

(B) The operator must retain the daily log, along with any logs kept by APHIS and deposited with the operator, for at least 2 years following the date of release of the ruminants from quarantine and must make such logs available to APHIS representatives upon request.

(5) *Environmental quality.* If APHIS determines that a privately owned medium or minimum security quarantine facility does not meet applicable local, State, or Federal environmental regulations, APHIS may deny or suspend approval of the facility until appropriate remedial measures have been applied.

(6) *Other laws.* A privately owned medium or minimum security quarantine facility must comply with other applicable Federal laws and regulations, as well as with all applicable State and local codes and regulations.

(7) *Variations.* The Administrator may grant variances to existing requirements relating to location, construction, and other design features of a privately owned medium security quarantine facility or minimum security quarantine facility as well as to sanitation, security, operating procedures, recordkeeping, and other provisions in paragraph (d) of this section, but only if the Administrator determines that the variance causes no detrimental impact to the health of the ruminants or to the overall biological security of the quarantine operations. The operator must submit a request for a variance to the Administrator in writing at least 30 days in advance of the arrival of the ruminants to the facility. Any variance also must be expressly provided for in the compliance agreement.

(Approved by the Office of Management and Budget under control number 0579-0232)

[55 FR 31495, Aug. 2, 1990. Redesignated at 62 FR 56012, Oct. 28, 1997, as amended at 71 FR 29773, May 24, 2006]

§ 93.413 Quarantine stations, visiting restricted; sales prohibited.

Visitors are not permitted in the quarantine enclosures during any time that ruminants are in quarantine unless the APHIS representative or inspector in charge specifically grants access under such conditions and restrictions as may be imposed by the

APHIS representative or inspector in charge. An importer (or his or her accredited agent or veterinarian) may be admitted to the yards and buildings containing his or her quarantined ruminants at such intervals as may be deemed necessary, and under such conditions and restrictions as may be imposed, by the APHIS representative or the inspector in charge of the quarantine facility or station. On the last day of the quarantine period, owners, officers, or registry societies, and others having official business or whose services may be necessary in the removal of the ruminants may be admitted upon written permission from the APHIS representative or inspector in charge. No exhibition or sale shall be allowed within the quarantine grounds.

[71 FR 29779, May 24, 2006]

§ 93.414 Milk from quarantined ruminants.

Milk or cream from ruminants quarantined under the provisions of this part shall not be used by any person other than those in charge of such ruminants, nor be fed to any animals other than those within the same enclosure, without permission of the APHIS representative or inspector in charge of the quarantine station and subject to such restrictions as he or she may consider necessary to each instance. No milk or cream shall be removed from the quarantine premises except in compliance with all State and local regulations.

[55 FR 31495, Aug. 2, 1990. Redesignated at 62 FR 56012, Oct. 28, 1997, as amended at 71 FR 29779, May 24, 2006]

§ 93.415 Manure from quarantined ruminants.

No manure shall be removed from the quarantine premises until the release of the ruminants producing same.

§ 93.416 Appearance of disease among ruminants in quarantine.

If any contagious disease appears among ruminants during the quarantine period special precautions shall be taken to prevent spread of the infection to other animals in the quarantine station or to those outside the grounds.

§93.417

9 CFR Ch. I (1–1–14 Edition)

The affected ruminants shall be disposed of as the Administrator may direct, depending upon the nature of the disease.

CANADA⁸

§93.417 Import permit and declaration for ruminants.

(a) For ruminants intended for importation from Canada, the importer shall first apply for and obtain from APHIS an import permit as provided in §93.404: *Provided*, That an import permit is not required for ruminants offered for entry at a land border port designated in §93.403(b) if such ruminant is:

(1) A wether;

(2) A sheep or goat imported for immediate slaughter; or

(3) A ruminant other than a sheep or goat and that ruminant:

(i) Was born in Canada or the United States, and has been in no region other than Canada or the United States, or

(ii) Has been legally imported into Canada from some other region and unconditionally released in Canada so as to be eligible to move freely within that region without restriction of any kind and has been in Canada after such release for 60 days or longer.

(b) For all ruminants offered for importation from Canada, the importer or his or her agent shall present two copies of a declaration as provided in §93.407.

[55 FR 31495, Aug. 2, 1990, as amended at 60 FR 13900, Mar. 15, 1995. Redesignated and amended at 62 FR 56012, 56018, Oct. 28, 1997]

§93.418 Cattle from Canada.

(a) *Health certificates.* Cattle intended for importation from Canada must be accompanied by a certificate issued in accordance with §93.405(a). The certificate must state that the cattle have been inspected and were found to be free from any evidence of communicable disease and that, as far as can be determined, they have not been exposed to any such disease during the preceding 60 days. Cattle found un-

qualified upon inspection at the port of entry will be refused entry into the United States.

(b) *Tuberculin-test certificates.* (1) Cattle from Canada from a herd in which any cattle have been determined to have tuberculosis shall not be imported into the United States.

(2) Except for cattle prohibited from importation under paragraph (b)(1) of this section, cattle from Canada may be imported into the United States if:

(i) The cattle are imported for immediate slaughter in accordance with §93.420; or

(ii) The cattle are imported for movement to a feedlot and then to slaughter and the certificate accompanying the cattle shows, in addition to the information required under §93.405, the breed of the animal, and:

(A) That the cattle are from a tuberculosis-free herd; or

(B) The date and place the cattle were last tested for tuberculosis; that the cattle were found negative for tuberculosis on such test; and that such test was performed within 60 days preceding the arrival of the cattle at the port of entry; or

(C) That the cattle are at least five days but not more than four weeks of age and, therefore, exempt from the tuberculosis testing requirement; or

(D) For a calf imported with its dam, the date and place the calf's dam was last tested for tuberculosis; that the dam was found negative for tuberculosis on such test; that such test was performed within 60 days preceding the arrival of the calf and dam at the port of entry; and that the calf was born after such test was performed.

(c) *Brucellosis test or vaccination certificates.* (1) Cattle from Canada from a herd in which any cattle have been determined to have brucellosis may not be imported into the United States;

(2) Except for cattle prohibited from importation into the United States under paragraph (c)(1) of this section, cattle 6 months of age or older from Canada may be imported into the United States if the following conditions are met:

(i) The cattle are imported for immediate slaughter in accordance with §93.420;

(ii) The cattle are steers; or

⁸Importations from Canada shall be subject to §§93.417 to 93.421, inclusive, in addition to other sections in this part which are in terms applicable to such importations.
