Subpart E—Special Provisions for Commercial Upland Game Birds, Commercial Waterfowl, Raised-for-Release Upland Game Birds, and Raised-for-Release Waterfowl

SOURCE: 74 FR 14717, Apr. 1, 2009, unless otherwise noted.

§ 146.51 Definitions.

Commercial upland game bird slaughter plant. A commercial upland game bird slaughter plant that is federally inspected or under State inspection that the U.S. Department of Agriculture's Food Safety and Inspection Service has recognized as equivalent to Federal inspection.

Commercial upland game birds. Upland game bird pheasants, quail, or partridges grown under confinement for the primary purpose of producing meat for human consumption.

Commercial waterfowl. Domesticated ducks or geese grown under confinement for the primary purpose of producing meat for human consumption.

Commercial waterfowl slaughter plant. A commercial waterfowl slaughter plant that is federally inspected or under State inspection that the U.S. Department of Agriculture's Food Safety and Inspection Service has recognized as equivalent to Federal inspection.

Raised-for-release upland game birds. Pheasants, quail, and partridge that are raised under confinement for release in game preserves and are not breeding stock.

Raised-for-release waterfowl. Waterfowl that are raised under confinement for release in game preserves and are not breeding stock.

Shift. The working period of a group of employees who are on duty at the same time.

9 CFR Ch. I (1-1-14 Edition)

§ 146.52 Participation.

(a) Participating commercial upland game bird slaughter plants, commercial waterfowl slaughter plants, raised-for-release upland game bird premises, and raised-for-release waterfowl premises shall comply with the applicable general provisions of Subpart A of this part and the special provisions of this subpart E.

(b) Commercial waterfowl and commercial upland game bird slaughter plants that slaughter fewer than 50,000 birds annually are exempt from the special provisions of this subpart E.

(c) Raised-for-release upland game bird premises and raised-for-release waterfowl premises that raise fewer than 25,000 birds annually are exempt from the special provisions of this subpart E.

§ 146.53 Terminology and classification; slaughter plants and premises.

Participating flocks which have met the respective requirements specified in this section may be designated by the following terms and the corresponding designs illustrated in §146.9 of this part:

(a) *U.S. H5/H7 Avian Influenza Monitored.* This program is intended to be the basis from which the commercial waterfowl and commercial upland game bird industry may conduct a program to monitor for the H5/H7 subtypes of avian influenza. It is intended to determine the presence of the H5/H7 subtypes of avian influenza in commercial waterfowl and commercial upland game birds through routine surveillance of each participating slaughter plant. A slaughter plant will qualify for this classification when the Official State Agency determines that it has met one of the following requirements:

(1) It is a commercial upland game bird slaughter plant or commercial waterfowl slaughter plant where a minimum of 11 birds per shift are tested negative for the H5/H7 subtypes of avian influenza, as provided in §146.13(b), at slaughter;

(2) It is a commercial upland game bird slaughter plant or commercial waterfowl slaughter plant that only accepts commercial upland game birds or commercial waterfowl from flocks where a minimum of 11 birds per flock

have been tested negative for the H5/H7 subtypes of avian influenza, as provided in §146.13(b), no more than 21 days prior to slaughter; or

(3) It is a commercial upland game bird slaughter plant or commercial waterfowl slaughter plant that has an ongoing active and passive surveillance program for H5/H7 subtypes of avian influenza that is approved by the Official State Agency and the Service.

(b) *U.S. H5/H7 Avian Influenza Monitored.* This program is intended to be the basis from which the raised-for-release upland game bird and raised-for-release waterfowl industries may conduct a program to monitor for the H5/H7 subtypes of avian influenza through routine surveillance of each participating premises. A premises will qualify for the classification when the Official State Agency determines that a representative sample of 30 birds from the participating premises has been tested with negative results for the H5/H7 subtypes of avian influenza, as provided in §146.13(b), every 90 days.

[74 FR 14717, Apr. 1, 2009, as amended at 76 FR 15797, Mar. 22, 2011]

PART 147—AUXILIARY PROVISIONS ON NATIONAL POULTRY IMPROVEMENT PLAN

Subpart A—Blood Testing Procedures

Sec.

- 147.1 The standard tube agglutination test.
- 147.2 The rapid serum test.
- 147.3 The stained-antigen, rapid, whole-blood test.
- 147.4 [Reserved]
- 147.5 The microagglutination test for pul-
lorum-typhoid.
- 147.6 Procedure for determining the status
of flocks reacting to tests for Myco-
plasma gallisepticum, Mycoplasma
synoviae, and Mycoplasma meleagridis.
- 147.7 Standard test procedures for myco-
plasma.
- 147.8 Procedures for preparing egg yolk
samples for diagnostic tests.
- 147.9 Standard test procedures for avian in-
fluenza.

Subpart B—Bacteriological Examination Procedure

- 147.10 Laboratory procedure recommended
for the bacteriological examination of

egg-type breeding flocks with salmonella
enteritidis positive environments.

- 147.11 Laboratory procedure recommended
for the bacteriological examination of
salmonella.
- 147.12 Procedures for collection, isolation,
and identification of Salmonella from en-
vironmental samples, cloacal swabs,
chick box papers, and meconium sam-
ples.
- 147.13 Procedure for bacteriological cul-
turing of eggshells for colon bacilli orga-
nisms.
- 147.14 Procedures to determine status and
effectiveness of sanitation monitored
program.
- 147.15 Laboratory procedure recommended
for the bacteriological examination of
mycoplasma reactors.
- 147.16 Procedure for the evaluation of myco-
plasma reactors by in vivo bio-assay (en-
richment).
- 147.17 Laboratory procedure recommended
for the bacteriological examination of
cull chicks and poults for salmonella.

Subpart C—Sanitation Procedures

- 147.21 Flock sanitation.
- 147.22 Hatching egg sanitation.
- 147.23 Hatchery sanitation.
- 147.24 Cleaning and disinfecting.
- 147.25 Fumigation.
- 147.26 Procedures for establishing isolation
and maintaining sanitation and good
management practices for the control of
Salmonella and Mycoplasma infections.
- 147.27 Procedures recommended to prevent
the spread of disease by artificial insemi-
nation of turkeys.

Subpart D—Molecular Examination Procedures

- 147.30 Laboratory procedure recommended
for the polymerase chain reaction (PCR)
test for Mycoplasma gallisepticum and
M. synoviae.
- 147.31 Laboratory procedures recommended
for the real-time polymerase chain reac-
tion test for Mycoplasma gallisepticum
(MGLP ReTi).

Subpart E—Procedure for Changing National Poultry Improvement Plan

- 147.41 Definitions.
- 147.42 General.
- 147.43 General Conference Committee.
- 147.44 Submitting, compiling, and distrib-
uting proposed changes.
- 147.45 Official delegates.
- 147.46 Committee consideration of proposed
changes.
- 147.47 Conference consideration of proposed
changes.
