of Federal participation in the cost of the equipment (not applicable to equipment furnished by the Federal Government);
   (vii) Location and condition of the equipment and the date the information was reported;
   (viii) Unit acquisition cost; and
   (ix) Ultimate disposition data, including date of disposal and sales price or the method used to determine current fair market value where a Cooperator compensates the REE Agency for its share.

(2) Equipment owned by the Federal Government shall be identified to indicate Federal ownership.

(3) A physical inventory of equipment shall be taken and the results reconciled with the equipment records at least once every two years and a copy provided to the ADO responsible for the agreement. Any differences between quantities determined by the physical inspection and those shown in the accounting records shall be investigated to determine the causes of the difference. The Cooperator shall, in connection with the inventory, verify the existence, current utilization, and continued need for the equipment.

(4) A control system shall be in effect to insure adequate safeguards to prevent loss, damage, or theft of the equipment. Any loss, damage, or theft of equipment shall be investigated and fully documented. If the Federal Government owns the equipment, the Cooperator shall promptly notify the REE Agency.

(5) Adequate maintenance procedures shall be implemented to keep the equipment in good condition.

(6) Where the Cooperator is authorized or required to sell the equipment, proper sales procedures shall be established which provide for competition to the extent practicable and result in the highest possible return.

(f) When the Cooperator no longer needs the equipment, the equipment shall be used for other activities in accordance with the following standards. For equipment with a current per unit fair market value of $5,000 or more, the Cooperator may retain the equipment for other uses provided that compensation is made to the original REE Agency or its successor. The amount of compensation shall be computed by applying the percentage of Federal participation in the cost of the original project or program to the current fair market value of the equipment. If the Cooperator has no need for the equipment, the Cooperator shall request disposition instructions from the REE Agency. The REE Agency shall determine whether the equipment can be used to meet the Agency’s requirements. If no requirement exists within that Agency, the availability of the equipment shall be reported to the General Services Administration (GSA) by the REE Agency to determine whether a requirement for the equipment exists in other Federal agencies. The REE Agency shall issue instructions to the Cooperator no later than 120 calendar days after the Cooperator’s request and the following procedures shall govern.

(1) If so instructed or if disposition instructions are not issued within 120 calendar days after the Cooperator’s request, the Cooperator shall sell the equipment and reimburse the REE Agency an amount computed by applying to the sales proceeds the percentage of Federal participation in the cost of the original project or program. However, the Cooperator shall be permitted to deduct and retain from the Federal share $500 or ten percent of the
§ 550.39 Equipment replacement insurance.

If required by the terms and conditions of the award, the Cooperator shall provide adequate insurance coverage for replacement of equipment acquired with Federal funds in the event of loss or damage to such equipment.

§ 550.40 Supplies and other expendable property.

(a) Title to supplies and other expendable property shall vest in the Cooperator upon acquisition. If there is a residual inventory of unused supplies exceeding $5,000 in total aggregate value upon termination or completion of the project or program and the supplies are not needed for any other federally-sponsored project or program, the Cooperator shall retain the supplies for use on non-Federal sponsored activities or sell them, but shall, in either case, compensate the Federal Government for its share. The amount of compensation shall be computed in the same manner as for equipment.

(b) The Cooperator shall not use supplies acquired with Federal funds to provide services to non-Federal outside organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute as long as the Federal Government retains an interest in the supplies.

§ 550.41 Federally-owned property.

(a) Title to federally-owned property remains vested in the Federal Government. Cooperators shall submit annually an inventory listing of federally-owned property in their custody to the REE Agency. Upon completion of the award or when the property is no longer needed, the Cooperator shall report the property to the REE Agency for further Federal Agency utilization.

(b) If the REE Agency has no further need for the property, it shall be declared excess and reported to the GSA, unless the REE Agency has statutory authority to dispose of the property by alternative methods (e.g., the authority provided by the Federal Technology Transfer Act (15 U.S.C. 3710 (i)) to donate research equipment to educational and non-profit organizations in accordance with Executive Order 12996, “Education technology: ensuring Opportunity for all children in the next century.” Appropriate instructions shall be issued to the Cooperator by the REE Agency.

§ 550.42 Intangible property.

(a) The Cooperator may copyright any work that is subject to copyright
and was developed, by the Cooperator, or jointly by the Federal Government and the Cooperator, or for which ownership was purchased, under a cooperative agreement. REE Agencies reserve a royalty-free, nonexclusive and irrevocable right to reproduce, publish, or otherwise use the work for Federal purposes, and to authorize others to do so for Federal purposes.

(b) Cooperators are subject to applicable regulations governing patents and inventions, including government-wide regulations issued by the Department of Commerce at 37 CFR part 401, "Rights to Inventions Made by Non-profit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements."

(c) The REE Agency has the right to:
(1) Obtain, reproduce, publish or otherwise use the data first produced under a cooperative agreement; and
(2) Authorize others to receive, reproduce, publish, or otherwise use such data for Federal purposes.

(d)(1) In addition, in response to a Freedom of Information Act (FOIA) request for research data relating to published research findings produced under a cooperative agreement that were used by the Federal Government in developing an Agency action that has the force and effect of law, the REE Agency shall request, and the Cooperator shall provide, within a reasonable time, the research data so that they can be made available to the public through the procedures established under the FOIA. If the REE Agency obtains the research data solely in response to a FOIA request, the Agency may charge the requester a reasonable fee equaling the full incremental cost of obtaining the research data. This fee should reflect costs incurred by the Agency, the Cooperator, and applicable subrecipients. This fee is in addition to any fees the Agency may assess under the FOIA (5 U.S.C. 552(a)(4)(A)).

(2) The following definitions apply for purposes of paragraph (d) of this section:

(1) Research data is defined as the recorded factual material commonly accepted in the scientific community as necessary to validate research findings, but not any of the following: preliminary analyses, drafts of scientific papers, plans for future research, peer reviews, or communications with colleagues. This "recorded" material excludes physical objects (e.g., laboratory samples). Research data also do not include:

(A) Trade secrets, commercial information, materials necessary to be held confidential by a researcher until they are published, or similar information which is protected under law; and

(B) Personnel and medical information and similar information the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, such as information that could be used to identify a particular person in a research study.

(ii) Published is defined as either when:

(A) Research findings are published in a peer-reviewed scientific or technical journal;

(B) A Federal Agency publicly and officially cites the research findings in support of an Agency action that has the force and effect of law; or

(C) Used by the Federal Government in developing an Agency action that has the force and effect of law is defined as when an Agency publicly and officially cites the research findings in support of an Agency action that has the force and effect of law.

(e) All rights, title, and interest in any Subject Invention made solely by employee(s) of the REE Agency shall be owned by the REE Agency. All rights, title, and interest in any Subject Invention made solely by at least one (1) employee of the Cooperator shall be jointly owned by the Agency and the Cooperator, subject to the provisions of 37 CFR part 401.

(f) REE Agencies shall have a non-exclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States the subject invention throughout the world.
§ 550.43 Purpose of procurement standards.

Sections 44 through 50 set forth standards for use by Cooperators in establishing procedures for the procurement of supplies and other expendable property, equipment and other services with Federal funds. These standards are furnished to ensure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal statutes and executive orders. No additional procurement standards or requirements shall be imposed by the Federal awarding agencies upon Cooperators, unless specifically required by Federal statute or executive order or approved by OMB.

§ 550.44 Cooperator responsibilities.

The standards contained in this section do not relieve the Cooperator of the contractual responsibilities arising under its contract(s). The Cooperator is the responsible authority, without recourse to the REE Agency, regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into in support of a nonassistance agreement. This includes disputes, claims, award protests, source evaluation or other matters of a contractual nature. Matters concerning violation of statute are to be referred to such Federal, State or local authority, as may have proper jurisdiction.

§ 550.45 Standards of conduct.

The Cooperator shall maintain written standards of conduct governing the performance of its employees engaged in the award and administration of contracts. No employee, officer, or agent shall participate in the selection, award, or administration of a contract supported by Federal funds if a real or apparent conflict of interest would be involved. Such a conflict would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or other interest in the firm selected for an award. The officers, employees, and agents of the Cooperator shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors, or parties to subagreements. However, Cooperators may set standards for situations in which the financial interest is not substantial or the gift is an unsolicited item of nominal value. The standards of conduct shall provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the Cooperator.

§ 550.46 Competition.

(a) All procurement transactions shall be conducted in a manner to provide, to the maximum extent practical, open and free competition. The Cooperator shall be alert to organizational conflicts of interest as well as non-competitive practices among contractors that may restrict or eliminate competition or otherwise restrain trade. In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, invitations for bids and/or requests for proposals shall be excluded from competing for such procurements. Awards shall be made to the bidder or offeror whose bid or offer is responsive to the solicitation and is most advantageous to the Cooperator, price, quality and other factors considered. Solicitations shall clearly set forth all requirements that the bidder or offer shall fulfill in order for the bid or offer to be evaluated by the Cooperator. Any and all bids or offers may be rejected when it is in the Cooperator’s interest to do so.

(b) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of the proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources or accessibility to other necessary resources. In certain circumstances, contracts with certain parties are restricted by agencies’ implementation of Executive Orders 12549.
Agricultural Research Service, USDA

§ 550.52

and 12689, "Debarment and Suspension."

(c) Recipients shall, on request, make available for the REE Agency, pre-award review and procurement documents, such as request for proposals or invitations for bids, independent cost estimates, etc.

§ 550.47 Cost and price analysis.

Some form of cost or price analysis shall be made and documented in the procurement files in connection with every procurement action. Price analysis may be accomplished in various ways, including the comparison of price quotations submitted, market prices and similar indicia, together with discounts. Cost analysis is the review and evaluation of each element of cost to determine reasonableness, allocability and allowability.

§ 550.48 Procurement records.

Procurement records and files for purchases in excess of the small purchase threshold shall include the following at a minimum:

(a) Basis for contractor selection;
(b) Justification for lack of competition when competitive bids or offers are not obtained; and
(c) Basis for award cost or price.

§ 550.49 Contract administration.

A system for contract administration shall be maintained to ensure contractor conformance with the terms, conditions and specifications of the contract and to ensure adequate and timely followup of all purchases. Recipients shall evaluate contractor performance and document, as appropriate, whether contractors have met the terms, conditions and specifications of the contract.

§ 550.50 Contract provisions.

The recipient shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all contracts. The following provisions shall also be applied to sub-contracts.

(a) Contracts in excess of the simplified acquisition threshold shall contain contractual provisions or conditions that allow for administrative, contractual, or legal remedies in instances in which a contractor violates or breaches the contract terms, and provide for such remedial actions as may be appropriate.

(b) All contracts in excess of the simplified acquisition threshold shall contain suitable provisions for termination by the cooperator, including the manner by which termination shall be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(c) All negotiated contracts (except those for less than the simplified acquisition threshold) awarded by recipients shall include a provision to the effect that the recipient, the REE Agency, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers and records of the contractor which are directly pertinent to a specific program for the purpose of making audits, examinations, excerpts and transcriptions.

(d) All contracts, including small purchases, awarded by recipients and their contractors shall contain the procurement provisions of appendix A, 2 CFR part 215, as applicable.

§ 550.51 Purpose of reports and records.

Sections 550.52 through 550.55 set forth the procedures for monitoring and reporting on the Cooperator’s financial and program performance and the necessary reporting format. They also set forth record retention requirements, and property and equipment inventory reporting requirements.

§ 550.52 Reporting program performance.

(a) The REE Agency shall prescribe the frequency with which performance reports shall be submitted. Performance reports shall not be required more frequently than quarterly or, less frequently than annually. Annual reports shall be due 90 calendar days after the
grant year; quarterly or semi-annual reports shall be due 30 days after the reporting period. The REE Agency may require annual reports before the anniversary dates of multiple year agreements in lieu of these requirements. The final performance reports are due 90 calendar days after the expiration or termination of the period of agreement.

(b) When required, performance reports shall contain, for each award, detailed information on each of the following.
(1) A comparison of actual accomplishments with the goals and objectives established for the period and the findings of the investigator. Whenever appropriate and the output of programs or projects can be readily quantified, such quantitative data should be related to cost data for computation of unit costs.
(2) Reasons why established goals were not met, if appropriate.
(3) Other pertinent information including, when appropriate, analysis and explanation of cost overruns or high unit costs.
(c) Cooperators shall not be required to submit more than the original and two copies of performance reports.
(d) Cooperators shall immediately notify the REE Agency of developments that have a significant impact on the award-supported activities. Also, notification shall be given in the case of problems, delays, or adverse conditions which materially impair the ability to meet the objectives of the award. This notification shall include a statement of the action taken or contemplated, and any assistance needed to resolve the situation.

§ 550.53 Financial reporting.
Financial Status Report.
(a) Each REE Agency shall require Cooperators to report the status of funds as approved in the budget for the cooperative agreement. A financial status report shall consist of the following information:
(1) The name and address of the Cooperator.
(2) The name and address of the PI.
(3) The name, address, and signature of the financial officer submitting the report.
(4) A reference to the cooperative agreement.
(5) Period covered by the report.
(6) An itemization of actual dollar amounts expended on the project during the reporting period (in line with the approved budget) and cumulative totals expended for each budget category from the starting date of the cooperative agreement.
(b) The REE Agency shall determine the frequency of the Financial Status Report for each project or program, considering the size and complexity of the particular project or program. However, the report shall not be required more frequently than quarterly or less frequently than annually. A final report shall be required at the completion of the agreement.
(c) The REE Agency shall require Cooperators to submit the financial status report (an original and no more than two copies) no later than 30 days after the end of each specified reporting period for quarterly and semi-annual reports, and 90 calendar days for annual and final reports. Extensions of reporting due dates may be approved by the REE Agency upon request of the Cooperator.

§ 550.54 Invention disclosure and utilization reporting.
(a) The Cooperator shall report Invention Disclosures and Utilization Information electronically via i-Edison Web Interface at: www.iedison.gov.
(b) If access to InterAgency Edison is unavailable, the invention disclosure should be sent directly to: Division of Extramural Intentions and Technology Resources, 6705 Rockledge Drive, (RKL 1), Suite 310, MSC 7980, Bethesda, Maryland 20892-7750.

§ 550.55 Retention and access requirements for records.
(a) This section sets forth requirements for record retention and access to records for awards to Cooperators. REE agencies shall not impose any other record retention or access requirements upon Cooperators, excepting as set out in §550.42(d).
(b) Financial records, supporting documents, statistical records, and all other records pertinent to an award shall be retained for a period of 3 years
from the date of submission of the final expenditure report or, for awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, as authorized by the REE Agency. The only exceptions are the following:

(1) If any litigation, claim, or audit is started before the expiration of the 3-year period, the records shall be retained until all litigation, claims or audit findings involving the records have been resolved and final action taken;

(2) Records for real property and equipment acquired with Federal funds shall be retained for 3 years after final disposition;

(3) When records are transferred to or maintained by the REE Agency, the 3-year retention requirement is not applicable to the Cooperator;

(4) Indirect cost rate proposals, cost allocations plans, etc., as specified in paragraph (f) of this section.

(c) Copies of original records may be substituted for the original records if authorized by the REE Agency.

(d) The REE Agency shall request transfer of certain records to its custody from Cooperators when it determines that the records possess long-term retention value. However, in order to avoid duplicate record keeping, a REE Agency may make arrangements for Cooperators to retain any records that are continuously needed for joint use.

(e) The REE Agency, the Inspector General, Comptroller General of the United States, or any of their duly authorized representatives, have the right of timely and unrestricted access to any books, documents, papers, or other records of Cooperators that are pertinent to the awards, in order to make audits, examinations, excerpts, transcripts and copies of such documents. This right also includes timely and reasonable access to a Cooperator’s personnel for the purpose of interview and discussion related to such documents. This right includes the intended disclosure with copies of the relevant records to the REE Agency.

(g) Indirect cost rate proposals, cost allocations plans, etc. Paragraphs (g)(1) and (g)(2) of this section apply to the following types of documents, and their supporting records: Indirect cost rate computations or proposals, cost allocations plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage charge back rates or composite fringe benefit rates).

(1) If submitted for negotiation. If the Cooperator submits to the REE Agency or the subrecipient submits to the Cooperator the proposal, plan, or other computation to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts on the date of such submission.

(2) If not submitted for negotiation. If the Cooperator is not required to submit to the REE Agency or the subrecipient is not required to submit to the Cooperator the proposal, plan, or other computation for negotiation purposes, then the 3-year retention period for the proposal, plan, or other computation and its supporting records starts at the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.
two parties shall agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated.

(c) If costs are allowed under an award, the responsibilities of the Cooperator referred to in §550.32, including those for property management as applicable, shall be considered in the termination of the award, and provision shall be made for continuing responsibilities of the Cooperator after termination, as appropriate.

§ 550.58 Enforcement.
(a) Remedies for noncompliance. If a Cooperator materially fails to comply with the terms and conditions of an award, whether stated in a Federal statute, regulation, assurance, application, or notice of award, the REE Agency may, in addition to imposing any of the special conditions outlined in §550.10, take one or more of the following actions.

1. Temporarily withhold cash payments pending correction of the deficiency by the Cooperator or more severe enforcement action by the REE Agency.
2. Disallow all or part of the cost of the activity or action not in compliance.
3. Wholly or partly suspend or terminate the current award.
4. Withhold further awards for the project or program.
5. Take other remedies that may be legally available.

(b) Effects of suspension and termination. Costs of a Cooperator resulting from obligations incurred by the Cooperator during a suspension or after termination of an award are not allowable unless the REE Agency expressly authorizes them in the notice of suspension or termination or thereafter. Other Cooperator costs during suspension or after termination which are necessary and not reasonably avoidable are allowable if paragraphs (b)(1) and (2) of this section apply.

1. The costs result from obligations which were properly incurred by the Cooperator before the effective date of suspension or termination, are not in anticipation of it, and in the case of a termination, are non-cancellable.
2. The costs would be allowable if the award were not suspended or expired normally at the end of the funding period in which the termination takes effect.
3. Relationship to debarment and suspension. The enforcement remedies identified in this section, including suspension and termination, do not preclude a Cooperator from being subject to debarment and suspension under Executive Orders 12549 and 12689 and USDA implementing regulations (7 CFR part 3017).

Subpart D—Close Out

§ 550.59 Purpose.
Sections 550.60 through 550.62 of this part contain closeout procedures and other procedures for subsequent disallowances and adjustments.

§ 550.60 Closeout procedures.
(a) Cooperators shall submit, within 90 calendar days after the date of completion of the award, all financial, performance, and other reports as required by the terms and conditions of the award. The REE Agency may approve extensions to the reporting period when requested by the Cooperator.

(b) Unless the REE Agency authorizes an extension, a Cooperator shall liquidate all obligations incurred under the award not later than 90 calendar days after the funding period or the date of completion as specified in the terms and conditions of the award or in Agency implementing instructions.

(c) The REE Agency shall make prompt payments to a Cooperator for allowable reimbursable costs under the award being closed out.

(d) The Cooperator shall promptly refund any balance of unobligated cash advanced or paid by the REE Agency that is not authorized to retain for use in other projects. OMB Circular A-129 governs unreturned amounts that become delinquent debts.

(e) When authorized by the terms and conditions of the award, the REE Agency shall make a settlement for any upward or downward adjustments to the Federal share of costs after closeout reports are received.

(f) The Cooperator shall account for any personal property acquired with
Federal funds or received from the Federal Government in accordance with §§550.36 through 550.42.

(g) In the event a final audit has not been performed prior to the closeout of an award, the REE Agency shall retain the right to recover an appropriate amount after fully considering the recommendations on disallowed costs resulting from the final audit.

§ 550.61 Subsequent adjustments and continuing responsibilities.

The closeout of an award does not affect any of the following:

(a) The right of the REE Agency to disallow costs and recover funds on the basis of a later audit or other review.

(b) The obligation of the Cooperator to return any funds due as a result of later refunds, corrections, or other transactions.

(c) Audit requirements in §550.24.

(d) Property management requirements in §§550.36 through 550.42.

(e) Records retention as required in §550.56.

§ 550.62 Collection of amounts due.

(a) Any funds paid to a Cooperator in excess of the amount to which the Cooperator is finally determined to be entitled under the terms and conditions of the award constitute a debt to the Federal Government. If not paid within a reasonable period after the demand for payment, the REE Agency may in accordance with 7 CFR part 3, reduce the debt by—

(1) Making an administrative offset against other requests for reimbursements, or

(2) Withholding advance payments otherwise due to the Cooperator, or

(3) Taking other action permitted by statute.

(b) Except as otherwise provided by law, the REE Agency shall charge interest on an overdue debt in accordance with 31 CFR part 900, “Federal Claims Collection Standards.”

PART 600—ORGANIZATION

§ 600.1 General.

(a) The Natural Resources Conservation Service (NRCS) was authorized by the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 7 U.S.C. 6901 note) and established by Secretary’s Memorandum 1010–1 (2.b.6), Reorganization of the Department of Agriculture, to provide national leadership in the conservation, development, and productive use of the Nation’s natural resources. Such leadership encompasses the conservation of soil, water, air, plant, and animal resources with consideration of the many human (economic and sociological) interactions. NRCS is the Federal agency that works with landowners on private lands to help them conserve their natural resources. NRCS employees are highly skilled in many scientific and technical specialties, including soil science, soil conservation, agronomy, biology, agroecology, range conservation, forestry, engineering, geology, hydrology, wetlands science, cultural resources, and economics. NRCS was formerly the Soil Conservation Service (SCS) which was established by the Soil Conservation Act of 1935 (Pub. L. 74–46, 49 Stat. 163 (16 U.S.C. 590 (a–f))). NRCS has responsibility for three major areas:

(1) Soil and water conservation;
(2) Natural resource surveys including soil surveys, resources inventory, snow surveys, and water supply forecasting; and
(3) Community resource protection and management including watershed projects, river basin studies and investigations, resource conservation and development areas, land evaluation and site assessment, and emergency watershed protection. In addition, NRCS has leadership for the Wetlands Reserve Program, Environmental Quality Incentives Program, Grazing Lands Conservation Initiative, Farmland Protection Program, Wildlife Habitat Incentives Program, Forestry Incentives Program, and Conservation Farm Option. NRCS provides technical support for the Conservation Reserve Program.

(b) The NRCS organization consists of a National Headquarters located in Washington, DC; six regional offices; 50 state offices and two equivalent offices in the Caribbean Area and the U.S. Trust Territories of the Pacific Basin Area; approximately 2,500 field offices and 300 specialized offices; 26 plant materials centers; 17 major land resource area soil survey offices; nine national centers; and seven national institutes. A Chief who reports to the USDA Under Secretary for Natural Resources and Environment heads NRCS.

§ 600.2 National headquarters.

(a) Chief. The Chief, with assistance of the Associate Chief, is responsible for administrating a coordinated national program of natural resource conservation; planning, directing, and coordinating all program, technical, and administrative activities of NRCS; developing policies and procedures; correlating NRCS conservation programs with other agencies; accepting departmental leadership for programs for other activities assigned by the Secretary of Agriculture; and serving as Equal Employment Opportunity Officer for NRCS.

(b) Deputy chiefs. Five deputy chiefs assist the Chief as follows:

(1) Deputy Chief for Management. The Deputy Chief for Management is responsible for policies, guidelines, and standards for management services,
human resources management, financial management, information technology, administrative support (providing a coordinated administrative management program for National Headquarters activities), NRCS outreach, training, and correspondence management. This deputy chief also is responsible for the activities of three national centers: business management, information technology, and employee development. 

(2) Deputy Chief for Strategic Planning and Accountability. The Deputy Chief for Strategic Planning and Accountability is responsible for policies, guidelines, and standards for strategic and performance planning, budget planning and analysis, and operations management and oversight.

(3) Deputy Chief for Programs. The Deputy Chief for Programs is responsible for policies, guidelines, and standards for conservation operations, resource conservation and community development, watersheds and wetlands, international programs, conservation compliance activities, conservation programs funded by the Commodity Credit Corporation, and animal husbandry and clean water programs.

(4) Deputy Chief for Soil Survey and Resource Assessment. The Deputy Chief for Soil Survey and Resource Assessment is responsible for policies, guidelines, and standards for NRCS technical activities, and provides leadership for soils, resource inventory, and resource assessment. This deputy chief also is responsible for the activities of two national centers (soil survey and cartography and geospatial) and two national institutes (soil quality and natural resources inventory and analysis).

(5) Deputy Chief for Science and Technology. The Deputy Chief for Science and Technology is responsible for policies, guidelines, and standards for the agency, and provides leadership for resource economics and social sciences, conservation engineering, and ecological sciences. This deputy chief also is responsible for the activities of four national centers (water and climate, water management, soil mechanics, and plant data) and five national institutes (grazing lands technology, social sciences, watershed science, wetlands science, and wildlife habitat management). This deputy chief, working closely with the deputy chiefs for Management and Soil Survey and Resource Assessment, provides overall direction for the National Science and Technology Consortium.

(c) National Science and Technology Consortium. The consortium consists of three divisions, four centers, five technical institutes, and several cooperating scientists under the Deputy Chief for Science and Technology; two divisions, two centers, and two technical institutes under the Deputy Chief for Soil Survey and Resource Assessment; and one division and three centers under the Deputy Chief for Management.

(1) Centers. The nine centers provide specific products and services that maintain and enhance the technical quality of the agency. The centers are: water and climate, water management, soil mechanics, plant data, soil survey, cartography and geospatial, information technology, business management, and employee development.

(2) Institutes. The seven institutes are: soil quality, natural resources inventory and analysis, grazing lands technology, social sciences, watershed science, wetlands science, and wildlife habitat management. The institutes provide training; develop technical materials; and acquire, develop, and transfer needed technology in special emphasis areas so field employees can better serve their customers. The institutes often establish partnerships with other Federal agencies, universities, and public and private organizations.

(3) Cooperating Scientists. Cooperating scientists work in the areas of soil erosion and sedimentation, air quality, and agroforestry. These scientists are located at various universities and research centers.

(d) Civil Rights. The Civil Rights staffs provide coordination, assistance, and recommendations to the Chief on civil rights employment and program compliance issues.

(e) Legislative Affairs. The Legislative Affairs Staff provides coordination and assistance to the Chief on legislative affairs issues and activities.

(f) Conservation Communications. The Conservation Communications Staff is
Natural Resources Conservation Service, USDA § 600.9

responsible for communications, volunteer programs, conservation education, and public affairs activities.

(g) Strategic Natural Resource Issues. The Strategic Natural Resource Issues Staff is responsible for coordinating priority strategic issues as determined by the Chief.

§ 600.3 Regional offices.

Each regional office is under the direction and supervision of a regional conservationist. Regional offices are responsible for:

1. Providing agency leadership, guidance, coordination, and partnering for solutions to regional resource issues;
2. Program implementation, consistency, and accountability;
3. Region-wide strategic planning, performance measurement, and operations management;
4. Administrative operations and support;
5. Fund integrity and accountability;
6. Technical quality of work; and
7. All NRCS activities in the region.

Regional offices are located in Beltsville, Maryland; Atlanta, Georgia; Fort Worth, Texas; Madison, Wisconsin; Lincoln, Nebraska; and Sacramento, California.

§ 600.4 State offices.

Each office is under the direction and supervision of a State conservationist. Each State conservationist is responsible for NRCS programs in a State. The Pacific Basin Area Office, under the direction and supervision of a director, serves the U.S. Trust Territories in that area. The Caribbean Area Office, under the direction and supervision of a director, serves the Commonwealth of Puerto Rico and the U.S. Virgin Islands. Directors of the Pacific Basin and Caribbean areas have the same responsibility and authority as a State conservationist. All references to State conservationists in this chapter include the directors of the Pacific Basin and Caribbean areas.

§ 600.5 Area offices.

Each area office is under the direction and supervision of an area conservationist or assistant State conservationist for field operations who is responsible for NRCS activities in the geographical area served by the area office. Usually the geographical area includes multiple field offices and counties. Many area offices now consist of teams working on a watershed or other geopolitical basis.

§ 600.6 Field offices.

Each field office is under the direction and supervision of a district conservationist who is responsible for NRCS activities in the geographical area served by the field office. Usually the geographical area of a field office includes one or more conservation districts and one or more counties. Field offices are generally collocated with other USDA agencies in USDA Service Centers.

§ 600.7 Specialized field offices.

Other field offices serve specialized activities, such as watershed protection and flood reduction projects, construction projects, resource conservation and development areas, and soil survey activities. State conservationists designate direction and supervision of these offices.

§ 600.8 Plant materials centers.

Plant materials centers (PMC) assemble and test plant species for conservation uses. Usually a PMC serves two or more States, and is under the jurisdiction of the State conservationist where the center is located. Each PMC is directed and supervised by a manager who is responsible to a State office specialist/manager as designated by the State conservationist.

§ 600.9 Major land resource area soil survey offices.

The United States is divided into 17 major land resource areas (MLRA) for the purpose of soil survey production. Major land resource area soil survey offices (MO) provide the technical leadership, coordination, and quality assurance for all soil survey project activities within the respective MLRA. Each MO serves two or more States (except for the MO in Alaska), and is under the jurisdiction of the State conservationist where the office is located. Each MO is directed and supervised by
a leader who is designated by the State conservationist.

PART 601—FUNCTIONS

Sec. 601.1 Functions assigned. 601.2 Functions reserved to the Secretary of Agriculture. 601.3 Defense responsibilities.

SOURCE: 65 FR 14783, Mar. 20, 2000, unless otherwise noted.

§ 601.1 Functions assigned.

The Natural Resources Conservation Service (NRCS) is the Federal agency that works with private landowners to conserve their natural resources. NRCS employees help land users and communities approach conservation planning and implementation with an understanding of how natural resources relate to each other and to people—and how human activities affect those resources. The agency emphasizes voluntary, science-based assistance, partnerships, and cooperative problem solving at the community level. The mission of NRCS is to work on the Nation's non-Federal lands to conserve, improve, and sustain natural resources. The following functions support the mission.

(a) NRCS facilitates and provides conservation technical assistance at the local level that helps people assess their natural resource conditions and needs, set goals, identify programs and other resources to address those needs, develop proposals and recommendations, implement solutions, and measure their success. The agency’s role is to assist with:

(1) Resource inventories,
(2) Resource assessments,
(3) Planning assistance, and/or
(4) Technical assistance.

(b) NRCS provides technical assistance through local conservation districts to land users, communities, watershed groups, Federal and State agencies, other partners, and customers.

(c) NRCS provides assistance on a voluntary basis.

(d) The agency’s work focuses on soil, water, air, plant, and animal conservation including erosion reduction, water quality improvement, wetland restoration and protection, fish and wildlife habitat improvement, range management, stream restoration, water management, and other natural resource issues.

(e) Through the conservation operations program, NRCS maintains a cadre of conservationists and interdisciplinary technical experts who provide landowners with advice and recommendations. Science-based procedures and techniques are based on new knowledge and research provided by the Agricultural Research Service and others. NRCS developed and maintains a system of directives—including manuals, handbooks, and technical references—to institutionalize new methods, procedures, and standards used to deliver technical assistance at the field level.

(f) NRCS has general responsibility for administration of the following programs:

(1) Conservation operations, authorized by the Soil Conservation Act of 1935 and the Soil and Water Resources Conservation Act of 1977. Activities include:

(i) Conservation technical assistance to land users, communities, units of State and local government, and other Federal agencies in planning and implementing natural resource solutions to reduce erosion, improve soil and water quantity and quality, improve and conserve wetlands, enhance fish and wildlife habitat, improve air quality, improve pasture and range conditions, reduce upstream flooding, and improve woodlands. Assistance is also provided to implement the highly erodible land (HEL) and wetland conservation (Swampbuster) provisions and—on a reimbursable basis—the Wetlands Reserve Program (WRP) and Conservation Reserve Program (CRP) in the 1985 Food Security Act, as amended by the Food, Agriculture, Conservation and Trade Act of 1990 and Federal Agriculture Improvement and Reform Act of 1996. NRCS technical field staff make HEL and wetland determinations and assist land users to develop and implement conservation plans needed
Natural Resources Conservation Service, USDA § 601.1
to ensure compliance with the law. NRCS is also the lead Federal agency for delineating wetlands on agricultural lands for purposes of implementing both the provisions of the Food Security Act and Section 404 of the Clean Water Act.

(ii) Soil surveys that provide the public with local information on the uses and capabilities of their soil resource. Soil surveys are based on scientific analysis and classification of the soils and are used to determine land capabilities and conservation treatment needs. Surveys are conducted cooperatively with other Federal agencies, land grant universities, State agencies, and local units of government. NRCS is the world leader in soil classification and soil mapping, and is expanding into soil quality.

(iii) Snow survey and water supply forecasts that provide western States and Alaska with vital information and forecasts of seasonable variable water supplies. NRCS field staff in cooperation with partnering organizations manually collect data from 850 remote high mountain sites. Data is electronically collected from an additional 600 SNOTEL (automated snowpack telemetry network) sites. In cooperation with the National Weather Service, the data is assembled and analyzed. Then, NRCS staff develop seasonal water supply forecasts.

(iv) Plant Material Centers that assemble, test, and encourage increased plant propagation and usefulness of plant species for biomass production, carbon sequestration, erosion reduction, wetland restoration, water quality improvement, streambank and riparian area protection, coastal dune stabilization, and to meet other special conservation treatment needs. The work is carried out cooperatively with State and Federal agencies, private organizations, commercial businesses, and seed and nursery associations. After species are proven, they are released to the private sector for commercial production.

(v) National Resources Inventory (NRI) that is a statistically-based survey designed and implemented using scientific principles to assess conditions and trends of soil, water, and related resources on nonfederal lands in the United States. The NRI captures data on land cover and use, soil erosion, prime farmland, wetlands, habitat diversity, selected conservation practices, and related attributes at thousands of scientifically selected sample sites in all 50 states, Puerto Rico, the U.S. Virgin Islands, and some Pacific Basin locations.

(2) Conservation programs in the Federal Agriculture Improvement and Reform Act of 1996, most of which are funded by the Commodity Credit Corporation (CCC). NRCS provides leadership and technical assistance for the following programs:

(i) Environmental Quality Incentives Program (EQIP). EQIP provides a single, voluntary conservation program for farmers and ranchers who face serious threats to soil, water, and related natural resources. Nationally, it provides technical, financial, and educational assistance, half of it targeted to livestock-related natural resource problems and half to more general conservation priorities.

(ii) Wetlands Reserve Program (WRP). WRP is a voluntary program to restore and protect wetlands on private property. It provides an opportunity for landowners to receive financial incentives to restore wetlands in exchange for retiring marginal agricultural land.

(iii) Wildlife Habitat Incentives Program (WHIP). WHIP is a voluntary program for people who want to develop and improve wildlife habitat on private lands. It provides both technical assistance and cost sharing to help establish and improve fish and wildlife habitat.

(iv) Farmland Protection Program (FPP). This program provides funds to help purchase development rights to keep productive farmland in agricultural use. Working through existing programs, USDA joins with State, tribal, or local governments to acquire voluntary conservation easements or other interests from landowners.

(v) Forestry Incentives Program (FIP). FIP supports good forest management practices on privately owned, non-industrial forest lands nationwide. FIP is designed to benefit the environment while meeting future demands for wood products. Although not funded by CCC, Section 373 of the Federal Agriculture Improvement and Reform Act of 1996
(3) Resource Conservation and Development (RC&D) Program, authorized by Section 102 of the Flood and Agriculture Act of 1962 (Pub. L. 87-702) and Sections 1528-1538 of the Agriculture and Food Act of 1981 (Pub. L. 97-98). This program is initiated and directed at the local level by volunteers who involve multiple communities, various units of government, municipalities, and grassroots organizations. RC&D is a catalyst for civic-oriented groups to share knowledge and resources in a collective attempt to solve common problems. The program offers aid in balancing the environmental, economic, and social needs of an area.

(4) Rural Abandoned Mine Program (RAMP) and other responsibilities assigned under the Surface Mining Control and Reclamation Act of 1977 (Pub. L. 95-87). Under RAMP, NRCS provides technical and financial assistance to landowners to reclaim certain abandoned coal-mined lands. This assistance can be used to reclaim these lands for approved uses, which include pasture, range, woodland, cropland, non-commercial recreation, and wildlife habitat. The program’s first priority is to protect public health, welfare, safety, and property from hazards caused by past surface coal mining or by surface effects of deep mining.

(5) Watershed surveys and planning, authorized by the Watershed Protection and Flood Prevention Act (Pub. L. 83-566, Section 6 (16 U.S.C. 1001-1008)). The 1996 appropriations act combined the Small Watershed Planning and the River Basin Surveys and Investigations programs into a new program called the Watershed Surveys and Planning Program. The program involves cooperation with other Federal, State, and local agencies to conduct watershed planning, river basin surveys and investigations, flood hazard analysis, and floodplain management assistance, which aid in the development of coordinated water resource programs, including the development of guiding principles and procedures.

(6) Watershed and flood prevention operations include several activities. Watershed operations are authorized by the Flood Control Act of 1944 (Public Law 78-534) and the Watershed Protection and Flood Prevention Act of 1954 (Public Law 87-566) and amendments; both of which are addressed by 7 CFR 622. Since 1998, the appropriations act for the Watershed Protection and Flood Prevention Act (Public Law 83-566) has included funds, not to exceed a specified amount, that may be used for Public Law 78-534 projects.

   (i) Public Law 83-566 and Public Law 78-534, jointly called the Small Watershed Program, authorize the Secretary of Agriculture to cooperate with State and local agencies to plan and carry out works of improvement for flood prevention; for the conservation, development, utilization, and disposal of water; and for the conservation and proper use of land in watersheds or sub-watershed areas. Under Public Law 83-566, these areas shall not exceed 250,000 acres. There is no acreage limitation under Public Law 78-534.

   (ii) The Small Watershed Program provides for cooperation with State and other public agencies (called project sponsors) in the installation of planned works of improvement and land treatment measures in authorized watershed projects. Eligible measures include flood prevention, water conservation, recreation, agricultural water management, floodplain easements, municipal and industrial water, and rural water supply.

(7) Emergency Watershed Protection (EWP) Program, authorized by Section 216 of Public Law 81-516, 33 U.S.C. 701b-1, and Section 403 of the Agriculture Credit Act of 1978 (Public Law 95-334, 16 U.S.C. 2203), as amended by Section 382 of the Federal Agriculture Improvement and Reform Act of 1996 (Public Law 104-127, 110 Stat. 898, 1016). EWP provides assistance to reduce an imminent threat to life and property caused by a sudden impairment of a watershed from a natural disaster. Emergency work includes such measures as removing debris from streams, stabilizing streambanks, repairing levees, critical area stabilization, and purchasing floodplain easements. Technical and financial assistance is available to sponsoring local organizations (units of government, Indian tribes and tribal organizations, and organizations formed by State law) for this disaster.
recovery work. Sponsors are required to provide the local share of the costs; obtain real property rights, water rights, and permits; and do any needed operation and maintenance.

§ 601.2 Functions reserved to the Secretary of Agriculture.

(a) Designation of new Resource Conservation and Development (RC&D) areas. Once designated, these areas may receive RC&D Program assistance from NRCS.

(b) Administration of the Soil and Water Resources Conservation Act of 1977 (Public Law 95-192) to conduct an appraisal and develop a national conservation program every five years.

§ 601.3 Defense responsibilities.

In the event of nuclear attack, NRCS is responsible for providing:

(a) Technical guidance, based upon results of radiological monitoring and the extent of radiological contamination to farmers, ranchers, and others relating to:

(1) The selection and use of land for agricultural production.

(2) The harvesting of crops.

(3) The use of crops stored on the farm.

(4) The use, conservation, disposal, and control of water to insure adequate usable water for agricultural purposes and to prevent floods.

(5) The safety of livestock.

(b) Basic soil information, land use guides, and onsite technical assistance in selecting land for production and in applying practices to increase production of food and fiber with maximum efficiency.
PART 610—TECHNICAL ASSISTANCE

Subpart A—Conservation Operations

610.1 Purpose.
The purpose of this subpart is to set forth Natural Resource Conservation Service (NRCS) policies and procedures for furnishing technical assistance in conservation operations.

610.2 Scope.
(1) Reduce soil losses from erosion;
(2) Help solve soil, water, and agricultural waste management problems;
(3) Bring about adjustments in land use as needed;
(4) Reduce damage caused by excess water and sedimentation;
(5) Enhance the quality of fish and wildlife habitat; and
(6) Improve all agricultural lands, including cropland, forestland, and grazing lands that include pastureland, rangeland, and grazed forestland so that the long-term sustainability of the resource base is achieved.

Subpart B—Soil Erosion Prediction Equations

610.11 Purpose and scope.
The purpose of this subpart is to provide equations for predicting soil loss due to erosion and wind erosion.

610.12 Equations for predicting soil loss due to water erosion.

610.13 Equations for predicting soil loss due to wind erosion.

610.14 Use of USLE, RUSLE, and WEQ.

Subpart C—State Technical Committees

610.21 Purpose and scope.
The purpose of this subpart is to provide for the establishment and operation of State Technical Committees.

610.22 State Technical Committee membership.

610.23 State Technical Committee meetings.

610.24 Responsibilities of State Technical Committees.

Subpart D—Conservation of Private Grazing Land

610.31 Purpose and scope.
The purpose of this subpart is to provide for the conservation of private grazing land.

610.32 Technical assistance furnished.

Source: 42 FR 38169, July 27, 1977, unless otherwise noted.

Subpart A—Conservation Operations

§ 610.1 Purpose.

This subpart sets forth Natural Resource Conservation Service (NRCS) policies and procedures for furnishing technical assistance in conservation operations.

[61 FR 27999, June 4, 1996]

§ 610.2 Scope.

(a) Conservation operations, including technical assistance, is the basic soil and water conservation program of NRCS. This program is designed to:

(b) The Natural Resources Conservation Service is USDA’s technical agency for providing assistance to private landowners, conservation districts, and other organizations in planning and carrying out their conservation activities and programs. NRCS works with individuals, groups, and units of government to help them plan and carry out conservation decisions to meet their objectives.

[64 FR 42003, Aug. 3, 1999]

§ 610.3 Assistance through conservation districts.

(a) Technical assistance is provided through and in cooperation with conservation districts in the 50 States, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands. These districts, formed under authority of State laws, are operated and controlled by local citizens. They provide the leadership and the program needed to meet the conservation objectives of the district.

(b) NRCS furnishes technical assistance to conservation districts as specified in memorandums of understanding. Soil conservationists assigned to conservation districts work directly with land users and others according to the program needs and the priorities established by the conservation districts.

(c) The practical experience of land users is combined with the scientific knowledge and skills of professional conservationists to plan and carry out locally formulated conservation programs.
Natural Resources Conservation Service, USDA § 610.4

(d) When requested, technical assistance may be provided to owners, operators, or groups using land that is under the jurisdiction of the United States Department of the Interior if such land is included in a conservation district or if assistance is in accordance with memorandums of understanding identifying the coordination of agency activities.

§ 610.4 Technical assistance furnished.

The Natural Resources Conservation Service provides technical assistance to land users and others who are responsible for making decisions and setting policies that influence land use, conservation treatment, and resource management. Technical assistance furnished by NRCS consists of program assistance, planning assistance, application of conservation practices, and assistance in the technical phases of USDA cost-share programs.

(a) Program assistance is provided to conservation districts and other organizations concerned with the conservation of soil, water, plant, and wildlife resources. This assistance includes providing resource inventory data and identifying conservation problems and needs in order for districts to develop long-range soil and water conservation programs. Individuals, groups, and organizations requesting NRCS assistance through conservation districts include:

(1) Farmers, ranchers, and other land users concerned with the conservation of land and water resources.

(2) County and other local government units such as park authorities, departments of public works, planning, zoning (rural, urban, and flood plain), school, and institution boards, highway departments, and tax assessors.

(3) Citizen groups, youth groups, recreation groups, and garden clubs.

(4) State and local units of government (highway, health, recreation, water resources, and regional planning) involved in establishing public policy regarding the use of resources.

(5) Federal departments and agencies such as Defense, Housing and Urban Development, Public Roads, Health and Human Services; and Interior.

(6) Professional consultants who provide services such as engineering, planning, environmental assessment, tax assessment, and forest management.

(b) Planning assistance includes evaluation of soil, water, vegetation, and other resource data needed for making land use, environmental and conservation treatment decisions. NRCS helps land users make conservation plans for farms, ranches, and other land units. This help includes onsite planning assistance in making conservation plans. The plans are based on a soil survey and interpretations for the intended land uses and conservation treatment. Plans may also include other inventories of soil, water, plant, and related resources needed in the planning process. Information about the responses of each kind of soil and the conservation practices and resource management needed for different land uses is provided. The land user's decisions recorded in the plan are based on his conservation objectives. Conservation plans provide for the orderly installation of conservation practices. Conservation plans reflect changing conditions.

(c) Application assistance is provided to help land users apply and maintain planned conservation work. NRCS assistance for applying the conservation practices in the plan may include:

(1) Designing, constructing, and maintaining conservation practices;

(2) Selecting management alternatives and cultural practices needed to establish and maintain vegetation; and

(3) Other conservation practices needed to protect land and water resources.

(d) The Natural Resources Conservation Service assists in carrying out certain phases of USDA soil and water conservation cost-share programs. NRCS assists individual program participants with conservation plans needed for long-term cost-share agreements. NRCS is assigned responsibility by the Secretary of Agriculture for technical phases of applying conservation practices on the land. This assignment includes:

(1) Determining what practices are needed and feasible to install;

(2) Selecting sites and planning and designing practices,
(3) Providing assistance for installing practices, and
(4) Certifying that the work done is in accordance with NRCS standards and specifications.

§ 610.5 Interdisciplinary assistance.

Technical assistance is based on the principle that soil, water, plant, and related resources are interdependent and must be managed accordingly. Soil conservationists integrate the various technical fields in providing for the conservation of land and water resources. Staff scientists and specialists develop conservation standards, prepare necessary specifications, provide training, and review work performance. NRCS uses consultants for conservation problems that require special expertise.

Subpart B—Soil Erosion Prediction Equations

SOURCE: 61 FR 27999, June 4, 1996, unless otherwise noted.

§ 610.11 Purpose and scope.

This subpart sets forth the equations and rules for utilizing the equations that are used by the Natural Resources Conservation Service (NRCS) to predict soil erosion due to water and wind. Section 301 of the Federal Agriculture Improvement and Reform Act of 1996 (FAIRA) and the Food Security Act, as amended, 16 U.S.C. 3801-3813 specified that the Secretary would publish the universal soil loss equation (USLE) and wind erosion equation (WEQ) used by the Department within 60 days of the enactment of FAIRA. This subpart sets forth the equations, definition of factors, and provides the rules under which NRCS will utilize the USLE, the revised universal soil loss equation (RUSLE), and the WEQ.

§ 610.12 Equations for predicting soil loss due to water erosion.

(a) The equation for predicting soil loss due to erosion for both the USLE and the RUSLE is

\[ A = R \times K \times LS \times C \times P \]

(For further information about USLE see the U.S. Department of Agriculture Handbook 537, “Predicting Rainfall Erosion Losses—A Guide to Conservation Planning,” dated 1978. Copies of this document are available from the Natural Resources Conservation Service, P.O. Box 2890, Washington, DC 20013. For further information about RUSLE see the U.S. Department of Agriculture Handbook 703, “Predicting Soil Erosion by Water: A Guide to Conservation Planning with the Revised Universal Soil Loss Equation (RUSLE).” Copies may be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.)

(b) The factors in the USLE equation are:

(1) \( A \) is the estimation of average annual soil loss in tons per acre caused by sheet and rill erosion.
(2) \( R \) is the rainfall erosivity factor. Accounts for the energy and intensity of rainstorms.
(3) \( K \) is the soil erodibility factor. Measures the susceptibility of a soil to erode under a standard condition.
(4) \( LS \) is the slope length and steepness factor. Accounts for the effect of length and steepness of slope on erosion.
(5) \( C \) is the cover and management factor. Estimates the soil loss ratio for each of 4 or 5 crop stage periods throughout the year, accounting for the combined effect of all the interrelated cover and management variables.
(6) \( P \) is the support practice factor. Accounts for the effect of conservation support practices, such as contouring, contour stripcropping, and terraces on soil erosion.

(c) The factors in the RUSLE equation are defined as follows:

(1) \( A \) is the estimation of average annual soil loss in tons per acre caused by sheet and rill erosion.
(2) \( R \) is the rainfall erosivity factor. Accounts for the energy and intensity of rainstorms.
(3) \( K \) is the soil erodibility factor. Measures the susceptibility of a soil to erode under a standard condition and adjusts it bi-monthly for the effects of freezing and thawing, and soil moisture.
(4) \( LS \) is the slope length and steepness factor. Accounts for the effect of
length and steepness of slope on erosion based on 4 tables reflecting the relationship of rill to interrill erosion.

(5) C is the cover and management factor. Estimates the soil loss ratio at one-half month intervals throughout the year, accounting for the individual effects of prior land use, crop canopy, surface cover, surface roughness, and soil moisture.

(6) P is the support practice factor. Accounts for the effect of conservation support practices, such as cross-slope farming, strip cropping, buffer strips, and terraces on soil erosion.

§ 610.13 Equations for predicting soil loss due to wind erosion.

(a) The equation for predicting soil loss due to wind in the Wind Erosion Equation (WEQ) is \( E = f(IKCLV) \). (For further information on WEQ see the paper by N.P. Woodruff and F.H. Siddaway, 1965, "A Wind Erosion Equation," Soil Science Society of America Proceedings, Vol. 29, No. 5, pages 602-608, which is available from the American Society of Agronomy, Madison, Wisconsin. In addition, the use of the WEQ in NRCS is explained in the Natural Resources Conservation Service (NRCS) National Agronomy Manual, 190-V-NAM, second ed., Part 502, March, 1988, which is available from the NRCS, P.O. Box 2890, Washington, DC 20013.)

(b) [Reserved]

(c) The factors in the WEQ equation are defined as follows:

(1) \( E \) is the estimation of the average annual soil loss in tons per acre.

(2) \( f \) indicates the equation includes functional relationships that are not straight-line mathematical calculations.

(3) \( I \) is the soil erodibility index. It is the potential for soil loss from a wide, level, unsheltered, isolated field with a bare, smooth, loose and uncrusted surface. Soil erodibility is based on soil surface texture, calcium carbonate content, and percent day.

(4) \( K \) is the ridge roughness factor. It is a measure of the effect of ridges formed by tillage and planting implements on wind erosion. The ridge roughness is based on ridge spacing, height, and erosive wind directions in relation to the ridge direction

(5) \( C \) is the climatic factor. It is a measure of the erosive potential of the wind speed and surface moisture at a given location compared with the same factors at Garden City, Kansas. The annual climatic factor at Garden City is arbitrarily set at 100. All climatic factor values are expressed as a percentage of that at Garden City.

(6) \( L \) is the unsheltered distance. It is the unsheltered distance across an erodible field, measured along the prevailing wind erosion direction. This distance is measured beginning at a stable border on the upwind side and continuing downward to the nonerodible or stable area, or to the downwind edge of the area being evaluated.

(7) \( V \) is the vegetative cover factor. It accounts for the kind, amount, and orientation of growing plants or plant residue on the soil surface.

§ 610.14 Use of USLE, RUSLE, and WEQ.

(a) All Highly Erodible Land (HEL) determinations are based on the formulas set forth in 7 CFR § 12.21 using some of the factors from the USLE and WEQ and the factor values that were contained in the local Field Office Technical Guide (FOTG) as of January 1, 1990. In addition, this includes the soil loss tolerance values used in those formulas for determining HEL. The soil loss tolerance value is used as one of the criteria for planning soil conservation systems. These values are available in the FOTG in the local field office of the Natural Resources Conservation Service.

(b) RUSLE will be used to:

(1)(i) Evaluate the soil loss estimates of conservation systems contained in the FOTG.

(ii) Evaluate the soil loss estimates of systems actually applied, where those systems were applied differently than specified in the conservation plan adopted by the producer or where a conservation plan was not developed, in determining whether a producer has complied with the HEL conservation provisions of the Food Security Act of 1985, as amended, 16 U.S.C. 3801 et seq., set forth in 7 CFR part 12; and

(2) Develop new or revised conservation plans.
Subpart C—State Technical Committees

SOURCE: 74 FR 66912, Dec. 17, 2009, unless otherwise noted.

§ 610.21 Purpose and scope.

This subpart sets forth the procedures for establishing and using the advice of State Technical Committees. The Natural Resources Conservation Service (NRCS) will establish in each State a Technical Committee to assist in making recommendations relating to the implementation and technical aspects of natural resource conservation activities and programs. The Department of Agriculture (USDA) will use State Technical Committees in an advisory capacity in the administration of certain conservation programs and initiatives. Pursuant to 16 U.S.C. 3862(d), these State Technical Committees and Local Working Groups are exempt from the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2).

§ 610.22 State Technical Committee membership.

(a) State Technical Committees will include agricultural producers, nonindustrial private forest land owners, and other professionals who represent a variety of disciplines in soil, water, wetlands, plant, and wildlife sciences. The State Conservationist in each State will serve as chairperson. The State Technical Committee for each State will include representatives from among the following, if willing to serve:

(1) NRCS, USDA;
(2) Farm Service Agency, USDA;
(3) State Farm Service Agency Committee, USDA;
(4) Forest Service, USDA;
(5) National Institute of Food and Agriculture, USDA;
(6) Each of the Federally recognized Indian Tribes in the State;
(7) State departments and agencies within the State, including the:
   (i) Fish and wildlife agency;
   (ii) Forestry agency;
   (iii) Water resources agency;
   (iv) Department of agriculture;
   (v) Association of soil and water conservation districts; and
   (vi) Soil and water conservation agency;
   (8) Agricultural producers representing the variety of crops and livestock or poultry raised within the State;
   (9) Owners of nonindustrial private forest land;
   (10) Nonprofit organizations, within the meaning of section 501(c)(3) of the Internal Revenue Code of 1986, with demonstrable conservation expertise and experience working with agriculture producers in the State; and
   (11) Agribusiness.

(b) The State Conservationist will invite other relevant Federal, State, and regional agencies, organizations, and persons knowledgeable about economic and environmental impacts of natural resource conservation techniques and programs to participate as needed.

(c) To ensure that recommendations of State Technical Committees take into account the needs of the diverse groups served by USDA, membership will include, to the extent practicable, individuals with demonstrated ability to represent the conservation and related technical concerns of particular historically underserved groups and individuals; i.e., minorities, women, persons with disabilities, socially and economically disadvantaged groups, and beginning farmers and ranchers.

(d) In accordance with the guidelines in paragraphs (a), (b), and (c) of this section, it is the responsibility of the State Conservationist to seek a balanced representation of interests among the membership on the State Technical Committee. Individuals or groups wanting to participate on a State Technical Committee within a specific State may submit a request to the State Conservationist that explains their interest and outlines their credentials which they believe are relevant to becoming a member. Decisions regarding membership are at the discretion of the State Conservationist. State Conservationist decisions on membership are final and not appealable to any other individual or group within USDA.
§ 610.23 State Technical Committee meetings.

(a) The State Conservationist, as Chairperson, schedules and conducts the meetings, although a meeting may be requested by any USDA agency or State Technical Committee member.

(b) NRCS will establish and maintain national standard operating procedures governing the operation of State Technical Committees and Local Working Groups in its directive system. The standard operating procedures will outline items such as: The best practice approach to establishing, organizing, and effectively utilizing State Technical Committees and Local Working Groups; direction on publication of State Technical Committee and Local Working Group meeting notices and agendas; State Technical Committee meeting summaries; how to provide feedback on State Conservationist decisions regarding State Technical Committee recommendations; and other items as determined by the Chief.

(c) In addition to the standard operating procedures established under paragraph (b) of this section, the State Conservationist will provide public notice and allow public attendance at State Technical Committee and Local Working Group meetings. The State Conservationist will publish a meeting notice no later than 14 calendar days prior to a State Technical Committee meeting. Notification may exceed this 14-day minimum where State open meeting laws exist and provide for a longer notification period. This minimum 14-day notice requirement may be waived in the case of exceptional conditions, as determined by the State Conservationist. The State Conservationist will publish this notice in at least one or more newspaper(s), including recommended Tribal publications, to attain statewide circulation.

§ 610.24 Responsibilities of State Technical Committees.

(a) Each State Technical Committee established under this subpart will meet on a regular basis, as determined by the State Conservationist, to provide information, analysis, and recommendations to appropriate officials of USDA who are charged with implementing and establishing priorities and criteria for natural resources conservation activities and programs under Title XII of the Food Security Act of 1985 including, but not limited to, the Conservation Reserve Program, Wetlands Reserve Program, Conservation Security Program, Conservation Stewardship Program, Farm and Ranch Lands Protection Program, Grassland Reserve Program, Environmental Quality Incentives Program, Conservation Innovation Grants, Cooperative Conservation Partnership Initiative, Agricultural Water Enhancement Program, Conservation of Private Grazing Land, Wildlife Habitat Incentive Program, Grassroots Source Water Protection Program, Great Lakes Basin Program, Chesapeake Bay Watershed Initiative, and the Voluntary Public Access and Habitat Incentive Program. The members of the State Technical Committee may also provide input on other natural resource conservation programs and issues as may be requested by the State Conservationist or other USDA agency heads at the State level as long as they are within the programs authorized by Title XII. Such recommendations may include, but are not limited to, recommendations on:

(1) The criteria to be used in prioritizing program applications;

(2) The State-specific application criteria;

(3) Priority natural resource concerns in the State;

(4) Emerging natural resource concerns and program needs; and

(5) Conservation practice standards and specifications.

(b) The role of the State Technical Committee is advisory in nature, and the committee will have no implementation or enforcement authority. The implementing agency reserves the authority to accept or reject the committee’s recommendations. However, the implementing USDA agency will give strong consideration to the State Technical Committee’s recommendations.

(c) State Technical Committees will review whether Local Working Groups are addressing State priorities.

§ 610.25 Subcommittees and Local Working Groups.

(a) Subcommittees. In some situations, specialized subcommittees, made up of
§ 610.31 Purpose and scope.

(a) This subpart sets forth the policies for the Conservation of Private Grazing Land (CPGL) Program, as authorized by Section 386 of the Federal Agriculture Improvement and Reform Act of 1996, (Pub. L. 104-127, April 4, 1996) 16 U.S.C. 2005b. Under the CPGL Program, NRCS will provide technical assistance to landowners and managers who request assistance based on locally-established priorities and resource concerns. The purpose of the CPGL Program is to provide technical assistance to private grazing land owners and managers to voluntarily conserve or enhance grazing land resources to meet ecological, economic, and social demands.

(b) The term “private grazing land” means private, State-owned, tribally owned, and any other non-federally owned rangeland, pastureland, grazed forestland, hayland, and other lands used for grazing.

(c) The NRCS Chief may implement the CPGL Program in any of the 50 States, the District of Columbia, Commonwealth of Puerto Rico, Guam, the U.S. Virgin Islands, and American Samoa. NRCS will provide assistance in cooperation with conservation districts, or directly to a landowner or operator.

Subpart D—Conservation of Private Grazing Land

Source: 67 FR 68497, Nov. 12, 2002, unless otherwise noted.

§ 610.32 Technical assistance furnished.

(a) Provide technical assistance to grazing-land owners and managers to plan and implement resource conservation on grazing land. The objective of planning on grazing land is to assist landowners and managers in understanding the basic ecological principles associated with managing their land. This objective can be met by implementing a plan that meets the needs of the resources (soil, water, air, plants, and animals) and management objectives of the owner or manager. NRCS may provide assistance, at the request of the private grazing-land owner or manager to:

(1) Maintain and improve private grazing land resources that provide multiple benefits;

(2) Ensure the long-term sustainability of private grazing land resources;

(3) Implement new grazing land management technologies;

(4) Manage resources on private grazing land through conservation planning, including, but not limited to; grazing management, nutrient management, and weed and invasive species control;
Natural Resources Conservation Service, USDA

§ 611.11

(5) Maintain and improve water quality and quantity, aquatic and wildlife habitat, recreational opportunities, and aesthetics on private grazing land;
(6) Harvest, process, and market private grazing land resources; and
(7) Identify opportunities to diversify private grazing land enterprises.

(b) Refer to 7 CFR 610.4 on other items relating to technical assistance.

(c) To receive technical assistance, a landowner or manager may contact NRCS or the local conservation district to seek assistance to solve identified natural resource problems or opportunities. Participation in this program is voluntary.

PART 611—SOIL SURVEYS

Subpart A—General

Sec.
611.1 Purpose and scope.
611.2 Cooperative relationships.

Subpart B—Soil Survey Operations

611.10 Standards, guidelines, and plans.
611.11 Soil survey information.

Subpart C—Cartographic Operations

611.20 Function.
611.21 Availability of aerial photography.
611.22 Availability of satellite imagery.

SOURCE: 69 FR 60283, Oct. 8, 2004, unless otherwise noted.

Subpart A—General

§ 611.1 Purpose and scope.

(a) This part sets forth policy on soil survey operations of the Natural Resources Conservation Service (NRCS).
(b) NRCS is responsible for soil survey activities of the U.S. Department of Agriculture (USDA). A soil survey provides:
(1) An orderly, on-the-ground, scientific inventory of soil resources according to their potentialities and problems of use; and
(2) Information about each kind of soil in sufficient detail to meet all reasonable needs of farmers, agricultural technicians, community planners, engineers, and scientists in planning and transferring the findings of research and experience to specific land areas.

§ 611.2 Cooperative relationships.

(a) Soil surveys on nonfederal lands are carried out cooperatively with State agricultural experiment stations and other State agencies. The cooperative effort is evidenced in a memorandum of understanding setting forth guidelines for actions to be taken by each cooperating party in the performance of soil surveys. Similar cooperative arrangements exist between NRCS and other Federal agencies for soil surveys on Federal lands.
(b) Arrangements for nonfederal financial participation in the cost of soil surveys may be made with States, counties, soil conservation districts, planning agencies, and other local groups.

Subpart B—Soil Survey Operations

§ 611.10 Standards, guidelines, and plans.

(a) NRCS conducts soil surveys under national standards and guidelines for naming, classifying, and interpreting soils and for disseminating soil survey information.
(b) A soil survey Memorandum of Understanding (MOU) is prepared prior to the start of each soil survey project, or a work plan is prepared for soil survey maintenance activities. These documents provide specific details and technical specifications to support the interpretive and data needs of the area to be surveyed. The MOU is signed by representatives of NRCS, land grant universities, and in some States representatives of other State agencies. Federal land administering agencies also sign the MOU if federal lands are included in the survey.

§ 611.11 Soil survey information.

(a) Availability. NRCS disseminates soil survey information to the public by any of the means described in paragraph (d) of this section. NRCS makes soil survey information available as soon as is practicable following field work or other soil survey activity that provides new soil survey information.
(b) Content. Soil survey information conforms with standards and meets the
needs identified in the soil survey MOU or work plan as described in §611.10 of this part. Soil survey information includes:

1. Soil maps that delineate the location and extent of various soil areas;
2. Soil characteristics for each of the soil areas shown on soil maps;
3. Interpretations of the soil characteristics; and
4. Information about the source, version, and applicability or limitations associated with the soil survey information.

(c) Maintenance. Soil survey information is reviewed on a periodic basis to ensure that the information continues to meet evolving needs.

(d) Distribution. Soil survey information is disseminated to the public through electronically accessible maps and reports, electronic access to data files, or printed documents. To the extent practicable, as limited by commonly accepted technology, soil survey information is disseminated in electronic form.

(e) Resource conservation plan data. Information prepared specifically for use in developing resource conservation plans for soil conservation district cooperators is considered confidential. Soil maps and interpretations prepared for this use will not be made available to others without the consent of the landowner as well as the district governing body. However, soil survey information from which the conservation plan was developed may be disseminated as described in paragraph (a) of this section.

Subpart C—Cartographic Operations

§611.20 Function.

The NRCS National Cartography and Geospatial Center provides cartographic services needed to carry out NRCS functions. Cartographic services include general cartography, photogrammetry, aerial photography, planimetric and topographic mapping, drafting, and specialized types of reproduction.

§611.21 Availability of aerial photography.

The National Cartography and Geospatial Center obtains necessary clearance for all aerial photography for NRCS. New aerial photography of designated areas in the United States is obtained yearly by NRCS through competitive contracting. This photography is obtained only after it is determined that imagery of these areas available from other sources does not meet NRCS scale and quality requirements. Orders for reproductions of NRCS aerial photography are subject to the fee schedule cited in §1.2(b) of this title. Order reproductions from the National Cartography and Geospatial center: USDA—Natural Resources Conservation Service; P.O. Box 6567, FWFC-Bldg. 23; 501 W. Felix Street; Fort Worth, Texas 76115.

§611.22 Availability of satellite imagery.

Cloud-free maps of the United States based on imagery received from a satellite are prepared and released to the public by NRCS. The maps offer the first image of the United States not obscured by clouds or distortions. Orders or requests for information should be directed to the National Cartography and Geospatial Center, USDA—Natural Resources Conservation Service; P.O. Box 6567, FWFC-Bldg. 23; 501 W. Felix Street; Fort Worth, Texas 76115. Orders are subject to the fee schedule cited in §1.2(b) of this title.

PART 612—SNOW SURVEYS AND WATER SUPPLY FORECASTS

Sec.
612.1 Purpose and scope.
612.2 Snow survey and water supply forecast activities.
612.3 Data collected and forecasts.
612.4 Eligible individuals or groups.
612.5 Dissemination of water supply forecasts and basic data.
612.6 Application for water supply forecast service.
612.7 Forecast user responsibility.

Source: 40 FR 12067, Mar. 17, 1975, unless otherwise noted.
§ 612.1 Purpose and scope.
This part sets forth Natural Resources Conservation Service (NRCS) policy and procedure for the administration of a cooperative snow survey and water supply forecast program. The program provides agricultural water users and other water management groups in the western states area with water supply forecasts to enable them to plan for efficient water management. The program also provides the public and the scientific community with a data base that can be used to accurately determine the extent of the snow resource. The western states area comprises Alaska, Arizona, California (east side of the Sierra Nevada mountain range only), Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

§ 612.2 Snow survey and water supply forecast activities.
To carry out the cooperative snow survey and water supply forecast program, NRCS:
(a) Establishes, maintains, and operates manual and automated snow course and related hydro meteorological networks. Planning for such networks is carried out in accordance with OMB Circular A-62.
(b) Determines and provides information on the expected water supply, including seasonal streamflow data. If pertinent and appropriate to the needs of cooperators and not otherwise available to them, may provide necessary interpretative analyses and forecasts required for operation of water-control structures and/or agricultural operations.
(c) On request and to the extent NRCS resources and any required cooperator contributions are available, establishes hydrometeorological stations to collect and provide data and necessary interpretive analyses to the requesting party. By written agreement NRCS may accept cooperators' funds, materials, equipment, and services for this purpose.
(d) Develops and encourages use of new techniques and improving data collection and processing.
(e) Cooperates with other federal, state, and local agencies, organizations, and Canadian provinces and agencies.

§ 612.3 Data collected and forecasts.
(a) Basic data are currently collected at numerous sites in the western states area. Data sites generally include a snow course where both snow depth and water equivalent of snow are measured. However, special sites may measure only snow depth or water equivalent. Many of these sites also provide related hydro meteorological data, such as precipitation, temperature, humidity, solar radiation, and wind.
(b) Water supply forecasts in the western states area are generally made monthly from January through June. Forecasts may be made more frequently for an established need when data are available to NRCS.

§ 612.4 Eligible individuals or groups.
(a) Any individual or group who is a significant water user and who would benefit from a water supply forecast may obtain forecasts from NRCS on a regular basis provided data are available to NRCS to develop a forecast at the desired location.
(b) The program collects and interprets data as a service and an aid to agricultural interests, particularly those served by or affiliated with soil, water, and other conservation districts. Information collected by NRCS for these agricultural users is also made available to other Federal, State, and private agencies and to the general public without charge. Cooperator financial contribution is usually required for special measurements or interpretations beyond the scope of the regular program.

§ 612.5 Dissemination of water supply forecasts and basic data.
Water supply outlook reports prepared by NRCS and its cooperators containing water supply forecasts and basic data are usually issued monthly by each NRCS state office in the western states area for the months of January through June. Other reports jointly issued by NRCS and its cooperators include a fall water supply summary, annual and accumulative summaries of data, and a western states area report covering water supply outlook.
§ 612.6 Application for water supply forecast service.

Requests for obtaining water supply forecasts or related assistance may be directed to any NRCS office in the western states areas. NRCS offices are described in part 600 of this chapter.

§ 612.7 Forecast user responsibility.

The forecast user’s obligation to the federal government is to give appropriate credit and recognition to NRCS for information furnished. The Federal Government does not assume any responsibility for management decisions the user makes which may be based in whole or part on information provided by NRCS.

PART 613—PLANT MATERIALS CENTERS

Sec.
613.1 Purpose.
613.2 Policy and objectives.
613.3 NRCS responsibilities in plant materials.
613.4 Special production of plant materials.
613.5 PMCs.

SOURCE: 73 FR 51351, Sept. 3, 2008, unless otherwise noted.

§ 613.1 Purpose.

This part provides NRCS policy on the operation of PMCs. The Centers have responsibilities for assembling, testing, releasing, and providing for the commercial production and use of plant materials and plant materials technology for programs of soil, water, and related resource conservation and development.

§ 613.2 Policy and objectives.

(a) It is NRCS policy to assemble, comparatively evaluate, release, and distribute for commercial increase new or improved plant materials and plant materials technology needed for broad programs of resource conservation and development for agriculture, wildlife, urban, recreation, and other land uses and environmental needs. It is the policy of NRCS to conduct plant materials work in cooperation with other agencies of the Department of Agriculture, such as the Agricultural Research Service, and with other Federal and State research agencies, including State agricultural experiment stations. The emphasis of the NRCS plant materials work is to find suitable plants to address conservation needs. In contrast, the emphasis of research agencies and organizations in plant development is to improve economically important crops. The NRCS program of testing and releasing new seed-propagated plant materials follows the guidelines in “Statement of Responsibilities and Policies Relating to the Development, Release, and Multiplication of Publicly Developed Varieties of Seed-Propagated Crops,” which was adopted in June 1972, by Land Grant Colleges and interested Federal agencies.

(b) The objective of the plant materials activity is to select or develop special and improved plants and techniques for their successful establishment and maintenance to solve conservation problems and needs related to:

(1) Controlling soil erosion on all lands;

(2) Conserving water;

(3) Protecting upstream watersheds;

(4) Reducing sediment movement into waterways and reservoirs through the stabilization of critical sediment sources, such as surface mined lands, highway slopes, recreation sites, and urban and industrial development areas;

(5) Stabilizing disposal areas for liquid and solid wastes;

(6) Improving plant diversity and lengthening the grazing season on dryland pastures and rangelands;

(7) Managing brush on mountain slopes with fire-retarding plant cover to reduce the possibility of fires that threaten life and property, or result in serious sediment sources;

(8) Improving the effectiveness of windbreaks and shelterbelts for reducing airborne sediment, controlling
snow drifting, and preventing crop damage from wind erosion;
(9) Protecting streambank, pond, and lake waterlines from erosion by scouring and wave action;
(10) Improving wildlife food and cover, including threatened and endangered and pollinator species;
(11) Selecting special purpose plants to meet specific needs for environment protection and enhancement;
(12) Selecting plants that tolerate air pollution agents and toxic soil chemicals;
(13) Selecting plants that mitigate odor, Particulate Matter (PM)-10, and PM-2.5;
(14) Testing plants for biofuels and other energy-related activities; and
(15) Evaluating plants and techniques to combat invasive plant species and for reestablishment of desirable species after eradication.

§ 613.3 NRCS responsibilities in plant materials.

NRCS operates or enters into agreements with State universities or other State organizations to operate PMCs. NRCS also cooperates, both formally and informally, with other Federal, State, county, and nonprofit agencies or organizations on the selection of plants and evaluation of plant technology to increase the capabilities of PMCs. NRCS employs specialists for testing and selecting plant materials for conservation uses and the development of plant materials technology. NRCS’ responsibilities are to:
(a) Identify the resource conservation needs and cultural management methods for environmental protection and enhancement.
(b) Assemble and comparatively evaluate plant materials at PMCs and on sites where soil, climate, or other conditions differ significantly from those at the Centers.
(c) Make comparative field plantings for final testing of promising plants and techniques in cooperation with conservation districts and other interested cooperators.
(d) Release cooperatively improved conservation plants and maintain the breeder or foundation stocks in ways appropriate for particular State and plant species by working with experiment stations, crop improvement associations, and other State and Federal agencies.
(e) Produce limited amounts of foundation or foundation-quality seed and plants available for allocation to conservation districts, experiment stations, other Federal and State research agencies, State seed certifying organizations and directly to commercial growers (if other options do not exist) that will use the material to establish seed fields, seed orchards, or vegetative plantings for large-scale increase.
(f) Encourage and assist conservation districts, commercial seed producers, and commercial and State nurseries to produce needed plant materials for conservation uses.
(g) Encourage the use of improved plant materials and plant materials technology in resource conservation and environmental improvement programs.

§ 613.4 Special production of plant materials.

NRCS can produce plant materials in the quantity required to do a specific conservation job if this production will serve the public welfare and only if the plant materials are not available commercially. This function will be performed only until the plant materials are available commercially. Specific production of plant materials by NRCS requires the approval of the Chief.

§ 613.5 PMCs.

(a) The Norman A. Berg National PMC.
The Norman A. Berg National PMC at Beltsville, Maryland, focuses on national initiatives and provides coordination for plant materials work across all 50 States. In addition, the center provides plants and plant technology to address resource concerns in the mid-Atlantic region.
(b) Other PMCs. There are 26 other PMCs. Each serves several major land resource areas. NRCS operates 24 of these Centers, and 2 by cooperating agencies, as follows:
(1) Operated by NRCS: Tucson, AZ, Booneville, AR, Lockeford, CA, Brooksville, FL, Americus, GA, Molokai, HI, Aberdeen, ID, Manhattan, KS, Galliano, LA, East Lansing, MI, Coffeeville, MS, Elsberry, MO, Bridger,
MT, Fallon, NV, Cape May Courthouse, NJ, Los Lunas, NM, Big Flats, NY, Bismarck, ND, Corvallis, OR, Kingsville, TX, Knox City, TX, Nacogdoches, TX, Pullman, WA, and Alderson, WV.

(2) Operated by cooperating agencies with financial and technical assistance from NRCS: Meeker, CO—White River and Douglas Creek Soil Conservation Districts with partial funding from NRCS.

(3) Operated by cooperating agencies with technical assistance from NRCS: Palmer, AK—State of Alaska, Department of Natural Resources.

PART 614—NRCS APPEAL PROCEDURES

§ 614.1 General.

This part sets forth the informal appeal procedures under which a participant may appeal adverse technical determinations or program decisions made by officials of the Natural Resources Conservation Service (NRCS), an agency under the Department of Agriculture (USDA). These regulations reflect NRCS policy to resolve at the agency level, to the greatest extent possible, disputes arising from adverse technical determinations and program decisions made by NRCS. Once a decision is rendered final by NRCS, participants may appeal to the National Appeals Division (NAD) as provided for under 7 CFR part 11, or to the Farm Service Agency (FSA) county committee pursuant to 7 CFR part 780 for decisions rendered under Title XII of the Food Security Act of 1985, as amended, 16 U.S.C. 3801 et seq. (Title XII).

§ 614.2 Definitions.

The following definitions are applicable for the purposes of this part:

*Adverse decision* means the final technical determination or the program decision issued by NRCS that is adverse to the individual participant and not a matter of general applicability.

*Agency* means NRCS and its employees.

*Agency exhibit* means those documents or materials that are used during the hearing to further explain, differentiate, or distinguish a point, concept, or criteria in an appeal but that were not those materials or documents that the agency relied upon in making the adverse decision. Agency exhibits are labeled alphabetically A, B, C, etc., with total pages in each exhibit numbered.

*Agency record* means all documents and materials, including documents submitted by the participant and those generated by NRCS, which the agency relies upon and bases its program decision or technical determination. The agency record will include all documents relevant to the adverse decision. NRCS maintains the agency record and will, upon request or appeal, make available a copy of the agency record for a specific adverse decision to the participant(s) involved in the dispute. Agency record documents are labeled numerically 1, 2, 3, etc., in the lower right hand of the document.

*Appeal* means a written request by a participant asking for review (including mediation) of an adverse NRCS technical determination or program decision under this part. An appeal must set out the reason(s) for appeal and include any supporting documentation. An appeal is considered filed when the participant’s request has been received by the accepting official as indicated in the adverse decision notice.
Chief means the Chief of NRCS or his or her designee.

Commodity Credit Corporation means a wholly owned government corporation within USDA.

Conservation district means any district or unit of State or local government developed under State law for the express purpose of developing and carrying out a local soil and water conservation program. Such district or unit of government may be referred to as a conservation district, soil and water conservation district, natural resource district, conservation committee, or similar name.

County committee means a FSA county or area committee established in accordance with section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)).

Designated conservationist means the NRCS official, usually the district conservationist, whom the State Conservationist designates to be responsible for the program or compliance requirement to which this part is applicable.

Final technical determination means a preliminary technical determination issued under the Highly Erodible Land and Wetland Conservation (HELC/WC) provisions found in 7 CFR part 12 that have become final, and thus, appealable under sections 8 or 10 of this final rule.

Hearing means an informal appeal proceeding, either before the NRCS State Conservationist or the FSA county committee that affords a participant opportunity to present testimony and documentary evidence to show why an adverse program decision is in error and why the adverse decision should be reversed.

Mediation means a process in which a neutral third party, the mediator, meets with the disputing parties, usually the participant and the agency. Through mediation, the parties have the opportunity to work together with the assistance of the mediator to: Improve communications, understand the relevant issues, develop and explore alternatives, and reach a mutually satisfactory resolution.

Mediator means a neutral third party who serves as an impartial facilitator between two or more parties to assist them in resolving a dispute. The mediator does not take sides or render decisions on the merits of the dispute. The mediator assists the parties in identifying areas of agreement and encourages the parties to explore potential options toward resolution.

Participant means any individual or entity who has applied for, or whose right to participate in or receive, a payment or other benefit in accordance with any program administered by NRCS to which the regulations in this part apply and is affected by a decision of NRCS. The term does not include those individuals or entities excluded in the definition of participant published at 7 CFR 11.1.

Preliminary technical determination means the initial written decision by NRCS for a technical matter under HELC/WC which has not become final under this part.

Program decision means a written decision by NRCS concerning eligibility for program benefits, program administration, or program implementation and based upon applicable regulations and program instructions and not a technical determination made solely for the HELC/WC provisions. Program decisions may include technical matters relative to the specific conservation program. These are final decisions upon receipt by the program participant.

Qualified mediator means a mediator who is accredited under State law in those States that have a mediation program certified by USDA pursuant to 7 CFR part 785, or in those States that do not have a mediation program certified by USDA, an individual who has attended a minimum of 40 hours of core mediator knowledge and skills training and, to remain in a qualified mediator status, completes a minimum of 20 hours of additional training or education during each 2-year period. Such training or education must be approved by USDA, an accredited college or university, or one of the following organizations: State Bar, a State mediation association, a State approved mediation program, or a society of dispute resolution professionals.

Reconsideration means a subsequent consideration of a preliminary technical determination by the designated
conservationist or the State Conservationist.  
Secretary means the Secretary of Agriculture.  
State Conservationist means the NRCS official, or his or her designee, in charge of NRCS operations within a State.  
Title XII means Title XII of the Food Security Act of 1985, as amended, 16 U.S.C. 3801 et seq.  
Verbatim transcript means the official, written record of proceedings of a hearing on a decision appealable under this part.  

§ 614.3 Decisions subject to informal appeal procedures.  
(a) This part applies to NRCS adverse program decisions and technical determinations made with respect to:  
(1) Conservation programs and regulatory requirements authorized under Title XII, including:  
(i) Conservation Security Program;  
(ii) Conservation Stewardship Program;  
(iii) Conservation Reserve Program and the Conservation Reserve Enhancement Program;  
(iv) Environmental Quality Incentives Program, including the following:  
(A) Agricultural Water Enhancement Program,  
(B) Conservation Activity Plans,  
(C) Colorado River Basin Salinity Control,  
(D) Conservation Innovation Grants,  
(E) Ground and Surface Water Conservation Program,  
(F) Klamath Basin Program, and  
(G) Organic Program Initiative;  
(iv) Healthy Forest Reserve Program;  
(v) Water Bank Program;  
(vi) Watershed Protection and Flood Prevention Program; and  
(3) Any other program to which this part is made applicable.  
(b) With respect to matters identified in paragraph (a) of this section, participants may appeal adverse decisions concerning:  
(1) Denial of participation in a program;  
(2) Compliance with program requirements;  
(3) Issuance of payments or other program benefits to a participant in a program;  
(4) Technical determinations made under Title XII HELC/WC provisions;  
(5) Technical determinations or program decisions that affect a participant’s eligibility for USDA program benefits;  
(6) The failure of an NRCS official to issue a technical determination or program decision subject to this part (“failure to act”); and  
(7) Incorrect application of general policies, statutory or regulatory requirements.  
(c)(1) Only a participant directly affected by a program decision or a technical determination made by NRCS may invoke the informal appeal procedures contained in this part.  
(2) In order for the appeal request to be effective, the participant must personally make a written request for appeal that is signed by the participant identified in paragraph (c)(1) no later than 30 days after receipt of the adverse decision.  
(d) Appeals of adverse final technical determinations and program decisions subject to this part are also covered by the NAD rules of procedure, set forth at 7 CFR part 11, and by the FSA county committee appeals process, set forth at 7 CFR parts 11 and 780 for informal appeals of Title XII decisions.
§ 614.4 Decisions not subject to informal appeal procedures.

(a) Decisions that are not appealable under this part include:
   (1) Any general program provision, program policy, or any statutory or regulatory requirement that is applicable to all similarly situated participants, such as:
      (i) Program application ranking criteria;
      (ii) Program application screening criteria;
      (iii) Published soil surveys; or
      (iv) Conservation practice technical standards included in the local field office technical guide or the electronic FOTG (eFOTG).
   (2) Mathematical or scientific formulas established under a statute or program regulation and a program decision or technical determination based solely on the application of those formulas;
   (3) Decisions made pursuant to statutory provisions or implementing regulations that expressly make agency program decisions or technical determinations final;
   (4) Decisions that are based on technical information provided by another Federal or State agency, e.g., lists of endangered and threatened species;
   (5) Corrections by NRCS of errors in data entered on program contracts, easement documents, loan agreements, and other program documents; or
   (6) Decisions issued by the Office of the General Counsel, in the exercise of authority delegated to it by the Attorney General, concerning the application of real property title standards issued by the Attorney General.

(b) Complaints involving discrimination in program delivery are not appealable under this part and are handled under the existing USDA civil rights rules and regulations.

(c) Appeals related to contractual issues that are subject to the jurisdiction of the Civilian Board of Contract Appeals are not appealable under the procedures within this part.

(d) Where NRCS is unable to fund an application for program participation due to a lack of funds, the agency may not deny appeal of the underlying computations used to rank and prioritize the application.

§ 614.5 Reservation of authority.

The Secretary of Agriculture, Chief of NRCS, if applicable, or designee, reserves the right to make a determination at any time on any question arising under the programs covered under this regulation within their respective authority, including reversing or modifying in writing, with sufficient reason given therefore, any program decision or technical determination made by an NRCS official.

§ 614.6 Agency records and decision notices.

(a) All NRCS decisions under this part are based upon an agency record. NRCS will supplement the agency record, as appropriate, during the informal appeals process.

(b) NRCS notifies participants of the agency’s preliminary and final technical determinations and program decisions through decision notices. By certified mail, return receipt requested, NRCS will send to the participant a decision notice within 10 working days of rendering a technical determination or program decision. In lieu of certified mail, NRCS may hand deliver notices to participants with written acknowledgment of delivery by the participant. Each decision notice contains the following:
   (1) The factual basis for the technical determination or program;
   (2) The regulatory, statutory, or policy basis for the technical determination or program decision; and
   (3) Information regarding any informal appeal rights available under this part; the process for requesting such appeal; and the procedure for requesting further review before the FSA county committee pursuant to 7 CFR part 780 or NAD pursuant to 7 CFR part 11.

§ 614.7 Preliminary technical determinations.

(a) A preliminary technical determination is limited to those determinations made pursuant to the HELC/ WC provisions (16 U.S.C. 3801, et seq.) and becomes final 30 days after the participant receives the decision, unless the participant files an appeal with the appropriate NRCS official as indicated in the decision notice requesting:
§ 614.8 Final technical determinations.

(a) Preliminary HELC/WC technical determinations become final and appealable:

(1) Thirty days after receipt of the preliminary technical decision by the participant unless the determination is appealed in a timely manner as provided for in this regulation.

(2) Thirty calendar days after the beginning of a mediation session if a mutual agreement has not been reached by the parties; or

(3) Upon receipt by the participant of the final technical determination issued on reconsideration as provided in § 614.7(c).

(b) The participant may appeal the final technical determination issued under the HELC/WC provisions to:

(1) The FSA county committee pursuant to 7 CFR part 780; or

(2) NAD pursuant to 7 CFR part 11.

§ 614.9 Program decisions.

(a) Program decisions are final upon receipt of the program decision notice by the participant. Program decisions include all decisions issued by NRCS for programs that NRCS administers separate from the HELC/WC provisions. The participant has the following options for appeal of the program decision:

(1) An informal hearing before NRCS as provided for in paragraph (b) through paragraph (d) of this section;

(2) Mediation as provided for in §614.11;

(3) An informal hearing before the FSA county committee pursuant to 7 CFR part 780 if the program decision is made under Title XII; or

(4) A hearing before NAD pursuant to 7 CFR part 11.

(b) A program participant must file an appeal request for a hearing with the appropriate State Conservationist as indicated in the decision notice within 30 calendar days from the date the participant received the program decision.
Natural Resources Conservation Service, USDA

(c) The State Conservationist may accept a hearing request that is untimely filed under paragraph (b) of this section if the State Conservationist determines that circumstances warrant such an action.

(d) The State Conservationist will hold a hearing no later than 30 days from the date the appeal request was received. The State Conservationist will issue a written final decision no later than 30 days from the close of the hearing.

(e) NRCS will provide notice of the right to appeal to NAD on program decisions when equitable relief is denied by the Chief or the State Conservationist.

§ 614.10 Appeals before the Farm Service Agency county committee.

(a) In accordance with 7 CFR part 780, a participant may appeal a final technical determination or a program decision to the FSA county committee for those decisions made under Title XII.

(b) When the FSA county committee hearing the appeal requests review the technical determination by the applicable State Conservationist prior to issuing their decision, the State Conservationist will:

(1) Designate an appropriate NRCS official to gather any additional information necessary for review of the technical determination;

(2) Obtain additional oral and documentary evidence from any party with personal or expert knowledge about the facts under review; and

(3) Conduct a field visit to review and obtain additional information concerning the technical determination.

(c) After the actions set forth in paragraphs (b)(1) through (3) of this section are completed, provide the FSA county committee with a written technical determination in the form required by §614.6(b)(1) through (2) as well as a copy of the agency record.

§ 614.11 Mediation.

(a) A participant who wishes to pursue mediation must file a request for mediation under this part with the official designated in the decision notice no later than 30 days after the date on which the decision notice was received. Participants in mediation are normally required to pay fees established by the mediation program.

(b) A dispute will be mediated by a qualified mediator as defined at §614.2(n).

(c) The parties will have 30 days from the date of the first mediation session to reach a settlement agreement. This date can be extended upon agreement of the parties. The mediator will notify the State Conservationist whether the parties have reached an agreement.

(d) Settlement agreement reached during, or as a result of, the mediation process must be in writing, signed by all parties to the mediation, and comply with the statutory and regulatory provisions and policies governing the program. In addition, the participant must waive all appeal and judicial rights as to the issues resolved by the settlement agreement.

(e) At the outset of mediation, the parties must agree to mediate in good faith. NRCS demonstrates good faith in the mediation process by, among other things:

(1) Designating an NRCS representative in the mediation;

(2) Making pertinent records available for review and discussion during the mediation; and

(3) To the extent the NRCS representative does not have authority to bind the agency, directing the NRCS representative to forward, in a timely manner, any written agreement proposed in mediation to the appropriate NRCS official for consideration.

(f) Mediator impartiality. (1) No person may serve as mediator in an adverse program dispute who has previously served as an advocate or representative for any party in the mediation.

(2) No person serving as mediator in an adverse program dispute may thereafter serve as an advocate for a participant in any other proceeding arising from or related to the mediated dispute including, without limitation, representation of a mediation participant before an administrative appeals entity of USDA or any other Federal agency.

(g) Confidentiality. Mediation is a confidential process except for those limited exceptions permitted by the Administrative Dispute Resolution Act.
§ 614.12 Transcripts.

(a) No recordings will be made of any informal hearing conducted under §614.9. In order to obtain an official record of a hearing, a participant may obtain a verbatim transcript as provided in paragraph (b) of this section.

(b) Any party to an informal hearing appeal under §614.9 may request that a verbatim transcript is made of the hearing proceedings and that such transcript is made the official record of the hearing. The party requesting a verbatim transcript must pay for the transcription service and provide a copy of the transcript to NRCS at no charge.

§ 614.13 Appealability review.

If NRCS states that a decision is not adverse to the individual participant, and thus, no right to appeal exists, NRCS will notify the participant that he may seek review of that determination from the NAD Director.

§ 614.14 Computation of time.

(a) The word “days” as used in this final rule means calendar days, unless specifically stated otherwise.

(b) Deadlines for any action under this part, including deadlines for filing and decisions which fall on a Saturday, Sunday, Federal holiday, or other day on which the relevant NRCS office is closed during normal business hours, will be extended to close of business the next working day.

§ 614.15 Implementation of final NAD determinations.

(a) No later than 30 days after a NAD determination becomes a final administrative decision of USDA, NRCS will implement the determination.

(b) Biannually, NRCS must file a report on the status of implementation of final administrative determinations in accordance with section 19099 of the 2008 Farm Bill.

§ 614.16 Participation of third parties in NRCS proceedings.

When an appeal is filed under this part, NRCS will notify any third party whose interests may be affected of the right to participate as an appellant in the appeal. If the third party declines to participate, then NRCS’ decision will be binding as to that third party as if the party had participated. If a formal hearing is conducted by NAD, third party issues will be decided by NAD.

§ 614.17 Judicial review.

A participant must receive a final determination from NAD pursuant to 7 CFR part 11 prior to seeking judicial review in any U.S. District Court of competent jurisdiction.
SUBCHAPTER C—WATER RESOURCES

PART 621—RIVER BASIN INVESTIGATIONS AND SURVEYS

Subpart A—General

Sec.
621.1 Purpose.

621.41 Participation in Federal-State policy and planning activities at the regional level.
621.42 Federal-State compacts.
621.43 Interstate compacts and commissions.
621.44 Special studies.
621.45 Flood insurance studies.

SOURCE: 48 FR 18788, Apr. 26, 1983, unless otherwise noted.

Subpart A—General

§ 621.1 Purpose.

This part describes policies, requirements, and procedures governing the Department of Agriculture’s (USDA’s) investigations and surveys of watersheds of rivers and other waterways as a basis for developing coordinated programs. These activities are undertaken in cooperation with other Federal, State, and local agencies. The delegation of authority to the Natural Resources Conservation Service (NRCS) to provide national leadership for the conservation, development, and productive use of the Nation’s soil, water, and related resources, including the activities treated in this part is found at §2.62 of this title.

§ 621.2 Scope.

USDA river basin activities include:
(a) Cooperative river basin surveys in coordination with Federal, State, and local agencies;
(b) Floodplain management assistance in coordination with the responsible State agency and involved local governments;
(c) Joint investigations and reports with the Department of the Army under Pub. L. 87-639, 76 Statute 438 (16 U.S.C. 1009); and
(d) Interagency coordination of water resources activities.
formulation. USDA assistance is provided through field advisory committees composed of representatives of the Economic Research Service, Forest Service, and NRCS. The NRCS representative chairs the field advisory committee.

§ 621.11 Who may obtain assistance.
Assistance is available to conservation districts, communities, county governments, regional planning boards, other planning groups, and State and Federal agencies. Local groups express their desires for a cooperative study to the governor or appropriate State agency.

§ 621.12 How to request assistance.
For a cooperative study a governor, or a Federal, State, or local government agency must submit a written request and a Proposal to Study (PTS) through the NRCS State Conservationist to the Chief. Assistance in preparing the proposal may be obtained by contacting the State Conservationist. The State Conservationist sends the request and proposal with comments to the Chief for consideration. The proposal should:
(a) Describe the basin or study area, including a map of the study area;
(b) Explain the need for the study;
(c) Explain the need for USDA participation;
(d) State the responsibility and authority of the requesting agency in the study;
(e) Estimate the extent of participation of other Federal and State agencies;
(f) Discuss views and priorities of affected soil conservation districts regarding the proposed study;
(g) Briefly describe the intended management organization of the study;
(h) Specifically describe the expected results of the study;
(i) Identify primary users of the study results and the manner in which the results will be used;
(j) State the relationship of the study to ongoing and completed river basin studies;
(k) State that procedures for informing clearinghouses and for eliciting public participation will be followed;
(l) Estimate the duration and scope of the study; and
(m) Estimate the study costs by year and agency.

§ 621.13 Conditions for approval.
The Chief may authorize requested cooperative studies recommended by the State Conservationist. Priority for starting cooperative studies is based on the date of application, the readiness of the requesting agency to begin participation, the importance and significance of problems to be studied, the monetary or in-kind contributions toward the study, the sequence of ongoing and future studies, the type of study, the duration of study, the cost of study, the potential for implementation and other factors affecting the effectiveness and efficiency of the study. The number and location of cooperative studies started each year are governed by the availability of USDA funds and personnel.

§ 621.14 Recipient responsibility.
Leadership in arrangements for other needed Federal, State, and local agency participation is responsibility of the requesting agency. Consistent with national objectives and NRCS policy and procedures, the requesting agency has leadership responsibility for developing specific study objectives, providing the necessary study organization, and ensuring public participation in the planning process.

Subpart C—Floodplain Management Assistance

§ 621.20 Description.
Floodplain management studies provide needed information and assistance to local and State entities so that they can implement programs for reducing existing and future flood damages in rural and urban communities. Assistance is targeted to communities where flood damage is a serious concern and local governments are sincerely interested in taking action to reduce damage.

§ 621.21 Who may obtain assistance.
Assistance is available to conservation districts, communities, county
Natural Resources Conservation Service, USDA § 621.30

§ 621.24 NRCS responsibility.
NRCS is responsible for providing leadership for scheduling and implementing the technical phases of the studies and preparing the reports. NRCS assists in interpreting the study results.

§ 621.25 Recipient responsibility.
The State agency is responsible for developing State priorities for floodplain management studies and coordinating this work with related activities in the State. The cooperating local government entity is responsible for obtaining permission for carrying out field surveys. The State and local participants assist in distributing and interpreting the report and providing public information and educational services.

Subpart D—Joint Investigations and Reports With the Department of the Army

§ 621.30 Description.
(a) As provided by Pub. L. 87-639, joint investigations and reports by USDA and the Department of the Army may be authorized by resolutions adopted by the Committee on Environment and Public Works of the U.S. Senate or the Committee on Public Works and Transportation of the U.S. House of Representatives for any watershed area in the 50 States, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands if the nature of the watershed area problems dictates need for a joint effort by the two Departments.

(b) Authorized joint investigations and reports are made to determine works of improvement needed in the study area for flood prevention; for the conservation, development, use, and disposal of water; for flood control; for the conservation and proper use of land; and for allied purposes. The joint report to Congress may include a water and related land resources plan recommended for implementation. Such an implementation plan must be accompanied by an environmental impact statement (EIS) and must be in sufficient detail to permit its implementation.
§ 621.31 Who may request assistance.

Any organization, group, or State or local government may request assistance.

§ 621.32 How to request assistance.

Applicants for a joint investigation and report should request their congressional representative(s) to initiate appropriate action under Pub. L. 87-639.

§ 621.33 Conditions for approval.

A joint investigation and report is authorized by a resolution of the Committee on Environment and Public Works of the U.S. Senate or the Committee on Public Works and Transportation of the U.S. House of Representatives. Studies are initiated when funds for them are appropriated by the Congress.

§ 621.34 Recipient responsibility.

Participating local and State governments work with USDA and the Department of the Army representatives in developing objectives, collecting data, analyzing problems, planning and formulating proposals, and considering financial plans. Active public participation is solicited in the planning process through means such as questionnaires, public meetings, citizen advisory boards, and technical committees.

Subpart E—Interagency Coordination

§ 621.40 Participation in Federal interagency policy activities at the national level.

(a) Policy development in water and related land resources is coordinated at the Federal level through the Cabinet Council on Natural Resources and Environment. NRCS provides staff support and representation in these activities as requested.

(b) Within the Department, all interested USDA agencies participate in water policy development through the USDA Committee on Natural Resources and Environment and the Water Issues Work Group.

(c) NRCS provides appropriate staff support when requested for committees, work groups, and task forces established for interagency coordination of water resources related activities of Federal agencies.

§ 621.41 Participation in Federal-State policy and planning activities at the regional level.

(a) NRCS has a responsibility to represent the Department when needed to assist regional water planning entities and interagency committees which coordinate water resources planning activities.

(b) For the Arkansas-White-Red Basin Interagency Committee (AWRBIAC) and the Pacific Southwest Interagency Committee (PSIAC), the USDA member periodically serves as chairperson and provides an executive secretary. For the Southeast Basin Interagency Committee (SEBIAC), NRCS periodically provides an executive secretary for the chairperson, who is a State government official.

(c) Under the leadership of NRCS, other USDA agencies, principally the Forest Service and Economic Research Service, also participate.

§ 621.42 Federal-State compacts.

NRCS is designated to represent USDA in assisting the U.S. Commissioners of the Delaware River Basin Commission and the Susquehanna River Basin Commission. In carrying out this responsibility, NRCS provides a liaison officer to work with the U.S. Commissioners on policy level matters, as well as providing the USDA representatives on the Federal field committees to assist the Commissioners.

§ 621.43 Interstate compacts and commissions.

As assigned, an NRCS State Conservationist is the USDA point of contact for governing bodies of interstate compacts and commissions concerned
with the conservation, development, and proper use of water, soil, and related resources.

§ 621.44 Special studies.
As designated, NRCS represents USDA on special study groups such as for the Colorado River Basin Salinity Control Program Studies.

§ 621.45 Flood insurance studies.
As requested by the Federal Emergency Management Agency (FEMA), and within the limits of available resources, NRCS carries out flood insurance studies of various types under the National Flood Insurance Program (Pub. L. 90-448, 82 Statute, 574 (42 U.S.C. 4012)), as amended. In this activity, NRCS performs detailed technical studies to determine the extent and frequency of flooding. The flood insurance program is administered by FEMA. NRCS is reimbursed by that agency for actual costs incurred in carrying out the studies. Local entities desiring flood insurance coverage should contact the responsible State agency or FEMA and apply in accordance with procedures of that agency.

PART 622—WATERSHED PROJECTS

Subpart A—General

Sec.
622.1 Purpose.
622.2 Scope.
622.3 Relationship to the Pub. L. 78-534 Program.
622.4 Relationship to other agencies.
622.5 Guidelines.
622.6 Equal opportunity.
622.7 Notification under Executive Order 12072.

Subpart B—Qualifications

622.10 Sponsors.
622.11 Eligible watershed projects.

Subpart C—Application Procedure

622.20 Application.
622.21 State agency approval.

Subpart D—Planning

622.30 General.
622.31 Basic planning efforts.
622.32 Reviews and approvals.

SOURCE: 49 FR 6078, Feb. 17, 1984, unless otherwise noted.

Subpart A—General

§ 622.1 Purpose.

§ 622.2 Scope.

(a) To assist sponsors in preparing and carrying out watershed plans, the Natural Resources Conservation Service (NRCS) shall conduct investigations and surveys, with the cooperation and assistance of other Federal agencies, to:

(1) Determine the extent of watershed problems and needs, and

(2) Set forth viable alternative solutions consistent with local, regional, and national objectives, including an alternative solution which makes the greatest net contribution to national economic development.

(b) Alternatives will consist of either land treatment, nonstructural or structural measures, or combinations thereof that will help accomplish one or more of the authorized project purposes.

(c) Authorized project purposes are watershed protection, conservation and proper utilization of land, flood prevention, agricultural water management including irrigation and drainage, public recreation, public fish and wildlife, municipal and industrial water supply, hydropower, water quality management, ground water supply, agricultural pollution control, and other water management.

(d) After a final plan for works of improvement is agreed upon between NRCS and the sponsors and the approval processes are completed, NRCS will provide technical and financial assistance to install the project, subject to the availability of funds and the budgeting and fiscal policies of the President.
§ 622.3 Relationship to the Pub. L. 78-534 Program.

(a) General. The purposes and objectives of the programs under Pub. L. 83-566 and Pub. L. 78-534 are the same in most cases. Planning criteria, economic justification, local sponsorship, agency participation, financial assistance, eligible measures, operation and maintenance arrangements for the Pub. L. 78-534 program are consistent with those of the Pub. L. 83-566 program. The differences with the Pub. L. 78-534 program are outlined below.

(b) Initiation. Flood prevention projects are individually authorized by Federal legislation. The state conservationist and the sponsors agree on a plan of action and notify interested parties to solicit their participation. The sponsors keep the public informed and solicit their views and comments.

(c) Subwatershed plans. These plans are administratively approved by the state conservationist. If the plan involves purposes other than flood prevention, clearance must be obtained from the Office of Management and Budget before approval. Financial assistance available differs only in that program funds may be used for the purchase of land rights for single-purpose flood prevention structures and installing land treatment on Federal lands.

(d) Installation. NRCS shall award and administer contracts for the installation of project measures unless the sponsors agree to perform the work. Project agreements between the sponsors and NRCS are not required if the work consists of flood prevention structures built and funded by NRCS.

§ 622.4 Relationship to other agencies.

NRCS will coordinate responsibilities with other water and land resource development agencies on projects that may come under the jurisdictions of various authorities. This will include any land management agencies which may have land which would be affected by project measures. Coordination with the U.S. Department of the Interior's Fish and Wildlife Service will be in accordance with section 12 of Pub. L. 83-566 (as amended).

§ 622.5 Guidelines.

Guidelines for carrying out programs authorized under Pub. L. 83-566 and Pub. L. 78-534 are contained in miscellaneous instructions, manuals, and handbooks issued by the Natural Resources Conservation Service, Regulations for Implementing NEPA (40 CFR parts 1500-1508) issued by the Council on Environmental Quality, and in Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies issued by the Water Resources Council. Watershed projects are to be planned and carried out in a way that will conform to conditions mandated by the above and other applicable laws, Executive orders, and codified rules.

§ 622.6 Equal opportunity.

The Pub. L. 83-566 and Pub. L. 78-534 programs will be conducted in compliance with all requirements respecting nondiscrimination as contained in the Civil Rights Act of 1964, as amended, and in the regulations of the Secretary of Agriculture (7 CFR Part 15), which provide that no person in the United States shall, on the grounds of race, color, national origin, sex, age, handicap, or religion be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity conducted or assisted by the Department of Agriculture.

§ 622.7 Notification under Executive Order 12372.

This program is covered under Executive Order 12372, “Intergovernmental Review of Federal Programs” and 7 CFR Part 3015, Subpart V, “Intergovernmental Review of the Department of Agriculture Programs and Activities.” State processes or directly affected State, areawide, regional and local officials and entities have 60 days for comment starting from the date of submission of the application to the State Single Point of Contact.

Subpart B—Qualifications

§ 622.10 Sponsors.

(a) Watershed projects are sponsored by one or more local organizations
§ 622.11 Eligible watershed projects.

(a) To be eligible for Federal assistance, a watershed project must:

1. Meet the definition of a watershed area as defined in NRCS’s National Watersheds Manual.
2. Not exceed 250,000 acres in size.
3. Not include any single structure that provides more than 12,500 acre-feet of floodwater detention capacity nor more than 25,000 acre-feet of total capacity.
4. Have significant land or water management problems that can be solved or alleviated by measures for watershed protection, flood prevention, drainage, irrigation, recreation, fish and wildlife, municipal or industrial water supply, or other water management.
5. Produce substantial benefits to the general public, to communities, and to groups of landowners.
6. Cannot be installed by individual or collective landowners under alternative cost-sharing assistance.
7. Have strong local citizen and sponsor support through agreement to obtain land rights, contribute the local cost of construction, and carry out operation and maintenance.

(b) Works and improvement that may be included in a watershed project are those that:

1. Contribute to reducing floodwater, erosion, and sediment damages.
2. Further the conservation, development, utilization, and disposal of water and the conservation and proper utilization of land.
3. Have the greatest net national economic benefits consistent with protecting the Nation’s environment (for structural water resource projects) relative to alternative works, unless an exception is granted by the Secretary.
§ 622.31 Basic planning efforts.

Upon receipt of an application, the NRCS will make any necessary field studies and develop a report to justify the need for planning effort. Once planning is authorized by the Chief of NRCS, a watershed plan-environmental impact statement (plan-EIS) or a watershed plan-environmental assessment (plan-EA) will be prepared by NRCS to request funding. This effort must be coordinated with other State and Federal agencies.

§ 622.32 Reviews and approvals.

(a) The watershed plan-environmental impact statement (or assessment) will be subject to internal technical reviews, sponsor and other local party review, interagency review by other Federal, state, and concerned groups, and a final review as stated in NRCS’s National Watersheds Manual.

(b) After thorough review by NRCS and other agencies, the NRCS and the sponsors shall accept the plan-EIS or plan-EA by signing the watershed agreement. The watershed plan must be approved by the Committees of Congress or the Chief of NRCS. Funding for installation can then be granted by the Chief of NRCS.
the affected land as cropland. Additionally, the easement shall require permanent maintenance of the wetland conditions, except in the case of natural disaster.

(b) The EWRP is available only in the following States: Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, South Dakota, and Wisconsin. Certain cropland areas within these States have been determined to have been inundated by the Midwest floods of 1993. As more fully defined and described in this part, eligible land may include farmed wetlands or prior converted wetlands (wetlands converted prior to December 23, 1985), together with adjacent lands on which the wetlands are functionally dependent so long as the likelihood of successful restoration of such land and the potential wetland values merit inclusion in the program with reasonable costs.

§ 623.2 Definitions.

The following definitions shall be applicable for the purposes of this part:

(a) Agricultural commodity—means any crop planted and produced by annual tilling of the soil, or on an annual basis by one trip planters, or alfalfa and other multiyear grasses and legumes in rotation as approved by the Secretary. For purposes of determining crop history, as relevant to eligibility to enroll land in the program, land shall be “considered planted to an agricultural commodity” during a crop year if, as determined by ASCS, as action of the Secretary prevented land from being planted to the commodity during the crop year.

(b) Applicant—means a person who submits to NRCS an application to participate in the EWRP.

(c) Commodity Credit Corporation—a wholly owned government corporation within the U.S. Department of Agriculture.

(d) Conservation District (CD)—means a subdivision of a State or local government organized pursuant to applicable State law to promote soil and water conservation practices.

(e) Conservation Reserve Program—means the program under which long-term payments and cost-share assistance is provided to individuals to establish permanent vegetative cover on cropland that is highly erodible or environmentally sensitive.

(f) Prior converted wetland—means wetland that has been drained, dredged, filled, leveled, or otherwise manipulated (including any activity that results in impairing or reducing the flow, circulation, or reach of water) prior to December 23, 1985, for the purpose, or that has the effect, of making the production of agricultural commodities possible if such production would not have been possible but for such action.

(g) Cost-share payment—means the payment made by NRCS to assist program participants in establishing the practices required in a WRPO.

(h) Chief—means the Chief of the Natural Resources Conservation Service, or the Chief’s designee.

(i) Easement—means the real property interest acquired by NRCS under this part for wetland restoration and maintenance and which is properly filed with the appropriate local or State government official.

(j) Easement area—means the land to which the approved wetland restoration practices and wetland conservation restrictions are to be applied.

(k) Fair market value (FMV)—means the price that a willing seller would accept and a willing buyer would pay in an open, informed transaction.

(l) Farmed wetland—means wetland that was drained, dredged, filled, or otherwise manipulated prior to December 23, 1985 to the extent that the production of agricultural commodities was made possible, but which continues to meet wetland criteria [refer to 7 CFR 12.32(a)(3) for descriptions of farmed wetlands].

(m) Floodwater control systems—means dikes, levees, or other similar structural measures for the protection of cropland from flooding.

(n) FWS—means the Fish and Wildlife Service of the United States Department of the Interior.

(o) Local NRCS office—means the office of the Natural Resources Conservation Service serving the county or combination of counties in which the landowner’s farm or ranch is located.

(p) Participant—means a person(s) owning land subject to a perfected
§ 623.3 Eligible person.

To be eligible to participate in the EWRP, a person must be the owner of eligible land for which enrollment is sought and must have been the owner of such land for at least the preceding 12 months prior to the time the enrollment offer is declared by NRCS, as provided in this part. The person shall provide to NRCS adequate proof of ownership of the land. NRCS may waive the 12 month ownership requirement if:

(a) The land was acquired by will or succession as a result of the death of the previous owner; or

(b) Adequate assurances have been presented that the new owner of such land did not acquire such land for the purpose of placing it in the EWRP.

§ 623.4 Eligible land.

(a) Except as otherwise provided in this section, land is eligible for enrollment in the EWRP only if NRCS determines that the land:

1. Was inundated by the Midwest floods of 1993;
2. If restored to productive condition, would have a fair market value that is less than the estimated costs of restoring the land to productive condition and repairing related floodwater control systems;
3. Is likely to have its wetland value restored with minimal costs; and
4. Is wetland farmed under natural conditions, a farmed wetland or prior converted wetland, or substantially altered lands which are cropland; or
5. Is wetland that has been restored on the land under a CRP contract, or under a Federal or State wetland restoration program with an easement for a period of less than 30 years.

(b) To be eligible for enrollment in the EWRP, land must also:

1. Be determined by ASCS to have been annually planted or considered planted to an agricultural commodity in at least 1 of the 5 previous crop years; or
2. Be land under a CRP contract, in which case, the land need only to have been planted to an agricultural commodity during 2 of the 1981 through 1985 crop years.

(c) Other lands may be considered eligible if the inclusion of such lands in the EWRP easement would significantly add to the functions and values of the wetlands to be restored under this part, as determined by NRCS.

(d) The criteria and procedures contained in 7 CFR part 12 will be used to identify wetlands, converted wetlands, and farmed wetlands.

§ 623.5 Ineligible land.

Notwithstanding any other provisions of this part, the following land is not eligible for enrollment in the EWRP:

(a) Land that contains either timber stands or trees established in connection with a CRP contract;
(b) Lands owned or acquired by an agency of the Federal Government;
(c) Land already subject to a deed restriction prohibiting the production of agricultural commodities or the alternation of existing wetland hydrologic conditions;
(d) Land located between the pre-flood mainstem levees and the river; or
Natural Resources Conservation Service, USDA

§ 623.6 Transfer of lands from the CRP to the EWRP.

Land that is subject to an existing CRP contract administered under 7 CFR parts 704 and 1410 may be transferred into the EWRP only if:

(a) The land and landowner(s) meet the requirements of this part; and

(b) The application for transfer into the EWRP is approved by Commodity Credit Corporation (CCC), if found to be in the interest of the program. If such transfer is requested by the owner and approved by CCC, the CRP contract for the property will be terminated or otherwise modified subject to such terms and conditions as are mutually agreed by the landowner, CCC, and NRCS.

§ 623.7 Terms of the easement.

Landowners will grant to NRCS an easement which shall run with the land and be in favor of NRCS and its assigns or delegates. The easement shall require the land to be monitored as specified by the WRPO to promote the purposes of this part, including but not limited to maintenance of the restored wetland for entire length of the easement. Such easement shall: (a) be a permanent reserve interest easement; (b) require that the maintenance of the land be in accordance with the terms of the easement and with the terms of the WRPO and shall be the responsibility of the owners of the property and their successors of any kind, including, but not limited to, the owners' heirs and assigns; (c) grant to NRCS a right of access in favor of NRCS and its delegates, assigns and successors of any kind, to the portion of the property which is subject to the provisions of the easement. Maintenance of such access shall be the responsibility of the owner and their successors of any kind; (d) reserve to NRCS the right to permit such compatible uses of the easement area as may be identified in the WRPO; (e) reserve to the landowner those compatible uses identified in the WRPO that are permitted to be pursued by the landowner; (f) be signed by each person with an interest of any kind in the land covered by the easement; (g) permanently prohibit use of the easement area for cropland, except to harvest an agricultural commodity planted before the easement is perfected; and (h) require permanent maintenance of the wetland conditions, except in the case of natural disaster.

§ 623.8 Easement value.

NRCS offers for easements will be based on the fair market value, as determined by the NRCS State Conservationist, of the land covered by the easements. Fair market value will be based on post-flood conditions as if reclaimed. Land easement values will be determined by the State Conservationist in consultation with a technical committee. A technical committee shall include representatives of ASCS, Extension Service, and FWS. Additionally, the State Conservationist may collect information from other sources as he deems necessary. Coordination between States will be provided by the Chief, NRCS.

§ 623.9 Easement priority.

The State Conservationist, in consultation with the FWS and with input from a technical committee and other interested Federal agencies, will establish a ranking process to establish the priority of parcels offered into the EWRP. This process will rank the floodway enhancement and environmental benefits per dollar of government expenditure on restoration and easement purchase. The factors for determining the priority for selection will consider the following:

(a) Protection and enhancement of habitat for migratory birds and wildlife, including the contribution the restoration may make to the recovery of threatened and endangered species,

(b) Floodway expansion,

(c) Proximity to other protected wetlands,

(d) Level of hydrology restored,

(e) Wetland function or values,

(f) Likelihood of successful restoration of wetland values,

(g) Cost of restoration and easement purchase, and

(h) Other factors as determined appropriate by NRCS.
§ 623.10 Application to participate.

(a) A person seeking to enroll land in the EWRP must apply for enrollment on an approved NRCS form. The application to participate must be filed with the local NRCS field office during an announced period for such submissions.

(b) A person submitting an application to participate shall not be obligated to accept an NRCS offer to purchase an easement if one is forthcoming.

(c) An application to participate must be signed by all owners of the property or their duly authorized representative(s).

§ 623.11 Obligations of the landowner.

(a) All owners of land who accept an EWRP offer from NRCS shall:

1. Comply with the terms of the easement.

2. Comply with all terms and conditions of the WRPO for the full life of the easement.

3. Ensure that the easement granted to NRCS is superior to the interest of all other parties who may have an interest in the easement area, except as authorized by NRCS. Such action shall include, but not be limited to, obtaining a written statement of consent to such a superior easement from those holding a security interest or any other encumbrance or the land covered by the easement. Additionally, the landowner shall perfect the easement with superior NRCS interest in accordance with State law.

4. Agree to the permanent retirement of the aggregate total of crop acreage bases, and allotment and mandatory quota on the farm or ranch in order to maintain the base allotment on quota acres at or below the number of acres of cropland after the easement has been perfected.

5. Not allow grazing or commercial use of the land covered by an easement except as provided for in the WRPO, or harvesting of any agricultural commodity produced on the land subject to the EWRP easement.

6. Comply with Federal or State noxious week laws in the manner specified in the WRPO.

7. Control other identified weed and pest species, in the manner specified in the WRPO.

8. Be responsible for repairs, improvements, and inspections of the WRPO practices as necessary to maintain existing public drainage systems when the land is restored to the condition required by the terms of the easement, the contract, and the easement.

9. Be permitted to control public access, in accordance with the WRPO, on the land enrolled in the program.

10. Implement any additional provisions that are required by NRCS in consultation with FWS in the contract, WRPO, or easement, in order to, as determined by NRCS, facilitate the administration of the EWRP.

11. Not alter the vegetation, except to harvest already planted crops or forage, or hydrology on such acres subsequent to perfection of the easement by the landowner, except as provided for in the easement or WRPO.

12. Be responsible for the long-term management of the easement in accordance with the terms of the easement and related agreements including the WRPO. Owners may enter into agreements with Federal or State agencies or private organizations to assist in the management of the easement area. No NRCS funds will be provided to these agencies or organizations for management expenses. Responsibility for management of the easement shall in all cases remain with the owner and the owner’s successors of any kind regardless of whether arrangements are made for third-party management.

13. Agree that each person with an interest in the land covered by an easement under EWRP shall be jointly and severally responsible for compliance with the WRPO, the easement, the provisions of this part, and for any refunds or payment adjustment which may be required for violation of any terms or conditions of the WRPO, the easement, or provisions of this part.

14. Refrain from taking any action on the easement area unless specifically authorized in the reserve interest easement or the WRPO; and

15. Secure any necessary local, State and Federal permits prior to commencing restoration of the designated area.

(b) In addition, program participants and their successors of any kind may:
(1) Not alter wildlife habitat and other natural land features of the enrolled land unless authorized by the WRPO.

(2) Apply pesticides or fertilizers on enrolled land or mow such land, only as provided for in the WRPO.

(3) Not engage in any activities on other land on the farm on which the easement exists that will, as determined by NRCS; (i) alter the flow of surface or subsurface water into or out of the easement area except as specified in the WRPO; or (ii) be otherwise inconsistent with the terms of the easement.

The activities of any person on the property shall be considered for purposes of this section to be the actions of the program participant. However, if the NRCS determines that the activities of the person were beyond the control of the program participants, NRCS may adjust the remedies provided for in this part to the extent determined consistent with program goals. Obligations created by the easement shall run with the land and shall bind all persons having an interest in the property at any time whether such interest is created by death of the owner, sale, assignment, or otherwise.

§ 623.12 Payments to landowners by NRCS.

(a) NRCS will share the cost with landowners of rehabilitating the enrolled land in the EWRP as provided in the WRPO. The amount of the cost-share assistance shall be specified in the contract. Eligible costs for such cost-share assistance by NRCS shall only include those costs which NRCS determines are appropriate and shall be subject to the following restrictions:

(1) The State Conservationist will establish cost-share rates of between 75 to 100 percent of the historical cost of establishing or installing the practices specified in the WRPO; or pay the average cost of establishing the practices specified in the WRPO, based on the historical cost of establishing the practices in the State;

(2) Cost-share payments may be made only upon a determination that an approved practice or an identifiable unit of the practice has been completed in compliance with NRCS approved standards and specifications; and

(3) Cost-share payments may not be made for the maintenance of the practice except as specifically permitted in writing by the State Conservationist.

(b) Notwithstanding paragraph (a)(3) of this section, cost share payments may be authorized for the replacement or restoration of practices for which cost share assistance has been previously allowed under the EWRP, but only if:

(1) Replacement or restoration of the practice is needed to meet the objectives for which the easement was established; and

(2) The failure of the original practice was due to reasons beyond the control of the participant.

(c)(1) NRCS shall pay the amount agreed upon by NRCS and the landowner for the purchase of the easement in a lump-sum amount after the easement is perfected in compliance with State law, except in the case of paragraph (c)(2) of this section.

(2) For all easements, NRCS shall pay no more than 75 percent of the total easement price pending completion of the practices to restore the wetlands as provided under the WRPO. The remaining amount shall be paid when NRCS determines the restoration is complete.

(d) After an easement is perfected, NRCS will reimburse landowners for fair and reasonable expenses incurred for title searches, filing expenses, and related costs, as determined by NRCS.

§ 623.13 Wetlands reserve plan of operations.

(a) After NRCS has accepted the applicant for enrollment in the program, a WRPO will be developed by the landowner and NRCS, in consultation with FWS.

(b) The WRPO shall:

(1) Include an aerial photo displaying the land offered for enrollment;

(2) Specify the manner in which the eligible land shall be restored, operated, and maintained to accomplish the goal of the program, including, but not limited to: (i) measures to control noxious weeds and insect pests in order to comply with applicable Federal, or State noxious weed and pest control laws; and (ii) measures to control other
specified species of weeds, insects or pests;
(3) Specify compatible land uses for personal enjoyment for which the landowner may be compensated. These compatible land uses shall be reserved to the landowner in the easement. Such uses may include, among others: (1) recreational use, hunting and fishing; (ii) manage timber production including harvesting; and (iii) managed haying or grazing consistent with the goals of the program;
(4) Set out cost estimates of the practices required by the WRPO, the offer for the easement, and other reimbursement costs;
(5) Identify access routes to be maintained for wetland restoration activities and future management and easement monitoring in connection with the land to be enrolled;
(6) Make provisions deemed necessary for maintaining public drainage systems if present on lands subject to the WRPO;
(7) Contain scheduled implementation dates for restoration practices;
(8) Contain other provisions or limitations as NRCS, in consultation with the FWS, determines to be necessary.
(c) NRCS in consultation with FWS will collect from State or Federal agencies whatever additional information is deemed necessary for the development of the WRPO with the landowner.
(d) The WRPO must be signed by NRCS, FWS, Conservation District (CD), and the landowner(s). However, if agreement between NRCS and FWS, or CD at the local level is not reached within 20 calendar days, the WRPO shall be developed by the State Conservationist of NRCS in consultation with FWS or CD.
(e) The WRPO may require that a temporary vegetative or water cover be established on the property if immediate establishment of a permanent cover is not practicable or otherwise desirable.
(f) The terms of an approved WRPO shall not relieve the program participant of any obligation or term imposed or provided for in the contract, the easement, or this part.
(g) WRPO, where appropriate, will provide for the development of a tree planting plan with the assistance of the FS or State forestry agency.
(h) The WRPO, where appropriate, will provide for the development by NRCS of detailed plans for weed control, structural measures and their operation, vegetation establishment and management, and other measures as needed.
(i) Revisions of the WRPO to enhance or protect the value for which the easement was established may be made at any time at the request of either NRCS, FWS, the owner and upon the concurrence of all three parties.
§ 623.14 Easement modifications.
After the easement has been perfected, no change will be made in the easement without a written request by the participant and the written consent of the Chief. Approval may be granted to achieve the goals of EWRP or facilitate the practical administration and management of the easement area or the program and the approval will not adversely affect the functions and values for which the easement was established. A modified easement shall be perfected in accordance with State law and NRCS superior interest shall be reserved by the landowner in accordance with §§623.7 and 623.11(a)(3).
§ 623.15 Transfer of land.
(a) If a new owner purchases or obtains the right and interest in, or right to occupancy of, the land subject to a EWRP easement, such new owner shall be subject to the terms and conditions of the easement. The participant who is the signatory to the easement shall be entitled to receive all remaining payments, if any, for the purchase of the easement. Eligible cost-share payments shall be made to the participants with respect to costs actually incurred.
(b) Upon the transfer of the property subject to an EWRP easement, any remaining cost-share payments shall be paid to the new owner or purchaser only if the new owner or purchaser becomes a party to the WRPO within 60 days of the perfection of the deed transferring title to the new owner. Such payments shall be paid in the manner agreed to by the participant.
and the buyer. The new owner or purchaser shall be responsible for assuring completion of all measures and practices required by the contract and the WRPO.

(c) Any transfer of the property prior to the perfection of the easement shall void any NRCS offer or WRPO unless the new owner agrees to accept the offer within 60 days of the perfection of the deed transferring the land to the new owner.

§ 623.16 Monitoring and enforcement of easement terms and conditions.

(a) NRCS or its representative shall be permitted to inspect each easement area at any and all times determined necessary by NRCS to ensure that:

(1) Structural and vegetative restoration work are properly maintained;

(2) The wetlands and adjacent upland habitat of the easement area is being managed as required in the WRPO and the terms of the easement; and

(3) Uses of the area are consistent with the terms and conditions of the easement and the WRPO.

(b) If an owner or other interested party is unwilling to voluntarily correct, in a timely manner, deficiencies in compliance with the terms of the WRPO, the EWRP easement, or any related agreements, NRCS may at the expense of any person who is subject to the EWRP easement correct such deficiency. Such NRCS action shall be in addition to other remedies available to NRCS.

(c) Monitoring and enforcement responsibilities may be delegated by NRCS at any time to other Federal or State agencies. Landowners may transfer management responsibilities only to Federal, State, or local agencies or private organizations that have been approved by NRCS in advance as having the appropriate authority, expertise, and resources necessary to carry out such delegated responsibilities.

§ 623.17 Violations and remedies.

(a) If a violation of the terms and conditions of the contract, the WRPO, or the recorded EWRP easement occurs, the easement shall remain in force and NRCS may:

(1) Require the owner to fully restore the easement area to fulfill the terms and conditions of the easement and WRPO; and

(2) Require the owner, who received payments from NRCS for any purpose under this part, to refund all or part of such payments received together with interest, as determined appropriate by NRCS.

(b) If an owner fails to carry out the terms and conditions of an easement, appropriate legal action may be initiated. The owner of the property shall reimburse NRCS for all costs incurred including, but not limited to, legal fees.

§ 623.18 Access to land.

In order to determine eligibility and compliance with respect to this part, representatives of the Department, or designee thereof, shall have the right of access to:

(a) Land which is the subject of an application made in accordance with this part,

(b) Land which is subject to an easement made in accordance with this part, and

(c) Records of the participant showing status of all ownership interest in lands subject to this part.

§ 623.19 Assignments.

Any participant entitled to any cash payment under this program may assign the right to receive such cash payments, in whole or in part.

§ 623.20 Appeals.

A participant in the EWRP may obtain a review of any administrative determination concerning land eligibility, development of a WRPO, or any adverse determination under this part in accordance with the administrative appeal regulations provided in part 614 of this title.

[60 FR 67316, Dec. 29, 1995]

§ 623.21 Scheme and device.

(a) If it is determined by NRCS that a landowner has employed a scheme or device to defeat the purposes of this part, any part of any program payment otherwise due or paid such landowner during the applicable period may be withheld or be required to be refunded with interest thereon, as determined
§ 623.22 Filing of false claims.

If it is determined by NRCS that any participant has knowingly supplied false information or has knowingly filed a false claim, such participant shall be ineligible for any payment under this part. False information or false claims include claims for payment for practices which do not meet the specifications of the applicable WRPO. Any amounts paid under these circumstances shall be refunded, together with interest as determined by NRCS, and any amounts otherwise due such participant shall be withheld.

PART 624—EMERGENCY WATERSHED PROTECTION

§ 624.1 Purpose.

The Natural Resources Conservation Service (NRCS) and United States Forest Service (FS) are responsible for administering the Emergency Watershed Protection (EWP) Program. This part sets forth the requirements and procedures for Federal assistance, administered by NRCS, under Section 216, Public Law 81-516; and Section 403 of the Agricultural Credit Act of 1978, as amended by Section 382, of the Federal Agriculture Improvement and Reform Act of 1996, Public Law 104-127.

The Secretary of Agriculture has delegated the administration of the EWP Program to the Chief of NRCS on state, tribal, and private lands, and Chief of FS on National Forest Systems lands, including any other lands that are administered under a formal agreement with the FS. The FS administers the EWP Program in accordance with the Forest Service Manuals 1950 and 3540, and the Forest Service Handbook 1909.15

§ 624.2 Objective.

The objective of the EWP Program is to assist sponsors, landowners, and operators in implementing emergency recovery measures for runoff retardation and erosion prevention to relieve imminent hazards to life and property created by a natural disaster that causes a sudden impairment of a watershed.

§ 624.3 Scope.

EWP Program technical and financial assistance may be made available to a qualified sponsor, or landowners when a floodplain easement is the selected alternative by the Secretary of Agriculture, upon a qualified sponsor or landowner’s request when a Federal emergency is declared by the President or when a local emergency is declared.
Natural Resources Conservation Service, USDA § 624.5

by the NRCS State Conservationist. The EWP Program is designed for emergency recovery work, including the purchase of floodplain easements. Emergency watershed protection is authorized in the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa.

§ 624.4 Definitions.

(a) Defensibility means the extent to which an action is:
(1) More beneficial than adverse in the extent and intensity of its environmental and economic effects;
(2) In compliance with Federal, State, and local laws;
(3) Acceptable to affected individuals and communities;
(4) Effective in restoring or protecting the natural resources;
(5) Complete with all necessary components included; and
(6) Efficient in achieving the desired outcome.

(b) Exigency means those situations that demand immediate action to avoid potential loss of life or property, including situations where a second event may occur shortly thereafter that could compound the impairment, cause new damages or the potential loss of life if action to remedy the situation is not taken immediately.

(c) Floodplain easement means a reserved interest easement, which is an interest in land, defined and delineated in a deed whereby the landowner conveys all rights and interest in the property to the grantee, but the landowner retains those rights, title, and interest in the property which are specifically reserved to the landowner in the easement deed.

(d) Imminent threat means a substantial natural occurrence that could cause significant damage to property or threaten human life in the near future.

(e)(1) Limited resource area is defined as a county where:
(i) Housing values are less than 75 percent of the State housing value average; and
(ii) Per capita income is 75 percent or less than the National per capita income; and
(iii) Unemployment is at least twice the U.S. average over the past 3 years based upon the annual unemployment figures.
(2) NRCS will use the most recent National census information available when determining paragraphs (e)(1)(i) and (ii) of this section.

(f) Natural occurrence includes, but is not limited to, floods, fires, windstorms, ice storms, hurricanes, typhoons, tornadoes, earthquakes, volcanic actions, slides, and drought.

(g) Project sponsor means a State government or a State agency or a legal subdivision thereof, local unit of government, or any Native American tribe or tribal organization as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b), with a legal interest in or responsibility for the values threatened by a watershed emergency; is capable of obtaining necessary land rights; and is capable of carrying out any operation and maintenance responsibilities that may be required.

(h) Watershed emergency means adverse impacts to resources exist when a natural occurrence causes a sudden impairment of a watershed and creates an imminent threat to life or property.

(i) Watershed impairment means the situation that exists when the ability of a watershed to carry out its natural functions is reduced to the point where an imminent threat to health, life, or property is created. This impairment can also include sediment and debris deposition in floodplains and upland portions of the watershed.

§ 624.5 Coordination.

(a) If the President declares an area to be a major disaster area, NRCS will provide assistance which will be coordinated with the Federal Emergency Management Agency (FEMA) or its designee. FEMA is the lead federal agency for Presidentially-declared natural disasters.

(b) When an NRCS State Conservationist determines that a watershed impairment exists, but the President does not declare an area to be a major...
disaster area, FEMA does not coordinate assistance. In this situation, NRCS will assume the lead, provide assistance, and coordinate work with the appropriate State office of emergency preparedness and other Federal, tribal, or local agencies involved with emergency activities, as appropriate.

(c) In the case where the watershed impairment exists solely on FS System lands, the FS will determine the existence of the impairment, assume the lead, provide assistance and coordinate work with the appropriate State office of emergency preparedness and other Federal, tribal, or local agencies involved with emergency activities, as appropriate.

§ 624.6 Program administration.

(a) Sponsors. (1) When the State Conservationist declares that a watershed impairment exists, NRCS may, upon request, make assistance available to a sponsor which must be a State or political subdivision thereof, qualified Indian tribe or tribal organization, or unit of local government. Private entities or individuals may receive assistance only through the sponsorship of a governmental entity.

(2) Sponsors must:

(i) Contribute their share of the project costs, as determined by NRCS, by providing funds or certain services necessary to undertake the activity. Contributions that may be applied towards the sponsor’s applicable cost-share of construction costs include:

(A) Cash;

(B) In-kind services such as labor, equipment, design, surveys, contract administration and construction inspection, and other services as determined by the State Conservationist; or

(C) A combination of cash and in-kind services;

(ii) Obtain any necessary real property rights, water rights, and regulatory permits;

(iii) Agree to provide for any required operation and maintenance of the completed emergency measures; and

(b) Eligibility. NRCS will provide assistance based upon the NRCS State Conservationist’s determination that the current condition of the land or watershed impairment poses a threat to health, life, or property. This assistance includes EWP practices associated with the removal of public health and safety threats, and restoration of the natural environment after disasters, including acquisition of floodplain easements.

(1) Priority EWP assistance is available to alleviate exigency situations. NRCS may approve assistance for temporary correction practices to relieve an exigency situation until a more acceptable solution can be designed and implemented.

(2) Limitations. (i) In cases where the same type of natural event occurs within a 10-year period and a structural measure has been installed or repaired twice within that period using EWP assistance, then EWP assistance is limited to those sites eligible for the purchase of a floodplain easement as described in §624.10 of this part.

(ii) EWP assistance will not be used to perform operation or maintenance, such as the periodic work that is necessary to maintain the efficiency and effectiveness of a measure to perform as originally designed and installed.

(iii) EWP assistance will not be used to repair, rebuild, or maintain private or public transportation facilities, public utilities, or similar facilities.

(iv) EWP assistance, funded by NRCS, will not be provided on any Federal lands if such assistance is found to augment the appropriations of other Federal agencies.

(v) EWP assistance is not available for repair or rehabilitation of non-structural management practices, such as conservation tillage and other similar practices.

(3) Repair of structural, enduring, and long-life conservation practices. (i) Sponsors may receive EWP assistance for structural, enduring, and long-life conservation practices including, but not limited to, grassed waterways, terraces, embankment ponds, diversions, and water conservation systems, except where the recovery measures are
Natural Resources Conservation Service, USDA

§ 624.6

eligible for assistance under the Emergency Conservation Program administered by the Farm Service Agency.

(ii) EWP assistance may be available for the repair of certain structural practices (i.e., dams and channels) originally constructed under Public Law 83-566; Public Law 78-534; Subtitle H of Title XV of the Agriculture and Food Act of 1981 (16 U.S.C. 3451 et seq., commonly known as the Resource Conservation and Development Program); and the Pilot Watershed Program of the Department of Agriculture Appropriation Act of 1954 (Pub. L. 83-156; 67 Stat. 214). EWP assistance may not be used to perform operation and maintenance activities specified in the agreement for the covered structure project entered into with the eligible local organization responsible for the works of improvement.

(iii) NRCS may authorize EWP assistance for modifying damaged practices when technology advances or construction techniques warrant modifications, including when modifications are the result of federal permitting or other requirements necessary to implement the recovery measure, and will be cost-shared as described in § 624.7.

(iv) EWP assistance is only available when public or private landowners, land managers, land users, or others document they have exhausted or have insufficient funding or other resources available to provide adequate relief from applicable hazards.

(4) Increased level of protection. In cases other than those described in paragraph (b)(3)(iii) of this section, if the sponsor desires to increase the level of protection that would be provided by the EWP practice, the sponsor will be responsible for paying 100 percent of the costs of the upgrade or additional work.

(c) Eligible practices. NRCS will only provide assistance for measures that:

(1) Provide protection from additional flooding or soil erosion; and,

(2) Reduce threats to life or property from a watershed impairment, including sediment and debris removal in floodplains and uplands; and

(3) Restore the hydraulic capacity to the natural environment to the maximum extent practical; and

(4) Are economically and environmentally defensible and technically sound.

(d) Documentation. NRCS will document the economic rationale of proposed practices in appropriate detail before the allocation of emergency funding, including projects under consideration for floodplain easements in §624.10. Generally, the expected value of the property restored should exceed the cost of emergency measures, including taking into consideration environmental benefits. Documentation will include, but is not limited to:

(1) Number of locations and extent of damage, including environmental and cultural resources at risk, because of the watershed impairment;

(2) Estimated damages to the values at risk if the threat is imminent but not yet realized;

(3) Events that must occur for any imminent threat to be realized and the estimated probability of their occurrence both individually and collectively;

(4) Estimates of the nature, extent, and costs of the emergency practices to be constructed to recover from an actual threat or relieve an imminent threat;

(5) Thorough description of the beneficial and adverse effects on environmental resources, including fish and wildlife habitat;

(6) Description of water quality and water conservation impacts, as appropriate;

(7) Analysis of effects on downstream water rights; and

(8) Other information deemed appropriate by NRCS to describe adequately the environmental impacts to comply with the National Environmental Policy Act, Endangered Species Act, National Historic Preservation Act, and related requirements.

(e) Implementation. When planning emergency recovery practices, NRCS will emphasize measures that are the most economical and are to be accomplished by using the least damaging practical construction techniques and equipment that retain as much of the existing characteristics of the landscape and habitat as possible. Construction of emergency practices may include, but are not limited to, timing
§ 624.7 Cost-sharing.
(a) Except as provided in paragraph (b) of this section, the Federal contribution toward the implementation of emergency measures may not exceed 75 percent of the construction cost of such emergency measures, including work done to offset or mitigate adverse impacts as a result of the emergency measures.
(b) If NRCS determines that an area qualifies as a limited resource area, the Federal contribution toward the implementation of emergency measures may not exceed 90 percent of the construction cost of such emergency measures.

§ 624.8 Assistance.
(a) Sponsors must submit a formal request to the State Conservationist for assistance within 60 days of the natural disaster occurrence, or 60 days from the date when access to the sites becomes available. Requests must include a statement that the sponsors understand their responsibilities and are willing to pay its cost-shared percentage as well as information pertaining to the natural disaster, including the nature, location, and scope of the problems and the assistance needed.
(b) On receipt of a formal request for EWP assistance, the State Conservationist or designee shall immediately investigate the emergency situation to determine whether EWP is applicable and to prepare an initial cost estimation for submission to the NRCS Chief or designee. The cost estimation will be submitted no later than 60 days from receipt of the formal request from the sponsor. The State Conservationist will take into account the funding priorities identified in paragraph (c)(3) of this section. The State Conservationist will forward the damage survey report, which provides the information pertaining to proposed EWP practices and indicates the amount of funds necessary to undertake the Federal portion, to the NRCS Chief or designee. This information will be submitted no later that 60 days from receipt of the formal request from the sponsor, or no later than 60 days from the date funding is made available to the State Conservationist, whichever is later. NRCS may not commit funds until notified by the Chief, or designee, of the availability of funds.
(c) Before the release of financial assistance, NRCS will enter into a Cooperative Agreement with a sponsor that specifies the responsibilities of the sponsor under this part, including any required operation and maintenance responsibilities. NRCS will not provide funding for activities undertaken by a sponsor prior to the signing of the agreement between NRCS and the sponsor.
(1) NRCS will only provide funding for work that is necessary to reduce applicable threats.
(2) Efforts must be made to avoid or minimize adverse environmental impacts associated with the implementation of emergency measures, to the extent practicable, giving special attention to protecting cultural resources and fish and wildlife habitat.
(3) Funding priorities for recovery measures. NRCS will provide EWP assistance based on the following criteria, which are ranked in the order of importance:
(i) Exigency situations;
(ii) Sites where there is a serious, but not immediate threat to human life;
(iii) Sites where buildings, utilities, or other important infrastructure components are threatened;
(iv) When reviewing paragraphs (c)(3)(i) through (iii) of this section,
NRCS will take into account the following resources as they may affect the priority, including, but not limited to:

(A) Sites inhabited by federally listed threatened and endangered species or containing federally designated critical habitat where the species or the critical habitat could be jeopardized, destroyed, or adversely modified without the EWP practice;

(B) Sites that contain or are in the proximity to cultural sites listed on the National Register of Historic Places where the listed resource would be jeopardized if the EWP practice were not installed;

(C) Sites where prime farmland supporting high value crops is threatened;

(D) Sites containing wetlands that would be damaged or destroyed without the EWP practice;

(E) Sites that have a major effect on water quality; and

(F) Sites containing unique habitat, including but not limited to, areas inhabited by State-listed threatened and endangered species, fish and wildlife management areas, or State-identified sensitive habitats; and

(v) Other funding priorities established by the Chief of NRCS.

§ 624.9 Time limits.

Funds must be obligated by the State Conservationist and construction completed within 220 calendar days after the date funds are committed to the State Conservationist, except for exigency situations in which case the construction must be completed within 10 days after the date the funds are committed.

§ 624.10 Floodplain easements.

(a) General. NRCS may purchase floodplain easements as an emergency measure. NRCS will only purchase easements from landowners on a voluntary basis.

(b) Floodplain easements. (1) Floodplain easements established under this part will be:

(i) Held by the United States, through the Secretary of Agriculture;

(ii) Administered by NRCS or its designee; and

(iii) Perpetual in duration;

(2) Eligible land. NRCS may determine land is eligible under this section if:

(i) The floodplain lands were damaged by flooding at least once within the previous calendar year or have been subject to flood damage at least twice within the previous 10 years; or

(ii) Other lands within the floodplain would contribute to the restoration of the flood storage and flow, erosion control, or that would improve the practical management of the easement; or

(iii) Lands would be inundated or adversely impacted as a result of a dam breach.

(3) Ineligible land. NRCS may determine that land is ineligible under this section if:

(i) Implementation of restoration practices would be futile due to "on-site" or "off-site" conditions;

(ii) The land is subject to an existing easement or deed restriction that provides sufficient protection or restoration, as determined by the Chief of NRCS, of the floodplain’s functions and values; or

(iii) The purchase of an easement would not meet the purposes of this part.

(4) Compensation for easements. NRCS will determine easement compensation in accordance with applicable regulation and other law.

(5) NRCS will not acquire any easement unless the landowner accepts the amount of the easement payment that is offered by NRCS. NRCS reserves the right not to purchase an easement if the easement compensation for a particular easement would be too expensive, as determined by NRCS.

(6) NRCS may provide up to 100 percent of the restoration and enhancement costs of the easement. NRCS may enter into an agreement with the landowner or another third party to ensure that identified practices are implemented. NRCS, the landowner, or other designee may implement identified practices. Restoration and enhancement efforts may include both structural and non-structural practices. An easement acquired under this part shall provide NRCS with the full authority to restore, protect, manage, maintain, and enhance the functions and values of the floodplain.

(7) The landowner must:
§ 624.11 Waivers.

To the extent allowed by law, the NRCS Deputy Chief for Programs may waive any provision of these regulations when the agency makes a written determination that such waiver is in the best interest of the Federal government.

SOURCE: 75 FR 6546, Feb. 10, 2010, unless otherwise noted.
§ 625.1 Purpose and scope.

(a) The purpose of the Healthy Forests Reserve Program (HFRP) is to assist landowners, on a voluntary basis, in restoring, enhancing, and protecting forestland resources on private lands through easements, 30-year contracts, and 10-year cost-share agreements.

(b) The objectives of HFRP are to:

(1) Promote the recovery of endangered and threatened species under the Endangered Species Act of 1973 (ESA);
(2) Improve plant and animal biodiversity; and
(3) Enhance carbon sequestration.

(c) The regulations in this part set forth the policies, procedures, and requirements for the HFRP as administered by the Natural Resources Conservation Service (NRCS) for program implementation and processing applications for enrollment.

(d) The Chief may implement HFRP in any of the 50 States, District of Columbia, Commonwealth of Puerto Rico, Guam, Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

§ 625.2 Definitions.

The following definitions will be applicable to this part:

30-year Contract means a contract that is limited to acreage owned by Indian tribes. The 30-year contract is not eligible for use on tribal lands held in trust or subject to Federal restrictions against alienation.

Acreage Owned by Indian Tribes means lands to which the title is held by individual Indians and Indian tribes. This term does not include land held in trust by the United States or lands where the fee title contains restraints against alienation.

Biodiversity (Biological Diversity) means the variety and variability among living organisms and the ecological complexes in which they live.

Candidate Conservation Agreement with Assurances (CCAA) means a voluntary arrangement between the U.S. Fish and Wildlife Service (FWS) or the National Marine Fisheries Service (NMFS), and cooperating non-Federal landowners under the authority of section 10(a)(1) of the Endangered Species Act of 1973, 16 U.S.C. 1539(a)(1). Under the CCAA and an associated enhancement of survival permit, the non-Federal landowner implements actions that are consistent with the conditions of the permit. CCAA with FWS are also subject to regulations at 50 CFR 17.22(d) for endangered species or 50 CFR 17.32(d) for threatened species, or applicable subsequent regulations.

Carbon sequestration means the long-term storage of carbon in soil (as soil organic matter) or in plant material (such as in trees).

Chief means the Chief of the Department of Agriculture (USDA) NRCS, or designee.

Confer means to discuss for the purpose of providing information; to offer an opinion for consideration; or to meet for discussion, while reserving final decision-making authority with NRCS.

Conservation practice means one or more conservation improvements and activities, including structural practices, land management practices, vegetative practices, forest management, and other improvements that benefit the eligible land and optimize environmental benefits, planned and applied according to NRCS standards and specifications.

Conservation treatment means any and all conservation practices, measures, activities, and works of improvement that have the purpose of alleviating resource concerns, solving or reducing the severity of natural resource use problems, or taking advantage of resource opportunities, including the restoration, enhancement, maintenance, or management of habitat conditions for HFRP purposes.

Coordination means to obtain input and involvement from others while reserving final decision-making authority with NRCS.

Cost-share agreement means a legal document that specifies the rights and obligations of any participant accepted into the program. A HFRP cost-share agreement is a binding agreement for the transfer of assistance from USDA to the participant to share in the costs of applying conservation. A cost-share agreement under HFRP has a duration of 10-years.
Cost-share payment means the payment made by NRCS to a program participant or vendor to achieve the restoration, enhancement, and protection goals of enrolled land in accordance with the HFRP restoration plan.

Easement means a conservation easement, which is an interest in land defined and delineated in a deed whereby the landowner conveys certain rights, title, and interests in a property to the United States for the purpose of protecting the forest ecosystem and the conservation values of the property.

Easement area means the land encumbered by an easement.

Easement payment means the consideration paid to a landowner for an easement conveyed to the United States under the HFRP.

Fish and Wildlife Service is an agency of the Department of Interior.

Forest Service is an agency of USDA.

Forest ecosystem means a dynamic set of living organisms, including plants, animals, and microorganisms interacting among themselves and with the environment in which they live. A forest ecosystem is characterized by predominance of trees, and by the fauna, flora, and ecological cycles (energy, water, carbon, and nutrients).

HFRP restoration plan means the document that identifies the conservation treatments that are scheduled for application to land enrolled in HFRP in accordance with NRCS standards and specifications.

Indian tribe means any Indian tribe, band, Nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 668, 43 U.S.C. 1601 et seq.), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

Landowner means an individual or entity having legal ownership of land. The term landowner may also include all forms of collective ownership including joint tenants, tenants in common, and life tenants.

Landowner protections means protections and assurances made available by NRCS to HFRP participants, when requested, and whose voluntary conservation activities result in a net conservation benefit for listed, candidate, or other species and meet other requirements of the program. These Landowner Protections are subject to a HFRP restoration plan and associated cost-share agreement, 30-year contract, or easement being properly implemented. Landowner protections made available by the Secretary of Agriculture to HFRP participants may include an incidental take authorization received by NRCS from FWS or NMFS, or may be provided by a Safe Harbor Agreement (SHA) or CCAA directly between the HFRP participant and FWS or NMFS, as appropriate.

Liquidated damages means a sum of money stipulated in the HFRP restoration agreement that the participant agrees to pay NRCS if the participant fails to adequately complete the terms of the restoration agreement. The sum represents an estimate of the expenses incurred by NRCS to service the restoration agreement, and reflects the difficulties of proof of loss and the inconvenience or non-feasibility of otherwise obtaining an adequate remedy.

Maintenance means work performed to keep the applied conservation practice functioning for the intended purpose during its life span. Maintenance includes work to prevent deterioration of the practice, repairing damage, or replacement of the practice to its original condition if one or more components fail.

Measure means one or more specific actions that is not a conservation practice, but has the effect of alleviating problems or improving the treatment of the resources.

National Marine Fisheries Service is an agency of the United States Department of Commerce.

Natural Resources Conservation Service is an agency of USDA which has the responsibility for administering HFRP.

Participant means a person, entity, or Indian tribe who is a party to a 10-year cost share agreement, 30-year contract, or an agreement to purchase an easement.

Private land means land that is not owned by a local, State, or Federal governmental entity, and includes land
that meets the definition of “acreage owned by Indian tribes.”

*Restoration* means implementing any conservation practice (vegetative, management, or structural) or measure that improves forest ecosystem values and functions (native and natural plant communities).

*Restoration agreement* means a cost-share agreement between the program participant and NRCS to restore, enhance, and protect the functions and values of a forest ecosystem for the purposes of HFRP under either an easement, 30-year contract, or a 10-year cost-share agreement enrollment option.

*Safe Harbor Agreement* means a voluntary arrangement between FWS or NMFS and cooperating non-Federal landowners under the authority of section 10(a)(1) of the Endangered Species Act of 1973, 16 U.S.C. 1539(a)(1). Under the SHA and an associated enhancement of survival permit, the private property owner implements actions that are consistent with the conditions of the permit. SHAs with FWS are also subject to regulations at 50 CFR 17.22(c) for endangered species or 50 CFR 17.32(c) for threatened species, or applicable subsequent regulations.

*State-listed species* means a species listed as threatened or endangered under State endangered species laws, a candidate for such listing, or a species listed in a State Wildlife Action Plan as a Species of Greatest Conservation Need.

*Sign-up notice* means the public notification document that NRCS provides to describe the particular requirements for a specific HFRP sign-up.

*State Conservationist* means the NRCS employee authorized to implement HFRP and direct and supervise NRCS activities in a State, Caribbean Area, or Pacific Islands Area.

*Technical service provider* means an individual, private-sector entity, or public agency certified by NRCS to provide technical services to program participants in lieu of or on behalf of NRCS.

§ 625.3 Administration.

(a) The regulations in this part will be administered under the general supervision and direction of the Chief.

(b) The Chief may modify or waive a provision of this part if the Chief determines that the application of such provision to a particular limited situation is inappropriate and inconsistent with the goals of the program. This authority cannot be further delegated. The Chief may not modify or waive any provision of this part which is required by applicable law.

(c) No delegation in this part to lower organizational levels will preclude the Chief from determining any issue arising under this part or from reversing or modifying any determination arising from this part.

(d) The State Conservationist will develop a list of eligible restoration practices, payment rates and cost-share percentages, a priority ranking process, and any related technical matters.

(e) NRCS will coordinate with FWS and NMFS in the implementation of the program and in establishing program policies. In carrying out this program, NRCS may confer with private forest landowners, including Indian tribes, the Forest Service and other Federal agencies, State fish and wildlife agencies, State forestry agencies, State environmental quality agencies, other State conservation agencies, and nonprofit conservation organizations. No determination by the FWS, NMFS, Forest Service, any Federal, State, or tribal agency, conservation district, or other organization will compel NRCS to take any action which NRCS determines will not serve the purposes of the program established by this part.

§ 625.4 Program requirements.

(a) General. Under the HFRP, NRCS will purchase conservation easements from, or enter into 30-year contracts or 10-year cost-share agreements with, eligible landowners who voluntarily cooperate in the restoration and protection of forestlands and associated lands. To participate in HFRP, a landowner will agree to the implementation of a HFRP restoration plan, the effect of which is to restore, protect, enhance, maintain, and manage the habitat conditions necessary to increase the likelihood of recovery of listed species under the ESA, or measurably improve the well-being of species that are not listed as endangered.
or threatened under the ESA but are candidates for such listing, State-listed species, or species identified by the Chief for special consideration for funding. NRCS may provide cost-share assistance for the activities that promote the restoration, protection, enhancement, maintenance, and management of forest ecosystem functions and values. Specific restoration, protection, enhancement, maintenance, and management activities may be undertaken by the landowner or other NRCS designee.

(1) Of the total amount of funds expended under the program for a fiscal year to acquire easements and enter into 10-year cost-share agreements, not more than 40 percent will be used for cost-share agreements, and not more than 60 percent will be used for easements.

(2) The Chief may use any funds that are not obligated by April 1 of the fiscal year for which the funds are made available to carry out a different method of enrollment during that fiscal year.

(b) Landowner eligibility. To be eligible to enroll an easement in the HFRP, an individual or entity must:

(1) Be the landowner of eligible land for which enrollment is sought;

(2) Agree to provide such information to NRCS, as the agency deems necessary or desirable, to assist in its determination of eligibility for program benefits and for other program implementation purposes; and

(3) Comply with applicable registration and reporting requirements of the Federal Funding Accountability and Transparency Act of 2006 (Pub. L. 109–282, as amended), and 2 CFR parts 25 and 170.

(c) Eligible land. (1) NRCS, in coordination with FWS or NMFS, will determine whether land is eligible for enrollment and whether once found eligible, the lands may be included in the program based on the likelihood of successful restoration, enhancement, and protection of forest ecosystem functions and values when considering the cost of acquiring the easement, 30-year contract, or 10-year cost share agreement, and the restoration, protection, enhancement, maintenance, and management costs.

(2) Land will be considered eligible for enrollment in the HFRP only if NRCS determines that:

(i) Such private land will contribute to the restoration or enhancement of the habitat or otherwise measurably increase the likelihood of recovery for a selected species listed under section 4 of the ESA; and

(ii) Such private land will contribute to the restoration or enhancement of the habitat or otherwise measurably improve the well-being of a selected species not listed under section 4 of the ESA but is a candidate for such listing, or the selected species is a State-listed species, or is a species identified by the Chief for special consideration for funding.

(3) NRCS may also enroll land adjacent to eligible land if the enrollment of such adjacent land would contribute significantly to the practical administration of the easement area, but not more than it determines is necessary for such contribution.

(4) To be enrolled in the program, eligible land must be configured in a size and with boundaries that allow for the efficient management of the area for easement purposes and otherwise promote and enhance program objectives.

(5) In the case of acreage owned by an Indian tribe, NRCS may enroll acreage into the HFRP which is privately owned by either the tribe or an individual.

(d) Ineligible land. The following land is not eligible for enrollment in the HFRP:

(1) Land owned by the United States, States, or units of local government;

(2) Land subject to an easement or deed restriction that already provides for the protection of fish and wildlife habitat or that would interfere with HFRP purposes, as determined by NRCS; and

(3) Land that would not be eligible for HFRP under paragraphs (c)(1) through (c)(5).

§625.5 Application procedures.

(a) Sign-up process. As funds are available, the Chief will solicit project proposals from the State Conservationist. The State Conservationist may consult
Natural Resources Conservation Service, USDA

§ 625.6 Establishing priority for enrollment in HFRP.

(a) Ranking considerations. Based on the specific criteria set forth in a sign-up announcement and the applications for participation, NRCS, in coordination FWS and NMFS, may consider the following factors to rank properties:

1. Estimated conservation benefit to habitat required by threatened or endangered species listed under section 4 of the ESA;
2. Estimated conservation benefit to habitat required by species not listed as endangered or threatened under section 4 of the ESA but that are candidates for such listing, State-listed species, or species identified by the Chief for special consideration for funding;
3. Estimated improvement of biological diversity, if enrolled;
4. Potential for increased capability of carbon sequestration, if enrolled;
5. Availability of contribution of non-Federal funds;
6. Significance of forest ecosystem functions and values;
7. Estimated cost-effectiveness of the particular restoration cost-share agreement, contract, or easement, and associated HFRP restoration plan; and
8. Other factors identified in a HFRP sign-up notice.

(b) NRCS may place higher priority on certain forest ecosystems based regions of the State or multi-State area where restoration of forestland may better achieve NRCS programmatic and sign-up goals and objectives.

(c) Notwithstanding any limitation of this part, NRCS may enroll eligible lands at any time in order to encompass project areas subject to multiple land ownership or otherwise to achieve program objectives. Similarly, NRCS may, at any time, exclude otherwise eligible lands if the participation of the adjacent landowners is essential to the successful restoration of the forest ecosystem and those adjacent landowners are unwilling to participate.

(d) If available funds are insufficient to accept the highest ranked application, and the applicant is not interested in reducing the acres offered to match available funding, NRCS may select a lower ranked application that can be fully funded. In cases where HFRP funds are not sufficient to cover the costs of an application selected for funding, the applicant may lower the cost of the application by changing the duration of the easement or agreement.
or reducing the acreage offered, unless these changes result in a reduction of the application ranking score below that of the score of the next available application on the ranking list.

§ 625.7 Enrollment of easements, contracts, and agreements.

(a) Offers of enrollment. Based on the priority ranking, NRCS will notify an affected landowner of tentative acceptance into the program. This notice of tentative acceptance into the program does not bind NRCS or the United States to enroll the proposed project in HFRP, nor does it bind the landowner to convey an easement, or to contract or agree to HFRP activities. The letter notifies the landowner that NRCS intends to continue the enrollment process on their land unless otherwise notified by the landowner.

(b) Acceptance of offer of enrollment. An agreement to purchase or a restoration cost-share agreement or contract will be presented by NRCS to the landowner which will describe the easement, agreement, or contract area; the easement, agreement, or contract terms and conditions; and other terms and conditions for participation that may be required by NRCS.

(c) Effect of the acceptance of the offer. After the agreement to purchase or restoration cost-share agreement or contract is executed by NRCS and the landowner, the land will be considered enrolled in the HFRP. For easements, NRCS will proceed with various easement acquisition activities, which may include conducting a survey of the easement area, securing necessary subordination agreements, procuring title insurance, and conducting other activities necessary to record the easement or implement the HFRP, as appropriate for the enrollment option being considered. For restoration cost-share agreements and contracts, the landowner will proceed to implement the restoration plan with technical assistance and cost-share from NRCS.

(d) Withdrawal of offers. Prior to execution of an agreement to purchase, a restoration cost-share agreement, or contract between the United States and the landowner, NRCS may withdraw the land from enrollment at any time due to lack of availability of funds, inability to clear title, or other reasons. An agreement to purchase will be void, and the offer withdrawn, if not executed by the landowner within the time specified.

§ 625.8 Compensation for easements and 30-year contracts.

(a) Determination of easement payment rates.

(1) NRCS will offer to pay not less than 75 percent, nor more than 100 percent of the fair market value of the enrolled land during the period the land is subject to the easement, less the fair market value of the land encumbered by the easement for permanent easements or easements for the maximum duration allowed under State law.

(2) NRCS will offer to pay not more than 75 percent of the fair market value of the enrolled land, less the fair market value of the land encumbered by the easement for 30-year easements or 30-year contracts.

(b) Acceptance and use of contributions. NRCS may accept and use contributions of non-Federal funds to make payments under this section.

(c) Acceptance of offered easement or 30-year contract compensation.

(1) NRCS will not acquire any easement or 30-year contract unless the landowner accepts the amount of the payment that is offered by NRCS. The payment may or may not equal the fair market value of the interests and rights to be conveyed by the landowner under the easement or 30-year contract. By voluntarily participating in the program, a landowner waives any claim to additional compensation based on fair market value.

(2) Payments may be made in a single payment or no more than 10 annual payments of equal or unequal size, as agreed to between NRCS and the landowner.

(d) If a landowner believes they may be eligible for a bargain sale tax deduction that is the difference between the fair market value of the easement conveyed to the United States and the easement payment made to the landowner, it is the landowner’s responsibility to discuss those matters with the Internal Revenue Service. NRCS disclaims any representations concerning
§ 625.10 Cost-share payments.

(a) NRCS may share the cost with landowners of restoring land enrolled in HFRP as provided in the HFRP restoration plan. The HFRP restoration plan may include periodic manipulation to maximize fish and wildlife habitat and preserve forest ecosystem functions and values, and measures that are needed to provide the Landowner Protections under section 7(b)(4) or section 10(a)(1) of the ESA, including the cost of any permit.

(b) Landowner Protections may be made available to landowners enrolled in the HFRP who agree, for a specified period, to restore, protect, enhance, maintain, and manage the habitat conditions on their land in a manner that is reasonably expected to result in a net conservation benefit that contributes to the recovery of listed species.
under the ESA, candidate, or other species covered by this regulation. These protections operate with lands enrolled in the HFRP and are valid for as long as the landowner is in compliance with the terms and conditions of such assurances, any associated permit, the easement, contract, or the restoration agreement.

(c) If the Landowner Protections, or any associated permit, require the adoption of a conservation practice or measure in addition to the conservation practices and measures identified in the applicable HFRP restoration plan, NRCS and the landowner will incorporate the conservation practice or measure into the HFRP restoration plan as an item eligible for cost-share assistance.

(d) Failure to perform planned management activities can result in violation of the easement, 10-year cost-share agreement, or the agreement under which Landowner Protections have been provided. NRCS will work with landowners to plan appropriate management activities.

(e) The amount and terms and conditions of the cost-share assistance will be subject to the following restrictions on the costs of establishing or installing NRCS approved conservation practices or implementing measures specified in the HFRP restoration plan:

1. On enrolled land subject to a permanent easement or an easement for the maximum duration allowed under State law, NRCS will offer to pay not less than 75 percent nor more than 100 percent of the average cost, and;
2. On enrolled land subject to a 30-year easement or 30-year contract, NRCS will offer to pay not more than 75 percent of the average cost.

(f) On enrolled land subject to a 10-year cost-share agreement without an associated easement, NRCS will offer to pay not more than 50 percent of the average costs.

(h) Cost-share payments may be made for the establishment and installation of additional eligible conservation practices and measures, or the maintenance or replacement of an eligible conservation practice or measure, but only if NRCS determines the practice or measure is needed to meet the objectives of HFRP, and the failure of the original conservation practices or measures was due to reasons beyond the control of the landowner.

§ 625.11 Easement participation requirements.

(a) To enroll land in HFRP through a permanent easement, an easement for the maximum duration allowed under State law, or 30-year enrollment option, a landowner will grant an easement to the United States. The easement deed will require, at a minimum, that the landowner and the landowner’s heirs, successors, and assignees, will cooperate in the restoration, protection, enhancement, maintenance, and management of the land and forest ecosystem functions and values.

(b) For the duration of its term, the easement will require, at a minimum, that the landowner and the landowner’s heirs, successors, and assignees, will cooperate in the restoration, protection, enhancement, maintenance, and management of the land in accordance with the easement and with the terms of the HFRP restoration plan. In addition, the easement will grant to the United States, through NRCS:

1. A right of access to the easement area by NRCS or its representative;
2. The right to determine and permit compatible uses on the easement area and specify the amount, method, timing, intensity, and duration of the compatible use, if such use is consistent with the long-term protection and enhancement of the purposes for which the easement was established;
3. The rights, title, and interest to the easement area as specified in the conservation easement deed; and
4. The right to perform restoration, protection, enhancement, maintenance, and management activities on the easement area.
(c) The landowner will convey title to the easement which is acceptable to NRCS. The landowner will warrant that the easement granted to the United States is superior to the rights of all others, except for exceptions to the title which are deemed acceptable by NRCS.

(d) The landowner will:
(1) Comply with the terms of the easement;
(2) Comply with all terms and conditions of any associated agreement or contract;
(3) Agree to the long-term restoration, protection, enhancement, maintenance, and management of the easement in accordance with the terms of the easement and related agreements;
(4) Have the option to enter into an agreement with governmental or private organizations to assist in carrying out any landowner responsibilities on the easement area; and
(5) Agree that each person who is subject to the easement will be jointly and severally responsible for compliance with the easement and the provisions of this part, and for any refunds or payment adjustment which may be required for violation of any terms or conditions of the easement or the provisions of this part.

§ 625.12 30-year contracts.

(a) To enroll land in HFRP through the 30-year contract option, a landowner will sign a 30-year contract with NRCS. The contract will require that the contract area be maintained in accordance with HFRP goals and objectives for the duration of the term of the contract, including the restoration, protection, enhancement, maintenance, and management of habitat and forest ecosystem functions and values.

(b) For the duration of its term, the 30-year contract will require, at a minimum, that the landowner and the landowner’s assignee, will cooperate in the restoration, protection, enhancement, maintenance, and management of the land in accordance with the contract and with the terms of the HFRP restoration plan. In addition, the contract will grant to the United States through NRCS:
(1) A right of access to the contract area by NRCS or its representative;
(2) The right to allow such activities by the landowner as hunting and fishing, managed timber harvest, or periodic haying or grazing, if such use is consistent with the long-term protection and enhancement of the purposes for which the contract was established;
(3) The right to specify the amount, method, timing, intensity, and duration of the activities listed in paragraph (b)(2) of this section, as incorporated into the terms of the contract; and
(4) The right to perform restoration, protection, enhancement, maintenance, and management activities on the contract area.

(c) The landowner will:
(1) Comply with the terms of the contract;
(2) Comply with all terms and conditions of any associated agreement or contract; and
(3) Agree to the long-term restoration, protection, enhancement, maintenance, and management of the contract area in accordance with the terms of the contract and related agreements.

(d) A 30-year contract will:
(1) Be signed by the participant;
(2) Identify the amount and extent of cost-share assistance that NRCS will provide for the adoption or implementation of the approved conservation treatment identified in the restoration plan; and
(3) Include any other provision determined necessary or appropriate by the NRCS representative.

(e) Once the landowner and NRCS have signed a 30-year contract, the land will be considered enrolled in HFRP.

§ 625.13 The HFRP restoration plan development and Landowner Protections.

(a) The development of the HFRP restoration plan will be made through an NRCS representative, who will confer with the program participant and with the FWS and NMFS, as appropriate.

(b) The HFRP restoration plan will specify the manner in which the enrolled land under easement, 30-year
contract, or 10-year cost-share agreement will be restored, protected, enhanced, maintained, and managed to accomplish the goals of the program.

(c) Eligible restoration practices and measures may include land management, vegetative, and structural practices and measures that will restore and enhance habitat conditions for listed species, candidate, State-listed, and other species identified by the Chief for special funding consideration. To the extent practicable, eligible practices and measures will improve biodiversity and optimize the sequestration of carbon through management that maintains diverse and high quality native forests to accomplish the goals of the restoration plan. NRCS, in coordination with FWS and NMFS, will determine the conservation practices and measures. The State Conservationist will develop and make available to the public a list of eligible practices, and will determine payment rates and cost-share percentages within statutory limits.

(d) Landowner Protections. An HFRP participant who enrolls land in HFRP and whose conservation treatment results in a net conservation benefit for listed, candidate, or other species, may request such Landowner Protections as follows:

(1) Incidental Take Authorization.
   (i) NRCS will extend to participants the incidental take authorization received by NRCS from FWS or NMFS through biological opinions issued as part of the interagency cooperation process under section 7(a)(2) of the ESA;
   (ii) NRCS will provide assurances, as a provision of the restoration plan, that when a participant is provided authorization for incidental take of a listed species, NRCS will not require management activities related to that species to be undertaken in addition to or different from those specified in the restoration plan without the participant’s consent;
   (iii) The program participant will be covered by the authorization to NRCS for incidental take associated with restoration actions or management activities. The incidental take may include a return to baseline conditions at the end of the applicable period, if the landowner so desires.
   (iv) Provided the landowner has acted in good faith and without intent to violate the terms of the HFRP restoration plan, NRCS will pursue all appropriate options with the participant to avoid termination in the event of the need to terminate an HFRP restoration plan that is being properly implemented; and
   (v) If the 30-year contract or 10-year restoration cost-share agreement is terminated, any requested assurances, including an incidental take authorization under this section, provided by NRCS will be voided. As such, the landowner will be responsible to FWS or NMFS for any violations of the ESA.

(2) SHA or CCAA.
   (i) NRCS will provide technical assistance to help participants design and use their HFRP restoration plan for the dual purposes of qualifying for HFRP financial assistance and as a basis for entering into a SHA or CCAA with FWS or NMFS and receiving an associated permit under section 10(a)(1)(A) of the ESA.
   (ii) In exchange for a commitment to undertake conservation measures, the landowner may receive a permit under section 10 of the ESA from FWS or NMFS authorizing incidental take of species covered by the SHA or CCAA that may occur as a result of restoration actions, management activities, and for a listed species covered by a SHA, a return to baseline conditions at the end of the applicable period.
   (iii) All SHAs and associated permits issued by FWS or NMFS are subject to the Safe Harbor Policy jointly adopted by FWS and NMFS according to the regulations at 64 FR 32717 or applicable subsequently adopted policy, and SHAs with FWS also are subject to regulations at 50 CFR 17.22(c) for endangered species or 50 CFR 17.32(c) for threatened species, or applicable subsequent regulations.
   (iv) All CCAAs and associated permits issued by FWS or NMFS are subject to the CCAAs policy jointly adopted by FWS and NMFS according to the regulations at 64 FR 32706 or applicable subsequently adopted policy, and CCAAs with FWS also are subject to
§ 625.16 Violations and remedies.

(a) Easement Violations.

(1) In the event of a violation of the easement or any associated agreement involving a landowner, the landowner will be given reasonable notice and an opportunity to voluntarily correct the violation within 30 days of the date of the notice, or such additional time as the State Conservationist determines is necessary to correct the violation.

(2) Notwithstanding paragraph (a)(1) of this section, NRCS reserves the right to enter upon the easement area at any time to remedy deficiencies or easement violations. Such entry may be made at the discretion of NRCS to the original landowner unless NRCS receives an assignment of proceeds.

(3) Eligible cost-share payments will be made to the new landowner upon presentation of an assignment of rights or other evidence that title has passed.

(4) Landowner protections will be available to the new landowner, and the new landowner will be held responsible for assuring completion of all measures and conservation practices required by the contract, deed, and incidental take permit.

(b) Claims to payments. With respect to any and all payments owed to a person, the United States will bear no responsibility for any full payments or partial distributions of funds between the original landowner and the landowner’s successor. In the event of a dispute or claim on the distribution of cost-share payments, NRCS may withhold payments without the accrual of interest pending an agreement or adjudication on the rights to the funds.

§ 625.15 Transfer of land.

(a) Offers voided prior to enrollment. Any transfer of the property prior to the applicant’s acceptance into the program will void the offer of enrollment. At the option of the State Conservationist, an offer can be extended to the new landowner if the new landowner agrees to the same or more restrictive easement, agreement, and contract terms and conditions.

(b) Actions following transfer of land.

(1) For easements or 30-year contracts with multiple annual payments, any remaining payments will be made to the new landowner if NRCS receives an assignment of proceeds.

§ 625.14 Modification of the HFRP restoration plan.

The State Conservationist may approve modifications to the HFRP restoration plan that do not modify or void provisions of the easement, contract, restoration agreement, or Landowner Protections, and are consistent with applicable law. NRCS may obtain and receive input from the landowner and coordinate with FWS and NMFS to determine whether a modification to the restoration plan is justified. Any HFRP restoration plan modification must meet HFRP program objectives, and must result in equal or greater wildlife benefits and ecological and economic values to the United States. Modifications to the HFRP restoration plan which are substantial and affect provisions of the contract, restoration cost-share agreement, or Landowner Protections will require agreement from the landowner, any relevant party to a specific SHA or CCAA, FWS, or NMFS, as appropriate, and may require execution of an amended contract or 10-year restoration cost-share agreement and modification to the Landowner Protection provisions.

§ 625.16 Violations and remedies.

(a) Easement Violations.

(1) In the event of a violation of the easement or any associated agreement involving a landowner, the landowner will be given reasonable notice and an opportunity to voluntarily correct the violation within 30 days of the date of the notice, or such additional time as the State Conservationist determines is necessary to correct the violation.

(2) Notwithstanding paragraph (a)(1) of this section, NRCS reserves the right to enter upon the easement area at any time to remedy deficiencies or easement violations. Such entry may be made at the discretion of NRCS to the original landowner unless NRCS receives an assignment of proceeds.

(3) Eligible cost-share payments will be made to the new landowner upon presentation of an assignment of rights or other evidence that title has passed.

(4) Landowner protections will be available to the new landowner, and the new landowner will be held responsible for assuring completion of all measures and conservation practices required by the contract, deed, and incidental take permit.

(b) Claims to payments. With respect to any and all payments owed to a person, the United States will bear no responsibility for any full payments or partial distributions of funds between the original landowner and the landowner’s successor. In the event of a dispute or claim on the distribution of cost-share payments, NRCS may withhold payments without the accrual of interest pending an agreement or adjudication on the rights to the funds.
when such actions are deemed necessary to protect important listed species, candidate species, and forest ecosystem functions and values or other rights of the United States under the easement. The landowner will be liable for any costs incurred by the United States as a result of the landowner’s negligence or failure to comply with easement or contractual obligations. (3) In addition to any and all legal and equitable remedies as may be available to the United States under applicable law, NRCS may withhold any easement and cost-share payments owed to landowners at any time there is a material breach of the easement covenants, associated restoration agreement, or any associated contract. Such withheld funds may be used to offset costs incurred by the United States in any remedial actions or retained as damages pursuant to court order or settlement agreement. (4) The United States will be entitled to recover any and all administrative and legal costs, including attorney’s fees or expenses, associated with any enforcement or remedial action. (b) 30-year Contract and 10-year Cost-Share Agreement Violations. (1) If NRCS determines that a participant is in violation of the terms of a 30-year contract, or 10-year cost-share agreement, or documents incorporated by reference into the 30-year contract or 10-year cost-share agreement, the landowner will be given reasonable notice and an opportunity to voluntarily correct the violation within 30 days of the date of the notice, or such additional time as the State Conservationist determines is necessary to correct the violation. If the violation continues, the State Conservationist may terminate the 30-year contract or 10-year cost-share agreement. (2) Notwithstanding the provisions of paragraph (b)(1) of this section, a 10-year cost-share agreement or 30-year contract termination is effective immediately upon a determination by the State Conservationist that the participant has: submitted false information; filed a false claim; engaged in any act for which a finding of ineligibility for payments is permitted under this part; or taken actions NRCS deems to be sufficiently purposeful or negligent to warrant a termination without delay. (3) If NRCS terminates a 10-year cost-share agreement or 30-year contract, the participant will forfeit all rights for future payments under the 10-year cost-share agreement or 30-year contract, and must refund all or part of the payments received, plus interest, and liquidated damages. (4) When making any 30-year contract or 10-year cost-share agreement termination decisions, the State Conservationist may provide equitable relief in accordance with 7 CFR part 635. §625.17 Payments not subject to claims. Any cost-share, contract, or easement payment or portion thereof due any person under this part will be allowed without regard to any claim or lien in favor of any creditor, except agencies of the United States Government. §625.18 Assignments. Any person entitled to any cash payment under this program may assign the right to receive such cash payments in whole or in part. §625.19 Appeals. (a) A person participating in the HFRP may obtain a review of any administrative determination concerning eligibility for participation utilizing the administrative appeal regulations provided in 7 CFR parts 11 and 614. (b) Before a person may seek judicial review of any administrative action concerning eligibility for program participation under this part, the person must exhaust all administrative appeal procedures set forth in paragraph (a) of this section, and for purposes of judicial review, no decision will be a final agency action except a decision of the Chief under these procedures. (c) Any appraisals, market analysis, or supporting documentation that may be used by NRCS in determining property value are considered confidential information, and will only be disclosed as determined at the sole discretion of NRCS in accordance with applicable law. (d) Enforcement actions undertaken by NRCS in furtherance of its federally
held property rights are under the jurisdiction of the Federal District Court, and are not subject to review under administrative appeal regulations.

§ 625.20 Scheme and device.

(a) If it is determined by NRCS that a person has employed a scheme or device to defeat the purposes of this part, any part of any program payment otherwise due or paid to such person during the applicable period may be withheld or be required to be refunded with interest thereon, as determined appropriate by NRCS.

(b) A scheme or device includes, but is not limited to, coercion, fraud, misrepresentation, depriving any other person of payments for 10-year cost-share agreements, contracts, or easements for the purpose of obtaining a payment to which a person would otherwise not be entitled.

(c) A person who succeeds to the responsibilities under this part will report in writing to NRCS any interest of any kind in enrolled land that is held by a predecessor or any lender. A failure of full disclosure will be considered a scheme or device under this section.
SUBCHAPTER D—LONG TERM CONTRACTING

PART 630—LONG TERM CONTRACTING

§ 630.1 Purpose.

The purpose of this subchapter is to provide for programs to extend cost sharing and technical assistance through long term contracts to landowners and others for making land use changes and to install measures to conserve, develop, and utilize the soil, water, and related natural resources on their lands.

[40 FR 53370, Nov. 18, 1975]

PART 631—GREAT PLAINS CONSERVATION PROGRAM

Subpart A—General Provisions

§ 631.1 Purpose.

(a) The Great Plains Conservation Program (GPCP) is a special program targeted to the total conservation treatment of farm or ranch units with the most severe soil and water resources problems. The purpose of the program is to assist farm, ranch and other land users to make changes in their cropping systems and land uses which are needed to conserve, develop, protect, and utilize the soil and water resources of their lands. This purpose is achieved by controlling erosion, conserving water, and adjusting land use to mitigate climatic, soil, topographic, flood, saline and other natural hazards.

(b) Program participation is voluntary and is carried out by applying a conservation plan encompassing an entire operating unit. A conservation plan is developed with the land user in consultation with the local conservation district and is used to establish a GPCP contract. This contract provides for cost sharing between the land user and the Secretary of Agriculture for applying needed land use adjustments and conservation treatment within a specified time schedule. The program is supplemental to, not a substitution for, other programs in the Great Plains area.

§ 631.2 Definitions.

The terms defined shall have the following meaning in this part and in all contracts, forms, documents, instructions, and procedures in connection therewith, unless the contract or subject matter requires otherwise.

Applicant. A land user who has requested in writing to participate in the GPCP.

Area conservationist. The NRCS employee who is the supervisor with primary responsibility for quality control. This person serves as contracting officer if designated by the state conservationist.

Chief. The Chief of the Natural Resources Conservation Service (NRCS), USDA.

Subpart B—Contracts

§ 631.10 Contracts.

§ 631.11 Conservation practice maintenance.

§ 631.12 Cost-share payments.

§ 631.13 Disputes and appeals for matters other than contract violations.

§ 631.14 Contract violations.

Subpart C—Miscellaneous

§ 631.20 Setoffs.

§ 631.21 Compliance with regulatory measures.

§ 631.22 Access to operating unit.

§ 631.23 State conservationist’s authority.

SOURCE: 49 FR 11142, Mar. 27, 1984, unless otherwise noted.
Conservation district (CD). A conservation district, soil conservation district, natural resource district, or similar legally constituted body with which the Secretary of Agriculture cooperates pursuant to the Soil Conservation and Domestic Allotment Act. The members of governing bodies of these organizations may be known as supervisors, directors, or commissioners.

Conservation plan. A written record of the land user’s decisions regarding planned land use and treatment, including estimates of extent and cost. The timing of applications for each practice and/or identifiable unit is scheduled in the conservation plan.

Conservation practice. A specific treatment which is planned and applied according to NRCS standards and specifications as a part of a resource management system for land, water, and related resources.

Contract. A legal document that binds both the participants and the federal government to carry out the terms and conditions of the conservation plan. The contract forms the basis for GPCP sharing the costs of implementing the conservation plan.

Contracting officer. The NRCS employee authorized to sign GPCP contracts on behalf of NRCS.

County program committee. A group of Federal, State, and local officials selected by the designated conservationist. The committee provides ideas to the designated conservationist regarding program development and interagency program coordination.

Designated county. A county within a Great Plains state that the Chief has designated for participation.

Designated conservationist. A district conservationist or other NRCS employee who the state conservationist has designated to be responsible for administration of the GPCP in a designated county.

District conservationist. The NRCS employee assigned to direct and supervise NRCS activities in one or more conservation districts.

Great Plains area. The area comprising those counties within the Great Plains states designated for GPCP participation.

Great Plains states. Colorado, Kansas, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

Identifiable unit. A discernibly distinct component of a conservation practice.

Land user. An individual, partnership, firm, joint-stock company, corporation, association, trust, estate, or other nonpublic legal entity having control of a unit of land. This definition includes two or more persons having a joint or common interest.

Life span. The period of time specified in the contract and/or operation and maintenance agreement during which the resource management systems of component practices are to be maintained and used for the intended purpose. Most practices will have a useful life beyond the specified life span.

Operation and maintenance agreement. A document signed by both the participant and the contracting officer outlining the operation and maintenance requirements for applied conservation treatment.

Operating unit. A parcel or parcels of land, whether contiguous or noncontiguous, constituting a single management unit for agricultural purposes.

Other land. Nonagricultural land on which erosion must be controlled to protect agricultural land and which can be covered by contract.

Participant. A land user who is a party to a GPCP contract.

Resource management system. A combination of conservation practices identified by the land or water use that, if installed, will protect or improve the soil or water resource base.

Specifications. Minimum quantity or quality requirements established by NRCS to meet the standard for a specific conservation practice.

State conservationist. The NRCS employee authorized to direct and supervise NRCS activities within the state.

State program committee. A group of Federal, state, and local officials selected by the state conservationist. The committee provides ideas to the state conservationist regarding program development, coordination, general policies, and operating procedures of GPCP in the state.
§ 631.3 Technical assistance. Guidance provided to land users regarding the use and treatment of soil, water, plant, animal, and related resources. This assistance may include conservation plan formulation, application, and maintenance and is usually confined to those activities which the recipient could not reasonably be expected to do without specialized assistance.

Technical guide. A document containing detailed information on the conservation of soil, water, plant, animal, and related resources applicable specifically to the area for which it is prepared.

§ 631.3 Administration.

(a) NRCS is responsible for the administration of the Great Plains Conservation Program (GPCP).

(b) The program shall be carried out in close cooperation with interested Federal, state, and local government units and organizations. The program in designated counties shall be coordinated with the long-range program of conservation districts operating in such counties and with other USDA activities.

(c) Applicants who have USDA-Farmers Home Administration (FmHA) loans must furnish to NRCS satisfactory evidence that the conservation plan used as a basis for the GPCP contract is compatible with assistance provided by FmHA. Such evidence may consist of written acknowledgement by the authorized FmHA official that the GPCP conservation plan is compatible with the farm management plan prepared for FmHA program purposes.

§ 631.4 Program applicability.

The program is applicable only to designated counties within the Great Plains states. County designation is a responsibility of the NRCS Chief.

§ 631.5 Land user eligibility.

Any land user in a designated county may file an application for participation in the GPCP with the NRCS field office. A land user who develops an acceptable conservation plan in cooperation with NRCS and the conservation district that is in compliance with the terms and conditions of the program is eligible to sign a contract.

§ 631.6 Land eligible for the program.

The program is applicable to:

(a) Privately owned land.

(b) Nonfederally owned public land under private control for the contract period and included in the participant’s operating unit, and

(c) Federally owned land, if installation of conservation practices would directly benefit nearby or adjoining privately owned land of persons who maintain and use the Federal land.

§ 631.7 Conservation treatment eligible for cost sharing.

(a) The state conservationist, in consultation with the state program committee, shall select the resource management systems, conservation practices, or identifiable units eligible for GPCP cost sharing in the state.

(b) The designated conservationist, in consultation with the county program committee, shall select from the state list the eligible conservation systems, practices, or identifiable units eligible for GPCP cost sharing in the county.

§ 631.8 Cost-share rates.

(a) The Federal rate may not exceed 80 percent.

(b) The maximum Federal rate (percentage) within each state for each practice or identifiable unit shall be established by the state conservationist.

(c) The maximum rate (percentage) for each county is established by the designated conservationist not to exceed the state rate (percentage).

(d) The rate (percentage) established by a state conservationist or a designated conservationist shall not exceed the amount necessary and appropriate to apply conservation treatment.

§ 631.9 Conservation plan.

(a) An applicant is responsible for developing a conservation plan, in cooperation with the conservation district, that protects the resource base in a manner acceptable to NRCS. This plan will be used as a basis for developing a contract. Conservation treatment is to be planned and implemented as a resource management system.

(b) The applicant decides how the land will be used and selects the resource management systems that will
Achieve the applicant’s objectives and provide protection of soil, water, and related resources acceptable to NRCS. Eligible practices may be included in the conservation plan to enhance fish and wildlife and recreation resources, promote the economic use of land, and reduce or control agriculture-related pollution.

(c) Technical assistance will be provided by NRCS, as needed by the land user. NRCS may utilize the services of private, local, state, and other Federal agencies in discharging its responsibilities for technical assistance.

(d) Participants are responsible for accomplishing the conservation plan and may use all available sources of assistance, including other USDA programs that are consistent with the conservation plan.

(e) All conservation practices scheduled in the conservation plan are to be carried out in accordance with the applicable NRCS technical guide.

Subpart B—Contracts

§ 631.10 Contracts.

(a) To participate in the program, an applicant must enter into a contract agreeing to implement a conservation plan. All persons who control or share control of the operating unit for the proposed contract period must sign the contract or one person with power-of-attorney may sign the contract for all persons. The applicant must provide the contracting officer with satisfactory evidence of control of the operating unit for the life of the proposed contract.

(b) Contracts may be entered into not later than September 30, 1991. The contract shall be for a period needed to establish the conservation treatment scheduled in the conservation plan and must extend at least 3 years but not more than 10 years.

(c) Contracts may be transferred or modified by mutual consent. The transferee assumes full responsibility for the contract including operation and maintenance of all land treatment installed under the contract. Also included are payments made under the contract to the participant or preceding participants before and after the transfer.

(d) Contracts may be terminated by mutual consent or by NRCS for cause.

§ 631.11 Conservation practice maintenance.

(a) Each participant is obligated to maintain the resource management systems or conservation practices applied under the contract for the duration of the contract. Practices installed before execution of the contract are to be maintained as specified in the contract.

(b) If the life span of the practices or resource management systems extends beyond the period of the contract, state conservationists may make the operation and maintenance of those practices or systems a condition of the contract. The length of such operation and maintenance shall extend for the expected life span.

§ 631.12 Cost-share payments.

(a) Federal cost sharing shall be adjusted so that the combined cost share by Federal and state government or subdivision of a state shall not exceed 100 percent of the cost.

(b) Cost-share payments for completing resource management systems or a practice or an identifiable unit according to specifications will be made by NRCS as specified in the contract or as adjusted according to §631.12(a).

§ 631.13 Disputes and appeals for matters other than contract violations.

Applicants or participants may appeal decisions regarding matters other than contract disputes under this part in accordance with part 614 of this title.

[60 FR 67316, Dec. 29, 1995]

§ 631.14 Contract violations.

Contract violations, determinations and appeals will be handled in accordance with the terms of the contract and attachments thereto. Violations involving fraud are to be handled in accordance with current USDA regulations.
§ 631.20 Setoffs.

(a) If any participant to whom compensation is payable under the program is indebted to U.S. Department of Agriculture (USDA), or any agency thereof, or is indebted to any other agency of the United States, and such indebtedness is listed on the county claim control record maintained in the office of the county ASC committee, the compensation due the participant shall be set off against the indebtedness. Indebtedness owing to USDA, or any agency thereof, shall be given first consideration. Setoffs made pursuant to this section shall not deprive the participant of any right to contest the justness of the indebtedness involved either by administrative appeal or by legal action.

(b) Participants who are indebted to this program for any reason will be placed on the USDA claim control record promptly by the state conservationist after the participant has been given opportunity to pay the debt.

§ 631.21 Compliance with regulatory measures.

Participants who carry out conservation practices shall be responsible for obtaining the authorities, rights, easements, or other approvals necessary for the implementation and maintenance of the conservation practices in keeping with applicable laws and regulations. Participants shall save the United States harmless from any infringements upon the rights of others or from any failure to comply with applicable laws or regulations.

§ 631.22 Access to operating unit.

Any authorized NRCS representative shall have the right to enter an operating unit for the purpose of ascertaining the accuracy of any representations made in a contract or leading up to a contract, and as to the performance of the terms and conditions of the contract. Access shall include the right to measure acreages, render technical assistance, and inspect any work undertaken under the contract.

§ 631.23 State conservationist's authority.

The state conservationist may take the initiative to revise or require revision of any determination made by the contracting officer or the district conservationist in connection with the program, except that the state conservationist may not revise any executed contract other than as may specifically be authorized herein.

PART 632—RURAL ABANDONED MINE PROGRAM

Subpart A—General

Sec. 632.1 Purpose and scope.
632.2 Objectives.
632.3 Responsibilities.
632.4 Definitions.

Subpart B—Qualifications

632.10 Applicability.
632.11 Availability of funds.
632.12 Funding priorities.
632.13 Eligible lands and water.
632.14 Eligible land users.
632.15 Eligible uses and treatment of reclaimed lands.
632.16 Methods of applying planned land use and treatment.
632.17 Cost-share rates.
632.18 Special projects.
632.19 Crop history and allotments.

Subpart C—Participation

632.20 Application for assistance.
632.21 Reclamation plan.
632.22 Contracts.
632.23 Access to land unit and records.

Subpart D—Cost-Share Procedures

632.30 Applicability.
632.31 Cost-share payment.

Subpart E—Appeals and Violations

632.40 Appeals.
632.41 Violations.
632.42 Violation procedures.

Subpart F—Environment

632.50 Environmental evaluation.
632.51 Accord with environmental laws and orders.
632.52 Identifying typical classes of action.

Subpart A—General
§ 632.1 Purpose and scope.
(a) The purpose of this part is to set forth the Natural Resources Conservation Service (NRCS) rules and regulations to carry out the Rural Abandoned Mine Program under section 406, Pub. L. 95-87; 91 Stat. 460 (30 U.S.C. 1236).
(b) The Rural Abandoned Mine Program:
(1) Through the NRCS delivery system, assists land users to voluntarily develop reclamation plans and apply conservation treatment for the reclamation, conservation, and development of eligible coal-mined lands and water, and
(2) Provides cost sharing through long-term contracts according to an approved reclamation plan, to land users for establishing land use and conservation treatment on these lands.

§ 632.2 Objectives.
(a) The objectives of the program are to protect people and the environment from the adverse effects of past coal-mining practices and to promote the development of the soil and water resources of unreclaimed mined lands by:
(1) Stabilizing mined lands.
(2) Controlling erosion and sediment on mined areas and areas affected by mining.
(3) Reclaiming lands and water for useful purposes.
(4) Enhancing water quality or quantity where it has been disturbed by past coal-mining practices.

§ 632.3 Responsibilities.
(a) The Rural Abandoned Mine Program is administered by the U.S. Department of Agriculture (USDA) through NRCS in accordance with the delegation of responsibility contained in §601.1(h) of this chapter.
(b) The Chief of NRCS is responsible for national program management and administration and for coordinating program operations within a State including program coordination with the State reclamation agency and the representatives of OSM.
(c) NRCS is assisted by other USDA agencies in accordance with existing authorities and agreements in carrying out the program.
(d) NRCS is to coordinate Rural Abandoned Mine Program activities with NRCS programs and the other reclamation programs authorized by Pub. L. 95-87 that are carried out by the Office of Surface Mining of the U.S. Department of the Interior, State reclamation agencies, and Indian tribes. Coordination includes program development, development of reclamation standards, preparation of special reports, requests for funding, and related actions required to achieve coordination between programs.
(e) NRCS is to consult with State and local reclamation committees to obtain recommendations on program operation, evaluation of applications for reclamation assistance, and public participation. The NRCS State Conservationist is to use existing reclamation committees or encourage the organization of a new State committee for this purpose. The State Conservationist is to serve as a member when the committee is functioning for the purposes of this program. Representatives of the Office of Surface Mining, State reclamation agency, State water quality agency, State conservation agency, and other agencies or groups are to be invited to participate as members. Individual citizens may participate through the State committee. Local committees, if needed, are to be organized on a multicounty, county, conservation district, or other appropriate area with a local membership structure similar to the State committee. The district conservationist is to be a member of a local reclamation committee organized to provide program guidance.

Source: 43 FR 44749, Sept. 28, 1978, unless otherwise noted.
§ 632.4 Definitions.

Abandoned mined lands. Unreclaimed coal-mined lands that existed before August 3, 1977, and for which there is no continuing reclamation responsibility on the part of a mine operator, permittee, or agent under State or Federal law or on the part of the State as a result of a bond forfeiture. See § 632.13.

Average costs. The calculated cost, determined by recent actual costs and current cost estimates, considered necessary for a land user to carry out a conservation practice or an identifiable unit of a conservation practice.

Conservation district. A legal subdivision of State government responsible for developing and carrying out programs of soil and water conservation with which the Secretary of Agriculture cooperates under the Soil Conservation and Domestic Allotment Act of 1935.

Conservation treatment. Specific conservation or reclamation practices applied to the land according to current standards and specifications in NRCS technical guides.

Contract. A binding agreement between NRCS and the land user that includes the reclamation plan and provides for cost sharing the conservation treatment.

Contracting officer. The NRCS official authorized to enter into and administer contracts for the Rural Abandoned Mine Program.

Cost. The monetary amount actually paid or obligated to be paid by the land user for equipment use, materials, and services for carrying out a conservation practice or identifiable unit. If the land user uses his own resources, it includes the computed value of his labor, equipment use, and materials.

Cost-share payments. Payments made to or on behalf of land users at established rates as specified in contracts for carrying out a conservation practice or an identifiable unit of such practices according to the contract.

Financial burden. The land user’s cost of reclamation that cannot be expected to be recovered within the contract period and that would probably prevent participation in the program. The land user must sign a statement to substantiate financial burden.

Identifiable unit. A component of a conservation practice that can be clearly identified as a step in carrying out the conservation practice.

Inadequately reclaimed. Lands or water that are mined for coal or are affected by mining conducted before August 3, 1977, which continue in their present condition to substantially degrade the quality of the environment, prevent or damage beneficial use of land or water resources, or endanger the health or safety of the public.

Landrights. An interest acquired by fee simple title, easements, and rights-of-way to occupy or use land, buildings, structures, or other improvements.

Land user. Any person, partnership, firm, company, corporation, association, trust, estate, other entity, or agent that owns or has management control of the surface rights of the land during the contract period or owns water rights on eligible lands. Also included are State or local public entities that own or control eligible land and water.

Main benefits. The principal values or benefits that can be identified and/or quantified as a result of reclamation. Main offsite benefits are those values that accrue to surrounding land users or the public in general as a result of the reclamation. Main onsite benefits are those that accrue to the participant. Examples of principal values or benefits include but are not limited to human lives and property protected, reduction of erosion or sediment damage, elimination of public safety or health hazards, improvement of water quality, improved visual quality, improved fish or wildlife habitat, or restoration of beneficial uses of reclaimed areas.

Reclamation committee. A committee on a local or State level consisting of representatives of Federal and State agencies and other organizations or individuals that have responsibilities or interest in abandoned mine reclamation. The committee provides guidance to NRCS on the operation of the Rural Abandoned Mine Program.

Reclamation plan. A conservation and development plan as referred to in Pub. L. 95-87, consisting of a written record of land user decisions on proposed use,
conservation treatment, and maintenance of eligible lands and water that will protect, enhance, and maintain the resource base. A reclamation plan contains pertinent soils data, a planned land use map or drawing, a record of use and treatment decisions including a schedule of conservation treatment, and other resource data as appropriate.

Specified maximum costs. The maximum amount of cost-share money that is to be paid to a land user for carrying out a conservation practice or an identifiable unit of a conservation practice.

Standards and specifications. Requirements that establish the acceptable quality level for planning, designing, and installing a conservation practice so it achieves its intended purpose. NRCS standards and specifications are contained in the NRCS field office technical guides and are designed to be sound and practicable under local conditions. Technical guides are on file in local NRCS field offices.

Water rights. Any interest acquired in, priority established for, or permission obtained for the use of water.

Subpart B—Qualifications

§ 632.10 Applicability.

This program applies to any county or other designated area within a State that had abandoned or inadequately reclaimed coal-mined lands within its borders before August 3, 1977.

§ 632.11 Availability of funds.

(a) The provisions of the program are subject to the annual appropriation by Congress of funds from the Abandoned Mine Reclamation Fund and the transfer of as much as 20 percent of these funds from the Office to Surface Mining to NRCS for program operation.

(b) Allotments of Rural Abandoned Mine Program funds to state conservationists are to reflect the national program needs, the geographic areas from which the funds were derived, the funding priority assigned to applications for program assistance, including benefits expected to be derived, and the practicability and feasibility of the reclamation work proposed.

§ 632.12 Funding priorities.

(a) All eligible applications within a State are to be assigned a funding priority and subpriority. Assignment of a priority and subpriority establishes the order in which the proposed reclamation work will be selected and evaluated for funding. (See §632.20(b) for additional selection criteria.) Applications for individual, joint, or special projects (See §632.18) for areas of different priorities or subpriorities are to be assigned the highest applicable priority or subpriority. The funding priorities are as follows:

(1) Priority 1. Protection of public health, safety, general welfare, and property from extreme danger of adverse effects of coal-mining practices. Extreme danger means a condition that could be expected to cause substantial physical harm to persons, property, or the environment and to which persons or improvements on real property are exposed.

(2) Priority 2. Protection of public health, safety, and general welfare from the adverse effects of coal-mining practices that do not constitute an extreme danger.

(3) Priority 3. Restoration of the land and water resources and the environment where previously degraded by the adverse effects of coal-mining practices, including measures for the conservation and development of soil, water (excluding channelization), woodland, fish and wildlife, recreation resources, and agricultural productivity. First consideration in this priority is to be the reduction of offsite damage affecting the public. Second consideration is to be given to restoring to beneficial use for the main benefit of the land user.

(b) Eligible and feasible applications for program assistance within each priority category (§632.12(a)) are to be funded in the following order:

(1) Individual persons or public entities who owned the eligible area before May 2, 1977, and who neither consented to nor exercised control over the mining operation.
§ 632.13 Eligible lands and water.

Lands and water eligible for reclamation are those that were mined for coal or were affected by coal-mining processes and were abandoned or inadequately reclaimed before August 3, 1977. These lands and water are not eligible if:

(a) There is continuing reclamation responsibility on the part of a mine operator, permittee, or agent under State or Federal law or on the part of the State as a result of bond forfeiture. However, if the amount of the bond forfeiture was insufficient to reclaim the area covered by the bond, the area will be considered eligible.

(b) They are under Federal ownership and control.

(c) The surface rights are under easement or lease to be remined for coal or other minerals.

§ 632.14 Eligible land users.

Landowners holding surface land and water rights, residents, tenants, or their agents who own or have management control of eligible land and/or water are eligible to participate in the program. Residents or tenants who do not own the land must have control of the land for the period of the proposed contract and have the written consent of the landowner. Land users may participate by operating as persons, partnerships, associations, corporations, estates, trusts, or non-Federal public entities, and by acting individually or jointly with other eligible land users. However, joint participation with other eligible land users is required if the primary purpose of reclamation is enhancement of water quality or quantity.

§ 632.15 Eligible uses and treatment of reclaimed lands.

(a) Reclaimed lands and water may be used for cropland, hayland, pasture land, rangeland, woodland, wildlife land, natural areas, noncommercial recreation land, and the supporting uses associated with these land uses. Other land uses proposed by public entities for public use and benefit such as open space, conservation uses, natural areas, and recreation sites may be approved by the NRCS State conservationist in accordance with the priorities stated in §632.12. However, development of public sites, such as the installation of recreation facilities, is not eligible for cost sharing.

(b) Reclaimed land use is determined by the objectives of the land user, compatibility of the land use with surrounding land use, and the practicability and feasibility of restoring the soil and water resources to support the use selected.

(c) The maximum acreage of eligible lands and water that may be offered for contract under one ownership is 320 acres for the life of the program.

(d) Conservation treatment eligible for Federal cost sharing includes the combination of practices needed and feasible to achieve:

(1) Protection of life, property, and elimination of public health and safety hazards, including land stabilization.

(2) Restoration of the environment where degraded by past mining, including water quality, visual quality, recreation resources, fish and wildlife habitat, and erosion and sediment control.

(3) A site that can be developed for a beneficial use as specified in §632.15(a). Examples of eligible treatment that may be cost shared include but are not limited to: Land shaping and grading, critical area planting or other plantings for stabilization, improving visual quality, wildlife food and cover, diversions or terraces, waterways or lined ditches, grade stabilization structures, sediment basins, and special practices for sealing shafts and tunnels, correcting subsidence problems, or other unusual situations. Practices not eligible for cost sharing are those that are solely applied to develop a reclamation site (including sites developed by public entities for public use), increase the production of crops, or for the recurring maintenance of applied reclamation.

(e) Applied conservation treatment is to meet the applicable Federal and State standards for the reclamation

7 CFR Ch. VI (1-1-14 Edition)

524
and conservation treatment of abandoned or inadequately reclaimed coal-mined lands and water. Where needed, these standards are incorporated in local NRCS technical guides as the NRCS standards and specifications applicable to the program. Special practices as specified in §632.15(d) are to be developed in cooperation with appropriate State or Federal agencies having the expertise or responsibility for the practices.

(f) NRCS State conservationists, in consultation with the State reclamation committee, are to:

(1) Develop a list of practices that are eligible for cost sharing, and

(2) Maintain, as applicable, lists of average costs of applying conservation treatment to eligible lands and waters.

§ 632.16 Methods of applying planned land use and treatment.

(a) Land users may arrange to apply the planned land uses and conservation treatment specified in the contract by one or more of the following methods:

(1) By performing the required treatment with his own labor and equipment.

(2) By hiring a qualified contractor to install the required treatment.

(3) By requesting NRCS to award and administer a contract to perform the required treatment in accordance with 41 CFR chapters I and IV.

(b) State conservationists are to develop criteria specifying the conditions for which NRCS will award and administer a contract. Criteria will consider:

Type of equipment required, type and amount of conservation treatment required, costs of the required reclamation, needs of the land user, and the applicable cost-share rate. If the Federal share is less than 100 percent, a land user must put up his estimated share of the cost before NRCS awards the contract.

§ 632.17 Cost-share rates.

(a) Cost-share rates paid by the Federal Government are to be established and issued as instructions by the NRCS Administrator in accordance with the following criteria:

(1) For 120 acres or less, the cost-share rate is to provide up to 80 percent of the costs of land use and conservation treatment depending on the income-producing potential of the land after reclamation. However, this rate may be increased to a level required to obtain participation if the main benefits of reclamation are offsite (in the public interest) and there is a declaration of financial burden by the participant.

(2) The rate on acreage in excess of 120 acres up to 320 acres maximum is to be reduced by up to 0.5 percent per acre. This reduced rate applies to the entire acreage offered for contract.

§ 632.18 Special projects.

(a) The NRCS State conservationist may approve the following types of special projects subject to the eligibility requirements, funding priorities, and cost-share rates as stated in §§632.12, 632.13, 632.14, 632.15, and 632.17:

(1) Field trials or demonstration projects recommended by the State reclamation committee.

(2) Projects to enhance water quality and quantity where past coal-mining practices disturbed local water supplies and where joint action by a group of eligible land users in cooperation with Federal and State agencies is needed to restore the water resource.

§ 632.19 Crop history and allotments.

(a) Most crop history and allotments on eligible lands were discontinued at the time of mining. However, if eligible lands are classified as cropland at the time the contract is signed, the cropland crop history and allotment, if any, may be:

(1) Preserved for a period not to exceed twice the length of the contract as provided in 7 CFR part 719, or

(2) Voluntarily surrendered by the land user.

Subpart C—Participation

§ 632.20 Application for assistance.

(a) Land users must submit an application for program assistance through the local conservation district or NRCS field office. NRCS is to announce dates for receiving applications through local media. Applications are to be reviewed by the conservation district and/or local reclamation committee,
which is to verify eligibility and recommend funding priorities to the NRCS district conservationist. The NRCS district conservationist is to assign funding priorities according to the recommendations unless he determines that applications are incomplete, ineligible, or unfeasible. Low priority applications that cannot be serviced within specific time periods established by the State conservationist are to be returned to the applicant with an appropriate explanation. These applicants may reapply at a later date if they are still interested.

(b) Eligible applicants are serviced within each subpriority according to the following criteria:

(1) The specific type, amount, and relative importance of benefits to be derived. (Public benefits and offsite environmental improvement will take precedence over onsite benefits.)

(2) Feasibility and practicability of reclaiming for the proposed uses.

(3) Land user’s ability to proceed.

(4) Date of the application.

§ 632.21 Reclamation plan.

(a) Responsibility. Land users are responsible for developing a reclamation plan that will serve as a basis for a contract. Normally, a land user will need the technical services of NRCS and the conservation district or another professional to develop an acceptable plan.

(b) Objectives and priorities. The reclamation plan is to provide for the appropriate program objectives and priorities as stated in §§632.2 and 632.12 and meet the definition of a reclamation plan as defined in §632.4.

(c) Review. (1) In areas served by conservation districts, reclamation plans are to be reviewed and signed by the district board to insure that planned land use and treatment is compatible with surrounding land uses and that proposed assistance is consistent with the district plan of work and priorities. In areas not served by conservation districts, the land use compatibility review may be performed by the local reclamation committee.

(2) If reclamation plans include lands within or adjacent to Federal lands, the plan is to be reviewed with the appropriate Federal land management agency to insure that the planned land use is compatible with that of the surrounding area.

(3) Land users are responsible for insuring that the proposed land use and treatment is compatible with local land use ordinances.

(d) Approval. Proposed land use, conservation treatment, and sequence of application contained in the plan are to be agreed to by both NRCS and the land user. The district conservationist is to sign the reclamation plan to indicate technical approval.

§ 632.22 Contracts.

(a) Cost-sharing contracts. A land user who has an approved reclamation plan may enter into a contract with NRCS to receive Federal cost-share assistance. All land users are to sign the contract. A land user is required to furnish evidence of management control, such as a long-term lease, recorded deed, or land contract, and must have the written consent of the landowner. The NRCS contracting officer is to sign the contract after determining that all documents meet program requirements.

(b) Effect of contract. A land user who signs a contract is obligated to apply or arrange for the application of the land use and conservation treatment as scheduled in the reclamation plan according to approved standards and specifications. A land user may request NRCS to award and administer a contract to apply the conservation treatment as scheduled in the reclamation plan in accordance with §632.16(a)(3).

(c) Permits, landrights, and water rights. The land user is responsible for obtaining the permits, surface land rights, and water rights that may be required to perform the planned work. NRCS is to assist land users in identifying the specific permit, landright, or water right required.

(d) Operation and maintenance. During the contract period the land user is responsible for the operation and maintenance of applied conservation treatment. Operation and maintenance requirements are to be included in the contract.

(e) Period of contract. The contract period is to be no less than 5 nor more than 10 years. A contract is to extend
for at least 3 years after the application of the last cost-shared conservation treatment to insure adequate establishment of vegetation and other treatment. Exceptions to the 3-year provision may be granted by the state conservationist for unusual circumstances.

(f) Transfer of contract. (1) If during the contract period all or part of the right and interest in the land is transferred by sale or other action, the contract is terminated on the land unit that was transferred and the land user:
   (i) Forfeits all right to any future cost-share payments on the transferred land unit, and
   (ii) Must refund cost-share payments that have been made on the transferred land unit to exceed the difference between the estimated value of the land at the time of entering into the contract and at the time of transfer, unless the new land user becomes a party to the contract as provided in paragraph (f)(2) of this section.

(2) If the new land user becomes a party to the contract:
   (i) He is to assume all obligations of the previous land user on the transferred land unit.
   (ii) The contract with the new land user is to remain in effect with the original terms and conditions.

   (iii) The contract is to be modified in writing to show the changes caused by the transfer. If the modification is not acceptable to the contracting officer, the provisions of paragraphs (f)(1) (i) and (ii) of this section apply.

(3) The transfer of all or part of a land unit by a land user does not affect the rights and obligations of other land users who have signed the contract.

(g) Modification of contract. (1) A contract previously entered into with a land user may be modified only with the approval of the State conservationist or as authorized under established policies. No contract may be modified unless it is determined that the modification is desirable to carry out the program.

(2) Contracts may be modified to add, delete, substitute, or reapply conservation treatment if:
   (i) Applied conservation treatment failed to achieve the desired results through no fault of the land user,
   (ii) Applied treatment deteriorated because of conditions beyond the control of the land user, or
   (iii) Other treatment is substituted that will achieve the desired results.

(h) Joint contract. A land user may enter a contract jointly with other land users subject to the 320 acres maximum limitation per landowner. However, joint participation is permitted only if it will result in better land use and treatment than individual participation or if it is required by §§632.14 and 632.18(a)(2).

(1) Termination of contract. Contracts may be terminated by mutual consent of the signatories only if the State conservationist determines that the termination is authorized under established policies and is in the public interest. In this case, the State conservationist is to determine the amount of refund.

§ 632.23 Access to land unit and records.

Any authorized NRCS employee or agent is to have the right of access to land under application or contract and the right to examine any program records to ascertain the accuracy of any representations made in the application or contract. This includes the right to furnish technical assistance and to inspect work done under the contract.

Subpart D—Cost-Share Procedures

§ 632.30 Applicability.

This subpart contains procedures for making cost-share payments to a land user when land use and conservation treatment is applied as specified in §632.16(a)(1) or (2).

§ 632.31 Cost-share payment.

(a) Amount of cost-share payment.

Cost-share payments are to be made at rates specified in the contract. The cost-share payment is to be determined by one of the following methods:

(1) Average cost.

(2) Actual cost but not more than the average cost.

(3) Specified maximum cost. If the average cost or the specified maximum cost at the time of starting the installation of a conservation practice or
identifiable unit is less than the cost specified in the contract, payment is to be made at the lower rate. If the cost at the start of installation is higher, payment may be made at the higher rate. A contract modification is necessary if NRCS determines that the higher cost is a significant increase in the total cost-share obligation. If costs are significant, cost-share payment is not to be made until the modification reflecting the increase is approved. If the higher costs are not significant, cost-share payments may be made if funds are available.

(b) Time of payment. Cost-share payments are to be made to the land user after a practice or an identifiable unit has been satisfactorily applied. The land user is to submit claims for payment to the district conservationist no later than September 30 of the year after application. Late claims require approval of the State conservationist before payment can be made. A claim is to show the proportion of each land user's contribution to the applied practice or identifiable unit.

(c) Approval. The district conservationist must certify that a practice or identifiable unit has been satisfactorily applied before NRCS can make cost-share payments.

(d) Ineligible claim. A land user is not eligible to receive cost-share payments for a practice or an identifiable unit that was not carried out under program requirements.

(e) Authorization for payment. (1) Materials or services needed to carry out contracts are to be obtained by land users. Contracts may provide for part or all of the cost-share payment for a practice or identifiable unit to be made directly to suppliers of materials or services. The materials or services must be delivered or performed before payment is made.

(2) The contracting officer is to authorize payment for materials or services not exceeding:

(i) The cost share of the material or service used, or

(ii) The total cost share of the practices or identifiable unit if requested by the land user.

(3) The land user who purchases materials or services to carry out a contract is responsible for them until the district conservationist determines that the material or service was used for the intended purpose. If a material or service cost-shared by NRCS is used for a purpose other than to carry out the contract, the land user is indebted to the United States for the cost of the misused material or service. This indebtedness is to be repaid to NRCS as a refund or withheld from cost-share payments otherwise due the land user under the contract.

(4) NRCS has the right to inspect materials or services and to take samples for testing. Inspections by NRCS will not be necessary if NRCS considers State inspection regulations adequate.

(5) Materials or services must meet the quality standards as specified. NRCS may make exceptions for materials or services that do not meet the standards only if they will satisfactorily serve the intended purpose. NRCS is to deduct from the cost-share payment the difference between the price of the materials or services specified and the actual value of the different materials or services.

(f) Division of cost-share payments. Federal cost-share payments made directly to suppliers of materials or services are credited to the land user who was issued the authorization. The remainder of the cost share is credited to the land user who carried out the remainder of the practice or identifiable unit. If more than one land user contributed to carrying out a practice or identifiable unit, the cost-share payment is to be divided proportionately according to the contribution made by each of the land users. Furnishing a landright or water right is not a contribution for cost-share payment purposes.

(g) Other aid. Non-Federal public entities may furnish all or part of the land user's portion of the cost of applying a practice or identifiable unit with no reduction in the Federal cost share.

(h) Assignments and claims. Land users may not assign cost-share payments except as provided under the authority of 31 U.S.C. 203, as amended by 41 U.S.C. 15. Federal cost-share payments due any land user are not subject to claims for advances except as provided in this section.
Subpart E—Appeals and Violations

§ 632.40 Appeals.
Land users may appeal decisions under this part in accordance with part 614 of this title.
[60 FR 67316, Dec. 29, 1995]

§ 632.41 Violations.

(a) Actions causing violation. The following actions constitute violation of a contract by a land user:
(1) Knowingly or negligently damaging or causing conservation treatment to be impaired.
(2) Adopting land use or treatment that tends to defeat the program purposes during the period of the contract.
(3) Failing to comply with the terms of the contract.
(4) Filing a false claim.
(5) Misusing an authorization.

(b) Effect of violation—(1) Contract to be terminated. (i) By signing a contract, the land user agrees to forfeit all rights to further cost-share payments under a contract and to refund cost-share payments received not to exceed the difference between the estimated value of the land at time of entering into the contract and the value at time of termination, if the contracting officer, with approval of the State conservationist, determines that:
(A) There was a violation of the contract during the time the land user had control of the land, and
(B) The nature of the violation does not warrant termination of the contract.
(ii) Payment adjustments may include decreasing the rate of a cost share, deleting a cost-share commitment from the contract, or withholding cost-share payments earned but not paid. The land user who signs the contract may be obligated to refund cost-share payments and cost shares paid under authorizations.

§ 632.42 Violation procedures.

(a) Scope. This section prescribes the regulations dealing with contract violations. The Chief reserves the right to revise or supplement any of the provisions of this section at any time if the action does not adversely affect the land user, or if the land user has been officially notified before this action is taken. No cost-share payment shall be made pending the decision on whether a contract violation has occurred.

(b) Determination by contracting officer. On notification that a contract violation may have occurred, the contracting officer is to:
(1) Determine, with the approval of the State conservationist, that a violation did not occur or that the violation was of such a nature that no penalty of forfeiture, refund, or payment adjustment is necessary. No notice is issued to the land user, and no further action is to be taken; or
(2) Determine that a violation did occur, but the land user agrees to accept the penalty. If the land user agrees in writing to accept a penalty of forfeiture, refund, payment adjustment or termination, no further action is to be taken. The land user’s agreement to accept the penalty must be approved by the contracting officer and State conservationist.

(c) Notice of possible violation. (1) When the State conservationist is notified that a contract violation may have occurred that may warrant a penalty of forfeiture, refund, payment adjustment or termination, he is to notify, in writing, each land user who signed the agreement of the alleged violation. This notice may be personally delivered or sent by certified or registered mail. A land user is considered to have
received the notice at the time of personal receipt acknowledged in writing, at the time of the delivery of a certified or registered letter, or at the time of the return of a certified or registered letter where delivery was refused.

(2) The notice setting forth the nature of the alleged violation is to give the land user an opportunity to appear at a hearing before a hearing officer designated by the State conservationist. The land user’s request for a hearing is to be submitted in writing and must be received in the NRCS field office within 30 days after receipt of the notice. The land user is to be notified in writing by the hearing officer of the time, date, and place for the hearing. The land user is to have no right to a hearing if he does not file a written request for a hearing, or if he or his representative does not appear at the appointed time, unless the hearing officer, at his discretion, permits an appearance. A request for a hearing filed by a land user is considered to be a request by all land users who signed the contract.

(d) Hearing. A public hearing is to be conducted to obtain the facts about the alleged violation. The hearing officer is to limit the hearing to relevant facts and evidence and is not to be bound by the strict rules of evidence as required in courts of law. Witnesses may be sworn in at the discretion of the hearing officer.

1. The land user or his representative is to be given full opportunity to present oral or documentary evidence about the alleged violation. Likewise, the United States may submit statements and evidence. Individuals not otherwise represented at the hearing may be permitted, at the discretion of the hearing officer, to give information of evidence. The hearing officer, at his discretion, may permit witnesses to be cross-examined.

2. The hearing officer is to make a record of the hearing so that the testimony can be summarized. A summary of the testimony may be made if both the land user and the State conservationist agree. A transcript of the hearing is to be made if requested by either the State conservationist or the land user within 10 days of the hearing. If a transcript is requested by the land user, the land user may be assessed the cost of a copy of the transcript.

(3) The hearing officer is to close the hearing after a reasonable period of time if the land user or his representative is not present at the scheduled time. The hearing officer may, at his discretion, accept information and evidence submitted by others present for the hearing.

(4) The hearing officer is to furnish the State conservationist with a written report setting forth his findings, conclusions, and recommendations. The report is to include the summary of testimony or transcript made of the hearing and any other information that would aid the State conservationist in reaching his decision.

(e) Decision by State conservationist. The State conservationist is to make a decision after considering the hearing officer’s report, including recommendations of the conservation district board if any, and any other information available to him, including, if applicable, the amount of the forfeiture, refund, or payment adjustment. The decision is to state whether the violation is of such a nature as to warrant termination of the contract. The State conservationist is to notify, in writing, each land user who signed the contract of his decision. The State conservationist may authorize or require the reopening of any hearing before a hearing officer for any reason at any time before his decision.

(f) Appeal to Chief. Any land user affected by a decision of the State conservationist has the right of appeal to the Chief. The appeal and any briefs or statements must be received in the Office of the Chief within 30 days after the land user has received notice of the State conservationist’s decision. The State conservationist is to file a brief or statement in the Office of the Chief within 20 days after the land user’s brief or statement is received there. The appeal is to be limited to the records and the issues made before the State conservationist. The Chief’s decision is final. The decision is to be determined by the record before him and the issues presented in the appeal, and the land user is to be notified in writing.
§ 632.51 Accord with environmental laws and orders.

(a) Environmental evaluation is an integral part of planning used by NRCS in developing each reclamation plan under this program. Planning includes site inventory and analysis, evaluation of reasonable alternatives, and identification of significant environmental impacts. Major points in planning when NRCS or the land user can make decisions concerning further action are:

(1) After an evaluation of the application for program assistance to verify eligibility, land user objectives, and priorities for funding.  
(2) After a site-specific inventory and analysis to evaluate feasible treatment alternatives, costs, and environmental impacts.  
(3) After development of an acceptable reclamation plan as a basis for contract.  
(4) Before the signing of a mutually acceptable contract for financial cost-share assistance.

(b) The scope and complexity of the assessment is to be consistent with the scope and complexity of the proposed reclamation.

(c) An interdisciplinary team, consisting of NRCS and/or other cooperating agency personnel as needed, is used in making the assessment.

(d) The Responsible Federal Official (RFO) is to use the environmental evaluation to make a decision concerning the need to prepare an environmental impact statement (EIS) in accordance with §632.52.

Subpart F—Environment

§ 632.50 Environmental evaluation.

(a) Environmental evaluation is an integral part of planning used by NRCS in developing each reclamation plan under this program. Planning includes site inventory and analysis, evaluation of reasonable alternatives, and identification of significant environmental impacts. Major points in planning when NRCS or the land user can make decisions concerning further action are:

(1) After an evaluation of the application for program assistance to verify eligibility, land user objectives, and priorities for funding.  
(2) After a site-specific inventory and analysis to evaluate feasible treatment alternatives, costs, and environmental impacts.  
(3) After development of an acceptable reclamation plan as a basis for contract.  
(4) Before the signing of a mutually acceptable contract for financial cost-share assistance.

(b) The scope and complexity of the assessment is to be consistent with the scope and complexity of the proposed reclamation.

(c) An interdisciplinary team, consisting of NRCS and/or other cooperating agency personnel as needed, is used in making the assessment.

(d) The Responsible Federal Official (RFO) is to use the environmental evaluation to make a decision concerning the need to prepare an environmental impact statement (EIS) in accordance with §632.52.

§ 632.52 Identifying typical classes of action.

(a) The RFO will analyze the environmental assessment of the proposed action to determine which of the following classes of action applies. This determination will be recorded and will be available to the public on request.

1. Actions not requiring a site-specific EIS. All proposed actions and their impacts that are determined to be adequately discussed in the program EIS or determined not to be major Federal actions will not require a site-specific EIS. However, if the assessment reveals that these proposed actions will have significant adverse effects on the quality of the human environment, the RFO will:
   (i) Modify the action to eliminate or mitigate the significant adverse impacts, or
   (ii) Withdraw further Federal assistance if significant adverse impacts cannot be eliminated or mitigated.

2. Actions requiring a site-specific EIS. A site-specific EIS is required for proposed actions if their impacts are not adequately discussed in the program EIS, and the proposal is determined to be a major Federal action significantly affecting the quality of the human environment in accordance with §650.7(b) of this chapter. When a decision is made to prepare an EIS, a Notice of Intent will be published in the FEDERAL REGISTER. The content and format of the EIS is to be consistent with the format of the program EIS and use scoping and tiering techniques to focus on the significant environmental issues.

3. Actions excluded from the EIS requirements. Those actions taken to prevent loss of life or property under the extreme danger provisions of priority 1 as described in §632.12. These actions are determined by a limited environmental assessment that reasonably identifies the possible loss of life or property.

PART 633—WATER BANK PROGRAM

Sec.
633.1 Purpose and scope.
633.2 Definitions.
633.3 Administration.

§ 633.1 Purpose and scope.

The regulations in this part set forth the policies, procedures, and requirements for the Water Bank Program (WBP) as administered by the Natural Resources Conservation Service (NRCS) for program implementation.

§ 633.2 Definitions.

The following definitions shall be applicable to this part:

Adjacent land means land on a farm which adjoins designated types 1 through 7 wetlands and is considered essential for the protection of the wetland or for the nesting, breeding, or feeding of migratory waterfowl. Adjacent land need not be contiguous to the land designated as wetland, but cannot be located more than one quarter of a mile away.

Agreement means the document that specifies the obligations and rights of any person who has been accepted for participation in the WBP.

Annual payment means the consideration paid to a participant each year for entering an agreement with the NRCS under the WBP.

Chief means the Chief of the Natural Resources Conservation Service or the person delegated authority to act for the Chief.

Conservation District is a subdivision of a State government organized pursuant to applicable State law to promote and undertake actions for the conservation of soil, water, and other natural resources.
Conservation plan means a written record of the land user's decision on the use and management of the wetland and adjacent areas covered by the agreement.

Cost-share payment means the payment made by the NRCS to achieve the protection of the wetland functions and values of the agreement area in accordance with the conservation plan.

Landowner means a person or persons having legal ownership of farmland, including those who may be buying farmland under a purchase agreement. Landowner may include all forms of collective ownership including joint tenants, tenants in common, and life tenants and remaindermen in a farm property.

Natural Resources Conservation Service (NRCS) is an agency of the United States Department of Agriculture, formerly called the Soil Conservation Service.

Operator means the person who is in general control of the farming operations on the farm during the crop year.

Person means one or more individuals, partnerships, associations, corporations, estates or trusts, or other business enterprises or other legal entities and, whenever applicable, a State, a political subdivision of a State, or any agency thereof.

Practice means a measure necessary or desirable to accomplish the desired program objectives.

State Technical Committee means a committee established by the Secretary of the United States Department of Agriculture in a State pursuant to 16 U.S.C. 3861. The State Conservationist will be the chairperson of the State Technical Committee.

U.S. Fish and Wildlife Service is an agency of the United States Department of the Interior.

Wetlands mean the inland fresh areas defined under 16 U.S.C. 1302 and described as types 1 through 7 in Circular 39, Wetlands of the United States, as published by the United States Department of the Interior.

Wetlands functions and values mean the hydrological and biological characteristics of wetlands and the social worth placed upon these characteristics, including:

1. Habitat for migratory birds and other wildlife, in particular at risk species;
2. Protection and improvement of water quality;
3. Attenuation of water flows due to flooding;
4. The recharge of ground water;
5. Protection and enhancement of open space and aesthetic quality;
6. Protection of flora and fauna which contributes to the Nation's natural heritage; and
7. Contribution to educational and scientific scholarship.

WBP means the Water Bank Program.

§633.3 Administration.

(a) The regulations in this part will be administered under the general supervision and direction of the Chief.

(b) As determined by the Chief and the Administrator of the Farm Service Agency, the NRCS will seek the agreement of the Farm Service Agency in establishing policies, priorities, and guidelines related to the implementation of this part.

(c) The State Conservationist will consult with the State Technical Committee, on program administration and related policy matters. No determination by the State Technical Committee shall compel the NRCS to take any action which the NRCS determines will not serve the purposes of the program established by this part.

(d) The NRCS may enter into cooperative agreements with Federal or State agencies and with private conservation organizations to assist the NRCS with educational efforts, agreement management and monitoring, program implementation assistance, and to assure a solid technical foundation for the program.

(e) The NRCS shall consult with the U.S. Fish and Wildlife Service in the implementation of the program and in establishing program policies.

(f) The Chief may allocate funds for such purposes related to special pilot programs for wetland management and monitoring, emergencies, cooperative agreements with other Federal or State agencies for program implementation, coordination of enrollment.
across State boundaries, or for other goals of the WBP found in this part.

§ 633.4 Program requirements.
     (a) General. Under the WBP, the NRCS will enter 10-year agreements with eligible persons who voluntarily cooperate in the protection of wetlands and associated lands. To participate in WBP, a person will agree to the implementation of a conservation plan, the effect of which is to protect, enhance, maintain, and manage the hydrologic conditions of inundation or saturation of the soil, native vegetation, and natural topography of eligible lands. The NRCS may provide cost-share assistance for the activities that promote the protection of wetland functions and values. Specific protection actions may be undertaken by the participant or other NRCS designee.
     (b) Participant eligibility. To be eligible to participate in the WBP, a person must:
         (1) Be the landowner of eligible land for which enrollment is sought; or
         (2) Have possession of the land by written lease over all designated acreage in the agreement for at least two years preceding the date of the agreement and will have possession over the all designated acreage for the agreement period.
     (c) Eligible land. (1) The NRCS shall determine whether land is eligible for enrollment and whether, once found eligible, the lands may be included in the program based on the likelihood of successful protection of wetland functions and values when considering the cost of entering the agreement and protection costs. Land placed under an agreement shall be specifically identified and designated for the period of the agreement.
         (2) The following land is eligible for enrollment in the WBP:
             (i) Privately owned inland fresh wetland areas of types 1 through 7.
             (ii) Privately owned inland fresh wetland areas of types 1 through 7 which are under a drainage easement with the U.S. Department of the Interior or with a State government which permits agricultural use; or
             (iii) Other privately owned land which is adjacent to or within one quarter mile of designated types 1 through 7 wetlands and which is determined by the State Conservationist to be essential for the nesting, breeding, or feeding of migratory waterfowl, or for the protection of wetland.
     (d) Ineligible land. The following land is not eligible for enrollment in the WBP:
         (1) Converted wetlands if the conversion was in violation of 16 U.S.C. 3821 et seq.;
         (2) Lands owned by an agency of the United States;
         (3) Land which is set aside or diverted under any other program administered by the Department of Agriculture;
         (4) Land which is harvested in the first year of the agreement period prior to being designated, except for land on which timber is harvested in accordance with a Forest Management Plan which is included in the conservation plan and is approved by the State forester or equivalent State official;
         (5) Lands where implementation of agreement practices would be futile due to on-site or off-site conditions; and
         (6) Land on which the ownership has changed during the 2-year period preceding the first year of the agreement period unless:
             (i) The new ownership was acquired by will or succession as a result of the death of the previous owner;
             (ii) The land was acquired by the owner or operator to replace eligible land from which he was displaced because of its acquisition by any Federal, State, or other agency having the right of eminent domain, or
             (iii) The new owner operated the land to be designated for as long as 2 years preceding the first year of the agreement and has control of such land for the agreement period.

§ 633.5 Application procedures.
     (a) Application for participation. To apply for enrollment, a person must submit an application for participation in the WBP.
     (b) Preliminary agency actions. The NRCS must certify that the designated acreage that would be placed under an agreement constitutes a viable wetland unit, contains sufficient adjacent land
§ 633.7 Annual payments.

(a) Person on the farm having an interest in the designated acreage, including tenants and sharecroppers, shall be eligible for an annual payment in the manner agreed upon by them as representing their respective contributions to compliance with the agreement. The State Conservationist shall not approve an agreement if it is determined that the proposed division of payment is not fair and equitable.

(b) The annual per acre payment rates for wetlands and for adjacent land shall be determined for each county by the State Conservationist, based on recommendations of the State Technical Committee.

(c) Maximum payments. In order to ensure that limited program funds are expended to maximize program benefits, the State Conservationist, in consultation with the State Technical
§ 633.8 Cost-share payments.

(a) In addition to annual payments, the NRCS may share the cost with program participants of protecting the wetland functions and values of the enrolled land as provided in the conservation plan. The NRCS may pay up to 75 percent of such costs.

(b) Cost-share payments may be made only upon a determination by the NRCS that an eligible practice or an identifiable unit of the practice has been established in compliance with appropriate standards and specifications. Identified practices may be implemented by the program participant or other designee.

(c) A program participant may seek additional cost-share assistance from other public or private organizations as long as the activities funded are in compliance with this part. In no event shall the program participant receive an amount which exceeds 100 percent of the total actual cost of the practices.

§ 633.9 Conservation plan.

(a) The program participant, with assistance from NRCS and in consultation with the Conservation District, shall prepare a conservation plan for the acreage designated under an agreement.

(b) The conservation plan is the basis for the agreement and is incorporated therein. It includes a schedule of conservation treatment and management required to protect and to maintain the wetland and adjacent land as a functional wetland unit for the life of the agreement.

(c) Conservation treatment and management of the vegetation for wetland protection, wildlife habitat, or other authorized objectives are consistent with the program objectives and priorities.

§ 633.10 Modifications.

The NRCS may approve modifications to the agreement or associated conservation plan after consultation with the Conservation District. Any modification must meet WBP program objectives, and must be in compliance with this part.

§ 633.11 Transfer of interest in an agreement.

(a) If the ownership or operation of a farm changes in such a manner that the agreement no longer contains the signatures of the persons required by §633.6(a) to sign the agreement, the agreement shall be modified to reflect the new interested persons and new divisions of payments.

(b) If such persons are not willing to become parties to the modified agreement or for any other reason a modified agreement is not executed, the agreement shall be terminated and all unearned payments shall be forfeited or refunded.

(c) The annual payment for the year in which the change of ownership or operation occurs shall not be considered to have been earned unless the designated acreage is continued in the program and there is compliance with the agreement for the full agreement year.
(d) The signatories to the agreement prior to the change of ownership or operation shall be jointly and severally responsible for refunding the unearned payments previously made.

§ 633.12 Termination of agreements.

(a) The State Conservationist may, by mutual agreement with the parties to the agreement, consent to the termination of the agreement where:

(1) The parties to the agreement are unable to comply with the terms of the agreement as the result of conditions beyond their control;

(2) Compliance with the terms of the agreement would work a severe hardship on the parties to the agreement;

(3) Termination of the agreement would be in the public interest.

(b) If an agreement is terminated in accordance with the provisions of this section, the annual payment for the year in which the agreement is terminated shall not be considered to have been earned unless there is compliance with the terms and conditions of the agreement for the entire calendar year.

§ 633.13 Violations and remedies.

(a) In the event of a violation of an agreement or any associated conservation plan, the parties to the agreement shall be given reasonable notice and an opportunity to voluntarily correct the violation within 30 days of the date of the notice, or such additional time as the State Conservationist may allow.

(b) In addition to any and all legal and equitable remedies as may be available to the NRCS under applicable law, the NRCS may withhold any annual or cost-share payments owing to the parties of the agreement at any time there is a material breach of the agreement or any conservation plan. Such withheld funds may be used to offset costs incurred by the NRCS in any remedial actions or retained as damages pursuant to court order or settlement agreement.

(c) The NRCS shall be entitled to recover any and all administrative and legal costs, including attorney’s fees or expenses, associated with any enforcement or remedial action.

§ 633.14 Debt collection.

Any debts arising under this program are governed with respect to their collection by the Federal Claims Collection Act of 1966 (31 U.S.C. 3701) and the regulations found in 4 CFR chapter II.

§ 633.15 Payments not subject to claims.

(a) Any payments due any person shall be determined and allowed without regard to State land and without regard to any claim or lien against any crop, or proceeds thereof, which may be asserted by any creditor, except as provided in paragraph (b) of this section.

(b) The regulations governing setoffs and withholdings, in part 13 of this title, as amended, shall be applicable to this program.

§ 633.16 Assignments.

Any person entitled to any cash payment under this program may assign the right to receive such cash payments, in whole or in part.

§ 633.17 Appeals.

(a) Any person may obtain reconsideration and review of determinations affecting participation in this program in accordance with part 614 of this chapter.

(b) Before a person may seek judicial review of any action taken under this part, the person must exhaust all administrative appeal procedures set forth in paragraph (a) of this section, and for purposes of judicial review, no decision shall be a final agency action except a decision of the Chief of NRCS under these procedures.

§ 633.18 Scheme and device.

(a) If it is determined by the NRCS that a person has employed a scheme or device to defeat the purposes of this part, any part of any program payment otherwise due or paid such person during the applicable period may be withheld or be required to be refunded with interest thereon, as determined appropriate by the NRCS.

(b) A scheme or device includes, but is not limited to, coercion, fraud, misrepresentation, depriving any other person of an annual payment or payments for cost-share practices for the
purpose of obtaining a payment to which a person would otherwise not be entitled.

(c) A program participant who succeeds to the responsibilities under this part shall report in writing to the NRCS any interest of any kind in enrolled land that is held by a predecessor or any lender. A failure of full disclosure will be considered a scheme or device under this section.

PART 634—RURAL CLEAN WATER PROGRAM

Subpart A—General

Sec.
634.1 Purpose and scope.
634.2 Objective.
634.3 Administration.
634.4 Responsibilities.
634.5 Definitions.

Subpart B—Project Authorization and Funding

634.10 Applicability.
634.11 Availability of funds.
634.12 Eligible project areas.
634.13 Project applications.
634.14 Review and approval of project applications.
634.15 Agreements.
634.16 Suspension of grants.
634.17 Termination of grant agreement.
634.18 Termination of project.
634.19 Project completion and closeout.

Subpart C—Participant RCWP Contracts

634.20 Eligible land.
634.21 Eligible participants.
634.22 Application for assistance.
634.23 Water quality plan.
634.24 Cost sharing.
634.25 Contracting.
634.26 Contract modifications.
634.27 Cost-share payment.
634.28 Appeals not related to contract violations.
634.29 Violations.
634.30 Appeals in USDA administered projects.
634.31 Appeals of contract violations.

Subpart D—Financial Management

634.40 Financial management.

Subpart E—Monitoring and Evaluation

634.50 Program and project monitoring and evaluation.
(a) A National Rural Clean Water Coordinating Committee (NRCWCC), chaired by the Administrator, NRCS, is to assist in carrying out the Rural Clean Water Program.

(b) At the State level, a State Rural Clean Water Coordinating Committee (SRCWCC) is to assist the State Conservationist, NRCS, in administering the program. The State Conservationist will chair the SRCWCC.

(c) To assure coordination at the project level, a local Rural Clean Water Coordinating Committee is to be established at the time the application is developed. An existing local committee may be used, where practicable, to perform the functions of this committee.

(d) The Administrator, NRCS, through the State Conservationists, NRCS, is to enter into agreements, where practicable, with soil conservation districts, State soil and water conservation agencies, or State water quality agencies to administer all or part of the program for a project area. That portion of program administration to be conducted by these agencies will be defined in the project application and grant agreement. Where this is not practicable, USDA will administer the program in a project area. In those instances where USDA retains administration of the program in a project area, NRCS will enter into agreements for the transfer of funds to the Agricultural Stabilization and Conservation Service (ASCS) for the administration of part of the program.

§ 634.4 Responsibilities.

(a) Environmental Protection Agency (EPA) will—

(1) Approve 208 water quality management plans,

(2) Participate in the National and State Rural Clean Water Coordinating Committees,

(3) Review and concur in project applications approved for funding in accordance with §634.14,

(4) Advise the Secretary of Agriculture of practices which tend to defeat the purposes of contracts with rural landowners or operators in accordance with section 208(j)(1)(iv) of the act,

(b) U.S. Department of Agriculture (USDA) will—

(1) With the concurrence of EPA, administer a program to enter into contracts to install and maintain best management practices to control agricultural nonpoint source pollution for improved water quality,

(2) Act through NRCS and such other USDA agencies as the Secretary may designate,

(3) Provide technical assistance and share the cost of carrying out best management practices that are set forth in the contracts,

(4) Where practicable, enter into agreements with soil conservation districts, State soil and water conservation agencies, or State water quality agencies to administer all or part of the program for a project area,

(5) Administer the program where it is not practicable for soil conservation districts, State soil and water conservation agencies, or State water quality agencies to administer all or part of the program for a project area,

(6) Together with local soil conservation districts, determine the priorities for assistance to individual participants to assure that the most critical water quality problems are addressed,

(7) Assist in evaluating the overall effectiveness of the program in improving water quality, and

(8) Within the framework of the 208 planning process, make additional investigations or plans, where necessary, to supplement information contained in the approved agricultural portion of 208 water quality management plans for the purpose of selecting among projects to be funded.

(c) Natural Resources Conservation Service (NRCS) will—

(1) Provide RCWP leadership,

(2) Retain major technical responsibility for RCWP, and provide leadership to assure the adequacy of standards and specifications for use by all administering agencies,
§634.4  7 CFR Ch. VI (1-1-14 Edition)

(3) Manage budgeting, accounting, and reporting.

(4) Chair NRCWCC and assure that RCWP applications are distributed to the NRCWCC, including EPA, for review.

(5) For the Secretary of Agriculture, with the concurrence of the Administrator, EPA, approve RCWP projects for funding.

(6) For the Secretary of Agriculture, select and enter into agreements with either soil conservation districts, State soil and water conservation agencies, or State water quality agencies, where practicable, to administer all or part of the program.

(7) Enter into fund transfer agreements to transfer funds to ASCS in those instances where the administration of contracts is retained by USDA.

(8) Enter into agreements with other USDA agencies, as appropriate, for support which they are to provide.

(9) Chair SRCWCC.

(10) For the Secretary of Agriculture, in coordination with NRCWCC, determine the maximum Federal contribution to the total cost of the project.

(11) Provide technical assistance through soil conservation districts or arrange for other Federal, State, local agencies, or private individuals or firms to provide technical assistance as appropriate.

(12) Provide technical assistance to soil conservation districts and County Agricultural Stabilization and Conservation (ASC) Committees to assist them in determining priorities of assistance among individual participants.

(13) Develop appropriate technical and administrative training programs.

(14) Provide leadership for USDA for comprehensive joint USDA-EPA water quality monitoring, evaluation, and analysis in selected project areas.

(15) Provide leadership for USDA in evaluating the effectiveness of the program in improving water quality.

(16) Carry out the function of soil conservation districts for approving water quality plans where no soil conservation district exists, and

(17) Through the State Conservationist, after considering recommendations of the SRCWCC, reach agreement with the Governor on the recommended administering agency to be included in the project application.

(d) The Agricultural Stabilization and Conservation Service (ASCS) will—

(1) Participate on the National, State, and local coordinating committees.

(2) Provide guidance to State and County ASC Committees and coordinate the Agricultural Conservation Program (ACP) and the Forestry Incentives Program (FIP) with RCWP.

(3) Where the administration of contracts is retained by USDA, enter into agreements with NRCS for the transfer of funds to be allocated to County ASC Committees.

(4) Consolidate reports of the annual cost-share disbursements made by the State ASC Committee, and report these disbursements to NRCS.

(5) Furnish data on land use, crop history, and cost-shared conservation measures.

(6) Review plans and contracts to assure coordination with other farm programs, and

(e) The Forest Service (FS) will—

(1) Retain technical responsibility for forestry.

(2) Provide technical assistance through the State forestry agency (State Forester as appropriate) for planning, applying, and maintaining forestry best management practices, and

(3) Participate on the National, and as appropriate, State, and local coordinating committees.

(f) The Science and Education Administration (SEA) will—

(1) Develop, implement, and coordinate educational programs for agricultural nonpoint source water pollution control.

(2) Participate on the National, and as appropriate, State, and local coordinating committees.

(3) Provide technical assistance for appropriate BMP’s.

(g) The Economics, Statistics, and Cooperatives Service (ESCS) will:

(1) Participate on the National coordinating committee and, as appropriate, participate in State, and local coordinating committee activities.

(2) Assist in the economic evaluation of best management practices and RCWP projects.
(3) Make data available from existing and planned ESCS surveys relating to water quality and related matters.

(4) Assist in RCWP evaluation by making available the ESCS land and water resource economic modeling systems, and

(5) Conduct socioeconomic research, within ESCS authorities and funds, on relevant policy and program issues pertinent to RCWP.

(h) The Farmers Home Administration (FmHA) will—

(1) Participate on the National, and as appropriate, State and local coordinating committees, and

(2) Provide assistance and coordinate their farm loan and grant programs with RCWP.

(i) The NRCWCC is chaired by the Administrator, NRCS. Other members of the National Committee are the Administrators of ASCS, FmHA, and ESCS; the Chief of FS; the Director of SEA; and the Assistant Administrator for Water and Waste Management, EPA. Non-Federal agencies such as conservation districts, State soil and water conservation agencies, State water quality agencies, and other organizations are invited to attend as observers. The duties of the Committee are to:

(1) Coordinate individual agency programs with the Rural Clean Water Program.

(2) Recommend to the Administrator, NRCS, the project applications to be funded.

(3) Advise the Administrator, NRCS, on the maximum Federal contribution to the total cost of the project,

(4) Assist the Administrator, NRCS, in mediating agency differences at the State level,

(5) Periodically advise the Secretary and Assistant Secretary for Conservation, Research and Education of program and policy issues, and

(6) Recommend project areas and criteria for comprehensive, joint USDA/EPA water quality monitoring, evaluation, and analyses.

(j) The SRCWCC is chaired by the State Conservationist, NRCS. Other members of the State committee are the State 208 water quality agency, a designated representative of soil and water conservation districts, other State and local agencies or individuals as the Governor deems appropriate, and representatives of the agency members of the NRCWCC. The duties of the committee are to insure that a process exists:

(1) To consult with the Governor or his designee on the Governor’s determination of priority project areas,

(2) To assure coordination of activities at the project level by assisting in determining the composition and responsibilities of the local rural clean water coordinating committee,

(3) To prepare the RCWP applications for the Governor to submit to the State Conservationist, NRCS, based on priorities established by the Governor,

(4) To incorporate adequate public participation, including public meeting(s), and appropriate environmental assessment in the preparation of RCWP applications,

(5) To monitor and evaluate the RCWP in the State and to assist USDA and EPA in their comprehensive, joint water quality monitoring and evaluation of selected project areas in accordance with §634.50,

(6) To develop procedures for coordination between conservation districts and county ASC committees and between RCWP and other water quality programs at the local level,

(7) To assist the State Conservationist, NRCS, in mediating agency differences at the local level,

(8) To initiate a written agreement setting forth any or all of the above activities when the Governor and the Secretary of Agriculture or his designee deem it appropriate, and

(9) To make recommendations to the State Conservationist, NRCS, concerning the selection of the administering agency to be included in the project application.

(k) The State soil and water conservation agency will, as appropriate:

(1) Assist in preparing and submitting applications for RCWP,

(2) Administer all or part of the RCWP for a project area,

(3) Carry out the responsibilities of soil conservation districts for determining priority for assistance among
individual participants where no soil conservation district exists, and
(4) Participate on the State and local coordinating committees.

(1) The State 208 water quality agency will, as appropriate:
   (1) Assist in preparing and submitting applications for rural clean water projects,
   (2) Administer all or part of the RCWP for a project area,
   (3) Participate on the State and local coordinating committees, and
   (4) Assist in monitoring and evaluating the water quality effectiveness of projects.

(m) The soil conservation district will:
   (1) As appropriate, assist in the preparation and submission of applications for rural clean water projects,
   (2) As appropriate, administer all or part of the RCWP in a project area.
   (3) As appropriate, participate on the local coordinating committees,
   (4) Approve participants’ water quality plans, and
   (5) Together with the county ASC Committee, determine the priority for assistance among individual participants to assure that the most critical water quality problems are addressed.

(n) The county ASC committee will:
   (1) Together with the soil conservation district, determine the priority for assistance among individual participants to assure that the most critical water quality problems are addressed,
   (2) Receive applications for assistance for individual participants where USDA retains administration of the program,
   (3) Make cost-share payments to individual participants where USDA retains administration of the program, and
   (4) As appropriate, participate on the local coordinating committees.

(o) The designated management agency(s) for the agricultural portion of a 208 plan for the project area will:
   (1) Assist in preparing and submitting an application for a rural clean water project in an area for which they were designated,
   (2) Submit a letter, as part of the project application, certifying that the BMP’s proposed for cost sharing are consistent with the BMP’s in the approved 208 plan,
   (3) Submit a letter, including a schedule, giving assurance that an adequate level of participation in the project will be achieved within 5 years, and
   (4) As appropriate, serve as the administering agency.

(p) The administering agency will:
   (1) As appropriate, enter into a grant agreement or fund transfer agreement with the Natural Resources Conservation Service for:
      (i) Receiving funds from the Natural Resources Conservation Service for administrative costs, cost sharing, and technical assistance, as appropriate, associated with carrying out the project,
      (ii) Establishing detailed work schedules in accordance with the approved project application,
      (iii) Establishing the maximum amount of administrative costs chargeable to the grant,
      (iv) Establishing an adequate financial management system,
      (v) Preparing a cost allocation plan,
      (vi) Monitoring and reporting performance,
      (vii) Reviewing applications for assistance from landowners or operators,
      (viii) Certifying availability of funds, and
      (ix) Complying with OMB Circular A-102 and other appropriate regulations.
   (2) Enter into contracts with participants for the installation and maintenance of BMP’s based on water quality plans developed by participants,
   (3) Make cost-share payments to participants upon receipt of certification by NRCS,
   (4) Issue modifications to participant RCWP contracts.
   (5) Develop average cost rates for each practice applicable in the project area.
   (6) Sample and inspect materials used in the installation of BMP’s,
   (7) Establish a contract violations and appeals and collections process,
   (8) Provide for public involvement in the implementation of RCWP in a project area, and maintain a mailing list of interested individuals and organizations for informing the public.
about the activities contemplated and carried out in the project area, and
(9) Maintain records, provide necessary facilities, personnel, and legal
counsel for carrying out these responsibilities.

(q) The Governor of each State will:
(1) In order to qualify for assistance under RCWP:
(i) Establish priorities for RCWP project areas in the State,
(ii) Coordinate the development of RCWP project applications with the
SRWC and local agencies,
(iii) Submit, in order of priority, RCWP project applications to the Ad-
ministrator, NRCS, through the State Conservationist, NRCS, and
(iv) Recommend an eligible State or local agency to serve as the admin-
istering agency of the project, or re-
quest USDA to be the administering
agency.

(2) Where appropriate, with the State
Conservationist, NRCS, set forth the
activities of the SRCW CC in a written
agreement,

(3) Assign additional State and local
agencies or individuals to membership
on the SRCW CC, as appropriate, and

(4) Reach agreement with the State
Conservationist, NRCS, in selecting
the administering agency.

§ 634.5 Definitions.

(a) Adequate level of participation. An
adequate level of participation is
reached when participants, having con-
trol of 75 percent of the identified crit-
ical area or source of the pollution
problem in the project area, are under
contract. Exceptions may be made
where the approved agricultural por-
tion of the 208 plan provides data and
analyses which indicate that a greater
or lesser percentage of the critical area
or source treated is needed to attain
water quality standards or water qual-
ity goals. Fifty (50) percent of the ade-
quate level of participation is to be
achieved within 3 years; the remainder
within 5 years.

(b) Administering agency. A soil con-
servation district, State soil and water
conservation agency, or State water
quality agency that enters into an
agreement with the State Conserva-
tionist, NRCS, to administer assigned
responsibilities for RCWP projects; or

ASCS, when USDA retains contract ad-
ministration.

(c) Administrative cost. Grant and fund
transfer costs, including allowable
costs incurred by the Administering
agency in contract administration.
These costs, indirect and direct, in-
clude charges for personnel, travel, ma-
terials, and supplies. The costs are lim-
ited to a maximum of 5 percent of the
Federal share for BMP cost.

(d) Agreement. A legal instrument re-
flecting the relationship between NRCS
and the administering agency for per-
formance of RCWP activities.

(e) Agricultural nonpoint source pollu-
tion. Pollution originating from exist-
ing nonpoint sources that are (a) agri-
culturally related, including runoff
from animal waste disposal areas and
from land used for livestock and crop
production, or (b) silviculturally re-
lated pollution.

(f) Agricultural portion of a 208 plan.
That portion of the 208 plan that deals
with agriculture and those silvicul-
tural activities related to farming and
ranching enterprises.

(g) Appeals board. A group of three or
more individuals, including a hearing
officer, established by the admin-
istering agency with the concurrence
of the State conservationist, NRCS, to
review asserted contract violations,
hear associated appeals, and report its
findings, conclusions, decisions, and
recommendations in State or locally
administered projects.

(h) Average cost. The calculated cost,
determined by recent actual local costs
and current cost estimates, considered
necessary for carrying out BMP’s or an
identifiable unit thereof.

(i) Best Management Practice (BMP). A
single practice or a system of practices
included in the approved RCWP appli-
cation that reduces or prevents agri-
cultural nonpoint source pollution to
improve water quality.

(j) BMP cost. The amount of money
actually paid or obligated to be paid by
the participant for equipment use, ma-
terials, and services for carrying out
BMP’s or an identifiable unit of a BMP.
If the participant uses his or her own
resources, the cost includes the com-
puted value of his or her own labor,
equipment use, and materials.
§ 634.10 7 CFR Ch. VI (1-1-14 Edition)

(k) Contract. The legal document, that includes the water-quality plan and is executed by the participant and the administering agency. It details the agreement between parties for carrying out BMP’s on the participant’s land.

(l) Cost-share level. The percentage of the total cost of installing BMP’s included in the participant’s contract that is paid by the administering agency.

(m) Critical areas or sources. Those finite areas or sources of agricultural nonpoint source pollutants identified as having the most significant impact on the quality of the receiving waters.

(n) Federal Management Circular FMC 74-4. ‘‘Cost Principles Applicable to Grants and Contracts with State and Local Governments.’’

(o) Financial burden. The participant’s contribution to the total cost of BMP’s that would be inequitable or probably prevent participation in RCWP.

(p) Identifiable unit. A component of a BMP that can be clearly identified in carrying out BMP’s in the water quality plan.

(q) Letter of Credit—Treasury Regional Disbursing Officer System. The system whereby the letters of credit are maintained and serviced by Treasury disbursing centers and Treasury regional disbursing officers.

(r) Management agency. The Federal, State, interstate, regional, or local agency designated by the Governor to carry out the approved agricultural portion of the 208 water-quality management plan.

(s) OMB Circular A-34. ‘‘Instructions on Budget Execution.’’

(t) OMB Circular A-102 (Rev.) Office of Management and Budget Uniform Administrative Requirements for Grants-in-Aid to State and local governments.

(u) Offsite benefits. Those favorable effects of BMP’s that occur away from the land of the participant receiving RCWP assistance and accrue to the public as a result of improved water quality.

(v) Participant. A landowner or operator who applies for and receives assistance under RCWP.

(w) Participants water quality plan. The plan which identifies critical agricultural nonpoint source(s) of water quality problems and sets forth BMP’s which contribute to meeting the water quality objectives of the project.

(x) Privately owned rural land. Those lands not held by Federal, State, or local governments which include cropland, pastureland, forest land, range land, and other associated lands.

(y) RCWP projects. The total system of BMP’s, institutional arrangements, and technical, cost-sharing, and administrative assistance activities that are authorized in a RCWP project area.

(2) Standards and specifications. Requirements that establish the minimum acceptable quality level for planning, designing, installing, and maintaining BMP’s.

(aa) State. Any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Marianas, and the Trust Territory of the Pacific Islands.

(bb) Technical assistance cost. Those direct and indirect costs associated with the preparation and review of participant water quality plans; design, layout and application of BMP’s; and investigations associated with monitoring and evaluating progress toward meeting project objectives.

(cc) Treasury Circular 1075 (Rev.). Uniform Administrative Requirements for Grants-in-Aid to State and local governments.

Subpart B—Project Authorization and Funding

§ 634.10 Applicability.
RCWP is applicable in project areas that meet the criteria for eligibility contained in §634.12 and are authorized for funding by the Administrator, NRCS.

§ 634.11 Availability of funds.

(a) The provisions of the program are subject to the appropriation of funds by Congress to the U.S. Department of Agriculture.

(b) The allocation of funds to the administering agencies is to be made on the basis of the total funds needed to carry out the project.

(c) The obligation of Federal funds for RCWP contracts with participants
§ 634.12 Eligible project areas.

(a) Only those project areas which are included in an approved agricultural portion of a 208 water quality management plan, or revised portions thereof, and have identified agricultural nonpoint source water quality problems are eligible for authorization under RCWP. Those critical areas or sources of pollutants significantly contributing to the water quality problems are eligible for financial and technical assistance.

(b) The management agency designated by the Governor under section 208(c)(1) of the Act to implement the agricultural portion of the 208 plan must assure in writing in the project application that there will be an adequate level of participation by land owners or operators with critical areas or sources in a project area.

(c) An RCWP project area is a hydrologically related land area. Exceptions may be made for ease of administration, or to focus on concentrated critical areas. To be designated as an RCWP project area eligible for authorization, the area’s water quality problems must be related to agricultural nonpoint source pollutants, including sediment animal waste, irrigation return flows, runoff, or leachate that contain high concentrations of nitrogen, phosphorus, dissolved solids, toxics (pesticides and heavy metals), or high pathogen levels. Generally, the project areas will be less than 200,000 acres.

§ 634.13 Project applications.

(a) The SRCWCC is to assure that a process exists to prepare the RCWP project applications for submission by the Governor in order of priority to the Administrator, NRCS, through the State Conservationist, NRCS. This process must include the opportunity for public participation, especially participation by potential RCWP participants. Applications will be submitted in conformance with OMB Circular A-95.

(b) The preparation and submission of applications are to be based on the priorities established by the Governor and data and information in the approved agricultural portion of the State or areawide 208 water quality management plan.

(c) Applications shall contain the following components. Additional material may be added when, in the judgment of the applicant, it is needed to fully support the application and/or would enhance the probability of project authorization. Information provided under each component shall be in sufficient detail to permit the NRCWCC to evaluate the application using priority criteria in §634.14.

(1) Description of the project area,

(2) Severity of the water quality problem,

(3) Objectives and planned action,

(4) Schedule for carrying out the plan, and

(5) Estimated cost. This component is to identify and show the basis for those costs associated with completing the project. The project application shall include an estimate of the total cost of the project, the Federal contribution, and the non-Federal contribution. The Federal contribution shall not exceed 50 percent unless the application, based on offsite benefits and financial burden, show that a higher level is appropriate.

(6) Estimated water quality benefits and effects.

(7) Arrangements for project administration. This component is to set out the applicant’s plan for carrying out the program in the project area. The plan should:

(i) Identify the administering agency and document the capability of the agency to carry out the responsibilities described in §634.4(p). In addition, information should be included to describe the administering agency staff, the location of that staff relative to the project area, and the experience of the agency in administering comparable grant programs.

(ii) Where appropriate, describe the specific arrangements that have been made, or that are anticipated, for local, State, and Federal agency participation such as technical assistance and other cost-sharing programs.

(8) Attachments. The following attachments are the minimum required with each application:
§ 634.14 Review and approval of project applications.

(a) In reviewing applications and recommending priorities, the NRCWCC will consider the following:

(i) Severity of the water quality problem caused by agricultural and silvicultural related pollutants, including:

(A) State designated uses of the water affected,

(B) Kinds, sources, and effects of pollutants, and

(C) Miles of stream or acres of water bodies affected,

(ii) Demonstration of public benefits from the project, including:

(A) Effects on human health,

(B) Population benefited by improved water quality,

(C) Effects on the natural environment, and

(D) Additional beneficial uses of the waters that result from improvement of the water quality,

(iii) Economic, and technical feasibility to control water quality problems within the life of the project, including:

(A) Cost effectiveness of BMP’s,

(B) Size of the area and BMP’s need-ed, and

(C) Cost per participant and cost per acre for solution of problem,

(iv) State and local input in the project area, including:

(A) Funds for cost-sharing, technical, and administrative costs. States or local governments with their own cost-share programs may receive greater consideration for the funding of RCWP projects,

(b) Based on the project applications, the NRCWCC is to recommend an upper limit of the Federal contribution to the total cost of the project.

(c) All project applications will be reviewed by EPA. Project applications approval for funding require written EPA concurrence, except that the Administrator, NRCS, may assume EPA’s concurrence if EPA does not act within 45 days following receipt of the project application. EPA review of project applications will occur concurrently with review by the NRCWCC.

(d) The Administrator, NRCS, will approve projects for funding. The NRCWCC acting through the Chairman will announce the approval of the project. The State Conservationist, NRCS, through the SRCWCC, will also inform the other involved Federal, State, and local agencies of the approval.

§ 634.15 Agreements.

The State Conservationist, NRCS, upon receiving notice of an approved project, is to enter into a grant agreement with the administering agency, except in those cases where USDA is to administer the program. When USDA retains administration, the State Conservationist, NRCS, is to enter into a fund transfer agreement with the State Executive Director, ASCS.

(a) Grant agreements. Grant agreements detail the working arrangements and applicable operating regulations between NRCS and the administering agency. A written grant agreement identifying the parties involved, their responsibilities for carrying out the program, and the amount of program funds to be encumbered by NRCS is to be executed by the parties. This agreement is the fund obligating document. It also sets out the necessary working arrangements between parties for determining and allocating the administering agency’s costs. All grants to administering agencies are to be in
Natural Resources Conservation Service, USDA  § 634.16

accordance with OMB Circular No. A-102, Department of the Treasury Circular No. 1075, and Federal Management Circular No. 74-4. State or local administering agency grants will be funded under Letter-of-Credit serviced by the U.S. Treasury Regional Disbursing Office, or by NRCS approved advance/reimbursement financing arrangements subject to the terms and conditions of the grant agreement.

1. The grant agreement will provide for payment of cost-sharing for BMP (§ 634.5(j)) and administrative costs (§ 634.5(c)).

2. The grant agreement may provide for payment of technical assistance costs when the administering agency has the capability, and the NRCS designates that agency to provide this assistance to RCWP participants.

3. The administering agency is to monitor the performance of activities supported by RCWP grant funds to ensure that time schedules and participant RCWP contract requirements are being met. Performance goals are to be measured against the terms of the grant agreement and program directives. When NRCS determines that on-site technical inspections, certified completion data, and financial status reports do not provide adequate grant evaluation data, the following information may be requested:

(i) A comparison of actual accomplishments with the objectives established for the plan,
(ii) Reasons why established objectives were not met, and
(iii) Objectives established for the next reporting period.

4. Grant agreements may be amended by mutual agreement of the parties to the agreement. NRCS may unilaterally amend agreements when the sole consideration is a change in the cost and the Administrator, NRCS, based on NRCWCC recommendations, determines that such an adjustment is necessary to carry out the program efficiently and effectively.

(b) Fund transfer agreements. When it is impractical for NRCS to enter into agreements with local soil conservation districts, State soil and water conservation agencies, or State water quality agencies to administer the program in a project area, USDA will retain program administration. In this case, the State Executive Director, ASCS, and the State Conservationist, NRCS, are to enter into an agreement for the transfer of funds to ASCS through county ASC committees for activities included in administrative cost (§ 634.5(c)) and BMP cost (§ 634.5(j)).

The following general working arrangements are to apply:

1. Administering contracts, making cost-share payment, and program reporting are to be provided by ASCS as the administering agency.

2. NRCS, or its designee, with appropriate Federal or State agency support, will provide technical assistance to participants in preparing RCWP contracts and in carrying out their water-quality plans.

(c) Agreements for services. NRCS may enter into an agreement for services with a State or local agency. The designee must meet the requirements of OMB Circular No. A-102.

(d) Contracts for services. NRCS may enter into contracts for services with individuals or firms for providing technical assistance.

§ 634.16 Suspension of grants.

(a) Suspension orders. Work on a project or on a portion or phase of a project for which a grant has been awarded, may be suspended by order of the State Conservationist, NRCS. Suspension does not affect RCWP contracts existing at the time the suspension order is issued, or the administering agency’s responsibility to make payments under such contracts unless specifically provided for in the suspend order. In no event will the participant’s right to cost-share payment be diminished by action taken under this section.

(b) Use of suspension orders. Suspension may be required for good cause, such as default by the administering agency, failure to comply with the terms and conditions of the grant, realignment of programs, or advancements in the state of the art.

(c) Contents of suspension orders. Prior to issuance, suspension orders will be discussed with the administering agency and may be appropriately modified, in the light of such discussions. Suspension orders are to include:

VerDate Mar 15 2010 01:21 Mar 20, 2014 Jkt 232017 PO 00000 Frm 00557 Fmt 8010 Sfmt 8010 C:\SGML_OUT\232017.XXX 232017srobinson on DSKB307YQ1PROD with CFR
§ 634.17

(1) A clear description of the work to be suspended,

(2) Instructions as to the issuance of further orders by the administering agency for materials or services,

(3) Instructions as to the administering agency entering into new RCWP contracts in the project area,

(4) Instructions as to the administering agency servicing existing RCWP contracts in the project area, and

(5) Other instructions to the administering agency for minimizing Federal costs.

(d) Issuance of suspension order. Suspension orders are issued by the State Conservationist, NRCS, by letter to the administering agency (certified mail, return receipt requested). A suspension order may not exceed forty-five (45) calendar days.

(e) Effect of suspension order. (1) Upon receipt of a suspension order, the administering agency shall promptly comply with its terms and take all reasonable steps to minimize costs allocable to the work covered by the order during the period of work suspension. During the suspension period, NRCS shall either:

(i) Cancel the suspension order, in full or in part, and authorize resumption of work, or

(ii) Take action to terminate the work covered by such order as provided by §634.17.

(2) If a suspension order is canceled, or the period of the order expires, the administering agency shall promptly resume the suspended work. An equitable adjustment shall be made in the grant period, the project period, or grant amount, or all of these, and the grant agreement may be amended:

(i) The suspension order results in an increase in the time, or cost properly allocable to, the performance of any part of the project; and

(ii) The administering agency asserts a written claim for such adjustment within thirty (30) days after the end of the period of work suspension. If no written claim is made, NRCS may unilaterally make such adjustments.

(iii) Reasonable costs resulting from the suspension order shall be allowed in arriving at any terminations settlement.

(3) Costs incurred by the administering agency after a suspension order is delivered that are not authorized by this section or specifically authorized in writing by the State Conservationist, NRCS, shall not be allowable costs.

§ 634.17 Termination of grant agreement.

(a) Termination agreement or notice. (1) The State Conservationist, NRCS, may, based on evidence of failure to comply with the terms of the grant agreement, issue a notice of intent to terminate the grant agreement. The notice of intent to terminate has the force and effect of extending or modifying the conditions of the suspend order. Any modification of the conditions of the suspend order shall be shown in the notice and discussed with the administering agency. The State Conservationist shall give not less than ten (10) days written notice to the administering agency (certified mail, return receipt requested) of intent to terminate the grant in whole or in part.

(2) After the administering agency has been afforded an opportunity for consultation, the State Conservationist, NRCS, may request authorization from the Administrator, NRCS, to terminate the grant in whole or in part. If the Administrator, NRCS, concurs in the termination action, the proposed termination notice will be forwarded to the Administrator, EPA, for concurrence.

(3) After the Administrators, NRCS and EPA, have been informed of any expressed views of the administering agency and concurred in the proposed termination, the State Conservationist, NRCS, may, in writing (certified mail, return receipt requested), terminate the grant in whole or in part.

(4) Termination of all or part of the grant agreement may be carried out by either execution of a termination agreement by the State Conservationist, NRCS, or issuance of a grant termination notice by the State Conservationist, NRCS. The agreement or notice shall establish the effective date of termination of the grant, the basis for settlement of grant termination
Natural Resources Conservation Service, USDA § 634.18

§ 634.18 Termination of project.

(a) An RCWP project is terminated by the State Conservationist because an adequate level of participation cannot be achieved. Upon this determination, the State Conservationist shall publish in a newspaper of public record in the project area a notice of intent to terminate all or part of the grant agreement and the project (§ 634.7(c)), and an announcement of the time and place of a public hearing.

(b) No sooner than 15 days from the publication of the notice of intent to terminate all or part of the project and grant agreement, the State Conservationist will conduct a public hearing in the project area.

(c) If, based on the hearing record, the performance record of the administering agency, and the recommendations of the SRCWCC, the State Conservationist determines that the project will be terminated pursuant to §634.17(c), the State Conservationist will enter into a grant termination agreement or issue a grant termination notice.

(d) The existing RCWP contracts will be transferred to the ASCS county office pursuant to §634.17(c)(1)(ii).

(e) The State Conservationist will prepare a project close-out report summarizing the actions accomplished.
§ 634.19 Project completion and closeout.

(a) The maximum total life of a project shall be fifteen (15) years or less.

(b) The allowable contracting period may be increased if an adequate level of participation has been achieved and the designated management agency assures a significant increase in participation can be reached in a reasonable time.

(c) The grant or fund transfer agreement with an administering agency shall expire when the administering agency has fulfilled all of its obligations in the long-term RCWP contracts.

(d) When a project is completed, the administering agency is to provide the State Conservationist, NRCS, a closeout report which summarizes the actions accomplished.

Subpart C—Participant RCWP Contracts

§ 634.20 Eligible land.

RCWP is only applicable to privately owned land. Land owned by corporations whose ownership is public (i.e., their stock is publicly traded over the market) is eligible for program assistance only if the corporation can document that the installation of BMP’s places an inappropriate financial burden on the corporation.

§ 634.21 Eligible participants.

(a) Any landowner or operator whose land or activities in a project area is contributing to the area’s agricultural nonpoint source water quality problems and who has an approved water quality plan is eligible to enter into an RCWP contract.

(b) This program will be conducted in compliance with all nondiscrimination requirements as contained in the Civil Rights Act of 1964 and amendments thereto and the Regulations of the Secretary of Agriculture (7 CFR 15.1 through 15.12).

§ 634.22 Application for assistance.

(a) Landowners or operators must apply for RCWP assistance through the office of the administering agency or its designee(s) by completing the prescribed application form.

(b) The priority for assistance among landowners and operators in developing water quality plans is to be determined jointly, through an agreed-to process, by the county ASC committee and the soil conservation district, with technical assistance from NRCS.

(c) Applications that are ineligible or technically infeasible are to be returned to the applicant with a letter stating the reasons for disapproval. Applications that are of a low priority will be retained and the applicant will be sent a notice that the application is being held for a period to be determined locally for future consideration.

§ 634.23 Water quality plan.

(a) The participant’s water quality plan, developed with technical assistance by the NRCS or its designee, is to include appropriate BMP’s identified in the approved agricultural portion of the 208 water quality management plan. Such BMP’s must reduce the amount of pollutants that enter a stream or lake by:

1. Methods, such as reducing the application rates or changing the application methods of potential pollutants, and

2. Methods, such as practices or combinations of practices which prevent potential pollutants from leaving source areas or reduce the amount of potential pollutants that reach a stream or lake after leaving a source area.

(b) Participant’s water quality plans shall as a minimum include BMP’s for all critical areas or sources. The plans will include BMP’s which are required but not cost-shared. Non-cost-shared BMP’s, essential for the performance and maintenance of cost-shared BMP’s shall be required as a condition of the RCWP contract.

(c) The participant is responsible for compliance with all other applicable Federal, State, and local laws that deal with the participant’s nonpoint source water quality problems, such as the treatment, storage, and disposal of hazardous waste. BMP’s required for compliance may be cost shared.

(d) It is recognized that the participants’ water-quality plans upon which
the RCWP contracts are to be based may include conservation measures other than those related to water quality improvement. These measures are not eligible for cost sharing under this program. The installation of such conservation measures will not be required as a condition of the RCWP contract and will not be shown in the time schedules for implementing BMP’s.

(e) Time schedules for implementing BMP’s are to be provided in the participant’s water quality plan. The time schedule is to establish the length of the contract within the 5 to 10 year period established by law.

(f) The Natural Resources Conservation Service will certify as to the technical adequacy of the water-quality plan.

(g) The soil conservation districts are to review and approve all water-quality plans and modifications.

§ 634.24 Cost sharing.

(a) The portion of BMP cost (including labor) to be cost shared shall be that part which the Secretary determines is necessary and appropriate. The value of land upon which BMP’s are applied, or the participant’s water rights, cannot be considered a part of the participant’s share of the cost.

(b) The administering agency, in consultation with the county ASC committee(s), soil conservation district(s), and designated management agency will annually set maximum individual BMP cost-share levels for the project area. However, the Federal share of the cost of the contract cannot exceed 50 percent unless a variance has been granted.

(c) Recommended variances exceeding the 50 percent level must be in the public interest and based on the following criteria:

1. The main benefits to be derived from measures are related to improving offsite water quality, and
2. The matching share requirements would place a burden on the landowner or operator which would probably prevent him or her from participating in the program.

(d) BMP’s to be cost shared must have a positive effect on water quality by reducing the amount of agricultural nonpoint source pollutants that enter a stream or lake.

(e) Cost sharing is not to be made available for:

1. Measures installed primarily for bringing additional land into crop production, including but not limited to land clearing and brush removal;
2. Measures installed primarily for increasing production on existing cropland, including but not limited to bedding, field ditches, open drains, and tile drains;
3. Measures having flood protection as the primary purpose, including but not limited to open channels, clearing and snagging, and obstruction removal;

(f) The Federal cost-share level is not to be reduced by the contribution of a State or subdivision thereof. Total payments from Federal, State, and local sources for a BMP may not exceed the total cost of that BMP.

§ 634.25 Contracting.

(a) To participate in RCWP, a landowner or operator must enter into a contract in which he or she agrees to apply his or her water-quality plan. Any person who controls, or shares control, of the farm, ranch, or other land for the proposed contract period (5 to 10 years) must sign the contract.

(b) Cost-sharing payments cannot be provided for any measure that is initiated before the contract is approved by the administering agency.

(c) The participant must furnish satisfactory evidence of his or her control of the farm, ranch, or other land. The administering agency is to determine the acceptability of the evidence and maintain current ownership evidence in the contract file.

(d) RCWP contracts shall include the basic contract document, special provisions as needed, the participant’s water-quality plan, schedule of operations, and any other data necessary.

(e) NRCS or its designee shall approve the technical adequacy of the RCWP contract and obtain the required signature of the participants. The NRCS or its designee will provide the contract to the administering agency for certification of fund availability and for execution.
(f) Participants shall install best management practices according to the specifications that are applicable at the time measures are installed.

(g) NRCS will provide technical assistance to participants for installing BMPs. The State Conservationist, NRCS, or its designee may enter into contracts with qualified soil conservation districts or others to provide technical assistance.

(h) The RCWP contract is to require BMPs to be operated and maintained by the participant at no cost to that administering agency.

(i) The contract period is to be not less than 5 and not more than 10 years. A contract is to extend for at least 1 year after the application of the last cost-shared BMPs. All contract items are to be accomplished prior to contract expiration.

(j) A land owner or operator may enter into a contract jointly (pooling agreement) with other land owners or operators to solve mutual water quality problems. Each participant must enter into an RCWP contract to treat water quality problems not covered by the joint arrangement.

(k) Participants may use all available sources of assistance to accomplish their water-quality objectives. They are responsible for:

(1) Accomplishing the water-quality plan;

(2) Keeping the administering agency informed of their current mailing address;

(3) Obtaining, having in hand, and maintaining any required permits and land rights necessary to perform the planned work;

(4) Applying or arranging for the application of BMPs, as scheduled in the plan, according to approved standards and specifications;

(5) The operation and maintenance of BMPs installed during the contract period; and

(6) Obtaining the authorities, rights, easements, or other approvals necessary to maintain BMPs in keeping with applicable laws and regulations.

(l) Unless otherwise approved by the Administrator, NRCS, and Administrator, EPA, the administering agency shall not enter into any new RCWP contracts after five (5) years of elapsed time from the date when RCWP funds are first made available to begin the project.

(m) Contracts may be terminated due to hardship by mutual agreement if the administering agency and the State Conservationist, NRCS, determine that such action would be in the public interest.

§ 634.26 Contract modifications.

(a) The administering agency may modify contracts previously entered into if it is determined to be desirable to carry out the purposes of the program, facilitate the practical administration thereof, or to accomplish equitable treatment with respect to other conservation, land-use, or water-quality programs.

(b) Requirements of active contracts may be waived or modified by the administering agency only if such waiver or modification is specifically provided for in these regulations. NRCS concurrence in modifications is necessary when modifications involve a technical aspect of the participant’s water-quality plan. A contract may be modified only if it is determined that such modifications are desirable to carry out purposes of the program or to facilitate the program’s practical administration.

(c) Contracts may be modified to add, delete, substitute, or reinstall best management practices when:

(1) The installed measure failed to achieve the desired results through no fault of the participant;

(2) The installed measure deteriorated because of conditions beyond the control of the participant, or

(3) Another BMP is substituted that will achieve the desired results.

(d) Contract modifications are not required when items of work are accomplished prior to scheduled completion or within 1 year following the year of scheduled completion.

(e) If, during the contract period, all or part of the right and interest in the land is transferred by sale or other transfer action, the contract is terminated on the land unit that was transferred and the participant having control over such land:
(1) Forfeits all right to any future cost-share payments on the transferred land unit, and
(2) Must refund with interest all cost-share payments that have been made on the transferred land unit unless the new land owner or operator becomes a party to the contract, except that where it is determined by the administering agency, with the approval of the State conservationist, NRCS, that the established BMPs will provide water quality benefits for the design life of the BMP, the payment may be retained.

(f) If the new land owner or operator becomes a party to the contract:
(1) Payment which has been earned, but not made to the participant who applied the BMPs and had control prior to the transfer, can be made,
(2) Such land owner or operator is to assume all obligations of the previous participant on the transferred land unit,
(3) The contract with the new participant is to remain in effect with the original terms and conditions, and
(4) The contract is to be modified in writing to show the changes caused by the transfer. If the modification is not acceptable to the administering agency, the provisions of paragraphs (e) (1) and (2) of this section apply.

(g) The transfer of all or part of a land unit by a participant does not affect the rights and obligations of other participants who have signed the contract.

§ 634.27 Cost-share payment.

(a) General. Participants are to obtain or contract for materials or services as needed to install BMPs. Federal Cost-share payments are to be made by the administering agency upon certification by the District Conservationist, NRCS, or its designee, that the BMPs, or an identifiable unit thereof, have been properly carried out and meet the appropriate standards and specifications.

(b) Payment maximum. The maximum total Federal cost-share payment to a participant shall be limited to $50,000. Exceptions to this limit may be made by the administering agency with concurrence of the Administrator, NRCS, upon recommendation of the NRCWCC, where it determines that the main benefits to be derived are essential for meeting the water quality objectives in the project area.

(c) Basis for cost-share payment. (1) Cost-share payments are to be made by the administering agency at the cost-share percentage and by one of the following methods designated by the administering agency and set out in the contract:
   (i) Average cost,
   (ii) Actual cost not to exceed average cost.
   (2) If the average cost at the time of starting the installation of a BMP or identifiable unit is less than the costs specified in the contract, payment is to be at the lower rate. If the costs at the start of installation are higher, payment may be made at the higher rate. A modification will be necessary if the higher cost results in a significant increase in the total cost-share obligation. Cost-share payment is not to be made until the modification reflecting the increase is approved.

(d) Average cost development. Average costs are to be developed by the administering agency for each project using cost data from the local area. These costs should be reviewed by the SRCWCC for consistency with average costs in other USDA programs. The average cost list is to be updated annually by the administering agency.

(e) Application for payment. Cost-share payments can be made by the administering agency after a participant has carried out a BMP or an identifiable unit of a BMP. Application for payment must be submitted to the administering agency, be certified by the NRCS or its designee, and be supported by such cost receipts as are required by the administering agency. It is the participant’s responsibility to apply for payments.

(f) Authorizations for payments to suppliers. (1) The contract may authorize that part or all of the Federal cost share for a BMP or an identifiable unit be made directly to suppliers of materials or services. The materials or services must be delivered or performed before payment is made.
   (2) Federal cost shares will not be in excess of the cost share attributable to the material or service used or not in
excess of the cost share for all identifiable units as may be requested by the participant.

(g) *Material inspection and analysis.* When authorizations for payments to suppliers are specified, the administering agency, its representatives, or the Government reserve the right to inspect, sample, and analyze materials or services prior to their use.

(h) *Assignments, set-offs, and claims.* (1) A State or local administering agency may allow the assignment of payments to the extent provided by State law. When ASCS is designated as the administering agency, assignments by any participant who may be entitled to cost-share payment under the program are prohibited unless they are made in accordance with the provisions of section 203, Title 31, U.S.C., as amended, and section 15, Title 41, U.S.C., as amended.

(2) If any participant to whom compensation is payable under RCWP is indebted to the United States and such indebtedness is listed on the county register of indebtedness maintained by the County ASC committee, the compensation due the participant must be used (set-off) to reduce that indebtedness. Indebtedness to USDA is to be given first consideration. Deductions for setoffs involving a nonresident alien shall be made as provided by 26 U.S.C. 871. Setoffs made pursuant to this section are not to deprive the participant of any right to contest the justness of the indebtedness involved, either by administrative appeal or by legal action.

(3) Any cost-share payment due any participant shall be allowed without deduction of claims for advances except as provided for above and without regard to any claim or lien against any crop, or proceeds thereof, in favor of the participant or any other creditor.

(i) *Access to land unit and records.* Any authorized administering agency, or NRCS employees or agents, shall have the right of access at reasonable times to land under application or contract, and the right to examine any program records to ascertain the accuracy of any representations made in the application or contract. This is limited to the right to furnish technical assistance and to inspect work performed under the contract.

(j) *Suspension of payments.* No cost-share payments will be made pending a decision on whether or not a contract violation has occurred.

(k) *Ineligible payments.* The filing of requests for payment for BMP’s not carried out, or for BMP’s carried out in such a manner that they do not meet contract specifications, constitutes a violation of the contract.

§ 634.28 Appeals not related to contract violations.

(a) The participant may, prior to execution of the contract, request that the administering agency review or reconsider criteria being used in developing his or her contract. Such review or reconsideration may include the eligibility of BMP’s which had not been approved for application in the project area, cost-sharing levels for BMP’s, priorities for developing water quality plans, and standards and specifications.

(1) If verbal agreement is not reached, the participant may make a written request within 30 days after receiving notice of the decision of his or her verbal request.

(2) The administering agency shall have 30 days in which to make a decision and notify the participant in writing.

(3) The decision of the administering agency shall be final.

(b) If, after the contract has been executed, the participant and the administering agency are unable to reach written agreement relative on matters which are not related to contract violations, the participant may request and receive a review by the appeals board. The administering agency will:

(1) Notify the participant, in writing, of the date the appeals board will consider the appeal.

(2) Within 30 days after receiving the administering agency’s notice, the participant may file a request to appear and present oral and other evidence. If the participant does not request an appearance, the administering agency appeals board will decide the dispute on the basis of the evidence submitted.
the evidence available to them, including statements or briefs of the authorized representatives of the soil conservation district and NRCS. The administering agency shall notify the participants of the appeals board’s decision in writing. There shall be no further administrative appeal of this decision.

(c) **Filing of documents.** A document is considered filed when it is received in the office of the person or agency concerned.

§ 634.29 Violations.

(a) **Actions causing violations.** The following actions constitute violation of a contract by a participant:

(1) Knowingly or negligently damaging or causing BMP’s to become impaired.

(2) Adopting a land use or practice during the contract period which tends to defeat the purposes of the program.

(3) Failing to comply with the terms of the contract.

(4) Filing a false claim.

(5) Misusing authorizations for payment.

(b) **Contract termination as a result of violations.**

(1) By signing a contract, the participant agrees to forfeit all rights to further cost-sharing payments under a contract and to refund all cost-share payments received, with interest, if the administering agency, with the concurrence of the State Conservationist, NRCS, determines that:

(i) There was a violation of the contract during the time the participant had control of the land; and

(ii) The nature of the violation does not warrant termination of the contract.

(2) Payment adjustments may include decreasing the rate of cost share, or deleting from the contract a cost-share commitment, or withholding cost-share payments earned but not paid. The participant who signs the contract may be obligated to refund cost-share payments.

§ 634.30 Appeals in USDA administered projects.

The participant in a USDA-administered RCWP project may appeal decisions of the administering agency in accordance with part 614 of this title.

[60 FR 67316, Dec. 29, 1995]

§ 634.31 Appeals of contract violations.

(a) **Scope.** This section prescribes the regulations dealing with contract violations. The Administrator, NRCS, reserves the right to revise or supplement any of the provisions of this section at any time if the action does not adversely affect the participant, or if the participant has been officially notified before this action is taken.

(b) **Determination by administering agency.** Upon notification that a contract violation may have occurred, the administering agency:

(1) Determines that a violation did not occur or that the violation was of such a nature as to warrant termination of the contract.

(2) The participant shall be obligated to refund all cost-share payments and all cost shares paid under authorizations, with interest, at the rates established by the Secretary of the Treasury pursuant to Pub. L. 92-41, 85 Stat. 97.

(c) **Payment adjustments and refunds resulting from violations.**

(1) By signing a contract, the participant agrees to refund cost-share payments received under the contract or to accept payment adjustments if the administering agency determines and the State Conservationist, NRCS, concurs that:

(i) There was a violation of the contract during the time the participant had control of the land; and

(ii) The nature of the violation does not warrant termination of the contract.

(2) Payment adjustments may include decreasing the rate of cost share, or deleting from the contract a cost-share commitment, or withholding cost-share payments earned but not paid. The participant who signs the contract may be obligated to refund cost-share payments.

(3) Payment adjustments may include decreasing the rate of cost share, or deleting from the contract a cost-share commitment, or withholding cost-share payments earned but not paid. The participant who signs the contract may be obligated to refund cost-share payments.
A participant is considered to have received the notice at the time of personal receipt acknowledged in writing, at the time of delivery of a certified or registered letter, or at the time of the return of a refused certified or registered letter.

(2) The notice shall give the participant an opportunity to appear at a hearing before an appeals board. The participant’s request for a hearing shall be submitted in writing, and must be received by the appeals board within 30 days after receipt of the notice. The participant shall be notified in writing by the appeals board of the time, date, and place for the hearing. The participant shall have no right to a hearing if he does not file a written request for a hearing, or if he or his representative does not appear at the appointed time, unless the appeals board, at its discretion, permits an appearance. A request for a hearing filed by a participant shall be considered to be a request by all participants who signed the contract.

(d) Hearing. The appeals board shall conduct an open hearing to obtain the facts about the alleged violation. The appeals board shall limit the hearing to relevant facts and evidence, and shall not be bound by the strict rules of evidence. Witnesses may be sworn in at the discretion of the appeals board.

(1) The participant or his or her representative shall be given full opportunity to present oral or documentary evidence about the alleged violation. Likewise, the administering agency may submit statements and evidence. Individuals not otherwise represented at the hearing may, at the discretion of the appeals board, be permitted to give information or evidence. The appeals board, at its discretion, may permit witnesses to be cross-examined.

(2) The appeals board shall make a record of the hearing. A summary of the testimony may be made if both the participant and the appeals board agree. A transcript of the hearing shall be made if requested by either the appeals board or the participant within 10 days prior to the hearing. If a transcript is requested by the participant, the participant may be assessed the cost of a copy of the transcript.

(3) The appeals board shall, after a reasonable period of time, close the hearing if the participant or his or her representative is not present at the scheduled time. The appeals board may, at its discretion, accept information and evidence submitted by others present for the hearing.

(4) The appeals board shall furnish the administering agency and the State Conservationist, NRCS, with a written report setting forth their findings, conclusions, and recommendations. The report shall include the summary of testimony or transcript made of the hearing and any other information which would aid the administering agency in reaching a decision.

(e) Decision by the administering agency. The administering agency shall make a decision within 30 days on the basis of the appeals board report, recommendations of soil conservation district board, if any, and any other information available, including if applicable, the amount of the forfeiture, refund, or payment adjustment. The decision shall state whether the violation is of such a nature as to warrant termination of the contract. The administering agency shall notify, in writing, each participant who signed the contract of its decision. The administering agency may authorize or require the reopening of any hearing before the appeals board for any reason at any time before their decision. The administering agency’s decision shall be final.

(1) If the decision provides for termination of the contract, it shall state that the contract is terminated and that all rights to further cost-share payments under the contract are forfeited and that all cost-share payments received under the contract shall be refunded with interest. The decision is to state the amount of refund and method of payment.

(2) If the decision does not provide for termination of the contract, the participant may be required to make a refund of cost-share payments or to accept payment adjustments. The decision shall state the amount and justification for refunds of cost-share payments or payment adjustments.
Subpart D—Financial Management

§ 634.40 Financial management.

(2) Administering agency RCWP grants will be funded under Letter-of-Credit serviced by the U.S. Treasury Regional Disbursing Office (RCO), subject to the terms and conditions of the grant agreement or by NRCS approved advance/reimbursement financing agreements.

(3) The State of local administering agency shall maintain a financial management system which provides accurate and complete disclosure of the financial status of the RCWP grant in accordance with prescribed reporting requirements.

(4) The State or local administering agency shall upon request make its financial management system records available to NRCS, USDA Office of Inspector General, and the General Accounting Office.

(b)(1) The carrying out of RCWP project areas will be selected to evaluate the improvement in water quality in the project area and to make projections on a nationwide basis. Water-quality monitoring, evaluation, and analysis is a joint USDA/EPA responsibility. Subject to appropriation of funds, the Administrator, NRCS, and EPA are jointly to select the project areas to be monitored and evaluated based on a list of project areas recommended by the NRCWCC.

(2) The Administrator, NRCS, and Administrator, EPA, are jointly to determine the criteria to be used for comprehensive water-quality monitoring, evaluation, and analysis in the selected project areas. A monitoring and evaluation plan is to be developed and agreed to by NRCS and EPA prior to initiating a project selected for monitoring and evaluation. The State water-quality agency and other Federal, State, and local agencies will be involved in the development of the plan for water-quality evaluation. The involvement of concerned agencies in

Subpart E—Monitoring and Evaluation

§ 634.50 Program and project monitoring and evaluation.

(a) Comprehensive USDA/EPA joint water quality monitoring, evaluation, and analysis. (1) Representative RCWP project areas will be selected to evaluate the overall cost and effectiveness of projects and BMPs to provide information on the impact of the program on improved water quality and for general RCWP program management.

(2) Monitoring, evaluation, and analysis will be conducted to evaluate the overall cost and effectiveness of projects and BMPs to provide information on the impact of the program on improved water quality and for general RCWP program management.

(3) The Administrator, NRCS, and Administrator, EPA, are jointly to determine the criteria to be used for comprehensive water-quality monitoring, evaluation, and analysis in the selected project areas. A monitoring and evaluation plan is to be developed and agreed to by NRCS and EPA prior to initiating a project selected for monitoring and evaluation. The State water-quality agency and other Federal, State, and local agencies will be involved in the development of the plan for water-quality evaluation. The involvement of concerned agencies in

557
implementing the plan will be determined at the time the plan is prepared.

(4) The project areas selected for detailed analysis are to be representative of agricultural and silvicultural nonpoint source pollution problems, categories of agriculture and silvicultural nonpoint source pollutants, agricultural enterprises, and BMPs used in the RCWP.

(5) Preference in the selection of project areas for comprehensive evaluation is to be given to those project areas for which long-term baseline information exists on land use, hydrologic data, and water quality.

(6) Monitoring and evaluation of selected project areas is to begin sufficiently in advance of the installation of BMPs to document, in a statistically satisfactory manner, existing land-use practices and baseline water-quality problems.

(7) The water quality monitoring and evaluation plan will provide sufficient basic information to adequately describe the land use, hydrologic water quality relationship. As a minimum, the plan will contain the following components:

   (i) Chemical and physical water quality monitoring,
   (ii) Biological monitoring,
   (iii) Appropriate hydrologic data,
   (iv) Soils properties and characteristics, topographic information,
   (v) Land use and farm inventory.

(b) Program and project evaluation.  
(1) There will be a continuing evaluation of the Rural Clean Water Program to measure its effectiveness and for each project for which cost-sharing funds are provided.

(2) Program and project evaluations will be conducted under the direction of the Assistant Secretary for Conservation, Research and Education, USDA, the Director of Economics, Policy Analysis, and Budget, USDA; and the Assistant Administrator for Water and Waste Management, EPA; or their representatives working through NRCWCC.

(3) Evaluative reports for the program and each project area will be submitted annually to the Secretary of Agriculture and the Administrator, EPA.

(c) Funding.  
(1) Research oriented activities will be from sources other than RCWP.

(2) Funding for program and project monitoring and evaluation will be provided through RCWP and other authorizations.

PART 635—EQUITABLE RELIEF FROM INELIGIBILITY

§ 635.1 Definitions and abbreviations.

Covered program means a natural resource conservation program specified in § 635.3.

Chief means the Chief of the Natural Resources Conservation Service or the person delegated authority to act for the Chief.

FSA means the Farm Service Agency of the United States Department of Agriculture.

NRCS means the Natural Resources Conservation Service of the United States Department of Agriculture.

OGC means the Office of the General Counsel of the United States Department of Agriculture.

Secretary means the Secretary of the U.S. Department of Agriculture.

State Conservationist means the NRCS employee authorized to direct and supervise NRCS activities in a State, the Caribbean Area, or the Pacific Basin area, or the State Conservationist's designee.

SOURCE: 69 FR 56347, Sept. 21, 2004, unless otherwise noted.

§ 635.1 Definitions and abbreviations.

The following terms apply to this part:

Covered program means a natural resource conservation program specified in § 635.3.

Chief means the Chief of the Natural Resources Conservation Service or the person delegated authority to act for the Chief.

FSA means the Farm Service Agency of the United States Department of Agriculture.

NRCS means the Natural Resources Conservation Service of the United States Department of Agriculture.

OGC means the Office of the General Counsel of the United States Department of Agriculture.

Secretary means the Secretary of the U.S. Department of Agriculture.

State Conservationist means the NRCS employee authorized to direct and supervise NRCS activities in a State, the Caribbean Area, or the Pacific Basin area, or the State Conservationist's designee.
§ 635.2 Applicability.

(a) This part is applicable to all covered conservation programs administered by the Natural Resources Conservation Service, except for the Highly Erodible Land and Wetland Conservation provisions of Title XII, subtitiles B and C of the Food Security Act of 1985, as amended, (16 U.S.C. 3811 et seq.). Administration of this part shall be under the supervision of the Chief, except that such authority shall not limit the exercise of authority by State Conservationists of the Natural Resources Conservation Service provided in §635.6.

(b) The equitable relief available under this part does not apply where the action for which relief is requested occurred before May 13, 2002. In such cases, authority that was effective prior to May 13, 2002, shall be applied.

(c) This part does not apply to a conservation program administered by the Farm Service Agency of the United States Department of Agriculture.

§ 635.3 Reliance on incorrect actions or information.

(a) The Chief, or designee, may grant relief by extending benefits or payments in accordance with §635.5 when any participant that has been determined to be not in compliance with the requirements of a covered NRCS program, and therefore ineligible for a loan, payment, or other benefit under the covered program, if the participant, acting in good faith, relied upon the action or advice of an NRCS employee or representative of the United States Department of Agriculture, to the detriment of the participant.

(b) This section applies only to a participant who relied upon the action of, or information provided by, an NRCS employee, or representative of USDA, and the participant acted, or failed to act, as a result of that action or information. This part does not apply to cases where the participant had sufficient reason to know that the action or information upon which they relied was improper or erroneous or where the participant acted in reliance on their own misunderstanding or misinterpretation of program provisions, notices or information.

§ 635.4 Failure to fully comply.

(a) When a participant fails to fully comply with the terms and conditions of a covered program, the Chief, or designee, may grant relief in accordance with §635.5 if the participant made a good faith effort to comply fully with the requirements of the covered program.

(b) This section only applies to participants who are determined by the Chief to have made a good faith effort to comply fully with the terms and conditions of the program and rendered substantial performance.

(c) In determining whether a participant acted in good faith and rendered substantial performance under paragraph (b) of this section, the Chief, or designee, shall consider such factors as whether—

(1) Performance of the primary conservation program requirements were completed; or

(2) The actions of the participant resulted in minimal damages or failure that were minor in nature.

§ 635.5 Forms of relief.

(a) The Chief, or designee, may authorize a participant in a covered program to:

(1) Retain loans, payments, or other benefits received under the covered program;

(2) Continue to receive loans, payments, and other benefits under the covered program;

(3) Continue to participate, in whole or in part, under any contract executed under the covered program;

(4) In the case of a conservation program, re-enroll all or part of the land covered by the program; and

(5) Receive such other equitable relief as determined to be appropriate.

(b) As a condition of receiving relief under this part, the participant may be required to remedy their failure to meet the program requirement or mitigate its affects.

§ 635.6 Equitable relief by State Conservationists.

(a) General nature of the authority.

Notwithstanding provisions in this part providing supervision and relief authority to other officials, the State...
Conservationist, without further review by other officials (other than the Secretary), may grant relief as set forth in §635.5 to a participant under the provisions of §§635.3 and 635.4 so long as:

(1) The program matter with respect to which the relief is sought is a program matter in a covered program which is operated within the State under the control of the State Conservationist;

(2) The total amount of relief which will be provided to the participant (that is, to the individual or entity that applies for the relief) under this authority for errors during the fiscal year is less than $20,000 (included in that calculation, any loan amount or other benefit of any kind payable for the fiscal year);

(3) The total amount of such relief which has been previously provided to the participant using this authority for errors in a fiscal year, as calculated in paragraph (a)(2) of this section, is not more than $5,000;

(4) The total amount of loans, payments, and benefits of any kind for which relief is provided to similarly situated participants by a State Conservationist for errors for a fiscal year under the authority provided in this section, as calculated in paragraph (a)(2), is not more than $1,000,000.

(b) Additional limits on the authority. The authority provided under this section does not extend to the administration of:

(1) Payment limitations under 7 CFR part 1400;

(2) Payment limitations under a conservation program administered by the Secretary, or

(3) The highly erodible land and wetland conservation requirements under subtitles B or C of Title XII of the Food Security Act of 1985 (16 U.S.C. 3811 et seq.);

(c) Relief shall only be made under this part after consultation with, and the approval of, the Office of the General Counsel.

(d) Secretary’s reversal authority. A decision made under this part by the State Conservationist may be reversed only by the Secretary, who may not delegate that authority.

(e) Relation to other authorities. The authority provided under this section is in addition to any other applicable authority that may allow relief.

§635.7. Procedures for granting equitable relief.

(a) Application for equitable relief by covered program participants. For the purposes of this part, the following conservation programs administered by NRCS are identified as “covered programs”:

(1) Agricultural Management Assistance (AMA);

(2) Conservation Security Program (CSP);

(3) Emergency Watershed Protection, Floodplain Easement Component (EWP-FPE);

(4) Environmental Quality Incentives Program (EQIP);

(5) Farm and Ranch Lands Protection Program (FRPP);

(6) Grassland Reserve Program (GRP);

(7) Resource Conservation and Development Program (RC&D);

(8) Water Bank Program (WBP);

(9) Watershed Protection and Flood Prevention Program. (WPFPP) (long-term contracts only);

(10) Wetlands Reserve Program (WRP);

(11) Wildlife Habitat Incentives Program (WHIP);

(b) Participants may request equitable relief from the Chief or the State Conservationist with respect to:

(1) Reliance on the actions or advice of an authorized NRCS representative; or

(2) Failure to fully comply with the program requirements but made a good faith effort to comply.

(c) Only a participant directly affected by the non-compliance with the covered program requirements may seek equitable relief under §635.6.

(d) Requests for equitable relief must be made in writing, no later than 30 calendar days from the date of receipt of the notification of non-compliance.
with the requirements of the covered conservation program.

(e) Requests for equitable relief shall include the following information:
   (1) The reason why the participant was unable to comply with the requirements of the conservation program;
   (2) Details regarding how much of the required action had been completed;
   (3) Why the participant did not have sufficient reason to know that the action or information relied upon was improper or erroneous;
   (4) Whether the participant did not act in reliance on their own misunderstanding or misinterpretation of the conservation program provisions, notices, or information; and
   (5) Any other pertinent facts or supporting documentation.

PART 636—WILDLIFE HABITAT INCENTIVE PROGRAM

§ 636.1 Applicability.

(a) The purpose of the Wildlife Habitat Incentive Program (WHIP) is to help participants develop fish and wildlife habitat on private agricultural land, nonindustrial private forest land (NIPF), and Indian land.

(b) The regulations in this part set forth the requirements for WHIP.

(c) The Chief, Natural Resources Conservation Service (NRCS), may implement WHIP in any of the 50 States, District of Columbia, Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, and the Commonwealth of the Northern Mariana Islands.

§ 636.2 Administration.

(a) The regulations in this part will be administered under the general supervision and direction of the Chief. The funds, facilities, and authorities of the Commodity Credit Corporation (CCC) are available to NRCS to carry out WHIP. Accordingly, where NRCS is mentioned in this part, it also refers to CCC’s funds, facilities, and authorities, where applicable.

(b) The State Conservationist may accept recommendations from the State Technical Committee and Tribal Conservation Advisory Council (for tribal land) in the implementation of the program and in establishing program direction for WHIP in the applicable State or tribal land. The State Conservationist has the authority to accept or reject the State Technical Committee and the Tribal Conservation Advisory Council’s (for tribal land) recommendation; however, the State Conservationist will give strong consideration to the State Technical Committee and the Tribal Conservation Advisory Council’s recommendation.

(c) NRCS may enter into agreements with Federal and State agencies, Indian tribes, conservation districts, local units of government, public and private organizations, and individuals to assist with program implementation, including the provision of technical assistance. NRCS may make payments pursuant to said agreements for program implementation and for other goals consistent with the program provided for in this part.

(d) NRCS will provide the public with notice of opportunities to apply for participation in the program.
§ 636.3 Definitions.

The following definitions will apply to this part, and all documents issued in accordance with this part, unless specified otherwise:

Agricultural lands means cropland, grassland, rangeland, pastureland, and other land determined by NRCS to be suitable for fish and wildlife habitat development on which agricultural and forest-related products or livestock are or have the potential to be produced. Agricultural lands may include cropped woodland, wetlands, waterways, streams, incidental areas included in the agricultural operation, and other types of land used for or have the potential to be used for production.

Applicant means a person, legal entity, joint operation, or Indian tribe that has an interest in agricultural land, NIPF, Indian land, or other lands identified in 636.4(c)(4), who has requested in writing to participate in WHIP.

At-risk species means any plant or animal species listed as threatened or endangered; proposed or candidate for listing under the Endangered Species Act (ESA); a species listed as threatened or endangered under State law or tribal law on tribal land; State or tribal land species of conservation concern; or other plant or animal species or community, as determined by the State Conservationist, with advice from the State Technical Committee and Tribal Conservation Advisory Council (for tribal land), that has undergone, or likely to undergo, population decline and may become imperiled without direct intervention.

Beginning farmer or rancher means an individual or entity who:

(1) Has not operated a farm or ranch, or who has operated a farm or ranch for not more than 10 consecutive years. This requirement applies to all members of an entity, who will materially and substantially participate in the operation of the farm or ranch.

(2) In the case of a cost-share agreement with an individual, individually, or with the immediate family, material and substantial participation requires that the individual provide substantial day-to-day labor and management of the farm or ranch consistent with the practices in the county or State where the farm is located.

(3) In the case of a cost-share agreement with an entity or joint operation, all members must materially and substantially participate in the operation of the farm or ranch. Material and substantial participation requires that each of the members provide some amount of the management, or labor and management necessary for day-to-day activities, such that if each of the members did not provide these inputs, operation of the farm or ranch would be seriously impaired.

Chief means the Chief of NRCS or designee.

Conservation activities means conservation systems, practices, or management measures needed to address a resource concern or improve environmental quality through the treatment of natural resources, and includes structural, vegetative, and management activities, as determined by NRCS.

Conservation district means any district or unit of State, tribal, or local government formed under State, tribal, or territorial law for the express purpose of developing and carrying out a local soil and water conservation program. Such district or unit of government may be referred to as a conservation district, soil conservation district, soil and water conservation district, resource conservation district, natural resource district, land conservation committee, or similar name.

Conservation practice means one or more conservation improvements and activities, including structural practices, land management practices, vegetative practices, forest management, and other improvements that benefit the eligible land and achieve program purposes. Approved conservation practices are listed in the NRCS Field Office Technical Guide (FOTG).

Cost-share agreement means a financial assistance document that specifies
the rights and obligations of any participant accepted into the program. A WHIP cost-share agreement is a binding agreement for the transfer of assistance from the Department of Agriculture (USDA) to the participant to share in the costs of applying conservation activities.

Cost-share payment means the payments under the WHIP cost-share agreement to develop fish and wildlife habitat or accomplish other goals consistent with the program provided for in this part.

Designated conservationist means an NRCS employee whom the State Conservationist has designated as responsible for WHIP administration in a specific area.

Field Office Technical Guide means the official local NRCS source of resource information and interpretations of guidelines, criteria, and requirements for planning and applying conservation practices and conservation management systems. It contains detailed information on the conservation of soil, water, air, plant, and animal resources applicable to the local area for which it is prepared.

Habitat development means the conservation activities implemented to establish, improve, protect, enhance, or restore the conditions of the land for the specific purpose of improving conditions for fish and wildlife.

Historically underserved producer means an eligible person, joint operation, legal entity, or Indian tribe who is a beginning farmer or rancher, socially disadvantaged farmer or rancher, limited resource farmer or rancher, or NIPF landowner who meets the beginning, socially disadvantaged, or limited resource qualifications set forth in §636.3.

Indian land means:
(1) Land held in trust by the United States for individual Indians or Indian tribes, or
(2) Land, the title to which is held by individual Indians or Indian tribes subject to Federal restrictions against alienation or encumbrance, or
(3) Land which is subject to rights of use, occupancy, and benefit of certain Indian tribes, or
(4) Land held in fee title by an Indian, Indian family, or Indian tribe.

Indian tribe means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.) that is eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

Joint operation means, as defined in 7 CFR part 1400, a general partnership, joint venture, or other similar business organization in which the members are jointly and severally liable for the obligations of the organization.

Legal entity means, as defined in 7 CFR part 1400, an entity created under Federal or State law that:
(1) Owns land or an agricultural commodity, product, or livestock; or
(2) Produces an agricultural commodity, product, or livestock.

Lifespan means the period of time during which a conservation practice is to be operated and maintained for the intended purpose.

Limited resource farmer or rancher means:
(1) A person with direct or indirect gross farm sales of not more than $142,000 in each of the previous 2 years (this is the amount for 2010, and adjusted for inflation using Prices Paid by Farmer Index as compiled by National Agricultural Statistical Service); and
(2) Has a total household income at or below the national poverty level for a family of four, or less than 50 percent of county median household income in each of the previous 2 years (to be determined annually using the Department of Commerce Data).

Liquidated damages means a sum of money stipulated in the WHIP cost-share agreement that the participant agrees to pay NRCS if the participant fails to adequately complete the terms of the cost-share agreement. The sum represents an estimate of the technical assistance expenses incurred to service the agreement, and reflects the difficulties of proof of loss and the inconvenience or non-feasibility of otherwise obtaining an adequate remedy.
Livestock means all animals produced on farms and ranches, as determined by the Chief.

Natural Resources Conservation Service is an agency of USDA, which has the responsibility for administering WHIP using the funds, facilities, and authorities of the CCC.

Nonindustrial private forest land means rural land, as determined by the Secretary, that has existing tree cover or is suitable for growing trees and is owned by any nonindustrial private individual, group, association, corporation, Indian tribe, or other private legal entity that has definitive decisionmaking authority over the land.

Operation and maintenance means work performed by the participant to keep the applied conservation activities functioning for the intended purpose during the conservation practice lifespan. Operation includes the administration, management, and performance of non-maintenance actions needed to keep the completed activity functioning as intended. Maintenance includes work to prevent deterioration of the practice, repairing damage, or replacement of the practice to its original condition if one or more components fail.

Operation and maintenance agreement means the document that, in conjunction with the WHIP plan of operations, specifies the operation and maintenance (O&M) responsibilities of the participants for conservation activities implemented with WHIP assistance.

Participant means a person, legal entity, joint operation, or Indian tribe that is receiving payment or is responsible for implementing the terms and conditions of a WHIP cost-share agreement.

Person means, as defined in 7 CFR part 1400, an individual, natural person and does not include a legal entity.

Producer means, as defined in 7 CFR part 1400, a person, legal entity, joint operation, or Indian tribe who has an interest in the agricultural operation or who is engaged in agricultural production or forestry management.

Resource concern means a specific natural resource problem that represents a significant concern in a State or region, and is likely to be addressed successfully through the implementation of the conservation activities by participants.

Secretary means the Secretary of USDA.

Socially disadvantaged farmer or rancher means a farmer or rancher who has been subjected to racial or ethnic prejudices because of their identity as a member of a group without regard to their individual qualities. Those groups include African Americans, American Indians or Alaskan Natives, Hispanics, and Asians or Pacific Islanders.

State Conservationist means the NRCS employee authorized to implement WHIP and direct and supervise NRCS activities in a State, Caribbean Area, or the Pacific Islands Area.

State Technical Committee means a committee established by the Secretary in a State pursuant to 16 U.S.C. 3861.

Technical assistance means technical expertise, information, and tools necessary for the conservation of natural resources on land active in agricultural, forestry, or related uses. The term includes the following:

1. Technical services provided directly to farmers, ranchers, and other eligible entities, such as conservation planning, technical consultation, and assistance with design and implementation of conservation practices; and

2. Technical infrastructure, including activities, processes, tools, and agency functions needed to support delivery of technical services, such as technical standards, resource inventories, training, data, technology, monitoring, and effects analyses.

Technical service provider means an individual, entity, Indian tribe, or public agency either:

1. Certified by NRCS and placed on the approved list to provide technical services to participants; or

2. Selected by the Department to assist the Department in the implementation of conservation programs covered by this part through a procurement contract, contribution agreement, or cooperative agreement with the Department.

Tribal Conservation Advisory Council means a committee established by a State Conservationist to implement consultation as defined in General Manual 410 Part 405.
Natural Resources Conservation Service, USDA § 636.4

WHIP plan of operations means the document that identifies the location and timing of conservation activities that the participant agrees to implement on eligible land in order to develop fish and wildlife habitat and provide environmental benefits. The WHIP plan of operations is a part of the WHIP cost-share agreement.

Wildlife means non-domesticated birds, fishes, reptiles, amphibians, invertebrates, and mammals.

Wildlife habitat means the aquatic and terrestrial environments required for fish and wildlife to complete their life cycles, providing air, food, cover, water, and spatial requirements.

§ 636.4 Program requirements.

(a) To participate in WHIP, an applicant must:

(1) Be in compliance with the highly erodible and wetland conservation provisions found in 7 CFR part 12;

(2) Be in compliance with the terms of all other USDA-administered conservation program contracts to which the participant is a party;

(3) Develop and agree to comply with a WHIP plan of operations and O&M agreement, as described in § 636.8;

(4) Enter into a cost-share agreement for the development of fish and wildlife habitat as described in § 636.9;

(5) Provide NRCS with written evidence of ownership or legal control of land for the term of the proposed cost-share agreement, including the O&M agreement. An exception may be made by the Chief in the case of land allotted by the Bureau of Indian Affairs (BIA) or Indian land where there is sufficient assurance of control;

(6) Agree to provide all information to NRCS determined to be necessary to assess the merits of a proposed project and to monitor cost-share agreement compliance;

(7) Agree to grant to NRCS or its representatives access to the land for purposes related to application, assessment, monitoring, enforcement, verification of certifications, or other actions required to implement this part;

(8) Provide a list of all members of the legal entity and embedded entities along with members’ tax identification numbers and percentage interest in the entity. Where applicable, American Indians, Alaska Natives, and Pacific Islanders may use another unique identification number for each individual eligible for payment;

(9) With regard to cost-share agreements with individual Indians or Indians represented by the BIA, payments exceeding the payment limitation may be made to the tribal participant if a BIA or tribal official certifies in writing that no one individual, directly or indirectly, will receive more than the payment limitation. The BIA or tribal entity must also provide annually, a listing of individuals and payments made, by tax identification number or other unique identification number, during the previous year for calculation of overall payment limitations. The tribal entity must also produce, at the request of NRCS, proof of payments made to the person or legal entity that incurred costs related to conservation activity implementation;

(10) Supply information, as required by NRCS, to determine eligibility for the program including, but not limited to, information to verify the applicant’s status as a limited resource farmer or rancher or beginning farmer or rancher and payment eligibility as established by 7 CFR part 1400, Adjusted Gross Income (AGI);

(11) With regard to any participant that utilizes a unique identification number as an alternative to a tax identification number, the participant will utilize only that identifier for any and all other WHIP cost-share agreements to which the participant is a party. Violators will be considered to have provided fraudulent representation and are subject to § 636.13; and

(b) Eligible land includes:

(1) Private agricultural land;

(2) NIPF;

(3) Indian land; and

(4) Trust land owned in fee title by a State, including an agency or subdivision of a State, when such trust land is held under a long-term lease by a person or nongovernmental entity and
when the Chief determines that (i) by the nature of the lease, such land is tantamount to private agricultural land; (ii) the duration of the lease is at least the length of any WHIP agreement; and (iii) no funds under the WHIP program are paid to a governmental entity.

(c) *Ineligible land.* NRCS will not provide cost-share assistance with respect to land:

1. Enrolled in a program where fish and wildlife habitat objectives have been sufficiently achieved, as determined by NRCS;
2. With onsite or offsite conditions which NRCS determines would undermine the benefits of the habitat development or otherwise reduce its value;
3. On which habitat for threatened or endangered species, as defined in section 3 of the ESA, 16 U.S.C. 1532, would be adversely affected; or
4. That is owned in fee title by an agency of the United States, other than:
   i. Land held in trust for Indian tribes, and
   ii. Lands owned in fee title by a State, including an agency or subdivision of a State or a unit of government except as provided in §636.4(b)(4).

§ 636.5 National priorities.

(a) The following national priorities will be used in WHIP implementation:

1. Promote the restoration of declining or important native fish and wildlife habitats;
2. Protect, restore, develop, or enhance fish and wildlife habitat to benefit at-risk species;
3. Reduce the impacts of invasive species on fish and wildlife habitats;
4. Protect, restore, develop, or enhance declining or important aquatic wildlife species’ habitats; and
5. Protect, restore, develop, or enhance important migration and other movement corridors for wildlife.

(b) NRCS, with advice of other Federal agencies, will undertake periodic reviews of the national priorities and the effects of program delivery at the State, tribal, and local levels to adapt the program to address emerging resource issues. NRCS will:

1. Use the national priorities to guide the allocation of WHIP funds to the State offices;
2. Use the national priorities in conjunction with State, tribal, and local priorities to assist with prioritization and selection of WHIP applications; and
3. Periodically review and update the national priorities utilizing input from the public, Indian tribes, and affected stakeholders to ensure that the program continues to address priority resource concerns.

§ 636.6 Establishing priority for enrollment in WHIP.

(a) NRCS, in consultation with Federal and State agencies, tribal, and conservation partners, may identify priorities for enrollment in WHIP that will complement the goals and objectives of relevant fish and wildlife conservation initiatives at the State, regional, tribal land, or national levels. In response to national, tribal, regional, or State fish and wildlife habitat concerns, the Chief may focus program implementation in any given year to specific geographic areas or to address specific habitat development needs.

(b) The State Conservationist, with recommendations from the State Technical Committee and Tribal Conservation Advisory Council (for tribal land), may give priority to WHIP projects that will address unique habitats or special geographic areas identified in the State. Subsequent cost-share agreement offers that would complement previous cost-share agreements due to geographic proximity of the lands involved or other relationships may receive priority consideration for participation.

(c) NRCS will evaluate the applications and make enrollment decisions based on the fish and wildlife habitat need using some or all of the following criteria:

1. Contribution to resolving an identified habitat concern of national, tribal, regional, or State importance including at-risk species;
2. Relationship to any established wildlife or conservation priority areas;
(3) Duration of benefits to be obtained from the habitat development practices;
(4) Self-sustaining nature of the habitat development practices;
(5) Availability of other partnership matching funds or reduced funding request by the person applying for participation;
(6) Estimated costs of fish and wildlife habitat development activities;
(7) Other factors determined appropriate by NRCS to meet the objectives of the program; and
(8) Willingness of the applicant to complete all conservation improvements during the first 2 years of the WHIP cost-share agreement.

§ 636.7 Cost-share payments.

(a) NRCS may share the cost with a participant for implementing the conservation activities as provided in the WHIP plan of operations that is a component of the WHIP cost-share agreement:

(1) Except as provided in paragraph (a)(2) of this section and in §636.9(c), NRCS will offer to pay no more than 75 percent of the costs to develop fish and wildlife habitat. The cost-share payment to a participant will be reduced proportionately below 75 percent to the extent that direct Federal financial assistance is provided to the participant from sources other than NRCS, except for certain cases that merit additional cost-share assistance to achieve the intended goals of the program, as determined by the State Conservationist.

(2) Historically underserved producers, as defined in §636.3, and Indian tribes may receive the applicable payment rate and an additional rate that is not less than 25 percent above the applicable rate, provided that this increase does not exceed 90 percent of the estimated costs associated with WHIP plan operations implementation.

(b) Cost-share payments may be made only upon a determination by NRCS that a conservation activity or an identifiable component of a conservation activity has been established in compliance with appropriate standards and specifications.

(c) Payments will not be made for a conservation activity that was:

(1) Applied prior to application for the program; or
(2) Initiated or implemented prior to cost-share agreement approval, unless a waiver was granted by the State Conservationist or designated conservationist prior to implementation.

(d) NRCS, in consultation with the State Technical Committee, will identify and provide public notice of the conservation activities eligible for payment under the program.

(e) Cost-share payments may be made for the establishment and installation of additional eligible conservation activities, or the maintenance or replacement of an eligible conservation activity, but only if NRCS determines the conservation activity is needed to meet the objectives of the program, or that the failure of the original project was due to reasons beyond the control of the participant.

(f) Payments made or attributed to a participant, directly or indirectly, may not exceed, in the aggregate, $50,000 per year.

(g) Eligibility for payment in accordance with 7 CFR part 1400, subpart G, average AGI limitation, will be determined prior to cost-share agreement approval.

(h) Subject to fund availability, the payment rates identified in a WHIP contract may be adjusted by NRCS to reflect increased costs.

(i) A participant will not be eligible for payments for conservation activities on eligible land if the participant receives payments or other benefits for the same activity on the same land under any other conservation program administered by USDA.

(j) Before NRCS will approve and issue final payment, the participant must certify that the conservation activity has been completed in accordance with the cost-share agreement, and NRCS or an approved Technical Service Provider (TSP) must certify that the activity has been carried out in accordance with the applicable FOTG.

(k) NRCS, for a fiscal year, may use up to 25 percent of WHIP funds to carry out cost-share agreements described in §636.9(c).
§ 636.8 WHIP plan of operations.

(a) As a condition of participation, the participant develops a WHIP plan of operations with the assistance of NRCS or other public or private natural resource professionals who are approved by NRCS. A WHIP plan of operations encompasses the parcel of land where habitat will be established, improved, protected, enhanced, or restored. The WHIP plan of operations will be approved by NRCS and address at least one of the following as determined by NRCS:
   (1) Fish and wildlife habitat conditions that are of concern to the participant;
   (2) Fish and wildlife habitat concerns identified in State, regional, tribal land, or national conservation initiatives, as referenced in § 636.6(a); or
   (3) Fish and wildlife habitat concerns identified in an approved area-wide plan that addresses the wildlife resource habitat concern.

(b) The WHIP plan of operations forms the basis for the WHIP cost-share agreement and will be attached and included as part of the cost-share agreement, along with the O&M agreement. The WHIP plan of operations includes a schedule for implementation and maintenance of the conservation activities, as determined by NRCS.

(c) The WHIP plan of operations may be modified in accordance with § 636.10.

(d) All conservation activities in the WHIP plan of operations must be approved by NRCS and developed and carried out in accordance with the applicable FOTG.

(e) The participant is responsible for the implementation of the WHIP plan of operations.

§ 636.9 Cost-share agreements.

(a) To apply for WHIP cost-share assistance, a person, tribe, or legal entity must submit an application for participation at a USDA Service Center to an NRCS representative.

(b) A WHIP cost-share agreement will:
   (1) Incorporate the WHIP plan of operations;
   (2) Be for a time period agreed to by the participant and NRCS, with a minimum duration of one year after the completion of conservation activities identified in the WHIP plan of operations and a maximum of 10 years, except for agreements entered into under paragraph (c) of this section;
   (3) Include all provisions as required by law or statute;
   (4) Include any participant reporting and recordkeeping requirements to determine compliance with the cost-share agreement and program;
   (5) Be signed by the participant;
   (6) Specify payment limits described in § 636.7(f) including any additional payment limitation associated with determinations made under § 636.7(g);
   (7) Include an O&M agreement that describes the O&M for each conservation activity and the agency expectation that WHIP-funded conservation activities will be operated and maintained for their expected lifespan; and
   (8) Include any other provision determined necessary or appropriate by the NRCS representative.

(c) Notwithstanding any limitation of this part, NRCS may enter into a long-term cost-share agreement that:
   (1) Is for a term of at least 15 years;
   (2) Protects and restores essential plant or animal habitat, as determined by NRCS; and
   (3) Provides cost-share payments of no more than 90 percent of the cost of implementing the WHIP plan of operations to develop fish and wildlife habitat.

§ 636.10 Modifications.

(a) The participant and NRCS may modify a cost-share agreement if both parties agree to the modification. The WHIP plan of operations is revised in accordance with NRCS requirements, and the agreement is approved by the designated conservationist.

(b) Any modifications made under this section must meet WHIP program objectives and must be in compliance with this part.

(c) In the event implementation of a conservation activity fails through no fault of the participant, the State Conservationist may modify the cost-share agreement in order to issue payments to re-implement the activity, at the rates established in accordance with § 636.7, provided such payments do not exceed the payment limitation requirements as set forth in § 636.7.
(d) Where circumstances beyond the participant’s control or when it is in the public interest, such as matters of health or safety, the State Conservationist may independently or by mutual agreement with the parties modify or terminate the cost-share agreement as provided for in §636.12.

§ 636.11 Transfer of interest in a cost-share agreement.

(a) A participant is responsible for notifying NRCS when he or she anticipates the voluntary or involuntary loss of control of the land covered by a WHIP cost-share agreement during the term of the agreement.

(b) The participant and NRCS may agree to transfer a cost-share agreement to another potential participant. The transferee must be determined by NRCS to be eligible to participate in WHIP and must assume full responsibility under the cost-share agreement.

(c) With respect to any and all payments owed to participants who wish to transfer ownership or control of land subject to a cost-share agreement, the division of payment will be determined by the original party and that party’s successor. In the event of a dispute or claim on the distribution of cost-share payments, NRCS may withhold payments without the accrual of interest pending a settlement or adjudication on the rights to the funds.

(d) If new participants are not willing or not eligible to assume the responsibilities of an existing WHIP cost-share agreement, including the O&M agreement, and the participant fails to implement the cost-share agreement, then NRCS will terminate the agreement and may require that all cost-share payments be forfeited, refunded, or both, with applicable interest in accordance with §636.12. Participants may be subject to liquidated damages in accordance with §636.12.

§ 636.12 Termination of cost-share agreements.

(a) The State Conservationist may, independently or by mutual agreement with the parties to the cost-share agreement, terminate the cost-share agreement where:

(1) The parties to the cost-share agreement are unable to comply with the terms of the cost-share agreement as the result of conditions beyond their control;

(2) Termination of the cost-share agreement would, as determined by the State Conservationist, be in the public interest;

(3) A participant fails to correct a violation of a cost-share agreement within the period provided by NRCS in accordance with §636.13.

(b) If NRCS terminates a cost-share agreement, in accordance with the provisions of paragraphs (a)(1) and (a)(2) of this section the State Conservationist may allow the participant to retain a portion of any payments received appropriate to the effort the participant has made to comply with the contract.

(1) NRCS may require a participant to provide only a partial refund of the payments received if a previously implemented conservation activity can function independently, and is not adversely affected by the violation or the absence of other conservation activities that would have been implemented under the cost-share agreement; and

(2) The State Conservationist will have the option to waive all or part of the liquidated damages assessed, depending upon the circumstances of the case.

(c) When making termination decisions, NRCS may reduce the amount of money owed by the participant by a proportion that reflects:

(1) The good faith effort of the participant to comply with the cost-share agreement; or

(2) The existence of hardships beyond the participant’s control that have prevented compliance. If a participant claims hardship, that claim must be documented and cannot have existed when the applicant applied for participation in the program.

§ 636.13 Violations and remedies.

(a) If NRCS determines that a participant is in violation of a cost-share agreement, NRCS will give the parties to the cost-share agreement notice of the violation and a minimum of 60 days to correct the violation and comply with the terms of the cost-share agreement and attachments thereto.

(b) If the participant fails to correct the violation of a cost-share agreement
within the period provided by NRCS under paragraph (a) of this section. NRCS may terminate the agreement and require the participant to refund all or part of any of the funds issued under that cost-share agreement, plus interest, and may assess liquidated damages as indicated in the cost-share agreement appendix, as well as require the participant to forfeit all rights to any future payment under the agreement.

(c) If NRCS terminates a cost-share agreement due to breach of contract, the participant will forfeit all rights to future payments under the agreement, may be required to pay liquidated damages in an amount determined by the State Conservationist in accordance with the terms of the agreement, and will refund all or part of the payments received, plus interest. Participants violating WHIP cost-share agreements may be determined ineligible for future NRCS-administered conservation program funding.

§ 636.14 Misrepresentation and scheme or device.

(a) A participant who is determined to have erroneously represented any fact affecting a program determination made in accordance with this part, will not be entitled to cost-share agreement payments and must refund to NRCS all payments and pay liquidated damages, plus interest, as determined by NRCS.

(b) A participant will refund to NRCS all payments, plus interest, as determined by NRCS, with respect to all NRCS cost-share agreements to which they are a party if they are determined to have knowingly:

(1) Adopted any scheme or device that tends to defeat the purpose of the program;

(2) Made any fraudulent representation; or

(3) Misrepresented any fact affecting a program determination.

(c) Other NRCS cost-share agreements where this person is a participant may be terminated.

§ 636.15 Offsets and assignments.

(a) Except as provided in paragraph (b) of this section, any payment or portion thereof to any person or legal entity will be made without regard to questions of title under State law and without regard to any claim or lien against the land, or proceeds thereof, in favor of the owner or any other creditor except agencies of the United States Government. The regulations governing offsets and withholdings found at 7 CFR part 1403 of this title will be applicable to cost-share agreement payments.

(b) WHIP participants may assign any payments in accordance with 7 CFR part 1404.

§ 636.16 Appeals.

(a) Any participant may obtain reconsideration and review of determinations affecting participation in this program in accordance with 7 CFR parts 11 and 614, except as provided in paragraph (b) of this section.

(b) In accordance with the provisions of the Department of Agriculture Reorganization Act of 1994, Public Law 103-354 (7 U.S.C. 6901), the following decisions are not appealable:

(1) Payment rates, payment limits, and cost-share percentages;

(2) The designation of approved fish and wildlife priority areas, habitats, or activities;

(3) NRCS program funding decisions;

(4) Eligible conservation activities; and

(5) Other matters of general applicability.

(c) Before a participant may seek judicial review of any action taken under this part, the participant must exhaust all administrative appeal procedures set forth in paragraph (a) of this section.

§ 636.17 Compliance with regulatory measures.

(a) Participants who implement the WHIP plan of operations will be responsible for obtaining the authorities, rights, easements, permits, or other approvals necessary for the implementation, operation, and maintenance of the conservation activities in keeping with applicable laws and regulations. The requirement for the participant to obtain necessary permits is included in the terms and conditions of the contract appendix.

(b) Participants will be responsible for compliance with all laws and for all
§ 636.18 Technical services provided by qualified personnel not affiliated with USDA.

(a) NRCS may use the services of qualified TSPs in performing its responsibilities for technical assistance.

(b) Participants may use technical services from qualified personnel of other Federal, State, and local agencies, Indian tribes, or individuals who are certified as TSPs by NRCS.

(c) Technical services provided by qualified personnel not affiliated with USDA may include, but are not limited to, conservation planning; conservation practice survey, layout, design, installation, and certification; and related technical services as defined in 7 CFR part 652.

(d) NRCS retains approval authority over certification of work done by non-NRCS personnel for the purpose of approving WHIP payments.

§ 636.19 Access to operating unit.

As a condition of program participation, any authorized NRCS representative will have the right to enter an agricultural operation or tract for the purposes of determining eligibility and for determining the accuracy of any representations related to cost-share agreements and performance. Access will include the right to provide technical assistance; determine eligibility; inspect any work undertaken under the cost-share agreements, including the WHIP plan of operations and O&M agreement; and collect information necessary to evaluate the habitat development performance specified in the cost-share agreements. The NRCS representative will make a reasonable effort to contact the participant prior to the exercising of this provision.

§ 636.20 Equitable relief.

(a) If a participant relied upon the advice or action of any authorized NRCS representative and did not know, or have reason to know, that the advice or action was improper or erroneous, NRCS may grant relief in accordance with 7 CFR part 635. Where a participant believes that detrimental reliance on the advice or action of a NRCS representative resulted in an ineligibility or program violation, the participant may request equitable relief under 7 CFR 635.3. The financial or technical liability for any action by a participant that was taken based on the advice of a NRCS certified non-USDA TSP is the responsibility of the certified TSP and will not be assumed by NRCS when NRCS authorizes payment.

(b) If during the term of a WHIP cost-share agreement a participant has been found in violation of a provision of the cost-share agreement, the O&M agreement, or any document incorporated by reference through failure to fully comply with that provision, the participant may be eligible for equitable relief under 7 CFR 635.4.

§ 636.21 Environmental services credits for conservation improvements.

USDA recognizes that environmental benefits will be achieved by implementing conservation activities funded through WHIP, and that environmental credits may be gained as a result of implementing activities compatible with the purposes of a WHIP cost-share agreement. NRCS asserts no direct or indirect interest on any such credits.

Where activities required under an environmental credit agreement may affect land covered under a WHIP cost-share agreement, participants are highly encouraged to request a compatibility assessment from NRCS prior to entering into such agreements. The WHIP cost-share agreement may be modified, in accordance with policies outlined in §636.10, provided the modification meets WHIP purposes and is in compliance with this part.
SUBCHAPTER E [RESERVED]
PART 650—COMPLIANCE WITH NEPA

Subpart A—Procedures for NRCS-Assisted Programs

§ 650.1 Purpose.
(a) This rule prescribes procedures by which NRCS is to implement the provisions of NEPA. The Natural Resources Conservation Service recognizes NEPA as the national charter for protection, restoration, and enhancement of the human environment. NEPA establishes policy, sets goals (Section 101), and provides means (Section 102) for carrying out this policy.

(b) The procedures included in this rule supplement CEQ’s NEPA regulations, 40 CFR parts 1500-1508. CEQ regulations that need no additional elaboration to address NRCS-assisted actions are not repeated in this rule, although the regulations are cited as references. The procedures include some overlap with CEQ regulations. This is done to highlight items of importance for NRCS. This does not supersede the existing body of NEPA regulations.

(c) These procedures provide that—
(1) Environmental information is to be available to citizens before decisions are made about actions that significantly affect the human environment;
(2) NRCS-assisted actions are to be supported to the extent possible by accurate scientific analyses that are technically acceptable to NRCS;
(3) NRCS-prepared NEPA documents are to be available for public scrutiny; and
(4) Documents are to concentrate on the issues that are timely and significant to the action in question rather than amassing needless detail.

(d) Procedures for implementing NEPA are designed to ensure that environmental consequences are considered in decisionmaking. They allow NRCS to assist individuals and nonfederal public entities to take actions that protect, enhance, and restore environmental quality.

(e) These procedures make possible the early identification of actions that have significant effects on the human environment to avoid delays in decisionmaking.

§ 650.2 Applicability.
This rule applies to all NRCS-assisted programs including the uninstalled parts of approved projects that are not covered by environmental documents prepared under previous rules for compliance with NEPA. It is effective on the date of publication of the final rule. NRCS is to consult with CEQ in the manner prescribed by 40 CFR 1506.11 if it is necessary to take emergency actions.

§ 650.3 Policy.
(a) NRCS mission. The NRCS mission is to provide assistance that will allow
use and management of ecological, cultural, natural, physical, social, and economic resources by striving for a balance between use, management, conservation, and preservation of the Nation’s natural resource base. The NRCS mission is reemphasized and expanded to carry out the mandate of section 101(b) of NEPA, within other legislative constraints, in all its programs of Federal assistance. NRCS will continue to improve and coordinate its plans, functions, programs, and recommendations on resource use so that Americans, as stewards of the environment for succeeding generations—

(1) Can maintain safe, healthy, productive, and esthetically and culturally pleasing surroundings that support diversity of individual choices; and

(2) Are encouraged to attain the widest range of beneficial uses of soil, water, and related resources without degradation to the environment, risk to health or safety, or other undesirable and unintended consequences.

(b) NRCS environmental policy. NRCS is to administer Federal assistance within the following overall environmental policies:

(1) Provide assistance to Americans that will motivate them to maintain equilibrium among their ecological, cultural, natural, physical, social, and economic resources by striving for a balance between conserving and preserving the Nation’s natural resource base.

(2) Provide technical and financial assistance through a systematic interdisciplinary approach to planning and decisionmaking to insure a balance between the natural, physical, and social sciences.

(3) Consider environmental quality equal to economic, social, and other factors in decisionmaking.

(4) Insure that plans satisfy identified needs and at the same time minimize adverse effects of planned actions on the human environment through interdisciplinary planning before providing technical and financial assistance.

(5) Counsel with highly qualified and experienced specialists from within and outside NRCS in many technical fields as needed.

(6) Encourage broad public participation in defining environmental quality objectives and needs.

(7) Identify and make provisions for detailed survey, recovery, protection, or preservation of unique cultural resources that otherwise may be irrevocably lost or destroyed by NRCS-assisted project actions, as required by Historic Preservation legislation and/or Executive Order.

(8) Encourage local sponsors to review with interested publics the operation and maintenance programs of completed projects to insure that environmental quality is not degraded.

(9) Advocate the retention of important farmlands and forestlands, prime rangeland, wetlands, or other lands designated by State or local governments. Whenever proposed conversions are caused or encouraged by actions or programs of a Federal agency, licensed by or require approval by a Federal agency, or are inconsistent with local or State government plans, provisions are to be sought to insure that such lands are not irreversibly converted to other uses unless other national interests override the importance of preservation or otherwise outweigh the environmental benefits derived from their protection. In addition, the preservation of farmland in general provides the benefits of open space, protection of scenery, wildlife habitat, and in some cases, recreation opportunities and controls on urban sprawl.

(10) Advocate actions that reduce the risk of flood loss; minimize effects of floods on human safety, health, and welfare; and restore and preserve the natural and beneficial functions and values of flood plains.

(11) Advocate and assist in the reclamation of abandoned surface-mined lands and in planning for the extraction of coal and other nonrenewable resources to facilitate restoration of the land to its prior productivity as mining is completed.

(12) Advocate the protection of valuable wetlands, threatened and endangered animal and plant species and their habitats, and designated ecosystems.

(13) Advocate the conservation of natural and manmade scenic resources to insure that NRCS-assisted programs
or activities protect and enhance the visual quality of the landscape.

(14) Advocate and assist in actions to preserve and enhance the quality of the Nation’s waters.

[44 FR 50579, Aug. 20, 1979, as amended at 44 FR 54981, Sept. 24, 1979]

§ 650.4 Definition of terms.

Definitions of the following terms or phrases appear in 40 CFR part 1508, CEQ regulations. These terms are important in the understanding and implementation of this rule. These definitions are not repeated in the interest of reducing duplication:

Categorical exclusion. (40 CFR 1508.4)
Cooperating agency. (40 CFR 1508.5)
Cumulative impact. (40 CFR 1508.7)
Environmental impact statement (EIS). (40 CFR 1508.11)
Human environment. (40 CFR 1508.14)
Lead agency. (40 CFR 1508.16)
Major Federal action. (40 CFR 1508.18)
Mitigation. (40 CFR 1508.20)
NEPA process. (40 CFR 1508.21)
Scope. (40 CFR 1508.25)
Scoping. (40 CFR 1501.7)
Tiering. (40 CFR 1508.28)

(a) Channel realignment. Channel realignment includes the construction of a new channel or a new alignment and may include the clearing, snagging, widening, and/or deepening of the existing channel. (Channel Modification Guidelines, 43 FR 8276).

(b) Environmental assessment (EA). (40 CFR 1508.9)

(1) An environmental assessment is a concise public document for which a Federal agency is responsible that—

(i) Briefly provides sufficient evidence and analysis for determining whether to prepare an environmental impact statement or a finding of no significant impact.

(ii) Aids an agency’s compliance with the Act when no environmental impact statement is necessary.

(iii) Facilitates preparation of an environmental impact statement when one is necessary.

(2) An environmental assessment includes brief discussions of the need for the proposal, alternatives as required by section of the environmental impacts of the proposed action and alternatives, and a list of agencies and persons consulted.

(c) Environmental evaluation. The environmental evaluation (EE) (formerly referred to by NRCS as an environmental assessment) is the part of planning that inventories and estimates the potential effects on the human environment of alternative solutions to resource problems. A wide range of environmental data together with social and economic information is considered in determining whether a proposed action is a major Federal action significantly affecting the human environment. The environmental evaluation for a program, regulation, or individual action is used to determine the need for an environmental assessment or an environmental impact statement. It also aids in the consideration of alternatives and in the identification of available resources.

(d) Federally-assisted actions. These actions are planned and carried out by individuals, groups, or local units of government largely on nonfederal land with technical and/or financial assistance provided by NRCS.

(e) Interdisciplinary planning. NRCS uses an interdisciplinary environmental evaluation and planning approach in which specialists and groups having different technical expertise act as a team to jointly evaluate existing and future environmental quality. The interdisciplinary group considers structure and function of natural resource systems, complexity of problems, and the economic, social, and environmental effects of alternative actions. Public participation is an essential part of effective interdisciplinary planning. Even if an NRCS employee provides direct assistance to an individual land user, the basic data used is a result of interdisciplinary development of guide and planning criteria.

(f) Nonproject actions. Nonproject actions consist of technical and/or financial assistance provided to an individual, group, or local unit of government by NRCS primarily through a cooperative agreement with a local conservation district, such as land treatment recommended in the Conservation Operations, Great Plains Conservation, Rural Abandoned Mine, and Rural Clean Water Programs. These actions may include consultations, advice, engineering, and other technical
assistance that land users usually cannot accomplish by themselves. Non-project technical and/or financial assistance may result in the land user installing field terraces, waterways, field leveling, onfarm drainage systems, farm ponds, pasture management, conservation tillage, critical area stabilization and other conservation practices.

(g) Notice of intent (NOI) (40 CFR 1508.22). A notice of intent is a brief statement inviting public reaction to the decision by the responsible Federal official to prepare an EIS for a major Federal action. The notice of intent is to be published in the FEDERAL REGISTER, circulated to interested agencies, groups, individuals, and published in one or more newspapers serving the area of the proposed action.

(h) Project actions. A project action is a formally planned undertaking that is carried out within a specified area by sponsors for the benefit of the general public. Project sponsors are units of government having the legal authority and resources to install, operate, and/or maintain works of improvement.

(i) Record of Decision. (ROD) (40 CFR 1505.2). A record of decision is a concise written rationale by the RFO regarding implementation of a proposed action requiring an environmental impact statement. This was previously defined by NRCS as a Statement of Findings (SOF).

(j) Responsible Federal official (RFO). The NRCS Administrator is the responsible Federal official (RFO) for compliance with NEPA regarding implementation of a proposed action. NRCS state conservationists (STC’s) are the RFO’s for compliance with the provisions of NEPA in other NRCS-assisted actions.

(k) Significantly. (40 CFR 1508.27) "Significantly" as used in NEPA requires considerations of both context and intensity:

(1) Context. This means that the significance of an action must be analyzed in several contexts such as society as a whole (human, national), the affected region, the affected interests, and the locality. Significance varies with the setting of the proposed action. For instance, for a site-specific action, significance usually depends on the effects in the locale rather than in the world as a whole. Both short- and long-term effects are relevant.

(2) Intensity. This refers to the severity of impact. Responsible officials must bear in mind that more than one agency may make decisions about partial aspects of a major action.

The following should be considered in evaluating intensity:

(i) Impacts that may be both beneficial and adverse. A significant effect may exist even if the Federal agency believes that on balance the effect will be beneficial.

(ii) The degree to which the proposed action affects public health or safety.

(iii) Unique characteristics of the geographic area such as proximity to historic or cultural resources, park lands, prime farmlands, wetlands, wild and scenic rivers, or ecologically critical areas.

(iv) The degree to which the effects on the quality of the human environment are likely to be highly controversial.

(v) The degree to which the possible effects on the human environment are highly uncertain or involve unique or unknown risks.

(vi) The degree to which the action may establish a precedent for future actions with significant effects or represents a decision in principle about a future consideration.

(vii) Whether the action is related to other actions with individually insignificant but cumulatively significant impacts. Significance exists if it is reasonable to anticipate a cumulatively significant impact on the environment. Significance cannot be avoided by terming an action temporary or by breaking it down into small component parts.

(viii) The degree to which the action may adversely affect districts, sites, highways, structures, or objects listed in or eligible for listing in the National Register of Historic Places or may cause loss or destruction of significant scientific, cultural, or historical resources.

(ix) The degree to which the action may adversely affect an endangered or threatened species or its habitat that has been determined to be critical.
under the Endangered Species Act of 1973 as amended.

(x) Whether the action threatens a violation of Federal, State, or local law or requirements imposed for the protection of the environment.

(1) **Finding of no significant impact (FNSI).** (40 CFR 1508.13) "Finding of No Significant Impact" means a document by a Federal agency briefly presenting the reasons why an action not otherwise excluded (§1508.4) will not have a significant effect on the human environment, and an environmental impact statement therefore will not be prepared. It shall include the environmental assessment or a summary of it and shall note any other environmental documents related to it (§1501.7(a)(5)). If the assessment is included, the finding need not repeat any of the discussion in the assessment but may incorporate it by reference.

[44 FR 50579, Aug. 29, 1979, as amended at 44 FR 54981, Sept. 24, 1979]

§ 650.5 Environmental evaluation in planning.

(a) **General.** Environmental evaluation (EE) integrates environmental concerns throughout the planning, installation, and operation of NRCS-assisted projects. The EE applies to all assistance provided by NRCS, but planning intensity, public involvement, and documentation of actions vary according to the scope of the action. NRCS begins consideration of environmental concerns when information gathered during the environmental evaluation is used:

1. To identify environmental concerns that may be affected, gather baseline data, and predict effects of alternative courses of actions;
2. To provide data to applicants for use in establishing objectives commensurate with the scope and complexity of the proposed action;
3. To assist in the development of alternative courses of action; (40 CFR 1502.14). In NRCS-assisted project actions, nonstructural, water conservation, and other alternatives that are in keeping with the Water Resources Council’s Principles and Standards are considered, if appropriate.
4. To perform other related investigations and analyses as needed, including economic evaluation, engineering investigations, etc.
5. To assist in the development of detailed plans for implementation and operation and maintenance.

(c) **Decision points.** Figure 1 illustrates the decision points for compliance with NEPA in NRCS decision-making.
§ 650.6 Categorical exclusions.

(a) Some NRCS programs or parts of programs do not normally create significant individual or cumulative impacts on the human environment. Therefore, an EA or EIS is not needed. These are data gathering and interpretation programs and include:

1. Soil Survey—7 CFR part 611;
2. Snow Survey and Water Supply Forecasts—7 CFR part 612;
3. Plant Materials for Conservation—7 CFR part 613;
(4) Inventory and Monitoring—Catalog of Federal Domestic Assistance—10.908; and

(b) When any new action is planned under the programs identified in paragraph (a) of this section, the EE performed by the RFO is to identify extraordinary circumstances that might lead to significant individual or cumulative impacts. Actions that have potential for significant impacts on the human environment are not categorically excluded.

(c)(1) The NRCS restoration and conservation actions and activities identified in paragraph (d) of this section are eligible for categorical exclusion and require the RFO to document a determination that a categorical exclusion applies. Agency personnel will use the EE review process detailed in §650.5 to evaluate proposed activities for extraordinary circumstances and document the determination that the categorical exclusion applies. The extraordinary circumstances address the significance criteria provided in 40 CFR 1508.27.

(2) The extraordinary circumstances identified in paragraph (c)(1) of this section include:

(i) The proposed action cannot cause significant effects on public health or safety.

(ii) The proposed action cannot significantly affect unique characteristics of the geographic area such as proximity to historic properties or cultural resources, park lands, prime farmlands, floodplains, wetlands, wild and scenic rivers, or ecologically critical areas.

(iii) The effects of the proposed action on the quality of the human environment cannot be highly controversial.

(iv) The proposed action cannot have highly uncertain effects, including potential unique or unknown risks on the human environment.

(v) The proposed action cannot include activities or conservation practices that establish a potential precedent for future actions with significant impacts.

(vi) The proposed action is known to have or reasonably cannot be expected to have potentially significant environment impacts to the quality of the human environment either individually or cumulatively over time.

(vii) The proposed action cannot cause or promote the introduction of invasive species or have a significant adverse effect on any of the following special environmental concerns not previously identified in paragraph (c)(2)(B) of this section, such as: endangered and threatened species, environmental justice communities as defined in Executive Order 12898, wetlands, other waters of the United States, wild and scenic rivers, air quality, migratory birds, and bald and golden eagles.

(viii) The proposed action will not violate Federal or other applicable law and requirements for the protection of the environment.

(3) In the absence of any extraordinary circumstances as determined through NRCS’ EE review process, the activities will be able to proceed without preparation of an EA or EIS. Where extraordinary circumstances are determined to exist, the categorical exclusion will not apply, and the appropriate documentation for compliance with NEPA will be prepared. Prior to determining that a proposed action is categorically excluded under paragraph (d) of this section, the proposed action must:

(i) Be designed to mitigate soil erosion, sedimentation, and downstream flooding;

(ii) Require disturbed areas to be vegetated with adapted species that are neither invasive nor noxious;

(iii) Be based on current Federal principals of natural stream dynamics and processes, such as those presented in the Federal Interagency Stream Corridor Restoration Working Group document, “Stream Corridor Restoration, Principles, Processes, and Practices;”

(iv) Incorporate the applicable NRCS conservation practice standards as found in the Field Office Technical Guide;

(v) Not require substantial dredging, excavation, or placement of fill; and

(vi) Not involve a significant risk of exposure to toxic or hazardous substances.

(d) The use of the following categorical exclusions for a proposed action
§650.6 7 CFR Ch. VI (1-1-14 Edition)

does not waive NRCS compliance with any applicable legal requirement including, but not limited to, the National Historical Preservation Act or the Endangered Species Act. The following categorical exclusions are available for application to proposed actions provided the conditions described in paragraph (c) of this section are met:

(1) Planting appropriate herbaceous and woody vegetation, which does not include noxious weeds or invasive plants, on disturbed sites to restore and maintain the sites ecological functions and services;

(2) Removing dikes and associated appurtenances (such as culverts, pipes, valves, gates, and fencing) to allow waters to access floodplains to the extent that existed prior to the installation of such dikes and associated appurtenances;

(3) Plugging and filling excavated drainage ditches to allow hydrologic conditions to return to pre-drainage conditions to the extent practicable;

(4) Replacing and repairing existing culverts, grade stabilization, and water control structures and other small structures that were damaged by natural disasters where there is no new depth required and only minimal dredging, excavation, or placement of fill is required;

(5) Restoring the natural topographic features of agricultural fields that were altered by farming and ranching activities for the purpose of restoring ecological processes;

(6) Removing or relocating residential, commercial, and other public and private buildings and associated structures constructed in the 100-year floodplain or within the breach inundation area of an existing dam or other flood control structure in order to restore natural hydrologic conditions of inundation or saturation, vegetation, or reduce hazards posed to public safety;

(7) Removing storm debris and sediment following a natural disaster where there is a continuing and eminent threat to public health or safety, property, and natural and cultural resources and removal is necessary to restore lands to pre-disaster conditions to the extent practicable. Excavation will not exceed the pre-disaster condition;

(8) Stabilizing stream banks and associated structures to reduce erosion through bioengineering techniques following a natural disaster to restore pre-disaster conditions to the extent practicable, e.g., utilization of living and nonliving plant materials in combination with natural and synthetic support materials, such as rocks, riprap, geo-textiles, for slope stabilization, erosion reduction, and vegetative establishment and establishment of appropriate plant communities (bank shaping and planting, brush mattresses, log, root wad, and boulder stabilization methods);

(9) Repairing or maintenance of existing small structures or improvements (including structures and improvements utilized to restore disturbed or altered wetland, riparian, in stream, or native habitat conditions). Examples of such activities include the repair or stabilization of existing stream crossings for livestock or human passage, levees, culverts, berms, dikes, and associated appurtenances;

(10) Constructing small structures or improvements for the restoration of wetland, riparian, in stream, or native habitats. Examples of activities include installation of fences and construction of small berms, dikes, and associated water control structures;

(11) Restoring an ecosystem, fish and wildlife habitat, biotic community, or population of living resources to a determinable pre-impact condition;

(12) Repairing or maintenance of existing constructed fish passageways, such as fish ladders or spawning areas impacted by natural disasters or human alteration;

(13) Repairing, maintaining, or installing fish screens to existing structures;

(14) Repairing or maintaining principal spillways and appurtenances associated with existing serviceable dams, originally constructed to NRCS standards, in order to meet current safety standards. Work will be confined to the existing footprint of the dam, and no major change in reservoir or downstream operations will result;

(15) Repairing or improving (deepening/widening/armoring) existing auxiliary/emergency spillways associated with dams, originally constructed to
NRCS standards, in order to meet current safety standards. Work will be confined to the dam or abutment areas, and no major change in reservoir or downstream operation will result;

(16) Repairing embankment slope failures on structures, originally built to NRCS standards, where the work is confined to the embankment or abutment areas;

(17) Increasing the freeboard (which is the height from the auxiliary (emergency) spillway crest to the top of embankment) of an existing dam or dike, originally built to NRCS standards, by raising the top elevation in order to meet current safety and performance standards. The purpose of the safety standard and associated work is to ensure that during extreme rainfall events, flows are confined to the auxiliary/emergency spillway so that the existing structure is not overtopped which may result in a catastrophic failure. Elevating the top of the dam will not result in an increase to lake or stream levels. Work will be confined to the existing dam and abutment areas, and no major change in reservoir operations will result. Examples of work may include the addition of fill material such as earth or gravel or placement of parapet walls;

(18) Modifying existing residential, commercial, and other public and private buildings to prevent flood damages, such as elevating structures or sealing basements to comply with current State safety standards and Federal performance standards;

(19) Undertaking minor agricultural practices to maintain and restore ecological conditions in floodplains after a natural disaster or on lands impacted by human alteration. Examples of these practices include: mowing, haying, grazing, fencing, off-stream watering facilities, and invasive species control which are undertaken when fish and wildlife are not breeding, nesting, rearing young, or during other sensitive timeframes;

(20) Implementing soil control measures on existing agricultural lands, such as grade stabilization structures (pipe drops), sediment basins, terraces, grassed waterways, filter strips, riparian forest buffer, and critical area planting; and

(21) Implementing water conservation activities on existing agricultural lands, such as minor irrigation land leveling, irrigation water conveyance (pipelines), irrigation water control structures, and various management practices.

§ 650.7 When to prepare an EIS.

The following are categories of NRCS action used to determine whether or not an EIS is to be prepared.

(a) An EIS is required for:

1. Projects that include stream channel realignment or work to modify channel capacity by deepening or widening where significant aquatic or wildlife habitat exists. The EE will determine if the channel supports significant aquatic or wildlife habitat;

2. Projects requiring Congressional action;

3. Broad Federal assistance programs administered by NRCS when the environmental evaluation indicates there may be significant cumulative impacts on the human environment (§ 650.7(e)); and

4. Other major Federal actions that are determined after environmental evaluation to affect significantly the quality of the human environment (§ 650.7(b)). If it is difficult to determine whether there is a significant impact on the human environment, it may be necessary to complete the EE and prepare an EA in order to decide if an EIS is required.

(b) The RFO is to determine the need for an EIS for each action, program, or regulation. An environmental evaluation, using a systematic interdisciplinary analysis and evaluation of data and information responding to the five provisions of Section 102(2)(C) of NEPA, will assist the RFO in deciding whether the action requires the preparation of an EIS. In analyzing and evaluating environmental concerns, the RFO will answer the following questions:

1. Environmental impact. Will the proposed action significantly affect the quality of the human environment (40 CFR 1508.14)? For example, will it significantly alter or destroy valuable
wetlands, important farmlands, cultural resources, or threatened and endangered species? Will it affect social values, water quality, fish and wildlife habitats, or wilderness and scenic areas?

(2) Adverse environmental effects that cannot be avoided. What are the important environmental amenities that would be lost if the proposed action were implemented?

(3) Alternatives. Are there alternatives that would achieve the planning objectives but avoid adverse environmental effects?

(4) Short-term uses versus long-term productivity. Will the proposed actions, in combination with other actions, sacrifice the enhancement of significant long-term productivity as a tradeoff for short-term uses?

(5) Commitment of resources. Will the proposed action irreversibly and irretrievably commit the use of resources such as important farmlands, wetlands, and fish and wildlife habitat?

(c) Criteria for determining the need for a program EIS:

(1) A program EIS is required if the environmental evaluation reveals that actions carried out under the program have individually insignificant but cumulatively significant environmental impacts.

(2) A project EIS, in lieu of a program EIS, is required if the environmental evaluation reveals that actions carried out under the program will have both individually and cumulatively significant environmental impacts. (7 CFR Parts 620 through 623 and 640 through 643).

(d) The RFO, through the process of tiering, is to determine if a site-specific EA or EIS is required for an action that is included in a program EA or EIS.

§ 650.9 NEPA and interagency planning.

(a) Lead agency. (1) NRCS is to be the lead agency for actions under programs it administers. If the actions affect more than one State, the NRCS Administrator is to designate one NRCS state conservationist as the RFO.

(2) NRCS normally takes the role of lead agency in actions that share program responsibilities among USDA agencies if NRCS provides the majority of funds for the actions. If the lead agency role is in question, the role of NRCS and other USDA agencies is to be determined by the USDA Environmental Coordinator, Office of Environmental Quality Activities.

(3) If NRCS and Federal agencies outside USDA cannot agree on which will be the lead agency and which will be the cooperating agencies, the procedures in 40 CFR 1501.5(e) are to be followed.

(4) NRCS, as lead agency, is to coordinate the participation of all concerned agencies in developing the EIS according to the provisions of 40 CFR 1501.6(a).

(b) Other actions that the EE reveals may be a major Federal action significantly affecting the quality of the human environment.

(c) Criteria for determining the need for a program EA:

(1) A program EA is to be prepared when NRCS has determined, based on the environmental evaluation, that a program EIS is not required and the program and actions to implement the program are not categorically excluded; and

(2) A program EA may also be prepared to aid in NRCS decision-making and to aid in compliance with NEPA.

§ 650.8 When to prepare an environmental assessment (EA).

An environmental assessment (EA) is to be prepared for:

(a) Land and water resource projects that are not included in § 650.7(a)(1) through (4) for which State and local units of government receive Federal technical and financial assistance from NRCS (7 CFR parts 620 through 623; and 640 through 643); and

(b) Cooperating agencies. (1) NRCS is to request, as appropriate, the assistance of cooperating agencies in preparing the environmental evaluation. This assistance will broaden the expertise in the planning and help to avoid

[44 FR 50579, Aug. 29, 1979, as amended at 73 FR 35886, June 25, 2008]
future conflict. NRCS is to request assistance in determining the scope of issues to be addressed and identifying the significant issues related to a proposed action from Federal agencies that have jurisdiction by law or special expertise.

(2) NRCS is to act as a cooperating agency if requested. NRCS may request to be designated as a cooperating agency if proposed actions may affect areas of NRCS expertise, such as prime farmlands, soils, erosion control, and agricultural sources of nonpoint pollution. NRCS, as a cooperating agency, is to comply with the requirements of 40 CFR 1501.6(b) to the extent possible depending on funds, personnel, and priority. If insufficient funds or other resources prevent NRCS from participating fully as a cooperating agency, NRCS is to request the lead agency to provide funds or other resources which will allow full participation.

(c) Scoping. See 40 CFR 1501.7 for a definition of scoping.

(1) NRCS is to use scoping to identify and categorize significant environmental issues in its environmental evaluation. Formalized scoping is used to insure that an analytical EIS can be prepared that will reduce paperwork and avoid delay. Scoping allows NRCS to obtain the assistance and consultation of affected agencies that have special expertise or legal jurisdiction in the proposed action. If early environmental evaluation identifies a need for an EIS, NRCS is to publish a notice of intent (NOI) to prepare an EIS. The NOI is to request the assistance of all interested agencies, groups, and persons in determining the scope of the evaluation of the proposed action.

(2) Normally a scoping meeting is held and Federal, State, or local agencies that have special expertise or legal jurisdiction in resource values that may be significantly affected are requested to participate. The scoping meeting will identify agencies that may become cooperating agencies.

(3) In the scoping meeting, the range of actions, alternatives, and impacts to be evaluated and included in the EIS as defined in (40 CFR 1508.25) are to be determined. Tiering (40 CFR 1508.28) may be used to define the relation of the proposed statement to other statements.

(4) Periodic meetings of the cooperating agencies are to be held at important decisionmaking points to provide timely interagency, interdisciplinary participation.

(5) Scoping is to include the items listed in 40 CFR 1501.7(a) and may also include any of the activities in 40 CFR 1501.7(b). Appropriate, timely requests and notification are to be made to promote public participation in scoping in accordance with paragraph (d) of this section.

(6) The RFO through the scoping process will set time and page limits as prescribed in 40 CFR 1501.8. Time and page limits are established by NRCS in consultation with sponsors and others according to the projected availability of resources. The RFO is to make the applicant aware of the possible need for revising time and page limits because of changes in resources.

(d) Public participation—(1) General. Public participation activities begin early in the EE and are to be appropriate to the proposed action. For example, extensive public participation activities are required in the implementation of new programs and project actions, but limited public participation is appropriate for nonproject technical and financial assistance programs on nonfederal land.

(2) Early public involvement. The public is to be invited and encouraged to participate in the early stages of planning, including the consideration of the potential effects of NRCS-assisted actions on significant environmental resources such as wetlands, flood plains, cultural values, endangered species, important farmland.

(3) Project activities. The following are general considerations for providing opportunities for public participation:

(i) Identification of interested public. The interested public consisting of but not limited to individuals, groups, organizations, and government agencies are to be identified, sought out, and encouraged to participate in and contribute to interdisciplinary planning and environmental evaluation.

(ii) Public notices. (40 CFR 1506.6) If the effects of an action are primarily of local concern, notice of each public
§ 650.10 Adoption of an EIS prepared by a cooperating agency.

(a) If NRCS adopts an EIS prepared by another Federal or State agency, the RFO is to review the document to insure that it meets the requirements of the CEQ regulations and NRCS-NEPA procedures.

(b) If the actions included in the EIS are substantially the same as those proposed by NRCS, the RFO is to recirculate the EIS as “final.” The final EIS is to include an appropriate explanation of the action. If these actions are not substantially the same, the EIS is to be supplemented and recirculated as a draft EIS. The RFO is to inform the preparing agency of the proposed action.

(c) If the adopted EIS is not final, if it is the subject of a referral under 40 CFR part 1504, or if the statement’s adequacy is in litigation, the RFO is to include an appropriate explanation in the EIS.

(d) The RFO is to take appropriate action to inform the public and appropriate agencies of the proposed action.

§ 650.11 Environmental documents.

(a) NRCS is to use the following documents in compliance with NEPA (see § 650.4):

(1) Environmental assessments (EA)

(2) Environmental impact statements (EIS)

(3) Notice of intent (NOI)

(4) Finding of no significant impact (FNSI)

(5) Record of decision (ROD)

(b) The format and content of each document is to be appropriate to the action being considered and consistent with the CEQ regulations.

(1) To reduce duplication, NRCS may combine environmental documents with other planning documents of the same proposal, as appropriate. For example, NRCS, in consultation with CEQ and the office of the Secretary of Agriculture, has determined that each EIS is to satisfy the requirements for a regulatory impact analysis as required.
§ 650.12 NRCS decisionmaking.

(a) General. The purpose of these procedures is to insure that environmental information is provided to decision makers in a timely manner. The NEPA process is a part of NRCS decisionmaking. The RFO is to insure that the policies and purposes of NEPA and CEQ regulations are complied with in NRCS decisionmaking by:

(1) Including in all decision documents and supporting environmental documents a discussion of all alternatives considered in the decision. Alternatives to be considered in reaching a decision will be available to the public.

(2) Submitting relevant environmental documents, comments, and responses with other decision documents through the review process.

(3) Including in the record of formal rulemaking or adjudicatory proceedings relevant environmental documents, comments and responses.

(4) Providing for pre- and post-project monitoring (40 CFR 1505.2(c), 1505.3) and evaluation in representative projects to insure that planning and evaluation procedures are performed according to sound criteria.

and other substantive comments that were not adequately discussed in the draft EIS are to be incorporated in the final EIS.

(5) Appendix. The RFO may use an appendix to an EA or EIS. If an appendix is too voluminous to be circulated with the EIS, the RFO is to make it available on request. If an appendix is included it is to—

(i) Meet the requirements of 40 CFR 1502.18;

(ii) Identify any methodologies used (40 CFR 1502.24) and make explicit reference to other sources relied on for conclusions; and

(iii) Briefly describe the relationship between the benefit-cost analysis and any analyses of unquantified environmental impacts, values, and amenities. “For purposes of complying with the Act, the weighing of the merits or drawbacks of the various alternatives need not be displayed in a monetary cost benefit and should not be when these are important qualitative considerations.” (40 CFR 1502.23).
(b) Decision points in NRCS-assisted projects. NRCS administers programs that may have a significant effect on the human environment. Program procedures incorporate provisions for compliance with NEPA and for providing environmental information to the public, other agencies, and decision makers in a timely manner. NRCS provides technical and financial assistance for projects under the Watershed Protection and Flood Prevention and the Resource Conservation and Development (RC&D) programs. These usually require the preparation of project EA’s or EIS’s. The major decisionmaking points and their relation to NEPA compliance are as follows:

(1) For Watershed Protection and Flood Prevention projects:

(i) Application for assistance by the sponsoring local organization (SLO).

(ii) A preauthorization report identifying goals, alternatives, and effects of alternatives (including environmental impacts) prepared by the RFO and submitted to the applicant for decision. It is circulated to local, State, and Federal agencies and public comment is solicited. A decision is made to stop planning assistance or to develop a watershed plan.

(iii) Granting of planning authorization by the Administrator. The RFO must provide an evaluation of the potential environmental impacts to obtain the authorization.

(iv) A watershed agreement between the SLO and NRCS. The agreement is based on a completed watershed plan and associated environmental documents, which have been adequately reviewed within NRCS.

(v) A project agreement between the SLO and the RFO executed after the NEPA process is complete and the watershed plan has been approved and final plans and specifications have been developed.

(2) For RC&D measure plans:

(i) A request for assistance (measure proposal) is reviewed by the RC&D council to insure that the proposal is in accordance with the RC&D area plan. The proposal is then referred to NRCS.

(ii) A preliminary report is prepared by the RFO to identify goals, alternatives, and effects (including environmental impacts). The report is submitted to the sponsor for review. The sponsor may then apply to NRCS for planning assistance for measures considered in the preliminary report.

(iii) An authorization for planning assistance is granted by the RFO.

(iv) The RC&D measure plan is signed by the applicant and the RFO after the preparation and review of the measure plan and environmental documents.

(v) A project agreement is signed between the applicant and the RFO after the NEPA process is complete, the measure plan has been approved, and final plans and specifications have been prepared.

(c) Environmental Impact Statement (EIS) and Record of decision

The RFO is to prepare a concise record of decision (ROD) for actions requiring an EIS. The record of decision is to be prepared and signed by the RFO following the 30-day administrative action period initiated by the EPA’s publication of the notice of availability of the final EIS in the FEDERAL REGISTER. It is to serve as the public record of decision as described in 40 CFR 1505.2 of the CEQ regulations. The ROD is to be distributed to all who provided substantive comments on the draft EIS and all others who request it. A notice of availability of the ROD will be published in the FEDERAL REGISTER and local newspaper(s) serving the project area. The RFO may choose to publish the entire ROD.

(d) Environmental Assessments and Finding of No Significant Impact (FNSI)—(1) EA’s. If the EA indicates that the proposed action is not a major Federal action significantly affecting the quality of the human environment, the RFO is to prepare a finding of no significant impact (FNSI).

(2) Availability of the FNSI (40 CFR 1501.4(e)(2)). In accordance with CEQ regulations at 40 CFR 1501.4(e)(2), NRCS shall make the EA/FNSI available for public review for thirty days in the following instances: The proposed action is, or closely similar to, one which normally requires the preparation of an EIS as defined by NRCS NEPA implementing regulations at §650.7, or the nature of the action is one without precedent. When availability for public review for thirty days...
§ 650.13 Review and comment.

In addition to the requirements of 40 CFR 1503, 1506.10 and 1506.11, NRCS will take the following steps in distributing EIS’s for review and comment:

(a) Draft EIS’s. Five copies of the draft EIS are to be filed by the RFO with the Office of Environmental Review, A-104, Environmental Protection Agency (EPA), Washington, D.C. At the same time, the RFO is to send copies of the draft EIS to the following:

(1) Other Federal agencies. The regional office of EPA and other agencies that have jurisdiction by law or special expertise with respect to any environmental effect, other Federal agencies (including appropriate field and regional offices), and affected Indian tribes.

(2) State and local agencies. OMB Circular No. A-95 (Revised), through its system of State and areawide clearing-houses, provides a means for obtaining the views of State and local environmental agencies that can assist in the preparation and review of EIS’s.

(3) Organizations, groups, and individuals. A copy of the draft EIS is to be sent to the appropriate official of each organization or group and each individual of the interested public (§650.9(d)(3)(i)) and to others as requested. A charge may be made for multiple copy requests.

(b) Time period for comment. The time period for review ends 45 days after the date EPA publishes the notice of public availability of the draft in the Federal Register. A 15-day-extension of time for review and comment is to be considered by the RFO when such requests are submitted in writing. If neither comments nor a request for an extension is received at the end of the 45-day period, it is to be presumed that the agency or party from whom comments were requested has no comments to make.

(c) News releases. In addition to the notice of availability published in the Federal Register by EPA, the RFO is to announce the availability of the draft EIS in one or more newspapers serving the area.

(d) Revising a draft EIS. If significant changes in the proposed action are made as a result of comments on the draft EIS, a revised draft EIS may be necessary. The revised draft EIS is to be recirculated for comment in the same manner as a draft EIS.

(e) Final EIS’s. After the review period for the draft EIS, the RFO is to prepare a final EIS, making adjustments where necessary by taking into consideration and responding to significant comments and opposing viewpoints received on the draft EIS. The following steps are to be taken in filing and distributing the final EIS:

(1) Letters of comment are to be appended to the final EIS. If numerous repetitive responses are received, summaries of the repetitive comments and a list of the groups or individuals who commented may be appended in lieu of the actual letter.

(2) The RFO is to send five copies of the final EIS to EPA’s Office of Environmental Review, and a copy of the final EIS to each State and Federal agency, organization, group, and individual who commented on the draft EIS. Single copy requests for copies of the final EIS will be provided without charge. A charge may be made for multiple copy requests.

(3) During the 30-day administrative action period noted in §650.12(c), NRCS will make its final EIS available to the public (40 CFR 1506.10).

(f) Supplements to EIS’s. (1) If NRCS determines that it is necessary to clarify or amplify a point of concern raised after the final EIS is filed, appropriate clarification or amplification is to be sent to EPA with information copies furnished to those who received copies of the final EIS. The waiting periods do not apply.
§ 650.20 Reviewing and commenting on EIS’s prepared by other agencies.

(a) NRCS employees assigned to review and comment on EIS’s prepared by other agencies are to be familiar with NRCS policies and guidelines contained in this part, and NEPA.

(b) EIS’s received for review by NRCS for which NRCS has expertise or interest shall be responded to promptly. Comments are to be objective with the intent to offer suggestions to help minimize adverse impacts of the proposed action to ensure the health and welfare of the agricultural community. Comments are to be based on knowledge readily available. Field office technical guides, soil surveys, field investigation reports, and other resource data and reference materials developed by NRCS and other agencies should be used and cited. It is not intended that special surveys or investigations be conducted to acquire additional information for use in preparing comments.

(c) The NRCS reviewer should consider the following kinds of concerns—(1) The suitability or limitations of the soils for the proposed action. Would an alternative route, location, or layout minimize land use problems and adverse environmental impacts?

(b) Provisions for control of erosion and management of water during construction. Are there resources downstream that would be affected by sediment from the construction area, and does the statement provide for adequate control measures? Will lack of erosion control cause air pollution? Is the stockpiling of topsoil for future use considered in the EIS?

(3) Provisions for soil and water conservation management measures on project lands, rights-of-way, access roads, and borrow areas. Does the statement indicate that enduring soil and water practices are to be installed and maintained?

(4) The effect of water discharges from project lands or rights-of-way onto other properties. Will discharges cause erosion or flooding on other lands? Will discharges affect water quality?

(5) The effects of disruption of the natural drainage patterns and severance of private land units. Does the statement indicate that natural drainage patterns will be maintained? Will bridges, culverts, and other water control structures be located to ensure that adjacent lands are not flooded or otherwise restricted in use? Does the EIS describe the effects of severance on private land ownerships?

(6) The impact on existing soil and water conservation management systems. To what extent will conservation systems be altered, severed, or suffer blocked outlets? Will land use or cover be affected?

(7) Impacts on prime and unique farmland. Would an alternative location or route require less prime farmland? Does the EIS consider secondary effects on prime farmland? What benefits are foregone if prime farmland is taken?

(8) Impacts on ecosystems. Does the EIS describe impacts on major plant communities, and terrestrial and aquatic ecosystems?

(9) Impacts on NRCS-assisted projects. Does the statement reflect the effect of the proposed action on present or planned NRCS assisted projects?

(d) EIS’s referred to NRCS for departmental comments. EIS’s referred by the USDA Coordinator for Environmental Quality Activities to the NRCS national office may designate NRCS as...
§ 650.21 Working relations with the U.S. Environmental Protection Agency (EPA) and related State environmental agencies.

(a) Background. The authorities and missions of NRCS, EPA, and state environmental agencies make it imperative that an effective cooperative and coordinative working relationship be developed and maintained in areas of mutual concern. These common areas include air quality, water quality, pesticides, waste recycling and disposal, environmental considerations in land use, Environmental Impact Statements (EIS's) and environmental considerations in the conservation and development of natural resources.

(b) Policy. NRCS will work closely with EPA in accordance with the provisions of the EPA-USDA Memorandum of Understanding July 31, 1974, at all administrative levels and with related state agencies to meet statutory requirements and to achieve harmonious implementation of all actions of mutual concern directed to improving or maintaining the quality of the environment.

(c) Responsibility—(1) NRCS national office. The Deputy Administrator for Field Services is responsible for overall coordination with EPA at the national office level. The Deputy Administrator for Water Resources is responsible for contacts with EPA in relation to activities of the Water Resources Council on water and related land resource planning and for coordinating work with EPA on EIS development.

(2) Technical service center. The TSC director is responsible for contacts and coordination with EPA regional offices within the group of states served by the TSC.

(3) NRCS state office. The state conservationist is responsible for contacts and coordination with regional representatives of EPA and state environmental agencies in matters of mutual concern within his state.

(d) Coordination and implementation. (1) The NRCS national office will:
   (i) Within the framework of USDA agreements and guidelines, develop copies of its letter of comments to CEQ.

   [42 FR 40118, Aug. 8, 1977]
agreements for undertaking specific activities or projects of national significance and mutual advantage.

(ii) Assist EPA as requested in developing EPA policy, guidelines, and standards.

(iii) Consider EPA needs in soil survey and land, inventory, and monitoring activities.

(iv) Maintain needed liaison and develop mutual guidelines with EPA on water resources work and in coordinating EIS's.

(v) Advise EPA regarding soils, plant materials, and soil and water conservation techniques.

(vi) Establish procedures for periodic review of NRCS national standards for treatment systems and practices for agricultural pollution abatement, including wind and water erosion and sediment control, transport of pesticides, organic matter and fertilizers, and burning of residues or clearing debris.

(2) The TSC director will:

(i) Within the framework of NRCS memorandums and guidelines coordinate with the EPA regional administrator(s) the development of needed agreements for undertaking specific activities or projects of multistate significance and mutual advantage.

(3) The state conservationist will:

(i) Obtain early input of EPA and interested state and local environmental agencies in the planning process for projects or measures within the state impacting on the environment.

(ii) Coordinate preparations of NRCS practice standards and procedures for agricultural pollution abatement within the state with EPA and related state agencies.

(iii) Encourage the development of a coordinated review and approval process within the state with EPA and appropriate state and local agencies including conservation districts for actions of mutual concern.

(iv) Attempt to resolve all EPA areas of concern on NRCS assisted project-type actions within the state before a final EIS is prepared.

§ 650.22 Rare, threatened, and endangered species of plants and animals.

(a) Background. (1) A variety of plant and animal species of the United States are so reduced in numbers that they are threatened with extinction. The disappearance of any of these would be a biological, cultural, and in some instances an economic loss. Their existence contributes to scientific knowledge and understanding, and their presence adds interest and variety to life.

(2) The principal hazard to threatened and endangered species is the destruction or deterioration of their habitats by human activities such as industrialization, urbanization, agriculture, lumbering, recreation, and transportation. These activities of man will continue but the necessity of recognizing their adverse impacts and selecting alternatives that minimize or eliminate such impacts on threatened and endangered species is imperative.

(3) The Endangered Species Act of 1973 (Pub. L. 93-205, 87 Stat. 884 (16 U.S.C. 1531 et seq.)) provides a means whereby the ecosystems upon which endangered and threatened species depend may be maintained and a program for the conservation of such species. The Act also provides that, in addition to the Department of the Interior, “All other federal departments and agencies shall, in consultation with and with the assistance of the Secretary of Interior, utilize their authorities for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected states, to be critical.” The Act also:

(i) Defines endangered species as any species in danger of extinction throughout all or a significant portion of its range and threatened species as any species likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act uses the category “‘threatened.’” The term “‘rare’” is not used.

(ii) Further defines species as including any subspecies of fish or wildlife or plants and any other group of fish and
wildlife of the same species or smaller taxa in common spatial arrangements that interbreed when mature.

(iii) Provides for the Secretary of the Interior to enter into cooperative agreements with states for the purpose of implementing state programs for the conservation of endangered and threatened fish and wildlife. This assistance may include financial grants.

(iv) Provides national lists of endangered and threatened animal and plant species to be maintained by the Secretary of the Interior and published in the Federal Register. When resident fish and wildlife are added to the list, the affected states are to be consulted by the Secretary. The Secretary of the Smithsonian Institution is preparing a list of endangered or threatened plant species.

(b) Policy. The Act gives NRCS additional direction for participation in the conservation and protection of endangered and threatened species. As the principal federal agency concerned with land use planning of privately owned rural land and with professional conservation employees headquartered in almost every county, NRCS is uniquely capable of playing a vital role. Additional training will be provided as needed to meet NRCS responsibilities. NRCS will assist in the conservation of threatened and endangered species and consistent with legal requirements avoid or prevent activities detrimental to such species. NRCS concern for these species will not be limited to those listed by the Secretary of the Interior and published in the Federal Register, but will include species designated by state agencies as rare, threatened, endangered, etc.

(c) Responsibility—(1) NRCS national office. The Administrator will arrange for consultation and coordination of NRCS national office activities with the U.S. Fish and Wildlife Service, other federal agencies, and national organizations.

(2) Technical service center. The TSC director will, within the group of states served by the TSC, arrange for consultation and coordination with regional representatives of the U.S. Fish and Wildlife Service, other Federal agencies, and national and regional organizations.

(3) NRCS state office. The state conservationist will arrange for consultation and coordination with the state fish and game or conservation agency, other state agencies, state organizations and foundations, conservation districts, and state representatives of federal agencies and national organizations.

(d) Coordination and implementation. (1) The NRCS national office will:

(i) Within the framework of national legislation, USDA agreements, and NRCS objectives, develop NRCS policies and directives for guiding agency efforts that will protect threatened and endangered species and for avoiding actions that jeopardize the continued existence of such species and their critical habitats.

(ii) Maintain needed liaison and develop mutual understanding with the U.S. Fish and Wildlife Service and other concerned federal agencies.

(iii) Establish procedures for periodic review of NRCS participation in the national effort to conserve these species.

(2) The TSC director will: (i) Within the framework of NRCS policies and guidelines, arrange for needed liaison and understanding with regional counterparts of other federal agencies within the group of states served by the TSC and keep state conservationists informed of developments within such states.

(ii) Provide guidance and assistance to state conservationists in carrying out NRCS policies and guidelines.

(3) The state conservationist will develop procedures to establish working relationships with other concerned federal agencies, state fish and wildlife or conservation agencies, conservation districts, concerned scientists in state university systems and natural history museums, and other informed persons and organizations to offer assistance in:

(i) Preparing or maintaining lists of the state’s threatened and endangered species.

(ii) Determining the geographic occurrence of endangered and threatened species, the nature of their habitat, and that portion of the habitat that is critical to the survival, maintenance, or increase of these species.
§ 650.23 Natural areas.

(a) Background. (1) Natural areas are defined as land or water units where natural conditions are maintained insofar as possible. Natural conditions usually result from allowing ordinary physical and biological processes to operate with a minimum of human intervention. Manipulations may be required on natural areas to maintain or restore features that the areas were established to protect.

(2) Natural areas may be designated areas of Federal, non-Federal government, or privately controlled land. Designation may be formal as provided for under federal regulations for areas of federal land to be administered as natural areas or by foundations or conservation organizations specifically created to acquire and maintain natural areas. Designation may be informal in the case of private landowners who designate a specific area as a natural area and manage it accordingly. Several professional societies concerned with renewable natural resources encourage establishment of natural areas withdrawn from economic uses and recognition of natural areas maintained and managed in economic enterprises.

(3) Natural areas are established and maintained for a variety of purposes including:

(i) Furthering science and education. Natural areas serve as sites for research and outdoor classrooms for study of plant and animal communities in environments with particular ecological conditions.

(ii) Monitoring the surrounding environment. Natural areas serve as gauges against which to evaluate changes in land use, vegetation, animal life, air quality, or other environmental values.

(iii) Providing recreation attractions. Natural areas are valued by many people for their scenic, wild, and undisturbed character but must be protected, as needed, to prevent disturbance or alteration of the resources.

(iv) Preserving unique values. Natural areas may be established to protect scenic, biologic, geologic, or paleontologic features.

(v) Serving as a genetic base for native plants and animals. Natural areas may be established to preserve examples of land and water ecosystems with their full range of genetic diversity of native plants and animals including threatened and endangered species.

§ 650.23 Natural areas.

(iii) Discussing the kinds of measures important to preserve their habitat.

(iv) A monitoring program that would obtain advanced warning of actions or conditions that could further endanger these species, thereby enabling NRCS and others to take appropriate protective action.

(v) Assisting recovery teams, as appropriate, in preparing species recovery plans of those endangered and threatened species included in Federal lists.

(4) The state conservationist will also:

(i) Keep NRCS area and field offices informed of species listed as being threatened or endangered, geographic area in which they are found, and information such as their numbers, preferred habitat, and critical factors.

(ii) Review the status of threatened and endangered species each December and send a report of the review to the Administrator.

(5) NRCS district conservationists within the geographic range of threatened and endangered species will examine conservation district programs and NRCS operations to evaluate their effects on these species, and recommend to district officials and the state conservationist any action needed for their protection.

(6) NRCS field employees within the geographic range of threatened and endangered species will be continually alert to conditions, actions, or trends that may adversely affect the welfare of these species and report adverse situations to the state conservationist.
(2) **Technical service center.** The TSC director will designate a TSC plant sciences discipline leader to provide leadership, appropriate liaison, and assistance on natural areas to NRCS state offices.

(3) **NRCS state office.** The state conservationist will designate an appropriate NRCS representative to work with other agencies and groups, and will coordinate assistance on natural areas needed by area and field offices.

(d) **Coordination and implementation.**

(1) NRCS technical assistance will be furnished to representatives of administering agencies, foundations, groups, and individuals when requested through conservation districts. Conservation district officers will be encouraged to recognize appropriate natural areas concepts and programs and to participate in them.

(2) NRCS employees will report to state conservationists abuses and potential or actual damages to natural areas that may be found in the course of ordinary business.

(3) NRCS will cooperate with professional societies, groups, and individuals in locating areas suitable for and needed as natural areas.

(4) NRCS employees providing technical assistance to land users must inform them about the impact their decisions may have on adjacent or nearby natural areas. Land users will be encouraged to consult with concerned agencies, societies, and individuals to arrive at mutually satisfactory land use and treatment.

(5) Recommended classification systems for characterizing areas designated as ecological preserves or as natural areas are contained in the following publications:

- **Soil Taxonomy, a Basic System of Soil Classification for Making and Interpreting Soil Surveys,** USDA-NRCS Agricultural Handbook 436.
- **Forest Cover Types of North America Exclusive of Mexico,** Report of the Committee on Forest Cover Types, Society of American Foresters, 1964.
- Wetlands classification described by the U.S. Fish and Wildlife Service in its Circular 39.

NRCS will, to the extent feasible, use these classification systems when providing technical assistance on public and private natural areas and ecological preserves.

(6) The NRCS published National List of Scientific Plant Names will be used when scientific names or name symbols are needed for automatic data processing.

§ 650.24 Scenic beauty (visual resource).

(a) **Background.** Contributions to scenic beauty are a normal product of NRCS work. Strip-cropping, field borders, field windbreaks, and ponds are examples. Emphasis is given to those soil and water conservation measures that contribute to a productive and efficient agriculture and increase the attractiveness of rural America and are in line with goals and objectives of conservation districts. This is best accomplished by considering the landscape visual resource when providing planning assistance to individual landowners, groups, units of government, and watershed and resource conservation development project sponsors. NRCS responsibilities in recreation also offer opportunities to develop the scenic beauty of the rural landscape. Department of Agriculture Secretary's Memorandum 1695, May 28, 1970, "Protecting and Improving The Quality of the Environment," includes scenic beauty as an objective of the Department's programs.

(b) **Policy.** NRCS will: (1) Provide technical assistance with full consideration of alternative management and development systems that preserve scenic beauty or improve the visual resource; (2) emphasize the application of conservation practices having scenic beauty or visual resource values particularly in waste management systems; field borders, field windbreaks, wetland management, access roads, critical area treatment; design and management of ponds, stream margins, odd areas, and farmsteads; siting or positioning of structures and buildings to be in harmony with the landscape while reducing the potential for erosion; using native and other adaptable plants for conservation which enhance scenic beauty and create variety while...
linking beauty with utility; (3) promote personal pride in landowners in the installation, maintenance, and appearance of conservation practices and their properties; (4) select suitable areas for waste products and use of screens to hide “eyesore” areas, and (5) encourage conservation districts to include practices which promote scenic beauty in their annual and long-range programs.

(c) Responsibility. The Natural Resources Conservation Service will provide technical assistance through conservation districts to landowners, operators, communities, and state and local governments in developing programs relating to scenic beauty.

(1) NRCS national office. The Administrator will:

(i) Assign appropriate NRCS national office leadership to insure that enhancement of scenic beauty is included in national information, policy, guidelines, standards, guides to specifications for conservation practices without impairing basic soil and water conservation functions.

(ii) Emphasize in plant material center management and in plant materials functions that locating and evaluating plants for forage, erosion control, and recreation or wildlife uses be carried out with full attention to visual resource value.

(2) NRCS state office. The state conservationist will:

(i) Assign appropriate staff members to provide leadership in carrying out scenic beauty policy and procedure within the state.

(ii) Develop and keep current a landscape management plan to improve and maintain the appearance of all real properties under NRCS control, and provide appropriate assistance to owners and managers of properties leased or rented by NRCS.

(iii) Give emphasis to preserving scenic beauty and contributing to the visual resource in the NRCS information program whenever opportunities exist.

(d) Coordination and implementation.

(1) The governing body of each conservation district will be encouraged to revise or update its district program to appropriately provide for beautification of the countryside through applicable land use changes and effective soil and water conservation treatment.

(2) In providing assistance to watershed and resource conservation and development project sponsors and other resource planning groups for soil, water, and related resources, emphasis will be given to measures that preserve natural beauty or contribute to the quality of the visual resource.

(3) Local organizations and groups interested in scenic beauty will be contacted and consulted for cooperation in and coordination with NRCS and conservation district efforts.

§ 650.25 Flood-plain management.

Through proper planning, flood plains can be managed to reduce the threat to human life, health, and property in ways that are environmentally sensitive. Most flood plains are valuable for maintaining agricultural and forest products for food and fiber, fish and wildlife habitat, temporary flood-water storage, park and recreation areas, and for maintaining and improving environmental values. NRCS technical and financial assistance is provided to land users primarily on non-Federal land through local conservation districts and other State and local agencies. Through its programs, NRCS encourages sound flood-plain management decisions by land users.

(a) Policy—(1) General. NRCS provides leadership and takes action, where practicable, to conserve, preserve, and restore existing natural and beneficial values in base (100-year) flood plains as part of technical and financial assistance in the programs it administers. In addition, 500-year flood plains are taken into account where there are “critical actions” such as schools, hospitals, nursing homes, utilities, and facilities producing or storing volatile, toxic, or water-reactive materials.

(2) Technical assistance. NRCS provides leadership, through consultation and advice to conservation districts and land users, in the wise use, conservation, and preservation of all land, including flood plains. Handbooks, manuals, and internal memoranda set forth specific planning criteria for addressing flood-plain management in NRCS-assisted programs. The general procedures and guidelines in this part
Natural Resources Conservation Service, USDA § 650.25

comply with Executive Order (E.O.) 11988, Floodplain Management, dated May 24, 1977, and are consistent with the Water Resources Council’s Unified National Program for Floodplain Management.

(3) Compatible land uses. The NRCS Administrator has determined that providing technical and financial assistance for the following land uses is compatible with E.O. 11988:

(i) Agricultural flood plains that have been used for producing food, feed, forage, fiber, or oilseed for at least 3 of the 5 years before the request for assistance; and

(ii) Agricultural production in accordance with official State or designated area water-quality plans.

(4) Nonproject technical and financial assistance programs. The NRCS Administrator has determined that NRCS may not provide technical and financial assistance to land users if the results of such assisted actions are likely to have significant adverse effects on existing natural and beneficial values in the base flood plain and if NRCS determines that there are practicable alternatives outside the base flood plain. NRCS will make a case-by-case decision on whether to limit assistance whenever a land user proposes converting existing agricultural land to a significantly more intensive agricultural use that could have significant adverse effects on the natural and beneficial values or increase flood risk in the base flood plain. NRCS will carefully evaluate the potential extent of the adverse effects and any increased flood risk.

(5) Project technical and financial assistance programs. In planning and installing land and water resource conservation projects, NRCS will avoid to the extent possible the long and short-term adverse effects of the occupancy and modification of base flood plains. In addition, NRCS also will avoid direct or indirect support of development in the base flood plain wherever there is a practicable alternative. As such, the environmental evaluation required for each project action (§650.5 of this part) will include alternatives to avoid adverse effects and incompatible development in base flood plains. Public participation in planning is described in §650.6 of this part and will comply with section 2(a)(4) of E.O. 11988. Floodplain management requires the integration of these concerns into NRCS’s National Environmental Policy Act (NEPA) process for project assistance programs as described in Section 650 of this part.

(6) Real property and facilities under NRCS ownership or control. NRCS owns or controls about 30 properties that are used primarily for the evaluation and development of plant materials for erosion control and fish and wildlife habitat plantings (7 CFR Part 613, Plant Materials Centers, 16 U.S.C. 590 a-e, f, and 7 U.S.C. 1010-1011). If NRCS real properties or facilities are located in the base flood plain, NRCS will require an environmental evaluation when new structures and facilities or major modifications are proposed. If it is determined that the only practicable alternative for siting the proposed action may adversely affect the base flood plain, NRCS will design or modify its action to minimize potential harm to or within the flood plain and will prepare and circulate a notice explaining why the action is proposed to be located in the base flood plain. Department of Housing and Urban Development (HUD) flood insurance maps, other available maps, information, or an onsite analysis will be used to determine whether the proposed NRCS action is in the base flood plain. Public participation in the action will be the same as described in §650.6 of this part.

(b) Responsibility. NRCS provides technical and financial assistance to land users primarily through conservation districts, special purpose districts, and other State or local subdivisions of State government. Acceptance of this assistance is voluntary on the part of the land user. NRCS does not have authority to make land use decisions on non-Federal land. NRCS provides the land user with technical flood hazard data and information on flood-plain natural values. NRCS informs the land user how alternative land use decisions may affect the aquatic and terrestrial ecosystems, human safety, property, and public welfare. Alternatives to flood-plain occupancy, modification, and development are discussed onsite with the land user by NRCS.
§ 650.25

(1) NRCS National Office. (§ 600.2 of this part). The NRCS Administrator, state conservationist, and district conservationist are the responsible Federal officials in NRCS for implementing the policies expressed in these rules. Any deviation from these rules must be approved by the Administrator. The Deputy Administrator for Programs has authority to oversee the application of policy in NRCS programs. Oversight assistance to state conservationists for flood-plain management will be provided by the NRCS technical service centers (§ 600.3 of this part).

(2) NRCS state offices. (§ 600.4 of this part). Each state conservationist is the responsible Federal official in all NRCS-assisted programs administered within the State. He or she is also responsible for administering the plant materials centers within the State. The state conservationist will assign a staff person who has basic knowledge of landforms, soils, water, and related plant and animal ecosystems to provide technical oversight to ensure that assistance to land users and project sponsors on the wise use, conservation, and preservation of flood plains is compatible with national policy. For NRCS-assisted project actions, the staff person assigned by the state conservationist will consult with the local jurisdictions, sponsoring local organizations, and land users, on the basis of an environmental evaluation, to determine what constitutes significant adverse effect or incompatible development in the base flood plain. The state conservationist will prepare and circulate a written notice for NRCS-assisted actions for which the only practicable alternative requires siting in a base flood plain and may result in adverse effects or incompatible development.

(3) NRCS field offices. The district conservationist (§ 600.6 of this part) is delegated the responsibility for providing technical assistance and approving financial assistance to land users in nonproject actions, where applicable, and for deciding what constitutes an adverse effect or incompatible development of a base flood plain. This assistance will be based on official NRCS policy, rules, guidelines, and procedures in NRCS handbooks, manuals, memoranda, etc. For NRCS-assisted nonproject actions, the district conservationist, on the basis of the environmental evaluation, will advise recipients of technical and financial assistance about what constitutes a significant adverse effect or incompatible development in the base flood plain.

(c) Coordination and implementation. All planning by NRCS staffs is interdisciplinary and encompasses the six NEPA policy statements, the WRC Principles and Standards, and an equivalent of the eight-step decision-making process in the WRC’s February 1978 Floodplain Management Guidelines. NRCS internal handbooks, manuals, and memoranda provide detailed information and guidance for NRCS planning and environmental evaluation.

(1) Steps for nonproject technical and financial assistance programs. (i) NRCS assistance programs are voluntary and are carried out through local conservation districts (State entities) primarily on non-Federal, privately owned lands.

(ii) After the land user decides the type, extent, and location of the intended action for which assistance is sought, the district conservationist will determine if the intended action is in the base flood plain by using HUD flood insurance maps, and other available maps and information or by making an onsite determination of the approximate level of the 100-year flood if maps or other usable information are lacking.

(iii) If the district conservationist determines that the land user’s proposed location is outside the base flood plain, and would not cause potential harm within the base flood plain, NRCS will continue to provide assistance, as needed.

(iv) If the district conservationist determines that the land user’s proposed action is within the base flood plain and would likely result in adverse effects, incompatible development, or an increased flood hazard, it is the responsibility of the district conservationist to determine and point out to the land

596
user alternative methods of achieving the objective, as well as alternative locations outside the base flood plain. If the alternative locations are determined to be impractical, the district conservationist will decide whether to continue providing assistance. If the decision is to terminate assistance for the proposed action, the land user and the local conservation district, if one exists, will be notified in writing about the decision.

(v) If the district conservationist decides to continue providing technical and financial assistance for a proposed action in the base flood plain, which is the only practicable alternative, NRCS may require that the proposed action be designed or modified so as to minimize potential harm to or within the flood plain. The district conservationist will prepare and circulate locally a written notice explaining why the action is proposed to be located in the base flood plain.

(2) Steps for project assistance programs. (i) NRCS project assistance to local sponsoring organizations (conservation districts and other legal entities of State government) and land users is carried out primarily on non-Federal land in response to requests for assistance. NRCS helps the local sponsoring organizations prepare a plan for implementing the needed resource measures.

(ii) NRCS uses an interdisciplinary environmental evaluation (§650.6 of this part) as a basis for providing recommendations and alternatives to project sponsors. Flood-plain management is an integral part of every NRCS environmental evaluation. NRCS delineates the base flood plain by using detailed HUD flood insurance maps and other available data, as appropriate, and provides recommendations to sponsors on alternatives to avoid adverse effects and incompatible development in base flood plains. NRCS will develop, as needed, detailed 100-year and 500-year flood-plain maps where there are none.

(iii) NRCS’s NEPA process (part 650 of this chapter) is used to integrate the spirit and intent of E.O. 11988 Sections 2(a) and 2(c) into agency planning and recommendations for land and water use decisions by local sponsoring organizations and land users.

(iv) NRCS will terminate assistance to a local sponsoring organization in project programs if it becomes apparent that decisions by land users and local jurisdictions concerning floodplain management would likely result in adverse effects or incompatible development and the environmental evaluation reveals that there are practicable alternatives to the proposed project that would not cause adverse effects on the base flood plain.

(v) In carrying out the planning and installation of land and water resource conservation projects, NRCS will avoid, to the extent possible, the long-term and short-term adverse effects associated with the occupancy and modification of base flood plains. In addition, NRCS will also avoid direct or indirect support of development in the base flood plain wherever there is a practicable alternative. Where appropriate, NRCS will require design modifications to minimize harm to or within the base flood plain. NRCS will provide appropriate public notice and public participation in the continuing planning process in accordance with NRCS NEPA process.

(vi) NRCS may require the local government to adopt and enforce appropriate flood plain regulations as a condition to receiving project financial assistance.

(3) Actions on property and facilities under NRCS ownership or control. For real property and facilities owned by or under the control of NRCS, the following actions will be taken:

(i) Locate new structures, facilities, etc., outside the base flood plain if there is a practicable alternate site.

(ii) Require public participation in decisions to construct structures, facilities, etc., in flood plains that might result in adverse effects and incompatible development in such areas if no practicable alternatives exist.

(iii) New construction or rehabilitation will be in accordance with the standards and criteria of the National Flood Insurance Program and will include floodproofing and other flood protection measures as appropriate.
PART 652—TECHNICAL SERVICE PROVIDER ASSISTANCE

Sec.
652.1 Applicability.
652.2 Definitions.
652.3 Administration.
652.4 Technical service standards.
652.5 Participant acquisition of technical services.
652.6 Department delivery of technical services.
652.7 Quality assurance.

Subpart B—Certification

652.21 Certification criteria and requirements.
652.22 Certification process for individuals.
652.23 Certification process for private-sector entities.
652.24 Certification process for public agencies.
652.25 Alternative application process for individual certification.
652.26 Certification renewal.

Subpart C—Decertification

652.31 Policy.
652.32 Causes for decertification.
652.33 Notice of proposed decertification.
652.34 Opportunity to contest decertification.
652.35 State Conservationist decision.
652.36 Appeal of decertification decision.
652.37 Period of decertification.
652.38 Scope of decertification.
652.39 Mitigating factors.
652.40 Effect of decertification.
652.41 Effect of filing deadlines.
652.42 Recertification.

Subpart A—General Provisions

SOURCE: 75 FR 6845, Feb. 12, 2010, unless otherwise noted.

§ 652.1 Applicability.

(a) The regulations in this part set forth the policies, procedures, and requirements related to delivery of technical assistance by individuals and entities other than the Department, hereinafter referred to as technical service providers (TSPs). The Food Security Act of 1985, requires the Secretary to deliver technical assistance to eligible participants for implementation of its Title XII Programs and the conservation activities in the Agricultural Management Assistance Program, 7 U.S.C. 1524, directly, through an agreement with a third party provider, or at the option of the producer through payment to the producer for an approved third party provider. This regulation defines how a participant acquires technical service from a third party TSP, sets forth a certification and decertification process, and establishes a method to make payments for technical services.

(b) TSPs may provide technical services to eligible participants in conservation planning, education and outreach, and assistance with design and implementation of conservation practices applied on private land, Indian land, or where allowed by conservation program rules on public land.

(c) The Chief may implement this part in any of the 50 States, District of Columbia, Commonwealth of Puerto Rico, Guam, Virgin Islands, American Samoa, and the Commonwealth of the Northern Marianna Islands.

§ 652.2 Definitions.

The following definitions apply to this part and all documents issued in accordance with this part, unless specified otherwise:

Approved list means the list of individuals, private sector entities, or public agencies certified by the Natural Resources Conservation Service (NRCS) to provide technical services to a participant.

Certification means the action taken by NRCS to approve:

(1) An individual as meeting the minimum NRCS criteria for providing technical service for conservation planning or a specific conservation practice or system.

(2) An entity or public agency having an employee or employees that meet the minimum NRCS criteria for providing technical service for conservation planning or a specific conservation practice or system.

Chief means the Chief of NRCS or designee.
Conservation activity plan means the conservation practices associated with plan development as authorized under the Food, Conservation, and Energy Act of 2008 (2008 Act).

Conservation plan means a record of the client’s decisions and supporting information for treatment of a land unit or water as a result of the planning process that meets the Field Office Technical Guide quality criteria for each natural resource (soil, water, air, plants, and animals), and takes into account economic and social considerations. The plan describes the schedule of operations and activities needed to solve identified natural resource problems and takes advantage of opportunities at a conservation management system level. The needs of the client, the resources, and Federal, State, and local requirements will be met.

Conservation practice means a specified treatment, such as a structural or vegetative practice, or a land management practice that is planned and applied according to NRCS standards and specifications.

Contribution agreement means the instrument used to acquire technical services under the authority of 7 U.S.C. 6962a.

Cooperative agreement means the same as defined in the Federal Grants and Cooperative Agreement Act, 31 U.S.C. 6301 et seq.

Department means the NRCS, the Farm Service Agency, or any other agency or instrumentality of the Department of Agriculture (USDA) that is assigned responsibility for all or a part of a conservation program subject to this part.

Eligible participant means a producer, landowner, or entity that is participating in, or seeking to participate in, a conservation program covered by this rule in which the producer, landowner, or entity is otherwise eligible to participate.

Entity means a corporation, joint stock company, association, cooperative, limited partnership, limited liability partnership, limited liability company, nonprofit organization, a member of a joint venture, or a member of a similar organization.

Indian land means all lands held in trust by the United States for individual Indians or tribes, or all lands, titles to which are held by individual Indians or tribes, subject to Federal restrictions against alienation or encumbrance, or all lands which are subject to the rights of use, occupancy, and benefit of certain tribes. The term Indian land also includes land for which the title is held in fee status by Indian tribes and the United States Government-owned land under the Bureau of Indian Affairs jurisdiction.

Procurement contract means the same as the term “contract” means under the Federal Grants and Cooperative Agreement Act, 31 U.S.C. 6301 et seq.

Program contract means the document that specifies the rights and obligations of any individual or entity that has been accepted for participation in a program authorized under Title XII of the Food Security Act of 1985, or the Agricultural Management Assistance Program, authorized under 7 U.S.C. 1524.

Public agency means a unit or subdivision of Federal, State, local, or tribal government other than the Department.

Recommendation means a professional organization, association, licensing board, or similar organization with which NRCS has entered into an agreement to recommend qualified individuals for NRCS certification as TSPs for specific technical services.

Secretary means the Secretary of the Department of Agriculture.

State Conservationist means the NRCS employee authorized to direct and supervise NRCS activities in a State, Caribbean Area, or Pacific Basin Area.

Technical service means the technical assistance provided by TSPs, including conservation planning; education and outreach; and the design, installment, and check-out of approved conservation practices.

Technical service contract means a document that specifies the rights and obligations of an eligible participant to obtain technical services from a TSP where the eligible participant will not receive financial assistance for the implementation of the practice paid for in the technical service contract through
§ 652.3 Administration.

(a) As provided in this part, the Department will provide technical assistance to participants directly, or at the option of the participant, through a TSP in accordance with the requirements of this part.

(b) The Chief of NRCS will direct and supervise the administration of the regulations in this part.

(c) NRCS will:

(1) Provide overall leadership and management for the development and administration of a TSP process;

(2) Consult with the Farm Service Agency and other appropriate agencies and entities concerning the availability and utilization of TSPs and the implementation of technical service;

(3) Establish policies, procedures, guidance, and criteria for certification, recertification, decertification, certification renewal, and implementation of the use of TSPs;

(4) Provide training to ensure that persons meet the certification criteria for certain technical expertise when there is a lack of training resources or market outside the agency for such technical expertise. However, any training provided by the Department will be limited to training about Department regulations, policies, procedures, processes, and business and technical tools unique to NRCS; and

(5) Establish a process for verifying information provided to NRCS under this part.

(d) The Department will not make payments under a program contract or written agreement with a participant for technical services provided by a TSP unless the TSP is certified by NRCS for the services provided and is identified on the approved list.

(e) The Department may enter into procurement contracts, contribution agreements, cooperative agreements, or other appropriate instruments to assist the Department in providing technical assistance when implementing conservation programs covered by this part. The Department will ensure that such instruments contain the qualification and performance criteria necessary to ensure quality implementation of the goals and objectives of these conservation programs; therefore, when the Department obtains assistance from a TSP in this manner, the TSP is authorized to provide technical services and receive payment even if such TSP is not certified in accordance with subpart B, nor identified on the approved list.

(f) When a participant acquires technical services from a TSP, the Department is not a party to the agreement between the participant and the TSP. To ensure that quality implementation of the goals and objectives of the conservation programs are met, the TSP must be certified by NRCS in accordance with subpart B of this part and identified on the approved list. Upon request of NRCS, TSPs are required to submit copies of all transcripts, licensing, and certification documentation.

§ 652.4 Technical service standards.

(a) All technical services provided by TSPs must meet USDA standards and specifications as set forth in Departmental manuals, handbooks, guides, and other references for soils mapping and natural resources information, conservation planning, conservation practice application, and other areas of technical assistance.

(b) The Department will only pay a participant for technical services provided in accordance with established
§ 652.5 Participant acquisition of technical services.

(a) Participants may obtain technical assistance directly from the Department or, when available, from a TSP.

(b) To acquire technical assistance directly from the Department, participants should contact their local USDA Service Center.

(c) To acquire technical services from a TSP, participants must:

(1) Enter into and comply with a program contract or a written agreement prior to acquiring technical services; and

(2) Select a certified TSP from the approved list of TSPs.

(d) The Department may approve written agreements for technical assistance prior to program participation based on available funding and natural resource priorities as identified by the State Conservationist.

(e) The technical assistance indicated in paragraph (d) may include the development of conservation plans or activity plans suitable for subsequent incorporation into a program contract.

(f) The Department may make payment to eligible participants who have a technical service contract and utilize it for technical assistance from a TSP.

(g) The Department will identify in the particular program contract or written agreement the payment provisions for TSPs hired directly by the participant.

(h) To obtain payment for technical services, participants must submit to the Department valid invoices, supporting documentation, and requests for payment. The Department will...
issue payment within 30 days of receiving these items. The Department may pay a participant for some or all of the costs associated with the technical services provided by a TSP hired by the participant, or upon receipt of an assignment of payment from the participant, make payment directly to the TSP.

(i) Participants must authorize in writing to the Department the disclosure of their records on file with the Department that they wish to make available to specific TSPs.

(j) Payments for technical services will be made only one time for the same technical service provided unless, as determined by the Department, the emergence of new technologies or major changes in the participant’s farming or ranching operations necessitate the need for additional technical services.

(k) The Department will not make payment for activities or services that are customarily provided at no cost by a TSP to a participant as determined by the State Conservationist.

(l) Payment rates for technical services acquired by participants.

(1) NRCS will calculate TSP payment rates for technical services using national, regional, and locally determined price data.

(2) Establishing TSP payment rates.

(i) NRCS will establish guidelines to analyze the local pricing information using a standardized method.

(ii) The State Conservationist will establish TSP payment rates in each State for the various categories of technical services. The State Conservationist will determine the rates according to local NRCS cost data, procurement data, and market data.

(iii) National Headquarters will review and approve State payment rates to ensure consistency where similar resource conditions and agricultural operations exist. Payment rates may vary to some degree between or within States due to differences in State laws, the cost of doing business, competition, and other variables.

(iv) National Headquarters and State levels will review payment rates annually or more frequently, as needed, and adjust the rates based upon data from existing procurement contracts, federal cost rates, and other appropriate sources.

(v) NRCS may adjust payment rates, as needed, on a case-by-case basis in response to unusual conditions or unforeseen circumstances in delivering technical services such as highly complex technical situations, emergency conditions, serious threats to human health or the environment, or major resource limitations. In these cases, NRCS will set a case-specific TSP payment rate based on the Department’s determination of the scope, magnitude, and timeliness of the technical services needed.

§ 652.6 Department delivery of technical services.

(a) The Department may enter into a procurement contract, contribution agreement, cooperative agreement, or other appropriate instrument to assist the Department in providing technical assistance when implementing the conservation programs covered by this part.

(b) The Department may enter into a procurement contract, contribution agreement, cooperative agreement, or other appropriate instrument with TSPs to provide related technical assistance services that accelerate conservation program delivery. Related technical assistance services may include activities or services that facilitate the development, processing, or implementation of a program contract, such as recording conservation planning decisions and specifications.

(c) NRCS may enter into agreements with other agencies or with a non-Federal entity to provide technical services to eligible participants.

(d) The Department will ensure that such legal instruments contain qualification and performance criteria necessary to ensure quality implementation of these conservation programs. When the Department obtains assistance from a TSP through a procurement contract, contribution agreement, cooperative agreement, or other similar instrument, the TSP is authorized to provide technical services and receive payment even if such TSP is not certified in accordance with subpart B of this part nor identified on the approved list.
§ 652.21 Certification criteria and requirements.

(a) To qualify for certification an individual must:

(1) Have the required technical training, education, and experience to perform the level of technical assistance for which certification is sought;

(2) Meet any applicable professional or business licensing or similar qualification standards established by State or Tribal law;

(3) Demonstrate, through documentation of training or experience, familiarity with NRCS guidelines, criteria, standards, and specifications as set forth in the applicable NRCS manuals, handbooks, field office technical guides, and supplements thereto for the planning and applying of specific conservation practices and management systems for which certification is sought; and

(4) Not be decertified in any State under subpart C of this part at the time of application for certification.

(b) To qualify for certification an entity or public agency must be authorized to provide such services in the jurisdiction and have a certified individual providing, in accordance with this part, technical services on its behalf.

(c) A technical service provider, as part of the certification by NRCS, must enter into a Certification Agreement with NRCS specifying the terms and conditions of the certification, including adherence to the requirements of this part, and acknowledging that failure to meet these requirements may result in ineligibility to receive payments from the Department, either directly or through the participant, for promptly remedy the deficiency, or the occurrence of repeated deficiencies in providing technical services, may trigger the decertification process set forth in subpart C of this part. A failure by NRCS to identify a deficiency does not affect any action under the decertification process. TSPs are solely responsible for providing technical services that meet all NRCS standards and specifications.
the technical services provided or may result in decertification.

(d) NRCS will certify Technical Service Providers for a time period specified by NRCS in the Certification Agreement, not to exceed 3 years. Decertification and Renewal of Certification is administered in accordance with §652.26.

(e) NRCS may, pursuant to 31 U.S.C. 9701, establish and collect fees for the certification of technical service providers.

§ 652.22 Certification process for individuals.

(a) In order to be considered for certification as a technical service provider, an individual must:

(1) Submit an Application for Certification to NRCS in accordance with this section;

(2) Request certification through a recommending organization pursuant to §652.25; or

(3) Request certification through an application submitted by a private-sector entity or public agency pursuant to §652.23 or §652.24, as appropriate.

(b) The application must contain the documentation demonstrating that the individual meets all requirements of paragraph (a) of §652.21.

(c) NRCS will, within 60 days of receipt of an application, make a determination on the application submitted by an individual under paragraph (a)(1) of this section and in accordance with paragraph (a) of §652.21. If all requirements are met, NRCS will:

(1) Enter into a Certification Agreement and certify the applicant as qualified to provide technical services for a specific practice, category, or categories of technical service;

(2) Place the applicant on the list of approved technical service providers when certified; and

(3) Make available to the public the list of approved technical service providers by practice or category of technical services.

(d) NRCS may decertify an individual in accordance with the decertification process set forth in subpart C of this part.

§ 652.23 Certification process for private-sector entities.

(a) A private sector entity that applies for certification must identify, and provide supporting documentation, that it has the requisite professional and business licensure within the jurisdiction for which it seek certification, and that it employs at least one individual, authorized to act on its behalf that:

(1) Has received certification on an individual basis in accordance with §652.22; or

(2) Seeks certification on an individual basis as part of the private-sector entity’s certification and ensures that the requirements set forth in §652.21(a) are contained within the private-sector entity’s application to support such certification.

(b) NRCS will determine pursuant to §652.22 whether the individual(s) identified in the private-sector entity’s application meets the certification standards set forth in §652.21 for the specific services the entity wishes to provide.

(c) NRCS will, within 60 days of receipt of an application, make a determination on the application submitted by an entity. If NRCS determines that all requirements for the private-sector entity and the identified individual(s) are met, NRCS will complete the actions described in paragraphs (c)(1) through (c)(3) of §652.22.

(d) The Certification Agreement entered into with the private-sector entity shall:

(1) Identify the certified individuals who are authorized to perform technical services on behalf of and under the auspices of the entity’s certification;

(2) Require that the entity has, at all times, an individual who is a certified technical service provider authorized to act on the entity’s behalf;

(3) Require that the entity promptly provide an amended Certification Agreement to NRCS for approval when the list of certified individuals performing technical services under its auspices changes;

(4) Require that responsibility for any work performed by non-certified individuals be assumed by a certified individual who is authorized to act on the entity’s behalf; and
(5) Require that the entity be legally responsible for the work performed by any individual working under the auspices of its certification.

e) NRCS may, in accordance with the decertification process set forth in this part, decertify the private sector entity, the certified individual(s) acting under the auspices of its certification, or both the private sector entity and the certified individual(s) acting under the auspices of its certification.

§ 652.24 Certification process for public agencies.

(a) A public agency that applies for certification must identify, and provide supporting documentation, that it has the authority within the jurisdiction within which it seeks to provide technical services and an individual or individuals authorized to act on its behalf:

(1) Has been certified as an individual in accordance with §652.22; or

(2) Seeks certification as an individual as part of the public agency’s certification and sufficient information as set forth in §652.21(a) is contained within the public agency’s application to support such certification.

(b) NRCS shall determine whether the individual identified in the public agency’s application meets the certification standards set forth in §652.22.

(c) NRCS will, within 60 days of receipt of an application, make a determination on the application submitted by a public agency. If NRCS determines that all requirements for the public agency and the identified individual(s) are met, NRCS will perform the actions described in paragraph (c)(1) through (c)(3) of §652.22. The Certification Agreement entered into with the public agency shall:

(1) Identify the certified individuals that are authorized to perform technical services on behalf of and under the auspices of the public agency’s certification;

(2) Require that the public agency have, at all times, an individual that is a certified technical service provider and is an authorized official of the public agency;

(3) Require that the public agency promptly provide to NRCS for NRCS approval an amended Certification Agreement when the list of certified individuals performing technical services under its auspices changes;

(4) Require that responsibility for any work performed by non-certified individuals be assumed by a certified individual that is authorized to act on the public agency’s behalf; and

(5) Require that the public agency be legally responsible for the work performed by any individual working under the auspices of its certification.

d) NRCS may, in accordance with the decertification process set forth in subpart C of this part, decertify the public agency, the certified individual(s) acting under its auspices, or both the public agency and the certified individual(s) acting under its auspices.

§ 652.25 Alternative application process for individual certification.

(a) NRCS may enter into an agreement, including a memorandum of understanding or other appropriate instrument, with a recommending organization that NRCS determines has an adequate accreditation program in place to train, test, and evaluate candidates for competency in a particular area or areas of technical service delivery and whose accreditation program NRCS determines meets the certification criteria as set forth for the technical services to be provided.

(b) Recommending organizations will, pursuant to an agreement entered into with NRCS:

(1) Train, test, and evaluate candidates for competency in the area of technical service delivery;

(2) Recommend to NRCS individuals who it determines meet the NRCS certification requirements of §652.21(a) for providing specific practices or categories of technical services;

(3) Inform the recommended individuals that they must meet the requirements of this part, including entering into a Certification Agreement with NRCS, in order to provide technical services under this part;

(4) Reassess individuals that request renewal of their certification pursuant to §652.26 through the recommendation of the organization; and
§ 652.26 Certification renewal.

(a) NRCS certifications are in effect for a time period specified by NRCS in the Certification Agreement, not to exceed 3 years and automatically expire unless they are renewed for an additional time period in accordance with this section.

(b) A technical service provider may request renewal of an NRCS certification by:

   (1) Submitting a complete certification renewal application to NRCS or through a private sector entity, a public agency, or a recommending organization to NRCS at least 60 days prior to expiration of the current certification;

   (2) Providing verification on the renewal form that the requirements of this part are met; and

   (3) Agreeing to abide by the terms and conditions of a Certification Agreement.

(c) All certification renewals are in effect for a time period specified by NRCS in the Certification Agreement, not to exceed three years and before expiration, may be renewed for subsequent time period in accordance with this section.

Subpart C—Decertification

§ 652.31 Policy.

In order to protect the public interest, it is the policy of NRCS to maintain certification of those technical service providers who act responsibly in the provision of technical service, including meeting NRCS standards and specifications when providing technical service to participants. This section, which provides for the decertification of technical service providers, is an appropriate means to implement this policy.

§ 652.32 Causes for decertification.

A State Conservationist, in whose State a technical service provider is certified to provide technical service, may decertify the technical service provider, in accordance with these provisions, if the technical service provider, or someone acting on behalf of the technical service provider:

(a) Fails to meet NRCS standards and specifications in the provision of technical services;

(b) Violates the terms of the Certification Agreement, including but not limited to, a demonstrated lack of understanding of, or an unwillingness or inability to implement, NRCS standards and specifications for a particular practice for which the technical service provider is certified, or the provision of technical services for which the technical service provider is not certified;

(c) Engages in a scheme or device to defeat the purposes of this part, including, but not limited to, coercion, fraud, misrepresentation, or providing incorrect or misleading information; or

(d) Commits any other action of a serious or compelling nature as determined by NRCS that demonstrates the technical service provider’s inability to fulfill the terms of the Certification Agreement or provide technical services under this part.
§ 652.33 Notice of proposed decertification.

The State Conservationist will send by certified mail, return receipt requested, to the technical service provider proposed for decertification a written Notice of Proposed Decertification, which will contain the cause(s) for decertification, as well as any documentation supporting decertification. In cases where a private sector entity or public agency is being notified of a proposed decertification, any certified individuals working under the auspices of such organization who are also being considered for decertification will receive a separate Notice of Decertification and will be afforded separate appeal rights following the process set forth below.

§ 652.34 Opportunity to contest decertification.

To contest decertification, the technical service provider must submit in writing to the State Conservationist, within 20 calendar days from the date of receipt of the Notice of Proposed Decertification, the reasons why the State Conservationist should not decertify, including any mitigating factors as well as any supporting documentation.

§ 652.35 State Conservationist decision.

Within 40 calendar days from the date of the notice of proposed decertification, the State Conservationist will issue a written determination. If the State Conservationist decides to decertify, the decision will set forth the reasons for decertification, the period of decertification, and the scope of decertification. If the State Conservationist decides not to decertify the technical service provider, the technical service provider will be given written notice of that determination. The decertification determination will be based on an administrative record, which will be comprised of: the Notice of Proposed Decertification and supporting documents, and, if submitted, the technical service provider’s written response and supporting documentation. Both a copy of the decision and administrative record will be sent promptly by certified mail, return receipt requested, to the technical service provider.

§ 652.36 Appeal of decertification decisions.

(a) Within 20 calendar days from the date of receipt of the State Conservationist’s decertification determination, the technical service provider may appeal, in writing, to the Chief of NRCS. The written appeal must state the reasons for appeal and any arguments in support of those reasons. If the technical service provider fails to appeal, the decision of the State Conservationist is final.

(b) Final decision. Within 30 calendar days of receipt of the technical service provider’s written appeal, the Chief or his designee, will make a final determination, in writing, based upon the administrative record and any additional information submitted to the Chief by the technical service provider. The decision of the Chief, or his designee, is final and not subject to further administrative review. The Chief’s determination will include the reasons for decertification, the period of decertification, and the scope of decertification.

§ 652.37 Period of decertification.

The period of decertification will not exceed three years in duration and will be decided by the decertifying official, either the State Conservationist or Chief, as applicable, based upon their weighing of all relevant facts and the seriousness of the reasons for decertification, mitigating factors, if any, and the following general guidelines:

(a) For failures in the provision of technical service for which there are no mitigating factors, e.g., no remedial action by the technical service provider, a maximum period of three years decertification;

(b) For repeated failures in the provision of technical assistance for which there are mitigating factors, e.g., the technical service provider has taken remedial action to the satisfaction of NRCS, a maximum period of one to two years decertification; and

(c) For a violation of Certification Agreement terms, e.g., failure to possess technical competency for a listed practice, a period of one year or less, if
the technical service provider can master such competency within a year period.

§ 652.38 Scope of decertification.

(a) When the technical service provider is a private sector entity or public agency, the decertifying official may decertify the entire organization, including all the individuals identified as authorized to provide technical services under the auspices of such organization. The decertifying official may also limit the scope of decertification, for example, to one or more specifically named individuals identified as authorized to provide technical services under the organization’s auspices or to an organizational element of such private sector entity or public agency. The scope of decertification will be set forth in the decertification determination and will be based upon the facts of each decertification action, including whether actions of particular individuals can be imputed to the larger organization.

(b) In cases where specific individuals are decertified only, an entity or public agency must file within 10 calendar days an amended Certification Agreement removing the decertified individual(s) from the Certification Agreement. In addition, the entity or public agency must demonstrate that, to the satisfaction of the State Conservationist, the entity or public agency has taken affirmative steps to ensure that the circumstances resulting in decertification have been addressed.

§ 652.39 Mitigating factors.

In considering whether to decertify, the period of decertification, and scope of decertification, the deciding official will take into consideration any mitigating factors. Examples of mitigating factors include, but are not limited to the following:

(a) The technical service provider worked, in a timely manner, to correct any deficiencies in the provision of technical service;

(b) The technical service provider took the initiative to bring any deficiency in the provision of their technical services to the attention of NRCS and sought NRCS advice to remediate the situation; and

(c) The technical service provider took affirmative steps to prevent any failures in the provision of technical services from occurring in the future.

§ 652.40 Effect of decertification.

(a) The Department will not make payment under a program contract for the technical services of a decertified technical service provider that were provided during the period of decertification. Likewise, NRCS will not procure, or otherwise enter into an agreement for, the services of a decertified technical service provider during the period of decertification.

(b) National decertification list. NRCS shall maintain a current list of decertified technical service providers. NRCS shall remove decertified providers from the list of certified providers. Participants may not hire a decertified technical service provider. It is the participant’s responsibility to check the decertified list before hiring a technical service provider. Decertification of a technical service provider in one State decertifies the technical service provider from providing technical services under current programs in all States, the Caribbean Area, and the Pacific Basin Area.

§ 652.41 Effect of filing deadlines.

A technical service provider’s failure to meet the filing deadlines under this subpart will result in the forfeiture of appeal rights. All filings must be received by NRCS no later than the close of business (5 p.m.) the last day of the filing period.

§ 652.42 Recertification.

A decertified technical service provider may apply to be re-certified under the certification provisions of this part after the period of decertification has expired. A technical service provider may not utilize the certification renewal process in an attempt to be recertified after being decertified.

PART 653—TECHNICAL STANDARDS
PART 654—OPERATION AND MAINTENANCE

Subpart A—General

§ 654.1 Purpose and scope.

§ 654.2 Definitions.

Subpart B—Federal Financially-Assisted Projects

§ 654.10 Operation and maintenance agreement.

§ 654.11 Sponsor(s)’ responsibility.

§ 654.12 Financing operations and maintenance.

§ 654.13 Designating responsibility for operation and maintenance.

§ 654.14 Duration of sponsor(s)’ responsibility.

§ 654.15 Operation and maintenance.

§ 654.16 Property management.

§ 654.17 Inspection.

§ 654.18 Natural Resources Conservation Service responsibility.

§ 654.30 Responsibility for operation and maintenance.

§ 654.31 Performing operation and maintenance.

Subpart D—Emergency Watershed Protection

§ 654.40 Responsibility for operation and maintenance.

§ 654.41 Performance of operation and maintenance.

Subpart E—Great Plains Conservation Program

§ 654.50 Responsibility for operation and maintenance.

SOURCE: 42 FR 58159, Nov. 8, 1977, unless otherwise noted.
Subpart A—General

§ 654.1 Purpose and scope.

(a) This part sets forth the operation and maintenance requirements pertaining to measures installed with Natural Resources Conservation Service (NRCS) assistance. This includes measures installed under the following programs:

(1) Federal financially-assisted projects.
   (iii) Specifically authorized projects.

(2) Conservation Operations (CO).

(4) Great Plains Conservation Program (GP). See part 631 of this title.

(b) These regulations shall apply to all Federal financially-assisted projects as set forth in subpart B for the duration of their respective operation and maintenance agreements. However, this does not relieve the sponsor(s) of any liability which may continue beyond the evaluated life of the measure under Federal, State, and local laws. Operation and maintenance agreements in effect prior to the effective date of these regulations are not affected by these regulations.

§ 654.2 Definitions.

Evaluated life. The time period for which project or measure benefits and costs have been evaluated. The evaluated life starts after the last project measure of the evaluation unit has been completed.

Landuser. Those who individually or collectively use land as owner, lessee, occupier, or by other arrangements which give them conservation planning or implementation concern and responsibility for the land involved.

Maintenance. The work and actions required to keep works of improvement in a condition to function for their intended purpose and the replacement of portions of project measures as specified in the O&M agreement.

Operation. The administration, management, and performance of services needed to insure the continued proper functioning of completed project measures.

Operation and maintenance agreement. A written agreement between the sponsor(s) and NRCS or other recipient(s) in which responsibilities and actions are established for the operation, maintenance, replacement, and inspection of project measures.

Plan of operation and maintenance. A detailed program of action to provide for performing the operation and maintenance of a specific project measure.

Project measures. An undertaking for watershed protection; flood prevention; the conservation, development, utilization, and disposal of water; the conservation and proper utilization of land; or a combination thereof. The undertaking may consist of vegetative, structural, or management measures or a combination thereof. Vegetative measures are those measures involving only seedbed preparation and/or the planting of vegetative material.

Public recreation and/or fish and wildlife facility. A project measure or part thereof which (a) creates or improves the potential for public recreational use and enjoyment, or (b) materially contributes to the preservation, production, or harvest of fish and wildlife.

Sponsor. An agency or organization with authority to provide local responsibility for a Federal financially-assisted local project under a program administered by NRCS.

State Conservationist. The NRCS officer responsible for NRCS activities within a particular State, the Commonwealth of Puerto Rico, or the U.S. Virgin Islands.

Structural measures. Structural measures are those measures that are excavated or constructed with concrete, earth, masonry, metal, rock, or other materials, and associated vegetation.
Subpart B—Federal Financially-Assisted Projects

§ 654.10 Operation and maintenance agreement.

A duly authorized official of the sponsor(s) must execute an O&M agreement with NRCS prior to NRCS furnishing financial assistance.

§ 654.11 Sponsor(s)' responsibility.

(a) On non-Federal land, sponsor(s) are responsible for financing and performing without cost to the Federal Government, needed operation and maintenance (O&M) of project measures installed with Federal financial assistance.

(b) The Federal agency administering Federal land involving project measures is responsible either for performing or requiring the performance of O&M on land administered by that agency. If project measures benefit both Federal and non-Federal land or interests, the O&M may be performed by the Federal agency, the sponsor(s), or both as mutually agreed by the Federal agency, sponsor(s), and NRCS. If O&M of project measures is performed by mutual agreement, the cost of O&M may be shared by the Federal agency and sponsor(s) as agreed.

(c) The sponsor(s) shall obtain NRCS approval before modifying a project measure of changing land use to fulfill a different purpose.

§ 654.12 Financing operations and maintenance.

Sources of funds needed to operate and maintain project measures for the duration of the O&M agreement shall be identified in the watershed or RC&D measure plan.

§ 654.13 Designating responsibility for operation and maintenance.

Those organizations or agencies responsible for the O&M of each project measure shall be identified in the watershed or RC&D measure plan.

§ 654.14 Duration of sponsor(s)' responsibility.

(a) Sponsor(s)' responsibility for O&M of a completed project measure begins when a part of all of the contract installing such measure is completed and accepted from the contractor. If the installation of the project measure is performed by force account, division of work, or performance of work methods, the sponsor(s)' O&M responsibilities begin on the date the work or portion thereof is completed as determined by NRCS, except for completed work located on Federal lands which are subject to special-use permits. The O&M agreement shall specify that O&M will continue through: (1) The evaluated life of the project, or (2) the evaluated life of measures that are economically evaluated as a unit, or (3) the useful life of cost-shared measures that are for land conservation or land utilization. The sponsor(s)' duties and liabilities for the measures under other Federal and State laws are not affected by the expiration of the O&M agreement.

(b) For project measures being installed in segments, the sponsor(s) shall be responsible for O&M of completed and accepted segments. However, the NRCS may share in the cost of repairing damages to a completed segment when the damage is attributed to the continuation of work on uncompleted segments of the measure or when due to the fact that the measure was only partially completed.

§ 654.15 Operation and maintenance.

Sponsor(s) are to operate and maintain completed project measures in:

(a) Compliance with applicable Federal, State, and local laws, regulations, and ordinances.

(b) Compliance with any applicable conditions set forth in the instruments by which the landrights were acquired for installing, operating, and maintaining the project measures.

(c) A manner that will not significantly degrade the environment and will permit project measures to serve the purpose for which they were installed as set forth in the watershed or RC&D measure plan.

(d) Compliance with the time frames and O&M work items established in the plan of O&M and inspection reports.

(e) Accordance with agreements with NRCS on admission charges and user fees for public recreation and/or fish and wildlife facility. Admission or user fees shall be charged only as necessary
§ 654.16 Property management.

Sponsor(s) are to:

(a) Use real property acquired in whole or in part with Federal funds as long as needed for the purpose for which it was acquired and in accordance with the O&M agreement. If real property acquired in whole or in part with Federal funds is no longer needed for the purpose for which it was acquired, the sponsor(s) shall obtain NRCS approval for future use or disposition.

(b) Use nonexpendable personal property acquired in whole or in part with Federal funds as long as needed for the purpose for which it was acquired in accordance with the rules governing Federal grant property (34 CFR part 256).

(c) Establish, adopt, and comply with a property management system which meets the standards governing Federal grant property.

§ 654.17 Inspection.

(a) Sponsor(s) are to make periodic and special inspections of installed project measures as provided in the plan of O&M. For structural measures, inspections are to be made at least annually and after each major storm or occurrence of any unusual condition that might adversely affect the project measures. At the discretion of the State Conservationist, NRCS may assist sponsor(s) with their inspections. NRCS or land-administering agencies may make independent inspections at any time during the period covered by the O&M agreement.

(b) Sponsor(s) are to maintain a written record of each inspection and furnish NRCS and land-administering agencies a copy of that record. The record should identify items inspected, O&M work that may be needed, a time frame to do the work, and the date of the inspection. The NRCS and land-administering agencies will provide the sponsor(s) a copy of a similar record of independent inspections.

(c) The sponsor(s) shall perform the O&M work listed as needed in the inspection reports within the time frame established for each item of work. Failure to perform O&M work will be considered a violation of the O&M agreement and will be handled in accordance with §654.20.

(d) Sponsor(s) are to maintain a written record of work performed which is listed in the inspection report and a record of other significant O&M activity. The record will identify the measure, item of work, cost of performance, and date completed.

(e) Sponsor(s)’ records relative to the project shall be made available to NRCS for examination.

§ 654.18 Natural Resources Conservation Service responsibility.

The Natural Resources Conservation Service will assist the sponsor(s) in developing a watershed or RC&D measure plan which includes a description of O&M work and estimated cost, assist in the preparation of O&M agreements and plans of O&M, enter into O&M agreements with the sponsor(s), and notify the sponsor(s) of observed failures to comply with the O&M agreement.

§ 654.19 Plan of operation and maintenance.

(a) The plan for O&M shall be incorporated into and made a part of the O&M agreement. A separate plan of O&M shall be prepared for each project measure that is expected to have a unique O&M need. Two or more measures with similar O&M needs may be included in a single plan for O&M.

(b) The plan of O&M shall include the known and anticipated items of O&M, an explanation of how the O&M activities may be carried out, a general time frame for making O&M inspections and
Natural Resources Conservation Service, USDA

§ 654.20 Violations of operation and maintenance agreement.
(a) The State Conservationist shall investigate alleged sponsor violations of the O&M agreement. If the State Conservationist determines that a violation has occurred that may prevent the project measure from functioning as intended, create a health or safety hazard, or prevent the accrual of project benefits, he shall provide sponsor(s) written notification.
(b) If the sponsor(s) fail to comply with the O&M agreement or fail to take corrective action, NRCS may notify authorities having appropriate jurisdiction, withhold further assistance to the project, require the sponsor(s) to reimburse the government for the NRCS share of the cost of the project, and/or pursue other action authorized by the O&M agreement or law.

Subpart C—Conservation Operations

§ 654.30 Responsibility for operation and maintenance.
The land user is responsible for O&M of soil and water conservation measures installed with NRCS assistance provided through soil, water, and other conservation districts.

§ 654.31 Performing operation and maintenance.
The method of performing O&M is to be at the option of the sponsor(s). The NRCS, working through districts, will furnish information and technical assistance as needed and requested to the extent NRCS resources permit.

Subpart D—Emergency Watershed Protection

§ 654.40 Responsibility for operation and maintenance.
(a) Non-Federal lands. The need for an O&M agreement will be determined by the State Conservationist. Where an O&M agreement is necessary, the sponsor(s) will provide the O&M and adopt standards for Federal grant property (34 CFR part 256). Where no O&M agreement is necessary, other arrangements will be made for complying with Federal property management.
(b) Federal lands. The Federal agency administering the Federal land is responsible for operating and maintaining emergency measures installed on Federal land.

§ 654.41 Performance of operation and maintenance.
(a) Arrangement. O&M is a prerequisite for approval of Federal emergency assistance when:
(1) The emergency measure needs to be operated and maintained in order to serve its intended purpose, or
(2) The emergency measure needs to be operated and maintained to insure that it will not become hazardous.
(b) Time of operation and maintenance. The sponsor(s)' obligations for O&M begin when the measure is installed and extend for the duration of the time required for the emergency measure to serve the purpose for which it is installed.
(c) Performance. Operation and maintenance is to be performed in a manner that will protect the environment and otherwise comply with NRCS, State, and local requirements. The method of performing O&M is at the option of the sponsor(s).

Subpart E—Great Plains Conservation Program

§ 654.50 Responsibility for operation and maintenance.
Responsibility for practices under the Great Plains Conservation Program are contained in §631.10 of this chapter.

PART 655 [RESERVED]
§ 656.1 Purpose.

This part prescribes Natural Resources Conservation Service (NRCS) policy, procedures, and guidelines for the implementation of archeological and historical laws and appropriate executive orders for administering NRCS programs.

§ 656.2 Archeological and historical laws and Executive orders applicable to NRCS-assisted programs.

(a) The Act of June 27, 1960, relating to the preservation of historical and archeological data, Pub. L. 86-523, 74 Stat. 220, as amended May 24, 1974; Pub. L. 93-291, 88 Stat. 174 (16 U.S.C. 469 et seq.), provides for the preservation of historical and archeological materials or data, including relics and specimens, that might otherwise be lost or destroyed as a result of any Federal or federally-assisted or licensed project, activity, or program.

(b) The National Historic Preservation Act, Pub. L. 89-665, 80 Stat. 915, as amended, (16 U.S.C. 470 et seq.), authorizes the Secretary of the Interior to maintain and expand a National Register of Historic Places (NRHP), including historic districts, sites, buildings, structures, and objects that are significant in American history, architecture, archeology, and culture. This law also establishes the Advisory Council on Historic Preservation (ACHP) to be appointed by the President. Section 106 of this Act (16 U.S.C. 470f), requires that prior to the approval of any Federal or federally-assisted or licensed undertaking, the Federal agency shall afford the ACHP a reasonable opportunity to comment, if properties listed in or eligible for listing in NRHP are affected.

(c) Executive Order 11593 (36 FR 8921, 3 CFR 1971 Comp. P. 154), Protection and Enhancement of the Cultural Environment, provides that the Federal government shall furnish leadership in preserving, restoring, and maintaining the historical and cultural environ-

ment of the nation, and that Federal agencies shall administer the cultural properties under their control in a spirit of stewardship and trusteeship for future generations; initiate measures necessary to direct their policies, plans, and programs in such a way that federally owned sites, structures, and objects of historical, architectural, or archeological significance are preserved, restored, and maintained. Section 1(3) directs that agencies institute procedures to assure that Federal plans and programs contribute to the preservation and enhancement of non-federally owned sites, structures, and objects of historical, architectural, or archeological significance in consultation with the ACHP.

§ 656.3 Policy.

(a) NRCS recognizes that significant historical, archeological, and architectural resources are an important part of our national heritage, the protection of which requires careful consideration in this agency’s project planning and implementation process.

(b) NRCS will take reasonable precautions to avoid damaging any significant historic, cultural, or natural aspects of our national heritage and will work with the National Park Service (NPS) and the Advisory Council on Historic Preservation (ACHP) in identifying and seeking to avoid or mitigate adverse effects of NRCS-assisted projects on the Nation’s significant cultural resources. The procedures contained in this part have been developed to comply with sections 1(3) and 2(c) of Executive Order 11593.

§§ 656.4-656.9 [Reserved]
Subpart A—Important Farmlands Inventory

§ 657.1 Purpose.
NRCS is concerned about any action that tends to impair the productive capacity of American agriculture. The Nation needs to know the extent and location of the best land for producing food, feed, fiber, forage, and oilseed crops. In addition to prime and unique farmlands, farmlands that are of statewide and local importance for producing these crops also need to be identified.

§ 657.2 Policy.
It is NRCS policy to make and keep current an inventory of the prime farmland and unique farmland of the Nation. This inventory is to be carried out in cooperation with other interested agencies at the National, State, and local levels of government. The objective of the inventory is to identify the extent and location of important rural lands needed to produce food, feed, fiber, forage, and oilseed crops.

§ 657.3 Applicability.
Inventories made under this memorandum do not constitute a designation of any land area to a specific land use. Such designations are the responsibility of appropriate local and State officials.

§ 657.4 NRCS responsibilities.
(a) State Conservationist. Each NRCS State Conservationist is to:
(1) Provide leadership for inventories of important farmlands for the State, county, or other subdivision of the State. Each is to work with appropriate agencies of State government and others to establish priorities for making these inventories.
(2) Identify the soil mapping units within the State that qualify as prime. In doing this, State Conservationists, in consultation with the cooperators of the National Cooperative Soil Survey, have the flexibility to make local deviation from the permeability criterion or to be more restrictive for other specific criteria in order to assure the most accurate identification of prime farmlands for a State. Each is to invite representatives of the Governor’s office, agencies of the State government, and others to identify farmlands of statewide importance and unique farmlands that are to be inventoried within the framework of this memorandum.
(3) Prepare a statewide list of:
(i) Soil mapping units that meet the criteria for prime farmland;
(ii) Soil mapping units that are farmlands of statewide importance if the criteria used were based on soil information; and
(iii) Specific high-value food and fiber crops that are grown and, when combined with other favorable factors, qualify lands to meet the criteria for unique farmlands. Copies are to be furnished to NRCS Field Offices and to National Soil Survey Center. (see 7 CFR 600.2(c), 600.6)
(4) Coordinate soil mapping units that qualify as prime farmlands with adjacent States, including Major Land Resource Area Offices (see 7 CFR 600.4, 600.7) responsible for the soil series. Since farmlands of statewide importance and unique farmlands are designated by others at the State level, the soil mapping units and areas identified need not be coordinated among States.
(5) Instruct NRCS District Conservationists to arrange local review of lands identified as prime, unique, and additional farmlands of statewide importance by Conservation Districts and representatives of local agencies. This review is to determine if additional farmland should be identified to meet local decisionmaking needs.
(6) Make and publish each important farmland inventory on a base map of national map accuracy at an intermediate scale of 1:50,000 or 1:100,000. State Conservationists who need base maps of other scales are to submit their requests with justification to the Chief for consideration.

(b) National Soil Survey Center. The National Soil Survey Center is to provide requested technical assistance to State Conservationists and Major Land Resource Area Offices in inventorying prime and unique farmlands (see 7 CFR 600.2(c)(1), 600.4, 600.7). This includes reviewing statewide lists of soil mapping units that meet the criteria for prime farmlands and resolving coordination...
§ 657.5 Identification of important farmlands.

(a) Prime farmlands—(1) General. Prime farmland is land that has the best combination of physical and chemical characteristics for producing food, feed, forage, fiber, and oilseed crops, and is also available for these uses (the land could be cropland, pastureland, rangeland, forest land, or other land, but not urban built-up land or water). It has the soil quality, growing season, and moisture supply needed to economically produce sustained high yields of crops when treated and managed, including water management, according to acceptable farming methods. In general, prime farmlands have an adequate and dependable water supply from precipitation or irrigation, a favorable temperature and growing season, acceptable acidity or alkalinity, acceptable salt and sodium content, and few or no rocks. They are permeable to water and air. Prime farmlands are not excessively erodible or saturated with water for a long period of time, and they either do not flood frequently or are protected from flooding. Examples of soils that qualify as prime farmland are Palouse silt loam, 0 to 7 percent slopes; Brookston silty clay loam, drained; and Tama silty clay loam, 0 to 5 percent slopes.

(i) The soils have:
(A) Aquic, udic, ustic, or xeric moisture regimes and sufficient available water capacity within a depth of 40 inches (1 meter), or in the root zone (root zone is the part of the soil that is penetrated or can be penetrated by plant roots) if the root zone is less than 40 inches deep, to produce the commonly grown cultivated crops (cultivated crops include, but are not limited to, grain, forage, fiber, oilseed, sugar beets, sugarcane, vegetables, tobacco, orchard, vineyard, and bush fruit crops) adapted to the region in 7 or more years out of 10; or
(B) Xeric or ustic moisture regimes in which the available water capacity is limited, but the area has a developed irrigation water supply that is dependable (a dependable water supply is one in which enough water is available for irrigation in 8 out of 10 years for the crops commonly grown) and of adequate quality; or,
(C) Aridic or torric moisture regimes and the area has a developed irrigation water supply that is dependable and of adequate quality; and,

(ii) The soils have a temperature regime that is frigid, mesic, thermic, or hyperthermic (pergelic and cryic regimes are excluded). These are soils that, at a depth of 20 inches (50 cm), have a mean annual temperature higher than 32 °F (0 °C). In addition, the mean summer temperature at this depth in soils with an O horizon is higher than 47 °F (8 °C); in soils that have no O horizon, the mean summer temperature is higher than 59 °F (15 °C); and,

(iii) The soils have a pH between 4.5 and 8.4 in all horizons within a depth of 40 inches (1 meter) or in the root zone if the root zone is less than 40 inches deep; and,

(iv) The soils either have no water table or have a water table that is maintained at a sufficient depth during the cropping season to allow cultivated crops common to the area to be grown; and,

(v) The soils can be managed so that, in all horizons within a depth of 40 inches (1 meter) or in the root zone if the root zone is less than 40 inches deep...
deep, during part of each year the conductivity of the saturation extract is less than 4 mmhos/cm and the exchangeable sodium percentage (ESP) is less than 15; and,

(vi) The soils are not flooded frequently during the growing season (less than once in 2 years); and,

(vii) The product of K (erodibility factor) x percent slope is less than 2.0, and the product of I (soils erodibility) x C (climatic factor) does not exceed 60; and

(viii) The soils have a permeability rate of at least 0.06 inch (0.15 cm) per hour in the upper 20 inches (50 cm) and the mean annual soil temperature at a depth of 20 inches (50 cm) is less than 59 °F (15 °C); the permeability rate is not a limiting factor if the mean annual soil temperature is 59 °F (15 °C) or higher; and

(ix) Less than 10 percent of the surface layer (upper 6 inches) in these soils consists of rock fragments coarser than 3 inches (7.6 cm).

(b) Unique farmland—(1) General. Unique farmland is land other than prime farmland that is used for the production of specific high value food and fiber crops. It has the special combination of soil quality, location, growing season, and moisture supply needed to economically produce sustained high quality and/or high yields of a specific crop when treated and managed according to acceptable farming methods. Examples of such crops are citrus, tree nuts, olives, cranberries, fruit, and vegetables.

(2) Specific characteristics of unique farmland. (i) Is used for a specific high-value food or fiber crop; (ii) Has a moisture supply that is adequate for the specific crop; the supply is from stored moisture, precipitation, or a developed-irrigation system; (iii) Combines favorable factors of soil quality, growing season, temperature, humidity, air drainage, elevation, aspect, or other conditions, such as nearness to market, that favor the growth of a specific food or fiber crop.

(c) Additional farmland of statewide importance. This is land, in addition to prime and unique farmlands, that is of statewide importance for the production of food, feed, fiber, forage, and oilseed crops. Criteria for defining and delineating this land are to be determined by the appropriate State agency or agencies. Generally, additional farmlands of statewide importance include those that are nearly prime farmland and that economically produce high yields of crops when treated and managed according to acceptable farming methods. Some may produce as high a yield as prime farmlands if conditions are favorable. In some States, additional farmlands of statewide importance may include tracts of land that have been designated for agriculture by State law.

(d) Additional farmland of local importance. In some local areas there is concern for certain additional farmlands for the production of food, feed, fiber, forage, and oilseed crops, even though these lands are not identified as having national or statewide importance. Where appropriate, these lands are to be identified by the local agency or agencies concerned. In places, additional farmlands of local importance may include tracts of land that have been designated for agriculture by local ordinance.
actions, as appropriate, that could lessen adverse effects, and (c) to ensure that their programs, to the extent practicable, are compatible with State and units of local government and private programs and policies to protect farmland. Guidelines to assist agencies in using the criteria are included in this part. The Department of Agriculture (hereinafter USDA) may make available to States, units of local government, individuals, organizations, and other units of the Federal Government, information useful in restoring, maintaining, and improving the quantity and quality of farmland.

§ 658.2 Definitions.
(a) Farmland means prime or unique farmlands as defined in section 1540(c)(1) of the Act or farmland that is determined by the appropriate state or unit of local government agency or agencies with concurrence of the Secretary to be farmland of statewide or local importance. “Farmland” does not include land already in or committed to urban development or water storage. Farmland “already in” urban development or water storage includes all such land with a density of 30 structures per 40-acre area. Farmland already in urban development also includes lands identified as “urbanized area” (UA) on the Census Bureau Map, or as urban area mapped with a “tint overprint” on the USGS topographical maps, or as “urban-built-up” on the USDA Important Farmland Maps. Areas shown as white on the USDA Important Farmland Maps are not “farmland” and, therefore, are not subject to the Act. Farmland “committed to urban development or water storage” includes all such land that receives a combined score of 160 points or less from the land evaluation and site assessment criteria.

(b) Federal agency means a department, agency, independent commission, or other unit of the Federal Government.

(c) Federal program means those activities or responsibilities of a Federal agency that involve undertaking, financing, or assisting construction or improvement projects or acquiring, managing, or disposing of Federal lands and facilities.

(1) The term “Federal program” does not include:
(i) Federal permitting, licensing, or rate approval programs for activities on private or non-Federal lands; and
(ii) Construction or improvement projects that were beyond the planning stage and were in either the active design or construction state on August 4, 1984.

(2) For the purposes of this section, a project is considered to be “beyond the planning stage and in either the active design or construction state on August 4, 1984” if, on or before that date, actual construction of the project had commenced or:
(i) Acquisition of land or easements for the project had occurred or all required Federal agency planning documents and steps were completed and accepted, endorsed, or approved by the appropriate agency;
(ii) A final environmental impact statement was filed with the Environmental Protection Agency or an environmental assessment was completed and a finding of no significant impact was executed by the appropriate agency official; and
(iii) The engineering or architectural design had begun or such services had been secured by contract. The phrase “undertaking, financing, or assisting construction or improvement projects” includes providing loan guarantees or loan insurance for such projects and includes the acquisition, management and disposal of land or facilities that a Federal agency obtains as the result of foreclosure or other actions taken under a loan or other financial assistance provided by the agency directly and specifically for that property. For the purposes of this section, the phrase “acquiring, managing, or disposing of Federal lands and facilities” refers to lands and facilities that are acquired, managed, or used by a Federal agency specifically in support of a Federal activity or program, such as national parks, national forests, or military bases, and does not refer to lands and facilities that are acquired by a Federal agency as the incidental result of actions by the agency that give the agency temporary custody or ownership of the lands or facilities, such as...
§658.3 Applicability and exemptions.

(a) Section 1540(b) of the Act, 7 U.S.C. 4201(b), states that the purpose of the Act is to minimize the extent to which Federal programs contribute to the unnecessary and irreversible conversion of farmland to nonagricultural uses. Conversion of farmland to non-agricultural uses does not include the construction of on-farm structures necessary for farm operations. Federal agencies can obtain assistance from USDA in determining whether a proposed location or site meets the Act’s definition of farmland. The USDA Natural Resources Conservation Service (NRCS) field office serving the area will provide the assistance. Many State or local government planning offices can also provide this assistance.

(b) Acquisition or use of farmland by a Federal agency for national defense purposes is exempted by section 1547(b) of the Act, 7 U.S.C. 4208(b).

(c) The Act and these regulations do not authorize the Federal Government in any way to regulate the use of private or non-Federal land, or in any way affect the property rights of owners of such land. In cases where either a private party or a non-Federal unit of government applies for Federal assistance to convert farmland to a non-agricultural use, the Federal agency should use the criteria set forth in this part to identify and take into account any adverse effects on farmland of the assistance requested and develop alternative actions that would avoid or mitigate such adverse effects. If, after consideration of the adverse effects and suggested alternatives, the landowners want to proceed with conversion, the Federal agency, on the basis of the analysis set forth in §658.4 and any agency policies or procedures for implementing the Act, may provide or deny the requested assistance. Only assistance and actions that would convert farmland to nonagricultural uses are subject to this Act. Assistance and actions related to the purchase, maintenance, renovation, or replacement of existing structures and sites converted prior to the time of an application for assistance from a Federal agency, including assistance and actions related to the construction of minor new ancillary structures (such as garages or sheds), are not subject to the Act.

(d) Section 1548 of the Act, as amended, 7 U.S.C. 4209, states that the Act...
shall not be deemed to provide a basis for any action, either legal or equitable, by any person or class of persons challenging a Federal project, program, or other activity that may affect farmland. Neither the Act nor this rule, therefore, shall afford any basis for such an action. However, as further provided in section 1548, the governor of an affected state, where a state policy or program exists to protect farmland, may bring an action in the Federal district court of the district where a Federal program is proposed to enforce the requirements of section 1541 of the Act, 7 U.S.C. 4202, and regulations issued pursuant to that section.

[49 FR 27724, July 5, 1984, as amended at 59 FR 31117, June 17, 1994]

§ 658.4 Guidelines for use of criteria.

As stated above and as provided in the Act, each Federal agency shall use the criteria provided in § 658.5 to identify and take into account the adverse effects of Federal programs on the protection of farmland. The agencies are to consider alternative actions, as appropriate, that could lessen such adverse effects, and assure that such Federal programs, to the extent practicable, are compatible with State, unit of local government and private programs and policies to protect farmland. The following are guidelines to assist the agencies in these tasks:

(a) An agency may determine whether or not a site is farmland as defined in § 658.2(a) or the agency may request that NRCS make such a determination. If an agency elects not to make its own determination, it should make a request to NRCS on Form AD-1006, the Farmland Conversion Impact Rating Form, available at NRCS offices, for determination of whether the site is farmland subject to the Act. If neither the entire site nor any part of it are subject to the Act, then NRCS will respond in 30 working days. In the event that NRCS fails to complete its response within the required period, if further delay would interfere with construction activities, the agency should proceed as though the site were not farmland.

(b) The Form AD 1006, returned to the agency by NRCS will also include the following incidental information: The total amount of farmable land (the land in the unit of local government’s jurisdiction that is capable of producing the commonly grown crop); the percentage of the jurisdiction that is farmland covered by the Act; the percentage of farmland in the jurisdiction that the project would convert; and the percentage of farmland in the local government’s jurisdiction with the same or higher relative value than the land that the project would convert. These statistics will not be part of the criteria scoring process, but are intended simply to furnish additional background information to Federal agencies to aid them in considering the effects of their projects on farmland.

(c) After the agency receives from NRCS the score of a site’s relative value as described in § 658.4(a) and then applies the site assessment criteria which are set forth in § 658.5 (b) and (c), the agency will assign to the site a combined score of up to 260 points, composed of up to 100 points for relative value and up to 160 points for the site assessment. With this score the agency will be able to identify the effect of its programs on farmland, and make a determination as to the suitability of the site for protection as farmland. Once this score is computed, USDA recommends:

(1) Sites with the highest combined scores be regarded as most suitable for protection under these criteria and sites with the lowest scores, as least suitable.

(2) Sites receiving a total score of less than 160 need not be given further consideration for protection and no additional sites need to be evaluated.

(3) Sites receiving scores totaling 160 or more be given increasingly higher levels of consideration for protection.

(4) When making decisions on proposed actions for sites receiving scores
Natural Resources Conservation Service, USDA § 658.5

totaling 160 or more, agency personnel consider:

(i) Use of land that is not farmland or use of existing structures;

(ii) Alternative sites, locations and designs that would serve the proposed purpose but convert either fewer acres of farmland or other farmland that has a lower relative value;

(iii) Special siting requirements of the proposed project and the extent to which an alternative site fails to satisfy the special siting requirements as well as the originally selected site.

(d) Federal agencies may elect to assign the site assessment criteria relative weightings other than those shown in §658.5 (b) and (c). If an agency elects to do so, USDA recommends that the agency adopt its alternative weighting system (1) through rulemaking in consultation with USDA, and (2) as a system to be used uniformly throughout the agency. USDA recommends that the weightings stated in §658.5 (b) and (c) be used until an agency issues a final rule to change the weightings.

(e) It is advisable that evaluations and analyses of prospective farmland conversion impacts be made early in the planning process before a site or design is selected, and that, where possible, agencies make the FPPA evaluations part of the National Environmental Policy Act (NEPA) process. Under the agency’s own NEPA regulations, some categories of projects may be excluded from NEPA which may still be covered under the FPPA. Section 1540(c)(4) of the Act exempts projects that were beyond the planning stage and were in either the active design or construction state on the effective date of the Act. Section 1547(b) exempts acquisition or use of farmland for national defense purposes. There are no other exemptions of projects by category in the Act.

(f) Numerous States and units of local government are developing and adopting Land Evaluation and Site Assessment (LESA) systems to evaluate the productivity of agricultural land and its suitability for conversion to nonagricultural use. Therefore, States and units of local government may have already performed an evaluation using criteria similar to those contained in this rule applicable to Federal agencies. USDA recommends that where sites are to be evaluated within a jurisdiction having a State or local LESA system that has been approved by the governing body of such jurisdiction and has been placed on the NRCS State conservationist’s list as one which meets the purpose of the FPPA in balance with other public policy objectives, Federal agencies use that system to make the evaluation.

(g) To meet reporting requirements of section 1546 of the Act, 7 U.S.C. 4207, and for data collection purposes, after the agency has made a final decision on a project in which one or more of the alternative sites contain farmland subject to the FPPA, the agency is requested to return a copy of the Form AD-1006, which indicates the final decision of the agency, to the NRCS field office.

(h) Once a Federal agency has performed an analysis under the FPPA for the conversion of a site, that agency’s, or a second Federal agency’s determination with regard to additional assistance or actions on the same site do not require additional redundant FPPA analysis.

[49 FR 27724, July 5, 1984, as amended at 59 FR 31118, June 17, 1994]

§ 658.5 Criteria.

This section states the criteria required by section 1541(a) of the Act, 7 U.S.C. 4202(a). The criteria were developed by the Secretary of Agriculture in cooperation with other Federal agencies. They are in two parts, (1) the land evaluation criterion, relative value, for which NRCS will provide the rating or score, and (2) the site assessment criteria, for which each Federal agency must develop its own ratings or scores. The criteria are as follows:

(a) Land Evaluation Criterion—Relative Value. The land evaluation criterion is based on information from several sources including national cooperative soil surveys or other acceptable soil surveys, NRCS field office technical guides, soil potential ratings or soil productivity ratings, land capability classifications, and important farmland determinations. Based on this information, groups of soils within a local government’s jurisdiction will be
evaluated and assigned a score between 0 to 100, representing the relative value, for agricultural production, of the farmland to be converted by the project compared to other farmland in the same local government jurisdiction. This score will be the Relative Value Rating on Form AD 1006.

(b) **Site Assessment Criteria.** Federal agencies are to use the following criteria to assess the suitability of each proposed site or design alternative for protection as farmland along with the score from the land evaluation criterion described in §658.5(a). Each criterion will be given a score on a scale of 0 to the maximum points shown. Conditions suggesting top, intermediate and bottom scores are indicated for each criterion. The agency would make scoring decisions in the context of each proposed site or alternative action by examining the site, the surrounding area, and the programs and policies of the State or local unit of government in which the site is located. Where one given location has more than one design alternative, each design should be considered as an alternative site. The site assessment criteria are:

1. **How much land is in nonurban use within a radius of 1.0 mile from where the project is intended?**
   - More than 90 percent—15 points
   - 90 to 20 percent—14 to 1 point(s)
   - Less than 20 percent—0 points

2. **How much of the perimeter of the site borders on land in nonurban use?**
   - More than 90 percent—10 points
   - 90 to 20 percent—9 to 1 point(s)
   - Less than 20 percent—0 points

3. **How much of the site has been farmed (managed for a scheduled harvest or timber activity) more than 5 of the last 10 years?**
   - More than 90 percent—20 points
   - 90 to 20 percent—19 to 1 point(s)
   - Less than 20 percent—0 points

4. **Is the site subject to State or unit of local government policies or programs to protect farmland or covered by private programs to protect farmland?**
   - Site is protected—20 points
   - Site is not protected—0 points

5. **How close is the site to an urban built-up area?**
   - The site is 2 miles or more from an urban built-up area—15 points
   - The site is more than 1 mile but less than 2 miles from an urban built-up area—10 points
   - The site is less than 1 mile from, but is not adjacent to an urban built-up area—5 points
   - The site is adjacent to an urban built-up area—0 points

6. **How close is the site to water lines, sewer lines and/or other local facilities and services whose capacities and design would promote non-agricultural use?**
   - None of the services exist nearer than 3 miles from the site—15 points
   - Some of the services exist more than 1 but less than 3 miles from the site—10 points
   - All of the services exist within 1⁄2 mile of the site—0 points

7. **Is the farm unit(s) containing the site (before the project) as large as the average-size farming unit in the county?** (Average farm sizes in each county are available from the NRCS field offices in each State. Data are from the latest available Census of Agriculture, Acreage of Farm Units in Operation with $1,000 or more in sales.)
   - As large or larger—10 points
   - Below average—deduct 1 point for each 5 percent below the average, down to 0 points if 50 percent or more below average—9 to 0 points

8. **If this site is chosen for the project, how much of the remaining land on the farm will become non-farmable because of interference with land patterns?**
   - Acreage equal to more than 25 percent of acres directly converted by the project—10 points
   - Acreage equal to between 25 and 5 percent of the acres directly converted by the project—9 to 1 point(s)
   - Acreage equal to less than 5 percent of the acres directly converted by the project—0 points

9. **Does the site have available adequate supply of farm support services and markets, i.e., farm suppliers, equipment dealers, processing and storage facilities and farmer’s markets?**
   - All required services are available—5 points
Natural Resources Conservation Service, USDA § 658.6

Some required services are available—4 to 1 point(s)
No required services are available—0 points

(10) Does the site have substantial and well-maintained on-farm investments such as barns, other storage buildings, fruit trees and vines, field terraces, drainage, irrigation, waterways, or other soil and water conservation measures?

High amount of on-farm investment—20 points
Moderate amount of on-farm investment—19 to 1 point(s)
No on-farm investment—0 points

(11) Would the project at this site, by converting farmland to nonagricultural use, reduce the demand for farm support services so as to jeopardize the continued existence of these support services and thus, the viability of the farms remaining in the area?

Substantial reduction in demand for support services if the site is converted—10 points
Some reduction in demand for support services if the site is converted—9 to 1 point(s)
No significant reduction in demand for support services if the site is converted—0 points

(12) Is the kind and intensity of the proposed use of the site sufficiently incompatible with agriculture that it is likely to contribute to the eventual conversion of surrounding farmland to nonagricultural use?

Proposed project is incompatible with existing agricultural use of surrounding farmland—10 points
Proposed project is tolerable to existing agricultural use of surrounding farmland—9 to 1 point(s)
Proposed project is fully compatible with existing agricultural use of surrounding farmland—0 points

(c) Corridor-type Site Assessment Criteria. The following criteria are to be used for projects that have a linear or corridor-type site configuration connecting two distant points, and crossing several different tracts of land. These include utility lines, highways, railroads, stream improvements, and flood control systems. Federal agencies are to assess the suitability of each corridor-type site or design alternative for protection as farmland along with the land evaluation information described in §658.5(a). All criteria for corridor-type sites will be scored as shown in §658.5(b) for other sites, except as noted below:

(1) Criteria 5 and 6 will not be considered.

(2) Criterion 8 will be scored on a scale of 0 to 25 points, and criterion 11 will be scored on a scale of 0 to 25 points.

§ 658.6 Technical assistance.

(a) Section 1543 of the Act, 7 U.S.C. 4204 states, “The Secretary is encouraged to provide technical assistance to any State or unit of local government, or any nonprofit organization, as determined by the Secretary, that desires to develop programs or policies to limit the conversion of productive farmland to nonagricultural uses.” In §2.62, of 7 CFR part 2, subtitle A, NRCS is delegated leadership responsibility within USDA for the activities treated in this part.

(b) In providing assistance to States, local units of government, and nonprofit organizations, USDA will make available maps and other soils information from the national cooperative soil survey through NRCS field offices.

(c) Additional assistance, within available resources, may be obtained from local offices of other USDA agencies. The Agricultural Stabilization and Conservation Service and the Forest Service can provide aerial photographs, crop history data, and related information. A reasonable fee may be charged. In many States, the Cooperative Extension Service can provide help in understanding and identifying farmland protection issues and problems, resolving conflicts, developing alternatives, deciding on appropriate actions, and implementing those decisions.

(d) Officials of State agencies, local units of government, nonprofit organizations, or regional, area, State-level, or field offices of Federal agencies may obtain assistance by contacting the office of the NRCS State conservationist. A list of Natural Resources Conservation Service State office locations appears in appendix A, §661.6 of this title. If further assistance is needed, requests

623
§ 658.7 USDA assistance with Federal agencies' reviews of policies and procedures.

(a) Section 1542(a) of the Act, 7 U.S.C. 4203, states, “Each department, agency, independent commission or other unit of the Federal Government, with the assistance of the Department of Agriculture, shall review current provisions of law, administrative rules and regulations, and policies and procedures applicable to it to determine whether any provision thereof will prevent such unit of the Federal Government from taking appropriate action to comply fully with the provisions of this subtitle.”

(b) Section 1542(b) of the Act, 7 U.S.C. 4203, requires, as appropriate, each department, agency, independent commission, or other unit of the Federal Government, with the assistance of the Department of Agriculture, to develop proposals for action to bring its programs, authorities, and administrative activities into conformity with the purpose and policy of the Act.

(c) USDA will provide certain assistance to other Federal agencies for the purposes specified in section 1542 of the Act, 7 U.S.C. 4203. If a Federal agency identifies or suggests changes in laws, administrative rules and regulations, policies, or procedures that may affect the agency’s compliance with the Act, USDA can advise the agency of the probable effects of the changes on the protection of farmland. To request this assistance, officials of Federal agencies should correspond with the Chief, Natural Resources Conservation Service, P.O. Box 2890, Washington, DC 20013.

(d) To meet the reporting requirements of section 1546 of the Act, 7 U.S.C. 4207, and for data collection purposes, each Federal agency is requested to report to the Chief of the Natural Resources Conservation Service by November 15th of each year on progress made during the prior fiscal year to implement sections 1542 (a) and (b) of the Act, 7 U.S.C. 4203 (a) and (b). Until an agency fully implements those sections, the agency should continue to make the annual report, but may omit the report upon full implementation. However, an agency is requested to file an annual report for any future year in which the agency has substantially changed its process for compliance with the Act.

[49 FR 27724, July 5, 1984, as amended at 59 FR 31118, June 17, 1994]
SUBCHAPTER G—MISCELLANEOUS

PART 660 [RESERVED]

PART 661—PUBLIC INFORMATION AND RIGHT TO PRIVACY

Subpart A—Availability of Records and Materials

Sec.
661.1 General.
661.2 Public access and copying.
661.3 Requests for records.
661.4 Appeals.
661.5 Exempt records.

Subpart B—Right to Privacy

661.6 General.

APPENDIX A TO PART 661—AVAILABILITY OF INFORMATION

AUTHORITY: 5 U.S.C. 552, 552a; 7 CFR 1.11-1.16.

SOURCE: 43 FR 34756, Aug. 7, 1978, unless otherwise noted.

Subpart A—Availability of Records and Materials

§ 661.1 General.
This part is issued in accordance with the regulations of the Secretary of Agriculture at 7 CFR 1.1 through 1.16 implementing the Freedom of Information Act, 5 U.S.C. 552. The Secretary’s regulations, as implemented by the regulations in this part, govern the availability to the public of records of the Natural Resources Conservation Service and the records for which the Natural Resources Conservation Service has custodial responsibility.

§ 661.2 Public access and copying.
Natural Resources Conservation Service will make available for public inspection and copying those materials covered by 5 U.S.C. 552(a)(2) as set out in the Secretary’s regulations.

§ 661.3 Requests for records.
Requests for records under 5 U.S.C. 552(a)(3) will be made in accordance with 7 CFR 1.3(a). The titles and mailing addresses of the officials in Natural Resources Conservation Service authorized to receive requests for records are shown in Appendix A of this subpart. Authority is hereby delegated to these officials to make determinations regarding such requests in accordance with 7 CFR 1.4(c).

§ 661.4 Appeals.
Any person whose request for records above is denied shall have the right to appeal that denial in accordance with 7 CFR 1.3(e). All appeals shall be addressed to: Administrator, Natural Resources Conservation Service, U.S. Department of Agriculture, P.O. Box 2890, Washington, DC 20013.

§ 661.5 Exempt records.
Records exempt under 5 U.S.C. 552(b) may be withheld in accordance with 7 CFR 1.11.

Subpart B—Right to Privacy

§ 661.6 General.
Natural Resources Conservation Service implementation of the Privacy Act of 1974, 5 U.S.C. 552a is contained in the regulations of the Secretary, 7 CFR 1.110 through 1.123.

APPENDIX A TO PART 661—AVAILABILITY OF INFORMATION

The following list pertaining to the availability of information are published in accordance with the requirement and pursuant to the authority of sections 552, 559 of Title 5, United States Code.

REQUEST FOR EXAMINATION OR COPY OF RECORDS

General

Request for examination and copying of a record or for copies of records shall be made to the Deputy Administrator for Administration, Natural Resources Conservation Service, U.S. Department of Agriculture, P.O. Box 2890, Washington, DC 20013, or to the State Conservationist in any of the listed State offices.

PART 662—REGIONAL EQUITY

Sec.
662.1 General.
662.2 Definitions.
662.3 Applicability.
662.4 Regional Equity implementation procedure.
Natural Resources Conservation Service, USDA § 662.4

SOURCE: 74 FR 63540, Dec. 4, 2009, unless otherwise noted.

§ 662.1 General.
This part sets forth the procedures that NRCS will use to implement the Regional Equity provision of the Food Security Act of 1985, 16 U.S.C. 3841(d).

§ 662.2 Definitions.
The following definitions are applicable to this part:
Chief means the Chief of NRCS or the person delegated authority to act on behalf of the Chief.
Contribution programs means Regional Equity programs that contribute funding to Regional Equity States, as determined by the Chief each fiscal year, consistent with the limitations established in 16 U.S.C. 3841(d).
Drawing account means the aggregated amount of contribution program funds required to bring all States to the Regional Equity threshold.
Funding opportunity means the amount of funding needed to bring a State to the $15,000,000 Regional Equity threshold for the aggregate of Regional Equity programs.
Initial allocation means the amount of funding provided to all States through a merit-based, natural resource focused process.
Obligated means a specific binding agreement, in writing, for the purpose authorized by law and executed while the funding is available.
Regional Equity programs mean conservation programs under Subtitle D (excluding the Conservation Reserve Program, Wetlands Reserve Program, and the Conservation Security Program) of the Food Security Act of 1985. These programs include: Conservation Stewardship Program, Farm and Ranch Lands Protection Program, Grassland Reserve Program, Environmental Quality Incentives Program, Conservation Innovation Grants, Agricultural Water Enhancement Program, Conservation of Private Grazing Land, Wildlife Habitat Incentive Program, Grassroots Source Water Protection Program, Great Lakes Basin Program, Chesapeake Bay Watershed Initiative, and the Voluntary Public Access and Habitat Incentive Program. Regional Equity programs will be aggregated to determine whether a State meets the $15,000,000 Regional Equity threshold. However, not all Regional Equity programs will be considered contribution programs.
Regional Equity provision means the statutory requirement to give priority funding before April 1 for approved applications for specific programs within States that have not received a $15,000,000 aggregate level of funding.
Regional Equity States means any State not meeting the Regional Equity threshold of $15,000,000 through the initial allocation for Regional Equity programs.
Regional Equity threshold means the $15,000,000 minimum aggregate amount of Regional Equity program funds.
Respective demand means the mix of contribution program funds that each State Conservationist in a Regional Equity State requests to fill that State’s funding opportunity.
State means all 50 States, the District of Columbia, Commonwealth of Puerto Rico, Guam, Virgin Islands, American Samoa, Commonwealth of the Northern Mariana Islands, and the Freely Associated States.
State Conservationist means the NRCS employee authorized to implement Regional Equity programs and direct and supervise NRCS activities in a State, the Caribbean Area, or the Pacific Islands Area.

§ 662.3 Applicability.
The regulation in this part sets forth the policies and procedures for the Regional Equity provision as administered by the NRCS. This regulation applies to the Regional Equity programs defined in this part. The Chief will implement the Regional Equity provision by identifying programs that contribute to the establishment of program-specific drawing accounts for priority funding in Regional Equity States.

§ 662.4 Regional Equity implementation procedure.
The following procedures will implement the Regional Equity provision:
(a) Determine initial allocations. NRCS will determine initial conservation
§ 662.4

program funding levels for each State through a merit-based, natural resource focused allocation process as determined by the Chief.

(b) Determine the funding opportunity. The combined initial allocation funding level for Regional Equity programs, by State, will be compared to the Regional Equity threshold to determine each Regional Equity State’s funding opportunity.

(c) Establish contribution program fund levels. Subject to availability of funds, contribution program fund levels are determined by:

(1) Identifying which programs contribute funds, as determined by the Chief, consistent with the limitations established in 16 U.S.C. 3841(d); and

(2) Each State’s respective demand.

(i) State Conservationists in Regional Equity States, in consultation with State Technical Committees, will evaluate and determine their respective program demands based on the following criteria:

(A) Program applications and how they address national program priorities;

(B) Historic trends in program interest; and

(C) State priority natural resource concerns.

(ii) The State Conservationist’s identified respective demand will assist the Chief in determining the composition of contribution program funds within the established drawing account.

(d) Establish the drawing account. NRCS will establish a drawing account for each contribution program, as determined in paragraphs (c)(1) and (c)(2) of this section, and will give priority before April 1 of each fiscal year for such funds to be used to fund applications in Regional Equity States sufficient to bring each of the Regional Equity States to the Regional Equity threshold of $15,000,000.

(e) Access the drawing account. State Conservationists in Regional Equity States may request access to that State’s assigned portion of the drawing account once that State has obligated at least 90 percent of its initial allocation for that same program. The Chief may waive the 90 percent threshold requirement for a specific program in response to specific program needs.

(f) Re-allocation of funds. The program-specific drawing accounts for Regional Equity States will be available until April 1 of each fiscal year, after which date the remaining funds may be re-allocated at the discretion of the Chief.
