

## § 82.7

## 9 CFR Ch. I (1–1–14 Edition)

destination listed on the permit required by paragraph (b)(4) of this section.

(Approved by the Office of Management and Budget under control number 0579–0116)

[61 FR 56883, Nov. 5, 1996, as amended at 73 FR 30298, May 27, 2008]

### § 82.7 Interstate movement of manure and litter from a quarantined area.

(a) Manure generated by and litter used by birds or poultry not known to be infected with Newcastle disease may be moved interstate from a quarantined area only if:

(1) The manure and litter is accompanied by a permit obtained in accordance with § 82.11;

(2) The manure and litter has been heated throughout, in the quarantined area, to a temperature of not less than 175 °F (79.4 °C) or subjected to any other treatment approved by the Administrator as being adequate to prevent the dissemination of Newcastle disease, and then placed either in a previously unused container or in a container that has been cleaned and disinfected, since last being used, in accordance with part 71 of this chapter;

(3) The declaration or affidavit required by § 82.11(b) lists the location of the poultry or birds that generated the manure or used the litter, and the name and address of the owner of the poultry or birds that generated the manure or used the litter; and

(4) Copies of the permit accompanying the manure and litter interstate are submitted so that a copy is received by the State animal health official and the veterinarian in charge for the State of destination within 72 hours of the arrival of the manure and litter at the destination listed on the permit.

(b) Compost derived from manure generated by and litter used by birds or poultry known to be infected with Newcastle disease may be moved interstate from a quarantined area only if:

(1) The manure and litter is accompanied by a permit obtained in accordance with § 82.11;

(2) All birds and poultry have been removed from the premises where the manure or litter is held;

(3) After all birds are removed from the premises where the manure or lit-

ter is held, all manure and litter inside and outside the bird or poultry house remains undisturbed for at least 28 days before being moved from the infected premises for composting;

(4) Composting is done at a site approved by the Administrator and under a protocol approved by the Administrator as being adequate to prevent the dissemination of Newcastle disease. All manure and litter from the infected premises must be moved to the composting site at the same time;

(5) Following the composting process, the composted manure or litter remains undisturbed for an additional 15 days before movement;

(6) After this 15-day period, all of the composted manure or litter from the infected site is removed at the same time;

(7) The resulting compost must be transported either in a previously unused container or in a container that has been cleaned and disinfected, since last being used, in accordance with part 71 of this chapter;

(8) The vehicle in which the resulting compost is to be transported has been cleaned and disinfected, since last being used, in accordance with part 71 of this chapter; and

(9) Copies of the permit accompanying the compost derived from the manure and the litter are submitted so that a copy is received by the State animal health official and the veterinarian in charge for the State of destination within 72 hours of arrival of the compost at the destination listed on the permit.
