PROGRAM OFFICES

§ 1.42 Office of Nuclear Material Safety and Safeguards.

(a) The Office of Nuclear Material Safety and Safeguards (NMSS) is responsible for regulating activities that provide for the safe and secure production of nuclear fuel used in commercial nuclear reactors; the safe storage, transportation, and disposal of low-level and high-level radioactive waste and spent nuclear fuel; the transportation of radioactive materials regulated under the Atomic Energy Act of 1954, as amended (the Act); and all other medical, industrial, academic, and commercial uses of radioactive isotopes. The NMSS ensures safety and security by implementing a regulatory program involving activities including licensing, inspection, assessment of environmental impacts for all nuclear material facilities and activities, assessment of licensee performance, events analysis, enforcement, and identification and resolution of generic issues. The NMSS is also responsible for developing all new regulations and amending existing regulations for all nuclear material facilities and activities regulated by NMSS.

(b) The Office of Nuclear Material Safety and Safeguards—

(1) Develops and implements NRC policy for the regulation of: Uranium recovery, conversion, and enrichment; fuel fabrication and development; transportation of nuclear materials, including certification of transport containers and reactor spent fuel storage; safe management and disposal of spent fuel and low-level and high-level radioactive waste; and medical, industrial, academic, and commercial uses of radioactive isotopes;

(2) Has lead responsibility within NRC for domestic and international safeguards policy and regulation for fuel cycle facilities, including material control and accountability;
