

CODE OF FEDERAL REGULATIONS

Title 26 Internal Revenue

Part 1 (§§ 1.851 to 1.907)

Revised as of April 1, 2015

Containing a codification of documents
of general applicability and future effect

As of April 1, 2015

Published by the Office of the Federal Register
National Archives and Records Administration
as a Special Edition of the Federal Register

U.S. GOVERNMENT OFFICIAL EDITION NOTICE

Legal Status and Use of Seals and Logos

The seal of the National Archives and Records Administration (NARA) authenticates the Code of Federal Regulations (CFR) as the official codification of Federal regulations established under the Federal Register Act. Under the provisions of 44 U.S.C. 1507, the contents of the CFR, a special edition of the Federal Register, shall be judicially noticed. The CFR is prima facie evidence of the original documents published in the Federal Register (44 U.S.C. 1510).

It is prohibited to use NARA's official seal and the stylized Code of Federal Regulations logo on any republication of this material without the express, written permission of the Archivist of the United States or the Archivist's designee. Any person using NARA's official seals and logos in a manner inconsistent with the provisions of 36 CFR part 1200 is subject to the penalties specified in 18 U.S.C. 506, 701, and 1017.

Use of ISBN Prefix

This is the Official U.S. Government edition of this publication and is herein identified to certify its authenticity. Use of the 0-16 ISBN prefix is for U.S. Government Publishing Office Official Editions only. The Superintendent of Documents of the U.S. Government Publishing Office requests that any reprinted edition clearly be labeled as a copy of the authentic work with a new ISBN.

*To cite the regulations in
this volume use title,
part and section num-
ber. Thus, 26 CFR
1.851-1 refers to title 26,
part 1, section 851-1.*

Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

Title 1 through Title 16.....	as of January 1
Title 17 through Title 27.....	as of April 1
Title 28 through Title 41.....	as of July 1
Title 42 through Title 50.....	as of October 1

The appropriate revision date is printed on the cover of each volume.

LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, April 1, 2015), consult the "List of CFR Sections Affected (LSA)," which is issued monthly, and the "Cumulative List of Parts Affected," which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cut-off date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.

Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

PAST PROVISIONS OF THE CODE

Provisions of the Code that are no longer in force and effect as of the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on any given date in the past by using the appropriate List of CFR Sections Affected (LSA). For the convenience of the reader, a “List of CFR Sections Affected” is published at the end of each CFR volume. For changes to the Code prior to the LSA listings at the end of the volume, consult previous annual editions of the LSA. For changes to the Code prior to 2001, consult the List of CFR Sections Affected compilations, published for 1949-1963, 1964-1972, 1973-1985, and 1986-2000.

“[RESERVED]” TERMINOLOGY

The term “[Reserved]” is used as a place holder within the Code of Federal Regulations. An agency may add regulatory information at a “[Reserved]” location at any time. Occasionally “[Reserved]” is used editorially to indicate that a portion of the CFR was left vacant and not accidentally dropped due to a printing or computer error.

INCORPORATION BY REFERENCE

What is incorporation by reference? Incorporation by reference was established by statute and allows Federal agencies to meet the requirement to publish regulations in the Federal Register by referring to materials already published elsewhere. For an incorporation to be valid, the Director of the Federal Register must approve it. The legal effect of incorporation by reference is that the material is treated as if it were published in full in the Federal Register (5 U.S.C. 552(a)). This material, like any other properly issued regulation, has the force of law.

What is a proper incorporation by reference? The Director of the Federal Register will approve an incorporation by reference only when the requirements of 1 CFR part 51 are met. Some of the elements on which approval is based are:

- (a) The incorporation will substantially reduce the volume of material published in the Federal Register.
- (b) The matter incorporated is in fact available to the extent necessary to afford fairness and uniformity in the administrative process.
- (c) The incorporating document is drafted and submitted for publication in accordance with 1 CFR part 51.

What if the material incorporated by reference cannot be found? If you have any problem locating or obtaining a copy of material listed as an approved incorporation by reference, please contact the agency that issued the regulation containing that incorporation. If, after contacting the agency, you find the material is not available, please notify the Director of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001, or call 202-741-6010.

CFR INDEXES AND TABULAR GUIDES

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Authorities and Rules. A list of CFR titles, chapters, subchapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.

An index to the text of “Title 3—The President” is carried within that volume. The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the “Contents” entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

INQUIRIES

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency’s name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202-741-6000 or write to the Director, Office of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001 or e-mail fedreg.info@nara.gov.

SALES

The Government Publishing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call toll-free, 866-512-1800, or DC area, 202-512-1800, M-F 8 a.m. to 4 p.m. e.s.t. or fax your order to 202-512-2104, 24 hours a day. For payment by check, write to: US Government Publishing Office – New Orders, P.O. Box 979050, St. Louis, MO 63197-9000.

ELECTRONIC SERVICES

The full text of the Code of Federal Regulations, the LSA (List of CFR Sections Affected), The United States Government Manual, the Federal Register, Public Laws, Public Papers of the Presidents of the United States, Compilation of Presidential Documents and the Privacy Act Compilation are available in electronic format via www.ofr.gov. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800, or 866-512-1800 (toll-free). E-mail, ContactCenter@gpo.gov.

The Office of the Federal Register also offers a free service on the National Archives and Records Administration’s (NARA) World Wide Web site for public law numbers, Federal Register finding aids, and related information. Connect to NARA’s web site at www.archives.gov/federal-register.

The e-CFR is a regularly updated, unofficial editorial compilation of CFR material and Federal Register amendments, produced by the Office of the Federal Register and the Government Publishing Office. It is available at www.ecfr.gov.

AMY P. BUNK,
Acting Director,
Office of the Federal Register.
April 1, 2015.

THIS TITLE

Title 26—INTERNAL REVENUE is composed of twenty-two volumes. The contents of these volumes represent all current regulations issued by the Internal Revenue Service, Department of the Treasury, as of April 1, 2015. The first fifteen volumes comprise part 1 (Subchapter A—Income Tax) and are arranged by sections as follows: §§ 1.0–1.60; §§ 1.61–1.139; §§ 1.140–1.169; §§ 1.170–1.300; §§ 1.301–1.400; §§ 1.401–1.409; §§ 1.410–1.440; §§ 1.441–1.500; §§ 1.501–1.640; §§ 1.641–1.850; §§ 1.851–1.907; §§ 1.908–1.1000; §§ 1.1001–1.1400; §§ 1.1401–1.1550; and § 1.1551 to end of part 1. The sixteenth volume containing parts 2–29, includes the remainder of subchapter A and all of Subchapter B—Estate and Gift Taxes. The last six volumes contain parts 30–39 (Subchapter C—Employment Taxes and Collection of Income Tax at Source); parts 40–49; parts 50–299 (Subchapter D—Miscellaneous Excise Taxes); parts 300–499 (Subchapter F—Procedure and Administration); parts 500–599 (Subchapter G—Regulations under Tax Conventions); and part 600 to end (Subchapter H—Internal Revenue Practice).

The OMB control numbers for Title 26 appear in § 602.101 of this chapter. For the convenience of the user, § 602.101 appears in the Finding Aids section of the volumes containing parts 1 to 599.

For this volume, Michele Bugenhagen was Chief Editor. The Code of Federal Regulations publication program is under the direction of John Hyrum Martinez, assisted by Stephen J. Frattini.

- 1.872-1 Gross income of nonresident alien individuals.
- 1.872-2 Exclusions from gross income of nonresident alien individuals.
- 1.873-1 Deductions allowed nonresident alien individuals.
- 1.874-1 Allowance of deductions and credits to nonresident alien individuals.
- 1.874-1T Allowance of deductions and credits to nonresident alien individuals (temporary).
- 1.875-1 Partnerships.
- 1.875-2 Beneficiaries of estates or trusts.
- 1.876-1 Alien residents of Puerto Rico, Guam, American Samoa, or the Northern Mariana Islands.
- 1.879-1 Treatment of community income.
- FOREIGN CORPORATIONS
- 1.881-0 Table of contents.
- 1.881-1 Manner of taxing foreign corporations.
- 1.881-2 Taxation of foreign corporations not engaged in U.S. business.
- 1.881-3 Conduit financing arrangements.
- 1.881-4 Recordkeeping requirements concerning conduit financing arrangements.
- 1.881-5 Exception for certain possessions corporations.
- 1.882-0 Table of contents.
- 1.882-1 Taxation of foreign corporations engaged in U.S. business or of foreign corporations treated as having effectively connected income.
- 1.882-2 Income of foreign corporations treated as effectively connected with U.S. business.
- 1.882-3 Gross income of a foreign corporation.
- 1.882-4 Allowance of deductions and credits to foreign corporations.
- 1.882-4T Allowance of deductions and credits to foreign corporations (temporary).
- 1.882-5 Determination of interest deduction.
- 1.883-0 Outline of major topics.
- 1.883-1 Exclusion of income from the international operation of ships or aircraft.
- 1.883-2 Treatment of publicly-traded corporations.
- 1.883-3 Treatment of controlled foreign corporations.
- 1.883-4 Qualified shareholder stock ownership test.
- 1.883-5 Effective/applicability dates.
- 1.884-0 Overview of regulation provisions for section 884.
- 1.884-1 Branch profits tax.
- 1.884-2 Special rules for termination or incorporation of a U.S. trade or business or liquidation or reorganization of a foreign corporation or its domestic subsidiary.
- 1.884-2T Special rules for termination or incorporation of a U.S. trade or business or liquidation or reorganization of a foreign corporation or its domestic subsidiary (temporary).
- 1.884-3T Coordination of branch profits tax with second-tier withholding (temporary). [Reserved]
- 1.884-4 Branch-level interest tax.
- 1.884-5 Qualified resident.
- MISCELLANEOUS PROVISIONS
- 1.891 Statutory provisions; doubling of rates of tax on citizens and corporations of certain foreign countries.
- 1.892-1T Purpose and scope of regulations (temporary regulations).
- 1.892-2T Foreign government defined (temporary regulations).
- 1.892-3 Income of foreign governments.
- 1.892-3T Income of foreign governments (temporary regulations).
- 1.892-4T Commercial activities (temporary regulations).
- 1.892-5 Controlled commercial entity.
- 1.892-5T Controlled commercial entity (temporary regulations).
- 1.892-6T Income of international organizations (temporary regulations).
- 1.892-7T Relationship to other Internal Revenue Code sections (temporary regulations).
- 1.893-1 Compensation of employees of foreign governments or international organizations.
- 1.894-1 Income affected by treaty.
- 1.895-1 Income derived by a foreign central bank of issue, or by Bank for International Settlements, from obligations of the United States or from bank deposits.
- 1.897-1 Taxation of foreign investment in United States real property interests, definition of terms.
- 1.897-2 United States real property holding corporations.
- 1.897-3 Election by foreign corporation to be treated as a domestic corporation under section 897(i).
- 1.897-4AT Table of contents (temporary).

- 1.897-5 Corporate distributions.
 1.897-5T Corporate distributions (temporary).
 1.897-6T Nonrecognition exchanges applicable to corporations, their shareholders, and other taxpayers, and certain transfers of property in corporate reorganizations (temporary).
 1.897-7T Treatment of certain partnership interests as entirely U.S. real property interests under sections 897(g) and 1445(e) (temporary).
 1.897-8T Status as a U.S. real property holding corporation as a condition for electing section 897(i) pursuant to §1.897-3 (temporary).
 1.897-9T Treatment of certain interest in publicly traded corporations, definition of foreign person, and foreign governments and international organizations (temporary).
- INCOME FROM SOURCES WITHOUT THE UNITED STATES
- FOREIGN TAX CREDIT
- 1.901-1 Allowance of credit for taxes.
 1.901-2 Income, war profits, or excess profits tax paid or accrued.
 1.901-2A Dual capacity taxpayers.
 1.901-3 Reduction in amount of foreign taxes on foreign mineral income allowed as a credit.
 1.902-0 Outline of regulations provisions for section 902.
 1.902-1 Credit for domestic corporate shareholder of a foreign corporation for foreign income taxes paid by the foreign corporation.
 1.902-2 Treatment of deficits in post-1986 undistributed earnings and pre-1987 accumulated profits of a first- or lower-tier corporation for purposes of computing an amount of foreign taxes deemed paid under §1.902-1.
 1.902-3 Credit for domestic corporate shareholder of a foreign corporation for foreign income taxes paid with respect to accumulated profits of taxable years of the foreign corporation beginning before January 1, 1987.
 1.902-4 Rules for distributions attributable to accumulated profits for taxable years in which a first-tier corporation was a less developed country corporation.
 1.903-1 Taxes in lieu of income taxes.
 1.904-0 Outline of regulation provisions for section 904.
 1.904-1 Limitation on credit for foreign taxes.
 1.904-2 Carryback and carryover of unused foreign tax.
 1.904-3 Carryback and carryover of unused foreign tax by husband and wife.
 1.904-4 Separate application of section 904 with respect to certain categories of income.
- 1.904-5 Look-through rules as applied to controlled foreign corporations and other entities.
 1.904-6 Allocation and apportionment of taxes.
 1.904-7 Transition rules.
 1.904(b)- Outline of regulation provisions.
 1.904(b)-1 Special rules for capital gains and losses.
 1.904(b)-2 Special rules for application of section 904(b) to alternative minimum tax foreign tax credit.
 1.904(f)-1 Overall foreign loss and the overall foreign loss account.
 1.904(f)-2 Recapture of overall foreign losses.
 1.904(f)-3 Allocation of net operating losses and net capital losses.
 1.904(f)-4 Recapture of foreign losses out of accumulation distributions from a foreign trust.
 1.904(f)-5 Special rules for recapture of overall foreign losses of a domestic trust.
 1.904(f)-6 Transitional rule for recapture of FORI and general limitation overall foreign losses incurred in taxable years beginning before January 1, 1983, from foreign source taxable income subject to the general limitation in taxable years beginning after December 31, 1982.
 1.904(f)-7 Separate limitation loss and the separate limitation loss account.
 1.904(f)-8 Recapture of separate limitation loss accounts.
 1.904(f)-9—1.904(f)-11 [Reserved]
 1.904(f)-12 Transition rules.
 1.904(g)-0 Outline of regulation provisions.
 1.904(g)-1 Overall domestic loss and the overall domestic loss account.
 1.904(g)-2 Recapture of overall domestic losses.
 1.904(g)-3 Ordering rules for the allocation of net operating losses, net capital losses, U.S. source losses, and separate limitation losses, and for recapture of separate limitation losses, overall foreign losses, and overall domestic losses.
 1.904(i)-0 Outline of regulation provisions.
 1.904(i)-1 Limitation on use of deconsolidation to avoid foreign tax credit limitations.
 1.904(j)-0 Outline of regulation provisions.
 1.904(j)-1 Certain individuals exempt from foreign tax credit limitations.
 1.905-1 When credit for taxes may be taken.
 1.905-2 Conditions of allowance of credit.
 1.905-3T Adjustments to the pools of foreign taxes and earnings and profits when the allowable foreign tax credit changes (temporary).
 1.905-4T Notification of foreign tax redetermination (temporary).
 1.905-5T Foreign tax redeterminations and currency translation rules for foreign tax redeterminations occurring in taxable years beginning prior to January 1, 1987 (temporary).

Internal Revenue Service, Treasury

Pt. 1

1.907-0 Outline of regulation provisions for section 907.

1.907(a)-0 Introduction (for taxable years beginning after December 31, 1982).

1.907(a)-1 Reduction in taxes paid on FOGEI (for taxable years beginning after December 31, 1982).

1.907(b)-1 Reduction of creditable FORI taxes (for taxable years beginning after December 31, 1982).

1.907(c)-1 Definitions relating to FOGEI and FORI (for taxable years beginning after December 31, 1982).

1.907(c)-2 Section 907(c)(3) items (for taxable years beginning after December 31, 1982).

1.907(c)-3 FOGEI and FORI taxes (for taxable years beginning after December 31, 1982).

1.907(d)-1 Disregard of posted prices for purposes of chapter 1 of the Code (for taxable years beginning after December 31, 1982).

1.907(e)-1 [Reserved].

1.907(f)-1 Carryback and carryover of credits disallowed by section 907(a) (for amounts carried between taxable years that each begin after December 31, 1982).

AUTHORITY: 26 U.S.C. 7805.

Section 1.852-11 is also issued under 26 U.S.C. 852(b)(3)(C), 852(b)(8), and 852(c).

Section 1.853-1 also issued under 26 U.S.C. 901(j).

Section 1.853-2 also issued under 26 U.S.C. 901(j).

Section 1.853-3 also issued under 26 U.S.C. 901(j).

Section 1.853-4 also issued under 26 U.S.C. 901(j) and 26 U.S.C. 6011.

Section 1.860A-0 also issued under 26 U.S.C. 860G(e).

Section 1.860A-1 also issued under 26 U.S.C. 860G(b) and 860G(e).

Section 1.860D-1 also issued under 26 U.S.C. 860G(e).

Section 1.860E-1 also issued under 26 U.S.C. 860E and 860G(e).

Section 1.860E-2 also issued under 26 U.S.C. 860E(e).

Section 1.860F-2 also issued under 26 U.S.C. 860G(e).

Section 1.860F-4 also issued under 26 U.S.C. 860G(e) and 26 U.S.C. 6230(k).

Section 1.860F-4T also issued under 26 U.S.C. 860G(c)(3) and (e).

Section 1.860G-1 also issued under 26 U.S.C. 860G(a)(1)(B) and (e).

Section 1.860G-2 also issued under 26 U.S.C. 860G(e).

Section 1.860G-3 also issued under 26 U.S.C. 860G(b) and 26 U.S.C. 860G(e).

Section 1.861-2 also issued under 26 U.S.C. 863(a).

Section 1.861-3 also issued under 26 U.S.C. 863(a).

Section 1.861-8 also issued under 26 U.S.C. 882(c).

Sections 1.861-9 and 1.861-9T also issued under 26 U.S.C. 863(a), 26 U.S.C. 864(e), 26 U.S.C. 865(i), and 26 U.S.C. 7701(f).

Section 1.861-10(e) also issued under 26 U.S.C. 863(a), 26 U.S.C. 864(e), 26 U.S.C. 865(i) and 26 U.S.C. 7701(f).

Section 1.861-11 also issued under 26 U.S.C. 863(a), 26 U.S.C. 864(e), 26 U.S.C. 865(i), and 26 U.S.C. 7701(f).

Section 1.861-14 also issued under 26 U.S.C. 863(a), 26 U.S.C. 864(e), 26 U.S.C. 865(i), and 26 U.S.C. 7701(f).

Sections 1.861-8T through 1.861-14T also issued under 26 U.S.C. 863(a), 26 U.S.C. 864(e), 26 U.S.C. 865(i) and 26 U.S.C. 7701(f).

Section 1.863-1 also issued under 26 U.S.C. 863(a).

Section 1.863-2 also issued under 26 U.S.C. 863.

Section 1.863-3 also issued under 26 U.S.C. 863(a) and (b), and 26 U.S.C. 936(h).

Section 1.863-4 also issued under 26 U.S.C. 863.

Section 1.863-6 also issued under 26 U.S.C. 863.

Section 1.863-7 also issued under 26 U.S.C. 863(a) and 871(m).

Section 1.863-8 also issued under 26 U.S.C. 863(a), (b) and (d).

Section 1.863-9 also issued under 26 U.S.C. 863(a), (d) and (e).

Section 1.864-5 also issued under 26 U.S.C. 7701(l).

Section 1.864-8T also issued under 26 U.S.C. 864(d)(8).

Section 1.865-1 also issued under 26 U.S.C. 863(a) and 865(j)(1).

Section 1.865-2 also issued under 26 U.S.C. 863(a) and 865(j)(1).

Section 1.871-1 also issued under 26 U.S.C. 7701(l).

Section 1.871-7 also issued under 26 U.S.C. 7701(l).

Section 1.871-9 also issued under 26 U.S.C. 7701(b)(11).

Section 1.871-15 also issued under 26 U.S.C. 871(m).

Section 1.874-1 also issued under 26 U.S.C. 874.

Section 1.881-2 also issued under 26 U.S.C. 7701(l).

Section 1.881-3 also issued under 26 U.S.C. 7701(l).

Section 1.881-4 also issued under 26 U.S.C. 7701(l).

Section 1.882-4 also issued under 26 U.S.C. 882(c).

Section 1.882-5 also issued under 26 U.S.C. 882, 26 U.S.C. 864(e), 26 U.S.C. 988(d), and 26 U.S.C. 7701(l).

Section 1.883-1 is also issued under 26 U.S.C. 883.

Section 1.883-2 is also issued under 26 U.S.C. 883.

REGULATED INVESTMENT COMPANIES AND REAL ESTATE INVESTMENT TRUSTS

§ 1.851-1 Definition of regulated investment company.

(a) *In general.* The term “regulated investment company” is defined to mean any domestic corporation (other than a personal holding company as defined in section 542) which meets (1) the requirements of section 851(a) and paragraph (b) of this section, and (2) the limitations of section 851(b) and § 1.851-2. As to the definition of the term “corporation”, see section 7701(a)(3).

(b) *Requirement.* To qualify as a regulated investment company, a corporation must be:

(1) Registered at all times during the taxable year, under the Investment Company Act of 1940, as amended (15 U.S.C. 80a-1 to 80b-2), either as a management company or a unit investment trust, or

(2) A common trust fund or similar fund excluded by section 3(c)(3) of the Investment Company Act of 1940 (15 U.S.C. 80a-3(c)) from the definition of “investment company” and not included in the definition of “common trust fund” by section 584(a).

§ 1.851-2 Limitations.

(a) *Election to be a regulated investment company.* Under the provisions of section 851(b)(1), a corporation, even though it satisfies the other requirements of part I, subchapter M, chapter 1 of the Code, for the taxable year, will not be considered a regulated investment company for such year, within the meaning of such part I, unless it elects to be a regulated investment company for such taxable year, or has made such an election for a previous taxable year which began after December 31, 1941. The election shall be made by the taxpayer by computing taxable

income as a regulated investment company in its return for the first taxable year for which the election is applicable. No other method of making such election is permitted. An election once made is irrevocable for such taxable year and all succeeding taxable years.

(b) *Gross income requirement*—(1) *General rule.* Section 851(b) (2) and (3) provides that (i) at least 90 percent of the corporation's gross income for the taxable year must be derived from dividends, interest, and gains from the sale or other disposition of stocks or securities, and (ii) less than 30 percent of its gross income must have been derived from the sale or other disposition of stock or securities held for less than three months. In determining the gross income requirements under section 851(b) (2) and (3), a loss from the sale or other disposition of stock or securities does not enter into the computation. A determination of the period for which stock or securities have been held shall be governed by the provisions of section 1223 insofar as applicable.

(2) *Special rules.* (i) For purposes of section 851(b)(2), there shall be treated as dividends amounts which are included in gross income for the taxable year under section 951(a)(1)(A)(i) to the extent that (a) a distribution out of a foreign corporation's earnings and profits of the taxable year is not included in gross income by reason of section 959 (a)(1), and (b) the earnings and profits are attributable to the amounts which were so included in gross income under section 951(a)(1)(A)(i). For allocation of distributions to earnings and profits of foreign corporations, see §1.959-3. The provisions of this subparagraph shall apply with respect to taxable years of controlled foreign corporations beginning after December 31, 1975, and to taxable years of United States shareholders (within the meaning of section 951(b) within which or with which such taxable years of such controlled foreign corporations end.

(ii) For purposes of subdivision (i) of this subparagraph, if by reason of section 959(a)(1) a distribution of a foreign corporation's earnings and profits for a taxable year described in section 959(c)(2) is not included in a shareholder's gross income, then such dis-

tribution shall be allocated proportionately between amounts attributable to amounts included under each clause of section 951(a)(1)(A). Thus, for example, M is a United States shareholder in X Corporation, a controlled foreign corporation. M and X each use the calendar year as the taxable year. For 1977, M is required by section 951(a)(1)(a) to include \$3,000 in its gross income, \$1,000 of which is included under clause (i) thereof. In 1977, M received a distribution described in section 959(c)(2) of \$2,700 out of X's earnings and profits for 1977, which is, by reason of section 959(a)(1), excluded from M's gross income. The amount of the distribution attributable to the amount included under section 951(a)(1)(A)(i) is \$900, i.e., \$2,700 multiplied by $(\$1,000/\$3,000)$.

(c) *Diversification of investments.* (1) Subparagraph (A) of section 851(b)(4) requires that at the close of each quarter of the taxable year at least 50 percent of the value of the total assets of the taxpayer corporation be represented by one or more of the following:

(i) Cash and cash items, including receivables;

(ii) Government securities;

(iii) Securities of other regulated investment companies; or

(iv) Securities (other than those described in subdivisions (ii) and (iii) of this subparagraph) of any one or more issuers which meet the following limitations: (a) The entire amount of the securities of the issuer owned by the taxpayer corporation is not greater in value than 5 percent of the value of the total assets of the taxpayer corporation, and (b) the entire amount of the securities of such issuer owned by the taxpayer corporation does not represent more than 10 percent of the outstanding voting securities of such issuer. For the modification of the percentage limitations applicable in the case of certain venture capital investment companies, see section 851(e) and §1.851-6.

Assuming that at least 50 percent of the value of the total assets of the corporation satisfies the requirements specified in this subparagraph, and

§ 1.851-3

26 CFR Ch. I (4-1-15 Edition)

that the limiting provisions of subparagraph (B) of section 851(b)(4) and subparagraph (2) of this paragraph are not violated, the corporation will satisfy the requirements of section 851(b)(4), notwithstanding that the remaining assets do not satisfy the diversification requirements of subparagraph (A) of section 851(b)(4). For example, a corporation may own all the stock of another corporation, provided it otherwise meets the requirements of subparagraphs (A) and (B) of section 851(b)(4).

(2) Subparagraph (B) of section 851(b)(4) prohibits the investment at the close of each quarter of the taxable year of more than 25 percent of the value of the total assets of the corporation (including the 50 percent or more mentioned in subparagraph (A) of section 851(b)(4)) in the securities (other than Government securities or the securities of other regulated investment companies) of any one issuer, or of two or more issuers which the taxpayer company controls and which are engaged in the same or similar trades or businesses or related trades or businesses, including such issuers as are merely a part of a unit contributing to the completion and sale of a product or the rendering of a particular service. Two or more issuers are not considered as being in the same or similar trades or businesses merely because they are engaged in the broad field of manufacturing or of any other general classification of industry, but issuers shall be construed to be engaged in the same or similar trades or businesses if they are engaged in a distinct branch of business, trade, or manufacture in which they render the same kind of service or produce or deal in the same kind of product, and such service or products fulfill the same economic need. If two or more issuers produce more than one product or render more than one type of service, then the chief product or service of each shall be the basis for determining whether they are in the same trade or business.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4090, Apr. 28, 1962; T.D. 7555, 43 FR 32753, July 28, 1978]

§ 1.851-3 Rules applicable to section 851(b)(4).

In determining the value of the taxpayer's investment in the securities of any one issuer, for the purposes of subparagraph (B) of section 851(b)(4), there shall be included its proper proportion of the investment of any other corporation, a member of a controlled group, in the securities of such issuer. See example 4 in § 1.851-5. For purposes of §§ 1.851-2, 1.851-4, 1.851-5, and 1.851-6, the terms "controls", "controlled group", and "value" have the meaning assigned to them by section 851(c). All other terms used in such sections have the same meaning as when used in the Investment Company Act of 1940 (15 U.S.C., chapter 2D) or that act as amended.

§ 1.851-4 Determination of status.

With respect to the effect which certain discrepancies between the value of its various investments and the requirements of section 851(b)(4) and paragraph (c) of § 1.851-2, or the effect that the elimination of such discrepancies will have on the status of a company as a regulated investment company for purposes of part I, subchapter M, chapter 1 of the Code, see section 851(d). A company claiming to be a regulated investment company shall keep sufficient records as to investments so as to be able to show that it has complied with the provisions of section 851 during the taxable year. Such records shall be kept at all times available for inspection by any internal revenue officer or employee and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

[T.D. 6598, 27 FR 4090, Apr. 28, 1962]

§ 1.851-5 Examples.

The provisions of section 851 may be illustrated by the following examples:

Example 1. Investment Company W at the close of its first quarter of the taxable year has its assets invested as follows:

	Percent
Cash	5
Government securities	10
Securities of regulated investment companies	20
Securities of Corporation A	10
Securities of Corporation B	15

Internal Revenue Service, Treasury

§ 1.851-5

	Percent
Securities of Corporation C	20
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	20
Total	100

Investment Company W owns all of the voting stock of Corporations A and B, 15 percent of the voting stock of Corporation C, and less than 10 percent of the voting stock of the other corporations. None of the corporations is a member of a controlled group. Investment Company W meets the requirements under section 851(b)(4) at the end of its first quarter. It complies with subparagraph (A) of section 851(b)(4) since it has 55 percent of its assets invested as provided in such subparagraph. It complies with subparagraph (B) of section 851(b)(4) since it does not have more than 25 percent of its assets invested in the securities of any one issuer, or of two or more issuers which it controls.

Example 2. Investment Company V at the close of a particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash	10
Government securities	35
Securities of Corporation A	7
Securities of Corporation B	12
Securities of Corporation C	15
Securities of Corporation D	21
Total	100

Investment Company V fails to meet the requirements of subparagraph (A) of section 851(b)(4) since its assets invested in Corporations A, B, C, and D exceed in each case 5 percent of the value of the total assets of the company at the close of the particular quarter.

Example 3. Investment Company X at the close of the particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash and Government securities	20
Securities of Corporation A	5
Securities of Corporation B	10
Securities of Corporation C	25
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	40
Total	100

Investment Company X owns more than 20 percent of the voting power of Corporations B and C and less than 10 percent of the voting power of all of the other corporations. Corporation B manufactures radios and Corporation C acts as its distributor and also distributes radios for other companies. Investment Company X fails to meet the requirements of subparagraph (B) of section 851(b)(4) since it has 35 percent of its assets invested in the securities of two issuers

which it controls and which are engaged in related trades or businesses.

Example 4. Investment Company Y at the close of a particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash and Government securities	15
Securities of Corporation K (a regulated investment company)	30
Securities of Corporation A	10
Securities of Corporation B	20
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	25
Total	100

Corporation K has 20 percent of its assets invested in Corporation L and Corporation L has 40 percent of its assets invested in Corporation B. Corporation A also has 30 percent of its assets invested in Corporation B, and owns more than 20 percent of the voting power in Corporation B. Investment Company Y owns more than 20 percent of the voting power of Corporations A and K. Corporation K owns more than 20 percent of the voting power of Corporation L, and Corporation L owns more than 20 percent of the voting power of Corporation B. Investment Company Y is disqualified under subparagraph (B) of section 851(b)(4) since more than 25 percent of its assets are considered invested in Corporation B as shown by the following calculation:

	Percent
Percentage of assets invested directly in Corporation B	20.0
Percentage invested through the controlled group, Y-K-L-B (40 percent of 20 percent of 30 percent)	2.4
Percentage invested in the controlled group, Y-A-B (30 percent of 10 percent)	3.0
Total percentage of assets of investment Company Y invested in Corporation B	25.4

Example 5. Investment Company Z, which keeps its books and makes its returns on the basis of the calendar year, at the close of the first quarter of 1955 meets the requirements of section 851(b)(4) and has 20 percent of its assets invested in Corporation A. Later during the taxable year it makes distributions to its shareholders and because of such distributions it finds at the close of the taxable year that it has more than 25 percent of its remaining assets invested in Corporation A. Investment Company Z does not lose its status as a regulated investment company for the taxable year 1955 because of such distributions, nor will it lose its status as a regulated investment company for 1956 or any subsequent year solely as a result of such distributions.

Example 6. Investment Company Q, which keeps its books and makes its returns on the basis of a calendar year, at the close of the

first quarter of 1955, meets the requirements of section 851(b)(4) and has 20 percent of its assets invested in Corporation P. At the close of the taxable year 1955, it finds that it has more than 25 percent of its assets invested in Corporation P. This situation results entirely from fluctuations in the market values of the securities in Investment Company Q's portfolio and is not due in whole or in part to the acquisition of any security or other property. Corporation Q does not lose its status as a regulated investment company for the taxable year 1955 because of such fluctuations in the market values of the securities in its portfolio, nor will it lose its status as a regulated investment company for 1956 or any subsequent year solely as a result of such market value fluctuations.

§ 1.851-6 Investment companies furnishing capital to development corporations.

(a) *Qualifying requirements.* (1) In the case of a regulated investment company which furnishes capital to development corporations, section 851 (e) provides an exception to the rule relating to the diversification of investments, made applicable to regulated investment companies by section 851(b)(4)(A). This exception (as provided in paragraph (b) of this section) is available only to registered management investment companies which the Securities and Exchange Commission determines, in accordance with regulations issued by it, and certifies to the Secretary or his delegate, not earlier than 60 days before the close of the taxable year of such investment company, to be principally engaged in the furnishing of capital to other corporations which are principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available.

(2) For the purpose of the aforementioned determination and certification, unless the Securities and Exchange Commission determines otherwise, a corporation shall be considered to be principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available, for at least 10 years after the date of the first acquisition of any security in such corporation or any predecessor thereof by such investment company if at the date of such acquisi-

tion the corporation or its predecessor was principally so engaged, and an investment company shall be considered at any date to be furnishing capital to any company whose securities it holds if within 10 years before such date it had acquired any of such securities, or any securities surrendered in exchange therefor, from such other company or its predecessor.

(b) *Exception to general rule.* (1) The registered management investment company, which for the taxable year meets the requirements of paragraph (a) of this section, may (subject to the limitations of section 851(e)(2) and paragraph (c) of this section) in the computation of 50 percent of the value of its assets under section 851(b)(4)(A) and paragraph (c)(1) of § 1.851-2 for any quarter of such taxable year, include the value of any securities of an issuer (whether or not the investment company owns more than 10 percent of the outstanding voting securities of such issuer) if at the time of the latest acquisition of any securities of such issuer the basis of all such securities in the hands of the investment company does not exceed 5 percent of the value of the total assets of the investment company at that time. The exception provided by section 851(e)(1) and this subparagraph is not applicable to the securities of an issuer if the investment company has continuously held any security of such issuer or of any predecessor company (as defined in paragraph (d) of this section) for 10 or more years preceding such quarter of the taxable year. The rule of section 851(e)(1) with respect to the relationship of the basis of the securities of an issuer to the value of the total assets of the investment company is, in substance, a qualification of the 5-percent limitation in section 851(b)(4)(A)(ii) and paragraph (c)(1)(iv) of § 1.851-2. All other provisions and requirements of section 851 and §§ 1.851-1 through 1.851-6 are applicable in determining whether such registered management investment company qualifies as a regulated investment company.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. (i) The XYZ Corporation, a regulated investment company, qualified under

section 851(e) as an investment company furnishing capital to development corporations. On June 30, 1954, the XYZ Corporation purchased 1,000 shares of the stock of the A Corporation at a cost of \$30,000. On June 30, 1954, the value of the total assets of the XYZ Corporation was \$1,000,000. Its investment in the stock of the A Corporation (\$30,000) comprised 3 percent of the value of its total assets, and it therefore met the requirements prescribed by section 851(b)(4)(A)(ii) as modified by section 851(e)(1).

(ii) On June 30, 1955, the value of the total assets of the XYZ Corporation was \$1,500,000 and the 1,000 shares of stock of the A Corporation which the XYZ Corporation owned appreciated in value so that they were then worth \$60,000. On that date, the XYZ Investment Company increased its investment in the stock of the A Corporation by the purchase of an additional 500 shares of that stock at a total cost of \$30,000. The securities of the A Corporation owned by the XYZ Corporation had a value of \$90,000 (6 percent of the value of the total assets of the XYZ Corporation) which exceeded the limit provided by section 851(b)(4)(A)(i). However, the investment of the XYZ Corporation in the A Corporation on June 30, 1955, qualified under section 851(b)(4)(A) as modified by section 851(e)(1), since the basis of those securities to the investment company did not exceed 5 percent of the value of its total assets as of June 30, 1955, illustrated as follows:

Basis to the XYZ Corporation of the A Corporation's stock acquired on June 30, 1954	\$30,000
Basis of the 500 shares of the A Corporation's stock acquired by the XYZ Corporation on June 30, 1955	30,000
Basis of all stock of A Corporation	60,000

Basis of stock of A Corporation (\$60,000)/
Value of XYZ Corporation's total assets at June 30, 1955, time of the latest acquisition (\$1,500,000)=4 percent

Example 2. The same facts existed as in example 1, except that on June 30, 1955, the XYZ Corporation increased its investment in the stock of the A Corporation by the purchase of an additional 1,000 shares of that stock (instead of 500 shares) at a total cost of \$60,000. No part of the investment of the XYZ Corporation in the A Corporation qualified under the 5 percent limitation provided by section 851(b)(4)(A) as modified by section 851(e)(1), illustrated as follows:

Basis to the XYZ Corporation of the 1,000 shares of the A Corporation's stock acquired on June 30, 1954	\$30,000
Basis of the 1,000 shares of the A Corporation's stock acquired on June 30, 1955	60,000
Total	90,000

Basis of stock of A Corporation (\$90,000)/
Value of XYZ Corporation's total assets at June 30, 1955, time of the latest acquisition (\$1,500,000)= 6 percent

Example 3. The same facts existed as in example 2 and on June 30, 1956, the XYZ Corporation increased its investment in the stock of the A Corporation by the purchase of an additional 100 shares of that stock at a total cost of \$6,000. On June 30, 1956, the value of the total assets of the XYZ Corporation was \$2,000,000 and on that date the investment in the A Corporation qualified under section 851(b)(4)(A) as modified by section 851(e)(1) illustrated as follows:

Basis to the XYZ Corporation of investments in the A Corporation's stock:	
1,000 shares acquired June 30, 1954	\$30,000
1,000 shares acquired June 30, 1955	60,000
100 shares acquired June 30, 1956	6,000
Total	96,000

Basis of stock of A Corporation (\$96,000)/
Value of XYZ Corporation's total assets at June 30, 1956, time of the latest acquisition (\$2,000,000)=4.8 percent

(c) *Limitation.* Section 851(e) and this section do not apply in the quarterly computation of 50 percent of the value of the assets of an investment company under subparagraph (A) of section 851(b)(4) and paragraph (c)(1) of §1.851-2 for any taxable year if at the close of any quarter of such taxable year more than 25 percent of the value of its total assets (including the 50 percent or more mentioned in such subparagraph (A)) is represented by securities (other than Government securities or the securities of other regulated investment companies) of issuers as to each of which such investment company (1) holds more than 10 percent of the outstanding voting securities of such issuer, and (2) has continuously held any security of such issuer (or any security of a predecessor of such issuer) for 10 or more years preceding such quarter, unless the value of its total assets so represented is reduced to 25 percent or less within 30 days after the close of such quarter.

(d) *Definition of predecessor company.* As used in section 851(e) and this section, the term "predecessor company" means any corporation the basis of whose securities in the hands of the investment company was, under the provisions of section 358 or corresponding provisions of prior law, the same in whole or in part as the basis of any of the securities of the issuer and any corporation with respect to whose securities any of the securities of the issuer were received directly or indirectly by

§ 1.851-7

26 CFR Ch. I (4-1-15 Edition)

the investment company in a transaction or series of transactions involving nonrecognition of gain or loss in whole or in part. The other terms used in this section have the same meaning as when used in section 851(b)(4). See paragraph (c) of § 1.851-2 and § 1.851-3.

§ 1.851-7 Certain unit investment trusts.

(a) *In general.* For purposes of the Internal Revenue Code, a unit investment trust (as defined in paragraph (d) of this section) shall not be treated as a person (as defined in section 7701(a)(1)) except for years ending before January 1, 1969. A holder of an interest in such a trust will be treated as directly owning the assets of such trust for taxable years of such holder which end with or within any year of the trust to which section 851(f) and this section apply.

(b) *Treatment of unit investment trust.* A unit investment trust shall not be treated as an individual, a trust estate, partnership, association, company, or corporation for purposes of the Internal Revenue Code. Accordingly, a unit investment trust is not a taxpayer subject to taxation under the Internal Revenue Code. No gain or loss will be recognized by the unit investment trust if such trust distributes a holder's proportionate share of the trust assets in exchange for his interest in the trust. Also, no gain or loss will be recognized by the unit investment trust if such trust sells the holder's proportionate share of the trust assets and distributes the proceeds from such share to the holder in exchange for his interest in the trust.

(c) *Treatment of holder of interest in unit investment trust.* (1) Each holder of an interest in a unit investment trust shall be treated (to the extent of such interest) as owning a proportionate share of the assets of the trust. Accordingly, if the trust distributes to the holder of an interest in such trust his proportionate share of the trust assets in exchange for his interest in the trust, no gain or loss shall be recognized by such holder (or by any other holder of an interest in such trust). For purposes of this paragraph, each purchase of an interest in the trust by the holder will be considered a separate in-

terest in the trust. Items of income, gain, loss, deduction, or credit received by the trust or a custodian thereof shall be taxed to the holders of interests in the trust (and not to the trust) as though they had received their proportionate share of the items directly on the date such items were received by the trust or custodian.

(2) The basis of the assets of such trust which are treated under subparagraph (1) of this paragraph as being owned by the holder of an interest in such trust shall be the same as the basis of his interest in such trust. Accordingly, the amount of the gain or loss recognized by the holder upon the sale by the unit investment trust of the holder's pro rata share of the trust assets shall be determined with reference to the basis, of his interest in the trust. Also, the basis of the assets received by the holder, if the trust distributes a holder's pro rata share of the trust assets in exchange for his interest in the trust, will be the same as the basis of his interest in the trust. If the unit investment trust sells less than all of the holder's pro rata share of the trust assets and the holder retains an interest in the trust, the amount of the gain or loss recognized by the holder upon the sale shall be determined with reference to the basis of his interest in the assets sold by the trust, and the basis of his interest in the trust shall be reduced accordingly. If the trust distributes a portion of the holder's pro rata share of the trust assets in exchange for a portion of his interest in the trust, the basis of the assets received by the holder shall be determined with reference to the basis of his interest in the assets distributed by the trust, and the basis of his interest in the trust shall be reduced accordingly. For purposes of this subparagraph the basis of the holder's interest in assets sold by the trust or distributed to him shall be an amount which bears the same relationship to the basis of his total interest in the trust that the fair market value of the assets so sold or distributed bears to the fair market value of such total interest in the trust, such fair market value to be determined on the date of such sale or distribution.

(3) The period for which the holder of an interest in such trust has held the assets of the trust which are treated under subparagraph (1) of this paragraph as being owned by him is the same as the period for which such holder has held his interest in such trust. Accordingly, the character of the gain, loss, deduction, or credit recognized by the holder upon the sale by the unit investment trust of the holder's proportionate share of the trust assets shall be determined with reference to the period for which he has held his interest in the trust. Also, the holding period of the assets received by the holder if the trust distributes the holder's proportionate share of the trust assets in exchange for his interest in the trust will include the period for which the holder has held his interest in the trust.

(4) The application of the provisions of this paragraph may be illustrated by the following example:

Example. B entered a periodic payment plan of a unit investment trust (as defined in paragraph (d) of this section) with X Bank as custodian and Z as plan sponsor. Under this plan, upon B's demand, X must either redeem B's interest at a price substantially equal to the fair market value of the number of shares in Y, a management company, which are credited to B's account by X in connection with the unit investment trust, or at B's option distribute such shares of Y to B. B's plan provides for quarterly payments of \$1,000. On October 1, 1969, B made his initial quarterly payment of \$1,000 and X credited B's account with 110 shares of Y. On December 1, 1969, Y declared and paid a dividend of 25 cents per share, 5 cents of which was designated as a capital gain dividend pursuant to section 852(b)(3) and § 1.852-4. X credited B's account with \$27.50 but did not distribute the money to B in 1969. On December 31, 1969, X charged B's account with \$1 for custodial fees for calendar year 1969. On January 1, 1970, B paid X \$1,000 and X credited B's account with 105 shares of Y. On April 1, 1970, B paid X \$1,000 and X credited B's account with 100 shares of Y. B must include in his tax return for 1969 a dividend of \$22 and a long-term capital gain of \$5.50. In addition, B is entitled to deduct the annual custodial fee of \$1 under section 212 of the Code.

(a) On April 4, 1970, at B's request, X sells the shares of Y credited to B's account (315 shares) for \$10 per share and distributes the proceeds (\$3,150) to B together with the remaining balance of \$26.50 in B's account. The receipt of the \$26.50 does not result in any tax consequences to B. B recognizes a long-

term capital gain of \$100 and a short-term capital gain of \$50, computed as follows:

(1) B is treated as owning 110 shares of Y as of October 1, 1969. The basis of these shares is \$1,000, and they were sold for \$1,100 (110 shares at \$10 per share). Therefore, B recognizes a gain from the sale or exchange of a capital asset held for more than 6 months in the amount of \$100.

(2) B is treated as owning 105 shares of Y as of January 1, 1970, and 100 shares as of April 1, 1970. With respect to the shares acquired on April 1, 1970, there is no gain recognized as the shares were sold for \$1,000, which is B's basis of the shares. The shares acquired on January 1, 1970, were sold for \$1,050 (105 shares at \$10 per share), and B's basis of these shares is \$1,000. Therefore, B recognizes a gain of \$50 from the sale or exchange of a capital asset held for not more than 6 months.

(b) On April 4, 1970, at B's request, X distributes to B the shares of Y credited to his account and \$26.50 in cash. The receipt of the \$26.50 does not result in any tax consequences to B. B does not recognize gain or loss on the distribution of the shares of Y to him. The bases and holding periods of B's interests in Y are as follows:

Number of shares	Date acquired	Basis
110	10-1-69	\$9.09
105	1-1-70	9.52
100	4-1-70	10.00

(d) *Definition.* A unit investment trust to which this section refers is a business arrangement (other than a segregated asset account, whether or not it holds assets pursuant to a variable annuity contract, under the insurance laws or regulations of a State) which (except for taxable years ending before Jan. 1, 1969)—

(1) Is a unit investment trust (as defined in the Investment Company Act of 1940);

(2) Is registered under such Act;

(3) Issues periodic payment plan certificates (as defined in such Act) in one or more series;

(4) Possesses, as substantially all of its assets, as to all such series, securities issued by—

(i) A single management company (as defined in such Act), and securities acquired pursuant to subparagraph (5) of this paragraph, or

(ii) A single other corporation; and

(5) Has no power to invest in any other securities except securities issued by a single other management

§ 1.852-1

26 CFR Ch. I (4-1-15 Edition)

company, when permitted by such Act or the rules and regulations of the Securities and Exchange Commission.

(e) *Investment in two single management companies.* (1) A unit investment trust may possess securities issued by two or more separate single management companies (as defined in such Act) if—

(i) The trust issues a separate series of periodic payment plan certificates (as defined in such Act) with respect to the securities of each separate single management company which it possesses; and

(ii) None of the periodic payment plan certificates issued by the trust permits joint acquisition of an interest in each series nor the application of payments in whole or in part first to a series issued by one of the single management companies and then to any other series issued by any other single management company.

(2) If a unit investment trust possesses securities of two or more separate single management companies as described in subparagraph (1) of this paragraph and issues a separate series of periodic payment plan certificates with respect to the securities of each such management company, then the holder of an interest in a series shall be treated as the owner of the securities in the single management company represented by such interest.

(i) A holder of an interest in a series of periodic payment plan certificates of a trust who transfers or sells his interest in the series in exchange for an interest in another series of periodic payment plan certificates of the trust shall recognize the gain or loss realized from the transfer or sale as if the trust had sold the shares credited to his interests in the series at fair market value and distributed the proceeds of the sale to him.

(ii) The basis of the interests in the series so acquired by the holder shall be the fair market value of his interests in the series transferred or sold.

(iii) The period for which the holder has held his interest in the series so acquired shall be measured from the date of his acquisition of his interest in that series.

(f) *Cross references.* (1) For reporting requirements imposed on custodians of

unit investment trusts described in this section, see §§ 1.852-4, 1.852-9, 1.853-3, 1.854-2, and 1.6042-2.

(2) For rules relating to redemptions of certain unit investment trusts not described in this section, see § 1.852-10.

[T.D. 7187, 37 FR 13254, July 6, 1972, as amended by T.D. 7187, 37 FR 20688, Oct. 3, 1972]

§ 1.852-1 Taxation of regulated investment companies.

(a) *Requirements applicable thereto—*(1) *In general.* Section 852(a) denies the application of the provisions of part I, subchapter M, chapter 1 of the Code (other than section 852(c), relating to earnings and profits), to a regulated investment company for a taxable year beginning after February 28, 1958, unless—

(i) The deduction for dividends paid for such taxable year as defined in section 561 (computed without regard to capital gain dividends) is equal to at least 90 percent of its investment company taxable income for such taxable year (determined without regard to the provisions of section 852(b)(2)(D) and paragraph (d) of § 1.852-3); and

(ii) The company complies for such taxable year with the provisions of § 1.852-6 (relating to records required to be maintained by a regulated investment company).

See section 853(b)(1)(B) and paragraph (a) of § 1.853-2 for amounts to be added to the dividends paid deduction, and section 855 and § 1.855-1, relating to dividends paid after the close of the taxable year.

(2) *Special rule for taxable years of regulated investment companies beginning before March 1, 1958.* The provisions of part I of subchapter M (including section 852(c)) are not applicable to a regulated investment company for a taxable year beginning before March 1, 1958, unless such company meets the requirements of section 852(a) and subparagraph (1) (i) and (ii) of this paragraph.

(b) *Failure to qualify.* If a regulated investment company does not meet the requirements of section 852(a) and paragraph (a)(1) (i) and (ii) of this section for the taxable year, it will, even though it may otherwise be classified as a regulated investment company, be

taxed in such year as an ordinary corporation and not as a regulated investment company. In such case, none of the provisions of part I of subchapter M (other than section 852(c) in the case of taxable years beginning after February 28, 1958) will be applicable to it. For the rules relating to the applicability of section 852(c), see § 1.852-5.

[T.D. 6598, 27 FR 4091, Apr. 28, 1962]

§ 1.852-2 Method of taxation of regulated investment companies.

(a) *Imposition of normal tax and surtax.* Section 852(b)(1) imposes a normal tax and surtax, computed at the rates and in the manner prescribed in section 11, on the investment company taxable income, as defined in section 852(b)(2) and § 1.852-3, for each taxable year of a regulated investment company. The tax is imposed as if the investment company taxable income were the taxable income referred to in section 11. In computing the normal tax under section 11, the regulated investment company's taxable income and the dividends paid deduction (computed without regard to the capital gains dividends) shall both be reduced by the deduction for partially tax-exempt interest provided by section 242.

(b) *Taxation of capital gains—(1) In general.* Section 852(b)(3)(A) imposes (i) in the case of a taxable year beginning before January 1, 1970, a tax of 25 percent, or (ii) in the case of a taxable year beginning after December 31, 1969, a tax determined as provided in section 1201(a) and paragraph (a)(3) of § 1.1201-1, on the excess, if any, of the net long-term capital gain of a regulated investment company (subject to tax under part I, subchapter M, chapter 1 of the Code) over the sum of its net short-term capital loss and its deduction for dividends paid (as defined in section 561) determined with reference to capital gain dividends only. For the definition of capital gain dividend paid by a regulated investment company, see section 852(b)(3)(C) and paragraph (c) of § 1.852-4. In the case of a taxable year ending after December 31, 1969, and beginning before January 1, 1975, such deduction for dividends paid shall first be made from the amount subject to tax in accordance with section 1201(a)(1)(B), to the extent thereof, and

then from the amount subject to tax in accordance with section 1201(a)(1)(A). See § 1.852-10, relating to certain distributions in redemption of interests in unit investment trusts which, for purposes of the deduction for dividends paid with reference to capital gain dividends only, are not considered preferential dividends under section 562(c). See section 855 and § 1.855-1, relating to dividends paid after the close of the taxable year.

(2) *Undistributed capital gains—(i) In general.* A regulated investment company (subject to tax under part I of subchapter M) may, for taxable years beginning after December 31, 1956, designate under section 852(b)(3)(D) an amount of undistributed capital gains to each shareholder of the company. For the definition of the term "undistributed capital gains" and for the treatment of such amounts by a shareholder, see paragraph (b)(2) of § 1.852-4. For the rules relating to the method of making such designation, the returns to be filed, and the payment of the tax in such cases, see paragraph (a) of § 1.852-9.

(ii) *Effect on earnings and profits of a regulated investment company.* If a regulated investment company designates an amount as undistributed capital gains for a taxable year, the earnings and profits of such regulated investment company for such taxable year shall be reduced by the total amount of the undistributed capital gains so designated. In such case, its capital account shall be increased—

(a) In the case of a taxable year ending before January 1, 1970, by 75 percent of the total amount designated,

(b) In the case of a taxable year ending after December 31, 1969, and beginning before January 1, 1975, by the total amount designated decreased by the amount of tax imposed by section 852(b)(3)(A) with respect to such amount, or

(c) In the case of a taxable year beginning after December 31, 1974, by 70 percent of the total amount designated. The earnings and profits of a regulated investment company shall not be reduced by the amount of tax which is imposed by section 852(b)(3)(A) on an amount designated as undistributed capital gains and which is paid by

§ 1.852-3

the corporation but deemed paid by the shareholder.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4091, Apr. 28, 1962; T.D. 6921, 32 FR 8754, June 20, 1967; T.D. 7337, 39 FR 44972, Dec. 30, 1974]

§ 1.852-3 Investment company taxable income.

Section 852(b)(2) requires certain adjustments to be made to convert taxable income of the investment company to investment company taxable income, as follows:

(a) The excess, if any, of the net long-term capital gain over the net short-term capital loss shall be excluded;

(b) The net operating loss deduction provided in section 172 shall not be allowed;

(c) The special deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code, shall not be allowed. Those not allowed are the deduction for partially tax-exempt interest provided by section 242, the deductions for dividends received provided by sections 243, 244, and 245, and the deduction for certain dividends paid provided by section 247. However, the deduction provided by section 248 (relating to organizational expenditures), otherwise allowable in computing taxable income, shall likewise be allowed in computing the investment company taxable income. See section 852(b)(1) and paragraph (a) of § 1.852-2 for treatment of the deduction for partially tax-exempt interest (provided by section 242) for purposes of computing the normal tax under section 11;

(d) The deduction for dividends paid (as defined in section 561) shall be allowed, but shall be computed without regard to capital gains dividends (as defined in section 852(b)(3)(C) and paragraph (c) of § 1.852-4); and

(e) The taxable income shall be computed without regard to section 443(b). Thus, the taxable income for a period of less than 12 months shall not be placed on an annual basis even though such short taxable year results from a change of accounting period.

26 CFR Ch. I (4-1-15 Edition)

§ 1.852-4 Method of taxation of shareholders of regulated investment companies.

(a) *Ordinary income.* (1) Except as otherwise provided in paragraph (b) of this section (relating to capital gains), a shareholder receiving dividends from a regulated investment company shall include such dividends in gross income for the taxable year in which they are received.

(2) See section 853 (b)(2) and (c) and paragraph (b) of § 1.853-2 and § 1.853-3 for the treatment by shareholders of dividends received from a regulated investment company which has made an election under section 853(a) with respect to the foreign tax credit. See section 854 and §§ 1.854-1 through 1.854-3 for limitations applicable to dividends received from regulated investment companies for the purpose of the credit under section 34 (for dividends received on or before December 31, 1964), the exclusion from gross income under section 116, and the deduction under section 243. See section 855 (b) and (d) and paragraphs (c) and (f) of § 1.855-1 for treatment by shareholders of dividends paid by a regulated investment company after the close of the taxable year in the case of an election under section 855(a).

(b) *Capital gains*—(1) *In general.* Under section 852(b)(3)(B), shareholders of a regulated investment company who receive capital gain dividends (as defined in paragraph (c) of this section), in respect of the capital gains of an investment company for a taxable year for which it is taxable under part I, subchapter M, chapter 1 of the Code, as a regulated investment company, shall treat such capital gain dividends as gains from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and realized in the taxable year of the shareholder in which the dividend was received. In the case of dividends with respect to any taxable year of a regulated investment company ending after December 31, 1969, and beginning before January 1, 1975, the portion of a shareholder's capital gain dividend to which section 1201(d) (1) or (2) applies is the portion

so designated by the regulated investment company pursuant to paragraph (c)(2) of this section.

(2) *Undistributed capital gains.* (i) A person who is a shareholder of a regulated investment company at the close of a taxable year of such company for which it is taxable under part I of subchapter M shall include in his gross income as a gain from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) any amount of undistributed capital gains. The term "undistributed capital gains" means the amount designated as undistributed capital gains in accordance with paragraph (a) of §1.852-9, but the amount so designated shall not exceed the shareholder's proportionate part of the amount subject to tax under section 852(b)(3)(A). Such amount shall be included in gross income for the taxable year of the shareholder in which falls the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated. The amount of such gains designated under paragraph (a) of §1.852-9 as gain described in section 1201(d) (1) or (2) shall be included in the shareholder's gross income as gain described in section 1201(d) (1) or (2). For certain administrative provisions relating to undistributed capital gains, see §1.852-9.

(ii) Any shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D)(i) and subdivision (i) of this subparagraph shall be deemed to have paid for his taxable year for which such amount is so includible—

(a) In the case of an amount designated with respect to a taxable year of the company ending before January 1, 1970, a tax equal to 25 percent of such amount.

(b) In the case of a taxable year of the company ending after December 31, 1969, and beginning before January 1, 1975, a tax equal to the tax designated under paragraph (a)(1) of §1.852-9 by the regulated investment company as his proportionate share of the capital gains tax paid with respect to such amount, or

(c) In the case of an amount designated with respect to a taxable year of the company beginning after December 31, 1974, a tax equal to 30 percent of such amount.

Such shareholder is entitled to a credit or refund of the tax so deemed paid in accordance with the rules provided in paragraph (c)(2) of §1.852-9.

(iii) Any shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D)(i) and subdivision (i) of this subparagraph shall increase the adjusted basis of the shares of stock with respect to which such amount is so includible—

(a) In the case of an amount designated with respect to a taxable year of the company ending before January 1, 1970, by 75 percent of such amount.

(b) In the case of an amount designated with respect to a taxable year of the company ending after December 31, 1969, and beginning before January 1, 1975, by the amount designated under paragraph (a)(1)(iv) of §1.852-9 by the regulated investment company, or

(c) In the case of an amount designated with respect to a taxable year of the company beginning after December 31, 1974, by 70 percent of such amount.

(iv) For purposes of determining whether the purchaser or seller of a share or regulated investment company stock is the shareholder at the close of such company's taxable year who is required to include an amount of undistributed capital gains in gross income, the amount of the undistributed capital gains shall be treated in the same manner as a cash dividend payable to shareholders of record at the close of the company's taxable year. Thus, if a cash dividend paid to shareholders of record as of the close of the regulated investment company's taxable year would be considered income to the purchaser, then the purchaser is also considered to be the shareholder of such company at the close of its taxable year for purposes of including an amount of undistributed capital gains in gross income. If, in such a case, notice on Form 2439 is, pursuant to paragraph (a)(1) of §1.852-9, mailed by the regulated investment company to the seller, then the seller

shall be considered the nominee of the purchaser and, as such, shall be subject to the provisions in paragraph (b) of § 1.852-9. For rules for determining whether a dividend is income to the purchaser or seller of a share of stock, see paragraph (c) of § 1.61-9.

(3) *Partners and partnerships.* If the shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a partnership, such amount shall be included in the gross income of the partnership for the taxable year of the partnership in which falls the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated. The amount so includible by the partnership shall be taken into account by the partners as distributive shares of the partnership gains and losses from sales or exchanges of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) pursuant to section 702(a)(2) and paragraph (a)(2) of § 1.702-1. The tax with respect to the undistributed capital gains is deemed paid by the partnership (under section 852(b)(3)(D)(ii) and subparagraph (2)(ii) of this paragraph), and the credit or refund of such tax shall be taken into account by the partners in accordance with section 702(a)(8) and paragraph (a)(8)(ii) of § 1.702-1 and paragraph (c)(2) of § 1.852-9. In accordance with section 705(a), the partners shall increase the basis of their partnership interests under section 705(a)(1) by the distributive shares of such gains, and shall decrease the basis of their partnership interests by the distributive shares of the amount of the tax under section 705(a)(2)(B) (relating to certain non-deductible expenditures) and paragraph (a)(3) of § 1.705-1.

(4) *Nonresident alien individuals.* If the shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a nonresident alien individual, such shareholder shall be treated, for purposes of section 871 and the regulations thereunder, as having realized a long-term capital gain in such

amount on the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated.

(5) *Effect on earnings and profits of corporate shareholders of a regulated investment company.* If a shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a corporation, such corporation, in computing its earnings and profits for the taxable year for which such amount is so includible, shall treat such amount as if it had actually been received and the taxes paid shall include any amount of tax liability satisfied by a credit under section 852(b)(3)(D) and subparagraph (2) of this paragraph.

(c) *Definition of capital gain dividend—*

(1) *General rule.* A capital gain dividend, as defined in section 852(b)(3)(C), is any dividend or part thereof which is designated by a regulated investment company as a capital gain dividend in a written notice mailed to its shareholders within the period specified in paragraph (c)(4) of this section. If the aggregate amount so designated with respect to the taxable year (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 855) is greater than the excess of the net long-term capital gain over the net short-term capital loss of the taxable year, the portion of each distribution which shall be a capital gain dividend shall be only that proportion of the amount so designated which such excess of the net long-term capital gain over the net short-term capital loss bears to the aggregate amount so designated. For example, a regulated investment company making its return on the calendar year basis advised its shareholders by written notice mailed December 30, 1955, that of a distribution of \$500,000 made December 15, 1955, \$200,000 constituted a capital gain dividend, amounting to \$2 per share. It was later discovered that an error had been made in determining the excess of the net long-term capital gain over the net short-term capital loss of the taxable year, and that such excess was \$100,000 instead of \$200,000. In such case each

shareholder would have received a capital gain dividend of \$1 per share instead of \$2 per share.

(2) *Shareholder of record custodian of certain unit investment trusts.* In any case where a notice is mailed pursuant to subparagraph (1) of this paragraph by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970, to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851-7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 55th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the capital gain dividend shown on the notice received by the nominee pursuant to subparagraph (1) of this paragraph. The notice shall include the name and address of the nominee identified as such. This subparagraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of subparagraph (1) of this paragraph with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and, not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where the company's income tax return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this subparagraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal

Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this subparagraph within 30 days of such notice. If a notice under paragraph (c)(1) of this section is mailed within the 120-day period following the date of a determination pursuant to paragraph (c)(4)(ii) of this section, the 120-day period and the 130-day period following the date of the determination shall be substituted for the 45-day period and the 55-day period following the close of the regulated investment company's taxable year prescribed by this subparagraph (2).

(3) *Subsection (d) gain for certain taxable years.* In the case of capital gain dividends with respect to any taxable year of a regulated investment company ending after December 31, 1969, and beginning before January 1, 1975 (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 855), the company must include in its written notice under paragraph (c)(1) of this section a statement showing the shareholder's proportionate share of the capital gain dividend which is gain described in section 1201(d)(1) and his proportionate share of such dividend which is gain described in section 1201(d)(2). In determining the portion of the capital gain dividend which, in the hands of a shareholder, is gain described in section 1201(d)(1) or (2), the regulated investment company shall consider that capital gain dividends for a taxable year are first made from its long-term capital gains for such year which are not described in section 1201(d)(1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d)(1) or (2). A shareholder's proportionate share of gains which are described in section 1201(d)(1) is the amount which bears the same ratio to the amount paid to him as a capital gain dividend in respect of such year as (i) the aggregate amount of the company's gains which are described in section 1201(d)(1) and paid to all shareholders bears to (ii) the aggregate amount of the capital gain dividend

paid to all shareholders in respect of such year. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every regulated investment company shall keep a record of the proportion of each capital gain dividend (to which this paragraph applies) which is gain described in section 1201(d)(1) or (2). If, for his taxable year, a shareholder must include in his gross income a capital gain dividend to which this paragraph applies, he shall attach to his income tax return for such taxable year a statement showing, with respect to the total of such dividends for such taxable year received from each regulated investment company, the name and address of the regulated investment company from which such dividends are received, the amount of such dividends, the portion of such dividends which was designated as gain described in section 1201(d)(1), and the portion of such dividends which was designated as gain described in section 1201(d)(2).

(4) *Mailing of written notice to shareholders.* (i) Except as provided in paragraph (c)(4)(ii) of this section, the written notice designating a dividend or part thereof as a capital gain dividend must be mailed to the shareholders not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year of the regulated investment company.

(ii) If a determination (as defined in section 860(e)) after November 6, 1978, increases the excess for the taxable year of the net capital gain over the deduction for capital gains dividends paid, then a regulated investment company may designate all or part of any dividend as a capital gain dividend in a written notice mailed to its shareholders at any time during the 120-day period immediately following the date of the determination. The aggregate amount designated during this period may not exceed this increase. A dividend may be designated if it is actually paid during the taxable year, is one paid after the close of the taxable year to which section 855 applies, or is a deficiency dividend (as defined in section 860(f)), including a deficiency dividend paid by an acquiring corporation to which section 381(c)(25) applies. The

date of a determination is established under § 1.860-2(b)(1).

(d) *Special treatment of loss on the sale or exchange of regulated investment company stock held less than 31 days—(1) In general.* Under section 852(b)(4), if any person, with respect to a share of regulated investment company stock acquired by such person after December 31, 1957, and held for a period of less than 31 days, is required by section 852(b)(3) (B) or (D) to include in gross income as a gain from the sale or exchange of a capital asset held for more than six months—

(i) The amount of a capital gain dividend, or

(ii) An amount of undistributed capital gains,

then such person shall, to the extent of such amount, treat any loss on the sale or exchange of such share of stock as a loss from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). Such special treatment with respect to the sale of regulated investment company stock held for a period of less than 31 days is applicable to losses for taxable years ending after December 31, 1957.

(2) *Determination of holding period.* The rules contained in section 246(c)(3) (relating to the determination of holding periods for purposes of the deduction for dividends received) shall be applied in determining whether, for purposes of section 852(b)(4) and this paragraph, a share of regulated investment company stock has been held for a period of less than 31 days. In applying those rules, however, "30 days" shall be substituted for the number of days specified in subparagraph (B) of section 246(c)(3).

(3) *Example.* The application of section 852(b)(4) and this paragraph may be illustrated by the following example:

Example. On December 15, 1958, A purchased a share of stock in the X regulated investment company for \$20. The X regulated investment company declared a capital gain dividend of \$2 per share to shareholders of record on December 31, 1958. A, therefore, received a capital gain dividend of \$2 which, pursuant to section 852(b)(3)(B), he must treat as a gain from the sale or exchange of a capital asset held for more than 6 months.

On January 5, 1959, A sold his share of stock in the X regulated investment company for \$17.50, which sale resulted in a loss of \$2.50. Under section 852(b)(4) and this paragraph, A must treat \$2 of such loss (an amount equal to the capital gain dividend received with respect to such share of stock) as a loss from the sale or exchange of a capital asset held for more than 6 months.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6531, 26 FR 413, Jan. 19, 1961; T.D. 6598, 27 FR 4091, Apr. 28, 1962; T.D. 6777, 29 FR 17809, Dec. 16, 1964; T.D. 6921, 32 FR 8755, June 20, 1967; T.D. 7187, 37 FR 13256, July 6, 1972; T.D. 7337, 39 FR 44972, Dec. 30, 1974; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.852-5 Earnings and profits of a regulated investment company.

(a) Any regulated investment company, whether or not such company meets the requirements of section 852(a) and paragraphs (a)(1) (i) and (ii) of § 1.852-1, shall apply paragraph (b) of this section in computing its earnings and profits for a taxable year beginning after February 28, 1958. However, for a taxable year of a regulated investment company beginning before March 1, 1958, paragraph (b) of this section shall apply only if the regulated investment company meets the requirements of section 852(a) and paragraphs (a)(1) (i) and (ii) of § 1.852-1.

(b) In the determination of the earnings and profits of a regulated investment company, section 852(c) provides that such earnings and profits for any taxable year (but not the accumulated earnings and profits) shall not be reduced by any amount which is not allowable as a deduction in computing its taxable income for the taxable year. Thus, if a corporation would have had earnings and profits of \$500,000 for the taxable year except for the fact that it had a net capital loss of \$100,000, which amount was not deductible in determining its taxable income, its earnings and profits for that year if it is a regulated investment company would be \$500,000. If the regulated investment company had no accumulated earnings and profits at the beginning of the taxable year, in determining its accumulated earnings and profits as of the beginning of the following taxable year,

the earnings and profits for the taxable year to be considered in such computation would amount to \$400,000 assuming that there had been no distribution from such earnings and profits. If distributions had been made in the taxable year in the amount of the earnings and profits then available for distribution, \$500,000, the corporation would have as of the beginning of the following taxable year neither accumulated earnings and profits nor a deficit in accumulated earnings and profits, and would begin such year with its paid-in capital reduced by \$100,000, an amount equal to the excess of the \$500,000 distributed over the \$400,000 accumulated earnings and profits which would otherwise have been carried into the following taxable year.

§ 1.852-6 Records to be kept for purpose of determining whether a corporation claiming to be a regulated investment company is a personal holding company.

(a) Every regulated investment company shall maintain in the internal revenue district in which it is required to file its income tax return permanent records showing the information relative to the actual owners of its stock contained in the written statements required by this section to be demanded from the shareholders. The actual owner of stock includes the person who is required to include in gross income in his return the dividends received on the stock. Such records shall be kept at all times available for inspection by any internal revenue officer or employee, and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(b) For the purpose of determining whether a domestic corporation claiming to be a regulated investment company is a personal holding company as defined in section 542, the permanent records of the company shall show the maximum number of shares of the corporation (including the number and face value of securities convertible into stock of the corporation) to be considered as actually or constructively owned by each of the actual owners of any of its stock at any time during the last half of the corporation's taxable year, as provided in section 544.

§ 1.852-7

26 CFR Ch. I (4-1-15 Edition)

(c) Statements setting forth the information (required by paragraph (b) of this section) shall be demanded not later than 30 days after the close of the corporation's taxable year as follows:

(1) In the case of a corporation having 2,000 or more record owners of its stock on any dividend record date, from each record holder of 5 percent or more of its stock; or

(2) In the case of a corporation having less than 2,000 and more than 200 record owners of its stock, on any dividend record date, from each record holder of 1 percent or more of its stock; or

(3) In the case of a corporation having 200 or less record owners of its stock, on any dividend record date, from each record holder of one-half of 1 percent or more of its stock.

When making demand for the written statements required of each shareholder by this paragraph, the company shall inform each of the shareholders of his duty to submit as a part of his income tax return the statements which are required by § 1.852-7 if he fails or refuses to comply with such demand. A list of the persons failing or refusing to comply in whole or in part with a company's demand shall be maintained as a part of its record required by this section. A company which fails to keep such records to show the actual ownership of its outstanding stock as are required by this section shall be taxable as an ordinary corporation and not as a regulated investment company.

§ 1.852-7 Additional information required in returns of shareholders.

Any person who fails or refuses to comply with the demand of a regulated investment company for the written statements which § 1.852-6 requires the company to demand from its shareholders shall submit as a part of his income tax return a statement showing, to the best of his knowledge and belief—

(a) The number of shares actually owned by him at any and all times during the period for which the return is filed in any company claiming to be a regulated investment company;

(b) The dates of acquisition of any such stock during such period and the

names and addresses of persons from whom it was acquired;

(c) The dates of disposition of any such stock during such period and the names and addresses of the transferees thereof;

(d) The names and addresses of the members of his family (as defined in section 544(a)(2)); the names and addresses of his partners, if any, in any partnership; and the maximum number of shares, if any, actually owned by each in any corporation claiming to be a regulated investment company, at any time during the last half of the taxable year of such company;

(e) The names and addresses of any corporation, partnership, association, or trust in which he had a beneficial interest to the extent of at least 10 percent at any time during the period for which such return is made, and the number of shares of any corporation claiming to be a regulated investment company actually owned by each;

(f) The maximum number of shares (including the number and face value of securities convertible into stock of the corporation) in any domestic corporation claiming to be a regulated investment company to be considered as constructively owned by such individual at any time during the last half of the corporation's taxable year, as provided in section 544 and the regulations thereunder; and

(g) The amount and date of receipt of each dividend received during such period from every corporation claiming to be a regulated investment company.

§ 1.852-8 Information returns.

Nothing in §§ 1.852-6 and 1.852-7 shall be construed to relieve regulated investment companies or their shareholders from the duty of filing information returns required by regulations prescribed under the provisions of subchapter A, chapter 61 of the Code.

§ 1.852-9 Special procedural requirements applicable to designation under section 852(b)(3)(D).

(a) *Regulated investment company*—(1) *Notice to shareholders.* (i) A designation of undistributed capital gains under section 852(b)(3)(D) and paragraph

(b)(2)(i) of § 1.852-2 shall be made by notice on Form 2439 mailed by the regulated investment company to each person who is a shareholder of record of the company at the close of the company's taxable year. The notice on Form 2439 shall show the name, address, and employer identification number of the regulated investment company; the taxable year of the company for which the designation is made; the name, address, and identifying number of the shareholder; the amount designated by the company for inclusion by the shareholder in computing his long-term capital gains; and the tax paid with respect thereto by the company which is deemed to have been paid by the shareholder.

(ii) In the case of a designation of undistributed capital gains with respect to a taxable year of the regulated investment company ending after December 31, 1969, and beginning before January 1, 1975, Form 2439 shall also show the shareholder's proportionate share of such gains which is gain described in section 1201(d)(1), his proportionate share of such gains which is gain described in section 1201(d)(2), and the amount (determined pursuant to subdivision (iv) of this subparagraph) by which the shareholder's adjusted basis in his shares shall be increased.

(iii) In determining under subdivision (ii) of this subparagraph the portion of the undistributed capital gains which, in the hands of the shareholder, is gain described in section 1201(d) (1) or (2), the company shall consider that capital gain dividends for a taxable year are made first from its long-term capital gains for such year which are not described in section 1201(d) (1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d) (1) or (2). A shareholder's proportionate share of undistributed capital gains for a taxable year which is gain described in section 1201(d)(1) is the amount which bears the same ratio to the amount included in his income as designated undistributed capital gains for such year as (a) the aggregate amount of the company's gains for such year which are described in section 1201(d)(1) and designated as undistributed capital gains bears to (b) the aggregate

amount of the company's gains for such year which are designated as undistributed capital gains. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every regulated investment company shall keep a record of the proportion of undistributed capital gains (to which this subdivision applies) which is gain described in section 1201(d) (1) or (2).

(iv) In the case of a designation of undistributed capital gains for any taxable year ending after December 31, 1969, and beginning before January 1, 1975, Form 2439 shall also show with respect to the undistributed capital gains of each shareholder the amount by which such shareholder's adjusted basis in his shares shall be increased under section 852(b)(3)(D)(iii). The amount by which each shareholders' adjusted basis in his shares shall be increased is the amount includible in his gross income with respect to such shares under section 852(b)(3)(D)(i) less the tax which the shareholder is deemed to have paid with respect to such shares. The tax which each shareholder is deemed to have paid with respect to such shares is the amount which bears the same ratio to the amount of the tax imposed by section 852(b)(3)(A) for such year with respect to the aggregate amount of the designated undistributed capital gains as the amount of such gains includible in the shareholder's gross income bears to the aggregate amount of such gains so designated.

(v) Form 2439 shall be prepared in triplicate, and copies B and C of the form shall be mailed to the shareholder on or before the 45th day (30th day for a taxable year ending before February 26, 1964) following the close of the company's taxable year. Copy A of each Form 2439 must be associated with the duplicate copy of the undistributed capital gains tax return of the company (Form 2438), as provided in subparagraph (2)(ii) of this paragraph.

(2) *Return of undistributed capital gains tax*—(i) *Form 2438*. Every regulated investment company which designates undistributed capital gains for any taxable year beginning after December 31, 1956, in accordance with subparagraph (1) of this paragraph, shall

file for such taxable year an undistributed capital gains tax return on Form 2438 including on such return the total of its undistributed capital gains so designated and the tax with respect thereto. The return on Form 2438 shall be prepared in duplicate and shall set forth fully and clearly the information required to be included therein. The original of Form 2438 shall be filed on or before the 30th day after the close of the company's taxable year with the internal revenue officer designated in instructions applicable to Form 2438. The duplicate copy of form 2438 for the taxable year shall be attached to and filed with the income tax return of the company on Form 1120 for such taxable year.

(ii) *Copies A of Form 2439.* For each taxable year which ends on or before December 31, 1965, there shall be submitted with the company's return on Form 2438 all copies A of Form 2439 furnished by the company to its shareholders in accordance with subparagraph (1) of this paragraph. For each taxable year which ends after December 31, 1965, there shall be submitted with the duplicate copy of the company's return on Form 2438, which is attached to and filed with the income tax return of the company on Form 1120 for the taxable year, all copies A of Form 2439 furnished by the company to its shareholders in accordance with subparagraph (1) of this paragraph. The copies A of Form 2439 shall be accompanied by lists (preferably in the form of adding machine tapes) of the amounts of undistributed capital gains and of the tax paid with respect thereto shown on such forms. The totals of the listed amounts of undistributed capital gains and of tax paid with respect thereto must agree with the corresponding entries on Form 2438.

(3) *Payment of tax.* The tax required to be returned on Form 2438 shall be paid by the regulated investment company on or before the 30th day after the close of the company's taxable year to the internal revenue officer with whom the return on Form 2438 is filed.

(b) *Shareholder of record not actual owner—(1) Notice to actual owner.* In any case in which a notice on Form 2439 is mailed pursuant to paragraph (a)(1) of this section by a regulated investment

company to a shareholder of record who is a nominee of the actual owner or owners of the shares of stock to which the notice relates, the nominee shall furnish to each such actual owner notice of the owner's proportionate share of the amounts of undistributed capital gains and tax with respect thereto, as shown on the Form 2439 received by the nominee from the regulated investment company. The nominee's notice to the actual owner shall be prepared in triplicate on Form 2439 and shall contain the information prescribed in paragraph (a)(1) of this section, except that the name and address of the nominee, identified as such, shall be entered on the form in addition to, and in the space provided for, the name and address of the regulated investment company, and the amounts of undistributed capital gains and tax with respect thereto entered on the form shall be the actual owner's proportionate share of the corresponding items shown on the nominee's notice from the regulated investment company. Copies B and C of the Form 2439 prepared by the nominee shall be mailed to the actual owner—

(i) For taxable years of regulated investment companies ending after February 25, 1964, on or before the 75th day (55th day in the case of a nominee who is acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851-7 for taxable years of regulated investment companies ending after December 8, 1970, and 135th day if the nominee is a resident of a foreign country) following the close of the regulated investment company's taxable year, or

(ii) For taxable years of regulated investment companies ending before February 26, 1964, on or before the 60th day (120th day if the nominee is a resident of a foreign country) following the close of the regulated investment company's taxable year.

(2) *Transmittal of Form 2439.* The nominee shall enter the word "Nominee" in the upper right hand corner of copy B of the notice on Form 2439 received by him from the regulated investment company, and on or before the appropriate day specified in subdivision (i) or (ii) of subparagraph (1) of this paragraph shall transmit such

copy B, together with all copies A of Form 2439 prepared by him pursuant to subparagraph (1) of this paragraph, to the internal revenue officer with whom his income tax return is required to be filed.

(3) *Custodian of certain unit investment trusts.* The requirements of this paragraph shall not apply to a nominee who is acting as a custodian of the unit investment trust described in section 851(f)(1) and paragraph (d) of §1.851-7 provided that the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by such nominee as custodian and on or before the 45th day following the close of the company's taxable year, files with the Internal Revenue Service office where the company's income tax return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

(c) *Shareholders—(1) Return and Recordkeeping Requirements—(i) Return requirements for taxable years beginning before January 1, 2002.* For taxable years beginning before January 1, 2002, the copy B of Form 2439 furnished to a shareholder by the regulated invest-

ment company or by a nominee, as provided in §1.852-9(a) or (b) shall be attached to the income tax return of the shareholder for the taxable year in which the amount of undistributed capital gains is includible in gross income as provided in §1.852-4(b)(2).

(ii) *Recordkeeping requirements for taxable years beginning after December 31, 2001.* For taxable years beginning after December 31, 2001, the shareholder shall retain a copy of Form 2439 for as long as its contents may become material in the administration of any internal revenue law.

(2) *Credit or refund—(i) In general.* The amount of the tax paid by the regulated investment company with respect to the undistributed capital gains required under section 852(b)(3)(D) and paragraph (b)(2) of §1.852-4 to be included by a shareholder in his computation of long-term capital gains for any taxable year is deemed paid by such shareholder under section 852(b)(3)(D)(ii) and such payment constitutes, for purposes of section 6513(a) (relating to time tax considered paid), an advance payment in like amount of the tax imposed under chapter 1 of the Code for such taxable year. In the case of an overpayment of tax within the meaning of section 6401, see section 6402 and the regulations in part 301 of this chapter (Regulations on Procedure and Administration) for rules applicable to the treatment of an overpayment of tax and section 6511 and the regulations in part 301 of this chapter (Regulations on Procedure and Administration) with respect to the limitations applicable to the credit or refund of an overpayment of tax.

(ii) *Form to be used.* Claim for refund or credit of the tax deemed to have been paid by a shareholder with respect to an amount of undistributed capital gains shall be made on the shareholder's income tax return for the taxable year in which such amount of undistributed capital gains is includable in gross income. In the case of a shareholder which is a partnership, claim shall be made by the partners on their income tax returns for refund or credit of their distributive shares of the tax deemed to have been paid by the partnership. In the case of a shareholder which is exempt from tax under section

501(a) and to which section 511 does not apply for the taxable year, claim for refund of the tax deemed to have been paid by such shareholder on an amount of undistributed capital gains for such year shall be made on Form 843 and copy B of Form 2439 furnished to such shareholder shall be attached to its claim. For other rules applicable to the filing of claims for credit or refund of an overpayment of tax, see §301.6402-2 of this chapter (Regulations on Procedure and Administration), relating to claims for credit or refund, and §301.6402-3 of this chapter, relating to special rules applicable to income tax.

(3) *Records.* The shareholder is required to keep copy C of the Form 2439 furnished for the regulated investment company's taxable years ending after December 31, 1969, and beginning before January 1, 1975, as part of his records to show increases in the adjusted basis of his shares in such company.

(d) *Penalties.* For criminal penalties for willful failure to file a return, supply information, or pay tax, and for filing a false or fraudulent return, statement, or other document, see sections 7203, 7206, and 7207.

[T.D. 6500, 25 FR 11710, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8755, June 20, 1967; T.D. 7012, 34 FR 7688, May 15, 1969; T.D. 7187, 37 FR 13256, July 6, 1972; T.D. 7332, 39 FR 44217, Dec. 23, 1974; T.D. 7337, 39 FR 44973, Dec. 30, 1974; T.D. 8989, 67 FR 20031, Apr. 24, 2002; T.D. 9040, 68 FR 4921, Jan. 31, 2003]

§ 1.852-10 Distributions in redemption of interests in unit investment trusts.

(a) *In general.* In computing that part of the excess of its net long-term capital gain over net short-term capital loss on which it must pay a capital gains tax, a regulated investment company is allowed under section 852(b)(3)(A)(ii) a deduction for dividends paid (as defined in section 561) determined with reference to capital gains dividends only. Section 561(b) provides that in determining the deduction for dividends paid, the rules provided in section 562 are applicable. Section 562(c) (relating to preferential dividends) provides that the amount of any distribution shall not be considered as a dividend unless such distribution is pro-rata, with no preference to any share of stock as compared with

other shares of the same class except to the extent that the former is entitled to such preference.

(b) *Redemption distributions made by unit investment trust—(1) In general.* Where a unit investment trust (as defined in paragraph (c) of this section) liquidates part of its portfolio represented by shares in a management company in order to make a distribution to a holder of an interest in the trust in redemption of part or all of such interest, and by so doing, the trust realizes net long-term capital gain, that portion of the distribution by the trust which is equal to the amount of the net long-term capital gain realized by the trust on the liquidation of the shares in the management company will not be considered a preferential dividend under section 562(c). For example, where the entire amount of net long-term capital gain realized by the trust on such a liquidation is distributed to the redeeming interest holder, the trust will be allowed the entire amount of net long-term capital gain so realized in determining the deduction under section 852(b)(3)(A)(ii) for dividends paid determined with reference to capital gains dividends only. This paragraph and section 852(d) shall apply only with respect to the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) realized by the trust which is attributable to a redemption by a holder of an interest in such trust. Such dividend may be designated as a capital gain dividend by a written notice to the certificate holder. Such designation should clearly indicate to the holder that the holder's gain or loss on the redemption of the certificate may differ from such designated amount, depending upon the holder's basis for the redeemed certificate, and that the holder's own records are to be used in computing the holder's gain or loss on the redemption of the certificate.

(2) *Example.* The application of the provisions of this paragraph may be illustrated by the following example:

Example. B entered into a periodic payment plan contract with X as custodian and Z as plan sponsor under which he purchased a plan certificate of X. Under this contract,

- (2) Retroactive election.
 - (i) In general.
 - (ii) Deadline for making election.
- (3) Amended return required for succeeding year in certain circumstances.
 - (i) In general.
 - (ii) Time for filing amended return.
- (4) Retroactive dividend.
 - (i) In general.
 - (ii) Method of making election.
- (iii) Deduction for dividends paid.
 - (A) In general.
 - (B) Limitation on ordinary dividends.
 - (C) Limitation on capital gain dividends.
 - (D) Effect on other years.
- (iv) Earnings and profits.
- (v) Receipt by shareholders.
- (vi) Foreign tax election.
- (vii) Example.
- (5) Certain distributions may be designated retroactively as capital gain dividends.
- (k) Effective date.

(b) *Scope*—(1) *In general*. This section prescribes the manner in which a regulated investment company must treat a post-October capital loss (as defined in paragraph (c) of this section) or a post-October currency loss (as defined in paragraph (d)(1) of this section) for purposes of determining its taxable income, its earnings and profits, and the amount that it may designate as capital gain dividends for the taxable year in which the loss is incurred and the succeeding taxable year (the “succeeding year”).

(2) *Limitation on application of section*. This section shall not apply to any post-October capital loss or post-October currency loss of a regulated investment company attributable to a taxable year for which an election is in effect under section 4982(e)(4) of the Code with respect to the company.

(c) *Post-October capital loss defined*—(1) *In general*. For purposes of this section, the term *post-October capital loss* means—

- (i) Any net capital loss attributable to the portion of a regulated investment company’s taxable year after October 31; or
- (ii) If there is no such net capital loss, any net long-term capital loss attributable to the portion of a regulated investment company’s taxable year after October 31.

(2) *Methodology*. The amount of any net capital loss or any net long-term capital loss attributable to the portion of the regulated investment company’s

taxable year after October 31 shall be determined in accordance with general tax law principles (other than section 1212) by treating the period beginning on November 1 of the taxable year of the regulated investment company and ending on the last day of such taxable year as though it were the taxable year of the regulated investment company. For purposes of this paragraph (c)(2), any item (other than a capital loss carryover) that is required to be taken into account or any rule that must be applied, for purposes of section 4982, on October 31 as if it were the last day of the regulated investment company’s taxable year must also be taken into account or applied in the same manner as required under section 4982, both on October 31 and again on the last day of the regulated investment company’s taxable year.

(3) *October 31 treated as last day of taxable year for purpose of determining taxable income under certain circumstances*—

(i) *In general*. If a regulated investment company has a post-October capital loss for a taxable year, any item that must be marked to market for purposes of section 4982 on October 31 as if it were the last day of the regulated investment company’s taxable year must also be marked to market on October 31 and again on the last day of the regulated investment company’s taxable year for purposes of determining its taxable income. If the regulated investment company does not have a post-October capital loss for a taxable year, the regulated investment company must treat items that must be marked to market for purposes of section 4982 on October 31 as if it were the last day of the regulated investment company’s taxable year as marked to market only on the last day of its taxable year for purposes of determining its taxable income.

(ii) *Effect on gross income*. The marking to market of any item on October 31 of a regulated investment company’s taxable year for purposes of determining its taxable income under paragraph (c)(3)(i) of this section shall not affect the amount of the gross income of such company for such taxable year for purposes of section 851(b) (2) or (3).

(d) *Post-October currency loss defined*. For purposes of this section—

(1) *Post-October currency loss.* The term *post-October currency loss* means any net foreign currency loss attributable to the portion of a regulated investment company's taxable year after October 31. For purposes of the preceding sentence, principles similar to those of paragraphs (c)(2) and (c)(3) of this section shall apply.

(2) *Net foreign currency loss.* The term "net foreign currency loss" means the excess of foreign currency losses over foreign currency gains.

(3) *Foreign currency gain or loss.* The terms "foreign currency gain" and "foreign currency loss" have the same meaning as provided in section 988(b).

(e) *Limitation on capital gain dividends—(1) In general.* For purposes of determining the amount a regulated investment company may designate as capital gain dividends for a taxable year, the amount of net capital gain for the taxable year shall be determined without regard to any post-October capital loss for such year.

(2) *Amount taken into account in current year—(i) Net capital loss.* If the post-October capital loss referred to in paragraph (e)(1) of this section is a post-October capital loss as defined in paragraph (c)(1)(i) of this section, the net capital gain of the company for the taxable year in which the loss arose shall be determined without regard to any capital gains or losses (both long-term and short-term) taken into account in computing the post-October capital loss for the taxable year.

(ii) *Net long-term capital loss.* If the post-October capital loss referred to in paragraph (e)(1) of this section is a post-October capital loss as defined in paragraph (c)(1)(ii) of this section, the net capital gain of the company for the taxable year in which the loss arose shall be determined without regard to any long-term capital gain or loss taken into account in computing the post-October capital loss for the taxable year.

(3) *Amount taken into account in succeeding year.* If a regulated investment company has a post-October capital loss (as defined in paragraph (c)(1)(i) or (c)(1)(ii) of this section) for any taxable year, then, for purposes of determining the amount the company may designate as capital gain dividends for the

succeeding year, the net capital gain for the succeeding year shall be determined by treating all gains and losses taken into account in computing the post-October capital loss as arising on the first day of the succeeding year.

(f) *Regulated investment company may elect to defer certain losses for purposes of determining taxable income—(1) In general.* A regulated investment company may elect, in accordance with the procedures of paragraph (i) of this section, to compute its taxable income for a taxable year without regard to part or all of any post-October capital loss or post-October currency loss for that year.

(2) *Effect of election in current year.* The taxable income of a regulated investment company for a taxable year to which an election under paragraph (f)(1) of this section applies shall be computed without regard to that part of any post-October capital loss or post-October currency loss to which the election applies.

(3) *Amount of loss taken into account in current year—(i) If entire amount of net capital loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer the entire amount of a post-October capital loss as defined in paragraph (c)(1)(i) of this section, the taxable income of the company for the taxable year in which the loss arose shall be determined without regard to any capital gains or losses (both long-term and short-term) taken into account in computing the post-October capital loss for the taxable year.

(ii) *If part of net capital loss deferred—(A) In general.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer less than the entire amount of a post-October capital loss as defined in paragraph (c)(1)(i) of this section, the taxable income of the company for the taxable year in which the loss arose shall be determined by including an amount of capital loss taken into account in computing the post-October capital loss for the taxable year equal to the amount of the post-October capital loss that is not deferred. No amount of capital gain taken into account in computing the

post-October capital loss for the taxable year shall be taken into account in the determination.

(B) *Character of capital loss not deferred.* The capital loss includible in the taxable income of the company under this paragraph (f)(3)(ii) for the taxable year in which the loss arose shall consist first of any short-term capital losses to the extent thereof, and then of any long-term capital losses, taken into account in computing the post-October capital loss for the taxable year.

(iii) *If entire amount of net long-term capital loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer the entire amount of a post-October capital loss as defined in paragraph (c)(1)(ii) of this section, the taxable income of the company for the taxable year in which the loss arose shall be determined without regard to any long-term capital gains or losses taken into account in computing the post-October capital loss for the taxable year.

(iv) *If part of net long-term capital loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer less than the entire amount of a post-October capital loss as defined in paragraph (c)(1)(ii) of this section, the taxable income of the company for the taxable year in which the loss arose shall be determined by including an amount of long-term capital loss taken into account in computing the post-October capital loss for the taxable year equal to the amount of the post-October capital loss that is not deferred. No amount of long term capital gain taken into account in computing the post-October capital loss for the taxable year shall be taken into account in the determination.

(v) *If entire amount of post-October currency loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer the entire amount of a post-October currency loss, the taxable income of the company for the taxable year in which the loss arose shall be determined without regard to any foreign currency gains or losses taken into account in computing the post-October currency loss for the taxable year.

(vi) *If part of post-October currency loss deferred.* If a regulated investment company elects, under paragraph (f)(1) of this section, to defer less than the entire amount of a post-October currency loss, the taxable income of the company for the taxable year in which the loss arose shall be determined by including an amount of foreign currency loss taken into account in computing the post-October currency loss for the taxable year equal to the amount of the post-October currency loss that is not deferred. No amount of foreign currency gain taken into account in computing the post-October currency loss for the taxable year shall be taken into account in the determination.

(4) *Amount of loss taken into account in succeeding year and subsequent years.* If a regulated investment company has a post-October capital loss or a post-October currency loss for any taxable year and an election under paragraph (f)(1) is made for that year, then, for purposes of determining the taxable income of the company for the succeeding year and all subsequent years, all capital gains and losses taken into account in determining the post-October capital loss, and all foreign currency gains and losses taken into account in determining the post-October currency loss, that are not taken into account under the rules of paragraph (f)(3) of this section in determining the taxable income of the regulated investment company for the taxable year in which the loss arose shall be treated as arising on the first day of the succeeding year.

(5) *Effect on gross income.* An election by a regulated investment company to defer any post-October capital loss or any post-October currency loss for a taxable year under paragraph (f)(1) of this section shall not affect the amount of the gross income of such company for such taxable year (or the succeeding year) for purposes of section 851(b) (2) or (3).

(g) *Earnings and profits—(1) General rule.* The earnings and profits of a regulated investment company for a taxable year are determined without regard to any post-October capital loss or post-October currency loss for that

Internal Revenue Service, Treasury

§ 1.852-11

year. If a regulated investment company distributes with respect to a calendar year amounts in excess of the limitation described in the succeeding sentence, then, with respect to those excess amounts, for the taxable year with respect to which the amounts are distributed, the earnings and profits of the company are computed without regard to the preceding sentence. The limitation described in this sentence is the amount that would be the required distribution for that calendar year under section 4982 if "100 percent" were substituted for each percentage set forth in section 4982(b)(1).

(2) *Special Rule—Treatment of losses that are deferred for purposes of determining taxable income.* If a regulated investment company elects to defer, under paragraph (f)(1) of this section, any part of a post-October capital loss or post-October currency loss arising in a taxable year, then, for both the taxable year in which the loss arose and the succeeding year, both the earnings and profits and the accumulated earnings and profits of the company are determined as if the part of the loss so deferred had arisen on the first day of the succeeding year.

(h) *Examples.* The provisions of paragraphs (e), (f), and (g) of this section may be illustrated by the following examples. For each example, assume that X is a regulated investment company that computes its income on a calendar year basis, and that no election is in effect under section 4982(e)(4).

Example 1. X has a \$25 net foreign currency gain, a \$50 net short-term capital loss, and a \$75 net long-term capital gain for the post-October period of 1988. X has no post-October currency loss and no post-October capital loss for 1988, and this section does not apply.

Example 2. X has the following capital gains and losses for the periods indicated:

	Long-term	Short-term
01/01 to 10/31/88	115 (15)	80 (20)
	100	60
11/01 to 12/31/88	75 (150)	150 (50)
	(75)	100
01/01 to 10/31/89	30 (5)	40 (20)

	Long-term	Short-term
	25	20
11/01 to 12/31/89	35 (0)	100 (50)
	35	50

X has a post-October capital loss of \$75 for its 1988 taxable year due to a net long-term capital loss for the post-October period of 1988. X does not make an election under paragraph (f)(1) of this section.

(i) *Capital gain dividends.* X may designate up to \$100 as a capital gain dividend for 1988 because X must disregard the \$75 long-term capital gain and the \$150 long-term capital loss for the post-October period of 1988 in computing its net capital gain for this purpose. In computing its net capital gain for 1989 for the purposes of determining the amount it may designate as a capital gain dividend for 1989, X must take into account the \$75 long-term capital gain and the \$150 long-term capital loss for the post-October period of 1988 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X may not designate any amount as a capital gain dividend for 1989.

(ii) *Taxable income.* X must include the \$75 long-term capital gain and the \$150 long-term capital loss for its post-October period of 1988 in its taxable income for 1988 because it did not make an election under paragraph (f)(1) of this section for 1988. Accordingly, X's taxable income for 1988 will include a net capital gain of \$25 and a net short-term capital gain of \$160. X's taxable income for 1989 will include a net capital gain of \$60 and a net short-term capital gain of \$70.

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the \$75 long-term capital gain and the \$150 long-term capital loss for the post-October period of 1988. X must, however, include the \$75 long-term capital gain and \$150 long-term capital loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. Thus, X includes \$260 of capital gain in its earnings and profits for 1988, includes \$185 in its accumulated earnings and profits for 1988, and includes \$130 of capital gain in its earnings and profits for 1989.

Example 3. Same facts as example 2, except that X elects to defer the entire \$75 post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 2.

(ii) *Taxable income.* X must compute its taxable income for 1988 without regard to the \$75 long-term capital gain and the \$150 long-term capital loss for the post-October period of 1988 because it made an election to defer

the entire \$75 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of \$100 and a net short-term capital gain of \$160. X must include the \$75 long-term capital gain and the \$150 long-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net long-term capital loss of \$15 and a net short-term capital gain of \$70.

(iii) *Earnings and profits.* For 1988, X must determine both its earnings and profits and its accumulated earnings and profits without regard to the \$75 long-term capital gain and \$150 long-term capital loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the \$75 long-term capital gain and \$150 long-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X will include \$260 of capital gain in its earnings and profits for 1988 and \$55 of capital gain in its earnings and profits for 1989.

Example 4. Same facts as example 2, except that X elects to defer only \$50 of the post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same results as in example 2.

(ii) *Taxable income.* X must compute its taxable income for 1988 without regard to the \$75 long-term capital gain and \$125 of the \$150 long-term capital loss for the post-October period of 1988 because it made an election to defer \$50 of the \$75 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of \$75 and a net short-term capital gain of \$160. X must include the \$75 long-term capital gain and \$125 of the \$150 long-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of \$10 and a net short-term capital gain of \$70.

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the \$75 long-term capital gain and the \$150 long-term capital loss for the post-October period of 1988. X must include \$25 of the \$150 long-term capital loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses

for 1989) the \$75 long-term capital gain and \$125 of the \$150 long-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X includes \$260 of capital gain in its earnings and profits for 1988, includes \$235 in its accumulated earnings and profits for 1988, and includes \$80 of capital gain in its earnings and profits for 1989.

Example 5. X has the following capital gains and losses for the periods indicated:

	Long-term	Short-term
01/01 to 10/31/88	115 (15)	80 (20)
	100	60
11/01 to 12/31/88	150 (75)	50 (150)
	75	(100)
01/01 to 10/31/89	30 (5)	40 (20)
	25	20
11/01 to 12/31/89	35 (0)	100 (50)
	35	50

X has a post-October capital loss of \$25 for its 1988 taxable year due to a net capital loss for the post-October period of 1988. X does not make an election under paragraph (f)(1) of this section.

(i) *Capital gain dividends.* X may designate up to \$100 as a capital gain dividend for 1988 because X must disregard the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988 in computing its net capital gain for this purpose. In computing its net capital gain for 1989 for purposes of determining the amount it may designate as a capital gain dividend for 1989, X must take into account the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X may designate up to \$105 as a capital gain dividend for 1989.

(ii) *Taxable income.* X must include the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988 in its taxable income for 1988 because it did not make an election under paragraph (f)(1) of this section for 1988. Accordingly, X's taxable income for 1988 will include a net capital gain of \$135 (consisting of a net long-term capital gain of \$175 and a net short-term capital loss of \$40).

X's taxable income for 1989 will include a net capital gain of \$60 and a net short-term capital gain of \$70.

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988. X must, however, include the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. Thus, X includes \$160 of capital gain in its earnings and profits for 1988, includes \$135 in its accumulated earnings and profits for 1988, and includes \$130 of capital gain in its earnings and profits for 1989.

Example 6. Same facts as example 5, except that X elects to defer the entire \$25 post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 5.

(ii) *Taxable income.* X must compute its taxable income for 1988 without regard to the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988 because it made an election to defer the entire \$25 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of \$100 and a net short-term capital gain of \$60. X must include the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of \$105 (consisting of a net long-term capital gain of \$135 and a net short-term capital loss of \$30).

(iii) *Earnings and profits.* For 1988, X must determine both its earnings and profits and its accumulated earnings and profits without regard to the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X will include \$160 of capital gain in its earnings and profits for 1988

and \$105 of capital gain in its earnings and profits for 1989.

Example 7. Same facts as example 5, except that X elects to defer only \$20 of the post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 5.

(ii) *Taxable income.* X must compute its taxable income for 1988 by including \$5 of the \$150 short-term capital loss for the post-October period of 1988, but without regard to the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and \$145 of the \$150 short-term capital loss for the post-October period of 1988 because it made an election to defer \$20 of the \$25 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of \$100 and a net short-term capital gain of \$55. X must include the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and \$145 of the \$150 short-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of \$110 (consisting of a long-term capital gain of \$135 and a net short-term capital loss of \$25).

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and the \$150 short-term capital loss for the post-October period of 1988. In determining its accumulated earnings and profits for 1988, X must include \$5 of the \$150 short-term capital loss for the post-October period of 1988. In determining its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the \$150 long-term capital gain, the \$75 long-term capital loss, the \$50 short-term capital gain, and \$145 of the \$150 short-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X includes \$160 of capital gain in its earnings and profits for 1988, includes \$155 in its accumulated earnings and profits for 1988, and includes \$110 of capital gain in its earnings and profits for 1989.

Example 8. X has the following capital gains and losses for the periods indicated:

	Long-term	Short-term
01/01 to 10/31/88	115 (15)	80 (20)
	100	60
11/01 to 12/31/88	15	25

	Long-term	Short-term
	(75)	(10)
	(60)	15
01/01 to 10/31/89	80 (5)	50 (100)
	75	(50)
11/01 to 12/31/89	85 (0)	40 (20)
	85	20

X has a post-October capital loss of \$45 for its 1988 taxable year due to a net capital loss for the post-October period of 1988. X does not make an election under paragraph (f)(1) of this section.

(i) *Capital gain dividends.* X may designate up to \$100 as a capital gain dividend for 1988 because X must disregard the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988 in computing its net capital gain for this purpose. In computing its net capital gain for 1989 for purposes of determining the amount it may designate as a capital gain dividend for 1989, X must take into account the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X may designate up to \$85 as a capital gain dividend for 1989.

(ii) *Taxable income.* X must include the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988 in its taxable income for 1988 because it did not make an election under paragraph (f)(1) of this section for 1988. Accordingly, X's taxable income for 1988 will include a net capital gain of \$40 and a net short-term capital gain of \$75. X's taxable income for 1989 will include a net capital gain of \$130 for 1989 (consisting of a net long-term capital gain of \$160 and a net short-term capital loss of \$30).

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988. X must, however, include the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. Thus, X includes \$160 of capital gain in its earnings and profits for 1988, includes \$115 in its accu-

mulated earnings and profits for 1988, and includes \$130 of capital gain in its earnings and profits for 1989.

Example 9. Same facts as example 8, except that X elects to defer the entire \$45 post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 8.

(ii) *Taxable income.* X must compute its taxable income for 1988 without regard to the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988 because it made an election to defer the entire \$45 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of \$100 and a net short-term capital gain of \$60. X must include the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of \$85 (consisting of a net long-term capital gain of \$100 and a net short-term capital loss of \$15).

(iii) *Earnings and profits.* For 1988, X must determine both its earnings and profits and its accumulated earnings and profits without regard to the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X will include \$160 of capital gain in its earnings and profits for 1988 and \$85 of capital gain in its earnings and profits for 1989.

Example 10. Same facts as example 8, except that X elects to defer only \$30 of the post-October capital loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Capital gain dividends.* Same result as in example 8.

(ii) *Taxable income.* X must compute its taxable income for 1988 by including \$5 of the \$75 long-term capital loss and the \$10 short-term capital loss for the post-October period of 1988, but without regard to the \$15 long-term capital gain, \$70 of the \$75 long-term capital loss, and the \$25 short-term capital

gain for the post-October period of 1988 because it made an election to defer \$30 of the \$45 post-October capital loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net capital gain of \$95 and a net short-term capital gain of \$50. X must include the \$15 long-term capital gain, \$70 of the \$75 long-term capital loss, and the \$25 short-term capital gain for the post-October period of 1988 in its taxable income for 1989 in addition to the long-term and short-term capital gains and losses for 1989. Accordingly, X's taxable income for 1989 will include a net capital gain of \$100 (consisting of a net long-term capital gain of \$105 and a net short-term capital loss of \$5).

(iii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the \$15 long-term capital gain, the \$75 long-term capital loss, the \$25 short-term capital gain, and the \$10 short-term capital loss for the post-October period of 1988. In determining its accumulated earnings and profits for 1988, X must include \$5 of the \$75 long-term capital loss and the \$10 short-term capital loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the long-term and short-term capital gains and losses for 1989) the \$15 long-term capital gain, \$70 of the \$75 long-term capital loss, and the \$25 short-term capital gain for the post-October period of 1988 as if those deferred gains and losses arose on January 1, 1989. Thus, X includes \$160 of capital gain in its earnings and profits for 1988, includes \$145 in its accumulated earnings and profits for 1989, and includes \$100 of capital gain in its earnings and profits for 1989 (consisting of a net long-term capital gain of \$105 and a net short-term capital loss of \$5).

Example 11. X has the following foreign currency gains and losses attributable to the periods indicated:

01/01 to 10/31/88	200
11/01 to 12/31/88	(100)
01/01 to 10/31/89	110
11/01 to 12/31/89	40

X has a \$100 post-October currency loss for its 1988 taxable year due to a net foreign currency loss for the post-October period of 1988. X does not make an election under paragraph (f)(1) of this section.

(i) *Taxable income.* X must compute its taxable income for 1988 by including the \$100 foreign currency loss for the post-October period of 1988 because it did not make an election under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net foreign currency gain of \$100. X's taxable income for 1989 will include a net foreign currency gain of \$150.

(ii) *Earnings and profits.* X must determine its earnings and profits for 1988 without re-

gard to the foreign currency loss for the post-October period of 1988. X must, however, include the \$100 foreign currency loss for the post-October period 1988 in determining its accumulated earnings and profits for 1988. Thus, X includes \$200 of foreign currency gain in its earnings and profits for 1988, includes \$100 in its accumulated earnings and profits for 1988, and includes \$150 of foreign currency gain in its earnings and profits for 1989.

Example 12. Same facts as example 11, except that X elects to defer the entire \$100 post-October currency loss for 1988 under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Taxable income.* X must compute its taxable income for 1988 without regard to the \$100 foreign currency loss for the post-October period of 1988 because it made an election to defer the entire \$100 post-October currency loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net foreign currency gain of \$200. X's taxable income for 1989 will include a net foreign currency gain of \$50 because X must compute its taxable income for 1989 by including the \$100 foreign currency loss for the post-October period of 1988 in addition to the foreign currency gains and losses for 1989.

(ii) *Earnings and profits.* For 1988, X must determine both its earnings and profits and its accumulated earnings and profits without regard to the \$100 foreign currency loss for the post-October period of 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the foreign currency gains and losses for 1989) the \$100 foreign currency loss for the post-October period 1988 as if that deferred loss arose on January 1, 1989. Thus, X will include \$200 of foreign currency gain in its earnings and profits for 1988 and \$50 of foreign currency gain in its earnings and profits for 1989.

Example 13. Same facts as example 11, except that X elects to defer only \$75 of the post-October currency loss under paragraph (f)(1) of this section for purposes of determining its taxable income for 1988.

(i) *Taxable income.* X must compute its taxable income for 1988 by including \$25 of the \$100 foreign currency loss for the post-October period of 1988, but without regard to \$75 of the \$100 foreign currency loss for the post-October period of 1988 because it made an election to defer \$75 of the \$100 post-October currency loss for 1988 under paragraph (f)(1) of this section. Accordingly, X's taxable income for 1988 will include a net foreign currency gain of \$175. X's taxable income will include a net foreign currency gain of \$75 for

1989 because X must compute its taxable income for 1989 by including \$75 of the \$100 foreign currency loss for the post-October period of 1988 in addition to the foreign currency gains and losses for 1989.

(ii) *Earnings and profits.* X must determine its earnings and profits for 1988 without regard to the \$100 foreign currency loss for the post-October period of 1988. X must, however, include \$25 of the \$100 foreign currency loss for the post-October period of 1988 in determining its accumulated earnings and profits for 1988. In determining both its earnings and profits and its accumulated earnings and profits for 1989, X must include (in addition to the foreign currency gains and losses for 1989) the \$75 of the \$100 foreign currency loss for the post-October period of 1988 as if that loss arose on January 1, 1989. Thus, X includes \$200 of foreign currency gain in its earnings and profits for 1988, includes \$175 in its accumulated earnings and profits for 1988, and includes \$75 of foreign currency gain in its earnings and profits for 1989.

(i) *Procedure for making election—(1) In general.* Except as provided in paragraph (i)(2) of this section, a regulated investment company may make an election under paragraph (f)(1) of this section for a taxable year to which this section applies by completing its income tax return (including any necessary schedules) for that taxable year in accordance with the instructions for the form that are applicable to the election.

(2) *When applicable instructions not available.* If the instructions for the income tax returns of regulated investment companies for a taxable year to which this section applies do not reflect the provisions of this section, a regulated investment company may make an election under paragraph (f)(1) of this section for that year by entering the appropriate amounts on its income tax return (including any necessary schedules) for that year, and by attaching a written statement to the return that states—

(i) The taxable year for which the election under this section is made;

(ii) The fact that the regulated investment company elects to defer all or a part of its post-October capital loss or post-October currency loss for that taxable year for purposes of computing its taxable income under the terms of this section;

(iii) The amount of the post-October capital loss or post-October currency

loss that the regulated investment company elects to defer for that taxable year; and

(iv) The name, address, and employer identification number of the regulated investment company.

(j) *Transition rules—(1) In general.* For a taxable year ending before March 2, 1990 in which a regulated investment company incurred a post-October capital loss or post-October currency loss, the company may use any method that is consistently applied and in accordance with reasonable business practice to determine the amounts taken into account in that taxable year for purposes of paragraphs (e)(2), (f)(3), and (g) of this section and to determine the amount taken into account in the succeeding year for purposes of paragraphs (e)(3), (f)(4), and (g) of this section. For example, for purposes of paragraph (e), a taxpayer may use a method that treats as incurred in a taxable year all capital gains taken into account in computing the post-October capital loss for that year and an amount of capital loss for such period equal to the amount of such gains and that treats the remaining amount of capital loss for such period as arising on the first day of the succeeding year.

Similarly, for purposes of paragraph (e)(3), a taxpayer may use a method that treats as arising on the first day of the succeeding year only the excess of the capital losses from sales or exchanges after October 31 over the capital gains for such period (that is, the net capital loss or net long-term capital loss for such period).

(2) *Retroactive election—(i) In general.* A regulated investment company may make an election (a “retroactive election”) under paragraph (f)(1) for a taxable year with respect to which it has filed an income tax return on or before May 1, 1990 (a “retroactive election year”) by filing an amended return (including any necessary schedules) for the retroactive election year reflecting the appropriate amounts and by attaching a written statement to the return that complies with the requirements of paragraph (i)(2) of this section.

(ii) *Deadline for making election.* A retroactive election may be made no later than December 31, 1990.

(3) *Amended return required for succeeding year in certain circumstances—(i) In general.* If, at the time a regulated investment company makes a retroactive election under this section, it has already filed an income tax return for the succeeding year, the company must file an amended return for such succeeding year reflecting the appropriate amounts.

(ii) *Time for filing amended return.* An amended return required under paragraph (j)(3)(i) of this section must be filed together with the amended return described in paragraph (j)(2)(i).

(4) *Retroactive dividend—(i) In general.* A regulated investment company that makes a retroactive election under this section for a retroactive election year may elect to treat any dividend (or portion thereof) declared and paid (or treated as paid under section 852(b)(7)) by the regulated investment company after the retroactive election year and on or before December 31, 1990 as having been paid during the retroactive election year (a “retroactive dividend”). This election shall be irrevocable with respect to the retroactive dividend to which it applies.

(ii) *Method of making election.* The election under this paragraph (j)(4) must be made by the regulated investment company by treating the dividend (or portion thereof) to which the election applies as a dividend paid during the retroactive election year in computing its deduction for dividends paid in its tax returns for all applicable years (including the amended return(s) required to be filed under paragraphs (j)(2) and (3) of this section).

(iii) *Deduction for dividends paid—(A) In general.* Subject to the rules of sections 561 and 562, a regulated investment company shall include the amount of any retroactive dividend in computing its deduction for dividends paid for the retroactive election year. No deduction for dividends paid shall be allowed under this paragraph (j)(4)(iii)(A) for any amount not paid (or treated as paid under section 852(b)(7)) on or before December 31, 1990.

(B) *Limitation on ordinary dividends.* The amount of retroactive dividends (other than retroactive dividends qualifying as capital gain dividends)

paid for a retroactive election year under this section shall not exceed the increase, if any, in the investment company taxable income of the regulated investment company (determined without regard to the deduction for dividends paid (as defined in section 561)) that is attributable solely to the regulated investment company having made the retroactive election.

(C) *Limitation on capital gain dividends.* The amount of retroactive dividends qualifying as capital gain dividends paid for a retroactive election year under this section shall not exceed the increase, if any, in the amount of the excess described in section 852(b)(3)(A) (relating to the excess of the net capital gain over the deduction for capital gain dividends paid) that is attributable solely to the regulated investment company having made the retroactive election.

(D) *Effect on other years.* A retroactive dividend shall not be includible in computing the deduction for dividends paid for—

(1) The taxable year in which such distribution is actually paid (or treated as paid under section 852(b)(7)); or

(2) Under section 855(a), the taxable year preceding the retroactive election year.

(iv) *Earnings and profits.* A retroactive dividend shall be considered as paid out of the earnings and profits of the retroactive election year (computed with the application of sections 852(c) and 855, §1.852-5, §1.855-1, and this section), and not out of the earnings and profits of the taxable year in which the distribution is actually paid (or treated as paid under section 852(b)(7)).

(v) *Receipt by shareholders.* Except as provided in section 852(b)(7), a retroactive dividend shall be included in the gross income of the shareholders of the regulated investment company for the taxable year in which the dividend is received by them.

(vi) *Foreign tax election.* If a regulated investment company to which section 853 (relating to foreign taxes) is applicable for a retroactive election year elects to treat a dividend paid (or treated as paid under section 852(b)(7)) during the taxable year as a retroactive dividend, the shareholders of the

§ 1.852-12

regulated investment company shall consider the amounts described in section 853(b)(2) allocable to such distribution as paid or received, as the case may be, in the shareholder's taxable year in which the distribution is made.

(vii) *Example.* The provisions of this paragraph (j)(4) may be illustrated by the following example:

Example. X is a regulated investment company that computes its income on a calendar year basis. No election is in effect under section 4982(e)(4). X has the following income for 1988:

FOREIGN CURRENCY GAINS AND LOSSES

Gains and Losses

Jan. 1-Oct. 31—100
Nov. 1-Dec. 31—(75)

CAPITAL GAINS AND LOSSES

Jan. 1-Oct. 31—short term, 100;
Nov. 1-Dec. 31—short term, 50; long term,
(100)

(A) X had investment company taxable income of \$175 and no net capital gain for 1988 for taxable income purposes. X distributed \$175 of investment company taxable income as an ordinary dividend for 1988.

(B) If X makes a retroactive election under this section to defer the entire \$75 post-October currency loss and the entire \$50 post-October capital loss for the post-October period of its 1988 taxable year for purposes of computing its taxable income, that deferral increases X's investment company taxable income for 1988 by \$25 (due to an increase in foreign currency gain of \$75 and a decrease in short-term capital gain of \$50) to \$200 and increases the excess described in section 852(b)(3)(A) for 1988 by \$100 from \$0 to \$100. The amount that X may treat as a retroactive ordinary dividend is limited to \$25, and the amount that X may treat as a retroactive capital gain dividend is limited to \$100.

(5) *Certain distributions may be designated retroactively as capital gain dividends.* To the extent that a regulated investment company designated as capital gain dividends for a taxable year less than the maximum amount permitted under paragraph (e) of this section for that taxable year, the regulated investment company may designate an additional amount of dividends paid (or treated as paid under sections 852(b)(7) or 855, or paragraph (j)(4) of this section) for the taxable year as capital gain dividends, notwithstanding that a written notice was not

26 CFR Ch. I (4-1-15 Edition)

mailed to its shareholders within 60 days after the close of the taxable year in which the distribution was paid (or treated as paid under section 852(b)(7)).

(k) *Effective date.* the provisions of this section shall apply to taxable years ending after October 31, 1987.

[T.D. 8287, 55 FR 3213, Jan. 31, 1990; 55 FR 7891, Mar. 6, 1990; 55 FR 11110, Mar. 26, 1990. Redesignated and amended by T.D. 8320, 55 FR 50176, Dec. 5, 1990; 56 FR 2808, Jan. 24, 1991; 56 FR 8130, Feb. 27, 1991]

§ 1.852-12 Non-RIC earnings and profits.

(a) *Applicability of section 852(a)(2)(A)*—(1) *In general.* An investment company does not satisfy section 852(a)(2)(A) unless—

(i) Part I of subchapter M applied to the company for all its taxable years ending on or after November 8, 1983; and

(ii) For each corporation to whose earnings and profits the investment company succeeded by the operation of section 381, part I of subchapter M applied for all the corporation's taxable years ending on or after November 8, 1983.

(2) *Special rule.* See section 1071(a)(5)(D) of the Tax Reform Act of 1984, Public Law 98-369 (98 Stat. 1051), for a special rule which treats part I of subchapter M as having applied to an investment company's first taxable year ending after November 8, 1983.

(b) *Applicability of section 852(a)(2)(B)*—(1) *In general.* An investment company does not satisfy section 852(a)(2)(B) unless, as of the close of the taxable year, it has no earnings and profits other than earnings and profits that—

(i) Were earned by a corporation in a year for which part I of subchapter M applied to the corporation and, at all times thereafter, were the earnings and profits of a corporation to which part I of subchapter M applied;

(ii) By the operation of section 381 pursuant to a transaction that occurred before December 22, 1992, became the earnings and profits of a corporation to which part I of subchapter M applied and, at all times thereafter, were the earnings and profits of a corporation to which part I of subchapter M applied;

(iii) Were accumulated in a taxable year ending before January 1, 1984, by a corporation to which part I of subchapter M applied for any taxable year ending before November 8, 1983; or

(iv) Were accumulated in the first taxable year of an investment company that began business in 1983 and that was not a successor corporation.

(2) *Prior law.* For purposes of paragraph (b) of this section, a reference to part I of subchapter M includes a reference to the corresponding provisions of prior law.

(c) *Effective date.* This regulation is effective for taxable years ending on or after December 22, 1992.

(d) For treatment of net built-in gain assets of a C corporation that become assets of a RIC, see § 1.337(d)-5T.

[T.D. 8483, 58 FR 43798, Aug. 18, 1993; 58 FR 49352, Sept. 22, 1993; T.D. 8872, 65 FR 5777, Feb. 7, 2000]

§ 1.853-1 Foreign tax credit allowed to shareholders.

(a) *In general.* Under section 853, a regulated investment company, meeting the requirements set forth in section 853(a) and paragraph (b) of this section, may make an election with respect to the income, war-profits, and excess profits taxes described in section 901(b)(1) which it pays to foreign countries or possessions of the United States during the taxable year, including such taxes as are deemed paid by it under the provisions of any income tax convention to which the United States is a party. If an election is made, the shareholders of the regulated investment company shall apply their proportionate share of such foreign taxes paid, or deemed to have been paid by it pursuant to any income tax convention, as either a credit (under section 901) or as a deduction (under section 164(a)) as provided by section 853(b)(2) and paragraph (b) of § 1.853-2. The election is not applicable with respect to taxes deemed to have been paid under section 902 (relating to the credit allowed to corporate stockholders of a foreign corporation for taxes paid by such foreign corporation). In addition, the election is not applicable to any tax with respect to which the regulated investment company is not allowed a credit by reason of any provision of the

Internal Revenue Code other than section 853(b)(1), including, but not limited to, section 901(j), section 901(k), or section 901(l).

(b) *Requirements.* To qualify for the election provided in section 853(a), a regulated investment company (1) must have more than 50 percent of the value of its total assets, at the close of the taxable year for which the election is made, invested in stocks and securities of foreign corporations, and (2) must also, for that year, comply with the requirements prescribed in section 852(a) and paragraph (a) of § 1.852-1. The term "value", for purposes of the first requirement, is defined in section 851(c)(4). For the definition of foreign corporation, see section 7701(a).

(c) *Effective/applicability date.* The final sentence of paragraph (a) of this section is applicable for RIC taxable years ending on or after December 31, 2007.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 9357, 72 FR 48553, Aug. 24, 2007]

§ 1.853-2 Effect of election.

(a) *Regulated investment company.* A regulated investment company making a valid election with respect to a taxable year under the provisions of section 853(a) is, for such year, denied both the deduction for foreign taxes provided by section 164(a) and the credit for foreign taxes provided by section 901 with respect to all income, war-profits, and excess profits taxes (described in section 901(b)(1)) which it has paid to any foreign country or possession of the United States. See section 853(b)(1)(A). However, under section 853(b)(1)(B), the regulated investment company is permitted to add the amount of such foreign taxes paid to its dividends paid deduction for that taxable year. See paragraph (a) of § 1.852-1.

(b) *Shareholder.* Under section 853(b)(2), a shareholder of an investment company, which has made the election under section 853, is, in effect, placed in the same position as a person directly owning stock in foreign corporations, in that he must include in his gross income (in addition to taxable dividends actually received) his proportionate share of such foreign taxes paid

and must treat such amount as foreign taxes paid by him for the purposes of the deduction under section 164(a) and the credit under section 901. For such purposes he must treat as gross income from a foreign country or possession of the United States (1) his proportionate share of the taxes paid by the regulated investment company to such foreign country or possession and (2) the portion of any dividend paid by the investment company which represents income derived from such sources.

(c) *Dividends paid after the close of the taxable year.* For additional rules applicable to certain distributions made after the close of the taxable year which may be designated as income received from sources within and taxes paid to foreign countries or possessions of the United States, see section 855(d) and paragraph (f) of § 1.855-1.

(d) *Example.* This section is illustrated by the following example:

Example. (i) *Facts.* X Corporation, a regulated investment company with 250,000 shares of common stock outstanding, has total assets, at the close of the taxable year, of \$10 million (\$4 million invested in domestic corporations, \$3.5 million in Foreign Country A corporations, and \$2.5 million in Foreign Country B corporations). X Corporation received dividend income of \$800,000 from the following sources: \$300,000 from domestic corporations, \$250,000 from Country A corporations, and \$250,000 from Country B corporations. All dividends from Country A corporations and from Country B corporations were properly characterized as income from sources without the United States. The dividends from Country A corporations were subject to a 10 percent withholding tax (\$25,000) and the dividends from Country B corporations were subject to a 20 percent withholding tax (\$50,000). X Corporation's only expenses for the taxable year were \$80,000 of operation and management expenses related to both its U.S. and foreign investments. In this case, Corporation X properly apportioned the \$80,000 expense based on the relative amounts of its U.S. and foreign source gross income. Thus, \$50,000 in expense was apportioned to foreign source income ($\$80,000 \times \$500,000 / \$800,000$, total expense times the fraction of foreign dividend income over total dividend income) and \$30,000 in expense was apportioned to U.S. source income ($\$80,000 \times \$300,000 / \$800,000$, total expense times the fraction of U.S. source dividend income over total dividend income). During the taxable year, X Corporation distributed to its shareholders the entire \$645,000 income that was available for

distribution (\$800,000, less \$80,000 in expenses, less \$75,000 in foreign taxes withheld).

(ii) *Section 853 election.* X Corporation meets the requirements of section 851 to be considered a RIC for the taxable year and the requirements of section 852(a) for part 1 of subchapter M to apply for the taxable year. X Corporation notifies each shareholder by mail, within the time prescribed by section 853(c), that by reason of the election the shareholders are to treat as foreign taxes paid \$0.30 per share of stock (\$75,000 of foreign taxes paid, divided by the 250,000 shares of stock outstanding). The shareholders must report as income \$2.88 per share (\$2.58 of dividends actually received plus the \$0.30 representing foreign taxes paid). Of the \$2.88 per share, \$1.80 per share (\$450,000 of foreign source taxable income divided by 250,000 shares) is to be considered as received from foreign sources. The \$1.80 consists of \$0.30, the foreign taxes treated as paid by the shareholder and \$1.50, the portion of the dividends received by the shareholder from the RIC that represents income of the RIC treated as derived from foreign sources (\$500,000 of foreign source income, less \$50,000 of expense apportioned to foreign source income, less \$75,000 of foreign tax withheld, which is \$375,000, divided by 250,000 shares).

(e) *Effective/applicability date.* Paragraph (d) of this section is applicable for RIC taxable years ending on or after December 31, 2007. Notwithstanding the preceding sentence, for a taxable year that ends on or after December 31, 2007, and begins before August 24, 2007, a taxpayer may rely on this section as it was in effect on August 23, 2007.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 9357, 72 FR 48553, Aug. 24, 2007]

§ 1.853-3 Notice to shareholders.

(a) *General rule.* If a regulated investment company makes an election under section 853(a), in the manner provided in § 1.853-4, the regulated investment company is required under section 853(c) to furnish its shareholders with a written notice mailed not later than 60 days after the close of its taxable year. The notice must designate the shareholder's portion of creditable foreign taxes paid to foreign countries or possessions of the United States and the portion of the dividend that represents income derived from sources within each country that is attributable to a period during which section 901(j) applies to such country, if any,

and the portion of the dividend that represents income derived from other foreign countries and possessions of the United States. For purposes of section 853(b)(2) and § 1.853-2(b), the amount that a shareholder may treat as the shareholder's proportionate share of foreign taxes paid and the amount to be included as gross income derived from any foreign country that is attributable to a period during which section 901(j) applies to such country or gross income from sources within other foreign countries or possessions of the United States shall not exceed the amount so designated by the regulated investment company in such written notice. If, however, the amount designated by the regulated investment company in the notice exceeds the shareholder's proper proportionate share of foreign taxes or gross income from sources within foreign countries or possessions of the United States, the shareholder is limited to the amount correctly ascertained.

(b) *Shareholder of record custodian of certain unit investment trusts.* In any case where a notice is mailed pursuant to paragraph (a) of this section by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970 to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (b) of § 1.851-7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 70th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the amounts of creditable foreign taxes paid to foreign countries or possessions of the United States and the holder's proportionate share of the dividend that represents income derived from sources within each country that is attributable to a period during which section 901(j) applies to such country, if any, and the holder's proportionate share of the dividend that represents income derived from other foreign countries or possessions of the United States shown on the notice received by the nominee pursuant to paragraph (a) of this section. This

paragraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where such company's return for the taxable year is to be filed, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 60-day period: *Provided however*, if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 60 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

(c) *Effective/applicability date.* This section is applicable for RIC taxable years ending on or after December 31, 2007. Notwithstanding the preceding sentence, for a taxable year that ends on or after December 31, 2007, and begins before August 24, 2007, a taxpayer may rely on this section as it was in effect on August 23, 2007.

[T.D. 7187, 37 FR 13257, July 6, 1972, as amended by T.D. 9357, 72 FR 48554, Aug. 24, 2007]

§ 1.853-4 Manner of making election.

(a) *General rule.* To make an election under section 853 for a taxable year, a regulated investment company must file a statement of election as part of its Federal income tax return for the taxable year. The statement of election

must state that the regulated investment company elects the application of section 853 for the taxable year and agrees to provide the information required by paragraph (c) of this section.

(b) *Irrevocability of the election.* The election shall be made with respect to all foreign taxes described in paragraph (c)(2) of this section, and must be made not later than the time prescribed for filing the return (including extensions). This election, if made, shall be irrevocable with respect to the dividend (or portion thereof), and the foreign taxes paid with respect thereto, to which the election applies.

(c) *Required information.* A regulated investment company making an election under section 853 must provide the following information:

(1) The total amount of taxable income received in the taxable year from sources within foreign countries and possessions of the United States and the amount of taxable income received in the taxable year from sources within each such foreign country or possession.

(2) The total amount of income, war profits, or excess profits taxes (described in section 901(b)(1)) to which the election applies that were paid in the taxable year to such foreign countries or possessions and the amount of such taxes paid to each such foreign country or possession.

(3) The amount of income, war profits, or excess profits taxes paid during the taxable year to which the election does not apply by reason of any provision of the Internal Revenue Code other than section 853(b), including, but not limited to, section 901(j), section 901(k), or section 901(l).

(4) The date, form, and contents of the notice to its shareholders.

(5) The proportionate share of creditable foreign taxes paid to each such foreign country or possession during the taxable year and foreign income received from sources within each such foreign country or possession during the taxable year attributable to one share of stock of the regulated investment company.

(d) *Time and manner of providing information.* The information specified in paragraph (c) of this section must be provided at the time and in the manner

prescribed by the Commissioner and, unless otherwise prescribed, must be provided on or with a modified Form 1118 “Foreign Tax Credit—Corporations” filed as part of the RIC’s timely filed Federal income tax return for the taxable year.

(e) *Effective/applicability date.* This section is applicable for RIC taxable years ending on or after December 31, 2007. Notwithstanding the preceding sentence, for a taxable year that ends on or after December 31, 2007, and begins before August 24, 2007, a taxpayer may rely on this section as it was in effect on August 23, 2007.

[T.D. 9357, 72 FR 48554, Aug. 24, 2007]

§ 1.854-1 Limitations applicable to dividends received from regulated investment company.

(a) *In general.* Section 854 provides special limitations applicable to dividends received from a regulated investment company for purposes of the exclusion under section 116 for dividends received by individuals, the deduction under section 243 for dividends received by corporations, and, in the case of dividends received by individuals before January 1, 1965, the credit under section 34.

(b) *Capital gain dividend.* Under the provisions of section 854(a) a capital gain dividend as defined in section 852(b)(3) and paragraph (c) of § 1.852-4 shall not be considered a dividend for purposes of the exclusion under section 116, the deduction under section 243, and, in the case of taxable years ending before January 1, 1965, the credit under section 34.

(c) *Rule for dividends other than capital gain dividends.* (1) Section 854(b)(1) limits the amount that may be treated as a dividend (other than a capital gain dividend) by the shareholder of a regulated investment company, for the purposes of the credit, exclusion, and deduction specified in paragraph (b) of this section, where the investment company receives substantial amounts of income (such as interest, etc.) from sources other than dividends from domestic corporations, which dividends qualify for the exclusion under section 116.

(2) Where the “aggregate dividends received” (as defined in section

854(b)(3)(B) and paragraph (b) of § 1.854-3) during the taxable year by a regulated investment company (which meets the requirements of section 852(a) and paragraph (a) of § 1.852-1 for the taxable year during which it paid such dividend) are less than 75 percent of its gross income for such taxable year (as defined in section 854(b)(3)(A) and paragraph (a) of § 1.854-3), only that portion of the dividend paid by the regulated investment company which bears the same ratio to the amount of such dividend paid as the aggregate dividends received by the regulated investment company, during the taxable year, bears to its gross income for such taxable year (computed without regard to gains from the sale or other disposition of stocks or securities) may be treated as a dividend for purposes of such credit, exclusion, and deduction.

(3) Subparagraph (2) of this paragraph may be illustrated by the following example:

Example. The XYZ regulated investment company meets the requirements of section 852(a) for the taxable year and has received income from the following sources:

Capital gains (from the sale of stock or securities)	\$100,000
Dividends (from domestic sources other than dividends described in section 116(b))	70,000
Dividend (from foreign corporations)	5,000
Interest	25,000
Total	200,000
Expenses	20,000
Taxable income	180,000

The regulated investment company decides to distribute the entire \$180,000. It distributes a capital gain dividend of \$100,000 and a dividend of ordinary income of \$80,000. The aggregate dividends received by the regulated investment company from domestic corporations (\$70,000) is less than 75 percent of its gross income (\$100,000) computed without regard to capital gains from sales of securities. Therefore, an apportionment is required. Since \$70,000 is 70 percent of \$100,000, out of every \$1 dividend of ordinary income paid by the regulated investment company only 70 cents would be available for the credit, exclusion, or deduction referred to in section 854(b)(1). The capital gains dividend and the dividend received from foreign corporations are excluded from the computation.

(d) *Dividends received from a regulated investment company during taxable years of shareholders ending after July 31, 1954, and subject to the Internal Revenue Code of 1939.* For the application of section

854 to taxable years of shareholders of a regulated investment company ending after July 31, 1954, and subject to the Internal Revenue Code of 1939, see § 1.34-5 and § 1.116-2.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8756, June 20, 1967]

§ 1.854-2 Notice to shareholders.

(a) *General rule.* Section 854(b)(2) provides that the amount that a shareholder may treat as a dividend for purposes of the exclusion under section 116 for dividends received by individuals, the deduction under section 243 for dividends received by corporation, and, in the case of dividends received by individuals before January 1, 1965, the credit under section 34, shall not exceed the amount so designated by the company in a written notice to its shareholders mailed not later than 45 days (30 days for a taxable year ending before Feb. 26, 1964) after the close of the company's taxable year. If, however, the amount so designated by the company in the notice exceeds the amount which may be treated by the shareholder as a dividend for such purposes, the shareholder is limited to the amount as correctly ascertained under section 854(b)(1) and paragraph (c) of § 1.854-1.

(b) *Shareholder of record custodian of certain unit investment trusts.* In any case where a notice is mailed pursuant to paragraph (a) of this section by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970 to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851-7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 55th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the amounts that may be treated as a dividend for purposes of the exclusion under section 116 for dividends received by individuals and the deduction under section 243 for dividends received by corporations shown on the notice received by the nominee

§ 1.854-3

pursuant to paragraph (a) of this section. This notice shall include the name and address of the nominee identified as such. This paragraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where such company's return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

[T.D. 7187, 37 FR 13257, July 6, 1972]

§ 1.854-3 Definitions.

(a) For the purpose of computing the limitation prescribed by section 854(b)(1)(B) and paragraph (c) of § 1.854-1, the term "gross income" does not include gain from the sale or other disposition of stock or securities. However, capital gains arising from the sale or other disposition of capital assets, other than stock or securities, shall not be excluded from gross income for this purpose.

(b) The term "aggregate dividends received" includes only dividends re-

26 CFR Ch. I (4-1-15 Edition)

ceived from domestic corporations other than dividends described in section 116(b) (relating to dividends not eligible for exclusion from gross income). Accordingly, dividends received from foreign corporations will not be included in the computation of "aggregate dividends received". In determining the amount of any dividend for purposes of this section, the rules provided in section 116(c) (relating to certain distributions) shall apply.

§ 1.855-1 Dividends paid by regulated investment company after close of taxable year.

(a) *General rule.* In—

(1) Determining under section 852(a) and paragraph (a) of § 1.852-1 whether the deduction for dividends paid during the taxable year (without regard to capital gain dividends) by a regulated investment company equals or exceeds 90 percent of its investment company taxable income (determined without regard to the provisions of section 852(b)(2)(D)),

(2) Computing its investment company taxable income (under section 852(b)(2) and § 1.852-3), and

(3) Determining the amount of capital gain dividends (as defined in section 852(b)(3) and paragraph (c) of § 1.852-4 paid during the taxable year, any dividend (or portion thereof) declared by the investment company either before or after the close of the taxable year but in any event before the time prescribed by law for the filing of its return for the taxable year (including the period of any extension of time granted for filing such return) shall, to the extent the company so elects in such return, be treated as having been paid during such taxable year. This rule is applicable only if the entire amount of such dividend is actually distributed to the shareholders in the 12-month period following the close of such taxable year and not later than the date of the first regular dividend payment made after such declaration.

(b) *Election—(1) Method of making election.* The election must be made in the return filed by the company for the taxable year. The election shall be made by the taxpayer (the regulated investment company) by treating the dividend (or portion thereof) to which

such election applies as a dividend paid during the taxable year in computing its investment company taxable income, or if the dividend (or portion thereof) to which such election applies is to be designated by the company as a capital gain dividend, in computing the amount of capital gain dividends paid during such taxable year. The election provided in section 855(a) may be made only to the extent that the earnings and profits of the taxable year (computed with the application of section 852(c) and §1.852-5) exceed the total amount of distributions out of such earnings and profits actually made during the taxable year (not including distributions with respect to which an election has been made for a prior year under section 855(a)). The dividend or portion thereof, with respect to which the regulated investment company has made a valid election under section 855(a), shall be considered as paid out of the earnings and profits of the taxable year for which such election is made, and not out of the earnings and profits of the taxable year in which the distribution is actually made.

(2) *Irrevocability of the election.* After the expiration of the time for filing the return for the taxable year for which an election is made under section 855(a), such election shall be irrevocable with respect to the dividend or portion thereof to which it applies.

(c) *Receipt by shareholders.* Under section 855(b), the dividend or portion thereof, with respect to which a valid election has been made, will be includable in the gross income of the shareholders of the regulated investment company for the taxable year in which the dividend is received by them.

(d) *Examples.* The application of paragraphs (a), (b), and (c) of this section may be illustrated by the following examples:

Example 1. The X Company, a regulated investment company, had taxable income (and earnings or profits) for the calendar year 1954 of \$100,000. During that year the company distributed to shareholders taxable dividends aggregating \$88,000. On March 10, 1955, the company declared a dividend of \$37,000 payable to shareholders on March 20, 1955. Such dividend consisted of the first regular quarterly dividend for 1955 of \$25,000 plus an additional \$12,000 representing that part of the

taxable income for 1954 which was not distributed in 1954. On March 15, 1955, the X Company filed its federal income tax return and elected therein to treat \$12,000 of the total dividend of \$37,000 to be paid to shareholders on March 20, 1955, as having been paid during the taxable year 1954. Assuming that the X Company actually distributed the entire amount of the dividend of \$37,000 on March 20, 1955, an amount equal to \$12,000 thereof will be treated for the purposes of section 852(a) as having been paid during the taxable year 1954. Such amount (\$12,000) will be considered by the X Company as a distribution out of the earnings and profits for the taxable year 1954, and will be treated by the shareholders as a taxable dividend for the taxable year in which such distribution is received by them.

Example 2. The Y Company, a regulated investment company, had taxable income (and earnings or profits) for the calendar year 1954 of \$100,000, and for 1955 taxable income (and earnings or profits) of \$125,000. On January 1, 1954, the company had a deficit in its earnings and profits accumulated since February 28, 1913, of \$115,000. During the year 1954 the company distributed to shareholders taxable dividends aggregating \$85,000. On March 5, 1955, the company declared a dividend of \$65,000 payable to shareholders on March 31, 1955. On March 15, 1955, the Y Company filed its federal income tax return in which it included \$40,000 of the total dividend of \$65,000 payable to shareholders on March 31, 1955, as a dividend paid by it during the taxable year 1954. On March 31, 1955, the Y Company distributed the entire amount of the dividend of \$65,000 declared on March 5, 1955. The election under section 855(a) is valid only to the extent of \$15,000, the amount of the undistributed earnings and profits for 1954 (\$100,000 earnings and profits less \$85,000 distributed during 1954). The remainder (\$50,000) of the \$65,000 dividend paid on March 31, 1955, could not be the subject of an election, and such amount will be regarded as a distribution by the Y Company out of earnings and profits for the taxable year 1955. Assuming that the only other distribution by the Y Company during 1955 was a distribution of \$75,000 paid as a dividend on October 31, 1955, the total amount of the distribution of \$65,000 paid on March 31, 1955, is to be treated by the shareholders as taxable dividends for the taxable year in which such dividend is received. The Y Company will treat the amount of \$15,000 as a distribution of the earnings or profits of the company for the taxable year 1954, and the remaining \$50,000 as a distribution of the earnings or profits for the year 1955. The distribution of \$75,000 on October 31, 1955, is, of course, a taxable dividend out of the earnings and profits for the year 1955.

§ 1.856-0

(e) *Notice to shareholders.* Section 855(c) provides that in the case of dividends, with respect to which a regulated investment company has made an election under section 855(a), any notice to shareholders required under subchapter M, chapter 1 of the Code, with respect to such amounts, shall be made not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year in which the distribution is made. Thus, the notice requirements of section 852(b)(3)(C) and paragraph (c) of § 1.852-4 with respect to capital gain dividends, section 853(c) and § 1.853-3 with respect to allowance to shareholder of foreign tax credit, and section 854(b)(2) and § 1.854-2 with respect to the amount of a distribution which may be treated as a dividend, may be satisfied with respect to amounts to which section 855(a) and this section apply if the notice relating to such amounts is mailed to the shareholders not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year in which the distribution is made. If the notice under section 855(c) relates to an election with respect to any capital gain dividends, such capital gain dividends shall be aggregated by the investment company with the designated capital gain dividends actually paid during the taxable year to which the election applies (not including such dividends with respect to which an election has been made for a prior year under section 855) for the purpose of determining whether the aggregate of the designated capital gain dividends with respect to such taxable year of the company is greater than the excess of the net long-term capital gain over the net short-term capital loss of the company. See section 852(b)(3)(C) and paragraph (c) of § 1.852-4.

(f) *Foreign tax election.* Section 855(d) provides that in the case of an election made under section 853 (relating to foreign taxes), the shareholder of the investment company shall consider the foreign income received, and the foreign tax paid, as received and paid, re-

26 CFR Ch. I (4-1-15 Edition)

spectively, in the shareholder's taxable year in which distribution is made.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8757, June 20, 1967]

REAL ESTATE INVESTMENT TRUSTS

§ 1.856-0 Revenue Act of 1978 amendments not included.

The regulations under part II of subchapter M of the Code do not reflect the amendments made by the Revenue Act of 1978, other than the changes made by section 362 of the Act, relating to deficiency dividends.

[T.D. 7767, 46 FR 11265, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.856-1 Definition of real estate investment trust.

(a) *In general.* The term "real estate investment trust" means a corporation, trust, or association which (1) meets the status conditions in section 856(a) and paragraph (b) of this section, and (2) satisfies the gross income and asset diversification requirements under the limitations of section 856(c) and § 1.856-2. (See, however, paragraph (f) of this section, relating to the requirement that, for taxable years beginning before October 5, 1976, a real estate investment trust must be an unincorporated trust or unincorporated association).

(b) *Qualifying conditions.* To qualify as a "real estate investment trust", an organization must be one—

(1) Which is managed by one or more trustees or directors,

(2) The beneficial ownership of which is evidenced by transferable shares or by transferable certificates of beneficial interest,

(3) Which would be taxable as a domestic corporation but for the provisions of part II, subchapter M, chapter 1 of the Code,

(4) Which, in the case of a taxable year beginning before October 5, 1976, does not hold any property (other than foreclosure property) primarily for sale to customers in the ordinary course of its trade or business,

(5) Which is neither (i) a financial institution to which section 585, 586, or 593 applies, nor (ii) an insurance company to which subchapter L applies,

(6) The beneficial ownership of which is held by 100 or more persons, and

(7) Which would not be a personal holding company (as defined in section 542) if all of its gross income constituted personal holding company income (as defined in section 543).

(c) *Determination of status.* The conditions described in subparagraphs (1) through (5) of paragraph (b) of this section must be met during the entire taxable year and the condition described in subparagraph (6) of paragraph (b) of this section must exist during at least 335 days of a taxable year of 12 months or during a proportionate part of a taxable year of less than 12 months. The days during which the latter condition must exist need not be consecutive. In determining the minimum number of days during which the condition described in paragraph (b)(6) of this section is required to exist in a taxable year of less than 12 months, fractional days shall be disregarded. For example, in a taxable year of 310 days, the actual number of days prescribed would be $284\frac{38}{73}$ days ($\frac{310}{365}$ of 335). The fractional day is disregarded so that the required condition in such taxable year need exist for only 284 days.

(d) *Rules applicable to status requirements.* For purposes of determining whether an organization meets the conditions and requirements in section 856(a), the following rules shall apply.

(1) *Trustee.* The term “trustee” means a person who holds legal title to the property of the real estate investment trust, and has such rights and powers as will meet the requirement of “centralization of management” under paragraph (c) of §301.7701-2 of this chapter (Regulations on Procedure and Administration). Thus, the trustee

must have continuing exclusive authority over the management of the trust, the conduct of its affairs, and (except as limited by section 856(d)(3) and §1.856-4) the management and disposition of the trust property. For example, such authority will be considered to exist even though the trust instrument grants to the shareholders any or all of the following rights and powers: To elect or remove trustees; to terminate the trust; and to ratify amendments to the trust instrument proposed by the trustee. The existence of a mere fiduciary relationship does not, in itself, make one a trustee for purposes of section 856(a)(1). The trustee will be considered to hold legal title to the property of the trust, for purposes of this subparagraph, whether the title is held in the name of the trust itself, in the name of one or more of the trustees, or in the name of a nominee for the exclusive benefit of the trust.

(2) *Beneficial ownership.* Beneficial ownership shall be evidenced by transferable shares, or by transferable certificates of beneficial interest, and (subject to the provisions of paragraph (c) of this section) must be held by 100 or more persons, determined without reference to any rules of attribution. Provisions in the trust instrument or corporate charter or bylaws which permit the trustee or directors to redeem shares or to refuse to transfer shares in any case where the trustee or directors, in good faith, believe that a failure to redeem shares or that a transfer of shares would result in the loss of status as a real estate investment trust will not render the shares “non-transferable.” For purposes of the regulations under part II of subchapter M, the terms “stockholder,” “stockholders,” “shareholder,” and “shareholders” include holders of beneficial interest in a real estate investment trust, the terms “stock,” “shares,” and “shares of stock” include certificates of beneficial interest, and the term “shares” includes shares of stock.

(3) *Unincorporated organization taxable as a domestic corporation.* The determination of whether an unincorporated organization would be taxable as a domestic corporation, in the absence of the provisions of part II of subchapter

M, shall be made in accordance with the provisions of section 7701(a) (3) and (4) and the regulations thereunder and for such purposes an otherwise qualified real estate investment trust is deemed to satisfy the “objective to carry on business” requirement of paragraph (a) of §301.7701-2 of this chapter. (Regulations on Procedure and Administration).

(4) *Property held for sale to customers.* In the case of a taxable year beginning before October 5, 1976, a real estate investment trust may not hold any property (other than foreclosure property) primarily for sale to customers in the ordinary course of its trade or business. Whether property is held for sale to customers in the ordinary course of the trade or business of a real estate investment trust depends upon the facts and circumstances in each case.

(5) *Personal holding company.* A corporation, trust, or association, even though it may otherwise meet the requirements of part II of subchapter M, will not be a real estate investment trust if, by considering all of its gross income as personal holding company income under section 543, it would be a personal holding company as defined in section 542. Thus, if at any time during the last half of the trust’s taxable year more than 50 percent in value of its outstanding stock is owned (directly or indirectly under the provisions of section 544) by or for not more than 5 individuals, the stock ownership requirement in section 542(a)(2) will be met and the trust would be a personal holding company. See §1.857-8, relating to record requirements for purposes of determining whether the trust is a personal holding company.

(e) *Other rules applicable.* To the extent that other provisions of chapter 1 of the Code are not inconsistent with those under part II of subchapter M there of and the regulations thereunder, such provisions will apply with respect to both the real estate investment trust and its shareholders in the same manner that they would apply to any other organization which would be taxable as a domestic corporation. For example:

(1) Taxable income of a real estate investment trust is computed in the

same manner as that of a domestic corporation;

(2) Section 301, relating to distributions of property, applies to distributions by a real estate investment trust in the same manner as it would apply to a domestic corporation;

(3) Sections 302, 303, 304, and 331 are applicable in determining whether distributions by a real estate investment trust are to be treated as in exchange for stock;

(4) Section 305 applies to distributions by a real estate investment trust of its own stock;

(5) Section 311 applies to distributions by a real estate investment trust;

(6) Except as provided in section 857(d), earnings and profits of a real estate investment trust are computed in the same manner as in the case of a domestic corporation;

(7) Section 316, relating to the definition of a dividend, applies to distributions by a real estate investment trust; and

(8) Section 341, relating to collapsible corporations, applies to gain on the sale or exchange of, or a distribution which is in exchange for, stock in a real estate investment trust in the same manner that it would apply to a domestic corporation.

(f) *Unincorporated status required for certain taxable years.* In the case of a taxable year beginning before October 5, 1976, a real estate investment trust must be an unincorporated trust or unincorporated association. Accordingly, in applying the regulations under part II of subchapter M of the Code with respect to such a taxable year, the term “an unincorporated trust or unincorporated association” is to be substituted for the term “a corporation, trust, or association” each place it appears, and the references to “directors”

and “corporate charter or bylaws” are to be disregarded.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 6598, 27 FR 4082, Apr. 28, 1962, as amended by T.D. 6928, 32 FR 13221, Sept. 19, 1967; T.D. 7767, 46 FR 11265, Feb. 6, 1981]

§ 1.856-2 Limitations.

(a) *Effective date.* The provisions of part II, subchapter M, chapter 1 of the Code, and the regulations thereunder apply only to taxable years of a real estate investment trust beginning after December 31, 1960.

(b) *Election.* Under the provisions of section 856(c)(1), a trust, even though it satisfies the other requirements of part II of subchapter M for the taxable year, will not be considered a “real estate investment trust” for such year, within the meaning of such part II, unless it elects to be a real estate investment trust for such taxable year, or has made such an election for a previous taxable year which has not been terminated or revoked under section 856(g)(1) or (2). The election shall be made by the trust by computing taxable income as a real estate investment trust in its return for the first taxable year for which it desires the election to apply, even though it may have otherwise qualified as a real estate investment trust for a prior year. No other method of making such election is permitted. An election cannot be revoked with respect to a taxable year beginning before October 5, 1976. Thus, the failure of an organization to be a qualified real estate investment trust for a taxable year beginning before October 5, 1976, does not have the effect of revoking a prior election by the organization to be a real estate investment trust, even though the organization is not taxable under part II of subchapter M for such taxable year. See section 856(g) and § 1.856-8 for rules under which an elec-

tion may be revoked with respect to taxable years beginning after October 4, 1976.

(c) *Gross income requirements.* Section 856(c) (2), (3), and (4), provides that a corporation, trust, or association is not a “real estate investment trust” for a taxable year unless it meets certain requirements with respect to the sources of its gross income for the taxable year. In determining whether the gross income of a real estate investment trust satisfies the percentage requirements of section 856(c) (2), (3), and (4), the following rules shall apply:

(1) *Gross income.* For purposes of both the numerator and denominator in the computation of the specified percentages, the term “gross income” has the same meaning as that term has under section 61 and the regulations thereunder. Thus, in determining the gross income requirements under section 856(c) (2), (3), and (4), a loss from the sale or other disposition of stock, securities, real property, etc. does not enter into the computation.

(2) *Lapse of options.* Under section 856(c)(6)(C), the term “interests in real property” includes options to acquire land or improvements thereon, and options to acquire leaseholds of land and improvements thereon. However, where a corporation, trust, or association writes an option giving the holder the right to acquire land or improvements thereon, or writes an option giving the holder the right to acquire a leasehold of land or improvements thereon, any income that the corporation, trust, or association recognizes because the option expires unexercised is not considered to be gain from the sale or other disposition of real property (including interests in real property) for purposes of section 856(c) (2)(D) and (3)(C). The rule in the preceding sentence also applies for purposes of section 856(c)(4)(C) in determining gain from the sale or other disposition of real property for the 30-percent-of-gross-income limitation.

(3) *Commitment fees.* For purposes of section 856(c) (2)(G) and (3)(G), if consideration is received or accrued for an agreement to make a loan secured by a mortgage covering both real property and other property, or for an agreement to purchase or lease both real

property and other property, an apportionment of the consideration is required. The apportionment of consideration received or accrued for an agreement to make a loan secured by a mortgage covering both real property and other property shall be made under the principles of § 1.856-5(c), relating to the apportionment of interest income.

(4) *Holding period of property.* For purposes of the 30-percent limitation of section 856(c)(4), the determination of the period for which property described in such section has been held is governed by the provisions of section 1223 and the regulations thereunder.

(5) *Rents from real property and interest.* See §§ 1.856-4 and 1.856-5 for rules relating to rents from real property and interest.

(d) *Diversification of investment requirements—(1) 75-percent test.* Section 856(c)(5)(A) requires that at the close of each quarter of the taxable year at least 75 percent of the value of the total assets of the trust be represented by one or more of the following:

- (i) Real estate assets;
- (ii) Government securities; and
- (iii) Cash and cash items (including receivables).

For purposes of this subparagraph the term “receivables” means only those receivables which arise in the ordinary course of the trust’s operation and does not include receivables purchased from another person. Subject to the limitations in section 856(c)(5)(B) and subparagraph (2) of this paragraph, the character of the remaining 25 percent (or less) of the value of the total assets is not restricted.

(2) *Limitations on certain securities.* Under section 856(c)(5)(B), not more than 25 percent of the value of the total assets of the trust may be represented by securities other than those described in section 856(c)(5)(A). The ownership of securities under the 25-percent limitation in section 856(c)(5)(B) is further limited in respect of any one issuer to an amount not greater in value than 5 percent of the value of the total assets of the trust and to not more than 10 percent of the outstanding voting securities of such issuer. Thus, if the real estate investment trust meets the 75-percent asset diversification requirement in section

856(c)(5)(A), it will also meet the first test under section 856(c)(5)(B) since it will, of necessity, have not more than 25 percent of its total assets represented by securities other than those described in section 856(c)(5)(A). However, the trust must also meet two additional tests under section 856(c)(5)(B), i.e. it cannot own the securities of any one issuer in an amount (i) greater in value than 5 percent of the value of the trust’s total assets, or (ii) representing more than 10 percent of the outstanding voting securities of such issuer.

(3) *Determination of investment status.* The term “total assets” means the gross assets of the trust determined in accordance with generally accepted accounting principles. In order to determine the effect, if any, which an acquisition of any security or other property may have with respect to the status of a trust as a real estate investment trust, section 856(c)(5) requires a revaluation of the trust’s assets at the end of the quarter in which such acquisition was made. A revaluation of assets is not required at the end of any quarter during which there has been no acquisition of a security or other property since the mere change in market value of property held by the trust does not, of itself, affect the status of the trust as a real estate investment trust. A change in the nature of “cash items”, for example, the prepayment of insurance or taxes, does not constitute the acquisition of “other property” for purposes of this subparagraph. A real estate investment trust shall keep sufficient records as to investments so as to be able to show that it has complied with the provisions of section 856(c)(5) during the taxable year. Such records shall be kept at all times available for inspection by any internal revenue officer or employee and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(4) *Illustrations.* The application of section 856(c)(5) and this paragraph may be illustrated by the following examples:

Example 1. Real Estate Investment Trust M, at the close of the first quarter of its taxable year, has its assets invested as follows:

Internal Revenue Service, Treasury

§ 1.856-2

	<i>Percent</i>
Cash	6
Government securities	7
Real estate assets	63
Securities of various corporations (not exceeding, with respect to any one issuer, 5 percent of the value of the total assets of the trust nor 10 percent of the outstanding voting securities of such issuer)	24
Total	100

Trust M meets the requirements of section 856(c)(5) for that quarter of its taxable year.

Example 2. Real Estate Investment Trust P, at the close of the first quarter of its taxable year, has its assets invested as follows:

	<i>Percent</i>
Cash	6
Government securities	7
Real estate assets	63
Securities of Corporation Z	20
Securities of Corporation X	4
Total	100

Trust P meets the requirement of section 856(c)(5)(A) since at least 75 percent of the value of the total assets is represented by cash, Government securities, and real estate assets. However, Trust P does not meet the diversification requirements of section 856(c)(5)(B) because its investment in the voting securities of Corporation Z exceeds 5 percent of the value of the trust's total assets.

Example 3. Real Estate Investment Trust G, at the close of the first quarter of its taxable year, has its assets invested as follows:

	<i>Percent</i>
Cash	4
Government securities	9
Real estate assets	70
Securities of Corporation S	5
Securities of Corporation L	4
Securities of Corporation U	4
Securities of Corporation M (which equals 25 percent of Corporation M's outstanding voting securities)	4
Total	100

Trust G meets the 75-percent requirement of section 856(c)(5)(A), but does not meet the requirements of section 856(c)(5)(B) because its investment in the voting securities of Corporation M exceeds 10 percent of Corporation M's outstanding voting securities.

Example 4. Real Estate Investment Trust R, at the close of the first quarter of its taxable year (i.e. calendar year), is a qualified real estate investment trust and has its assets invested as follows:

Cash	\$5,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities of Corporation P	4,000

Securities of Corporation O	5,000
Securities of Corporation U	5,000
Securities of Corporation T	5,000
Total assets	100,000

During the second calendar quarter the stock in Corporation P increases in value to \$50,000 while the value of the remaining assets has not changed. If Real Estate Investment Trust R has made no acquisition of stock or other property during such second quarter it will not lose its status as a real estate investment trust merely by reason of the appreciation in the value of P's stock. If, during the third quarter, Trust R acquires stock of Corporation S worth \$2,000, such acquisition will necessitate a revaluation of all of the assets of Trust R as follows:

Cash	\$3,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities in Corporation P	50,000
Securities in Corporation O	5,000
Securities in Corporation U	5,000
Securities in Corporation T	5,000
Securities in Corporation S	2,000
Total assets	146,000

Because of the discrepancy between the value of its various investments and the 25-percent limitation in section 856(c)(5), resulting in part from the acquisition of the stock of Corporation S, Trust R, at the end of the third quarter, loses its status as a real estate investment trust. However, if Trust R, within 30 days after the close of such quarter, eliminates the discrepancy so that it meets the 25-percent limitation, the trust will be considered to have met the requirements of section 856(c)(5) at the close of the third quarter, even though the discrepancy between the value of its investment in Corporation P and the 5-percent limitation in section 856(c)(5) (resulting solely from appreciation) may still exist. If instead of acquiring stock of Corporation S, Trust R had acquired additional stock of Corporation P, then because of the discrepancy between the value of its investments and both the 5-percent and the 25-percent limitations in section 856(c)(5) resulting in part from this acquisition, trust R, at the end of the third quarter, would lose its status as a real estate investment trust, unless within 30 days after the close of such quarter both of the discrepancies are eliminated.

Example 5. If, in the previous example, the stock of Corporation P appreciates only to \$10,000 during the second quarter and, in the third quarter, Trust R acquires stock of Corporation S worth \$1,000, the assets as of the end of the third quarter would be as follows:

Cash	\$4,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities in Corporation P	10,000

§ 1.856-3

26 CFR Ch. I (4-1-15 Edition)

Securities in Corporation O	5,000
Securities in Corporation U	5,000
Securities in Corporation T	5,000
Securities in Corporation S	1,000
<hr/>	<hr/>
Total assets	106,000

Because the discrepancy between the value of its investment in Corporation P and the 6-percent limitation in section 856(c)(5) results solely from appreciation, and because there is no discrepancy between the value of its various investments and the 25-percent limitation, Trust R, at the end of the third quarter, does not lose its status as a real estate investment trust. If, instead of acquiring stock of Corporation S, Trust R had acquired additional stock of Corporation P worth \$1,000, then, because of the discrepancy between the value of its investment in Corporation P and the 5-percent limitation resulting in part from this acquisition, Trust R, at the end of the third quarter, would lose its status as a real estate investment trust, unless within 30 days after the close of such quarter this discrepancy is eliminated.

[T.D. 6598, 27 FR 4083, Apr. 28, 1962 as amended by T.D. 7767, 46 FR 11265, Feb. 6, 1981]

§ 1.856-3 Definitions.

For purposes of the regulations under part II, subchapter M, chapter 1 of the Code, the following definitions shall apply.

(a) *Value.* The term “value” means, with respect to securities for which market quotations are readily available, the market value of such securities; and with respect to other securities and assets, fair value as determined in good faith by the trustees of the real estate investment trust. In the case of securities of other qualified real estate investment trusts, fair value shall not exceed market value or asset value, whichever is higher.

(b) *Real estate assets—(1) In general.* The term “real estate assets” means real property, interests in mortgages on real property (including interests in mortgages on leaseholds of land or im-

provements thereon), and shares in other qualified real estate investment trusts. The term “mortgages on real property” includes deeds of trust on real property.

(2) *Treatment of REMIC interests as real estate assets—(i) In general.* If, for any calendar quarter, at least 95 percent of a REMIC’s assets (as determined in accordance with §1.860F-4(e)(1)(ii) or §1.6049-7(f)(3)) are real estate assets (as defined in paragraph (b)(1) of this section), then, for that calendar quarter, all the regular and residual interests in that REMIC are treated as real estate assets and, except as provided in paragraph (b)(2)(iii) of this section, any amount includible in gross income with respect to those interests is treated as interest on obligations secured by mortgages on real property. If less than 95 percent of a REMIC’s assets are real estate assets, then the real estate investment trust is treated as holding directly its proportionate share of the assets and as receiving directly its proportionate share of the income of the REMIC. See §§1.860F-4(e)(1)(ii)(B) and 1.6049-7(f)(3) for information required to be provided to regular and residual interest holders if the 95-percent test is not met.

(ii) *Treatment of REMIC assets for section 856 purposes—(A) Manufactured housing treated as real estate asset.* For purposes of paragraphs (b) (1) and (2) of this section, the term “real estate asset” includes manufactured housing treated as a single family residence under section 25(e)(10).

(B) *Status of cash flow investments.* For purposes of this paragraph (b)(2), cash flow investments (as defined in section 860G(a)(6) and §1.860G-2(g)(1)) are real estate assets.

(iii) *Certain contingent interest payment obligations held by a REIT.* If a REIT holds a residual interest in a REMIC for a principal purpose of avoiding the limitation set out in section 856(f) (concerning interest based on mortgagor net profits) or section 856(j) (concerning shared appreciation provisions), then, even if the REMIC satisfies the 95-percent test of paragraph (b)(i) of this section, the REIT is treated as receiving directly the REMIC’s items of income for purposes of section 856.

(c) *Interests in real property.* The term “interests in real property” includes fee ownership and co-ownership of land or improvements thereon, leaseholds of land or improvements thereon, options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon. The term also includes timeshare interests that represent an undivided fractional fee interest, or undivided leasehold interest, in real property, and that entitle the holders of the interests to the use and enjoyment of the property for a specified period of time each year. The term also includes stock held by a person as a tenant-stockholder in a cooperative housing corporation (as those terms are defined in section 216). Such term does not, however, include mineral, oil, or gas royalty interests, such as a retained economic interest in coal or iron ore with respect to which the special provisions of section 631(c) apply.

(d) *Real property.* The term “real property” means land or improvements thereon, such as buildings or other inherently permanent structures thereon (including items which are structural components of such buildings or structures). In addition, the term “real property” includes interests in real property. Local law definitions will not be controlling for purposes of determining the meaning of the term “real property” as used in section 856 and the regulations thereunder. The term includes, for example, the wiring in a building, plumbing systems, central heating, or central air-conditioning machinery, pipes or ducts, elevators or escalators installed in the building, or other items which are structural components of a building or other permanent structure. The term does not include assets accessory to the operation of a business, such as machinery, printing press, transportation equipment which is not a structural component of the building, office equipment, refrigerators, individual air-conditioning units, grocery counters, furnishings of a motel, hotel, or office building, etc., even though such items may be termed fixtures under local law.

(e) *Securities.* The term “securities” does not include “interests in real property” or “real estate assets” as

those terms are defined in section 856 and this section.

(f) *Qualified real estate investment trusts.* The term “qualified real estate investment trust” means a real estate investment trust within the meaning of part II of subchapter M which is taxable under such part as a real estate investment trust. For purposes of the 75-percent requirement in section 856(c)(5)(A), the trust whose stock has been included by another trust as “real estate assets” must be a “qualified real estate investment trust” for its full taxable year in which falls the close of each quarter of the trust’s taxable year for which the computation is made. For example, Real Estate Investment Trust Z for its taxable year ending December 31, 1963, holds as “real estate assets” stock in Real Estate Investment Trust Y, which is also on a calendar year. If Trust Y is not a qualified real estate investment trust for its full taxable year ending December 31, 1963, Trust Z may not include the stock of Trust Y as “real estate assets” in computing the 75-percent requirement as of the close of any quarter of its taxable year ending December 31, 1963.

(g) *Partnership interest.* In the case of a real estate investment trust which is a partner in a partnership, as defined in section 7701(a)(2) and the regulations thereunder, the trust will be deemed to own its proportionate share of each of the assets of the partnership and will be deemed to be entitled to the income of the partnership attributable to such share. For purposes of section 856, the interest of a partner in the partnership’s assets shall be determined in accordance with his capital interest in the partnership. The character of the various assets in the hands of the partnership and items of gross income of the partnership shall retain the same character in the hands of the partners for all purposes of section 856. Thus, for example, if the trust owns a 30-percent capital interest in a partnership which owns a piece of rental property the trust will be treated as owning 30 percent of such property and as being entitled to 30 percent of the rent derived from the property by the partnership. Similarly, if the partnership holds any property primarily for sale to customers in the ordinary course of

§ 1.856-4

26 CFR Ch. I (4-1-15 Edition)

its trade or business, the trust will be treated as holding its proportionate share of such property primarily for such purpose. Also, for example, where a partnership sells real property or a trust sells its interest in a partnership which owns real property, any gross income realized from such sale, to the extent that it is attributable to the real property, shall be deemed gross income from the sale or disposition of real property held for either the period that the partnership has held the real property of the period that the trust was a member of the partnership, whichever is the shorter.

(h) *Net capital gain.* The term “net capital gain” means the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for the taxable year.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 6598, 27 FR 4084, Apr. 28, 1962, as amended by T.D. 6841, 30 FR 9308, July 27, 1965; T.D. 7767, 46 FR 11266, Feb. 6, 1981; T.D. 8458, 57 FR 61298, Dec. 24, 1992]

§ 1.856-4 Rents from real property.

(a) *In general.* Subject to the exceptions of section 856(d) and paragraph (b) of this section, the term “rents from real property” means, generally, the gross amounts received for the use of, or the right to use, real property of the real estate investment trust.

(b) *Amounts specifically included or excluded—(1) Charges for customary services.* For taxable years beginning after October 4, 1976, the term “rents from real property”, for purposes of paragraphs (2) and (3) of section 856(c), includes charges for services customarily furnished or rendered in connection with the rental of real property, whether or not the charges are separately stated. Services furnished to the tenants of a particular building will be considered as customary if, in the geo-

graphic market in which the building is located, tenants in buildings which are of a similar class (such as luxury apartment buildings) are customarily provided with the service. The furnishing of water, heat, light, and air-conditioning, the cleaning of windows, public entrances, exits, and lobbies, the performance of general maintenance and of janitorial and cleaning services, the collection of trash, and the furnishing of elevator services, telephone answering services, incidental storage space, laundry equipment, watchman or guard services, parking facilities, and swimming pool facilities are examples of services which are customarily furnished to the tenants of a particular class of buildings in many geographic marketing areas. Where it is customary, in a particular geographic marketing area, to furnish electricity or other utilities to tenants in buildings of a particular class, the submetering of such utilities to tenants in such buildings will be considered a customary service. To qualify as a service customarily furnished, the service must be furnished or rendered to the tenants of the real estate investment trust or, primarily for the convenience or benefit of the tenant, to the guests, customers, or subtenants of the tenant. The service must be furnished through an independent contractor from whom the trust does not derive or receive any income. See paragraph (b)(5) of this section. For taxable years beginning before October 5, 1976, the rules in paragraph (b)(3) of 26 CFR 1.856-4 (revised as of April 1, 1977), relating to the furnishing of services, shall continue to apply.

(2) *Amounts received with respect to certain personal property—(i) In general.* In the case of taxable years beginning after October 4, 1976, rent attributable to personal property that is leased under, or in connection with, the lease of real property is treated under section 856(d)(1)(C) as “rents from real property” (and thus qualified for purposes of the income source requirements) if the rent attributable to the personal property is not more than 15 percent of the total rent received or accrued under the lease for the taxable year. If, however, the rent attributable to personal property is greater than 15

percent of the total rent received or accrued under the lease for the taxable year, then the portion of the rent from the lease that is attributable to personal property will not qualify as "rents from real property".

(ii) *Application.* In general, the 15-percent test in section 856(d)(1)(C) is applied separately to each lease of real property. However, where the real estate investment trust rents all (or a portion of all) the units in a multiple unit project under substantially similar leases (such as the leasing of apartments in an apartment building or complex to individual tenants), the 15-percent test may be applied with respect to the aggregate rent received or accrued for the taxable year under the similar leases of the property, by using the average of the trust's aggregate adjusted bases of all of the personal property subject to such leases, and the average of the trust's aggregate adjusted bases of all real and personal property subject to such leases. A lease of a furnished apartment is not considered to be substantially similar to a lease of an unfurnished apartment (including an apartment where the trust provides only personal property, such as major appliances, that is commonly provided by a landlord in connection with the rental of unfurnished living quarters).

(iii) *Taxable years beginning before October 5, 1976.* In the case of taxable years beginning before October 5, 1976, any amount of rent that is attributable to personal property does not qualify as rent from real property.

(3) *Disqualification of rent which depends on income or profits of any person.* Except as provided in paragraph (b)(6)(ii) of this section, no amount received or accrued, directly or indirectly, with respect to any real property (or personal property leased under, or in connection with, real property) qualifies as "rents from real property" where the determination of the amount depends in whole or in part on the income or profits derived by any person from the property. However, any amount so accrued or received shall not be excluded from the term "rents from real property" solely by reason of being based on a fixed percentage or percentages of receipts or sales (whether or not receipts or sales

are adjusted for returned merchandise, or Federal, State, or local sales taxes). Thus, for example, "rents from real property" would include rents where the lease provides for differing percentages or receipts or sales from different departments or from separate floors of a retail store so long as each percentage is fixed at the time of entering into the lease and a change in such percentage is not renegotiated during the term of the lease (including any renewal periods of the lease, in a manner which has the effect of basing the rent on income or profits. See paragraph (b)(6) of this section for rules relating to certain amounts received or accrued by a trust which are considered to be based on the income or profits of a sublessee of the prime tenant. The amount received or accrued as rent for the taxable year which is based on a fixed percentage or percentages of the lessee's receipts or sales reduced by escalation receipts (including those determined under a formula clause) will qualify as "rents from real property". Escalation receipts include amounts received by a prime tenant from subtenants by reason of an agreement that rent shall be increased to reflect all or a portion of an increase in real estate taxes, property insurance, operating costs of the prime tenant, or similar items customarily included in lease escalation clauses. Where in accordance with the terms of an agreement an amount received or accrued as rent for the taxable year includes both a fixed rental and a percentage of all or a portion of the lessee's income or profits, neither the fixed rental nor the additional amount will qualify as "rents from real property". However, where the amount received or accrued for the taxable year under such an agreement includes only the fixed rental, the determination of which does not depend in whole or in part on the income or profits derived by the lessee, such amount may qualify as "rents from real property". An amount received or accrued as rent for the taxable year which consists, in whole or in part, of one or more percentages of the lessee's receipts or sales in excess of determinable dollar amounts may qualify as "rents from real property", but only if two conditions exist. First, the determinable

amounts must not depend in whole or in part on the income or profits of the lessee. Second, the percentages and, in the case of leases entered into after July 7, 1978, the determinable amounts, must be fixed at the time the lease is entered into and a change in percentages and determinable amounts is not renegotiated during the term of the lease (including any renewal periods of the lease) in a manner which has the effect of basing rent on income or profits. In any event, an amount will not qualify as "rents from real property" if, considering the lease and all the surrounding circumstances, the arrangement does not conform with normal business practice but is in reality used as a means of basing the rent on income or profits. The provisions of this subparagraph may be illustrated by the following example:

Example. A real estate investment trust owns land underlying an office building. On January 1, 1975, the trust leases the land for 50 years to a prime tenant for an annual rental of \$100x plus 20 percent of the prime tenant's annual gross receipts from the office building in excess of a fixed base amount of \$5,000x and 10 percent of such gross receipts in excess of \$10,000x. For this purpose the lease defines gross receipts as all amounts received by the prime tenant from occupancy tenants pursuant to leases of space in the office building reduced by the amount by which real estate taxes, property insurance, and operating costs related to the office building for a particular year exceed the amount of such items for 1974. The exclusion from gross receipts of increases since 1974 in real estate taxes, property insurance, and other expenses relating to the office building reflects the fact that the prime tenant passes on to occupancy tenants by way of a customary lease escalation provision the risk that such expenses might increase during the term of an occupancy lease. The exclusion from gross receipts of these expense escalation items will not cause the rental received by the real estate investment trust from the prime tenant to fail to qualify as "rents from real property" for purposes of section 856(c).

(4) *Disqualification of amounts received from persons owned in whole or in part by the trust.* "Rents from real property" does not include any amount received or accrued, directly or indirectly, from any person in which the real estate investment trust owns, at any time during the taxable year, the specified percentage or number of shares of stock

(or interest in the assets or net profits) of that person. Any amount received from such person will not qualify as "rents from real property" if such person is a corporation and the trust owns 10 percent or more of the total combined voting power of all classes of its stock entitled to vote or 10 percent or more of the total number of shares of all classes of its outstanding stock, or if such person is not a corporation and the trust owns a 10-percent-or-more interest in its assets or net profits. For example, a trust leases an office building to a tenant for which it receives rent of \$100,000 for the taxable year 1962. The lessee of the building subleases space to various subtenants for which it receives gross rent of \$500,000 for the year 1962. The trust owns 15 percent of the total assets of an unincorporated subtenant. The rent paid by this subtenant for the taxable year is \$50,000. Therefore, \$10,000 ($50,000/500,000 \times \$100,000$) of the rent paid to the trust does not qualify as "rents from real property". Where the real estate investment trust receives, directly or indirectly, any amount of rent from any person in which it owns any proprietary interest, the trust shall submit, at the time it files its return for the taxable year (or before June 1, 1962, whichever is later), a schedule setting forth—

(i) The name and address of such person and the amount received as rent from such person; and

(ii) If such person is a corporation, the highest percentage of the total combined voting power of all classes of its stock entitled to vote, and the highest percentage of the total number of shares of all classes of its outstanding stock, owned by the trust at any time during the trust's taxable year; or

(iii) If such person is not a corporation, the highest percentage of the trust's interest in the assets or net profits of such person, owned by the trust at any time during its taxable year.

(5) *Furnishing of services or management of property must be through an independent contractor—(i) In general.* No amount received or accrued, directly or indirectly, with respect to any real property (or any personal property leased under, or in connection

with, the real property) qualifies as “rents from real property” if the real estate investment trust furnishes or renders services to the tenants of the property or manages or operates the property, other than through an independent contractor from whom the trust itself does not derive or receive any income. The prohibition against the trust deriving or receiving any income from the independent contractor applies regardless of the source from which the income was derived by the independent contractor. Thus, for example, the trust may not receive any dividends from the independent contractor. The requirement that the trust not receive any income from an independent contractor requires that the relationship between the two be an arm’s-length relationship. The independent contractor must be adequately compensated for any services which are performed for the trust. Compensation to an independent contractor determined by reference to an unadjusted percentage of gross rents will generally be considered to be adequate where the percentage is reasonable taking into account the going rate of compensation for managing similar property in the same locality, the services rendered, and other relevant factors. The independent contractor must not be an employee of the trust (*i.e.*, the manner in which he carries out his duties as independent contractor must not be subject to the control of the trust). Although the cost of services which are customarily rendered or furnished in connection with the rental of real property may be borne by the trust, the services must be furnished or rendered through an independent contractor. Furthermore, the facilities through which the services are furnished must be maintained and operated by an independent contractor. For example, if a heating plant is located in the building, it must be maintained and operated by an independent contractor. To the extent that services (other than those customarily furnished or rendered in connection with the rental of real property) are rendered to the tenants of the property by the independent contractor, the cost of the services must be borne by the independent contractor, a separate charge must be made for the services,

the amount of the separate charge must be received and retained by the independent contractor, and the independent contractor must be adequately compensated for the services.

(ii) *Trustee or director functions.* The trustees or directors of the real estate investment trust are not required to delegate or contract out their fiduciary duty to manage the trust itself, as distinguished from rendering or furnishing services to the tenants of its property or managing or operating the property. Thus, the trustees or directors may do all those things necessary, in their fiduciary capacities, to manage and conduct the affairs of the trust itself. For example, the trustees or directors may establish rental terms, choose tenants, enter into and renew leases, and deal with taxes, interest, and insurance, relating to the trust’s property. The trustees or directors may also make capital expenditures with respect to the trust’s property (as defined in section 263) and may make decisions as to repairs of the trust’s property (of the type which would be deductible under section 162), the cost of which may be borne by the trust.

(iii) *Independent contractor defined.* The term “independent contractor” means—

(a) A person who does not own, directly or indirectly, at any time during the trust’s taxable year more than 35 percent of the shares in the real estate investment trust, or

(b) A person—

(1) If a corporation, not more than 35 percent of the total combined voting power of whose stock (or 35 percent of the total shares of all classes of whose stock), or

(2) If not a corporation, not more than 35 percent of the interest in whose assets or net profits is owned, directly or indirectly, at any time during the trust’s taxable year by one or more persons owning at any time during such taxable year 35 percent or more of the shares in the trust.

(iv) *Information required.* The real estate investment trust shall submit with its return for the taxable year (or before June 1, 1962, whichever is later) a statement setting forth the name and address of each independent contractor; and

(a) The highest percentage of the outstanding shares in the trust owned at any time during its taxable year by such independent contractor and by any person owning at any time during such taxable year any shares of stock or interest in the independent contractor.

(b) If the independent contractor is a corporation such statement shall set forth the highest percentage of the total combined voting power of its stock and the highest percentage of the total number of shares of all classes of its stock owned at any time during its taxable year by any person owning shares in the trust at any time during such taxable year.

(c) If the independent contractor is not a corporation such statement shall set forth the highest percentage of any interest in its assets or net profits owned at any time during its taxable year by any person owning shares in the trust at any time during such taxable year.

(6) *Amounts based on income or profits of subtenants.* (i) Except as provided in paragraph (b)(6)(ii) of this section, if a trust leases real property to a tenant under terms other than solely on a fixed sum rental (for example, a percentage of the tenant's gross receipts), and the tenant subleases all or a part of such property under an agreement which provides for a rental based in whole or in part on the income or profits of the sublessee, the entire amount of the rent received by the trust from the prime tenant with respect to such property is disqualified as "rents from real property".

(ii) *Exception.* For taxable years beginning after October 4, 1976, section 856(d)(4) provides an exception to the general rule that amounts received or accrued, directly or indirectly, by a real estate investment trust do not qualify as rents from real property if the determination of the amount depends in whole or in part on the income or profits derived by any person from the property. This exception applies where the trust rents property to a tenant (the prime tenant) for a rental which is based, in whole or in part, on a fixed percentage or percentages of the receipts or sales of the prime tenant, and the rent which the trust re-

ceives or accrues from the prime tenant pursuant to the lease would not qualify as "rents from real property" solely because the prime tenant receives or accrues from subtenants (including concessionaires) rents or other amounts based on the income or profits derived by a person from the property. Under the exception, only a proportionate part of the rent received or accrued by the trust does not qualify as "rents from real property". The proportionate part of the rent received or accrued by the trust which is non-qualified is the lesser of the following two amounts:

(A) The rent received or accrued by the trust from the prime tenant pursuant to the lease, that is based on a fixed percentage or percentages of receipts or sales, or

(B) The product determined by multiplying the total rent which the trust receives or accrues from the prime tenant pursuant to the lease by a fraction, the numerator of which is the rent or other amount received by the prime tenant that is based, in whole or in part, on the income or profits derived by any person from the property, and the denominator of which is the total rent or other amount received by the prime tenant from the property. For example, assume that a real estate investment trust owns land underlying a shopping center. The trust rents the land to the owner of the shopping center for an annual rent of \$10x plus 2 percent of the gross receipts which the prime tenant receives from subtenants who lease space in the shopping center. Assume further that, for the year in question, the prime tenant derives total rent from the shopping center of \$100x and, of that amount, \$25x is received from subtenants whose rent is based, in whole or in part, on the income or profits derived from the property. Accordingly, the trust will receive a total rent of \$12x, of which \$2x is based on a percentage of the gross receipts of the prime tenant. The portion of the rent which is disqualified is the lesser of \$2x (the rent received by the trust which is based on a percentage of gross receipts), or \$3x, (\$12x multiplied by \$25x/\$100x). Accordingly, \$10x

of the rent received by the trust qualifies as “rents from real property” and §2x does not qualify.

(7) *Attribution rules.* Paragraphs (2) and (3) of section 856(d) relate to direct or indirect ownership of stock, assets, or net profits by the persons described therein. For purposes of determining such direct or indirect ownership, the rules prescribed by section 318(a) (for determining the ownership of stock) shall apply except that “10 percent” shall be substituted for “50 percent” in section 318(a) (2)(C) and (3)(C).

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4085, Apr. 28, 1962, as amended by T.D. 6969, 33 FR 12000, Aug. 23, 1968; T.D. 7767, 46 FR 11266, Feb. 6, 1981]

§ 1.856-5 Interest.

(a) *In general.* In computing the percentage requirements in section 856(c) (2)(B) and (3)(B), the term “interest” includes only an amount which constitutes compensation for the use or forbearance of money. For example, a fee received or accrued by a lender which is in fact a charge for services performed for a borrower rather than a charge for the use of borrowed money is not includable as interest.

(b) *Where amount depends on income or profits of any person.* Except as provided in paragraph (d) of this section, any amount received or accrued, directly or indirectly, with respect to an obligation is not includable as interest for purposes of section 856(c) (2)(B) and (3)(B) if, under the principles set forth in paragraphs (b)(3) and (6)(i) of §1.856-4, the determination of the amount depends in whole or in part on the income or profits of any person (whether or not derived from property secured by the obligation). Thus, for example, if in accordance with a loan agreement an amount is received or accrued by the trust with respect to an obligation

which includes both a fixed amount of interest and a percentage of the borrower’s income or profits, neither the fixed interest nor the amount based upon the percentage will qualify as interest for purposes of section 856(c) (2)(B) and (3)(B). This paragraph and paragraph (d) of this section apply only to amounts received or accrued in taxable years beginning after October 4, 1976, pursuant to loans made after May 27, 1976. For purposes of the preceding sentence, a loan is considered to be made before May 28, 1976, if it is made pursuant to a binding commitment entered into before May 28, 1976.

(c) *Apportionment of interest*—(1) *In general.* Where a mortgage covers both real property and other property, an apportionment of the interest income must be made for purposes of the 75-percent requirement of section 856(c)(3). For purposes of the 75-percent requirement, the apportionment shall be made as follows:

(i) If the loan value of the real property is equal to or exceeds the amount of the loan, then the entire interest income shall be apportioned to the real property.

(ii) If the amount of the loan exceeds the loan value of the real property, then the interest income apportioned to the real property is an amount equal to the interest income multiplied by a fraction, the numerator of which is the loan value of the real property, and the denominator of which is the amount of the loan. The interest income apportioned to the other property is an amount equal to the excess of the total interest income over the interest income apportioned to the real property.

(2) *Loan value.* For purposes of this paragraph, the loan value of the real property is the fair market value of the property, determined as of the date on which the commitment by the trust to make the loan becomes binding on the trust. In the case of a loan purchased by the trust, the loan value of the real property is the fair market value of the property, determined as of the date on which the commitment by the trust to purchase the loan becomes binding on the trust. However, in the case of a construction loan or other loan made for purposes of improving or developing real property, the loan value of the real

property is the fair market value of the land plus the reasonably estimated cost of the improvements or developments (other than personal property) which will secure the loan and which are to be constructed from the proceeds of the loan. The fair market value of the land and the reasonably estimated cost of improvements or developments shall be determined as of the date on which a commitment to make the loan becomes binding on the trust. If the trust does not make the construction loan but commits itself to provide long-term financing following completion of construction, the loan value of the real property is determined by using the principles for determining the loan value for a construction loan. Moreover, if the mortgage on the real property is given as additional security (or as a substitute for other security) for the loan after the trust's commitment is binding, the real property loan value is its fair market value when it becomes security for the loan (or, if earlier, when the borrower makes a binding commitment to add or substitute the property as security).

(3) *Amount of loan.* For purposes of this paragraph, the amount of the loan means the highest principal amount of the loan outstanding during the taxable year.

(d) *Exception.* Section 856(f)(2) provides an exception to the general rule that amounts received, directly or indirectly, with respect to an obligation do not qualify as "interest" where the determination of the amounts depends in whole or in part on the income or profits of any person. The exception applies where the trust receives or accrues, with respect to the obligation of its debtor, an amount that is based in whole or in part on a fixed percentage or percentages of receipts or sales of the debtor, and the amount would not qualify as interest solely because the debtor has receipts or sale proceeds that are based on the income or profits of any person. Under this exception only a proportionate part of the amount received or accrued by the trust fails to qualify as interest for purposes of the percentage-of-income requirements of section 856(c) (2) and (3). The proportionate part of the amount received or accrued by the

trust that is non-qualified is the lesser of the following two amounts:

(1) The amount received or accrued by the trust from the debtor with respect to the obligation that is based on a fixed percentage or percentages of receipts or sales, or

(2) The product determined by multiplying by a fraction the total amount received or accrued by the trust from the debtor with respect to the obligation. The numerator of the fraction is the amount of receipts or sales of the debtor that is based, in whole or in part, on the income or profits of any person and the denominator is the total amount of the receipts or sales of the debtor. For purposes of the preceding sentence, the only receipts or sales to be taken into account are those taken into account in determining the payment to the trust pursuant to the loan agreement.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 7767, 46 FR 11268, Feb. 6, 1981]

§ 1.856-6 Foreclosure property.

(a) *In general.* Under section 856(e) a real estate investment trust may make an irrevocable election to treat as "foreclosure property" certain real property (including interests in real property), and any personal property incident to the real property, acquired by the trust after December 31, 1973. This section prescribes rules relating to the election, including rules relating to property eligible for the election. This section also prescribes rules relating to extensions of the general two-year period (hereinafter the "grace period") during which property retains its status as foreclosure property, as well as rules relating to early termination of the grace period under section 856(e)(4). The election to treat property as foreclosure property does not alter the character of the income

derived therefrom (other than for purposes of section 856(c)(2)(F) and (3)(F)). For example, if foreclosure property is sold, the determination of whether it is property described in section 1221(1) will not be affected by the fact that it is foreclosure property.

(b) *Property eligible for the election*—(1) *Rules relating to acquisitions.* In general, the trust must acquire the property after December 31, 1973, as the result of having bid in the property at foreclosure, or having otherwise reduced the property to ownership or possession by agreement or process of law, after there was default (or default was imminent) on a lease of the property (where the trust was the lessor) or on an indebtedness owed to the trust which the property secured. Foreclosure property which secured an indebtedness owed to the trust is acquired for purposes of section 856(e) on the date on which the trust acquires ownership of the property for Federal income tax purposes. Foreclosure property which a trust owned and leased to another is acquired for purposes of section 856(e) on the date on which the trust acquires possession of the property from its lessee. A trust will not be considered to have acquired ownership of property for purposes of section 856(e) where it takes control of the property as a mortgagee-in-possession and cannot receive any profit or sustain any loss with respect to the property except as a creditor of the mortgagor. A trust may be considered to have acquired ownership of property for purposes of section 856(e) even through legal title to the property is held by another person. For example, where, upon foreclosure of a mortgage held by the trust, legal title to the property is acquired in the name of a nominee for the exclusive benefit of the trust and the trust is the equitable owner of the property, the trust will be considered to have acquired ownership of the property for purposes of section 856(e). Generally, the fact that under local law the mortgagor has a right of redemption after foreclosure is not relevant in determining whether the trust has acquired ownership of the property for purposes of section 856(e). Property is not ineligible for the election solely because the property, in addition to se-

curing an indebtedness owed to the trust, also secures debts owed to other creditors. Property eligible for the election includes a building or other improvement which has been constructed on land owned by the trust and which is acquired by the trust upon default of a lease of the land.

(2) *Personal property.* Personal property (including personal property not subject to a mortgage or lease of the real property) will be considered incidental to a particular item of real property if the personal property is used in a trade or business conducted on the property or the use of the personal property is otherwise an ordinary and necessary corollary of the use to which the real property is put. In the case of a hotel, such items as furniture, appliances, linens, china, food, etc. would be examples of incidental personal property. Personal property incidental to the real property is eligible for the election even though it is acquired after the real property is acquired or is placed in the building or other improvement in the course of the completion of construction.

(3) *Property with respect to which default is anticipated.* Property is not eligible for the election to be treated as foreclosure property if the loan or lease with respect to which the default occurs (or is imminent) was made or entered into (or the lease or indebtedness was acquired) by the trust with an intent to evict or foreclose, or when the trust knew or had reason to know that default would occur (“improper knowledge”). For purposes of the preceding sentence, a trust will not be considered to have improper knowledge with respect to a particular lease or loan, if the lease or loan was made pursuant to a binding commitment entered into by the trust at a time when it did not have improper knowledge. Moreover, if the trust, in an attempt to avoid default or foreclosure, advances additional amounts to the borrower in excess of amounts contemplated in the original loan commitment or modifies the lease or loan, such advance or modification will be considered not to have been made with an intent to evict or foreclose, or with improper knowledge, unless the original loan or lease

was entered into with that intent or knowledge.

(c) *Election*—(1) *In general.* (i) An election to treat property as foreclosure property applies to all of the eligible real property acquired in the same taxable year by the trust upon the default (or as a result of the imminence of default) on a particular lease (where the trust is the lessor) or on a particular indebtedness owed to the trust. For example, if a loan made by a trust is secured by two separate tracts of land located in different cities, and in the same taxable year the trust acquires both tracts on foreclosure upon the default (or imminence of default) of the loan, the trust must include both tracts in the election. For a further example, the trust may choose to make a separate election for only one of the tracts if they are acquired in different taxable years or were not security for the same loan. If real property subject to the same election is acquired at different times in the same taxable year, the grace period for a particular property begins when that property is acquired.

(ii) If the trust acquires separate pieces of real property that secure the same indebtedness (or are under the same lease) in different taxable years because the trust delays acquiring one of them until a later taxable year, and the primary purpose for the delay is to include only one of them in an election, then if the trust makes an election for one piece it must also make an election for the other piece. A trust will not be considered to have delayed the acquisition of property for this purpose if there is a legitimate business reason for the delay (such as an attempt to avoid foreclosure by further negotiations with the debtor or lessee).

(iii) All of the eligible personal property incident to the real property must also be included in the election.

(2) *Time for making election.* The election to treat property as foreclosure property must be made on or before the due date (including extensions of time) for filing the trust's income tax return for the taxable year in which the trust acquires the property with respect to which the election is being made, or April 3, 1975, whichever is later.

(3) *Manner of making the election.* An election made after February 6, 1981, shall be made by a statement attached to the income tax return for the taxable year in which the trust acquired the property with respect to which the election is being made. The statement shall indicate that the election is made under section 856(e) and shall identify the property to which the election applies. The statement shall also set forth—

(i) The name, address, and taxpayer identification number of the trust,

(ii) The date the property was acquired by the trust, and

(iii) A brief description of how the real property was acquired, including the name of the person or persons from whom the real property was acquired and a description of the lease or indebtedness with respect to which default occurred or was imminent.

An election made on or before February 6, 1981 shall be filed in the manner prescribed in 26 CFR 10.1(f) (revised as of April 1, 1977) (temporary regulations relating to the election to treat property as foreclosure property) as in effect when the election is made.

(4) *Status of taxpayer.* In general, a taxpayer may make an election with respect to an acquisition of property only if the taxpayer is a qualified real estate investment trust for the taxable year in which the acquisition occurs. If, however, the taxpayer establishes, to the satisfaction of the district director for the internal revenue district in which the taxpayer maintains its principal place of business or principal office or agency, that its failure to be a qualified real estate investment trust for a taxable year was due to reasonable cause and not due to willful neglect, the taxpayer may make the election with respect to property acquired in such taxable year. The principles of §§ 1.856.7(c) and 1.856.8(d) (including the principles relating to expert advice) will apply in determining whether, for purposes of this subparagraph, the failure of the taxpayer to be a qualified real estate investment trust for the taxable year in which the property is acquired was due to reasonable cause and not due to willful neglect. If a taxpayer makes a valid election to treat property as foreclosure property, the

property will not lose its status as foreclosure property solely because the taxpayer is not a qualified real estate investment trust for a subsequent taxable year (including a taxable year which encompasses an extension of the grace period). However, the rules relating to the termination of foreclosure property status in section 856(e)(4) (but not the tax on income from foreclosure property imposed by section 857(b)(4)) apply to the year in which the property is acquired and all subsequent years, even though the taxpayer is not a qualified real estate investment trust for such year.

(d) *Termination of 2-year grace period; subsequent leases*—(1) *In general.* Under section 856(e)(4)(A), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring on or after the day on which the trust acquired the property) on which the trust either—

(i) Enters into a lease with respect to any of the property which, by its terms, will give rise to income of the trust which is not described in section 856(c)(3) (other than section 856(c)(3)(F)), or

(ii) Receives or accrues, directly or indirectly, any amount which is not described in section 856(c)(3) (other than section 856(c)(3)(F)) pursuant to a lease with respect to any of the real property entered into by the trust on or after the day the trust acquired the property.

For example, assume the trust acquires, in a particular taxable year, a shopping center upon the default of an indebtedness owed to the trust. Also assume that the trust subsequently enters into a lease with respect to one of several stores in the shopping center that requires the lessee to pay rent to the trust which is not income described in section 856(c)(3) (other than section 856(c)(3)(F)). In such case, the entire shopping center will cease to be foreclosure property on the day the trust enters into the lease.

(2) *Extensions or renewals of leases.* Generally, the extension or renewal of a lease of foreclosure property will be treated as the entering into of a new

lease only if the trust has a right to renegotiate the terms of the lease. If, however, by operation of law or by contract, the acquisition of the foreclosure property by the trust terminates a pre-existing lease of the property, or gives the trust a right to terminate the lease, then for purposes of section 856(e)(4)(A), a trust, in such circumstances, will not be considered to have entered into a lease with respect to the property solely because the terms of the preexisting lease are continued in effect after foreclosure without substantial modification. The letting of rooms in a hotel or motel does not constitute the entering into a lease for purposes of section 856(e)(4)(A).

(3) *Rent attributable to personal property.* Solely for the purposes of section 856(e)(4)(A), if a trust enters into a lease with respect to real property on or after the day upon which the trust acquires such real property by foreclosure, and a portion of the rent from such lease is attributable to personal property which is foreclosure property incident to such real property, such rent attributable to the incidental personal property will not be considered to terminate the status of such real property (or such incidental personal property) as foreclosure property.

(e) *Termination of 2-year grace period; completion of construction*—(1) *In general.* Under section 856(e)(4)(B), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring on or after the day on which the trust acquired the property) on which any construction takes place on the property, other than completion of a building (or completion of any other improvement) where more than 10 percent of the construction of the building (or other improvement) was completed before default became imminent. If more than one default occurred with respect to an indebtedness or lease in respect of which there is an acquisition, the more-than-10-percent test (including the rule prescribed in this paragraph relating to the test) will not be applied at the time a particular default became imminent if it is clear that the acquisition did not occur as

the result of such default. For example, if the debtor fails to make four consecutive payments of principal and interest on the due dates, and the trust takes action to acquire the property securing the debt only after the fourth default becomes imminent, the 10-percent test is applied at the time the fourth default became imminent (even though the trust would not have foreclosed on the property had not all four defaults occurred).

(2) *Determination of percentage of completion.* The determination of whether the construction of a building or other improvement was more than 10 percent complete when default became imminent shall be made by comparing the total direct costs of construction incurred with respect to the building or other improvement as of the date default became imminent with the estimated total direct costs of construction as of such date. If the building or other improvement qualifies as more than 10 percent complete under this method, the building or other improvement shall be considered to be more than 10 percent complete. For purposes of this subparagraph, direct costs of construction include the cost of labor and materials which are directly connected with the construction of the building or improvement.

Thus, for example, direct costs of construction incurred as of the date default became imminent would include amounts paid, or for which liability has been incurred, for labor which has been performed as of such date that is directly connected with the construction of the building or other improvement and for building materials and supplies used or consumed in connection with the construction as of such date. For purposes of applying the 10-percent test the trust may also take into account the cost of building materials and supplies which have been delivered to the construction site as of the date default became imminent and which are to be used or consumed in connection with the construction. On the other hand, architect's fees, administrative costs of the developer or builder, lawyers' fees, and expenses incurred in connection with obtaining zoning approval or building permits are not considered to be direct costs of con-

struction. Any construction by the trust as mortgagee-in-possession is considered to have taken place after default resulting in acquisition of the property became imminent. Generally, the trust's estimate of the total direct costs of completing construction as of the date the default became imminent will be accepted, provided that the estimate is reasonable, in good faith, and is based on all of the data reasonably available to the trust when the trust undertakes completion of construction of the building or other improvement. Appropriate documentation which shows that construction was more than 10 percent complete when default became imminent must be available at the principal place of business of the trust for inspection in connection with an examination of the income tax return. Construction includes the renovation of a building, such as the remodeling of apartments, or the renovation of an apartment building to convert rental units to a condominium. The renovation must be more than 10 percent complete (determined by comparing the total direct cost of the physical renovation which has been incurred when default became imminent with the estimated total direct cost of renovation as of such date) when default became imminent in order for the property not to lose its status as foreclosure property if the trust undertakes the renovation.

(3) *Modification of a building or improvement.* Generally, the terms "building" and "improvement" in section 856(e)(4)(B) mean the building or improvement (including any integral part thereof) as planned by the mortgagor or lessee (or other person in possession of the property, if appropriate) as of the date default became imminent. The trust, however, may estimate the total direct costs of construction and complete the construction of the building or other improvement by modifying the building or other improvement as planned as of the date default became imminent so as to reduce the estimated direct cost of construction of the building or improvement. If the trust does so modify the planned construction of the building or improvement, the 10-percent test is to be applied by comparing the direct costs

of construction incurred as of the date default became imminent that are attributable to the building or improvement as modified, with the estimated total direct costs (as of such date) of construction of the building or other improvement as modified. The trust, in order to meet the 10-percent test, may not, however, modify the planned building or improvement by reducing the estimated direct cost of construction to such an extent that the building or improvement is not functional.

Also, the trust may make subsequent modifications which increase the direct cost of construction of the building or improvement if such modifications—

(i) Are required by a Federal, State, or local agency, or

(ii) Are alterations that are either required by a prospective lessee or purchaser as a condition of leasing or buying the property or are necessary for the property to be used for the purpose planned at the time default became imminent.

Subdivision (ii) of the preceding sentence applies, however, only if the building or improvement, as modified, was more than 10 percent complete when default became imminent. A building completed by the trust will not cease to be foreclosure property solely because the building is used in a manner other than that planned by the defaulting mortgagor or lessee. Thus, for example, assume a trust acquired on foreclosure a planned apartment building which was 20 percent complete when default became imminent and that the trust completes the building without modifications which increase the direct cost of construction. The property will not cease to be foreclosure property by reason of section 856(e)(4)(B) solely because the trust sells the dwelling units in the building as condominium units, rather than holding them for rent as planned by the defaulting mortgagor. (See, however, section 856(e)(4)(C) and paragraph (f)(2) of this section for rules relating to the requirement that where foreclosure property is used in a trade or business (including a trade or business of selling the foreclosure property), the trade or business must be conducted through an independent contractor

after 90 days after the property is acquired.)

(4) *Application on building-by-building basis.* Generally the more than 10 percent test is to be applied on a building-by-building basis. Thus, for example, if a trust has foreclosed on land held by a developer building a housing subdivision, the trust may complete construction of the houses which were more than 10 percent complete when default became imminent. The trust, however, may not complete construction of houses which were only 10 percent (or less) complete, nor may the trust begin construction of other houses planned for the subdivision on which construction has not begun. The trust, however, may construct an additional building or improvement (whether or not the construction thereof has begun) which is an integral part of another building or other improvement that was more than 10 percent complete when default became imminent if the additional building or improvement and the other building or improvement, taken together as a unit, meet the more than 10 percent test. For purposes of this paragraph, an additional building or other improvement will be considered to be an integral part of another building or improvement if—

(i) It is ancillary to the other building or improvement and its principal intended use is to furnish services or facilities which either supplement the use of such other building or improvement or are necessary for such other building or improvement to be utilized in the manner or for the purpose for which it is intended, or

(ii) The buildings or improvements are intended to comprise constituent parts of an interdependent group of buildings or other improvements.

However, a building or other improvement will not be considered to be an integral part of another building or improvement unless the buildings or improvements were planned as part of the same overall construction plan or project before default became imminent. An additional building or other improvement (such as, for example, an outdoor swimming pool or a parking garage) may be considered to be an integral part of another building or improvement, even though the additional

building or improvement was also intended to be used to provide facilities or services for use in connection with several other buildings or improvements which will not be completed. If the trust chooses not to undertake the construction of an additional building or other improvement which qualifies as an integral part of another building or improvement, so much of the costs of construction (including both the direct costs of construction incurred before the default became imminent and the estimated costs of completion) as are attributable to that "integral part" shall not be taken into account in determining whether any other building or improvement was more than 10 percent complete when default became imminent. For example, assume the trust acquires on foreclosure a property on which the defaulting mortgagor has begun construction of a motel. The motel, as planned by the mortgagor, was to consist of a two-story building containing 30 units, and two detached one-story wings, each of which was to contain 20 units. At the time default became imminent, the defaulting mortgagor had completed more than 10 percent of the construction of the two-story structure but the two wings, an access road, a parking lot, and an outdoor swimming pool planned for the motel were each less than 10 percent complete. The trust may construct the two wings of the motel, the access road, the parking lot, and the swimming pool: *Provided*, That the motel and the other improvements which the trust undertakes to construct, taken together as a unit, were more than 10 percent complete when default became imminent. If, however, the trust chooses not to undertake construction of the swimming pool, the cost of construction attributable to the swimming pool, whether incurred before default became imminent or estimated as the cost of completion, shall not be taken into account in determining whether the trust can complete construction of the other buildings and improvements. For another example, assume that the trust acquires a planned shopping center on foreclosure. At the time default became imminent several large buildings intended to house shops and stores in the shopping

center were more than 10 percent complete. Less than 10 percent of the construction, however, had been completed on a separate structure intended to house a bank. The bank was planned as a component of the shopping center in order to provide, in conjunction with the other shops and stores, a specific range and variety of goods and services with which to attract customers to the shopping center. The trust may complete construction of the bank: *Provided*, That the bank and the other buildings and improvements which the trust undertakes to complete, taken together as a unit, were more than 10 percent complete when default became imminent. If the trust chooses not to construct the bank, no actual or estimated construction costs attributable to the bank are to be taken into account in applying the 10-percent test with respect to the other buildings and improvements in the shopping center. For a third example, assume that a defaulting mortgagor had planned to construct two identical apartment buildings, A and B, on the same tract of land, that neither building is to provide substantial facilities or services to be used in connection with the other, and that only building A was more than 10 percent complete when default became imminent. The trust, in this case, may not complete building B. On the other hand, if the facts are the same except that pursuant to the plans of the defaulting mortgagor, one of the buildings is to contain the furnace and central air conditioning machinery for both buildings A and B, the trust may complete both buildings A and B: *Provided*, That, taken together as a unit, the two buildings meet the more-than-10-percent test.

(5) *Repair and maintenance.* Under this paragraph (e), "construction" does not include—

(i) The repair or maintenance of a building or other improvement (such as the replacement of worn or obsolete furniture and appliances) to offset normal wear and tear or obsolescence, and the restoration of property required because of damage from fire, storm, vandalism or other casualty,

(ii) The preparation of leased space for a new tenant which does not substantially extend the useful life of the

building or other improvement or significantly increase its value, even though, in the case of commercial space, this preparation includes adapting the property to the conduct of a different business, or

(iii) The performing of repair or maintenance described in paragraph (e)(5)(i) of this section after property is acquired that was deferred by the defaulting party and that does not constitute renovation under paragraph (e)(2) of this section.

(6) *Independent contractor required.* If any construction takes place on the foreclosure property more than 90 days after the day on which such property was acquired by the trust, such construction must be performed by an independent contractor (as defined in section 856(d)(3) and § 1.856-4(b)(5)(iii)) from whom the trust does not derive or receive any income. Otherwise, the property will cease to be foreclosure property.

(7) *Failure to complete construction.* Property will not cease to be foreclosure property solely because a trust which undertakes the completion of construction of a building or other improvement on the property that was more than 10 percent complete when default became imminent does not complete the construction. Thus, for example, if a trust continues construction of a building that was 20 percent complete when default became imminent, and the trust constructs an additional 40 percent of the building and then sells the property, the property will not lose its status as foreclosure property solely because the trust fails to complete construction of the building.

(f) *Termination of 2-year grace period; use of foreclosure property in a trade or business—(1) In general.* Under section 856(e)(4)(C), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring more than 90 days after the day on which the trust acquired the property) on which the property is used in a trade or business conducted by the trust, other than a trade or business conducted by the trust through an independent con-

tractor from whom the trust itself does not derive or receive any income. (See section 856(d)(3) for the definition of independent contractor.)

(2) *Property held primarily for sale to customers.* For the purposes of section 856(e)(4)(C), foreclosure property held by the trust primarily for sale to customers in the ordinary course of a trade or business is considered to be property used in a trade or business conducted by the trust. Thus, if a trust holds foreclosure property (whether real property or personal property incident to real property) for sale to customers in the ordinary course of a trade or business more than 90 days after the day on which the trust acquired the real property, the trade or business of selling the property must be conducted by the trust through an independent contractor from whom the trust does not derive or receive any income. Otherwise, after such 90th day the property will cease to be foreclosure property.

(3) *Change in use.* Foreclosure property will not cease to be foreclosure property solely because the use of the property in a trade or business by the trust differs from the use to which the property was put by the person from whom it was acquired. Thus, for example, if a trust acquires a rental apartment building on foreclosure, the property will not cease to be foreclosure property solely because the trust converts the building to a condominium apartment building and, through an independent contractor from whom the trust derives no income, engages in the trade or business of selling the individual condominium units.

(g) *Extension of 2-year grace period—(1) In general.* A real estate investment trust may apply to the district director of the internal revenue district in which is located the principal place of business (or principal office or agency) of the trust for an extension of the 2-year grace period. If the trust establishes to the satisfaction of the district director that an extension of the grace period is necessary for the orderly liquidation of the trust's interest in foreclosure property, or for an orderly renegotiation of a lease or leases of the

property, the district director may extend the 2-year grace period. See section 856(e)(3) (as in effect with respect to the particular extension) for rules relating to the maximum length of an extension, and the number of extensions which may be granted. An extension of the grace period may be granted by the district director either before or after the date on which the grace period, but for the extension, would expire. The extension shall be effective as of the date on which the grace period, but for the extension, would expire.

(2) *Showing required.* Generally, in order to establish the necessity of an extension, the trust must demonstrate that it has made good faith efforts to renegotiate leases with respect to, or dispose of, the foreclosure property. In certain cases, however, the trust may establish the necessity of an extension even though it has not made such efforts. For example, if the trust demonstrates that, for valid business reasons, construction of the foreclosure property could not be completed before the expiration of the grace period, the necessity of the extension could be established even though the trust had made no effort to sell the property. For another example, if the trust demonstrates that due to a depressed real estate market, it could not sell the foreclosure property before the expiration of the grace period except at a distress price, the necessity of an extension could be established even though the trust had made no effort to sell the property. The fact that property was acquired as foreclosure property prior to January 3, 1975 (the date of enactment of section 856(e)), generally will be considered as a factor (but not a controlling factor) which tends to establish that an extension of the grace period is necessary.

(3) *Time for requesting an extension of the grace period.* A request for an extension of the grace period must be filed with the appropriate district director more than 60 days before the day on which the grace period would otherwise expire. In the case of a grace period which would otherwise expire before August 6, 1976, a request for an extension will be considered to be timely filed if filed on or before June 7, 1976.

(4) *Information required.* The request for an extension of the grace period shall identify the property with respect to which the request is being made and shall also include the following information:

(i) The name, address, and taxpayer identification number of the trust,

(ii) The date the property was acquired as foreclosure property by the trust,

(iii) The taxable year of the trust in which the property was acquired,

(iv) If the trust has been previously granted an extension of the grace period with respect to the property, a statement to that effect (which shall include the date on which the grace period, as extended, expires) and a copy of the information which accompanied the request for the previous extension,

(v) A statement of the reasons why the grace period should be extended,

(vi) A description of any efforts made by the trust after the acquisition of the property to dispose of the property or to renegotiate any lease with respect to the property, and

(vii) A description of any other factors which tend to establish that an extension of the grace period is necessary for the orderly liquidation of the trust's interest in the property, or for an orderly renegotiation of a lease or leases of the property.

The trust shall also furnish any additional information requested by the district director after the request for extension is filed.

(5) *Automatic extension.* If a real estate investment trust files a request for an extension with the district director more than 60 days before the expiration of the grace period, the grace period shall be considered to be extended until the end of the 30th day after the date on which the district director notifies the trust by certified mail sent to its last known address that the period of extension requested by the trust is not granted. For further guidance regarding the definition of last known address, see §301.6212-2 of this chapter. In no event, however, shall the rule in the preceding sentence extend the grace period beyond the expiration of (i) the period of extension requested by the trust, or (ii) the 1-year period following the date that the grace period

(but for the automatic extension) would expire. The date of the postmark on the sender's receipt is considered to be the date of the certified mail for purposes of this subparagraph. This subparagraph does not apply, however, if the date of the notification by certified mail described in the first sentence is more than 30 days before the date that the grace period (determined without regard to this subparagraph) expires. Moreover, this subparagraph shall not operate to allow any period of extension that is prohibited by the last sentence of section 856(e)(3) (as in effect with respect to the particular extension).

(6) *Extension of time for filing.* If a real estate investment trust fails to file the request for an extension of the grace period within the time provided in paragraph (g)(3) of this section, then the district director shall grant a reasonable extension of time for filing such request, provided (i) it is established to the satisfaction of the district director that there was reasonable cause for failure to file the request within the prescribed time and (ii) a request for such extension is filed within such time as the district director considers reasonable under the circumstances.

(7) *Status of taxpayer.* The reference to "real estate investment trust" or "trust" in this paragraph (g) shall be considered to include a taxpayer that is not a qualified real estate investment trust, if the taxpayer establishes to the satisfaction of the district director that its failure to be a qualified real estate investment trust for the taxable year was due to reasonable cause and not due to willful neglect. The principles of § 1.856-7(c) and § 1.856-8(d) (including the principles relating to expert advice) shall apply for deter-

mining reasonable cause (and absence of willful neglect) for this purpose.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11269, Feb. 6, 1981; 46 FR 15263, Mar. 5, 1981, as amended by T.D. 8939, 66 FR 2819, Jan. 12, 2001]

§ 1.856-7 Certain corporations, etc., that are considered to meet the gross income requirements.

(a) *In general.* A corporation, trust, or association which fails to meet the requirements of paragraph (2) or (3) of section 856(c), or of both such paragraphs, for any taxable year nevertheless is considered to have satisfied these requirements if the corporation, trust, or association meets the requirements of subparagraphs (A), (B), and (C) of section 856(c)(7) (relating to a schedule attached to the return, the absence of fraud, and reasonable cause).

(b) *Contents of the schedule.* The schedule required by subparagraph (A) of section 856(c)(7) must contain a breakdown, or listing, of the total amount of gross income falling under each of the separate subparagraphs of section 856(c) (2) and (3). Thus, for example, the real estate investment trust, for purposes of listing its income from the sources described in section 856(c)(2), would list separately the total amount of dividends, the total amount of interest, the total amount of rents from real property, etc. The listing is not required to be on a lease-by-lease, loan-by-loan, or project-by-project basis, but the real estate investment trust must maintain adequate records on such a basis with which to substantiate each total amount listed in the schedule.

(c) *Reasonable cause—(1) In general.* The failure to meet the requirements of paragraph (2) or (3) of section 856(c)

(or of both paragraphs) will be considered due to reasonable cause and not due to willful neglect if the real estate investment trust exercised ordinary business care and prudence in attempting to satisfy the requirements. Such care and prudence must be exercised at the time each transaction is entered into by the trust. However, even if the trust exercised ordinary business care and prudence in entering into a transaction, if the trust later determines that the transaction results in the receipt or accrual of nonqualified income and that the amounts of such nonqualified income, in the context of the trust's overall portfolio, reasonably can be expected to cause a source-of-income requirement to be failed, the trust must use ordinary business care and prudence in an effort to renegotiate the terms of the transaction, dispose of property acquired or leased in the transaction, or alter other elements of its portfolio. In any case, failure to meet an income source requirement will be considered due to willful neglect and not due to reasonable cause if the failure is willful and the trust could have avoided such failure by taking actions not inconsistent with ordinary business care and prudence. For example, if the trust enters into a lease knowing that it will produce nonqualified income which reasonably can be expected to cause a source-of-income requirement to be failed, the failure is due to willful neglect even if the trust has a legitimate business purpose for entering into the lease.

(2) *Expert advice*—(i) *In general*. The reasonable reliance on a reasoned, written opinion as to the characterization for purposes of section 856 of gross income to be derived (or being derived) from a transaction generally constitutes “reasonable cause” if income from that transaction causes the trust to fail to meet the requirements of paragraph (2) or (3) of section 856(c) (or of both paragraphs). The absence of such a reasoned, written opinion with respect to a transaction does not, by itself, give rise to any inference that the failure to meet a percentage of income requirement was without reasonable cause. An opinion as to the character of income from a transaction in-

cludes an opinion pertaining to the use of a standard form of transaction or standard operating procedure in a case where such standard form or procedure is in fact used or followed.

(ii) If the opinion indicates that a portion of the income from a transaction will be nonqualified income, the trust must still exercise ordinary business care and prudence with respect to the nonqualified income and determine that the amount of that income, in the context of its overall portfolio, reasonably cannot be expected to cause a source-of-income requirement to be failed. Reliance on an opinion is not reasonable if the trust has reason to believe that the opinion is incorrect (for example, because the trust withholds facts from the person rendering the opinion).

(iii) *Reasoned written opinion*. For purposes of this subparagraph (2), a written opinion means an opinion, in writing, rendered by a tax advisor (including house counsel) whose opinion would be relied on by a person exercising ordinary business care and prudence in the circumstances of the particular transaction. A written opinion is considered “reasoned” even if it reaches a conclusion which is subsequently determined to be incorrect, so long as the opinion is based on a full disclosure of the factual situation by the real estate investment trust and is addressed to the facts and law which the person rendering the opinion believes to be applicable. However, an opinion is not considered “reasoned” if it does nothing more than recite the facts and express a conclusion.

(d) *Application of section 856(c)(7) to taxable years beginning before October 5, 1976*. Pursuant to section 1608(b) of the Tax Reform Act of 1976, paragraph (7) of section 856(c) and this section apply to a taxable year of a real estate investment trust which begins before October 5, 1976, only if as the result of a determination occurring after October 4, 1976, the trust does not meet the requirements of paragraph (2) or (3) of section 856(c), or both paragraphs, as in effect for the taxable year. The requirement that the schedule described in subparagraph (A) of section 856(c)(7) be attached to the income tax return of a real estate investment trust in order

for section 856(c)(7) to apply is not applicable to taxable years beginning before October 5, 1976. For purposes of section 1608(b) of the Tax Reform Act of 1976 and this paragraph, the rules relating to determinations prescribed in section 860(e) and § 1.860-2(b)(1) (other than the second, third, and last sentences of § 1.860-2(b)(1)(ii)) shall apply. However, a determination consisting of an agreement between the taxpayer and the district director (or other official to whom authority to sign the agreement is delegated) shall set forth the amount of gross income for the taxable year to which the determination applies, the amount of the 90 percent and 75 percent source-of-income requirements for the taxable year to which the determination applies, and the amount by which the real estate investment trust failed to meet either or both of the requirements. The agreement shall also set forth the amount of tax for which the trust is liable pursuant to section 857(b)(5). The agreement shall also contain a finding as to whether the failure to meet the requirements of paragraph (2) or (3) of section 856(c) (or of both paragraphs) was due to reasonable cause and not due to willful neglect.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954); sec. 860(e) (92 Stat. 2849; 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850; 26 U.S.C. 860(g)))

[T.D. 7767, 46 FR 11274, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.856-8 Revocation or termination of election.

(a) *Revocation of an election to be a real estate investment trust.* A corporation, trust, or association that has made an election under section 856(c)(1) to be a real estate investment trust may revoke the election for any taxable year after the first taxable year for which the election is effective. The

revocation must be made by filing a statement with the district director for the internal revenue district in which the taxpayer maintains its principal place of business or principal office or agency. The statement must be filed on or before the 90th day after the first day of the first taxable year for which the revocation is to be effective. The statement must be signed by an official authorized to sign the income tax return of the taxpayer and must—

(1) Contain the name, address, and taxpayer identification number of the taxpayer,

(2) Specify the taxable year for which the election was made, and

(3) Include a statement that the taxpayer, pursuant to section 856(g)(2), revokes its election under section 856(c)(1) to be a real estate investment trust.

The revocation may be made only with respect to a taxable year beginning after October 4, 1976, and is effective for the taxable year in which made and for all succeeding taxable years. A revocation with respect to a taxable year beginning after October 4, 1976, that is filed before February 6, 1981, in the time and manner prescribed in § 7.856(g)-1 of this chapter (as in effect when the revocation was filed) is considered to meet the requirements of this paragraph.

(b) *Termination of election to be a real estate investment trust.* An election of a corporation, trust, or association under section 856(c)(1) to be a real estate investment trust shall terminate if the corporation, trust, or association is not a qualified real estate investment trust for any taxable year (including the taxable year with respect to which the election is made) beginning after October 4, 1976. (This election terminates whether the failure to be a qualified real estate investment trust is intentional or inadvertent.) The term “taxable year” includes a taxable year of less than 12 months for which a return is made under section 443. The termination of the election is effective for the first taxable year beginning after October 4, 1976, for which the corporation, trust, or association is not a qualified real estate investment trust and for all succeeding taxable years.

(c) *Restrictions on election after termination or revocation*—(1) *General rule.* Except as provided in paragraph (d) of this section, if a corporation, trust, or association has made an election under section 856(c)(1) to be a real estate investment trust and the election has been terminated or revoked under section 856(g)(1) or (2), the corporation, trust, or association (and any successor corporation, trust, or association) is not eligible to make a new election under section 856(c)(1) for any taxable year prior to the fifth taxable year which begins after the first taxable year for which the termination or revocation is effective.

(2) *Successor corporation.* The term “successor corporation, trust, or association”, as used in section 856(g)(3), means a corporation, trust, or association which meets both a continuity of ownership requirement and a continuity of assets requirement with respect to the corporation, trust, or association whose election has been terminated under section 856(g)(1) or revoked under section 856(g)(2). A corporation, trust, or association meets the continuity of ownership requirement only if at any time during the taxable year the persons who own, directly or indirectly, 50 percent or more in value of its outstanding shares owned, at any time during the first taxable year for which the termination or revocation was effective, 50 percent or more in value of the outstanding shares of the corporation, trust, or association whose election has been terminated or revoked. A corporation, trust, or association meets the continuity of assets requirement only if either (i) a substantial portion of its assets were assets of the corporation, trust, or association whose election has been terminated or revoked, or (ii) it acquires a substantial portion of the assets of the corporation, trust, or association whose election has been terminated or revoked.

(3) *Effective date.* Section 856(g)(3) does not apply to the termination of an election that was made by a taxpayer pursuant to section 856(c)(1) on or before October 4, 1976, unless the taxpayer is a qualified real estate investment trust for a taxable year ending after October 4, 1976, for which the pre-

October 5, 1976, election is in effect. For example, assume that Trust X, a calendar year taxpayer, files a timely election under section 856(c)(1) with respect to its taxable year 1974, and is a qualified real estate investment trust for calendar years 1974 and 1975. Assume further that Trust X is not a qualified real estate investment trust for 1976 and 1977 because it willfully fails to meet the asset diversification requirements of section 856(c)(5) for both years. The failure (whether or not willful) to meet these requirements in 1977 terminates the election to be a real estate investment trust made with respect to 1974. (See paragraph (b) of this section.) The termination is effective for 1977 and all succeeding taxable years. However, under section 1608(d)(3) of the Tax Reform Act of 1976, Trust X is not prohibited by section 856(g)(3) from making a new election under section 856(c)(1) with respect to 1978.

(d) *Exceptions*—Section 856(g)(4) provides an exception to the general rule of section 856(g)(3) that the termination of an election to be a real estate investment trust disqualifies the corporation, trust, or association from making a new election for the 4 taxable years following the first taxable year for which the termination is effective. This exception applies where the corporation, trust, or association meets the requirements of section 856(g)(4)(A), (B) and (C) (relating to the timely filing of a return, the absence of fraud, and reasonable cause, respectively) for the taxable year with respect to which the termination of election occurs. In order to meet the requirements of section 856(g)(4)(C), the corporation, trust, or association must establish, to the satisfaction of the district director for the internal revenue district in which the corporation, trust, or association maintains its principal place of business or principal office or agency, that its failure to be a qualified real estate investment trust for the taxable year in question was due to reasonable cause and not due to willful neglect. The principles of § 1.856-7(c) (including the principles relating to expert advice) will apply in determining whether, for purposes of section 856(g)(4), the failure of a corporation, trust, or association to be a

qualified real estate investment trust for a taxable year was due to reasonable cause and not due to willful neglect. Thus, for example, the corporation, trust, or association must exercise ordinary business care and prudence in attempting to meet the status conditions of section 856(a) and the distribution and recordkeeping requirements of section 857(a), as well as the gross income requirements of section 856(c). The provisions of section 856(g)(4) do not apply to a taxable year in which the corporation, trust, or association makes a valid revocation, under section 856(g)(2), of an election to be a real estate investment trust.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11275, Feb. 6, 1981; 46 FR 15263, Mar. 5, 1981]

§ 1.856-9 Treatment of certain qualified REIT subsidiaries.

(a) *In general.* A qualified REIT subsidiary, even though it is otherwise not treated as a corporation separate from the REIT, is treated as a separate corporation for purposes of:

(1) Federal tax liabilities of the qualified REIT subsidiary with respect to any taxable period for which the qualified REIT subsidiary was treated as a separate corporation.

(2) Federal tax liabilities of any other entity for which the qualified REIT subsidiary is liable.

(3) Refunds or credits of Federal tax.

(b) *Examples.* The following examples illustrate the application of paragraph (a) of this section:

Example 1. X, a calendar year taxpayer, is a domestic corporation 100 percent of the stock of which is acquired by Y, a real estate investment trust, in 2002. X was not a member of a consolidated group at any time during its taxable year ending in December 2001. Consequently, X is treated as a qualified REIT subsidiary under the provisions of sec-

tion 856(i) for 2002 and later periods. In 2004, the Internal Revenue Service (IRS) seeks to extend the period of limitations on assessment for X's 2001 taxable year. Because X was treated as a separate corporation for its 2001 taxable year, X is the proper party to sign the consent to extend the period of limitations.

Example 2. The facts are the same as in *Example 1*, except that upon Y's acquisition of X, Y and X jointly elect under section 856(l) to treat X as a taxable REIT subsidiary of Y. In 2003, Y and X jointly revoke that election. Consequently, X is treated as a qualified REIT subsidiary under the provisions of section 856(i) for 2003 and later periods. In 2004, the IRS determines that X miscalculated and underreported its income tax liability for 2001. Because X was treated as a separate corporation for its 2001 taxable year, the deficiency may be assessed against X and, in the event that X fails to pay the liability after notice and demand, a general tax lien will arise against all of X's property and rights to property.

Example 3. X is a qualified REIT subsidiary of Y under the provisions of section 856(i). In 2001, Z, a domestic corporation that reports its taxes on a calendar year basis, merges into X in a state law merger. Z was not a member of a consolidated group at any time during its taxable year ending in December 2000. Under the applicable state law, X is the successor to Z and is liable for all of Z's debts. In 2004, the IRS seeks to extend the period of limitations on assessment for Z's 2000 taxable year. Because X is the successor to Z and is liable for Z's 2000 taxes that remain unpaid, X is the proper party to sign the consent to extend the period of limitations.

(c) *Effective date.* This section applies on or after April 1, 2004.

[T.D. 9183, 70 FR 9221, Feb. 25, 2005]

§ 1.857-1 Taxation of real estate investment trusts.

(a) *Requirements applicable thereto.* Section 857(a) denies the application of the provisions of part II, subchapter M, chapter 1 of the Code (other than sections 856(g), relating to the revocation or termination of an election, and 857(d), relating to earnings and profits) to a real estate investment trust for a taxable year unless—

(1) The deduction for dividends paid for the taxable year as defined in section 561 (computed without regard to capital gain dividends) equals or exceeds the amount specified in section 857(a)(1), as in effect for the taxable year; and

§ 1.857-2

26 CFR Ch. I (4-1-15 Edition)

(2) The trust complies for such taxable year with the provisions of § 1.857-8 (relating to records required to be maintained by a real estate investment trust).

See section 858 and § 1.858-1, relating to dividends paid after the close of the taxable year.

(b) *Failure to qualify.* If a real estate investment trust does not meet the requirements of section 857(a) and paragraph (a) of this section for the taxable year, it will, even though it may otherwise be classified as a real estate investment trust, be taxed in such year as an ordinary corporation and not as a real estate investment trust. In such case, none of the provisions of part II of subchapter M (other than sections 856(g) and 857(d)) will be applicable to it. For the rules relating to the applicability of sections 856(g) and 857(d), see § 1.857-7.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4087, Apr. 28, 1962, as amended by T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§ 1.857-2 Real estate investment trust taxable income and net capital gain.

(a) *Real estate investment trust taxable income.* Section 857(b)(1) imposes a nominal tax and surtax, computed at the rates and in the manner prescribed in section 11, on the “real estate investment trust taxable income”, as defined in section 857(b)(2). Section 857(b)(2) requires certain adjustments to be made to convert taxable income of the real estate investment trust to “real estate investment trust taxable income”. The adjustments are as follows:

(1) *Net capital gain.* In the case of taxable years ending before October 5, 1976, the net capital gain, if any, is excluded.

(2) *Special deductions disallowed.* The special deductions provided in part VIII, subchapter B, chapter 1 of the Code (except the deduction under section 248) are not allowed.

(3) *Deduction for dividends paid—(i) General rule.* The deduction for dividends paid (as defined in section 561) is allowed. In the case of taxable years ending before October 5, 1976, the deduction for dividends paid is computed without regard to capital gains dividends.

(ii) *Deduction for dividends paid if there is net income from foreclosure property.* If for any taxable year the trust has net income from foreclosure property (as defined in section 857(b)(4)(B) and § 1.857-3), the deduction for dividends paid is an amount equal to the amount which bears the same proportion to the total dividends paid or considered as paid during the taxable year that otherwise meet the requirements for the deduction for dividends paid (as defined in section 561) as the real estate investment trust taxable income (determined without regard to the deduction for dividends paid) bears to the sum of—

(A) The real estate investment trust taxable income (determined without regard to the deduction for dividends paid), and

(B) The amount by which the net income from foreclosure property exceeds the tax imposed on such income by section 857(b)(4)(A).

For purposes of the preceding sentence, the term “total dividends paid or considered as paid during the taxable year” includes deficiency dividends paid with respect to the taxable year that are not otherwise excluded under this subdivision or section 857(b)(3)(A). The term, however, does not include either deficiency dividends paid during the taxable year with respect to a preceding taxable year ending before October 5, 1976, capital gains dividends.

(iii) *Deduction for dividends paid for purposes of the alternative tax.* The rules in section 857(b)(3)(A) apply in determining the amount of the deduction for dividends paid that is taken into account in computing the alternative tax. Thus, for example, if a real estate investment trust has net income from foreclosure property for a taxable year

ending after October 4, 1976, then for purposes of determining the partial tax described in section 857(b)(3)(A)(i), the amount of the deduction for dividends paid is computed pursuant to paragraph (a)(3)(ii) of this section, except that capital gains dividends are excluded from the dividends paid or considered as paid during the taxable year, and the net capital gain is excluded in computing real estate investment trust taxable income.

(4) *Section 443(b) disregarded.* The taxable income is computed without regard to section 443(b). Thus, the taxable income for a period of less than 12 months is not placed on an annual basis even though the short taxable year results from a change of accounting period.

(5) *Net operating loss deduction.* In the case of a taxable year ending before October 5, 1976, the net operating loss deduction provided in section 172 is not allowed.

(6) *Net income from foreclosure property.* An amount equal to the net income from foreclosure property (as defined in section 857(b)(4)(B) and paragraph (a) of § 1.857-3), if any, is excluded.

(7) *Tax imposed by section 857(b)(5).* An amount equal to the tax (if any) imposed on the trust by section 857(b)(5) for the taxable year is excluded.

(8) *Net income or loss from prohibited transactions.* An amount equal to the amount of any net income derived from prohibited transactions (as defined in section 857(b)(6)(B)(i)) is excluded. On the other hand, an amount equal to amount of any net loss derived from prohibited transactions (as defined in section 857(b)(6)(B)(ii)) is included. Because the amount of the net loss derived from prohibited transactions is taken into account in computing taxable income before the adjustments required by section 857(b)(2) and this section are made, the effect of including an amount equal to the amount of the loss is to disallow a deduction for the loss.

(b) *Net capital gain in taxable years ending October 5, 1976.* The rules relating to the taxation of capital gains in 26 CFR 1.857-2(b) (revised as of April 1,

1977) apply to taxable years ending before October 5, 1976.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§ 1.857-3 Net income from foreclosure property.

(a) *In general.* For purposes of section 857(b)(4)(B), net income from foreclosure property means the aggregate of—

(1) All gains and losses from sales or other dispositions of foreclosure property described in section 1221(1), and,

(2) The difference (hereinafter called “net gain or loss from operations”) between (i) the gross income derived from foreclosure property (as defined in section 856(e)) to the extent such gross income is not described in subparagraph (A), (B), (C), (D), (E), or (G) of section 856(c)(3), and (ii) the deductions allowed by chapter 1 of the Code which are directly connected with the production of such gross income.

Thus, the sum of the gains and losses from sales or other dispositions of foreclosure property described in section 1221(1) is aggregated with the net gain or loss from operations in arriving at net income from foreclosure property. For example, if for a taxable year a real estate investment trust has gain of \$100 from the sale of an item of foreclosure property described in section 1221(1), a loss of \$50 from the sale of an item of foreclosure property described in section 1221(1), gross income of \$25 from the rental of foreclosure property that is not gross income described in subparagraph (A), (B), (C), (D), or (G) of section 856(c)(3), and deductions of \$35 allowed by chapter 1 of the Code which are directly connected with the production of the rental income, the net income from foreclosure property for the taxable years is \$40 (($\$100 - \50) + ($\$25 - \35)).

(b) *Directly connected deductions.* A deduction which is otherwise allowed by chapter 1 of the Code is “directly connected” with the production of gross income from the foreclosure property if it has a proximate and primary relationship to the earning of the income. Thus, in the case of gross income from real property that is foreclosure property, “directly connected” deductions would include depreciation on the property, interest paid or accrued on the indebtedness of the trust (whether or not secured by the property) to the extent attributable to the carrying of the property, real estate taxes, and fees paid to an independent contractor hired to manage the property. On the other hand, general overhead and administrative expenses of the trust are not “directly connected” deductions. Thus, salaries of officers and other administrative employees of the trust are not “directly connected” deductions. The net operating loss deduction provided by section 172 is not allowed in computing net income from foreclosure property.

(c) *Net loss from foreclosure property.* The tax imposed by section 857(b)(4) applies only if there is net income from foreclosure property. If there is a net loss from foreclosure property (that is, if the aggregate computed under paragraph (a) of this section results in a negative amount) the loss is taken into account in computing real estate investment trust taxable income under section 857(b)(2).

(d) *Gross income not subject to tax on foreclosure property.* If the gross income derived from foreclosure property consists of two classes, a deduction directly connected with the production of both classes (including interest attributable to the carrying of the property) must be apportioned between them. The two classes are:

(1) Gross income which is taken into account in computing net income from foreclosure property and

(2) Other income (such as income described in subparagraph (A), (B), (C), (D), or (G) of section 856(c)(3)).

The apportionment may be made on any reasonable basis.

(e) *Allocation and apportionment of interest.* For purposes of determining the amount of interest attributable to the

carrying of foreclosure property under paragraph (b) of this section, the following rules apply:

(1) *Deductible interest.* Interest is taken into account under this paragraph (e) only if it is otherwise deductible under chapter 1 of the Code.

(2) *Interest specifically allocated to property.* Interest that is specifically allocated to an item of property is attributable only to the carrying of that property. Interest is specifically allocated to an item of property if (i) the indebtedness on which the interest is paid or accrued is secured only by that property, (ii) such indebtedness was specifically incurred for the purpose of purchasing, constructing, maintaining, or improving that property, and (iii) the proceeds of the borrowing were applied for that purpose.

(3) *Other interest.* Interest which is not specifically allocated to property is apportioned between foreclosure property and other property under the principles of §1.861-8(e)(2)(v).

(4) *Effective date.* The rules in this paragraph (e) are mandatory for all taxable years ending after February 6, 1981.

[T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§ 1.857-4 Tax imposed by reason of the failure to meet certain source-of-income requirements.

Section 857(b)(5) imposes a tax on a real estate investment trust that is considered, by reason of section 856(c)(7), as meeting the source-of-income requirements of paragraph (2) or

(3) of section 856(c) (or both such paragraphs). The amount of the tax is determined in the manner prescribed in section 857(b)(5).

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11278, Feb. 2, 1981]

§ 1.857-5 Net income and loss from prohibited transactions.

(a) *In general.* Section 857(b)(6) imposes, for each taxable year, a tax equal to 100 percent of the net income derived from prohibited transactions. A prohibited transaction is a sale or other disposition of property described in section 1221(1) that is not foreclosure property. The 100-percent tax is imposed to preclude a real estate investment trust from retaining any profit from ordinary retailing activities such as sales to customers of condominium units or subdivided lots in a development tract. In order to prevent a trust from receiving any tax benefit from such activities, a net loss from prohibited transactions effectively is disallowed in computing real estate investment trust taxable income. See § 1.857-2(a)(8). Such loss, however, does reduce the amount which a trust is required to distribute as dividends. For purposes of applying the provisions of the Code, other than those provisions of part II of subchapter M which relate to prohibited transactions, no inference is to be drawn from the fact that a type of transaction does not constitute a prohibited transaction.

(b) *Special rules.* In determining whether a particular transaction constitutes a prohibited transaction, the activities of a real estate investment trust with respect to foreclosure property and its sales of such property are disregarded. Also, if a real estate investment trust enters into a purchase and leaseback of real property with an option in the seller-lessee to repur-

chase the property at the end of the lease period, and the seller exercises the option pursuant to its terms, income from the sale generally will not be considered to be income from a prohibited transaction solely because the purchase and leaseback was entered into with an option in the seller to repurchase and because the option was exercised pursuant to its terms. Other facts and circumstances, however, may require a conclusion that the property is held primarily for sale to customers in the ordinary course of a trade or business. Gain from the sale or other disposition of property described in section 1221(1) (other than foreclosure property) that is included in gross income for a taxable year of a qualified real estate investment trust constitutes income from a prohibited transaction, even though the sale or other disposition from which the gain is derived occurred in a prior taxable year. For example, if a corporation that is a qualified real estate investment trust for the current taxable year elected to report the income from the sale of an item of section 1221(1) property (other than foreclosure property) on the installment method of reporting income, the gain from the sale that is taken into income by the real estate investment trust for the current taxable year is income from a prohibited transaction. This result follows even though the sale occurred in a prior taxable year for which the corporation did not qualify as a real estate investment trust. On the other hand, if the gain is taken into income in a taxable year for which the taxpayer is not a qualified real estate investment trust, the 100-percent tax does not apply.

(c) *Net income or loss from prohibited transactions.* Net income or net loss from prohibited transactions is determined by aggregating all gains from the sale or other disposition of property (other than foreclosure property) described in section 1221(1) with all losses from the sale or other disposition of such property. Thus, for example, if a real estate investment trust sells two items of property described in section 1221(1) (other than foreclosure property) and recognizes a gain of \$100 on the sale of one item and a loss of \$40 on the sale of the second item, the net

§ 1.857-6

26 CFR Ch. I (4-1-15 Edition)

income from prohibited transactions will be \$60.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. 856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 7767, 46 FR 11278, Feb. 6, 1981]

§ 1.857-6 Method of taxation of shareholders of real estate investment trusts.

(a) *Ordinary income.* Except as otherwise provided in paragraph (b) of this section (relating to capital gains), a shareholder receiving dividends from a real estate investment trust shall include such dividends in gross income for the taxable year in which they are received. See section 858(b) and paragraph (c) of § 1.858-1 for treatment by shareholders of dividends paid by a real estate investment trust after the close of its taxable year in the case of an election under section 858(a).

(b) *Capital gains.* Under section 857(b)(3)(B), shareholders of a real estate investment trust who receive capital gain dividends (as defined in paragraph (e) of this section), in respect of the capital gains of a corporation, trust, or association for a taxable year for which it is taxable under part II of subchapter M as a real estate investment trust, shall treat such capital gain dividends as gains from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and realized in the taxable year of the shareholder in which the dividend was received. In the case of dividends with respect to any taxable year of a real estate investment trust ending after December 31, 1969, and beginning before January 1, 1975, the portion of a shareholder's capital gain dividend which in his hands is gain to which section 1201(d) (1) or (2) applies is the portion so designated by the real estate invest-

ment trust pursuant to paragraph (e)(2) of this section.

(c) *Special treatment of loss on the sale or exchange of real estate investment trust stock held less than 31 days—(1) In general.* Under section 857(b)(7), if any person with respect to a share of real estate investment trust stock held for a period of less than 31 days, is required by section 857(b)(3)(B) to include in gross income as a gain from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) the amount of a capital gains dividend, then such person shall, to the extent of such amount, treat any loss on the sale or exchange of such share as a loss from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(2) *Determination of holding period.* The rules contained in section 246(c)(3) (relating to the determination of holding periods for purposes of the deduction for dividends received) shall be applied in determining whether, for purposes of section 857(b)(7)(B) and this paragraph, a share of real estate investment trust stock has been held for a period of less than 31 days. In applying those rules, however, "30 days" shall be substituted for the number of days specified in subparagraph (B) of such section.

(3) *Illustration.* The application of section 857(b)(7) and this paragraph may be illustrated by the following example:

Example. On December 15, 1961, A purchased a share of stock in the S Real Estate Investment Trust for \$20. The S trust declared a capital gains dividend of \$2 per share to shareholders of record on December 31, 1961. A, therefore, received a capital gain dividend of \$2 which, pursuant to section 857(b)(3)(B), he must treat as a gain from the sale or exchange of a capital asset held for more than six months. On January 5, 1962, A sold his share of stock in the S trust for \$17.50, which sale resulted in a loss of \$2.50. Under section 857(b)(4) and this paragraph, A must treat \$2 of such loss (an amount equal to the capital gain dividend received with respect to such share of stock) as a loss from the sale or exchange of a capital asset held for more than six months.

(d) *Dividend received credit, exclusion, and deduction not allowed.* Any dividend received from a real estate investment trust which, for the taxable year to which the dividend relates, is a qualified real estate investment trust, shall not be eligible for the dividend received credit (for dividends received on or before December 31, 1964) under section 34(a), the dividend received exclusion under section 116, or the dividend received deduction under section 243.

(e) *Definition of capital gain dividend.* (1)(i) A capital gain dividend, as defined in section 857(b)(3)(C), is any dividend or part thereof which is designated by a real estate investment trust as a capital gain dividend in a written notice mailed to its shareholders within the period specified in section 857(b)(3)(C) and paragraph (f) of this section. If the aggregate amount so designated with respect to the taxable year (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 858) is greater than the net capital gain of the taxable year, the portion of each distribution which shall be a capital gain dividend shall be only that proportion of the amount so designated which such excess of the net long-term capital gain over the net short-term capital loss bears to the aggregate of the amount so designated. For example, a real estate investment trust making its return on the calendar year basis advised its shareholders by written notice mailed December 30, 1961, that \$200,000 of a distribution of \$500,000 made December 15, 1961, constituted a capital gain dividend, amounting to \$2 per share. It was later discovered that an error had been made in determining the net capital gain of the taxable year and the net capital gain was \$100,000 instead of \$200,000. In such case, each shareholder would have received a capital gain dividend of \$1 per share instead of \$2 per share.

(ii) For purposes of section 857(b)(3)(C) and this paragraph, the net capital gain for a taxable year ending after October 4, 1976, is deemed not to exceed the real estate investment trust taxable income determined by taking into account the net operating loss deduction for the taxable year but not

the deduction for dividends paid. See example 2 in §1.172-5(a)(4).

(2) In the case of capital gain dividends designated with respect to any taxable year of a real estate investment trust ending after December 31, 1969, and beginning before January 1, 1975 (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 858), the real estate investment trust must include in its written notice designating the capital gain dividend a statement showing the shareholder's proportionate share of such dividend which is gain described in section 1201(d)(1) and his proportionate share of such dividend which is gain described in section 1201(d)(2). In determining the portion of the capital gain dividend which, in the hands of a shareholder, is gain described in section 1201(d)(1) or (2), the real estate investment trust shall consider that capital gain dividends for a taxable year are first made from its long-term capital gains which are not described in section 1201(d)(1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d)(1) or (2). A shareholder's proportionate share of gains which are described in section 1201(d)(1) is the amount which bears the same ratio to the amount paid to him as a capital gain dividend in respect of such year as (i) the aggregate amount of the trust's gains which are described in section 1201(d)(1) and paid to all shareholders bears to (ii) the aggregate amount of the capital gain dividend paid to all shareholders in respect of such year. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every real estate investment trust shall keep a record of the proportion of each capital gain dividend (to which this subparagraph applies) which is gain described in section 1201(d)(1) or (2).

(f) *Mailing of written notice to shareholders*—(1) *General rule.* Except as provided in paragraph (f)(2) of this section, the written notice designating a dividend or part thereof as a capital gain dividend must be mailed to the shareholders not later than 30 days after the

§ 1.857-7

26 CFR Ch. I (4-1-15 Edition)

close of the taxable year of the real estate investment trust.

(2) *Net capital gain resulting from a determination.* If, as a result of a determination (as defined in section 860(e)), occurring after October 4, 1976, there is an increase in the amount by which the net capital gain exceeds the deduction for dividends paid (determined with reference to capital gains dividends only) for the taxable year, then a real estate investment trust may designate a dividend (or part thereof) as a capital gain dividend in a written notice mailed to its shareholders at any time during the 120-day period immediately following the date of the determination. The designation may be made with respect to a dividend (or part thereof) paid during the taxable year to which the determination applies (including a dividend considered as paid during the taxable year pursuant to section 858). A deficiency dividend (as defined in section 860(f)), or a part thereof, that is paid with respect to the taxable year also may be designated as a capital gain dividend by the real estate investment trust (or by the acquiring corporation to which section 381(c)(25) applies) before the expiration of the 120-day period immediately following the determination. However, the aggregate amount of the dividends (or parts thereof) that may be designated as capital gain dividends after the date of the determination shall not exceed the amount of the increase in the excess of the net capital gain over the deduction for dividends paid (determined with reference to capital gains dividends only) that results from the determination. The date of a deter-

mination shall be established in accordance with § 1.860-2(b)(1).

Redesignated and amended by T.D. 7767, 46 FR 11277, 11279, and 11283, Feb. 6, 1981; T.D. 7936, 49 FR 2107, Jan. 18, 1984; T.D. 8107, 51 FR 43347, Dec. 2, 1986]

§ 1.857-7 Earnings and profits of a real estate investment trust.

(a) Any real estate investment trust whether or not such trust meets the requirements of section 857(a) and paragraph (a) of § 1.857-1 for any taxable year beginning after December 31, 1960 shall apply paragraph (b) of this section in computing its earnings and profits for such taxable year.

(b) In the determination of the earnings and profits of a real estate investment trust, section 857(d) provides that such earnings and profits for any taxable year (but not the accumulated earnings and profits) shall not be reduced by any amount which is not allowable as a deduction in computing its taxable income for the taxable year. Thus, if a trust would have had earnings and profits of \$500,000 for the taxable year except for the fact that it had a net capital loss of \$100,000, which amount was not deductible in determining its taxable income, its earnings and profits for that year if it is a real estate investment trust would be \$500,000. If the real estate investment trust had no accumulated earnings and profits at the beginning of the taxable year, in determining its accumulated earnings and profits as of the beginning of the following taxable year, the earnings and profits for the taxable year to be considered in such computation would amount to \$400,000 assuming

that there had been no distribution from such earnings and profits. If distributions had been made in the taxable year in the amount of the earnings and profits then available for distribution, \$500,000, the trust would have as of the beginning of the following taxable year neither accumulated earnings and profits nor a deficit in accumulated earnings and profits, and would begin such year with its paid-in capital reduced by \$100,000, an amount equal to the excess of the \$500,000 distributed over the \$400,000 accumulated earnings and profits which would otherwise have been carried into the following taxable year. For purposes of section 857(d) and this section, if an amount equal to any net loss derived from prohibited transactions is included in real estate investment trust taxable income pursuant to section 857(b)(2)(F), that amount shall be considered to be an amount which is not allowable as a deduction in computing taxable income for the taxable year. The earnings and profits for the taxable year (but not the accumulated earnings and profits) shall not be considered to be less than (i) in the case of a taxable year ending before October 5, 1976, the amount (if any) of the net capital gain for the taxable year, or (ii) in the case of a taxable year ending after December 31, 1973, the amount (if any), of the excess of the net income from foreclosure property for the taxable year over the tax imposed thereon by section 857(b)(4)(A).

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2))); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749; 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4088, Apr. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.857-8 Records to be kept by a real estate investment trust.

(a) *In general.* Under section 857(a)(2) a real estate investment trust is re-

quired to keep such records as will disclose the actual ownership of its outstanding stock. Thus, every real estate investment trust shall maintain in the internal revenue district in which it is required to file its income tax return permanent records showing the information relative to the actual owners of its stock contained in the written statements required by this section to be demanded from its shareholders. Such records shall be kept at all times available for inspection by any internal revenue officer or employee, and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(b) *Actual owner of stock.* The actual owner of stock of a real estate investment trust is the person who is required to include in gross income in his return the dividends received on the stock. Generally, such person is the shareholder of record of the real estate investment trust. However, where the shareholder of record is not the actual owner of the stock, the stockholding record of the real estate investment trust may not disclose the actual ownership of such stock. Accordingly, the real estate investment trust shall demand written statements from shareholders of record disclosing the actual owners of stock as required in paragraph (d) of this section.

(c) *Stock ownership for personal holding company determination.* For the purpose of determining under section 856(a)(6) whether a trust, claiming to be a real estate investment trust, is a personal holding company, the permanent records of the trust shall show the maximum number of shares of the trust (including the number and face value of securities convertible into stock of the trust) to be considered as actually or constructively owned by each of the actual owners of any of its stock at any time during the last half of the trust's taxable year, as provided in section 544.

(d) *Statements to be demanded from shareholders.* The information required by paragraphs (b) and (c) of this section shall be set forth in written statements which shall be demanded from shareholders of record as follows:

§ 1.857-9

26 CFR Ch. I (4-1-15 Edition)

(1) In the case of a trust having 2,000 or more shareholders of record of its stock on any dividend record date, from each record holder of 5 percent or more of its stock; or

(2) In the case of a trust having less than 2,000 and more than 200 shareholders of record of its stock on any dividend record date, from each record holder of 1 percent or more of its stock; or

(3) In the case of a trust having 200 or less shareholders of record of its stock on any dividend record date, from each record holder of one-half of 1 percent or more of its stock.

(e) *Demands for statements.* The written statements from shareholders of record shall be demanded by the real estate investment trust in accordance with paragraph (d) of this section within 30 days after the close of the real estate investment trust's taxable year (or before June 1, 1962, whichever is later). When making demand for such written statements, the trust shall inform each such shareholder of his duty to submit at the time he files his income tax return (or before July 1, 1962, whichever is later) the statements which are required by § 1.857-9 if he fails or refuses to comply with such demand. A list of the persons failing or refusing to comply in whole or in part with the trust's demand for statements under this section shall be maintained as a part of the trust's records required by this section. A trust which fails to keep such records to show, to the extent required by this section, the actual ownership of its outstanding stock shall be taxable as an ordinary corporation and not as a real estate investment trust.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4088, Apr. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.857-9 Information required in returns of shareholders.

(a) *In general.* Any person who fails or refuses to submit to a real estate investment trust the written statements required under § 1.857-8 to be demanded by such trust from its shareholders of record shall submit at the time he files his income tax return for his taxable year which ends with, or includes, the last day of the trust's taxable year (or before July 1, 1962, whichever is later) a statement setting forth the information required by this section.

(b) *Information required—(1) Shareholder of record not actual owner.* In the case of any person holding shares of stock in any trust claiming to be a real estate investment trust who is not the actual owner of such stock, the name and address of each actual owner, the number of shares owned by each actual owner at any time during such person's taxable year, and the amount of dividends belonging to each actual owner.

(2) *Actual owner of shares.* In the case of an actual owner of shares of stock in any trust claiming to be a real estate investment trust—

(i) The name and address of each such trust, the number of shares actually owned by him at any and all times during his taxable year, and the amount of dividends from each such trust received during his taxable year;

(ii) If shares of any such trust were acquired or disposed of during such person's taxable year, the name and address of the trust, the number of shares acquired or disposed of, the dates of acquisition or disposition, and the names and addresses of the persons from whom such shares were acquired or to whom they were transferred;

(iii) If any shares of stock (including securities convertible into stock) of any such trust are also owned by any member of such person's family (as defined in section 544(a)(2)), or by any of his partners, the name and address of the trust, the names and addresses of such members of his family and his partners, and the number of shares owned by each such member of his family or partner at any and all times during such person's taxable year; and

(iv) The names and addresses of any corporation, partnership, association, or trust, in which such person had a

Internal Revenue Service, Treasury

§ 1.858-1

beneficial interest of 10 percent or more at any time during his taxable year.

§ 1.857-10 Information returns.

Nothing in §§ 1.857-8 and 1.857-9 shall be construed to relieve a real estate investment trust or its shareholders from the duty of filing information returns required by regulations prescribed under the provisions of subchapter A, chapter 61 of the Code.

(Sec. 856(d)(4) (90 Stat. 1750; 26 U.S.C. 856(d)(4)); sec. 856(e)(5) (88 Stat. 2113; 26 U.S.C. 856(e)(5)); sec. 856(f)(2) (90 Stat. 1751; 26 U.S.C. (856(f)(2)); sec. 856(g)(2) (90 Stat. 1753; 26 U.S.C. 856(g)(2)); sec. 858(a) (74 Stat. 1008; 26 U.S.C. 858(a)); sec. 859(c) (90 Stat. 1743; 26 U.S.C. 859(c)); sec. 859(e) (90 Stat. 1744; 26 U.S.C. 859(e)); sec. 6001 (68A Stat. 731; 26 U.S.C. 6001); sec. 6011 (68A Stat. 732; 26 U.S.C. 6011); sec. 6071 (68A Stat. 749, 26 U.S.C. 6071); sec. 6091 (68A Stat. 752; 26 U.S.C. 6091); sec. 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954))

[T.D. 6598, 27 FR 4089, Apr. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.857-11 Non-REIT earnings and profits.

(a) *Applicability of section 857(a)(3)(A).* A real estate investment trust does not satisfy section 857(a)(3)(A) unless—

(1) Part II of subchapter M applied to the trust for all its taxable years beginning after February 28, 1986; and

(2) For each corporation to whose earnings and profits the trust succeeded by the operation of section 381, part II of subchapter M applied for all the corporation's taxable years beginning after February 28, 1986.

(b) *Applicability of section 857(a)(3)(B); in general.* A real estate investment trust does not satisfy section 857(a)(3)(B) unless, as of the close of the taxable year, it has no earnings and profits other than earnings and profits that—

(1) Were earned by a corporation in a year for which part II of subchapter M applied to the corporation and, at all times thereafter, were the earnings and profits of a corporation to which part II of subchapter M applied; or

(2) By the operation of section 381 pursuant to a transaction that occurred before December 22, 1992, became the earnings and profits of a corporation to which part II of subchapter M applied and, at all times thereafter, were the earnings and profits of a corporation to which part II of subchapter M applied.

(c) *Distribution procedures similar to those for regulated investment companies to apply.* Distribution procedures similar to those in section 852(e) for regulated investment companies apply to non-REIT earnings and profits of real estate investment trusts.

(d) *Effective date.* This regulation is effective for taxable years ending on or after December 22, 1992.

(e) For treatment of net built-in gain assets of a C corporation that become assets of a REIT, see § 1.337(d)-5T.

[T.D. 8483, 58 FR 43798, Aug. 18, 1993; as amended by T.D. 8872, 65 FR 5777, Feb. 7, 2000]

§ 1.858-1 Dividends paid by a real estate investment trust after close of taxable year.

(a) *General rule.* Under section 858, a real estate investment trust may elect to treat certain dividends that are distributed within a specified period after the close of a taxable year as having been paid during the taxable year. The dividend is taken into account in determining the deduction for dividends paid for the taxable year in which it is treated as paid. The dividend may be an ordinary dividend or, subject to the requirements of sections 857(b)(3)(C) and 858(c), a capital gain dividend. The trust may make the dividend declaration required by section 858(a)(1) either before or after the close of the taxable year as long as the declaration is made before the time prescribed by law for

filing its return for the taxable year (including the period of any extension of time granted for filing the return).

(b) *Election*—(1) *Method of making election*. The election must be made in the return filed by the trust for the taxable year. The election shall be made by treating the dividend (or portion thereof) to which the election applies as a dividend paid during the taxable year of the trust in computing its real estate investment trust taxable income and, if applicable, the alternative tax imposed by section 857(b)(3)(A). (In the case of an election with respect to a taxable year ending before October 5, 1976, if the dividend (or portion thereof) to which the election is to apply is a capital gain dividend, the trust shall treat the dividend as paid during such taxable year in computing the amount of capital gains dividends paid during the taxable year.) In the case of an election with respect to a taxable year beginning after October 4, 1976, the trust must also specify in its return (or in a statement attached to its return) the exact dollar amount that is to be treated as having been paid during the taxable year.

(2) *Limitation based on earnings and profits*. The election provided in section 858(a) may be made only to the extent that the earnings and profits of the taxable year (computed with the application of sections 857(d) and § 1.857-7) exceed the total amount of distributions out of such earnings and profits actually made during the taxable year. For purposes of the preceding sentence, deficiency dividends and distributions with respect to which an election has been made for a prior year under section 858(a) are disregarded in determining the total amount of distributions out of earnings and profits actually made during the taxable year. The dividend or portion thereof, with respect to which the real estate investment trust has made a valid election under section 858(a), shall be considered as paid out of the earnings and profits of the taxable year for which such election is made, and not out of the earnings and profits of the taxable year in which the distribution is actually made.

(3) *Additional limitation based on amount specified*. The amount treated

under section 858(a) as having been paid in a taxable year beginning after October 4, 1976, cannot exceed the lesser of (i) the dollar amount specified by the trust in its return (or a statement attached thereto) in making the election or (ii) the amount allowable under the limitation prescribed in paragraph (b)(2) of this section.

(4) *Irrevocability of the election*. After the expiration of the time for filing the return for the taxable year for which an election is made under section 858(a), such election shall be irrevocable with respect to the dividend or portion thereof to which it applies.

(c) *Receipt by shareholders*. Under section 858(b), the dividend or portion thereof, with respect to which a valid election has been made, will be includable in the gross income of the shareholders of the real estate investment trust for the taxable year in which the dividend is received by them.

(d) *Illustrations*. The application of paragraphs (a), (b), and (c) of this section may be illustrated by the following examples:

Example 1. The X Trust, a real estate investment trust, had taxable income (and earnings and profits) for the calendar year 1961 of \$100,000. During that year the trust distributed to shareholders taxable dividends aggregating \$88,000. On March 10, 1962, the trust declared a dividend of \$37,000 payable to shareholders on March 20, 1962. Such dividend consisted of the first regular quarterly dividend for 1962 of \$25,000 plus an additional \$12,000 representing that part of the taxable income for 1961 which was not distributed in 1961. On March 15, 1962, the X Trust filed its Federal income tax return and elected therein to treat \$12,000 of the total dividend of \$37,000 to be paid to shareholders on March 20, 1962, as having been paid during the taxable year 1961. Assuming that the X Trust actually distributed the entire amount of the dividend of \$37,000 on March 20, 1962, an amount equal to \$12,000 thereof will be treated for the purposes of section 857(a) as having been paid during the taxable year 1961. Upon distribution of such dividend the trust becomes a qualified real estate investment trust for the taxable year 1961. Such amount (\$12,000) will be considered by the X Trust as a distribution out of the earnings and profits for the taxable year 1961, and will be treated by the shareholders as a taxable dividend for the taxable year in which such distribution is received by them. However, assuming that the X Trust is not a qualified real estate investment trust for the calendar year 1962,

nevertheless, the \$12,000 portion of the dividend (paid on March 20, 1962) which the trust elected to relate to the calendar year 1961, will not qualify as a dividend for purposes of section 34, 116, or 243.

Example 2. The Y Trust, a real estate investment trust, had taxable income (and earnings and profits) for the calendar year 1964 of \$100,000, and for 1965 taxable income (and earnings and profits) of \$125,000. On January 1, 1964, the trust had a deficit in its earnings and profits accumulated since February 28, 1913, of \$115,000. During the year 1964 the trust distributed to shareholders taxable dividends aggregating \$85,000. On March 5, 1965, the trust declared a dividend of \$65,000 payable to shareholders on March 31, 1965. On March 15, 1965, the Y Trust filed its Federal income tax return in which it included \$40,000 of the total dividend of \$65,000 payable to shareholders on March 31, 1965, as a dividend paid by it during the taxable year 1964. On March 31, 1965, the Y Trust distributed the entire amount of the dividend of \$65,000 declared on March 5, 1965. The election under section 858(a) is valid only to the extent of \$15,000, the amount of the undistributed earnings and profits for 1964 (\$100,000 earnings and profits less \$85,000 distributed during 1964). The remainder (\$50,000) of the \$65,000 dividend paid on March 31, 1965, could not be the subject of an election, and such amount will be regarded as a distribution by the Y Trust out of earnings and profits for the taxable year 1965. Assuming that the only other distribution by the Y Trust during 1965 was a distribution of \$75,000 paid as a dividend on October 31, 1965, the total amount of the distribution of \$65,000 paid on March 31, 1965, is to be treated by the shareholders as taxable dividends for the taxable year in which such dividend is received. The Y Trust will treat the amount of \$15,000 as a distribution of the earnings or profits of the trust for the taxable year 1964, and the remaining \$50,000 as a distribution of the earnings or profits for the year 1965. The distribution of \$75,000 on October 31, 1966, is, of course, a taxable dividend out of the earnings and profits for the year 1965.

Example 3. Assume the facts are the same as in example 2, except that the taxable years involved are calendar years 1977 and 1978, and Y Trust specified in its Federal income tax return for 1977 that the dollar amount of \$40,000 of the \$65,000 distribution payable to shareholders on March 31, 1978, is to be treated as having been paid in 1977. The result will be the same as in example 2, since the amount of the undistributed earnings and profits for 1977 is less than the \$40,000 amount specified by Y Trust in making its election. Accordingly, the election is valid only to the extent of \$15,000. Y Trust will treat the amount of \$15,000 as a distribution, in 1977, of earnings and profits of the trust for the taxable year 1977 and the remaining

\$50,000 as a distribution, in 1978, of the earnings and profits for 1978.

(e) *Notice to shareholders.* Section 858(c) provides that, in the case of dividends with respect to which a real estate investment trust has made an election under section 858(a), any notice to shareholders required under part II, subchapter M, chapter 1 of the Code, with respect to such amounts, shall be made not later than 30 days after the close of the taxable year in which the distribution is made. Thus, the notice requirement of section 857(b)(3)(C) and paragraph (f) of § 1.857-6 with respect to capital gains dividends may be satisfied with respect to amounts to which section 858(a) and this section apply if the notice relating to such amounts is mailed to the shareholders not later than 30 days after the close of the taxable year in which the distribution is made. If the notice under section 858(c) relates to an election with respect to any capital gains dividends, such capital gains dividends shall be aggregated by the real estate investment trust with the designated capital gains dividends actually paid during the taxable year to which the election applies (not including deficiency dividends or dividends with respect to which an election has been made for a prior taxable year under section 858) to determine whether the aggregate of the designated capital gains dividends with respect to such taxable year exceeds the net capital gain of the trust. See section 857(b)(3)(C) and paragraph (f) of § 1.857-6.

[T.D. 6598, 27 FR 4089, Apr. 28, 1962, as amended by T.D. 7767, 46 FR 11279, Feb. 6, 1981]

§ 1.860-1 Deficiency dividends.

Section 860 allows a qualified investment entity to be relieved from the

payment of a deficiency in (or to be allowed a credit or refund of) certain taxes. "Qualified investment entity" is defined in section 860(b). The taxes referred to are those imposed by sections 852(b) (1) and (3), 857(b) (1) or (3), the minimum tax on tax preferences imposed by section 56 and, if the entity fails the distribution requirements of section 852(a)(1)(A) or 857(a)(1) (as applicable), the corporate income tax imposed by section 11(a) or 1201(a). The method provided by section 860 is to allow an additional deduction for a dividend distribution (that meets the requirements of section 860 and § 1.860-2) in computing the deduction for dividends paid for the taxable year for which the deficiency is determined. A deficiency dividend may be an ordinary dividend or, subject to the limitations of sections 852(b)(3)(C), 857(b)(3)(C), and 860(f)(2)(B), may be a capital gain dividend.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2107, Jan. 18, 1984]

§ 1.860-2 Requirements for deficiency dividends.

(a) *In general*—(1) *Determination, etc.* A qualified investment entity is allowed a deduction for a deficiency dividend only if there is a determination (as defined in section 860(e) and paragraph (b)(1) of this section) that results in an adjustment (as defined in section 860(d) (1) or (2)) for the taxable year for which the deficiency dividend is paid. An adjustment does not include an increase in the excess of (i) the taxpayer's interest income excludable from gross income under section 103(a) over (ii) its deductions disallowed under sections 265 and 171(a)(2).

(2) *Payment date and claim.* The deficiency dividend must be paid on, or within 90 days after, the date of the determination and before the filing of a claim under section 860(g) and paragraph (b)(2) of this section. This claim must be filed within 120 days after the date of the determination.

(3) *Nature and amount of distribution.* (i) The deficiency dividend must be a distribution of property (including money) that would have been properly taken into account in computing the

dividends paid deduction under section 561 for the taxable year for which tax liability resulting from the determination exists if the property had been distributed during that year. Thus, if the distribution would have been a dividend under section 316(a) if it had been made during the taxable year for which the determination applies, and the distribution may qualify under sections 316(b)(3), 562(a), and 860(f)(1), even though the distributing corporation, trust, or association has no current or accumulated earnings and profits for the taxable year in which the distribution is actually made. The amount of the distribution is determined under section 301 as of the date of the distribution.

The amount of the deduction is subject to the applicable limitations under sections 562 and 860(f)(2). Thus, if the entity distributes to an individual shareholder property (other than money) which on the date of the distribution has a fair market value in excess of its adjusted basis in the hands of the entity, the amount of the deficiency dividend in the individual's hands for purposes of section 316(b)(3) is determined by using the property's fair market value on that date. Nevertheless, the amount of the deficiency dividend the entity may deduct is limited, under § 1.562-1(a), to the adjusted basis of the property and the amount taxable to the individual as a dividend is determined by reference to the current and accumulated earnings and profits for the year to which the determination applies.

(ii) The qualified investment entity does not have to distribute the full amount of the adjustment in order to pay a deficiency dividend. For example, assume that in 1983 a determination with respect to a calendar year regulated investment company results in an increase of \$100 in investment company taxable income (computed without the dividends paid deduction) for 1981 and no other change. The regulated investment company may choose to pay a deficiency dividend of \$100 or of any lesser amount and be allowed a dividends paid deduction for 1981 for the amount of that deficiency dividend.

(4) *Status of distributor.* The corporation, trust, or association that pays the

deficiency dividend does not have to be a qualified investment entity at the time of payment.

(5) *Certain definitions to apply.* For purposes of sections 860(d) (defining adjustment) and (f)(2) (limitations) the definitions of the terms “investment company taxable income,” “real estate investment trust taxable income,” and “capital gains dividends” in sections 852(b)(2), 857(b)(2), 852(b)(3)(C), and 857(b)(3)(C) apply, as appropriate to the particular entity.

(b) *Determination and claim for deduction—(1) Determination.* For purposes of applying section 860(e), the following rules apply:

(i) The date of determination by a decision of the United States Tax Court, the date upon which a judgment of a court becomes final, and the date of determination by a closing agreement shall be determined under the rules in §1.547-2(b)(1) (ii), (iii), and (iv).

(ii) A determination under section 860(e)(3) may be made by an agreement signed by the district director or another official to whom authority to sign the agreement is delegated, and by or on behalf of the taxpayer. The agreement shall set forth the amount, if any, of each adjustment described in subparagraphs (A), (B), and (C) of section 860(d) (1) or (2) (as appropriate) for the taxable year and the amount of the liability for any tax imposed by section 11(a), 56(a), 852(b)(1), 852(b)(3)(A), 857(b)(1), 857(b)(3)(A), or 1201(a) for the taxable year. The agreement shall also set forth the amount of the limitation (determined under section 860(f)(2)) on the amount of deficiency dividends that can qualify as capital gain dividends and ordinary dividends, respectively, for the taxable year. An agreement under this subdivision (ii) which is signed by the district director (or other delegate) shall be sent to the taxpayer at its last known address by either registered or certified mail. For further guidance regarding the definition of last known address, see §301.6212-2 of this chapter. If registered mail is used, the date of registration is the date of determination. If certified mail is used, the date of the postmark on the sender's receipt is the date of determination. However, if a dividend is paid by the taxpayer before the reg-

istration or postmark date, but on or after the date the agreement is signed by the district director (or other delegate), the date of determination is the date of signing.

(2) *Claim for deduction.* A claim for deduction for a deficiency dividend shall be made, with the requisite declaration, on Form 976 and shall contain the following information and have the following attachments:

(i) The name, address, and taxpayer identification number of the corporation, trust, or association;

(ii) The amount of the deficiency and the taxable year or years involved;

(iii) The amount of the unpaid deficiency or, if the deficiency has been paid in whole or in part, the date of payment and the amount thereof;

(iv) A statement as to how the deficiency was established (*i.e.*, by an agreement under section 860(e)(3), by a closing agreement under section 7121, or by a decision of the Tax Court or court judgment);

(v) Any date or other information with respect to the determination that is required by Form 976;

(vi) The amount and date of payment of the dividend with respect to which the claim for the deduction for deficiency dividends is filed;

(vii) The amount claimed as a deduction for deficiency dividends;

(viii) If the amount claimed as a deduction for deficiency dividends includes any amount designated (or to be designated) as capital gain dividends, the amount of capital gain dividends for which a deficiency dividend deduction is claimed;

(ix) Any other information required by the claim form;

(x) A certified copy of the resolution of the trustees, directors, or other authority authorizing the payment of the dividend with respect to which the claim is filed; and

(xi) A copy of any court decision, judgment, agreement, or other document required by Form 976.

(3) *Filing claim.* The claim, together with the accompanying documents, shall be filed with the district director, or director of the internal revenue service center, with whom the income tax return for the taxable year for which the determination applies was

filed. In the event that the determination is an agreement with the district director (or other delegate) described in section 860(e)(3) and paragraph (b)(1)(ii) of this section, the claim may be filed with the district director with whom (or pursuant to whose delegation) the agreement was made.

(The reporting requirements of this section were approved by the Office of Management and Budget under control number 1545-0045)

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2107, Jan. 18, 1984; 49 FR 3177, Jan. 26, 1984, as amended by T.D. 8939, 66 FR 2819, Jan. 12, 2001]

§ 1.860-3 Interest and additions to tax.

(a) *In general.* If a qualified investment entity is allowed a deduction for deficiency dividends with respect to a taxable year, under section 860(c)(1) the tax imposed on the entity by chapter 1 of the Code (computed by taking into account the deduction) for that year is deemed to be increased by the amount of the deduction. This deemed increase in tax, however, applies solely for purposes of determining the liability of the entity for interest under subchapter A of chapter 67 of the Code and for additions to tax and additional amounts under chapter 68 of the Code. For purposes of applying subchapter A of chapter 67 and 68, the last date prescribed for payment of the deemed increase in tax is considered to be the last date prescribed for the payment of tax (determined in the manner provided in section 6601(b)) for the taxable year for which the deduction for deficiency dividends is allowed. The deemed increase in tax is considered to be paid as of the date that the claim for the deficiency dividend deduction described in section 860(g) is filed.

(b) *Overpayments of tax.* If a qualified investment entity is entitled to a credit or refund of an overpayment of the tax imposed by chapter 1 of the Code for the taxable year for which the deficiency dividend deduction is allowed, then, for purposes of computing interest, additions to tax, and additional amounts, the payment (or payments) that result in the overpayment and that precede the filing of the claim described in section 860(g) will be applied

against and reduce the increase in tax that is deemed to occur under section 860(c)(1).

(c) *Examples.* This section is illustrated by the following examples:

Example 1. Corporation X is a real estate investment trust that files its income tax return on a calendar year basis. X receives an extension of time until June 15, 1978, to file its 1977 income tax return and files the return on May 15, 1978. X does not elect to pay any tax due in installments. For 1977, X reports real estate investment trust taxable income (computed without the dividends paid deduction) of \$100, a dividends paid deduction of \$100, and no tax liability. Following an examination of X's 1977 return, the district director and X enter into an agreement which is a determination under section 860(e)(3). The determination is dated November 1, 1979, and increases X's real estate investment trust taxable income (computed without the dividends paid deduction) by \$20 to \$120. Thus, taking into account the \$100 of dividends paid in 1977, X has undistributed real estate investment trust taxable income of \$20 as a result of the determination. X pays a dividend of \$20 on November 10, 1979, files a claim for a deficiency dividend deduction of this \$20 pursuant to section 860(g) on November 15, 1979, and is allowed a deficiency dividend deduction of \$20 for 1977. After taking into account this deduction, X has no real estate investment trust taxable income and meets the distribution requirements of section 857(a)(1). However, for purposes of section 6601 (relating to interest on underpayment of tax), the tax imposed by chapter 1 of the Code on X for 1977 is deemed increased by this \$20, and the last date prescribed for payment of the tax is March 15, 1978 (the due date of the 1977 return determined without any extension of time). The tax of \$20 is deemed paid on November 15, 1979, the date the claim for the deficiency dividend deduction is filed. Thus, X is liable for interest on \$20, at the rate established under section 6621, for the period from March 15, 1978, to November 15, 1979. Also, for purposes of determining whether X is liable for any addition to tax or additional amount imposed by chapter 68 of the Code (including the penalty prescribed by section 6697), the amount of tax imposed on X by chapter 1 of the Code is deemed to be increased by \$20 (the amount of the deficiency dividend deduction allowed), the last date prescribed for payment of such tax is March 15, 1978, and the tax of \$20 is deemed to be paid on November 15, 1979. X, however, is not subject to interest and penalties for the amount of any tax for which it would have been liable under section 11(a), 56(a), 1201(a), or 857(b) had it not been allowed the \$20 deduction for deficiency dividends.

Internal Revenue Service, Treasury

§ 1.860A-0

Example 2. Assume the facts are the same as in example (1) except that the district director, upon examining X's income tax return, asserts an income tax deficiency of \$4, based on an asserted increase of \$10 in real estate investment trust taxable income, and no agreement is entered into between the parties. X pays the \$4 on June 1, 1979, and files suit for refund in the United States District Court. The District Court, in a decision which becomes final on November 1, 1980, holds that X did fail to report \$10 of real estate investment trust taxable income and is not entitled to any refund. (No other item of income or deduction is in issue.) X pays a dividend of \$10 on November 10, 1980, files a claim for a deficiency dividend deduction of this \$10 on November 15, 1980, and is allowed a deficiency dividend deduction of \$10 for 1977. Assume further that \$4 is refunded to X on December 31, 1980, as the result of the \$10 deficiency dividend deduction being allowed. Also assume that any assessable penalties, additional amounts, and additions to tax (including the penalty imposed by section 6697) for which X is liable are paid within 10 days of notice and demand, so that no interest is imposed on such penalties, etc. X's liability for interest for the period March 15, 1978, to June 1, 1979, is determined with respect to \$10 (the amount of the deficiency dividend deduction allowed). X's liability for interest for the period June 1, 1979, to November 15, 1980, is determined with respect to \$6, *i.e.*, \$10 minus the \$4 payment. X is entitled to interest on the \$4 overpayment for the period described in section 6611(b)(2), beginning on November 15, 1980.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2108, Jan. 18, 1984]

§ 1.860-4 Claim for credit or refund.

If the allowance of a deduction for a deficiency dividend results in an overpayment of tax, the taxpayer, in order to secure credit or refund of the overpayment, must file a claim on Form 1120X in addition to the claim for the deficiency dividend deduction required under section 860(g). The credit or refund will be allowed as if on the date of the determination (as defined in section 860(e)) two years remained before the expiration of the period of limitations on the filing of claim for refund

for the taxable year to which the overpayment relates.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

[T.D. 7936, 49 FR 2109, Jan. 18, 1984]

§ 1.860-5 Effective date.

(a) *In general.* Section 860 and §§1.860-1 through 1.860-4 apply with respect to determinations after November 6, 1978.

(b) *Prior determination of real estate investments trusts.* Section 859 (as in effect before the enactment of the Revenue Act of 1978) applies to determinations with respect to real estate investment trusts occurring after October 4, 1976, and before November 7, 1978. In the case of such a determination, the rules in §§1.860-1 through 1.860-4 apply, a reference in this chapter 1 to section 860 (or to a particular provision of section 860) shall be considered to be a reference to section 859 (or to the corresponding substantive provision of section 859), as in effect before enactment of the Revenue Act of 1978, and "qualified investment entity" in §§1.381(c)25-1(a) and 1.860-1 through 1.860-3 means a real estate investment trust.

(Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805; sec. 860(e) (92 Stat. 2849, 26 U.S.C. 860(e)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)))

 - (ii) Time for furnishing statement.
 - (4) Reports to the Internal Revenue Service.
 - (f) Information returns for persons engaged in a trade or business.

§ 1.860G-1 Definition of regular and residual interests.

- (a) Regular interest.
 - (1) Designation as a regular interest.
 - (2) Specified portion of the interest payments on qualified mortgages.
 - (i) In general.
 - (ii) Specified portion cannot vary.
 - (iii) Defaulted or delinquent mortgages.
 - (iv) No minimum specified principal amount is required.
 - (v) Specified portion includes portion of interest payable on regular interest.
 - (vi) Examples.
 - (3) Variable rate.
 - (i) Rate based on current interest rate.
 - (ii) Weighted average rate.

- (A) In general.
- (B) Reduction in underlying rate.
- (iii) Additions, subtractions, and multiplications.
 - (iv) Caps and floors.
 - (v) Funds-available caps.
 - (A) In general.
 - (B) Facts and circumstances test.
 - (C) Examples.
 - (vi) Combination of rates.
 - (4) Fixed terms on the startup day.
 - (5) Contingencies prohibited.
 - (b) Special rules for regular interests.
 - (1) Call premium.
 - (2) Customary prepayment penalties received with respect to qualified mortgages.
 - (3) Certain contingencies disregarded.
 - (i) Prepayments, income, and expenses.
 - (ii) Credit losses.
 - (iii) Subordinated interests.
 - (iv) Deferral of interest.
 - (v) Prepayment interest shortfalls.
 - (vi) Remote and incidental contingencies.
 - (4) Form of regular interest.
 - (5) Interest disproportionate to principal.
 - (i) In general.
 - (ii) Exception.
 - (6) Regular interest treated as a debt instrument for all Federal income tax purposes.
 - (c) Residual interest.
 - (d) Issue price of regular and residual interests.
 - (1) In general.
 - (2) The public.

§ 1.860G-2 Other rules.

- (a) Obligations principally secured by an interest in real property.
 - (1) Tests for determining whether an obligation is principally secured.
 - (i) The 80-percent test.
 - (ii) Alternative test.
 - (2) Treatment of liens.
 - (3) Safe harbor.
 - (i) Reasonable belief that an obligation is principally secured.
 - (ii) Basis for reasonable belief.
 - (iii) Later discovery that an obligation is not principally secured.
 - (4) Interests in real property; real property.
 - (5) Obligations secured by an interest in real property.
 - (6) Obligations secured by other obligations; residual interests.
 - (7) Certain instruments that call for contingent payments are obligations.
 - (8) Release of a lien on an interest in real property securing a qualified mortgage; defeasance.
 - (9) Stripped bonds and coupons.
 - (b) Assumptions and modifications.
 - (1) Significant modifications are treated as exchanges of obligations.
 - (2) Significant modification defined.
 - (3) Exceptions.

§ 1.860A-1

26 CFR Ch. I (4-1-15 Edition)

(4) Modifications that are not significant modifications.

(5) Assumption defined.

(6) Pass-thru certificates.

(7) Test for determining whether an obligation continues to be principally secured following certain types of modifications.

(c) Treatment of certain credit enhancement contracts.

(1) In general.

(2) Credit enhancement contracts.

(3) Arrangements to make certain advances.

(i) Advances of delinquent principal and interest.

(ii) Advances of taxes, insurance payments, and expenses.

(iii) Advances to ease REMIC administration.

(4) Deferred payment under a guarantee arrangement.

(d) Treatment of certain purchase agreements with respect to convertible mortgages.

(1) In general.

(2) Treatment of amounts received under purchase agreements.

(3) Purchase agreement.

(4) Default by the person obligated to purchase a convertible mortgage.

(5) Convertible mortgage.

(e) Prepayment interest shortfalls.

(f) Defective obligations.

(1) Defective obligation defined.

(2) Effect of discovery of defect.

(g) Permitted investments.

(1) Cash flow investment.

(i) In general.

(ii) Payments received on qualified mortgages.

(iii) Temporary period.

(2) Qualified reserve funds.

(3) Qualified reserve asset.

(i) In general.

(ii) Reasonably required reserve.

(A) In general.

(B) Presumption that a reserve is reasonably required.

(C) Presumption may be rebutted.

(h) Outside reserve funds.

(i) Contractual rights coupled with regular interests in tiered arrangements.

(1) In general.

(2) Example.

(j) Clean-up call.

(1) In general.

(2) Interest rate changes.

(3) Safe harbor.

(k) Startup day.

§ 1.860G-3 Treatment of foreign persons.

(a) Transfer of a residual interest with tax avoidance potential.

(1) In general.

(2) Tax avoidance potential.

(i) Defined.

(ii) Safe harbor.

(3) Effectively connected income.

(4) Transfer by a foreign holder.

(b) Accounting for REMIC net income

(1) Allocation of partnership income to a foreign partner.

(2) Excess inclusion income allocated by certain pass-through entities to a foreign person.

[T.D. 8458, 57 FR 61299, Dec. 24, 1992; 58 FR 15089, Mar. 19, 1993, as amended by T.D. 8614, 60 FR 42787, Aug. 17, 1995; T.D. 9004, 67 FR 47453, July 19, 2002; T.D. 9128, 69 FR 26041, May 11, 2004; T.D. 9272, 71 FR 43365, Aug. 1, 2006; T.D. 9415, 73 FR 40172, July 14, 2008; T.D. 9463, 74 FR 47438, Sept. 16, 2009]

§ 1.860A-1 Effective dates and transition rules.

(a) *In general.* Except as otherwise provided in paragraph (b) of this section, the regulations under sections 860A through 860G are effective only for a qualified entity (as defined in § 1.860D-1(c)(3)) whose startup day (as defined in section 860G(a)(9) and § 1.860G-2(k)) is on or after November 12, 1991.

(b) *Exceptions—(1) Reporting regulations.* (i) Sections 1.860D-1(c) (1) and (3), and § 1.860D-1(d) (1) through (3) are effective after December 31, 1986.

(ii) Sections 1.860F-4 (a) through (e) are effective after December 31, 1986 and are applicable after that date except as follows:

(A) Section 1.860F-4(c)(1) is effective for REMICs with a startup day on or after November 10, 1988.

(B) Sections 1.860F-4(e)(1)(ii) (A) and (B) are effective for calendar quarters and calendar years beginning after December 31, 1988.

(C) Section 1.860F-4(e)(1)(ii)(C) is effective for calendar quarters and calendar years beginning after December 31, 1986 and ending before January 1, 1988.

(D) Section 1.860F-4(e)(1)(ii)(D) is effective for calendar quarters and calendar years beginning after December 31, 1987 and ending before January 1, 1990.

(2) *Tax avoidance rules—(i) Transfers of certain residual interests.* Section 1.860E-1(c) (concerning transfers of noneconomic residual interests) and § 1.860G-3(a)(4) (concerning transfers by a foreign holder to a United States person) are effective for transfers of residual interests on or after September 27, 1991.

(ii) *Transfers to foreign holders.* Generally, §1.860G-3(a) (concerning transfers of residual interests to foreign holders) is effective for transfers of residual interests after April 20, 1992. However, §1.860G-3(a) does not apply to a transfer of a residual interest in a REMIC by the REMIC's sponsor (or by another transferor contemporaneously with formation of the REMIC) on or before June 30, 1992, if—

(A) The terms of the regular interests and the prices at which regular interests were offered had been fixed on or before April 20, 1992;

(B) On or before June 30, 1992, a substantial portion of the regular interests in the REMIC were transferred, with the terms and at the prices that were fixed on or before April 20, 1992, to investors who were unrelated to the REMIC's sponsor at the time of the transfer; and

(C) At the time of the transfer of the residual interest, the expected future distributions on the residual interest were equal to at least 30 percent of the anticipated excess inclusions (as defined in §1.860E-2(a)(3)), and the transferor reasonably expected that the transferee would receive sufficient distributions from the REMIC at or after the time at which the excess inclusions accrue in an amount sufficient to satisfy the taxes on the excess inclusions.

(iii) *Residual interests that lack significant value.* The significant value requirement in §1.860E-1(a) (1) and (3) (concerning excess inclusions accruing to organizations to which section 593 applies) generally is effective for residual interests acquired on or after September 27, 1991. The significant value requirement in §1.860E-1(a) (1) and (3) does not apply, however, to residual interests acquired by an organization to which section 593 applies as a sponsor at formation of a REMIC in a transaction described in §1.860F-2(a)(1) if more than 50 percent of the interests in the REMIC (determined by reference to issue price) were sold to unrelated investors before November 12, 1991. The exception from the significant value requirement provided by the preceding sentence applies only so long as the sponsor owns the residual interests.

(3) *Excise taxes.* Section 1.860E-2(a)(1) is effective for transfers of residual in-

terests to disqualified organizations after March 31, 1988. Section 1.860E-2(b)(1) is effective for excess inclusions accruing to pass-thru entities after March 31, 1988.

(4) *Rate based on current interest rate—*
(i) *In general.* Section 1.860G-1(a)(3)(i) applies to obligations (other than transition obligations described in paragraph (b)(4)(iii) of this section) intended to qualify as regular interests that are issued on or after April 4, 1994.

(ii) *Rate based on index.* Section 1.860G-1(a)(3)(i) (as contained in 26 CFR part 1 revised as of April 1, 1994) applies to obligations intended to qualify as regular interests that—

(A) Are issued by a qualified entity (as defined in §1.860D-1(c)(3)) whose startup date (as defined in section 860G(a)(9) and §1.860G-2(k)) is on or after November 12, 1991; and

(B) Are either—

(1) Issued before April 4, 1994; or

(2) Transition obligations described in paragraph (b)(4)(iii) of this section.

(iii) *Transition obligations.* Obligations are described in this paragraph (b)(4)(iii) if—

(A) The terms of the obligations and the prices at which the obligations are offered are fixed before April 4, 1994; and

(B) On or before June 1, 1994, a substantial portion of the obligations are transferred, with the terms and at the prices that are fixed before April 4, 1994, to investors who are unrelated to the REMIC's sponsor at the time of the transfer.

(5) Accounting for REMIC net income of foreign persons. Section 1.860G-3(b) is applicable to REMIC net income (including excess inclusions) of a foreign person with respect to a REMIC residual interest if the first net income allocation under section 860C(a)(1) to the foreign person with respect to that interest occurs on or after August 1, 2006.

(6) *Exceptions for certain modified obligations.* Paragraphs (a)(8)(i), (b)(3)(v), (b)(3)(vi), and (b)(7) of §1.860G-2 apply to modifications made to the terms of

§ 1.860C-1

an obligation on or after September 16, 2009.

[T.D. 8458, 57 FR 61300, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993; 58 FR 15089, Mar. 19, 1993; T.D. 8614, 60 FR 42787, Aug. 17, 1995; T.D. 9272, 71 FR 43365, Aug. 1, 2006; T.D. 9415, 73 FR 40172, July 14, 2008; T.D. 9463, 74 FR 47438, Sept. 16, 2009]

§ 1.860C-1 Taxation of holders of residual interests.

(a) *Pass-thru of income or loss.* Any holder of a residual interest in a REMIC must take into account the holder's daily portion of the taxable income or net loss of the REMIC for each day during the taxable year on which the holder owned the residual interest.

(b) *Adjustments to basis of residual interests—*(1) *Increase in basis.* A holder's basis in a residual interest is increased by—

(i) The daily portions of taxable income taken into account by that holder under section 860C(a) with respect to that interest; and

(ii) The amount of any contribution described in section 860G(d)(2) made by that holder.

(2) *Decrease in basis.* A holder's basis in a residual interest is reduced (but not below zero) by—

(i) First, the amount of any cash or the fair market value of any property distributed to that holder with respect to that interest; and

(ii) Second, the daily portions of net loss of the REMIC taken into account under section 860C(a) by that holder with respect to that interest.

(3) *Adjustments made before disposition.* If any person disposes of a residual interest, the adjustments to basis prescribed in paragraph (b) (1) and (2) of this section are deemed to occur immediately before the disposition.

(c) *Counting conventions.* For purposes of determining the daily portion of REMIC taxable income or net loss under section 860C(a)(2), any reasonable convention may be used. An example of a reasonable convention is "30 days per month/90 days per quarter/360 days per year."

26 CFR Ch. I (4-1-15 Edition)

(d) For rules on the proper accounting for income from inducement fees, see § 1.446-6.

[T.D. 8458, 57 FR 61301, Dec. 24, 1992, as amended by T.D. 9128, 69 FR 26041, May 11, 2004]

§ 1.860C-2 Determination of REMIC taxable income or net loss.

(a) *Treatment of gain or loss.* For purposes of determining the taxable income or net loss of a REMIC under section 860C(b), any gain or loss from the disposition of any asset, including a qualified mortgage (as defined in section 860G(a)(3)) or a permitted investment (as defined in section 860G(a)(5) and § 1.860G-2(g)), is treated as gain or loss from the sale or exchange of property that is not a capital asset.

(b) *Deductions allowable to a REMIC—*

(1) *In general.* Except as otherwise provided in section 860C(b) and in paragraph (b) (2) through (5) of this section, the deductions allowable to a REMIC for purposes of determining its taxable income or net loss are those deductions that would be allowable to an individual, determined by taking into account the same limitations that apply to an individual.

(2) *Deduction allowable under section 163.* A REMIC is allowed a deduction, determined without regard to section 163(d), for any interest expense accrued during the taxable year.

(3) *Deduction allowable under section 166.* For purposes of determining a REMIC's bad debt deduction under section 166, debt owed to the REMIC is not treated as nonbusiness debt under section 166(d).

(4) *Deduction allowable under section 212.* A REMIC is not treated as carrying on a trade or business for purposes of section 162. Ordinary and necessary operating expenses paid or incurred by the REMIC during the taxable year are deductible under section 212, without regard to section 67. Any expenses that are incurred in connection with the formation of the REMIC and that relate to the organization of the REMIC and the issuance of regular and residual interests are not treated as expenses of the REMIC for which a deduction is allowable under section 212. See § 1.860F-2(b)(3)(ii) for treatment of those expenses.

(5) *Expenses and interest relating to tax-exempt income.* Pursuant to section 265(a), a REMIC is not allowed a deduction for expenses and interest allocable to tax-exempt income. The portion of a REMIC's interest expense that is allocable to tax-exempt interest is determined in the manner prescribed in section 265(b)(2), without regard to section 265(b)(3).

[T.D. 8458, 57 FR 61301, Dec. 24, 1992]

§ 1.860D-1 Definition of a REMIC.

(a) *In general.* A real estate mortgage investment conduit (or REMIC) is a qualified entity, as defined in paragraph (c)(3) of this section, that satisfies the requirements of section 860D(a). See paragraph (d)(1) of this section for the manner of electing REMIC status.

(b) *Specific requirements—(1) Interests in a REMIC—(i) In general.* A REMIC must have one class, and only one class, of residual interests. Except as provided in paragraph (b)(1)(ii) of this section, every interest in a REMIC must be either a regular interest (as defined in section 860G(a)(1) and § 1.860G-1(a)) or a residual interest (as defined in section 860G(a)(2) and § 1.860G-1(c)).

(ii) *De minimis interests.* If, to facilitate the creation of an entity that elects REMIC status, an interest in the entity is created and, as of the startup day (as defined in section 860G(a)(9) and § 1.860G-2(k)), the fair market value of that interest is less than the lesser of \$1,000 or 1/1,000 of one percent of the aggregate fair market value of all the regular and residual interests in the REMIC, then, unless that interest is specifically designated as an interest in the REMIC, the interest is not treated as an interest in the REMIC for purposes of section 860D(a) (2) and (3) and paragraph (B)(1)(i) of this section.

(2) *Certain rights not treated as interests.* Certain rights are not treated as interests in a REMIC. Although not an exclusive list, the following rights are not interests in a REMIC.

(i) *Payments for services.* The right to receive from the REMIC payments that represent reasonable compensation for services provided to the REMIC in the ordinary course of its operation is not an interest in the REMIC. Payments

made by the REMIC in exchange for services may be expressed as a specified percentage of interest payments due on qualified mortgages or as a specified percentage of earnings from permitted investments. For example, a mortgage servicer's right to receive reasonable compensation for servicing the mortgages owned by the REMIC is not an interest in the REMIC.

(ii) *Stripped interests.* Stripped bonds or stripped coupons not held by the REMIC are not interests in the REMIC even if, in a transaction preceding or contemporaneous with the formation of the REMIC, they and the REMIC's qualified mortgages were created from the same mortgage obligation. For example, the right of a mortgage servicer to receive a servicing fee in excess of reasonable compensation from payments it receives on mortgages held by a REMIC is not an interest in the REMIC. Further, if an obligation with a fixed principal amount provides for interest at a fixed or variable rate and for certain contingent payment rights (*e.g.*, a shared appreciation provision or a percentage of mortgagor profits provision), and the owner of the obligation contributes the fixed payment rights to a REMIC and retains the contingent payment rights, the retained contingent payment rights are not an interest in the REMIC.

(iii) *Reimbursement rights under credit enhancement contracts.* A credit enhancer's right to be reimbursed for amounts advanced to a REMIC pursuant to the terms of a credit enhancement contract (as defined in § 1.860G-2(c)(2)) is not an interest in the REMIC even if the credit enhancer is entitled to receive interest on the amounts advanced.

(iv) *Rights to acquire mortgages.* The right to acquire or the obligation to purchase mortgages and other assets from a REMIC pursuant to a clean-up call (as defined in § 1.860G-2(j)) or a qualified liquidation (as defined in section 860F(a)(4)), or on conversion of a convertible mortgage (as defined in § 1.860G-2(d)(5)), is not an interest in the REMIC.

(3) *Asset test—(i) In general.* For purposes of the asset test of section

860D(a)(4), substantially all of a qualified entity's assets are qualified mortgages and permitted investments if the qualified entity owns no more than a de minimis amount of other assets.

(ii) *Safe harbor.* The amount of assets other than qualified mortgages and permitted investments is de minimis if the aggregate of the adjusted bases of those assets is less than one percent of the aggregate of the adjusted bases of all of the REMIC's assets. Nonetheless, a qualified entity that does not meet this safe harbor may demonstrate that it owns no more than a de minimis amount of other assets.

(4) *Arrangements test.* Generally, a qualified entity must adopt reasonable arrangements designed to ensure that—

(i) Disqualified organizations (as defined in section 860E(e)(5)) do not hold residual interests in the qualified entity; and

(ii) If a residual interest is acquired by a disqualified organization, the qualified entity will provide to the Internal Revenue Service, and to the persons specified in section 860E(e)(3), information needed to compute the tax imposed under section 860E(e) on transfers of residual interests to disqualified organizations.

(5) *Reasonable arrangements—(i) Arrangements to prevent disqualified organizations from holding residual interests.* A qualified entity is considered to have adopted reasonable arrangements to ensure that a disqualified organization (as defined in section 860E(e)(5)) will not hold a residual interest if—

(A) The residual interest is in registered form (as defined in §5f.103-1(c) of this chapter); and

(B) The qualified entity's organizational documents clearly and expressly prohibit a disqualified organization from acquiring beneficial ownership of a residual interest, and notice of the prohibition is provided through a legend on the document that evidences ownership of the residual interest or through a conspicuous statement in a prospectus or private offering document used to offer the residual interest for sale.

(ii) *Arrangements to ensure that information will be provided.* A qualified entity is considered to have made reason-

able arrangements to ensure that the Internal Revenue Service and persons specified in section 860E(e)(3) as liable for the tax imposed under section 860E(e) receive the information needed to compute the tax if the qualified entity's organizational documents require that it provide to the Internal Revenue Service and those persons a computation showing the present value of the total anticipated excess inclusions with respect to the residual interest for periods after the transfer. See §1.860E-2(a)(5) for the obligation to furnish information on request.

(6) *Calendar year requirement.* A REMIC's taxable year is the calendar year. The first taxable year of a REMIC begins on the startup day and ends on December 31 of the same year. If the startup day is other than January 1, the REMIC has a short first taxable year.

(c) *Segregated pool of assets—(1) Formation of REMIC.* A REMIC may be formed as a segregated pool of assets rather than as a separate entity. To constitute a REMIC, the assets identified as part of the segregated pool must be treated for all Federal income tax purposes as assets of the REMIC and interests in the REMIC must be based solely on assets of the REMIC.

(2) *Identification of assets.* Formation of the REMIC does not occur until—

(i) The sponsor identifies the assets of the REMIC, such as through execution of an indenture with respect to the assets; and

(ii) The REMIC issues the regular and residual interests in the REMIC.

(3) *Qualified entity defined.* For purposes of this section, the term "qualified entity" includes an entity or a segregated pool of assets within an entity.

(d) *Election to be treated as a real estate mortgage investment conduit—(1) In general.* A qualified entity, as defined in paragraph (c)(3) of this section, elects to be treated as a REMIC by timely filing, for the first taxable year of its existence, a Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return, signed by a person authorized to sign that return under §1.860F-4(c). See §1.9100-1 for rules regarding

extensions of time for making elections. Once made, this election is irrevocable for that taxable year and all succeeding taxable years.

(2) *Information required to be reported in the REMIC's first taxable year.* For the first taxable year of the REMIC's existence, the qualified entity, as defined in paragraph (c)(3) of this section, must provide either on its return or in a separate statement attached to its return—

(i) The REMIC's employer identification number, which must not be the same as the identification number of any other entity,

(ii) Information concerning the terms and conditions of the regular interests and the residual interest of the REMIC, or a copy of the offering circular or prospectus containing such information,

(iii) A description of the prepayment and reinvestment assumptions that are made pursuant to section 1272(a)(6) and the regulations thereunder, including a statement supporting the selection of the prepayment assumption,

(iv) The form of the electing qualified entity under State law or, if an election is being made with respect to a segregated pool of assets within an entity, the form of the entity that holds the segregated pool of assets, and

(v) Any other information required by the form.

(3) *Requirement to keep sufficient records.* A qualified entity, as defined in paragraph (c)(3) of this section, that elects to be a REMIC must keep sufficient records concerning its investments to show that it has complied with the provisions of sections 860A through 860G and the regulations thereunder during each taxable year.

[T.D. 8366, 56 FR 49516, Sept. 30, 1991; T.D. 8458, 57 FR 61301, Dec. 24, 1992]

§ 1.860E-1 Treatment of taxable income of a residual interest holder in excess of daily accruals.

(a) *Excess inclusion cannot be offset by otherwise allowable deductions—(1) In general.* Except as provided in paragraph (a)(3) of this section, the taxable income of any holder of a residual interest for any taxable year is in no event less than the sum of the excess inclusions attributable to that holder's

residual interests for that taxable year. In computing the amount of a net operating loss (as defined in section 172(c)) or the amount of any net operating loss carryover (as defined in section 172(b)(2)), the amount of any excess inclusion is not included in gross income or taxable income. Thus, for example, if a residual interest holder has \$100 of gross income, \$25 of which is an excess inclusion, and \$90 of business deductions, the holder has taxable income of \$25, the amount of the excess inclusion, and a net operating loss of \$15 (\$75 of other income - \$90 of business deductions).

(2) *Affiliated groups.* If a holder of a REMIC residual interest is a member of an affiliated group filing a consolidated income tax return, the taxable income of the affiliated group cannot be less than the sum of the excess inclusions attributable to all residual interests held by members of the affiliated group.

(3) *Special rule for certain financial institutions—(i) In general.* If an organization to which section 593 applies holds a residual interest that has significant value (as defined in paragraph (a)(3)(iii) of this section), section 860E(a)(1) and paragraph (a)(1) of this section do not apply to that organization with respect to that interest. Consequently, an organization to which section 593 applies may use its allowable deductions to offset an excess inclusion attributable to a residual interest that has significant value, but, except as provided in section 860E(a)(4)(A), may not use its allowable deductions to offset an excess inclusion attributable to a residual interest held by any other member of an affiliated group, if any, of which the organization is a member. Further, a net operating loss of any other member of an affiliated group of which the organization is a member may not be used to offset an excess inclusion attributable to a residual interest held by that organization.

(ii) *Ordering rule—(A) In general.* In computing taxable income for any year, an organization to which section 593 applies is treated as having applied its allowable deductions for the year first to offset that portion of its gross income that is not an excess inclusion

and then to offset that portion of its income that is an excess inclusion.

(B) *Example.* The following example illustrates the provisions of paragraph (a)(3)(ii) of this section:

Example. Corp. X, a corporation to which section 593 applies, is a member of an affiliated group that files a consolidated return. For a particular taxable year, Corp. X has gross income of \$1,000, and of this amount, \$150 is an excess inclusion attributable to a residual interest that has significant value. Corp. X has \$975 of allowable deductions for the taxable year. Corp. X must apply its allowable deductions first to offset the \$850 of gross income that is not an excess inclusion, and then to offset the portion of its gross income that is an excess inclusion. Thus, Corp. X has \$25 of taxable income (\$1,000 - \$975), and that \$25 is an excess inclusion that may not be offset by losses sustained by other members of the affiliated group.

(iii) *Significant value.* A residual interest has significant value if—

(A) The aggregate of the issue prices of the residual interests in the REMIC is at least 2 percent of the aggregate of the issue prices of all residual and regular interests in the REMIC; and

(B) The anticipated weighted average life of the residual interests is at least 20 percent of the anticipated weighted average life of the REMIC.

(iv) *Determining anticipated weighted average life—*(A) *Anticipated weighted average life of the REMIC.* The anticipated weighted average life of a REMIC is the weighted average of the anticipated weighted average lives of all classes of interests in the REMIC. This weighted average is determined under the formula in paragraph (a)(3)(iv)(B) of this section, applied by treating all payments taken into account in computing the anticipated weighted average lives of regular and residual interests in the REMIC as principal payments on a single regular interest.

(B) *Regular interests that have a specified principal amount.* Generally, the anticipated weighted average life of a regular interest is determined by—

(1) Multiplying the amount of each anticipated principal payment to be made on the interest by the number of years (including fractions thereof) from the startup day (as defined in section 860G(a)(9) and § 1.860G-2(k)) to the related principal payment date;

(2) Adding the results; and

(3) Dividing the sum by the total principal paid on the regular interest.

(C) *Regular interests that have no specified principal amount or that have only a nominal principal amount, and all residual interests.* If a regular interest has no specified principal amount, or if the interest payments to be made on a regular interest are disproportionately high relative to its specified principal amount (as determined by reference to § 1.860G-1(b)(5)(i)), then, for purposes of computing the anticipated weighted average life of the interest, all anticipated payments on that interest, regardless of their designation as principal or interest, must be taken into account in applying the formula set out in paragraph (a)(3)(iv)(B) of this section. Moreover, for purposes of computing the weighted average life of a residual interest, all anticipated payments on that interest, regardless of their designation as principal or interest, must be taken into account in applying the formula set out in paragraph (a)(3)(iv)(B) of this section.

(D) *Anticipated payments.* The anticipated principal payments to be made on a regular interest subject to paragraph (a)(3)(iv)(B) of this section, and the anticipated payments to be made on a regular interest subject to paragraph (a)(3)(iv)(C) of this section or on a residual interest, must be determined based on—

(1) The prepayment and reinvestment assumptions adopted under section 1272(a)(6), or that would have been adopted had the REMIC's regular interests been issued with original issue discount; and

(2) Any required or permitted clean up calls or any required qualified liquidation provided for in the REMIC's organizational documents.

(b) *Treatment of residual interests held by REITs, RICs, common trust funds, and subchapter T cooperatives.* [Reserved]

(c) *Transfers of noneconomic residual interests—*(1) *In general.* A transfer of a noneconomic residual interest is disregarded for all Federal tax purposes if a significant purpose of the transfer was to enable the transferor to impede the assessment or collection of tax. A significant purpose to impede the assessment or collection of tax exists if

the transferor, at the time of the transfer, either knew or should have known (had “improper knowledge”) that the transferee would be unwilling or unable to pay taxes due on its share of the taxable income of the REMIC.

(2) *Noneconomic residual interest.* A residual interest is a noneconomic residual interest unless, at the time of the transfer—

(i) The present value of the expected future distributions on the residual interest at least equals the product of the present value of the anticipated excess inclusions and the highest rate of tax specified in section 11(b)(1) for the year in which the transfer occurs; and

(ii) The transferor reasonably expects that, for each anticipated excess inclusion, the transferee will receive distributions from the REMIC at or after the time at which the taxes accrue on the anticipated excess inclusion in an amount sufficient to satisfy the accrued taxes.

(3) *Computations.* The present value of the expected future distributions and the present value of the anticipated excess inclusions must be computed under the procedure specified in § 1.860E-2(a)(4) for determining the present value of anticipated excess inclusions in connection with the transfer of a residual interest to a disqualified organization.

(4) *Safe harbor for establishing lack of improper knowledge.* A transferor is presumed not to have improper knowledge if—

(i) The transferor conducted, at the time of the transfer, a reasonable investigation of the financial condition of the transferee and, as a result of the investigation, the transferor found that the transferee had historically paid its debts as they came due and found no significant evidence to indicate that the transferee will not continue to pay its debts as they come due in the future;

(ii) The transferee represents to the transferor that it understands that, as the holder of the noneconomic residual interest, the transferee may incur tax liabilities in excess of any cash flows generated by the interest and that the transferee intends to pay taxes associated with holding the residual interest as they become due;

(iii) The transferee represents that it will not cause income from the noneconomic residual interest to be attributable to a foreign permanent establishment or fixed base (within the meaning of an applicable income tax treaty) of the transferee or another U.S. taxpayer; and

(iv) The transfer satisfies either the asset test in paragraph (c)(5) of this section or the formula test in paragraph (c)(7) of this section.

(5) *Asset test.* The transfer satisfies the asset test if it meets the requirements of paragraphs (c)(5)(i), (ii) and (iii) of this section.

(i) At the time of the transfer, and at the close of each of the transferee’s two fiscal years preceding the transferee’s fiscal year of transfer, the transferee’s gross assets for financial reporting purposes exceed \$100 million and its net assets for financial reporting purposes exceed \$10 million. For purposes of the preceding sentence, the gross assets and net assets of a transferee do not include any obligation of any related person (as defined in paragraph (c)(6)(ii) of this section) or any other asset if a principal purpose for holding or acquiring the other asset is to permit the transferee to satisfy the conditions of this paragraph (c)(5)(i).

(ii) The transferee must be an eligible corporation (defined in paragraph (c)(6)(i) of this section) and must agree in writing that any subsequent transfer of the interest will be to another eligible corporation in a transaction that satisfies paragraphs (c)(4)(i), (ii), and (iii) and this paragraph (c)(5). The direct or indirect transfer of the residual interest to a foreign permanent establishment (within the meaning of an applicable income tax treaty) of a domestic corporation is a transfer that is not a transfer to an eligible corporation. A transfer also fails to meet the requirements of this paragraph (c)(5)(ii) if the transferor knows, or has reason to know, that the transferee will not honor the restrictions on subsequent transfers of the residual interest.

(iii) A reasonable person would not conclude, based on the facts and circumstances known to the transferor on or before the date of the transfer, that the taxes associated with the residual

interest will not be paid. The consideration given to the transferee to acquire the noneconomic residual interest in the REMIC is only one factor to be considered, but the transferor will be deemed to know that the transferee cannot or will not pay if the amount of consideration is so low compared to the liabilities assumed that a reasonable person would conclude that the taxes associated with holding the residual interest will not be paid. In determining whether the amount of consideration is too low, the specific terms of the formula test in paragraph (c)(7) of this section need not be used.

(6) *Definitions for asset test.* The following definitions apply for purposes of paragraph (c)(5) of this section:

(i) *Eligible corporation* means any domestic C corporation (as defined in section 1361(a)(2)) other than—

(A) A corporation which is exempt from, or is not subject to, tax under section 11;

(B) An entity described in section 851(a) or 856(a);

(C) A REMIC; or

(D) An organization to which part I of subchapter T of chapter 1 of subtitle A of the Internal Revenue Code applies.

(ii) *Related person* is any person that—

(A) Bears a relationship to the transferee enumerated in section 267(b) or 707(b)(1), using “20 percent” instead of “50 percent” where it appears under the provisions; or

(B) Is under common control (within the meaning of section 52(a) and (b)) with the transferee.

(7) *Formula test.* The transfer satisfies the formula test if the present value of the anticipated tax liabilities associated with holding the residual interest does not exceed the sum of—

(i) The present value of any consideration given to the transferee to acquire the interest;

(ii) The present value of the expected future distributions on the interest; and

(iii) The present value of the anticipated tax savings associated with holding the interest as the REMIC generates losses.

(8) *Conditions and limitations on formula test.* The following rules apply for

purposes of the formula test in paragraph (c)(7) of this section.

(i) The transferee is assumed to pay tax at a rate equal to the highest rate of tax specified in section 11(b)(1). If the transferee has been subject to the alternative minimum tax under section 55 in the preceding two years and will compute its taxable income in the current taxable year using the alternative minimum tax rate, then the tax rate specified in section 55(b)(1)(B) may be used in lieu of the highest rate specified in section 11(b)(1).

(ii) The direct or indirect transfer of the residual interest to a foreign permanent establishment or fixed base (within the meaning of an applicable income tax treaty) of a domestic transferee is not eligible for the formula test.

(iii) Present values are computed using a discount rate equal to the Federal short-term rate prescribed by section 1274(d) for the month of the transfer and the compounding period used by the taxpayer.

(9) *Examples.* The following examples illustrate the rules of this section:

Example 1. Transfer to partnership. X transfers a noneconomic residual interest in a REMIC to Partnership P in a transaction that does not satisfy the formula test of paragraph (c)(7) of this section. Y and Z are the partners of P. Even if Y and Z are eligible corporations that satisfy the requirements of paragraph (c)(5)(i) of this section, the transfer fails to satisfy the asset test requirements found in paragraph (c)(5)(ii) of this section because P is a partnership rather than an eligible corporation within the meaning of (c)(6)(i) of this section.

Example 2. Transfer to a corporation without capacity to carry additional residual interests. During the first ten months of a year, Bank transfers five residual interests to Corporation U under circumstances meeting the requirements of the asset test in paragraph (c)(5) of this section. Bank is the major creditor of U and consequently has access to U's financial records and has knowledge of U's financial circumstances. During the last month of the year, Bank transfers three additional residual interests to U in a transaction that does not meet the formula test of paragraph (c)(7) of this section. At the time of this transfer, U's financial records indicate it has retained the previously transferred residual interests. U's financial circumstances, including the aggregate tax liabilities it has assumed with respect to

REMIC residual interests, would cause a reasonable person to conclude that *U* will be unable to meet its tax liabilities when due. The transfers in the last month of the year fail to satisfy the investigation requirement in paragraph (c)(4)(i) of this section and the asset test requirement of paragraph (c)(5)(iii) of this section because Bank has reason to know that *U* will not be able to pay the tax due on those interests.

Example 3. Transfer to a foreign permanent establishment of an eligible corporation. *R* transfers a noneconomic residual interest in a REMIC to the foreign permanent establishment of Corporation *T*. Solely because of paragraph (c)(8)(ii) of this section, the transfer does not satisfy the formula test of paragraph (c)(7) of this section. In addition, even if *T* is an eligible corporation, the transfer does not satisfy the asset test because the transfer fails the requirements of paragraph (c)(5)(ii) of this section.

(10) *Effective dates.* Paragraphs (c)(4) through (c)(9) of this section are applicable to transfers occurring on or after February 4, 2000, except for paragraphs (c)(4)(iii) and (c)(8)(iii) of this section, which are applicable for transfers occurring on or after August 19, 2002. For the dates of applicability of paragraphs (a) through (c)(3) and (d) of this section, see § 1.860A-1.

(d) *Transfers to foreign persons.* Paragraph (c) of this section does not apply to transfers of residual interests to which § 1.860G-3(a)(1), concerning transfers to certain foreign persons, applies.

[T.D. 8458, 57 FR 61302, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993; T.D. 9004, 67 FR 47453, July 19, 2002]

§ 1.860E-2 Tax on transfers of residual interests to certain organizations.

(a) *Transfers to disqualified organizations—(1) Payment of tax.* Any excise tax due under section 860E(e)(1) must be paid by the later of March 24, 1993, or April 15th of the year following the calendar year in which the residual interest is transferred to a disqualified organization. The Commissioner may prescribe rules for the manner and method of collecting the tax.

(2) *Transitory ownership.* For purposes of section 860E (e) and this section, a transfer of a residual interest to a disqualified organization in connection with the formation of a REMIC is disregarded if the disqualified organization has a binding contract to sell the interest and the sale occurs within 7

days of the startup day (as defined in section 860G(a)(9) and § 1.860G-2(k)).

(3) *Anticipated excess inclusions.* The anticipated excess inclusions are the excess inclusions that are expected to accrue in each calendar quarter (or portion thereof) following the transfer of the residual interest. The anticipated excess inclusions must be determined as of the date the residual interest is transferred and must be based on—

(i) Events that have occurred up to the time of the transfer;

(ii) The prepayment and reinvestment assumptions adopted under section 1272(a)(6), or that would have been adopted had the REMIC's regular interests been issued with original issue discount; and

(iii) Any required or permitted clean up calls, or required qualified liquidation provided for in the REMIC's organizational documents.

(4) *Present value computation.* The present value of the anticipated excess inclusions is determined by discounting the anticipated excess inclusions from the end of each remaining calendar quarter in which those excess inclusions are expected to accrue to the date the disqualified organization acquires the residual interest. The discount rate to be used for this present value computation is the applicable Federal rate (as specified in section 1274(d)(1)) that would apply to a debt instrument that was issued on the date the disqualified organization acquired the residual interest and whose term ended on the close of the last quarter in which excess inclusions were expected to accrue with respect to the residual interest.

(5) *Obligation of REMIC to furnish information.* A REMIC is not obligated to determine if its residual interests have been transferred to a disqualified organization. However, upon request of a person designated in section 860E(e)(3), the REMIC must furnish information sufficient to compute the present value of the anticipated excess inclusions. The information must be furnished to the requesting party and to the Internal Revenue Service within 60 days of the request. A reasonable fee charged to the requestor is not income derived

§ 1.860F-1

26 CFR Ch. I (4-1-15 Edition)

from a prohibited transaction within the meaning of section 860F(a).

(6) *Agent.* For purposes of section 860E(e)(3), the term “agent” includes a broker (as defined in section 6045(c) and § 1.6045-1(a)(1)), nominee, or other middleman.

(7) *Relief from liability*—(i) *Transferee furnishes information under penalties of perjury.* For purposes of section 860E(e)(4), a transferee is treated as having furnished an affidavit if the transferee furnishes—

(A) A social security number, and states under penalties of perjury that the social security number is that of the transferee; or

(B) A statement under penalties of perjury that it is not a disqualified organization.

(ii) *Amount required to be paid.* The amount required to be paid under section 860E(e)(7)(B) is equal to the product of the highest rate specified in section 11(b)(1) for the taxable year in which the transfer described in section 860E(e)(1) occurs and the amount of excess inclusions that accrued and were allocable to the residual interest during the period that the disqualified organization held the interest.

(b) *Tax on pass-thru entities*—(1) *Tax on excess inclusions.* Any tax due under section 860E(e)(6) must be paid by the later of March 24, 1993, or by the fifteenth day of the fourth month following the close of the taxable year of the pass-thru entity in which the disqualified person is a record holder. The Commissioner may prescribe rules for the manner and method of collecting the tax.

(2) *Record holder furnishes information under penalties of perjury.* For purposes of section 860E(e)(6)(D), a record holder is treated as having furnished an affidavit if the record holder furnishes—

(i) A social security number and states, under penalties of perjury, that the social security number is that of the record holder; or

(ii) A statement under penalties of perjury that it is not a disqualified organization.

(3) *Deductibility of tax.* Any tax imposed on a pass-thru entity pursuant to section 860E(e)(6)(A) is deductible against the gross amount of ordinary income of the pass-thru entity. For ex-

ample, in the case of a REIT, the tax is deductible in determining real estate investment trust taxable income under section 857(b)(2).

(4) *Allocation of tax.* Dividends paid by a RIC or by a REIT are not preferential dividends within the meaning of section 562(c) solely because the tax expense incurred by the RIC or REIT under section 860E(e)(6) is allocated solely to the shares held by disqualified organizations.

[T.D. 8458, 57 FR 61304, Dec. 24, 1992]

§ 1.860F-1 Qualified liquidations.

A plan of liquidation need not be in any special form. If a REMIC specifies the first day in the 90-day liquidation period in a statement attached to its final return, then the REMIC will be considered to have adopted a plan of liquidation on the specified date.

[T.D. 8458, 57 FR 61304, Dec. 24, 1992]

§ 1.860F-2 Transfers to a REMIC.

(a) *Formation of a REMIC*—(1) *In general.* For Federal income tax purposes, a REMIC formation is characterized as the contribution of assets by a sponsor (as defined in paragraph (b)(1) of this section) to a REMIC in exchange for REMIC regular and residual interests. If, instead of exchanging its interest in mortgages and related assets for regular and residual interests, the sponsor arranges to have the REMIC issue some or all of the regular and residual interests for cash, after which the sponsor sells its interests in mortgages and related assets to the REMIC, the transaction is, nevertheless, viewed for Federal income tax purposes as the sponsor's exchange of mortgages and related assets for regular and residual interests, followed by a sale of some or all of those interests. The purpose of this rule is to ensure that the tax consequences associated with the formation of a REMIC are not affected by the actual sequence of steps taken by the sponsor.

(2) *Tiered arrangements*—(i) *Two or more REMICs formed pursuant to a single set of organizational documents.* Two or more REMICs can be created pursuant to a single set of organizational documents even if for state law purposes or for Federal securities law purposes

those documents create only one organization. The organizational documents must, however, clearly and expressly identify the assets of, and the interests in, each REMIC, and each REMIC must satisfy all of the requirements of section 860D and the related regulations.

(ii) *A REMIC and one or more investment trusts formed pursuant to a single set of documents.* A REMIC (or two or more REMICs) and one or more investment trusts can be created pursuant to a single set of organizational documents and the separate existence of the REMIC(s) and the investment trust(s) will be respected for Federal income tax purposes even if for state law purposes those documents create only one organization. The organizational documents for the REMIC(s) and the investment trust(s) must, however, require both the REMIC(s) and the investment trust(s) to account for items of income and ownership of assets for Federal tax purposes in a manner that respects the separate existence of the multiple entities. See § 1.860G-2(i) concerning issuance of regular interests coupled with other contractual rights for an illustration of the provisions of this paragraph.

(b) *Treatment of sponsor*—(1) *Sponsor defined.* A sponsor is a person who directly or indirectly exchanges qualified mortgages and related assets for regular and residual interests in a REMIC. A person indirectly exchanges interests in qualified mortgages and related assets for regular and residual interests in a REMIC if the person transfers, other than in a nonrecognition transaction, the mortgages and related assets to another person who acquires a transitory ownership interest in those assets before exchanging them for interests in the REMIC, after which the transitory owner then transfers some or all of the interests in the REMIC to the first person.

(2) *Nonrecognition of gain or loss.* The sponsor does not recognize gain or loss on the direct or indirect transfer of any property to a REMIC in exchange for regular or residual interests in the REMIC. However, the sponsor, upon a subsequent sale of the REMIC regular or residual interests, may recognize

gain or loss with respect to those interests.

(3) *Basis of contributed assets allocated among interests*—(i) *In general.* The aggregate of the adjusted bases of the regular and residual interests received by the sponsor in the exchange described in paragraph (a) of this section is equal to the aggregate of the adjusted bases of the property transferred by the sponsor in the exchange, increased by the amount of organizational expenses (as described in paragraph (b)(3)(ii) of this section). That total is allocated among all the interests received in proportion to their fair market values on the pricing date (as defined in paragraph (b)(3)(iii) of this section) if any, or, if none, the startup day (as defined in section 860G(a)(9) and § 1.860G-2(k)).

(ii) *Organizational expenses*—(A) *Organizational expense defined.* An organizational expense is an expense that is incurred by the sponsor or by the REMIC and that is directly related to the creation of the REMIC. Further, the organizational expense must be incurred during a period beginning a reasonable time before the startup day and ending before the date prescribed by law for filing the first REMIC tax return (determined without regard to any extensions of time to file). The following are examples of organizational expenses: legal fees for services related to the formation of the REMIC, such as preparation of a pooling and servicing agreement and trust indenture; accounting fees related to the formation of the REMIC; and other administrative costs related to the formation of the REMIC.

(B) *Syndication expenses.* Syndication expenses are not organizational expenses. Syndication expenses are those expenses incurred by the sponsor or other person to market the interests in a REMIC, and, thus, are applied to reduce the amount realized on the sale of the interests. Examples of syndication expenses are brokerage fees, registration fees, fees of an underwriter or placement agent, and printing costs of the prospectus or placement memorandum and other selling or promotional material.

(iii) *Pricing date.* The term “pricing date” means the date on which the

terms of the regular and residual interests are fixed and the prices at which a substantial portion of the regular interests will be sold are fixed.

(4) *Treatment of unrecognized gain or loss*—(i) *Unrecognized gain on regular interests.* For purposes of section 860F(b)(1)(C)(i), the sponsor must include in gross income the excess of the issue price of a regular interest over the sponsor's basis in the interest as if the excess were market discount (as defined in section 1278(a)(2)) on a bond and the sponsor had made an election under section 1278(b) to include this market discount currently in gross income. The sponsor is not, however, by reason of this paragraph (b)(4)(i), deemed to have made an election under section 1278(b) with respect to any other bonds.

(ii) *Unrecognized loss on regular interests.* For purposes of section 860F(b)(1)(D)(i), the sponsor treats the excess of the sponsor's basis in a regular interest over the issue price of the interest as if that excess were amortizable bond premium (as defined in section 171(b)) on a taxable bond and the sponsor had made an election under section 171(c). The sponsor is not, however, by reason of this paragraph (b)(4)(ii), deemed to have made an election under section 171(c) with respect to any other bonds.

(iii) *Unrecognized gain on residual interests.* For purposes of section 860F(b)(1)(C)(ii), the sponsor must include in gross income the excess of the issue price of a residual interest over the sponsor's basis in the interest ratably over the anticipated weighted average life of the REMIC (as defined in § 1.860E-1(a)(3)(iv)).

(iv) *Unrecognized loss on residual interests.* For purposes of section 860F(b)(1)(D)(ii), the sponsor deducts the excess of the sponsor's basis in a residual interest over the issue price of the interest ratably over the anticipated weighted average life of the REMIC.

(5) *Additions to or reductions of the sponsor's basis.* The sponsor's basis in a regular or residual interest is increased by any amount included in the sponsor's gross income under paragraph (b)(4) of this section. The sponsor's basis in a regular or residual interest is

decreased by any amount allowed as a deduction and by any amount applied to reduce interest payments to the sponsor under paragraph (b)(4)(ii) of this section.

(6) *Transferred basis property.* For purposes of paragraph (b)(4) of this section, a transferee of a regular or residual interest is treated in the same manner as the sponsor to the extent that the basis of the transferee in the interest is determined in whole or in part by reference to the basis of the interest in the hands of the sponsor.

(c) *REMIC's basis in contributed assets.* For purposes of section 860F(b)(2), the aggregate of the REMIC's bases in the assets contributed by the sponsor to the REMIC in a transaction described in paragraph (a) of this section is equal to the aggregate of the issue prices (determined under section 860G(a)(10) and § 1.86G-1(d)) of all regular and residual interests in the REMIC.

[T.D. 8458, 57 FR 61304, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993]

§ 1.860F-4 REMIC reporting requirements and other administrative rules.

(a) *In general.* Except as provided in paragraph (c) of this section, for purposes of subtitle F of the Internal Revenue Code, a REMIC is treated as a partnership and any holder of a residual interest in the REMIC is treated as a partner. A REMIC is not subject, however, to the rules of subchapter C of chapter 63 of the Internal Revenue Code, relating to the treatment of partnership items, for a taxable year if there is at no time during the taxable year more than one holder of a residual interest in the REMIC. The identity of a holder of a residual interest in a REMIC is not treated as a partnership item with respect to the REMIC for purposes of subchapter C of chapter 63.

(b) *REMIC tax return*—(1) *In general.* To satisfy the requirement under section 6031 to make a return of income for each taxable year, a REMIC must file the return required by paragraph (b)(2) of this section. The due date and any extensions for filing the REMIC's annual return are determined as if the REMIC were a partnership.

(2) *Income tax return.* The REMIC must make a return, as required by

section 6011(a), for each taxable year on Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return. The return must include—

(i) The amount of principal outstanding on each class of regular interests as of the close of the taxable year,

(ii) The amount of the daily accruals determined under section 860E(c), and

(iii) The information specified in § 1.860D-1(d)(2) (i), (iv), and (v).

(c) *Signing of REMIC return*—(1) *In general.* Although a REMIC is generally treated as a partnership for purposes of subtitle F, for purposes of determining who is authorized to sign a REMIC's income tax return for any taxable year, the REMIC is not treated as a partnership and the holders of residual interests in the REMIC are not treated as partners. Rather, the REMIC return must be signed by a person who could sign the return of the entity absent the REMIC election. Thus, the return of a REMIC that is a corporation or trust under applicable State law must be signed by a corporate officer or a trustee, respectively. The return of a REMIC that consists of a segregated pool of assets must be signed by a person who could sign the return of the entity that owns the assets of the REMIC under applicable State law.

(2) *REMIC whose startup day is before November 10, 1988*—(i) *In general.* The income tax return of a REMIC whose startup day is before November 10, 1988, may be signed by any person who held a residual interest during the taxable year to which the return relates, or, as provided in section 6903, by a fiduciary, as defined in section 7701(a)(6), who is acting for the REMIC and who has furnished adequate notice in the manner prescribed in § 301.6903-1(b) of this chapter.

(ii) *Startup day.* For purposes of paragraph (c)(2) of this section, startup day means any day selected by a REMIC that is on or before the first day on which interests in such REMIC are issued.

(iii) *Exception.* A REMIC whose startup day is before November 10, 1988, may elect to have paragraph (c)(1) of this section apply, instead of paragraph (c)(2) of this section, in determining who is authorized to sign the REMIC return. See section 1006(t)(18)(B) of the

Technical and Miscellaneous Revenue Act of 1988 (102 Stat. 3426) and § 5h.6(a)(1) of this chapter for the time and manner for making this election.

(d) *Designation of tax matters person.* A REMIC may designate a tax matters person in the same manner in which a partnership may designate a tax matters partner under § 301.6231(a)(7)-1T of this chapter. For purposes of applying that section, all holders of residual interests in the REMIC are treated as general partners.

(e) *Notice to holders of residual interests*—(1) *Information required.* As of the close of each calendar quarter, a REMIC must provide to each person who held a residual interest in the REMIC during that quarter notice on Schedule Q (Form 1066) of information specified in paragraphs (e)(1) (i) and (ii) of this section.

(i) *In general.* Each REMIC must provide to each of its residual interest holders the following information—

(A) That person's share of the taxable income or net loss of the REMIC for the calendar quarter;

(B) The amount of the excess inclusion (as defined in section 860E and the regulations thereunder), if any, with respect to that person's residual interest for the calendar quarter;

(C) If the holder of a residual interest is also a pass-through interest holder (as defined in § 1.67-3T(a)(2)), the allocable investment expenses (as defined in § 1.67-3T(a)(4)) for the calendar quarter, and

(D) Any other information required by Schedule Q (Form 1066).

(ii) *Information with respect to REMIC assets*—(A) *95 percent asset test.* For calendar quarters after 1988, each REMIC must provide to each of its residual interest holders the following information—

(1) The percentage of REMIC assets that are qualifying real property loans under section 593,

(2) The percentage of REMIC assets that are assets described in section 7701(a)(19), and

(3) The percentage of REMIC assets that are real estate assets defined in section 856(c)(6)(B), computed by reference to the average adjusted basis (as defined in section 1011) of the REMIC assets during the calendar quarter (as

described in paragraph (e)(1)(iii) of this section). If the percentage of REMIC assets represented by a category is at least 95 percent, then the REMIC need only specify that the percentage for that category was at least 95 percent.

(B) *Additional information required if the 95 percent test not met.* If, for any calendar quarter after 1988, less than 95 percent of the assets of the REMIC are real estate assets defined in section 856(c)(6)(B), then, for that calendar quarter, the REMIC must also provide to any real estate investment trust (REIT) that holds a residual interest the following information—

(1) The percentage of REMIC assets described in section 856(c)(5)(A), computed by reference to the average adjusted basis of the REMIC assets during the calendar quarter (as described in paragraph (e)(1)(iii) of this section),

(2) The percentage of REMIC gross income (other than gross income from prohibited transactions defined in section 860F(a)(2)) described in section 856(c)(3)(A) through (E), computed as of the close of the calendar quarter, and

(3) The percentage of REMIC gross income (other than gross income from prohibited transactions defined in section 860F(a)(2)) described in section 856(c)(3)(F), computed as of the close of the calendar quarter. For purposes of this paragraph (e)(1)(ii)(B)(3), the term “foreclosure property” contained in section 856(c)(3)(F) has the meaning specified in section 860G(a)(8).

In determining whether a REIT satisfies the limitations of section 856(c)(2), all REMIC gross income is deemed to be derived from a source specified in section 856(c)(2).

(C) *For calendar quarters in 1987.* For calendar quarters in 1987, the percentages of assets required in paragraphs (e)(1)(ii) (A) and (B) of this section may be computed by reference to the fair market value of the assets of the REMIC as of the close of the calendar quarter (as described in paragraph (e)(1)(iii) of this section), instead of by reference to the average adjusted basis during the calendar quarter.

(D) *For calendar quarters in 1988 and 1989.* For calendar quarters in 1988 and 1989, the percentages of assets required in paragraphs (e)(1)(ii) (A) and (B) of this section may be computed by ref-

erence to the average fair market value of the assets of the REMIC during the calendar quarter (as described in paragraph (e)(1)(iii) of this section), instead of by reference to the average adjusted basis of the assets of the REMIC during the calendar quarter.

(iii) *Special provisions.* For purposes of paragraph (e)(1)(ii) of this section, the percentage of REMIC assets represented by a specified category computed by reference to average adjusted basis (or fair market value) of the assets during a calendar quarter is determined by dividing the average adjusted bases (or for calendar quarters before 1990, fair market value) of the assets in the specified category by the average adjusted basis (or, for calendar quarters before 1990, fair market value) of all the assets of the REMIC as of the close of each month, week, or day during that calendar quarter. The monthly, weekly, or daily computation period must be applied uniformly during the calendar quarter to all categories of assets and may not be changed in succeeding calendar quarters without the consent of the Commissioner.

(2) *Quarterly notice required—(i) In general.* Schedule Q must be mailed (or otherwise delivered) to each holder of a residual interest during a calendar quarter no later than the last day of the month following the close of the calendar quarter.

(ii) *Special rule for 1987.* Notice to any holder of a REMIC residual interest of the information required in paragraph (e)(1) of this section for any of the four calendar quarters of 1987 must be mailed (or otherwise delivered) to each holder no later than March 28, 1988.

(3) *Nominee reporting—(i) In general.* If a REMIC is required under paragraphs (e) (1) and (2) of this section to provide notice to an interest holder who is a nominee of another person with respect to an interest in the REMIC, the nominee must furnish that notice to the person for whom it is a nominee.

(ii) *Time for furnishing statement.* The nominee must furnish the notice required under paragraph (e)(3)(i) of this section to the person for whom it is a nominee no later than 30 days after receiving this information.

(4) *Reports to the Internal Revenue Service.* For each person who was a residual interest holder at any time during a REMIC's taxable year, the REMIC must attach a copy of Schedule Q to its income tax return for that year for each quarter in which that person was a residual interest holder. Quarterly notice to the Internal Revenue Service is not required.

(f) *Information returns for persons engaged in a trade or business.* See § 1.6041-1(b)(2) for the treatment of a REMIC under sections 6041 and 6041A.

[T.D. 8366, 56 FR 49516, Sept. 30, 1991, as amended by T.D. 8458, 57 FR 61306, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993; T.D. 9184, 70 FR 9219, Feb. 25, 2005]

§ 1.860G-1 Definition of regular and residual interests.

(a) *Regular interest*—(1) *Designation as a regular interest.* For purposes of section 860G(a)(1), a REMIC designates an interest as a regular interest by providing to the Internal Revenue Service the information specified in § 1.860D-1(d)(2)(ii) in the time and manner specified in § 1.860D-1(d)(2).

(2) *Specified portion of the interest payments on qualified mortgages*—(i) *In general.* For purposes of section 860G(a)(1)(B)(ii), a specified portion of the interest payments on qualified mortgages means a portion of the interest payable on qualified mortgages, but only if the portion can be expressed as—

(A) A fixed percentage of the interest that is payable at either a fixed rate or at a variable rate described in paragraph (a)(3) of this section on some or all of the qualified mortgages;

(B) A fixed number of basis points of the interest payable on some or all of the qualified mortgages; or

(C) The interest payable at either a fixed rate or at a variable rate described in paragraph (a)(3) of this section on some or all of the qualified mortgages in excess of a fixed number of basis points or in excess of a variable rate described in paragraph (a)(3) of this section.

(ii) *Specified portion cannot vary.* The portion must be established as of the startup day (as defined in section 860G(a)(9) and § 1.860G-2(k)) and, except as provided in paragraph (a)(2)(iii) of

this section, it cannot vary over the period that begins on the startup day and ends on the day that the interest holder is no longer entitled to receive payments.

(iii) *Defaulted or delinquent mortgages.* A portion is not treated as varying over time if an interest holder's entitlement to a portion of the interest on some or all of the qualified mortgages is dependent on the absence of defaults or delinquencies on those mortgages.

(iv) *No minimum specified principal amount is required.* If an interest in a REMIC consists of a specified portion of the interest payments on the REMIC's qualified mortgages, no minimum specified principal amount need be assigned to that interest. The specified principal amount can be zero.

(v) *Specified portion includes portion of interest payable on regular interest.* (A) The specified portions that meet the requirements of paragraph (a)(2)(i) of this section include a specified portion that can be expressed as a fixed percentage of the interest that is payable on some or all of the qualified mortgages where—

(1) Each of those qualified mortgages is a regular interest issued by another REMIC; and

(2) With respect to that REMIC in which it is a regular interest, each of those regular interests bears interest that can be expressed as a specified portion as described in paragraph (a)(2)(i)(A), (B), or (C) of this section.

(B) See § 1.860A-1(a) for the effective date of this paragraph (a)(2)(v).

(vi) *Examples.* The following examples, each of which describes a pass-thru trust that is intended to qualify as a REMIC, illustrate the provisions of this paragraph (a)(2).

Example 1. (i) A sponsor transferred a pool of fixed rate mortgages to a trustee in exchange for two classes of certificates. The Class A certificate holders are entitled to all principal payments on the mortgages and to interest on outstanding principal at a variable rate based on the current value of One-Month LIBOR, subject to a lifetime cap equal to the weighted average rate payable on the mortgages. The Class B certificate holders are entitled to all interest payable on the mortgages in excess of the interest paid on the Class A certificates. The Class B certificates are subordinate to the Class A certificates so that cash flow shortfalls due

to defaults or delinquencies on the mortgages will be borne first by the Class B certificate holders.

(ii) The Class B certificate holders are entitled to all interest payable on the pooled mortgages in excess of a variable rate described in paragraph (a)(3)(vi) of this section. Moreover, the portion of the interest payable to the Class B certificate holders is not treated as varying over time solely because payments on the Class B certificates may be reduced as a result of defaults or delinquencies on the pooled mortgages. Thus, the Class B certificates provide for interest payments that consist of a specified portion of the interest payable on the pooled mortgages under paragraph (a)(2)(i)(C) of this section.

Example 2. (i) A sponsor transferred a pool of variable rate mortgages to a trustee in exchange for two classes of certificates. The mortgages call for interest payments at a variable rate based on the current value of the One-Year Constant Maturity Treasury Index (hereinafter “CMTI”) plus 200 basis points, subject to a lifetime cap of 12 percent. Class C certificate holders are entitled to all principal payments on the mortgages and interest on the outstanding principal at a variable rate based on the One-Year CMTI plus 100 basis points, subject to a lifetime cap of 12 percent. The interest rate on the Class C certificates is reset at the same time the rate is reset on the pooled mortgages.

(ii) The Class D certificate holders are entitled to all interest payments on the mortgages in excess of the interest paid on the Class C certificates. So long as the One-Year CMTI is at 10 percent or lower, the Class D certificate holders are entitled to 100 basis points of interest on the pooled mortgages. If, however, the index exceeds 10 percent on a reset date, the Class D certificate holders’ entitlement shrinks, and it disappears if the index is at 11 percent or higher.

(iii) The Class D certificate holders are entitled to all interest payable on the pooled mortgages in excess of a qualified variable rate described in paragraph (a)(3) of this section. Thus, the Class D certificates provide for interest payments that consist of a specified portion of the interest payable on the qualified mortgages under paragraph (a)(2)(i)(C) of this section.

Example 3. (i) A sponsor transferred a pool of fixed rate mortgages to a trustee in exchange for two classes of certificates. The fixed interest rate payable on the mortgages varies from mortgage to mortgage, but all rates are between 8 and 10 percent. The Class E certificate holders are entitled to receive all principal payments on the mortgages and interest on outstanding principal at 7 percent. The Class F certificate holders are entitled to receive all interest on the mortgages in excess of the interest paid on the Class E certificates.

(ii) The Class F certificates provide for interest payments that consist of a specified portion of the interest payable on the mortgages under paragraph (a)(2)(i) of this section. Although the portion of the interest payable to the Class F certificate holders varies from mortgage to mortgage, the interest payable can be expressed as a fixed percentage of the interest payable on each particular mortgage.

(3) *Variable rate.* A regular interest may bear interest at a variable rate. For purposes of section 860G(a)(1)(B)(i), a variable rate of interest is a rate described in this paragraph (a)(3).

(i) *Rate based on current interest rate.* A qualified floating rate as defined in § 1.1275-5(b)(1) (but without the application of paragraph (b)(2) or (3) of that section) set at a current value, as defined in § 1.1275-5(a)(4), is a variable rate. In addition, a rate equal to the highest, lowest, or average of two or more qualified floating rates is a variable rate. For example, a rate based on the average cost of funds of one or more financial institutions is a variable rate.

(ii) *Weighted average rate—(A) In general.* A rate based on a weighted average of the interest rates on some or all of the qualified mortgages held by a REMIC is a variable rate. The qualified mortgages taken into account must, however, bear interest at a fixed rate or at a rate described in this paragraph (a)(3). Generally, a weighted average interest rate is a rate that, if applied to the aggregate outstanding principal balance of a pool of mortgage loans for an accrual period, produces an amount of interest that equals the sum of the interest payable on the pooled loans for that accrual period. Thus, for an accrual period in which a pool of mortgage loans comprises \$300,000 of loans bearing a 7 percent interest rate and \$700,000 of loans bearing a 9.5 percent interest rate, the weighted average rate for the pool of loans is 8.75 percent.

(B) *Reduction in underlying rate.* For purposes of paragraph (a)(3)(ii)(A) of this section, an interest rate is considered to be based on a weighted average rate even if, in determining that rate, the interest rate on some or all of the qualified mortgages is first subject to a cap or a floor, or is first reduced by a

number of basis points or a fixed percentage. A rate determined by taking a weighted average of the interest rates on the qualified mortgage loans net of any servicing spread, credit enhancement fees, or other expenses of the REMIC is a rate based on a weighted average rate for the qualified mortgages. Further, the amount of any rate reduction described above may vary from mortgage to mortgage.

(iii) *Additions, subtractions, and multiplications.* A rate is a variable rate if it is—

(A) Expressed as the product of a rate described in paragraph (a)(3)(i) or (ii) of this section and a fixed multiplier;

(B) Expressed as a constant number of basis points more or less than a rate described in paragraph (a)(3)(i) or (ii) of this section; or

(C) Expressed as the product, plus or minus a constant number of basis points, of a rate described in paragraph (a)(3)(i) or (ii) of this section and a fixed multiplier (which may be either a positive or a negative number).

(iv) *Caps and floors.* A rate is a variable rate if it is a rate that would be described in paragraph (a)(3)(i) through (iii) of this section except that it is—

(A) Limited by a cap or ceiling that establishes either a maximum rate or a maximum number of basis points by which the rate may increase from one accrual or payment period to another or over the term of the interest; or

(B) Limited by a floor that establishes either a minimum rate or a maximum number of basis points by which the rate may decrease from one accrual or payment period to another or over the term of the interest.

(v) *Funds-available caps—(A) In general.* A rate is a variable rate if it is a rate that would be described in paragraph (a)(3)(i) through (iv) of this section except that it is subject to a “funds-available” cap. A funds-available cap is a limit on the amount of interest to be paid on an instrument in any accrual or payment period that is based on the total amount available for the distribution, including both principal and interest received by an issuing entity on some or all of its qualified mortgages as well as amounts held in a reserve fund. The term “funds-available cap” does not, how-

ever, include any cap or limit on interest payments used as a device to avoid the standards of paragraph (a)(3)(i) through (iv) of this section.

(B) *Facts and circumstances test.* In determining whether a cap or limit on interest payments is a funds-available cap within the meaning of this section and not a device used to avoid the standards of paragraph (a)(3)(i) through (iv) of this section, one must consider all of the facts and circumstances. Facts and circumstances that must be taken into consideration are—

(1) Whether the rate of the interest payable to the regular interest holders is below the rate payable on the REMIC’s qualified mortgages on the start-up day; and

(2) Whether, historically, the rate of interest payable to the regular interest holders has been consistently below that payable on the qualified mortgages.

(C) *Examples.* The following examples, both of which describe a pass-thru trust that is intended to qualify as a REMIC, illustrate the provisions of this paragraph (a)(3)(v).

Example 1. (i) A sponsor transferred a pool of mortgages to a trustee in exchange for two classes of certificates. The pool of mortgages has an aggregate principal balance of \$100x. Each mortgage in the pool provides for interest payments based on the eleventh district cost of funds index (hereinafter COFI) plus a margin. The initial weighted average rate for the pool is COFI plus 200 basis points. The trust issued a Class X certificate that has a principal amount of \$100x and that provides for interest payments at a rate equal to One-Year LIBOR plus 100 basis points, subject to a cap described below. The Class R certificate, which the sponsor designated as the residual interest, entitles its holder to all funds left in the trust after the Class X certificates have been retired. The Class R certificate holder is not entitled to current distributions.

(ii) At the time the certificates were issued, COFI equalled 4.874 percent and One-Year LIBOR equalled 3.375 percent. Thus, the initial weighted average pool rate was 6.874 percent and the Class X certificate rate was 4.375 percent. Based on historical data, the sponsor does not expect the rate paid on the Class X certificate to exceed the weighted average rate on the pool.

(iii) Initially, under the terms of the trust instrument, the excess of COFI plus 200 over One-Year LIBOR plus 100 (excess interest) will be applied to pay expenses of the trust,

to fund any required reserves, and then to reduce the principal balance on the Class X certificate. Consequently, although the aggregate principal balance of the mortgages initially matched the principal balance of the Class X certificate, the principal balance on the Class X certificate will pay down faster than the principal balance on the mortgages as long as the weighted average rate on the mortgages is greater than One-Year LIBOR plus 100. If, however, the rate on the Class X certificate (One-Year LIBOR plus 100) ever exceeds the weighted average rate on the mortgages, then the Class X certificate holders will receive One-Year LIBOR plus 100 subject to a cap based on the current funds that are available for distribution.

(iv) The funds available cap here is not a device used to avoid the standards of paragraph (a)(3) (i) through (iv) of this section. First, on the date the Class X certificates were issued, a significant spread existed between the weighted average rate payable on the mortgages and the rate payable on the Class X certificate. Second, historical data suggest that the weighted average rate payable on the mortgages will continue to exceed the rate payable on the Class X certificate. Finally, because the excess interest will be applied to reduce the outstanding principal balance of the Class X certificate more rapidly than the outstanding principal balance on the mortgages is reduced, One-Year LIBOR plus 100 basis points would have to exceed the weighted average rate on the mortgages by an increasingly larger amount before the funds available cap would be triggered. Accordingly, the rate paid on the Class X certificates is a variable rate.

Example 2. (i) The facts are the same as those in *Example 1*, except that the pooled mortgages are commercial mortgages that provide for interest payments based on the gross profits of the mortgagors, and the rate on the Class X certificates is 400 percent on One-Year LIBOR (a variable rate under paragraph (a)(3)(iii) of this section), subject to a cap equal to current funds available to the trustee for distribution.

(ii) Initially, 400 percent of One-Year LIBOR exceeds the weighted average rate payable on the mortgages. Furthermore, historical data suggest that there is a significant possibility that, in the future, 400 percent of One-Year LIBOR will exceed the weighted average rate on the mortgages.

(iii) The facts and circumstances here indicate that the use of 400 percent of One-Year LIBOR with the above-described cap is a device to pass through to the Class X certificate holder contingent interest based on mortgagor profits. Consequently, the rate paid on the Class X certificate here is not a variable rate.

(vi) *Combination of rates.* A rate is a variable rate if it is based on—

(A) One fixed rate during one or more accrual or payment periods and a different fixed rate or rates, or a rate or rates described in paragraph (a)(3) (i) through (v) of this section, during other accrual or payment periods; or

(B) A rate described in paragraph (a)(3) (i) through (v) of this section during one or more accrual or payment periods and a fixed rate or rates, or a different rate or rates described in paragraph (a)(3) (i) through (v) of this section in other periods.

(4) *Fixed terms on the startup day.* For purposes of section 860G(a)(1), a regular interest in a REMIC has fixed terms on the startup day if, on the startup day, the REMIC's organizational documents irrevocably specify—

(i) The principal amount (or other similar amount) of the regular interest;

(ii) The interest rate or rates used to compute any interest payments (or other similar amounts) on the regular interest; and

(iii) The latest possible maturity date of the interest.

(5) *Contingencies prohibited.* Except for the contingencies specified in paragraph (b)(3) of this section, the principal amount (or other similar amount) and the latest possible maturity date of the interest must not be contingent.

(b) *Special rules for regular interests—*

(1) *Call premium.* An interest in a REMIC does not qualify as a regular interest if the terms of the interest entitle the holder of that interest to the payment of any premium that is determined with reference to the length of time that the regular interest is outstanding and is not described in paragraph (b)(2) of this section.

(2) *Customary prepayment penalties received with respect to qualified mortgages.* An interest in a REMIC does not fail to qualify as a regular interest solely because the REMIC's organizational documents provide that the REMIC must allocate among and pay to its regular interest holders any customary prepayment penalties that the REMIC receives with respect to its qualified mortgages. Moreover, a REMIC may allocate prepayment penalties among its classes of interests in any manner specified in the REMIC's organizational documents. For example, a REMIC

could allocate all or substantially all of a prepayment penalty that it receives to holders of an interest-only class of interests because that class would be most significantly affected by prepayments.

(3) *Certain contingencies disregarded.* An interest in a REMIC does not fail to qualify as a regular interest solely because it is issued subject to some or all of the contingencies described in paragraph (b)(3) (i) through (vi) of this section.

(i) *Prepayments, income, and expenses.* An interest does not fail to qualify as a regular interest solely because—

(A) The timing of (but not the right to or amount of) principal payments (or other similar amounts) is affected by the extent of prepayments on some or all of the qualified mortgages held by the REMIC or the amount of income from permitted investments (as defined in § 1.860G-2(g)); or

(B) The timing of interest and principal payments is affected by the payment of expenses incurred by the REMIC.

(ii) *Credit losses.* An interest does not fail to qualify as a regular interest solely because the amount or the timing of payments of principal or interest (or other similar amounts) with respect to a regular interest is affected by defaults on qualified mortgages and permitted investments, unanticipated expenses incurred by the REMIC, or lower than expected returns on permitted investments.

(iii) *Subordinated interests.* An interest does not fail to qualify as a regular interest solely because that interest bears all, or a disproportionate share, of the losses stemming from cash flow shortfalls due to defaults or delinquencies on qualified mortgages or permitted investments, unanticipated expenses incurred by the REMIC, lower than expected returns on permitted investments, or prepayment interest shortfalls before other regular interests or the residual interest bear losses occasioned by those shortfalls.

(iv) *Deferral of interest.* An interest does not fail to qualify as a regular interest solely because that interest, by its terms, provides for deferral of interest payments.

(v) *Prepayment interest shortfalls.* An interest does not fail to qualify as a regular interest solely because the amount of interest payments is affected by prepayments of the underlying mortgages.

(vi) *Remote and incidental contingencies.* An interest does not fail to qualify as a regular interest solely because the amount or timing of payments of principal or interest (or other similar amounts) with respect to the interest is subject to a contingency if there is only a remote likelihood that the contingency will occur. For example, an interest could qualify as a regular interest even though full payment of principal and interest on that interest is contingent upon the absence of significant cash flow shortfalls due to the operation of the Soldiers and Sailors Civil Relief Act, 50 U.S.C. app. 526 (1988).

(4) *Form of regular interest.* A regular interest in a REMIC may be issued in the form of debt, stock, an interest in a partnership or trust, or any other form permitted by state law. If a regular interest in a REMIC is not in the form of debt, it must, except as provided in paragraph (a)(2)(iv) of this section, entitle the holder to a specified amount that would, were the interest issued in debt form, be identified as the principal amount of the debt.

(5) *Interest disproportionate to principal—(i) In general.* An interest in a REMIC does not qualify as a regular interest if the amount of interest (or other similar amount) payable to the holder is disproportionately high relative to the principal amount or other specified amount described in paragraph (b)(4) of this section (specified principal amount). Interest payments (or other similar amounts) are considered disproportionately high if the issue price (as determined under paragraph (d) of this section) of the interest in the REMIC exceeds 125 percent of its specified principal amount.

(ii) *Exception.* A regular interest in a REMIC that entitles the holder to interest payments consisting of a specified portion of interest payments on qualified mortgages qualifies as a regular interest even if the amount of interest is disproportionately high relative to the specified principal amount.

(6) *Regular interest treated as a debt instrument for all Federal income tax purposes.* In determining the tax under chapter 1 of the Internal Revenue Code, a REMIC regular interest (as defined in section 860G(a)(1)) is treated as a debt instrument that is an obligation of the REMIC. Thus, sections 1271 through 1288, relating to bonds and other debt instruments, apply to a regular interest. For special rules relating to the accrual of original issue discount on regular interests, see section 1272(a)(6).

(c) *Residual interest.* A residual interest is an interest in a REMIC that is issued on the startup day and that is designated as a residual interest by providing the information specified in § 1.860D-1(d)(2)(ii) at the time and in the manner provided in § 1.860D-1(d)(2). A residual interest need not entitle the holder to any distributions from the REMIC.

(d) *Issue price of regular and residual interests—(1) In general.* The issue price of any REMIC regular or residual interest is determined under section 1273(b) as if the interest were a debt instrument and, if issued for property, as if the requirements of section 1273(b)(3) were met. Thus, if a class of interests is publicly offered, then the issue price of an interest in that class is the initial offering price to the public at which a substantial amount of the class is sold. If the interest is in a class that is not publicly offered, the issue price is the price paid by the first buyer of that interest regardless of the price paid for the remainder of the class. If the interest is in a class that is retained by the sponsor, the issue price is its fair market value on the pricing date (as defined in § 1.860F-2(b)(3)(iii)), if any, or, if none, the startup day, regardless of whether the property exchanged therefor is publicly traded.

(2) *The public.* The term “the public” for purposes of this section does not include brokers or other middlemen, nor does it include the sponsor who acquires all of the regular and residual interests from the REMIC on the startup day in a transaction described in § 1.860F-2(a).

[T.D. 8458, 57 FR 61306, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993; 58 FR 15089, Mar. 19, 1993; T.D. 8614, 60 FR 42787, Aug. 17, 1995]

§ 1.860G-2 Other rules.

(a) *Obligations principally secured by an interest in real property—(1) Tests for determining whether an obligation is principally secured.* For purposes of section 860G(a)(3)(A), an obligation is principally secured by an interest in real property only if it satisfies either the test set out in paragraph (a)(1)(i) or the test set out in paragraph (a)(1)(ii) of this section.

(i) *The 80-percent test.* An obligation is principally secured by an interest in real property if the fair market value of the interest in real property securing the obligation—

(A) Was at least equal to 80 percent of the adjusted issue price of the obligation at the time the obligation was originated (see paragraph (b)(1) of this section concerning the origination date for obligations that have been significantly modified); or

(B) Is at least equal to 80 percent of the adjusted issue price of the obligation at the time the sponsor contributes the obligation to the REMIC.

(ii) *Alternative test.* For purposes of section 860G(a)(3)(A), an obligation is principally secured by an interest in real property if substantially all of the proceeds of the obligation were used to acquire or to improve or protect an interest in real property that, at the origination date, is the only security for the obligation. For purposes of this test, loan guarantees made by the United States or any state (or any political subdivision, agency, or instrumentality of the United States or of any state), or other third party credit enhancement are not viewed as additional security for a loan. An obligation is not considered to be secured by property other than real property solely because the obligor is personally liable on the obligation.

(2) *Treatment of liens.* For purposes of paragraph (a)(1)(i) of this section, the fair market value of the real property interest must be first reduced by the amount of any lien on the real property interest that is senior to the obligation being tested, and must be further reduced by a proportionate amount of any lien that is in parity with the obligation being tested.

(3) *Safe harbor—(i) Reasonable belief that an obligation is principally secured.*

If, at the time the sponsor contributes an obligation to a REMIC, the sponsor reasonably believes that the obligation is principally secured by an interest in real property within the meaning of paragraph (a)(1) of this section, then the obligation is deemed to be so secured for purposes of section 860G(a)(3). A sponsor cannot avail itself of this safe harbor with respect to an obligation if the sponsor actually knows or has reason to know that the obligation fails both of the tests set out in paragraph (a)(1) of this section.

(ii) *Basis for reasonable belief.* For purposes of paragraph (a)(3)(i) of this section, a sponsor may base a reasonable belief concerning any obligation on—

(A) Representations and warranties made by the originator of the obligation; or

(B) Evidence indicating that the originator of the obligation typically made mortgage loans in accordance with an established set of parameters, and that any mortgage loan originated in accordance with those parameters would satisfy at least one of the tests set out in paragraph (a)(1) of this section.

(iii) *Later discovery that an obligation is not principally secured.* If, despite the sponsor's reasonable belief concerning an obligation at the time it contributed the obligation to the REMIC, the REMIC later discovers that the obligation is not principally secured by an interest in real property, the obligation is a defective obligation and loses its status as a qualified mortgage 90 days after the date of discovery. See paragraph (f) of this section, relating to defective obligations.

(4) *Interests in real property; real property.* The definition of "interests in real property" set out in § 1.856-3(c), and the definition of "real property" set out in § 1.856-3(d), apply to define those terms for purposes of section 860G(a)(3) and paragraph (a) of this section.

(5) *Obligations secured by an interest in real property.* Obligations secured by interests in real property include the following: mortgages, deeds of trust, and installment land contracts; mortgage pass-thru certificates guaranteed by GNMA, FNMA, FHLMC, or CMHC (Canada Mortgage and Housing Corporation); other investment trust interests

that represent undivided beneficial ownership in a pool of obligations principally secured by interests in real property and related assets that would be considered to be permitted investments if the investment trust were a REMIC, and provided the investment trust is classified as a trust under § 301.7701-4(c) of this chapter; and obligations secured by manufactured housing treated as single family residences under section 25(e)(10) (without regard to the treatment of the obligations or the properties under state law).

(6) *Obligations secured by other obligations; residual interests.* Obligations (other than regular interests in a REMIC) that are secured by other obligations are not principally secured by interests in real property even if the underlying obligations are secured by interests in real property. Thus, for example, a collateralized mortgage obligation issued by an issuer that is not a REMIC is not an obligation principally secured by an interest in real property. A residual interest (as defined in section 860G(a)(2)) is not an obligation principally secured by an interest in real property.

(7) *Certain instruments that call for contingent payments are obligations.* For purposes of section 860G(a)(3) and (4), the term "obligation" includes any instrument that provides for total non-contingent principal payments that at least equal the instrument's issue price even if that instrument also provides for contingent payments. Thus, for example, an instrument that was issued for \$100x and that provides for non-contingent principal payments of \$100x, interest payments at a fixed rate, and contingent payments based on a percentage of the mortgagor's gross receipts, is an obligation.

(8) *Release of a lien on an interest in real property securing a qualified mortgage; defeasance.* If a REMIC releases its lien on an interest in real property that secures a qualified mortgage, that mortgage ceases to be a qualified mortgage on the date the lien is released unless—

(i) The REMIC releases its lien in a modification that—

(A) Either is not a significant modification as defined in paragraph (b)(2)

of this section or is one of the listed exceptions set forth in paragraph (b)(3) of this section; and

(B) Following that modification, the obligation continues to be principally secured by an interest in real property as determined by paragraph (b)(7) of this section; or

(ii) The mortgage is defeased in the following manner—

(A) The mortgagor pledges substitute collateral that consists solely of government securities (as defined in section 2(a)(16) of the Investment Company Act of 1940 as amended (*15 U.S.C. 80a-1*));

(B) The mortgage documents allow such a substitution;

(C) The lien is released to facilitate the disposition of the property or any other customary commercial transaction, and not as part of an arrangement to collateralize a REMIC offering with obligations that are not real estate mortgages; and

(D) The release is not within 2 years of the startup day.

(9) *Stripped bonds and coupons.* The term “qualified mortgage” includes stripped bonds and stripped coupons (as defined in section 1286(e) (2) and (3)) if the bonds (as defined in section 1286(e)(1)) from which such stripped bonds or stripped coupons arose would have been qualified mortgages.

(b) *Assumptions and modifications—(1) Significant modifications are treated as exchanges of obligations.* If an obligation is significantly modified in a manner or under circumstances other than those described in paragraph (b)(3) of this section, then the modified obligation is treated as one that was newly issued in exchange for the unmodified obligation that it replaced. Consequently—

(i) If such a significant modification occurs after the obligation has been contributed to the REMIC and the modified obligation is not a qualified replacement mortgage, the modified obligation will not be a qualified mortgage and the deemed disposition of the unmodified obligation will be a prohibited transaction under section 860F(a)(2); and

(ii) If such a significant modification occurs before the obligation is contributed to the REMIC, the modified obli-

gation will be viewed as having been originated on the date the modification occurs for purposes of the tests set out in paragraph (a)(1) of this section.

(2) *Significant modification defined.* For purposes of paragraph (b)(1) of this section, a “significant modification” is any change in the terms of an obligation that would be treated as an exchange of obligations under section 1001 and the related regulations.

(3) *Exceptions.* For purposes of paragraph (b)(1) of this section, the following changes in the terms of an obligation are not significant modifications regardless of whether they would be significant modifications under paragraph (b)(2) of this section—

(i) Changes in the terms of the obligation occasioned by default or a reasonably foreseeable default;

(ii) Assumption of the obligation;

(iii) Waiver of a due-on-sale clause or a due-on-encumbrance clause;

(iv) Conversion of an interest rate by a mortgagor pursuant to the terms of a convertible mortgage;

(v) A modification that releases, substitutes, adds, or otherwise alters a substantial amount of the collateral for, a guarantee on, or other form of credit enhancement for, a recourse or nonrecourse obligation, so long as the obligation continues to be principally secured by an interest in real property following the release, substitution, addition, or other alteration as determined by paragraph (b)(7) of this section; and

(vi) A change in the nature of the obligation from recourse (or substantially all recourse) to nonrecourse (or substantially all nonrecourse), or from nonrecourse (or substantially all nonrecourse) to recourse (or substantially all recourse), so long as the obligation continues to be principally secured by an interest in real property following such a change as determined by paragraph (b)(7) of this section.

(4) *Modifications that are not significant modifications.* If an obligation is modified and the modification is not a significant modification for purposes of paragraph (b)(1) of this section, then the modified obligation is not treated as one that was newly originated on the date of modification.

(5) *Assumption defined.* For purposes of paragraph (b)(3) of this section, a mortgage has been assumed if—

(i) The buyer of the mortgaged property acquires the property subject to the mortgage, without assuming any personal liability;

(ii) The buyer becomes liable for the debt but the seller also remains liable; or

(iii) The buyer becomes liable for the debt and the seller is released by the lender.

(6) *Pass-thru certificates.* If a REMIC holds as a qualified mortgage a pass-thru certificate or other investment trust interest of the type described in paragraph (a)(5) of this section, the modification of a mortgage loan that backs the pass-thru certificate or other interest is not a modification of the pass-thru certificate or other interest unless the investment trust structure was created to avoid the prohibited transaction rules of section 860F(a).

(7) *Test for determining whether an obligation continues to be principally secured following certain types of modifications.* (i) For purposes of paragraphs (a)(8)(i), (b)(3)(v), and (b)(3)(vi) of this section, the obligation continues to be principally secured by an interest in real property following the modification only if, as of the date of the modification, the obligation satisfies either paragraph (b)(7)(ii) or paragraph (b)(7)(iii) of this section.

(ii) The fair market value of the interest in real property securing the obligation, determined as of the date of the modification, must be at least 80 percent of the adjusted issue price of the modified obligation, determined as of the date of the modification. If, as of the date of the modification, the servicer reasonably believes that the obligation satisfies the criterion in the preceding sentence, then the obligation is deemed to do so. A reasonable belief does not exist if the servicer actually knows, or has reason to know, that the criterion is not satisfied. For purposes of this paragraph (b)(7)(ii), a servicer must base a reasonable belief on—

(A) A current appraisal performed by an independent appraiser;

(B) An appraisal that was obtained in connection with the origination of the obligation and, if appropriate, that has

been updated for the passage of time and for any other changes that might affect the value of the interest in real property;

(C) The sales price of the interest in real property in the case of a substantially contemporaneous sale in which the buyer assumes the seller's obligations under the mortgage; or

(D) Some other commercially reasonable valuation method.

(iii) If paragraph (b)(7)(ii) of this section is not satisfied, the fair market value of the interest in real property that secures the obligation immediately after the modification must equal or exceed the fair market value of the interest in real property that secured the obligation immediately before the modification. The criterion in the preceding sentence must be established by a current appraisal, an original (and updated) appraisal, or some other commercially reasonable valuation method; and the servicer must not actually know, or have reason to know, that the criterion in the preceding sentence is not satisfied.

(iv) *Example.* The following example illustrates the rules of this paragraph (b)(7).

Example. (i) S services mortgage loans that are held by R, a REMIC. Borrower B is the issuer of one of the mortgage loans held by R. The original amount of B's mortgage loan was \$100,000, and the loan was secured by real property X. At the time the loan was contributed to R, property X had a fair market value of \$90,000. Sometime after the loan was contributed to R, B experienced financial difficulties such that it was reasonably foreseeable that B might default on the loan if the loan was not modified. Accordingly, S altered various terms of B's loan to substantially reduce the risk of default. The alterations included the release of the lien on property X and the substitution of real property Y for property X as collateral for the loan. At the time the loan was modified, its adjusted issue price was \$100,000. The fair market value of property X immediately before the modification (as determined by a commercially reasonable valuation method) was \$70,000, and the fair market value of property Y immediately after the modification (as determined by a commercially reasonable valuation method) was \$75,000.

(ii) The alterations to B's loan are a significant modification within the meaning of §1.1001-3(e). The modification, however, is described in paragraphs (a)(8)(i) and (b)(3) of this section. Accordingly, the modified loan

continues to be a qualified mortgage if, immediately after the modification, the modified loan continues to be principally secured by an interest in real property, as determined by paragraph (b)(7) of this section.

(iii) Because the modification includes the release of the lien on property X and substitution of property Y for property X, the modified loan must satisfy paragraph (b)(7)(i) of this section (which requires satisfaction of either paragraph (b)(7)(ii) or paragraph (b)(7)(iii) of this section). The modified loan does not satisfy paragraph (b)(7)(ii) of this section because property Y is worth less than \$80,000 (the amount equal to 80 percent of the adjusted issue price of the modified mortgage loan). The modified loan, however, satisfies paragraph (b)(7)(iii) of this section because the fair market value of the interest in real estate (real property Y) that secures the obligation immediately after the modification (\$75,000) exceeds the fair market value of the interest in real estate (real property X) that secured the obligation immediately before the modification (\$70,000). Accordingly, the modified loan satisfies paragraph (b)(7)(i) of this section and continues to be principally secured by an interest in real property.

(c) *Treatment of certain credit enhancement contracts*—(1) *In general.* A credit enhancement contract (as defined in paragraph (c) (2) and (3) of this section) is not treated as a separate asset of the REMIC for purposes of the asset test set out in section 860D(a)(4) and § 1.860D-1(b)(3), but instead is treated as part of the mortgage or pool of mortgages to which it relates. Furthermore, any collateral supporting a credit enhancement contract is not treated as an asset of the REMIC solely because it supports the guarantee represented by that contract. See paragraph (g)(1)(ii) of this section for the treatment of payments made pursuant to credit enhancement contracts as payments received under a qualified mortgage.

(2) *Credit enhancement contracts.* For purposes of this section, a credit enhancement contract is any arrangement whereby a person agrees to guarantee full or partial payment of the principal or interest payable on a qualified mortgage or on a pool of such mortgages, or full or partial payment on one or more classes of regular interests or on the class of residual interests, in the event of defaults or delinquencies on qualified mortgages, unanticipated losses or expenses incurred by the REMIC, or lower than expected re-

turns on cash flow investments. Types of credit enhancement contracts may include, but are not limited to, pool insurance contracts, certificate guarantee insurance contracts, letters of credit, guarantees, or agreements whereby the REMIC sponsor, a mortgage servicer, or other third party agrees to make advances described in paragraph (c)(3) of this section.

(3) *Arrangements to make certain advances.* The arrangements described in this paragraph (c)(3) are credit enhancement contracts regardless of whether, under the terms of the arrangement, the payor is obligated, or merely permitted, to advance funds to the REMIC.

(i) *Advances of delinquent principal and interest.* An arrangement by a REMIC sponsor, mortgage servicer, or other third party to advance to the REMIC out of its own funds an amount to make up for delinquent payments on qualified mortgages is a credit enhancement contract.

(ii) *Advances of taxes, insurance payments, and expenses.* An arrangement by a REMIC sponsor, mortgage servicer, or other third party to pay taxes and hazard insurance premiums on, or other expenses incurred to protect the REMIC's security interest in, property securing a qualified mortgage in the event that the mortgagor fails to pay such taxes, insurance premiums, or other expenses is a credit enhancement contract.

(iii) *Advances to ease REMIC administration.* An agreement by a REMIC sponsor, mortgage servicer, or other third party to advance temporarily to a REMIC amounts payable on qualified mortgages before such amounts are actually due to level out the stream of cash flows to the REMIC or to provide for orderly administration of the REMIC is a credit enhancement contract. For example, if two mortgages in a pool have payment due dates on the twentieth of the month, and all the other mortgages have payment due dates on the first of each month, an agreement by the mortgage servicer to advance to the REMIC on the fifteenth of each month the payments not yet received on the two mortgages together with the amounts received on

the other mortgages is a credit enhancement contract.

(4) *Deferred payment under a guarantee arrangement.* A guarantee arrangement does not fail to qualify as a credit enhancement contract solely because the guarantor, in the event of a default on a qualified mortgage, has the option of immediately paying to the REMIC the full amount of mortgage principal due on acceleration of the defaulted mortgage, or paying principal and interest to the REMIC according to the original payment schedule for the defaulted mortgage, or according to some other deferred payment schedule. Any deferred payments are payments pursuant to a credit enhancement contract even if the mortgage is foreclosed upon and the guarantor, pursuant to subrogation rights set out in the guarantee arrangement, is entitled to receive immediately the proceeds of foreclosure.

(d) *Treatment of certain purchase agreements with respect to convertible mortgages—(1) In general.* For purposes of sections 860D(a)(4) and 860G(a)(3), a purchase agreement (as described in paragraph (d)(3) of this section) with respect to a convertible mortgage (as described in paragraph (d)(5) of this section) is treated as incidental to the convertible mortgage to which it relates. Consequently, the purchase agreement is part of the mortgage or pool of mortgages and is not a separate asset of the REMIC.

(2) *Treatment of amounts received under purchase agreements.* For purposes of sections 860A through 860G and for purposes of determining the accrual of original issue discount and market discount under sections 1272(a)(6) and 1276, respectively, a payment under a purchase agreement described in paragraph (d)(3) of this section is treated as a prepayment in full of the mortgage to which it relates. Thus, for example, a payment under a purchase agreement with respect to a qualified mortgage is considered a payment received under a qualified mortgage within the meaning of section 860G(a)(6) and the transfer of the mortgage is not a disposition of the mortgage within the meaning of section 860F(a)(2)(A).

(3) *Purchase agreement.* A purchase agreement is a contract between the

holder of a convertible mortgage and a third party under which the holder agrees to sell and the third party agrees to buy the mortgage for an amount equal to its current principal balance plus accrued but unpaid interest if and when the mortgagor elects to convert the terms of the mortgage.

(4) *Default by the person obligated to purchase a convertible mortgage.* If the person required to purchase a convertible mortgage defaults on its obligation to purchase the mortgage upon conversion, the REMIC may sell the mortgage in a market transaction and the proceeds of the sale will be treated as amounts paid pursuant to a purchase agreement.

(5) *Convertible mortgage.* A convertible mortgage is a mortgage that gives the obligor the right at one or more times during the term of the mortgage to elect to convert from one interest rate to another. The new rate of interest must be determined pursuant to the terms of the instrument and must be intended to approximate a market rate of interest for newly originated mortgages at the time of the conversion.

(e) *Prepayment interest shortfalls.* An agreement by a mortgage servicer or other third party to make payments to the REMIC to make up prepayment interest shortfalls is not treated as a separate asset of the REMIC and payments made pursuant to such an agreement are treated as payments on the qualified mortgages. With respect to any mortgage that prepays, the prepayment interest shortfall for the accrual period in which the mortgage prepays is an amount equal to the excess of the interest that would have accrued on the mortgage during that accrual period had it not prepaid, over the interest that accrued from the beginning of that accrual period up to the date of the prepayment.

(f) *Defective obligations—(1) Defective obligation defined.* For purposes of sections 860G(a)(4)(B)(ii) and 860F(a)(2), a defective obligation is a mortgage subject to any of the following defects.

(i) The mortgage is in default, or a default with respect to the mortgage is reasonably foreseeable.

(ii) The mortgage was fraudulently procured by the mortgagor.

(iii) The mortgage was not in fact principally secured by an interest in real property within the meaning of paragraph (a)(1) of this section.

(iv) The mortgage does not conform to a customary representation or warranty given by the sponsor or prior owner of the mortgage regarding the characteristics of the mortgage, or the characteristics of the pool of mortgages of which the mortgage is a part. A representation that payments on a qualified mortgage will be received at a rate no less than a specified minimum or no greater than a specified maximum is not customary for this purpose.

(2) *Effect of discovery of defect.* If a REMIC discovers that an obligation is a defective obligation, and if the defect is one that, had it been discovered before the startup day, would have prevented the obligation from being a qualified mortgage, then, unless the REMIC either causes the defect to be cured or disposes of the defective obligation within 90 days of discovering the defect, the obligation ceases to be a qualified mortgage at the end of that 90 day period. Even if the defect is not cured, the defective obligation is, nevertheless, a qualified mortgage from the startup day through the end of the 90 day period. Moreover, even if the REMIC holds the defective obligation beyond the 90 day period, the REMIC may, nevertheless, exchange the defective obligation for a qualified replacement mortgage so long as the requirements of section 860G(a)(4)(B) are satisfied. If the defect is one that does not affect the status of an obligation as a qualified mortgage, then the obligation is always a qualified mortgage regardless of whether the defect is or can be cured. For example, if a sponsor represented that all mortgages transferred to a REMIC had a 10 percent interest rate, but it was later discovered that one mortgage had a 9 percent interest rate, the 9 percent mortgage is defective, but the defect does not affect the status of that obligation as a qualified mortgage.

(g) *Permitted investments*—(1) *Cash flow investment*—(i) *In general.* For purposes of section 860G(a)(6) and this section, a cash flow investment is an investment of payments received on

qualified mortgages for a temporary period between receipt of those payments and the regularly scheduled date for distribution of those payments to REMIC interest holders. Cash flow investments must be passive investments earning a return in the nature of interest.

(ii) *Payments received on qualified mortgages.* For purposes of paragraph (g)(1) of this section, the term “payments received on qualified mortgages” includes—

(A) Payments of interest and principal on qualified mortgages, including prepayments of principal and payments under credit enhancement contracts described in paragraph (c)(2) of this section;

(B) Proceeds from the disposition of qualified mortgages;

(C) Cash flows from foreclosure property and proceeds from the disposition of such property;

(D) A payment by a sponsor or prior owner in lieu of the sponsor’s or prior owner’s repurchase of a defective obligation, as defined in paragraph (f) of this section, that was transferred to the REMIC in breach of a customary warranty; and

(E) Prepayment penalties required to be paid under the terms of a qualified mortgage when the mortgagor prepays the obligation.

(iii) *Temporary period.* For purposes of section 860G(a)(6) and this paragraph (g)(1), a temporary period generally is that period from the time a REMIC receives payments on qualified mortgages and permitted investments to the time the REMIC distributes the payments to interest holders. A temporary period may not exceed 13 months. Thus, an investment held by a REMIC for more than 13 months is not a cash flow investment. In determining the length of time that a REMIC has held an investment that is part of a commingled fund or account, the REMIC may employ any reasonable method of accounting. For example, if a REMIC holds mortgage cash flows in a commingled account pending distribution, the first-in, first-out method of accounting is a reasonable method for determining whether all or part of the account satisfies the 13 month limitation.

(2) *Qualified reserve funds.* The term qualified reserve fund means any reasonably required reserve to provide for full payment of expenses of the REMIC or amounts due on regular or residual interests in the event of defaults on qualified mortgages, prepayment interest shortfalls (as defined in paragraph (e) of this section), lower than expected returns on cash flow investments, or any other contingency that could be provided for under a credit enhancement contract (as defined in paragraph (c) (2) and (3) of this section).

(3) *Qualified reserve asset—(i) In general.* The term “qualified reserve asset” means any intangible property (other than a REMIC residual interest) that is held both for investment and as part of a qualified reserve fund. An asset need not generate any income to be a qualified reserve asset.

(ii) *Reasonably required reserve—(A) In general.* In determining whether the amount of a reserve is reasonable, it is appropriate to consider the credit quality of the qualified mortgages, the extent and nature of any guarantees relating to either the qualified mortgages or the regular and residual interests, the expected amount of expenses of the REMIC, and the expected availability of proceeds from qualified mortgages to pay the expenses. To the extent that a reserve exceeds a reasonably required amount, the amount of the reserve must be promptly and appropriately reduced. If at any time, however, the amount of the reserve fund is less than is reasonably required, the amount of the reserve fund may be increased by the addition of payments received on qualified mortgages or by contributions from holders of residual interests.

(B) *Presumption that a reserve is reasonably required.* The amount of a reserve fund is presumed to be reasonable (and an excessive reserve is presumed to have been promptly and appropriately reduced) if it does not exceed the amount required by a third party insurer or guarantor, who does not own directly or indirectly (within the meaning of section 267(c)) an interest in the REMIC (as defined in § 1.860D-1(b)(1)), as a condition of providing credit enhancement.

(C) *Presumption may be rebutted.* The presumption in paragraph (g)(3)(ii)(B) of this section may be rebutted if the amounts required by the third party insurer are not commercially reasonable considering the factors described in paragraph (g)(3)(ii)(A) of this section.

(D) *Applicability date.* Paragraphs (g)(3)(ii)(B) and (g)(3)(ii)(C) of this section apply on and after July 6, 2011.

(h) *Outside reserve funds.* A reserve fund that is maintained to pay expenses of the REMIC, or to make payments to REMIC interest holders is an outside reserve fund and not an asset of the REMIC only if the REMIC’s organizational documents clearly and expressly—

(1) Provide that the reserve fund is an outside reserve fund and not an asset of the REMIC;

(2) Identify the owner(s) of the reserve fund, either by name, or by description of the class (e.g., subordinated regular interest holders) whose membership comprises the owners of the fund; and

(3) Provide that, for all Federal tax purposes, amounts transferred by the REMIC to the fund are treated as amounts distributed by the REMIC to the designated owner(s) or transferees of the designated owner(s).

(i) *Contractual rights coupled with regular interests in tiered arrangements—(1) In general.* If a REMIC issues a regular interest to a trustee of an investment trust for the benefit of the trust certificate holders and the trustee also holds for the benefit of those certificate holders certain other contractual rights, those other rights are not treated as assets of the REMIC even if the investment trust and the REMIC were created contemporaneously pursuant to a single set of organizational documents. The organizational documents must, however, require that the trustee account for the contractual rights as property that the trustee holds separate and apart from the regular interest.

(2) *Example.* The following example, which describes a tiered arrangement involving a pass-thru trust that is intended to qualify as a REMIC and a pass-thru trust that is intended to be classified as a trust under § 301.7701-4(c)

of this chapter, illustrates the provisions of paragraph (i)(1) of this section.

Example. (i) A sponsor transferred a pool of mortgages to a trustee in exchange for two classes of certificates. The pool of mortgages has an aggregate principal balance of \$100x. Each mortgage in the pool provides for interest payments based on the eleventh district cost of funds index (hereinafter COFI) plus a margin. The trust (hereinafter REMIC trust) issued a Class N bond, which the sponsor designates as a regular interest, that has a principal amount of \$100x and that provides for interest payments at a rate equal to One-Year LIBOR plus 100 basis points, subject to a cap equal to the weighted average pool rate. The Class R interest, which the sponsor designates as the residual interest, entitles its holder to all funds left in the trust after the Class N bond has been retired. The Class R interest holder is not entitled to current distributions.

(ii) On the same day, and under the same set of documents, the sponsor also created an investment trust. The sponsor contributed to the investment trust the Class N bond together with an interest rate cap contract. Under the interest rate cap contract, the issuer of the cap contract agrees to pay to the trustee for the benefit of the investment trust certificate holders the excess of One-Year LIBOR plus 100 basis points over the weighted average pool rate (COFI plus a margin) times the outstanding principal balance of the Class N bond in the event One-Year LIBOR plus 100 basis points ever exceeds the weighted average pool rate. The trustee (the same institution that serves as REMIC trust trustee), in exchange for the contributed assets, gave the sponsor certificates representing undivided beneficial ownership interests in the Class N bond and the interest rate cap contract. The organizational documents require the trustee to account for the regular interest and the cap contract as discrete property rights.

(iii) The separate existence of the REMIC trust and the investment trust are respected for all Federal income tax purposes. Thus, the interest rate cap contract is an asset beneficially owned by the several certificate holders and is not an asset of the REMIC trust. Consequently, each certificate holder must allocate its purchase price for the certificate between its undivided interest in the Class N bond and its undivided interest in the interest rate cap contract in accordance with the relative fair market values of those two property rights.

(j) *Clean-up call*—(1) *In general.* For purposes of section 860F(a)(5)(B), a clean-up call is the redemption of a class of regular interests when, by reason of prior payments with respect to those interests, the administrative

costs associated with servicing that class outweigh the benefits of maintaining the class. Factors to consider in making this determination include—

- (i) The number of holders of that class of regular interests;
- (ii) The frequency of payments to holders of that class;
- (iii) The effect the redemption will have on the yield of that class of regular interests;
- (iv) The outstanding principal balance of that class; and
- (v) The percentage of the original principal balance of that class still outstanding.

(2) *Interest rate changes.* The redemption of a class of regular interests undertaken to profit from a change in interest rates is not a clean-up call.

(3) *Safe harbor.* Although the outstanding principal balance is only one factor to consider, the redemption of a class of regular interests with an outstanding principal balance of no more than 10 percent of its original principal balance is always a clean-up call.

(k) *Startup day.* The term “startup day” means the day on which the REMIC issues all of its regular and residual interests. A sponsor may, however, contribute property to a REMIC in exchange for regular and residual interests over any period of 10 consecutive days and the REMIC may designate any one of those 10 days as its startup day. The day so designated is then the startup day, and all interests are treated as issued on that day.

[T.D. 8458, 57 FR 61309, Dec. 24, 1992; 58 FR 8098, Feb. 11, 1993; T.D. 9463, 74 FR 47438, Sept. 16, 2009; T.D. 9533, 76 FR 39282, July 6, 2011; T.D. 9637, 78 FR 54760, Sept. 6, 2013]

§ 1.860G-3 Treatment of foreign persons.

(a) *Transfer of a residual interest with tax avoidance potential*—(1) *In general.* A transfer of a residual interest that has tax avoidance potential is disregarded for all Federal tax purposes if the transferee is a foreign person. Thus, if a residual interest with tax avoidance potential is transferred to a foreign holder at formation of the REMIC, the sponsor is liable for the tax on any excess inclusion that accrues with respect to that residual interest.

(2) *Tax avoidance potential*—(i) *Defined*. A residual interest has tax avoidance potential for purposes of this section unless, at the time of the transfer, the transferor reasonably expects that, for each excess inclusion, the REMIC will distribute to the transferee residual interest holder an amount that will equal at least 30 percent of the excess inclusion, and that each such amount will be distributed at or after the time at which the excess inclusion accrues and not later than the close of the calendar year following the calendar year of accrual.

(ii) *Safe harbor*. For purposes of paragraph (a)(2)(i) of this section, a transferor has a reasonable expectation if the 30-percent test would be satisfied were the REMIC's qualified mortgages to prepay at each rate within a range of rates from 50 percent to 200 percent of the rate assumed under section 1272(a)(6) with respect to the qualified mortgages (or the rate that would have been assumed had the mortgages been issued with original issue discount).

(3) *Effectively connected income*. Paragraph (a)(1) of this section will not apply if the transferee's income from the residual interest is subject to tax under section 871(b) or section 882.

(4) *Transfer by a foreign holder*. If a foreign person transfers a residual interest to a United States person or a foreign holder in whose hands the income from a residual interest would be effectively connected income, and if the transfer has the effect of allowing the transferor to avoid tax on accrued excess inclusions, then the transfer is disregarded and the transferor continues to be treated as the owner of the residual interest for purposes of section 871(a), 881, 1441, or 1442.

(b) *Accounting for REMIC net income*—(1) *Allocation of partnership income to a foreign partner*. A domestic partnership shall separately state its allocable share of REMIC taxable income or net loss in accordance with § 1.702-1(a)(8). If a domestic partnership allocates all or some portion of its allocable share of REMIC taxable income to a partner that is a foreign person, the amount allocated to the foreign partner shall be taken into account by the foreign partner for purposes of sections 871(a), 881, 1441, and 1442 as if that amount was re-

ceived on the last day of the partnership's taxable year, except to the extent that some or all of the amount is required to be taken into account by the foreign partner at an earlier time under section 860G(b) as a result of a distribution by the partnership to the foreign partner or a disposition of the foreign partner's indirect interest in the REMIC residual interest. A disposition in whole or in part of the foreign partner's indirect interest in the REMIC residual interest may occur as a result of a termination of the REMIC, a disposition of the partnership's residual interest in the REMIC, a disposition of the foreign partner's interest in the partnership, or any other reduction in the foreign partner's allocable share of the portion of the REMIC net income or deduction allocated to the partnership. See § 1.871-14(d)(2) for the treatment of interest received on a regular or residual interest in a REMIC. For a partnership's withholding obligations with respect to excess inclusion amounts described in this paragraph (b)(1), see §§ 1.1441-2(b)(5), 1.1441-2(d)(4), 1.1441-5(b)(2)(i)(A), and §§ 1.1446-1 through 1.1446-7.

(2) *Excess inclusion income allocated by certain pass-through entities to a foreign person*. If an amount is allocated under section 860E(d)(1) to a foreign person that is a shareholder of a real estate investment trust or a regulated investment company, a participant in a common trust fund, or a patron of an organization to which part I of subchapter T applies and if the amount so allocated is governed by section 860E(d)(2) (treating it "as an excess inclusion with respect to a residual interest held by" the taxpayer), the amount shall be taken into account for purposes of sections 871(a), 881, 1441, and 1442 at the same time as the time prescribed for other income of the shareholder, participant, or patron from the trust, company, fund, or organization.

[T.D. 8458, 57 FR 61313, Dec. 24, 1992, as amended by T.D. 9272, 71 FR 43365, Aug. 1, 2006; T.D. 9415, 73 FR 40172, July 14, 2008]

TAX BASED ON INCOME FROM
SOURCES WITHIN OR WITHOUT
THE UNITED STATES

DETERMINATION OF SOURCES OF INCOME

**§1.861-1 Income from sources within
the United States.**

(a) *Categories of income.* Part I (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder determine the sources of income for purposes of the income tax. These sections explicitly allocate certain important sources of income to the United States or to areas outside the United States, as the case may be; and, with respect to the remaining income (particularly that derived partly from sources within and partly from sources without the United States), authorize the Secretary or his delegate to determine the income derived from sources within the United States, either by rules of separate allocation or by processes or formulas of general apportionment. The statute provides for the following three categories of income:

(1) *Within the United States.* The gross income from sources within the United States, consisting of the items of gross income specified in section 861(a) plus the items of gross income allocated or apportioned to such sources in accordance with section 863(a). See §§1.861-2 to 1.861-7, inclusive, and §1.863-1. The taxable income from sources within the United States, in the case of such income, shall be determined by deducting therefrom, in accordance with sections 861(b) and 863(a), the expenses, losses, and other deductions properly apportioned or allocated thereto and a ratable part of any other expenses, losses, or deductions which cannot definitely be allocated to some item or class of gross income. See §§1.861-8 and 1.863-1.

(2) *Without the United States.* The gross income from sources without the United States, consisting of the items of gross income specified in section 862(a) plus the items of gross income allocated or apportioned to such sources in accordance with section 863(a). See §§1.862-1 and 1.863-1. The taxable income from sources without the United States, in the case of such income, shall be determined by deduct-

ing therefrom, in accordance with sections 862(b) and 863(a), the expenses, losses, and other deductions properly apportioned or allocated thereto and a ratable part of any other expenses, losses, or deductions which cannot definitely be allocated to some item or class of gross income. See §§1.862-1 and 1.863-1.

(3) *Partly within and partly without the United States.* The gross income derived from sources partly within and partly without the United States, consisting of the items specified in section 863(b) (1), (2), and (3). The taxable income allocated or apportioned to sources within the United States, in the case of such income, shall be determined in accordance with section 863 (a) or (b). See §§1.863-2 to 1.863-5, inclusive.

(4) *Exceptions.* An owner of certain aircraft or vessels first leased on or before December 28, 1980, may elect to treat income in respect of these aircraft or vessels as income from sources within the United States for purposes of sections 861(a) and 862(a). See §1.861-9. An owner of certain aircraft, vessels, or spacecraft first leased after December 28, 1980, must treat income in respect of these craft as income from sources within the United States for purposes of sections 861(a) and 862(a). See §1.861-9A.

(b) *Taxable income from sources within the United States.* The taxable income from sources within the United States shall consist of the taxable income described in paragraph (a)(1) of this section plus the taxable income allocated or apportioned to such sources, as indicated in paragraph (a)(3) of this section.

(c) *Computation of income.* If a taxpayer has gross income from sources within or without the United States, together with gross income derived partly from sources within and partly from sources without the United States, the amounts thereof, together with the expenses and investment applicable thereto, shall be segregated; and the taxable income from sources within the United States shall be separately computed therefrom.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7928, 48 FR 55845, Dec. 16, 1983]

§ 1.861-2 Interest.

(a) *In general.* (1) Gross income consisting of interest from the United States or any agency or instrumentality thereof (other than a possession of the United States or an agency or instrumentality of a possession), a State or any political subdivision thereof, or the District of Columbia, and interest from a resident of the United States on a bond, note, or other interest-bearing obligation issued, assumed or incurred by such person shall be treated as income from sources within the United States. Thus, for example, income from sources within the United States includes interest received on any refund of income tax imposed by the United States, a State or any political subdivision thereof, or the District of Columbia. Interest other than that described in this paragraph is not to be treated as income from sources within the United States. See paragraph (a)(7) of this section for special rules concerning substitute interest paid or accrued pursuant to a securities lending transaction.

(2) The term "resident of the United States", as used in this paragraph, includes (i) an individual who at the time of payment of the interest is a resident of the United States, (ii) a domestic corporation, (iii) a domestic partnership which at any time during its taxable year is engaged in trade or business in the United States, or (iv) a foreign corporation or a foreign partnership, which at any time during its taxable year is engaged in trade or business in the United States.

(3) The method by which, or the place where, payment of the interest is made is immaterial in determining whether interest is derived from sources within the United States.

(4) For purposes of this section, the term "interest" includes all amounts treated as interest under section 483, and the regulations thereunder. It also includes original issue discount, as defined in section 1232(b)(1), whether or not the underlying bond, debenture, note, certificate, or other evidence of indebtedness is a capital asset in the hands of the taxpayer within the meaning of section 1221.

(5) If interest is paid on an obligation of a resident of the United States by a

nonresident of the United States acting in the nonresident's capacity as a guarantor of the obligation of the resident, the interest will be treated as income from sources within the United States.

(6) In the case of interest received by a nonresident alien individual or foreign corporation this paragraph (a) applies whether or not the interest is effectively connected for the taxable year with the conduct of a trade or business in the United States by such individual or corporation.

(7) A substitute interest payment is a payment, made to the transferor of a security in a securities lending transaction or a sale-repurchase transaction, of an amount equivalent to an interest payment which the owner of the transferred security is entitled to receive during the term of the transaction. A securities lending transaction is a transfer of one or more securities that is described in section 1058(a) or a substantially similar transaction. A sale-repurchase transaction is an agreement under which a person transfers a security in exchange for cash and simultaneously agrees to receive a substantially identical securities from the transferee in the future in exchange for cash. A substitute interest payment shall be sourced in the same manner as the interest accruing on the transferred security for purposes of this section and § 1.862-1. See also §§ 1.864-5(b)(2)(iii), 1.871-7(b)(2), 1.881-2(b)(2) and for the character of such payments and § 1.894-1(c) for the application tax treaties to these transactions.

(b) *Interest not derived from U.S. sources.* Notwithstanding paragraph (a) of this section, interest shall be treated as income from sources without the United States to the extent provided by subparagraphs (A) through (H), of section 861(a)(1) and by the following subparagraphs of this paragraph.

(1) *Interest on bank deposits and on similar amounts.* (i) Interest paid or credited before January 1, 1977, to a nonresident alien individual or foreign corporation on—

(a) Deposits with persons, including citizens of the United States or alien individuals and foreign or domestic partnerships or corporations, carrying

on the banking business in the United States,

(b) Deposits or withdrawable accounts with savings institutions chartered and supervised as savings and loan or similar associations under Federal or State law, or

(c) Amounts held by an insurance company under an agreement to pay interest thereon, shall be treated as income from sources without the United States if such interest is not effectively connected for the taxable year with the conduct of a trade or business in the United States by such nonresident alien individual or foreign corporation. If such interest is effectively connected for the taxable year with the conduct of a trade or business in the United States by such nonresident alien individual or foreign corporation, it shall be treated as income from sources within the United States under paragraph (a) of this section unless it is treated as income from sources without the United States under another subparagraph of this paragraph. For a special rule for determining whether such interest is effectively connected for the taxable year with the conduct of a trade or business in the United States, see paragraph (c)(1)(ii) or § 1.864-4.

(ii) Paragraph (b)(1)(i)(b) of this section applies to interest on deposits or withdrawable accounts described therein only to the extent that the interest paid or credited by the savings institution described therein is deductible under section 591 in determining the taxable income of such institution; and, for this purpose, whether an amount is deductible under section 591 shall be determined without regard to section 265, relating to deductions allocable to tax-exempt income. Thus, for example, such subdivision does not apply to amounts paid by a savings and loan or similar association on or with respect to its nonwithdrawable capital stock or on or with respect to funds held in restricted accounts which represent a proprietary interest in such association. Paragraph (b)(1)(i)(b) of this section also applies to so-called dividends paid or credited on deposits or withdrawable accounts if such dividends are deductible under section 591 without reference to section 265.

(iii) For purposes of paragraph (b)(1)(i)(c) of this section, amounts held by an insurance company under an agreement to pay interest thereon include policyholder dividends left with the company to accumulate, prepaid insurance premiums, proceeds of policies left on deposit with the company, and overcharges of premiums. Such subdivision does not apply to (a) the so-called "interest element" in the case of annuity or installment payments under life insurance or endowment contracts or (b) interest paid by an insurance company to its creditors on notes, bonds, or similar evidences of indebtedness, if the debtor-creditor relationship does not arise by virtue of a contract of insurance with the insurance company.

(iv) For purposes of paragraph (b)(1)(i) of this section, interest received by a partnership shall be treated as received by each partner of such partnership to the extent of his distributive share of such item.

(2) *Interest from a resident alien individual or domestic corporation deriving substantial income from sources without the United States.* Interest received from a resident alien individual or a domestic corporation shall be treated as income from sources without the United States when it is shown to the satisfaction of the district director (or, if applicable, the Director of International Operations) that less than 20 percent of the gross income from all sources of such individual or corporation has been derived from sources within the United States, as determined under the provisions of sections 861 to 863, inclusive, and the regulations thereunder, for the 3-year period ending with the close of the taxable year of such individual or corporation preceding its taxable year in which such interest is paid or credited, or for such part of such period as may be applicable. If 20 percent or more of the gross income from all sources of such individual or corporation has been derived from sources within the United States, as so determined, for such 3-year period (or part thereof), the entire amount of the interest from such individual or corporation shall be treated as income from sources within the United States.

(3) *Interest from a foreign corporation not deriving major portion of its income from a U.S. business.* (i) Interest from a foreign corporation which, at any time during the taxable year, is engaged in trade or business in the United States shall be treated as income from sources without the United States when it is shown to the satisfaction of the district director (or, if applicable, the Director of International Operations) that (a) less than 50 percent of the gross income from all sources of such foreign corporation for the 3-year period ending with the close of its taxable year preceding its taxable year in which such interest is paid or credited (or for such part of such period as the corporation has been in existence) was effectively connected with the conduct by such corporation of a trade or business in the United States, as determined under section 864(c) and § 1.864-3, or (b) such foreign corporation had gross income for such 3-year period (or part thereof) but none was effectively connected with the conduct of a trade or business in the United States.

(ii) If 50 percent or more of the gross income from all sources of such foreign corporation for such 3-year period (or part thereof) was effectively connected with the conduct by such corporation of a trade or business in the United States, see section 861(a)(1)(D) and paragraph (c)(1) of this section for determining the portion of interest from such corporation which is treated as income from sources within the United States.

(iii) For purposes of this paragraph the gross income which is effectively connected with the conduct of a trade or business in the United States includes the gross income which, pursuant to section 882 (d) or (e) and the regulations thereunder, is treated as income which is effectively connected with the conduct of a trade or business in the United States.

(iv) This paragraph does not apply to interest paid or credited after December 31, 1969, by a branch in the United States of a foreign corporation if, at the time of payment or crediting, such branch is engaged in the commercial banking business in the United States; furthermore, such interest is treated under paragraph (a) of this section as

income from sources within the United States unless it is treated as income from sources without the United States under paragraph (b) (1) or (4) of this section.

(4) *Bankers' acceptances.* Interest derived by a foreign central bank of issue from bankers' acceptances shall be treated as income from sources without the United States. For this purpose, a foreign central bank of issue is a bank which is by law or government sanction the principal authority, other than the government itself, issuing instruments intended to circulate as currency. Such a bank is generally the custodian of the banking reserves of the country under whose laws it is organized.

(5) *Foreign banking branch of a domestic corporation or partnership.* Interest paid or credited on deposits with a branch outside the United States (as defined in section 7701(a)(9)) of a domestic corporation or of a domestic partnership shall be treated as income from sources without the United States, if, at the time of payment or crediting, such branch is engaged in the commercial banking business. For purposes of applying this paragraph, it is immaterial (i) whether the domestic corporation or domestic partnership is carrying on a banking business in the United States, (ii) whether the recipient of the interest is a citizen or resident of the United States, a foreign corporation, or a foreign partnership, (iii) whether the interest is effectively connected with the conduct of a trade or business in the United States by the recipient, or (iv) whether the deposits with the branch located outside the United States are payable in the currency of a foreign country. Notwithstanding the provisions of § 1.863-6, interest to which this paragraph applies shall be treated as income from sources within the foreign country, possession of the United States, or other territory in which the branch is located.

(6) *Section 4912(c) debt obligations—* (i) *In general.* Under section 861(a)(1)(G), interest on a debt obligation shall not be treated as income from sources within the United States if—

(a) The debt obligation was part of an issue of debt obligations with respect to which an election has been made

under section 4912(c) (relating to the treatment of such debt obligations as debt obligations of a foreign obligor for purposes of the interest equalization tax),

(b) The debt obligation had a maturity not exceeding 15 years (within the meaning of paragraph (b)(6)(ii) of this section) on the date it is originally issued or on the date it is treated under section 4912(c)(2) as issued by reason of being assumed by a certain domestic corporation,

(c) The debt obligation, when originally issued, was purchased by one or more underwriters (within the meaning of paragraph (b)(6)(iii) of this section) with a view to distribution through resale (within the meaning of paragraph (b)(6)(iv) of this section), and

(d) The interest on the debt obligation is attributable to periods after the effective date of an election under section 4912(c) to treat such debt obligations as debt obligations of a foreign obligor for purposes of the interest equalization tax.

(i) *Maturity not exceeding 15 years.* The date the debt obligation is issued or treated as issued is not included in the 15 year computation, but the date of maturity of the debt, obligation is included in such computation.

(ii) *Purchased by one or more underwriters.* For purposes of this paragraph, the debt obligation when originally issued will not be treated as purchased by one or more underwriters unless the underwriter purchases the debt obligation for his own account and bears the risk of gain or loss on resale. Thus, for example, a debt obligation, when originally issued, will not be treated as purchased by one or more underwriters if the underwriter acts only in the capacity of an agent of the issuer. Neither will a debt obligation, when originally issued, be treated as purchased by one or more underwriters if the agreement between the underwriter and issuer is merely for a "best efforts" underwriting, for the purchase by the underwriter of all or a portion of the debt obligations remaining unsold at the expiration of a fixed period of time, or for any other arrangement under the terms of which the debt obligations are not purchased by the underwriter with a view to distribution through resale.

The fact that an underwriter is related to the issuer will not prevent the underwriter from meeting the requirements of this paragraph. In determining whether a related underwriter meets the requirements of this paragraph consideration shall be given to whether the purchase by the underwriter of the debt obligation from the issuer for resale was effected by a transaction subject to conditions similar to those which would have been imposed between independent persons.

(iv) *With a view to distribution through resale.* (a) An underwriter who purchased a debt obligation shall be deemed to have purchased it with a view to distribution through resale if the requirements of paragraph (b)(6)(iv) (b) or (c) of this section are met.

(b) The requirements of this paragraph (b) is that—

(1) The debt obligation is registered, approved, or listed for trading on one or more foreign securities exchanges or foreign established securities markets within 4 months after the date on which the underwriter purchases the debt obligation, or by the date of the first interest payment on the debt obligation, whichever is later, or

(2) The debt obligation, or any substantial portion of the issue of which the debt obligation is a part, is actually traded on one or more foreign securities markets on or within 15 calendar days after the date on which the underwriter purchases the debt obligation.

For purposes of this paragraph (b)(6)(iv), a foreign established securities market includes any foreign over-the-counter market as reflected by the existence of an inter-dealer quotation system for regularly disseminating to brokers and dealers quotations of obligations by identified brokers or dealers, other than quotations prepared and distributed by a broker or dealer in the regular course of his business and containing only quotations of such broker or dealer.

(c) The requirements of this paragraph (c) are that, except as provided in paragraph (b)(6)(iv)(d) of this section, the underwriter is under no written or implied restriction imposed by the issuer with respect to whom he

may resell the debt obligation and either—

(1) Within 30 calendar days after he purchased the debt obligation the underwriter or underwriters either (i) sold it or (ii) sold at least 95 percent of the face amount of the issue of which the debt obligation is a part, or

(2)(i) The debt obligation is evidenced by an instrument which, under the laws of the jurisdiction in which it is issued, is either negotiable or transferable by assignment (whether or not it is registered for trading), and (ii) it appears from all the relevant facts and circumstances, including any written statements or assurances made by the purchasing underwriter or underwriters, that such debt obligation was purchased with a view to distribution through resale.

(d) The requirements of paragraph (b)(6)(iv)(c) of this paragraph may be met whether or not the underwriter is restricted from reselling the debt obligations—

(1) To a United States person (as defined in section 7701(a)(30)) or

(2) To any particular person or persons pursuant to a restriction imposed by, or required to be met in order to comply with, United States or foreign securities or other law.

(v) *Statement with return.* Any taxpayer who is required to file a tax return and who excludes from gross income interest of the type specified in this subparagraph must comply with the requirements of paragraph (d) of this section.

(vi) *Effect of termination of IET.* If the interest equalization tax expires, the provisions of section 861(a)(1)(G) and this subparagraph shall apply to interest paid on debt obligations only with respect to which a section 4912(c) election was made.

(vii) *Definition of term underwriter.* For purposes of section 861(a)(1)(G) and this paragraph, the term “underwriter” shall mean any underwriter as defined in section 4919(c)(1).

(c) *Special rules—(1) Proration of interest from a foreign corporation deriving major portion of its income from a U.S. business.* If, after applying the first sentence of paragraph (b)(3) of this section to interest to which that paragraph applies, it is determined that the interest

may not be treated as income from sources without the United States, the amount of the interest from the foreign corporation which at some time during the taxable year is engaged in trade or business in the United States which is to be treated as income from sources within the United States shall be the amount that bears the same ratio to such interest as the gross income of such foreign corporation for the 3-year period ending with the close of its taxable year preceding its taxable year in which such interest is paid or credited (or for such part of such period as the corporation has been in existence) which was effectively connected with the conduct by such corporation of a trade or business in the United States bears to its gross income from all sources for such period.

(2) *Payors having no gross income for period preceding taxable year of payment.* If the resident alien individual, domestic corporation, or foreign corporation, as the case may be, paying interest has no gross income from any source for the 3-year period (or part thereof) specified in paragraph (b) (2) or (3) of this section, or paragraph (c)(1) of this section, the 20-percent test or the 50-percent test, or the apportionment formula, as the case may be, described in such paragraph shall be applied solely with respect to the taxable year of the payor in which the interest is paid or credited. This paragraph applies whether the lack of gross income for the 3-year period (or part thereof) stems from the business inactivity of the payor, from the fact that the payor is a corporation which is newly created or organized, or from any other cause.

(3) *Transitional rule.* For purposes of applying paragraph (b)(3) of this section, and paragraph (c)(1) of this section, the gross income of the foreign corporation for any period before the first taxable year beginning after December 31, 1966, which is from sources within the United States (determined as provided by sections 861 through 863, and the regulations thereunder, as in effect immediately before amendment by section 102 of the Foreign Investors Tax Act of 1966 (Pub. L. 89-809, 80 Stat. 1541)) shall be treated as gross income for such period which is effectively connected with the conduct of a trade

or business in the United States by such foreign corporation.

(4) *Gross income determinations.* In making determinations under paragraph (b) (2) or (3) of this section, or paragraph (c) (1) or (3) of this section—

(i) The gross income of a domestic corporation or a resident alien individual is to be determined by excluding any items specifically excluded from gross income under chapter 1 of the Code, and

(ii) The gross income of a foreign corporation which is effectively connected with the conduct of a trade or business in the United States is to be determined under section 882(b)(2) and by excluding any items specifically excluded from gross income under chapter 1 of the Code, and

(iii) The gross income from all sources of a foreign corporation is to be determined without regard to section 882(b) and without excluding any items otherwise specifically excluded from gross income under chapter 1 of the Code.

(d) *Statement with return.* Any taxpayer who is required to file a return and applies any provision of this section to exclude an amount of interest from his gross income must file with his return a statement setting forth the amount so excluded, the date of its receipt, the name and address of the obligor of the interest, and, if known, the location of the records which substantiate the amount of the exclusion. A statement from the obligor setting forth such information and indicating the amount of interest to be treated as income from sources without the United States may be used for this purpose. See §§ 1.6012-1(b)(1)(i) and 1.6012-2(g)(1)(i).

(e) *Effective dates.* Except as otherwise provided, this section applies with respect to taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, (see 26 CFR part 1 revised April 1, 1971). Paragraph (a)(7) of this section is applicable to payments made after November 13, 1997.

[T.D. 7378, 40 FR 45429, Oct. 2, 1975; 40 FR 48508, Oct. 16, 1975, as amended by T.D. 8257, 54 FR 31819, Aug. 2, 1989; T.D. 8735, 62 FR 53500, Oct. 14, 1997]

§ 1.861-3 Dividends.

(a) *General*—(1) *Dividends included in gross income.* Gross income from sources within the United States includes a dividend described in subparagraph (2), (3), (4), or (5) of this paragraph. For purposes of subparagraphs (2), (3), and (4) of this paragraph, the term “dividend” shall have the same meaning as set forth in section 316 and the regulations thereunder. See subparagraph (5) of this paragraph for special rules with respect to certain dividends from a DISC or former DISC. See also paragraph (a)(6) of this section for special rules concerning substitute dividend payments received pursuant to a securities lending transaction.

(2) *Dividend from a domestic corporation.* A dividend described in this paragraph (a)(2) is a dividend from a domestic corporation other than a corporation that has an election in effect under section 936. See paragraph (a)(5) of this section for the treatment of certain dividends from a DISC or former DISC.

(3) *Dividend from a foreign corporation*—(i) *In general.*(A) A dividend described in this subparagraph is a dividend from a foreign corporation (other than a dividend to which subparagraph (4) of this paragraph applies) unless less than 50 percent of the gross income from all sources of such foreign corporation for the 3-year period ending with the close of its taxable year preceding the taxable year in which occurs the declaration of such dividend (or for such part of such period as the corporation has been in existence) was effectively connected with the conduct by such corporation of a trade or business in the United States, as determined under section 864(c) and § 1.864-3. Thus, no portion of a dividend from a foreign corporation shall be treated as income from sources within the United States under section 861(a)(2)(B) if less than 50 percent of the gross income of such foreign corporation from all sources for such 3-year period (or part thereof) was effectively connected with the conduct by such corporation of a trade or business in the United States or if such foreign corporation had gross income for such 3-year period (or part thereof) but none was effectively connected with

the conduct by such corporation of a trade or business in the United States.

(b) If 50 percent or more of the gross income from all sources of such foreign corporation for such 3-year period (or part thereof) was effectively connected with the conduct by such corporation of a trade or business in the United States, the amount of the dividend which is to be treated as income from sources within the United States under section 861(a)(2)(B) shall be the amount that bears the same ratio to such dividend as the gross income of such foreign corporation for such 3-year period (or part thereof) which was effectively connected with the conduct by such corporation of a trade or business in the United States bears to its gross income from all sources for such period.

(c) For purposes of this subdivision (i), the gross income which is effectively connected with the conduct of a trade or business in the United States includes the gross income which, pursuant to section 882 (d) or (e), is treated as income which is effectively connected with the conduct of a trade or business in the United States.

(ii) *Rule applicable in applying limitation on amount of foreign tax credit.* For purposes of determining under section 904 the limitation upon the amount of the foreign tax credit—

(a) So much of a dividend from a foreign corporation as exceeds (and only to the extent it so exceeds) the amount which is 100/85ths of the amount of the deduction allowable under section 245(a) in respect of such dividend, plus

(b) An amount which bears the same proportion to any section 78 dividend to which the dividend from the foreign corporation gives rise as the amount of the excess determined under (a) of this subdivision bears to the total amount of the dividend from the foreign corporation, shall, notwithstanding subdivision (i) of this subparagraph, be treated as income from sources without the United States. This subdivision applies to a dividend for which no dividends-received deduction is allowed under section 245 or for which the 85 percent dividends-received deduction is allowed under section 245(a) but does not apply to a dividend for which a deduction is allowable under section 245(b). All of a dividend for which the

100 percent dividends-received deduction is allowed under section 245(b) shall be treated as income from sources within the United States for purposes of determining under section 904 the limitation upon the amount of the foreign tax credit. If the amount of a distribution of property other than money (constituting a dividend under section 316) is determined by applying section 301(b)(1)(C), such amount must be used as the dividend for purposes of applying (a) of this subdivision even though the amount used for purposes of section 245(a) is determined by applying section 301(b)(1)(D). In making determinations under this subdivision, a dividend (other than a section 78 dividend referred to in (b) of this subdivision) shall be determined without regard to section 78.

(iii) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. D, a domestic corporation, owns 80 percent of the outstanding stock of M, a foreign manufacturing corporation. M, which makes its returns on the basis of the calendar year, has earnings and profits of \$200,000 for 1971 and 60 percent of its gross income for that year is effectively connected for 1971 with the conduct of a trade or business in the United States. For an uninterrupted period of 36 months ending on December 31, 1970, M has been engaged in trade or business in the United States and has received gross income effectively connected with the conduct of a trade or business in the United States amounting to 60 percent of its gross income from all sources for such period. The only distribution by M to D for 1971 is a cash dividend of \$100,000; of this amount, \$60,000 ($\$100,000 \times 60\%$) is treated under subdivision (i) of this subparagraph as income from sources within the United States, and \$40,000 ($\$100,000 - \$60,000$) is treated under § 1.862-1(a)(2) as income from sources without the United States. Accordingly, under section 245(a), D is entitled to a dividends-received deduction of \$51,000 ($\$60,000 \times 85\%$), and under subdivision (ii) of this subparagraph \$40,000 ($\$100,000 - [\$51,000 \times 100/85]$) is treated as income from sources without the United States for purposes of determining under section 904(a) (1) or (2) the limitation upon the amount of the foreign tax credit.

Example 2. (a) The facts are the same as in example (1) except that the distribution for 1971 consists of property which has a fair market value of \$100,000 and an adjusted

§ 1.861-3

26 CFR Ch. I (4-1-15 Edition)

basis of \$30,000 in M's hands immediately before the distribution. The amount of the dividend under section 316 is \$58,000, determined by applying section 301(b)(1)(C) as follows:

| | |
|--|----------|
| Portion of adjusted basis of property attributable to gross income of M effectively connected for 1971 with conduct of trade or business in United States (\$30,000×60%) | \$18,000 |
| Portion of fair market value of property attributable to gross income of M not effectively connected for 1971 with conduct of trade or business in United States (\$100,000×40%) | 40,000 |
| Total dividend | 58,000 |

(b) Of the total dividend, \$34,800 (\$58,000×60% (percentage applicable to 3-year period)) is treated under subdivision (i) of this subparagraph as income from sources within the United States, and \$23,200 (\$58,000×40%) is treated under § 1.862-1(a)(2) as income from sources without the United States. However, by reason of section 245(c) the adjusted basis of the property (\$30,000) is used under section 245(a) in determining the dividends-received deduction. Thus, under section 245(a), D is entitled to a dividends-received deduction of \$15,300 (\$30,000×60%×85%).

(c) Under subdivision (ii) of this subparagraph, the amount of the dividend for purposes of applying (a) of that subdivision is the amount (\$58,000) determined by applying section 301(b)(1)(C) rather than the amount (\$30,000) determined by applying section 301(b)(1)(B). Accordingly, under subdivision (ii) of this subparagraph \$40,000 (\$58,000 - [\$15,300×100/85]) is treated as income from sources without the United States for purposes of determining under section 904(a) (1) or (2) the limitation upon the amount of the foreign tax credit.

Example 3. (a) D, a domestic corporation which makes its returns on the basis of the calendar year, owns 100 percent of the outstanding stock of N, a foreign corporation which is not a less developed country corporation under section 902(d). N, which makes its returns on the basis of the calendar year, has total gross income for 1971 of \$100,000, of which \$80,000 (including \$60,000 from sources within foreign country X) is effectively connected for that year with the conduct of a trade or business in the United States. For 1971 N is assumed to have paid \$27,000 of income taxes to country X and to have accumulated profits of \$81,000 for purposes of section 902(c)(1)(A). N's accumulated profits in excess of foreign income taxes amount to \$54,000. For 1971 D receives a cash dividend of \$42,000 from N, which is D's only income for that year.

(b) For 1971 D chooses the benefits of the foreign tax credit under section 901, and as a result is required under section 78 to include in gross income an amount equal to the foreign income taxes of \$21,000 (\$27,000×\$42,000/\$54,000) it is deemed to have paid under section 902(a)(1). Thus, assuming no other de-

ductions for the taxable year, D has gross income of \$63,000 (\$42,000+\$21,000) for 1971 less a dividends-received deduction under section 245(a) of \$28,560 ([(\$42,000×\$80,000/\$100,000)×85%], or taxable income for 1971 of \$34,440.

(c) Under subdivision (ii) of this subparagraph, for purposes of determining under section 904(a) (1) or (2) the limitation upon the amount of the foreign tax credit, \$12,600 is treated as income from sources without the United States, determined as follows:

| | |
|--|---------|
| Excess of dividend from N over amount which is 100/85ths of amount of sec. 245(a) deduction (\$42,000 - [\$28,560×100/85]) | \$8,400 |
| Proportionate part of sec. 78 dividend (\$21,000×\$8,400/\$42,000) | 4,200 |
| Taxable income from sources without the United States | 12,600 |

Example 4. A, an individual citizen of the United States who makes his return on the basis of the calendar year, receives in 1971 a cash dividend of \$10,000 from M, a foreign corporation, which makes its return on the basis of the calendar year. For the 3-year period ending with 1970 M has been engaged in trade or business in the United States and has received gross income effectively connected with the conduct of a trade or business in the United States amounting to 80 percent of its gross income from all sources for such period. Of the total dividend, \$8,000 (\$10,000×80%) is treated under subdivision (i) of this subparagraph as income from sources within the United States and \$2,000 (\$10,000 - \$8,000) is treated under § 1.862-1(a)(2) as income from sources without the United States. Since under section 245 no dividends received-deduction is allowable to an individual, A is entitled under subdivision (ii) of this subparagraph to treat the entire dividend of \$10,000 (\$10,000 - [\$0×100/85]) as income from sources without the United States for purposes of determining under section 904(a) (1) or (2) the limitation upon the amount of the foreign tax credit.

(4) *Dividend from a foreign corporation succeeding to earnings of a domestic corporation.* A dividend described in this subparagraph is a dividend from a foreign corporation, if such dividend is received by a corporation after December 31, 1959, but only to the extent that such dividend is treated by such recipient corporation under the provisions of § 1.243-3 as a dividend from a domestic corporation subject to taxation under chapter 1 of the Code. To the extent that this subparagraph applies to a dividend received from a foreign corporation, subparagraph (3) of this paragraph shall not apply to such dividend.

(5) *Certain dividends from a DISC or former DISC*—(i) *General rule.* A dividend described in this subparagraph is a dividend from a corporation that is a DISC or former DISC (as defined in section 992(a)) other than a dividend that—

(a) Is deemed paid by a DISC, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F) to the extent provided in subdivision (iii) of this subparagraph or

(b) Reduces under § 1.996-3(b)(3) accumulated DISC income (as defined in subdivision (ii)(b) of this subparagraph) to the extent provided in subdivision (iv) of this subparagraph.

Thus, a dividend deemed paid under section 995(b)(1) (A), (B), or (C) (relating to certain deemed distributions in qualified years) will be treated in full as gross income from sources within the United States. To the extent that a dividend from a DISC or former DISC is paid out of other earnings and profits (as defined in § 1.996-3(d)), subparagraph (2) of this paragraph shall apply. To the extent that a dividend from a DISC or former DISC is paid out of previously taxed income (as defined in § 1.996-3(c)), see section 996(a)(3) (relating to the exclusion from gross income of amounts distributed out of previously taxed income). In determining the source of income of certain dividends from a DISC or former DISC, the source of income from any transaction which gives rise to gross receipts (as defined in § 1.993-6), in the hands of the DISC or former DISC, is immaterial.

(ii) *Definitions.* For purposes of this subparagraph, the term—

(a) “Dividend from” means any amount actually distributed which is a dividend within the meaning of section 316 (including distributions to meet qualification requirements under section 992(c)) and any amount treated as a distribution taxable as a dividend pursuant to section 995(b) (relating to deemed distributions in qualified years or upon disqualification) or included in gross income as a dividend pursuant to section 995(c) (relating to gain on cer-

tain dispositions of stock in a DISC or former DISC), and

(b) “Accumulated DISC income” means the amount of accumulated DISC income as of the close of the taxable year immediately preceding the taxable year in which the dividend was made increased by the amount of DISC income for the taxable year in which the dividend was made (as determined under § 1.996-3(b)(2)).

(c) “Nonqualified export taxable income” means the taxable income of a DISC from any transaction which gives rise to gross receipts (as defined in § 1.993-6) which are not qualified export receipts (as defined in § 1.993-1) other than a transaction giving rise to gain described in section 995(b)(1) (B) or (C). For purposes of subdivisions (i)(b) and (iv) of this subparagraph, if by reason of section 995(c), gain is included in the shareholder’s gross income as a dividend, accumulated DISC income shall be treated as if it were reduced under § 1.996-3(b)(3).

(iii) *Determination of source of income for deemed distributions, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F).* (a) If for its taxable year a DISC does not have any nonqualified export taxable income, then for such year the entire amount treated, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F) as a deemed distribution taxable as a dividend will be treated as gross income from sources without the United States.

(b) If for its taxable year a DISC has any nonqualified export taxable income, then for such year the portion of the amount treated, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1) (D), (E), and (F) as a deemed distribution taxable as a dividend that will be treated as income from sources

within the United States shall be equal to the amount of such nonqualified export taxable income multiplied by the following fraction. The numerator of the fraction is the sum of the amounts treated, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1)(D), (E), and (F) as deemed distributions taxable as dividends. The denominator of the fraction is the taxable income of the DISC for the taxable year, reduced by the amounts treated under section 995(b)(1)(A), (B), and (C) as deemed distributions taxable as dividends. However, in no event shall the numerator exceed the denominator. The remainder of such dividend will be treated as gross income from sources without the United States.

(iv) *Determination of source of income for dividends that reduce accumulated DISC income.* (a) If no portion of the accumulated DISC income of a DISC or former DISC is attributable to nonqualified export taxable income from any transaction during a year for which it is (or is treated as) a DISC, then the entire amount of any dividend that reduces under § 1.996-3(b)(3) accumulated DISC income will be treated as income from sources without the United States.

(b) If any portion of the accumulated DISC income of a DISC or former DISC is attributable to nonqualified export taxable income from any transaction during a year for which it is (or is treated as) a DISC, then the portion of any dividend during its taxable year that reduces under § 1.996-3(b)(3) accumulated DISC income that will be treated as income from sources within the United States shall be equal to the amount of such dividend multiplied by a fraction (determined as of the close of such year) the numerator of which is the amount of accumulated DISC income attributable to nonqualified export taxable income, and the denominator of which is the total amount of accumulated DISC income. The remainder of such dividend will be treated as gross income from sources without the United States.

(v) *Special rules.* For purposes of subdivisions (iii) and (iv) of this subparagraph—

(a) Taxable income shall be determined under § 1.992-3(b)(2)(i) (relating to the computation of deficiency distribution), and

(b) The portion of any deemed distribution taxable as a dividend, for taxable years beginning before January 1, 1976, under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, and for taxable years beginning after December 31, 1975, under section 995(b)(1)(D), (E), and (F) or amount under § 1.996-3(b)(3) (i) through (iv) that is treated as gross income from sources within the United States during the taxable year shall be considered to reduce the amount of nonqualified export taxable income as of the close of such year.

(vi) *Illustrations.* This subparagraph may be illustrated by the following examples:

Example 1. (a) Y is a corporation which uses the calendar year as its taxable year and which elects to be treated as a DISC beginning with 1972. X is its sole shareholder. In 1973, Y has \$18,000 of taxable income from qualified export receipts (none of which are interest and gains described in section 995(b)(1)(A), (B), and (C)) and \$1,000 of nonqualified export taxable income. Under these facts, X is deemed to have received a distribution under section 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, of \$9,500, *i.e.*, \$19,000 X ½. X is treated under subdivision (iii)(b) of this subparagraph as having \$500, *i.e.*, \$1,000 X \$9,500/\$19,000, from sources within the United States and \$9,000 from sources without the United States.

(b) For 1972, assume that Y did not have any nonqualified export taxable income. Pursuant to subdivision (v)(b) of this subparagraph, at the beginning of 1974, \$500 of Y's accumulated DISC income is attributable to nonqualified export taxable income (iii)(a) of this subparagraph), *i.e.*, \$1,000—\$500.

Example 2. The facts are the same as in example (1) except that in 1973, in addition to the taxable income described in such example, Y has \$450 of taxable income from gross interest from producer's loans described in section 995(b)(1)(A). Under these facts, the deemed distribution of \$450 under section 995(b)(1)(A) is treated in full under subdivision (i) of this subparagraph as gross income from sources within the United States. The deemed distribution under section

995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976, of \$9,500 will be treated in the same manner as in example (1), i.e., \$1,000 X \$9,500/(\$19,450 - \$450).

Example 3. (a) The facts are the same as in example (1) except that in 1973, in addition to the distribution described in such example, Y makes a deemed distribution taxable as a dividend of \$100 under section 995(b)(1)(G) (relating to foreign investment attributable to producer's loans) and actual distributions of all of its previously taxed income and of \$2,000 taxable as a dividend which reduces accumulated DISC income (as defined in subdivision (ii)(b) of this subparagraph). Under § 1.996-3(b)(3), accumulated DISC income is first reduced by the deemed distribution of \$100 and then by the actual distribution taxable as a dividend of \$2,000. As indicated in example (1), for 1972 Y did not have any nonqualified export taxable income. Assume that Y had accumulated DISC income of \$12,000 at the end of 1973, \$500 of which under example (1) is attributable to nonqualified export taxable income.

(b) The distribution from previously taxed income is excluded from gross income pursuant to section 996(a)(3).

(c) Of the deemed distribution of \$100, X is treated under subdivision (iv)(b) as having \$4.17, i.e., \$100x500/12,000, from sources within the United States and \$95.83, i.e., \$100-\$4.17, from sources without the United States.

(d) Of the actual distribution taxable as a dividend of \$2,000, X is treated under subdivision (iv)(b) as having \$83.33, i.e., \$2,000x500/12,000, from sources within the United States and \$1,916.67, i.e., \$2,000-\$83.33, from sources without the United States.

(e) The sum of the amounts deemed and actually distributed as dividends for 1973 that are treated as gross income from sources within the United States is as follows:

| | Total dividend | Amount of dividend from sources within the United States |
|---|-----------------|--|
| Deemed distribution under sec. 995(b)(1)(D) as in effect for taxable years beginning before January 1, 1976 | \$9,500 | \$500.00 |
| Deemed distribution under section 995(b)(1)(G) | 100 | 4.17 |
| Actual distribution that reduces accumulated DISC income | 2,000 | 83.33 |
| Totals | \$11,600 | \$587.50 |

Thus, pursuant to subdivision (v)(b) of this subparagraph, at the beginning of 1974 Y has \$412.50, i.e., \$1,000-\$587.50, of nonqualified export taxable income.

(f) The result would be the same if Y made an actual distribution taxable as a dividend

of \$1,500 on March 30, 1973, and another distribution of \$500 on December 31, 1973.

Example 4. (a) Z is a corporation which uses the calendar year as its taxable year and which elects to be treated as a DISC beginning with 1972. W is its sole shareholder. At the end of the 1976 Z has previously taxed income of \$12,000 and accumulated DISC income of \$4,000, \$900 of which is attributable to nonqualified export taxable income. In 1977, Z has \$20,050 of taxable income from qualified export receipts, of which \$550 is from gross income from producer's loans described in section 995(b)(1)(A); Z has \$950 of taxable income giving rise to gross receipts which are not qualified export receipts, of which \$450 is gain described in section 995(b)(1)(B). Of its total taxable income of \$21,000 (which is equal to its earnings and profits for 1977), \$1,000 is attributable to sales of military property. Z has an international boycott factor (determined under section 999) of .10, and made an illegal bribe (within the meaning of section 162(c)) of \$1,265. The proportion which the amount of Z's adjusted base period export receipts bears to Z's export gross receipts for 1977 is .40 (see section 995(e)(1)). Z makes a deemed distribution taxable as a dividend of \$1,000 under section 995(b)(1)(G) (relating to foreign investment attributable to producer's loans) and actual distributions of \$32,000.

(b) The deemed distributions of \$550 under section 995(b)(1)(A) and \$450 under section 995(b)(1)(B) are treated in full under subdivision (i) of this subparagraph as gross income from sources within the United States.

(c) Under these facts, Z has also made the following deemed distributions taxable as dividends to W under the following subdivisions of section 995(b)(1):

| | | |
|-----------------|---------------|---|
| (D) | \$500, | i.e., 1/2x\$1,000. |
| (E) | 7,800, | i.e., .40 x [\$21,000 - \$(550 + 450 + 500)]. |
| (F)(i) | 5,850, | i.e., 1/2 x [\$21,000 - \$550 + 450 + 500 + 7,800]. |
| (ii) | 585, | i.e., \$5,850x.10 |
| (iii) | 1,265 | |
| Total .. | 16,000 | |

(d) The portion of the total amount of these deemed distributions (\$16,000 that is treated under the subdivision (iii)(b) as gross income from sources within the United States is computed as follows:

(1) The amount of nonqualified export taxable income is \$500, i.e., taxable income giving rise to gross receipts which are not qualified export receipts (\$950) minus gain described in section 995(b)(1) (B) or (C) (\$450).

(2) $500 \times (\$16,000 / \$[21,000 - (550 + 450)]) = \$400.$

The remainder of these distributions, \$15,600 (\$16,000 minus \$400), is treated under subdivision (iii)(b) of this subparagraph as gross income from sources without the United States.

(e) The earnings and profits accounts of Z at the end of 1977 are computed as follows:

| | Total earnings and profits | Previously taxed income | Accumulated DISC income attributable to taxable income from translations which give rise to gross receipts which— | |
|---|----------------------------|-------------------------|---|-----------------------------------|
| | | | Are qualified export receipts | Are not qualified export receipts |
| (1) Balance: January 1, 1977 | \$16,000 | \$12,000 | \$3,100 | \$900 |
| (2) Earnings and profits for 1977, before actual and section 955(b)(1)(G) distributions | 21,000 | 17,000 | 3,900 | ¹ 100 |
| (3) Balance: December 31, 1977 | 37,000 | 29,000 | 7,000 | 1,000 |
| (4) Distribution under section 955(b)(1)(G) | | 1,000 | (875) | ² (125) |
| (5) Balance | 37,000 | 30,000 | 6,125 | 875 |
| (6) Actual distribution | (32,000) | (30,000) | (1,750) | ³ (250) |
| (7) Balance: January 1, 1978 | 5,000 | | 4,375 | 625 |

¹ The total of nonqualified export taxable income (\$500) minus the portion of such income, under subdivision (iii)(b) of this subparagraph, deemed distributed pursuant to section 995(b)(1)(D), (E), and (F) (\$400), as computed under (d)(2) of this example.

² Under subdivision (iv)(b) of this subparagraph, \$1,000/\$8,000×\$1,000.

³ Under subdivision (iv)(b) of this subparagraph, \$1,000/\$8,000×\$2,000 (amount of actual distribution that reduces accumulated DISC income).

(6) *Substitute dividend payments.* A substitute dividend payment is a payment, made to the transferor of a security in a securities lending transaction or a sale-repurchase transaction, of an amount equivalent to a dividend distribution which the owner of the transferred security is entitled to receive during the term of the transaction. A securities lending transaction is a transfer of one or more securities that is described in section 1058(a) or a substantially similar transaction. A sale-repurchase transaction is an agreement under which a person transfers a security in exchange for cash and simultaneously agrees to receive substantially identical securities from the transferee in the future in exchange for cash. A substitute dividend payment shall be sourced in the same manner as the distributions with respect to the transferred security for purposes of this section and § 1.862-1. See also §§ 1.864-5(b)(2)(iii), 1.871-7(b)(2) and 1.881-2(b)(2) for the character of such payments and § 1.894-1(c) for the application of tax treaties to these transactions.

(b) *Special rules*—(1) *Foreign corporation having no gross income for period preceding declaration of dividend.* If the foreign corporation has no gross income from any source for the 3-year period (or part thereof) specified in paragraph (a)(3)(i) of this section, the 50-percent test, or the apportionment for-

mula, as the case may be, described in such paragraph shall be applied solely with respect to the taxable year of such corporation in which the declaration of the dividend occurs. This subparagraph applies whether the lack of gross income for the 3-year period (or part thereof) stems from the business inactivity of the foreign corporation, from the fact that such corporation is newly created or organized, or from any other cause.

(2) *Transitional rule.* For purposes of applying paragraph (a)(3)(i) of this section, the gross income of the foreign corporation for any period before the first taxable year beginning after December 31, 1966, which is from sources within the United States (determined as provided by sections 861 through 863, and the regulations thereunder, as in effect immediately before amendment by section 102 of the Foreign Investors Tax Act of 1966 (Pub. L. 89-809, 80 Stat. 1541)) shall be treated as gross income for such period which is effectively connected with the conduct of a trade or business within the United States by such foreign corporation.

(3) *Gross income determinations.* In making determinations under subparagraph (2) or (3) of paragraph (a) of this section, or subparagraph (2) of this paragraph—

(i) The gross income of a domestic corporation is to be determined by excluding any items specifically excluded from gross income under chapter 1 of the Code.

(ii) The gross income of a foreign corporation which is effectively connected with the conduct of a trade or business in the United States is to be determined under section 882(b)(2) and by excluding any items specifically excluded from gross income under chapter 1 of the Code, and

(iii) The gross income from all sources of a foreign corporation is to be determined without regard to section 882(b) and without excluding any items otherwise specifically excluded from gross income under chapter 1 of the Code.

(c) *Statement with return.* Any taxpayer who is required to file a return and applies any provision of this section to exclude any dividend from his gross income must file with his return a statement setting forth the amount so excluded, the date of its receipt, the name and address of the corporation paying the dividend, and, if known, the location of the records which substantiate the amount of the exclusion. A statement from the paying corporation setting forth such information and indicating the amount of the dividend to be treated as income from sources within the United States may be used for this purpose. See §§ 1.6012-1(b)(1)(i) and 1.6012-2 (g)(1)(i).

(d) *Effective/applicability date.* Except as otherwise provided in this paragraph this section applies with respect to dividends received or accrued after December 31, 1966. Paragraph (a)(5) of this section applies to certain dividends from a DISC or former DISC in taxable years ending after December 31, 1971. Paragraph (a)(6) of this section is applicable to payments made after November 13, 1997. For purposes of paragraph (a)(5) of this section, any reference to a distribution taxable as a dividend under section 995(b)(1)(F) (ii) and (iii) for taxable years beginning after December 31, 1975, shall also constitute a reference to any distribution taxable as a dividend under section 995(b)(1)(F) (ii) and (iii) for taxable years beginning after November 30, 1975, but before January 1, 1976. For corresponding rules

applicable with respect to dividends received or accrued before January 1, 1967, see 26 CFR 1.861-3 (Revised as of January 1, 1972). Paragraph (a)(2) of this section applies to taxable years ending after April 9, 2008.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.861-3, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 1.861-4 Compensation for labor or personal services.

(a) *Compensation for labor or personal services performed wholly within the United States.* (1) Generally, compensation for labor or personal services, including fees, commissions, fringe benefits, and similar items, performed wholly within the United States is gross income from sources within the United States.

(i) The labor or services are performed by a nonresident alien individual temporarily present in the United States for a period or periods not exceeding a total of 90 days during his taxable year,

(ii) The compensation for such labor or services does not exceed in the aggregate a gross amount of \$3,000, and

(iii) The compensation is for labor or services performed as an employee of, or under any form of contract with—

(a) A nonresident alien individual, foreign partnership, or foreign corporation, not engaged in trade or business within the United States, or

(b) An individual who is a citizen or resident of the United States, a domestic partnership, or a domestic corporation, if such labor or services are performed for an office or place of business maintained in a foreign country or in a possession of the United States by such individual, partnership, or corporation.

(2) As a general rule, the term “day”, as used in subparagraph (1)(i) of this paragraph, means a calendar day during any portion of which the nonresident alien individual is physically present in the United States.

(3) Solely for purposes of applying this paragraph, the nonresident alien

individual, foreign partnership, or foreign corporation for which the non-resident alien individual is performing personal services in the United States shall not be considered to be engaged in trade or business in the United States by reason of the performance of such services by such individual.

(4) In determining for purposes of subparagraph (1)(ii) of this paragraph whether compensation received by the nonresident alien individual exceeds in the aggregate a gross amount of \$3,000, any amounts received by the individual from an employer as advances or reimbursements for travel expenses incurred on behalf of the employer shall be omitted from the compensation received by the individual, to the extent of expenses incurred, where he was required to account and did account to his employer for such expenses and has met the tests for such accounting provided in § 1.162-17 and paragraph (e)(4) of § 1.274-5. If advances or reimbursements exceed such expenses, the amount of the excess shall be included as compensation for personal services for purposes of such subparagraph. Pensions and retirement pay attributable to labor or personal services performed in the United States are not to be taken into account for purposes of subparagraph (1)(ii) of this paragraph. (5) For definition of the term "United States", when used in a geographical sense, see sections 638 and 7701(a)(9).

(b) *Compensation for labor or personal services performed partly within and partly without the United States*—(1) *Compensation for labor or personal services performed by persons other than individuals*—(i) *In general.* In the case of compensation for labor or personal services performed partly within and partly without the United States by a person other than an individual, the part of that compensation that is attributable to the labor or personal services performed within the United States, and that is therefore included in gross income as income from sources within the United States, is determined on the basis that most correctly reflects the proper source of the income under the facts and circumstances of the particular case. In many cases, the facts and circumstances will be such that an

apportionment on the time basis, as defined in paragraph (b)(2)(ii)(E) of this section, will be acceptable.

(ii) *Example.* The application of paragraph (b)(1)(i) is illustrated by the following example.

Example. Corp X, a domestic corporation, receives compensation of \$150,000 under a contract for services to be performed concurrently in the United States and in several foreign countries by numerous Corp X employees. Each Corp X employee performing services under this contract performs his or her services exclusively in one jurisdiction. Although the number of employees (and hours spent by employees) performing services under the contract within the United States equals the number of employees (and hours spent by employees) performing services under the contract without the United States, the compensation paid to employees performing services under the contract within the United States is higher because of the more sophisticated nature of the services performed by the employees within the United States. Accordingly, the payroll cost for employees performing services under the contract within the United States is \$20,000 out of a total contract payroll cost of \$30,000. Under these facts and circumstances, a determination based upon relative payroll costs would be the basis that most correctly reflects the proper source of the income received under the contract. Thus, of the \$150,000 of compensation included in Corp X's gross income, \$100,000 ($\$150,000 \times \$20,000/\$30,000$) is attributable to the labor or personal services performed within the United States and \$50,000 ($\$150,000 \times \$10,000/\$30,000$) is attributable to the labor or personal services performed without the United States.

(2) *Compensation for labor or personal services performed by an individual*—(i) *In general.* Except as provided in paragraph (b)(2)(ii) of this section, in the case of compensation for labor or personal services performed partly within and partly without the United States by an individual, the part of such compensation that is attributable to the labor or personal services performed within the United States, and that is therefore included in gross income as income from sources within the United States, is determined on the basis that most correctly reflects the proper source of that income under the facts and circumstances of the particular case. In many cases, the facts and circumstances will be such that an apportionment on a time basis, as defined in

paragraph (b)(2)(ii)(E) of this section, will be acceptable.

(ii) *Employee compensation*—(A) *In general.* Except as provided in paragraph (b)(2)(ii)(B) or (C) of this section, in the case of compensation for labor or personal services performed partly within and partly without the United States by an individual as an employee, the part of such compensation that is attributable to the labor or personal services performed within the United States, and that is therefore included in gross income as income from sources within the United States, is determined on a time basis, as defined in paragraph (b)(2)(ii)(E) of this section.

(B) *Certain fringe benefits sourced on a geographical basis.* Except as provided in paragraph (b)(2)(ii)(C) of this section, items of compensation of an individual as an employee for labor or personal services performed partly within and partly without the United States that are described in paragraphs (b)(2)(ii)(D)(1) through (6) of this section are sourced on a geographical basis in accordance with those paragraphs.

(C) *Exceptions and special rules*—(1) *Alternative basis*—(i) *Individual as an employee generally.* An individual may determine the source of his or her compensation as an employee for labor or personal services performed partly within and partly without the United States under an alternative basis if the individual establishes to the satisfaction of the Commissioner that, under the facts and circumstances of the particular case, the alternative basis more properly determines the source of the compensation than a basis described in paragraph (b)(2)(ii)(A) or (B), whichever is applicable, of this section. An individual that uses an alternative basis must retain in his or her records documentation setting forth why the alternative basis more properly determines the source of the compensation. In addition, the individual must provide the information related to the alternative basis required by applicable Federal tax forms and accompanying instructions.

(ii) *Determination by Commissioner.* The Commissioner may, under the facts and circumstances of the particular case, determine the source of

compensation that is received by an individual as an employee for labor or personal services performed partly within and partly without the United States under an alternative basis other than a basis described in paragraph (b)(2)(ii)(A) or (B) of this section if such compensation either is not for a specific time period or constitutes in substance a fringe benefit described in paragraph (b)(2)(ii)(D) of this section notwithstanding a failure to meet any requirement of paragraph (b)(2)(ii)(D) of this section. The Commissioner may make this determination only if such alternative basis determines the source of compensation in a more reasonable manner than the basis used by the individual pursuant to paragraph (b)(2)(ii)(A) or (B) of this section.

(2) *Ruling or other administrative pronouncement with respect to groups of taxpayers.* The Commissioner may, by ruling or other administrative pronouncement applying to similarly situated taxpayers generally, permit individuals to determine the source of their compensation as an employee for labor or personal services performed partly within and partly without the United States under an alternative basis. Any such individual shall be treated as having met the requirement to establish such alternative basis to the satisfaction of the Commissioner under the facts and circumstances of the particular case, provided that the individual meets the other requirements of paragraph (b)(2)(ii)(C)(1)(i) of this section. The Commissioner also may, by ruling or other administrative pronouncement, indicate the circumstances in which he will require individuals to determine the source of certain compensation as an employee for labor or personal services performed partly within and partly without the United States under an alternative basis pursuant to the authority under paragraph (b)(2)(ii)(C)(1)(ii) of this section.

(3) *Artists and athletes.* [Reserved]

(D) *Fringe benefits sourced on a geographical basis.* Except as provided in paragraph (b)(2)(ii)(C) of this section, compensation of an individual as an employee for labor or personal services performed partly within and partly without the United States in the form

of the following fringe benefits is sourced on a geographical basis as indicated in this paragraph (b)(2)(ii)(D). The amount of the compensation in the form of the fringe benefit must be reasonable, and the individual must substantiate such amounts by adequate records or by sufficient evidence under rules similar to those set forth in § 1.274-5T(c) or (h) or § 1.132-5. For purposes of this paragraph (b)(2)(ii)(D), the term *principal place of work* has the same meaning that it has for purposes of section 217 and § 1.217-2(c)(3).

(1) *Housing fringe benefit.* The source of compensation in the form of a housing fringe benefit is determined based on the location of the individual's principal place of work. For purposes of this paragraph (b)(2)(ii)(D)(1), a housing fringe benefit includes payments to or on behalf of an individual (and the individual's family if the family resides with the individual) only for rent, utilities (other than telephone charges), real and personal property insurance, occupancy taxes not deductible under section 164 or 216(a), nonrefundable fees paid for securing a leasehold, rental of furniture and accessories, household repairs, residential parking, and the fair rental value of housing provided in kind by the individual's employer. A housing fringe benefit does not include payments for expenses or items set forth in § 1.911-4(b)(2).

(2) *Education fringe benefit.* The source of compensation in the form of an education fringe benefit for the education expenses of the individual's dependents is determined based on the location of the individual's principal place of work. For purposes of this paragraph (b)(2)(ii)(D)(2), an education fringe benefit includes payments only for qualified tuition and expenses of the type described in section 530(b)(4)(A)(i) (regardless of whether incurred in connection with enrollment or attendance at a school) and expenditures for room and board and uniforms as described in section 530(b)(4)(A)(ii) with respect to education at an elementary or secondary educational institution.

(3) *Local transportation fringe benefit.* The source of compensation in the form of a local transportation fringe benefit is determined based on the lo-

cation of the individual's principal place of work. For purposes of this paragraph (b)(2)(ii)(D)(3), an individual's local transportation fringe benefit is the amount that the individual receives as compensation for local transportation of the individual or the individual's spouse or dependents at the location of the individual's principal place of work. The amount treated as a local transportation fringe benefit is limited to the actual expenses incurred for local transportation and the fair rental value of any vehicle provided by the employer and used predominantly by the individual or the individual's spouse or dependents for local transportation. For this purpose, actual expenses incurred for local transportation do not include the cost (including interest) of the purchase by the individual, or on behalf of the individual, of an automobile or other vehicle.

(4) *Tax reimbursement fringe benefit.* The source of compensation in the form of a foreign tax reimbursement fringe benefit is determined based on the location of the jurisdiction that imposed the tax for which the individual is reimbursed.

(5) *Hazardous or hardship duty pay fringe benefit.* The source of compensation in the form of a hazardous or hardship duty pay fringe benefit is determined based on the location of the hazardous or hardship duty zone for which the hazardous or hardship duty pay fringe benefit is paid. For purposes of this paragraph (b)(2)(ii)(D)(5), a hazardous or hardship duty zone is any place in a foreign country which is either designated by the Secretary of State as a place where living conditions are extraordinarily difficult, notably unhealthy, or where excessive physical hardships exist, and for which a post differential of 15 percent or more would be provided under section 5925(b) of title 5 of the U.S. Code to any officer or employee of the U.S. Government present at that place, or where a civil insurrection, civil war, terrorism, or wartime conditions threatens physical harm or imminent danger to the health and well-being of the individual. Compensation provided an employee during the period that the employee performs

labor or personal services in a hazardous or hardship duty zone may be treated as a hazardous or hardship duty pay fringe benefit only if the employer provides the hazardous or hardship duty pay fringe benefit only to employees performing labor or personal services in a hazardous or hardship duty zone. The amount of compensation treated as a hazardous or hardship duty pay fringe benefit may not exceed the maximum amount that the U.S. government would allow its officers or employees present at that location.

(6) *Moving expense reimbursement fringe benefit.* Except as otherwise provided in this paragraph (b)(2)(ii)(D)(6), the source of compensation in the form of a moving expense reimbursement is determined based on the location of the employee's new principal place of work. The source of such compensation is determined based on the location of the employee's former principal place of work, however, if the individual provides sufficient evidence that such determination of source is more appropriate under the facts and circumstances of the particular case. For purposes of this paragraph (b)(2)(ii)(D)(6), sufficient evidence generally requires an agreement, between the employer and the employee, or a written statement of company policy, which is reduced to writing before the move and which is entered into or established to induce the employee or employees to move to another country. Such written statement or agreement must state that the employer will reimburse the employee for moving expenses that the employee incurs to return to the employee's former principal place of work regardless of whether he or she continues to work for the employer after returning to that location. The writing may contain certain conditions upon which the right to reimbursement is determined as long as those conditions set forth standards that are definitely ascertainable and can only be fulfilled prior to, or through completion of, the employee's return move to the employee's former principal place of work.

(E) *Time basis.* The amount of compensation for labor or personal services performed within the United States determined on a time basis is the amount

that bears the same relation to the individual's total compensation as the number of days of performance of the labor or personal services by the individual within the United States bears to his or her total number of days of performance of labor or personal services. A unit of time less than a day may be appropriate for purposes of this calculation. The time period for which the compensation for labor or personal services is made is presumed to be the calendar year in which the labor or personal services are performed, unless the taxpayer establishes to the satisfaction of the Commissioner, or the Commissioner determines, that another distinct, separate, and continuous period of time is more appropriate. For example, a transfer during a year from a position in the United States to a foreign posting that lasted through the end of that year would generally establish two separate time periods within that taxable year. The first of these time periods would be the portion of the year preceding the start of the foreign posting, and the second of these time periods would be the portion of the year following the start of the foreign posting. However, in the case of a foreign posting that requires short-term returns to the United States to perform services for the employer, such short-term returns would not be sufficient to establish distinct, separate, and continuous time periods within the foreign posting time period but would be relevant to the allocation of compensation relating to the overall time period. In each case, the source of the compensation on a time basis is based upon the number of days (or unit of time less than a day, if appropriate) in that separate time period.

(F) *Multi-year compensation arrangements.* The source of multi-year compensation is determined generally on a time basis, as defined in paragraph (b)(2)(ii)(E) of this section, over the period to which such compensation is attributable. For purposes of this paragraph (b)(2)(ii)(F), *multi-year compensation* means compensation that is included in the income of an individual in one taxable year but that is attributable to a period that includes two or more taxable years. The determination

of the period to which such compensation is attributable, for purposes of determining its source, is based upon the facts and circumstances of the particular case. For example, an amount of compensation that specifically relates to a period of time that includes several calendar years is attributable to the entirety of that multi-year period. The amount of such compensation that is treated as from sources within the United States is the amount that bears the same relationship to the total multi-year compensation as the number of days (or unit of time less than a day, if appropriate) that labor or personal services were performed within the United States in connection with the project bears to the total number of days (or unit of time less than a day, if appropriate) that labor or personal services were performed in connection with the project. In the case of stock options, the facts and circumstances generally will be such that the applicable period to which the compensation is attributable is the period between the grant of an option and the date on which all employment-related conditions for its exercise have been satisfied (the vesting of the option).

(G) *Examples.* The following examples illustrate the application of this paragraph (b)(2)(ii):

Example 1. B, a nonresident alien individual, was employed by Corp M, a domestic corporation, from March 1 to December 25 of the taxable year, a total of 300 days, for which B received compensation in the amount of \$80,000. Under B's employment contract with Corp M, B was subject to call at all times by Corp M and was in a payment status on a 7-day week basis. Pursuant to that contract, B performed services (or was available to perform services) within the United States for 180 days and performed services (or was available to perform services) without the United States for 120 days. None of B's \$80,000 compensation was for fringe benefits as identified in paragraph (b)(2)(ii)(D) of this section. B determined the amount of compensation that is attributable to his labor or personal services performed within the United States on a time basis under paragraph (b)(2)(ii)(A) and (E) of this section. B did not assert, pursuant to paragraph (b)(2)(ii)(C)(1)(i) of this section, that, under the particular facts and circumstances, an alternative basis more properly determines the source of that compensation than the time basis. Therefore, B must include in income from sources within the

United States \$48,000 ($\$80,000 \times 180/300$) of his compensation from Corporation M.

Example 2. (i) Same facts as in *Example 1* except that Corp M had a company-wide arrangement with its employees, including B, that they would receive an education fringe benefit, as described in paragraph (b)(2)(ii)(D)(2) of this section, while working in the United States. During the taxable year, B incurred education expenses for his dependent daughter that qualified for the education fringe benefit in the amount of \$10,000, for which B received a reimbursement from Corp M. B did not maintain adequate records or sufficient evidence of this fringe benefit as required by paragraph (b)(2)(ii)(D) of this section. When B filed his Federal income tax return for the taxable year, B did not apply paragraphs (b)(2)(ii)(B) and (D)(2) of this section to treat the compensation in the form of the education fringe benefit as income from sources within the United States, the location of his principal place of work during the 300-day period. Rather, B combined the \$10,000 reimbursement with his base compensation of \$80,000 and applied the time basis of paragraph (b)(2)(ii)(A) of this section to determine the source of his gross income.

(ii) On audit, B argues that because he failed to substantiate the education fringe benefit in accordance with paragraph (b)(2)(ii)(D) of this section, his entire employment compensation from Corp M is sourced on a time basis pursuant to paragraph (b)(2)(ii)(A) of this section. The Commissioner, after reviewing Corp M's fringe benefit arrangement, determines, pursuant to paragraph (b)(2)(ii)(C)(1)(ii) of this section, that the \$10,000 educational expense reimbursement constitutes in substance a fringe benefit described in paragraph (b)(2)(ii)(D)(2) of this section, notwithstanding a failure to meet all of the requirements of paragraph (b)(2)(ii)(D) of this section, and that an alternative geographic source basis, under the facts and circumstances of this particular case, is a more reasonable manner to determine the source of the compensation than the time basis used by B.

Example 3. (i) A, a United States citizen, is employed by Corp N, a domestic corporation. A's principal place of work is in the United States. A earns an annual salary of \$100,000. During the first quarter of the calendar year (which is also A's taxable year), A performed services entirely within the United States. At the beginning of the second quarter of the calendar year, A was transferred to Country X for the remainder of the year and received, in addition to her annual salary, \$30,000 in fringe benefits that are attributable to her new principal place of work in Country X. Corp N paid these fringe benefits separately from A's annual salary. Corp N supplied A with a statement detailing that \$25,000 of the

fringe benefit was paid for housing, as defined in paragraph (b)(2)(ii)(D)(1) of this section, and \$5,000 of the fringe benefit was paid for local transportation, as defined in paragraph (b)(2)(ii)(D)(3) of this section. None of the local transportation fringe benefit is excluded from the employee's gross income as a qualified transportation fringe benefit under section 132(a)(5). Under A's employment contract, A was required to work on a 5-day week basis, Monday through Friday. During the last three quarters of the year, A performed services 30 days in the United States and 150 days in Country X and other foreign countries.

(ii) A determined the source of all of her compensation from Corp N pursuant to paragraphs (b)(2)(ii)(A), (B), and (D)(1) and (3) of this section. A did not assert, pursuant to paragraph (b)(2)(ii)(C)(1)(i) of this section, that, under the particular facts and circumstances, an alternative basis more properly determines the source of that compensation than the bases set forth in paragraphs (b)(2)(ii)(A), (B), and (D)(1) and (3) of this section. However, in applying the time basis set forth in paragraph (b)(2)(ii)(E) of this section, A establishes to the satisfaction of the Commissioner that the first quarter of the calendar year and the last three quarters of the calendar year are two separate, distinct, and continuous periods of time. Accordingly, \$25,000 of A's annual salary is attributable to the first quarter of the year (25 percent of \$100,000). This amount is entirely compensation that was attributable to the labor or personal services performed within the United States and is, therefore, included in gross income as income from sources within the United States. The balance of A's compensation as an employee of Corp N, \$105,000 (which includes the \$30,000 in fringe benefits that are attributable to the location of A's principal place of work in Country X), is compensation attributable to the final three quarters of her taxable year. During those three quarters, A's periodic performance of services in the United States does not result in distinct, separate, and continuous periods of time. Of the \$75,000 paid for annual salary, \$12,500 ($30/180 \times \$75,000$) is compensation that was attributable to the labor or personal services performed within the United States and \$62,500 ($150/180 \times \$75,000$) is compensation that was attributable to the labor or personal services performed outside the United States. Pursuant to paragraphs (b)(2)(ii)(B) and (D)(1) and (3) of this section, A sourced the \$25,000 received for the housing fringe benefit and the \$5,000 received for the local transportation fringe benefit based on the location of her principal place of work, Country X. Accordingly, A included the \$30,000 in fringe benefits in her gross income as income from sources without the United States.

Example 4. Same facts as in *Example 3*. Of the 150 days during which A performed serv-

ices in Country X and in other foreign countries (during the final three quarters of A's taxable year), she performed 30 days of those services in Country Y. Country Y is a country designated by the Secretary of State as a place where living conditions are extremely difficult, notably unhealthy, or where excessive physical hardships exist and for which a post differential of 15 percent or more would be provided under section 5925(b) of title 5 of the U.S. Code to any officer or employee of the U.S. government present at that place. Corp N has a policy of paying its employees a \$65 premium per day for each day worked in countries so designated. The \$65 premium per day does not exceed the maximum amount that the U. S. government would pay its officers or employees stationed in Country Y. Because A performed services in Country Y for 30 days, she earned additional compensation of \$1,950. The \$1,950 is considered a hazardous duty or hardship pay fringe benefit and is sourced under paragraphs (b)(2)(ii)(B) and (D)(5) of this section based on the location of the hazardous or hardship duty zone, Country Y. Accordingly, A included the amount of the hazardous duty or hardship pay fringe benefit (\$1,950) in her gross income as income from sources without the United States.

Example 5. (i) During 2006 and 2007, Corp P, a domestic corporation, employed four United States citizens, E, F, G, and H to work in its manufacturing plant in Country V. As part of his or her compensation package, each employee arranged for local transportation unrelated to Corp P's business needs. None of the local transportation fringe benefit is excluded from the employee's gross income as a qualified transportation fringe benefit under section 132(a)(5) and (f).

(ii) Under the terms of the compensation package that E negotiated with Corp P, Corp P permitted E to use an automobile owned by Corp P. In addition, Corp P agreed to reimburse E for all expenses incurred by E in maintaining and operating the automobile, including gas and parking. Provided that the local transportation fringe benefit meets the requirements of paragraph (b)(2)(ii)(D)(3) of this section, E's compensation with respect to the fair rental value of the automobile and reimbursement for the expenses E incurred is sourced under paragraphs (b)(2)(ii)(B) and (D)(3) of this section based on E's principal place of work in Country V. Thus, the local transportation fringe benefit will be included in E's gross income as income from sources without the United States.

(iii) Under the terms of the compensation package that F negotiated with Corp P, Corp P let F use an automobile owned by Corp P. However, Corp P did not agree to reimburse

F for any expenses incurred by F in maintaining and operating the automobile. Provided that the local transportation fringe benefit meets the requirements of paragraph (b)(2)(ii)(D)(3) of this section, F's compensation with respect to the fair rental value of the automobile is sourced under paragraphs (b)(2)(ii)(B) and (D)(3) of this section based on F's principal place of work in Country V. Thus, the local transportation fringe benefit will be included in F's gross income as income from sources without the United States.

(iv) Under the terms of the compensation package that G negotiated with Corp P, Corp P agreed to reimburse G for the purchase price of an automobile that G purchased in Country V. Corp P did not agree to reimburse G for any expenses incurred by G in maintaining and operating the automobile. Because the cost to purchase an automobile is not a local transportation fringe benefit as defined in paragraph (b)(2)(ii)(D)(3) of this section, the source of the compensation to G will be determined pursuant to paragraph (b)(2)(ii)(A) or (C) of this section.

(v) Under the terms of the compensation package that H negotiated with Corp P, Corp P agreed to reimburse H for the expenses that H incurred in maintaining and operating an automobile, including gas and parking, which H purchased in Country V. Provided that the local transportation fringe benefit meets the requirements of paragraph (b)(2)(ii)(D)(3) of this section, H's compensation with respect to the reimbursement for the expenses H incurred is sourced under paragraphs (b)(2)(ii)(B) and (D)(3) of this section based on H's principal place of work in Country V. Thus, the local transportation fringe benefit will be included in H's gross income as income from sources without the United States.

Example 6. (i) On January 1, 2006, Company Q compensates employee J with a grant of options to which section 421 does not apply that do not have a readily ascertainable fair market value when granted. The stock options permit J to purchase 100 shares of Company Q stock for \$5 per share. The stock options do not become exercisable unless and until J performs services for Company Q (or a related company) for 5 years. J works for Company Q for the 5 years required by the stock option grant. In years 2006-08, J performs all of his services for Company Q within the United States. In 2009, J performs ½ of his services for Company Q within the United States and ½ of his services for Company Q without the United States. In year 2010, J performs his services entirely without the United States. On December 31, 2012, J exercises the options when the stock is worth \$10 per share. J recognizes \$500 in taxable compensation $(\$10 - \$5) \times 100$ in 2012.

(ii) Under the facts and circumstances, the applicable period is the 5-year period be-

tween the date of grant (January 1, 2006) and the date the stock options become exercisable (December 31, 2010). On the date the stock options become exercisable, J performs all services necessary to obtain the compensation from Company Q. Accordingly, the services performed after the date the stock options become exercisable are not taken into account in sourcing the compensation from the stock options. Therefore, pursuant to paragraph (b)(2)(ii)(A), since J performs 3½ years of services for Company Q within the United States and 1½ years of services for Company Q without the United States during the 5-year period, 7/10 of the \$500 of compensation (or \$350) recognized in 2012 is income from sources within the United States and the remaining 3/10 of the compensation (or \$150) is income from sources without the United States.

(c) *Coastwise travel.* Except as to income excluded by paragraph (a) of this section, wages received for services rendered inside the territorial limits of the United States and wages of an alien seaman earned on a coastwise vessel are to be regarded as from sources within the United States.

(d) *Effective date.* This section applies with respect to taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.861-4 (Revised as of January 1, 1972). Paragraph (b) and the first sentence of paragraph (a)(1) of this section apply to taxable years beginning on or after July 14, 2005.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7378, 40 FR 45433, Oct. 2, 1975; 40 FR 48508, Oct. 16, 1975; T.D. 9212, 70 FR 40665, July 14, 2005]

§ 1.861-5 Rentals and royalties.

Gross income from sources within the United States includes rentals or royalties from property located in the United States or from any interest in such property, including rentals or royalties for the use of, or for the privilege of using, in the United States, patents, copyrights, secret processes and formulas, good will, trademarks, trade brands, franchises, and other like property. The income arising from the rental of property, whether tangible or intangible, located within the United States, or from the use of property, whether tangible or intangible, within the United States, is from sources within the United States. For taxable

years beginning after December 31, 1966, gains described in section 871(a)(1)(D) and section 881(a)(4) from the sale or exchange after October 4, 1966, of patents, copyrights, and other like property shall be treated, as provided in section 871(e)(2), as rentals or royalties for the use of, or privilege of using, property or an interest in property. See paragraph (e) of §1.871-11.

[T.D. 7378, 40 FR 45434, Oct. 2, 1975]

§ 1.861-6 Sale of real property.

Gross income from sources within the United States includes gain, computed under the provisions of section 1001 and the regulations thereunder, derived from the sale or other disposition of real property located in the United States. For the treatment of capital gains and losses, see subchapter P (section 1201 and following), chapter 1 of the Code, and the regulations thereunder.

§ 1.861-7 Sale of personal property.

(a) *General.* Gains, profits, and income derived from the purchase and sale of personal property shall be treated as derived entirely from the country in which the property is sold. Thus, gross income from sources within the United States includes gains, profits, and income derived from the purchase of personal property without the United States and its sale within the United States.

(b) *Purchase within a possession.* Notwithstanding paragraph (a) of this section, income derived from the purchase of personal property within a possession of the United States and its sale within the United States shall be treated as derived partly from sources within and partly from sources without the United States. See section 863(b)(3) and §1.863-2.

(c) *Country in which sold.* For the purposes of part I (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder, a sale of personal property is consummated at the time when, and the place where, the rights, title, and interest of the seller in the property are transferred to the buyer. Where bare legal title is retained by the seller, the sale shall be deemed to have occurred at the time and place of passage to the

buyer of beneficial ownership and the risk of loss. However, in any case in which the sales transaction is arranged in a particular manner for the primary purpose of tax avoidance, the foregoing rules will not be applied. In such cases, all factors of the transaction, such as negotiations, the execution of the agreement, the location of the property, and the place of payment, will be considered, and the sale will be treated as having been consummated at the place where the substance of the sale occurred.

(d) *Production and sale.* For provisions respecting the source of income derived from the sale of personal property produced by the taxpayer, see section 863(b)(2) and paragraphs (b) of §§1.863-1 and 1.863-2.

(e) *Section 306 stock.* For determining the source of gain on the disposition of section 306 stock, see section 306(f) and the regulations thereunder.

§ 1.861-8 Computation of taxable income from sources within the United States and from other sources and activities.

(a) *In general—(1) Scope.* Sections 861(b) and 863(a) state in general terms how to determine taxable income of a taxpayer from sources within the United States after gross income from sources within the United States has been determined. Sections 862(b) and 863(a) state in general terms how to determine taxable income of a taxpayer from sources without the United States after gross income from sources without the United States has been determined. This section provides specific guidance for applying the cited Code sections by prescribing rules for the allocation and apportionment of expenses, losses, and other deductions (referred to collectively in this section as “deductions”) of the taxpayer. The rules contained in this section apply in determining taxable income of the taxpayer from specific sources and activities under other sections of the Code, referred to in this section as operative sections. See paragraph (f)(1) of this section for a list and description of operative sections. The operative sections include, among others, sections 871(b) and 882 (relating to taxable income of a

nonresident alien individual or a foreign corporation which is effectively connected with the conduct of a trade or business in the United States), section 904(a)(1) (as in effect before enactment of the Tax Reform Act of 1976, relating to taxable income from sources within specific foreign countries), and section 904(a)(2) (as in effect before enactment of the Tax Reform Act of 1976, or section 904(a) after such enactment, relating to taxable income from all sources without the United States).

(2) *Allocation and apportionment of deductions in general.* A taxpayer to which this section applies is required to allocate deductions to a class of gross income and, then, if necessary to make the determination required by the operative section of the Code, to apportion deductions within the class of gross income between the statutory grouping of gross income (or among the statutory groupings) and the residual grouping of gross income. Except for deductions, if any, which are not definitely related to gross income (see paragraphs (c)(3) and (e)(9) of this section) and which, therefore, are ratably apportioned to all gross income, all deductions of the taxpayer (except the deductions for personal exemptions enumerated in paragraph (e)(11) of this section) must be so allocated and apportioned. As further detailed below, allocations and apportionments are made on the basis of the factual relationship of deductions to gross income.

(3) *Class of gross income.* For purposes of this section, the gross income to which a specific deduction is definitely related is referred to as a “class of gross income” and may consist of one or more items (or subdivisions of these items) of gross income enumerated in section 61, namely:

- (i) Compensation for services, including fees, commissions, and similar items;
- (ii) Gross income derived from business;
- (iii) Gains derived from dealings in property;
- (iv) Interest;
- (v) Rents;
- (vi) Royalties;
- (vii) Dividends;
- (viii) Alimony and separate maintenance payments;

- (ix) Annuities;
- (x) Income from life insurance and endowment contracts;
- (xi) Pensions;
- (xii) Income from discharge of indebtedness;
- (xiii) Distributive share of partnership gross income;
- (xiv) Income in respect of a decedent;
- (xv) Income from an interest in an estate or trust.

(4) *Statutory grouping of gross income and residual grouping of gross income.* For purposes of this section, the term “statutory grouping of gross income” or “statutory grouping” means the gross income from a specific source or activity which must first be determined in order to arrive at “taxable income” from which specific source or activity under an operative section. (See paragraph (f)(1) of this section.) Gross income from other sources or activities is referred to as the “residual grouping of gross income” or “residual grouping.” For example, for purposes of determining taxable income from sources within specific foreign countries and possessions of the United States, in order to apply the per-country limitation to the foreign tax credit (as in effect before enactment of the Tax Reform Act of 1976), the statutory groupings are the separate gross incomes from sources within each country and possession. Moreover, if the taxpayer has income subject to section 904(d) (as in effect after enactment of the Tax Reform Act of 1976), such income constitutes one or more separate statutory groupings. In the case of the per-country limitation, the residual grouping is the aggregate of gross income from sources within the United States. In some instances, where the operative section so requires, the statutory grouping or the residual grouping may include, or consist entirely of, excluded income. See paragraph (d)(2) of this section with respect to the allocation and apportionment of deductions to excluded income.

(5) *Effective date—(i) Taxable years beginning after December 31, 1976.* The provisions of this section apply to taxable years beginning after December 31, 1976.

(ii) Paragraph (e)(4), the last sentence of paragraph (f)(4)(i), and paragraph (g), *Examples 17, 18, and 30* of this section are generally applicable for taxable years beginning after July 31, 2009. In addition, a person may elect to apply the provisions of paragraph (e)(4) of this section to earlier years. Such election shall be made in accordance with the rules set forth in §1.482-9(n)(2).

(iii) *Taxable years beginning before January 1, 1977.* For taxable years beginning before January 1, 1977, §1.861-8 applies as in effect on October 23, 1957 (T.D. 6258), as amended on August 22, 1966 (T.D. 6892) and on September 29, 1975 (T.D. 7378). The specific rules for allocation and apportionment of deductions set forth in this section may, at the option of the taxpayer, apply to those taxable years on a deduction-by-deduction basis if the rules are applied consistently to all taxable years with respect to which action by the Internal Revenue Service is not barred by any statute of limitations. Thus, for example, a calendar year taxpayer may choose to have the rules of paragraph (e)(2) of this section apply for the allocation and apportionment of all interest expenses for the two taxable years ending December 31, 1975 and 1976, which are open years under examination, and may justify the allocation and apportionment of all research and development expenses for those years on a basis supportable under §1.861-8 as in effect for 1975 and 1976 without regard to the rules of paragraph (e)(3) of this section.

(b) *Allocation—(1) In general.* For purposes of this section, the gross income to which a specific deduction is definitely related is referred to as a “class of gross income” and may consist of one or more items of gross income. The rules emphasize the factual relationship between the deduction and a class of gross income. See paragraph (d)(1) of this section which provides that in a taxable year there may be no item of gross income in a class or less gross income than deductions allocated to the class, and paragraph (d)(2) of this section which provides that a class of gross income may include excluded income. Allocation is accomplished by determining, with respect to each de-

duction, the class of gross income to which the deduction is definitely related and then allocating the deduction to such class of gross income (without regard to the taxpayable year in which such gross income is received or accrued or is expected to be received or accrued). The classes of gross income are not predetermined but must be determined on the basis of the deductions to be allocated. Although most deductions will be definitely related to some class of a taxpayer’s total gross income, some deductions are related to all gross income. In addition, some deductions are treated as not definitely related to any gross income and are ratably apportioned to all gross income. (See paragraph (e)(9) of this section.) In allocating deductions it is not necessary to differentiate between deductions related to one item of gross income and deductions related to another item of gross income where both items of gross income are exclusively within the same statutory grouping or exclusively within the residual grouping.

(2) *Relationship to activity or property.* A deduction shall be considered definitely related to a class of gross income and therefore allocable to such class if it is incurred as a result of, or incident to, an activity or in connection with property from which such class of gross income is derived. Where a deduction is incurred as a result of, or incident to, an activity or in connection with property, which activity or property generates, has generated, or could reasonably have been expected to generate gross income, such deduction shall be considered definitely related to such gross income as a class whether or not there is any item of gross income in such class which is received or accrued during the taxable year and whether or not the amount of deductions exceeds the amount of the gross income in such class. See paragraph (d)(1) of this section and example 17 of paragraph (g) of this section with respect to cases in which there is an excess of deductions. In some cases, it will be found that this subparagraph can most readily be applied by determining, with respect to a deduction, the categories of gross income to which it is not related and concluding that it

is definitely related to a class consisting of all other gross income.

(3) *Supportive functions.* Deductions which are supportive in nature (such as overhead, general and administrative, and supervisory expenses) may relate to other deductions which can more readily be allocated to gross income. In such instance, such supportive deductions may be allocated and apportioned along with the deductions to which they relate. On the other hand, it would be equally acceptable to attribute supportive deductions on some reasonable basis directly to activities or property which generate, have generated or could reasonably be expected to generate gross income. This would ordinarily be accomplished by allocating the supportive expenses to all gross income or to another broad class of gross income and apportioning the expenses in accordance with paragraph (c)(1) of this section. For this purpose, reasonable departmental overhead rates may be utilized. For examples of the application of the principles of this paragraph (b)(3) to expenses other than expenses attributable to stewardship activities, see *Examples 19 through 21* of paragraph (g) of this section. See paragraph (e)(4)(ii) of this section for the allocation and apportionment of deductions attributable to stewardship expenses. However, supportive deductions that are described in § 1.861-14T(e)(3) shall be allocated and apportioned in accordance with the rules of § 1.861-14T and shall not be allocated and apportioned by reference only to the gross income of a single member of an affiliated group of corporations as defined in § 1.861-14T(d).

(4) *Deductions related to a class of gross income.* See paragraph (e) of this section for rules relating to the allocation and apportionment of certain specific deductions definitely related to a class of gross income. See paragraph (c)(1) of this section for rules relating to the apportionment of deductions.

(5) *Deductions related to all gross income.* If a deduction does not bear a definite relationship to a class of gross income constituting less than all of gross income, it shall ordinarily be treated as definitely related and allocable to all of the taxpayer's gross income except where provided to the con-

trary under paragraph (e) of this section. Paragraph (e)(9) of this section lists various deductions which generally are not definitely related to any gross income and are ratably apportioned to all gross income.

(c) *Apportionment of deductions—(1) Deductions definitely related to a class of gross income.* [Reserved]. For guidance, see § 1.861-8T(c)(1).

(2) *Apportionment based on assets.* [Reserved]. For guidance, see § 1.861-8T(c)(2).

(3) *Deductions not definitely related to any gross income.* If a deduction is not definitely related to any gross income (see paragraph (e)(9) of this section), the deduction must be apportioned ratably between the statutory grouping (or among the statutory groupings) of gross income and the residual grouping. Thus, the amount apportioned to each statutory grouping shall be equal to the same proportion of the deduction which the amount of gross income in the statutory grouping bears to the total amount of gross income. The amount apportioned to the residual grouping shall be equal to the same proportion of the deduction which the amount of the gross income in the residual grouping bears to the total amount of gross income.

(d) *Excess of deductions and excluded and eliminated income—(1) Excess of deductions.* Each deduction which bears a definite relationship to a class of gross income shall be allocated to that class in accordance with paragraph (b)(1) of this section even though, for the taxable year, no gross income in such class is received or accrued or the amount of the deduction exceeds the amount of such class of gross income. In apportioning deductions, it may be that, for the taxable year, there is no gross income in the statutory grouping (or residual grouping), or that deductions exceed the amount of gross income in the statutory grouping (or residual grouping). If there is no gross income in a statutory grouping or the amount of deductions allocated and apportioned to a statutory grouping exceeds the amount of gross income in the statutory grouping, the effects are determined under the operative section. If the taxpayer is a member of a group filing a consolidated return, such

excess of deductions allocated or apportioned to a statutory grouping of income of such member is taken into account in determining the consolidated taxable income from such statutory grouping, and such excess of deductions allocated or apportioned to the residual grouping of income is taken into account in determining the consolidated taxable income from the residual grouping. See §1.1502-4(d)(1) and the last sentence of §1.1502-12. For an illustration of the principles of this paragraph (d)(1), see example 17 of paragraph (g) of this section.

(2) *Allocation and apportionment to exempt, excluded, or eliminated income.* [Reserved]. For guidance, see §1.861-8T(d)(2).

(e) *Allocation and apportionment of certain deductions*—(1) *In general.* Paragraphs (e)(2) and (e)(3) of this section contain rules with respect to the allocation and apportionment of interest expense and research and development expenditures, respectively. Paragraphs (e)(4) through (e)(8) of this section contain rules with respect to the allocation of certain other deductions. Paragraph (e)(9) of this section lists those deductions which are ordinarily considered as not being definitely related to any class of gross income. Paragraph (e)(10) of this section lists special deductions of corporations which must be allocated and apportioned. Paragraph (e)(11) of this section lists personal exemptions which are neither allocated nor apportioned. Paragraph (e)(12) of this section contains rules with respect to the allocation and apportionment of deductions for charitable contributions. Examples of allocation and apportionment are contained in paragraph (g) of this section.

(2) *Interest.* [Reserved]. For guidance, see §1.861-8T(e)(2).

(3) *Research and experimental expenditures.* For rules regarding the allocation and apportionment of research and experimental expenditures, see §1.861-17.

(4) *Stewardship and controlled services*—(i) *Expenses attributable to controlled services.* If a corporation performs a controlled services transaction (as defined in §1.482-9(1)(3)), which includes any activity by one member of a group of controlled taxpayers that re-

sults in a benefit to a related corporation, and the rendering corporation charges the related corporation for such services, section 482 and these regulations provide for an allocation where the charge is not consistent with an arm's length result as determined. The deductions for expenses of the corporation attributable to the controlled services transaction are considered definitely related to the amounts so charged and are to be allocated to such amounts.

(ii) *Stewardship expenses attributable to dividends received.* Stewardship expenses, which result from “overseeing” functions undertaken for a corporation's own benefit as an investor in a related corporation, shall be considered definitely related and allocable to dividends received, or to be received, from the related corporation. For purposes of this section, stewardship expenses of a corporation are those expenses resulting from “duplicative activities” (as defined in §1.482-9(1)(3)(iii)) or “shareholder activities” (as defined in §1.482-9(1)(3)(iv)) of the corporation with respect to the related corporation. Thus, for example, stewardship expenses include expenses of an activity the sole effect of which is either to protect the corporation's capital investment in the related corporation or to facilitate compliance by the corporation with reporting, legal, or regulatory requirements applicable specifically to the corporation, or both. If a corporation has a foreign or international department which exercises overseeing functions with respect to related foreign corporations and, in addition, the department performs other functions that generate other foreign-source income (such as fees for services rendered outside of the United States for the benefit of foreign related corporations, foreign-source royalties, and gross income of foreign branches), some part of the deductions with respect to that department are considered definitely related to the other foreign-source income. In some instances, the operations of a foreign or international department will also generate United States source income (such as fees for services performed in the United States). Permissible methods of

apportionment with respect to stewardship expenses include comparisons of time spent by employees weighted to take into account differences in compensation, or comparisons of each related corporation's gross receipts, gross income, or unit sales volume, assuming that stewardship activities are not substantially disproportionate to such factors. See paragraph (f)(5) of this section for the type of verification that may be required in this respect. See § 1.482-9(1)(5) for examples that illustrate the principles of § 1.482-9(1)(3). See *Example 17* and *Example 18* of paragraph (g) of this section for the allocation and apportionment of stewardship expenses. See paragraph (b)(3) of this section for the allocation and apportionment of deductions attributable to supportive functions other than stewardship expenses, such as expenses in the nature of day-to-day management, and paragraph (e)(5) of this section generally for the allocation and apportionment of deductions attributable to legal and accounting fees and expenses.

(5) *Legal and accounting fees and expenses.* Fees and other expenses for legal and accounting services are ordinarily definitely related and allocable to specific classes of gross income or to all the taxpayer's gross income, depending on the nature of the services rendered (and are apportioned as provided in paragraph (c)(1) of this section). For example, accounting fees for the preparation of a study of the costs involved in manufacturing a specific product will ordinarily be definitely related to the class of gross income derived from (or which could reasonably have been expected to be derived from) that specific product. The taxpayer is not relieved from his responsibility to make a proper allocation and apportionment of fees on the grounds that the statement of services rendered does not identify the services performed beyond a generalized designation such as "professional," or does not provide any type of allocation, or does not properly allocate the fees involved.

(6) *Income taxes—(i) In general.* The deduction for state, local, and foreign income, war profits and excess profits taxes ("state income taxes") allowed by section 164 shall be considered definitely related and allocable to the

gross income with respect to which such state income taxes are imposed. For example, if a domestic corporation is subject to state income taxation and the state income tax is imposed in part on an amount of foreign source income, then that part of the taxpayer's deduction for state income tax that is attributable to foreign source income is definitely related and allocable to foreign source income. In allocating and apportioning the deduction for state income tax for purposes including (but not limited to) the computation of the foreign tax credit limitation under section 904 of the Code and the consolidated foreign tax credit under § 1.1502-4 of the regulations, the income upon which the state income tax is imposed is determined by reference to the law of the jurisdiction imposing the tax. Thus, if a state attributes taxable income to a corporate taxpayer by applying an apportionment formula that takes into consideration the income and factors of one or more corporations related by ownership to the corporate taxpayer and engaging in activities related to the business of the corporate taxpayer, then the income so attributed is the income upon which the state income tax is imposed. If the income so attributed to the corporate taxpayer includes foreign source income, then, in computing the taxpayer's foreign tax credit limitation under section 904, for example, the taxpayer's deduction for state income tax will be considered definitely related and allocable to a class of gross income that includes the statutory grouping of foreign source income. When the law of the state includes dividends that are treated under section 862(a)(2) as income from sources without the United States in taxable income apportionable to the state, but does not include factors of the corporation paying such dividends in the apportionment formula used to determine state taxable income, an appropriate portion of the deduction for state income tax will be considered definitely related and allocable to a class of gross income consisting solely of foreign source dividend income. A deduction for state income tax will not be considered definitely related to a hypothetical amount of income calculated under federal tax principles when the

jurisdiction imposing the tax computes taxable income under different principles. A corporate taxpayer's deduction for a state franchise tax that is computed on the basis of income attributable to business activities conducted within the state must be allocated and apportioned in the same manner as the deduction for state income taxes. In determining, for example, both the foreign tax credit under section 904 of the Code and the consolidated foreign tax credit limitation under §1.1502-4 of the regulations, the deduction for state income tax may be allocable and apportionable to foreign source income in a statutory grouping described in section 904(d) in a taxable year in which the taxpayer has no foreign source income in such statutory grouping. Alternatively, such an allocation or apportionment may be appropriate if a taxpayer corporation has no foreign source income in a statutory grouping, but its deduction is attributable to foreign source income in such grouping that is attributed to the taxpayer corporation under the law of a state which attributes taxable income to a corporation by applying an apportionment formula that takes into consideration the income and factors of one or more corporations related by ownership to the taxpayer corporation and engaging in activities related to the business of the taxpayer corporation. Example 30 of paragraph (g) of this section illustrates the application of this last rule.

(ii) *Methods of allocation and apportionment*—(A) *In general*. A taxpayer's deduction for a state income tax is to be allocated (and then apportioned, if necessary, subject to the rules of §1.861-8(d)) by reference to the taxable income that the law of the taxing jurisdiction attributes to the taxpayer ("state taxable income").

(B) *Effect of subsequent recomputations of state income tax*. [Reserved]

(C) *Illustrations*—(1) *In general*. Examples 25 through 32 of paragraph (g) of §1.861-8 illustrate, in the given factual situations, the application of this paragraph (e)(6) and the general rule of paragraph (b)(1) of this section that a deduction must be allocated to the class of gross income to which the deduction is factually related. In general,

these examples employ a presumption that state income taxes are allocable to a class of gross income that includes the statutory grouping of income from sources without the United States when the total amount of taxable income determined under state law exceeds the amount of taxable income determined under the Code (without taking into account the deduction for state income taxes) in the residual grouping of income from sources within the United States. A taxpayer that allocates and apportions the deduction for state income tax in accordance with the methodology of Example 25 of paragraph (g) of this section must also apply the modifications illustrated in Examples 26 and 27 of paragraph (g) of this section, when applicable. The modification illustrated in *Example 26* is applicable when the deduction for state income tax is attributable in part to taxes imposed by a state which factually excludes foreign source income (as determined for federal income tax purposes) from state taxable income. The modification illustrated in *Example 27* is applicable when the taxpayer has income-producing activities in a state which does not impose a corporate income tax. The specific allocation of state income tax illustrated in Example 28 follows the rule in paragraph (e)(6)(i) of this section, and must be applied whenever a taxpayer's state taxable income includes dividends apportioned to the state under a formula that does not take into account the factors of the corporations paying those dividends, regardless of whether the taxpayer uses the methodology of Example 25 with respect to the remainder of the deduction for state income taxes.

(2) *Modifications*. Before applying a method of allocation and apportionment illustrated in the examples, the computation of state taxable income under state law may be modified, subject to the approval of the District Director, to reflect more accurately the income with respect to which the state income tax is imposed. Any modification to the state law computation of state taxable income must yield an allocation and apportionment of the deduction for state income taxes that is consistent with the rules contained in

this paragraph (e)(6), and that accurately reflects the factual relationship between the state income tax and the income on which that tax is imposed. For example, a modification to the computation of taxable income under state law might be appropriate to compensate for differences between the state law definition of taxable income and the federal definition of taxable income, due to a difference in the rate of allowable depreciation or the amount of another deduction that is allowable under both systems. This rule is illustrated in Example 31 of paragraph (g) of this section. However, a modification to the computation of taxable income under state law will not be appropriate, and will not more accurately reflect the factual relationship between the state tax and the income on which the tax is imposed, to the extent such modification reflects the fact that the state does not follow federal tax principles in attributing income to the taxpayer's activities in the state. This rule is illustrated in Example 32 of paragraph (g) of this section. A taxpayer may not modify the methods illustrated in the examples, or use an alternative method of allocation and apportionment of the deduction for state income taxes, if the modification or alternative method would be inconsistent with the rules of paragraph (e)(6)(i) of this section. A taxpayer that uses a method of allocation and apportionment other than one illustrated in Example 25 (as modified by Examples 26 and 27), or 29 with respect to a factual situation similar to those of the examples, must describe the alternative method on an attachment to its federal income tax return and establish to the satisfaction of the District Director, upon examination, that the result of the alternative method more accurately reflects the factual relationship between the state income tax and the income on which the tax is imposed.

(D) *Elective safe harbor methods—(1) In general.* In lieu of applying the rules set forth in paragraphs (e)(6)(ii) (A) through (C) of this section, a taxpayer may elect to allocate and apportion the deduction for state income tax in accordance with one of the two safe harbor methods described in paragraph

(e)(6)(ii)(D) (2) and (3) of this section. A taxpayer shall make this election for a taxable year by filing a timely tax return for that year that reflects an allocation and apportionment of the deduction for state income tax under one of the safe harbor methods and attaching to such return a statement that the taxpayer has elected to use the safe harbor method provided in either paragraph (e)(6)(ii)(D) (2) or (3) of this section, as appropriate. Once made, this election is effective for the taxable year for which made and all subsequent taxable years, and may be revoked only with the consent of the Commissioner. Example 33 of paragraph (g) of this section illustrates the application of these safe harbor methods.

(2) *Method One—(i) Step One—Specific allocation to foreign source portfolio dividends and other income.* If any portion of the deduction for state income tax is attributable to tax imposed by a state which includes in a corporate taxpayer's taxable income apportionable to the state, portfolio dividends (as defined in paragraph (i) of Example 28 of paragraph (g) of this section) that are treated under section 862(a)(2) as income from sources without the United States, but does not include factors of the corporations paying the portfolio dividends in the apportionment formula used to determine state taxable income, the taxpayer shall allocate an appropriate portion of the deduction to a class of gross income consisting solely of foreign source portfolio dividends. The portion of the deduction so allocated, and the amount of foreign source portfolio dividends included in such class, shall be determined in accordance with the methodology illustrated in paragraph (ii) of Example 28 of paragraph (g). If a state income tax is determined based upon formulary apportionment of the total taxable income attributable to the taxpayer's unitary business, the taxpayer must also apply the methodology illustrated in paragraph (ii) (C) through (G) of Example 29 of paragraph (g) of this section to make specific allocations of appropriate portions of the deduction for state income tax on the basis of income that, under separate accounting, would have been attributed to other members of the unitary group. The taxpayer

shall reduce its aggregate state taxable income by the amount of foreign source portfolio dividends and other income to which a specific allocation is made (the reduced amount being referred to hereinafter as “adjusted state taxable income”).

(ii) *Step Two—Adjustment of U.S. source federal taxable income.* If the taxpayer has significant income-producing activities in a state which does not impose a corporate income tax or other state tax measured by income derived from business activities in the state, the taxpayer shall reduce its U.S. source federal taxable income (solely for purposes of this safe harbor method) by the amount of federal taxable income attributable to its activities in such state. This amount shall be determined in accordance with the methodology illustrated in paragraph (ii) of Example 27 of paragraph (g) of this section, provided that the taxpayer shall be required to use the rules of the Uniform Division of Income for Tax Purposes Act to attribute income to the relevant state. The taxpayer’s U.S. source federal taxable income, as so reduced, is referred to hereinafter as “adjusted U.S. source federal taxable income.”

(iii) *Step Three—Allocation.* The taxpayer shall allocate the remainder of the deduction for state income tax (after reduction by the portion allocated to foreign source portfolio dividends and other income under Step One) in accordance with the methodology illustrated in paragraph (ii) of Example 25 of paragraph (g) of this section. However, the taxpayer shall substitute for the comparison of aggregate state taxable income to U.S. source federal taxable income, illustrated in paragraph (ii) of Example 25 of paragraph (g) of this section, a comparison of its adjusted state taxable income to an amount equal to 110% of its adjusted U.S. source federal taxable income.

(iv) *Step Four—Apportionment.* In the event that apportionment of the remainder of the deduction for state income tax is required, the taxpayer shall apportion that remaining deduction to U.S. source income in accordance with the methodology illustrated in paragraph (iii) of Example 25 of

paragraph (g) of this section, substituting for domestic source income in that paragraph an amount equal to 110% of the taxpayer’s adjusted U.S. source federal taxable income. The remaining portion of the deduction shall be apportioned to the statutory groupings of foreign source income described in section 904(d) of the Code in accordance with the proportion of the income in each statutory grouping of foreign source income described in section 904(d) to the taxpayer’s total foreign source federal taxable income (after reduction by the amount of foreign source portfolio dividends to which tax has been specifically allocated under Step One, above).

(3) *Method Two—(i) Step One—Specific allocation to foreign source portfolio dividends and other income.* Step One of this method is the same as Step One of Method One (as described in paragraph (e)(6)(ii)(D)(2)(i) of this section).

(ii) *Step Two—Adjustment of U.S. source federal taxable income.* Step Two of this method is the same as Step Two of Method One (as described in paragraph (e)(6)(ii)(D)(2)(ii) of this section).

(iii) *Step Three—Allocation.* The taxpayer shall allocate the remainder of the deduction for state income tax (after reduction by the portion allocated to foreign source portfolio dividends and other income under Step One) in accordance with the methodology illustrated in paragraph (ii) of Example 25 of paragraph (g) of this section. However, the taxpayer shall substitute for the comparison of aggregate state taxable income to U.S. source federal taxable income, illustrated in paragraph (ii) of Example 25 of paragraph (g) of this section, a comparison of its adjusted state taxable income to its adjusted U.S. source federal taxable income.

(iv) *Step Four—Apportionment.* In the event that apportionment of the deduction is required, the taxpayer shall apportion to U.S. source income that portion of the deduction that is attributable to state income taxes imposed upon an amount of state taxable income equal to adjusted U.S. source federal taxable income. The taxpayer shall apportion the remaining amount of the deduction to U.S. and foreign source income in the same proportions

that the taxpayer's adjusted U.S. source federal taxable income and foreign source federal taxable income (after reduction by the amount of foreign source portfolio dividends to which tax has been specifically allocated under Step One, above) bear to its total federal taxable income (taking into account the adjustment of U.S. source federal taxable income under Step Two and after reduction by the amount of foreign source portfolio dividends to which tax has been specifically allocated under Step One). The portion of the deduction apportioned to foreign source income shall be apportioned among the statutory groupings described in section 904(d) of the Code in accordance with the proportions of the taxpayer's total foreign source federal taxable income (after reduction by the amount of foreign source portfolio dividends to which tax has been specifically allocated under Step One, above) in each grouping.

(iii) *Effective dates.* The rules of § 1.861-8(e)(6)(i) and the language preceding the examples in § 1.861-8(g) are effective for taxable years beginning after December 31, 1976. The rules of § 1.861-8(e)(6)(ii) (other than § 1.861-8(e)(6)(ii)(D)) and Examples 25 through 32 of § 1.861-8(g) are effective for taxable years beginning on or after January 1, 1988. The rules of § 1.861-8(e)(6)(ii)(D) and Example 33 of § 1.861-8(g) are effective for taxable years ending after March 12, 1991. At the option of the taxpayer, however, the rules of § 1.861-8(e)(6)(ii) (other than § 1.861-8(e)(6)(ii)(D)) and Examples 25 through 32 of § 1.861-8(g) may be applied with respect to deductions for state taxes incurred in taxable years beginning before January 1, 1988.

(7) *Losses on the sale, exchange, or other disposition of property—(i) Allocation.* The deduction allowed for loss recognized on the sale, exchange, or other disposition of a capital asset or property described in section 1231(b) shall be considered a deduction which is definitely related and allocable to the class of gross income to which such asset or property ordinarily gives rise in the hands of the taxpayer. Where the nature of gross income generated from the asset or property has varied significantly over several taxable years of the

taxpayer, such class of gross income shall generally be determined by reference to gross income generated from the asset or property during the taxable year or years immediately preceding the sale, exchange, or other disposition of such asset or property. Thus, for example, where an asset generates primarily sales income from domestic sources in the early years of its operation and then is leased by the taxpayer to a foreign subsidiary in later years, the class of gross income to which the asset gives rise will be considered to be the rental income derived from the lease and will not include sales income from domestic sources.

(ii) *Apportionment of losses.* Where in the unusual circumstances that an apportionment of a deduction for losses on the sale, exchange, or other disposition of a capital asset or property described in section 1231(b) is necessary, the amount of such deduction shall be apportioned between the statutory grouping (or among the statutory groupings) of gross income (within the class of gross income) and the residual grouping (within the class of gross income) in the same proportion that the amount of gross income within such statutory grouping (or statutory groupings) and such residual grouping bear, respectively, to the total amount of gross income within the class of gross income. Apportionment will be necessary where, for example, the class of gross income to which the deduction is allocated consists of gross income (such as royalties) attributable to an intangible asset used both within and without the United States, or gross income (such as from sales or services) attributable to a tangible asset used both within and without the United States.

(iii) *Allocation of loss recognized in taxable years after 1986.* See §§ 1.865-1 and 1.865-2 for rules regarding the allocation of certain loss recognized in taxable years beginning after December 31, 1986.

(8) *Net operating loss deduction.* A net operating loss deduction allowed under section 172 shall be allocated and apportioned in the same manner as the deductions giving rise to the net operating loss deduction.

(9) *Deductions which are not definitely related.* Deductions which shall generally be considered as not definitely related to any gross income, and therefore are ratably apportioned as provided in paragraph (c)(3) of this section, are—

(i) The deduction allowed by section 163 for interest described in subparagraph (2)(iii) of this paragraph (e);

(ii) The deduction allowed by section 164 for real estate taxes on a personal residence or for sales tax on the purchase of items for personal use;

(iii) The deduction for medical expenses allowed by section 213; and

(iv) The deduction for alimony payments allowed by section 215.

(10) *Special deductions.* The special deductions allowed in the case of a corporation by section 241 (relating to the deductions for partially tax exempt interest, dividends received, etc.), section 922 (relating to Western Hemisphere trade corporations), and section 941 (relating to China Trade Act corporations) shall be allocated and apportioned consistent with the principles of this section.

(11) *Personal exemptions.* The deductions for the personal exemptions allowed by section 151, 642(b), or 873(b)(3) shall not be taken into account for purpose of allocation and apportionment under this section.

(12) *Deductions for certain charitable contributions—(i) In general.* The deduction for charitable contributions that is allowed under sections 170, 873(b)(2), and 882(c)(1)(B) is definitely related and allocable to all of the taxpayer's gross income. The deduction allocated under this paragraph (e)(12)(i) shall be apportioned between the statutory grouping (or among the statutory groupings) of gross income and the residual grouping on the basis of the relative amounts of gross income from sources in the United States in each grouping.

(ii) *Treaty provisions.* If a deduction for charitable contributions not otherwise permitted by sections 170, 873(b)(2), and 882(c)(1)(B) is allowed under a U.S. income tax treaty, and such treaty limits the amount of the deduction based on a percentage of income arising from sources within the treaty partner, the deduction is definitely related and allocable to all of

the taxpayer's gross income. The deduction allocated under this paragraph (e)(12)(i) shall be apportioned between the statutory grouping (or among the statutory groupings) of gross income and the residual grouping on the basis of the relative amounts of gross income from sources within the treaty partner within each grouping.

(iii) *Coordination with §§ 1.861-14 and 1.861-14T.* A deduction for a charitable contribution by a member of an affiliated group shall be allocated and apportioned under the rules of this section, § 1.861-14(e)(6), and § 1.861-14T(c)(1).

(iv) *Effective date.* (A) The rules of paragraphs (e)(12)(i) and (iii) of this section shall apply to charitable contributions made on or after July 28, 2004. Taxpayers may apply the provisions of paragraphs (e)(12)(i) and (iii) of this section to charitable contributions made before July 28, 2004, but during the taxable year ending on or after July 28, 2004.

(B) The rules of paragraphs (e)(12)(ii) of this section shall apply to charitable contributions made on or after July 14, 2005. Taxpayers may apply the provisions of paragraph (e)(12)(ii) of this section to charitable contributions made before July 14, 2005, but during the taxable year ending on or after July 14, 2005.

(f) *Miscellaneous matters—(1) Operative sections.* The operative sections of the Code which require the determination of taxable income of the taxpayer from specific sources or activities and which give rise to statutory groupings to which this section is applicable include the sections described below.

(i) *Overall limitation to the foreign tax credit.* Under the overall limitation to the foreign tax credit, as provided in section 904(a)(2) (as in effect before enactment of the Tax Reform Act of 1976, or section 904(a) after such enactment) the amount of the foreign tax credit may not exceed the tentative U.S. tax (i.e., the U.S. tax before application of the foreign tax credit) multiplied by a fraction, the numerator of which is the taxable income from sources without the United States and the denominator of which is the entire taxable income. Accordingly, in this case, the statutory

grouping is foreign source income (including, for example, interest received from a domestic corporation which meets the tests of section 861(a)(1)(B), dividends received from a domestic corporation which has an election in effect under section 936, and other types of income specified in section 862). Pursuant to sections 862(b) and 863(a) and §§ 1.862-1 and 1.863-1, this section provides rules for identifying the deductions to be taken into account in determining taxable income from sources without the United States. See section 904(d) (as in effect after enactment of the Tax Reform Act of 1976) and the regulations thereunder which require separate treatment of certain types of income. See example 3 of paragraph (g) of this section for one example of the application of this section to the overall limitation.

(ii) [Reserved]

(iii) *DISC and FSC taxable income.* Sections 925 and 994 provide rules for determining the taxable income of a FSC and DISC, respectively, with respect to qualified sales and leases of export property and qualified services. The combined taxable income method available for determining a DISC's taxable income provides, without consideration of export promotion expenses, that the taxable income of the DISC shall be 50 percent of the combined taxable income of the DISC and the related supplier derived from sales and leases of export property and from services. In the FSC context, the taxable income of the FSC equals 23 percent of the combined taxable income of the FSC and the related supplier. Pursuant to regulations under section 925 and 994, this section provides rules for determining the deductions to be taken into account in determining combined taxable income, except to the extent modified by the marginal costing rules set forth in the regulations under sections 925(b)(2) and 994(b)(2) if used by the taxpayer. See *Examples* (22) and (23) of paragraph (g) of this section. In addition, the computation of combined taxable income is necessary to determine the applicability of the section 925(d) limitation and the "no loss" rules of the regulations under sections 925 and 994.

(iv) *Effectively connected taxable income.* Nonresident alien individuals and foreign corporations engaged in trade or business within the United States, under sections 871(b)(1) and 882(a)(1), on taxable income which is effectively connected with the conduct of a trade or business within the United States. Such taxable income is determined in most instances by initially determining, under section 864(c), the amount of gross income which is effectively connected with the conduct of a trade or business within the United States. Pursuant to sections 873 and 882(c), this section is applicable for purposes of determining the deductions from such gross income (other than the deduction for interest expense allowed to foreign corporations (see § 1.882-5)) which are to be taken into account in determining taxable income. See example 21 of paragraph (g) of this section.

(v) *Foreign base company income.* Section 954 defines the term "foreign base company income" with respect to controlled foreign corporations. Section 954(b)(5) provides that in determining foreign base company income the gross income shall be reduced by the deductions of the controlled foreign corporation "properly allocable to such income". This section provides rules for identifying which deductions are properly allocable to foreign base company income.

(vi) *Other operative sections.* The rules provided in this section also apply in determining—

(A) The amount of foreign source items of tax preference under section 58(g) determined for purposes of the minimum tax;

(B) The amount of foreign mineral income under section 901(e);

(C) [Reserved]

(D) The amount of foreign oil and gas extraction income and the amount of foreign oil related income under section 907;

(E) The tax base for individuals entitled to the benefits of section 931 and the section 936 tax credit of a domestic corporation that has an election in effect under section 936;

(F) The exclusion for income from Puerto Rico for bona fide residents of Puerto Rico under section 933;

(G) The limitation under section 934 on the maximum reduction in income tax liability incurred to the Virgin Islands;

(H) The income derived from the U.S. Virgin Islands or from a section 935 possession (as defined in §1.935-1(a)(3)(i)).

(I) The special deduction granted to China Trade Act corporations under section 941;

(J) The amount of certain U.S. source income excluded from the subpart F income of a controlled foreign corporation under section 952(b);

(K) The amount of income from the insurance of U.S. risks under section 953(b)(5);

(L) The international boycott factor and the specifically attributable taxes and income under section 999; and

(M) The taxable income attributable to the operation of an agreement vessel under section 607 of the Merchant Marine Act of 1936, as amended, and the Capital Construction Fund Regulations thereunder (26 CFR, part 3). See 26 CFR 3.2(b)(3).

(2) *Application to more than one operative section.* (i) Where more than one operative section applies, it may be necessary for the taxpayer to apply this section separately for each applicable operative section. In such a case, the taxpayer is required to use the same method of allocation and the same principles of apportionment for all operative sections.

(ii) When expenses, losses, and other deductions that have been properly allocated and apportioned between combined gross income of a related supplier and a DISC or former DISC and residual gross income, regardless of which of the administrative pricing methods of section 994 has been applied, such deductions are not also allocated and apportioned to gross income consisting of distributions from the DISC or former DISC attributable to income of the DISC or former DISC as determined under the administrative pricing methods with respect to DISC or former DISC taxable years beginning after December 31, 1986. Accordingly, *Example (22)* of paragraph (g) of this section does not apply to distributions from a DISC or former DISC with respect to DISC or former DISC taxable

years beginning after December 31, 1986. This rule does not apply to the extent that the taxable income of the DISC or former DISC is determined under the section 994(a)(3) transfer pricing method. In addition, for taxable years beginning after December 31, 1986, in the case of expenses, losses, and other deductions that have been properly allocated and apportioned between combined gross income of a related supplier and a FSC and residual gross income, regardless of which of the administrative pricing methods of section 925 has been applied, such deductions are not also allocated and apportioned to gross income consisting of distributions from the FSC or former FSC which are attributable to the foreign trade income of the FSC or former FSC as determined under the administrative pricing methods. This rule does not apply to the extent that the foreign trade income of the FSC or former FSC is determined under the section 925(a)(3) transfer pricing method. See *Example (23)* of paragraph (g) of this section.

(3) *Special rules of section 863(b)*—(i) *In general.* Special rules under section 863(b) provide for the application of rules of general apportionment provided in §§1.863-3 to 1.863-5, to worldwide taxable income in order to attribute part of such worldwide taxable income to U.S. sources and the remainder of such worldwide taxable income to foreign sources. The activities specified in section 863(b) are—

(A) Transportation or other services rendered partly within and partly without the United States,

(B) Sales of personal property produced by the taxpayer within and sold without the United States, or produced by the taxpayer without and sold within the United States, and

(C) Sales within the United States of personal property purchased within a possession of the United States.

In the instances provided in §§1.863-3 and 1.863-4 with respect to the activities described in (A), (B), and (C) of this subdivision, this section is applicable only in determining worldwide taxable income attributable to these activities.

(ii) *Relationship of sections 861, 862, 863(a), and 863(b).* Sections 861, 862,

863(a), and 863(b) are the four provisions applicable in determining taxable income from specific sources. Each of these four provisions applies independently. Where a deduction has been allocated and apportioned to income under one of these four provisions, the deduction shall not again be allocated and apportioned to gross income under any of the other three provisions. However, two or more of these provisions may have to be applied at the same time to determine the proper allocation and apportionment of a deduction. The special rules under section 863(b) take precedence over the general rules of Code sections 861, 862 and 863(a). For example, where a deduction is allocable in whole or in part to gross income to which section 863(b) applies, such deduction or part thereof shall not otherwise be allocated under section 861, 862, or 863(a). However, where the gross income to which the deduction is allocable includes both gross income to which section 863(b) applies and gross income to which section 861, 862, or 863(a) applies, more than one section must be applied at the same time in order to determine the proper allocation and apportionment of the deduction.

(4) *Adjustments made under other provisions of the Code—(i) In general.* If an adjustment which affects the taxpayer is made under section 482 or any other provision of the Code, it may be necessary to recompute the allocations and apportionments required by this section in order to reflect changes resulting from the adjustment. The recomputation made by the Commissioner shall be made using the same method of allocation and apportionment as was originally used by the taxpayer, provided such method as originally used conformed with paragraph (a)(2) of this section and, in light of the adjustment, such method does not result in a material distortion. In addition to adjustments which would be made aside from this section, adjustments to the taxpayer's income and deductions which would not otherwise be made may be required before applying this section in order to prevent a distortion in determining taxable income from a particular source of activity. For example, if an item included as a

part of the cost of goods sold has been improperly attributed to specific sales, and, as a result, gross income under one of the operative sections referred to in paragraph (f)(1) of this section is improperly determined, it may be necessary for the Commissioner to make an adjustment to the cost of goods sold, consistent with the principles of this section, before applying this section. Similarly, if a domestic corporation transfers the stock in its foreign subsidiaries to a domestic subsidiary and the parent corporation continues to incur expenses in connection with protecting its capital investment in the foreign subsidiaries (see paragraph (e)(4) of this section), it may be necessary for the Commissioner to make an allocation under section 482 with respect to such expenses before making allocations and apportionments required by this section, even though the section 482 allocation might not otherwise be made.

(ii) *Example.* X, a domestic corporation, purchases and sells consumer items in the United States and foreign markets. Its sales in foreign markets are made to related foreign subsidiaries. X reported \$1,500,000 as sales during the taxable year of which \$1,000,000 was domestic sales and \$500,000 was foreign sales. X took a deduction for expenses incurred by its marketing department during the taxable year in the amount of \$150,000. These expenses were determined to be allocable to both domestic and foreign sales and are apportionable between such sales. Thus, X allocated and apportioned the marketing department deduction as follows:

| | |
|---|-----------|
| To gross income from domestic sales: | |
| \$150,000×(\$1,000,000/\$1,500,000) | \$100,000 |
| To gross income from foreign sales: | |
| \$150,000×(\$500,000/\$1,500,000) | 50,000 |
| Total | 150,000 |

On audit of X's return for the taxable year, the District Director adjusted, under section 482, X's sales to related foreign subsidiaries by increasing the sales price by a total of \$100,000, thereby increasing X's foreign sales and total sales by the same amount. As a result of the section 482 adjustment, the apportionment of the deduction for the marketing department expenses is redetermined as follows:

| | |
|---|----------|
| To gross income from domestic sales: | |
| \$150,000×(\$1,000,000/\$1,600,000) | \$93,750 |

Internal Revenue Service, Treasury

§ 1.861-8

| | |
|-------------------------------------|---------|
| To gross income from foreign sales: | |
| \$150,000×(\$600,000/\$1,600,000) | 56,250 |
| Total | 150,000 |

(5) *Verification of allocations and apportionments.* Since, under this section, allocations and apportionments are made on the basis of the factual relationship between deductions and gross income, the taxpayer is required to furnish, at the request of the District Director, information from which such factual relationships can be determined. In reviewing the overall limitation to the foreign tax credit of a domestic corporation, for example, the District Director should consider information which would enable him to determine the extent to which deductions attributable to functions performed in the United States are related to earning foreign source income, United States source income, or income from both sources. In addition to functions with a specific international purpose, consideration should be given to the functions of management, the direction and results of an acquisition program, the functions of operating units and personnel located at the head office, the functions of support units (including but not limited to engineering, legal, budget, accounting, and industrial relations), the functions of selling and advertising units and personnel, the direction and uses of research and development and the direction and uses of services furnished by independent contractors. Thus, for example when requested by the District Director, the taxpayer shall make available any of its organization charts, manuals, and other writings which relate to the manner in which its gross income arises and to the functions of organizational units, employees, and assets of the taxpayer and arrange for the interview of such of its employees as the District Director deems desirable in order to determine the gross income to which deductions relate. See section 7602 and the regulations thereunder which generally provide for the examination of books and witnesses. See also section 905(b) and the regulations thereunder which require proof of foreign tax credits to the satisfaction of the Secretary or his delegate.

(g) *General examples.* The following examples illustrate the principles of

this section. In each example, unless otherwise specified, the operative section which is applied and gives rise to the statutory grouping of gross income is the overall limitation to the foreign tax credit under section 904(a). In addition, in each example, where a method of allocation or apportionment is illustrated as an acceptable method, it is assumed that such method is used by the taxpayer on a consistent basis from year to year (except in the case of the optional method for apportioning research and development expense under paragraph (e)(3)(iii) of §1.861-8). Further, it is assumed that each party named in each example operates on a calendar year accounting basis and, where the party is a U.S. taxpayer, files returns on a calendar year basis.

Examples 1-16 [Reserved]

Example 17. Stewardship expenses (consolidation). (i) (A) *Facts.* X, a domestic corporation, wholly owns M, N, and O, also domestic corporations. X, M, N, and O file a consolidated income tax return. All the income of X and O is from sources within the United States, all of M's income is general category income from sources within South America, and all of N's income is general category income from sources within Africa. X receives no dividends from M, N, or O. During the taxable year, the consolidated group of corporations earned consolidated gross income of \$550,000 and incurred total deductions of \$370,000 as follows:

| | Gross income | Deductions |
|----------------------|--------------|------------|
| Corporations: | | |
| X | \$100,000 | \$50,000 |
| M | 250,000 | 100,000 |
| N | 150,000 | 200,000 |
| O | 50,000 | 20,000 |
| Total | 550,000 | 370,000 |

(B) Of the \$50,000 of deductions incurred by X, \$15,000 relates to X's ownership of M; \$10,000 relates to X's ownership of N; \$5,000 relates to X's ownership of O; and the sole effect of the entire \$30,000 of deductions is to protect X's capital investment in M, N, and O. X properly categorizes the \$30,000 of deductions as stewardship expenses. The remainder of X's deductions (\$20,000) relates to production of United States source income from its plant in the United States.

(ii) (A) *Allocation.* X's deductions of \$50,000 are definitely related and thus allocable to the types of gross income to which they give rise, namely \$25,000 wholly to general category income from sources outside the United States (\$15,000 for stewardship of M

and \$10,000 for stewardship of N) and the remainder (\$25,000) wholly to gross income from sources within the United States. Expenses incurred by M and N are entirely related and thus wholly allocable to general category income earned from sources without the United States, and expenses incurred by O are entirely related and thus wholly allocable to income earned within the United States. Hence, no apportionment of expenses of X, M, N, or O is necessary. For purposes of applying the foreign tax credit limitation, the statutory grouping is general category gross income from sources without the United States and the residual grouping is gross income from sources with in the United States. As a result of the allocation of deductions, the X consolidated group has taxable income from sources without the United States in the amount of \$75,000, computed as follows:

| | |
|--|---------------|
| Foreign source general category gross income (\$250,000 from M + \$150,000 from N) | \$400,000 |
| Less: Deductions allocable to foreign source general category gross income (\$25,000 from X, \$100,000 from M, and \$200,000 from N) | (325,000) |
| Total foreign-source taxable income | 75,000 |

(B) Thus, in the combined computation of the general category limitation, the numerator of the limiting fraction (taxable income from sources outside the United States) is \$75,000.

Example 18. Stewardship and supportive expenses. (i) (A) *Facts.* X, a domestic corporation, manufactures and sells pharmaceuticals in the United States. X's domestic subsidiary S, and X's foreign subsidiaries T, U, and V perform similar functions in the United States and foreign countries T, U, and V, respectively. Each corporation derives substantial net income during the taxable year that is general category income described in section 904(d)(1). X's gross income for the taxable year consists of:

| | |
|--|--------------|
| Domestic sales income | \$32,000,000 |
| Dividends from S (before dividends received deduction) | 3,000,000 |
| Dividends from T | 2,000,000 |
| Dividends from U | 1,000,000 |
| Dividends from V | 0 |
| Royalties from T and U | 1,000,000 |
| Fees from U for services performed by X | 1,000,000 |

Total gross income 40,000,000

(B) In addition, X incurs expenses of its supervision department of \$1,500,000.

(C) X's supervision department (the Department) is responsible for the supervision of its four subsidiaries and for rendering certain services to the subsidiaries, and this Department provides all the supportive functions necessary for X's foreign activities. The Department performs three principal types of activities. The first type consists of services for the direct benefit of U for which a fee is paid by U to X. The cost of the services for U is \$900,000 (which results in a total charge to U of \$1,000,000). The second type consists of activities described in § 1.482-9(1)(3)(iii) that are in the nature of shareholder oversight that duplicate functions performed by the subsidiaries' own employees and that do not provide an additional benefit to the subsidiaries. For example, a team of auditors from X's accounting department periodically audits the subsidiaries' books and prepares internal reports for use by X's management. Similarly, X's treasurer periodically reviews for the board of directors of X the subsidiaries' financial policies. These activities do not provide an additional benefit to the related corporations. The cost of the duplicative services and related supportive expenses is \$540,000. The third type of activity consists of providing services which are ancillary to the license agreements which X maintains with subsidiaries T and U. The cost of the ancillary services is \$60,000.

(i) *Allocation.* The Department's outlay of \$900,000 for services rendered for the benefit of U is allocated to the \$1,000,000 in fees paid by U. The remaining \$600,000 in the Department's deductions are definitely related to the types of gross income to which they give rise, namely dividends from subsidiaries S, T, U, and V and royalties from T and U. However, \$60,000 of the \$600,000 in deductions are found to be attributable to the ancillary services and are definitely related (and therefore allocable) solely to royalties received from T and U, while the remaining \$540,000 in deductions are definitely related (and therefore allocable) to dividends received from all the subsidiaries.

(iii) (A) *Apportionment.* For purposes of applying the foreign tax credit limitation, the statutory grouping is general category gross income from sources outside the United States and the residual grouping is gross income from sources within the United States. X's deduction of \$540,000 for the Department's expenses and related supportive expenses which are allocable to dividends received from the subsidiaries must be apportioned between the statutory and residual groupings before the foreign tax credit limitation may be applied. In determining an appropriate method for apportioning the

Internal Revenue Service, Treasury

§ 1.861-8

\$540,000, a basis other than X's gross income must be used since the dividend payment policies of the subsidiaries bear no relationship either to the activities of the Department or to the amount of income earned by each subsidiary. This is evidenced by the fact that V paid no dividends during the year, whereas S, T, and U paid dividends of \$1 million or more each. In the absence of facts that would indicate a material distortion resulting from the use of such method, the stewardship expenses (\$540,000) may be apportioned on the basis of the gross receipts of each subsidiary.

(B) The gross receipts of the subsidiaries were as follows:

| | |
|-------------|-------------|
| S | \$4,000,000 |
| T | 3,000,000 |
| U | 500,000 |
| V | 1,500,000 |
| | 9,000,000 |
| Total | 9,000,000 |

(C) Thus, the expenses of the Department are apportioned for purposes of the foreign tax credit limitation as follows:

| | |
|---|-----------|
| Apportionment of stewardship expenses to the statutory grouping of gross income: $\$540,000 \times [(\$3,000,000 + \$500,000 + \$1,500,000)/\$9,000,000]$ | \$300,000 |
| Apportionment of supervisory expenses to the residual grouping of gross income: $\$540,000 \times [\$4,000,000/9,000,000]$ | 240,000 |
| | 540,000 |
| Total: Apportioned stewardship expense | 540,000 |

Example 19. Supportive Expense. (i) *Facts.* X, a domestic corporation, purchases and sells products both in the United States and in foreign countries. X has no foreign subsidiary and no international department. During the taxable year, X incurs the following expenses with respect to its worldwide activities:

| | |
|---|----------|
| Personnel department expenses | \$50,000 |
| Training department expenses | 35,000 |
| General and administrative expenses | 55,000 |
| President's salary | 40,000 |
| Sales manager's salary | 20,000 |
| | 200,000 |
| Total | 200,000 |

X has domestic gross receipts from sales of \$750,000 and foreign gross receipts from sales of \$500,000 and has gross income from such sales in the same ratio, namely \$300,000 from domestic sources and \$200,000 from foreign sources.

(ii) *Allocation.* The above expenses are definitely related and allocable to all of X's gross income derived from both domestic and foreign markets.

(iii) *Apportionment.* For purposes of applying the overall limitation, the statutory grouping is gross income from sources outside the United States and the residual grouping is gross income from sources within the United States. X's deductions for its worldwide sales activities must be apportioned between these groupings. Company X in this example (unlike Company X in example 18) does not have a separate international division which performs essentially all of the functions required to manage and oversee its foreign activities. The president and sales manager do not maintain time records. The division of their time between domestic and foreign activities varies from day to day and cannot be estimated on an annual basis with

any reasonable degree of accuracy. Similarly, there are no facts which would justify a method of apportionment of their salaries or of one of the other listed deductions based on more specific factors than gross receipts or gross income. An acceptable method of apportionment would be on the basis of gross receipts. The apportionment of the \$200,000 deduction is as follows:

| | |
|---|----------|
| Apportionment of the \$200,000 expense to the statutory grouping of gross income: $\$200,000 \times [\$500,000/(\$500,000 + \$750,000)]$ | \$80,000 |
| Apportionment of the \$200,000 expense to the residual grouping of gross income: $\$200,000 \times [\$750,000/(\$500,000 + \$750,000)]$ | 120,000 |
| | 200,000 |
| Total apportioned supportive expense | 200,000 |

Example 20. Supportive Expense. (i) *Facts.* Assume the same facts as above except that X's president devotes only 5 percent of his time to the foreign operations and 95 percent of his time to the domestic operations and that X's sales manager devotes approximately 10 percent of his time to foreign sales and 90 percent of his time to domestic sales.

(ii) *Allocation.* The expenses incurred by X with respect to its worldwide activities are definitely related, and therefore allocable to X's gross income from both its foreign and domestic markets.

(iii) *Apportionment.* On the basis of the additional facts it is not acceptable to apportion the salaries of the president and the sales manager on the basis of gross receipts. It is acceptable to apportion such salaries between the statutory grouping (gross income from sources without the United States) and residual grouping (gross income from sources within the United States) on the basis of time devoted to each sales activity. Remaining expenses may still be apportioned on the basis of gross receipts. The apportionment is as follows:

| | |
|---|----------------|
| Apportionment of the \$200,000 expense to the statutory grouping of gross income: | |
| President's salary: \$40,000×5 pct | \$2,000 |
| Sales manager's salary: \$20,000×10 pct | 2,000 |
| Remaining expenses: \$140,000×[\$500,000/(\$500,000+\$750,000)] | 56,000 |
| Subtotal: Apportionment of expense to statutory grouping | 60,000 |
| Apportionment of the \$200,000 expense to the residual grouping of gross income: | |
| President's salary: \$40,000×95 pct | 38,000 |
| Sales manager's salary: \$20,000×90 pct | 18,000 |
| Remaining expenses: \$140,000×[\$750,000/(\$500,000+\$750,000)] | 84,000 |
| Subtotal: Apportionment of expense to residual grouping | 140,000 |
| Total: Apportioned general and administrative expense | 200,000 |

Example 21. Supportive Expense. (i) *Facts.* X, a foreign corporation doing business in the United States, is a manufacturer of metal stamping machines. X has no United States subsidiaries and no separate division to manage and oversee its business in the United States. X manufactures and sells these machines in the United States and in foreign countries A and B and has a separate manufacturing facility in each country. Sales of these machines are X's only source of income. In 1977, X incurs general and administrative expenses related to both its U.S. and foreign operations of \$100,000. It has machine sales of \$500,000, \$1,000,000 and \$1,000,000 on which it earns gross income of \$200,000, \$400,000 and \$400,000 in the United States, country A, and country B, respectively. The income from the manufacture and sale of the machines in countries A and B is not effectively connected with X's business in the United States.

(ii) *Allocation.* The \$100,000 of general and administrative expense is definitely related to the income to which it gives rise, namely a part of the gross income from sales of machines in the United States, in country A, and in country B. The expenses are allocable to this class of income, even though X's gross income from sources outside the United States is excluded income since it is not effectively connected with a U.S. trade or business.

(iii) *Apportionment.* Since X is a foreign corporation, the statutory grouping is gross income effectively connected with X's trade or business in the United States, namely gross income from sources within the United States, and the residual grouping is gross income not effectively connected with a trade or business in the United States, namely gross income from countries A and B. Since there are no facts which would require a method of apportionment other than on the basis of sales or gross income, the amount may be apportioned between the two

groupings on the basis of amounts of gross income as follows:

| | | |
|---|----------------|----------|
| Apportionment of general and administrative expense to the statutory grouping, gross income from sources within the United States: \$100,000×[\$200,000/(\$200,000 + \$400,000 + \$400,000)] | | \$20,000 |
| Apportionment of general and administrative expense to the residual grouping, gross income from sources without the United States: \$100,000×[\$400,000 + \$400,000]/(\$200,000 + \$400,000 + \$400,000)] | | 80,000 |
| Total apportioned general and administrative expense | 100,000 | |

Example 22. Domestic International Sales Corporations. (i) *Facts.* X, a domestic corporation, manufactures a line of kitchenware and sells it to retailers in the United States, France, and the United Kingdom. After the Domestic International Sales Corporation (DISC) legislation was passed in 1971, X established, as of January 1, 1972, a DISC and thereafter did all of its foreign marketing through sales by the DISC. In 1977 the DISC has total sales of \$7,700,000 for which X's cost of goods sold is \$6,000,000. Thus, the gross income attributable to exports through the DISC is \$1,700,000 (\$7,700,000-\$6,000,000). Moreover, X has U.S. domestic sales of kitchenware of \$12,000,000 on which it earned gross income of \$900,000, and X receives royalty income from the foreign license of its kitchenware technology in the amount of \$800,000. The DISC's expenses attributable to the resale of export property are \$400,000 of which \$300,000 qualify as export promotion expenses. X also incurs \$125,000 of general and administrative expenses in connection with its domestic and foreign sales activities, and its foreign licensing activities. X and the DISC determine transfer prices charged on the basis of a single product grouping and the "50-50" combined taxable income method (without marginal costing) which permits the DISC to have a taxable income equal to 50 percent of the combined taxable income attributable to the production and sales of the export property, plus 10 percent of the DISC's export promotion expenses.

(ii) *Allocation.* For purposes of determining combined taxable income of X and the DISC from export sales, general and administrative expenses of \$125,000 must be allocated to and apportioned between gross income resulting from the production and sale of kitchenware for export, and from the production and sale of kitchenware for the domestic market. The deduction of \$400,000 for expenses attributable to the resale of export property is allocated solely to gross income from the production and sale of kitchenware in foreign markets.

(iii) *Apportionment.* Apportionment of expense takes place in two stages. In the first stage, for computing combined taxable income from the production and sale of export

property, the general and administrative expense should be apportioned between the statutory grouping of gross income from the export of kitchenware and the residual grouping of gross income from domestic sales and foreign licenses. In the second stage, since the limitation on the foreign tax credit requires the use of a separate limitation with respect to dividends from a DISC (section 904(d)), the general and administrative expense should be apportioned between two statutory groupings, DISC dividends and foreign royalty income (for which the overall limitation is used), and the residual grouping of gross income from sales within the United States. In the first stage, in the absence of more specific or contrary information, the general and administrative expense may be apportioned on the basis of gross income in the respective groupings, as follows:

| | |
|--|----------|
| Apportionment of general and administrative expense to the statutory grouping, gross income from exports of kitchenware: $\$125,000 \times (\$1,700,000 / (\$1,700,000 + \$900,000 + \$800,000))$ | \$62,500 |
| Apportionment of general and administrative expense to the residual grouping, gross income from domestic sales of kitchenware and foreign royalty income from licensing kitchenware technology: $\$125,000 \times [(\$900,000 + \$800,000) / (\$1,700,000 + \$900,000 + \$800,000)]$ | 62,500 |
| Total apportionment of general and administrative expense | 125,000 |

On the basis of this apportionment, the combined taxable income, and the DISC portion of taxable income may be calculated as follows:

| | |
|---|-------------|
| Gross income from exports | \$1,700,000 |
| Less: | |
| DISC expense for resale of export property | 400,000 |
| Apportioned general and administrative expense | 62,500 |
| | \$462,500 |
| Combined taxable income from production and export of kitchenware | 1,237,500 |
| DISC income: | |
| 50 pct of combined taxable income | 618,750 |
| 10 pct of export promotion expense of \$300,000 | 30,000 |
| Total DISC income | 648,750 |
| DISC income as a percentage of combined taxable income | 52.4 |

In the second stage, in the absence of more specific or contrary information, the general and administrative expense may also be apportioned on the basis of gross income in the respective groupings. Since DISC taxable income is 52.4 percent of combined taxable income, DISC gross income is treated as 52.4 percent of the gross income from exports \$1,700,000. The apportionment follows:

| | |
|---|----------|
| Apportionment of general and administrative expense to the statutory grouping, DISC dividends: $\$125,000 \times [(0.524 \times \$1,700,000) / (\$1,700,000 + \$900,000 + \$800,000)]$ | \$32,750 |
| Apportionment of general and administrative expense to the statutory grouping, foreign royalty income: $\$125,000 \times [\$800,000 / (\$1,700,000 + 900,000 + \$800,000)]$ | 29,412 |
| Apportionment of general and administrative expense to the residual grouping, gross income from sources within the United States: $\$125,000 \times [(\$900,000 + (0.476 \times \$1,700,000)) / (\$1,700,000 + \$900,000 + \$800,000)]$ | 62,838 |
| Total apportioned general and administrative expense | 125,000 |

(iv) This Example 22 applies only to DISC taxable years ending before January 1, 1987, and to distributions from a DISC or former DISC with respect to DISC or former DISC taxable years ending before January 1, 1987.

Example 23. [Reserved]

Example 24. [Reserved]. For guidance, see § 1.861-8T(g) Example 24.

Example 25. *Income Taxes.* (i) *Facts.* X, a domestic corporation, is a manufacturer and distributor of electronic equipment with operations in states A, B, and C. X also has a branch in country Y which manufactures and distributes the same type of electronic equipment. In 1988, X has taxable income from these activities, as described under the Code (without taking into account the deduction for state income taxes), of \$1,000,000, of which \$200,000 is foreign source general limitation income subject to a separate limitation under section 904(d)(1)(I) ("general limitation income") and \$800,000 is domestic source income. States A, B, and C each determine X's income subject to tax within their state by making adjustments to X's taxable income as determined under the Code, and then apportioning the adjusted taxable income on the basis of the relative amounts of X's payroll, property, and sales within each state as compared to X's worldwide payroll, property, and sales. The adjustments made by states A, B, and C all involve adding and subtracting enumerated items from taxable income as determined under the Code. However, in making these adjustments to taxable income, none of the states specifically exempts foreign source income as determined under the Code. On this basis, it is determined that X has taxable income of \$550,000, \$200,000, and \$200,000 in states A, B, and C, respectively. The corporate tax rates in states A, B, and C are 10 percent, 5 percent, and 2 percent, respectively, and X has total state income tax liabilities of \$69,000 (\$55,000 + \$10,000 + \$4,000), which it deducts as an expense for federal income tax purposes.

(ii) *Allocation.* X's deduction of \$69,000 for state income taxes is definitely related and thus allocable to the gross income with respect to which the taxes are imposed. Since

the statutes of states A, B, and C do not specifically exempt foreign source income (as determined under the Code) from taxation and since, in the aggregate, states A, B, and C tax \$950,000 of X's income while only \$800,000 is domestic source income under the Code, it is presumed that state income taxes are imposed on \$150,000 of foreign source income. The deduction for state income taxes is therefore related and allocable to both X's foreign source and domestic source income.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation gross income, and one residual grouping, gross income from sources within the United States. The state income tax deduction of \$69,000 must be apportioned between these two groupings. Corporation X calculates the apportionment on the basis of the relative amounts of foreign source general limitation taxable income and U.S. source taxable income subject to state taxation. In this case, state income taxes are presumed to be imposed on \$800,000 of domestic source income and \$150,000 of foreign source general limitation income.

| | |
|---|----------|
| State income tax deduction apportioned to foreign source general limitation income (statutory grouping): $\$69,000 \times (\$150,000 / \$950,000)$ | \$10,895 |
| State income tax deduction apportioned to income from sources within the United States (residual grouping): $\$69,000 \times (\$800,000 / \$950,000)$ | 58,105 |
| Total apportioned state income tax deduction | \$69,000 |

Example 26. Income Taxes. (i) *Facts.* Assume the same facts as in Example 25 except that the language of state A's statute and the statute's operation exempt from taxation all foreign source income, as determined under the Code, so that foreign source income is not included in adjusted taxable income subject to apportionment in state A (and factors relating to X's country Y branch are not taken into account in computing the state A apportionment fraction).

(ii) *Allocation.* X's deduction of \$69,000 for state income taxes is definitely related and thus allocable to the gross income with respect to which the taxes are imposed. Since state A exempts all foreign source income by statute, state A is presumed to impose tax on \$550,000 of X's \$800,000 of domestic source income. X's state A tax of \$55,000 is allocable, therefore, solely to domestic source income. Since the statutes of states B and C do not specifically exclude all foreign source income as determined under the Code, and since states B and C impose tax on \$400,000 (\$200,000 + \$200,000) of X's income of which only \$250,000 (\$800,000 - \$550,000) is presumed to be domestic source, the deduction for the

\$14,000 of income taxes imposed by states B and C is related and allocable to both foreign source and domestic source income.

(iii) *Apportionment.* (A) For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation gross income, and one residual grouping, gross income from sources within the United States. The deduction of \$14,000 for income taxes of states B and C must be apportioned between these two groupings.

(B) Corporation X calculates the apportionment on the basis of the relative amounts of foreign source general limitation income and U.S. source income subject to state taxation.

| | |
|--|----------|
| States B and C income tax deduction apportioned to foreign source general limitation income (statutory grouping): $\$14,000 \times (\$150,000 / \$400,000)$ | \$5,250 |
| States B and C income tax deduction apportioned to income from sources within the United States (residual grouping): $\$14,000 \times (\$250,000 / \$400,000)$ | 8,750 |
| Total apportioned state income tax deduction | \$14,000 |

(C) Of X's total income taxes of \$69,000, the amount allocated and apportioned to foreign source general limitation income equals \$5,250. The total amount of state income taxes allocated and apportioned to U.S. source income equals \$63,750 (\$55,000 + \$8,750).

Example 27. Income Tax. (i) *Facts.* Assume the same facts as in Example 25 except that state A, in which X has significant income-producing activities, does not impose a corporate income tax or other state tax computed on the basis of income derived from business activities conducted in state A. X therefore has a total state income tax liability in 1988 of \$14,000 (\$10,000 paid to state B plus \$4,000 paid to state C), all of which is subject to allocation and apportionment under paragraph (b) of this section.

(ii) *Allocation.* (A) X's deduction of \$14,000 for state income taxes is definitely related and allocable to the gross income with respect to which the taxes are imposed. However, in these facts, an adjustment is necessary before the aggregate state taxable incomes can be compared with U.S. source income on the federal income tax return in the manner described in Examples 25 and 26. Unlike the facts in Examples 25 and 26, state A imposes no income tax and does not define taxable income attributable to activities in state A. The total amount of X's income subject to state taxation is, therefore, \$400,000 (\$200,000 in state B and \$200,000 in state C). This total presumptively does not include any income attributable to activities performed in state A and therefore can not

properly be compared to total U.S. source taxable income reported by X for federal income tax purposes, which does include income attributable to state A activities.

(B)(1) Accordingly, before applying the method used in Examples 25 and 26 to the facts of this example, it is necessary first to estimate the amount of taxable income that state A could reasonably attribute to X's activities in state A, and then to reduce federal taxable income by that amount.

(2) Any reasonable method may be used to attribute taxable income to X's activities in state A. For example, the rules of the Uniform Division of Income for Tax Purposes Act ("UDITPA") attribute income to a state on the basis of the average of three ratios that are based upon the taxpayer's facts—property within the state over total property, payroll within the state over total payroll, and sales within the state over total sales—and, with adjustments, provide a reasonable method for this purpose. When applying the rules of UDITPA to estimate U.S. source income derived from state A activities, the taxpayer's UDITPA factors must be adjusted to eliminate both taxable income and factors attributable to a foreign branch. Therefore, in this example all taxable income as well as UDITPA apportionment factors (property, payroll, and sales) attributable to X's country Y branch must be eliminated.

(C)(1) Since it is presumed that, if state A had had an income tax, state A would not attempt to tax the income derived by X's country Y branch, any reasonable estimate of the income that would be taxed by state A must exclude any foreign source income.

(2) When using the rules of UDITPA to estimate the income that would have been taxable by state A in these facts, foreign source income is excluded by starting with federally defined taxable income (before deduction for state income taxes) and subtracting any income derived by X's country Y branch. The hypothetical state A taxable income is then determined by multiplying the resulting difference by the average of X's state A property, payroll, and sales ratios, determined using the principles of UDITPA (after adjustment by eliminating the country Y branch factors). The resulting product is presumed to be exclusively U.S. source income, and the allocation and apportionment method described in Example 26 must then be applied.

(3) If, for example, state A taxable income were determined to equal \$550,000, then \$550,000 of U.S. source income for federal income tax purposes would be presumed to constitute state A taxable income. Under Example 26, the remaining \$250,000 (\$800,000 - \$550,000) of U.S. source income for federal income tax purposes would be presumed to be subject to tax in states B and C. Since states B and C impose tax on \$400,000, the application of Example 25 would result in a pre-

sumption that \$150,000 is foreign source income and \$250,000 is domestic source income. The deduction for the \$14,000 of income taxes of states B and C would therefore be related and allocable to both foreign source and domestic source income and would be subject to apportionment.

(iii) *Apportionment.* The deduction of \$14,000 for income taxes of states B and C is apportioned in the same manner as in Example 26. As a result, \$5,250 of the \$14,000 of state B and state C income taxes is apportioned to foreign source general limitation income ($\$14,000 \times \$150,000 / \$400,000$), and \$8,750 ($\$14,000 \times \$250,000 / \$400,000$) of the \$14,000 of state B and state C income taxes is apportioned to U.S. source income.

Example 28. Income Tax. (i) *Facts.* (A) Assume the same facts as in Example 25 (X has \$1,000,000 of taxable income for federal income tax purposes, \$800,000 of which is U.S. source income and \$200,000 of which is foreign source general limitation income), except that \$100,000 of X's \$200,000 of foreign source general limitation income consists of dividends from first-tier controlled foreign corporations ("CFCs") (as defined in section 957(a) of the Code) which derive exclusively foreign source general limitation income. X owns stock representing 10 to 50 percent of the vote and value in such CFCs.

(B) State A taxable income is computed by first making adjustments to X's federal taxable income. These adjustments result in X having a total of \$1,100,000 of apportionable taxable income for state A tax purposes. None of the \$100,000 of adjustments made by state A relate to the dividends paid by the CFCs. As in Example 25, the amount of apportionable taxable income attributable to business activities conducted in state A is determined by multiplying apportionable taxable income by a fraction (the "state apportionment fraction") that compares the relative amounts of X's payroll, property, and sales within state A with X's worldwide payroll, property and sales. An analysis of state A law indicates that state A law includes in its definition of the taxable business income of X which is apportionable to X's state A activities, dividends paid to X by its subsidiaries that are in the same business as X, but are less than 50 percent owned by X ("portfolio dividends"). The dividends received by X from the 10 to 50 percent owned first-tier CFCs, therefore, are considered to be portfolio dividends includable in apportionable business income for state A tax purposes. However, the factors of these CFCs are not included in the state A apportionment fraction for purposes of apportioning income to X's activities in the state. The comparison of X's state A factors with X's worldwide factors results in a state apportionment fraction of 50 percent. Applying this fraction to apportionable taxable income of \$1,100,000, as determined under state

law, results in attributing 50 percent of apportionable taxable income to state A, and produces total state A taxable income of \$550,000. State A imposes an income tax at a rate of 10 percent on the amount of income that is attributed to state A, which results in \$55,000 of tax imposed by state A.

(ii) *Allocation.* (A) States A, B, and C impose income taxes of \$69,000 which must be allocated to the classes of gross income upon which the taxes are imposed. A portion of X's federal income tax deduction of \$55,000 for state A income tax is definitely related and thus allocable to the class of gross income consisting of foreign source portfolio dividends. A definite relationship exists between a deduction for state income tax and portfolio dividends when a state includes portfolio dividends in state taxable income apportionable to the state, but determines state taxable income by applying an apportionment fraction that excludes the factors of the corporations paying those dividends. By applying a state apportionment fraction that excludes factors of the corporations paying portfolio dividends to apportionable taxable income that includes the \$100,000 of foreign source portfolio dividends, \$50,000 (50 percent of the \$100,000) of the portfolio dividends is attributed to X's activities in state A and subjected to state A income tax. Applying the state A income tax rate of 10 percent to the \$50,000 of foreign source portfolio dividends subjected to state A income tax, \$5,000 of X's \$55,000 total state A income tax liability is definitely related and allocable to a class of gross income consisting of the foreign source portfolio dividends. Since under the look-through rules of section 904(d)(3) the foreign source portfolio dividends from the first-tier CFCs are included within the general limitation described in section 904(d)(1)(I), the \$5,000 of state A tax on foreign source portfolio dividends is allocated entirely to foreign source general limitation income and, therefore, is not apportioned. (If the total amount of state A tax imposed on foreign source portfolio dividends were to exceed the actual amount of X's state A income tax liability (for example, due to net operating losses), the actual amount of state A tax would be allocated entirely to those foreign source portfolio dividends.) After allocation of a portion of the state A tax to portfolio dividends, \$50,000 (\$55,000 - \$5,000) of state A tax remains to be allocated.

(B) A total of \$64,000 (the aggregate of the \$50,000 remaining state A tax, and the \$10,000 and \$4,000 of taxes imposed by states B and C, respectively) is to be allocated (as provided in Example 25) by comparing U.S. source taxable income (as determined under the Code) with the aggregate of the state taxable incomes determined by states A, B, and C (after reducing state apportionable taxable incomes by the amount of any portfolio dividends included in apportionable taxable in-

come to which tax has been specifically allocated). X's state A taxable income, after reduction by the \$50,000 of portfolio dividends taxed by state A, equals \$500,000. X also has taxable income of \$200,000 and \$200,000 in states B and C, respectively. In the aggregate, therefore, states A, B, and C tax \$900,000 of X's income, after excluding state taxable income attributable to portfolio dividends. Since X has only \$800,000 of U.S. source taxable income for federal income tax purposes, it is presumed that state income taxes are imposed on \$100,000 of foreign source income. The remaining deduction of \$64,000 for state income taxes is therefore related and allocable to both foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation income, and one residual grouping, gross income from sources within the United States. The remaining state income tax deduction of \$64,000 must be apportioned between these two groupings on the basis of relative amounts of foreign source general limitation taxable income and U.S. source taxable income subject to state taxation. In this case, the \$64,000 of state income taxes is considered to be imposed on \$800,000 of domestic source income and \$100,000 of foreign source general limitation income and is apportioned as follows:

| | |
|---|----------|
| State income tax deduction apportioned to foreign source general limitation income (statutory grouping): | |
| \$64,000 × (\$100,000/\$900,000) | \$7,111 |
| State income tax deduction apportioned to income from sources within the United States (residual grouping): | |
| \$64,000 × (\$800,000/\$900,000) | 56,889 |
| | <hr/> |
| Total apportioned state income tax deduction | \$64,000 |

Of the total state income taxes of \$69,000, the amount allocated and apportioned to foreign source general limitation income equals \$12,111 (\$5,000 + \$7,111). The total amount of state income taxes allocated and apportioned to U.S. source income equals \$56,889.

Example 29. Income Taxes. (i) *Facts.* (A) P, a domestic corporation, is a manufacturer and distributor of electronic equipment with operations in states F, G, and H. P also has a branch in country Y which manufactures and distributes the same type of electronic equipment. In addition, P has three wholly owned subsidiaries, US1, US2, and FS, the latter a controlled foreign corporation ("CFC") as defined in section 957(a) of the Code. P also owns stock representing 10 to 50

percent of the vote and value of various other first-tier CFCs that derive exclusively foreign source general limitation income.

(B) In 1988, P derives \$1,000,000 of federal taxable income (without taking into account the deduction for state income taxes), which consists of \$250,000 of foreign source general limitation income and \$750,000 of U.S. source income. The foreign source general limitation income consists of a \$25,000 subpart F inclusion with respect to FS, \$150,000 of dividends from the other first-tier CFCs deriving exclusively foreign source general limitation income, in which P owns stock representing 10 to 50 percent of the vote and value, and \$75,000 of manufacturing and sales income derived by P's U.S. operations and country Y branch. The \$750,000 of U.S. source income consists of manufacturing and sales income derived by P's U.S. operations.

(C) For federal income tax purposes, US1 derives \$75,000 of taxable income, before deduction for state income taxes, which consists entirely of U.S. source income. US2, a so-called "80/20" corporation described in section 861(c)(1), derives \$250,000 of federal taxable income before deduction for state or foreign income taxes, all of which is derived from foreign operations and consists entirely of foreign source general limitation income. FS is not engaged in a U.S. trade or business and derives \$550,000 of foreign source general limitation income before deduction for foreign income taxes.

(D) State F imposes a corporate income tax of 10 percent of P's state F taxable income, which is determined by formulary apportionment of the total taxable income attributable to P's worldwide unitary business. State F determines P's taxable income for state F tax purposes by first making adjustments to the taxable income, as determined for federal income tax purposes, of the members of the unitary business group to determine the total taxable income of the group. State F then computes P's state taxable income by attributing a portion of that unitary business taxable income to activities of P that are conducted in state F. State F does this by multiplying the unitary business taxable income (federal taxable income with state adjustments) by a fraction (the "state apportionment fraction") that compares the relative amounts of the unitary business group's payroll, property, and sales (the "factors") in state F with the payroll, property, and sales of the unitary business group. P is the only member of its unitary business group that has state F factors and that is thereby subject to state F income tax and filing requirements. State F defines the unitary business group to include any corporation more than 50 percent of which is directly or indirectly owned by a state F taxpayer and is engaged in the same unitary business. P's unitary business group, therefore, includes P, US1, US2, and FS, but does

not include the 10 to 50 percent owned CFCs. The income of the unitary business group excludes intercompany dividends between members of the unitary business group and subpart F inclusions with respect to a member of the unitary business group. Dividends paid from nonmembers of the unitary group (the 10 to 50 percent owned CFCs) for state F tax purposes are referred to as "portfolio dividends" and are included in taxable income of the unitary business. None of the factors (in state F or worldwide) of the corporations paying portfolio dividends are included in the state F apportionment fraction for purposes of apportioning total taxable income of the unitary business to P's state F activities.

(E) After state adjustments to the taxable income of the unitary business group, as determined under federal tax principles, the total taxable income of P's unitary business group equals \$2,000,000, consisting of \$1,050,000 of P's income (\$100,000 of foreign source manufacturing and sales income, \$150,000 of foreign source portfolio dividends, and \$800,000 of U.S. source manufacturing and sales income, but excluding the \$25,000 subpart F inclusion attributable to FS since FS is a member of the unitary business group), \$100,000 of US1's income (from sales made in the United States), \$275,000 of US2's income (from an active business outside the United States), and \$575,000 of FS's income. The differences between taxable income under federal tax principles and state F apportionable taxable income for P, US1, US2, and FS represent adjustments to taxable income under federal tax principles that are made pursuant to the tax laws of state F.

(F) The taxable income for each member of the unitary business group under federal tax principles and state law principles is summarized in the following table. (The items of income listed in the "Federal" column of the table refer to taxable income before deduction for state income tax.)

| | Federal | State F |
|--|-----------|-----------|
| P | | |
| U.S. source income | \$750,000 | \$800,000 |
| Foreign source general limitation income: | | |
| Portfolio dividends | 150,000 | 150,000 |
| Subpart F income | 25,000 | 0 |
| Manufacturing and sales income | 75,000 | 100,000 |
| Total taxable income | 1,000,000 | 1,050,000 |
| US1 | | |
| U.S. source income | 75,000 | 100,000 |
| US2 | | |
| Foreign source general limitation income | 250,000 | 275,000 |

§ 1.861-8

26 CFR Ch. I (4-1-15 Edition)

| | Federal | State F |
|--|---------|-----------|
| FS | | |
| Foreign source general limitation income | 550,000 | 575,000 |
| Taxable income of the unitary business group | | 2,000,000 |

(G) State F deems P to have state F taxable income of \$500,000, which is determined by multiplying the total taxable income of the unitary business group (\$2,000,000) by the group's state F apportionment fraction, which is assumed to be 25 percent in these facts. P's state F taxable income is then multiplied by the state F tax rate of 10 percent, resulting in a state F tax liability of \$50,000. State G and state H, unlike state F, do not tax portfolio dividends. Although state G and state H apportion taxable income, respectively, on the basis of an apportionment fraction that compares state factors to total factors, state G and state H, unlike state F, do not apply a unitary business theory and consider only P's taxable income and factors in computing P's taxable income. P's taxable income under state G law equals \$300,000, which is subject to a 5 percent tax rate resulting in a state G tax liability of \$15,000. P's taxable income under state H law is \$300,000, which is subject to a tax rate of 2 percent resulting in a state H tax liability of \$6,000. P has a total federal income tax deduction for state income taxes of \$71,000 (\$50,000 + 15,000 + 6,000).

(i) *Allocation.* (A) P's deduction of \$71,000 for state income taxes is definitely related and allocable to the gross income with respect to which the taxes are imposed. Adjustments may be necessary, however, before aggregate state taxable incomes can be compared with U.S. source taxable income on the federal income tax return in the manner described in Examples 25 and 26. In allocating P's deduction for state income taxes, it is necessary first to determine the portion, if any, of the deduction that is definitely related and allocable to a particular class of gross income. A definite relationship exists between a deduction for state income tax and dividend income when a state includes portfolio dividends in state taxable income apportionable to the taxpayer's activities in the state, but determines state taxable income by applying an apportionment formula that excludes the factors of the corporations paying portfolio dividends.

(B) In this case, \$150,000 of foreign source portfolio dividends are subject to a state F apportionment fraction of 25 percent, which results in a total of \$37,500 of state F taxable income attributable to such dividends. As illustrated in Example 28, \$3,750 ($\$150,000 \times 25$ percent state F apportionment percentage \times 10 percent state F tax rate) of P's state F in-

come tax is definitely related and allocable to a class of gross income consisting entirely of the foreign source portfolio dividends. Since under the look-through rules of section 904(d)(3) the foreign source portfolio dividends paid by first-tier CFCs are included within the general limitation described in section 904(d)(1)(I), the \$3,750 of state F tax on foreign source portfolio dividends is allocated entirely to foreign source general limitation income and, therefore, is not apportioned.

(C) After reducing state F taxable income of the unitary business group by the taxable income attributable to portfolio dividends, P's remaining state F taxable income equals \$462,500 ($\$500,000 - \$37,500$), the portion of the taxable income of the unitary business that state F attributes to P's activities in state F. Accordingly, in order to allocate and apportion the remaining \$46,250 of state F tax ($\$50,000$ of state F tax minus the \$3,750 of state F tax allocated to foreign source portfolio dividends), it is necessary first to determine if state F is taxing only P's non-unitary taxable income (as defined below) or is imposing its tax partly on other unitary business income that is attributed under state F law to P's activities in state F. P's state F non-unitary taxable income is computed by applying the state F apportionment formula, solely on the basis of P's income (excluding portfolio dividends) and state F apportionment factors. If the state F taxable income (after reduction by the portfolio dividends attributed to state F) attributed to P under state F law exceeds P's non-unitary taxable income, a portion of the state F tax must be allocated and apportioned on the basis of the other unitary business income that is attributed to and taxable to P under state F law. If P's non-unitary taxable income equals or exceeds the \$462,500 of remaining state F taxable income, it is presumed that state F is only taxing P's non-unitary taxable income, so that the entire amount of the remaining state F tax should be allocated and apportioned in the manner described in Example 25.

(D) If P's non-unitary taxable income is less than the \$462,500 of remaining state F taxable income (after reduction for the \$37,500 of state F taxable income attributable to portfolio dividends), it is presumed that state F is attributing to P, and taxing P upon, other unitary business income. In such a case, it is necessary to determine if state F is attributing to P, and imposing its income tax on, a part of the foreign source income that would be generally presumed under separate accounting to be the income of foreign affiliates and 80/20 companies included in the unitary group, or whether state F is limiting the income it attributes to P, and its taxation of P, to the U.S. source income that would be generally presumed

under separate accounting to be the income of domestic members of the unitary group.

(E) Assume for purposes of this example that the non-unitary taxable income attributable to P equals \$396,000, computed by multiplying P's state F taxable income of \$900,000 (P's state F taxable income (before state F apportionment) of \$1,050,000 less the \$150,000 of foreign source portfolio dividends) by P's non-unitary state F apportionment fraction, which is assumed to be 44 percent. Because P's non-unitary taxable income of \$396,000 is less than the \$462,500 of remaining state F taxable income, state F is presumed to be attributing to P and taxing the income that would have been generally attributed under separate accounting to P's affiliates in the unitary group. To determine if state F tax is being imposed on members of the unitary group (other than P) that produce foreign source income, it is necessary to compute a hypothetical state F taxable income for all companies in the unitary group with significant U.S. operations. (For this purpose, the hypothetical group of companies with significant domestic operations is referred to as the "water's edge group.") State F is presumed to be attributing to P and taxing income that would have been generally attributable under separate accounting to foreign corporations and 80/20 companies to the extent that the remaining state F taxable income (\$462,500) of P exceeds the hypothetical state F taxable income that would have been attributed under state F law to P if state F had defined the unitary group to be the water's edge group.

(F) The members of the water's edge group would have been P and US1. The unitary business income of this water's edge group is \$1,000,000, the sum of \$900,000 (P's state F taxable income (before state F apportionment) of \$1,050,000 less the \$150,000 of foreign source portfolio dividends) and \$100,000 (US1's state F taxable income). For purposes of this example, the state F apportionment fraction determined on a unitary basis for this water's edge group is assumed to equal 40 percent, the average of P and US1's state F payroll, property, and sales factor ratios (the water's edge group's state F factors over its worldwide factors). Applying this apportionment fraction to the \$1,000,000 of unitary business income of the water's edge group yields state F water's edge taxable income of \$400,000. The excess of the remaining \$462,500 of P's state F taxable income over the \$400,000 of P's state F water's edge taxable income equals \$62,500, and is attributable to the inclusion of US2 and FS in the unitary group. The state F tax attributable to the \$62,500 of taxable income attributed to P under state F law, and that would have generally been attributed to US2 and FS under non-unitary accounting, equals \$6,250 and is allocated entirely to a class of gross income consisting of foreign source general limita-

tion income, because the income of FS and US2 consists entirely of such income. After the \$6,250 of state F tax attributable to US2 and FS is subtracted from the remaining \$46,250 of net state F tax, P has \$40,000 of state F tax remaining to be allocated and apportioned.

(G) To the extent that the remainder of P's state F taxable income (\$400,000) exceeds P's non-unitary state F taxable income (\$396,000), it is presumed that state F is attributing to and imposing on P a tax on U.S. source income that would have been attributed under separate accounting to members of the water's edge group other than P. In these facts, the \$4,000 difference in P's state F taxable income results from the inclusion of US1 in the unitary group. The \$400 of P's state F tax attributable to this \$4,000 is allocated entirely to P's U.S. source income. P's remaining \$39,600 of state F tax (\$40,000 of P's state F tax resulting from the attribution of P of income that would have been attributed under non-unitary accounting to other members of the water's edge group, minus \$400 of state F tax attributable to US1 and allocated to P's U.S. source income) is the state F tax attributable to P's non-unitary state F taxable income that is to be allocated and apportioned together with P's state G tax of \$15,000 and state H tax of \$6,000 as illustrated in Example 25.

(H) In allocating the \$60,600 of state tax liabilities (\$39,600 state F tax attributable to P's non-unitary state F income + \$15,000 state G tax + \$6,000 state H tax) under Example 25, P's state taxable income in state G and state H (\$300,000 + \$300,000) must be added to P's non-unitary state F taxable income (\$396,000). The resulting \$996,000 of combined state taxable incomes is compared with \$750,000 of U.S. source income on P's federal income tax return. Because P's combined state taxable incomes exceeds P's federal U.S. source taxable income, it is presumed that the remaining \$60,600 of P's total state income taxes is imposed in part on foreign source income. Accordingly, P's remaining deduction of \$60,600 (\$39,600 + \$15,000 + \$6,000) for state income taxes is related and allocable to both P's foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment.* The \$60,600 of state taxes (the remaining \$39,600 of state F tax + \$15,000 of state G tax + \$6,000 of state H tax) must be apportioned between foreign source general limitation income and U.S. source income for federal income tax purposes. This apportionment is based upon the relative amounts of foreign source general limitation taxable income and U.S. source taxable income comprising the \$996,000 of income subject to tax by the states, after reducing the total amount of income subject to tax by the portfolio dividends and the income attributed to P under state F law that would have

been attributed under arm's length principles to other members of P's state F unitary business group. The deduction for the \$60,600 of state income taxes is apportioned as follows:

| | |
|--|----------|
| State income tax deduction apportioned to foreign source general limitation income (statutory grouping): \$60,600×(\$246,000/\$996,000) | \$14,967 |
| State income tax deduction apportioned to income from sources within the United States (residual grouping): \$60,600×(\$750,000/\$996,000) | 45,633 |
| Total apportioned state income tax deduction | 60,600 |

Of the total state income taxes of \$71,000, the amount allocated and apportioned to foreign source general limitation income is \$24,967—the sum of \$14,967 of state F, state G, and state H taxes apportioned to foreign source general limitation income, \$3,750 of state F tax allocated to foreign source apportionable dividend income, and the \$6,250 of state F tax allocated to foreign source general limitation income as the result of state F's worldwide unitary business theory of taxation. The total amount of state income taxes allocated and apportioned to U.S. source income equals \$46,033—the sum of the \$400 of state F tax attributable to the inclusion of US1 in the state F unitary business group and \$45,633 of combined state F, G, and H tax apportioned under the method provided in Example 25.

Example 30. Income taxes. (i)(A) *Facts.* As in Example 17 of this paragraph (g), X is a domestic corporation that wholly owns M, N, and O, also domestic corporations. X, M, N, and O file a consolidated income tax return. All the income of X and O is from sources within the United States, all of M's income is general category income from sources within South America, and all of N's income is general category income from sources within Africa. X receives no dividends from M, N, or O. During the taxable year, the consolidated group of corporations earned consolidated gross income of \$550,000 and incurred total deductions of \$370,000. X has gross income of \$100,000 and deductions of \$50,000, without regard to its deduction for state income tax. Of the \$50,000 of deductions incurred by X, \$15,000 relates to X's ownership of M; \$10,000 relates to X's ownership of N; \$5,000 relates to X's ownership of O; and the entire \$30,000 constitutes stewardship expenses. The remainder of X's \$20,000 of deductions (which is assumed not to include state income tax) relates to production of U.S. source income from its plant in the United States. M has gross income of \$250,000 and deductions of \$100,000, which yield foreign-source general category taxable income of \$150,000. N has gross income of \$150,000 and deductions of \$200,000, which yield a foreign-source general category loss of \$50,000. O has gross income of \$50,000 and deductions of

\$20,000, which yield U.S. source taxable income of \$30,000.

(B) Unlike Example 17 of this paragraph (g), however, X also has a deduction of \$1,800 for state A income taxes. X's state A taxable income is computed by first making adjustments to the Federal taxable income of X to derive apportionable taxable income for state A tax purposes. An analysis of state A law indicates that state A law also includes in its definition of the taxable business income of X which is apportionable to X's state A activities, the taxable income of M, N, and O, which is related to X's business. As in Example 25 of this paragraph (g), the amount of apportionable taxable income attributable to business activities conducted in state A is determined by multiplying apportionable taxable income by a fraction (the "state apportionment fraction") that compares the relative amounts of payroll, property, and sales within state A with worldwide payroll, property, and sales. Assuming that X's apportionable taxable income equals \$180,000, \$100,000 of which is from sources without the United States, and \$80,000 is from sources within the United States, and that the state apportionment fraction is equal to 10 percent, X has state A taxable income of \$18,000. The state A income tax of \$1,800 is then derived by applying the state A income tax rate of 10 percent to the \$18,000 of state A taxable income.

(ii) *Allocation and apportionment.* Assume that under Example 29 of this paragraph (g), it is determined that X's deduction for state A income tax is definitely related to a class of gross income consisting of income from sources both within and without the United States, and that the state A tax is apportioned \$1,000 to sources without the United States, and \$800 to sources within the United States. Under Example 17 of this paragraph (g), without regard to the deduction for X's state A income tax, X has a separate loss of (\$25,000) from sources without the United States. After taking into account the deduction for state A income tax, X's separate loss from sources without the United States is increased by the \$1,000 state A tax apportioned to sources without the United States, and equals a loss of (\$26,000), for purposes of computing the numerator of the consolidated general category foreign tax credit limitation.

Example 31. Income Taxes. (i) *Facts.* Assume that the facts are the same as in Example 29, except that state G requires P to adjust its federal taxable income by depreciating an asset at a different rate than is allowed P under the Internal Revenue Code for the same asset. Before using the methodology of Example 25 to determine whether a portion of its deduction for state income taxes is allocable to a class of gross income that includes foreign source income, P recomputes its taxable income under state G law by

using the rate of depreciation that it is entitled to use under the Code, and uses this recomputed amount in applying the methodology of Example 25.

(i) *Allocation.* P's modification of its state G taxable income is permissible. Under the methodology of Example 25, this modification of state G taxable income will produce a reasonable determination of the portion (if any) of P's state income taxes that is allocable to a class of gross income that includes foreign sources income.

Example 32. Income Taxes. (i) *Facts.* Assume the facts are the same as Example 29, except that P's state F taxable income differs from the amount of its U.S. source income under federal income tax principles solely because state F determines P's state taxable income under a worldwide unitary business theory instead of the arm's length principles applied in the Code. Before using the methodology of Example 25 to determine whether a portion of its deduction for state income taxes is allocable to a class of gross income that includes foreign source income, P recomputes state F taxable income under the arm's length principles applied in the Code. P substitutes that recomputed amount for the amount of taxable income actually determined under state F law in applying the methodology of Example 25.

(ii) *Allocation.* P's modification of state F taxable income does not accurately reflect the factual relationship between the deduction for state F income tax and the income on which the tax is imposed, because there is no factual relationship between the state F income tax and the state F taxable income as recomputed under Code principles. State F does not impose its income tax upon P's income as it might have been defined under the Internal Revenue Code. Consequently, P's modification of state F taxable income is impermissible because it will not produce a reasonable determination of the portion (if any) of P's state income taxes that is allocable to a class of gross income that includes foreign source income.

Example 33. Income Taxes. (i) *Facts.* Assume the same facts as in Example 29, except that state G does not impose an income tax on corporations, and P's non-unitary state F taxable income equals \$462,500. Thus only \$56,000 of state income taxes (\$50,000 of state F income tax and \$6,000 of state H income tax) are deductible and required to be allocated and (if necessary) apportioned. As in Example 29, P has \$800,000 of aggregate state taxable income (\$500,000 of state F taxable income and \$300,000 of state H taxable income).

(ii) *Method One.* Assume that P has elected to allocate and apportion its deduction for state income tax under the safe harbor method provided in § 1.861-8 (e)(6)(ii)(D)(2) ("Method One").

(A) *Step One—Specific allocation to foreign source portfolio dividends.* P applies the methodology of paragraph (ii) of Example 28 to determine the portion of the deduction that must be allocated to a class of gross income consisting solely of foreign source portfolio dividends. As illustrated in paragraphs (ii) (A) and (B) of Example 29, \$3,750 of the deduction for state F income tax is attributable to the \$37,500 of foreign source portfolio dividends attributed under state F law to P's activities in state F. Thus \$3,750 of P's deduction for state income tax must be specifically allocated to a class of gross income consisting solely of \$37,500 of foreign source portfolio dividends. No apportionment of the \$3,750 is necessary. P's adjusted state taxable income is \$762,500 (aggregate state taxable income of \$800,000 reduced by \$37,500 of foreign source portfolio dividends). Because the remaining amount of state F taxable income (\$462,500) equals P's non-unitary state F taxable income, no further specific allocation of state tax is required.

(B) *Step Two—Adjustment of U.S. source federal taxable income.* P applies the methodology illustrated in paragraph (ii) of Example 27 (including the rules of UDITPA described therein) to determine the amount of its federal taxable income attributable to its activities in state G. Assume that P determines under this methodology that \$300,000 of its federal taxable income is attributable to activities in state G. P's adjusted U.S. source federal taxable income equals \$450,000 (\$750,000 minus the \$300,000 attributed to P's activities in state G).

(C) *Step Three—Allocation.* The portion of P's deduction for state income tax remaining to be allocated equals \$52,250 (\$56,000 minus the \$3,750 specifically allocated to foreign source portfolio dividends). P allocates this portion by applying the methodology illustrated in paragraph (ii) of Example 25, as modified by paragraph (e)(6)(ii)(D)(2)(iii) of this section. Thus, P compares its adjusted state taxable income (as determined under Step One in paragraph (A) above) with an amount equal to 110% of its adjusted U.S. source federal taxable income (as determined under Step Two in paragraph (B) above). Because P's adjusted state taxable income (\$762,500) exceeds 110% of P's adjusted U.S. source federal taxable income (\$495,000, or 110% of \$450,000), the remaining portion of P's deduction for state income tax (\$52,500) must be allocated to a class of gross income that includes both U.S. and foreign source income.

(D) *Step Four—Apportionment.* P must apportion to U.S. source income the portion of the deduction that is attributable to state income tax imposed upon state taxable income in an amount equal to 110% of P's adjusted U.S. source federal taxable income.

§ 1.861-8T

26 CFR Ch. I (4-1-15 Edition)

The remainder of the deduction must be apportioned to foreign source general limitation income.

| | |
|--|-------------|
| Amount of deduction to be apportioned | \$52,250.00 |
| Less portion of deduction to be apportioned to income from sources within the United States (residual grouping): | |
| (\$52,250×(\$495,000/\$762,500) | \$33,919.67 |

| | |
|---|-------------|
| Equals Portion of deduction to be apportioned to foreign source general limitation income (statutory grouping): | \$18,330.33 |
|---|-------------|

(iii) *Method Two*. Assume that P has elected to allocate and apportion its deduction for state income tax under the safe harbor method provided in § 1.861-8(e)(6)(ii)(D)(3) (“Method Two”).

(A) *Step One—Specific allocation*. Step One of Method Two is the same as Step One of Method One. Therefore, as described in paragraph (A) of paragraph (ii) above, \$3,750 of P’s deduction for state income tax must be specifically allocated to a class of gross income consisting solely of \$37,500 of foreign source portfolio dividends. No apportionment of the \$3,750 is necessary. P’s adjusted state taxable income is \$762,500 (aggregate state taxable income of \$800,000 reduced by \$37,500 of foreign source portfolio dividends).

(B) *Step Two—Adjustment of U.S. source federal taxable income*. Step Two of Method Two is the same as Step Two of Method One. Therefore, as described in paragraph (B) of paragraph (ii) above, assume that P determines that \$300,000 of its federal taxable income is attributable to activities in state G. P’s adjusted U.S. source federal taxable income equals \$450,000 (\$750,000 minus the \$300,000 attributed to P’s activities in state G).

(C) *Step Three—Allocation*. The portion of P’s deduction for state income tax remaining to be allocated equals \$52,250 (\$56,000 minus the \$3,750 of state F income tax specifically allocated to foreign source portfolio dividends). P allocates this portion by applying the methodology illustrated in paragraph (ii) of Example 25, as modified by paragraph (e)(6)(ii)(D)(3)(iii) of this section. Thus, P compares its adjusted state taxable income (as determined under Step One in paragraph (A) above) with its adjusted U.S. source federal taxable income (as determined under Step Two in paragraph (B) above). Because P’s adjusted state taxable income (\$762,500) exceeds P’s adjusted U.S. source federal taxable income (\$450,000), the remaining portion of P’s deduction for state income tax (\$52,500) must be allocated to a class of gross income that includes both U.S. and foreign source income.

(D) *Step Four—Apportionment*. P must apportion to U.S. source income the portion of the deduction that is attributable to state income tax imposed upon state taxable income in an amount equal to P’s adjusted U.S. source federal taxable income.

| | |
|--|-------------|
| Amount of deduction to be apportioned | \$52,250.00 |
| Less portion of deduction initially apportioned to income from sources within the United States (residual grouping): | |
| \$52,250×(\$450,000/\$762,500) | 30,836.07 |

| | |
|--|-----------|
| Remainder requiring further apportionment: | |
| \$52,250×(\$312,500/\$762,500) | 21,413.93 |

The remainder of \$21,413.93 must be further apportioned between foreign source general limitation income and U.S. source federal taxable income in the same proportions that P’s adjusted U.S. source federal taxable income and foreign source general limitation income bear to P’s total federal taxable income (taking into account the adjustment of U.S. source federal taxable income and reduced by the amount of foreign source portfolio dividends to which the tax has been specifically allocated).

| | | |
|--|---|------------|
| Portion of remainder apportioned to foreign source general limitation income (statutory grouping): | \$21,413.93 X (\$212,500/\$662,500) | \$6,868.62 |
|--|---|------------|

| | | |
|---|---|-------------|
| Remaining state income tax deduction to be apportioned to income from sources within the United States (residual grouping): | \$21,413.93 X (\$450,000/\$662,500) | \$14,545.31 |
|---|---|-------------|

Of P’s total deduction of \$56,000 for state income tax, the portion allocated and apportioned to foreign source general limitation income equals \$10,618.62—the sum of \$6,868.62 apportioned under Step Four and the \$3,750.00 specifically allocated to foreign source portfolio dividend income under Step One. The portion of the deduction allocated and apportioned to U.S. source income equals \$45,381.38—the sum of the \$30,836.07 and the \$14,545.31 apportioned under Step Four.

[T.D. 7456, 42 FR 1195, Jan. 6, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.861-8, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

EDITORIAL NOTE: At 74 FR 38872, Aug. 4, 2009, § 1.861-8 was amended; however, the amendment to revise paragraph (h) could not be incorporated due to inaccurate amendatory instruction.

§ 1.861-8T Computation of taxable income from sources within the United States and from other sources and activities (temporary).

(a) *In general*. (1) [Reserved]

(2) *Allocation and apportionment of deductions in general*. If an affiliated group of corporations joins in filing a consolidated return under section 1501, the provisions of this section are to be applied separately to each member in

that affiliated group for purposes of determining such member's taxable income, except to the extent that expenses, losses, and other deductions are allocated and apportioned as if all domestic members of an affiliated group were a single corporation under section 864(e) and the regulations thereunder. See § 1.861-9T through § 1.861-11T for rules regarding the affiliated group allocation and apportionment of interest expense, and § 1.861-14T for rules regarding the affiliated group allocation and apportionment of expenses other than interest.

(a)(3) through (b) [Reserved] For further guidance, see § 1.861-8(a)(3) through (b).

(c) *Apportionment of deductions*—(1) *Deductions definitely related to a class of gross income.* Where a deduction has been allocated in accordance with paragraph (b) of this section to a class of gross income which is included in one statutory grouping and the residual grouping, the deduction must be apportioned between the statutory grouping and the residual grouping. Where a deduction has been allocated to a class of gross income which is included in more than one statutory grouping, such deduction must be apportioned among the statutory groupings and, where necessary, the residual grouping. Thus, in determining the separate limitations on the foreign tax credit imposed by section 904(d)(1) or by section 907, the income within a separate limitation category constitutes a statutory grouping of income and all other income not within that separate limitation category (whether domestic or within a different separate limitation category) constitutes the residual grouping. In this regard, the same method of apportionment must be used in apportioning a deduction to each separate limitation category. Also, see paragraph (f)(1)(iii) of this section with respect to the apportionment of deductions among the statutory groupings designated in section 904(d)(1). If the class of gross income to which a deduction has been allocated consists entirely of a single statutory grouping or the residual grouping, there is no need to apportion that deduction. If a deduction is not definitely related to any gross income, it must be

apportioned ratably as provided in paragraph (c)(3) of this section. A deduction is apportioned by attributing the deduction to gross income (within the class to which the deduction has been allocated) which is in one or more statutory groupings and to gross income (within the class) which is in the residual grouping. Such attribution must be accomplished in a manner which reflects to a reasonably close extent the factual relationship between the deduction and the grouping of gross income. In apportioning deductions, it may be that for the taxable year there is no gross income in the statutory grouping or that deductions will exceed the amount of gross income in the statutory grouping. See paragraph (d)(1) of this section with respect to cases in which deductions exceed gross income. In determining the method of apportionment for a specific deduction, examples of bases and factors which should be considered include, but are not limited to—

- (i) Comparison of units sold,
- (ii) Comparison of the amount of gross sales or receipts,
- (iii) Comparison of costs of goods sold,
- (iv) Comparison of profit contribution,
- (v) Comparison of expenses incurred, assets used, salaries paid, space utilized, and time spent which are attributable to the activities or properties giving rise to the class of gross income, and
- (iv) Comparison of the amount of gross income.

Paragraph (e) (2) through (8) of this section provides the applicable rules for allocation and apportionment of deductions for interest, research and development expenses, and certain other deductions. The effects on tax liability of the apportionment of deductions and the burden of maintaining records not otherwise maintained and making computations not otherwise made shall be taken into consideration in determining whether a method of apportionment and its application are sufficiently precise. A method of apportionment described in this paragraph (c)(1) may not be used when it does not reflect, to a reasonably close extent, the

factual relationship between the deduction and the groupings of income. Furthermore, certain methods of apportionment described in this paragraph (c)(1) may not be used in connection with any deduction for which another method is prescribed. The principles set forth above are applicable in apportioning both deductions definitely related to a class which constitutes less than all of the taxpayer's gross income and to deductions related to all of the taxpayer's gross income. If a deduction is not related to any class of gross income, it must be apportioned ratably as provided in paragraph (c)(3) of this section.

(2) *Apportionment based on assets.* Certain taxpayers are required by paragraph (e)(2) of this section and § 1.861-9T to apportion interest expense on the basis of assets. A taxpayer may apportion other deductions based on the comparative value of assets that generate income within each grouping, provided that such method reflects the factual relationship between the deduction and the groupings of income and is applied in accordance with the rules of § 1.861-9T(g). In general, such apportionments must be made either on the basis of the tax book value of those assets or on their fair market value. However, once the taxpayer uses fair market value, the taxpayer and all related persons must continue to use such method unless expressly authorized by the Commissioner to change methods. For purposes of this paragraph (c)(2) the term *related persons* means two or more persons in a relationship described in section 267(b). In determining whether two or more corporations are members of same controlled group under section 267(b)(3), a person is considered to own stock owned directly by such person, stock owned with the application of section 1563(e)(1), and stock owned by the application of section 267(c). In determining whether a corporation is related to a partnership under section 267(b)(10), a person is considered to own the partnership interest owned directly by such person and the partnership interest owned with the application of section 267(e)(3). In the case of any corporate taxpayer that—

- (i) Uses tax book value, and

- (ii) Owns directly or indirectly (within the meaning of § 1.861-11T(b)(2)(ii)) 10 percent or more of the total combined voting power of all classes of stock entitled to vote in any other corporation (domestic or foreign) that is not a member of the affiliated group (as defined in section 864(e)(5)), such taxpayer shall adjust its basis in that stock in the manner described in § 1.861-11T(b).

(3) [Reserved]

(d) *Excess of deductions and excluded and eliminated items of income.* (1) [Reserved]

(2) *Allocation and apportionment to exempt, excluded or eliminated income—(i) In general.* In the case of taxable years beginning after December 31, 1986, except to the extent otherwise permitted by § 1.861-13T, the following rules shall apply to take account of income that is exempt or excluded, or assets generating such income, with respect to allocation and apportionment of deductions.

(A) *Allocation of deductions.* In allocating deductions that are definitely related to one or more classes of gross income, exempt income (as defined in paragraph (d)(2)(ii) of this section) shall be taken into account.

(B) *Apportionment of deductions.* In apportioning deductions that are definitely related either to a class of gross income consisting of multiple groupings of income (whether statutory or residual) or to all gross income, exempt income and exempt assets (as defined in paragraph (d)(2)(ii) of this section) shall not be taken into account.

For purposes of apportioning deductions which are not taken into account under § 1.1502-13 in determining gain or loss from intercompany transactions, as defined in § 1.1502-13, income from such transactions shall be taken into account in the year such income is ultimately included in gross income.

(ii) *Exempt income and exempt asset defined—(A) In general.* For purposes of this section, the term *exempt income* means any income that is, in whole or in part, exempt, excluded, or eliminated for federal income tax purposes. The term *exempt asset* means any asset the income from which is, in whole or

in part, exempt, excluded, or eliminated for federal tax purposes.

(B) *Certain stock and dividends.* The term “exempt income” includes the portion of the dividends that are deductible under—

(1) Section 243(a) (1) or (2) (relating to the dividends received deduction),

(2) Section 245(a) (relating to the dividends received deduction for dividends from certain foreign corporations).

Thus, for purposes of apportioning deductions using a gross income method, gross income would not include a dividend to the extent that it gives rise to a dividend received deduction under either section 243(a)(1), section 243(a)(2), or section 245(a). In the case of a life insurance company taxable under section 801, the amount of such stock that is treated as tax exempt shall not be reduced because a portion of the dividends received deduction is disallowed as attributable to the policyholder’s share of such dividends. See § 1.861-14T(h) for a special rule concerning the allocation of reserve expenses of a life insurance company. In addition, for purposes of apportioning deductions using an asset method, assets would not include that portion of stock equal to the portion of dividends paid thereon that would be deductible under either section 243(a)(1), section 243(a)(2), or section 245(a). In the case of stock which generates, has generated, or can reasonably be expected to generate qualifying dividends deductible under section 243(a)(3), such stock shall not constitute a tax exempt asset. Such stock and the dividends thereon will, however, be eliminated from consideration in the apportionment of interest expense under the consolidation rule set forth in § 1.861-10T(c), and in the apportionment of other expenses under the consolidation rules set forth in § 1.861-14T.

(iii) *Income that is not considered tax exempt.* The following items are not considered to be exempt, eliminated, or excluded income and, thus, may have expenses, losses, or other deductions allocated and apportioned to them:

(A) In the case of a foreign taxpayer (including a foreign sales corporation (FSC)) computing its effectively connected income, gross income (whether

domestic or foreign source) which is not effectively connected to the conduct of a United States trade or business;

(B) In computing the combined taxable income of a DISC or FSC and its related supplier, the gross income of a DISC or a FSC;

(C) For all purposes under subchapter N of the Code, including the computation of combined taxable income of a possessions corporation and its affiliates under section 936(h), the gross income of a possessions corporation for which a credit is allowed under section 936(a); and

(D) Foreign earned income as defined in section 911 and the regulations thereunder (however, the rules of § 1.911-6 do not require the allocation and apportionment of certain deductions, including home mortgage interest, to foreign earned income for purposes of determining the deductions disallowed under section 911(d)(6)).

(iv) *Prior years.* For expense allocation and apportionment rules applicable to taxable years beginning before January 1, 1987, and for later years to the extent permitted by § 1.861-13T, see § 1.861-8(d)(2) (Revised as of April 1, 1986).

(e) *Allocation and apportionment of certain deductions.* (1) [Reserved]. For further guidance, see § 1.861-8(e)(1).

(2) *Interest.* The rules concerning the allocation and apportionment of interest expense and certain interest equivalents are set forth in §§ 1.861-9T through § 1.861-13T.

(3) through (f)(1)(i) [Reserved] For further guidance, see § 1.861-8(e)(3) through (f)(1)(i).

(ii) *Separate limitations to the foreign tax credit.* Section 904(d)(1) requires that the foreign tax credit limitation be determined separately in the case of the types of income specified therein. Accordingly, the income within each separate limitation category constitutes a statutory grouping of income and all other income not within that separate limitation category (whether domestic or within a different separate limitation category) constitutes the residual groups.

(f)(1)(iii) through (g) *Examples 1 through 23* [Reserved] For further guidance, see § 1.861-8(f)(1)(iii) through (g) *Examples 1 through 23*.

Example 24. Exempt, excluded, or eliminated income. (i) *Income method*—(A) *Facts.* X, a domestic corporation organized on January 1, 1987, is engaged in a number of businesses worldwide. X owns a 25-percent voting interest in each of five corporations engaged in the business A, two of which are domestic and three of which are foreign. X incurs stewardship expenses in connection with these five stock investments in the amount of \$100. X apportions its stewardship expenses using a gross income method. Each of the five companies pays a dividend in the amount of \$100. X is entitled to claim the 80-percent dividends received deduction on dividends paid by the two domestic companies. Because tax exempt income is considered in the allocation of deductions, X's \$100 stewardship expense is allocated to the class of income consisting of dividends from business A companies. However, because tax exempt income is not considered in the apportionment of deductions within a class of gross income, the gross income of the two domestic companies must be reduced to reflect the availability of the dividends received deduction. Thus, for purposes of apportionment, the gross income paid by the three foreign companies is considered to be \$100 each, while the gross income paid by the domestic companies is considered to be \$20 each. Accordingly, X has total gross income from business A companies, for purposes of apportionment, of \$340. As a result, \$29.41 of X's stewardship expense is apportioned to each of the foreign companies and \$5.88 of X's stewardship expense is apportioned to each of the domestic companies.

(ii) *Asset method*—(A) *Facts.* X, a domestic corporation organized on January 1, 1987, carries on a trade or business in the United States. X has deductible interest expense incurred in 1987 of \$60,000. X owns all the stock of Y, a foreign corporation. X also owns 49 percent of the voting stock of Z, a domestic corporation. Neither Y nor Z has retained earnings and profits at the end of 1987. X apportions its interest expense on the basis of the fair market value of its assets. X has assets worth \$1,500,000 that generate domestic source income, among which are tax exempt municipal bonds worth \$100,000, and the stock of Z, which has a value of \$500,000. The Y stock owned by X has a fair market value of \$2,000,000 and generates solely foreign source general limitation income.

(B) *Allocation.* No portion of X's interest expense is directly allocable solely to identified property within the meaning of § 1.861-10T. Thus, X's deduction for interest is definitely related to all its gross income as a class.

(C) *Apportionment.* For purposes of apportioning expenses, assets that generate exempt, eliminated, or excluded income are not taken into account. Because X's municipal bonds are tax exempt, they are not taken into account in apportioning interest expense. Since X is entitled to claim under section 243 to 80-percent dividends received deduction with respect to the dividend it received from Z, 80 percent of the value of that stock is not taken into account as an asset for purposes of apportionment under the asset method. X apportions its interest deduction between the statutory grouping of foreign source general limitation income and the residual grouping of domestic source income as follows:

To foreign source general limitation income:

$$\text{Interest expense} \times \frac{\text{General limitation assets that are not tax exempt}}{\text{Worldwide assets that are not tax exempt}}$$

$$\$60,000 \times \frac{\$2,000,000}{(\$100,000 + \$900,000 + \$2,000,000)} = \$40,000$$

Nonexempt foreign assets

20 percent of Z stock value + Nonexempt domestic assets + Nonexempt foreign assets

To domestic source income:

$$\text{Interest expense} \times \frac{\text{Domestic assets that are not tax exempt}}{\text{Worldwide assets that are not tax exempt}}$$

$$\$60,000 \times \frac{\$100,000 + \$900,000}{(\$100,000 + \$900,000 + \$2,000,000)} = \$20,000$$

20 percent of Z stock value + nonexempt domestic assets

20 percent of Z stock value + Nonexempt domestic assets + Nonexempt foreign assets

Examples 25-29. [Reserved]

Example 30. [Reserved] For further guidance, see § 1.861-8(g) *Example 30*.

(h) *Effective/applicability date.* (1) Paragraphs (f)(1)(vi)(E), (f)(1)(vi)(F), and (f)(1)(vi)(G) of this section apply to taxable years ending after April 9, 2008.

(2) Paragraph (e)(4), the last sentence of paragraph (f)(4)(i), and paragraph (g), *Examples 17, 18, and 30* of this section apply to taxable years beginning after July 31, 2009.

(3) Also, see paragraph (e)(12)(iv) of this section and 1.861-14(e)(6) for rules concerning the allocation and apportionment of deductions for charitable contributions.

[T.D. 8228, 53 FR 35474, Sept. 14, 1988]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.861-8T, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

EDITORIAL NOTE: At 71 FR 76903, Dec. 22, 2006, § 1.861-8T was amended as follows:

2. Paragraph (g), paragraph (i) following *Example 30*. (i)(C) is redesignated as paragraph (ii) and the paragraph designation for *Example 30*. (i)(C) is removed. However, the amendment could not be incorporated because of inaccurate amendatory instructions.

§ 1.861-9 Allocation and apportionment of interest expense.

(a) through (e)(1) [Reserved]. For further guidance, see § 1.861-9T(a) through (e)(1).

(2) *Corporate partners whose interest in the partnership is 10 percent or more.* A corporate partner shall apportion its interest expense, including the partner's distributive share of partnership interest expense, by reference to the partner's assets, including the partner's pro rata share of partnership assets, under the rules of paragraph (f) of this section if the corporate partner's direct and indirect interest in the partnership (as determined under the attribution rules of section 318) is 10 percent or more. A corporation using the tax book value method or alternative tax book value method of apportionment shall use the partnership's inside basis in its assets, including adjustments under sections 734(b) and 743(b), if any, and adjusted to the extent required under § 1.861-10T(d)(2). A corporation using the fair market value method of apportionment shall use the fair market value of the partnership's assets, adjusted to the extent required under § 1.861-10T(d)(2).

(3) *Individual partners who are general partners or who are limited partners with an interest in the partnership of 10 percent or more.* An individual partner is subject to the rules of this paragraph (e)(3) if either the individual is a general partner or the individual's direct and indirect interest (as determined under the attribution rules of section 318) in the partnership is 10 percent or more. The individual shall first classify his or her distributive share of partnership interest expense as interest incurred in the active conduct of a trade or business, as passive activity interest, or as investment interest under regulations issued under sections 163 and 469. The individual must then apportion his or her interest expense, including the partner's distributive share of partnership interest expense, under the rules of paragraph (d) of this section. Each such individual partner shall take into account his or her distributive share of the partnership gross income or pro rata share of the partnership assets in applying such rules. An individual using the tax book value or alternative tax book value method of apportionment shall use the partnership's inside basis in its assets, including adjustments under sections 734(b) and 743(b), if any, and adjusted to the extent required under § 1.861-10T(d)(2). An individual using the fair market value method of apportionment shall use the fair market value of the partnership's assets, adjusted to the extent required under § 1.861-10(d)(2).

(e)(4) through (f)(3)(i) [Reserved]. For further guidance, see § 1.861-9T(e)(4) through (f)(3)(i).

(f)(3)(ii) *Manner of election.* The election shall be made by filing the statement and providing the written notice described in § 1.964-1(c)(3)(ii) and (iii), respectively, at the time and in the manner described therein. For further guidance, see § 1.861-9T(f)(3)(ii).

(f)(3)(iii) and (iv) [Reserved] For further guidance, see § 1.861-9T(f)(3)(iii) and (iv).

(4) *Noncontrolled section 902 corporations—(i) In general.* For purposes of computing earnings and profits of a noncontrolled section 902 corporation (as defined in section 904(d)(2)(E)) for Federal tax purposes, the interest expense of a noncontrolled section 902

corporation may be apportioned using either the asset method described in § 1.861-9T(g) or the modified gross income method described in § 1.861-9T(j). A noncontrolled section 902 corporation that is not a controlled foreign corporation may elect to use a different method of apportionment than that elected by one or more of its shareholders. A noncontrolled section 902 corporation must use the same method of apportionment with respect to all its domestic corporate shareholders.

(ii) *Manner of election.* The election to use the asset method described in § 1.861-9T(g) or the modified gross income method described in § 1.861-9T(j) may be made either by the noncontrolled section 902 corporation or by the majority domestic corporate shareholders (as defined in § 1.964-1(c)(5)(ii)) on behalf of the noncontrolled section 902 corporation. The election shall be made by filing the statement and providing the written notice described in § 1.964-1(c)(3)(ii) and (iii), respectively, at the time and in the manner described therein. For further guidance, see § 1.861-9T(f)(4)(ii).

(iii) *Stock characterization.* In general, the stock of a noncontrolled section 902 corporation shall be characterized in the hands of any domestic corporation that meets the ownership requirements of section 902(a) with respect to the noncontrolled section 902 corporation, or in the hands of any member of the same qualified group as defined in section 902(b)(2), using the same method that the noncontrolled section 902 corporation uses to apportion its interest expense. Stock in a noncontrolled section 902 corporation shall be characterized as a passive category asset in the hands of any such shareholder that fails to meet the substantiation requirements of § 1.904-5(c)(4)(iii), or in the hands of any shareholder that is not eligible to compute an amount of foreign taxes deemed paid with respect to a dividend from the noncontrolled section 902 corporation for the taxable year. See § 1.861-12(c)(4).

(f)(5) through (h)(3) [Reserved]. For further guidance, see § 1.861-9T(f)(5) through (h)(3).

(h)(4) *Valuing related party debt and stock in related persons—(i) Related party*

debt. For purposes of this section, the value of a debt obligation of a related person held by the taxpayer or another person related to the taxpayer equals the amount of the liability of the obligor related person.

(ii) *Stock in related persons.* The value of stock in a related person held by the taxpayer or by another person related to the taxpayer equals the sum of the following amounts reduced by the taxpayer's pro rata share of liabilities of such related person:

(A) The portion of the value of intangible assets of the taxpayer and related persons that is apportioned to such related person under § 1.861-9T(h)(2);

(B) The taxpayer's pro rata share of tangible assets held by the related person (as determined under § 1.861-9T(h)(1)(ii));

(C) The taxpayer's pro rata share of debt obligations of any related person held by the related person (as valued under paragraph (h)(4)(i) of this section); and

(D) The total value of stock in all related persons held by the related person as determined under this paragraph (h)(4).

(iii) *Example.(A)Facts.* USP, a domestic corporation, wholly owns CFC1 and owns 80% of CFC2, both foreign corporations. The aggregate trading value of USP's stock traded on established securities markets at the end of Year 1 is \$700 and the amount of USP's liabilities to unrelated persons at the end of Year 1 is \$400. Neither CFC1 nor CFC2 has liabilities to unrelated persons at the end of Year 1. USP owns plant and equipment valued at \$500, CFC1 owns plant and equipment valued at \$400, and CFC2 owns plant and equipment valued at \$250. The value of these assets has been determined using generally accepted valuation techniques, as required by § 1.861-9T(h)(1)(ii). There is an outstanding loan from CFC2 to CFC1 in an amount of \$100. There is also an outstanding loan from USP to CFC1 in an amount of \$200.

(B) *Valuation of group assets.* Pursuant to § 1.861-9T(h)(1)(i), the aggregate value of USP's assets is \$1100 (the \$700 trading value of USP's stock increased by \$400 of USP's liabilities to unrelated persons).

(C) *Valuation of tangible assets.* Pursuant to § 1.861-9T(h)(1)(ii), the value of USP's tangible assets and pro rata share of assets held by CFC1 and CFC2 is \$1100 (the plant and equipment held directly by USP, valued at \$500, plus USP's 100% pro rata share of the plant and equipment held by CFC1 valued at \$400 and USP's 80% pro rata share of the plant and equipment held by CFC2 valued at \$200 (80% of \$250)).

(D) *Computation of intangible asset value.* Pursuant to § 1.861-9T(h)(1)(iii), the value of the intangible assets of USP, CFC1, and CFC2 is \$0 (total aggregate group asset value (\$1100) determined in paragraph (B) less total tangible asset value (\$1100) determined in paragraph (C)). Because the intangible asset value is zero, the provisions of § 1.861-9T(h)(2) and (3) relating to the apportionment and characterization of intangible assets do not apply.

(E) *Valuing related party debt obligations.* Pursuant to § 1.861-9(h)(4)(i), the value of the debt obligation of CFC1 held by CFC2 is equal to the amount of the liability, \$100. The value of the debt obligation of CFC1 held by USP is equal to the amount of the liability, \$200.

(F) *Valuing the stock of CFC1 and CFC2.* Pursuant to § 1.861-9(h)(4)(ii), the value of the stock of CFC2 held by USP is \$280 (USP's 80% pro rata share of tangible assets of CFC2 included in paragraph (C) (\$200) plus USP's 80% pro rata share of the debt obligation of CFC1 held by CFC2 valued in paragraph (E) (\$80). The value of the stock of CFC1 held by USP is \$100 (USP's 100% pro rata share of tangible assets of CFC1 included in paragraph (C) (\$400) less USP's 100% pro rata share of the liabilities of CFC1 to USP and CFC2 (\$300)).

(h)(5) *Characterizing stock in related persons—(i) General rule.* Stock in a related person held by the taxpayer or by another related person shall be characterized on the basis of the fair market value of the taxpayer's pro rata share of assets held by the related person attributed to each statutory grouping and the residual grouping under the stock characterization rules of § 1.861-12T(c)(3)(ii), except that the portion of the value of intangible assets of the taxpayer and related persons that is

apportioned to the related person under § 1.861-9T(h)(2) shall be characterized on the basis of the net income before interest expense of the related person within each statutory grouping or residual grouping (excluding income that is passive under § 1.904-4(b)).

(ii) *Special rule for section 936 corporations regarding alternative minimum tax.* For purposes of characterizing stock in a related section 936 corporation in determining foreign source alternative minimum taxable income within each separate category and the alternative minimum tax foreign tax credit pursuant to section 59(a), the rules of § 1.861-9T(g)(3) shall apply and § 1.861-9(h)(5)(i) shall not apply. Thus, for taxable years beginning after December 31, 1989, and before January 1, 1994, stock in a related section 936 corporation is characterized for alternative minimum tax purposes as a foreign source passive asset because the stock produces foreign source passive dividend income under sections 861(a)(2)(A), 862(a)(2), and 904(d)(2)(A) and the regulations under those sections. For taxable years beginning after December 31, 1993, stock in a related section 936 corporation would be characterized for alternative minimum tax purposes as an asset subject to the separate limitation for section 936 corporation dividends because the stock produces foreign source dividend income that, for alternative minimum tax purposes, is subject to a separate foreign tax credit limitation under section 56(g)(4)(C)(iii)(IV). However, stock in a section 936 corporation is characterized as a U.S. source asset to the extent required by section 904(g). For the definition of the term *section 936 corporation*, see § 1.861-11(d)(2)(ii).

(6) [Reserved]. For further guidance, see § 1.861-9T(h)(6).

(i) *Alternative tax book value method—(1) Alternative value for certain tangible property.* A taxpayer may elect to determine the tax book value of its tangible property that is depreciated under section 168 (section 168 property) using the rules provided in this paragraph (i)(1) (the alternative tax book value method). The alternative tax book value method applies solely for purposes of apportioning expenses (including the calculation of the alter-

native minimum tax foreign tax credit pursuant to section 59(a)) under the asset method described in paragraph (g) of this section.

(i) The tax book value of section 168 property placed in service during or after the first taxable year to which the election to use the alternative tax book value method applies shall be determined as though such property were subject to the alternative depreciation system set forth in section 168(g) (or a successor provision) for the entire period that such property has been in service.

(ii) In the case of section 168 property placed in service prior to the first taxable year to which the election to use the alternative tax book value method applies, the tax book value of such property shall be determined under the depreciation method, convention, and recovery period provided for under section 168(g) for the first taxable year to which the election applies.

(iii) If a taxpayer revokes an election to use the alternative tax book value method (the prior election) and later makes another election to use the alternative tax book value method (the subsequent election) that is effective for a taxable year that begins within 3 years of the end of the last taxable year to which the prior election applied, the taxpayer shall determine the tax book value of its section 168 property as though the prior election has remained in effect.

(iv) The tax book value of section 168 property shall be determined without regard to the election to expense certain depreciable assets under section 179.

(v) *Examples.* The provisions of this paragraph (i)(1) are illustrated in the following examples:

Example 1. In 2000, a taxpayer purchases and places in service section 168 property used solely in the United States. In 2005, the taxpayer elects to use the alternative tax book value method, effective for the current taxable year. For purposes of determining the tax book value of its section 168 property, the taxpayer's depreciation deduction is determined by applying the method, convention, and recovery period rules of the alternative depreciation system under section 168(g)(2) as in effect in 2005 to the taxpayer's original cost basis in such property. In 2006, the taxpayer acquires and places in service

in the United States new section 168 property. The tax book value of this section 168 property is determined under the rules of section 168(g)(2) applicable to property placed in service in 2006.

Example 2. Assume the same facts as in *Example 1*, except that the taxpayer revokes the alternative tax book value method election effective for taxable year 2010. Additionally, in 2011, the taxpayer acquires new section 168 property and places it in service in the United States. If the taxpayer elects to use the alternative tax book value method effective for taxable year 2012, the taxpayer must determine the tax book value of its section 168 property as though the prior election still applied. Thus, the tax book value of property placed in service prior to 2005 would be determined by applying the method, convention, and recovery period rules of the alternative depreciation system under section 168(g)(2) applicable to property placed in service in 2005. The tax book value of section 168 property placed in service during any taxable year after 2004 would be determined by applying the method, convention, and recovery period rules of the alternative depreciation system under section 168(g)(2) applicable to property placed in service in such taxable year.

(2) *Timing and scope of election.* (i) Except as provided in this paragraph (i)(2), a taxpayer may elect to use the alternative tax book value method with respect to any taxable year beginning on or after March 26, 2004. However, pursuant to § 1.861-8T(c)(2), a taxpayer that has elected the fair market value method must obtain the consent of the Commissioner prior to electing the alternative tax book value method. Any election made pursuant to this paragraph (i)(2) shall apply to all members of an affiliated group of corporations as defined in §§ 1.861-11(d) and 1.861-11T(d). Any election made pursuant to this paragraph (i)(2) shall apply to all subsequent taxable years of the taxpayer unless revoked by the taxpayer. Revocation of such an election, other than in conjunction with an election to use the fair market value method, for a taxable year prior to the sixth taxable year for which the election applies requires the consent of the Commissioner.

(ii) *Example.* The provisions of this paragraph (i)(2) are illustrated in the following example:

Example. Corporation X, a calendar year taxpayer, elects on its original, timely filed tax return for the taxable year ending De-

cember 31, 2007, to use the alternative tax book value method for its 2007 year. The alternative tax book value method applies to Corporation X's 2007 year and all subsequent taxable years. Corporation X may not, without the consent of the Commissioner, revoke its election and determine tax book value using a method other than the alternative tax book value method with respect to any taxable year beginning before January 1, 2012. However, Corporation X may automatically elect to change from the alternative tax book value method to the fair market value method for any open year.

(3) *Certain other adjustments.* [Reserved]

(j) [Reserved]. For further guidance, see § 1.861-9T(j).

(k) *Effective/applicability date.* Paragraph (h)(5) of this section applies to taxable years beginning after December 31, 1989. Paragraph (i) of this section applies to taxable years beginning on or after March 26, 2004. Paragraphs (f)(3)(ii) and (4) of this section apply to taxable years of shareholders ending on or after April 20, 2009. See 26 CFR 1.861-9T(f)(3)(ii)(last sentence) and (4) (revised as of April 1, 2009) for rules applicable to taxable years of shareholders ending after the first day of the first taxable year of the noncontrolled section 902 corporation beginning after December 31, 2002, and ending before April 20, 2009. Paragraphs (e)(2), (e)(3) and (h)(4) apply to taxable years beginning on or after *July 16, 2014*. See 26 CFR 1.861-9T(e)(2) and (3) (revised as of April 1, 2014) for rules applicable to taxable years beginning after January 17, 2012, and before *July 16, 2014*. See 26 CFR 1.861-9T(e)(2) and (3) (revised as of April 1, 2011) for rules applicable to taxable years beginning on or before January 17, 2012. See 26 CFR 1.861-9T(h)(4) (revised as of April 1, 2014) for rules applicable to taxable years ending on or after January 17, 2012, and beginning before *July 16, 2014*. See 26 CFR 1.861-9T(h)(4) (revised as of April 1, 2011) for rules applicable to taxable years ending before January 17, 2012.

[T.D. 8916, 66 FR 272, Jan. 3, 2001, as amended by T.D. 9120, 69 FR 15675, Mar. 26, 2004; T.D. 9247, 71 FR 4814, Jan. 30, 2006; T.D. 9452, 74 FR 27873, June 11, 2009; T.D. 9456, 74 FR 46346, Sept. 9, 2009; T.D. 9676, 79 FR 41425, July 16, 2014; T.D. 9676, 79 FR 49683, Aug. 22, 2014]

§ 1.861-9T

26 CFR Ch. I (4-1-15 Edition)

§ 1.861-9T Allocation and apportionment of interest expense (temporary).

(a) *In general.* Any expense that is deductible under section 163 (including original issue discount) constitutes interest expense for purposes of this section, as well as for purposes of §§ 1.861-10T, 1.861-11T, 1.861-12T, and 1.861-13T. The term interest refers to the gross amount of interest expense incurred by a taxpayer in a given tax year. The method of allocation and apportionment for interest set forth in this section is based on the approach that, in general, money is fungible and that interest expense is attributable to all activities and property regardless of any specific purpose for incurring an obligation on which interest is paid. Exceptions to the fungibility rule are set forth in § 1.861-10T. The fungibility approach recognizes that all activities and property require funds and that management has a great deal of flexibility as to the source and use of funds. When borrowing will generally free other funds for other purposes, and it is reasonable under this approach to attribute part of the cost of borrowing to such other purposes. Consistent with the principles of fungibility, except as otherwise provided, the aggregate of deductions for interest in all cases shall be considered related to all income producing activities and assets of the taxpayer and, thus, allocable to all the gross income which the assets of the taxpayer generate, have generated, or could reasonably have been expected to generate. In the case of the interest expense of members of an affiliated group, interest expense shall be considered to be allocable to all gross income of the members of the group under § 1.861-11T. That section requires the members of an affiliated group to allocate and apportion the interest expense of each member of the group as if all members of such group were a single corporation. For the method of determining the interest deduction allowed to foreign corporations under section 882(c), see § 1.882-5.

(b) *Interest equivalents*—(1) *Certain expenses and losses*—(i) *General rule.* Any expense or loss (to the extent deductible) incurred in a transaction or series of integrated or related transactions in

which the taxpayer secures the use of funds for a period of time shall be subject to allocation and apportionment under the rules of this section if such expense or loss is substantially incurred in consideration of the time value of money. However, the allocation and apportionment of a loss under this paragraph (b) shall not affect the characterization of such loss as capital or ordinary for other purposes of the Code and the regulations thereunder.

(ii) *Examples.* The rule of this paragraph (b)(1) may be illustrated by the following examples.

Example 1. W, a domestic corporation, borrows from X two ounces of gold at a time when the spot price for gold is \$500 per ounce. W agrees to return the two ounces of gold in six months. W sells the two ounces of gold to Y for \$1000. W then enters into a contract with Z to purchase two ounces of gold six months in the future for \$1,050. In exchange for the use of \$1,000 in cash, W has sustained a loss of \$50 on related transactions. This loss is subject to allocation and apportionment under the rules of this section in the same manner as interest expense.

Example 2. X, a domestic corporation with a dollar functional currency, borrows 100 pounds on January 1, 1987 for a three-year term at an interest rate greater than the applicable federal rate for dollar loans. At this time, the interest rate on the pound was approximately equal to the interest rate on dollar borrowings and the forward price on the pound, vis-a-vis the dollar, was approximately equal to the spot price. On January 1, 1987, X converted 100 pounds into dollars and entered into a currency swap that substantially hedged X's foreign currency exposure on the pound borrowing, both with respect to interest and principal. The borrowing, coupled with the swap, represents a series of related transactions in which the taxpayer secures the use of funds in its functional currency. Any net foreign currency loss on this series of transactions constitutes a loss incurred substantially in consideration of the time value of money and shall be apportioned in the same manner as interest expense. Thus, if the pound depreciates against the dollar, such that when the first payment on the pound borrowing is due the taxpayer has a currency loss on the swap payment hedging its first interest payment, such loss shall, even if the transaction is not integrated under section 988(d), be allocated and apportioned in the same manner as interest expense under the authority of this paragraph (b)(1).

Example 3. On January 1, 1987, X, a domestic corporation with a dollar functional currency, enters into a dollar interest rate swap

contract with Y, a domestic counterparty. Under the terms of this agreement, X agrees to pay Y floating rate interest with respect to a notional principal amount of \$100 for five years. In return, Y agrees to pay X fixed rate interest at 10 percent with respect to a notional principal amount of \$100 for five years. On the same day, Y prepays the fixed leg of the swap by making a lump sum payment of \$37 to X. This lump sum payment represents the present value of five \$10 swap payments. Because X secures the use of \$37 in this transaction, any net swap expense arising from the transaction represents an expense incurred substantially in consideration of the time value of money. Assuming this lump sum payment is not otherwise characterized as a loan from Y to X, and that X must amortize the \$37 lump sum payment under the principles of Notice 89-21, any net swap expense incurred by X with respect to this transaction (*i.e.*, the excess, if any, of X's annual swap payment to Y over the annual amortization of the \$37 lump sum payment that is taken into income by X) represents an expense equivalent to interest expense. The result would be the same if X sold the fixed leg to a third party for \$37. While this example presents the case of a lump sum payment, the rules of paragraph (b)(1) would also apply to any transaction in which the swap payments are not substantially contemporaneous if the pricing of the transaction is materially affected by the time value of money. Thus, expenses and losses will be subject to apportionment under the rules of this section to the extent that such expenses or losses were incurred in consideration of the time value of money.

(2) *Certain foreign currency borrowings*—(i) *Rule*. If a taxpayer borrows in a nonfunctional currency at a rate of interest that is less than the applicable federal rate (or its equivalent in functional currency if the functional currency is not the dollar), any swap, forward, future, option, or similar financial arrangement (or any combination thereof) entered into by the taxpayer or by a related person (as defined in § 1.861-8T(c)(2)) that exists during the term of the borrowing and that substantially diminishes currency risk with respect to the borrowing or interest expense thereon will be presumed to constitute a hedge of such borrowing, unless the taxpayer can demonstrate on the basis of facts and circumstances that the two transactions are in fact unrelated. Under this presumption, the currency loss incurred on the borrowing during taxable years beginning after December 31, 1988, in

connection with hedged nonfunctional currency borrowings, reduced or increased by the gain or loss on the hedge, will be apportioned in the same manner as interest expense. This presumption can be rebutted by a showing that the financial arrangement was entered into in connection with hedging currency exposure arising in the ordinary course of a trade or business (other than with respect to the borrowing).

(ii) *Examples*. The principles of this paragraph (b)(2) may be illustrated by the following examples.

Example 1. Taxpayer has a dollar functional currency and does not have any qualified business units with a functional currency other than the dollar. On January 1, 1989, when the unit of foreign currency is worth \$1, taxpayer borrows 100 units of foreign currency for a three-year period bearing interest at the annual rate of 3 percent and immediately converts the proceeds of the borrowing into dollars for use in its business. In the ordinary course of its business, taxpayer has no foreign currency exposure in this currency. In March 1989, taxpayer enters into a three-year swap agreement that covers most, but not all, of the payment of interest and principal. Because the swap substantially diminishes currency risk with respect to the borrowing, it is presumed to hedge the loan. Since taxpayer cannot demonstrate that it was hedging currency exposure arising in the ordinary course of its business (other than currency exposure with respect to the borrowing), the net currency loss on the borrowing adjusted for any gain or loss on the swap must be apportioned in the same manner as interest expense.

Example 2. Assume the same facts as in Example 1, except that the taxpayer borrows in two separate foreign currencies on terms described in Example 1 and enters into a swap agreement in a single currency that substantially diminishes the taxpayer's aggregate foreign currency risk. The net currency loss on the borrowings adjusted for any gain or loss on the swap must be apportioned in the same manner as interest expense.

(3) *Losses on sale of certain receivables*—(1) *General rule*. Any loss on the sale of a trade receivable (as defined in § 1.954-2(h)) shall be allocated and apportioned, solely for purposes of this section and §§ 1.861-10T, 1.861-11T, 1.861-12T, and 1.861-13T, in the same manner as interest expense, unless at the time

of sale of the receivable, it bears interest at a rate which is at least 120 percent of the short term applicable federal rate (as determined under section 1274(d) of the Code), or its equivalent in foreign currency in the case of receivables denominated in foreign currency, determined at the time the receivable arises. This treatment shall not affect the characterization of such expense as interest for other purposes of the Internal Revenue Code.

(ii) *Exceptions.* To the extent that a loss on the sale of a trade receivable exceeds the discount on the receivable that would be computed applying to the amount received on the sale of the receivable 120 percent of the applicable federal rate (or its equivalent in foreign currency in the case of receivables denominated in foreign currency) for the period commencing with the date on which the receivable is sold and ending with the earlier of the date on which the receivable begins to bear interest at such rate or the anticipated payment date of the receivable, such excess shall not be allocated and apportioned in the same manner as interest expense but rather shall be allocated and apportioned to the gross income generated by the receivable. In cases of transfers of receivables to a domestic international sales corporation described § 1.994-1(c)(6)(v), the rule of this paragraph (b)(3) shall not apply for purposes of computing combined taxable income. In computing the combined taxable income of a foreign sales corporation and its related supplier, loss on the sale of receivables to a third party incurred either by the foreign sales corporation or its related supplier shall offset combined taxable income, notwithstanding the provisions of this paragraph (b)(3). See § 1.924(a)-1T(g)(7).

Example. On October 1, X sells a widget to Y for \$100 payable in 30 days, after which the receivable will bear stated interest at 13 percent. On October 4, X sells Y's obligation to Z for \$98. Assume that the applicable federal rate for the month of October is 10 percent. Applying 120 percent of the applicable federal rate to the \$98 received on the sale of the receivable, the obligation is discounted at a 12 percent rate for a period of 27 days. At this discount rate, the obligation would have sold for \$99.22. Thus, 88 cents of the \$2 loss on the sale is apportioned in the same manner as interest expense, and \$1.22 of the \$2 loss on

the sale is directly allocated to the income generated on the widget sale.

(4) *Rent in certain leasing transactions.*
[Reserved]

(5) *Treatment of bond premium—(i) Treatment by the issuer.* If a bond or other debt obligation is issued at a premium, an amount of interest expense incurred by the issuer on that bond or other debt obligation equal to the amortized portion of that premium that is included in gross income for the year shall be allocated and apportioned solely to the amortized portion of premium derived by the issuer for the year.

(ii) *Treatment by the holder.* If a bond or debt obligation is purchased at a premium, the portion of that premium amortized during the year by the holder under section 171 and the regulations thereunder shall be allocated and apportioned solely to interest income derived from the bond by the holder for the year.

(6) *Financial products that alter effective cost of borrowing—(i) In general.* Various derivative financial products can be part of transactions or series of transactions described in paragraph (b)(1) of this section. Such derivative financial products, including interest rate swaps, options, forwards, caps, and collars, potentially alter a taxpayer's effective cost of borrowing with respect to an actual liability of the taxpayer. For example, a taxpayer that is obligated to pay interest at a fixed rate may, in effect, pay interest at a floating rate by entering into an interest rate swap. Similarly, a taxpayer that is obligated to pay interest at a floating rate may, in effect, limit its exposure to rising interest rates by purchasing a cap. Such a taxpayer may have gains or losses associated with such derivative financial products. This paragraph (b)(6) provides rules for the treatment of gains and losses from such derivative financial products ("financial products") that are part of transactions described in paragraph (b)(1) of this section and that are used by the taxpayer to alter its effective cost of borrowing with respect to an actual liability. This paragraph (b)(6) shall only apply where the hedge and the borrowing are in the same currency and shall not apply to the extent otherwise

provided in section 988 and the regulations thereunder. The allocation and apportionment of a loss under this paragraph (b) shall not affect the characterization of such loss as capital or ordinary for other purposes of the Code and the regulations thereunder.

(ii) *Definition of gain and loss.* For purposes of this paragraph (b)(6), the term “gain” refers to the excess of the amounts properly taken into income under a financial product that alters the effective cost of borrowing over the amounts properly allowed as a deduction thereunder within a given taxable year. See, e.g., Notice 89-21. The term “loss” refers to the excess of the amounts properly allowed as a deduction under such a financial product over the amounts properly taken into income thereunder within a given taxable year.

(iii) *Treatment of gain or loss on the disposition of a financial product.* [Reserved]

(iv) *Entities that are not financial services entities.* An entity that does not constitute a financial services entity within the meaning of §1.904-4(e)(3) shall treat gains and losses on financial products described in paragraph (b)(6)(i) of this section as follows.

(A) *Losses.* Losses on any financial product described in paragraph (b)(6)(i) of this section shall be apportioned in the same manner as interest expense whether or not such financial product is identified by the taxpayer under paragraph (b)(6)(iv)(C) of this section as a liability hedge.

(B) *Gains.* Gains on any financial product described in paragraph (b)(6)(i) of this section shall reduce the taxpayer’s total interest expense that is subject to apportionment, but only if such financial product is identified by the taxpayer under paragraph (b)(6)(iv)(C) of this section as a liability hedge. Such reduction is accomplished by directly allocating interest expense to the income derived from such a financial product.

(C) *Identification of financial products.* A taxpayer can identify a financial product described in paragraph (b)(6)(i) of this section as hedging a particular interest-bearing liability (or any group of such liabilities) by clearly identifying on its books and records on the

same day that it becomes a party to such arrangement that such arrangement hedges a given liability (or group of liabilities). In the case of a partial hedge, such identification shall apply to only that part of the liability that is hedged. If the taxpayer clearly identifies on its books and records a financial product as a hedge of an interest-bearing asset (or any group of such assets), it will create a rebuttable presumption that such financial product is not described in paragraph (b)(6)(i) of this section. A taxpayer may identify a hedge as relating to an anticipated liability, provided that such liability is in fact incurred within 120 days following the date of such identification. Gains and losses on such an anticipatory arrangement accruing prior to the time at which the liability is incurred shall constitute an adjustment to interest expense.

(v) *Financial services entities.* [Reserved]

(vi) *Dealers.* The rule of paragraph (b)(6)(iv) of this section shall not apply to a person acting in its capacity as a regular dealer in the financial products described in paragraph (b)(6)(i) of this section. Instead, losses sustained by a regular dealer in connection with such financial products shall be allocated to the class of gross income from such arrangements. Gains of a regular dealer in notional principal contracts are governed by the rules of §1.863-7T(b). Amounts received or accrued by any person from any financial product that is integrated as specified in Notice 89-90 with an asset shall not be treated as amounts received or accrued by a person acting in its capacity as a regular dealer in financial products.

(vii) *Examples.* The principles of this paragraph (b)(6) may be illustrated by the following examples.

Example 1. X is not a financial services entity or regular dealer in the financial products described in paragraph (b)(6)(i) of this section and has a dollar functional currency. In 1990, X incurred a total of \$200 of interest expense. On January 1, 1990, X entered into an interest rate swap agreement with Y, in order to hedge its interest rate exposure with respect to a pre-existing floating rate liability. On the same day, X properly identified the agreement as a hedge of such liability. Under the agreement, X is required to pay Y an amount equal to a fixed rate of 10

percent on a notional principal amount of \$1,000. Y is required to pay X an amount equal to a floating rate of interest on the same notional principal amount. Under the agreement, X received from Y during 1990 a net payment of \$25. Because X identified the swap agreement as a liability hedge under the rules of paragraph (b)(6)(iv)(C), X may effectively reduce its total allocable interest expense for 1990 to \$175 by directly allocating \$25 of interest expense to the swap income. Had X not properly identified the swap as a liability hedge, this swap payment would have been treated as domestic source income in accordance with the rule of § 1.863-7T(b).

Example 2. Assume the same facts as Example (1), except that X did not properly identify the agreement as a liability hedge on January 1, 1990. In 1990, X made a net payment of \$25 to Y under the swap agreement. This swap payment is allocated and apportioned in the same manner as interest expense under the rules of paragraph (b)(6)(iv)(A).

(7) *Foreign currency gain or loss.* In addition to the rules of paragraph (b)(1), (b)(2), and (b)(6) of this section, any foreign currency loss that is treated as an adjustment to interest expense under regulations issued under section 988 shall be allocated and apportioned in the same manner as interest expense. Any foreign currency gain that is treated as an adjustment to interest expense under regulations issued under section 988 shall offset apportionable interest expense.

(c) *Allowable deductions.* In order for an interest expense to be allocated and apportioned, it must first be determined that the interest expense is currently deductible. A number of provisions in the Code disallow or suspend deductions of interest expense or require the capitalization thereof.

(1) *Disallowed deductions.* A taxpayer does not allocate and apportion interest expense under this section that is permanently disallowed as a deduction by operation of section 163(h), section 265, or any other provision or rule that permanently disallows the deduction of interest expense.

(2) *Section 263A.* Section 263A requires the capitalization of interest expense that is allocable to designated types of property. Any interest expense that is capitalized under section 263A does not constitute deductible interest expense for purposes of this section. Furthermore, interest expense capitalized in

inventory or depreciable property is not separately allocated and apportioned when the inventory is sold or depreciation is allowed. Capitalized interest expense is effectively allocated and apportioned as part of, and in the same manner as, the cost of goods sold, amortization, or depreciation deduction.

(3) *Section 163(d).* Section 163(d) suspends the deduction for interest expense to the extent that it exceeds net investment income. In the year that suspended investment interest expense becomes allowable under the rules of section 163(d), that interest expense is apportioned under rules set forth in paragraph (d)(1) of this section as though it were incurred in the taxable year in which the expense is deducted.

(4) *Section 469—(i) General rule.* Section 469 suspends the deduction of passive activity losses to the extent that they exceed passive activity income for the year. Passive activity losses may consist in part of interest expense properly allocable to passive activity. In the year that suspended interest expense becomes allowable as a deduction under the rules of section 469, that interest expense is apportioned under rules set forth in paragraph (d)(1) of this section as though it were incurred in the taxable year in which the expense is deducted.

(ii) *Identification of the interest component of a suspended passive loss.* A suspended passive loss may consist of a variety of items of expense other than interest expense. Suspended interest expense for any taxable year is computed by multiplying the total suspended passive loss for the year by a fraction, the numerator of which is passive interest expense for the year (determined under regulations issued under section 163) and the denominator of which is total passive expenses for the year. The amount of the suspended interest expense that is considered to be deductible in a subsequent taxable year is computed by multiplying the amount of any cumulative suspended interest expense (reduced by suspended interest expense allowed as a deduction in prior taxable years) times a fraction, the numerator of which is the portion of cumulative suspended passive losses that become deductible in the taxable

year and the denominator of which is the cumulative suspended passive losses for prior taxable years (reduced by suspended passive losses allowed as deductions in prior taxable years).

(iii) *Example.* The rules of this paragraph (c)(4) may be illustrated by the following example.

Example. On January 1, 1987, A, a United States citizen, invested in a passive activity. In 1987, the passive activity generated no passive income and \$100 in passive losses, all of which were suspended by operation of section 469. The suspended loss included \$10 of suspended interest expense. In 1988, the passive activity generated \$50 in passive income and \$150 in passive expenses which included \$30 of interest expense. The entire \$100 passive loss was suspended in 1988 and included \$20 of interest expense ($\$100 \text{ suspended passive loss} \times \$30 \text{ passive interest expense} / \$150 \text{ total passive expenses}$). Thus, at the end of 1988, A had total suspended passive losses of \$200, including \$30 of suspended interest expense. In 1989, the passive activity generated \$100 in passive income and no passive expenses. Thus, \$100 of A's cumulative suspended passive loss was therefore allowed in 1989. The \$100 of deductible passive loss includes \$15 of suspended interest expense ($\$30 \text{ cumulative suspended interest expense} \times \$100 \text{ of cumulative suspended passive losses allowable in 1989} / \$200 \text{ of total cumulative suspended passive losses}$). The \$15 of interest expense is apportioned under the rules of paragraph (d) of this section as though it were incurred in 1989.

(d) *Apportionment rules for individuals, estates, and certain trusts—(1) United States individuals.* In the case of taxable years beginning after December 31, 1986, individuals generally shall apportion interest expense under different rules according to the type of interest expense incurred. The interest expense of individuals shall be characterized under the regulations issued under section 163. However, in the case of an individual whose foreign source income (including income that is excluded under section 911) does not exceed a gross amount of \$5,000, the apportionment of interest expense under this section is not required. Such an individual's interest expense may be allocated entirely to domestic source income.

(i) *Interest incurred in the conduct of a trade or business.* An individual who incurs business interest described in section 163(h)(2)(A) shall apportion such

interest expense using an asset method by reference to the individual's business assets.

(ii) *Investment interest.* An individual who incurs investment interest described in section 163(h)(2)(B) shall apportion that interest expense on the basis of the individual's investment assets.

(iii) *Interest incurred in a passive activity.* An individual who incurs passive activity interest described in section 163(h)(2)(C) shall apportion that interest expense on the basis of the individual's passive activity assets. Individuals who receive a distributive share of interest expense incurred in a partnership are subject to special rules set forth in paragraph (e) of this section.

(iv) *Qualified residence and deductible personal interest.* Individuals who incur qualified residence interest described in section 163(h)(2)(D) shall apportion that interest expense under a gross income method, taking into account all income (including business, passive activity, and investment income) but excluding income that is exempt under section 911. For purposes of this section, any qualified residence that is rented shall be considered to be a business asset for the period in which it is rented, with the result that the interest on such a residence is not apportioned under this subdivision (iv) but instead under subdivisions (i) or (iii) of this paragraph (d)(1). To the extent that personal interest described in section 163(h)(2) remains deductible under transitional rules, individuals shall apportion such interest expense in the same manner as qualified residence interest.

(v) *Example.* The following example illustrates the principles of this section.

Example. (i) *Facts.* A is a resident individual taxpayer engaged in the active conduct of a trade or business, which A operates as a sole proprietor. A's business generates only domestic source income. A's investment portfolio consists of several less than 10 percent stock investments. Certain stocks in which A's adjusted basis is \$40,000 generate domestic source income and other stocks in which A's adjusted basis is \$60,000 generate foreign source passive income. In addition, A owns his personal residence, which is subject to a mortgage in the amount of \$100,000. All interest expense incurred with respect to A's

mortgage is qualified residence interest for purposes of section 163(h)(2)(D). A's other indebtedness consists of a bank loan in the amount of \$40,000. Under the regulations issued under section 163(h), it is determined that the proceeds of the \$40,000 loan were divided equally between A's business and his investment portfolio. In 1987, the gross income of A's business, before the apportionment of interest expense, was \$50,000. A's investment portfolio generated \$4,000 in domestic source income and \$6,000 in foreign source passive income. All of A's debt obligations bear interest at the annual rate of 10 percent.

(ii) *Analysis of business interest.* Under section 163(h) of the Code, \$2,000 of A's interest expense is attributable to his business. Under the rules of paragraph (d)(1)(i), such interest must be apportioned on the basis of the business assets. Applying the asset method described in paragraph (g) of this section, it is determined that all of A's business assets generate domestic income and, therefore, constitute domestic assets. Thus, the \$2,000 in interest expense on the business loan is allocable to domestic source income.

(iii) *Analysis of investment interest.* Under section 163(h) of the Code, \$2,000 of A's interest expense is investment interest. Under the rules of paragraph (d)(1)(ii) of this section, such interest must be apportioned on the basis of investment assets. Applying the asset method, A's investment assets consist of stock generating domestic source income with an adjusted basis of \$40,000 and stock generating foreign source passive income with an adjusted basis of \$60,000. Thus, 40 percent (\$800) of A's investment interest is apportioned to domestic source income and 60 percent (\$1,200) of A's investment interest is apportioned to foreign source passive income for purposes of section 904.

(iv) *Analysis of qualified residence interest.* The \$10,000 of qualified residence interest expense is apportioned under the rules of paragraph (d)(1)(iv) of this section on the basis of all of A's gross income. A's gross income consists of \$60,000, \$54,000 of which is domestic source and \$6,000 of which is foreign source passive income. Thus, \$9,000 of A's qualified residence interest is apportioned to domestic source income and \$1,000 of A's qualified residence interest is apportioned to foreign source passive income.

(2) *Nonresident aliens—(i) General rule.* For taxable years beginning on or after January 1, 1988, interest expense incurred by a nonresident alien shall be considered to be connected with income effectively connected with a United States trade or business only to the extent that interest expense is incurred with respect to liabilities that—

(A) Are entered on the books and records of the United States trade or business when incurred, or

(B) Are secured by assets that generate such effectively connected income.

(ii) *Limitations—(A) Maximum debt capitalization.* Interest expense incurred by a nonresident alien is not considered to be connected with effectively connected income to the extent that it is incurred with respect to liabilities that exceed 80 percent of the gross assets of the United States trade or business.

(B) *Collateralization by other assets.* Interest expense on indebtedness that is secured by specific assets (not including the general credit of the nonresident alien) other than the assets of the United States trade or business shall not be considered to be connected with effectively connected income.

(3) *Estates and trusts.* Estates shall be treated in the same manner as individuals. In the case of a trust that is beneficially owned by individuals and is a complex trust, the trust shall be treated in the same manner as individuals under the rules of paragraph (d) of this section, except that no de minimis amount shall apply. In the case of a trust that is beneficially owned by one or more corporations, the trust shall be treated either as a partnership or as a corporation depending on how the trust is characterized under the rules of section 7701 and the regulations thereunder.

(e) *Partnerships—(1) In general—aggregate rule.* A partner's distributive share of the interest expense of a partnership that is directly allocable under § 1.861-10T to income from specific partnership property shall be treated as directly allocable to the income generated by such partnership property. Subject to the exceptions set forth in paragraph (e)(4), a partner's distributive share of the interest expense of a partnership that is not directly allocable under § 1.861-10T generally is considered related to all income producing activities and assets of the partner and shall be subject to apportionment under the rules described in this paragraph. For purposes of this section, a

partner's percentage interest in a partnership shall be determined by reference to the partner's interest in partnership income for the year. Similarly, a partner's pro rata share of partnership assets shall be determined by reference to the partner's interest in partnership income for the year.

(e)(2) through (e)(3) [Reserved]. For further guidance see §1.861-9(e)(2) through (e)(3).

(4) *Less than 10 percent limited partners and less than 10 percent corporate general partners—entity rule—(i) Partnership interest expense.* A limited partner (whether individual or corporate) or corporate general partner whose direct and indirect interest (as determined under the attribution rules of section 318) in the partnership is less than 10 percent shall directly allocate its distributive share of partnership interest expense to its distributive share of partnership gross income. Under §1.904-7(i)(2) of the regulations, such a partner's distributive share of foreign source income of the partnership is treated as passive income (subject to the high taxed income exception of section 904(d)(2)(F)), except in the case of high withholding tax interest or income from a partnership interest held in the ordinary course of the partner's active trade or business, as defined in §1.904-7(i)(2). A partner's distributive share of partnership interest expense (other than partnership interest expense that is directly allocated to identified property under §1.861-10T) shall be apportioned in accordance with the partner's relative distributive share of gross foreign source income in each limitation category and of domestic source income from the partnership. To the extent that partnership interest expense is directly allocated under §1.861-10T, a comparable portion of the income to which such interest expense is allocated shall be disregarded in determining the partner's relative distributive share of gross foreign source income in each limitation category and domestic source income. The partner's distributive share of the interest expense of the partnership that is directly allocable under §1.861-10T shall be allocated according to the treatment, after application of §1.904-7(i)(2), of the partner's distributive share of

the income to which the expense is allocated.

(ii) *Other interest expense of the partner.* For purposes of apportioning other interest expense of the partner on an asset basis, the partner's interest in the partnership, and not the partner's pro rata share of partnership assets, is considered to be the relevant asset. The value of this asset for apportionment purposes is either the tax book value or fair market value of the partner's partnership interest, depending on the method of apportionment used by the taxpayer. This amount of a partner's interest in the partnership is allocated among various limitation categories in the same manner as partnership interest expense (that is not directly allocable under §1.861-10T) is apportioned in subdivision (i) of this paragraph (e)(4). If the partner uses the tax book value method of apportionment, the partner's interest in the partnership must be reduced, for this purpose, to the extent that the partner's basis consists of liabilities that are taken into account under section 752. Under either the tax book value or fair market value method of apportionment, for purposes of this section only, the value of the partner's interest in the partnership must be reduced by the principal amount of any indebtedness of the partner the interest on which is directly allocated to its partnership interest under §1.861-10T.

(5) *Tiered partnerships.* If a partnership is a partner in another partnership, the distributive share of interest expense of a lower-tier partnership that is subject to the rules of paragraph (e)(4) shall not be reapportioned in the hands of any higher-tier partner. However, the distributive share of interest expense of lower-tier partnership that is subject to the rules of paragraph (e) (2) or (3) shall be apportioned by the partner of the higher-tier partnership or by any higher-tier partnership to which the rules of paragraph (e)(4) apply, taking into account the partner's indirect pro rata share of the lower-tier partnership's income or assets.

(6) *Example—(i) Facts.* A, B, and C are partners in a limited partnership. A is a corporate general partner, owns a 5 percent interest in the partnership, and

has an adjusted basis in its partnership interest, determined without regard to section 752 of the Code, of \$5. A's investment in the partnership is not held in the ordinary course of the taxpayer's active trade or business, as defined in § 1.904-7(i)(2). B, a corporate limited partner, owns a 70 percent interest in the partnership, and has an adjusted basis in its partnership interest, determined without regard to section 752 of the Code, of \$70. C is an individual limited partner, owns a 25 percent interest in the partnership, and has an adjusted basis in the partnership interest, determined without regard to section 752 of the Code, of \$25. The partners' interests in the profits and losses of the partnership conform to their respective interests. None of the interest expense incurred directly by any of the partners is directly allocable to their partnership interest under § 1.861-10T. The ABC partnership's sole assets are two apartment buildings, one domestic and the other foreign. The domestic building has an adjusted inside basis of \$600 and the foreign building has an adjusted inside basis of \$500. Each of the buildings is subject to a nonrecourse liability in the amount of \$500. The ABC partnership's total interest expense for the taxable year is \$120, both nonrecourse liabilities bearing interest at the rate of 12 percent. The indebtedness on the domestic building qualifies for direct allocation under the rules of § 1.861-10T. The indebtedness on the foreign building does not so qualify. The partnership incurred no foreign taxes. The partnership's gross income for the taxable year is \$360, consisting of \$100 in foreign source income and \$260 in domestic source income. Under § 1.752-1(e), the nonrecourse liabilities of the partnership are allocated among the partners according to their share of the partnership profits. Accordingly, the adjusted basis of A, B, and C in their respective partnership interests (for other than apportionment purposes) is, respectively, \$55, \$770, and \$275.

(ii) *Determination of the amount of partnership interest expense that is subject to allocation and apportionment.* Interest on the nonrecourse loan on the domestic building is, under § 1.861-10T, directly allocable to income from that

investment. The interest expense is therefore directly allocable to domestic income. Interest on the nonrecourse loan on the foreign building is not directly allocable. The interest expense is therefore subject to allocation and apportionment. Thus, \$60 of interest expense is directly allocable to domestic income and \$60 of interest expense is subject to allocation and apportionment.

(iii) *Analysis for Partner A.* A's distributive share of the partnership's gross income is \$18, which consists of \$5 in foreign source income and \$13 in domestic source income. A's distributive share of the ABC interest expense is \$6, \$3 of which is directly allocable to domestic income and \$3 of which is subject to apportionment. After direct allocation of qualifying interest expense, A's distributive share of the partnership's gross income consists of \$5 in foreign source income and \$10 in domestic source income. Because A is a less than 10 percent corporate partner, A's distributive share of any foreign source partnership income is considered to be passive income. Accordingly, in apportioning the \$3 of partnership interest expense that is subject to apportionment on a gross income method, one-third (\$1) is apportioned to foreign source passive income and two-thirds (\$2) is apportioned to domestic source income. In apportioning its other interest expense, A uses the tax book value method. A's adjusted basis in A's partnership interest (\$55) includes A's share of the partnership's liabilities (\$50), which are included in basis under section 752. For purposes of apportioning other interest expense, A's adjusted basis in the partnership must be reduced to the extent of such liabilities. Thus, A's adjusted basis in the partnership, for purposes of apportionment, is \$5. For the purpose of apportioning A's other interest expense, this \$5 in basis is characterized one-third as a foreign passive asset and two-thirds as a domestic asset, which is the ratio determined in paragraph (e)(4)(i).

(iv) *Analysis for Partner B.* B's distributive share of the ABC interest expense is \$84, \$42 of which is directly allocable to domestic income and \$42 of which is subject to apportionment. As

a corporate limited partner whose interest in the partnership is 10 percent or more, B is subject to the rules of paragraph (e)(2) and paragraph (f) of this section. These rules require that a corporate partner apportion its distributive share of partnership interest expense at the partner level on the asset method described in paragraph (g) of this section by reference to its corporate assets, which include, for this purpose, 70 percent of the partnership's assets, adjusted in the manner described in §1.861-10T(e) to reflect directly allocable interest expense.

(v) *Analysis for Partner C.* C's distributive share of the ABC interest expense is \$30, \$15 of which is directly allocable to domestic income and \$15 of which is subject to apportionment. As an individual limited partner whose interest in the partnership is 10 percent or more, C is subject to the rules of paragraph (e)(3) of this section. These rules require that an individual's share of partnership interest expense be classified under regulations issued under section 163(h) and then apportioned under the rules applicable to individuals, which are set forth in paragraph (d) of this section.

(7) *Foreign partners.* The distributive share of partnership interest expense of a nonresident alien who is a partner in a partnership shall be considered to be connected with effectively connected income based on the percentage of the assets of the partnership that generate effectively connected income. No interest expense directly incurred by the partner may be allocated and apportioned to effectively connected income derived by the partnership.

(f) *Corporations—(1) Domestic corporations.* Domestic corporations shall apportion interest expense using the asset method described in paragraph (g) of this section and the applicable rules of §§1.861-10T through 1.861-13T.

(2) *Foreign branches of domestic corporations.* In the application of the asset method described in paragraph (g) of this section, a domestic corporation shall—

(i) Take into account the assets of any foreign branch, translated according to the rules set forth in paragraph (g) of this section, and

(ii) Combine with its own interest expense any deductible interest expense incurred by a branch, translated according to the rules of section 987 and the regulations thereunder.

For purposes of computing currency gain or loss on any remittance from a branch or other qualified business unit (as defined in §1.989(a)-1T) under section 987, the rules of this paragraph (f) shall not apply. The branch shall compute its currency gain or loss on remittances by taking into account only its separate expenses and its separate income.

Example. (i) *Facts.* X is a domestic corporation which operates B, a branch doing business in a foreign country. In 1988, without regard to branch B, X has gross domestic source income of \$1,000 and gross foreign source general limitation income of \$500 and incurs \$200 of interest expense. Using the tax book value method of apportionment, X, without regard to branch B, determines the value of its assets that generate domestic source income to be \$6,000 and the value of its assets that generate foreign source general limitation income to be \$1,000. B constitutes a qualified business unit within the meaning of section 989 with a functional currency other than the U.S. dollar and uses the profit and loss method prescribed by section 987. Applying the translation rules of section 987, B earned \$500 of gross foreign general limitation income and incurred \$100 of interest expense. B incurred no other expenses. For 1988, the average functional currency book value of B's assets that generate foreign general limitation income translated at the year-end rate for 1988 is \$3,000.

(ii) *Computation of net income.* The combined assets of X and B for 1988 (averaged under the rules of §1.861-9T(g)(3)) consist 60 percent of assets generating domestic source income and 40 percent of assets generating foreign source general limitation income. The combined interest expense of both X and B is \$300. Thus, \$180 of the combined interest expense is apportioned to domestic source income and \$120 is apportioned to the foreign source income, yielding net domestic source income of \$820 and net foreign source general limitation income of \$880.

(iii) *Computation of currency gain or loss.* For purposes of computing currency gain or loss on branch remittances, B takes into account only its gross income and its separate expenses. In 1988, B therefore has a net amount of income in foreign currency units equal in value to \$400. Gain or loss on remittances shall be computed by reference to this amount.

(3) *Controlled foreign corporations*—(i) *In general.* For purposes of computing subpart F income and computing earnings and profits for all other federal tax purposes, the interest expense of a controlled foreign corporation may be apportioned either using the asset method described in paragraph (g) of this section or using the modified gross income method described in paragraph (j) of this section, subject to the rules of subdivisions (ii) and (iii) of this paragraph (f)(2). However, the gross income method described in paragraph (j) of this section is not available to any controlled foreign corporation if a United States shareholder and the members of its affiliated group (as defined in § 1.861-11T(d)) constitute controlling shareholders of such controlled foreign corporation and such affiliated group elects the fair market value method of apportionment under paragraph (g) of this section.

(ii) *Manner of election.* The election to use the asset method described in paragraph (g) of this section or the modified gross income method described in paragraph (j) of this section may be made either by the controlled foreign corporation or by the controlling United States shareholders on behalf of the controlled foreign corporation. The term “controlling United States shareholders” means those United States shareholders (as defined in section 951(b)) who, in aggregate, own (within the meaning of section 958(a)) greater than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote. In the case of a controlled foreign corporation in which the United States shareholders own stock representing more than 50 percent of the value of the stock in such corporation, but less than 50 percent of the combined voting power of all classes of stock in such corporation, the term “controlling United States shareholders” means all the United States shareholders (as defined in section 951(b)) who own (within the meaning of section 958(a)) stock of the controlled foreign corporation. All United States shareholders are bound by the election of either the controlled foreign corporation or the controlling United States shareholders. For guid-

ance relating to the time and manner of this election, see § 1.861-9(f)(3)(ii).

(iii) *Consistency requirement.* The same method of apportionment must be employed by all controlled foreign corporations in which a United States taxpayer and the members of its affiliated group (as defined in § 1.861-11T(d)) constitute controlling United States shareholders. A controlled foreign corporation that is required by this paragraph (f)(3)(iii) to utilize a particular method of apportionment must do so with respect to all United States shareholders.

(iv) *Stock characterization.* Pursuant to § 1.861-12T(c)(2), the stock of a controlled foreign corporation shall be characterized in the hands of any United States shareholder using the same method that the controlled foreign corporation uses to apportion its interest expense.

(4) *Noncontrolled section 902 corporations*—(i) *In general.* For purposes of computing earnings and profits of a noncontrolled section 902 corporation (as defined in section 904(d)(2)(E)) for federal tax purposes, the interest expense of a noncontrolled section 902 corporation may be apportioned using either the asset method described in paragraph (g) of this section or the modified gross income method described in paragraph (j) of this section. A noncontrolled section 902 corporation that is not a controlled foreign corporation may elect to use a different method of apportionment than that elected by one or more of its shareholders. For further guidance, see § 1.861-9(f)(4).

(ii) *Manner of election.* The election to use the asset method described in paragraph (g) of this section or the modified gross income method described in paragraph (j) of this section may be made either by the noncontrolled section 902 corporation or by the majority domestic corporate shareholders (as defined in § 1.964-1T(c)(5)(ii)) on behalf of the noncontrolled section 902 corporation. The election shall be made by filing a statement described in § 1.964-1T(c)(3)(ii) at the time and in the manner described therein and providing a written notice described in § 1.964-

1T(c)(3)(iii), except that no such statement or notice is required to be filed or sent before July 24, 2006.

(iii) *Stock characterization.* In general, the stock of a noncontrolled section 902 corporation shall be characterized in the hands of any domestic corporation that meets the ownership requirements of section 902(a) with respect to the noncontrolled section 902 corporation, or in the hands of any member of the same qualified group as defined in section 902(b)(2), using the same method that the noncontrolled section 902 corporation uses to apportion its interest expense. Stock in a noncontrolled section 902 corporation shall be characterized as a passive category asset in the hands of any such shareholder that fails to meet the substantiation requirements of § 1.904-5T(c)(4)(iii), or in the hands of any shareholder that is not eligible to compute an amount of foreign taxes deemed paid with respect to a dividend from the noncontrolled section 902 corporation for the taxable year. See § 1.861-12T(c)(4).

(iv) *Effective date.* This paragraph (f)(4) applies for taxable years of shareholders ending after the first day of the first taxable year of the noncontrolled section 902 corporation beginning after December 31, 2002.

(5) *Other relevant provisions.* Affiliated groups of corporations are subject to special rules set forth in § 1.861-11T. Section 1.861-12T sets forth rules relating to basis adjustments for stock in nonaffiliated 10 percent owned corporations, special rules relating to the consideration and characterization of certain assets in the apportionment of interest expense, and to other special rules pertaining to the apportionment of interest expense. Section 1.861-13T contains transition rules limiting the application of the rules of §§ 1.861-8T through 1.861-12T, which are otherwise applicable to taxable years beginning after 1986. In the case of an affiliated group of corporations as defined in § 1.861-11T(d), any reference in §§ 1.861-8T through 1.861-13T to the “taxpayer” with respect to the allocation and apportionment of interest expense generally denotes the entire affiliated group of corporations and not the separate members thereof, unless the context otherwise requires.

(g) *Asset method—(1) In general.* (i) Under the asset method, the taxpayer apportions interest expense to the various statutory groupings based on the average total value of assets within each such grouping for the taxable year, as determined under the asset valuation rules of this paragraph (g)(1) and paragraph (g)(2) of this section and the asset characterization rules of paragraph (g)(3) of this section and § 1.861-12T. Except to the extent otherwise provided (*see, e.g.*, paragraph (d)(1)(iv) of this section), taxpayers must apportion interest expense only on the basis of asset values and may not apportion any interest deduction on the basis of gross income.

(ii) A taxpayer may elect to determine the value of its assets on the basis of either the tax book value or the fair market value of its assets. For rules concerning the application of an alternative method of valuing assets for purposes of the tax book value method, see § 1.861-9(i). For rules concerning the application of the fair market value method, see paragraph (h) of this section. In the case of an affiliated group—

(A) The parent of which used the fair market value method prior to 1987, or

(B) A substantial portion of which used the fair market value method prior to 1987, such a taxpayer may use either the fair market value method or the tax book value method for its tax year commencing in 1987 and may use either such method in its tax year commencing in 1988 without regard to which method was used in its tax year commencing in 1987 and without securing the Commissioner’s consent. The use of the fair market value method in 1988, however, shall operate as a binding election as described in § 1.861-8T(c)(2). For rules requiring consistency in the use of the tax book value or fair market value method, see § 1.861-8T(c)(2).

(iii) A taxpayer electing to apportion its interest expense on the basis of the fair market value of its assets must establish the fair market value to the satisfaction of the Commissioner. If a taxpayer fails to establish the fair market value of an asset to the satisfaction of the Commissioner, the Commissioner may determine the appropriate

§ 1.861-9T

26 CFR Ch. I (4-1-15 Edition)

asset value. If a taxpayer fails to establish the value of a substantial portion of its assets to the satisfaction of the Commissioner, the Commissioner may require the taxpayer to use the tax book value method of apportionment.

(iv) For rules relating to earnings and profits adjustments by taxpayers using the tax book value method for the stock in certain nonaffiliated 10 percent owned corporations, see § 1.861-12T(b).

(v) The provisions of this paragraph (g)(1) may be illustrated by the following examples.

Example 1. (i) *Facts.* X, a domestic corporation organized on January 1, 1987, has deductible interest expense in 1987 in the amount of \$150,000. X apportions its expenses according to the tax book value method. The adjusted basis of X's assets is \$3,600,000, \$3,000,000 of which generate domestic source income and \$600,000 of which generate foreign source general limitation income.

(ii) *Allocation.* No portion of the \$150,000 deduction is directly allocable solely to identified property within the meaning of § 1.861-10T. Thus, X's deduction for interest is related to all its activities and assets.

(iii) *Apportionment.* X apportions its interest expense as follows:

To foreign source general limitation income:

$$\$150,000 \times \frac{\$600,000}{\$3,600,000} \dots \$25,000$$

To domestic source income:

$$\$150,000 \times \frac{\$300,000}{\$3,600,000} \dots \$125,000$$

Example 2. (i) *Facts.* Assume the same facts as in Example 1, except that X apportions its interest expense on the basis of the fair market value of its assets. X's total assets have a fair market value of \$4,000,000, \$3,200,000 of which generate domestic source income and \$800,000 of which generate foreign source general limitation income.

(ii) *Allocation.* No portion of the \$150,000 deduction is directly allocable solely to identified property within the meaning of § 1.861-10T. Thus, X's deduction for interest is related to all its activities and properties.

(iii) *Apportionment.* If it establishes the fair market value of its assets to the satisfaction of the Commissioner, X may apportion its interest expense as follows:

To foreign source general limitation income:

$$\$150,000 \times \frac{\$800,000}{\$4,000,000} \dots \$30,000$$

To domestic source income:

$$\$150,000 \times \frac{\$3,200,000}{\$4,000,000} \dots \$120,000$$

(2) *Asset values*—(i) *General rule.* For purposes of determining the value of assets under this section, an average of values (book or market) within each statutory grouping and the residual grouping shall be computed for the year on the basis of values of assets at the beginning and end of the year. For the first taxable year beginning after 1986, a taxpayer may choose to determine asset values solely by reference to the year-end value of its assets, provided that all the members of an affiliated group as defined in § 1.861-11T(d) make the same choice. Thus, no averaging is required for the first taxable year beginning after 1986. Where a substantial distortion of asset values would result from averaging beginning-of-year and year-end values, as might be the case in the event of a major corporate acquisition or disposition, the taxpayer must use a different method of asset valuation that more clearly reflects the average value of assets weighted to reflect the time such assets are held by the taxpayer during the taxable year.

(ii) *Special rule for qualified business units of domestic corporations with functional currency other than the U.S. dollar*—(A) *Tax book value method.* In the case of taxpayers using the tax book value method of apportionment, the following rules shall apply to determine the value of the assets of a qualified business unit (as defined in section 989(a)) of a domestic corporation with a functional currency other than the dollar.

(1) *Profit and loss branch.* In the case of a branch for which an election is not effective under § 1.985-2T to use the dollar approximate separate transactions method of computing currency gain or loss, the tax book value shall be determined by applying the rules of paragraph (g)(2)(i) and (3) of this section with respect to beginning-of-year and end-of-year tax book value in units of functional currency that are translated

into dollars at the end-of-year exchange rate between the functional currency and the U.S. dollar.

Example. At the end of 1987, a profit and loss branch has assets that generate foreign source general limitation income with a tax book value in units of functional currency of 100. At the end of 1987, the unit is worth \$1. At the end of 1988, the branch has assets that generate foreign source general limitation income with a tax book value in units of functional currency of 80. At the end of 1988, the unit is worth \$2. The average value of foreign source general limitation assets for 1988 is 90 units, which is worth \$180.

(2) *Approximate separate transactions method.* In the case of a branch for which an election is effective under § 1.985-2T to use the dollar approximate separate transactions method to compute currency gain or loss, the beginning-of-year dollar amount of the assets shall be determined by reference to the end-of-year balance sheet of the branch for the immediately preceding taxable year, adjusted for United States generally accepted accounting principles and United States tax accounting principles, and translated into U.S. dollars as provided in § 1.985-3T. The year-end dollar amount of the assets of the branch shall be determined in the same manner by reference to the end-of-year balance sheet for the current taxable year. The beginning-of-year and end-of-year dollar tax book value of assets, as so determined, within each grouping must then be averaged as provided in paragraph (g)(2)(i) of this section.

(B) *Fair market value method.* In the case of taxpayers using the fair market value method of apportionment, the beginning-of-year and end-of-year fair market values of branch assets within each grouping shall be computed in dollars and averaged as provided in this paragraph (g)(2).

(iii) *Adjustment for directly allocated interest.* Prior to averaging, the year-end value of any asset to which interest expense is directly allocated during the current taxable year under the rules of § 1.861-10T (b) or (c) shall be reduced (but not below zero) by the percentage of the principal amount of indebtedness outstanding at year-end equal to the percentage of all interest on the debt for the taxable year that is directly allocated.

(iv) *Assets in intercompany transactions.* In the application of the asset method described in this paragraph (g), the tax book value of assets transferred between affiliated corporations in intercompany transactions shall be determined without regard to the gain or loss that is deferred under the regulations issued under section 1502.

(v) *Example.* X is a domestic corporation that uses the fair market value method of apportionment. X is a calendar year taxpayer. X owns 25 percent of the stock of A, a noncontrolled section 902 corporation. At the end of 1987, the fair market value of X's assets by income grouping are as follows:

| | |
|---------------------------------------|-------------|
| Domestic..... | \$1,000,000 |
| Foreign general limitation..... | 500,000 |
| Foreign passive..... | 500,000 |
| Noncontrolled section 902 corporation | |
| | 50,000 |

For its 1987 tax year, X apportions its interest expense by reference to the 1987 year-end values. In July of 1988, X sells a portion of its investment in A and in an asset acquisition purchases a shipping business, the assets of which generate exclusively foreign shipping income. At the end of 1988, the fair market values of X's assets by income grouping are as follows:

| | |
|---------------------------------------|-----------|
| Domestic..... | \$800,000 |
| Foreign general limitation..... | 900,000 |
| Foreign passive..... | 300,000 |
| Noncontrolled section 902 corporation | |
| | 40,000 |
| Foreign shipping..... | 100,000 |

For its 1988 tax year, X shall apportion its interest expense by reference to the average of the 1988 beginning-of-year values (the 1987 year-end values) and the 1988 year-end values, assuming that the averaging of beginning-of-year and end-of-year values does not cause a substantial distortion of asset values. These averages are as follows:

| | |
|---------------------------------------|-----------|
| Domestic..... | \$900,000 |
| Foreign general limitation..... | 700,000 |
| Foreign passive..... | 400,000 |
| Foreign shipping..... | 50,000 |
| Noncontrolled section 902 corporation | |
| | 45,000 |

(3) *Characterization of assets.* Assets are characterized for purposes of this section according to the source and type of the income that they generate, have generated, or may reasonably be expected to generate. The physical location of assets is not relevant to this

determination. Subject to the special rules of paragraph (h) concerning the application of the fair market value method of apportionment, the value of assets within each statutory grouping and the residual grouping at the beginning and end of each year shall be determined by dividing the taxpayer's assets into three types—

(i) *Single category assets.* Assets that generate income that is exclusively within a single statutory grouping or the residual grouping;

(ii) *Multiple category assets.* Assets that generate income within more than one grouping of income (statutory or residual); and

(iii) *Assets without directly identifiable yield.* Assets that produce no directly identifiable income yield or that contribute equally to the generation of all the income of the taxpayer (such as assets used in general and administrative functions).

Single category assets are directly attributable to the relevant statutory or residual grouping of income. In order to attribute multiple category assets to the relevant groupings of income, the income yield of each such asset for the taxable year must be analyzed to determine the proportion of gross income generated by it within each relevant grouping. The value of each asset is then prorated among the relevant groupings of income according to their respective proportions of gross income. The value of each asset without directly identifiable income yield must be identified. However, because prorating the value of such assets cannot alter the ratio of assets within the various groupings of income (as determined by reference to the single and multiple category assets), they are not taken into account in determining that ratio. Special asset characterization rules that are set forth in § 1.861-12T. An example demonstrating the application of the asset method is set forth in § 1.861-12T(d).

(h) *The fair market value method.* An affiliated group (as defined in § 1.861-11T(d)) or other taxpayer (the "taxpayer") that elects to use the fair market value method of apportionment shall value its assets according to the following methodology.

(1) *Determination of values—(i) Valuation of group assets.* The taxpayer shall first determine the aggregate value of the assets of the taxpayer on the last day of its taxable year without excluding the value of stock in foreign subsidiaries or any other asset. In the case of a publicly traded corporation, this determination shall be equal to the aggregate trading value of the taxpayer's stock traded on established securities markets at year-end increased by the taxpayer's year-end liabilities to unrelated persons and its pro rata share of year-end liabilities of all related persons owed to unrelated persons. In determining whether persons are related, § 1.861-8T(c)(2) shall apply. In the case of a corporation that is not publicly traded, this determination shall be made by reference to the capitalization of corporate earnings, in accordance with the rules of Rev. Rul. 68-609. In either case, control premium shall not be taken into account.

(ii) *Valuation of tangible assets.* The taxpayer shall determine the value of all assets held by the taxpayer and its pro rata share of assets held by other related persons on the last day of its taxable year, excluding stock or indebtedness in such persons, any intangible property as defined in section 936(h)(3)(B), or goodwill or going concern value intangibles. Such valuations shall be made using generally accepted valuation techniques. For this purpose, assets may be combined into reasonable groupings. Statistical methods of valuation may only be used in connection with fungible property, such as commodities. The value of stock in any corporation that is not a related person shall be determined under the rules of paragraph (h)(1)(i) of this section, except that no liabilities shall be taken into account.

(iii) *Computation of intangible asset value.* The value of the intangible assets of the taxpayer and of intangible assets of all related persons attributable to the taxpayer's ownership in related persons is equal to the amount obtained by subtracting the amount determined under paragraph (h)(1)(ii) of this section from the amount determined under paragraph (h)(1)(i) of this section.

(2) *Apportionment of intangible asset value.* The value of the intangible assets determined under paragraph (h)(1)(iii) of this section is apportioned among the taxpayer and all related persons in proportion to the net income before interest expense of the taxpayer and the taxpayer's pro rata share of the net income before interest expense of each related person held by the taxpayer, excluding income that is passive under § 1.904-4(b). For this purpose, net income is determined before reduction for income taxes. Net income of the taxpayer and of related persons shall be computed without regard to dividends or interest received from any person that is related to the taxpayer.

(3) *Characterization of affiliated group's portion of intangible asset value.* The portion of the value of intangible assets of the taxpayer and related persons that is apportioned to the taxpayer under paragraph (h)(2) of this section is characterized on the basis of net income before interest expense, as determined under paragraph (h)(2) of this section, of the taxpayer within each statutory or residual grouping of income.

(4) [Reserved]. For further guidance see § 1.861-9(h)(4).

(5) [Reserved]. For further guidance, see § 1.861-9(h)(5).

(6) *Adjustments for apportioning related person expenses.* For purposes of apportioning expenses of a related person, the value of stock in a second related person as otherwise determined under paragraph (h)(4) of this section (which is determined on the basis of the taxpayer's percentage ownership interest in the second related person) shall be increased to reflect the first related person's percentage ownership interest in the second related person to the extent it is larger.

Example. Assume that a taxpayer owns 80 percent of CFC1, which owns 100 percent of CFC2. The value of CFC1 is determined generally under paragraph (h)(4) on the basis of the taxpayer's 80 percent indirect interest in CFC2. For purposes of apportioning expenses of CFC1, 100 percent of the stock of CFC1 must be taken into account. Therefore, the value of CFC2 stock in the hands of CFC1 shall equal the value of CFC2 stock in the hands of CFC1 as determined under paragraph (h)(4) of this section, increased by 25 percent of such amount to reflect the fact

that CFC1 owns 100 percent and not 80 percent of CFC2.

(i) [Reserved]. For further guidance, see § 1.861-9(i).

(j) *Modified gross income method.* Subject to rules set forth in paragraph (f)(3) of this section, the interest expense of a controlled foreign corporation may be allocated according to the following rules.

(1) *Single-tier controlled foreign corporation.* In the case of a controlled foreign corporation that does not hold stock in any lower-tier controlled foreign corporation, the interest expense of the controlled foreign corporation shall be apportioned based on its gross income.

(2) *Multiple vertically owned controlled foreign corporations.* In the case of a controlled foreign corporation that holds stock in any lower-tier controlled foreign corporation, the interest expense of that controlled foreign corporation and such upper-tier controlled foreign corporation shall be apportioned based on the following methodology:

(i) *Step 1.* Commencing with the lowest-tier controlled foreign corporation in the chain, allocate and apportion its interest expense based on its gross income as provided in paragraph (j)(1) of this section, yielding gross income in each grouping net of interest expense.

(ii) *Step 2.* Moving to the next higher-tier controlled foreign corporation, combine the gross income of such corporation within each grouping with its pro rata share of the gross income net of interest expense of all lower-tier controlled foreign corporations held by such higher-tier corporation within the same grouping adjusted as follows:

(A) Exclude from the gross income of the upper-tier corporation any dividends or other payments received from the lower-tier corporation other than interest subject to look-through under section 904(d)(3); and

(B) Exclude from the gross income net of interest expense of any lower-tier corporation any subpart F income (net of interest expense apportioned to such income).

Then apportion the interest expense of the higher-tier controlled foreign corporation based on the adjusted combined gross income amounts. Repeat

this step 2 for each next higher-tier controlled foreign corporation in the chain. For purposes of this paragraph (j)(2)(ii), pro rata share shall be determined under principles similar to section 951(a)(2).

(k) *Effective/applicability dates.* In general, the rules of this section apply for taxable years beginning after December 31, 1986. Paragraphs (b)(2) (concerning the treatment of certain foreign currency) and (d)(2) (concerning the treatment of interest incurred by nonresident aliens) of this section are applicable for taxable years commencing after December 31, 1988. Taxpayers may also apply paragraph (b)(6) of this section to any gain that was realized on any transaction described in paragraph (b)(6)(i) of this section that was entered into after September 14, 1988, and on or before August 11, 1989, if the taxpayer can demonstrate to the satisfaction of the Commissioner that substantially all of the arrangements described in paragraph (b)(6)(i) of this section to which the taxpayer became a party during that interim period were identified on the taxpayer's books and records with the liabilities of the taxpayer in a substantially contemporaneous manner and that all losses and expenses that are subject to the rules of paragraph (b)(6) of this section were treated in the same manner as interest expense. For this purpose, arrangements that were identified in a substantially contemporaneous manner with the taxpayer's assets shall be ignored. For further guidance, see § 1.861-9(k).

[T.D. 8228, 53 FR 35477, Sept. 14, 1988]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.861-9T, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 1.861-10 Special allocations of interest expense.

(a)-(d) [Reserved]

(e) *Treatment of certain related group indebtedness*—(1) *In general.* If, for any taxable year beginning after December 31, 1991, a U.S. shareholder (as defined in paragraph (e)(5)(i) of this section) has both—

(i) Excess related group indebtedness (as determined under Step One in paragraph (e)(2) of this section) and

(ii) Excess U.S. shareholder indebtedness (as determined under Step Two in paragraph (e)(3) of this section),

the U.S. shareholder shall allocate, to its gross income in the various separate limitation categories described in section 904(d)(1), a portion of its interest expense paid or accrued to any obligee who is not a member of the affiliated group (as defined in § 1.861-11T(d)) of the U.S. shareholder (“third party interest expense”), excluding amounts allocated under paragraphs (b) and (c) of § 1.861-10T. The amount of third party interest expense so allocated shall equal the total amount of interest income derived by the U.S. shareholder during the year from related group indebtedness, multiplied by the ratio of the lesser of the foregoing two amounts of excess indebtedness for the year to related group indebtedness for the year. This amount of third party interest expense is allocated as described in Step Three in paragraph (e)(4) of this section.

(2) *Step One: Excess related group indebtedness.* (i) The excess related group indebtedness of a U.S. shareholder for the year equals the amount by which its related group indebtedness for the year exceeds its allowable related group indebtedness for the year.

(ii) The “related group indebtedness” of the U.S. shareholder is the average of the aggregate amounts at the beginning and end of the year of indebtedness owed to the U.S. shareholder by each controlled foreign corporation which is a related person (as defined in paragraph (e)(5)(ii) of this section) with respect to the U.S. shareholder.

(iii) The “allowable related group indebtedness” of a U.S. shareholder for the year equals—

(A) The average of the aggregate values at the beginning and end of the year of the assets (including stock holdings in and obligations of related persons, other than related controlled foreign corporations) of each related controlled foreign corporation, multiplied by

(B) The foreign base period ratio of the U.S. shareholder for the year.

(iv) The “foreign base period ratio” of the U.S. shareholder for the year is the average of the related group debt-to-asset ratios of the U.S. shareholder for each taxable year comprising the foreign base period for the current year (each a “base year”). For this purpose, however, the related group debt-to-asset ratio of the U.S. shareholder for any base year may not exceed 110 percent of the foreign base period ratio for that base year. This limitation shall not apply with respect to any of the five taxable years chosen as initial base years by the U.S. shareholder under paragraph (e)(2)(v) of this section or with respect to any base year for which the related group debt-to-asset ratio does not exceed 0.10.

(v)(A) The foreign base period for any current taxable year (except as described in paragraphs (e)(2)(v)(B) and (C) of this section) shall consist of the five taxable years immediately preceding the current year.

(B) The U.S. shareholder may choose as foreign base periods for all of its first five taxable years for which this paragraph (e) is effective the following alternative base periods:

(1) For the first effective taxable year, the 1982, 1983, 1984, 1985 and 1986 taxable years;

(2) For the second effective taxable year, the 1983, 1984, 1985 and 1986 taxable years and the first effective taxable year;

(3) For the third effective taxable year, the 1984, 1985 and 1986 taxable years and the first and second effective taxable years;

(4) For the fourth effective taxable year, the 1985 and 1986 taxable years and the first, second and third effective taxable years; and

(5) For the fifth effective taxable year, the 1986 taxable year and the first, second, third and fourth effective taxable years.

(C) If, however, the U.S. shareholder does not choose, under paragraph (e)(10)(ii) of this section, to apply this paragraph (e) to one or more taxable years beginning before January 1, 1992, the U.S. shareholder may not include within any foreign base period the taxable year immediately preceding the first effective taxable year. Thus, for example, a U.S. shareholder for which

the first effective taxable year is the taxable year beginning on October 1, 1992, may not include the taxable year beginning on October 1, 1991, in any foreign base period. Assuming that the U.S. shareholder does not elect the alternative base periods described in paragraph (e)(2)(v)(B) of this section, the initial foreign base period for the U.S. shareholder will consist of the taxable years beginning on October 1 of 1986, 1987, 1988, 1989, and 1990. The foreign base period for the U.S. shareholder for the following taxable year, beginning on October 1, 1993, will consist of the taxable years beginning on October 1 of 1987, 1988, 1989, 1990, and 1992.

(D) If the U.S. shareholder chooses the base periods described in paragraph (e)(2)(v)(B) of this section as foreign base periods, it must make a similar election under paragraph (e)(3)(v)(B) of this section with respect to its U.S. base periods.

(vi) The “related group debt-to-asset ratio” of a U.S. shareholder for a year is the ratio between—

(A) The related group indebtedness of the U.S. shareholder for the year (as determined under paragraph (e)(2)(ii) of this section); and

(B) The average of the aggregate values at the beginning and end of the year of the assets (including stock holdings in and obligations of related persons, other than related controlled foreign corporations) of each related controlled foreign corporation.

(vii) Notwithstanding paragraph (e)(2)(i) of this section, a U.S. shareholder is considered to have no excess related group indebtedness for the year if—

(A) Its related group indebtedness for the year does not exceed its allowable related group indebtedness for the immediately preceding year (as determined under paragraph (e)(2)(iii) of this section); or

(B) Its related group debt-to-asset ratio (as determined under paragraph (e)(2)(vi) of this section) for the year does not exceed 0.10.

(3) *Step Two: Excess U.S. shareholder indebtedness.* (i) The excess indebtedness of a U.S. shareholder for the year

equals the amount by which its unaffiliated indebtedness for the year exceeds its allowable indebtedness for the year.

(ii) The “unaffiliated indebtedness” of the U.S. shareholder is the average of the aggregate amounts at the beginning and end of the year of indebtedness owed by the U.S. shareholder to any obligee, other than a member of the affiliated group (as defined in § 1.861-11T(d)) of the U.S. shareholder.

(iii) The “allowable indebtedness” of a U.S. shareholder for the year equals—

(A) The average of the aggregate values at the beginning and end of the year of the assets of the U.S. shareholder (including stock holdings in and obligations of related controlled foreign corporations, but excluding stock holdings in and obligations of members of the affiliated group (as defined in § 1.861-11T(d)) of the U.S. shareholder), reduced by the amount of the excess related group indebtedness of the U.S. shareholder for the year (as determined under Step One in paragraph (e)(2) of this section), multiplied by

(B) The U.S. base period ratio of the U.S. shareholder for the year.

(iv) The “U.S. base period ratio” of the U.S. shareholder for the year is the average of the debt-to-asset ratios of the U.S. shareholder for each taxable year comprising the U.S. base period for the current year (each a “base year”). For this purpose, however, the debt-to-asset ratio of the U.S. shareholder for any base year may not exceed 110 percent of the U.S. base period ratio for that base year. This limitation shall not apply with respect to any of the five taxable years chosen as initial base years by the U.S. shareholder under paragraph (e)(3)(v) of this section or with respect to any base year for which of the debt-to-asset ratio does not exceed 0.10.

(v)(A) The U.S. base period for any current taxable year (except as described in paragraphs (e)(3)(v) (B) and (C) of this section) shall consist of the five taxable years immediately preceding the current year.

(B) The U.S. shareholder may choose as U.S. base periods for all of its first five taxable years for which this paragraph (e) is effective the following alternative base periods:

(1) For the first effective taxable year, the 1982, 1983, 1984, 1985 and 1986 taxable years;

(2) For the second effective taxable year, the 1983, 1984, 1985 and 1986 taxable years and the first effective taxable year;

(3) For the third effective taxable year, the 1984, 1985 and 1986 taxable years and the first and second effective taxable years;

(4) For the fourth effective taxable year, the 1985 and 1986 taxable years and the first, second and third effective taxable years; and

(5) For the fifth effective taxable year, the 1986 taxable year and the first, second, third and fourth effective taxable years.

(C) If, however, the U.S. shareholder does not choose, under paragraph (e)(10)(ii) of this section, to apply this paragraph (e) to one or more taxable years beginning before January 1, 1992, the U.S. shareholder may not include within any U.S. base period the taxable year immediately preceding the first effective taxable year. Thus, for example, a U.S. shareholder for which the first effective taxable year is the taxable year beginning on October 1, 1992, may not include the taxable year beginning on October 1, 1991, in any U.S. base period. Assuming that the U.S. shareholder does not elect the alternative base periods described in paragraph (e)(3)(v)(B) of this section, the initial U.S. base period for the U.S. shareholder will consist of the taxable years beginning on October 1, of 1986, 1987, 1988, 1989, and 1990. The U.S. base period for the U.S. shareholder for the following taxable year, beginning on October 1, 1993, will consist of the taxable years beginning on October 1, 1987, 1988, 1989, 1990, and 1992.

(D) If the U.S. shareholder chooses the base periods described in paragraph (e)(3)(v)(B) of this section as U.S. base periods, it must make a similar election under paragraph (e)(2)(v)(B) of this section with respect to its foreign base periods.

(vi) The “debt-to-asset ratio” of a U.S. shareholder for a year is the ratio between—

(A) The unaffiliated indebtedness of the U.S. shareholder for the year (as

determined under paragraph (e)(3)(ii) of this section); and

(B) The average of the aggregate values at the beginning and end of the year of the assets of the U.S. shareholder. For this purpose, the assets of the U.S. shareholder include stock holdings in and obligations of related controlled foreign corporations but do not include stock holdings in and obligations of members of the affiliated group (as defined in §1.861-11T(d)).

(vii) A U.S. shareholder is considered to have no excess indebtedness for the year if its debt-to-asset ratio (as determined under paragraph (e)(3)(vi) of this section) for the year does not exceed 0.10.

(4) *Step Three: Allocation of third party interest expense.* (i) A U.S. shareholder shall allocate to its gross income in the various separate limitation categories described in section 904(d)(1) a portion of its third party interest expense incurred during the year equal in amount to the interest income derived by the U.S. shareholder during the year from allocable related group indebtedness.

(ii) The “allocable related group indebtedness” of a U.S. shareholder for any year is an amount of related group indebtedness equal to the lesser of—

(A) The excess related group indebtedness of the U.S. shareholder for the year (determined under Step One in paragraph (e)(2) of this section); or

(B) The excess U.S. shareholder indebtedness for the year (determined under Step Two in paragraph (e)(3) of this section).

(iii) The amount of interest income derived by a U.S. shareholder from allocable related group indebtedness during the year equals the total amount of interest income derived by the U.S. shareholder during the year with respect to related group indebtedness, multiplied by the ratio of allocable related group indebtedness for the year to the aggregate amount of related group indebtedness for the year.

(iv) The portion of third party interest expense described in paragraph (e)(4)(i) of this section shall be allocated in proportion to the relative average amounts of related group indebtedness held by the U.S. shareholder in each separate limitation category during the year. The remaining portion of

third party interest expense of the U.S. shareholder for the year shall be apportioned as provided in §§1.861-8T through 1.861-13T, excluding paragraph (e) of §1.861-10T and this paragraph (e).

(v) The average amount of related group indebtedness held by the U.S. shareholder in each separate limitation category during the year equals the average of the aggregate amounts of such indebtedness in each separate limitation category at the beginning and end of the year. Solely for purposes of this paragraph (e)(4), each debt obligation of a related controlled foreign corporation held by the U.S. shareholder at the beginning or end of the year is attributed to separate limitation categories in the same manner as the stock of the obligor would be attributed under the rules of §1.861-12T(c)(3), whether or not such stock is held directly by the U.S. shareholder.

(vi) The amount of third party interest expense of a U.S. shareholder allocated pursuant to this paragraph (e)(4) shall not exceed the total amount of the third party interest expense of the U.S. shareholder for the year (excluding any third party interest expense allocated under paragraphs (b) and (c) of §1.861-10T).

(5) *Definitions.* For purposes of this paragraph (e), the following terms shall have the following meanings.

(i) *U.S. shareholder.* The term “U.S. shareholder” has the same meaning as the term “United States shareholder” when used in section 957, except that, in the case of a United States shareholder that is a member of an affiliated group (as defined in §1.861-11T(d)), the entire affiliated group is considered to constitute a single U.S. shareholder.

(ii) *Related person.* For the definition of the term “related person”, see §1.861-8T(c)(2). A controlled foreign corporation is considered “related” to a U.S. shareholder if it is a related person with respect to the U.S. shareholder.

(6) *Determination of asset values.* A U.S. shareholder shall determine the values of the assets of each related controlled foreign corporation (for purposes of Step One in paragraph (e)(2) of this section) and the assets of the U.S. shareholder (for purposes of Step Two in paragraph (e)(3) of this section) for

any year in accordance with the valuation method (tax book value or fair market value) elected for that year pursuant to § 1.861-9T(g). However, solely for purposes of this paragraph (e), a U.S. shareholder may instead choose to determine the values of the assets of all related controlled foreign corporations by reference to their values as reflected on Forms 5471 (the annual information return with respect to each related controlled foreign corporation), subject to the translation rules of paragraph (e)(8)(i) of this section. This method of valuation may be used only if the taxable years of each of the related controlled foreign corporations begin with, or no more than one month earlier than, the taxable year of the U.S. shareholder. Once chosen for a taxable year, this method of valuation must be used in each subsequent taxable year and may be changed only with the consent of the Commissioner.

(7) *Adjustments to asset value.* For purposes of apportioning remaining interest expense under § 1.861-9T, a U.S. shareholder shall reduce (but not below zero) the value of its assets for the year (as determined under § 1.861-9T (g) (3) or (h)) by an amount equal to the allocable related group indebtedness of the U.S. shareholder for the year (as determined under Step Three in paragraph (e)(4)(ii) of this section). This reduction is allocated among assets in each separate limitation category in proportion to the average amount of related group indebtedness held by the U.S. shareholder in each separate limitation category during the year (as determined under Step Three in paragraph (e)(4)(v) of this section).

(8) *Special rules*—(i) *Exchange rates.* All indebtedness amounts and asset values (including current year and base year amounts and values) denominated in a foreign currency shall be translated into U.S. dollars at the exchange rate for the current year. The exchange rate for the current year may be determined under any reasonable method (e.g., average of month-end exchange rates for each month in the current year) if it is consistently applied to the current year and all base years. Once chosen for a taxable year, a method for determining an exchange rate must be used in each subsequent taxable year

and will be treated as a method of accounting for purposes of section 446. A taxpayer may apply a different translation rule only with the prior consent of the Commissioner. In this regard, the Commissioner will be guided by the extent to which a different rule would reduce the comparability of dollar amounts of indebtedness and dollar asset values for the base years and the current year.

(ii) *Exempt assets.* Solely for purposes of this paragraph (e), any exempt assets otherwise excluded under section 864(e)(3) and § 1.861-8T(d) shall be included as assets of the U.S. shareholder or related controlled foreign corporation.

(iii) *Exclusion of certain directly allocated indebtedness and assets.* Qualified nonrecourse indebtedness (as defined in § 1.861-10T(b)(2)) and indebtedness incurred in connection with an integrated financial transaction (as defined in § 1.861-10T(c)(2)) shall be excluded from U.S. shareholder indebtedness and related group indebtedness. In addition, assets which are the subject of qualified nonrecourse indebtedness or integrated financial transactions shall be excluded from the assets of the U.S. shareholder and each related controlled foreign corporation.

(iv) *Exclusion of certain receivables.* Receivables between related controlled foreign corporations (or between members of the affiliated group constituting the U.S. shareholder) shall be excluded from the assets of the related controlled foreign corporation (or affiliated group member) holding such receivables. See also § 1.861-11T(e)(1).

(v) *Classification of certain loans as related group indebtedness.* If—

(A) A U.S. shareholder owns stock in a related controlled foreign corporation which is a resident of a country that—

(1) Does not impose a withholding tax of 5 percent or more upon payments of dividends to a U.S. shareholder; and

(2) Does not, for the taxable year of the controlled foreign corporation, subject the income of the controlled foreign corporation to an income tax which is greater than that percentage specified under § 1.954-1T(d)(1)(i) of the maximum rate of tax specified under section 11 of the Code, and

(B) The controlled foreign corporation has outstanding a loan or loans to one or more other related controlled foreign corporations, or the controlled foreign corporation has made a direct or indirect capital contribution to one or more other related controlled foreign corporations which have outstanding a loan or loans to one or more other related controlled foreign corporations, then, to the extent of the aggregate amount of its capital contributions in taxable years beginning after December 31, 1986, to the related controlled foreign corporation that made such loans or additional contributions, the U.S. shareholder itself shall be treated as having made the loans described in paragraph (e)(8)(v)(B) of this section and, thus, such loan amounts shall be considered related group indebtedness. However, for purposes of paragraph (e)(4) of this section, interest income derived by the U.S. shareholder during the year from related group indebtedness shall not include any income derived with respect to the U.S. shareholder's ownership of stock in the related controlled foreign corporation that made such loans or additional contributions.

(vi) *Classification of certain stock as related person indebtedness.* In determining the amount of its related group indebtedness for any taxable year, a U.S. shareholder must treat as related group indebtedness its holding of stock in a related controlled foreign corporation if, during such taxable year, such related controlled foreign corporation claims a deduction for interest under foreign law for distributions on such stock. However, for purposes of paragraph (e)(4) of this section, interest income derived by the U.S. shareholder during the year from related group indebtedness shall not include any income derived with respect to the U.S. shareholder's ownership of stock in the related controlled foreign corporation.

(9) *Corporate events—(1) Initial acquisition of a controlled foreign corporation.* If the foreign base period of the U.S. shareholder for any year includes a base year in which the U.S. shareholder did not hold stock in any related controlled foreign corporation, then, in computing the foreign base period ratio, the related group debt-to-asset

ratio of the U.S. shareholder for any such base year shall be deemed to be 0.10.

(ii) *Incorporation of U.S. shareholder—(A) Nonapplication.* This paragraph (e) does not apply to the first taxable year of the U.S. shareholder. However, this paragraph (e) does apply to all following years, including years in which later members of the affiliated group may be incorporated.

(B) *Foreign and U.S. base period ratios.* In computing the foreign and U.S. base period ratios, the foreign and U.S. base periods of the U.S. shareholder shall be considered to be only the period prior to the current year that the U.S. shareholder was in existence if this prior period is less than five taxable years.

(iii) *Acquisition of additional corporations.* (A) If a U.S. shareholder acquires (directly or indirectly) stock of a foreign or domestic corporation which, by reason of the acquisition, then becomes a related controlled foreign corporation or a member of the affiliated group, then in determining excess related group indebtedness or excess U.S. shareholder indebtedness, the indebtedness and assets of the acquired corporation shall be taken into account only at the end of the acquisition year and in following years. Thus, amounts of indebtedness and assets and the various debt-to-asset ratios of the U.S. shareholder existing at the beginning of the acquisition year or relating to preceding years are not recalculated to take account of indebtedness and assets of the acquired corporation existing as of dates before the end of the year. If, however, a major acquisition is made within the last three months of the year and a substantial distortion of values for the year would otherwise result, the taxpayer must take into account the average values of the acquired indebtedness and assets weighted to reflect the time such indebtedness is owed and such assets are held by the taxpayer during the year.

(B) In the case of a reverse acquisition subject to this paragraph (e)(9), the rules of § 1.1502-75(d)(3) apply in determining which corporations are the acquiring and acquired corporations. For this purpose, whether corporations are affiliated is determined under § 1.861-11T(d).

(C) If the stock of a U.S. shareholder is acquired by (and, by reason of such acquisition, the U.S. shareholder becomes affiliated with) a corporation described below, then such U.S. shareholder shall be considered to have acquired such corporation for purposes of the application of the rules of this paragraph (e). A corporation to which this paragraph (e)(9)(iii)(C) applies is—

(1) A corporation which is not affiliated with any other corporation (other than other similarly described corporations); and

(2) Substantially all of the assets of which consist of cash, securities and stock.

(iv) *Election to compute base period ratios by including acquired corporations.* A U.S. shareholder may choose, solely for purposes of paragraph (e)(9) (i) and (iii) of this section, to compute its foreign and U.S. base period ratios for the acquisition year and all subsequent years by taking into account the indebtedness and asset values of the acquired corporation or corporations (including related group indebtedness owed to a former U.S. shareholder) at the beginning of the acquisition year and in each of the five base years preceding the acquisition year. This election, if made for an acquisition, must be made for all other acquisitions occurring during the same taxable year or initiated in that year and concluded in the following year.

(v) *Dispositions.* If a U.S. shareholder disposes of stock of a foreign or domestic corporation which, by reason of the disposition, then ceases to be a related controlled foreign corporation or a member of the affiliated group (unless liquidated or merged into a related corporation), in determining excess related group indebtedness or excess U.S. shareholder indebtedness, the indebtedness and assets of the divested corporation shall be taken into account only at the beginning of the disposition year and for the relevant preceding years. Thus, amounts of indebtedness and assets and the various debt-to-asset ratios of the U.S. shareholder existing at the end of the year or relating to following years are not affected by indebtedness and assets of the divested corporation existing as of dates after the beginning of the year. If, however,

a major disposition is made within the first three months of the year and a substantial distortion of values for the year would otherwise result, the taxpayer must take into account the average values of the divested indebtedness and assets weighted to reflect the time such indebtedness is owed and such assets are held by the taxpayer during the year.

(vi) *Election to compute base period ratios by excluding divested corporations.* A U.S. shareholder may choose, solely for purposes of paragraph (e) (9) (v) and (vii) of this section, to compute its foreign and U.S. base period ratios for the disposition year and all subsequent years without taking into account the indebtedness and asset values of the divested corporation or corporations at the beginning of the disposition year and in each of the five base years preceding the disposition year. This election, if made for a disposition, must be made for all other dispositions occurring during the same taxable year or initiated in that year and concluded in the following year.

(vii) *Section 355 transactions.* A U.S. corporation which becomes a separate U.S. shareholder as a result of a distribution of its stock to which section 355 applies shall be considered—

(A) As disposed of by the U.S. shareholder of the affiliated group of which the distributing corporation is a member, with this disposition subject to the rules of paragraphs (e) (9) (v) and (vi) of this section; and

(B) As having the same related group debt-to-asset ratio and debt-to-asset ratio as the distributing U.S. shareholder in each year preceding the year of distribution for purposes of applying this paragraph (e) to the year of distribution and subsequent years of the distributed corporation.

(10) *Effective date—(i) Taxable years beginning after December 31, 1991.* The provisions of this paragraph (e) apply to all taxable years beginning after December 31, 1991.

(ii) *Taxable years beginning after December 31, 1987 and before January 1, 1992.* The provisions of § 1.861-10T (e) apply to taxable years beginning after December 31, 1987, and before January 1, 1992. The taxpayer may elect to apply the provisions of this paragraph

Internal Revenue Service, Treasury

§ 1.861-10

(e) (in lieu of the provisions of §1.861-10T (e)) for any taxable year beginning after December 31, 1987, but this paragraph (e) must then be applied to all subsequent taxable years.

(11) The following example illustrates the provisions of this paragraph (e):

Example. (i) *Facts.* X, a domestic corporation, elects to apply this paragraph (e) to its 1990 tax year. X has a calendar taxable year and apportions its interest expense on the basis of the tax book value of its assets. In 1990, X incurred deductible third-party interest expense of \$24,960 on an average amount of indebtedness (determined on the basis of beginning-of-year and end-of-year amounts) of \$249,600. X manufactures widgets, all of which are sold in the United States. X owns all of the stock of Y, a controlled foreign corporation that also has a calendar taxable year and is also engaged in the manufacture and sale of widgets. Y has no earnings and profits or deficit of earnings and profits attributable to taxable years prior to 1987. X's total assets and their average tax book values (determined on the basis of beginning-of-year and end-of-year tax book values) for 1990 are:

| Asset | Average tax book value |
|------------------------------|------------------------|
| Plant and equipment | \$315,000 |
| Corporate headquarters | 60,000 |
| Y stock | 75,000 |
| Y note | 50,000 |
| Total | 500,000 |

Y had \$25,000 of income before the deduction of any interest expense. Of this total, \$5,000 is high withholding tax interest income. The remaining \$20,000 is derived from widget sales, and constitutes foreign source general limitation income. Assume that Y has no deductions from gross income other than interest expense. During 1990, Y paid \$5,000 of interest expense to X on the Y note and \$10,000 of interest expense to third parties, giving Y total interest expense of \$15,000. X elects pursuant to §1.861-9T to apportion Y's interest expense under the gross income method prescribed in section 1.861-9T (j).

(ii) *Step 1:* Using a beginning and end of year average, X (the U.S. shareholder) held the following average amounts of indebtedness of Y and Y had the following average asset values:

| | 1985 | 1986-88 | 1989 | 1990 |
|--|----------|---------|---------|---------|
| (A) Related group indebtedness | \$11,000 | 24,000 | 26,000 | 50,000 |
| (B) Average Value of Assets of Related CFC | 100,000 | 200,000 | 200,000 | 250,000 |
| (C) Related Group Debt-to-Asset Ratio | .11 | .12 | .13 | .20 |

(1) X's "foreign base period ratio" for 1990, an average of its ratios of related group indebtedness to related group assets for 1985 through 1989, is:

$$(.11 + .12 + .12 + .12 + .13) / 5 = .12$$

(2) X's "allowable related group indebtedness" for 1990 is:

$$\$250,000 \times .12 = \$30,000.$$

(3) X's "excess related group indebtedness" for 1990 is:

$$\$50,000 - \$30,000 = \$20,000$$

X's related group indebtedness of \$50,000 for 1990 is greater than its allowable related group indebtedness of \$24,000 for 1989 (assuming a foreign base period ratio in 1989 of .12), and X's related group debt-to-asset ratio for 1990 is .20, which is greater than the ratio of .10 described in paragraph (e)(2)(vii)(B) of this section. Therefore, X's excess related group indebtedness for 1990 remains at \$20,000.

(iii) *Step 2:* Using a beginning and end of year average, X has the following average amounts of U.S. and foreign indebtedness and average asset values:

| | 1985 | 1986 | 1987 | 1988 | 1989 | 1990 |
|-----------|-----------|---------|---------|---------|---------|------------|
| (1) | \$231,400 | 225,000 | 225,000 | 225,000 | 220,800 | 249,600 |
| (2) | 445,000 | 450,000 | 450,000 | 450,000 | 460,000 | 480,000 |
| (3) | .52 | .50 | .50 | .50 | .48 | (a)
.52 |

(1) U.S. and foreign indebtedness
(2) Average value of assets of U.S. shareholder

(3) Debt-to-Asset ratio of U.S. shareholder
(a) $[500,000 - 20,000 \text{ (excess related group indebtedness determined in Step 1)}]$

X's "U.S. base period ratio" for 1990 is:
 $(.52 + .50 + .50 + .50 + .48) / 5 = .50$

X's "allowable indebtedness" for 1990 is:
 $\$480,000 \times .50 = \$240,000$

§ 1.861-10T

26 CFR Ch. I (4-1-15 Edition)

X's "excess U.S. shareholder indebtedness" for 1990 is:

$$\$249,000 - \$240,000 = \$9,600$$

X's debt-to-asset ratio for 1990 is .52, which is greater than the ratio of .10 described in paragraph (e)(3)(vii) of this section. Therefore, X's excess U.S. shareholder indebtedness for 1990 remains at \$9,600.

(iv) *Step 3:* (a) Since X's excess U.S. shareholder indebtedness of \$9,600 is less than its excess related group indebtedness of \$20,000, X's allocable related group indebtedness for 1990 is \$9,600. The amount of interest received by X during 1990 on allocable related group indebtedness is:

$$\$5,000 \times \$9,600 / \$50,000 = \$960$$

(b) Therefore, \$960 of X's third party interest expense (\$24,960) shall be allocated among various separate limitation categories in proportion to the relative average amounts of Y obligations held by X in each such category. The amount of Y obligations in each limitation category is determined in the same manner as the stock of Y would be attributed under the rules of § 1.861-12T(c)(3). Since Y's interest expense is apportioned under the gross income method prescribed in § 1.861-9T(j), the Y stock must be characterized under the gross income method described in § 1.861-12T(c)(3)(iii). Y's gross income net of interest expense is determined as follows:

Foreign source high withholding tax interest income

$$= \$5,000 - [(\$15,000) \text{ multiplied by } (\$5,000) / (\$5,000 + \$20,000)]$$

$$= \$2,000$$

and

Foreign source general limitation income

$$= \$20,000 - [(\$15,000) \text{ multiplied by } (\$20,000) / (\$5,000 + \$20,000)]$$

$$= \$8,000.$$

(c) Therefore, \$192 [(\$960 × \$2,000 / (\$2,000 + \$8,000))] of X's third party interest expense is allocated to foreign source high withholding tax interest income and \$768 [\$960 × \$8,000 / (\$2,000 + \$8,000)] is allocated to foreign source general limitation income.

(v) As a result of these direct allocations, for purposes of apportioning X's remaining interest expense under § 1.861-9T, the value of X's assets generating foreign source general limitation income is reduced by the principal amount of indebtedness the interest on which is directly allocated to foreign source general limitation income (\$7,680), and the value of X's assets generating foreign source high withholding tax interest income is reduced by the principal amount of indebtedness the interest on which is directly allocated to foreign source high withholding tax interest income (\$1,920), determined as follows:

Reduction of X's assets generating foreign source general limitation income:

$$\text{X's allocable related group indebtedness} \times \frac{\text{Y's Foreign source general limitation income}}{\text{Y's Foreign source income}}$$

$$\$9,600 \times \$8,000 / (\$8,000 + \$2,000) = \$7,680$$

Reduction of X's assets generating foreign source high withholding tax interest income:

$$\text{X's allocable related group indebtedness} \times \frac{\text{Y's Foreign source high withholding tax interest income}}{\text{Y's Foreign source income}}$$

$$\$9,600 \times \$2,000 / (\$8,000 + \$2,000) = \$1,920$$

[T.D. 8410, 57 FR 13022, Apr. 15, 1992; 57 FR 28012, June 23, 1992]

§ 1.861-10T Special allocations of interest expense (temporary).

(a) *In general.* This section applies to all taxpayers and provides three exceptions to the rules of § 1.861-9T that re-

quire the allocation and apportionment of interest expense on the basis of all assets of all members of the affiliated group. Paragraph (b) of this section describes the direct allocation of interest

expense to the income generated by certain assets that are subject to qualified nonrecourse indebtedness. Paragraph (c) of this section describes the direct allocation of interest expense to income generated by certain assets that are acquired in integrated financial transaction. Paragraph (d) of this section provides special rules that are applicable to all transactions described in paragraphs (b) and (c) of this section. Paragraph (e) of this section requires the direct allocation of third party interest of an affiliated group to such group's investment in related controlled foreign corporations in cases involving excess related person indebtedness (as defined therein). See also § 1.861-9T(b)(5), which requires direct allocation of amortizable bond premium.

(b) *Qualified nonrecourse indebtedness*—(1) *In general.* In the case of qualified nonrecourse indebtedness (as defined in paragraph (b)(2) of this section), the deduction for interest shall be considered directly allocable solely to the gross income which the property acquired, constructed, or improved with the proceeds of the indebtedness generates, has generated, or could reasonably be expected to generate.

(2) *Qualified nonrecourse indebtedness defined.* The term “qualified nonrecourse indebtedness” means any borrowing that is not excluded by paragraph (b)(4) of this section if:

(i) The borrowing is specifically incurred for the purpose of purchasing, constructing, or improving identified property that is either depreciable tangible personal property or real property with a useful life of more than one year or for the purpose of purchasing amortizable intangible personal property with a useful life of more than one year;

(ii) The proceeds are actually applied to purchase, construct, or improve the identified property;

(iii) Except as provided in paragraph (b)(7)(ii) (relating to certain third party guarantees in leveraged lease transactions), the creditor can look only to the identified property (or any lease or other interest therein) as security for payment of the principal and interest on the loan and, thus, cannot look to any other property, the bor-

rower, or any third party with respect to repayment of principal or interest on the loan;

(iv) The cash flow from the property, as defined in paragraph (b)(3) of this section, is reasonably expected to be sufficient in the first year of ownership as well as in each subsequent year of ownership to fulfill the terms and conditions of the loan agreement with respect to the amount and timing of payments of interest and original issue discount and periodic payments of principal in each such year; and

(v) There are restrictions in the loan agreement on the disposal or use of the property consistent with the assumptions described in subdivisions (iii) and (iv) of this paragraph (b)(2).

(3) *Cash flow defined*—(i) *In general.* The term “cash flow from the property” as used in paragraph (b)(2)(iv) of this section means a stream of revenue (as computed under paragraph (b)(3)(ii) of this section) substantially all of which derives directly from the property. The phrase “cash flow from the property” does not include revenue if a significant portion thereof is derived from activities such as sales, labor, services, or the use of other property. Thus, revenue derived from the sale or lease of inventory or of similar property does not constitute cash flow from the property, including plant or equipment used in the manufacture and sale or lease, or purchase and sale or lease, of such inventory or similar property. In addition, revenue derived in part from the performance of services that are not ancillary and subsidiary to the use of property does not constitute cash flow from the property.

(ii) *Self-constructed assets.* The activities associated with self-construction of assets shall be considered to constitute labor or services for purposes of paragraph (b)(3)(i) only if the self-constructed asset—

(A) Is constructed for the purpose of resale, or

(B) Without regard to purpose, is sold to an unrelated person within one year from the date that the property is placed in service for purposes of section 167.

(iii) *Computation of cash flow.* Cash flow is computed by subtracting cash

disbursements excluding debt service from cash receipts.

(iv) *Analysis of operating costs.* [Reserved]

(v) *Examples.* The principles of this paragraph may be demonstrated by the following examples.

Example 1. In 1987, X borrows \$100,000 in order to purchase an apartment building, which X then purchases. The loan is secured only by the building and the leases thereon. Annual debt service on the loan is \$12,000. Annual gross rents from the building are \$20,000. Annual taxes on the building are \$2,000. Other expenses deductible under section 162 are \$2,000. Rents are reasonably expected to remain stable or increase in subsequent years, and taxes and expenses are reasonably expected to remain proportional to gross rents in subsequent years. X provides security, maintenance, and utilities to the tenants of the building. Based on facts and circumstances, it is determined that, although services are provided to tenants, these services are ancillary and subsidiary to the occupancy of the apartments. Accordingly, the cash flow of \$16,000 is considered to constitute a return from the property. Furthermore, such cash flow is sufficient to fulfill the terms and conditions of the loan agreement as required by paragraph (b)(2)(iii).

Example 2. In 1987, X borrows funds in order to purchase a hotel, which X then purchases and operates. The loan is secured only by the hotel. Based on facts and circumstances, it is determined that the operation of the hotel involves services the value of which is significant in relation to amounts paid to occupy the rooms. Thus, a significant portion of the cash flow is derived from the performance of services incidental to the occupancy of hotel rooms. Accordingly, the cash flow from the hotel is considered not to constitute a return on or from the property.

Example 3. In 1987, X borrows funds in order to build a factory, which X then builds and operates. The loan is secured only by the factory and the equipment therein. Based on the facts and circumstances, it is determined that the operation of the factory involves significant expenditures for labor and raw materials. Thus, a significant portion of the cash flow is derived from labor and the processing of raw materials. Accordingly, the cash flow from the factory is considered not to constitute a return on or from the property.

(4) *Exclusions.* The term “qualified nonrecourse indebtedness” shall not include any transaction that—

(i) Lacks economic significance within the meaning of paragraph (b)(5) of this section;

(ii) Involves cross collateralization within the meaning of paragraph (b)(6) of this section;

(iii) Except in the case of a leveraged lease described in paragraph (b)(7)(i) of this section, involves credit enhancement within the meaning of paragraph (b)(7) of this section or, with respect to loans made on or after October 14, 1988, does not under the terms of the loan documents, prohibit the acquisition by the holder of bond insurance or similar forms of credit enhancement;

(iv) Involves the purchase of inventory;

(v) Involves the purchase of any financial asset, including stock in a corporation, an interest in a partnership or a trust, or the debt obligation of any obligor (although interest incurred in order to purchase certain financial instruments may qualify for direct allocation under paragraph (c) of this section);

(vi) Involves interest expense that constitutes qualified residence interest as defined in section 163(h)(3); or

(vii) [Reserved]

(5) *Economic significance.* Indebtedness that otherwise qualifies under paragraph (b)(2) shall nonetheless be subject to apportionment under § 1.861-9T if, taking into account all the facts and circumstances, the transaction (including the security arrangement) lacks economic significance.

(6) *Cross collateralization.* The term “cross collateralization” refers to the pledge as security for a loan of—

(i) Any asset of the borrower other than the identified property described in paragraph (b)(2) of this section, or

(ii) Any asset belonging to any related person, as defined in § 1.861-8T(c)(2).

(7) *Credit enhancement—(i) In general.* Except as provided in paragraph (b)(7)(ii) of this section, the term “credit enhancement” refers to any device, including a contract, letter of credit, or guaranty, that expands the creditor’s rights, directly or indirectly, beyond the identified property purchased, constructed, or improved with the funds advanced and, thus effectively provides as security for a loan the assets of any person other than the borrower. The acquisition of bond insurance or any other contract of

suretyship by an initial or subsequent holder of an obligation shall constitute credit enhancement.

(ii) *Special rule for leveraged leases.* For purposes of this paragraph (b), the term “credit enhancement” shall not include any device under which any person that is not a related person within the meaning of §1.861-8T(c)(2) agrees to guarantee, without recourse to the lessor or any person related to the lessor, a lessor’s payment of principal and interest on indebtedness that was incurred in order to purchase or improve an asset that is depreciable tangible personal property or depreciable tangible real property (and the land on which such real property is situated) that is leased to a lessee that is not a related person in a transaction that constitutes a lease for federal income tax purposes.

(iii) *Syndication of credit risk and sale of loan participations.* The term “syndication of credit risk” refers to an arrangement in which one primary lender secures the promise of a secondary lender to bear a portion of the primary lender’s credit risk on a loan. The term “sale of loan participations” refers to an arrangement in which one primary lender divides a loan into several portions, sells and assigns all rights with respect to one or more portions to participating secondary lenders, and does not remain at risk in any manner with respect to the portion assigned. For purposes of this paragraph (b), the syndication of credit risk shall constitute credit enhancement because the primary lender can look to secondary lenders for payment of the loan, notwithstanding limitations on the amount of the secondary lender’s liability. Conversely, the sale of loan participations does not constitute credit enhancement, because the holder of each portion of the loan can look solely to the asset securing the loan and not to the credit or other assets of any person.

(8) *Other arrangements that do not constitute cross collateralization or credit enhancement.* For purposes of paragraphs (b) (6) and (7) of this section, the following arrangements do not constitute cross collateralization or credit enhancement:

(i) *Integrated projects.* A taxpayer’s pledge of multiple assets of an integrated project, provided that the integrated project. An integrated project consists of functionally related and geographically contiguous assets that, as to the taxpayer, are used in the same trade or business.

(ii) *Insurance.* A taxpayer’s purchase of third-party casualty and liability insurance on the collateral or, by contract, bearing the risk of loss associated with destruction of the collateral or with respect to the attachment of third party liability claims.

(iii) *After-acquired property.* Extension of a creditor’s security interest to improvements made to the collateral, provided that the extension does not constitute excess collateralization under paragraph (b)(6), determined by taking into account the value of improvements at the time the improvements are made and the value of the original property at the time the loan was made.

(iv) *Warranties of completion and maintenance.* A taxpayer’s warranty to a creditor that it will complete construction or manufacture of the collateral or that it will maintain the collateral in good condition.

(v) *Substitution of collateral.* A taxpayer’s right to substitute collateral under any loan contract. However, after the right is exercised, the loan shall no longer constitute qualified nonrecourse indebtedness.

(9) *Refinancings.* If a taxpayer refinances qualified nonrecourse indebtedness (as defined in paragraph (b)(2) of this section) with new indebtedness, such new indebtedness shall continue to qualify only if—

(i) The principal amount of the new indebtedness does not exceed by more than five percent the remaining principal amount of the original indebtedness,

(ii) The term of the new indebtedness does not exceed by more than six months the remaining term of the original indebtedness, and

(iii) The requirements of this paragraph (other than those of paragraph (b)(2) (i) and (ii) of this section) are satisfied at the time of the refinancing, and the exclusions contained in this paragraph (b)(4) do not apply.

(10) *Post-construction permanent financing.* Financing that is obtained after the completion of constructed property will be deemed to satisfy the requirements of paragraph (b)(2) (i) and (ii) of this section if—

(i) The financing is obtained within one year after the constructed property or substantially all of a constructed integrated project (as defined in paragraph (b)(9)(i) of this section) is placed in service for purposes of section 167; and

(ii) The financing does not exceed the cost of construction (including construction period interest).

(11) *Assumptions of pre-existing qualified nonrecourse indebtedness.* If a transferee of property that is subject to qualified nonrecourse indebtedness assumes such indebtedness, the indebtedness shall continue to constitute qualified nonrecourse indebtedness, provided that the assumption in no way alters the qualified status of the debt.

(12) *Excess collateralization.* [Reserved]

(c) *Direct allocations in the case of certain integrated financial transactions—(1) General rule.* Interest expense incurred on funds borrowed in connection with an integrated financial transaction (as defined in paragraph (c)(2) of this section) shall be directly allocated to the income generated by the investment funded with the borrowed amounts.

(2) *Definition.* The term “integrated financial transaction” refers to any transaction in which—

(i) The taxpayer—

(A) Incurs indebtedness for the purpose of making an identified term investment,

(B) Identifies the indebtedness as incurred for such purpose at the time the indebtedness is incurred, and

(C) Makes the identified term investment within ten business days after incurring the indebtedness;

(ii) The return on the investment is reasonably expected to be sufficient throughout the term of the investment to fulfill the terms and conditions of the loan agreement with respect to the amount and timing of payments of principal and interest or original issue discount;

(iii) The income constitutes interest or original issue discount or would constitute income equivalent to interest if

earned by a controlled foreign corporation (as described in § 1.954-2T(h));

(iv) The debt incurred and the investment mature within ten business days of each other;

(v) The investment does not relate in any way to the operation of, and is not made in the normal course of, the trade or business of the taxpayer or any related person, including the financing of the sale of goods or the performance of services by the taxpayer or any related person, or the compensation of the taxpayer’s employees (including any contribution or loan to an employee stock ownership plan (as defined in section 4975(e)(7)) or other plan that is qualified under section 401(a)); and

(vi) The borrower does not constitute a financial services entity (as defined in section 904 and the regulations thereunder).

(3) *Rollovers.* In the event that a taxpayer sells or otherwise liquidates an investment described in paragraph (c)(2) of this section, the interest expense incurred on the borrowing shall, subsequent to that liquidation, no longer qualify for direct allocation under this paragraph (c).

(4) *Examples.* The principles of this paragraph (c) may be demonstrated by the following examples.

Example 1. X is a manufacturer and does not constitute a financial services entity as defined in the regulations under section 904. On January 1, 1988, X borrows \$100 for 6 months at an annual interest rate of 10 percent. X identifies on its books and records by the close of that day that the indebtedness is being incurred for the purpose of making an investment that is intended to qualify as an integrated financial transaction. On January 5, 1988, X uses the proceeds to purchase a portfolio of stock that approximates the composition of the Standard & Poor’s 500 Index. On that day, X also enters into a forward sale contract that requires X to sell the stock on June 1, 1988 for \$110. X identifies on its books and records by the close of January 5, 1988, that the portfolio stock purchases and the forward sale contract constitute part of the integrated financial transaction with respect to which the identified borrowing was incurred. Under § 1.954-2T(h), the income derived from the transaction would constitute income equivalent to interest. Assuming that the return on the investment to be derived on June 1, 1988, will be sufficient to pay the interest due on June 1, 1988, the interest on the borrowing is directly allocated to the gain from the investment.

Example 2. X does not constitute a financial services entity as defined in the regulations under section 904. X is in the business of, among other things, issuing credit cards to consumers and purchasing from merchants who accept the X card the receivables of consumers who make purchases with the X card. X borrows from Y in order to purchase X credit card receivables from Z, a merchant. Assuming that the Y borrowing satisfies the other requirements of paragraph (c)(2) of this section, the transaction nonetheless cannot constitute an integrated financial transaction because the purchase relates to the operation of X's trade or business.

Example 3. Assume the same facts as in Example 2, except that X borrows in order to purchase the receivables of A, a merchant who does not accept the X card and is not otherwise engaged directly or indirectly in any business transaction with X. Because the borrowing is not related to the operation of X's trade or business, the borrowing may qualify as an integrated financial transaction if the other requirements of paragraph (c)(2) of this section are satisfied.

(d) *Special rules.* In applying paragraphs (b) and (c) of this section, the following special rules shall apply.

(1) *Related person transactions.* The rules of this section shall not apply to the extent that any transaction—

(i) Involves either indebtedness between related persons (as defined in section § 1.861-8T(c)(2)) or indebtedness incurred from unrelated persons for the purpose of purchasing property from a related person; or

(ii) Involves the purchase of property that is leased to a related person (as defined in § 1.861-8T(c)(2)) in a transaction described in paragraph (b) of this section. If a taxpayer purchases property and leases such property in whole or in part to a related person, a portion of the interest incurred in connection with such an acquisition, based on the ratio that the value of the property leased to the related person bears to the total value of the property, shall not qualify for direct allocation under this section.

(2) *Consideration of assets or income to which interest is directly allocated in apportioning other interest expense.* In apportioning interest expense under § 1.861-9T, the year-end value of any asset to which interest expense is directly allocated under this section during the current taxable year shall be reduced to the extent provided in

§ 1.861-9T(g)(2)(iii) to reflect the portion of the principal amount of the indebtedness outstanding at year-end relating to the interest which is directly allocated. A similar adjustment shall be made to the end-of-year value of assets for the prior year for purposes of determining the beginning-of-year value of assets for the current year. These adjustments shall be made prior to averaging beginning-of-year and end-of-year values pursuant to § 1.861-9T(g)(2). In apportioning interest expense under the modified gross income method, gross income shall be reduced by the amount of income to which interest expense is directly allocated under this section.

(e) *Treatment of certain related controlled foreign corporation indebtedness—*
(1) *In general.* In taxable years beginning after 1987, if a United States shareholder has incurred substantially disproportionate indebtedness in relation to the indebtedness of its related controlled foreign corporations so that such corporations have excess related person indebtedness (as determined under step 4 in subdivision (iv) of this paragraph (e)(1), the third party interest expense of the related United States shareholder (excluding amounts allocated under paragraphs (b) and (c)) in an amount equal to the interest income received on such excess related person indebtedness shall be allocated to gross income in the various separate limitation categories described in section 904(d)(1) in the manner prescribed in step 6 in subdivision (vi) of this paragraph (e)(1). This computation shall be performed as follows.

(i) *Step 1: Compute the debt-to-asset ratio of the related United States shareholder.* The debt-to-asset ratio of the related United States shareholder is the ratio between—

(A) The average month-end debt level of the related United States shareholder taking into account debt owing to any obligee who is not a related person as defined in section § 1.861-8T(c)(2), and

(B) The value of assets (tax book or fair market) of the related United States shareholder including stockholdings and obligations of related controlled foreign corporations but excluding stockholdings and obligations of

§ 1.861-10T

26 CFR Ch. I (4-1-15 Edition)

members of the affiliated group (as defined in § 1.861-11T(d)).

(ii) *Step 2: Compute aggregate debt-to-asset ratio of all related controlled foreign corporations.* The aggregate debt-to-asset ratio of all related controlled foreign corporations is the ratio between—

(A) The average aggregate month-end debt level of all related controlled foreign corporations for their taxable years ending during the related United States shareholder's taxable year taking into account only indebtedness owing to persons other than the related United States shareholder or the related United States shareholder's other related controlled foreign corporations ("third party indebtedness"), and

(B) The aggregate value (tax book or fair market) of the assets of all related controlled foreign corporations for their taxable years ending during the related United States shareholder's taxable year excluding stockholdings in and obligations of the related United States shareholder or the related United States shareholder's other related controlled foreign corporations.

(iii) *Step 3: Compute aggregate related person debt of all related controlled foreign corporations.* This amount equals the average aggregate month-end debt level of all related controlled foreign corporations for their taxable years ending with or within the related United States shareholder's taxable year, taking into account only debt which is owned to the related United States shareholder ("related person indebtedness").

(iv) *Step 4: Computation of excess related person indebtedness and computation of the income therefrom—(A) General rule.* If the ratio computed under step 2 is less than applicable percentage of the ratio computed under step 1, the taxpayer shall add to the aggregate third party indebtedness of all related controlled foreign corporations determined under paragraph (e)(1)(ii)(A) of this section that portion of the related

person indebtedness computed under step 3 that, when combined with the aggregate third party indebtedness of all controlled foreign corporations, makes the ratio computed under step 2 equal to applicable percentage of the ratio computed under step 1. The amount of aggregate related person debt that is so added to the aggregate third party debt of related controlled foreign corporations is considered to constitute excess related person indebtedness. For purposes of this paragraph (e)(1)(iv)(A), the term "applicable percentage" means the designated percentages for taxable years beginning during the following calendar years:

| Taxable years beginning in | Applicable percentage |
|----------------------------|-----------------------|
| 1988 | 50 |
| 1989 | 65 |
| 1990 and thereafter | 80 |

(B) *Elective quadratic formula.* In calculating the amount of excess related party indebtedness of related controlled foreign corporations, the United States shareholder's debt-to-asset ratio may be adjusted to reflect the amount by which its debt and assets would be reduced had the related controlled foreign corporations incurred the excess related party indebtedness directly to third parties. In such case, the ratio computed in Step 1 is adjusted to reflect a reduction of both portions of the ratio by the amount of excess related person indebtedness as computed under this paragraph (e)(1)(ii)(A). Excess related person indebtedness may be computed under the following formula, under which excess related person indebtedness equals the smallest positive amount (not exceeding the aggregate amount of related controlled foreign corporation indebtedness) that is a solution to the following formula (with X equalling the amount of excess related person indebtedness):

$$\frac{\text{Aggregate third party debt of related US shareholder} - X}{\text{US shareholder assets} - X} \times \text{Applicable percentage for year} = \frac{\text{Aggregate third party debt of related CFCs} + X}{\text{Related CFC assets}}$$

Guidance concerning the solution of this equation is set forth in *Example (2)* of § 1.861-12(k).

(C) *Computation of interest income received on excess related party indebtedness.* The amount of interest income received on excess related person indebtedness equals the total interest income on related person indebtedness derived by the related United States shareholder during the taxable year multiplied by the ratio of excess related person indebtedness over the aggregate related person indebtedness for the taxable year.

(v) *Step 5: Determine the aggregate amount of related controlled foreign corporation obligations held by the related United States shareholder in each limitation category.* The aggregate amount of related controlled foreign corporation obligations held by the related United States shareholder in each limitation category equals the sum of the value of all such obligations in each limitation category. Solely for purposes of this paragraph (e)(1)(v), each debt obligation in a related controlled foreign corporation held by a related United States shareholder shall be attributed to separate limitation categories in the same manner as the stock of the obligor would be attributed under the rules of § 1.861-12T(c)(3), whether or not such stock is held directly by such related United States shareholder.

(vi) *Step 6: Direct allocation of United States shareholder third party interest expense.* Third party interest expense of the related United States shareholder equal to the amount of interest income received on excess related person indebtedness as determined in step 4 shall be allocated among the various separate limitation categories in proportion to the relative aggregate amount of related controlled foreign corporation obligations held by the related United States shareholder in each such category, as determined under step 5. The remaining portion of third party interest expense will be apportioned as provided in §§ 1.861-8T through 1.861-13T, excluding this paragraph.

(2) *Definitions*—(i) *United States shareholder.* For purposes of this paragraph, the term “United States shareholder” has the same meaning as defined by

section 957, except that, in the case of a United States shareholder that is a member an affiliated group (as defined in § 1.861-11T(d)), the entire affiliated group shall be considered to constitute a single United States shareholder. The term “related United States shareholder” is the United States shareholder (as defined in this paragraph (e)(2)(i)) with respect to which related controlled foreign corporations (as defined in paragraph (e)(2)(ii) of this section) are related within the meaning of that paragraph.

(ii) *Related controlled foreign corporation.* For purposes of this section, the term “related controlled foreign corporation” means any controlled foreign corporation which is a related person (as defined in § 1.861-8T(c)(2)) to a United States shareholder (as defined paragraph (e)(2)(i) of this section).

(iii) *Value of assets and amount of liabilities.* For purposes of this section, the value of assets is determined under § 1.861-9T(g). Thus, in the case of assets that are denominated in foreign currency, the average of the beginning-of-year and end-of-year values is determined in foreign currency and translated into dollars using exchange rates on the last day of the related United States shareholder’s taxable year. In the case of liabilities that are denominated in foreign currency, the average month-end debt level of such liabilities is determined in foreign currency and then translated into dollars using exchange rates on the last day of the related United States shareholder’s taxable year.

(3) *Treatment of certain stock.* To the extent that there is insufficient related person indebtedness of all related controlled foreign corporations under step 3 in paragraph (e)(1)(iii) of this section to achieve as equal ratio in step 4 of paragraph (e)(1)(iv) of this section, certain stock held by the related United States shareholder will be treated as related person indebtedness. Such stock includes—

(i) Any stock in the related controlled foreign corporation that is treated in the same manner as debt under the law of any foreign country that grants a deduction for interest or original issue discount relating to such stock, and

(ii) Any stock in a related controlled foreign corporation that has made loans to, or held stock described in this paragraph (e)(3) in, another related controlled foreign corporation. However, such stock shall be treated as related person indebtedness only to the extent of the principal amount of such loans.

For purposes of computing income from excess related person indebtedness in step 4 of paragraph (e)(1)(iv) of this section, stock that is treated under this paragraph as related person indebtedness shall be considered to yield interest in an amount equal to the interest that would be computed on an equal amount of indebtedness under section 1274. Only dividends actually paid thereon shall be included in gross income for other purposes.

(4) *Adjustments to assets in apportioning other interest expense.* In apportioning interest expense under § 1.861-9T, the value of assets in each separate limitation category for the taxable year as determined under § 1.861-9T(g)(3) shall be reduced (but not below zero) by the principal amount of third party indebtedness of the related United States shareholder the interest expense on which is allocated to each such category under paragraph (e)(1) of this section.

(5) *Exceptions—(i) Per company rule.* If—

(A) A related controlled foreign corporation with obligations owing to a related United States shareholder has a greater proportion of passive assets than the proportion of passive assets held by the related United States shareholder,

(B) Such passive assets are held in liquid or short term investments, and

(C) There are frequent cash transfers between the related controlled foreign corporation and the related United States shareholder,

the Commissioner, in his discretion, may choose to exclude such a corporation from other related controlled foreign corporations in the application of the rules of this paragraph (e).

(ii) *Aggregate rule.* If it is determined that, in aggregate, the application of the rules of this paragraph (e) increases a taxpayer's foreign tax credit as determined under section 901(a), the Com-

missioner, in his discretion, may choose not to apply the rules of this paragraph. If the Commissioner exercises discretion under this paragraph (e)(5)(ii), then paragraph (e) shall not apply to any extent to any interest expense of the taxpayer.

(f) *Effective/applicability date.* (1) In general, the rules of this section apply for taxable years beginning after December 31, 1986.

(2) Paragraphs (b)(3)(ii) (providing an operating costs test for purposes of the nonrecourse indebtedness exception) and (b)(6) (concerning excess collateralization of nonrecourse borrowings) of this section are applicable for taxable years commencing after December 31, 1988.

(3) Paragraph (e) (concerning the treatment of related controlled foreign corporation indebtedness) of this section is applicable for taxable years commencing after December 31, 1987. For rules for taxable years beginning before January 1, 1987, and for later years to the extent permitted by § 1.861-13T, see § 1.861-8 (revised as of April 1, 1986).

[T.D. 8228, 53 FR 35485, Sept. 14, 1988, as amended by T.D. 9456, 74 FR 38875, Aug. 4, 2009]

§ 1.861-11 Special rules for allocating and apportioning interest expense of an affiliated group of corporations.

(a)-(c) [Reserved]. For further guidance, see § 1.861-11T(a) through (c).

(d) *Definition of affiliated group—(1) General rule.* For purposes of this section, in general, the term *affiliated group* has the same meaning as is given that term by section 1504, except that section 936 corporations are also included within the affiliated group to the extent provided in paragraph (d)(2) of this section. Section 1504(a) defines an affiliated group as one or more chains of includible corporations connected through 80-percent stock ownership with a common parent corporation which is an includible corporation (as defined in section 1504(b)). In the case of a corporation that either becomes or ceases to be a member of the group during the course of the corporation's taxable year, only the interest expense incurred by the group member during

the period of membership shall be allocated and apportioned as if all members of the group were a single corporation. In this regard, assets held during the period of membership shall be taken into account. Other interest expense incurred by the group member during its taxable year but not during the period of membership shall be allocated and apportioned without regard to the other members of the group.

(2) *Inclusion of section 936 corporations—(i) Rule—(A) In general.* Except as otherwise provided in paragraph (d)(2)(i)(B) of this section, the exclusion of section 936 corporations from the affiliated group under section 1504(b)(4) does not apply for purposes of this section. Thus, a section 936 corporation that meets the ownership requirements of section 1504(a) is a member of the affiliated group.

(B) *Exception for purposes of alternative minimum tax.* The exclusion from the affiliated group of section 936 corporations under section 1504(b)(4) shall be operative for purposes of the application of this section solely in determining the amount of foreign source alternative minimum taxable income within each separate category and the alternative minimum tax foreign tax credit pursuant to section 59(a). Thus, a section 936 corporation that meets the ownership requirements of section 1504(a) is not a member of the affiliated group for purposes of determining the amount of foreign source alternative minimum taxable income within each separate category and the alternative minimum tax foreign tax credit pursuant to section 59(a).

(ii) *Section 936 corporation defined.* For purposes of this section, § 1.861-9, and § 1.861-14, the term *section 936 corporation* means, for any taxable year, a corporation with an election in effect to be eligible for the credit provided under section 936(a)(1) or section 30A for the taxable year.

(iii) *Example.* This example illustrates the provisions of paragraph (d)(2)(i) of this section:

Example. (A) Facts. X owns all of the stock of Y. XY constitutes an affiliated group of corporations within the meaning of section 1504(a) and uses the tax book value method of apportionment. In 2000, Y owns all of the stock of Z, a section 936 corporation. Z man-

ufactures widgets in Puerto Rico. Y purchases these widgets and markets them exclusively in the United States. Of the three corporations, only Z has foreign source income, which includes both qualified possessions source investment income and general limitation income. For purposes of section 904, Z's qualified possessions source investment income constitutes foreign source passive income. In computing the section 30A benefit, Y and Z have elected the cost sharing method. Of the three corporations, only X has debt and, thus, only X incurs interest expense.

(B) *Analysis for regular tax.* Assume first that X has no alternative minimum tax liability. Under paragraph (d)(2) of this section, Z is treated as a member of the XY affiliated group for purposes of allocating and apportioning interest expense for regular tax purposes. As provided in § 1.861-11T(b)(2), section 864(e)(1) and (5) do not apply in computing the combined taxable income of Y and Z under section 936, but these rules do apply in computing the foreign source taxable income of the XY affiliated group. The effect of including Z in the affiliated group is that X, the only debtor corporation in the group, must, under the asset method described in § 1.861-9T(g), apportion a part of its interest expense to foreign source passive income and foreign source general limitation income. This is because the assets of Z that generate qualified possessions source investment income and general limitation income are included in computing the group apportionment fractions. The result is that, under section 904(f), X has an overall foreign loss in both the passive and general limitation categories, which currently offsets domestic income and must be recaptured against any subsequent years' foreign passive income and general limitation income, respectively, under the rules of that section.

(C) *Analysis for alternative minimum tax.* Assume, alternatively, that X is liable to pay the alternative minimum tax. Pursuant to section 59(a), X must compute its alternative minimum tax foreign tax credit as if section 904 were applied on the basis of alternative minimum taxable income instead of taxable income. Under paragraph (d)(2)(i)(B) of this section, for purposes of the apportionment of interest expense in determining alternative minimum taxable income within each limitation category, Z is not considered a member of the XY affiliated group. Thus, the stock (and not the assets) of Z are included in computing the group apportionment fractions. Pursuant to sections 59(g)(4)(C)(iii)(IV), 861(a)(2)(A), and 862(a)(2), dividends paid by a section 936 corporation are foreign source income subject to a separate foreign tax credit limitation for alternative minimum tax purposes. Thus, under § 1.861-9T(g)(3), the stock of Z must be considered attributable solely to the statutory

§ 1.861-11T

26 CFR Ch. I (4-1-15 Edition)

grouping consisting of foreign source dividends from Z. The effect of excluding Z from the affiliated group is that X must apportion a part of its interest expense to the separate category for foreign source dividends from Z in computing alternative minimum taxable income within each separate category. If, as a result, under section 904(f), X has a separate limitation loss or an overall foreign loss in the category for dividends from Z for alternative minimum tax purposes, then that loss must be allocated against X's other income (separate limitation or United States source, as the case may be). The loss must be recaptured in subsequent years under the rules of section 904(f) for purposes of the alternative minimum tax foreign tax credit. * * *

(iv) *Effective date.* This paragraph (d)(2) applies to taxable years beginning after December 31, 1989.

(d)(3) through (6)(i) [Reserved]. For further guidance see § 1.861-11T(d)(3) through (6)(i).

(ii) Any foreign corporation if more than 50 percent of the gross income of such foreign corporation for the taxable year is effectively connected with the conduct of a trade or business within the United States and at least 80 percent of either the vote or value of all outstanding stock of such foreign corporation is owned directly or indirectly by members of the affiliated group (determined with regard to this sentence). This paragraph (d)(6)(ii) applies to taxable years beginning on or after *July 16, 2014*. See 26 CFR 1.861-11T(d)(6)(ii) (revised as of April 1, 2014) for rules applicable to taxable years beginning after August 10, 2010, and before *July 16, 2014*. See 26 CFR 1.861-11T(d)(6)(ii) (revised as of April 1, 2010) for rules applicable to taxable years beginning on or before August 10, 2010.

(7) *Special rules for the application of § 1.861-11T(d)(6).* The attribution rules of section 1563(e) and the regulations under that section shall apply in determining indirect ownership under § 1.861-11T(d)(6). The Commissioner shall have the authority to disregard trusts, partnerships, and pass-through entities that break affiliated status. Corporations described in § 1.861-11T(d)(6) shall be considered to constitute members of an affiliated group that does not file a consolidated return and shall therefore be subject to the limitations imposed under § 1.861-11T(g). The affiliated group filing a

consolidated return shall be considered to constitute a single corporation for purposes of applying the rules of § 1.861-11T(g). For taxable years beginning after December 31, 1989, § 1.861-11T(d)(6)(i) shall not apply in determining foreign source alternative minimum taxable income within each separate category and the alternative minimum tax foreign tax credit pursuant to section 59(a) to the extent that such application would result in the inclusion of a section 936 corporation within the affiliated group. This paragraph (d)(7) applies to taxable years beginning after December 31, 1986.

(e)-(g) [Reserved]. For further guidance, see § 1.861-11T(e) through (g).

[T.D. 8916, 66 FR 273, Jan. 3, 2001, as amended by T.D. 9676, 79 FR 41426, July 16, 2014]

§ 1.861-11T Special rules for allocating and apportioning interest expense of an affiliated group of corporations (temporary).

(a) *In general.* Sections 1.861-9T, 1.861-10T, 1.861-12T, and 1.861-13T provide rules that are generally applicable in apportioning interest expense. The rules of this section relate to affiliated groups of corporations and implement section 864(e) (1) and (5), which requires affiliated group allocation and apportionment of interest expense. The rules of this section apply to taxable years beginning after December 31, 1986, except as otherwise provided in § 1.861-13T. Paragraph (b) of this section describes the scope of the application of the rule for the allocation and apportionment of interest expense of affiliated groups of corporations, which is contained in paragraph (c) of this section. Paragraph (d) of this section sets forth the definition of the term "affiliated group" for purposes of this section. Paragraph (e) describes the treatment of loans between members of an affiliated group. Paragraph (f) of this section provides rules concerning the affiliated group allocation and apportionment of interest expense in computing the combined taxable income of a FSC or DISC and its related supplier. Paragraph (g) of this section describes the treatment of losses caused by apportionment of interest expense in the case of an affiliated group that does not file a consolidated return.

(b) *Scope of application*—(1) *Application of section 864(e) (1) and (5) (concerning the definition and treatment of affiliated groups)*. Section 864(e) (1) and (5) and the portions of this section implementing section 864(e) (1) and (5) apply to the computation of foreign source taxable income for purposes of section 904 (relating to various limitations on the foreign tax credit). Section 904 imposes separate foreign tax credit limitations on passive income, high withholding interest income, financial services income, shipping income, income consisting of dividends from each noncontrolled section 902 corporation, income consisting of dividends from a DISC or former DISC, taxable income attributable to foreign trade income within the meaning of section 923(b), distributions from a FSC or former FSC, and all other forms of foreign source income not enumerated above (“general limitation income”). Section 864(e) (1) and (5) and the portions of this section implementing section 864(e) (1) and (5) also apply in connection with section 907 to determine reductions in the amount allowed as a foreign tax credit under section 901. Section 864(e) (1) and (5) and the portions of this section implementing section 864(e) (1) and (5) also apply to the computation of the combined taxable income of the related supplier and a foreign sales corporation (FSC) (under sections 921 through 927) as well as the combined taxable income of the related supplier and a domestic international sales corporation (DISC) (under sections 991 through 997).

(2) *Nonapplication of section 864(e) (1) and (5) (concerning the definition and treatment of affiliated groups)*. Section 864(e) (1) and (5) and the portions of this section implementing section 864(e) (1) and (5) do not apply to the computation of subpart F income of controlled foreign corporations (under sections 951 through 964), the computation of combined taxable income of a possessions corporation and its affiliates (under section 936), or the computation of effectively connected taxable income of foreign corporations. For the rules with respect to the allocation and apportionment of interest expenses of foreign corporations other

than controlled foreign corporations, see §§ 1.882-4 and 1.882-5.

(c) *General rule for affiliated corporations*. Except as otherwise provided in this section, the taxable income of each member of an affiliated group within each statutory grouping shall be determined by allocating and apportioning the interest expense of each member according to apportionment fractions which are computed as if all members of such group were a single corporation. For purposes of determining these apportionment fractions, stock in corporations within the affiliated group (as defined in section 864(e)(5) and the rules of this section) shall not be taken into account. In the case of an affiliated group of corporations that files a consolidated return, consolidated foreign tax credit limitations are computed for the group in accordance with the rules of § 1.1502-4. Except as otherwise provided, all the interest expense of all members of the group will be treated as definitely related and therefore allocable to all the gross income of the members of the group and all the assets of all the members of the group shall be taken into account in apportioning this interest expense. For purposes of this section, the term “taxpayer” refers to the affiliated group (regardless of whether the group files a consolidated return), rather than to the separate members thereof.

(d)(1)–(2) [Reserved]. For further guidance, see § 1.861-11(d)(1) and (2).

(3) *Treatment of life insurance companies subject to taxation under section 801*—(i) *General rule*. A life insurance company that is subject to taxation under section 801 shall be considered to constitute a member of the affiliated group composed of companies not taxable under section 801 only if a parent corporation so elects under section 1504(c)(2)(A) of the Code. If a parent does not so elect, no adjustments shall be required with respect to such an insurance company under paragraph (g) of this section.

(ii) *Treatment of stock*. Stock of a life insurance company that is subject to taxation under section 801 that is not included in an affiliated group shall be

disregarded in the allocation and apportionment of the interest expense of such affiliated group.

(4) *Treatment of certain financial corporations*—(i) *In general.* In the case of an affiliated group (as defined in paragraph (d)(1) of this section), any member that constitutes financial corporations as defined in paragraph (d)(4)(ii) of this section shall be treated as a separate affiliated group consisting of financial corporations (the “financial group”). The members of the group that do not constitute financial corporations shall be treated as members of a separate affiliated group consisting of nonfinancial corporations (“the nonfinancial group”).

(ii) *Financial corporation defined.* The term “financial corporation” means any corporation which meets all of the following conditions:

(A) It is described in section 581 (relating to the definition of a bank) or section 591 (relating to the deduction for dividends paid on deposits by mutual savings banks, cooperative banks, domestic building and loan associations, and other savings institutions chartered and supervised as savings and loan or similar associations);

(B) Its business is predominantly with persons other than related persons (within the meaning of section 864(d)(4) and the regulations thereunder) or their customers; and

(C) It is required by state or Federal law to be operated separately from any other entity which is not such an institution.

(iii) *Treatment of bank holding companies.* The total aggregate interest expense of any member of an affiliated group that constitutes a bank holding company subject to regulation under the Bank Holding Company Act of 1956 shall be prorated between the financial group and the nonfinancial group on the basis of the assets in the financial and nonfinancial groups. For purposes of making this proration, the assets of each member of each group, and not the stock basis in each member, shall be taken into account. Any direct or indirect subsidiary of a bank holding company that is predominantly engaged in the active conduct of a banking, financing, or similar business shall be considered to be a financial corpora-

tion for purposes of this paragraph (d)(4). The interest expense of the bank holding company must be further apportioned in accordance with § 1.861-9T(f) to the various section 904(d) categories of income contained in both the financial group and the nonfinancial group on the basis of the assets owned by each group. For purposes of computing the apportionment fractions for each group, the assets owned directly by a bank holding company within each limitation category described in section 904(d)(1) (other than stock in affiliates or assets described in § 1.861-9T(f)) shall be treated as owned pro rata by the nonfinancial group and the financial group based on the relative amounts of investments of the bank holding company in the nonfinancial group and financial group.

(iv) *Consideration of stock of the members of one group held by members of the other group.* In apportioning interest expense, the nonfinancial group shall not take into account the stock of any lower-tier corporation that is treated as a member of the financial group under paragraph (d)(4)(i) of this section. Conversely, in apportioning interest expense, the financial group shall not take into account the stock of any lower-tier corporation that is treated as a member of the nonfinancial group under paragraph (d)(4)(i) of this section. For the treatment of loans between members of the financial group and members of the nonfinancial group, see paragraph (e)(1) of this section.

(5) *Example.* (i) *Facts.* X, a domestic corporation which is not a bank holding company, is the parent of domestic corporations Y and Z. Z owns 100 percent of the stock Z1, which is also a domestic corporation. X, Y, Z, and Z1 were organized after January 1, 1987, and constitute an affiliated group within the meaning of paragraph (d)(1) of this section. Y and Z are financial corporations described in paragraph (d)(4) of this section. X also owns 25 percent of the stock of A, a domestic corporation. Y owns 25 percent of the voting stock of B, a foreign corporation that is not a controlled foreign corporation.

Internal Revenue Service, Treasury

§ 1.861-11T

Z owns less than 10 percent of the voting stock of C, another foreign corporation. The foreign source income generated by Y's or Z's direct assets is exclusively financial services income. The foreign source income generated by X's or Z1's direct assets is exclusively general limitation income. X and Z1 are not financial corporations described in paragraph (d)(4)(ii) of this section. Y and Z, therefore, constitute a separate affiliated group apart from X and Z1 for purposes of section 864(e). The combined interest expense of Y and Z of \$100,000 (\$50,000 each) is apportioned separately on the basis of their assets. The combined interest expense of X and Z1 of \$50,000 (\$25,000 each) is allocated on the basis of the assets of the XZ1 group.

| | |
|---|--------------------|
| Analysis of the YZ group assets | |
| Adjusted basis of assets of the YZ group that generate foreign source financial services income (excluding stock of foreign subsidiaries not included in the YZ affiliated group) | \$200,000 |
| Z's basis in the C stock (not adjusted by the allocable amount of C's earnings and profits because Z owns less than 10 percent of the stock) which would be considered to generate passive income in the hands of a non-financial services entity but is considered to generate financial services income when in the hands of Z, a financial services entity | \$100,000 |
| Y's basis in the B stock (adjusted by the allocable amount of B's earnings and profits) which generates dividends subject to a separate limitation for B dividends | \$100,000 |
| Adjusted basis of assets of the YZ group that generate U.S. source income | \$600,000 |
| Total assets | \$1,000,000 |
| Analysis of the XZ1 group assets | |
| Adjusted basis of assets of the XZ1 group that generate foreign source general limitation income | \$500,000 |
| Adjusted basis of assets of the XZ1 group other than A stock that generate domestic source income | \$1,900,000 |
| X's basis in the A stock adjusted by the allocable amount of A's earnings and profits | \$100,000 |

| | |
|-----------------------------|-------------|
| Total domestic assets | \$2,000,000 |
| Total assets | \$2,500,000 |

(ii) *Allocation.* No portion of the \$50,000 deduction of the YZ group is definitely related solely to specific property within the meaning of §1.861-10T. Thus, the YZ group's deduction for interest is related to all its activities and properties. Similarly, no portion of the \$50,000 deduction of the XZ1 group is definitely related solely to specific property within the meaning of §1.861-10T. Thus, the XZ1 group's deduction for interest is related to all its activities and properties.

(iii) *Apportionment.* The YZ group would apportion its interest expense as follows:

To gross financial services income from sources outside the United States:

$$\$50,000 \times \frac{\$300,000}{\$1,000,000} \dots\dots \$15,000$$

To gross income subject to a separate limitation for dividends from B:

$$\$50,000 \times \frac{\$100,000}{\$1,000,000} \dots\dots \$5,000$$

To gross income from sources inside the United States:

$$\$50,000 \times \frac{\$600,000}{\$1,000,000} \dots\dots \$30,000$$

The XZ1 group would apportion its interest expense as follows:

To gross general limitation income from sources outside the United States:

$$\$50,000 \times \frac{\$500,000}{\$2,500,000} \dots\dots \$10,000$$

To gross income from sources inside the United States:

$$\$50,000 \times \frac{\$2,000,000}{\$2,500,000} \dots\dots \$40,000$$

(6) *Certain unaffiliated corporations.* Certain corporations that are not described in paragraph (d)(1) of this section will nonetheless be considered to constitute affiliated corporations for purposes of §§1.861-9T through 1.861-13T. These corporations include:

(i) Any includible corporation (as defined in section 1504(b) without regard to section 1504(b)(4)) if 80 percent of either the vote or value of all outstanding stock of such corporation is owned directly or indirectly by an includible corporation or by members of an affiliated group, and

(ii) [Reserved]. For further guidance see § 1.861-11(d)(6)(ii).

(7) *Special rules for the application of § 1.861-11T(d)(6)*. [Reserved]. For special rules for the application of § 1.861-11T(d)(6), see § 1.861-11(d)(7).

(e) *Loans between members of an affiliated group—(1) General rule*. In the case of loans (including any receivable) between members of an affiliated group, as defined in paragraph (d) of this section, for purposes of apportioning interest expense, the indebtedness of the member borrower shall not be considered an asset of the member lender. However, in the case of members of separate financial and nonfinancial groups under paragraph (d)(4) of this section, the indebtedness of the member borrower shall be considered an asset of the member lender and such asset shall be characterized by reference to the member lender's income from the asset as determined under paragraph (e)(2)(ii) of this section. For purposes of this paragraph (e), the terms "related person interest income" and "related person interest payment" refer to interest paid and received by members of the same affiliated group as defined in paragraph (d) of this section.

(2) *Treatment of interest expense within the affiliated group—(i) General rule*. A member borrower shall deduct related person interest payments in the same manner as unrelated person interest expense using group apportionment fractions computed under § 1.861-9T(f). A member lender shall include related person interest income in the same class of gross income as the class of gross income from which the member borrower deducts the related person interest payment.

(ii) *Special rule for loans between financial and nonfinancial affiliated corporations*. In the case of a loan between two affiliated corporations only one of which constitutes a financial corporation under paragraph (d)(4) of this section,

the member borrower shall allocate and apportion related person interest payments in the same manner as unrelated person interest expense using group apportionment fractions computed under § 1.861-9T(f). The source of the related person interest income to the member lender shall be determined under section 861(a)(1).

(iii) *Special rule for high withholding tax interest*. In the case of an affiliated corporation that pays interest that is high withholding tax interest under § 1.904-5(f)(1) to another affiliated corporation, the interest expense of the payor shall be allocated to high withholding tax interest.

(3) *Back-to-back loans*. If a member of the affiliated group makes a loan to a nonmember who makes a loan to a member borrower, the rule of paragraphs (e) (1) and (2) of this section shall apply, in the Commissioner's discretion, as if the member lender made the loan directly to the member borrower, provided that the loans constitute a back-to-back loan transaction. Such loans will constitute a back-to-back loan for purposes of this paragraph (e) if the loan by the nonmember would not have been made or maintained on substantially the same terms irrespective of the loan of funds by the lending member to the nonmember or other intermediary party.

(4) *Examples*. The rules of this paragraph (e) may be illustrated by the following examples.

Example 1. X, a domestic corporation, is the parent of Y, a domestic corporation. X and Y were organized after January 1, 1987, and constitute an affiliated group within the meaning of paragraph (d)(1) of this section. Among X's assets is the note of Y for the amount of \$100,000. Because X and Y are members of an affiliated group, Y's note does not constitute an asset for purposes of apportionment. The apportionment fractions for the relevant tax year of the XY group are 50 percent domestic, 40 percent foreign general, and 10 percent foreign passive. Y deducts its related person interest payment using those apportionment fractions. Of the \$10,000 in related person interest income received by X, \$5,000 consists of domestic source income, \$4,000 consists of foreign general limitation income, and \$1,000 consists of foreign passive income.

Example 2. X is a domestic corporation organized after January 1, 1987. X owns all the stock of Y, a domestic corporation. On June

1, 1987, X loans \$100,000 to Z, an unrelated person. On June 2, 1987, Z makes a loan to Y with terms substantially similar to those of the loan from X to Z. Based on the facts and circumstances of the transaction, it is determined that Z would not have made the loan to Y on the same terms if X had not made the loan to Z. Because the transaction constitutes a back-to-back loan, as defined in paragraph (e)(3) of this section, the Commissioner may require, in his discretion, that neither the note of Y nor the note of Z may be considered an asset of X for purposes of this section.

(f) *Computations of combined taxable income.* In the computation of the combined taxable income of any FSC or DISC and its related supplier which is a member of an affiliated group under the pricing rules of sections 925 or 994, the combined taxable income of such FSC or DISC and its related supplier shall be reduced by the portion of the total interest expense of the affiliated group that is incurred in connection with those assets of the group used in connection with export sales involving that FSC or DISC. This amount shall be computed by multiplying the total interest expense of the affiliated group and interest expense of the FSC or DISC by a fraction the numerator of which is the assets of the affiliated group and of the FSC or DISC generating foreign trade income or gross income attributable to qualified export receipts, as the case may be, and the denominator of which is the total assets of the affiliated group and the FSC or DISC. Under this rule, interest of other group members may be attributed to the combined taxable income of a FSC or DISC and its related supplier without affecting the amount of interest otherwise deductible by the FSC or DISC, the related supplier or other member of the affiliated group. The FSC or DISC is entitled to only the statutory portion of the combined taxable income, net of any deemed interest expense, which determines the commission paid to the FSC or DISC or the transfer price of qualifying export property sold to the FSC or DISC.

(g) *Losses created through apportionment—(1) General rules.* In the case of an affiliated group that is eligible to file, but does not file, a consolidated return and in the case of any corporation described in paragraph (d)(6) of this sec-

tion, the foreign tax credits in any separate limitation category are limited to the credits computed under the rules of this paragraph (g). As a consequence of the affiliated group allocation and apportionment of interest expense required by section 864(e)(1) and this section, interest expense of a group member may be apportioned for section 904 purposes to a limitation category in which that member has no gross income, resulting in a loss in that limitation category. The same is true in connection with any expense other than interest that is subject to apportionment under the rules of section 864(e)(6) of the Code. Any reference to “interest expense” in this paragraph (g) shall be treated as including such expenses. For purposes of this paragraph, the term “limitation category” includes domestic source income, as well as the types of income described in section 904(d)(1) (A) through (I). A loss of one affiliate in a limitation category will reduce the income of another member in the same limitation category if a consolidated return is filed. (See § 1.1502-4.) If a consolidated return is not filed, this netting does not occur. Accordingly, in such a case, the following adjustments among members are required in order to give effect to the group allocation of interest expense:

(i) Losses created through group apportionment of interest expense in one or more limitation categories within a given member must be eliminated; and

(ii) A corresponding amount of income of other members in the same limitation category must be recharacterized.

Such adjustments shall be accomplished, in accordance with paragraph (g)(2) of this section, without changing the total taxable income of any member and before the application of section 904(f). Section 904(f) (including section 904(f)(5)) does not apply to a loss created through the apportionment of interest expense to the extent that the loss is eliminated pursuant to paragraph (g)(2)(ii) of this section. For purposes of this section, the terms “limitation adjustment” and “recharacterization” mean the recharacterization of income in one limitation category as income in another limitation category.

(2) *Mechanics of computation*—(i) *Step 1: Computation of consolidated taxable income.* The members of an affiliated group must first allocate and apportion all other deductible expenses other than interest. The members must then deduct from their respective gross incomes within each limitation category interest expense apportioned under the rules of § 1.861-9T(f). The taxable income of the entire affiliated group within each limitation category is then totalled.

(ii) *Step 2: Loss offset adjustments.* If, after step 1, a member has losses in a given limitation category or limitation categories created through apportionment of interest expense, any such loss (i.e., the portion of such loss equal to interest expense) shall be eliminated by offsetting that loss against taxable income in other limitation categories of that member to the extent of the taxable income of other members within the same limitation category as the loss. If the member has taxable income in more than one limitation category, then the loss shall offset taxable income in all such limitation categories on a pro rata basis. If there is insufficient domestic income of the member to offset the net losses in all foreign limitation categories caused by the apportionment of interest expense, the losses in each limitation category shall be recharacterized as domestic losses to the extent of the taxable income of other members in the same respective limitation categories. After these adjustments are made, the income of the entire affiliated group within each limitation category is totalled again.

(iii) *Step 3: Determination of amount subject to recharacterization.* In order to determine the amount of income to be recharacterized in step 4, the income totals computed under step 1 in each limitation category shall be subtracted from the income totals computed under step 2 in each limitation category.

(iv) *Step 4: Recharacterization.* Because any differences determined under step 3 represent deviations from the consolidated totals computed under Step 1, such differences (in any limitation category) must be eliminated.

(A) *Limitation categories to be reduced.* In the case of any limitation category in which there is a positive change, the

income of group members with income in that limitation category must be reduced on a pro rata basis (by reference to net income figures as determined under Step 2) to the extent of such positive change (“limitation reductions”). Each member shall separately compute the sum of the limitation reductions.

(B) *Limitation categories to be increased.* In any case in which only one limitation category has a negative change in Step 3, the sum of the limitation reductions within each member is added to that limitation category. In the case in which multiple limitation categories have negative changes in Step 3, the sum of the limitation reductions within each member is prorated among the negative change limitation categories based on the ratio that the negative change for the entire group in each limitation category bears to the total of all negative changes for the entire group in all limitation categories.

(3) *Examples.* The following examples illustrate the principles of this paragraph.

Example 1. (i) *Facts.* X, a domestic corporation, is the parent of domestic corporations Y and Z. X, Y, and Z were organized after January 1, 1987, constitute an affiliated group within the meaning of paragraph (d)(1) of this section, but do not file a consolidated return. The XYZ group apportions its interest expense on the basis of the fair market value of its assets. X, Y, and Z have the following assets, interest expense, and taxable income before apportioning interest expense:

| Assets | X | Y | Z | Total |
|--------------------------------|----------|--------|----------|----------|
| Domestic | 2,000.00 | 0 | 1,000.00 | 3,000.00 |
| Foreign Passive ... | 0 | 50.00 | 50.00 | 100.00 |
| Foreign General .. | 0 | 700.00 | 200.00 | 900.00 |
| Interest expense .. | 48.00 | 12.00 | 80.00 | 140.00 |
| Taxable Income (pre-interest): | | | | |
| Domestic | 100.00 | 0 | 63.00 | 163.00 |
| Foreign Passive | 0 | 5.00 | 5.00 | 10.00 |
| Foreign General | 0 | 60.00 | 35.00 | 95.00 |

(ii) *Step 1: Computation of consolidated taxable income.* Each member of the XYZ group apportions its interest expense according to group apportionment ratios determined under the asset method described in § 1.861-9T(f), yielding the following results:

| Apportioned interest expense | X | Y | Z | Total |
|------------------------------|-------|------|-------|--------|
| Domestic | 36.00 | 9.00 | 60.00 | 105.00 |
| Foreign Passive | 1.20 | 0.30 | 2.00 | 3.50 |

Internal Revenue Service, Treasury

§ 1.861-11T

| Apportioned interest expense | X | Y | Z | Total |
|------------------------------|-------|-------|-------|--------|
| Foreign General | 10.80 | 2.70 | 18.00 | 31.50 |
| Total | 48.00 | 12.00 | 80.00 | 140.00 |

The members of the group then compute taxable income within each category by deducting the apportioned interest expense from the amounts of pre-interest taxable income specified in the facts in paragraph (i), yielding the following results:

| Taxable income | X | Y | Z | Total |
|-----------------------|--------|-------|-------|--------|
| Domestic | 64.00 | 9.00 | 3.00 | 58.00 |
| Foreign Passive | -1.20 | 4.70 | 3.00 | 6.50 |
| Foreign General | -10.80 | 57.30 | 17.00 | 63.50 |
| Total | 52.00 | 53.00 | 23.00 | 128.00 |

(iii) *Step 2: Loss offset adjustments.* Because X and Y have losses created through apportionment, these losses must be eliminated by reducing taxable income of the member in other limitation categories. Because X has a total of \$12 in apportionment losses and because it has only one limitation category with income (i.e., domestic), domestic income must be reduced by \$12, thus eliminating its apportionment losses. Because Y has a total of \$9 in apportionment losses and because it has two limitation categories with income (i.e., foreign passive and foreign general limitation), the income in these two limitation categories must be reduced on a pro rata basis in order to eliminate its apportionment losses. In summary, the following adjustments are required:

| Loss offset adjustments | X | Y | Z | Total |
|-------------------------|--------|-------|---|-------|
| Domestic | -12.00 | +9.00 | 0 | -3.00 |
| Foreign Passive | +1.20 | -0.68 | 0 | +0.52 |
| Foreign General | +10.80 | -8.32 | 0 | +2.48 |

These adjustments yield the following adjusted taxable income figures:

| Adjusted taxable income | X | Y | Z | Total |
|-------------------------|-------|-------|-------|--------|
| Domestic | 52.00 | 0 | 3.00 | 55.00 |
| Foreign Passive | 0 | 4.02 | 3.00 | 7.02 |
| Foreign General | 0 | 48.98 | 17.00 | 65.98 |
| Total | 52.00 | 53.00 | 23.00 | 128.00 |

(iv) *Step 3: Determination of amount subject to recharacterization.* The adjustments performed under Step 2 led to a change in the group's taxable income within each limitation category. The total loss offset adjustments column shown in paragraph (iii) above shows the net deviations between Step 1 and 2.

(v) *Step 4: Recharacterization.* The loss offset adjustments yield a positive change in the foreign passive and the foreign general

limitation categories. Y and Z both have income in these limitation categories. Accordingly, the income of Y and Z in each of these limitation categories must be reduced on a pro rata basis (by reference to the adjusted taxable income figures) to the extent of the positive change in each limitation category. The total positive change in the foreign passive limitation category is \$0.52. The adjusted taxable income of Y in the foreign passive limitation category is \$4.02 and the adjusted taxable income of Z in the foreign passive limitation category is \$3. Therefore, \$0.30 is drawn from Y and \$0.22 is drawn from Z. The total positive change in the foreign general limitation category is \$2.48. The adjusted taxable income of Y in the foreign general limitation category is \$48.98, and the adjusted taxable income of Z in the foreign general limitation category is \$17. Therefore, \$1.84 is drawn from Y and \$.64 is drawn from Z.

The members must then separately compute the sum of the limitation reductions. Y has limitation reductions of \$0.30 in the foreign passive limitation category and \$1.84 in the foreign general limitation category, yielding total limitation reduction of \$2.14. Under these facts, domestic income is the only limitation category requiring a positive adjustment. Accordingly, Y's domestic income is increased by \$2.14. Z has limitation reductions of \$0.22 in the foreign passive limitation category and \$0.64 in the foreign general limitation category, yielding total limitation reductions of \$0.86. Under these facts, domestic income is the only limitation category of Z requiring a positive adjustment. Accordingly, Z's domestic income is increased by \$0.86.

| Recharacterization adjustments | X | Y | Z | Total |
|--------------------------------|---|-------|-------|-------|
| Domestic | 0 | +2.14 | +0.86 | +3.00 |
| Foreign Passive | 0 | -0.30 | -0.22 | -0.52 |
| Foreign General | 0 | -1.84 | -0.64 | -2.48 |

These recharacterization adjustments yield the following final taxable income figures:

| Final taxable income | X | Y | Z | Total |
|-----------------------|-------|-------|-------|--------|
| Domestic | 52.00 | 2.14 | 3.86 | 58.00 |
| Foreign Passive | 0 | 3.72 | 2.78 | 6.50 |
| Foreign General | 0 | 47.14 | 16.36 | 63.50 |
| Total | 52.00 | 53.00 | 23.00 | 128.00 |

Example 2. (i) Facts. X, a domestic corporation, is the parent of domestic corporations Y and Z. X, Y, and Z were organized after January 1, 1987, constitute an affiliated group within the meaning of paragraph (d)(1) of this section, but do not file a consolidated return. Moreover, X has served as the sole borrower in the group and, as a result, has

§ 1.861-11T

26 CFR Ch. I (4-1-15 Edition)

sustained an overall loss. The XYZ group apportions its interest expense on the basis of the fair market value of its assets. X, Y, and Z have the following assets, interest expense, and taxable income before interest expense:

| Assets | X | Y | Z | Total |
|--------------------------------|-------|-----|-------|-------|
| Domestic | 2,000 | 0 | 1,000 | 3,000 |
| Foreign Passive | 0 | 50 | 50 | 100 |
| Foreign General | 0 | 700 | 200 | 900 |
| Interest Expense | 140 | 0 | 0 | 140 |
| Taxable Income (pre-interest): | | | | |
| Domestic | 100 | 0 | 100 | 200 |
| Foreign Passive | 0 | 5 | 5 | 10 |
| Foreign General | 0 | 70 | 35 | 105 |

(ii) *Step 1: Computation of consolidated taxable income.* Each member of the XYZ group apportions its interest expense according to group apportionment ratios determined under the asset method described in § 1.861-9T(g), yielding the following results:

| Apportioned interest expense | X | Y | Z | Total |
|------------------------------|--------|---|---|--------|
| Domestic | 105.00 | 0 | 0 | 105.00 |
| Foreign Passive | 3.50 | 0 | 0 | 3.50 |
| Foreign General | 31.50 | 0 | 0 | 31.50 |
| Total | 140.00 | 0 | 0 | 140.00 |

The members of the group then compute taxable income within each category by deducting the apportioned interest expense from the amounts of pre-interest taxable income specified in the facts in paragraph (i), yielding the following results:

| Taxable income | X | Y | Z | Total |
|---------------------|--------|-------|--------|--------|
| Domestic | -5.00 | 0 | 100.00 | 95.00 |
| Foreign Passive ... | -3.50 | 5.00 | 5.00 | 6.50 |
| Foreign General .. | -31.50 | 70.00 | 35.00 | 73.50 |
| Total | -40.00 | 75.00 | 140.00 | 175.00 |

(iii) *Step 2: Loss offset adjustment.* Because X has insufficient domestic income to offset the sum of the losses in the foreign limitation categories caused by apportionment, the amount of apportionment losses in each limitation category shall be recharacterized as domestic losses to the extent of taxable income of other members in the same limitation category. This is accomplished by adding to each foreign limitation categories an amount equal to the loss therein and by subtracting the sum of such foreign losses from domestic income, as follows:

| Loss offset adjustments | X | Y | Z | Total |
|-------------------------|--------|---|---|--------|
| Domestic | -35.00 | 0 | 0 | -35.00 |
| Foreign Passive | +3.50 | 0 | 0 | +3.50 |
| Foreign General | +31.50 | 0 | 0 | +31.50 |

These adjustments yield the following adjusted taxable income figures:

| Adjusted taxable income | X | Y | Z | Total |
|-------------------------|-----|----|-----|-------|
| Domestic | -40 | 0 | 100 | 60 |
| Foreign Passive | 0 | 5 | 5 | 10 |
| Foreign General | 0 | 70 | 35 | 105 |
| Total | -40 | 75 | 140 | 175 |

(iv) *Step 3: Determination of amount subject to recharacterization.* The adjustments performed under Step 2 led to a change in the group's taxable income within each limitation category. The total loss offset adjustment column shown in paragraph (iii) above shows the net deviations between Steps 1 and 2.

(v) *Step 4: Recharacterization.* The loss offset adjustments yield a positive change in the foreign passive and the foreign general limitation categories. Y and Z both have income in these limitation categories. Accordingly, the income of Y and Z in each of these limitation categories must be reduced on a pro rata basis (by reference to the adjusted taxable income figures) to the extent of the positive change in each limitation category. The total positive change in the foreign passive limitation category is \$3.50. The adjusted taxable income of Y in the foreign passive limitation category is \$5, and the adjusted taxable income of Z in the foreign passive limitation category is \$5. Therefore, \$1.75 is drawn from Y and \$1.75 is drawn from Z. The total positive change in the foreign general limitation category is \$31.50. The adjusted taxable income of Y in the foreign general limitation category is \$70, and the adjusted taxable income of Z in the foreign general limitation category is \$35. Therefore, \$21 is drawn from Y and \$10.50 is drawn from Z.

The members must then separately compute the sum of the limitation reductions. Y has limitation reductions of \$1.75 in the foreign passive limitation category and \$21 in the foreign general limitation category, yielding total limitation reductions of \$22.75. Under these facts, domestic income is the only limitation category requiring a positive adjustment. Accordingly, Y's domestic income is increased by \$22.75. Z has limitation reductions of \$1.75 in the foreign passive limitation category and \$10.50 in the foreign general limitation category, yielding total limitation reductions of \$12.25. Under these facts, domestic income is the only limitation category requiring a positive adjustment. Accordingly, Z's domestic income is increased by \$12.25.

| Recharacterization adjustments | X | Y | Z | Total |
|--------------------------------|---|--------|--------|--------|
| Domestic | 0 | +22.75 | +12.25 | +35.00 |
| Foreign Passive | 0 | -1.75 | -1.75 | -3.50 |
| Foreign General | 0 | -21.00 | -10.50 | -31.50 |

Internal Revenue Service, Treasury

§ 1.861-12T

These recharacterization adjustments yield the following final taxable income figures:

| Final taxable income | X | Y | Z | Total |
|----------------------|--------|-------|--------|--------|
| Domestic | -40.00 | 22.75 | 112.25 | 95.00 |
| Foreign Passive | 0 | 3.25 | 3.25 | 6.50 |
| Foreign General | 0 | 49.00 | 24.50 | 73.50 |
| Total | -40.00 | 75.00 | 140.00 | 175.00 |

(h) *Effective/applicability date.* In general, the rules of this section apply for taxable years beginning after December 31, 1986.

[T.D. 8228, 53 FR 35490, Sept. 14, 1988, as amended by T.D. 8916, 65 FR 274, Jan. 3, 2001; T.D. 9456, 74 FR 38875, Aug. 4, 2009; T.D. 9571, 77 FR 2227, Jan. 17, 2012; 77 FR 9844, Feb. 21, 2012; T.D. 9676, 79 FR 41426, July 16, 2014]

§ 1.861-12 Characterization rules and adjustments for certain assets.

(a) through (c)(1) [Reserved] For further guidance, see § 1.861-12T(a) through (c)(1).

(2) *Basis adjustment for stock in non-affiliated 10 percent owned corporations—*

(i) *Taxpayers using the tax book value method—(A) General rule.* For purposes of apportioning expenses on the basis of the tax book value of assets, the adjusted basis of any stock in a 10 percent owned corporation owned by the taxpayer either directly or, for taxable years beginning after April 25, 2006, indirectly through a partnership or other pass-through entity shall be—

(1) Increased by the amount of the earnings and profits of such corporation (and of lower-tier 10 percent owned corporations) attributable to such stock and accumulated during the period the taxpayer or other members of its affiliated group held 10 percent or more of such stock; or

(2) Reduced (but not below zero) by any deficit in earnings and profits of such corporation (and of lower-tier 10 percent owned corporations) attributable to such stock for such period.

(c)(2)(i)(B) through (c)(3) [Reserved] For further guidance, see § 1.861-12T(c)(2)(i)(B) through (c)(3).

(4) *Characterization of stock of noncontrolled section 902 corporations—(i) General rule.* The principles of § 1.861-12T(c)(3) shall apply to stock in a noncontrolled section 902 corporation (as defined in section 904(d)(2)(E)). Accord-

ingly, stock in a noncontrolled section 902 corporation shall be characterized as an asset in the various separate limitation categories on the basis of either the asset method described in § 1.861-12T(c)(3)(ii) or the modified gross income method described in § 1.861-12T(c)(3)(iii). Stock in a noncontrolled section 902 corporation the interest expense of which is apportioned on the basis of assets shall be characterized in the hands of its domestic shareholders (as defined in § 1.902-1(a)(1)) under the asset method described in § 1.861-12T(c)(3)(ii). Stock in a noncontrolled section 902 corporation the interest expense of which is apportioned on the basis of gross income shall be characterized in the hands of its domestic shareholders under the gross income method described in § 1.861-12T(c)(3)(iii).

(ii) *Nonqualifying shareholders.* Stock in a noncontrolled section 902 corporation shall be characterized as a passive category asset in the hands of a shareholder that is not eligible to compute an amount of foreign taxes deemed paid with respect to a dividend from the noncontrolled section 902 corporation for the taxable year, and in the hands of any shareholder with respect to whom look-through treatment is not substantiated. See § 1.904-5(c)(4)(iii).

(5) *Effective/applicability date.* Paragraphs (c)(2)(i)(A) and (4) of this section apply to taxable years of shareholders ending on or after April 20, 2009. See 26 CFR § 1.861-12T(c)(2)(i) introductory text, (2)(i)(A), (2)(i)(B), and (4) (revised as of April 1, 2009) for rules applicable to taxable years of shareholders ending after the first day of the first taxable year of the noncontrolled section 902 corporation beginning after December 31, 2002, and ending before April 20, 2009.

(d) through (j) [Reserved] For further guidance, see § 1.861-12T(d) through (j).

[T.D. 9452, 74 FR 27874, June 11, 2009]

§ 1.861-12T Characterization rules and adjustments for certain assets (temporary).

(a) *In general.* These rules are applicable to taxpayers in apportioning expenses under an asset method to income in various separate limitation categories under section 904(d), and

supplement other rules provided in §§ 1.861-9T, 1.861-10T, and 1.861-11T. The rules of this section apply to taxable years beginning after December 31, 1986, except as otherwise provided in § 1.861-13T. Paragraph (b) of this section describes the treatment of inventories. Paragraph (c)(1) of this section concerns the treatment of various stock assets. Paragraph (c)(2) of this section describes a basis adjustment for stock in nonaffiliated 10 percent owned corporations. Paragraph (c)(3) of this section sets forth rules for characterizing the stock in controlled foreign corporations. Paragraph (c)(4) of this section describes the treatment of stock of noncontrolled section 902 corporations. Paragraph (d)(1) of this section concerns the treatment of notes. Paragraph (d)(2) of this section concerns the treatment of the notes of controlled foreign corporations. Paragraph (e) of this section describes the treatment of certain portfolio securities that constitute inventory or generate income primarily in the form of gains. Paragraph (f) of this section describes the treatment of assets that are subject to the capitalization rules of section 263A. Paragraph (g) of this section concerns the treatment of FSC stock and of assets of the related supplier generating foreign trade income. Paragraph (h) of this section concerns the treatment of DISC stock and of assets of the related supplier generating qualified export receipts. Paragraph (i) of this section is reserved. Paragraph (j) of this section sets forth an example illustrating the rules of this section, as well as the rules of § 1.861-9T(g).

(b) *Inventories.* Inventory must be characterized by reference to the source and character of sales income, or sales receipts in the case of LIFO inventory, from that inventory during the taxable year. If a taxpayer maintains separate inventories for any federal tax purpose, including the rules for establishing pools of inventory items under sections 472 and 474 of the Code, each separate inventory shall be separately characterized in accordance with the previous sentence.

(c) *Treatment of stock—(1) In general.* Subject to the adjustment and special rules of paragraphs (c) and (e) of this section, stock in a corporation is taken

into account in the application of the asset method described in § 1.861-9T(g). However, an affiliated group (as defined in § 1.861-11T(d)) does not take into account the stock of any member in the application of the asset method.

(2) *Basis adjustment for stock in non-affiliated 10 percent owned corporations—*

(i)(A) [Reserved] For further guidance, see § 1.861-12(c)(2)(i)(A).

(B) *Computational rules.* Solely for purposes of this section, a taxpayer's basis in the stock of a controlled foreign corporation shall not include any amount included in basis under section 961 or 1293(d) of the Code. For purposes of this paragraph (c)(2), earnings and profits and deficits are computed under the rules of section 312 and, in the case of a foreign corporation, section 902 and the regulations thereunder for taxable years of the 10 percent owned corporation ending on or before the close of the taxable year of the taxpayer. The rules of section 1248 and the regulations thereunder shall apply to determine the amount of earnings and profits that is attributable to stock without regard to whether earned and profits (or deficits) were derived (or incurred) during taxable years beginning before or after December 31, 1962. This adjustment is to be made annually and is noncumulative. Thus, the adjusted basis of the stock (determined without prior years' adjustments under this section) is to be adjusted annually by the amount of accumulated earnings and profits (or any deficit) attributable to such stock as of the end of each year. Earnings and profits or deficits of a qualified business unit that has a functional currency other than the dollar must be computed under this paragraph (c)(2) in functional currency and translated into dollars using the exchange rate at the end of the taxpayer's current taxable year with respect to which interest is being allocated (and not the exchange rates for the years in which the earnings and profits or deficits were derived or incurred).

(ii) *10 percent owned corporation defined—(A) In general.* The term "10 percent owned corporation" means any corporation (domestic or foreign)—

(1) Which is not included within the taxpayer's affiliated group as defined in § 1.861-11T(d) (1) or (6).

(2) In which the members of the taxpayer's affiliated group own directly or indirectly 10 percent or more of the total combined voting power of all classes of the stock entitled to vote, and

(3) Which is taken into account for purposes of apportionment.

(B) *Rule of attribution.* Stock that is owned by a corporation, partnership, or trust shall be treated as being indirectly owned proportionately by its shareholders, partners, or beneficiaries. For this purpose, a partner's interest in stock held by a partnership shall be determined by reference to the partner's distributive share of partnership income.

(iii) *Earnings and profits of lower-tier corporations taken into account.* For purposes of the adjustment to the basis of the stock of the 10 percent owned corporation owned by the taxpayer under paragraph (c)(2)(i) of this section, the earnings and profits of that corporation shall include its pro rata share of the earnings and profits (or any deficit therein) of each succeeding lower-tier 10 percent owned corporation. Thus, a first-tier 10 percent owned corporation shall combine with its own earnings and profits its pro rata share of the earnings and profits of all such lower-tier corporations. The affiliated group shall then adjust its basis in the stock of the first-tier corporation by its pro rata share of the total combined earnings and profits of the first-tier and the lower-tier corporations. In the case of a 10 percent owned corporation whose tax year does not conform to that of the taxpayer, the taxpayer shall include the annual earnings and profits of such 10 percent owned corporation for the tax year ending within the tax year of the taxpayer, whether or not such 10 percent owned corporation is owned directly by the taxpayer.

(iv) *Special rules for foreign corporations in pre-effective date tax years.* Solely for purposes of determining the adjustment required under paragraph (c)(2)(i) of this section, for tax years beginning after 1912 and before 1987, financial earnings (or losses) of a foreign corporation computed using United

States generally accepted accounting principles may be substituted for earnings and profits in making the adjustment required by paragraph (c)(2)(i) of this section. A taxpayer is not required to isolate the financial earnings of a foreign corporation derived or incurred during its period of 10 percent ownership or during the post-1912 taxable years and determine earnings and profits (or deficits) attributable under section 1248 principles to the taxpayer's stock in a 10 percent owned corporation. Instead, the taxpayer may include all historic financial earnings for purposes of this adjustment. If the affiliated group elects to use financial earnings with respect to any foreign corporation, financial earnings must be used by that group with respect to all foreign corporations, except that earnings and profits may in any event be used for controlled foreign corporations for taxable years beginning after 1962 and before 1987. However, if the affiliated group elects to use earnings and profits with respect to any single controlled foreign corporation for the 1963 through 1986 period, such election shall apply with respect to all its controlled foreign corporations.

(v) *Taxpayers using the fair market value method.* Because the fair market value of any asset which is stock will reflect retained earnings and profits, taxpayers who use the fair market value method shall not adjust stock basis by the amount of retained earnings and profits, as otherwise required by paragraph (c)(2)(i) of this section.

(vi) *Examples.* Certain of the rules of this paragraph (c)(2) may be illustrated by the following examples.

Example 1. X, an affiliated group that uses the tax book value method of apportionment, owns 20 percent of the stock of Y, which owns 50 percent of the stock of Z. X's basis in the Y stock is \$1,000. X, Y, and Z have calendar taxable years. The undistributed earnings and profits of Y and Z at year-end attributable to X's period of ownership are \$80 and \$40, respectively. Because Y owns half of the Z stock, X's pro rata share of Z's earnings and profits attributable to X's Y stock is \$4. X's pro rata share of Y's earnings attributable to X's Y stock is \$16. For purposes of apportionment, the tax book value of the Y stock is, therefore, considered to be \$1,020.

Example 2. X, an unaffiliated domestic corporation that was organized on January 1,

§ 1.861-12T

26 CFR Ch. I (4-1-15 Edition)

1987, has owned all the stock of Y, a foreign corporation with a functional currency other than the U.S. dollar, since January 1, 1987. Both X and Y have calendar taxable years. All of Y's assets generate general limitation income. X has a deductible interest expense incurred in 1987 of \$160,000. X apportions its interest expense using the tax book value method. The adjusted basis of its assets that generate domestic income is \$7,500,000. The adjusted basis of its assets that generate foreign source general limitation income (other than the stock of Y) is \$400,000. X's adjusted basis in the Y stock is \$2,000,000. Y has undistributed earnings and profits for 1987 of

\$100,000, translated into dollars from Y's functional currency at the exchange rate on the last day of X's taxable year. Because X is required under paragraph (b)(1) of this § 1.861-10T to increase its basis in the Y stock by the computed amount of earnings and profits, X's adjusted basis in the Y stock is considered to be \$2,100,000, and its adjusted basis of assets that generate foreign source general limitation income is, thus, considered to be \$2,500,000. X would apportion its interest expense as follows:

To foreign source general limitation income:

$$\text{Interest expense} \times \frac{\text{Adjusted basis of foreign general limitation assets}}{\text{Adjusted basis of foreign general limitation assets} + \text{Adjusted basis of domestic assets}}$$

$$\$160,000 \times \frac{\$2,500,000}{\$2,500,000 + \$7,500,000} = \$40,000$$

To domestic source income:

$$\text{Interest expense} \times \frac{\text{Adjusted basis of domestic assets}}{\text{Adjusted basis of foreign general limitation assets} + \text{Adjusted basis of domestic assets}}$$

$$\$160,000 \times \frac{\$7,500,000}{\$2,500,000 + \$7,500,000} = \$120,000$$

(3) *Characterization of stock of controlled foreign corporations*—(i) *In general.* Stock in a controlled foreign corporation (as defined in section 957) shall be characterized as an asset in the various separate limitation categories either on the basis of:

(A) The asset method described in paragraph (c)(3)(ii) of this section, or

(B) The modified gross income method described in paragraph (c)(3)(iii) of this section.

Stock in a controlled foreign corporation whose interest expense is apportioned on the basis of assets shall be characterized in the hands of its United States shareholders under the asset method described in paragraph (c)(3)(ii). Stock in a controlled foreign

corporation whose interest expense is apportioned on the basis of gross income shall be characterized in the hands of its United States shareholders under the gross income method described in paragraph (c)(3)(iii).

(ii) *Asset method.* Under the asset method, the taxpayer characterizes the tax book value or fair market value of the stock of a controlled foreign corporation based on an analysis of the assets owned by the controlled foreign corporation during the foreign corporation's taxable year that ends with or within the taxpayer's taxable year. This process is based on the application of § 1.861-9T(g) at the level of the controlled foreign corporation. In the case of a controlled foreign corporation that

owns stock in one or more lower-tier controlled foreign corporations in which the United States taxpayer is a United States shareholder, the characterization of the tax book value of the fair market value of the stock of the first-tier controlled foreign corporation to the various separate limitation categories of the affiliated group must take into account the stock in lower-tier corporations. For this purpose, the stock of each such lower-tier corporation shall be characterized by reference to the assets owned during the lower-tier corporation's taxable year that ends during the taxpayer's taxable year. The analysis of assets within a chain of controlled foreign corporations must begin at the lowest-tier controlled foreign corporation and proceed up the chain to the first-tier controlled foreign corporation. For purposes of this paragraph (c), the value of any passive asset to which related person interest is allocated under § 1.904-5(c)(2)(ii) must be reduced by the principal amount of indebtedness on which such interest is incurred. Furthermore, the value of any asset to which interest expense is directly allocated under § 1.861-10T must be reduced as provided in § 1.861-9T(g)(2)(iii). See § 1.861-9T(h)(5) for further guidance concerning characterization of stock in a related person under the fair market value method.

(iii) *Modified gross income method.* Under the gross income method, the taxpayer characterizes the tax book value of the stock of the first-tier controlled foreign corporation based on the gross income net of interest expense of the controlled foreign corporation (as computed under § 1.861-9T(j)) within each relevant category for the taxable year of the controlled foreign corporation ending with or within the taxable year of the taxpayer. For this purpose, however, the gross income of the first-tier controlled foreign corporation shall include the total amount of net subpart F income of any lower-tier controlled foreign corporation that was excluded under the rules of § 1.861-9T(j)(2)(ii)(B).

(4) [Reserved] For further guidance, see § 1.861-12(c)(4).

(5) [Reserved] For further guidance, see § 1.861-12(c)(5).

(d) *Treatment of notes—(1) General rule.* Subject to the adjustments and special rules of this paragraph (d) and paragraph (e) of this section, all notes held by a taxpayer are taken into account in the application of the asset method described in § 1.861-9T(g). However, the notes of an affiliated corporation are subject to special rules set forth in § 1.861-11T(e). For purposes of this section, the term "notes" means all interest bearing debt, including debt bearing original issue discount.

(2) *Characterization of related controlled foreign corporation notes.* The debt of a controlled foreign corporation shall be characterized according to the taxpayer's treatment of the interest income derived from that debt obligation after application of the look-through rule of section 904(d)(3)(C). Thus, a United States shareholder includes interest income from a controlled foreign corporation in the same category of income as the category of income from which the controlled foreign corporation deducts the interest expense. See section 954(b)(5) and § 1.904-5(c)(2) for rules concerning the allocation of related person interest payments to the foreign personal holding company income of a controlled foreign corporation.

(e) *Portfolio securities that constitute inventory or generate primarily gains.* Because gain on the sale of securities is sourced by reference to the residence of the seller, a resident of the United States will generally receive domestic source income (and a foreign resident will generally receive foreign source income) upon sale or disposition of securities that otherwise generate foreign source dividends and interest (or domestic source dividends and interest in the case of a foreign resident). Although under paragraphs (c) and (d) of this section securities are characterized by reference to the source and character of dividends and interest, the source and character of income on gain or disposition must also be taken into account for purposes of characterizing portfolio securities if:

(1) The securities constitute inventory in the hands of the holder, or

(2) 80 percent or more of the gross income generated by a taxpayer's entire

portfolio of such securities during a taxable year consists of gains.

For this purpose, a portfolio security is a security in any entity other than a controlled foreign corporation with respect to which the taxpayer is a United States shareholder under section 957, a noncontrolled section 902 corporation with respect to the taxpayer, or a 10 percent owned corporation as defined in § 1.861-12(c)(2)(ii). In taking gains into account, a taxpayer must treat all portfolio securities generating foreign source dividends and interest as a single asset and all portfolio securities generating domestic source dividends as a single asset and shall characterize the total value of that asset based on the source of all income and gain generated by those securities in the taxable year.

(f) *Assets funded by disallowed interest—(1) Rule.* In the case of any asset in connection with which interest expense accruing at the end of the taxable year is capitalized, deferred, or disallowed under any provision of the Code, the adjusted basis or fair market value (depending on the taxpayer's choice of apportionment methods) of such an asset shall be reduced by the principal amount of indebtedness the interest on which is so capitalized, deferred, or disallowed.

(2) *Example.* The rules of this paragraph (f) may be illustrated by the following example.

Example. X is a domestic corporation which uses the tax book value method of apportionment. X has \$1000 of indebtedness and \$100 of interest expense. X constructs an asset with an adjusted basis of \$800 before interest capitalization and is required under the rules of section 263A to capitalize \$80 in interest expense. Because interest on \$800 of debt is capitalized and because the production period is in progress at the end of X's taxable year, \$800 of the principal amount of X's debt is allocable to the building. The \$800 of debt allocable to the building reduces its adjusted basis for purposes of apportioning the balance of X's interest expense (\$20).

(g) *Special rules for FSCs—(1) Treatment of FSC stock.* No interest expense shall be allocated or apportioned to stock of a foreign sales corporation ("FSC") to the extent that the FSC stock is attributable to the separate limitation for certain FSC distributions described in section 904(d)(1)(H).

FSC stock is considered to be attributable solely to the separate limitation category described in section 904(d)(1)(H) unless the taxpayer can demonstrate that more than 20 percent of the FSC's gross income for the taxable year consists of income other than foreign trading income.

(2) *Treatment of assets that generate foreign trade income.* Assets of the related supplier that generate foreign trade income must be prorated between assets attributable to foreign source general limitation income and assets attributable to domestic source income in proportion to foreign source general limitation income and domestic source income derived from transactions generating foreign trade income.

(i) *Value of assets attributable to foreign source income.* The value of assets attributable to foreign source general limitation income is computed by multiplying the value of assets for the taxable year generating foreign trading gross receipts by a fraction:

(A) The numerator of which is foreign source general limitation income for the taxable year derived from transactions giving rise to foreign trading gross receipts, after the application of the limitation provided in section 927(e)(1), and

(B) The denominator of which is total income for the taxable year derived from the transaction giving rise to foreign trading gross receipts.

(ii) *Value of assets attributable to domestic source income.* The value of assets attributable to domestic source income is computed by subtracting from the total value of assets for the taxable year generating foreign trading gross receipts the value of assets attributable to foreign source general limitation income as computed under paragraph (g)(2)(i) of this section.

(h) *Special rules for DISCs—(1) Treatment of DISC stock.* No interest shall be allocated or apportioned to stock in a DISC (or stock in a former DISC to the extent that the stock in the former DISC is attributable to the separate limitation category described in section 904(d)(1)(F)).

(2) *Treatment of assets that generate qualified export receipts.* Assets of the related supplier that generate qualified

export receipts must be prorated between assets attributable to foreign source general limitation income and assets attributable to domestic source income in proportion to foreign source general limitation income and domestic source income derived from transactions during the taxable year from transactions generating qualified export receipts.

(i) [Reserved]

(j) *Examples.* Certain of the rules in this section and §§ 1.861-9T(g) and 1.861-10(e) are illustrated by the following example.

Example 1. (1) *Facts.* X, a domestic corporation organized on January 1, 1987, has a calendar taxable year and apportions its interest expense on the basis of the tax book value of its assets. In 1987, X incurred a deductible third-party interest expense of \$100,000 on an average month-end debt amount of \$1 million. The total tax book value of X's assets (adjusted as required under paragraph (b) of this section for retained earnings and profits) is \$2 million. X manufactures widgets. One-half of the widgets are sold in the United States and one-half are exported and sold through a foreign branch with title passing outside the United States.

X owns all the stock of Y, a controlled foreign corporation that also has a calendar taxable year and is also engaged in the manufacture and sale of widgets. Y has no earnings and profits or deficits in earnings and profits prior to 1987. For 1987, Y has taxable income and earnings and profits of \$50,000 before the deductible for related person interest expense. Half of the \$50,000 is foreign source personal holding company income and the other half is derived from widget sales and constitutes foreign source general limitation income. Assume that Y has no deductibles from gross income other than interest expense. Y's foreign personal holding company taxable income is included in X's gross income under section 951. Y paid no dividends in 1987. Prior to 1987, Y did not borrow any funds from X. The average month-end level of borrowings by Y from X in 1987 is \$100,000, on which Y paid a total of \$10,000 in interest. The total tax book value of Y's assets in 1987 is \$500,000. Y has no liabilities to third parties. X elects pursuant to § 1.861-9T for Y to apportion Y's interest expense under the gross income method prescribed in § 1.861-9T(g).

In addition to its stock in Y, X owns 20 percent of the stock of Z, a noncontrolled section 902 corporation.

X's total assets and their tax book values are:

| Asset | Tax book value |
|---|----------------|
| Plant & equipment | \$1,000,000 |
| Corporate headquarters | 500,000 |
| Inventory | 200,000 |
| Automobiles | 20,000 |
| Patents | 50,000 |
| Trademarks | 10,000 |
| Y stock (including paragraph (c)(2) adjustment) | 80,000 |
| Y note | 100,000 |
| Z stock | 40,000 |

(2) *Categorization of Assets.*

Single Category Assets

1. *Automobiles:* X's automobiles are used exclusively by its domestic sales force in the generation of United States source income. Thus, these assets are attributable solely to the grouping of domestic income.

2. *Y Note:* Under paragraph (d)(2) of this section, the Y note in the hands of X is characterized according to X's treatment of the interest income received on the Y note. In determining the source and character of the interest income on the Y note, the look-through rules of sections 904(d)(3)(C) and 904(g) apply. Under section 954(b)(5) and § 1.904-5(c)(2)(ii), Y's \$10,000 interest payment to X is allocated directly to, and thus reduces, Y's foreign personal holding company income of \$25,000 (yielding foreign personal holding company taxable income of \$15,000). Therefore, the Y note is attributable solely to the statutory grouping of foreign source passive income.

3. *Z stock:* Because Z is a noncontrolled section 902 corporation, the dividends paid by Z are subject to a separate limitation under section 904(d)(1)(E). Thus, this asset is attributable solely to the statutory grouping consisting of Z dividends.

Multiple Category Assets

1. *Plant & equipment, inventory, patents, and trademarks:* In 1987, X sold half its widgets in the United States and exported half outside the United States. A portion of the taxable income from export sales will be foreign source income, since the export sales were accomplished through a foreign branch and title passed outside the United States. Thus, these assets are attributable both to the statutory grouping of foreign general limitation and the grouping of domestic income.

2. *Y Stock:* Since Y's interest expense is apportioned under the gross income method prescribed in § 1.861-9T(j), the Y stock must be characterized under the gross income method described in paragraph (c)(3)(iii) of this section.

Assets without Directly Identifiable Yield

1. *Corporate headquarters:* This asset generates no directly identifiable income yield. The value of the asset is disregarded.

(3) *Analysis of Income Yield for Multiple Category Assets.*

1. Plant & Equipment, inventory, patents, and trademarks: As noted above, X's 1987 widget sales were half domestic and half foreign. Assume that Example 2 of § 1.863-3(b)(2) applies in sourcing the export income from the export sales. Under Example 2, the income generated by the export sales is sourced half domestic and half foreign. The income generated by the domestic sales is entirely domestic source. Accordingly, three-quarters of the income generated on all sales is domestic source and one-quarter of the income is foreign source. Thus, three-quarters of the fair market value of these assets are attributed to the grouping of domestic source income and one-quarter of the fair market value of these assets is attributed to the statutory grouping of foreign source general limitation income.

2. Y Stock: Under the gross income method described in paragraph (c)(3)(iii) of this section, Y's gross income net of interest expenses in each limitation category must be determined—\$25,000 foreign source general limitation income and \$15,000 of foreign source passive income. Of X's adjusted basis of \$80,000 in Y stock, \$50,000 is attributable to foreign source general limitation income and \$30,000 is attributable to foreign source passive income.

(4) *Application of the Special Allocation Rule of § 1.861-10T(e).* Assume that the taxable year in question is 1990 and that the applicable percentage prescribed by § 1.861-10T(e)(1)(iv)(A) is 80 percent. Assume that X has elected to use the quadratic formula provided in § 1.861-10T(e)(1)(iv)(B).

Step 1. X's average month-end level of debt owing to unrelated persons is \$1 million. The tax book value of X's assets is \$2 million. Thus, X's debt-to-asset ratio computed under § 1.861-10T(e)(1)(i) is 1 to 2.

Step 2. The tax book value of Y's assets is \$500,000. Because Y has no debt to persons other than X, Y's debt-to-asset ratio computed under § 1.861-10T(e)(1)(ii) is \$0 to \$500,000.

Step 3. Y's average month-end liabilities to X, as computed under § 1.861-10T(e)(1)(iii) for 1987 are \$100,000.

Step 4. Adding the \$100,000 of Y's liabilities owed to X as computed under Step 3 to Y's third party liabilities (\$0) would be insufficient to make Y's debt-to-asset ratio computed in Step 2 (\$100,000-to-\$500,000, or 1:5)

equal to at least 80 percent of X's debt-to-asset ratio computed under Step 1, as adjusted to reflect a reduction in X's debt and assets by the \$100,000 of excess related person indebtedness (.80×\$900,000/\$1,900,000 or 1:2.6). Therefore, the entire amount of Y's liabilities to X (\$100,000) constitute excess related person indebtedness under § 1.861-10T(e)(1)(ii). Thus, the entire \$10,000 of interest received by X from Y during 1987 constitutes interest received on excess related person indebtedness.

Step 5. The Y note held by X has a tax book value of \$100,000. Solely for purposes of § 1.861-10(e)(1)(v), the Y note is attributed to separate limitation categories in the same manner as the Y stock. Under paragraph (c)(3)(iii) of this section, of the \$80,000 of Y stock held by X, \$50,000 is attributable to foreign source general limitation income, and \$30,000 is attributable to foreign source passive income. Thus, for purposes of § 1.861-10T(e)(1)(v), \$62,500 of the \$100,000 Y note is considered to be a foreign source general limitation asset and \$37,500 of the \$100,000 Y note is considered to be a foreign source passive asset.

Step 6. Since \$8,000 of the \$10,000 in related person interest income received by Y constitutes interest received on excessive related person indebtedness, \$10,000 of X's third party interest expense is allocated to X's debt investment in Y. Under § 1.861-10T(e)(1)(vi), 62.5 percent of the \$10,000 of X's third party interest expense (\$6,250) is allocated to foreign source general limitation income and 37.5 percent of the \$10,000 of X's third party interest expense (\$3,750) is allocated to foreign source passive income. As a result of this direct allocation, the value of X's assets generating foreign source general limitation income shall be reduced by the principal amount of indebtedness the interest on which is directly allocated to foreign source general limitation income (\$62,500), and X's assets generating foreign general limitation income shall be reduced by the principal amount of indebtedness the interest on which is directly allocated to foreign passive income (\$37,500).

(5) *Totals.*

Having allocated \$10,000 of its third party interest expense to its debt investment in Y, X would apportion the \$90,000 balance of its interest according to the following apportionment fractions:

| Asset | Domestic source | Foreign general | Foreign passive | Noncontrolled section 902 |
|---------------------------|-----------------|-----------------|-----------------|---------------------------|
| Plant and equipment | \$750,000 | \$250,000 | | |
| Inventory | \$150,000 | \$50,000 | | |
| Automobiles | \$20,000 | | | |
| Patents | \$37,500 | \$12,500 | | |
| Trademarks | \$7,500 | \$2,500 | | |
| Y stock | | \$50,000 | \$30,000 | |
| Y note | | | \$100,000 | |

Internal Revenue Service, Treasury

§ 1.861-12T

| Asset | Domestic source | Foreign general | Foreign passive | Noncontrolled section 902 |
|---|-----------------|-----------------|-----------------|---------------------------|
| Z stock | | | | \$40,000 |
| Totals | \$965,000 | \$365,000 | \$130,000 | \$40,000 |
| Adjustments for directly allocable interest | | (\$62,250) | (\$37,750) | |
| Adjusted totals | \$965,000 | \$302,750 | \$92,250 | \$40,000 |
| Percentage | 69 | 22 | 6 | 3 |

Example 2. Assume the same facts as in *Example 1*, except that Y has \$100,000 of third party indebtedness. Further, assume for purposes of the application of the special allocation rule of §1.861-10T(e) that the taxable year is 1990 and that the applicable percentage prescribed by §1.861-10T(e)(1)(iv)(A) is 80 percent. The application of the §1.861-10(e) would be modified as follows.

Step 1. X's debt-to-asset ratio computed under §1.861-10T(e)(1)(i) remains 1 to 2 (or 0.5).

Step 2. The tax book value of Y's assets is \$500,000. Y has \$100,000 of indebtedness to third parties. Y's debt-to-asset ratio computed under §1.861-10T(e)(1)(ii) is \$100,000 to \$500,000 (1:5 or 0.2).

Step 3. Y's average month-end liabilities to X, as computed under §1.861-10T(e)(1)(iii) remain \$100,000.

Step 4. X's debt-to-asset ratio is 0.5 and 80 percent of 0.5 is 0.4. Because Y's debt-to-asset ratio is 0.2, there is excess related person indebtedness, the amount of which can be computed based on the following formula:

$$\frac{\text{Aggregate third party debt of related U. S. shareholder} - X}{\text{U. S. shareholder assets} - X} \times \text{Applicable percentage for year (0.8)} = \frac{\text{Aggregate third party debt of related CFCs} + X}{\text{Related CFC assets}}$$

Supplying the facts as given, this equation is as follows:

$$\frac{1,000,000 - X}{2,000,000 - X} \times .8 = \frac{100,000 + X}{500,000}$$

Multiply both sides by 500,000 and (2,000,000 - X), yielding:

$$4 \times 10^{11} - 400,000X = 2 \times 10^{11} + 2,000,000X - 100,000X - X^2$$

Since there is an X² in this equation, a quadratic formula must be utilized to solve for X. Group the components in this equation, segregating the X and the X²:

$$X^2 + (-2,300,000)X + (2 \times 10^{11}) = 0$$

Apply the quadratic formula:

$$X = \frac{-b \pm \sqrt{b^2 - 4(a)(c)}}{2(a)}$$

a=1 (coefficient of X²)
 b=-2,300,000 (coefficient of X)
 c=2×10¹¹ (remaining element of equation)

Therefore, X equals either 90,519 or (2.21×10¹¹). for purposes of computing excess related person indebtedness, X is the lowest

§ 1.861-13T

positive amount derived from this equation, which is 90,519.

Steps 5 and 6 are unchanged from *Example 1*, except that the total amount of interest on excess related party indebtedness is \$9,051.

(k) *Effective/applicability date.* The rules of this section apply for taxable years beginning after December 31, 1986.

[T.D. 8228, 53 FR 35495, Sept. 14, 1988, as amended by T.D. 9260, 71 FR 24526, Apr. 25, 2006, T.D. 9452, 74 FR 27875, June 11, 2009; T.D. 9456, 74 FR 38875, Aug. 4, 2009]

§ 1.861-13T Transition rules for interest expenses (temporary regulations).

(a) *In general*—(1) *Optional application.* The rules of this section may be applied at the choice of a corporate taxpayer. In the case of an affiliated group, however, the choice must be made on a consistent basis for all members. Therefore, a corporate taxpayer (or affiliated group) may allocate and apportion its interest expense entirely on the basis of the rules contained in §§ 1.861-8T through 1.861-12T and without regard to the rules of this section. The choice is made on an annual basis and, thus, is not binding with respect to subsequent tax years.

(2) *Transition relief.* This section contains transitional rules that limit the application of the rules for allocating and apportioning interest expense of corporate taxpayers contained in §§ 1.861-8T through 1.861-12T, which are applicable in allocating and apportioning the interest expense of corporate taxpayers generally for taxable years beginning after 1986. Sections 1.861-9(d) (relating to individuals, estates, and certain trusts) and 1.861-9(e) (relating to partnerships) are effective for taxable years beginning after 1986. Thus, the taxpayers to whom those sections apply do not qualify for transition relief under this section.

(3) *Indebtedness defined.* For purposes of this section, the term “indebtedness” means any obligation or other evidence of indebtedness that generates an expense that constitutes interest expense within the meaning of § 1.861-9T(a). In the case of an obligation that does not bear interest initially, but becomes interest bearing with the lapse of time or upon the oc-

currence of an event, such obligation shall only be considered to constitute indebtedness when it first bears interest. Obligations that are outstanding as of November 16, 1985 shall only qualify for transition relief under this section if they bear interest-bearing as of that date. For this purpose, any obligation that has original issue discount within the meaning of section 1273(a)(1) of the Code shall be considered to be interest-bearing.

(4) *Exceptions.* The term “indebtedness” shall not include any obligation existing between affiliated corporations, as defined in § 1.861-11T(d). Moreover, the term “indebtedness” shall not include any obligation the interest on which is directly allocable under §§ 1.861-10T(b) and 1.861-10T(c). Under § 1.861-9T(b)(6)(iv)(B), certain interest expense is directly allocated to the gain derived from an appropriately identified financial product. When interest expense on a liability is reduced by such gain, the principal amount of such liability shall be reduced pro rata by the relative amount of interest expense that is directly allocated.

(b) *General phase-in*—(1) *In general.* In the case of each of the first three taxable years of the taxpayer beginning after December 31, 1986, the rules of §§ 1.861-8T through 1.861-12T shall not apply to interest expenses paid or accrued by the taxpayer during the taxable year with respect to an aggregate amount of indebtedness which does not exceed the general phase-in amount, as defined in paragraph (b)(2) of this section.

(2) *General phase-in amount defined.* Subject to the limitation imposed by paragraph (b)(3) of this section, the general phase-in amount means the amount which is the applicable percentage (determined under the following table) of the aggregate amount of indebtedness of the taxpayer outstanding on November 16, 1985:

| Taxable year beginning after December 31,
1986 | Percentage |
|---|------------|
| First | 75 |
| Second | 50 |
| Third | 25 |

(3) *Reductions in indebtedness.* The general phase-in amount shall not exceed the taxpayer’s historic lowest

month-end debt level taking into account all months after October 1985. However, for the taxable year in which a taxpayer attains a new historic lowest month-end debt level (but not for subsequent taxable years), the general phase-in amount shall not exceed the average of month-end debt levels within that taxable year (without taking into account any increase in month-end debt levels occurring in such taxable Year after the new historic lowest month-end debt level is attained).

Example. X is a calendar year taxpayer that had \$100 of indebtedness outstanding on November 16, 1985. X's month-end debt level remained \$100 for all subsequent months until July 1987, when X's month-end debt level fell to \$50. In computing transition relief for 1987, X's general phase-in amount cannot exceed \$75 (900 divided by 12), which is the average of month-end debt levels in 1987. Assuming that X's month-end debt level for any subsequent month does not fall below \$50, the limitation on its general phase-in amount for all taxable years after 1987 will be \$50, its historic lowest month-end debt level after October 1985.

(c) *Nonapplication of the consolidation rule—(1) General rule.* In the case of each of the first five taxable years of the taxpayer beginning after December 31, 1986, the consolidation rule contained in § 1.861-11T(c) shall not apply to interest expenses paid or accrued by the taxpayer during the taxable year with respect to an aggregate amount of indebtedness which does not exceed the special phase-in amount, as defined in paragraph (c)(2) of this section.

(2) *Special phase-in amount.* The special phase-in amount is the sum of—

- (i) The general phase-in amount,
- (ii) The five-year phase-in amount, and
- (iii) The four-year phase-in amount.

(3) *Five-year phase-in amount.* The five-year phase-in amount is the lesser of—

(i) The applicable percentage (the “unreduced percentage” in the following table) of the five-year debt amount, or

(ii) The applicable percentage (the “reduced percentage” in the following table) of the five-year debt amount reduced by paydowns (if any):

| Transition year | Unreduced percentage | Reduced percentage |
|-----------------|----------------------|--------------------|
| Year 1 | 8 $\frac{1}{3}$ | 10 |
| Year 2 | 16 $\frac{2}{3}$ | 25 |
| Year 3 | 25 | 50 |
| Year 4 | 33 $\frac{1}{3}$ | 100 |
| Year 5 | 16 $\frac{2}{3}$ | 100 |

(4) *Four-year phase-in amount.* The four-year phase-in amount is the lesser of—

(i) The applicable percentage (the “unreduced percentage” in the following table) of the four-year debt amount, or

(ii) The applicable percentage (the “reduced percentage” in the following table) of the four-year debt amount reduced by paydowns (if any) to the extent that such paydowns exceed the five-year debt amount:

| Transition year | Unreduced percentage | Reduced percentage |
|-----------------|----------------------|--------------------|
| Year 1 | 5 | 6 $\frac{1}{4}$ |
| Year 2 | 10 | 16 $\frac{2}{3}$ |
| Year 3 | 15 | 37 $\frac{1}{2}$ |
| Year 4 | 20 | 100 |

(5) *Five-year debt amount.* The “five-year debt amount” means the excess (if any) of—

(i) The amount of the outstanding indebtedness of the taxpayer on May 29, 1985, over

(ii) The amount of the outstanding indebtedness of the taxpayer on December 31, 1983. The five-year debt amount shall not exceed the aggregate amount of indebtedness of the taxpayer outstanding on November 16, 1985.

(6) *Four-year debt amount.* The “four-year debt amount” means the excess (if any) of—

(i) The amount of the outstanding indebtedness of the taxpayer on December 31, 1983, over

(ii) The amount of the outstanding indebtedness of the taxpayer on December 31, 1982.

The four-year debt amount shall not exceed the aggregate amount of indebtedness of the taxpayer outstanding on November 16, 1985, reduced by the five-year debt amount.

(7) *Paydowns.* The term “paydowns” means the excess (if any) of—

(i) The aggregate amount of indebtedness of the taxpayer outstanding on November 16, 1985, over

(ii) The limitation on the general phase-in amount described in paragraph (b)(3) of this section.

Paydowns are first applied to the five-year debt amount to the extent thereof and then to the four-year debt amount for purposes of computing the five-year and the four-year phase-in amounts.

(d) *Treatment of affiliated group.* For purposes of this section, all members of the same affiliated group of corporations (as defined in § 1.861-11(d)) shall be treated as one taxpayer whether or not such members filed a consolidated return. Interaffiliate debt is not taken into account in computing transition relief. Moreover, any reduction in the amount of interaffiliate debt is not taken into account in determining the amount of paydowns.

(e) *Mechanics of computation—(1) Step 1: Determination of the amounts within the various categories of debt.* Each separate member of an affiliated group must determine each of its following amounts:

(i) *November 16, 1985 amount.* The amount of its debt outstanding on November 16, 1985 (after the elimination of interaffiliate indebtedness),

(ii) *Unreduced five-year debt.* The amount of any net increase in the amount of its indebtedness on May 29, 1985 (after elimination of interaffiliate indebtedness) over the amount of its indebtedness on December 31, 1983 (after elimination of interaffiliate indebtedness),

(iii) *Unreduced four-year debt.* The amount of any net increase in the amount of its indebtedness on December 31, 1983 (after elimination of interaffiliate indebtedness) over the amount of its indebtedness on December 31, 1982 (after elimination of interaffiliate indebtedness), and

(iv) *Month-end debt.* The amount of its month-end debt level for all months after October 1985 (after elimination of interaffiliate indebtedness).

(2) *Step 2: Aggregation of the separate company amounts.* Each of the designated amounts for the separate companies identified in Step 1 must be aggregated in order to compute consolidated transition relief. Paragraph (e)(10)(iv) of this section (Step 10) requires the use of the taxpayer's current

year average debt level for the purpose of computing the percentages of debt that are subject to the three sets of rules that are identified in Step 10. For use in that computation, the taxpayer should compute the current year average debt level by aggregating separate company month-end debt levels and then by averaging those aggregate amounts.

(3) *Step 3: Calculation of the lowest historic month-end debt level of the taxpayer.* In order to calculate the lowest historic month-end debt level of the taxpayer, determine the month-end debt level of each separate company for each month ending after October 1985 and aggregate these amounts on a month-by-month basis. On such aggregate basis, in any taxable year in which the taxpayer attains an aggregate new lowest historic month-end debt level, add together all the aggregate month-end debt levels within the taxable year (without taking into account any increase in aggregate debt level subsequent to the attainment of such lowest historic month-end debt level) and divide by the number of months in that taxable year, yielding the average of month-end debt levels for such year. Such average shall constitute the taxpayer's lowest historic month-end debt level for that taxable year in which the aggregate new lowest historic month-end debt level was attained. Unless otherwise specified, all subsequent references to any amount refer to the aggregate amount for all members of the same affiliated group of corporations.

(4) *Step 4: Computation of paydowns.* Paydowns equal the amount by which the November 16, 1985 amount exceeds the taxpayer's lowest historic month-end debt level, determined under Step 3.

(5) *Step 5: Computation of limitations on unreduced five-year debt and unreduced four-year debt.* (i) The unreduced five-year debt cannot exceed the November 16, 1985 amount.

(ii) The unreduced four-year debt cannot exceed the November 16, 1985 amount less the unreduced five-year debt.

(6) *Step 6: Computation of reduced five-year and reduced four-year debt—(i) Reduced five-year debt.* Compute the

amount of reduced five-year debt by subtracting from the unreduced five-year debt (see Step 5) the amount of paydowns (see Step 4).

(ii) *Reduced four-year debt.* To the extent that the amount of paydowns (see step 4) exceeds the amount of unreduced five-year debt (see Step 5), compute the amount of reduced four-year debt by subtracting such excess from the unreduced four-year debt (see Step 1).

(iii) To the extent that paydowns do not offset either the unreduced five-year amount or the unreduced four-year amount, the reduced and the unreduced amounts are the same.

(7) *Step 7: Computation of the general phase-in amount.* The general phase-in amount is the lesser of—

(i) The percentage of the November 16, 1985 amount designated for the relevant transition year in the table below, or

(ii) The lowest group month-end debt level (see Step 3).

GENERAL PHASE-IN TABLE

| Transition year | Percentage |
|-----------------|------------|
| Year 1 | 75 |
| Year 2 | 50 |
| Year 3 | 25 |

(8) *Step 8: Computation of Five-Year Phase-in Amount.* The five-year phase-in amount is the lesser of—

(i) The percentage of the unreduced five-year debt designated for the relevant transition year in the table below, or

(ii) The percentage of the reduced five-year debt designated for the relevant transition year in the table below.

FIVE-YEAR PHASE-IN TABLE

| Transition year | Unreduced percentage | Reduced percentage |
|-----------------|----------------------|--------------------|
| Year 1 | 8 1/3 | 10 |
| Year 2 | 16 2/3 | 25 |
| Year 3 | 25 | 50 |
| Year 4 | 33 1/3 | 100 |
| Year 5 | 16 2/3 | 100 |

(9) *Step 9: Computation of Four-year Phase-in Amount.* The four-year phase-in amount is the lesser of—

(i) The percentage of the unreduced four-year debt designated for the relevant

transition year in the table below, or

(ii) The percentage of the reduced four-year debt designated for the relevant transition year in the table below.

FOUR-YEAR PHASE-IN TABLE

| Transition year | Unreduced percentage | Reduced percentage |
|-----------------|----------------------|--------------------|
| Year 1 | 5 | 6 1/4 |
| Year 2 | 10 | 16 2/3 |
| Year 3 | 15 | 37 1/2 |
| Year 4 | 20 | 100 |

(10) *Step 10: Determination of group debt ratio and application of transition relief to separate company interest expense.* (i) The general phase-in amount consists of the amount computed under Step 7. Interest expense on this amount is subject to pre-1987 rules of allocation and apportionment.

(ii) The post-1986 separate company amount consists of the sum of the amounts determined under Steps 8 and 9. Interest expense on this amount is subject to post-1986 rules of allocation and apportionment as applied on a separate company basis. Thus, § 1.861-11T(c) does not apply with respect to this amount of indebtedness. Because the consolidation rule does not apply, stock in affiliated corporations shall be taken into account in computing the apportionment fractions for each separate company in the same manner as under pre-1987 rules.

(iii) The post-1986 one-taxpayer amount consists of any indebtedness that does not qualify for transition relief under Steps 7, 8, and 9. Interest expense on this amount is subject to post-1986 rules as applied on a consolidated basis.

(iv) To determine the extent to which the interest expense of each separate company is subject to any of these sets of allocation and apportionment rules, each company shall prorate its own interest expense using two fractions. The general phase-in fraction is the general phase-in amount over the current year average debt level of the affiliated group (see Step 2). The post-1986 separate company fraction is the post-1986 separate company amount over the current year average debt level of the affiliated group. The balance of each

separate company's interest expense is subject to post-1986 one-taxpayer rules.

(f) *Example.* XYZ form an affiliate group.

(1) *Step 1:* Determination of the amounts within the various debt categories.

| | Historic 3rd party debt | Increase |
|--------------------------------|-------------------------|----------|
| Company X: | | |
| Nov. 16, 1985 | \$100,000 | |
| May 29, 1983 (5-year) | 90,000 | \$10,000 |
| Dec. 31, 1983 (4-year) | 80,000 | 10,000 |
| Dec. 31, 1982 | 70,000 | |
| Current Interest Expense | 10,000 | |
| Company Y: | | |
| Nov. 16, 1985 | 200,000 | |
| May 29, 1985 (5-year) | 170,000 | 120,000 |
| Dec. 31, 1983 (4-year) | 50,000 | 10,000 |
| Dec. 31, 1982 | 40,000 | |
| Current Interest Expense | 30,000 | |
| Company Z: | | |
| Nov. 16, 1985 | 300,000 | |
| May 29, 1985 (5-year) | 300,000 | 50,000 |
| Dec. 31, 1983 (4-year) | 250,000 | 100,000 |
| Dec. 31, 1982 | 150,000 | |
| Current Interest Expense | 30,000 | |

(2) *Step 2:* Aggregation of the separate company amounts.

| | |
|---------------------------------------|-----------|
| Aggregate Nov. 16, 1985 | \$600,000 |
| Aggregate 5-year debt | 180,000 |
| Aggregate 4-year debt | 120,000 |
| Current year average debt level | 700,000 |

(3) *Step 3:* Calculation of lowest historic month-end debt level.

An analysis of historic month-end debt levels indicates that in 1986, XYZ's aggregate month-end debt level fell to \$500,000, which represents the lowest sum for all years under consideration. Because this historic low occurred in a prior tax year, there is no averaging of month-end debt levels in the current taxable year.

(4) *Step 4:* Computation of paydowns.

The aggregate November 16, 1985 amount (\$600,000), less the lowest historic month-end debt level (\$500,000), yields a total paydown in the amount of \$100,000.

(5) *Step 5:* Computation of limitations on aggregate unreduced five-year debt and aggregate unreduced four-year debt.

| | |
|---------------------------------------|-----------|
| Aggregate Nov. 16, 1985 amount | \$600,000 |
| Aggregate unreduced 5-year debt | 180,000 |
| Aggregate unreduced 4-year debt | 120,000 |

Because the November 16, 1985 amount exceeds the unreduced 4- and 5-year debt, the full amount of the 4- and

5-year debt qualify for transition relief. In cases where the November 16, 1985 amount is less than the 4- or 5-year debt (or the sum of both), the latter amounts are limited to the November 16, 1985 amount. See the limitations on the 4-year and 5-year debt amounts in paragraphs (c)(6) and (c)(5), respectively, of this section.

(6) *Step 6:* Computation of reduced five-year and four-year debt. The paydowns computed under Step 4 are deemed to first offset the aggregate unreduced five-year debt. Accordingly, the reduced amount of five-year debt is \$80,000. Since the paydowns are less than the aggregate unreduced five-year debt, there is no paydown in connection with aggregate unreduced four-year debt. Accordingly, the unreduced four-year debt and the reduced four-year debt are both considered to be \$120,000.

(7) *Step 7:* Computation of the general phase-in amount. In transition year 1, the general transition amount is the lesser of:

(i) 75 percent of the aggregate November 16, 1985 amount (75% of \$600,000 = \$450,000); or

(ii) the lowest month-end debt level since November 16, 1985 (\$500,000).

Therefore, the general transition amount is \$450,000.

(8) *Step 8:* Computation of the five-year phase-in amount. In transition year 1, the five-year phase-in amount is the lesser of:

(i) 8½ percent of the unreduced five-year amount (8½% of \$180,000=\$15,000); or

(ii) 10 percent of the reduced five-year amount (10% of \$80,000=\$8,000).

Therefore, the five-year phase-in amount is \$8,000.

(9) *Step 9:* Computation of the four-year phase-in amount. In transition year 1, the four-year phase-in amount is the lesser of:

(i) 5 percent of the unreduced four-year amount (5% of \$120,000=\$6,000); or

(ii) 6¼ percent of the reduced four-year amount (6¼% of \$120,000=\$7,500).

Therefore, the four-year phase-in amount is \$6,000.

(10) *Step 10:* Determination of group debt ratio and application of relief to separate company interest expense.

(i) As determined under Step 7, interest expense on a total of \$450,000 of the XYZ debt in the first transition year is computed under pre-1987 rules of allocation and apportionment.

(ii) The sum of Steps 8 (\$8,000) and 9 (\$6,000) is \$14,000. Interest expense on a total of \$14,000 of XYZ debt is computed under post-1986 rules of allocation and apportionment as applied on a separate company basis.

(iii) The balance of XYZ's current year interest expense is computed under post-1986 rules of allocation and apportionment as applied on a consolidated basis. X, Y, and Z, respectively, have current interest expense of \$10,000, \$30,000, and \$30,000. Thus, 64.3 percent ($450,000/700,000$) of the interest expense of each separate company is subject to pre-1987 rules. Two percent ($14,000/700,000$) of the interest expense of each separate company is subject to post-1986 rules applied on a separate company basis. Finally, the balance of each separate company's current year interest expense (33.7 percent) is subject to post-1986 rules applied on a consolidated basis.

(g) *Corporate transfers*—(1) *Effect on transferee*—(i) *General rule*. Except as provided in paragraph (g)(1)(ii) of this section, if a domestic corporation or an affiliated group acquires stock in a domestic corporation that was not a member of the transferee's affiliated group before the acquisition, but becomes a member of the transferee's affiliated group after the acquisition, the transferee group shall take into account the following transition attributes of the acquired corporation in computing its transition relief:

(A) November 16, 1985 amount;

(B) Unreduced five-year amount;

(C) Unreduced four-year amount; and

(D) The amount of any transferor paydowns attributed to the acquired corporation under the rules of paragraph (h)(1) of this section.

(ii) *Special rule for year of acquisition*. To compute the amount of the transition attributes described in paragraph (g)(1)(i) of this section that a transferee takes into account in the transferee's taxable year of the acquisition, such transition attributes shall be multiplied by a fraction, the numerator of which is the number of months within

the taxable year that the transferee held the acquired corporation and the denominator of which is the number of months in such taxable year. In order for the transferee to assert ownership of a subsidiary for a given month, the transferee and the acquired corporation must be affiliated corporations as of the last day of the month. In addition, the transferor and the transferee shall take account of the month-end debt level of the transferred corporation only for those months at the end of which the transferred corporation was a member of the transferor's or the transferee's respective affiliated group.

(iii) *Aggregation of transition attributes*. The transition attributes of the acquired corporation shall be aggregated with the respective amounts of the transferee group.

(iv) *Conveyance of transferor paydowns*. The total paydowns of the transferee group shall include the amount of any paydown of the transferor group that was attributed to the acquired corporation under the rules of paragraph (h)(1) of this section.

(v) *Effect of certain elections*. If an election—

(A) Is made under section 338(g) (whether or not an election under 338(h)(10) is made),

(B) Is deemed to be made under section 338(e) (other than (e)(2)), or section 338(f), or,

(C) Is made under section 336(e), no indebtedness of the acquired corporation shall qualify for transition relief for the year such election first becomes effective and for subsequent taxable years, and no other transition attributes of the acquired corporation shall be taken into account by the transferee group.

(2) *Effect on transferor*—(i) *General rule*. Except as provided in paragraph (g)(2)(ii) of this section, in the case of an acquisition of a member of an affiliated group by a nonmember of the group, the transferor shall not take into account the transition attributes of the acquired corporation in computing the transition relief of the transferor group in subsequent taxable years. Thus, the November 16, 1985 amount, the unreduced five-year and four-year debt amounts, and the end-of-month debt levels of the transferor

group shall be computed without regard to the acquired corporation's respective amounts for purposes of computing transition relief of the transferor group for years thereafter.

(ii) *Special rule for the year of disposition.* To compute the amount of the transition attributes described in paragraph (g)(2)(i) of this section that a transferor shall take into account in the transferor's taxable year of the disposition, such transition attributes shall be multiplied by a fraction, the numerator of which is the number of months within the taxable year that the transferor held the acquired corporation and the denominator of which is the number of months in such taxable year. In order for the transferor to assert ownership of a subsidiary for a given month, the transferor and the acquired corporation must be affiliated corporations as of the last day of the month.

(iii) *Effect of prior paydowns.* Any paydowns of the acquired corporation that are considered to reduce the debt of other members of the transferor group under the rules of paragraph (h)(1) of this section (whether incurred in a prior taxable year or in that portion of a year of disposition that is taken into account by the transferor) shall continue to be taken into account by the transferor group after the disposition.

(3) *Special rule for assumptions of indebtedness.* In connection with the transfer of a corporation, if the indebtedness of an acquired corporation is assumed by any party other than the transferee or another member of the transferee's affiliated group, the transition attributes of the acquired corporation shall not be taken into account in computing the transition relief of the transferee group. See paragraph (g)(2) of this section concerning the treatment of the transferor group. Also in connection with the transfer of a corporation, if the transferee or another member of the transferee's affiliated group assumes the indebtedness of an acquired corporation, such assumed indebtedness shall only qualify for transition relief during the period in which the acquired corporation remains a member of the transferee group. Further, if the transferee group

subsequently disposes of the acquired corporation, the indebtedness of the acquired corporation will continue to qualify for transition relief only if the indebtedness is assumed by the new purchaser as of the time such corporation is acquired.

(4) *Effect of asset sales.* If substantially all of the assets of a corporation are sold, the indebtedness of such corporation shall cease to be qualified for transition relief. Thus, the transition attributes of such corporation shall not be taken into account in computing transition relief.

(h) *Rules for attributing paydowns among separate companies—(1) General rule.* In the case of a corporate transfer under paragraph (g) of this section, it is necessary to determine the amount of paydowns attributable to the acquired corporation. Under paragraph (c)(7) of this section, paydowns are deemed to reduce first the five-year phase-in amount, then the four-year phase-in amount, and then the general phase-in amount. Thus, for example, a reduction in indebtedness of the group caused by a reduction in the debt of a group member that has no five-year debt will nevertheless be deemed under this ordering rule to reduce the indebtedness of those group members that do have five-year debt. In order to preserve the effect of paydowns caused by a reduction, each member must determine on a separate company basis at the time of any transfer of any member of the affiliated group the impact of paydowns (including those paydowns occurring in the year of transfer prior to the time of the transfer) on the various categories of indebtedness.

(2) *Mechanics of computation.* Separate company accounts of paydowns are determined by prorating any paydown among all group members with five-year debt to the extent thereof on the basis of the relative amounts of five-year debt. Paydowns in excess of five-year debt are prorated on a similar basis among all group members with four-year debt to the extent thereof on the basis of the relative amounts of four-year debt. Paydowns in excess of four-year and five-year debt are prorated among all group members with general phase-in debt to the extent thereof on the basis of the relative

amounts of general phase-in debt. After an initial paydown has been prorated among the members of an affiliated group, any further reduction in the amount of aggregate month-end debt level as compared to the November 16, 1985 amount is prorated among all members of the affiliated group based on the remaining net amounts of four-year and five-year debt.

(3) *Examples.* The rules of paragraphs (g) and (h) of this section may be illustrated by the following examples.

Example 1. Computing separate company accounts of reductions. (i) *Facts.* XYZ constitutes an affiliated group of corporations that has a calendar taxable year and the following transition attributes:

| | Historic 3rd party debt | Increase |
|------------------------------|-------------------------|----------|
| Company X: | | |
| Nov. 16, 1985 | \$100,000 | |
| May 29, 1985 (5-year) | 80,000 | \$0 |
| Dec. 31, 1983 (4-year) | 80,000 | 10,000 |
| Dec. 31, 1982 | 70,000 | |
| Company Y: | | |
| Nov. 16, 1985 | 200,000 | |
| May 29, 1985 (5-year) | 170,000 | 120,000 |
| Dec. 31, 1983 (4-year) | 50,000 | 10,000 |
| Dec. 31, 1982 | 40,000 | |
| Company Z: | | |
| Nov. 16, 1985 | 300,000 | |
| May 29, 1985 (5-year) | 290,000 | 40,000 |
| Dec. 31, 1983 (4-year) | 250,000 | 100,000 |
| Dec. 31, 1982 | 150,000 | |

In 1986, the XYZ group attained its lowest historic month-end debt level of \$500,000. Because the November 16, 1985 amount is \$600,000 the XYZ group therefore has a paydown in the amount of \$100,000. This paydown partially offsets the \$160,000 of five-year debt in the XYZ group.

(ii) *Analysis.* Applying the rule of paragraph (h)(1) of this section, separate company accounts of paydowns are computed by prorating the \$100,000 paydown among those members of the group that have five-year debt. Accordingly, the paydown is prorated between Y and Z as follows:

To Y:

$$\$100,000 \times \frac{\$120,000}{\$160,000} = \$75,000$$

To Z:

$$\$100,000 \times \frac{\$40,000}{\$160,000} = \$25,000$$

Example 2. Corporate acquisitions. (i) *Facts.* The facts are the same as in example 1. On July 15, 1987, the XYZ group sells all the stock of Y to A. Having held the stock of Y

for six months in 1987, the XZ group computes its transition relief for that year taking into account half of the transition attributes of Y. AY constitutes an affiliated group of corporations after the acquisition. Having held the stock of Y for six months in 1987, the AY group computes its transition relief for that year taking into account half of the transition attributes of Y. In 1987, the AY group attained a new lowest month-end debt level that yields an average lowest month-end debt level for 1987 of \$150,000.

(ii) *Transferee group.* The following analysis applies in determining transition relief for purposes of apportioning the interest expense of the transferee group for 1987. The AY group has the following transition attributes for 1987:

| | Historic 3rd party debt | Increase |
|---|-------------------------|----------|
| Company A: | | |
| Nov. 16, 1985 | \$100,000 | |
| May 29, 1985 (5-year) | 250,000 | \$5,000 |
| Dec. 31, 1983 (4-year) | 245,000 | 10,000 |
| Dec. 31, 1982 | 235,000 | |
| Company Y (half-year amounts): | | |
| Nov. 16, 1985 | 100,000 | |
| May 29, 1985 (5-year) | 85,000 | 60,000 |
| Dec. 31, 1983 (4-year) | 25,000 | 5,000 |
| Dec. 31, 1982 | 20,000 | |
| Pre-acquisition year paydown by another member of the transferor group that reduced Y's five-year debt (one half of \$75,000) | 37,500 | |

Because the November 16, 1985 amount of the AY group in 1987 is \$200,000 and because the 1987 average of historic month-end debt levels was \$150,000, the AY group has a paydown in the amount of \$50,000. In addition, the 1986 paydown by the XYZ group that was deemed to reduce Y debt is added to the paydown computed above, yielding a total paydown of \$87,500. This amount is prorated between members, eliminating the four and five year debt of the AY group. Note that Y is only a member of the AY group for half of the 1987 taxable year. In 1988, Y's entire transition indebtedness and a \$75,000 paydown must be taken into account in computing the amount of interest expense eligible for transition relief.

(iii) *Transferor group.* The following analysis applies in determining transition relief for purposes of apportioning the interest expense of the transferor group for 1987. The XZ group has the transition attributes stated below for 1987. In 1987, the XZ group attained a new lowest month-end debt level that yields an average lowest month-end debt level for 1987 of \$250,000.

| | Historic 3rd party debt | Increase |
|---|-------------------------|----------|
| Company X: | | |
| Nov. 16, 1985 | \$100,000 | |
| May 29, 1985 (5-year) | 80,000 | \$0 |
| Dec. 31, 1983 (4-year) | 80,000 | 10,000 |
| Dec. 31, 1982 | 70,000 | |
| Pre-disposition
paydown that re-
duced X's debt | 0 | |
| Company Y (half-year
amounts): | | |
| Nov. 16, 1985 | 100,000 | |
| May 29, 1985 (5-year) | 85,000 | 60,000 |
| Dec. 31, 1983 (4-year) | 25,000 | 5,000 |
| Dec. 31, 1982 | 20,000 | |
| Pre-disposition
paydown that re-
duced Y's debt | 37,500 | |
| Company Z: | | |
| Nov. 16, 1985 | 300,000 | |
| May 29, 1985 (5-year) | 290,000 | 40,000 |
| Dec. 31, 1983 (4-year) | 250,000 | 100,000 |
| Dec. 31, 1982 | 150,000 | |
| Pre-disposition
paydown that re-
duced Z's debt | 25,000 | |

Because the revised November 16, 1985 amount of the XZ group is \$500,000 and because the 1987 average of lowest historic month-end debt levels of the XZ group was \$250,000, the XZ group has a paydown in the amount of \$250,000. This paydown offsets the total five and four year debt of the XZ group. Had the 1987 paydown of the XZ group been an amount less than the five-year amount, the paydown would have been prorated based on Y's adjusted 5-year amount of \$22,500 and Z's adjusted 5-year amount of \$15,000.

[T.D. 8257, 54 FR 31820, Aug. 2, 1989]

§ 1.861-14 Special rules for allocating and apportioning certain expenses (other than interest expense) of an affiliated group of corporations.

(a)-(c) [Reserved]. For further guidance, see § 1.861-14T(a) through (c).

(d) *Definition of affiliated group*—(1) *General rule.* For purposes of this section, the term *affiliated group* has the same meaning as is given that term by section 1504, except that section 936 corporations (as defined in § 1.861-11(d)(2)(ii)) are also included within the affiliated group to the extent provided in paragraph (d)(2) of this section. Section 1504(a) defines an affiliated group as one or more chains of includible corporations connected through 80-percent stock ownership with a common parent corporation which is an includible corporation (as defined in section 1504(b)). In the case of a corporation that either becomes or ceases to be a member of the group during the course of the cor-

poration's taxable year, only the expenses incurred by the group member during the period of membership shall be allocated and apportioned as if all members of the group were a single corporation. In this regard, the apportionment factor chosen shall relate only to the period of membership. For example, if apportionment on the basis of assets is chosen, the average amount of assets (tax book value or fair market value) for the taxable year shall be multiplied by a fraction, the numerator of which is the number of months of the corporation's taxable year during which the corporation was a member of the affiliated group, and the denominator of which is the number of months within the corporation's taxable year. If apportionment on the basis of gross income is chosen, only gross income generated during the period of membership shall be taken into account. If apportionment on the basis of units sold or sales receipts is chosen, only units sold or sales receipts during the period of membership shall be taken into account. Expenses incurred by the group member during its taxable year, but not during the period of membership, shall be allocated and apportioned without regard to other members of the group. This paragraph (d)(1) applies to taxable years beginning after December 31, 1989.

(2) *Inclusion of section 936 corporations*—(i) *General rule.* Except as otherwise provided in paragraph (d)(2)(ii) of this section, the exclusion from the affiliated group of section 936 corporations under section 1504(b)(4) does not apply for purposes of this section. Thus, a section 936 corporation that meets the ownership requirements of section 1504(a) is a member of the affiliated group.

(ii) *Exception for purposes of alternative minimum tax.* The exclusion from the affiliated group of section 936 corporations under section 1504(b)(4) shall be operative for purposes of the application of this section solely in determining the amount of foreign source alternative minimum taxable income within each separate category and the alternative minimum tax foreign tax credit pursuant to section 59(a). Thus, a section 936 corporation that meets the ownership requirements of section

1504(a) is not a member of the affiliated group for purposes of determining the amount of foreign source alternative minimum taxable income within each separate category and the alternative minimum tax foreign tax credit pursuant to section 59(a).

(iii) *Effective date.* This paragraph (d)(2) applies to taxable years beginning after December 31, 1989.

(d)(3) through (e)(5) [Reserved]. For further guidance, see § 1.861-14T(d)(3) through (e)(5).

(e)(6) *Charitable contribution expenses—(i) In general.* A deduction for a charitable contribution by a member of an affiliated group shall be allocated and apportioned under the rules of §§ 1.861-8(e)(12) and 1.861-14T(c)(1).

(ii) *Effective date.* (A) The rules of this paragraph shall apply to charitable contributions subject to § 1.861-8(e)(12)(i) that are made on or after July 28, 2004, and, for taxpayers applying the second sentence of § 1.861-8(e)(12)(iv)(A), to charitable contributions made during the taxable year ending on or after July 28, 2004.

(B) The rules of this paragraph shall apply to charitable contributions subject to § 1.861-8(e)(12)(ii) that are made on or after July 14, 2005, and, for taxpayers applying the second sentence of § 1.861-8(e)(12)(iv)(B), to charitable contributions made during the taxable year ending on or after July 14, 2005.

(f) through (j) [Reserved] For further guidance, see § 1.861-14T(f) through (j).

[T.D. 8916, 66 FR 274, Jan. 3, 2001, as amended by T.D. 9211, 70 FR 40663, July 14, 2005]

§ 1.861-14T Special rules for allocating and apportioning certain expenses (other than interest expense) of an affiliated group of corporations (temporary).

(a) *In general.* Section 1.861-11T provides special rules for allocating and apportioning interest expense of an affiliated group of corporations. The rules of this § 1.861-14T also relate to affiliated groups of corporations and implement section 864(e)(6), which requires affiliated group allocation and apportionment of expenses other than interest which are not directly allocable and apportionable to any specific income producing activity or property. In general, the rules of this section

apply to taxable years beginning after December 31, 1986. Paragraph (b) of this section describes the scope of the application of the rule for the allocation and apportionment of such expenses of affiliated groups of corporations. Such rule is then set forth in paragraph (c) of this section. Paragraph (d) of this section contains the definition of the term “affiliated group” for purposes of this section. Paragraph (e) of this section describes the expenses subject to allocation and apportionment under the rules of this section. Paragraph (f) of this section provides rules concerning the affiliated group allocation and apportionment of such expenses in computing the combined taxable income of a FSC or DISC and its related supplier. Paragraph (g) of this section describes the treatment of losses caused by apportionment of such expenses in the case of an affiliated group that does not file a consolidated return. Paragraph (h) of this section provides rules concerning the treatment of the reserve expenses of a life insurance company. Paragraph (j) of this section provides examples illustrating the application of this section.

(b) *Scope—(1) Application of section 864(e)(6).* Section 864(e)(6) and this section apply to the computation of taxable income for purposes of computing separate limitations on the foreign tax credit under section 904. Section 864(e)(6) and this section also apply in connection with section 907 to determine reductions in the amount allowed as a foreign tax credit under section 901. Section 864(e)(6) and this section also apply to the computation of the combined taxable income of the related supplier and a foreign sales corporation (FSC) (under sections 921 through 927) as well as the combined taxable income of the related supplier and a domestic international sales corporation (DISC) (under sections 991 through 997).

(2) *Nonapplication of section 864(e)(6).* Section 864(e)(6) and this section do not apply to the computation of subpart F income of controlled foreign corporations (under sections 951 through 964) or the computation of effectively connected taxable income of foreign corporations.

(3) *Application of section 864(e)(6) to the computation of combined taxable income*

of a possessions corporation and its affiliates. [Reserved]

(c) *General rule for affiliated corporations*—(1) *General rule.* (i) Except as otherwise provided in paragraph (c)(2) of this section, the taxable income of each member of an affiliated group within each statutory grouping shall be determined by allocating and apportioning the expenses described in paragraph (e) of this section of each member according to apportionment fractions which are computed as if all members of such group were a single corporation. For purposes of determining these apportionment fractions, any interaffiliate transactions or property that are duplicative with respect to the measure of apportionment chosen shall be eliminated. For example, in the application of an asset method of apportionment, stock in affiliated corporations shall not be taken into account, and loans between members of an affiliated group shall be treated in accordance with the rules of § 1.861-11T(e). Similarly, in the application of a gross income method of apportionment, interaffiliate dividends and interest, gross income from sales or services, and other interaffiliate gross income shall be eliminated. Likewise, in the application of a method of apportionment based on units sold or sales receipts, interaffiliate sales shall be eliminated.

(ii) Except as otherwise provided in this section, the rules of § 1.861-8T apply to the allocation and apportionment of the expenses described in paragraph (e) of this section. Thus, allocation under this paragraph (c) is accomplished by determining, with respect to each expense described in paragraph (e), the class of gross income to which the expense is definitely related and then allocating the deduction to such class of gross income. For this purpose, the gross income of all members of the affiliated group must be taken in account. Then, the expense is apportioned by attributing the expense to gross income (within the class to which the expense has been allocated) which is in the statutory grouping and to gross income (within the class) which is in the residual grouping. Section 1.861-8T(c)(1) identifies a number of factors upon which apportionment may

be based, such as comparison of units sold, gross sales or receipts, assets used, or gross income. The apportionment method chosen must be applied consistently by each member of the affiliated group in apportioning the expense when more than one member incurred the expense or when members incurred separate portions of the expense. The apportionment fraction must take into account the apportionment factors contributed by all members of the affiliated group. In the case of an affiliated group of corporations that files a consolidated return, consolidated foreign tax credit limitations are computed for the group in accordance with the rules of § 1.1502-4. For purposes of this section the term “taxpayer” refers to the affiliated group (regardless of whether the group files a consolidated return), rather than to the separate members thereof.

(2) *Expenses relating to fewer than all members.* An expense relates to fewer than all members of an affiliated group if the expense is allocable under paragraph (e)(1) of this section to gross income of at least one member other than the member that incurred the expense but fewer than all members of the affiliated group. The taxable income of the member that incurred the expense shall be determined by apportioning that expense under the rules of paragraph (c)(1) of this section as if the members of the affiliated group that derive gross income to which such expense is allocable under paragraph (e)(1) were treated as a single corporation.

(3) *Prior application of section 482.* The rules of this section do not supersede the application of section 482 and the regulations thereunder. Section 482 may be applied effectively to deny a deduction for an expense to one member of an affiliated group and to allow a deduction for that expense to another member of the affiliated group. In cases to which section 482 is applied, expenses shall be reallocated and re-apportioned under section 864(e)(6) and this section after taking into account the application of section 482.

(d)(1)–(2) [Reserved]. For further guidance, see § 1.861-14(d)(1) and (2).

(e) *Expenses to be allocated and apportioned under this section*—(1) *Expenses*

not directly traceable to specific income producing activities or property. (i) The expenses that are required to be allocated and apportioned under the rules of this section are expenses related to certain supportive functions, research and experimental expenses, stewardship expenses, and legal and accounting expenses, to the extent that such expenses are not directly allocable to specific income producing activities or property solely of the member of the affiliated group that incurred the expense. Interest expense of members of an affiliated group of corporations is allocated and apportioned under § 1.861-11T and not under the rules of this section. Expenses that are included in inventory costs or that are capitalized are not subject to allocation and apportionment under the rules of this section.

(ii) An item of expense is not considered to be directly allocable to specific income producing activities or property solely of the member incurring the expense if, were all members of the affiliated group treated as a single corporation, the expense would not be considered definitely related, within the meaning of § 1.861-8T(b)(2), only to a class of gross income derived solely by the member which actually incurred the expense. Furthermore, the expense is presumed not to be definitely related only to a class of gross income derived solely by the member incurring the expense (and is, therefore, presumed not to be directly allocable to specific income producing activities or property of that member) unless the taxpayer is able affirmatively to establish otherwise. As provided in paragraph (c)(1) of this section, expenses described in this paragraph (e)(1) generally shall be apportioned by the member incurring the expense according to apportionment fractions computed as if all members of the affiliated group were a single corporation. Under paragraph (c)(2) of this section, however, an expense shall be apportioned according to apportionment fractions computed as if only some (but fewer than all) members of the affiliated group were a single corporation, if the expense is considered allocable to gross income of at least one member other than the member incurring the expense but fewer than all

members of the affiliated group. An item of expense shall be considered to be allocable to gross income of fewer than all members of the group if, were all members of the affiliated group treated as a single corporation, the expense would not be considered definitely related within the meaning of § 1.861-8T(b)(2) to gross income derived by all members of the group. In such case, the expense shall be considered allocable, for purposes of paragraph (c)(2) of this section, to gross income of those members of the group that generated (or could reasonably be expected to generate) the gross income to which the expense would be considered definitely related if the group were treated as a single corporation.

(2) *Research and experimental expenses*—(i) *In general.* The allocation and apportionment of research and experimental expenses is governed by the rules of § 1.861-8T(e)(3). In the case of research and experimental expenses incurred by a member of an affiliated group, the rules of § 1.861-8T(e)(3) shall be applied as if all members of the affiliated group were a single taxpayer. Thus, research and experimental expenses shall be allocated to all income of all members of the affiliated group reasonably connected with the relevant broad product category to which such expenses are definitely related under § 1.861-8T(e)(3)(i). If fewer than all members of the affiliated group derive gross income reasonably connected with that relevant broad product category, then such expenses shall be apportioned under the rules of this paragraph (c)(2) only among those members, as if those members were a single corporation. See *Example (1)* of paragraph (j) of this section. Such expenses shall then be apportioned, if the sales method is used, in accordance with the rules of § 1.861-8T(e)(3)(ii) between the statutory grouping (within the class of gross income) and the residual grouping (within the class of gross income) taking into account the amount of sales of all members of the affiliated group from the product category which resulted in such gross income. Section 1.861-8T(e)(3)(ii)(D), relating to sales of controlled parties, shall be applied as if all members of

the affiliated group were the “taxpayer” referred to therein. If either of the optional gross income methods of apportionment is used, gross income of all members of the affiliated group that generate, have generated, or could reasonably have been expected to generate gross income within the relevant class of gross income must be taken into account.

(ii) *Expenses subject to the statutory moratorium.* The rules of this section do not apply to research and experimental expenses allocated under section 126 of Pub. L. 98-368.

(3) *Expenses related to supportive functions.* Expenses which are supportive in nature (such as overhead, general and administrative, supervisory expenses, advertising, marketing, and other sales expenses) are to be allocated and apportioned in accordance with the rules of § 1.861-8T(b)(3). To the extent that such expenses are not directly allocable under paragraph (e)(1)(ii) of this section to specific income producing activities or property of the member of the affiliated group that incurred the expense, such expenses must be allocated and apportioned as if all members of the affiliated group were a single corporation in accordance with the rules of paragraph (c) of this section. Specifically, such expenses must be allocated to a class of gross income that take into account gross income that is generated, has been generated, or could reasonably have been expected to have been generated by the members of the affiliated group. If the expenses relate to the gross income of fewer than all members of the affiliated group as determined under paragraph (c)(2) of this section, then those expenses must be apportioned under the rules of paragraph (c)(2) of this section, as if those fewer members were a single corporation. See *Example* (3) of paragraph (j) of this section. Such expenses must be apportioned between statutory and residual groupings of income within the appropriate class of gross income by reference to the apportionment factors contributed by the members of the affiliated group that are treated as a single corporation.

(4) *Stewardship expenses.* Stewardship expenses are to be allocated and apportioned in accordance with the rules of

§ 1.861-8T(e)(4). In general, stewardship expenses are considered definitely related and allocable to dividends received or to be received from a related corporation. If members of the affiliated group, other than the member that incurred the stewardship expense, receive or may receive dividends from the related corporation, such expense must be allocated and apportioned in accordance with the rules of paragraph (c) of this section as if all such members of the affiliated group that receive or may receive dividends were a single corporation. See *Example* (4) of paragraph (j) of this section. Such expenses must be apportioned between statutory and residual groupings of income within the appropriate class of gross income by reference to the apportionment factors contributed by the members of the affiliated group treated as a single corporation.

(5) *Legal and accounting fees and expenses.* Legal and accounting fees and expenses are to be allocated and apportioned under the rules of § 1.861-8T(e)(5). To the extent that such expenses are not directly allocable under paragraph (e)(1)(ii) of this section to specific income producing activities or property of the member of the affiliated group that incurred the expense, such expenses must be allocated and apportioned as if all members of the affiliated group were a single corporation. Specifically, such expenses must be allocated to a class of gross income that takes into account the gross income which is generated, has been generated, or could reasonably have been expected to have been generated by the other members of the affiliated group. If the expenses relate to the gross income of fewer than all members of the affiliated group as determined under paragraph (c)(2) of this section, then those expenses must be apportioned under the rules of paragraph (c)(2) of this section, as if those fewer members were a single corporation. See *Example* (5) of paragraph (j) of this section. Such expenses must be apportioned taking into account the apportionment factors contributed by the members of the group that are treated as a single corporation.

(f) *Computation of FSC or DISC combined taxable income.* In the computation under the pricing rules of sections 925 and 994 of the combined taxable income of any FSC or DISC and its related supplier which are members of an affiliated group, the combined taxable income of such FSC or DISC and its related supplier shall be reduced by the portion of the expenses of the affiliated group described in paragraph (e) of this section that is incurred in connection with export sales involving that FSC or DISC. In order to determine the portion of the expenses of the affiliated group that is incurred in connection with export sales by or through a FSC or DISC, the portion of the total of the apportionment factor chosen that relates to the generation of that export income must be determined. Thus, if gross income is the apportionment factor chosen, the portion of total gross income of the affiliated group that consists of combined gross income derived from transactions involving the FSC or DISC and related supplier must be determined. Similarly, if units sold or sales receipts is the apportionment factor chosen, the portion of total units sold or sales receipts that generated export income of the FSC or DISC and related supplier must be determined. The amount of the expense shall then be multiplied by a fraction, the numerator of which is the export related apportionment factor as determined above, and the denominator of which is the total apportionment factor. Thus, if gross income is the apportionment factor chosen, apportionment is based on a fraction, the numerator of which is export related combined gross income of the FSC or DISC and related supplier and the denominator of which is the total gross income of the affiliated group. Similarly, if units sold or sales receipts is the apportionment factor chosen, the fraction is the units sold or sales receipts that generated export income of the FSC or DISC and related supplier over the total units sold or sales receipts of the affiliated group. Under this rule, expenses of other group members may be attributed to the combined gross income of a FSC or DISC and its related supplier without affecting the amount of expenses (other than any commission

payable by the related supplier to the FSC or DISC) otherwise deductible by the FSC or DISC, the related supplier, or other members of the affiliated group. The FSC or DISC must calculate combined taxable income, taking into account any reduction by expenses attributed from other members of the affiliated group to determine the commission derived by the FSC or DISC or the transfer price of qualifying export property sold to the FSC or DISC.

(g) *Losses created through apportionment.* In the case of an affiliated group that does not file a consolidated return, the taxable income in any separate limitation category must be adjusted under this paragraph (g) for purposes of computing the separate foreign tax credit limitations under section 904(d). As a consequence of the affiliated group allocation and apportionment of expenses required by section 864(e)(6) and this section, expenses of a group member may be apportioned for section 904 purposes to a limitation category with a consequent loss in that limitation category. For purposes of this paragraph, the term "limitation category" includes domestic source income, as well as the types of income described in section 904(d)(1) (A) through (I). A loss of one affiliate in a limitation category will reduce the income of another member in the same limitation category if a consolidated return is filed. (See §1.1502-4.) If a consolidated return is not filed, this netting does not occur. Accordingly, in such a case, the following adjustments among members are required, in order to give effect to the group allocation of expense:

(1) Losses created through group apportionment of expense in one or more limitation categories within a given member must be eliminated; and

(2) A corresponding amount of income of other members in the same limitation category must be recharacterized.

Such adjustments shall be accomplished in accordance with the rules of §1.861-11T(g).

(h) *Special rule for the allocation of reserve expenses of a life insurance company.* An amount of reserve expenses of a life insurance company equal to the dividends received deduction that is

§ 1.861-14T

26 CFR Ch. I (4-1-15 Edition)

disallowed because it is attributable to the policyholders' share of dividends received shall be treated as definitely related to such dividends. The remaining reserve expenses of such company shall be allocated and apportioned under the rules of § 1.861-8 and this section.

(i) [Reserved]

(j) *Examples.* The rules of this section may be illustrated by the following examples. All of these examples assume that section 482 has not been applied by the Commissioner.

Example 1: (i) *Facts.* P owns all of the stock of X and all of the stock of Y. P, X and Y are domestic corporations. P is a holding company for the stock of X and Y. Both X and Y manufacture and sell a product which is included in a broad product category listed in § 1.861-8(e)(3)(i). During 1988, X incurred \$100,000 on research connected with that product. All of the research was performed in the United States. In 1988, the domestic sales by X of the product totalled \$400,000 and the foreign sales of the product totalled \$200,000; Y's domestic sales of the product totalled \$200,000 and Y's foreign sales of the product

totalled \$200,000. In 1988, X's gross income is \$300,000, of which \$200,000 is from domestic sales and \$100,000 is from foreign sales; Y's gross income is \$200,000 of which \$100,000 is from domestic sales and \$100,000 is from foreign sales.

(ii) P, X and Y are affiliated corporations within the meaning of section 864(e)(5) and this section. The research expenses incurred by X are allocable to all income connected with the relevant broad category listed in § 1.861-8T(e)(3)(i). Both X and Y have gross income includible within the class of gross income related to that product category. Accordingly, the research and experimental expenses incurred by X are to be allocated and apportioned as if X and Y were a single corporation. The apportionment for 1988 is as follows:

Tentative Apportionment on the Basis of Sales

| | |
|--|-----------|
| Research expenses to be apportioned | \$100,000 |
| Exclusive apportionment to United States source gross income..... | \$30,000 |
| Research expense to be apportioned on the basis of sales..... | \$70,000 |
| Apportionment of research expense to foreign source general limitation income: | |

$$\$70,000 \times \frac{\$200,000 + \$200,000}{\$600,000 + \$400,000} = \$28,000$$

Apportionment of research expense to United States source gross income:

$$\$70,000 \times \frac{\$400,000 + \$200,000}{\$600,000 + \$400,000} = \$42,000$$

| | |
|--|-----------|
| Total apportioned deduction for research..... | \$100,000 |
| Of which— | |
| Apportioned to foreign source gross income | \$28,000 |
| Apportioned to U.S. source gross in- | |

| | |
|--|----------|
| come (\$30,000+\$42,000) | \$72,000 |
| <i>Tentative Apportionment on the Basis of Gross Income</i> | |
| Research expense apportioned to foreign source gross income: | |

$$\$100,000 \times \frac{\$100,000 + \$100,000}{\$300,000 + \$200,000} = \$40,000$$

Research expense apportioned to United States income:

$$\$100,000 \times \frac{\$200,000 + \$100,000}{\$300,000 + \$200,000} = \$60,000$$

Example 2: (i) *Facts.* P owns all of the stock of X, which owns all of the stock of Y. P, X and Y are all domestic corporations. P has incurred general training program expenses of \$100,000 in 1987. Employees of P, X and Y participate in the training program. In 1987, P had United States source gross income of \$200,000 and foreign source general limitation income of \$200,000; X had U.S. source gross income of \$100,000 and foreign source general limitation income of \$100,000; and Y had U.S. source gross income of \$300,000 and foreign source general limitation income of \$100,000.

(ii) *Analysis.* P, X and Y are an affiliated group of corporations within the meaning of

section 864(e)(5). The training expenses incurred by P are not definitely related solely to specific income producing activities or property of P. The employees of X and Y also participate in the training program. Thus, this expense relates to gross income generated by P, X and Y. This expense is definitely related and allocable to all of the gross income from foreign and domestic sources of P, X and Y. It is assumed that apportionment on the basis of gross income is reasonable. The apportionment of the expense is as follows:

Apportionment of \$100,000 expense to foreign source general limitation income:

$$\$100,000 \times \frac{\$200,000 + \$100,000 + \$100,000}{\$400,000 + \$200,000 + \$400,000} = \$40,000$$

Apportionment of \$100,000 expense to United States source gross income:

$$\$100,000 \times \frac{\$200,000 + \$100,000 + \$300,000}{\$400,000 + \$200,000 + \$400,000} = \$60,000$$

Total apportioned expense\$100,000

Example 3: (i) *Facts.* The facts are the same as in *Example (2)* above, except that only employees of P and X participate in the training program.

(ii) *Analysis.* Because only the employees of P and X participate in the training program and they perform no services for Y, the ex-

pense relates only to gross income generated by P and X. Accordingly, the \$100,000 expense must be allocated and apportioned as if P and X were a single corporation. The apportionment of the \$100,000 expense is as follows:

Apportionment of \$100,000 expense to foreign source general limitation income:

$$\$100,000 \times \frac{\$200,000 + \$100,000}{\$400,000 + \$200,000} = \$50,000$$

Apportionment of \$100,000 expense to U.S. source gross income:

$$\$100,000 \times \frac{\$200,000 + \$100,000}{\$400,000 + \$200,000} = \$50,000$$

Example 4: (i) *Facts.* P owns all of the stock of X which owns all of the stock of Y. P and X are domestic corporations; Y is a foreign corporation. In 1987 P incurred \$10,000 of stewardship expenses relating to an audit of Y.

(ii) *Analysis.* The stewardship expenses incurred by P are not directly allocable to specific income producing activities or property of P. The expense is definitely related and allocable to dividends received or to be received by X. Accordingly, the expense of P is allocated and apportioned as if P and X were a single corporation. The expense is definitely related to dividends received or to be received by X from Y, a foreign corporation. Such dividends are foreign source general limitation income. Thus, the entire amount of the expense must be allocated to foreign source dividend income.

Example 5: (i) *Facts.* P owns all of the stock of X which owns all of the stock of Y. P, X and Y are all domestic corporations. In 1987, P incurred \$10,000 legal expense relating to the testimony of certain employees of P in connection with litigation to which Y is a party. This expense is not allocable to specific income of Y. In 1987, Y had \$100,000 foreign source general limitation income and \$300,000 U.S. source gross income.

(ii) *Analysis.* The legal expenses incurred by P are not definitely related solely to specific income producing activities or property of P. The expense is definitely related and allocable to the class of gross income which includes only gross income generated by Y. Accordingly, the expense of P is allocated and apportioned as if Y were the only member of the affiliated group, as follows:

Apportionment of legal expenses to foreign source general limitation income:

$$\$10,000 \times \frac{\$100,000}{\$400,000} \dots\dots \$2,500$$

Apportionment of legal expenses to U.S. source gross income:

$$\$10,000 \times \frac{\$300,000}{\$400,000} \dots\dots \$7,500$$

Example 6: (i) *Facts.* P owns all of the stock of R, which owns all of the stock of F. P and

R are domestic corporations, and F is a foreign sales corporation under section 922 of the Code. R and F have entered into an agreement whereby F is paid a commission with respect to sales of product A. In 1987, P had gross receipts of \$1,000,000 from domestic sales of product A, and gross receipts of \$1,000,000 from foreign sales of product A. R had gross receipts of \$1,000,000 from domestic sales of product A, and \$1,000,000 from export sales of product A. R's cost of goods sold attributable to export sales is \$500,000. R has deductible expenses of \$100,000 directly related to its export sales, and F has such deductible expenses of \$100,000. During 1987, P incurred an expense of \$100,000 for marketing studies involving the worldwide market for product A.

(ii) *Analysis.* P and R are an affiliated group of corporations within the meaning of section 864(e)(5) and this section. The expense incurred by P for marketing studies regarding the worldwide market for product A is an expense that is not directly related solely to the activities of P, but also to the activities of R. This expense must be allocated and apportioned under the rules of paragraph (c)(1) of this section, as if P and R were a single corporation. The expense is allocable to the class of gross income that includes all gross income generated by sales of product A. Apportionment on the basis of gross receipts is reasonable under these facts. F, a foreign corporation, is not a member of the affiliated group. However, for purposes of determining F's commission on its sales, the combined gross income of F and R must be reduced by the portion of the marketing studies expense of P that is incurred in connection with export sales involving F under the rules of paragraph (f) of this section. The computation of the combined taxable income of R and F is as follows:

| | |
|--|-------------|
| <i>Combined Taxable Income of R and F</i> | |
| R's gross receipts from export sales | \$1,000,000 |
| R's cost of goods sold | \$500,000 |
| | <hr/> |
| Combined Gross Income | \$500,000 |
| | <hr/> |
| Less: | |
| R's other deductible expenses | \$100,000 |
| F's other deductible expenses | 100,000 |
| Apportionment of P's expense: | |

$$\$100,000 \times \frac{\$1,000,000}{\$200,000 + \$2,000,000} \dots\dots \$25,000$$

Internal Revenue Service, Treasury

§ 1.861-15

| | |
|-------------------------------|-----------|
| Total | \$225,000 |
| Combined Taxable Income | \$275,000 |

(k) *Effective/applicability date.* The rules of this section apply for taxable years beginning after December 31, 1986.

[T.D. 8228, 53 FR 35501, Sept. 14, 1988, as amended by T.D. 8916, 65 FR 274, Jan. 3, 2001; T.D. 9143, 69 FR 44932, July 28, 2004; T.D. 9211, 70 FR 40663, July 14, 2005; T.D. 9456, 74 FR 38875, Aug. 4, 2009]

§ 1.861-15 Income from certain aircraft or vessels first leased on or before December 28, 1980.

(a) *General rule.* A taxpayer who owns an aircraft or vessel described in paragraph (b) of this section and who leases the aircraft or vessel to a United States person (other than a member of the same controlled group of corporations (as defined in section 1563) as the taxpayer) may elect under paragraph (f) of this section to treat all amounts includible in gross income with respect to the aircraft or vessel as income from sources within the United States for any taxable year ending after the commencement of the lease. This paragraph (a) applies only with respect to taxable years ending after August 15, 1971, and only with respect to leases entered into after that date of aircraft or vessels first leased by the taxpayer on or before December 28, 1980. An election once made applies to the taxable year for which made and to all subsequent taxable years unless it is revoked or terminated in accordance with paragraph (g) of this section. A taxpayer need not be a United States person to be eligible to make the election under this section, unless otherwise required by a provision of law not contained in the Internal Revenue Code of 1954. In addition, the taxpayer need not be a bank or other financial institution to be eligible to make this election. The term "United States person" as used in this section has the meaning assigned to it by section 7701(a)(30).

(b) *Property to which the election applies—(1) Section 38 property.* An election made under this section may be made only if the aircraft or vessel is section 38 property, or property which would be section 38 property but for section 48(a)(5) (relating to property

used by governmental units), at the time the election is made and for all taxable years to which the election applies. The aircraft or vessel must be property which qualifies for the investment credit under section 38 unless the property does not qualify because it is described in section 48(a)(5). If an aircraft is used predominantly outside the United States (determined under §1.48-1(g)(1)), it must qualify under the provisions of section 48(a)(2)(B)(i) and §1.48-1(g)(2)(i). If a vessel is used predominantly outside the United States, it must qualify under the provisions of section 48(a)(2)(B)(iii) and §1.48-1(g)(2)(iii). The aircraft or vessel may not be suspension or termination period property described in section 48(h) or section 49(a) (as in effect before the enactment of the Revenue Act of 1978). See paragraph (g) (3) and (4) of this section for rules which apply if the property ceases to be section 38 property.

(2) *United States manufacture or construction.* An election under this section may be made only if the aircraft or vessel is manufactured or constructed in the United States. The aircraft or vessel will be considered to be manufactured or constructed in the United States if 50 percent or more of the basis of the aircraft or vessel is attributable to value added within the United States.

(3) *Exclusion of certain property used outside the United States.* The term "aircraft or vessel" as used in this paragraph (b) does not include any property which is used predominantly outside the United States and which qualifies as section 38 property under—

(i) Section 48(a)(2)(B)(v), relating to containers used in the transportation of property to and from the United States,

(ii) Section 48(a)(2)(B)(vi), relating to certain property used for the purpose of exploring for, developing, removing, or transporting resources from the Outer Continental Shelf, or

(iii) Section 48(a)(2)(B)(x), relating to certain property used in international or territorial waters.

(c) *Leases or subleases to which the election applies.* At the time the election under this section is made and for all taxable years for which the election applies, the lessee of the aircraft or

vessel must be a United States person. In addition, the aircraft or vessel may not be subleased to a person who is not a United States person unless the sublease is a short-term sublease. For purposes of this section, a short-term sublease is a sublease for a period of time (including any period for which the sublease may be renewed or extended) which is less than 30 percent of the asset guideline period of the aircraft or vessel leased (determined under section 167(m)). See paragraphs (g) (3) and (4) of this section for rules which apply if the requirements of this paragraph (c) are not met.

(d) *Income to which the election applies.*

An election under this section applies to all amounts derived by the taxpayer with respect to the aircraft or vessel which is subject to the election. The election applies to all amounts which are includible in the taxpayer's gross income whether or not includible during or after the period of a lease to which the election applies. Amounts derived by the taxpayer with respect to the aircraft or vessel include any gain from the sale, exchange, or other disposition of the aircraft or vessel. If by reason of the allowance of expenses and other deductions, there is a loss with respect to an aircraft or vessel, the election applies to treat the loss as having a source within the United States. Similarly, if the sale, exchange or other disposition of the aircraft or vessel which is subject to an election results in a loss, it is treated as having a source within the United States. See paragraph (e)(2) of this section for the application of an election under this section to the income of certain transferees or distributees.

(e) *Effect of election—(1) In general.* An election under this section applies to the taxable year for which it is made and to all subsequent taxable years for which amounts in respect of the aircraft or vessel to which the election relates are includible in gross income. However, the election may be revoked under paragraph (g) (1) or (2) of this section or terminated under paragraph (g)(3) of this section.

(2) *Certain transfers involving carryover of basis.* (i) If an electing taxpayer transfers or distributes an aircraft or vessel which is subject to the election

under this section, the transferee or distributee will be treated as having made an election under this section with respect to the aircraft or vessel if the basis of the aircraft or vessel in the hands of the transferee or distributee is determined by reference to its basis in the hands of the transferor or distributor. This paragraph (e)(2)(i) applies even though the transferor or distributor recognizes an amount of gain which increases basis in the hands of the transferee or distributee and even though the transferee or distributee is a nonresident alien individual or foreign corporation. For example, if a corporation distributes a vessel which is subject to an election under this section to its parent corporation in a complete liquidation described in section 332(b), the parent corporation will be required to treat all amounts includible in its gross income with respect to the vessel as income from source within the United States if, unless the election is revoked or terminated under paragraph (g) of this section, the basis of the property in the hands of the parent is determined under section 334(b)(1) (relating to the general rule on carryover of basis). In further illustration, if a corporation distributes a vessel (subject to an election) in a distribution to which section 301(a) applies, the distributee will be treated as having made the election with respect to the vessel if its basis is determined under section 301(d)(2) (relating to basis of corporate distributees) even though the basis is the fair market value of the vessel under section 301(d)(2)(A).

(ii) If a member of an affiliated group which files a consolidated return transfers an aircraft or vessel subject to an election to another member of that group, the transferee will be treated as having made the election with respect to the aircraft or vessel. In addition, if a partnership distributes an aircraft or vessel subject to an election to a partner, the partner will be treated as having made the election with respect to the aircraft or vessel.

(iii) If paragraph (e)(2) (i) and (ii) of this section do not apply, the election under this section with respect to an aircraft or vessel will not be considered as made by a transferee or distributee.

(f) *Election*—(1) *Time for making the election.* The election under this section must be made before the expiration of the period prescribed by section 6511(a) (or section 6511(c) if the period is extended by agreement) for making a claim for credit or refund of the tax imposed by chapter 1 for the first taxable year for which the election is to apply. The period for that first taxable year is determined without regard to the special periods prescribed by section 6511(d).

(2) *Manner of making the election.* An election under this section must be made by filing with the income tax return (or an amended return) for the first taxable year for which the election is to apply a statement, signed by the taxpayer, to the effect that the election under section 861(e) is being made. The statement must—

(i) Set forth sufficient facts to identify the aircraft or vessel which is the subject of the election,

(ii) State that the aircraft or vessel was manufactured or constructed in the United States,

(iii) State that the aircraft or vessel is section 38 property described in § 1.861-9(b) which was leased to a United States person (as defined in section 7701(a)(30) of the Code) pursuant to a lease entered into after August 15, 1971,

(iv) State that the electing taxpayer is the owner of the aircraft or vessel,

(v) State the lessee of the aircraft or vessel is not a member of a controlled group of corporations (as defined in section 1563) of which the taxpayer is a member,

(vi) Give the name and taxpayer identification number of the lessee of the aircraft or vessel, and

(vii) State that the aircraft or vessel is not subject to a sublease (other than a short-term sublease) to any person who is not a United States person.

(3) *Election by partnership.* Any election under this section with respect to an aircraft or vessel owned by a partnership shall be made by the partnership. Any partnership election is applicable to each partner's partnership interest in the aircraft or vessel. However, an election made by a partner before August 8, 1979 will be recognized where the partnership made no election and the election can no longer be re-

voked without the consent of the Commissioner under paragraph (g)(1) of this section.

(g) *Termination of election*—(1) *Revocation without consent.* A taxpayer may revoke an election within the time prescribed in paragraph (f)(1) of this section without the consent of the Commissioner. In such a case, the taxpayer must file an amended income tax return for any taxable year to which the election applied.

(2) *Revocation with consent.* Except as provided in paragraph (g) (1) or (3) of this section, an election made under this section is binding unless consent to revoke is obtained from the Commissioner. A request to revoke the election must be made in writing and addressed to the Assistant Commissioner of Internal Revenue (Technical), Attention: T:C:C:3, Washington, DC 20224. The request must include the name and address of the taxpayer and be signed by the taxpayer or his duly authorized representative. It must specify the taxable year or years for which the revocation is to be effective and must be filed at least 90 days prior to the time (not including extensions) prescribed by law for filing the income tax return for the first taxable year for which the revocation of the election is to be effective or by November 6, 1979 whichever is later. The request must specify the grounds which are considered to justify the revocation. The Commissioner may require such additional information as may be necessary in order to determine whether the proposed revocation will be permitted. Consent will generally not be given to revoke an election where the revocation would result in treating gross income with respect to the aircraft or vessel (including any gain from the sale, exchange, or other disposition of such aircraft or vessel) as income from sources without the United States where, during the period the election was in effect, there were losses from sources within the United States. A copy of the consent of the Commissioner to revoke must be attached to the taxpayer's income tax return (or amended return) for each taxable year affected by the revocation.

(3) *Automatic termination.* If an aircraft or vessel subject to an election

under section 861(e) ceases to be section 38 property, ceases to be leased by its owner directly to a United States person, or is subleased (other than a short-term sublease) to a person who is not a United States person, within the period set forth in section 6511(a) (or section 6511(c) if the period is extended by agreement) for making a claim for credit or refund of the tax imposed by chapter 1 for the first taxable year for which the election applied, then the election with respect to such aircraft or vessel will automatically terminate. If the election terminates, the taxpayer who made the election must file an amended tax return or claim for credit or refund, as the case may be, for any taxable year to which the election applied.

(4) *Factors not causing revocation or termination.* The fact that an aircraft or vessel ceases to be section 38 property, ceases to be leased by its owner directly to a United States person, or is leased or subleased for any period of time to a person who is not a United States person, after expiration of the period set forth in section 6511(a) (or section 6511(c) if the period is extended by agreement) for making a claim for credit or refund of the tax imposed by chapter 1 for the first taxable year for which the election applied, will not cause a termination of the election made under this section with respect to the aircraft or vessel. For example, the electing taxpayer is not relieved from any of the consequences of making the election merely because the aircraft or vessel is subleased to a person who is not a United States person for a period in excess of that allowed for short-term subleases under paragraph (c) of this section after expiration of the later of 3 years from the time the return was filed for the first taxable year to which the election applied or 2 years from the time the tax was paid for that year where the period set forth in section 6511(a) has not been extended by agreement.

(5) *Effect of revocation or termination.* If an election is revoked or terminated under this paragraph (g), the taxpayer is required to recompute the tax for the appropriate taxable years without reference to section 861(e)(1).

(6) *Revocation or termination after December 28, 1980.* The rules in paragraph (g)(1) through (g)(5) continue to apply with respect to any election made pursuant to this section even though the revocation or termination may occur after December 28, 1980.

[T.D. 7635, 44 FR 46457, Aug. 8, 1979, as amended by T.D. 7928, 48 FR 55846, Dec. 16, 1983. Redesignated at 53 FR 35477, Sept. 14, 1988]

§ 1.861-16 Income from certain craft first leased after December 28, 1980.

(a) *General rule.* If a taxpayer—

(1) Owns a qualified craft (as defined in paragraph (b) of this section).

(2) Leases such qualified craft after December 28, 1980, to a United States person that is not a member of the same controlled group of corporations as the taxpayer, and

(3) The lease is the taxpayer's first lease of the craft and the taxpayer is not considered to have made an election with respect to the craft under § 1.861-9(e)(2),

then the taxpayer shall treat all amounts includible in gross income with respect to the qualified craft as income from sources within the United States for each taxable year ending after commencement of the lease. If this section applies to income with respect to a craft, it applies to all such amounts that are includible in the taxpayer's gross income, whether or not includible during or after the period of a lease to a United States person. Amounts derived by the taxpayer with respect to the qualified craft include any gain from the sale, exchange, or other disposition of the qualified craft. If this section applies to income with respect to a craft and there is a loss with respect to that craft (either due to the allowance of expenses and other deductions or due to a sale, exchange, or other disposition of the qualified craft), such loss is treated as allocable or apportionable to sources within the United States. The fact that a craft ceases to be section 38 property, ceases to be leased by the taxpayer to a United States person, or is leased or subleased for any period of time to a person who is not a United States person will not terminate the application of this section.

(b) *Qualified craft*—(1) *In general.* A qualified craft is a vessel, aircraft, or spacecraft that—

(i) Is section 38 property (or would be section 38 property but for section 48(a)(5), relating to use by governmental units), and

(ii) Is manufactured or constructed in the United States.

(2) *Vessel.* The term “vessel” includes every type of watercraft capable of being used as a means of transportation on water, and any items of property that are affixed in a permanent fashion or are integral to the vessel. A vessel that is used predominately outside the United States must be described in section 48(a)(2)(B)(iii) and § 1.48-1(g)(2)(iii), relating to vessels documented for use in the foreign or domestic commerce of the United States, to be a qualified craft.

(3) *Aircraft.* An aircraft used predominantly outside the United States must be described in section 48(a)(2)(B)(i) and § 1.48-1(g)(2)(i), relating to aircraft registered by the Administrator of the Federal Aviation Agency, and operated to and from the United States or operated under contract with the United States, to be a qualified craft.

(4) *Spacecraft.* A spacecraft must be described in section 48(a)(2)(B)(viii) and § 1.48-1(g)(2)(viii), relating to communications satellites, or any interest therein, of a United States person, to be a qualified craft.

(5) *United States manufacture or construction.* A craft will be considered to be manufactured or constructed in the United States if 50 percent or more of the basis of the craft on the date of the lease to a United States person is attributable to value added within the United States.

(c) *United States person.* For purposes of this section, the term “United States person” includes those persons described in section 7701(a)(30) and individuals with respect to whom an election under section 6013 (g) or (h) (relating to nonresident alien individuals married to United States citizens or residents) is in effect.

(d) *Controlled group.* For purposes of paragraph (a)(2) of this section, whether a taxpayer and a United States person are members of the same controlled group of corporations is deter-

mined under section 1563. Solely for purposes of this section, if at least 80% of the capital interest, or the profits interest, in a partnership is owned, directly or indirectly, by a member or members of a controlled group of corporations, then the partnership shall be considered a member of that controlled group of corporations. In addition, if at least 80% of the capital interest, or the profits interest, in a partnership is owned, directly or indirectly, by a corporation, then the partnership and that corporation shall be considered members of a controlled group of corporations.

(e) *Certain transfers and distributions*—(1) *Transfers and distributions involving carryover of basis.* If—

(i) The income with respect to a craft is subject to this section,

(ii) The taxpayer transfers or distributes such craft, and

(iii) The basis of such craft in the hands of the transferee or distributee is determined by reference to its basis in the hands of the transferor or distributor,

then this section will apply to the income with respect to the craft includable in the gross income of the transferee or distributee. This paragraph (e)(1) applies even though the transferor or distributor recognizes an amount of gain that increases basis in the hands of the transferee or distributee and even though the transferee or distributee is a nonresident alien or foreign corporation. For example, if a corporation distributes a craft the income of which is subject to this section to its parent corporation in a complete liquidation described in section 332(b), the parent corporation will be treated as if it satisfied the requirements of paragraph (a) of this section with respect to such craft if the basis of the property in the hands of the parent corporation is determined under section 334(b) (relating to the general rule on carryover of basis in liquidations). In further illustration, if a corporation distributes a craft the income of which is subject to this section, in a distribution to which section 301(a) applies, the distributee will be treated as if it satisfied the requirements of paragraph (a) of this section with respect to such craft if its basis is determined

under section 301(d)(2) (relating to basis of corporate distributees) even though the basis may be the fair market value of the craft under section 301(d)(2)(A).

(2) *Partnerships.* If a partnership satisfies the requirements of paragraph (a) (1), (2), and (3) of this section, each partner shall treat all amounts includible in gross income with respect to the craft as income from sources within the United States for any taxable year of the partnership ending after commencement of the lease. In addition, if a partnership distributes a craft the income of which is subject to this section, to a partner, the partner will be treated as if he or she satisfied the requirements of paragraph (a) of this section with respect to such craft.

(3) *Affiliated groups.* If a member of a group of corporations that files a consolidated return transfers a craft, the income of which is subject to this section, to another member of that same group, the transferee will be treated as if it satisfied the requirements of paragraph (a) of this section with respect to the craft.

[T.D. 7928, 48 FR 55846, Dec. 16, 1983. Redesignated by T.D. 8228, 53 FR 35477, Sept. 14, 1988]

§ 1.861-17 Allocation and apportionment of research and experimental expenditures.

(a) *Allocation—(1) In general.* The methods of allocation and apportionment of research and experimental expenditures set forth in this section recognize that research and experimentation is an inherently speculative activity, that findings may contribute unexpected benefits, and that the gross income derived from successful research and experimentation must bear the cost of unsuccessful research and experimentation. Expenditures for research and experimentation that a taxpayer deducts under section 174 ordinarily shall be considered deductions that are definitely related to all income reasonably connected with the relevant broad product category (or categories) of the taxpayer and therefore allocable to all items of gross income as a class (including income from sales, royalties, and dividends) related to such product category (or categories). For purposes of this allocation,

the product category (or categories) that a taxpayer may be considered to have shall be determined in accordance with the provisions of paragraph (a)(2) of this section.

(2) *Product categories—(i) Allocation based on product categories.* Ordinarily, a taxpayer's research and experimental expenditures may be divided between the relevant product categories. Where research and experimentation is conducted with respect to more than one product category, the taxpayer may aggregate the categories for purposes of allocation and apportionment; however, the taxpayer may not subdivide the categories. Where research and experimentation is not clearly identified with any product category (or categories), it will be considered conducted with respect to all the taxpayer's product categories.

(ii) *Use of three digit standard industrial classification codes.* A taxpayer shall determine the relevant product categories by reference to the three digit classification of the Standard Industrial Classification Manual (SIC code). A copy may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402. The individual products included within each category are enumerated in Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual, 1987 (or later edition, as available).

(iii) *Consistency.* Once a taxpayer selects a product category for the first taxable year for which this section is effective with respect to the taxpayer, it must continue to use that product category in following years, unless the taxpayer establishes to the satisfaction of the Commissioner that, due to changes in the relevant facts, a change in the product category is appropriate. For this purpose, a change in the taxpayer's selection of a product category shall include a change from a three digit SIC code category to a two digit SIC code category, a change from a two digit SIC code category to a three digit SIC code category, or any other aggregation, disaggregation or change of a previously selected SIC code category.

(iv) *Wholesale trade category.* The two digit SIC code category "Wholesale

trade” is not applicable with respect to sales by the taxpayer of goods and services from any other of the taxpayer’s product categories and is not applicable with respect to a domestic international sales corporation (DISC) or foreign sales corporation (FSC) for which the taxpayer is a related supplier of goods and services from any of the taxpayer’s product categories.

(v) *Retail trade category.* The two digit SIC code category “Retail trade” is not applicable with respect to sales by the taxpayer of goods and services from any other of the taxpayer’s product categories, except wholesale trade, and is not applicable with respect to a DISC or FSC for which the taxpayer is a related supplier of goods and services from any other of the taxpayer’s product categories, except wholesale trade.

(3) *Affiliated Groups—(i) In general.* Except as provided in paragraph (a)(3)(ii) of this section, the allocation and apportionment required by this section shall be determined as if all members of the affiliated group (as defined in § 1.861-14T(d)) were a single corporation. See § 1.861-14T.

(ii) *Possessions corporations.* (A) For purposes of the allocation and apportionment required by this section, sales and gross income from products produced in whole or in part in a possession by an electing corporation (within the meaning of section 936(h)(5)(E)), and dividends from an electing corporation, shall not be taken into account, except that this paragraph (a)(3)(ii) shall not apply to sales of (and gross income and dividends attributable to sales of) products with respect to which an election under section 936(h)(5)(F) is not in effect.

(B) The research and experimental expenditures taken into account for purposes of this section shall be reduced by the amount of such expenditures included in computing the cost-sharing amount (determined under section 936(h)(5)(C)(i)).

(4) *Legally mandated research and experimentation.* Where research and experimentation is undertaken solely to meet legal requirements imposed by a political entity with respect to improvement or marketing of specific products or processes, and the results cannot reasonably be expected to gen-

erate amounts of gross income (beyond de minimis amounts) outside a single geographic source, the deduction for such research and experimentation shall be considered definitely related and therefore allocable only to the grouping (or groupings) of gross income within that geographic source as a class (and apportioned, if necessary, between such groupings as set forth in paragraphs (c) and (d) of this section). For example, where a taxpayer performs tests on a product in response to a requirement imposed by the U.S. Food and Drug Administration, and the test results cannot reasonably be expected to generate amounts of gross income (beyond de minimis amounts) outside the United States, the costs of testing shall be allocated solely to gross income from sources within the United States.

(b) *Exclusive apportionment—(1) In general.* An exclusive apportionment shall be made under this paragraph (b), where an apportionment based upon geographic sources of income of a deduction for research and experimentation is necessary (after applying the exception in paragraph (a)(4) of this section).

(i) *Exclusive apportionment under the sales method.* If the taxpayer apportions on the sales method under paragraph (c) of this section, an amount equal to fifty percent of such deduction for research and experimentation shall be apportioned exclusively to the statutory grouping of gross income or the residual grouping of gross income, as the case may be, arising from the geographic source where the research and experimental activities which account for more than fifty percent of the amount of such deduction were performed.

(ii) *Exclusive apportionment under the optional gross income methods.* If the taxpayer apportions on the optional gross income methods under paragraph (d) of this section, an amount equal to twenty-five percent of such deduction for research and experimentation shall be apportioned exclusively to the statutory grouping or the residual grouping of gross income, as the case may be, arising from the geographic source where the research and experimental activities which account for more than

fifty percent of the amount of such deduction were performed.

(iii) *Exception.* If the applicable fifty percent geographic source test of the preceding paragraph (b)(1)(i) or (ii) is not met, then no part of the deduction shall be apportioned under this paragraph (b)(1).

(2) *Facts and circumstances supporting an increased exclusive apportionment—(i) In general.* The exclusive apportionment provided for in paragraph (b)(1) of this section reflects the view that research and experimentation is often most valuable in the country where it is performed, for two reasons. First, research and experimentation often benefits a broad product category, consisting of many individual products, all of which may be sold in the nearest market but only some of which may be sold in foreign markets. Second, research and experimentation often is utilized in the nearest market before it is used in other markets, and in such cases, has a lower value per unit of sales when used in foreign markets. The taxpayer may establish to the satisfaction of the Commissioner that, in its case, one or both of the conditions mentioned in the preceding sentences warrant a significantly greater exclusive allocation percentage than allowed by paragraph (b)(1) of this section because the research and experimentation is reasonably expected to have very limited or long delayed application outside the geographic source where it was performed. Past experience with research and experimentation may be considered in determining reasonable expectations.

(ii) *Not all products sold in foreign markets.* For purposes of establishing that only some products within the product category (or categories) are sold in foreign markets, the taxpayer shall compare the commercial production of individual products in domestic and foreign markets made by itself, by uncontrolled parties (as defined under paragraph (c)(2)(i) of this section) of products involving intangible property which was licensed or sold by the taxpayer, and by those controlled corporations (as defined under paragraph (c)(3)(ii) of this section) that can reasonably be expected to benefit directly or indirectly from any of the tax-

payer's research expense connected with the product category (or categories). The individual products compared for this purpose shall be limited, for nonmanufactured categories, solely to those enumerated in Executive Office of the President, Office of Management and Budget Standard Industrial Classification Manual, 1987 (or later edition, as available), and, for manufactured categories, solely to those enumerated at a 7-digit level in the U.S. Bureau of the Census, Census of Manufacturers: 1992, Numerical List of Manufactured Products, 1993, (or later edition, as available). Copies of both of these documents may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402.

(iii) *Delayed application of research findings abroad.* For purposes of establishing the delayed application of research findings abroad, the taxpayer shall compare the commercial introduction of its own particular products and processes (not limited by those listed in the Standard Industrial Classification Manual or the Numerical List of Manufactured Products) in the United States and foreign markets, made by itself, by uncontrolled parties (as defined under paragraph (c)(2)(i) of this section) of products involving intangible property that was licensed or sold by the taxpayer, and by those controlled corporations (as defined under paragraph (c)(3)(i) of this section) that can reasonably be expected to benefit, directly or indirectly, from the taxpayer's research expense. For purposes of evaluating the delay in the application of research findings in foreign markets, the taxpayer shall use a safe haven discount rate of 10 percent per year of delay unless he is able to establish to the satisfaction of the Commissioner, by reference to the cost of money and the number of years during which economic benefit can be directly attributable to the results of the taxpayer's research, that another discount rate is more appropriate.

(c) *Sales method—(1) In general.* The amount equal to the remaining portion of such deduction for research and experimentation, not apportioned under paragraph (a)(4) or (b)(1)(i) of this section, shall be apportioned between the

statutory grouping (or among the statutory groupings) within the class of gross income and the residual grouping within such class in the same proportions that the amount of sales from the product category (or categories) that resulted in such gross income within the statutory grouping (or statutory groupings) and in the residual grouping bear, respectively, to the total amount of sales from the product category (or categories).

(i) *Apportionment in excess of gross income.* Amounts apportioned under this section may exceed the amount of gross income related to the product category within the statutory grouping. In such case, the excess shall be applied against other gross income within the statutory grouping. See § 1.861-8(d)(1) for instances where the apportionment leads to an excess of deductions over gross income within the statutory grouping.

(ii) *Leased property.* For purposes of this paragraph (c), amounts received from the lease of equipment during a taxable year shall be regarded as sales receipts for such taxable year.

(2) *Sales of uncontrolled parties.* For purposes of the apportionment under paragraph (c)(1) of this section, the sales from the product category (or categories) by each party uncontrolled by the taxpayer, of particular products involving intangible property that was licensed or sold by the taxpayer to such uncontrolled party shall be taken fully into account both for determining the taxpayer's apportionment and for determining the apportionment of any other member of a controlled group of corporations to which the taxpayer belongs if the uncontrolled party can reasonably be expected to benefit directly or indirectly (through any member of the controlled group of corporations to which the taxpayer belongs) from the research expense connected with the product category (or categories) of such other member. An uncontrolled party can reasonably be expected to benefit from the research expense of a member of a controlled group of corporations to which the taxpayer belongs if such member can reasonably be expected to license, sell, or transfer intangible property to that uncontrolled party or transfer secret processes to

that uncontrolled party, directly or indirectly through a member of the controlled group of corporations to which the taxpayer belongs. Past experience with research and experimentation shall be considered in determining reasonable expectations.

(i) *Definition of uncontrolled party.* For purposes of this paragraph (c)(2) the term *uncontrolled party* means a party that is not a person with a relationship to the taxpayer specified in section 267(b), or is not a member of a controlled group of corporations to which the taxpayer belongs (within the meaning of section 993(a)(3) or 927(d)(4)).

(ii) *Licensed products.* In the case of licensed products, if the amount of sales of such products is unknown (for example, where the licensed product is a component of a large machine), a reasonable estimate based on the principles of section 482 should be made.

(iii) *Sales of intangible property.* In the case of sales of intangible property, regardless of whether the consideration received in exchange for the intangible is a fixed amount or is contingent on the productivity, use, or disposition of the intangible, if the amount of sales of products utilizing the intangible property is unknown, a reasonable estimate of sales shall be made annually. If necessary, appropriate economic analyses shall be used to estimate sales.

(3) *Sales of controlled parties.* For purposes of the apportionment under paragraph (c)(1) of this section, the sales from the product category (or categories) of the taxpayer shall be taken fully into account and the sales from the product category (or categories) of a corporation controlled by the taxpayer shall be taken into account to the extent provided in this paragraph (c)(3) for determining the taxpayer's apportionment, if such corporation can reasonably be expected to benefit directly or indirectly (through another member of the controlled group of corporations to which the taxpayer belongs) from the taxpayer's research expense connected with the product category (or categories). A corporation controlled by the taxpayer can reasonably be expected to benefit from the taxpayer's research expense if the taxpayer can be expected to license, sell, or transfer intangible property to that

corporation or transfer secret processes to that corporation, either directly or indirectly through a member of the controlled group of corporations to which the taxpayer belongs. Past experience with research and experimentation shall be considered in determining reasonable expectations.

(i) *Definition of a corporation controlled by the taxpayer.* For purposes of this paragraph (c)(3), the term *a corporation controlled by the taxpayer* means any corporation that has a relationship to the taxpayer specified in section 267(b) or is a member of a controlled group of corporations to which the taxpayer belongs (within the meaning of section 993(a)(3) or 927(d)(4)).

(ii) *Sales to be taken into account.* The sales from the product category (or categories) of a corporation controlled by the taxpayer taken into account shall be equal to the amount of sales that bear the same proportion to the total sales of the controlled corporation as the total value of all classes of the stock of such corporation owned directly or indirectly by the taxpayer, within the meaning of section 1563, bears to the total value of all classes of stock of such corporation.

(iii) *Sales not to be taken into account more than once.* Sales from the product category (or categories) between or among such controlled corporations or the taxpayer shall not be taken into account more than once; in such a situation, the amount sold by the selling corporation to the buying corporation shall be subtracted from the sales of the buying corporation.

(iv) *Effect of cost sharing arrangements.* If the corporation controlled by the taxpayer has entered into a cost sharing arrangement, in accordance with the provisions of § 1.482-7, with the taxpayer for the purpose of developing intangible property, then that corporation shall not reasonably be expected to benefit from the taxpayer's share of the research expense.

(d) *Gross income methods*—(1)(i) *In general.* In lieu of applying the sales method of paragraph (c) of this section, the remaining amount of the deduction for research and experimentation, not apportioned under paragraph (a)(4) or (b)(1)(ii) of this section, shall be apportioned as prescribed in paragraphs

(d)(2) and (3) of this section, between the statutory grouping (or among the statutory groupings) of gross income and the residual grouping of gross income.

(ii) *Optional methods to be applied to all research and experimental expenditures.* These optional methods must be applied to the taxpayer's entire deduction for research and experimental expense remaining after applying the exception in paragraph (a)(4) of this section, and may not be applied on a product category basis. Thus, after the allocation of the taxpayer's entire deduction for research and experimental expense under paragraph (a)(2) of this section (by attribution to SIC code categories), the taxpayer must then apportion as necessary the entire deduction as allocated by separate amounts to various product categories, using only the sales method under paragraph (c) of this section or only the optional gross income methods under this paragraph (d). The taxpayer may not use the sales method for a portion of the deduction and optional gross income methods for the remainder of the deduction separately allocated.

(2) *Option one.* The taxpayer may apportion its research and experimental expenditures ratably on the basis of gross income between the statutory grouping (or among the statutory groupings) of gross income and the residual grouping of gross income in the same proportions that the amount of gross income in the statutory grouping (or groupings) and the amount of gross income in the residual grouping bear, respectively, to the total amount of gross income, if the conditions described in paragraph (d)(2)(i) and (ii) of this section are both met.

(i) The amount of research and experimental expense ratably apportioned to the statutory grouping (or groupings in the aggregate) is not less than fifty percent of the amount that would have been so apportioned if the taxpayer had used the method described in paragraph (c) of this section; and

(ii) The amount of research and experimental expense ratably apportioned to the residual grouping is not less than fifty percent of the amount that would have been so apportioned if

the taxpayer had used the method described in paragraph (c) of this section.

(3) *Option two.* If, when the amount of research and experimental expense is apportioned ratably on the basis of gross income, either of the conditions described in paragraph (d)(2)(i) or (ii) of this section is not met, the taxpayer may either—

(i) Where the condition of paragraph (d)(2)(i) of this section is not met, apportion fifty percent of the amount of research and experimental expense that would have been apportioned to the statutory grouping (or groupings in the aggregate) under paragraph (c) of this section to such statutory grouping (or to such statutory groupings in the aggregate and then among such groupings on the basis of gross income within each grouping), and apportion the balance of the amount of research and experimental expenses to the residual grouping; or

(ii) Where the condition of paragraph (d)(2)(ii) of this section is not met, apportion fifty percent of the amount of research and experimental expense that would have been apportioned to the residual grouping under paragraph (c) of this section to such residual grouping, and apportion the balance of the amount of research and experimental expenses to the statutory grouping (or to the statutory groupings in the aggregate and then among such groupings ratably on the basis of gross income within each grouping).

(e) *Binding election*—(1) *In general.* A taxpayer may choose to use either the sales method under paragraph (c) of this section or the optional gross income methods under paragraph (d) of this section for its original return for its first taxable year to which this section applies. The taxpayer's use of either the sales method or the optional gross income methods for its return filed for its first taxable year to which this section applies shall constitute a binding election to use the method chosen for that year and for four taxable years thereafter.

(2) *Change of method.* The taxpayer's election of a method may not be revoked during the period referred to in paragraph (e)(1) of this section without the prior consent of the Commissioner. After the expiration of that period, the

taxpayer may change methods without the prior consent of the Commissioner. However, the taxpayer's use of the new method shall constitute a binding election to use the new method for its return filed for the first year for which the taxpayer uses the new method and for four taxable years thereafter. The taxpayer's election of the new method may not be revoked during that period without the prior consent of the Commissioner.

(i) *Short taxable years.* For purposes of this paragraph (e), the term *taxable year* includes a taxable year of less than twelve months.

(ii) *Affiliated groups.* In the case of an affiliated group, the period referred to in paragraph (e)(1) of this section shall commence as of the latest taxable year in which any member of the group has changed methods.

(f) *Special rules for partnerships*—(1) *Research and experimental expenditures.* For purposes of applying this section, if research and experimental expenditures are incurred by a partnership in which the taxpayer is a partner, the taxpayer's research and experimental expenditures shall include the taxpayer's distributive share of the partnership's research and experimental expenditures.

(2) *Purpose and location of expenditures.* In applying the exception for expenditures undertaken to meet legal requirements under paragraph (a)(4) of this section and the exclusive apportionment for the sales method and the optional gross income methods under paragraph (b) of this section, a partner's distributive share of research and experimental expenditures incurred by a partnership shall be treated as incurred by the partner for the same purpose and in the same location as incurred by the partnership.

(3) *Apportionment under the sales method.* In applying the remaining apportionment for the sales method under paragraph (c) of this section, a taxpayer's sales from a product category shall include the taxpayer's share of any sales from the product category of any partnership in which the taxpayer is a partner. For purposes of the preceding sentence, a taxpayer's share of

sales shall be proportionate to the taxpayer's distributive share of the partnership's gross income in the product category.

(g) *Effective date.* This section applies to taxable years beginning after December 31, 1995. However, a taxpayer may at his or her option, apply this section in its entirety to all taxable years beginning after August 1, 1994.

(h) *Examples.* The following examples illustrate the application of this section:

Example 1. (i) *Facts.* X, a domestic corporation, is a manufacturer and distributor of small gasoline engines for lawn mowers. Gasoline engines are a product within the category, Engines and Turbines (SIC Industry Group 351). Y, a wholly owned foreign subsidiary of X, also manufactures and sells these engines abroad. During 1996, X incurred expenditures of \$60,000 on research and experimentation, which it deducts as a current expense, to invent and patent a new and improved gasoline engine. All of the research and experimentation was performed in the United States. In 1996, the domestic sales by X of the new engine total \$500,000 and foreign sales by Y total \$300,000. X provides technology for the manufacture of engines to Y via a license that requires the payment of an arm's length royalty. In 1996, X's gross income is \$160,000, of which \$140,000 is U.S. source income from domestic sales of gasoline engines and \$10,000 is foreign source royalties from Y, and \$10,000 is U.S. source interest income.

(ii) *Allocation.* The research and experimental expenditures were incurred in connection with small gasoline engines and they are definitely related to the items of gross income to which the research gives rise, namely gross income from the sale of small gasoline engines in the United States and royalties received from subsidiary Y, a foreign manufacturer of gasoline engines. Accordingly, the expenses are allocable to this class of gross income. The U.S. source interest income is not within this class of gross income and, therefore, is not taken into account.

(iii) *Apportionment.* (A) For purposes of applying the foreign tax credit limitation, the statutory grouping is general limitation gross income from sources without the United States and the residual grouping is gross income from sources within the United States. Since the related class of gross income derived from the use of engine technology consists of both gross income from sources without the United States (royalties from Y) and gross income from sources within the United States (gross income from engine sales), X's deduction of \$60,000 for its re-

search and experimental expenditure must be apportioned between the statutory and residual grouping before the foreign tax credit limitation may be determined. Because more than 50 percent of X's research and experimental activity was performed in the United States, 50 percent of that deduction can be apportioned exclusively to the residual grouping of gross income, gross income from sources within the United States. The remaining 50 percent of the deduction can then be apportioned between the residual and statutory groupings on the basis of sales of small gasoline engines by X and Y. Alternatively, X's deduction for research and experimentation can be apportioned under the optional gross income method. The apportionment for 1996 is as follows:

(1) *Tentative Apportionment on the Basis of Sales*

| | |
|---|----------|
| (i) Research and experimental expense to be apportioned between residual and statutory groupings of gross income: | \$60,000 |
| (ii) Less: Exclusive apportionment of research and experimental expense to the residual grouping of gross income (50 percent): | \$30,000 |
| (iii) Research and experimental expense to be apportioned between residual and statutory groupings of gross income on the basis of sales: | \$30,000 |
| (iv) Apportionment of research and experimental expense to the residual grouping of gross income ($\frac{\$30,000 \times \$500,000}{\$500,000 + \$300,000}$): | \$18,750 |
| (v) Apportionment of research and experimental expense to the statutory grouping of gross income ($\frac{\$30,000 \times \$300,000}{\$500,000 + \$300,000}$): | \$11,250 |
| (vi) Total apportioned deduction for research and experimentation: | \$60,000 |
| (vii) Amount apportioned to the residual grouping ($\$30,000 + \$18,750$): | \$48,750 |
| (viii) Amount apportioned to the statutory grouping: | \$11,250 |

(2) *Tentative Apportionment on the Basis of Gross Income.*

| | |
|--|----------|
| (i) Exclusive apportionment of research and experimental expense to the residual grouping of gross income (25 percent): | \$15,000 |
| (ii) Research and experimental expense apportioned to sources within the United States (residual grouping) ($\frac{\$45,000 \times \$140,000}{\$140,000 + \$10,000}$): | \$42,000 |
| (iii) Research and experimental expense apportioned to sources within country Y (statutory grouping) ($\frac{\$45,000 \times \$10,000}{\$140,000 + \$10,000}$): | \$3,000 |
| (iv) Amount apportioned to the residual grouping: | \$57,000 |
| (v) Amount apportioned to the statutory grouping: | \$3,000 |

(B) The total research and experimental expense apportioned to the statutory grouping (\$3,000) under the gross income method is approximately 26 percent of the amount apportioned to the statutory grouping under the sales method. Thus, X may use option two of the gross income method (paragraph (d)(3) of this section) and apportion to the statutory grouping fifty percent (50%) of the

\$11,250 apportioned to that grouping under the sales method. Thus, X apportions \$5,625 of research and experimental expense to the statutory grouping. X's use of the optional gross income methods will constitute a binding election to use the optional gross income methods for 1996 and four taxable years thereafter.

Example 2. (i) *Facts.* Assume the same facts as in *Example 1* except that X also spends \$30,000 in 1996 for research on steam turbines, all of which is performed in the United States, and X has steam turbine sales in the United States of \$400,000. X's foreign subsidiary Y neither manufactures nor sells steam turbines. The steam turbine research is in addition to the \$60,000 in research which X does on gasoline engines for lawnmowers. X thus has a deduction of \$90,000 for its research activity. X's gross income is \$200,000, of which \$140,000 is U.S. source income from domestic sales of gasoline engines, \$50,000 is U.S. source income from domestic sales of steam turbines, and \$10,000 is foreign source royalties from Y.

(ii) *Allocation.* X's research expenses generate income from sales of small gasoline engines and steam turbines. Both of these products are in the same three digit SIC code category, Engines and Turbines (SIC Industry Group 351). Therefore, the deduction is definitely related to this product category and allocable to all items of income attributable to it. These items of X's income are gross income from the sale of small gasoline engines and steam turbines in the United States and royalties from foreign subsidiary Y, a foreign manufacturer and seller of small gasoline engines.

(iii) *Apportionment.* (A) For purposes of applying the foreign tax credit limitation, the statutory grouping is general limitation gross income from sources outside the United States and the residual grouping is gross income from sources within the United States. X's deduction of \$90,000 must be apportioned between the statutory and residual groupings. Because more than 50 percent of X's research and experimental activity was performed in the United States, 50 percent of that deduction can be apportioned exclusively to the residual grouping, gross income from sources within the United States. The remaining 50 percent of the deduction can then be apportioned between the residual and statutory groupings on the basis of total sales of small gasoline engines and steam turbines by X and Y. Alternatively, X's deduction for research and experimentation can be apportioned under the optional gross income methods. The apportionment for 1996 is as follows:

(1) *Tentative Apportionment on the Basis of Sales*

| | |
|---|----------|
| (i) Research and experimental expense to be apportioned between residual and statutory groupings of gross income: | \$90,000 |
|---|----------|

| | |
|--|----------|
| (ii) Less: Exclusive apportionment of the research and experimental expense to the residual grouping of gross income (\$90,000×50 percent): | \$45,000 |
| (iii) Research and experimental expense to be apportioned between the residual and statutory groupings of gross income on the basis of sales: | \$45,000 |
| (iv) Apportionment of research and experimental expense to the residual grouping of gross income $(\$45,000 \times (\$500,000 + \$400,000) / (\$500,000 + \$400,000 + \$300,000))$: | \$33,750 |
| (v) Apportionment of research and experimental expense to the statutory grouping of gross income $(\$45,000 \times \$300,000 / (\$500,000 + \$400,000 + \$300,000))$: | \$11,250 |
| (vi) Total apportioned deduction for research and experimentation: | \$90,000 |
| (vii) Amount apportioned to the residual grouping $(\$45,000 + \$33,750)$: | \$78,750 |
| (viii) Amount apportioned to the statutory grouping: | \$11,250 |

(2) *Tentative Apportionment on the Basis of Gross Income*

| | |
|--|----------|
| (i) Exclusive apportionment of research and experimental expense to the residual grouping of gross income $(\$90,000 \times 25 \text{ percent})$: | \$22,500 |
| (ii) Research and experimental expense apportioned to sources within the United States (residual grouping) $(\$67,500 \times \$190,000 / (\$140,000 + \$50,000 + \$10,000))$: | \$64,125 |
| (iii) Research and experimental expense apportioned to sources within country Y (statutory grouping) $(\$67,500 \times \$10,000 / (\$140,000 + \$50,000 + \$10,000))$: | \$3,375 |
| (iv) Amount apportioned to the residual grouping: | \$86,625 |
| (v) Amount apportioned to the statutory grouping: | \$3,375 |

(B) The total research and experimental expense apportioned to the statutory grouping (\$3,375) under the gross income method is 30 percent of the amount apportioned to the statutory grouping under the sales method. Thus, X may use option two of the gross income method (paragraph (d)(3) of this section) and apportion to the statutory grouping fifty percent (50%) of the \$11,250 apportioned to that grouping under the sales method. Thus, X apportions \$5,625 of research and experimental expense to the statutory grouping. X's use of the optional gross income methods will constitute a binding election to use the optional gross income methods for 1996 and four taxable years thereafter.

Example 3. (i) *Facts.* Assume the same facts as in *Example 1* except that in 1997 X continues its sales of the new engines, with sales of \$600,000 in the United States and \$400,000 abroad by subsidiary Y. X also acquires a 60 percent (by value) ownership interest in foreign corporation Z and a 100 percent ownership interest in foreign corporation C. X transfers its engine technology to Z for a royalty equal to 5 percent of sales, and X enters into an arm's length cost-sharing arrangement with C to share the funding of all of X's research activity. In 1997, corporation Z has sales in country Z equal to \$1,000,000. X

incurs expense of \$80,000 on research and experimentation in 1997, and in addition, X performs \$15,000 of research on gasoline engines which was funded by the cost-sharing arrangement with C. All of Z's sales are from the product category, Engines and Turbines (SIC Industry Group 351). X performs all of its research in the United States and \$20,000 of its expenditure of \$80,000 is made solely to meet pollution standards mandated by law. X establishes, to the satisfaction of the Commissioner, that the expenditure in response to pollution standards is not expected to generate gross income (beyond *de minimis* amounts) outside the United States.

(ii) *Allocation.* The \$20,000 of research expense which X incurred in connection with pollution standards is definitely related and thus allocable to the residual grouping, gross income from sources within the United States. The remaining \$60,000 in research and experimental expenditure incurred by X is definitely related to all gasoline engines and is therefore allocable to the class of gross income to which the engines give rise, gross income from sales of gasoline engines in the United States, royalties from country Y, and royalties from country Z. No part of the \$60,000 research expense is allocable to dividends from country C, because corporation C has already paid, through its cost-sharing arrangement, for research activity performed by X which may benefit C.

(iii) *Apportionment.* For purposes of applying the foreign tax credit limitation, the statutory grouping is general limitation gross income from sources without the United States, and the residual grouping is gross income from sources within the United States. X's deduction of \$60,000 for its research and experimental expenditure must be apportioned between these groupings. Because more than 50 percent of the research and experimentation was performed in the United States, 50 percent of the \$60,000 deduction can be apportioned exclusively to the residual grouping. The remaining 50 percent of the deduction can then be apportioned between the residual and the statutory grouping on the basis of sales of gasoline engines by X, Y, and Z. (If X utilized the optional gross income methods in 1996, then its use of such methods constituted a binding election to use the optional gross income methods in 1996 and for four taxable years thereafter. If X utilized the sales method in 1996, then its use of such method constituted a binding election to use the sales method in 1996 and for four taxable years thereafter.) The optional gross income methods are not illustrated in this *Example 3* (see instead *Examples 1* and *2*). Since X has only a 60 percent ownership interest in corporation Z, only 60 percent of Z's sales (60% of \$1,000,000, or \$600,000) are included for purposes of apportionment. The allocation and apportionment for 1997 is as follows:

| | |
|---|----------|
| (A) X's total research expense: | \$80,000 |
| (B) Less: Legally mandated research directly allocated to the residual grouping of gross income: | \$20,000 |
| (C) Tentative apportionment on the basis of sales: | |
| (1) Research and experimental expense to be apportioned between residual and statutory groupings of gross income: | \$60,000 |
| (2) Less: Exclusive apportionment of research and experimental expense to the residual grouping of gross income (\$60,000×50 percent): | \$30,000 |
| (3) Research and experimental expense to be apportioned between the residual and the statutory groupings on the basis of sales: | \$30,000 |
| (4) Apportionment of research and experimental expense to gross income from sources within the United States (residual grouping) (\$30,000×\$600,000/(\$600,000+\$400,000+\$600,000)): | \$11,250 |
| (5) Apportionment of research and experimental expense to general limitation gross income from countries Y and Z (statutory grouping) (\$30,000×\$400,000+\$600,000/(\$600,000+\$400,000+\$600,000)): | \$18,750 |
| (6) Total apportioned deduction for research and experimentation (\$30,000+\$30,000): | \$60,000 |
| (7) Amount apportioned to the residual grouping (\$30,000+\$11,250): | \$41,250 |
| (8) Amount apportioned to the statutory grouping of gross income from sources within countries Y and Z: | \$18,750 |

Example 4. Research and Experimentation (i) Facts. X, a domestic corporation, manufactures and sells forklift trucks and other types of materials handling equipment in the United States. The manufacture and sale of forklift trucks and other materials handling equipment belongs to the product category, Construction, Mining, and Materials Handling Machinery and Equipment (SIC Industry Group 353). X also sells its forklift trucks to a wholesaling subsidiary located in foreign country Y (but title passes in the United States), and X manufactures forklift trucks in foreign country Z. The wholesaling of forklift trucks to country Y also belongs to X's product category Transportation equipment and, therefore, may not belong to the product category, Wholesale trade (SIC Major Group 50 and 51). In 1997, X sold \$7,000,000 of forklift trucks to purchasers in the United States, \$3,000,000 of forklift trucks to the wholesaling subsidiary in Y, and transferred forklift truck components with an FOB export value of \$2,000,000 to its branch in Z. The branch's sales of finished forklift trucks were \$5,000,000. In response to legally mandated emission control requirements, X's United States research department has been engaged in a research project to improve the performance and quality of engine exhaust systems used on its products in the United States. It incurs expenses of \$100,000 for this purpose in 1997. In the past, X has customarily adapted the product improvements developed originally for the domestic market to its forklift trucks manufactured abroad. During the taxable year

1997, development of an improved engine exhaust system is completed and X begins installing the new system during the latter part of the taxable year in products manufactured and sold in the United States. X continues to manufacture and sell forklift trucks in foreign countries without the improved engine exhaust systems.

(ii) *Allocation.* X's deduction for its research expense is definitely related to the income to which it gives rise, namely income from the manufacture and sale of forklift trucks within the United States and in country Z. Although the research is undertaken in response to a legal mandate, it can reasonably be expected to generate gross income from the manufacture and sale of trucks by the branch in Z. Therefore, the deduction is not allocable solely to income from X's domestic sales of forklift trucks. It is allocable to income from such sales and income from the sales of X's branch in Z.

(iii) *Apportionment.* For the method of apportionment on the basis of either sales or gross income, see *Example 3*. However, in determining the amount of research apportioned to income from foreign and domestic sources, the net sales of the branch in Z are \$3,000,000 (\$5,000,000 less \$2,000,000) and the sales within the United States are \$12,000,000 (\$7,000,000 plus \$3,000,000 plus \$2,000,000). See § 1.861-17(c)(3)(iii).

Example 5. (i) *Facts.* X, a domestic corporation, is a drug company that manufactures a wide variety of pharmaceutical products for sale in the United States. Pharmaceutical products belong to the product category, Drugs (SIC Industry Group 283). X exports its pharmaceutical products through a foreign sales corporation (FSC). X's wholly owned foreign subsidiary Y also manufactures pharmaceutical products. In 1997, X has domestic sales of pharmaceutical products of \$10,000,000, the FSC has sales of pharmaceutical products of \$3,000,000, and Y has sales of pharmaceutical products of \$5,000,000. In that same year, 1997, X incurs expense of \$200,000 on research to test a product in response to requirements imposed by the United States Food and Drug Administration (FDA). X is able to show that, even though country Y imposes certain testing requirements on pharmaceutical products, the research performed in the United States is not accepted by country Y for purposes of its own licensing requirements, and the research has minimal use abroad. X is further able to show that FSC sells goods to countries that do not accept or do not require research performed in the United States for purposes of their own licensing standards.

(ii) *Allocation.* Since X's research expense of \$200,000 is undertaken to meet the requirements of the United States Food and Drug Administration, and since it is reasonable to expect that the expenditure will not generate gross income (beyond *de minimis*

amounts) outside the United States, the deduction is definitely related and thus allocable to the residual grouping.

(iii) *Apportionment.* No apportionment is necessary since the entire expense is allocated to the residual grouping, gross income from sales within the United States.

Example 6. (i) *Facts.* X, a domestic corporation, is engaged in continuous research and experimentation to improve the quality of the products that it manufactures and sells, which are floodlights, flashlights, fuse boxes, and solderless connectors. X incurs and deducts \$100,000 of expenditure for research and experimentation in 1997 that was performed exclusively in the United States. As a result of this research activity, X acquires patents that it uses in its own manufacturing activity. X licenses its floodlight patent to Y and Z, uncontrolled foreign corporations, for use in their own territories, countries Y and Z, respectively. Corporation Y pays X an arm's length royalty of \$3,000 plus \$0.20 for each floodlight sold. Sales of floodlights by Y for the taxable year are \$135,000 (at \$4.50 per unit) or 30,000 units, and the royalty is \$9,000 (\$3,000+\$0.20×30,000). Y has sales of other products of \$500,000. Z pays X an arm's length royalty of \$3,000 plus \$0.30 for each unit sold. Z manufactures 30,000 floodlights in the taxable year, and the royalty is \$12,000 (\$3,000+\$0.30×30,000). The dollar value of Z's floodlight sales is not known and cannot be reasonably estimated because, in this case, the floodlights are not sold separately by Z but are instead used as a component in Z's manufacture of lighting equipment for theaters. The sales of all Z's products, including the lighting equipment for theaters, are \$1,000,000. Y and Z each sell the floodlights exclusively within their respective countries. X's sales of floodlights for the taxable year are \$500,000 and its sales of its other products, flashlights, fuse boxes, and solderless connectors, are \$400,000. X has gross income of \$500,000, consisting of gross income from domestic sources from sales of floodlights, flashlights, fuse boxes, and solderless connectors of \$479,000, and royalty income of \$9,000 and \$12,000 from foreign corporations Y and Z respectively. X utilized the optional gross income methods of apportionment for its return filed for its first taxable year to which this section applies.

(ii) *Allocation.* X's research and experimental expenses are definitely related to all of the products that it produces, which are floodlights, flashlights, fuse boxes, and solderless connectors. All of these products are in the same three digit SIC Code category, Electric Lighting and Wiring Equipment (SIC Industry Group 364). Thus, X's research and experimental expenses are allocable to all items of income attributable to this product category, domestic sales income and royalty income from the foreign countries in which corporations Y and Z operate.

§ 1.861-18

26 CFR Ch. I (4-1-15 Edition)

(iii) *Apportionment.* (A) The statutory grouping of gross income is general limitation income from sources without the United States. The residual grouping is gross income from sources within the United States. X's deduction of \$100,000 for its research expenditures must be apportioned between the groupings. For apportionment on the basis of sales in accordance with paragraph (c) of this section, X is entitled to an exclusive apportionment of 50 percent of its research and experimental expense to the residual grouping, gross income from sources within the United States, since more than 50 percent of the research activity was performed in the United States. The remaining 50 percent of the deduction can then be apportioned between the residual and statutory groupings on the basis of sales. Since Y and Z are unrelated licensees of X, only their sales of the licensed product, floodlights, are included for purposes of apportionment. Floodlight sales of Z are unknown, but are estimated at ten times royalties from Z, or \$120,000. All of X's sales from the entire product category are included for purposes of apportionment on the basis of sales. Alternatively, X may apportion its deduction on the basis of gross income, in accordance with paragraph (d) of this section. The apportionment is as follows:

(1) *Tentative Apportionment on the Basis of Sales*

| | |
|---|-----------|
| (i) Research and experimental expense to be apportioned between statutory and residual groupings of gross income: | \$100,000 |
| (ii) Less: Exclusive apportionment of research and experimental expense to the residual groupings of gross income (50 percent): | \$50,000 |
| (iii) Research and experimental expense to be apportioned between the statutory and residual groupings of gross income on the basis of sales: | \$50,000 |
| (iv) Apportionment of research and experimental expense to the residual groupings of gross income (\$50,000×\$900,000/(\$900,000+\$135,000+\$120,000)): | \$38,961 |
| (v) Apportionment of research and experimental expense to the statutory grouping, royalty income from countries Y and Z (\$50,000×\$135,000+\$120,000/(\$900,000+\$135,000+\$120,000)): | \$11,039 |
| (vi) Total apportioned deduction for research and experimentation: | \$100,000 |
| (vii) Amount apportioned to the residual grouping (\$50,000+\$38,961): | \$88,961 |
| (viii) Amount apportioned to the statutory grouping of sources within countries Y and Z: | \$11,039 |

(2) *Tentative Apportionment on Gross Income Basis*

| | |
|--|----------|
| (i) Exclusive apportionment of research and experimental expense to the residual grouping of gross income (25 percent): | \$25,000 |
| (ii) Apportionment of research and experimental expense to the residual grouping of gross income (\$75,000×\$479,000/\$500,000): | \$71,850 |

| | |
|---|----------|
| (iii) Apportionment of research and experimental expense to the statutory grouping of gross income (\$75,000×\$9,000+\$12,000/\$500,000): | \$3,150 |
| (iv) Amount apportioned to the residual grouping: | \$96,850 |
| (v) Amount apportioned to the statutory grouping of general limitation income from sources without the United States: | \$3,150 |

(B) Since X has elected to use the optional gross income methods of apportionment and its apportionment on the basis of gross income to the statutory grouping, \$3,150, is less than 50 percent of its apportionment on the basis of sales to the statutory grouping, \$11,039, it must use Option two of paragraph (d)(3) of this section and apportion \$5,520 (50 percent of \$11,039) to the statutory grouping.

[T.D. 8646, 60 FR 66503, Dec. 22, 1995, as amended by T.D. 9441, 74 FR 390, Jan. 5, 2009; T.D. 9568, 76 FR 80136, Dec. 22, 2011]

§ 1.861-18 Classification of transactions involving computer programs.

(a) *General*—(1) *Scope.* This section provides rules for classifying transactions relating to computer programs for purposes of subchapter N of chapter 1 of the Internal Revenue Code, sections 367, 404A, 482, 551, 679, 1059A, chapter 3, chapter 5, sections 842 and 845 (to the extent involving a foreign person), and transfers to foreign trusts not covered by section 679.

(2) *Categories of transactions.* This section generally requires that such transactions be treated as being solely within one of four categories (described in paragraph (b)(1) of this section) and provides certain rules for categorizing such transactions. In the case of a transfer of a copyright right, this section provides rules for determining whether the transaction should be classified as either a sale or exchange, or a license generating royalty income. In the case of a transfer of a copyrighted article, this section provides rules for determining whether the transaction should be classified as either a sale or exchange, or a lease generating rental income.

(3) *Computer program.* For purposes of this section, a computer program is a set of statements or instructions to be used directly or indirectly in a computer in order to bring about a certain result. For purposes of this paragraph (a)(3), a computer program includes any media, user manuals, documentation, data base or similar item if the media, user manuals, documentation,

data base or similar item is incidental to the operation of the computer program.

(b) *Categories of transactions*—(1) *General*. Except as provided in paragraph (b)(2) of this section, a transaction involving the transfer of a computer program, or the provision of services or of know-how with respect to a computer program (collectively, a transfer of a computer program) is treated as being solely one of the following—

(i) A transfer of a copyright right in the computer program;

(ii) A transfer of a copy of the computer program (a copyrighted article);

(iii) The provision of services for the development or modification of the computer program; or

(iv) The provision of know-how relating to computer programming techniques.

(2) *Transactions consisting of more than one category*. Any transaction involving computer programs which consists of more than one of the transactions described in paragraph (b)(1) of this section shall be treated as separate transactions, with the appropriate provisions of this section being applied to each such transaction. However, any transaction that is de minimis, taking into account the overall transaction and the surrounding facts and circumstances, shall not be treated as a separate transaction, but as part of another transaction.

(c) *Transfers involving copyright rights and copyrighted articles*—(1) *Classification*—(i) *Transfers treated as transfers of copyright rights*. A transfer of a computer program is classified as a transfer of a copyright right if, as a result of the transaction, a person acquires any one or more of the rights described in paragraphs (c)(2)(i) through (iv) of this section. Whether the transaction is treated as being solely the transfer of a copyright right or is treated as separate transactions is determined pursuant to paragraph (b)(1) and (b)(2) of this section. For example, if a person receives a disk containing a copy of a computer program which enables it to exercise, in relation to that program, a non-de minimis right described in paragraphs (c)(2)(i) through (iv) of this section (and the transaction does not involve, or involves only a de minimis

provision of services as described in paragraph (d) of this section or of know-how as described in paragraph (e) of this section), then, under paragraph (b)(2) of this section, the transfer is classified solely as a transfer of a copyright right.

(ii) *Transfers treated solely as transfers of copyrighted articles*. If a person acquires a copy of a computer program but does not acquire any of the rights described in paragraphs (c)(2)(i) through (iv) of this section (or only acquires a de minimis grant of such rights), and the transaction does not involve, or involves only a de minimis, provision of services as described in paragraph (d) of this section or of know-how as described in paragraph (e) of this section, the transfer of the copy of the computer program is classified solely as a transfer of a copyrighted article.

(2) *Copyright rights*. The copyright rights referred to in paragraph (c)(1) of this section are as follows—

(i) The right to make copies of the computer program for purposes of distribution to the public by sale or other transfer of ownership, or by rental, lease or lending;

(ii) The right to prepare derivative computer programs based upon the copyrighted computer program;

(iii) The right to make a public performance of the computer program; or

(iv) The right to publicly display the computer program.

(3) *Copyrighted article*. A copyrighted article includes a copy of a computer program from which the work can be perceived, reproduced, or otherwise communicated, either directly or with the aid of a machine or device. The copy of the program may be fixed in the magnetic medium of a floppy disk, or in the main memory or hard drive of a computer, or in any other medium.

(d) *Provision of services*. The determination of whether a transaction involving a newly developed or modified computer program is treated as either the provision of services or another transaction described in paragraph (b)(1) of this section is based on all the facts and circumstances of the transaction, including, as appropriate, the intent of the parties (as evidenced by their agreement and conduct) as to

which party is to own the copyright rights in the computer program and how the risks of loss are allocated between the parties.

(e) *Provision of know-how.* The provision of information with respect to a computer program will be treated as the provision of know-how for purposes of this section only if the information is—

(1) Information relating to computer programming techniques;

(2) Furnished under conditions preventing unauthorized disclosure, specifically contracted for between the parties; and

(3) Considered property subject to trade secret protection.

(f) *Further classification of transfers involving copyright rights and copyrighted articles—(1) Transfers of copyright rights.*

The determination of whether a transfer of a copyright right is a sale or exchange of property is made on the basis of whether, taking into account all facts and circumstances, there has been a transfer of all substantial rights in the copyright. A transaction that does not constitute a sale or exchange because not all substantial rights have been transferred will be classified as a license generating royalty income. For this purpose, the principles of sections 1222 and 1235 may be applied. Income derived from the sale or exchange of a copyright right will be sourced under section 865(a), (c), (d), (e), or (h), as appropriate. Income derived from the licensing of a copyright right will be sourced under section 861(a)(4) or 862(a)(4), as appropriate.

(2) *Transfers of copyrighted articles.* The determination of whether a transfer of a copyrighted article is a sale or exchange is made on the basis of whether, taking into account all facts and circumstances, the benefits and burdens of ownership have been transferred. A transaction that does not constitute a sale or exchange because insufficient benefits and burdens of ownership of the copyrighted article have been transferred, such that a person other than the transferee is properly treated as the owner of the copyrighted article, will be classified as a lease generating rental income. Income from transactions that are classified as sales or exchanges of copyrighted arti-

cles will be sourced under sections 861(a)(6), 862(a)(6), 863, 865(a), (b), (c), or (e), as appropriate. Income derived from the leasing of a copyrighted article will be sourced under section 861(a)(4) or section 862(a)(4), as appropriate.

(3) *Special circumstances of computer programs.* In connection with determinations under this paragraph (f), consideration must be given as appropriate to the special characteristics of computer programs in transactions that take advantage of these characteristics (such as the ability to make perfect copies at minimal cost). For example, a transaction in which a person acquires a copy of a computer program on disk subject to a requirement that the disk be destroyed after a specified period is generally the equivalent of a transaction subject to a requirement that the disk be returned after such period. Similarly, a transaction in which the program deactivates itself after a specified period is generally the equivalent of returning the copy.

(g) *Rules of operation—(1) Term applied to transaction by parties.* Neither the form adopted by the parties to a transaction, nor the classification of the transaction under copyright law, shall be determinative. Therefore, for example, if there is a transfer of a computer program on a single disk for a one-time payment with restrictions on transfer and reverse engineering, which the parties characterize as a license (including, but not limited to, agreements commonly referred to as shrink-wrap licenses), application of the rules of paragraphs (c) and (f) of this section may nevertheless result in the transaction being classified as the sale of a copyrighted article.

(2) *Means of transfer not to be taken into account.* The rules of this section shall be applied irrespective of the physical or electronic or other medium used to effectuate a transfer of a computer program.

(3) *To the public—(i) In general.* For purposes of paragraph (c)(2)(i) of this section, a transferee of a computer program shall not be considered to have the right to distribute copies of the program to the public if it is permitted to distribute copies of the software to

only either a related person, or to identified persons who may be identified by either name or by legal relationship to the original transferee. For purposes of this subparagraph, a related person is a person who bears a relationship to the transferee specified in section 267(b)(3), (10), (11), or (12), or section 707(b)(1)(B). In applying section 267(b), 267(f), 707(b)(1)(B), or 1563(a), “10 percent” shall be substituted for “50 percent.”

(ii) *Use by individuals.* The number of employees of a transferee of a computer program who are permitted to use the program in connection with their employment is not relevant for purposes of this paragraph (g)(3). In addition, the number of individuals with a contractual agreement to provide services to the transferee of a computer program who are permitted to use the program in connection with the performance of those services is not relevant for purposes of this paragraph (g)(3).

(h) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. (i) *Facts.* Corp A, a U.S. corporation, owns the copyright in a computer program, Program X. It copies Program X onto disks. The disks are placed in boxes covered with a wrapper on which is printed what is generally referred to as a shrink-wrap license. The license is stated to be perpetual. Under the license no reverse engineering, decompilation, or disassembly of the computer program is permitted. The transferee receives, first, the right to use the program on two of its own computers (for example, a laptop and a desktop) provided that only one copy is in use at any one time, and, second, the right to make one copy of the program on each machine as an essential step in the utilization of the program. The transferee is permitted by the shrink-wrap license to sell the copy so long as it destroys any other copies it has made and imposes the same terms and conditions of the license on the purchaser of its copy. These disks are made available for sale to the general public in Country Z. In return for valuable consideration, P, a Country Z resident, receives one such disk.

(ii) *Analysis.* (A) Under paragraph (g)(1) of this section, the label license is not determinative. None of the copyright rights described in paragraph (c)(2) of this section have been transferred in this transaction. P has received a copy of the program, however, and, therefore, under paragraph (c)(1)(ii) of this section, P has acquired solely a copyrighted article.

(B) Taking into account all of the facts and circumstances, P is properly treated as the owner of a copyrighted article. Therefore, under paragraph (f)(2) of this section, there has been a sale of a copyrighted article rather than the grant of a lease.

Example 2. (i) *Facts.* The facts are the same as those in *Example 1*, except that instead of selling disks, Corp A, the U.S. corporation, decides to make Program X available, for a fee, on a World Wide Web home page on the Internet. P, the Country Z resident, in return for payment made to Corp A, downloads Program X (via modem) onto the hard drive of his computer. As part of the electronic communication, P signifies his assent to a license agreement with terms identical to those in *Example 1*, except that in this case P may make a back-up copy of the program on to a disk.

(ii) *Analysis.* (A) None of the copyright rights described in paragraph (c)(2) of this section have passed to P. Although P did not buy a physical copy of the disk with the program on it, paragraph (g)(2) of this section provides that the means of transferring the program is irrelevant. Therefore, P has acquired a copyrighted article.

(B) As in *Example 1*, P is properly treated as the owner of a copyrighted article. Therefore, under paragraph (f)(2) of this section, there has been a sale of a copyrighted article rather than the grant of a lease.

Example 3. (i) *Facts.* The facts are the same as those in *Example 1*, except that Corp A only allows P, the Country Z resident, to use Program X for one week. At the end of that week, P must return the disk with Program X on it to Corp A. P must also destroy any copies made of Program X. If P wishes to use Program X for a further period he must enter into a new agreement to use the program for an additional charge.

(ii) *Analysis.* (A) Under paragraph (c)(2) of this section, P has received no copyright rights. Because P has received a copy of the program under paragraph (c)(1)(ii) of this section, he has, therefore, received a copyrighted article.

(B) Taking into account all of the facts and circumstances, P is not properly treated as the owner of a copyrighted article. Therefore, under paragraph (f)(2) of this section, there has been a lease of a copyrighted article rather than a sale. Taking into account the special characteristics of computer programs as provided in paragraph (f)(3) of this section, the result would be the same if P were required to destroy the disk at the end of the one week period instead of returning it since Corp A can make additional copies of the program at minimal cost.

Example 4. (i) *Facts.* The facts are the same as those in *Example 2*, where P, the Country Z resident, receives Program X from Corp A's home page on the Internet, except that P may only use Program X for a period of one

week at the end of which an electronic lock is activated and the program can no longer be accessed. Thereafter, if P wishes to use Program X, it must return to the home page and pay Corp A to send an electronic key to reactivate the program for another week.

(ii) *Analysis.* (A) As in *Example 3*, under paragraph (c)(2) of this section, P has not received any copyright rights. P has received a copy of the program, and under paragraph (g)(2) of this section, the means of transmission is irrelevant. P has, therefore, under paragraph (c)(1)(ii) of this section, received a copyrighted article.

(B) As in *Example 3*, P is not properly treated as the owner of a copyrighted article. Therefore, under paragraph (f)(2) of this section, there has been a lease of a copyrighted article rather than a sale. While P does retain Program X on its computer at the end of the one week period, as a legal matter P no longer has the right to use the program (without further payment) and, indeed, cannot use the program without the electronic key. Functionally, Program X is no longer on the hard drive of P's computer. Instead, the hard drive contains only a series of numbers which no longer perform the function of Program X. Although in *Example 3*, P was required to physically return the disk, taking into account the special characteristics of computer programs as provided in paragraph (f)(3) of this section, the result in this *Example 4* is the same as in *Example 3*.

Example 5. (i) *Facts.* Corp A, a U.S. corporation, transfers a disk containing Program X to Corp B, a Country Z corporation, and grants Corp B an exclusive license for the remaining term of the copyright to copy and distribute an unlimited number of copies of Program X in the geographic area of Country Z, prepare derivative works based upon Program X, make public performances of Program X, and publicly display Program X. Corp B will pay Corp A a royalty of \$y a year for three years, which is the expected period during which Program X will have commercially exploitable value.

(ii) *Analysis.* (A) Although Corp A has transferred a disk with a copy of Program X on it to Corp B, under paragraph (c)(1)(i) of this section because this transfer is accompanied by a copyright right identified in paragraph (c)(2)(i) of this section, this transaction is a transfer solely of copyright rights, not of copyrighted articles. For purposes of paragraph (b)(2) of this section, the disk containing a copy of Program X is a de minimis component of the transaction.

(B) Applying the all substantial rights test under paragraph (f)(1) of this section, Corp A will be treated as having sold copyright rights to Corp B. Corp B has acquired all of the copyright rights in Program X, has received the right to use them exclusively within Country Z, and has received the rights for the remaining life of the copyright

in Program X. The fact the payments cease before the copyright term expires is not controlling. Under paragraph (g)(1) of this section, the fact that the agreement is labelled a license is not controlling (nor is the fact that Corp A receives a sum labelled a royalty). (The result in this case would be the same if the copy of Program X to be used for the purposes of reproduction were transmitted electronically to Corp B, as a result of the application of the rule of paragraph (g)(2) of this section.)

Example 6. (i) *Facts.* Corp A, a U.S. corporation, transfers a disk containing Program X to Corp B, a Country Z corporation, and grants Corp B the non exclusive right to reproduce (either directly or by contracting with either Corp A or another person to do so) and distribute for sale to the public an unlimited number of disks at its factory in Country Z in return for a payment related to the number of disks copied and sold. The term of the agreement is two years, which is less than the remaining life of the copyright.

(ii) *Analysis.* (A) As in *Example 5*, the transfer of the disk containing the copy of the program does not constitute the transfer of a copyrighted article under paragraph (c)(1) of this section because Corp B has also acquired a copyright right under paragraph (c)(2)(i) of this section, the right to reproduce and distribute to the public. For purposes of paragraph (b)(2) of this section, the disk containing Program X is a de minimis component of the transaction.

(B) Taking into account all of the facts and circumstances, there has been a license of Program X to Corp B, and the payments made by Corp B are royalties. Under paragraph (f)(1) of this section, there has not been a transfer of all substantial rights in the copyright to Program X because Corp A has the right to enter into other licenses with respect to the copyright of Program X, including licenses in Country Z (or even to sell that copyright, subject to Corp B's interest). Corp B has acquired no right itself to license the copyright rights in Program X. Finally, the term of the license is for less than the remaining life of the copyright in Program X.

Example 7. (i) *Facts.* Corp C, a distributor in Country Z, enters into an agreement with Corp A, a U.S. corporation, to purchase as many copies of Program X on disk as it may from time-to-time request. Corp C will then sell these disks to retailers. The disks are shipped in boxes covered by shrink-wrap licenses (identical to the license described in *Example 1*).

(ii) *Analysis.* (A) Corp C has not acquired any copyright rights under paragraph (c)(2) of this section with respect to Program X. It has acquired individual copies of Program X, which it may sell to others. The use of the term license is not dispositive under paragraph (g)(1) of this section. Under paragraph

(c)(1)(ii) of this section, Corp C has acquired copyrighted articles.

(B) Taking into account all of the facts and circumstances, Corp C is properly treated as the owner of copyrighted articles. Therefore, under paragraph (f)(2) of this section, there has been a sale of copyrighted articles.

Example 8. (i) *Facts.* Corp A, a U.S. corporation, transfers a disk containing Program X to Corp D, a foreign corporation engaged in the manufacture and sale of personal computers in Country Z. Corp A grants Corp D the non-exclusive right to copy Program X onto the hard drive of an unlimited number of computers, which Corp D manufactures, and to distribute those copies (on the hard drive) to the public. The term of the agreement is two years, which is less than the remaining life of the copyright in Program X. Corp D pays Corp A an amount based on the number of copies of Program X it loads on to computers.

(ii) *Analysis.* The analysis is the same as in *Example 6*. Under paragraph (c)(2)(i) of this section, Corp D has acquired a copyright right enabling it to exploit Program X by copying it on to the hard drives of the computers that it manufactures and then sells. For purposes of paragraph (b)(2) of this section, the disk containing Program X is a de minimis component of the transaction. Taking into account all of the facts and circumstances, Corp D has not, however, acquired all substantial rights in the copyright to Program X (for example, the term of the agreement is less than the remaining life of the copyright). Under paragraph (f)(1) of this section, this transaction is, therefore, a license of Program X to Corp D rather than a sale and the payments made by Corp D are royalties. (The result would be the same if Corp D included with the computers it sells an archival copy of Program X on a floppy disk.)

Example 9. (i) *Facts.* The facts are the same as in *Example 8*, except that Corp D, the Country Z corporation, receives physical disks. The disks are shipped in boxes covered by shrink-wrap licenses (identical to the licenses described in *Example 1*). The terms of these licenses do not permit Corp D to make additional copies of Program X. Corp D uses each individual disk only once to load a single copy of Program X onto each separate computer. Corp D transfers the disk with the computer when it is sold.

(ii) *Analysis.* (A) As in *Example 7* (unlike *Example 8*) no copyright right identified in paragraph (c)(2) of this section has been transferred. Corp D acquires the disks without the right to reproduce and distribute publicly further copies of Program X. This is therefore the transfer of copyrighted articles under paragraph (c)(1)(ii) of this section.

(B) Taking into account all of the facts and circumstances, Corp D is properly treated as the owner of copyrighted articles. Therefore,

under paragraph (f)(2) of this section, the transaction is classified as the sale of a copyrighted article. (The result would be the same if Corp D used a single physical disk to copy Program X onto each computer, and transferred an unopened box containing Program X with each computer, if Corp D were not permitted to copy Program X onto more computers than the number of individual copies purchased.)

Example 10. (i) *Facts.* Corp A, a U.S. corporation, transfers a disk containing Program X to Corp E, a Country Z corporation, and grants Corp E the right to load Program X onto 50 individual workstations for use only by Corp E employees at one location in return for a one-time per-user fee (generally referred to as a site license or enterprise license). If additional workstations are subsequently introduced, Program X may be loaded onto those machines for additional one-time per-user fees. The license which grants the rights to operate Program X on 50 workstations also prohibits Corp E from selling the disk (or any of the 50 copies) or reverse engineering the program. The term of the license is stated to be perpetual.

(ii) *Analysis.* (A) The grant of a right to copy, unaccompanied by the right to distribute those copies to the public, is not the transfer of a copyright right under paragraph (c)(2) of this section. Therefore, under paragraph (c)(1)(ii) of this section, this transaction is a transfer of copyrighted articles (50 copies of Program X).

(B) Taking into account all of the facts and circumstances, P is properly treated as the owner of copyrighted articles. Therefore, under paragraph (f)(2) of this section, there has been a sale of copyrighted articles rather than the grant of a lease. Notwithstanding the restriction on sale, other factors such as, for example, the risk of loss and the right to use the copies in perpetuity outweigh, in this case, the restrictions placed on the right of alienation.

(C) The result would be the same if Corp E were permitted to copy Program X onto an unlimited number of workstations used by employees of either Corp E or corporations that had a relationship to Corp E specified in paragraph (g)(3) of this section.

Example 11. (i) *Facts.* The facts are the same as in *Example 10*, except that Corp E, the Country Z corporation, acquires the right to make Program X available to workstation users who are Corp E employees by way of a local area network (LAN). The number of users that can use Program X on the LAN at any one time is limited to 50. Corp E pays a one-time fee for the right to have up to 50 employees use the program at the same time.

(ii) *Analysis.* Under paragraph (g)(2) of this section the mode of utilization is irrelevant. Therefore, as in *Example 10*, under paragraph (c)(2) of this section, no copyright right has

been transferred, and, thus, under paragraph (c)(1)(ii) of this section, this transaction will be classified as the transfer of a copyrighted article. Under the benefits and burdens test of paragraph (f)(2) of this section, this transaction is a sale of copyrighted articles. The result would be the same if an unlimited number of Corp E employees were permitted to use Program X on the LAN or if Corp E were permitted to copy Program X onto LANs maintained by corporations that had a relationship to Corp E specified in paragraph (g)(3) of this section.

Example 12. (i) *Facts.* The facts are the same as in *Example 11*, except that Corp E pays a monthly fee to Corp A, the U.S. corporation, calculated with reference to the permitted maximum number of users (which can be changed) and the computing power of Corp E's server. In return for this monthly fee, Corp E receives the right to receive upgrades of Program X when they become available. The agreement may be terminated by either party at the end of any month. When the disk containing the upgrade is received, Corp E must return the disk containing the earlier version of Program X to Corp A. If the contract is terminated, Corp E must delete (or otherwise destroy) all copies made of the current version of Program X. The agreement also requires Corp A to provide technical support to Corp E but the agreement does not allocate the monthly fee between the right to receive upgrades of Program X and the technical support services. The amount of technical support that Corp A will provide to Corp E is not foreseeable at the time the contract is entered into but is expected to be de minimis. The agreement specifically provides that Corp E has not thereby been granted an option to purchase Program X.

(ii) *Analysis.* (A) Corp E has received no copyright rights under paragraph (c)(2) of this section. Corp A has not provided any services described in paragraph (d) of this section. Based on all the facts and circumstances of the transaction, Corp A has provided de minimis technical services to Corp E. Therefore, under paragraph (c)(1)(ii) of this section, the transaction is a transfer of a copyrighted article.

(B) Taking into account all facts and circumstances, under the benefits and burdens test Corp E is not properly treated as the owner of the copyrighted article. Corp E does not receive the right to use Program X in perpetuity, but only for so long as it continues to make payments. Corp E does not have the right to purchase Program X on advantageous (or, indeed, any) terms once a certain amount of money has been paid to Corp A or a certain period of time has elapsed (which might indicate a sale). Once the agreement is terminated, Corp E will no longer possess any copies of Program X, current or superseded. Therefore under para-

graph (f)(2) of this section there has been a lease of a copyrighted article.

Example 13. (i) *Facts.* The facts are the same as in *Example 12*, except that, while Corp E must return copies of Program X as new upgrades are received, if the agreement terminates, Corp E may keep the latest version of Program X (although Corp E is still prohibited from selling or otherwise transferring any copy of Program X).

(ii) *Analysis.* For the reasons stated in *Example 10*, paragraph (ii)(B), the transfer of the program will be treated as a sale of a copyrighted article rather than as a lease.

Example 14. (i) *Facts.* Corp G, a Country Z corporation, enters into a contract with Corp A, a U.S. corporation, for Corp A to modify Program X so that it can be used at Corp G's facility in Country Z. Under the contract, Corp G is to acquire one copy of the program on a disk and the right to use the program on 5,000 workstations. The contract requires Corp A to rewrite elements of Program X so that it will conform to Country Z accounting standards and states that Corp A retains all copyright rights in the modified Program X. The agreement between Corp A and Corp G is otherwise identical as to rights and payment terms as the agreement described in *Example 10*.

(ii) *Analysis.* (A) As in *Example 10*, no copyright rights are being transferred under paragraph (c)(2) of this section. In addition, since no copyright rights are being transferred to Corp G, this transaction does not involve the provision of services by Corp A under paragraph (d) of this section. This transaction will be classified, therefore, as a transfer of copyrighted articles under paragraph (c)(1)(ii) of this section.

(B) Taking into account all facts and circumstances, Corp G is properly treated as the owner of copyrighted articles. Therefore, under paragraph (f)(2) of this section, there has been the sale of a copyrighted article rather than the grant of a lease.

Example 15. (i) *Facts.* Corp H, a Country Z corporation, enters into a license agreement for a new computer program. Program Q is to be written by Corp A, a U.S. corporation. Corp A and Corp H agree that Corp A is writing Program Q for Corp H and that, when Program Q is completed, the copyright in Program Q will belong to Corp H. Corp H gives instructions to Corp A programmers regarding program specifications. Corp H agrees to pay Corp A a fixed monthly sum during development of the program. If Corp H is dissatisfied with the development of the program, it may cancel the contract at the end of any month. In the event of termination, Corp A will retain all payments, while any procedures, techniques or copyrightable interests will be the property of

Corp H. All of the payments are labelled royalties. There is no provision in the agreement for any continuing relationship between Corp A and Corp H, such as the furnishing of updates of the program, after completion of the modification work.

(ii) *Analysis.* Taking into account all of the facts and circumstances, Corp A is treated as providing services to Corp H. Under paragraph (d) of this section, Corp A is treated as providing services to Corp H because Corp H bears all of the risks of loss associated with the development of Program Q and is the owner of all copyright rights in Program Q. Under paragraph (g)(1) of this section, the fact that the agreement is labelled a license is not controlling (nor is the fact that Corp A receives a sum labelled a royalty).

Example 16. (i) *Facts.* Corp A, a U.S. corporation, and Corp I, a Country Z corporation, agree that a development engineer employed by Corp A will travel to Country Z to provide know-how relating to certain techniques not generally known to computer programmers, which will enable Corp I to more efficiently create computer programs. These techniques represent the product of experience gained by Corp A from working on many computer programming projects, and are furnished to Corp I under nondisclosure conditions. Such information is property subject to trade secret protection.

(ii) *Analysis.* This transaction contains the elements of know-how specified in paragraph (e) of this section. Therefore, this transaction will be treated as the provision of know-how.

Example 17. (i) *Facts.* Corp A, a U.S. corporation, transfers a disk containing Program Y to Corp E, a Country Z corporation, in exchange for a single fixed payment. Program Y is a computer program development program, which is used to create other computer programs, consisting of several components, including libraries of reusable software components that serve as general building blocks in new software applications. No element of these libraries is a significant component of any overall new program. Because a computer program created with the use of Program Y will not operate unless the libraries are also present, the license agreement between Corp A and Corp E grants Corp E the right to distribute copies of the libraries with any program developed using Program Y. The license agreement is otherwise identical to the license agreement in *Example 1.*

(ii) *Analysis.* (A) No non-de minimis copyright rights described in paragraph (c)(2) of this section have passed to Corp E. For purposes of paragraph (b)(2) of this section, the right to distribute the libraries in conjunction with the programs created using Program Y is a de minimis component of the transaction. Because Corp E has received a copy of the program under paragraph

(c)(1)(ii) of this section, it has received a copyrighted article.

(B) Taking into account all the facts and circumstances, Corp E is properly treated as the owner of a copyrighted article. Therefore, under paragraph (f)(2) of this section, there has been the sale of a copyrighted article rather than the grant of a lease.

Example 18. (i) *Facts.* (A) Corp A, a U.S. corporation, transfers a disk containing Program X to Corp E, a country Z Corporation. The disk contains both the object code and the source code to Program X and the license agreement grants Corp E the right to—

(1) Modify the source code in order to correct minor errors and make minor adaptations to Program X so it will function on Corp E's computer; and

(2) Recompile the modified source code.

(B) The license does not grant Corp E the right to distribute the modified Program X to the public. The license is otherwise identical to the license agreement in *Example 1.*

(ii) *Analysis.* (A) No non-de minimis copyright rights described in paragraph (c)(2) of this section have passed to Corp E. For purposes of paragraph (b)(2) of this section, the right to modify the source code and recompile the source code in order to create new code to correct minor errors and make minor adaptations is a de minimis component of the transaction. Because Corp E has received a copy of the program under paragraph (c)(1)(ii) of this section, it has received a copyrighted article.

(B) Taking into account all the facts and circumstances, Corp E is properly treated as the owner of a copyrighted article. Therefore, under paragraph (f)(2) of this section, there has been the sale of a copyrighted article rather than the grant of a lease.

(i) *Effective date—(1) General.* This section applies to transactions occurring pursuant to contracts entered into on or after December 1, 1998.

(2) *Elective transition rules—(i) Contracts entered into in taxable years ending on or after October 2, 1998.* A taxpayer may elect to apply this section to transactions occurring pursuant to contracts entered into in taxable years ending on or after October 2, 1998. A taxpayer that makes an election under this paragraph (i)(2)(i) must apply this section to all contracts entered into in taxable years ending on or after October 2, 1998.

(ii) *Contracts entered into before October 2, 1998.* A taxpayer may elect to apply this section to transactions occurring in taxable years ending on or after October 2, 1998 pursuant to contracts entered into before October 2,

1998 provided the taxpayer would not be required under this section to change its method of accounting as a result of such election, or the taxpayer would be required to change its method of accounting but the resulting section 481(a) adjustment would be zero. A taxpayer that makes an election under this paragraph (i)(2)(ii) must apply this section to all transactions occurring in taxable years ending on or after October 2, 1998 pursuant to contracts entered into before October 2, 1998.

(3) *Manner of making election.* Taxpayers may elect, under paragraph (i)(2)(i) or (i)(2)(ii) of this section, to apply this section, by treating the transactions in accordance with these regulations on their original tax return.

(4) *Examples.* The following examples illustrate application of the transition rule of paragraph (i)(2)(ii) of this section:

Example 1. Corp A develops computer programs for sale to third parties. Corp A uses an overall accrual method of accounting and files its tax return on a calendar-year basis. In year 1, Corp A enters into a contract to deliver a computer program in that year, and to provide updates for each of the following four years. Under the contract, the computer program and the updates are priced separately, and Corp A is entitled to receive payments for the computer program and each of the updates upon delivery. Assume Corp A properly accounts for the contract as a contract for the provision of services. Corp A properly includes the payments under the contract in gross income in the taxable year the payments are received and the computer program or updates are delivered. Corp A properly deducts the cost of developing the computer program and updates when the costs are incurred. Year 3 includes October 2, 1998. Assume under the rules of this section, the provision of updates would properly be accounted for as the transfer of copyrighted articles. If Corp A made an election under paragraph (i)(2)(ii) of this section, Corp A would not be required to change its method of accounting for income under the contract as a result of the election. Corp A would also not be required to change its method of accounting for the cost of developing the computer program and the updates under the contract as a result of the election. Therefore, under paragraph (i)(2)(ii) of this section, Corp A may elect to apply the provisions of this section to the updates provided in years 3, 4, and 5, because Corp A is not required to change from its method of account-

ing for the contract as a result of the election.

Example 2. Corp A develops computer programs for sale to third parties. Corp A uses an overall accrual method of accounting and files its tax return on a calendar-year basis. In year 1, Corp A enters into a contract to deliver a computer program and to provide one update the following year. Under the contract, the computer program and the update are priced separately, and Corp A is entitled to receive payment for the computer program and the update upon delivery of the computer program. Assume Corp A properly accounts for the contract as a contract for the provision of services. Corp A properly includes the portion of the payment relating to the computer program in gross income in year 1, the taxable year the payment is received and the program delivered. Corp A properly includes the portion of the payment relating to the update in gross income in year 2, the taxable year the update is provided, under Rev. Proc. 71-21, 1971-2 CB 549 (see §601.601 (d)(2) of this chapter). Corp A properly deducts the cost of developing the computer program and update when the costs are incurred. Year 2 includes October 2, 1998. Assume under the rules of this section, provision of the update would properly be accounted for as the transfer of a copyrighted article. If Corp A made an election under paragraph (i)(2)(ii) of this section, Corp A would be required to change its method of accounting for deferring income under its contract as a result of the election. However, the section 481(a) adjustment would be zero because the portion of the payment relating to the update would be includible in gross income in year 2, the taxable year the update is provided, under both Rev. Proc. 71-21 and §1.451-5. Corp A would not be required to change its method of accounting for the cost of developing the computer program and the update under the contract as a result of the election. Therefore, under paragraph (i)(2)(ii) of this section, Corp A may elect to apply the provisions of this section to the update in year 2, because the section 481(a) adjustment resulting from the change in method of accounting for deferring advance payments under the contract is zero, and because Corp A is not required to change from its method of accounting for the cost of developing the computer program and updates under the contract as a result of the election.

Example 3. Assume the same facts as in *Example 1* except that Corp A is entitled to receive payments for the computer program and each of the updates 30 days after delivery. Corp A properly includes the amounts due under the contract in gross income in the taxable year the computer program or updates are provided. Assume that Corp A properly uses the nonaccrual-experience method described in section 448(d)(5) and

§1.448-2T to account for income on its contracts. If Corp A made an election under paragraph (i)(2)(ii) of this section, Corp A would be required to change from the non-accrual-experience method for income as a result of the election, because the method is only available with respect to amounts to be received for the performance of services. Therefore, Corp A may not elect to apply the provisions of this section to the updates provided in years 3, 4, and 5, under paragraph (i)(2)(ii) of this section, because Corp A would be required to change from the non-accrual-experience method of accounting for income on the contract as a result of the election.

(j) *Change in method of accounting required by this section—(1) Consent.* A taxpayer is granted consent to change its method of accounting for contracts involving computer programs, to conform with the classification prescribed in this section. The consent is granted for contracts entered into on or after December 1, 1998, or in the case of a taxpayer making an election under paragraph (i)(2)(i) of this section, the consent is granted for contracts entered into in taxable years ending on or after October 2, 1998. In addition, a taxpayer that makes an election under paragraph (i)(2)(ii) of this section is granted consent to change its method of accounting for any contract with transactions subject to the election, if the taxpayer is required to change its method of accounting as a result of the election.

(2) *Year of change.* The year of change is the taxable year that includes December 1, 1998, or in the case of a taxpayer making an election under paragraph (i)(2)(i) or (i)(2)(ii) of this section, the taxable year that includes October 2, 1998.

(k) *Time and manner of making change in method of accounting—(1) General.* A taxpayer changing its method of accounting in accordance with this section must file a Form 3115, Application for Change in Method of Accounting, in duplicate. The taxpayer must type or print the following statement at the top of page 1 of the Form 3115: “FILED UNDER TREASURY REGULATION §1.861-18.” The original Form 3115 must be attached to the taxpayers original return for the year of change. A copy of the Form 3115 must be filed with the National Office no later than when the

original Form 3115 is filed for the year of change.

(2) *Copy of Form 3115.* The copy required by this paragraph (k)(1) to be sent to the national office should be sent to the Commissioner of Internal Revenue, Attention: CC:DOM:IT&A, P.O. Box 7604, Benjamin Franklin Station, Washington DC 20044 (or in the case of a designated private delivery service: Commissioner of Internal Revenue, Attention: CC:DOM:IT&A, 1111 Constitution Avenue, NW., Washington, DC 20224).

(3) *Effect of consent and Internal Revenue Service review.* A change in method of accounting granted under this section is subject to review by the district director and the national office and may be modified or revoked in accordance with the provisions of Rev. Proc. 97-37 (1997-33 IRB 18) (or its successors) (see §601.601(d)(2) of this chapter).

§ 1.862-1 Income specifically from sources without the United States.

(a) *Gross income.* (1) The following items of gross income shall be treated as income from sources without the United States:

(i) Interest other than that specified in section 861(a)(1) and §1.861-2 as being derived from sources within the United States;

(ii) Dividends other than those derived from sources within the United States as provided in section 861(a)(2) and §1.861-3;

(iii) Compensation for labor or personal services performed without the United States;

(iv) Rentals or royalties from property located without the United States or from any interest in such property, including rentals or royalties for the use of, or for the privilege of using, without the United States, patents, copyrights, secret processes and formulas, goodwill, trademarks, trade brands, franchises, and other like property;

(v) Gains, profits, and income from the sale of real property located without the United States; and

(vi) Gains, profits, and income derived from the purchase of personal

property within the United States and its sale without the United States.

(2) In applying subparagraph (1)(iv) of this paragraph for taxable years beginning after December 31, 1966, gains described in section 871(a)(1)(D) and section 881(a)(4) from the sale or exchange after October 4, 1966, of patents, copyrights, and other like property shall be treated, as provided in section 871(e)(2), as rentals or royalties for the use of, or privilege of using, property or an interest in property. See paragraph (e) of § 1.871-11.

(3) For determining the time and place of sale of personal property for purposes of subparagraph (1)(vi) of this paragraph, see paragraph (c) of § 1.861-7.

(4) Income derived from the purchase of personal property within the United States and its sale within a possession of the United States shall be treated as derived entirely from within that possession.

(5) If interest is paid on an obligation of a nonresident of the United States by a resident of the United States acting in the resident's capacity as a guarantor of the obligation of the nonresident, the interest will be treated as income from sources without the United States.

(6) For rules treating certain interest as income from sources without the United States, see paragraph (b) of § 1.861-2.

(7) For the treatment of compensation for labor or personal services performed partly within the United States and partly without the United States, see paragraph (b) of § 1.861-4.

(b) *Taxable income.* The taxable income from sources without the United States, in the case of the items of gross income specified in paragraph (a) of this section, shall be determined on the same basis as that used in § 1.861-8 for determining the taxable income from sources within the United States.

(c) *Income from certain property.* For provisions permitting a taxpayer to elect to treat amounts of gross income attributable to certain aircraft or vessels first leased on or before December 28, 1980, as income from sources within the United States which would otherwise be treated as income from sources without the United States under paragraph (a) of this section, see § 1.861-9.

For provisions requiring amounts of gross income attributable to certain aircraft, vessels, or spacecraft first leased by the taxpayer after December 28, 1980, to be treated as income from sources within the United States which would otherwise be treated as income from sources without the United States under paragraph (a) of this section, see § 1.861-9A.

§ 1.863-1 Allocation of gross income under section 863(a).

(a) *In general.* Items of gross income other than those specified in section 861(a) and section 862(a) will generally be separately allocated to sources within or without the United States. See § 1.863-2 for alternate methods to determine the income from sources within or without the United States in the case of items specified in § 1.863-2(a). See also sections 865(b) and (e)(2). In the case of sales of property involving partners and partnerships, the rules of § 1.863-3(g) apply.

(b) *Natural resources—(1) In general.* Notwithstanding any other provision, except to the extent provided in paragraph (b)(2) of this section, gross receipts from the sale outside the United States of products derived from the ownership or operation of any farm, mine, oil or gas well, other natural deposit, or timber within the United States, must be allocated between sources within and without the United States based on the fair market value of the product at the export terminal (as defined in paragraph (b)(3)(iii) of this section). Notwithstanding any

other provision, except to the extent provided in paragraph (b)(2) of this section, gross receipts from the sale within the United States of products derived from the ownership or operation of any farm, mine, oil or gas well, other natural deposit, or timber outside the United States must be allocated between sources within and without the United States based on the fair market value of the product at the export terminal. For place of sale, see §§ 1.861-7(c) and 1.863-3(c)(2). The source of gross receipts equal to the fair market value of the product at the export terminal will be from sources where the farm, mine, well, deposit, or uncut timber is located. The source of gross receipts from the sale of the product in excess of its fair market value at the export terminal (excess gross receipts) will be determined as follows—

(i) If the taxpayer engages in additional production activities subsequent to shipment from the export terminal and outside the country of sale, the source of excess gross receipts must be determined under § 1.863-3. For purposes of applying § 1.863-3, only production assets used in additional production activity subsequent to the export terminal are taken into account.

(ii) In all other cases, excess gross receipts will be from sources within the country of sale. This paragraph (b)(1)(ii) applies to a taxpayer that engages in additional production activities in the country of sale, as well as to a taxpayer that does not engage in additional production activities at all.

(2) *Additional production prior to export terminal.* Notwithstanding any other provision of this section, gross receipts from the sale of products derived by a taxpayer who performs additional production activities as defined in paragraph (b)(3)(ii) of this section before the relevant product is shipped from the export terminal are allocated between sources within and without the United States based on the fair market value of the product immediately prior to the additional production activities. The source of gross receipts equal to the fair market value of the product immediately prior to the additional production activities will be from sources where the farm, mine,

well, deposit, or uncut timber is located. The source of gross receipts from the sale of the product in excess of the fair market value immediately prior to the additional production activities must be determined under § 1.863-3. For purposes of applying § 1.863-3, only production assets used in the additional production activities are taken into account.

(3) *Definitions*—(i) *Production activity*. For purposes of this section, production activity means an activity that creates, fabricates, manufactures, extracts, processes, cures, or ages inventory. See § 1.864-1. Except as otherwise provided in §§ 1.1502-13 or 1.863-3(g)(2), only production activities conducted directly by the taxpayer are taken into account.

(ii) *Additional production activities*. For purposes of this section, additional production activities are substantial production activities performed directly by the taxpayer in addition to activities from the ownership or operation of any farm, mine, oil or gas well, other natural deposit, or timber. Whether a taxpayer's activities constitute additional production activities will be determined under the principles of § 1.954-3(a)(4). However, in no case will activities that prepare the natural resource itself for export, including those that are designed to facilitate the transportation of the natural resource to or from the export terminal, be considered additional production activities for purposes of this section.

(iii) *Export terminal*. Where the farm, mine, well, deposit, or uncut timber is located without the United States, the export terminal will be the final point in a foreign country from which goods are shipped to the United States. If there is no such final point in a foreign country (e.g., the property is extracted and produced on the high seas), the export terminal will be the place of production. Where the farm, mine, well, deposit, or uncut timber is located within the United States, the export terminal will be the final point in the United States from which goods are shipped from the United States to a foreign country. The location of the export terminal is determined without regard to any contractual terms agreed to by the taxpayer and without regard

to whether there is an actual sale of the products at the export terminal.

(4) *Determination of fair market value*. For purposes of this section, fair market value depends on all of the facts and circumstances as they exist relative to a party in any particular case. Where the products are sold to a related party in a transaction subject to section 482, the determination of fair market value under this section must be consistent with the arm's length price determined under section 482.

(5) *Determination of gross income*. To determine the amount of a taxpayer's gross income from sources within or without the United States, the taxpayer's gross receipts from sources within or without the United States determined under this paragraph (b) must be reduced by the cost of goods sold properly attributable to gross receipts from sources within or without the United States.

(6) *Tax return disclosure*. A taxpayer that determines the source of its income under this paragraph (b) shall attach a statement to its return explaining the methodology used to determine fair market value under paragraph (b)(4) of this section, and explaining any additional production activities (as defined in paragraph (b)(3)(ii) of this section) performed by the taxpayer. In addition, the taxpayer must provide such other information as is required by § 1.863-3.

(7) *Examples*. The following examples illustrate the rules of this paragraph (b):

Example 1. No additional production. U.S. Mines, a U.S. corporation, operates a copper mine and mill in country X. U.S. Mines extracts copper-bearing rocks from the ground and transports the rocks to the mill where the rocks are ground and processed to produce copper-bearing concentrate. The concentrate is transported to a port where it is dried in preparation for export, stored and then shipped to purchasers in the United States. Because title to the property is passed in the United States and, under the facts and circumstances, none of U.S. Mine's activities constitutes additional production prior to the export terminal within the meaning of paragraph (b)(3)(ii) of this section, under paragraph (b)(1) and (b)(1)(ii) of this section, gross receipts equal to the fair market value of the concentrate at the export terminal will be from sources without the United States, and excess gross receipts

will be from sources within the United States.

Example 2. No additional production. US Gas, a U.S. corporation, extracts natural gas within the United States, and transports the natural gas to a U.S. port where it is liquified in preparation for shipment. The liquified natural gas is then transported via freighter and sold without additional production activities in a foreign country. Liquefaction of natural gas is not an additional production activity because liquefaction prepares the natural gas for transportation from the export terminal. Therefore, under paragraph (b)(1) and (b)(1)(ii) of this section, gross receipts equal to the fair market value of the liquified natural gas at the export terminal will be from sources within the United States, and excess gross receipts will be from sources without the United States.

Example 3. Sale in third country. US Gold, a U.S. corporation, mines gold in country X, produces gold jewelry in the United States, and sells the jewelry in country Y. Assume that the fair market value of the gold at the export terminal in country X is \$40, and that US Gold ultimately sells the gold jewelry in country Y for \$100. Under §1.863-1(b), \$40 of US Gold's gross receipts will be allocated to sources without the United States. Under paragraph (b)(1)(i) of this section, the source of the remaining \$60 of gross receipts will be determined under §1.863-3. If US Gold applies the 50/50 method described in §1.863-3, \$20 of cost of goods sold is properly attributable to activities subsequent to the export terminal, and all of US Gold's production assets subsequent to the export terminal are located in the United States, then \$20 of gross income will be allocated to sources within the United States and \$20 of gross income will be allocated to sources without the United States.

Example 4. Production in country of sale. US Oil, a U.S. corporation, extracts oil in country X, transports the oil via pipeline to the export terminal in country Y, refines the oil in the United States, and sells the refined product in the United States to unrelated persons. Assume that the fair market value of the oil at the export terminal in country Y is \$80, and that US Oil ultimately sells the refined product for \$100. Under paragraph (b)(1) of this section, \$80 of US Oil's gross receipts will be allocated to sources without the United States, and under paragraph (b)(1)(ii) of this section the remaining \$20 of gross receipts will be allocated to sources within the United States.

Example 5. Additional production prior to export. The facts are the same as in *Example 1*, except that U.S. Mines also operates a smelter in country X. The concentrate output from the mill is transported to the smelter where it is transformed into smelted copper. The smelted copper is exported to purchasers in the United States. Under the facts and cir-

cumstances, all of the processes applied to make copper concentrate are considered mining. Therefore, under paragraph (b)(2) of this section, gross receipts equal to the fair market value of the concentrate at the smelter will be from sources without the United States. Under the facts and circumstances, the conversion of the concentrate into smelted copper is an additional production activity in a foreign country within the meaning of paragraph (b)(3)(ii) of this section. Therefore, the source of U.S. Mine's excess gross receipts will be determined pursuant to paragraph (b)(2) of this section.

(c) *Determination of taxable income.* The taxpayer's taxable income from sources within or without the United States will be determined under the rules of §§1.861-8 through 1.861-14T for determining taxable income from sources within the United States.

(d) *Scholarships, fellowship grants, grants, prizes and awards—(1) In general.* This paragraph (d) applies to scholarships, fellowship grants, grants, prizes and awards. The provisions of this paragraph (d) do not apply to amounts paid as salary or other compensation for services.

(2) *Source of income.* The source of income from scholarships, fellowship grants, grants, prizes and awards is determined as follows:

(i) *United States source income.* Except as provided in paragraph (d)(2)(iii) of this section, scholarships, fellowship grants, grants, prizes and awards made by a U.S. citizen or resident, a domestic partnership, a domestic corporation, an estate or trust (other than a foreign estate or trust within the meaning of section 7701(a)(31)), the United States (or an instrumentality or agency thereof), a State (or any political subdivision thereof), or the District of Columbia shall be treated as income from sources within the United States.

(ii) *Foreign source income.* Scholarships, fellowship grants, grants, prizes and awards made by a foreign government (or an instrumentality, agency, or any political subdivision thereof), an international organization (as defined in section 7701(a)(18)), or a person other than a U.S. person (as defined in section 7701(a)(30)) shall be treated as income from sources without the United States.

(iii) *Certain activities conducted outside the United States.* Scholarships, fellowship grants, targeted grants, and achievement awards received by a person other than a U.S. person (as defined in section 7701(a)(30)) with respect to activities previously conducted (in the case of achievement awards) or to be conducted (in the case of scholarships, fellowships grants, and targeted grants) outside the United States shall be treated as income from sources without the United States.

(3) *Definitions.* The following definitions apply for purposes of this paragraph (d):

(i) *Scholarships* are defined in section 117 and the regulations thereunder.

(ii) *Fellowship grants* are defined in section 117 and the regulations thereunder.

(iii) *Prizes and awards* are defined in section 74 and the regulations thereunder.

(iv) *Grants* are amounts described in subparagraph (3) of section 4945(g) and the regulations thereunder, and are not amounts otherwise described in paragraphs (d)(3) (i), (ii), or (iii) of this section. For purposes of this paragraph (d), the reference to section 4945(g)(3) is applied without regard to the identity of the payor or recipient and without the application of the objective and nondiscriminatory basis test and the requirement of a procedure approved in advance.

(v) *Targeted grants* are grants—

(A) Issued by an organization described in section 501(c)(3), the United States (or an instrumentality or agency thereof), a State (or any political subdivision thereof), or the District of Columbia; and

(B) For an activity undertaken in the public interest and not primarily for the private financial benefit of a specific person or persons or organization.

(vi) *Achievement awards* are awards—

(A) Issued by an organization described in section 501(c)(3), the United States (or an instrumentality or agency thereof), a State (or political subdivision thereof), or the District of Columbia; and

(B) For a past activity undertaken in the public interest and not primarily for the private financial benefit of a

specific person or persons or organization.

(4) *Effective dates.* The following are the effective dates concerning this paragraph (d):

(i) *Scholarships and fellowship grants.* This paragraph (d) is effective for scholarship and fellowship grant payments made after December 31, 1986. However, for scholarship and fellowship grant payments made after May 14, 1989, and before June 16, 1993, the residence of the payor rule of paragraph (d)(2) (i) and (ii) of this section may be applied without applying paragraph (d)(2)(iii) of this section.

(ii) *Grants, prizes and awards.* This paragraph (d) is effective for payments made for grants, prizes and awards, targeted grants, and achievement awards after September 25, 1995. However, the taxpayer may elect to apply the provisions of this paragraph (d) to payments made for grants, prizes and awards, targeted grants, and achievement awards after December 31, 1986, and before September 26, 1995.

(e) *Residual interest in a REMIC—(1) REMIC inducement fees.* An inducement fee (as defined in § 1.446-6(b)(2)) shall be treated as income from sources within the United States.

(2) *Excess inclusion income and net losses.* An excess inclusion (as defined in section 860E(c)) shall be treated as income from sources within the United States. To the extent of excess inclusion income previously taken into account with respect to a residual interest (reduced by net losses previously taken into account under this paragraph), a net loss (described in section 860C(b)(2)) with respect to the residual interest shall be allocated to the class of gross income and apportioned to the statutory grouping(s) or residual grouping of gross income to which the excess inclusion income was assigned.

(f) *Effective/applicability date.* Paragraph (e)(2) of this section applies for taxable years ending after August 1, 2006.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 8615, 60 FR 44275, Aug. 25, 1995; T.D. 8687, 61 FR 60545, Nov. 29, 1996; 61 FR 65323, Dec. 12, 1996; T.D. 9128, 69 FR 26041, May 11, 2004; T.D. 9272, 71 FR 43366, Aug. 1, 2006; T.D. 9415, 73 FR 40172, July 14, 2008]

§ 1.863-2 Allocation and apportionment of taxable income.

(a) *Determination of taxable income.* Section 863(b) provides an alternate method for determining taxable income from sources within the United States in the case of gross income derived from sources partly within and partly without the United States. Under this method, taxable income is determined by deducting from such gross income the expenses, losses, or other deductions properly apportioned or allocated thereto and a ratable part of any other expenses, losses, or deductions that cannot definitely be allocated to some item or class of gross income. The income to which this section applies (and that is treated as derived partly from sources within and partly from sources without the United States) will consist of gains, profits, and income

(1) From certain transportation or other services rendered partly within and partly without the United States to the extent not within the scope of section 863(c) or other specific provisions of this title;

(2) From the sale of inventory property (within the meaning of section 865(i)) produced (in whole or in part) by the taxpayer in the United States and sold outside the United States or produced (in whole or in part) by the taxpayer outside the United States and sold in the United States; or

(3) Derived from the purchase of personal property within a possession of the United States and its sale within the United States, to the extent not excluded from the scope of these regulations under § 1.936-6(a)(5),

Q&A 7.

(b) *Determination of source of taxable income.* Income treated as derived from sources partly within and partly without the United States under paragraph (a) of this section may be allocated to sources within and without the United States pursuant to § 1.863-1 or apportioned to such sources in accordance with the methods described in other regulations under section 863. To determine the source of certain types of income described in paragraph (a)(1) of this section, see § 1.863-4. To determine the source of gross income described in paragraph (a)(2) of this section, see

§ 1.863-1 for natural resources and see § 1.863-3 for other inventory. Taxpayers, at their election, may apply the principles of § 1.863-3 (b)(1) and (c) to determine the source of taxable income (rather than gross income) from sales of inventory property (other than natural resources). To determine the source of income partly from sources within a possession of the United States, including income described in paragraph (a)(3) of this section, see § 1.863-3(f).

(c) *Effective dates.* This section will apply to taxable years beginning after December 30, 1996. However, taxpayers may apply the rules of this section for taxable years beginning after July 11, 1995, and on or before December 30, 1996. For years beginning before December 30, 1996, see § 1.863-2 (as contained in 26 CFR part 1 revised as of April 1, 1996).

[T.D. 8687, 61 FR 60546, Nov. 29, 1996; 61 FR 65323, Dec. 12, 1996]

§ 1.863-3 Allocation and apportionment of income from certain sales of inventory.

(a) *In general*—(1) *Scope.* Paragraphs (a) through (e) of this section apply to determine the source of income derived from the sale of inventory property (inventory), which a taxpayer produces (in whole or in part) within the United States and sells outside the United States, or which a taxpayer produces (in whole or in part) outside the United States and sells within the United States (Section 863 Sales). To determine the source of income from sales of property produced by the taxpayer, when the property is either produced in whole or in part in space or on or under water not within the jurisdiction (as recognized by the United States) of a foreign country, possession of the United States, or the United States (in international water), or is sold in space or international water, the rules of § 1.863-8 apply, and the rules of this section do not apply except to the extent provided in § 1.863-8. A taxpayer must divide gross income from Section 863 Sales between production activity and sales activity using one of the methods described in paragraph (b) of this section. The source of gross income from

production activity and from sales activity must then be determined under paragraph (c) of this section. Taxable income from Section 863 Sales is determined under paragraph (d) of this section. Paragraph (e) of this section describes the rules for electing the methods described in paragraph (b) of this section and the information that a taxpayer must disclose on a tax return. Paragraph (f) of this section applies to determine the source of certain income derived from a possession of the United States. Paragraph (g) of this section provides special rules for partnerships for all sales subject to §§ 1.863-1 through 1.863-3. Paragraph (h) of this section provides effective dates for the rules in this section.

(2) *Rules of application for Section 863 Sales.* Once a taxpayer has elected a method described in paragraph (b) of this section, the taxpayer must separately apply that method to Section 863 Sales in the United States and to Section 863 Sales outside the United States. In addition, the taxpayer must apply the rules of paragraphs (c) and (d) of this section by aggregating all Section 863 Sales to which a method described in paragraph (b) of this section applies, after separately applying that method to Section 863 Sales in the United States and to Section 863 Sales outside the United States. See section 865(i)(1) for the definition of inventory property. See also section 865(e)(2). See § 1.861-7(c) and paragraph (c)(2) of this section for the time and place of sale.

(b) *Methods to determine income attributable to production activity and sales activity—(1) 50/50 method—(i) Determination of gross income.* Generally, gross income from Section 863 Sales will be apportioned between production activity and sales activity under the 50/50 method as described in this paragraph (b)(1). Under the 50/50 method, one-half of the taxpayer's gross income will be considered income attributable to production activity and the source of that income will be determined under the rules of paragraph (c)(1) of this section. The remaining one-half of such gross income will be considered income attributable to sales activity and the source of that income will be determined under the rules of paragraph (c)(2) of this section. In lieu of the 50/50 method, the tax-

payer may elect to determine the source of income from Section 863 Sales under the IFP method described in paragraph (b)(2) of this section or, with the consent of the District Director, the books and records method described in paragraph (b)(3) of this section.

(ii) *Example.* The following example illustrates the rules of this paragraph (b)(1):

Example. 50/50 method. (i) P, a U.S. corporation, produces widgets in the United States. P sells the widgets for \$100 to D, an unrelated foreign distributor, in another country. P's cost of goods sold is \$40. Thus, P's gross income is \$60.

(ii) Pursuant to the 50/50 method, one-half of P's gross income, or \$30, is considered income attributable to production activity, and one-half of P's gross income, or \$30, is considered income attributable to sales activity.

(2) *IFP method—(i) Establishing an IFP.* A taxpayer may elect to allocate gross income earned from production activity and sales activity using the independent factory price (IFP) method described in this paragraph (b)(2) if an IFP is fairly established. An IFP is fairly established based on a sale by the taxpayer only if the taxpayer regularly sells part of its output to wholly independent distributors or other selling concerns in such a way as to reasonably reflect the income earned from production activity. A sale will not be considered to fairly establish an IFP if sales activity by the taxpayer with respect to that sale is significant in relation to all of the activities with respect to that product.

(ii) *Applying the IFP method.* If the taxpayer elects to use the IFP method, the amount of the gross sales price equal to the IFP will be treated as attributable to production activity, and the excess of the gross sales price over the IFP will be treated as attributable to sales activity. If a taxpayer elects to use the IFP method, the IFP must be applied to all Section 863 Sales of inventory that are substantially similar in physical characteristics and function, and are sold at a similar level of distribution as the inventory sold in the sale fairly establishing an IFP. The IFP will only be applied to sales that are reasonably contemporaneous with the sale fairly establishing the IFP. An

IFP cannot be applied to sales in other geographic markets if the markets are substantially different. If the taxpayer elects the IFP method, the rules of this paragraph will also apply to determine the division of gross receipts between production activity and sales activity in a Section 863 Sale that itself fairly establishes an IFP. If the taxpayer elects to apply the IFP method, the IFP method must be applied to all sales for which an IFP may be fairly established and applied for that taxable year and each subsequent taxable year. The taxpayer will apply either the 50/50 method described in paragraph (b)(1) of this section or the books and records method described in paragraph (b)(3) of this section to any other Section 863 Sale for which an IFP cannot be established or applied for each taxable year.

(iii) *Determination of gross income.* The amount of a taxpayer's gross income from production activity is determined by reducing the amount of gross receipts from production activity by the cost of goods sold properly attributable to production activity. The amount of a taxpayer's gross income from sales activity is determined by reducing the amount of gross receipts from sales activity by the cost of goods sold (if any) properly attributable to sales activity. The source of gross income from production activity is determined under the rules of paragraph (c)(1) of this section, and the source of gross income from sales activity will be determined under the rules of paragraph (c)(2) of this section.

(iv) *Examples.* The following examples illustrate the rules of this paragraph (b)(2):

Example 1. IFP method. (i) P, a U.S. producer, purchases cotton and produces cloth in the United States. P sells cloth in country X to D, an unrelated foreign clothing manufacturer, for \$100. Cost of goods sold for cloth is \$80, entirely attributable to production activity. P does not engage in significant sales activity in relation to its other activities in the sales to D. Under these facts, the sale to D fairly establishes an IFP of \$100. Assume that P elects to use the IFP method. Accordingly, \$100 of the gross sales price is treated as attributable to production activity, and no amount of income from this sale is attributable to sales activity. After reducing the gross sales price by cost of goods sold, \$20 of the gross income is treated as attributable to production activity (\$100-\$80).

(ii) P also sells cloth in country X to A, an unrelated foreign retail outlet, for \$110. Because P elected the IFP method and the cloth is substantially similar to the cloth sold to D, the IFP fairly established in the sales to D must be used to determine the amount attributable to production activity in the sale to A. Accordingly, \$100 of the gross sales price is treated as attributable to production activity and \$10 (\$110-\$100) is attributable to sales activity. After reducing the gross sales price by cost of goods sold, \$20 of the gross income is treated as attributable to production activity (\$100-\$80) and \$10 is attributable to sales activity.

Example 2. Scope of IFP Method. (i) USCo manufactures three dissimilar products. USCo elects to apply the IFP method. In year 1, an IFP can be established for sales of product X, but not for products Y and Z. In year 2, an IFP cannot be established for any of USCo's products. In year 3, an IFP can be established for products X and Y, but not for product Z.

(ii) In year 1, USCo must apply the IFP method to sales of product X. In year 2, although USCo's IFP election remains in effect, USCo is not required to apply the IFP election to any products. In year 3, USCo is required to apply the IFP method to sales of products X and Y.

(3) *Books and records method.* A taxpayer may elect to determine the amount of its gross income from Section 863 Sales that is attributable to production and sales activities for the taxable year based upon its books of account if it has received in advance the permission of the District Director having audit responsibility over its tax return. The taxpayer must establish to the satisfaction of the District Director that the taxpayer, in good faith and unaffected by considerations of tax liability, will regularly employ in its books of account a detailed allocation of receipts and expenditures which clearly reflects the amount of the taxpayer's income from production and sales activities. If a taxpayer receives permission to apply the books and records method, but does not comply with a material condition set forth by the District Director, the District Director may, in its discretion, revoke permission to use the books and records method. The source of gross income treated as attributable to production activity under this method may be determined under the rules of paragraph (c)(1) of this section, and the source of gross income attributable to

sales activity will be determined under the rules of paragraph (c)(2) of this section.

(c) *Determination of the source of gross income from production activity and sales activity*—(1) *Income attributable to production activity*—(i) *Production only within the United States or only within foreign countries*—(A) *Source of income*. For purposes of this section, production activity means an activity that creates, fabricates, manufactures, extracts, processes, cures, or ages inventory. See § 1.864-1. Subject to the provisions in § 1.1502-13 or paragraph (g)(2)(ii) of this section, the only production activities that are taken into account for purposes of §§ 1.863-1, 1.863-2, and this section are those conducted directly by the taxpayer. Where the taxpayer's production assets are located only within the United States or only outside the United States, the income attributable to production activity is sourced where the taxpayer's production assets are located. For rules regarding the source of income when production assets are located both within the United States and without the United States, see paragraph (c)(1)(ii) of this section. For rules regarding the source of income when production takes place, in whole or in part, in space or international water, the rules of § 1.863-8 apply, and the rules of this section do not apply except to the extent provided in § 1.863-8.

(B) *Definition of production assets*. Subject to the provisions of § 1.1502-13 and paragraph (g)(2)(ii) of this section, production assets include only tangible and intangible assets owned directly by the taxpayer that are directly used by the taxpayer to produce inventory described in paragraph (a) of this section. Production assets do not include assets that are not directly used to produce inventory described in paragraph (a) of this section. Thus, production assets do not include such assets as accounts receivables, intangibles not related to production of inventory (e.g., marketing intangibles, including trademarks and customer lists), transportation assets, warehouses, the inventory itself, raw materials, or work-in-process. In addition, production assets do not include cash or other liquid assets (including working capital), in-

vestment assets, prepaid expenses, or stock of a subsidiary.

(C) *Location of production assets*. For purposes of this section, a tangible production asset will be considered located where the asset is physically located. An intangible production asset will be considered located where the tangible production assets owned by the taxpayer to which it relates are located.

(ii) *Production both within the United States and within foreign countries*—(A) *Source of income*. Where the taxpayer's production assets are located both within and without the United States, income from sources without the United States will be determined by multiplying the income attributable to the taxpayer's production activity by a fraction, the numerator of which is the average adjusted basis of production assets that are located outside the United States and the denominator of which is the average adjusted basis of all production assets within and without the United States. The remaining income is treated as from sources within the United States.

(B) *Adjusted basis of production assets*. For purposes of paragraph (c)(1)(ii)(A) of this section, the adjusted basis of an asset is determined under section 1011. The average adjusted basis is computed by averaging the adjusted basis of the asset at the beginning and end of the taxable year, unless by reason of material changes during the taxable year such average does not fairly represent the average for such year. In this event, the average adjusted basis will be determined upon a more appropriate basis. If production assets are used to produce inventory sold in Section 863 Sales and are also used to produce other property during the taxable year, the portion of its adjusted basis that is included in the fraction described in paragraph (c)(1)(ii)(A) of this section will be determined under any method that reasonably reflects the portion of the assets that produces inventory sold in Section 863 Sales. For example, the portion of such an asset that is included in the formula may be determined by multiplying the asset's average adjusted basis by a fraction, the numerator of which is the gross receipts from sales of inventory from

Section 863 Sales produced by the asset, and the denominator of which is the gross receipts from all property produced by that asset.

(iii) *Anti-abuse rule.* The purpose of this paragraph (c)(1) is to attribute the source of the taxpayer's production income to the location of the taxpayer's production activity. Therefore, if the taxpayer has entered into or structured one or more transactions with a principal purpose of reducing its U.S. tax liability by manipulating the formula described in paragraph (c)(1)(ii)(A) of this section in a manner inconsistent with the purpose of this paragraph (c)(1), the District Director may make appropriate adjustments so that the source of the taxpayer's income from production activity more clearly reflects the source of that income.

(iv) *Examples.* The following examples illustrate the rules of this paragraph (c)(1):

Example 1. Source of production income. (i) A, a U.S. corporation, produces widgets that are sold both within the United States and within a foreign country. The initial manufacture of all widgets occurs in the United States. The second stage of production of widgets that are sold within a foreign country is completed within the country of sale. A's U.S. plant and machinery which is involved in the initial manufacture of the widgets has an average adjusted basis of \$200. A also owns warehouses used to store work-in-process. A owns foreign equipment with an average adjusted basis of \$25. A's gross receipts from all sales of widgets is \$100, and its gross receipts from export sales of widgets is \$25. Assume that apportioning average adjusted basis using gross receipts is reasonable. Assume A's cost of goods sold from the sale of widgets in the foreign countries is \$13 and thus, its gross income from widgets sold in foreign countries is \$12. A uses the 50/50 method to divide its gross income between production activity and sales activity.

(ii) A determines its production gross income from sources without the United States by multiplying one-half of A's \$12 of gross income from sales of widgets in foreign countries, or \$6, by a fraction, the numerator of which is all relevant foreign production assets, or \$25, and the denominator of which is all relevant production assets, or \$75 (\$25 foreign assets + (\$200 U.S. assets × \$25 gross receipts from export sales/\$100 gross receipts from all sales)). Therefore, A's gross production income from sources without the United States is \$2 ($\$6 \times (\$25/\$75)$).

Example 2. Location of intangible property. Assume the same facts as *Example 1*, except

that A employs a patented process that applies only to the initial production of widgets. In computing the formula used to determine the source of income from production activity, A's patent, if it has an average adjusted basis, would be located in the United States.

Example 3. Anti-abuse rule. (i) Assume the same facts as *Example 1*. A sells its U.S. assets to B, an unrelated U.S. corporation, with a principal purpose of reducing its U.S. tax liability by manipulating the property fraction. A then leases these assets from B. After this transaction, under the general rule of paragraph (c)(1)(ii) of this section, all of A's production income would be considered from sources without the United States, because all of A's relevant production assets are located within a foreign country. Since the leased property is not owned by the taxpayer, it is not included in the fraction.

(ii) Because A has entered into a transaction with a principal purpose of reducing its U.S. tax liability by manipulating the formula described in paragraph (c)(1)(ii)(A) of this section, A's income must be adjusted to more clearly reflect the source of that income. In this case, the District Director may redetermine the source of A's production income by ignoring the sale-leaseback transactions.

(2) *Income attributable to sales activity.* The source of the taxpayer's income that is attributable to sales activity will be determined under the provisions of §1.861-7(c). Notwithstanding any other provision, for rules regarding the source of income when a sale takes place in space or international water, the rules of §1.863-8 apply, and the rules of this section do not apply except to the extent provided in §1.863-8. However, notwithstanding any other provision, for purposes of section 863, the place of sale will be presumed to be the United States if personal property is wholly produced in the United States and the property is sold for use, consumption, or disposition in the United States. See §1.864-6(b)(3)(ii) to determine the country of use, consumption, or disposition. Also, in applying this paragraph, property will be treated as wholly produced in the United States if it is subject to no more than packaging, repackaging, labeling, or other minor assembly operations outside the United States, within the meaning of §1.954-3(a)(4)(iii) (property manufactured or produced by a controlled foreign corporation). Notwithstanding any other provision, for rules regarding

the source of income when a sale takes place in space or international water, the rules of § 1.863-8 apply, and the rules of this section do not apply except to the extent provided in § 1.863-8.

(d) *Determination of source of taxable income.* Once the source of gross income has been determined under paragraph (c) of this section, the taxpayer must properly allocate and apportion separately under §§ 1.861-8 through 1.861-14T the amounts of its expenses, losses, and other deductions to its respective amounts of gross income from Section 863 Sales determined separately under each method described in paragraph (b) of this section. In addition, if the taxpayer deducts expenses for research and development under section 174 that may be attributed to its Section 863 Sales under § 1.861-8(e)(3), the taxpayer must separately allocate or apportion expenses, losses, and other deductions to its respective amounts of gross income from each relevant product category that the taxpayer uses in applying the rules of § 1.861-8(e)(3)(i)(A). In the case of gross income from Section 863 Sales determined under the IFP method or the books and records method, the rules of §§ 1.861-8 through 1.861-14T must apply to properly allocate or apportion amounts of expenses, losses and other deductions allocated and apportioned to such gross income between gross income from sources within and without the United States. In the case of gross income from Section 863 Sales determined under the 50/50 method, the amounts of expenses, losses, and other deductions allocated and apportioned to such gross income must be apportioned between sources within and without the United States pro rata based on the relative amounts of gross income from sources within and without the United States determined under the 50/50 method. Research and experimental expenditures qualifying under § 1.861-17 are allocated under that section, and are not allocated and apportioned pro rata under the 50/50 method.

(e) *Election and reporting rules—(1) Elections under paragraph (b) of this section.* If a taxpayer does not elect a method specified in paragraph (b) (2) or (3) of this section, the taxpayer must apply the method specified in para-

graph (b)(1) of this section. The taxpayer may elect to apply the method specified in paragraph (b)(2) of this section by using the method on a timely filed original return (including extensions). A taxpayer may elect to apply the method specified in paragraph (b)(3) of this section by using the method on a timely filed original return (including extensions), but only if the taxpayer has received permission from the District Director to apply that method. Once a method under paragraph (b) of this section has been used, that method must be used in later taxable years unless the Commissioner consents to a change. However, if a taxpayer elects to change to or from the method specified in paragraph (b)(3) of this section, the taxpayer must obtain permission from the District Director instead of the Commissioner. Permission to change methods from one year to another year will not be withheld unless the change would result in a substantial distortion of the source of the taxpayer's income.

(2) *Disclosure on tax return.* A taxpayer who uses one of the methods described in paragraph (b) of this section must fully explain in a statement attached to the return the methodology used, the circumstances justifying use of that methodology, the extent that sales are aggregated, and the amount of income so allocated.

(f) *Income partly from sources within a possession of the United States—(1) In general.* This paragraph (f) relates to gains, profits, and income, which are treated as derived partly from sources within the United States and partly from sources within a possession of the United States (Section 863 Possession Sales). This paragraph (f) applies to determine the source of income derived from the sale of inventory produced (in whole or in part) by the taxpayer within the United States and sold within a possession, or produced (in whole or in part) by a taxpayer in a possession and sold within the United States (Possession Production Sales). It also applies to determine the source of income derived from the purchase of personal property within a possession of the United States and its sale within the United States (Possession Purchase

Sales). A taxpayer subject to this paragraph (f) must divide gross income from Section 863 Possession Sales using one of the methods described in either paragraph (f)(2)(i) of this section (in the case of Possession Production Sales) or paragraph (f)(3)(i) of this section (in the case of Possession Purchase Sales). Once a taxpayer has elected a method, the taxpayer must separately apply that method to the applicable category of Section 863 Possession Sales in the United States and to those in a possession. The source of gross income from each type of activity must then be determined under either paragraph (f)(2)(ii) or (3)(ii) of this section, as appropriate. The source of taxable income from Section 863 Possession Sales is determined under paragraph (f)(4) of this section. The taxpayer must apply the rules for computing gross and taxable income by aggregating all Section 863 Possession Sales to which a method in this section applies after separately applying that method to Section 863 Possession Sales in the United States and to Section 863 Possession Sales in a possession. This section does not apply to determine the source of a taxpayer's gross income derived from a sale of inventory purchased from a corporation that has an election in effect under section 936, if the taxpayer's income from sales of that inventory is taken into account to determine benefits under section 936 for the section 936 corporation. For rules to be applied to determine the source of such income, see § 1.936-6(a)(5) Q&A 7a and 1.936-6(b)(1) Q&A 13.

(2) *Allocation or apportionment for Possession Production Sales*—(i) *Methods for determining the source of gross income for Possession Production Sales*—(A) *Possession 50/50 method*. Under the possession 50/50 method, gross income from Possession Production Sales is allocated between production activity and business sales activity as described in this paragraph (f)(2)(i)(A). Under the possession 50/50 method, one-half of the taxpayer's gross income will be considered income attributable to production activity and the source of that income will be determined under the rules of paragraph (f)(2)(ii)(A) of this section. The remaining one-half of such gross income will be considered income at-

tributable to business sales activity and the source of that income will be determined under the rules of paragraph (f)(2)(ii)(B) of this section.

(B) *IFP method*. In lieu of the possession 50/50 method, a taxpayer may elect the independent factory price (IFP) method. Under the IFP method, gross income from Possession Production Sales is allocated to production activity or sales activity using the IFP method, as described in paragraph (b)(2) of this section, if an IFP is fairly established under the rules of paragraph (b)(2) of this section. See paragraphs (f)(2)(ii)(A) and (C) of this section for rules for determining the source of gross income attributable to production activity and sales activity.

(C) *Books and records method*. A taxpayer may elect to allocate gross income using the books and records method described in paragraph (b)(3) of this section, if it has received in advance the permission of the District Director having audit responsibility over its return. See paragraph (f)(2)(ii) of this section for rules for determining the source of gross income.

(ii) *Determination of source of gross income from production, business sales, and sales activity*—(A) *Gross income attributable to production activity*. The source of gross income from production activity is determined under the rules of paragraph (c)(1) of this section, except that the term possession is substituted for foreign country wherever it appears.

(B) *Gross income attributable to business sales activity*—(1) *Source of gross income*. Gross income from the taxpayer's business sales activity is sourced in the possession in the same proportion that the amount of the taxpayer's business sales activity for the taxable year within the possession bears to the amount of the taxpayer's business sales activity for the taxable year both within the possession and outside the possession, with respect to Possession Production Sales. The remaining income is sourced in the United States.

(2) *Business sales activity*. For purposes of this paragraph (f)(2)(ii)(B), the taxpayer's business sales activity is equal to the sum of—

(i) The amounts for the taxable period paid for wages, salaries, and other

compensation of employees, and other expenses attributable to Possession Production Sales (other than amounts that are nondeductible under section 263A, interest, and research and development); and

(ii) Possession Production Sales for the taxable period.

(3) *Location of business sales activity.* For purposes of determining the location of the taxpayer's business activity within a possession, the following rules apply:

(i) *Sales.* Receipts from gross sales will be attributed to a possession under the provisions of paragraph (c)(2) of this section.

(ii) *Expenses.* Expenses will be attributed to a possession under the rules of §§ 1.861-8 through 1.861-14T.

(C) *Gross income attributable to sales activity.* The source of the taxpayer's income that is attributable to sales activity, as determined under the IFP method or the books and records method, will be determined under the provisions of paragraph (c)(2) of this section.

(3) *Allocation or apportionment for Possession Purchase Sales—(i) Methods for determining the source of gross income for Possession Purchase Sales—(A) Business activity method.* Gross income from Possession Purchase Sales is allocated in its entirety to the taxpayer's business activity, and is then apportioned between U.S. and possession sources under paragraph (f)(3)(ii) of this section.

(B) *Books and records method.* A taxpayer may elect to allocate gross income using the books and records method described in paragraph (b)(3) of this section, subject to the conditions set forth in paragraph (b)(3) of this section. See paragraph (f)(2)(ii) of this section for rules for determining the source of gross income.

(ii) *Determination of source of gross income from business activity—(A) Source of gross income.* Gross income from the taxpayer's business activity is sourced in the possession in the same proportion that the amount of the taxpayer's business activity for the taxable year within the possession bears to the amount of the taxpayer's business activity for the taxable year both within the possession and outside the possession, with respect to Possession Pur-

chase Sales. The remaining income is sourced in the United States.

(B) *Business activity.* For purposes of this paragraph (f)(3)(ii), the taxpayer's business activity is equal to the sum of—

(1) The amounts for the taxable period paid for wages, salaries, and other compensation of employees, and other expenses attributable to Possession Purchase Sales (other than amounts that are nondeductible under section 263A, interest, and research and development);

(2) Cost of goods sold attributable to Possession Purchase Sales during the taxable period; and

(3) Possession Purchase Sales for the taxable period.

(C) *Location of business activity.* For purposes of determining the location of the taxpayer's business activity within a possession, the following rules apply:

(1) *Sales.* Receipts from gross sales will be attributed to a possession under the provisions of paragraph (c)(2) of this section.

(2) *Cost of goods sold.* Payments for cost of goods sold will be properly attributable to gross receipts from sources within the possession only to the extent that the property purchased was manufactured, produced, grown, or extracted in the possession (within the meaning of section 954(d)(1)(A)).

(3) *Expenses.* Expenses will be attributed to a possession under the rules of §§ 1.861-8 through 1.861-14T.

(iii) *Examples.* The following examples illustrate the rules of paragraph (f)(3)(ii) of this section relating to the determination of source of gross income from business activity:

Example 1. (i) U.S. Co. purchases in a possession product X for \$80 from A. A manufactures X in the possession. Without further production, U.S. Co. sells X in the United States for \$100. Assume U.S. Co. has sales and administrative expenses in the possession of \$10.

(ii) To determine the source of U.S. Co.'s gross income, the \$100 gross income from sales of X is allocated entirely to U.S. Co.'s business activity. Forty-seven dollars of U.S. Co.'s gross income is sourced in the possession. [Possession expenses (\$10) plus possession purchases (i.e., cost of goods sold) (\$80) plus possessions sales (\$0), divided by total expenses (\$10) plus total purchases (\$80) plus total sales (\$100).] The remaining \$53 is sourced in the United States.

Example 2. (i) Assume the same facts as in *Example 1*, except that A manufactures X outside the possession.

(ii) To determine the source of U.S. Co.'s gross income, the \$100 gross income is allocated entirely to U.S. Co.'s business activity. Five dollars of U.S. Co.'s gross income is sourced in the possession. [Possession expenses (\$10) plus possession purchases (\$0) plus possession sales (\$0), divided by total expenses (\$10) plus total purchases (\$80) plus total sales (\$100).] The \$80 purchase is not included in the numerator used to determine U.S. Co.'s business activity in the possession, since product X was not manufactured in the possession. The remaining \$95 is sourced in the United States.

(4) *Determination of source of taxable income.* Once the source of gross income has been determined under paragraph (f)(2) or (3) of this section, the taxpayer must properly allocate and apportion separately under §§1.861-8 through 1.861-14T the amounts of its expenses, losses, and other deductions to its respective amounts of gross income from Section 863 Possession Sales determined separately under each method described in paragraph (f)(2) or (3) of this section. In addition, if the taxpayer deducts expenses for research and development under section 174 that may be attributed to its Section 863 Possession Sales under §1.861-17, the taxpayer must separately allocate or apportion expenses, losses, and other deductions to its respective amounts of gross income from each relevant product category that the taxpayer uses in applying the rules of §1.861-17. Thus, in the case of gross income from Section 863 Possession Sales determined under the IFP method or books and records method, a taxpayer must apply the rules of §§1.861-8 through 1.861-14T to properly allocate or apportion amounts of expenses, losses and other deductions, allocated and apportioned to such gross income, between gross income from sources within and without the United States. However, in the case of gross income from Possession Production Sales determined under the possessions 50/50 method or gross income from Possession Purchase Sales computed under the business activity method, the amounts of expenses, losses, and other deductions allocated and apportioned to such gross income must be apportioned between sources within and without the United States

pro rata based on the relative amounts of gross income from sources within and without the United States determined under those methods, except that the rules regarding the allocation and apportionment of research and experimental expenditures in §1.861-17 shall apply to such expenditures of taxpayers using the 50/50 method.

(5) *Special rules for partnerships.* In applying the rules of this paragraph (f) to transactions involving partners and partnerships, the rules of paragraph (g) of this section apply.

(6) *Election and reporting rules—(i) Elections under paragraph (f)(2) or (3) of this section.* If a taxpayer does not elect one of the methods specified in paragraph (f)(2) or (3) of this section, the taxpayer must apply the possession 50/50 method in the case of Possession Production Sales or the business activity method in the case of Possession Purchase Sales. The taxpayer may elect to apply a method specified in either paragraph (f)(2) or (3) of this section by using the method on a timely filed original return (including extensions). Once a method has been used, that method must be used in later taxable years unless the Commissioner consents to a change. Permission to change methods from one year to another year will be granted unless the change would result in a substantial distortion of the source of the taxpayer's income.

(ii) *Disclosure on tax return.* A taxpayer who uses one of the methods described in paragraph (f)(2) or (3) of this section must fully explain in a statement attached to the tax return the methodology used, the circumstances justifying use of that methodology, the extent that sales are aggregated, and the amount of income so allocated.

(g) *Special rules for partnerships—(1) General rule.* For purposes of §1.863-1 and this section, a taxpayer's production or sales activity does not include production and sales activities conducted by a partnership of which the taxpayer is a partner either directly or through one or more partnerships, except as otherwise provided in paragraph (g)(2) of this section.

(2) *Exceptions—(i) In general.* For purposes of determining the source of the

partner's distributive share of partnership income or determining the source of the partner's income from the sale of inventory property which the partnership distributes to the partner in kind, the partner's production or sales activity includes an activity conducted by the partnership. In addition, the production activity of a partnership includes the production activity of a taxpayer that is a partner either directly or through one or more partnerships, to the extent that the partner's production activity is related to inventory that the partner contributes to the partnership in a transaction described under section 721.

(ii) *Attribution of production assets to or from a partnership.* A partner will be treated as owning its proportionate share of the partnership's production assets only to the extent that, under paragraph (g)(2)(i) of this section, the partner's activity includes production activity conducted through a partnership. A partner's share of partnership assets will be determined by reference to the partner's distributive share of partnership income for the year attributable to such production assets. Similarly, to the extent a partnership's activities include the production activities of a partner, the partnership will be treated as owning the partner's production assets related to the inventory that is contributed in kind to the partnership. See paragraph (c)(1)(ii)(B) of this section for rules apportioning the basis of assets to Section 863 Sales.

(iii) *Basis.* For purposes of this section, in those cases where the partner is treated as owning its proportionate share of the partnership's production assets, the partner's basis in production assets held through a partnership shall be determined by reference to the partnership's adjusted basis in its assets (including a partner's special basis adjustment, if any, under section 743). Similarly, a partnership's basis in a partner's production assets is determined with reference to the partner's adjusted basis in its assets.

(iv) *Separate application of methods.* If, under paragraph (g)(2) of this section, a partner is treated as conducting the activity of a partnership, and is treated as owning its proportionate share of a partnership's production assets, a part-

ner must apply the method it has elected under paragraph (b) of this section separately to Section 863 Sales described in this paragraph (g) and all other Section 863 Sales.

(3) *Examples.* The following examples illustrate the rules of this paragraph (g):

Example 1. Distributive share of partnership income. A, a U.S. corporation, forms a partnership in the United States with B, a country X corporation. A and B each have a 50 percent interest in the income, gains, losses, deductions and credits of the partnership. The partnership is engaged in the manufacture and sale of widgets. The widgets are manufactured in the partnership's plant located in the United States and are sold by the partnership outside the United States. The partnership owns the manufacturing facility and all other production assets used to produce the widgets. A's distributive share of partnership income includes 50 percent of the sales income from these sales. In applying the rules of section 863 to determine the source of its distributive share of partnership income from the export sales of widgets, A is treated as carrying on the activity of the partnership related to production of these widgets and as owning a proportionate share of the partnership's assets related to production of the widgets, based upon its distributive share of partnership income.

Example 2. Distribution in kind. Assume the same facts as in *Example 1* except that the partnership, instead of selling the widgets, distributes the widgets to A and B. A then further processes the widgets and then sells them outside the United States. In determining the source of the income earned by A on the sales outside the United States, A is treated as conducting the activities of the partnership related to production of the distributed widgets. Thus, the source of gross income on the sale of the widgets is determined under section 863 and these regulations. A applies the 50/50 method described in paragraph (b)(1) of this section to determine the source of income from the sales. In applying paragraph (c)(1) of this section, A is treated as owning its proportionate share of the partnership's production assets based upon its distributive share of partnership income.

(h) *Effective dates.* The rules of this section apply to taxable years beginning after December 30, 1996. However, taxpayers may apply these regulations for taxable years beginning after July 11, 1995, and on or before December 30, 1996. For years beginning before December 30, 1996, see §§ 1.863-3A and

1.863-3AT. However, the rules of paragraph (f) of this section apply to taxable years beginning on or after November 13, 1998.

[T.D. 8687, 61 FR 60547, Nov. 29, 1996; 61 FR 65323, Dec. 12, 1996, as amended by T.D. 8786, 63 FR 55023, Oct. 14, 1998; T.D. 9305, 71 FR 77603, Dec. 27, 2006]

REGULATIONS APPLICABLE TO TAXABLE
YEARS PRIOR TO DECEMBER 30, 1996

§ 1.863-3A Income from the sale of personal property derived partly from within and partly from without the United States.

(a) *General*—(1) *Classes of income*. Income from the sale of property to which paragraph (b) (2) and (3) of § 1.863-2 applies is divided into two classes for purposes of this section, namely, income which is treated as derived partly from sources within the United States and partly from sources within a foreign country, and income which is treated as derived partly from sources within the United States and partly from sources within a possession of the United States.

(2) *Definition*. For purposes of this section, the word “produced” includes created, fabricated, manufactured, extracted, processed, cured, or aged. For determining the time and place of sale of personal property for purposes of this section, see paragraph (c) of § 1.861-7.

(b) *Income partly from sources within a foreign country*—(1) *General*. This paragraph relates to gains, profits, and income derived from the sale of personal property produced (in whole or in part) by the taxpayer within the United States and sold within a foreign country, or produced (in whole or in part) by the taxpayer within a foreign country and sold within the United States. Pursuant to section 863(b) such items shall be treated as derived partly from sources within the United States and partly from sources within a foreign country.

(2) *Allocation or apportionment*. The taxable income from sources within the United States, in the case of the items to which this paragraph applies, shall be determined according to the examples set forth in this subparagraph. For such purposes, the deductions for the personal exemptions shall not be taken

into account, but the special deductions described in paragraph (c) of § 1.861-8 shall be taken into account.

Example 1. Where the manufacturer or producer regularly sells part of his output to wholly independent distributors or other selling concerns in such a way as to establish fairly an independent factory or production price—or shows to the satisfaction of the district director (or, if applicable, the Director of International Operations) that such an independent factory or production price has been otherwise established—unaffected by considerations of tax liability and the selling or distributing branch or department of the business is located in a different country from that in which the factory is located or the production carried on, the taxable income attributable to sources within the United States shall be computed by an accounting which treats the products as sold by the factory or productive department of the business to the distributing or selling department at the independent factory price so established. In all such cases the basis of the accounting shall be fully explained in a statement attached to the return for the taxable year.

Example 2. (i)–(ii) [Reserved]. For guidance, see § 863-3T(b)(2) *Example (2)*(i) and (ii).

(iii) The term “gross sales”, as used in this example, refers only to the sales of personal property produced (in whole or in part) by the taxpayer within the United States and sold within a foreign country or produced (in whole or in part) by the taxpayer within a foreign country and sold within the United States.

(iv) The term “property”, as used in this example, includes only the property held or used to produce income which is derived from such sales. Such property should be taken at its actual value, which in the case of property valued or appraised for purposes of inventory, depreciation, depletion, or other purposes of taxation shall be the highest amount at which so valued or appraised, and which in other cases shall be deemed to be its book value in the absence of affirmative evidence showing such value to be greater or less than the actual value. The average value during the taxable year or period shall be employed. The average value of property as above prescribed at the beginning and end of the taxable year or period ordinarily may be used, unless by reason of material changes during the taxable year or period such average does not fairly represent the average for such year or period, in which event the average shall be determined upon a monthly or daily basis.

(v) Bills and accounts receivable shall (unless satisfactory reason for a different treatment is shown) be assigned or allocated to the United States when the debtor resides in the United States, unless the taxpayer has

no office, branch, or agent in the United States.

Example 3. Application for permission to base the return upon the taxpayer's books of account will be considered by the district director (or, if applicable, the Director of International Operations) in the case of any taxpayer who, in good faith and unaffected by considerations of tax liability, regularly employs in his books of account a detailed allocation of receipts and expenditures which reflects more clearly than the processes or formulas herein prescribed the taxable income derived from sources within the United States.

(c) *Income partly from sources within a possession of the United States—(1) General.* This paragraph relates to gains, profits, and income which, pursuant to section 863(b), are treated as derived partly from sources within the United States and partly from sources within a possession of the United States. The items so treated are described in subparagraphs (3) and (4) of this paragraph.

(2) *Allocation or apportionment.* The taxable income from sources within the United States, in the case of the items to which this paragraph applies, shall be determined according to the examples set forth in subparagraphs (3) and (4) of this paragraph. For such purposes, the deductions for the personal exemptions shall not be taken into account, but the special deductions described in paragraph (c) of § 1.861-8 shall be taken into account.

(3) *Personal property produced and sold.* This subparagraph relates to gross income derived from the sale of personal property produced (in whole or in part) by the taxpayer within the United States and sold within a possession of the United States, or produced (in whole or in part) by the taxpayer within a possession of the United States and sold within the United States.

Example 1. Same as example 1 under paragraph (b)(2) of this section.

Example 2. (i) Where an independent factory or production price has not been established as provided under example 1, the taxable income shall first be computed by deducting from the gross income derived from the sale of personal property produced (in whole or in part) by the taxpayer within the United States and sold within a possession of the United States, or produced (in whole or in part) by the taxpayer within a possession

of the United States and sold within the United States, the expenses, losses, or other deductions properly allocated and apportioned thereto in accordance with the rules set forth in § 1.861-8.

(ii) Of the amount of taxable income so determined, one-half shall be apportioned in accordance with the value of the taxpayer's property within the United States and within the possession of the United States, the portion attributable to sources within the United States being determined by multiplying such one-half by a fraction the numerator of which consists of the value of the taxpayer's property within the United States, and the denominator of which consists of the value of the taxpayer's property both within the United States and within the possession of the United States. The remaining one-half of such taxable income shall be apportioned in accordance with the total business of the taxpayer within the United States and within the possession of the United States, the portion attributable to sources within the United States being determined by multiplying such one-half by a fraction the numerator of which consists of the amount of the taxpayer's business for the taxable year or period within the United States, and the denominator of which consists of the amount of the taxpayer's business for the taxable year or period both within the United States and within the possession of the United States.

(iii) "The business of the taxpayer", as used in this example, shall be measured by the amounts which the taxpayer paid out during the taxable year or period for wages, salaries, and other compensation of employees and for the purchase of goods, materials, and supplies consumed in the regular course of business, plus the amounts received during the taxable year or period from gross sales, such expenses, purchases, and gross sales being limited to those attributable to the production (in whole or in part) of personal property within the United States and its sale within a possession of the United States or to the production (in whole or in part) of personal property within a possession of the United States and its sale within the United States. The term "property", as used in this example, includes only the property held or used to produce income which is derived from such sales.

Example 3. Same as example 3 under paragraph (b)(2) of this section.

(4) *Personal property purchased and sold.* This subparagraph relates to gross income derived from the purchase of personal property within a possession of the United States and its sale within the United States.

Example 1. (i) The taxable income shall first be computed by deducting from such

gross income the expenses, losses, or other deductions properly allocated or apportioned thereto in accordance with the rules set forth in §1.861-8.

(ii) The amount of taxable income so determined shall be apportioned in accordance with the total business of the taxpayer within the United States and within the possession of the United States, the portion attributable to sources within the United States being that percentage of such taxable income which the amount of the taxpayer's business for the taxable year or period within the United States bears to the amount of the taxpayer's business for the taxable year or period both within the United States and within the possession of the United States.

(iii) The "business of the taxpayer", as that term is used in this example, shall be measured by the amounts which the taxpayer paid out during the taxable year or period for wages, salaries, and other compensation of employees and for the purchase of goods, materials, and supplies sold or consumed in the regular course of business, plus the amount received during the taxable year or period from gross sales, such expenses, purchases, and gross sales being limited to those attributable to the purchase of personal property within a possession of the United States and its sale within the United States.

Example 2. Same as example 3 under paragraph (b)(2) of this section.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7456, 42 FR 1214, Jan. 6, 1977; T.D. 8228, 53 FR 35506, Sept. 14, 1988. Redesignated by T.D. 8687, 61 FR 60545, Nov. 29, 1996]

§ 1.863-3AT Income from the sale of personal property derived partly from within and partly from without the United States (temporary regulations).

(a) [Reserved]

(b) *Income partly from sources within a foreign country.* (1) [Reserved]

(2) *Allocation or apportionment.*

Example 1. [Reserved]

Example 2. (i) Where an independent factory or production price has not been established as provided under *Example 1*, the gross income derived from the sale of personal property produced (in whole or in part) by the taxpayer within the United States and sold within a foreign country or produced (in whole or in part) by the taxpayer within a foreign country and sold within the United States shall be computed.

(ii) Of this gross amount, one-half shall be apportioned in accordance with the value of the taxpayer's property within the United States and within the foreign country, the portion attributable to sources within the United States being determined by multi-

plying such one-half by a fraction, the numerator of which consists of the value of the taxpayer's property within the United States and the denominator of which consists of the value of the taxpayer's property both within the United States and within the foreign country. The remaining one-half of such gross income shall be apportioned in accordance with the gross sales of the taxpayer within the United States and within the foreign country, the portion attributable to sources within the United States being determined by multiplying such one-half by a fraction the numerator of which consists of the taxpayer's gross sales for the taxable year or period within the United States, and the denominator of which consists of the taxpayer's gross sales for the taxable year or period both within the United States and within the foreign country. Deductions from gross income that are allocable and apportionable to gross income described in paragraph (i) of this *Example 2* shall be apportioned between the United States and foreign source portions of such income, as determined under this paragraph (ii), on a pro rata basis, without regard to whether the deduction relates primarily or exclusively to the production of property or to the sale of property.

(b)(2) *Example 2*(iii) through (c)(4) [Reserved]

[T.D. 8228, 53 FR 35506, Sept. 14, 1988. Redesignated by T.D. 8687, 61 FR 60545, Nov. 29, 1996]

§ 1.863-4 Certain transportation services.

(a) *General.* A taxpayer carrying on the business of transportation service (other than an activity giving rise to transportation income described in section 863(c) or to income subject to other specific provisions of this title) between points in the United States and points outside the United States derives income partly from sources within and partly from sources without the United States.

(b) *Gross income.* The gross income from sources within the United States derived from such services shall be determined by taking such a portion of the total gross revenues therefrom as (1) the sum of the costs or expenses of such transportation business carried on by the taxpayer within the United States and a reasonable return upon the property used in its transportation business while within the United States bears to (2) the sum of the total

costs or expenses of such transportation business carried on by the taxpayer and a reasonable return upon the total property used in such transportation business. Revenues from operations incidental to transportation services, such as the sale of money orders, shall be apportioned on the same basis as direct revenues from transportation services.

(c) *Allocation of costs or expenses.* In allocating the total costs or expenses incurred in such transportation business, costs or expenses incurred in connection with that part of the services which was wholly rendered in the United States shall be assigned to the cost of transportation business within the United States. For example, expenses of loading and unloading in the United States, rentals, office expenses, salaries, and wages wholly incurred for services rendered to the taxpayer in the United States belong to this class. Costs and expenses incurred in connection with services rendered partly within and partly without the United States may be prorated on a reasonable basis between such services. For example, ship wages, charter money, insurance, and supplies chargeable to voyage expenses shall ordinarily be prorated for each voyage on the basis of the proportion which the number of days the ship was within the territorial limits of the United States bears to the total number of days on the voyage; and fuel consumed on each voyage may be prorated on the basis of the proportion which the number of miles sailed within the territorial limits of the United States bears to the total number of miles sailed on the voyage. For other expenses entering into the cost of services, only such expenses as are allowable deductions under the internal revenue laws shall be taken into account.

(d) *Items not included as costs or expenses—(1) Taxes and interest.* Income, war profits, and excess profits taxes shall not be regarded as costs or expenses for the purpose of determining the proportion of gross income from sources within the United States; and, for such purpose, interest and other expenses for the use of borrowed capital shall not be taken into the cost of services rendered, for the reason that the

return upon the property used measures the extent to which such borrowed capital is the source of the income. See paragraph (f)(2) of this section.

(2) *Other business activity and general expenses.* If a taxpayer subject to this section is also engaged in a business other than that of providing transportation service between points in the United States and points outside the United States, the costs and expenses, including taxes, properly apportioned or allocated to such other business shall be excluded both from the deductions and from the apportionment process prescribed in paragraph (c) of this section; but, for the purpose of determining taxable income, a ratable part of any general expenses, losses, or deductions, which cannot definitely be allocated to some item or class of gross income, may be deducted from the gross income from sources within the United States after the amount of such gross income has been determined. Such ratable part shall ordinarily be based upon the ratio of gross income from sources within the United States to the total gross income. See paragraph (f)(3) of this section.

(3) *Personal exemptions and special deductions.* The deductions for the personal exemptions, and the special deductions described in paragraph (c) of § 1.861-8, shall not be taken into account for purposes of paragraph (c) of this section.

(e) *Property used while within the United States—(1) General.* The value of the property used shall be determined upon the basis of cost less depreciation. Eight percent may ordinarily be taken as a reasonable rate of return to apply to such property. The property taken shall be the average property employed in the transportation service between points in the United States and points outside the United States during the taxable year.

(2) *Average property.* For ships, the average shall be determined upon a daily basis for each ship, and the amount to be apportioned for each ship as assets employed within the United States shall be computed upon the proportion which the number of days the ship was within the territorial limits of the United States bears to the total number of days the ship was in service

during the taxable period. For other assets employed in the transportation business, the average of the assets at the beginning and end of the taxable period ordinarily may be taken, but if the average so obtained does not, by reason of material changes during the taxable year, fairly represent the average for such year either for the assets employed in the transportation business in the United States or in total, the average must be determined upon a monthly or daily basis.

(3) *Current assets.* Current assets shall be decreased by current liabilities and allocated to services between the United States and foreign countries and to other services. The part allocated to services between the United States and foreign countries shall be based on the proportion which the gross receipts from such services bear to the gross receipts from all services. The amount so allocated to services between the United States and foreign countries shall be further allocated to services rendered within the United States and to services rendered without the United States. The portion allocable to services rendered within the United States shall be based on the proportion which the expenses incurred within the territorial limits of the United States bear to the total expenses incurred in services between the United States and foreign countries.

(f) *Taxable income*—(1) *General.* In computing taxable income from sources within the United States there shall be allowed as deductions from the gross income from such sources, determined in accordance with paragraph (b) of this section, (i) the expenses of the transportation business carried on within the United States (as determined under paragraphs (c) and (d) of this section) and (ii) the expenses and deductions determined in accordance with this paragraph.

(2) *Interest and taxes.* Interest and income, war-profits, and excess profits taxes shall be excluded from the apportionment process, as indicated in paragraph (d) of this section; but, for the purpose of computing taxable income there may be deducted from the gross income from sources within the United States, after the amount of such gross income has been determined, a ratable

part of all interest deductible under section 163 and of all income, war-profits, and excess profits taxes deductible under section 164, paid or accrued in respect of the business of transportation service between points in the United States and points outside the United States. The ratable part shall ordinarily be based upon the ratio of gross income from sources within the United States to the total gross income, from such transportation service.

(3) *General expenses.* General expenses, losses, or deductions shall be deducted under this paragraph to the extent indicated in paragraph (d)(2) of this section.

(4) *Personal exemptions.* The deductions for the personal exemptions shall be allowed under this paragraph to the same extent as provided by paragraph (b) of §1.861-8.

(5) *Special deductions.* The special deductions allowed in the case of a corporation by sections 241, 922, and 941 shall be allowed under this paragraph to the same extent as provided by paragraph (c) of §1.861-8.

(g) *Allocation based on books of account.* Application for permission to base the return upon the taxpayer's books of account will be considered by the district director (or, if applicable, the Director of International Operations) in the case of any taxpayer subject to this section, who, in good faith and unaffected by considerations of tax liability, regularly employs in his books of account a detailed allocation of receipts and expenditures which more clearly reflects the income derived from sources within the United States than does the process prescribed by paragraphs (b) to (f), inclusive, of this section.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 8687, 61 FR 60550, Nov. 29, 1996]

§ 1.863-6 Income from sources within a foreign country.

The principles applied in sections 861 through 863 and section 865 and the regulations thereunder for determining the gross and the taxable income from sources within and without the United States shall generally be applied in determining the gross and the taxable income from sources within and without

a particular foreign country when such a determination must be made under any provision of Subtitle A of the Internal Revenue Code, including section 952(a)(5). This section shall not apply, however, to the extent it is determined by applying § 1.863-3 that a portion of the taxable income is from sources within the United States and the balance of the taxable income is from sources within a foreign country. In the application of this section, the name of the particular foreign country shall be used instead of the term *United States*, and the term *domestic* shall be construed to mean created or organized in such foreign country. In applying section 861 and the regulations thereunder for purposes of this section, references to sections 243 and 245 shall be excluded, and the exception in section 861(a)(3) shall not apply. In the case of any item of income, the income from sources within a foreign country shall not exceed the amount which, by applying any provision of sections 861 through 863 and section 865 and the regulations thereunder without reference to this section, is treated as income from sources without the United States. See § 1.937-2T for rules for determining income from sources within a possession of the United States.

[T.D. 9194, 70 FR 18928, Apr. 11, 2005]

§ 1.863-7 Allocation of income attributable to certain notional principal contracts under section 863(a).

(a) *Scope*—(1) *Introduction*. This section provides rules relating to the source and, in certain cases, the character of notional principal contract income. However, this section does not apply to income from a section 988 transaction within the meaning of section 988 and the regulations thereunder, relating to the treatment of certain nonfunctional currency transactions. Further, this section does not apply to a dividend equivalent described in section 871(m) and the regulations thereunder. Notional principal contract income is income attributable to a notional principal contract as defined in § 1.446-3(c). An agreement between a taxpayer and a qualified business unit (as defined in section 989(a)) of the taxpayer, or among qualified business units of the same taxpayer, is

not a notional principal contract, because a taxpayer cannot enter into a contract with itself.

(2) *Effective/applicability date*. This section applies to notional principal contract income includible in income on or after February 13, 1991. However, any taxpayer desiring to apply paragraph (b)(2)(iv) of this section to notional principal contract income includible in income prior to February 13, 1991, in lieu of temporary Income Tax Regulations § 1.863-7T(b)(2)(iv) may (on a consistent basis) so choose. See paragraph (c) of this section for an election to apply the rules of this section to notional principal contract income includible in income before December 24, 1986. With respect to a dividend equivalent described in section 871(m) and the regulations thereunder, this section applies to payments made on or after January 23, 2012.

(b) *Source of notional principal contract income*—(1) *General rule*. Unless paragraph (b) (2) or (3) of this section applies, the source of notional principal contract income shall be determined by reference to the residence of the taxpayer as determined under section 988(a)(3)(B)(i).

(2) *Qualified business unit exception*. The source of notional principal contract income shall be determined by reference to the residence of a qualified business unit of a taxpayer if—

(i) The taxpayer's residence, determined under section 988(a)(3)(B)(i), is the United States;

(ii) The qualified business unit's residence, determined under section 988(a)(3)(B)(ii), is outside the United States;

(iii) The qualified business unit is engaged in the conduct of a trade or business where it is a resident as determined under section 988(a)(3)(B)(ii); and

(iv) The notional principal contract is properly reflected on the books of the qualified business unit. Whether a notional principal contract is properly reflected on the books of such qualified business unit is a question of fact. The degree of participation in the negotiation and acquisition of a notional principal contract shall be considered in this determination. Participation in

connection with the negotiation or acquisition of a notional principal contract may be disregarded if the district director determines that a purpose for such participation was to affect the source of notional principal contract income.

(3) *Effectively connected notional principal contract income.* Notional principal contract income that under principles similar to those set forth in §1.864-4(c) arises from the conduct of a United States trade or business shall be sourced in the United States and such income shall be treated as effectively connected to the conduct of a United States trade or business for purposes of sections 871(b) and 882(a)(1).

(c) *Election—(1) Eligibility and effect.* A taxpayer described in paragraph (b)(2)(i) of this section may make an election to apply the rules of this section to all, but not part, of the taxpayer's income attributable to notional principal contracts for all taxable years (or portion thereof) beginning before December 24, 1986, for which the period of limitations for filing a claim for refund under section 6511(a) has not expired. A taxpayer not described in paragraph (b)(2)(i) of this section that is engaged in trade or business within the United States may make an election to apply the rules of this section to all, but not part, of the taxpayer's income described in paragraph (b)(3) of this section for all taxable years (or portion thereof) beginning before December 24, 1986, for which the period of limitations for filing a claim for refund under section 6511(a) has not expired. If a taxpayer makes an election pursuant to this paragraph (c)(1) in the time and manner provided in paragraph (c) (2) and (3) of this section, then, with respect to such taxable years (or portion thereof), no tax shall be deducted or withheld under sections 1441 and 1442 with respect to payments made by the taxpayer pursuant to a notional principal contract the income attributable to which is subject to such election. The election may be revoked only with the consent of the Commissioner.

(2) *Time for making election.* The election specified in paragraph (c)(1) of this section shall be made by May 14, 1991.

(3) *Manner of making election.* The election described in paragraph (c)(1) of

this section shall be made by attaching a statement to the tax return or an amended tax return for each taxable year beginning before December 24, 1986, in which the taxpayer accrued or received notional principal contract income. The statement shall—

(i) Contain the name, address, and taxpayer identifying number of the electing taxpayer;

(ii) Identify the election as a “Notional Principal Contract Election under §1.863-7”; and

(iii) Specify each taxable year described in paragraph (c)(1) of this section in which payments were made.

(d) *Example.* The operation of this section is illustrated by the following example:

Example. (1) On January 1, 1990, X, a calendar year domestic corporation, entered into an interest rate swap contract with FZ, an unrelated foreign corporation. X does not have a qualified business unit outside the United States. Under the contract, X is required to pay FZ fixed rate dollar amounts, and FZ is required to pay X floating rate dollar amounts, each determined solely by reference to a notional dollar denominated principal amount specified under the contract. The contract is a notional principal contract under §1.863-7(a) because the contract provides for the payment of amounts at specified intervals calculated by reference to a specified index upon a notional principal amount in exchange for a promise to pay similar amounts.

(2) Assume that during 1990 X had notional principal contract income of \$100 in connection with the notional principal contract described in (1) above. Also assume that the contract provides that payments more than 30 days late give rise to a \$5 fee, and that X receives such a fee in 1990. Under paragraph (b)(1) of this section, the source of X's \$100 of income attributable to the swap agreement is domestic. The \$5 fee is not notional principal contract income.

(e) *Cross references.* See §1.861-9T(b) for the allocation of expense to certain notional principal contracts. For rules relating to the source of income from nonfunctional currency notional principal contracts, see §1.9 88-4T. For rules relating to the taxable amount of notional principal contract income allocable under this section to sources

§ 1.863-8

26 CFR Ch. I (4-1-15 Edition)

inside or outside the United States, see § 1.863-1(c).

[T.D. 8330, 56 FR 1362, Jan. 14, 1991, as amended by T.D. 9572, 77 FR 3109, Jan. 23, 2012; T.D. 9648, 78 FR 73080, Dec. 5, 2013]

§ 1.863-8 Source of income derived from space and ocean activity under section 863(d).

(a) *In general.* Income of a United States or a foreign person derived from space and ocean activity (space and ocean income) is sourced under the rules of this section, notwithstanding any other provision, including sections 861, 862, 863, and 865. A taxpayer will not be considered to derive income from space or ocean activity, as defined in paragraph (d) of this section, if such activity is performed by another person, subject to the rules for the treatment of consolidated groups in § 1.1502-13.

(b) *Source of gross income from space and ocean activity—(1) Space and ocean income derived by a United States person.* Space and ocean income derived by a United States person is income from sources within the United States. However, space and ocean income derived by a United States person is income from sources without the United States to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed in a foreign country or countries.

(2) *Space and ocean income derived by a foreign person—(i) In general.* Space and ocean income derived by a person other than a United States person is income from sources without the United States, except as otherwise provided in this paragraph (b)(2).

(ii) *Space and ocean income derived by a controlled foreign corporation.* Space and ocean income derived by a controlled foreign corporation within the meaning of section 957 (CFC) is income from sources within the United States. However, space and ocean income derived by a CFC is income from sources without the United States to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed in a foreign country or countries.

(iii) *Space and ocean income derived by foreign persons engaged in a trade or business within the United States.* Space and ocean income derived by a foreign person (other than a CFC) engaged in a trade or business within the United States is income from sources within the United States to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed within the United States.

(3) *Source rules for income from certain sales of property—(i) Sales of purchased property.* When a taxpayer sells purchased property in space or international water, the source of gross income from the sale generally will be determined under paragraph (b)(1) or (2) of this section, as applicable. However, if such property is inventory property within the meaning of section 1221(a)(1) (inventory property) and is sold for use, consumption, or disposition outside space and international water, the source of income from the sale will be determined under § 1.861-7(c).

(ii) *Sales of property produced by the taxpayer—(A) General.* If the taxpayer both produces property and sells such property, the taxpayer must allocate gross income from such sales between production activity and sales activity under the 50/50 method. Under the 50/50 method, one-half of the taxpayer's gross income will be considered income allocable to production activity, and the source of that income will be determined under paragraph (b)(3)(ii)(B) or (C) of this section. The remaining one-half of such gross income will be considered income allocable to sales activity, and the source of that income will be determined under paragraph (b)(3)(ii)(D) of this section.

(B) *Production only in space or international water, or only outside space and international water.* When production occurs only in space or international water, income allocable to production activity is sourced under paragraph (b)(1) or (2) of this section, as applicable. When production occurs only outside space and international water, income allocable to production activity is sourced under § 1.863-3(c)(1).

(C) *Production both in space or international water and outside space and international water.* When property is produced both in space or international water and outside space and international water, gross income allocable to production activity must be allocated to production occurring in space or international water and production occurring outside space and international water. Such gross income is allocated to production activity occurring in space or international water to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed in space or international water. The balance of such gross income is allocated to production activity occurring outside space and international water. The source of gross income allocable to production activity in space or international water is determined under paragraph (b)(1) or (2) of this section, as applicable. The source of gross income allocated to production activity occurring outside space and international water is determined under § 1.863-3(c)(1).

(D) *Source of income allocable to sales activity.* When property produced by the taxpayer is sold outside space and international water, the source of gross income allocable to sales activity will be determined under §§ 1.861-7(c) and 1.863-3(c)(2). When property produced by the taxpayer is sold in space or international water, the source of gross income allocable to sales activity generally will be determined under paragraph (b)(1) or (2) of this section, as applicable. However, if such property is inventory property within the meaning of section 1221(a)(1) and is sold in space or international water for use, consumption, or disposition outside space, international water, and the United States, the source of gross income allocable to sales activity will be determined under §§ 1.861-7(c) and 1.863-3(c)(2).

(4) *Special rule for determining the source of gross income from services.* To the extent a transaction characterized as the performance of a service constitutes a space or ocean activity, as determined under paragraph (d)(2)(ii) of this section, the source of gross income

derived from such transaction is determined under paragraph (b)(1) or (2) of this section.

(5) *Special rule for determining source of income from communications activity (other than income from international communications activity).* Space and ocean activity, as defined in paragraph (d) of this section, includes activity that occurs in space or international water that is characterized as a communications activity as defined in § 1.863-9(h)(1) (other than international communications activity). The source of space and ocean income that is also communications income as defined in § 1.863-9(h)(2) (but not space/ocean communications income as defined in § 1.863-9(h)(3)(v)) is determined under the rules of § 1.863-9(c), (d), and (f), as applicable, rather than under paragraph (b) of this section. The source of space and ocean income that is also space/ocean communications income as defined in § 1.863-9(h)(3)(v) is determined under the rules of paragraph (b) of this section. See § 1.863-9(e).

(c) *Taxable income.* When a taxpayer allocates gross income under paragraph (b)(1), (b)(2), (b)(3)(ii)(C), or (b)(4) of this section, the taxpayer must allocate expenses, losses, and other deductions as prescribed in §§ 1.861-8 through 1.861-14T to the class or classes of gross income that include the income so allocated in each case. A taxpayer must then apply the rules of §§ 1.861-8 through 1.861-14T to apportion properly amounts of expenses, losses, and other deductions so allocated to such gross income between gross income from sources within the United States and gross income from sources without the United States.

(d) *Space and ocean activity—(1) Definition—(i) Space activity.* In general, space activity is any activity conducted in space. For purposes of this section, space means any area not within the jurisdiction (as recognized by the United States) of a foreign country, possession of the United States, or the United States, and not in international water. For purposes of determining space activity, the Commissioner may separate parts of a single transaction into separate transactions or combine separate transactions as part of a single transaction. Paragraph

(d)(3) of this section lists specific exceptions to the general definition of space activity. Activities that constitute space activity include but are not limited to—

(A) Performance and provision of services in space, as defined in paragraph (d)(2)(ii) of this section;

(B) Leasing of equipment located in space, including spacecraft (for example, satellites) or transponders located in space;

(C) Licensing of technology or other intangibles for use in space;

(D) Production, processing, or creation of property in space, as defined in paragraph (d)(2)(i) of this section;

(E) Activity occurring in space that is characterized as communications activity (other than international communications activity) under § 1.863-9(h)(1);

(F) Underwriting income from the insurance of risks on activities that produce space income; and

(G) Sales of property in space (see § 1.861-7(c)).

(ii) *Ocean activity.* In general, ocean activity is any activity conducted on or under water not within the jurisdiction (as recognized by the United States) of a foreign country, possession of the United States, or the United States (collectively, in international water). For purposes of determining ocean activity, the Commissioner may separate parts of a single transaction into separate transactions or combine separate transactions as part of a single transaction. Paragraph (d)(3) of this section lists specific exceptions to the general definition of ocean activity. Activities that constitute ocean activity include but are not limited to—

(A) Performance and provision of services in international water, as defined in paragraph (d)(2)(ii) of this section;

(B) Leasing of equipment located in international water, including underwater cables;

(C) Licensing of technology or other intangibles for use in international water;

(D) Production, processing, or creation of property in international water, as defined in paragraph (d)(2)(i) of this section;

(E) Activity occurring in international water that is characterized as communications activity (other than international communications activity) under § 1.863-9(h)(1);

(F) Underwriting income from the insurance of risks on activities that produce ocean income;

(G) Sales of property in international water (see § 1.861-7(c));

(H) Any activity performed in Antarctica;

(I) The leasing of a vessel that does not transport cargo or persons for hire between ports-of-call (for example, the leasing of a vessel to engage in research activities in international water); and

(J) The leasing of drilling rigs, extraction of minerals, and performance and provision of services related thereto, except as provided in paragraph (d)(3)(ii) of this section.

(2) *Determining a space or ocean activity—(i) Production of property in space or international water.* For purposes of this section, production activity means an activity that creates, fabricates, manufactures, extracts, processes, cures, or ages property within the meaning of section 864(a) and § 1.864-1.

(ii) *Special rule for performance of services—(A) General.* Except as provided in paragraph (d)(2)(ii)(B) of this section, if a transaction is characterized as the performance of a service, then such service will be treated as a space or ocean activity in its entirety when any part of the service is performed in space or international water. Services are performed in space or international water if functions are performed, resources are employed, or risks are assumed in space or international water, regardless of whether performed by personnel, equipment, or otherwise.

(B) *Exception to the general rule.* If the taxpayer can demonstrate the value of the service attributable to performance occurring in space or international water, and the value of the service attributable to performance occurring outside space and international water, then such service will be treated as space or ocean activity only to the extent of the activity performed in space or international water. The value of

the service is attributable to performance occurring in space or international water to the extent the performance of the service, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed in space or international water. In addition, if the taxpayer can demonstrate, based on all the facts and circumstances, that the value of the service attributable to performance in space and international water is de minimis, such service will not be treated as space or ocean activity.

(3) *Exceptions to space or ocean activity.* Space or ocean activity does not include the following types of activities:

(i) Any activity giving rise to transportation income as defined in section 863(c).

(ii) Any activity with respect to mines, oil and gas wells, or other natural deposits, to the extent the mines, wells, or natural deposits are located within the jurisdiction (as recognized by the United States) of any country, including the United States and its possessions.

(iii) Any activity giving rise to international communications income as defined in § 1.863-9(h)(3)(ii).

(e) *Treatment of partnerships.* This section is applied at the partner level.

(f) *Examples.* The following examples illustrate the rules of this section:

Example 1. Space activity—activity occurring on land and in space. (i) *Facts.* S, a United States person, owns satellites in orbit. S leases one of its satellites to A. S, as lessor, will not operate the satellite. Part of S's performance as lessor in this transaction occurs on land. Assume that the combination of S's activities is characterized as the lease of equipment.

(ii) *Analysis.* Because the leased equipment is located in space, the transaction is defined in its entirety as space activity under paragraph (d)(1)(i) of this section. Income derived from the lease will be sourced under paragraph (b)(1) of this section. Under paragraph (b)(1) of this section, S's space income is sourced outside the United States to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed in a foreign country or countries.

Example 2. Space activity. (i) *Facts.* X is an Internet service provider. X offers a service that permits a customer (C) to connect to the Internet via a telephone call, initiated by the modem of C's personal computer, to a

control center. X transmits information requested by C to C's personal computer, in part using satellite capacity leased by X from S. X performs the uplink and downlink functions. X charges its customers a flat monthly fee. Assume that neither X nor S derive international communications income within the meaning of § 1.863-9(h)(3)(ii). In addition, assume that X is able to demonstrate, pursuant to paragraph (d)(2)(ii)(B) of this section, the extent to which the value of the service is attributable to functions performed, resources employed, and risks assumed in space.

(ii) *Analysis.* Under paragraph (d)(2)(ii) of this section, the service performed by X constitutes space activity to the extent the value of the service is attributable to functions performed, resources employed, and risks assumed in space. To the extent the service performed by X constitutes space activity, the source of X's income from the service transaction is determined under paragraph (b) of this section. To the extent the service performed by X does not constitute space or ocean activity, the source of X's income from the service is determined under sections 861, 862, and 863, as applicable. To the extent that X derives space and ocean income that is also communications income within the meaning of § 1.863-9(h)(2), the source of X's income is determined under paragraph (b) of this section and § 1.863-9(c), (d), and (f), as applicable, as provided in paragraph (b)(5) of this section. S derives space and ocean income that is also communications income within the meaning of § 1.863-9(h)(2), and the source of S's income is therefore determined under paragraph (b) of this section and § 1.863-9(c), (d), and (f), as applicable, as provided in paragraph (b)(5) of this section.

Example 3. Services as space activity—de minimis value attributable to performance occurring in space. (i) *Facts.* R owns a retail outlet in the United States. R engages S to provide a security system for R's premises. S operates its security system by transmitting images from R's premises directly to a satellite, and from the satellite to a group of S employees located in Country B, who monitor the premises by viewing the transmitted images. The satellite is used as a medium of delivery and not as a method of surveillance. O provides S with transponder capacity on O's satellite, which S uses to transmit those images. Assume that S's transaction with R is characterized as the performance of a service. Assume that O's provision of transponder capacity is also viewed as the provision of a service. Assume also that S is able to demonstrate, pursuant to § 1.863-9(h)(1), that the value of the transaction with R attributable to communications activities is de minimis.

(ii) *Analysis.* S derives income from providing monitoring services. S can demonstrate, pursuant to paragraph (d)(2)(ii) of this section, that based on all the facts and circumstances, the value of S's service transaction attributable to performance in space is de minimis. Thus, S is not treated as engaged in a space activity, and none of S's income from the service transaction is space income. In addition, because S demonstrates that the value of the transaction with R attributable to communications activities is de minimis, S is not required under § 1.863-9(h)(1)(ii) to treat the transaction as separate communications and non-communications transactions, and none of S's gross income from the transaction is treated as communications income within the meaning of § 1.863-9(h)(2). O's provision of transponder capacity is viewed as the provision of a service. Based on all the facts and circumstances, the value of O's service transaction attributable to performance in space is not de minimis. Thus, O's activity will be considered space activity, pursuant to paragraph (d)(2)(i) of this section, to the extent the value of the services transaction is attributable to performance in space (unless O's activity in space is international communications activity). To the extent that O derives communications income, the source of such income is determined under paragraph (b) of this section and § 1.863-9(b), (c), (d), and (f), as applicable, as provided in paragraph (b)(5) of this section. R does not derive any income from space activity.

Example 4. Space activity. (i) *Facts.* L, a domestic corporation, offers programming and certain other services to customers located both in the United States and in foreign countries. Assume that L's provision of programming and other services in this *Example 4* is characterized as the provision of a service, and that no part of the service transaction occurs in space or international water. Assume that the delivery of the programming constitutes a separate transaction also characterized as the performance of a service. L uses satellite capacity acquired from S to deliver the programming service directly to customers' television sets. L performs the uplink and downlink functions, so that part of the value of the delivery transaction derives from functions performed and resources employed in space. Assume that these contributions to the value of the delivery transaction occurring in space are not considered de minimis under paragraph (d)(2)(ii)(B) of this section. Customer C pays L to provide and deliver programming to C's residence in the United States. Assume S's provision of satellite capacity in this *Example 4* is viewed as the provision of a service, and also that S does not derive international communications income within the meaning of § 1.863-9(h)(3)(ii).

(ii) *Analysis.* S's activity will be considered space activity. To the extent that S derives space and ocean income that is also communications income under § 1.863-9(h)(2), the source of S's income is determined under paragraph (b) of this section and § 1.863-9(c), (d), and (f), as applicable, as provided in paragraph (b)(5) of this section. On these facts, L's activities are treated as two separate service transactions: the provision of programming (and other services), and the delivery of programming. L's income derived from provision of programming and other services is not income derived from space activity. L's delivery of programming and other services is considered space activity, pursuant to paragraph (d)(2)(ii) of this section, to the extent the value of the delivery transaction is attributable to performance in space. To the extent that the delivery of programming is treated as a space activity, the source of L's income derived from the delivery transaction is determined under paragraph (b)(1) of this section, as provided in paragraph (b)(4) of this section. To the extent that L derives space and ocean income that is also communications income within the meaning of § 1.863-9(h)(2), the source of such income is determined under paragraph (b) of this section and § 1.863-9(b), (c), (d), (e), and (f), as applicable, as provided in paragraph (b)(5) of this section.

Example 5. Space activity. (i) *Facts.* The facts are the same as in *Example 4*, except that L does not deliver the programming service directly but instead engages R, a domestic corporation specializing in content delivery, to deliver by transmission its programming. For all portions of a transmission which require satellite capacity, R, in turn, contracts out such functions to S. S performs the uplink and downlink functions, so that part of the value of the delivery transaction derives from functions performed and resources employed in space.

(ii) *Analysis.* L's activity will not be considered space activity because none of L's activity occurs in space. Thus, L does not derive any space and ocean income. L does, however, derive communications income within the meaning of § 1.863-9(h)(2). This is the case even though L does not perform the transmission function because L is paid by Customer C to transmit, and bears the risk of transmitting, the communications or data. To the extent that L's activity consists in part of non-de minimis communications and non-de minimis non-communications activity, each part of the transaction must be treated as a separate transaction and gross income is allocated accordingly under § 1.863-9(h)(1)(ii). In addition, L must also allocate expenses, losses, and other deductions, for example, payments to R, to the class or classes of gross income that include the income so allocated. R's activity will not be considered space activity. Since R contracts

out all of the functions involving satellite capacity to S, no part of R's activity occurs in space. Thus, R does not derive any space and ocean income. R does, however, derive communications income within the meaning of § 1.863-9(h)(2). This is the case even though R does not perform the transmission function because R is paid by L to transmit, and bears the risk of transmitting, the communications or data. S's activity will be considered space activity. To the extent that S derives space and ocean income that is also communications income within the meaning of § 1.863-9(h)(2), the source of such income is determined under paragraph (b) of this section and § 1.863-9(b), (c), (d), (e), and (f), as applicable, as provided in paragraph (b)(5) of this section.

Example 6. Space activity—treatment of land activity. (i) *Facts.* S, a United States person, offers remote imaging products and services to its customers. In year 1, S uses its satellite's remote sensors to gather data on certain geographical terrain. In year 3, C, a construction development company, contracts with S to obtain a satellite image of an area for site development work. S pulls data from its archives and transfers to C the images gathered in year 1, in a transaction that is characterized as a sale of the data. S's rights, title, and interest in the data pass to C in the United States. Before transferring the images to C, S uses computer software in its land-based office to enhance the images so that the images can be used.

(ii) *Analysis.* The collection of data and creation of images in space is characterized as the creation of property in space. Because S both produces and sells the data, S must allocate gross income from the sale of the data between production activity and sales activity under the 50/50 method of paragraph (b)(3)(ii)(A). The source of S's income allocable to production activity is determined under paragraph (b)(3)(ii)(C) of this section because production activities occur both in space and on land. The source of S's income attributable to sales activity is determined under paragraph (b)(3)(ii)(D) of this section (by reference to § 1.863-3(c)(2)) as U.S. source income because S's rights, title, and interest in the data pass to C in the United States.

Example 7. Use of intangible property in space. (i) *Facts.* X acquires a license to use a particular satellite slot or orbit, which X sublicenses to C. C pays X a royalty.

(ii) *Analysis.* Because the royalty is paid for the right to use intangible property in space, the source of the royalty paid by C to X is determined under paragraph (b) of this section.

Example 8. Performance of services. (i) *Facts.* E, a domestic corporation, operates satellites with sensing equipment that can determine how much heat and light particular plants emit and reflect. Based on the data, E will provide F, a U.S. farmer, a report ana-

lyzing the data, which F will use in growing crops. E analyzes the data from offices located in the United States. Assume that E's combined activities are characterized as the performance of services.

(ii) *Analysis.* Based on all the facts and circumstances, the value of E's service transaction attributable to performance in space is not de minimis. Thus, E's activities will be considered space activities, pursuant to paragraph (d)(2)(ii) of this section, to the extent the value of E's service transaction is attributable to performance in space. To the extent E's service transaction constitutes a space activity, the source of E's income derived from the service transaction will be determined under paragraph (b)(4) of this section, by reference to paragraph (b)(1) of this section. To the extent that E's service transaction does not constitute a space or ocean activity, the source of E's income derived from the service transaction is determined under sections 861, 862, and 863, as applicable.

Example 9. Separate transactions. (i) *Facts.* The same facts as *Example 8*, except that E provides the raw data to F in a transaction characterized as a sale of a copyrighted article. In addition, E provides an analysis in the form of a report to F. The price F pays E for the raw data is separately stated.

(ii) *Analysis.* To the extent that the provision of raw data and the analysis of the data are each treated as separate transactions, the source of income from the production and sale of data is determined under paragraph (b)(3)(ii) of this section. The provision of services would be analyzed in the same manner as in *Example 8*.

Example 10. Sale of property in international water. (i) *Facts.* T purchased and owns transatlantic cable that lies in international water. T sells the cable to B, with T's rights, title, and interest in the cable passing to B in international water. Assume that the transatlantic cable is not inventory property within the meaning of section 1221(a)(1).

(ii) *Analysis.* Because T's rights, title, and interest in the property pass to B in international water, the sale takes place in international water under § 1.861-7(c), and the sale transaction is ocean activity under paragraph (d)(1)(ii) of this section. The source of T's sales income is determined under paragraph (b)(3)(i) of this section, by reference to paragraph (b)(1) or (2) of this section.

Example 11. Sale of property in space. (i) *Facts.* S, a United States person, manufactures a satellite in the United States and sells it to a customer who is not a United States person. S's rights, title, and interest in the satellite pass to the customer in space.

(ii) *Analysis.* Because S's rights, title, and interest in the satellite pass to the customer in space, the sale takes place in space under § 1.861-7(c), and the sale transaction is space

activity under paragraph (d)(1)(i) of this section. The source of income derived from the sale of the satellite in space is determined under paragraph (b)(3)(ii) of this section, with the source of income allocable to production activity determined under paragraphs (b)(3)(ii)(A) and (B) of this section, and the source of income allocable to sales activity determined under paragraphs (b)(3)(ii)(A) and (D) of this section. Under paragraph (b)(1) of this section, S's space income is sourced outside the United States to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed in a foreign country or countries.

Example 12. Sale of property in space. (i) *Facts.* S has a right to operate from a particular position (satellite slot or orbit) in space. S sells the right to operate from that position to P. Assume that the sale of the satellite slot is characterized as a sale of property and that S's rights, title, and interest in the satellite slot pass to P in space.

(ii) *Analysis.* The sale of the satellite slot takes place in space under § 1.861-7(c) because S's rights, title, and interest in the satellite slot pass to P in space. The sale of the satellite slot is space activity under paragraph (d)(1)(i) of this section, and income or gain from the sale is sourced under paragraph (b)(3)(i) of this section, by reference to paragraph (b)(1) or (2) of this section.

Example 13. Source of income of a foreign person. (i) *Facts.* FP, a foreign corporation that is not a CFC, derives income from the operation of satellites. FP operates ground stations in the United States and in foreign Country FC. Assume that FP is considered engaged in a trade or business within the United States based on FP's operation of the ground station in the United States.

(ii) *Analysis.* Under paragraph (b)(2)(iii) of this section, FP's space income is sourced in the United States to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed within the United States.

Example 14. Source of income of a foreign person. (i) *Facts.* FP, a foreign corporation that is not a CFC, operates remote sensing satellites in space to collect data and images for its customers. FP uses an independent agent, A, in the United States who provides marketing, order-taking, and other customer service functions. Assume that FP is considered engaged in a trade or business within the United States based on A's activities on FP's behalf in the United States.

(ii) *Analysis.* Under paragraph (b)(2)(iii) of this section, FP's space income is sourced in the United States to the extent the income, based on all the facts and circumstances, is attributable to functions performed, re-

sources employed, or risks assumed within the United States.

(g) *Reporting and documentation requirements—(1) In general.* A taxpayer making an allocation of gross income under paragraph (b)(1), (b)(2), (b)(3)(ii)(C), or (b)(4) of this section must satisfy the requirements in paragraphs (g)(2), (3), and (4) of this section.

(2) *Required documentation.* In all cases, a taxpayer must prepare and maintain documentation in existence when its return is filed regarding the allocation of gross income and allocation and apportionment of expenses, losses, and other deductions, the methodologies used, and the circumstances justifying use of those methodologies. The taxpayer must make available such documentation within 30 days upon request.

(3) *Access to software.* If the taxpayer or any third party used any computer software, within the meaning of section 7612(d), to allocate gross income, or to allocate or apportion expenses, losses, and other deductions, the taxpayer must make available upon request—

(i) Any computer software executable code, within the meaning of section 7612(d), used for such purposes, including an executable copy of the version of the software used in the preparation of the taxpayer's return (including any plug-ins, supplements, etc.) and a copy of all related electronic data files. Thus, if software subsequently is upgraded or supplemented, a separate executable copy of the version used in preparing the taxpayer's return must be retained;

(ii) Any related computer software source code, within the meaning of section 7612(d), acquired or developed by the taxpayer or a related person, or primarily for internal use by the taxpayer or such person rather than for commercial distribution; and

(iii) In the case of any spreadsheet software or similar software, any formulae or links to supporting worksheets.

(4) *Use of allocation methodology.* In general, when a taxpayer allocates gross income under paragraph (b)(1), (b)(2), (b)(3)(ii)(C), or (b)(4) of this section, it does so by making the allocation on a timely filed original return

(including extensions). However, a taxpayer will be permitted to make changes to such allocations made on its original return with respect to any taxable year for which the statute of limitations has not closed as follows:

(i) In the case of a taxpayer that has made a change to such allocations prior to the opening conference for the audit of the taxable year to which the allocation relates or who makes such a change within 90 days of such opening conference, if the IRS issues a written information document request asking the taxpayer to provide the documents and such other information described in paragraphs (g)(2) and (3) of this section with respect to the changed allocations and the taxpayer complies with such request within 30 days of the request, then the IRS will complete its examination, if any, with respect to the allocations for that year as part of the current examination cycle. If the taxpayer does not provide the documents and information described in paragraphs (g)(2) and (3) of this section within 30 days of the request, then the procedures described in paragraph (g)(4)(ii) of this section shall apply.

(ii) If the taxpayer changes such allocations more than 90 days after the opening conference for the audit of the taxable year to which the allocations relate or the taxpayer does not provide the documents and information with respect to the changed allocations as requested in accordance with paragraphs (g)(2) and (3) of this section, then the IRS will, in a separate cycle, determine whether an examination of the taxpayer's allocations is warranted and complete any such examination. The separate cycle will be worked as resources are available and may not have the same estimated completion date as the other issues under examination for the taxable year. The IRS may ask the taxpayer to extend the statute of limitations on assessment and collection for the taxable year to permit examination of the taxpayer's method of allocation, including an extension limited, where appropriate, to the taxpayer's method of allocation.

(h) *Effective date.* This section applies to taxable years beginning on or after December 27, 2006.

[T.D. 9305, 71 FR 77603, Dec. 27, 2006]

§ 1.863-9 Source of income derived from communications activity under section 863(a), (d), and (e).

(a) *In general.* Income of a United States or a foreign person derived from each type of communications activity, as defined in paragraph (h)(3) of this section, is sourced under the rules of this section, notwithstanding any other provision including sections 861, 862, 863, and 865. Notwithstanding that a communications activity would qualify as space or ocean activity under section 863(d) and the regulations thereunder, the source of income derived from such communications activity is determined under this section, and not under section 863(d) and the regulations thereunder, except to the extent provided in § 1.863-8(b)(5).

(b) *Source of international communications income—(1) International communications income derived by a United States person.* Income derived from international communications activity (international communications income) by a United States person is one-half from sources within the United States and one-half from sources without the United States.

(2) *International communications income derived by foreign persons—(i) In general.* International communications income derived by a person other than a United States person is, except as otherwise provided in this paragraph (b)(2), wholly from sources without the United States.

(ii) *International communications income derived by a controlled foreign corporation.* International communications income derived by a controlled foreign corporation within the meaning of section 957 (CFC) is one-half from sources within the United States and one-half from sources without the United States.

(iii) *International communications income derived by foreign persons with a fixed place of business in the United States.* International communications income derived by a foreign person, other than a CFC, that is attributable to an office or other fixed place of business of the foreign person in the United States is from sources within the United States. The principles of section 864(c)(5) apply in determining whether a foreign person has an office or fixed

place of business in the United States. See § 1.864-7. International communications income is attributable to an office or other fixed place of business to the extent of functions performed, resources employed, or risks assumed by the office or other fixed place of business.

(iv) *International communications income derived by foreign persons engaged in a trade or business within the United States.* International communications income derived by a foreign person (other than a CFC) engaged in a trade or business within the United States is income from sources within the United States to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed within the United States.

(c) *Source of U.S. communications income.* Income derived by a United States or foreign person from U.S. communications activity is from sources within the United States.

(d) *Source of foreign communications income.* Income derived by a United States or foreign person from foreign communications activity is from sources without the United States.

(e) *Source of space/ocean communications income.* The source of income derived by a United States or foreign person from space/ocean communications activity is determined under section 863(d) and the regulations thereunder.

(f) *Source of communications income when taxpayer cannot establish the two points between which the taxpayer is paid to transmit the communication.* Income derived by a United States or foreign person from communications activity, when the taxpayer cannot establish the two points between which the taxpayer is paid to transmit the communication as required in paragraph (h)(3)(i) of this section, is from sources within the United States.

(g) *Taxable income.* When a taxpayer allocates gross income under paragraph (b)(2)(iii), (b)(2)(iv), or (h)(1)(ii) of this section, the taxpayer must allocate expenses, losses, and other deductions as prescribed in §§ 1.861-8 through 1.861-14T to the class or classes of gross income that include the income so allocated in each case. A taxpayer must then apply the rules of §§ 1.861-8

through 1.861-14T properly to apportion amounts of expenses, losses, and other deductions so allocated to such gross income between gross income from sources within the United States and gross income from sources without the United States. For amounts of expenses, losses, and other deductions allocated to gross income derived from international communications activity, when the source of income is determined under the 50/50 method of paragraph (b)(1) or (b)(2)(ii) of this section, taxpayers generally must apportion expenses, losses, and other deductions between sources within the United States and sources without the United States pro rata based on the relative amounts of gross income from sources within the United States and gross income from sources without the United States. However, the preceding sentence shall not apply to research and experimental expenditures qualifying under § 1.861-17, which are to be allocated and apportioned under the rules of that section.

(h) *Communications activity and income derived from communications activity—(1) Communications activity—(i) General rule.* For purposes of this part, *communications activity* consists solely of the delivery by transmission of communications or data (communications). Delivery of communications other than by transmission (for example, by delivery of physical packages and letters) is not communications activity within the meaning of this section. Communications activity also includes the provision of capacity to transmit communications. Provision of content or any other additional service provided along with, or in connection with, a non-de minimis communications activity must be treated as a separate non-communications activity unless de minimis. Communications activity or non-communications activity will be treated as de minimis to the extent, based on the facts and circumstances, the value attributable to such activity is de minimis.

(ii) *Separate transaction.* To the extent that a taxpayer's transaction consists in part of non-de minimis communications activity and in part of non-de minimis non-communications activity, each such part of the transaction must

be treated as a separate transaction. Gross income is allocated to each such communications activity transaction and non-communications activity transaction to the extent the income, based on all the facts and circumstances, is attributable to functions performed, resources employed, or risks assumed in each such activity.

(2) *Income derived from communications activity.* Income derived from communications activity (communications income) is income derived from the delivery by transmission of communications, including income derived from the provision of capacity to transmit communications. Income may be considered derived from a communications activity even if the taxpayer itself does not perform the transmission function, but in all cases, the taxpayer derives communications income only if the taxpayer is paid to transmit, and bears the risk of transmitting, the communications.

(3) *Determining the type of communications activity—(i) In general.* Whether income is derived from international communications activity, U.S. communications activity, foreign communications activity, or space/ocean communications activity is determined by identifying the two points between which the taxpayer is paid to transmit the communication. The taxpayer must establish the two points between which the taxpayer is paid to transmit, and bears the risk of transmitting, the communication. Whether the taxpayer contracts out part or all of the transmission function is not relevant. A taxpayer may satisfy the requirement that the taxpayer establish the two points between which the taxpayer is paid to transmit, and bears the risk of transmitting, the communication by using any consistently applied reasonable method to establish one or both endpoints. In evaluating the reasonableness of such method, consideration will be given to all the facts and circumstances, including whether the endpoints would otherwise be identifiable absent this reasonable method provision and the reliability of the data. Depending on the facts and circumstances, methods based on, for example, records of port or transport charges, customer billing records, a

satellite footprint, or records of termination fees made pursuant to an international settlement agreement may be reasonable. In addition, practices used by taxpayers to classify or categorize certain communications activity in connection with preparation of statements and analyses for the use of management, creditors, minority shareholders, joint ventures, or other parties or governmental agencies in interest may be reliable indicators of the reasonableness of the method chosen, but need not be accorded conclusive weight by the Commissioner. In all cases, the method chosen to establish the two points between which the taxpayer is paid to transmit, and bears the risk of transmitting, the communication must be supported by sufficient documentation to permit verification by the Commissioner.

(ii) *Income derived from international communications activity.* Income derived by a taxpayer from international communications activity (international communications income) is income derived from communications activity, as defined in paragraph (h)(2) of this section, when the taxpayer is paid to transmit—

(A) Between a point in the United States and a point in a foreign country (or a possession of the United States); or

(B) Foreign-originating communications (communications with a beginning point in a foreign country or a possession of the United States) from a point in space or international water to a point in the United States.

(iii) *Income derived from U.S. communications activity.* Income derived by a taxpayer from U.S. communications activity (U.S. communications income) is income derived from communications activity, as defined in paragraph (h)(2) of this section, when the taxpayer is paid to transmit—

(A) Between two points in the United States; or

(B) Between the United States and a point in space or international water, except as provided in paragraph (h)(3)(ii)(B) of this section.

(iv) *Income derived from foreign communications activity.* Income derived by a taxpayer from foreign communications activity (foreign communications income)

is income derived from communications activity, as defined in paragraph (h)(2) of this section, when the taxpayer is paid to transmit—

(A) Between two points in a foreign country or countries (or a possession or possessions of the United States);

(B) Between a foreign country and a possession of the United States; or

(C) Between a foreign country (or a possession of the United States) and a point in space or international water.

(v) *Income derived from space/ocean communications activity.* Income derived by a taxpayer from space/ocean communications activity (space/ocean communications income) is income derived from communications activity, as defined in paragraph (h)(2) of this section, when the taxpayer is paid to transmit between a point in space or international water and another point in space or international water.

(i) *Treatment of partnerships.* This section is applied at the partner level.

(j) *Examples.* The following examples illustrate the rules of this section:

Example 1. Income derived from non-communications activity—remote data base access. (i) *Facts.* D provides its customers in various foreign countries with access to its data base, which contains information on certain individuals' health care insurance coverage. Customer C obtains access to D's data base by placing a call to D's telephone number. Assume that C's telephone service, used to access D's data base, is provided by a third party, and that D assumes no responsibility for the transmission of the information via telephone.

(ii) *Analysis.* D is not paid to transmit communications and does not derive income from communications activity within the meaning of paragraph (h)(2) of this section. Rather, D derives income from provision of content or provision of services to its customers. Therefore, the rules of this section do not apply to determine the source of D's income.

Example 2. Income derived from U.S. communications activity—U.S. portion of international communication. (i) *Facts.* TC, a local telephone company, receives an access fee from an international carrier for picking up a call from a local telephone customer and delivering the call to a U.S. point of presence (POP) of the international carrier. The international carrier picks up the call from its U.S. POP and delivers the call to a foreign country.

(ii) *Analysis.* TC is not paid to carry the transmission between the United States and a foreign country. TC is paid to transmit a

communication between two points in the United States. TC derives U.S. communications income as defined in paragraph (h)(3)(iii) of this section, which is sourced under paragraph (c) of this section as U.S. source income.

Example 3. Income derived from international communications activity—underwater cable. (i) *Facts.* TC, a domestic corporation, owns an underwater fiber optic cable. Pursuant to contracts, TC makes available to its customers capacity to transmit communications via the cable. TC's customers then solicit telephone customers and arrange to transmit the telephone customers' calls. The cable runs in part through U.S. waters, in part through international waters, and in part through foreign country waters.

(ii) *Analysis.* TC derives international communications income as defined in paragraph (h)(3)(ii) of this section because TC is paid to make available capacity to transmit communications between the United States and a foreign country. Because TC is a United States person, TC's international communications income is sourced under paragraph (b)(1) of this section as one-half from sources within the United States and one-half from sources without the United States.

Example 4. Income derived from international communications activity—satellite. (i) *Facts.* S, a United States person, owns satellites in orbit and uplink facilities in Country X, a foreign country. B, a resident of Country X, pays S to deliver B's programming from S's uplink facility, located in Country X, to a downlink facility in the United States owned by C, a customer of B.

(ii) *Analysis.* S derives international communications income under paragraph (h)(3)(ii) of this section because S is paid to transmit the communications between a beginning point in a foreign country and an endpoint in the United States. Because S is a United States person, the source of S's international communications income is determined under paragraph (b)(1) of this section as one-half from sources within the United States and one-half from sources without the United States.

Example 5. The paid-to-do rule—foreign communications via domestic route. (i) *Facts.* TC is paid to transmit communications from Toronto, Canada, to Paris, France. TC transmits the communications from Toronto to New York. TC pays another communications company, IC, to transmit the communications from New York to Paris.

(ii) *Analysis.* Under the *paid-to-do* rule of paragraph (h)(3)(i) of this section, TC derives foreign communications income under paragraph (h)(3)(iv) of this section because TC is paid to transmit communications between two points in foreign countries, Toronto and Paris. Under paragraph (h)(3)(i) of this section, the character of TC's communications

activity is determined without regard to the fact that TC pays IC to transmit the communications for some portion of the delivery path. IC has international communications income under paragraph (h)(3)(ii) of this section because IC is paid to transmit the communications between a point in the United States and a point in a foreign country.

Example 6. The paid-to-do rule—domestic communication via foreign route. (i) *Facts.* TC is paid to transmit a call between two points in the United States, but routes the call through Canada.

(ii) *Analysis.* Under paragraph (h)(3)(i) of this section, the character of income derived from communications activity is determined by the two points between which the taxpayer is paid to transmit, and bears the risk of transmitting, the communications, without regard to the path of the transmission between those two points. Thus, under paragraph (h)(3)(iii) of this section, TC derives income from U.S. communications activity because it is paid to transmit the communications between two U.S. points.

Example 7. The paid-to-do rule—foreign-originating communications. (i) *Facts.* Under an international settlement agreement, G, a Country X international carrier, pays T to receive all calls originating in Country X that are bound for the United States and to terminate such calls in the United States. Due to Country X legal restrictions, the international settlement agreement specifies that G carries the transmission to a point outside the territory of Country X and that T carries the foreign-originating transmission from such point to the destined point in the United States. T, in turn, contracts out with another communications company, S, to transmit the U.S. portion of the communications. Tracing and identifying the endpoints of each transmission is not possible or practical. T does, however, keep records of termination fees received from G for terminating the foreign-originating calls.

(ii) *Analysis.* T derives communications income as defined in paragraph (h)(2) of this section. Based on all the facts and circumstances, T can establish that T is paid to transmit, and bears the risk of transmitting, foreign-originating calls from a point in space or international water to a point in the United States using a reasonable method to establish the endpoints, assuming that this method is consistently applied. In this case, T can reasonably establish that T is paid to receive foreign-originating calls and terminate such calls in the United States based on the records of termination fees pursuant to an international settlement agreement. Under paragraph (h)(3)(ii)(B) of this section, a taxpayer derives income from international communications activity when the taxpayer is paid to transmit foreign-originating communications from space or inter-

national water to the United States. Thus, under paragraph (h)(3)(ii)(B) of this section, T derives income from international communications. If, based on all the facts and circumstances, T could reasonably trace and identify the endpoints, then T would have to directly establish that each call originated in a foreign country. Assuming T is able to do so, the rest of the analysis in this *Example 7* remains the same. Under paragraph (h)(3)(iii) of this section, S derives income from U.S. communications activity because S is paid to transmit the communications between two U.S. points.

Example 8. Indeterminate endpoints—prepaid telephone calling cards. (i) *Facts.* S purchases capacity from TC to transmit telephone calls. S sells prepaid telephone calling cards that give customers access to TC's telephone lines for a certain number of minutes. Assume that S cannot establish the endpoints of its customers' telephone calls, even under the reasonable method rule of paragraph (h)(3) of this section.

(ii) *Analysis.* S derives communications income as defined in paragraph (h)(2) of this section because S makes capacity to transmit communications available to its customers. In this case, S cannot establish the two points between which the communications are transmitted. Therefore, S's communications income is U.S. source income, as provided by paragraph (f) of this section.

Example 9. Reasonable methods—minutes of use data on long distance calling plans. (i) *Facts.* B provides both domestic and international long distance services in a calling plan for a limited number of minutes for a set amount each month. Tracing and identifying the endpoints of each transmission is not possible or practical. B is, however, able to establish that the calling plan generated \$10,000 of revenue for 25,000 minutes based on reports derived from customer billing records. Based on minutes of use data in these reports, B is able to establish that of the total 25,000 minutes, 60 percent or 15,000 minutes were for U.S. long distance calls and 40 percent or 10,000 minutes were for international calls.

(ii) *Analysis.* B derives communications income as defined in paragraph (h)(2) of this section. Based on all the facts and circumstances, B can establish the two points between which B is paid to transmit, and bears the risk of transmitting, the communications using a reasonable method to establish the endpoints, assuming that this method is consistently applied. In this case, B can reasonably establish that 60 percent of the income derived from the long distance calling plan is U.S. communications income and 40 percent is international communications income based on the minutes of use data derived from customer billing records

to establish the endpoints of the communications. If, based on all the facts and circumstances, B could reasonably trace and identify the endpoints, then B would have to directly identify the endpoints between which B is paid to transmit the communications.

Example 10. Reasonable methods—system design. (i) *Facts.* D operates satellites which are designed to transmit signals through two separate ranges of signal frequencies (bands). Due to technological limitations, requirements, and practicalities, one band is designed to only transmit signals within the United States. The other band is designed to transmit signals between foreign countries and the United States. D cannot trace and identify the endpoints of each individual transmission. D does, however, track the total transmission through each band and the total income derived from transmitting signals through each band.

(ii) *Analysis.* D derives communications income as defined in paragraph (h)(2) of this section. Based on all the facts and circumstances, D can establish the two points between which D is paid to transmit, and bears the risk of transmitting, the communications using a reasonable method to establish endpoints, assuming that this method is consistently applied. In this case, D can reasonably establish that income derived from transmissions through the first band is U.S. communications income and income derived from transmissions through the second band is international communications income based on the design of the bands to establish the endpoints of the communications.

Example 11. Reasonable methods—port locations. (i) *Facts.* X provides its customer, C, with a virtual private network (VPN) so that C's U.S. headquarter office can connect and communicate with offices in the United States, Country X, Country Y, and Country Z. Assume that the VPN is only for communications with the U.S. headquarter office. X cannot trace and identify the endpoints of each transmission. C pays X a set amount each month for the entire service, regardless of the magnitude of the usage or the geographic points between which C uses the service.

(ii) *Analysis.* X derives communications income as defined in paragraph (h)(2) of this section. Based on the facts and circumstances, X can establish the two points between which X is paid to transmit, and bears the risk of transmitting, the communications using a reasonable method to establish endpoints, assuming that this method is consistently applied. In this case, X can reasonably establish that one-fourth of the income derived from the VPN service is U.S. communications income and three-fourths is international communications income based

on the location of the VPN ports to establish the endpoints of the communications.

Example 12. Indeterminate endpoints—Internet access. (i) *Facts.* B, a domestic corporation, is an Internet service provider. B charges its customer, C, a monthly lump sum for Internet access. C accesses the Internet via a telephone call, initiated by the modem of C's personal computer, to one of B's control centers, which serves as C's portal to the Internet. B transmits data sent by C from B's control center in France to a recipient in England, over the Internet. B does not maintain records as to the beginning and endpoints of the transmission.

(ii) *Analysis.* B derives communications income as defined in paragraph (h)(2) of this section. The source of B's communications income is determined under paragraph (f) of this section as income from sources within the United States because B cannot establish the two points between which it is paid to transmit the communications.

Example 13. De minimis non-communications activity. (i) *Facts.* The same facts as in Example 12.

Assume in addition that B replicates frequently requested sites on B's own servers, solely to speed up response time. Assume that B's replication of frequently requested sites would be considered a *de minimis* non-communications activity under this section.

(ii) *Analysis.* On these facts, because B's replication of frequently requested sites would be considered a *de minimis* non-communications activity, B is not required to treat the replication activity as a separate non-communications activity transaction under paragraph (h)(1) of this section. B derives communications income under paragraph (h)(2) of this section. The character and source of B's communications income are determined by demonstrating the points between which B is paid to transmit the communications, under paragraph (h)(3)(i) of this section.

Example 14. Income derived from communications and non-communications activity—bundled services. (i) *Facts.* A, a domestic corporation, offers customers local and long distance phone service, video, and Internet services. Customers pay a flat monthly fee plus 10 cents a minute for all long-distance calls, including international calls.

(ii) *Analysis.* Under paragraph (h)(1)(ii) of this section, to the extent that A's transaction with its customer consists in part of non-*de minimis* communications activity and in part of non-*de minimis* non-communications activity, each such part of the transaction must be treated as a separate transaction. A's gross income from the transaction is allocated to each such communications activity transaction and non-communications activity transaction in accordance with paragraph (h)(1)(ii) of this section. To the extent A can establish that it

derives international communications income as defined in paragraph (h)(3)(ii) of this section, A would determine the source of such income under paragraph (b)(1) of this section. If A cannot establish the points between which it is paid to transmit communications, as required by paragraph (h)(3)(i) of this section, A's communications income is from sources within the United States, as provided by paragraph (f) of this section.

Example 15. Income derived from communications and non-communications activity. (i) *Facts.* B, a domestic corporation, is paid by D, a cable system operator in Foreign Country, to provide television programs and to transmit the television programs to Foreign Country. Using its own satellite transponder, B transmits the television programs from the United States to downlink facilities owned by D in Foreign Country. D receives the transmission, unscrambles the signals, and distributes the broadcast to D's customers in Foreign Country. Assume that B's provision of television programs is a non-de minimis non-communications activity, and that B's transmission of television programs is a non-de minimis communications activity.

(ii) *Analysis.* Under paragraph (h)(1)(ii) of this section, B must treat its communications and non-communications activities as separate transactions. B's gross income is allocated to each such separate communications and non-communications activity transaction in accordance with paragraph (h)(1)(ii) of this section. Income derived by B from the transmission of television programs to D's Foreign Country downlink facility is international communications income as defined in paragraph (h)(3)(ii) of this section because B is paid to transmit communications from the United States to a foreign country.

Example 16. Income derived from foreign communications activity. (i) *Facts.* STS provides satellite capacity to B, a broadcaster located in Australia. B beams programming from Australia to the satellite. S's satellite picks the communications up in space and beams the programming over a footprint covering Southeast Asia.

(ii) *Analysis.* S derives communications income as defined in paragraph (h)(2) of this section. S's income is characterized as foreign communications income under paragraph (h)(3)(iv) of this section because S picks up the communication in space, and beams it to a footprint entirely covering a foreign area. Under paragraph (d) of this section, S's foreign communications income is from sources without the United States. If S were beaming the programming over a satellite footprint that covered area both in the United States and outside the United States, S would be required to allocate the income derived from the different types of communications activity.

(k) *Reporting and documentation requirements*—(1) *In general.* A taxpayer making an allocation of gross income under paragraph (b)(2)(iii), (b)(2)(iv), or (h)(1)(ii) of this section must satisfy the requirements in paragraphs (k)(2), (3), and (4) of this section.

(2) *Required documentation.* In all cases, a taxpayer must prepare and maintain documentation in existence when its return is filed regarding the allocation of gross income, and allocation and apportionment of expenses, losses, and other deductions, the methodologies used, and the circumstances justifying use of those methodologies. The taxpayer must make available such documentation within 30 days upon request.

(3) *Access to software.* If the taxpayer or any third party used any computer software, within the meaning of section 7612(d), to allocate gross income, or to allocate or apportion expenses, losses, and other deductions, the taxpayer must make available upon request—

(i) Any computer software executable code, within the meaning of section 7612(d), used for such purposes, including an executable copy of the version of the software used in the preparation of the taxpayer's return (including any plug-ins, supplements, etc.) and a copy of all related electronic data files. Thus, if software subsequently is upgraded or supplemented, a separate executable copy of the version used in preparing the taxpayer's return must be retained;

(ii) Any related computer software source code, within the meaning of section 7612(d), acquired or developed by the taxpayer or a related person, or primarily for internal use by the taxpayer or such person rather than for commercial distribution; and

(iii) In the case of any spreadsheet software or similar software, any formulae or links to supporting worksheets.

(4) *Use of allocation methodology.* In general, when a taxpayer allocates gross income under paragraph (b)(2)(iii), (b)(2)(iv), or (h)(1)(ii) of this section, it does so by making the allocation on a timely filed original return (including extensions). However, a taxpayer will be permitted to make

changes to such allocations made on its original return with respect to any taxable year for which the statute of limitations has not closed as follows:

(i) In the case of a taxpayer that has made a change to such allocations prior to the opening conference for the audit of the taxable year to which the allocation relates or who makes such a change within 90 days of such opening conference, if the IRS issues a written information document request asking the taxpayer to provide the documents and such other information described in paragraphs (k)(2) and (3) of this section with respect to the changed allocations and the taxpayer complies with such request within 30 days of the request, then the IRS will complete its examination, if any, with respect to the allocations for that year as part of the current examination cycle. If the taxpayer does not provide the documents and information described in paragraphs (k)(2) and (3) of this section within 30 days of the request, then the procedures described in paragraph (k)(4)(ii) of this section shall apply.

(ii) If the taxpayer changes such allocations more than 90 days after the opening conference for the audit of the taxable year to which the allocations relate or the taxpayer does not provide the documents and information with respect to the changed allocations as requested in accordance with paragraphs (k)(2) and (3) of this section, then the IRS will, in a separate cycle, determine whether an examination of the taxpayer's allocations is warranted and complete any such examination. The separate cycle will be worked as resources are available and may not have the same estimated completion date as the other issues under examination for the taxable year. The IRS may ask the taxpayer to extend the statute of limitations on assessment and collection for the taxable year to permit examination of the taxpayer's method of allocation, including an extension limited, where appropriate, to the taxpayer's method of allocation.

(1) *Effective date.* This section applies to taxable years beginning on or after December 27, 2006.

[T.D. 9305, 71 FR 77603, Dec. 27, 2006; 72 FR 3490, Jan. 25, 2007]

§ 1.863-10 Source of income from a qualified fails charge.

(a) *In general.* Except as provided in paragraphs (b) and (c) of this section, the source of income from a qualified fails charge shall be determined by reference to the residence of the taxpayer as determined under section 988(a)(3)(B)(i).

(b) *Qualified business unit exception.* The source of income from a qualified fails charge shall be determined by reference to the residence of a qualified business unit (as defined in section 989) of a taxpayer if—

(1) The taxpayer's residence, determined under section 988(a)(3)(B)(i), is the United States;

(2) The qualified business unit's residence, determined under section 988(a)(3)(B)(ii), is outside the United States;

(3) The qualified business unit is engaged in the conduct of a trade or business in the country where it is a resident; and

(4) The transaction to which the qualified fails charge relates is attributable to the qualified business unit. A transaction will be treated as attributable to a qualified business unit if it satisfies the principles of § 1.864-4(c)(5)(iii) (substituting "qualified business unit" for "U.S. office").

(c) *Effectively connected income exception.* Qualified fails charge income that arises from a transaction any income from which is (or would be if the transaction produced income) effectively connected with a United States trade or business pursuant to § 1.864-4(c) is treated as from sources within the United States, and the income from the qualified fails charge is treated as effectively connected to the conduct of a United States trade or business.

(d) *Qualified fails charge.* For purposes of this section, a qualified fails charge is a payment that—

(1) Compensates a party to a transaction that provides for delivery of a designated security (as defined in paragraph (e) of this section) in exchange for the payment of cash (delivery-versus-payment settlement) for another party's failure to deliver the specified designated security on the settlement date specified in the relevant agreement; and

Internal Revenue Service, Treasury

§ 1.864-2

(2) Is made pursuant to—

(i) A trading practice or similar guidance approved or adopted by either an agency of the United States government or the Treasury Market Practices Group, or

(ii) Any trading practice, program, policy or procedure approved by the Commissioner in guidance published in the Internal Revenue Bulletin.

(e) *Designated security.* For purposes of this section, a *designated security* means any—

(i) Debt instrument (as defined in §1.1275-1(d)) issued by the United States Treasury Department, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, or any Federal Home Loan Bank; or

(ii) Pass-through mortgage-backed security guaranteed by the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, or the Government National Mortgage Association.

(g) *Effective/applicability date.* This section is effective on February 21, 2012. This section applies to a qualified fails charge paid or accrued on or after December 8, 2010.

[T.D. 9579, 77 FR 9847, Feb. 21, 2012]

§ 1.864-1 Meaning of sale, etc.

For purposes of §§1.861 through 1.864-7, the word “sale” includes “exchange”; the word “sold” includes “exchanged”; the word “produced” includes “created”, “fabricated”, “manufactured”, “extracted”, “processed”, “cured”, and “aged”.

[T.D. 6948, 33 FR 5090, Mar. 28, 1968]

§ 1.864-2 Trade or business within the United States.

(a) *In general.* As used in part I (section 861 and following) and part II (section 871 and following), subchapter N, chapter 1 of the Code, and chapter 3 (section 1441 and following) of the Code, and the regulations thereunder, the term “engaged in trade or business within the United States” does not include the activities described in paragraphs (c) and (d) of this section, but includes the performance of personal services within the United States at any time within the taxable year ex-

cept to the extent otherwise provided in this section.

(b) *Performance of personal services for foreign employer—*(1) *Excepted services.* For purposes of paragraph (a) of this section, the term “engaged in trade or business within the United States” does not include the performance of personal services—

(i) For a nonresident alien individual, foreign partnership, or foreign corporation, not engaged in trade or business within the United States at any time during the taxable year, or

(ii) For an office or place of business maintained in a foreign country or in a possession of the United States by an individual who is a citizen or resident of the United States or by a domestic partnership or a domestic corporation, by a nonresident alien individual who is temporarily present in the United States for a period or periods not exceeding a total of 90 days during the taxable year and whose compensation for such services does not exceed in the aggregate gross amount of \$3,000.

(2) *Rules of application.* (i) As a general rule, the term “day”, as used in subparagraph (1) of this paragraph, means a calendar day during any portion of which the nonresident alien individual is physically present in the United States.

(ii) Solely for purposes of applying this paragraph, the nonresident alien individual, foreign partnership, or foreign corporation for which the nonresident alien individual is performing personal services in the United States shall not be considered to be engaged in trade or business in the United States by reason of the performance of such services by such individual.

(iii) In applying subparagraph (1) of this paragraph it is immaterial whether the services performed by the nonresident alien individual are performed as an employee for his employer or under any form of contract with the person for whom the services are performed.

(iv) In determining for purposes of subparagraph (1) of this paragraph whether compensation received by the nonresident alien individual exceeds in the aggregate a gross amount of \$3,000, any amounts received by the individual

from an employer as advances or reimbursements for travel expenses incurred on behalf of the employer shall be omitted from the compensation received by the individual, to the extent of expenses incurred, where he was required to account and did account to his employer for such expenses and has met the tests for such accounting provided in § 1.162-17 and paragraph (e)(4) of § 1.274-5. If advances or reimbursements exceed such expenses, the amount of the excess shall be included as compensation for personal services for purposes of such subparagraph. Pensions and retirement pay attributable to personal services performed in the United States are not to be taken into account for purposes of subparagraph (1) of this paragraph.

(v) See section 7701(a)(5) and § 301.7701-5 of this chapter (Procedure and Administration Regulations) for the meaning of “foreign” when applied to a corporation or partnership.

(vi) As to the source of compensation for personal services, see §§ 1.861-4 and 1.862-1.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. During 1967, A, a nonresident alien individual, is employed by the London office of a domestic partnership. A, who uses the calendar year as his taxable year, is temporarily present in the United States during 1967 for 60 days performing personal service in the United States for the London office of the partnership and is paid by that office a total gross salary of \$2,600 for such services. During 1967, A is not engaged in trade or business in the United States solely by reason of his performing such personal services for the London office of the domestic partnership.

Example 2. The facts are the same as in example 1, except that A’s total gross salary for the services performed in the United States during 1967 amounts to \$3,500, of which \$2,625 is received in 1967 and \$875 is received in 1968. During 1967, is engaged in trade or business in the United States by reason of his performance of personal services in the United States.

(c) *Trading in stocks or securities.* For purposes of paragraph (a) of this section—

(1) *In general.* The term “engaged in trade or business within the United States” does not include the effecting of transactions in the United States in

stocks or securities through a resident broker, commission agent, custodian, or other independent agent. This subparagraph shall apply to any taxpayer, including a broker or dealer in stocks or securities, except that it shall not apply if at any time during the taxable year the taxpayer has an office or other fixed place of business in the United States through which, or by the direction of which, the transactions in stocks or securities are effected. The volume of stock or security transactions effected during the taxable year shall not be taken into account in determining under this subparagraph whether the taxpayer is engaged in trade or business within the United States.

(2) *Trading for taxpayer’s own account—(i) In general.* The term “engaged in trade or business within the United States” does not include the effecting of transactions in the United States in stocks or securities for the taxpayer’s own account, irrespective of whether such transactions are effected by or through—

(a) The taxpayer himself while present in the United States,

(b) Employees of the taxpayer, whether or not such employees are present in the United States while effecting the transactions, or

(c) A broker, commission agent, custodian, or other agent of the taxpayer, whether or not such agent while effecting the transactions is (1) dependent or independent, or (2) resident, nonresident, or present, in the United States, and irrespective of whether any such employee or agent has discretionary authority to make decisions in effecting such transactions. For purposes of this paragraph, the term “securities” means any note, bond, debenture, or other evidence of indebtedness, or any evidence of an interest in or right to subscribe to or purchase any of the foregoing; and the effecting of transactions in stocks or securities includes buying, selling (whether or not by entering into short sales), or trading in stocks, securities, or contracts or options to buy or sell stocks or securities, on margin or otherwise, for the account and risk of the taxpayer, and any other activity closely related thereto (such as obtaining credit for

the purpose of effectuating such buying, selling, or trading). The volume of stock of security transactions effected during the taxable year shall not be taken into account in determining under this subparagraph whether the taxpayer is engaged in trade or business within the United States. The application of this subdivision may be illustrated by the following example:

Example. A, a nonresident alien individual who is not a dealer in stocks or securities, authorizes B, an individual resident of the United States, as his agent to effect transactions in the United States in stocks and securities for the account of A. B is empowered with complete authority to trade in stocks and securities for the account of A and to use his own discretion as to when to buy or sell for A's account. This grant of discretionary authority from A to B is also communicated in writing by A to various domestic brokerage firms through which A ordinarily effects transactions in the United States in stocks or securities. Under the agency arrangement B has the authority to place orders with the brokers, and all confirmations are to be made by the brokers to B, subject to his approval. The brokers are authorized by A to make payments to B and to charge such payments to the account of A. In addition, B is authorized to obtain and advance the necessary funds, if any, to maintain credits with the brokerage firms. Pursuant to his authority B carries on extensive trading transactions in the United States during the taxable year through the various brokerage firms for the account of A. During the taxable year A makes several visits to the United States in order to discuss with B various aspects of his trading activities and to make necessary changes in his trading policy. A is not engaged in trade or business within the United States during the taxable year solely because of the effecting by B of transactions in the United States in stocks or securities during such year for the account of A.

(ii) *Partnerships.* A nonresident alien individual, foreign partnership, foreign estate, foreign trust, or foreign corporation shall not be considered to be engaged in trade or business within the United States solely because such person is a member of a partnership (whether domestic or foreign) which, pursuant to discretionary authority granted to such partnership by such person, effects transactions in the United States in stocks or securities for the partnership's own account or solely because an employee of such

partnership, or a broker, commission agent, custodian, or other agent, pursuant to discretionary authority granted by such partnership, effects transactions in the United States in stocks or securities for the account of such partnership. This subdivision shall not apply, however, to any member of (a) a partnership which is a dealer in stocks or securities or (b) a partnership (other than a partnership in which, at any time during the last half of its taxable year, more than 50 percent of either the capital interest or the profits interest is owned, directly or indirectly, by five or fewer partners who are individuals) the principal business of which is trading in stocks or securities for its own account, if the principal office of such partnership is in the United States at any time during the taxable year. The principles of subdivision (iii) of this subparagraph for determining whether a foreign corporation has its principal office in the United States shall apply in determining under this subdivision whether a partnership has its principal office in the United States. See section 707(b)(3) and paragraph (b)(3) of §1.707-1 for rules for determining the extent of the ownership by a partner of a capital interest or profits interest in a partnership. The application of this subdivision may be illustrated by the following examples:

Example 1. B, a nonresident alien individual, is a member of partnership X, the members of which are U.S. citizens, nonresident alien individuals, and foreign corporations. The principal business of partnership X is trading in stocks or securities for its own account. Pursuant to discretionary authority granted by B, partnership X effects transactions in the United States in stocks or securities for its own account. Partnership X is not a dealer in stocks or securities, and more than 50 percent of either the capital interest or the profits interest in partnership X is owned throughout its taxable year by five or fewer partners who are individuals. B is not engaged in trade or business within the United States solely by reason of such effecting of transactions in the United States in stocks or securities by partnership X for its own account.

Example 2. The facts are the same as in example 1, except that not more than 50 percent of either the capital interest or the profits interest in partnership X is owned throughout the taxable year by five or fewer

partners who are individuals. However, partnership X does not maintain its principal office in the United States at any time during the taxable year. B is not engaged in trade or business within the United States solely by reason of the trading in stocks or securities by partnership X for its own account.

Example 3. The facts are the same as in example 1, except that, pursuant to discretionary authority granted by partnership X, domestic broker D effects transactions in the United States in stocks or securities for the account of partnership X. B is not engaged in trade or business in the United States solely by reason of such trading in stocks or securities for the account of partnership X.

(iii) *Dealers in stocks or securities and certain foreign corporations.* This subparagraph shall not apply to the effecting of transactions in the United States for the account of (a) a dealer in stocks or securities or (b) a foreign corporation (other than a corporation which is, or but for section 542(c)(7) or 543(b)(1)(C) would be, a personal holding company) the principal business of which is trading in stocks or securities for its own account, if the principal office of such corporation is in the United States at any time during the taxable year. Whether a foreign corporation's principal office is in the United States for this purpose is to be determined by comparing the activities (other than trading in stocks or securities) which the corporation conducts from its office or other fixed place of business located in the United States with the activities it conducts from its offices or other fixed places of business located outside the United States. For purposes of this subdivision, a foreign corporation is considered to have only one principal office, and an office of such corporation will not be considered to be its principal office merely because it is a statutory office of such corporation. For example, a foreign corporation which carries on most or all of its investment activities in the United States but maintains a general business office or offices outside the United States in which its management is located will not be considered as having its principal office in the United States if all or a substantial portion of the following functions is carried on at or from an office or offices located outside the United States:

- (1) Communicating with its shareholders (including the furnishing of financial reports),
- (2) Communicating with the general public,
- (3) Soliciting sales of its own stock,
- (4) Accepting the subscriptions of new stockholders,
- (5) Maintaining its principal corporate records and books of account,
- (6) Auditing its books of account,
- (7) Disbursing payments of dividends, legal fees, accounting fees, and officers' and directors' salaries,
- (8) Publishing or furnishing the offering and redemption price of the shares of stock issued by it,
- (9) Conducting meetings of its shareholders and board of directors, and
- (10) Making redemptions of its own stock.

The application of this subdivision may be illustrated by the following examples:

Example 1. (a) Foreign corporation X (not a corporation which is, or but for section 542(c)(7) or 543(b)(1)(C) would be, a personal holding company) was organized to sell its shares to nonresident alien individuals and foreign corporations and to invest the proceeds from the sale of such shares in stocks or securities in the United States. Foreign corporation X is engaged primarily in the business of investing, reinvesting, and trading in stocks or securities for its own account.

(b) For a period of three years, foreign corporation X irrevocably authorizes domestic corporation Y to exercise its discretion in effecting transactions in the United States in stocks or securities for the account and risk of foreign corporation X. Foreign corporation X issues a prospectus in which it is stated that its funds will be invested pursuant to an investment advisory contract with domestic corporation Y and otherwise advertises its services. Shares of foreign corporation X are sold to nonresident aliens and foreign corporations who are customers of the United States brokerage firms unrelated to domestic corporation Y or foreign corporation X. The principal functions performed for foreign corporation X by domestic corporation Y are the rendering of investment advice and the effecting of transactions in the United States in stocks or securities for the account of foreign corporation X. Moreover, domestic corporation Y occasionally communicates with prospective foreign investors in foreign corporation X (through speaking engagements abroad by management of domestic corporation Y, and otherwise) for the purpose of explaining the investment techniques

and policies used by domestic corporation Y in investing the funds of foreign corporation X. However, domestic corporation Y does not participate in the day-to-day conduct of other business activities of foreign corporation X.

(c) Foreign corporation X maintains a general business office or offices outside the United States in which its management is permanently located and from which it carries on, except to the extent noted heretofore, the functions enumerated in (b)(1) through (10) of this subdivision. The management of foreign corporation X at all times retains the independent power to cancel the investment advisory contract with domestic corporation Y subject to the contractual limitations contained therein and is in all other respects independent of the management of domestic corporation Y. The managing personnel of foreign corporation X communicate on a regular basis with domestic corporation Y, and periodically visit the offices of domestic corporation Y, in connection with the business activities of foreign corporation X.

(d) The principal office of foreign corporation X will not be considered to be in the United States; and, therefore, foreign corporation X is not engaged in trade or business within the United States solely by reason of its relationship with domestic corporation Y.

Example 2. The facts are the same as in example 1 except that, in lieu of having the investment advisory contract with domestic corporation Y, foreign corporation X has an office in the United States in which its employees perform the same functions as are performed by domestic corporation Y in example 1. Foreign corporation X is not engaged in trade or business within the United States during the taxable year solely because the employees located in its United States office effect transactions in the United States in stocks or securities for the account of that corporation.

(iv) *Definition of dealer in stocks or securities—(a) In general.* For purposes of this subparagraph, a dealer in stocks or securities is a merchant of stocks or securities, with an established place of business, regularly engaged as a merchant in purchasing stocks or securities and selling them to customers with a view to the gains and profits that may be derived therefrom. Persons who buy and sell, or hold, stocks or securities for investment or speculation, irrespective of whether such buying or selling constitutes the carrying on of a trade or business, and officers of corporations, members of partnerships, or fiduciaries, who in their indi-

vidual capacities buy and sell, or hold, stocks or securities for investment or speculation are not dealers in stocks or securities within the meaning of this subparagraph solely by reason of that activity. In determining under this subdivision whether a person is a dealer in stocks or securities such person's transactions in stocks or securities effected both in and outside the United States shall be taken into account.

(b) *Underwriting syndicates and dealers trading for others.* A foreign person who otherwise may be considered a dealer in stocks or securities under (a) of this subdivision shall not be considered a dealer in stocks or securities for purposes of this subparagraph—

(1) Solely because he acts as an underwriter, or as a selling group member, for the purpose of making a distribution of stocks or securities of a domestic issuer to foreign purchasers of such stocks or securities, irrespective of whether other members of the selling group distribute the stocks or securities of the domestic issuer to domestic purchasers, or

(2) Solely because of transactions effected in the United States in stocks or securities pursuant to his grant of discretionary authority to make decisions in effecting those transactions, if he can demonstrate to the satisfaction of the Commissioner that the broker, commission agent, custodian, or other agent through whom the transactions were effected acted pursuant to his written representation that the funds in respect of which such discretion was granted were the funds of a customer who is neither a dealer in stocks or securities, a partnership described in subdivision (ii)(b) of this subparagraph, or a foreign corporation described in subdivision (iii)(b) of this subparagraph.

For purposes of this (b), a foreign person includes a nonresident alien individual, a foreign corporation, or a partnership any member of which is a nonresident alien individual or a foreign corporation. This (b) shall apply only if the foreign person at no time during the taxable year has an office or other fixed place of business in the United States through which, or by the direction of which, the transactions in stocks or securities are effected.

(c) *Illustrations.* The application of this subdivision may be illustrated by the following examples:

Example 1. Foreign corporation X is a member of an underwriting syndicate organized to distribute stock issued by domestic corporation Y. Foreign corporation X distributes the stock of domestic corporation Y to foreign purchasers only. Domestic corporation M is syndicate manager of the underwriting syndicate and, pursuant to the terms of the underwriting agreement, reserves the right to sell certain quantities of the underwritten stock on behalf of all the members of the syndicate so as to engage in stabilizing transactions and to take certain other actions which may result in the realization of profit by all members of the underwriting syndicate. Foreign corporation X is not engaged in trade or business within the United States solely by reason of its participation as a member of such underwriting syndicate for the purpose of distributing the stock of domestic corporation Y to foreign purchasers or by reason of the exercise by M corporation of its discretionary authority as manager of such syndicate.

Example 2. Foreign corporation Y, a calendar year taxpayer, is a bank which trades in stocks or securities both for its own account and for the account of others. During 1967 foreign corporation Y authorizes domestic corporation M, a broker, to exercise its discretion in effecting transactions in the United States in stocks or securities for the account of B, a nonresident alien individual who has a trading account with foreign corporation Y. Foreign corporation Y furnishes a written representation to domestic corporation M to the effect that the funds in respect of which foreign corporation Y has authorized domestic corporation M to use its discretion in trading in the United States in stocks or securities are not funds in respect of which foreign corporation Y is trading for its own account but are the funds of one of its customers who is neither a dealer in stocks or securities, a partnership described in subdivision (ii)(b) of this subparagraph, or a foreign corporation described in subdivision (iii)(b) of this subparagraph. Pursuant to the discretionary authority so granted, domestic corporation M effects transactions in the United States during 1967 in stocks or securities for the account of the customer of foreign corporation Y. At no time during 1967 does foreign corporation Y have an office or other fixed place of business in the United States through which, or by the direction of which, such transactions in stocks or securities are effected by domestic corporation M. During 1967 foreign corporation Y is not engaged in trade or business within the United States solely by reason of such trading in stocks or securities during such year by domestic corporation M for the account of the

customer of foreign corporation Y. Copies of the written representations furnished to domestic corporation M should be retained by foreign corporation Y for inspection by the Commissioner, if inspection is requested.

(d) *Trading in commodities.* For purposes of paragraph (a) of this section—

(1) *In general.* The term “engaged in trade or business within the United States” does not include the effecting of transactions in the United States in commodities (including hedging transactions) through a resident broker, commission agent, custodian, or other independent agent if (i) the commodities are of a kind customarily dealt in on an organized commodity exchange, such as a grain futures or a cotton futures market, (ii) the transaction is of a kind customarily consummated at such place, and (iii) the taxpayer at no time during the taxable year has an office or other fixed place of business in the United States through which, or by the direction of which, the transactions in commodities are effected. The volume of commodity transactions effected during the taxable year shall not be taken into account in determining under this subparagraph whether the taxpayer is engaged in trade or business in the United States.

(2) *Trading for taxpayer's own account—*(i) *In general.* The term “engaged in trade or business within the United States” does not include the effecting of transactions in the United States in commodities (including hedging transactions) for the taxpayer's own account if the commodities are of a kind customarily dealt in on an organized commodity exchange and if the transaction is of a kind customarily consummated at such place. This rule shall apply irrespective of whether such transactions are effected by or through—

(a) The taxpayer himself while present in the United States,

(b) Employees of the taxpayer, whether or not such employees are present in the United States while effecting the transactions, or

(c) A broker, commission, agent, custodian, or other agent of the taxpayer, whether or not such agent while effecting the transactions is (1) dependent or independent, or (2) resident, nonresident, or present, in the United

States, and irrespective of whether any such employee or agent has discretionary authority to make decisions in effecting such transactions. The volume of commodity transactions effected during the taxable year shall not be taken into account in determining under this subparagraph whether the taxpayer is engaged in trade or business within the United States. This subparagraph shall not apply to the effecting of transactions in the United States for the account of a dealer in commodities.

(ii) *Partnerships.* A nonresident alien individual, foreign partnership, foreign estate, foreign trust, or foreign corporation shall not be considered to be engaged in trade or business within the United States solely because such person is a member of a partnership (whether domestic or foreign) which, pursuant to discretionary authority granted to such partnership by such person, effects transactions in the United States in commodities for the partnership's account or solely because an employee of such partnership, or a broker, commission agent, custodian, or other agent, pursuant to discretionary authority granted by such partnership, effects transactions in the United States in commodities for the account of such partnership. This subdivision shall not apply to any member of a partnership which is a dealer in commodities.

(iii) *Illustration.* The application of this subparagraph may be illustrated by the following example:

Example. Foreign corporation X, a calendar year taxpayer, is engaged as a merchant in the business of purchasing grain in South America and selling such cash grain outside the United States under long-term contracts for delivery in foreign countries. Foreign corporation X consummates a sale of 100,000 bushels of cash grain in February 1967 for July delivery to Sweden. Because foreign corporation X does not actually own such grain at the time of the sales transaction, such corporation buys as a hedge a July "futures contract" for delivery of 100,000 bushels of grain, in order to protect itself from loss by reason of a possible rise in the price of grain between February and July. The "futures contract" is ordered through domestic corporation Y, a futures commission merchant registered under the Commodity Exchange Act. Foreign corporation X is not engaged in trade or business within the United

States during 1967 solely by reason of its effecting of such futures contract for its own account through domestic corporation Y.

(3) *Definition of commodity.* For purposes of section 864(b)(2)(B) and this paragraph the term "commodities" does not include goods or merchandise in the ordinary channels of commerce.

(e) *Other rules.* The fact that a person is not determined by reason of this section to be not engaged in trade or business with the United States is not to be considered a determination that such person is engaged in trade or business within the United States. Whether or not such person is engaged in trade or business within the United States shall be determined on the basis of the facts and circumstances in each case. For other rules relating to the determination of whether a taxpayer is engaged in trade or business in the United States see section 875 and the regulations thereunder.

(f) *Effective date.* The provisions of this section shall apply only in the case of taxable years beginning after December 31, 1966.

[T.D. 6948, 33 FR 5090, Mar. 28, 1968, as amended by T.D. 7378, 40 FR 45435, Oct. 2, 1975]

§ 1.864-3 Rules for determining income effectively connected with U.S. business of nonresident aliens or foreign corporations.

(a) *In general.* For purposes of the Internal Revenue Code, in the case of a nonresident alien individual or a foreign corporation that is engaged in a trade or business in the United States at any time during the taxable year, the rules set forth in §§ 1.864-4 through 1.864-7 and this section shall apply in determining whether income, gain, or loss shall be treated as effectively connected for a taxable year beginning after December 31, 1966, with the conduct of a trade or business in the United States. Except as provided in sections 871 (c) and (d) and 882 (d) and (e), and the regulations thereunder, in the case of a nonresident alien individual or a foreign corporation that is at no time during the taxable year engaged in a trade or business in the United States, no income, gain, or loss shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the

United States. The general rule prescribed by the preceding sentence shall apply even though the income, gain, or loss would have been treated as effectively connected with the conduct of a trade or business in the United States if such income or gain had been received or accrued, or such loss had been sustained, in an earlier taxable year when the taxpayer was engaged in a trade or business in the United States. In applying §§ 1.864-4 through 1.864-7 and this section, the determination whether an item of income, gain, or loss is effectively connected with the conduct of a trade or business in the United States shall not be controlled by any administrative, judicial, or other interpretation made under the laws of any foreign country.

(b) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. During 1967 foreign corporation N, which uses the calendar year as the taxable year, is engaged in the business of purchasing and selling household equipment on the installment plan. During 1967 N is engaged in business in the United States by reason of the sales activities it carries on in the United States for the purpose of selling therein some of the equipment which it has purchased. During 1967 N receives installment payments of \$800,000 on sales it makes that year in the United States, and the income from sources within the United States for 1967 attributable to such payments is \$200,000. By reason of section 864(c)(3) and paragraph (b) of § 1.864-4 this income of \$200,000 is effectively connected for 1967 with the conduct of a trade or business in the United States by N. In December of 1967, N discontinues its efforts to make any further sales of household equipment in the United States, and at no time during 1968 is N engaged in a trade or business in the United States. During 1968 N receives installment payments of \$500,000 on the sales it made in the United States during 1967, and the income from sources within the United States for 1968 attributable to such payments is \$125,000. By reason of section 864(c)(1)(B) and this section, this income of \$125,000 is not effectively connected for 1968 with the conduct of a trade or business in the United States by N, even though such amount, if it had been received by N during 1967, would have been effectively connected for 1967 with the conduct of a trade or business in the United States by that corporation.

Example 2. R, a foreign holding company, owns all of the voting stock in five corporations, two of which are domestic corpora-

tions. All of the subsidiary corporations are engaged in the active conduct of a trade or business. R has an office in the United States where its chief executive officer, who is also the chief executive officer of one of the domestic corporations, spends a substantial portion of the taxable year supervising R's investment in its operating subsidiaries and performing his function as chief executive officer of the domestic operating subsidiary. R is not considered to be engaged in a trade or business in the United States during the taxable year by reason of the activities carried on in the United States by its chief executive officer in the supervision of its investment in its operating subsidiary corporations. Accordingly, the dividends from sources within the United States received by R during the taxable year from its domestic subsidiary corporations are not effectively connected for that year with the conduct of a trade or business in the United States by R.

Example 3. During the months of June through December 1971, B, a nonresident alien individual who uses the calendar year as the taxable year and the cash receipts and disbursements method of accounting, is employed in the United States by domestic corporation M for a salary of \$2,000 per month, payable semimonthly. During 1971, B receives from M salary payments totaling \$13,000, all of which income by reason of section 864(c)(2) and paragraph (c)(6)(ii) of § 1.864-4, is effectively connected for 1971 with the conduct of a trade or business in the United States by B. On December 31, 1971, B terminates his employment with M and departs from the United States. At no time during 1972 is B engaged in a trade or business in the United States. In January of 1972, B receives from M salary of \$1,000 for the last half of December 1971, and a bonus of \$1,000 in consideration of the services B performed in the United States during 1971 for that corporation. By reason of section 864(c)(1)(B) and this section, the \$2,000 received by B during 1972 from sources within the United States is not effectively connected for that year with the conduct of a trade or business in the United States, even though such amount, if it had been received by B during 1971, would have been effectively connected for 1971 with the conduct of a trade or business in the United States by B.

[T.D. 7216, 37 FR 23424, Nov. 3, 1972]

§ 1.864-4 U.S. source income effectively connected with U.S. business.

(a) *In general.* This section applies only to a nonresident alien individual or a foreign corporation that is engaged in a trade or business in the United States at some time during a taxable year beginning after December

31, 1966, and to the income, gain, or loss of such person from sources within the United States. If the income, gain, or loss of such person for the taxable year from sources within the United States consists of (1) gain or loss from the sale or exchange of capital assets or (2) fixed or determinable annual or periodical gains, profits, and income or certain other gains described in section 871(a)(1) or 881(a), certain factors must be taken into account, as prescribed by section 864(c)(2) and paragraph (c) of this section, in order to determine whether the income, gain, or loss is effectively connected for the taxable year with the conduct of a trade or business in the United States by that person. All other income, gain, or loss of such person for the taxable year from sources within the United States shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that person, as prescribed by section 864(c)(3) and paragraph (b) of this section.

(b) *Income other than fixed or determinable income and capital gains.* All income, gain, or loss for the taxable year derived by a nonresident alien individual or foreign corporation engaged in a trade or business in the United States from sources within the United States which does not consist of income, gain, or loss described in section 871(a)(1) or 881(a), or of gain or loss from the sale or exchange of capital assets, shall, for purposes of paragraph (a) of this section, be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States. This income, gain, or loss shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States, whether or not the income, gain, or loss is derived from the trade or business being carried on in the United States during the taxable year. The application of this paragraph may be illustrated by the following examples:

Example 1. M, a foreign corporation which uses the calendar year as the taxable year, is engaged in the business of manufacturing machine tools in a foreign country. It establishes a branch office in the United States during 1968 which solicits orders from cus-

tomers in the United States for the machine tools manufactured by that corporation. All negotiations with respect to such sales are carried on in the United States. By reason of its activity in the United States M is engaged in business in the United States during 1968. The income or loss from sources within the United States from such sales during 1968 is treated as effectively connected for that year with the conduct of a business in the United States by M. Occasionally, during 1968 the customers in the United States write directly to the home office of M, and the home office makes sales directly to such customers without routing the transactions through its branch office in the United States. The income or loss from sources within the United States for 1968 from these occasional direct sales by the home office is also treated as effectively connected for that year with the conduct of a business in the United States by M.

Example 2. The facts are the same as in example 1 except that during 1967 M was also engaged in the business of purchasing and selling office machines and that it used the installment method of accounting for the sales made in this separate business. During 1967 M was engaged in business in the United States by reason of the sales activities it carried on in the United States for the purpose of selling therein a number of the office machines which it had purchased. Although M discontinued this business activity in the United States in December of 1967, it received in 1968 some installment payments on the sales which it had made in the United States during 1967. The income of M for 1968 from sources within the United States which is attributable to such installment payments is effectively connected for 1968 with the conduct of a business in the United States, even though such income is not connected with the business carried on in the United States during 1968 through its sales office located in the United States for the solicitation of orders for the machine tools it manufactures.

Example 3. Foreign corporation S, which uses the calendar year as the taxable year, is engaged in the business of purchasing and selling electronic equipment. The home office of such corporation is also engaged in the business of purchasing and selling vintage wines. During 1968, S establishes a branch office in the United States to sell electronic equipment to customers, some of whom are located in the United States and the balance, in foreign countries. This branch office is not equipped to sell, and does not participate in sales of, wine purchased by the home office. Negotiations for the sales of the electronic equipment take place in the United States. By reason of the activity of its branch office in the United States, S is engaged in business in the United States during 1968. As a result of advertisements which the home office of S places in periodicals

sold in the United States, customers in the United States frequently place orders for the purchase of wines with the home office in the foreign country, and the home office makes sales of wine in 1968 directly to such customers without routing the transactions through its branch office in the United States. The income or loss from sources within the United States for 1968 from sales of electronic equipment by the branch office, together with the income or loss from sources within the United States for that year from sales of wine by the home office, is treated as effectively connected for that year with the conduct of a business in the United States by S.

(c) *Fixed or determinable income and capital gains*—(1) *Principal factors to be taken into account*—(i) *In general*. In determining for purposes of paragraph (a) of this section whether any income for the taxable year from sources within the United States which is described in section 871(a)(1) or 881(a), relating to fixed or determinable annual or periodical gains, profits, and income and certain other gains, or whether gain or loss from sources within the United States for the taxable year from the sale or exchange of capital assets, is effectively connected for the taxable year with the conduct of a trade or business in the United States, the principal tests to be applied are (a) the asset-use test, that is, whether the income, gain, or loss is derived from assets used in, or held for use in, the conduct of the trade or business in the United States, and (b) the business-activities test, that is, whether the activities of the trade or business conducted in the United States were a material factor in the realization of the income, gain, or loss.

(ii) *Special rule relating to interest on certain deposits*. For purposes of determining under section 861(a)(1)(A) (relating to interest on deposits with banks, savings and loan associations, and insurance companies paid or credited before January 1, 1976) whether the interest described therein is effectively connected for the taxable year with the conduct of a trade or business in the United States, such interest shall be treated as income from sources within the United States for purposes of applying this paragraph and § 1.864-5. If by reason of the application of this paragraph such interest is determined to be income which is not effectively

connected for the taxable year with the conduct of a trade or business in the United States, it shall then be treated as interest from sources without the United States which is not subject to the application of § 1.864-5.

(2) *Application of the asset-use test*—(i) *In general*. For purposes of subparagraph (1) of this paragraph, the asset-use test ordinarily shall apply in making a determination with respect to income, gain, or loss of a passive type where the trade or business activities as such do not give rise directly to the realization of the income, gain, or loss. However, even in the case of such income, gain, or loss, any activities of the trade or business which materially contribute to the realization of such income, gain, or loss shall also be taken into account as a factor in determining whether the income, gain, or loss is effectively connected with the conduct of a trade or business in the United States. The asset-use test is of primary significance where, for example, interest income is derived from sources within the United States by a nonresident alien individual or foreign corporation that is engaged in the business of manufacturing or selling goods in the United States. See also subparagraph (5) of this paragraph for rules applicable to taxpayers conducting a banking, financing, or similar business in the United States.

(ii) *Cases where applicable*. Ordinarily, an asset shall be treated as used in, or held for use in, the conduct of a trade or business in the United States if the asset is—

(a) Held for the principal purpose of promoting the present conduct of the trade or business in the United States; or

(b) Acquired and held in the ordinary course of the trade or business conducted in the United States, as, for example, in the case of an account or note receivable arising from that trade or business; or

(c) Otherwise held in a direct relationship to the trade or business conducted in the United States, as determined under paragraph (c)(2)(iv) of this section.

(iii) *Application of asset-use test to stock*—(a) *In general*. Except as provided

in paragraph (c)(2)(iii)(b) of this section, stock of a corporation (whether domestic or foreign) shall not be treated as an asset used in, or held for use in, the conduct of a trade or business in the United States.

(b) *Stock held by foreign insurance companies.* This paragraph (c)(2)(iii) shall not apply to stock of a corporation (whether domestic or foreign) held by a foreign insurance company unless the foreign insurance company owns 10 percent or more of the total voting power or value of all classes of stock of such corporation. For purposes of this section, section 318(a) shall be applied in determining ownership, except that in applying section 318(a)(2)(C), the phrase "10 percent" is used instead of the phrase "50 percent."

(iv) *Direct relationship between holding of asset and trade or business—(a) In general.* In determining whether an asset is held in a direct relationship to the trade or business conducted in the United States, principal consideration shall be given to whether the asset is needed in that trade or business. An asset shall be considered needed in a trade or business, for this purpose, only if the asset is held to meet the present needs of that trade or business and not its anticipated future needs. An asset shall be considered as needed in the trade or business conducted in the United States if, for example, the asset is held to meet the operating expenses of that trade or business. Conversely, an asset shall be considered as not needed in the trade or business conducted in the United States if, for example, the asset is held for the purpose of providing for (1) future diversification into a new trade or business, (2) expansion of trade or business activities conducted outside of the United States, (3) future plant replacement, or (4) future business contingencies.

(b) *Presumption of direct relationship.* Generally, an asset will be treated as held in a direct relationship to the trade or business if (1) the asset was acquired with funds generated by that trade or business, (2) the income from the asset is retained or reinvested in that trade or business, and (3) personnel who are present in the United States and actively involved in the conduct of that trade or business exer-

cise significant management and control over the investment of such asset.

(v) *Illustration.* The application of paragraph (iv) may be illustrated by the following examples:

Example 1. M, a foreign corporation which uses the calendar year as the taxable year, is engaged in industrial manufacturing in a foreign country. M maintains a branch in the United States which acts as importer and distributor of the merchandise it manufactures abroad; by reason of these branch activities. M is engaged in business in the United States during 1968. The branch in the United States is required to hold a large current cash balance for business purposes, but the amount of the cash balance so required varies because of the fluctuating seasonal nature of the branch's business. During 1968 at a time when large cash balances are not required the branch invests the surplus amount in U.S. Treasury bills. Since these Treasury bills are held to meet the present needs of the business conducted in the United States they are held in a direct relationship to that business, and the interest for 1968 on these bills is effectively connected for that year with the conduct of the business in the United States by M.

Example 2. Foreign corporation M, which uses the calendar year as the taxable year, has a branch office in the United States where it sells to customers located in the United States various products which are manufactured by that corporation in a foreign country. By reason of this activity M is engaged in business in the United States during 1997. The U.S. branch establishes in 1997 a fund to which are periodically credited various amounts which are derived from the business carried on at such branch. The amounts in this fund are invested in various securities issued by domestic corporations by the managing officers of the U.S. branch, who have the responsibility for maintaining proper investment diversification and investment of the fund. During 1997, the branch office derives from sources within the United States interest on these securities, and gains and losses resulting from the sale or exchange of such securities. Since the securities were acquired with amounts generated by the business conducted in the United States, the interest is retained in that business, and the portfolio is managed by personnel actively involved in the conduct of that business, the securities are presumed under paragraph (c)(2)(iv)(b) of this section to be held in a direct relationship to that business. However, M is able to rebut this presumption by demonstrating that the fund was established to carry out a program of future expansion and not to meet the present needs of the business conducted in the United States. Consequently, the income,

gains, and losses from the securities for 1997 are not effectively connected for that year with the conduct of a trade or business in the United States by M.

(3) *Application of the business-activities test—(i) In general.* For purposes of subparagraph (1) of this paragraph, the business-activities test shall ordinarily apply in making a determination with respect to income, gain, or loss which, even though generally of the passive type, arises directly from the active conduct of the taxpayer's trade or business in the United States. The business-activities test is of primary significance, for example, where (a) dividends or interest are derived by a dealer in stocks or securities, (b) gain or loss is derived from the sale or exchange of capital assets in the active conduct of a trade or business by an investment company, (c) royalties are derived in the active conduct of a business consisting of the licensing of patents or similar intangible property, or (d) service fees are derived in the active conduct of a servicing business. In applying the business-activities test, activities relating to the management of investment portfolios shall not be treated as activities of the trade or business conducted in the United States unless the maintenance of the investments constitutes the principal activity of that trade or business. See also subparagraph (5) of this paragraph for rules applicable to taxpayers conducting a banking, financing, or similar business in the United States.

(ii) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. Foreign corporation S is a foreign investment company organized for the purpose of investing in stocks and securities. S is not a personal holding company or a corporation which would be a personal holding company but for section 542(c)(7) or 543(b)(1)(C). Its investment portfolios consist of common stocks issued by both foreign and domestic corporations and a substantial amount of high grade bonds. The business activity of S consists of the management of its portfolios for the purpose of investing, reinvesting, or trading in stocks and securities. During the taxable year 1968, S has its principal office in the United States within the meaning of paragraph (c)(2)(iii) of § 1.864-2 and, by reason of its trading in the United States in stocks and securities, is engaged in business in the United States. The dividends

and interest derived by S during 1968 from sources within the United States, and the gains and losses from sources within the United States for such year from the sale of stocks and securities from its investment portfolios, are effectively connected for 1968 with the conduct of the business in the United States by that corporation, since its activities in connection with the management of its investment portfolios are activities of that business and such activities are a material factor in the realization of such income, gains, and losses.

Example 2. N, a foreign corporation which uses the calendar year as the taxable year, has a branch in the United States which acts as an importer and distributor of merchandise; by reason of the activities of that branch, N is engaged in business in the United States during 1968. N also carries on a business in which it licenses patents to unrelated persons in the United States for use in the United States. The businesses of the licensees in which these patents are used have no direct relationship to the business carried on in N's branch in the United States, although the merchandise marketed by the branch is similar in type to that manufactured under the patents. The negotiations and other activities leading up to the consummation of these licenses are conducted by employees of N who are not connected with the U.S. branch of that corporation, and the U.S. branch does not otherwise participate in arranging for the licenses. Royalties received by N during 1968 from these licenses are not effectively connected for that year with the conduct of its business in the United States because the activities of that business are not a material factor in the realization of such income.

(4) *Method of accounting as a factor.* In applying the asset-use test or the business-activities test described in subparagraph (1) of this paragraph, due regard shall be given to whether or not the asset, or the income, gain, or loss, is accounted for through the trade or business conducted in the United States, that is, whether or not the asset, or the income, gain, or loss, is carried on books of account separately kept for that trade or business, but this accounting test shall not by itself be controlling. In applying this subparagraph, consideration shall be given to whether the accounting treatment of an item reflects the consistent application of generally accepted accounting principles in a particular trade or business in accordance with accepted conditions or practices in that trade or

business and whether there is a consistent accounting treatment of that item from year to year by the taxpayer.

(5) *Special rules relating to banking, financing, or similar business activity*—(i) *Definition of banking, financing, or similar business.* A nonresident alien individual or a foreign corporation shall be considered for purposes of this section and paragraph (b)(2) of §1.864-5 to be engaged in the active conduct of a banking, financing, or similar business in the United States if at some time during the taxable year the taxpayer is engaged in business in the United States and the activities of such business consist of any one or more of the following activities carried on, in whole or in part, in the United States in transactions with persons situated within or without the United States:

- (a) Receiving deposits of funds from the public,
- (b) Making personal, mortgage, industrial, or other loans to the public,
- (c) Purchasing, selling, discounting, or negotiating for the public on a regular basis, notes, drafts, checks, bills of exchange, acceptances, or other evidences of indebtedness,
- (d) Issuing letters of credit to the public and negotiating drafts drawn thereunder,
- (e) Providing trust services for the public, or
- (f) Financing foreign exchange transactions for the public.

Although the fact that the taxpayer is subjected to the banking and credit laws of a foreign country shall be taken into account in determining whether he is engaged in the active conduct of a banking, financing, or similar business, the character of the business actually carried on during the taxable year in the United States shall determine whether the taxpayer is actively conducting a banking, financing, or similar business in the United States. A foreign corporation which acts merely as a financing vehicle for borrowing funds for its parent corporation or any other person who would be a related person within the meaning of section 954(d)(3) if such foreign corporation were a controlled foreign corporation shall not be considered to be engaged in the active conduct of a

banking, financing, or similar business in the United States.

(ii) *Effective connection of income from stocks or securities with active conduct of a banking, financing, or similar business.* Notwithstanding the rules in subparagraphs (2) and (3) of this paragraph with respect to the asset-use test and the business-activities test, any dividends or interest from stocks or securities, or any gain or loss from the sale or exchange of stocks or securities which are capital assets, which is from sources within the United States and derived by a nonresident alien individual or a foreign corporation in the active conduct during the taxable year of a banking, financing, or similar business in the United States shall be treated as effectively connected for such year with the conduct of that business only if the stocks or securities giving rise to such income, gain, or loss are attributable to the U.S. office through which such business is carried on and—

(a) Were acquired—

- (1) As a result of, or in the course of making loans to the public,
- (2) In the course of distributing such stocks or securities to the public, or
- (3) For the purpose of being used to satisfy the reserve requirements, or other requirements similar to reserve requirements, established by a duly constituted banking authority in the United States, or

(b) Consist of securities (as defined in subdivision (v) of this subparagraph) which are—

- (1) Payable on demand or at a fixed maturity date not exceeding 1 year from the date of acquisition,
- (2) Issued by the United States, or any agency or instrumentality thereof, or
- (3) Not described in (a) or in (1) or (2) of this (b).

However, the amount of interest from securities described in (b)(3) of this subdivision (ii) which shall be treated as effectively connected for the taxable year with the active conduct of a banking, financing, or similar business in the United States shall be an amount (but not in excess of the entire interest

for the taxable year from sources within the United States from such securities) determined by multiplying the entire interest for the taxable year from sources within the United States from such securities by a fraction the numerator of which is 10 percent and the denominator of which is the same percentage, determined on the basis of a monthly average for the taxable year, as the book value of the total of such securities held by the U.S. office through which such business is carried on bears to the book value of the total assets of such office. The amount of gain or loss, if any, for the taxable year from the sale or exchange of such securities which shall be treated as effectively connected for the taxable year with the active conduct of a banking, financing, or similar business in the United States shall be an amount (but not in excess of the entire gain or loss for the taxable year from sources within the United States from the sale or exchange of such securities) determined by multiplying the entire gain or loss for the taxable year from sources within the United States from the sale or exchange of such securities by the fraction described in the immediately preceding sentence. The percentage of the denominator of the limiting fraction for such purposes shall be the percentage obtained by separately adding the book value of such securities and such total assets held at the close of each month in the taxable year, dividing each such sum by 12, and then dividing the amount of securities so obtained by the amount of assets so obtained. This subdivision does not apply to dividends from stock owned by a foreign corporation in a domestic corporation of which more than 50 percent of the total combined voting power of all classes of stock entitled to vote is owned by such foreign corporation and which is engaged in the active conduct of a banking business in the United States. The application of this subdivision may be illustrated by the following example:

Example. Foreign corporation M, created under the laws of foreign country Y, has in the United States a branch, B, which during the taxable year is engaged in the active conduct of the banking business in the United States within the meaning of subdivision (i) of this subparagraph. During the tax-

able year M derives from sources within the United States through the activities carried on through B, \$7,500,000 interest from securities described in subdivision (b)(3) of this subdivision (ii) and \$7,500,000 gain from the sale or exchange of such securities. The monthly average, determined as of the last day of each month in the taxable year, of such securities held by B divided by the monthly average, as so determined, of the total assets held by B equals 15 percent. Under this subdivision, the amount of interest income from such securities that shall be treated as effectively connected for the taxable year with the active conduct by M of a banking business in the United States is \$5 million ($\$7,500,000 \text{ interest} \times 10\% / 15\%$), and the amount of gain from the sale or exchange of such securities that shall be treated as effectively connected for such year with the active conduct of such business is \$5 million ($\$7,500,000 \text{ gain} \times 10\% / 15\%$).

(iii) *Stocks or securities attributable to U.S. office—(a) In general.* For purposes of paragraph (c)(5)(ii) of this section, a stock or security shall be deemed to be attributable to a U.S. office only if such office actively and materially participated in soliciting, negotiating, or performing other activities required to arrange the acquisition of the stock or security. The U.S. office need not have been the only active participant in arranging the acquisition of the stock or security.

(b) *Exceptions.* A stock or security shall not be deemed to be attributable to a U.S. office merely because such office conducts one or more of the following activities:

(1) Collects or accounts for the dividends, interest, gain, or loss from such stock or security,

(2) Exercises general supervision over the activities of the persons directly responsible for carrying on the activities described in paragraph (c)(5)(iii)(a) of this section,

(3) Performs merely clerical functions incident to the acquisition of such stock or security,

(4) Exercises final approval over the execution of the acquisition of such stock or security, or

(5) Holds such stock or security in the United States or records such stock or security on its books or records as having been acquired by such office or for its account.

(c) *Effective date.* This paragraph (c)(5)(iii) shall be effective for income

includible in taxable years beginning on or after June 18, 1984, except that 26 CFR 1.864-4 (c)(5)(iii) as it appeared in the Code of Federal Regulations revised as of April 1, 1983, shall apply to income received or accrued under a loan made by the taxpayer on or before May 18, 1984, or pursuant to a written binding commitment entered into on or before May 18, 1984.

(iv) *Acquisitions in course of making loans to the public.* For purposes of subdivision (ii) of this subparagraph—

(a) A stock or security shall be considered to have been acquired in the course of making a loan to the public where, for example, such stock or security was acquired as additional consideration for the making of the loan,

(b) A stock or security shall be considered to have been acquired as a result of making a loan to the public if, for example, such stock or security was acquired by foreclosure upon a bona fide default of the loan and is held as an ordinary and necessary incident to the active conduct of the banking, financing, or similar business in the United States, and

(c) A stock or security acquired on a stock exchange or organized over-the-counter market shall be considered not to have been acquired as a result of, or in the course of, making loans to the public.

(v) *Security defined.* For purposes of this subparagraph, a security is any bill, note, bond, debenture, or other evidence of indebtedness, or any evidence of an interest in, or right to subscribe to or purchase, any of the foregoing items.

(vi) *Limitations on application of subparagraph—(a) Other business activity.* This subparagraph provides rules for determining when certain income from stocks or securities is effectively connected with the active conduct of a banking, financing, or similar business in the United States. Any dividends, interest, gain, or loss from sources within the United States which by reason of the application of subdivision (ii) of this subparagraph is not effectively connected with the active conduct by a nonresident alien individual or a foreign corporation of a banking, financing, or similar business in the United States may be effectively con-

nected for the taxable year, under subparagraph (2) or (3) of this paragraph with the conduct by such taxpayer of another trade or business in the United States, such as, for example, the business of selling or manufacturing goods or merchandise or of trading in stocks or securities for the taxpayer's own account.

(b) *Other income.* For rules relating to income, gain, or loss from sources within the United States (other than dividends or interest from, or gain or loss from the sale or exchange of, stocks or securities referred to in subdivision (ii) of this subparagraph) derived in the active conduct of a banking, financing, or similar business in the United States, see subparagraphs (2) and (3) of this paragraph and paragraph (b) of this section.

(vii) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. Foreign corporation F, which is created under the laws of foreign country X and engaged in the active conduct of the banking business in country X and a number of other foreign countries, has in the United States a branch, B, which during the taxable year is engaged in the active conduct of the banking business in the United States within the meaning of subdivision (i) of this subparagraph. In the course of its banking business in foreign countries, F receives at its branches located in country X and other foreign countries substantial deposits in U.S. dollars which are transferred to the accounts of B in the United States. During the taxable year, B actively participates in negotiating loans to residents of the United States, such as call loans to U.S. brokers, which are financed from the U.S. dollar deposits transferred to B by F. In addition, B actively participates in purchasing on the New York Stock Exchange and over-the-counter markets long-term bonds and notes issued by the U.S. Government, U.S. Treasury bills, and long-term interest-bearing bonds issued by domestic corporations and having a maturity date of less than 1 year from the date of acquisition, all of which are purchased from the deposits transferred to B by F. All of the securities so acquired are held by B and recorded on its books in the United States. Pursuant to subdivision (ii) of this subparagraph, the interest received by F during the taxable year on these loans, bonds, notes, and bills is effectively connected for such year with the active conduct by F of a banking business in the United States.

Example 2. The facts are the same as in example 1 except that B also actively participates in using part of the U.S. dollar deposits, which are transferred to it by F, to purchase on the New York Stock Exchange shares of common stock issued by various domestic corporations. All of the shares so purchased are considered to be capital assets within the meaning of section 1221 and are recorded on B's books in the United States. None of the shares so purchased were acquired for the purpose of meeting reserve or other similar requirements. During the taxable year some of the shares are sold by B on the stock exchange. Pursuant to subdivision (ii) of this subparagraph, the dividends and gains received by F during the taxable year on these shares of stock are not effectively connected with the active conduct by F of a banking, financing, or similar business in the United States.

Example 3. The facts are the same as in example 1 except that B also uses part of the U.S. dollar deposits, which are transferred to it by F, to make a loan to domestic corporation M. As part of the consideration for the loan, M gives to B a number of shares of common stock issued by M. All of these shares of stock are considered to be capital assets within the meaning of section 1221 and are recorded on B's books in the United States. During the taxable year one-half of these shares of stock is sold by B on the New York Stock Exchange. Pursuant to subdivision (ii) of this subparagraph, the dividends and gains received by F during the taxable year on these shares of stock are effectively connected for such year with the active conduct by F of a banking business in the United States.

Example 4. The facts are the same as in example 1 except that during the taxable year the home office of F in country X actively participates in negotiating loans to residents of the United States, such as call loans to U.S. brokers, which are financed by the U.S. dollar deposits received at the home office and are recorded on the books of the home office. B does not participate in negotiating these loans. Pursuant to subdivision (ii) of this subparagraph the interest received by F during the taxable year on these loans made by the home office in country X is not effectively connected with the active conduct by F of a banking, financing, or similar business in the United States.

Example 5. Foreign corporation Y, which is created under the laws of foreign country X and is engaged in the active conduct of a banking business in country X and other foreign countries, has a branch, C, in the United States that is engaged in the active conduct of a banking business in the United States, within the meaning of paragraph (c)(5)(i) of this section, during the taxable year. C handles the negotiation and acquisition of securities involved in loans made by Y to U.S.

persons. C also presents interest coupons with respect to such securities for payment, presents all such securities for payment at maturity, and maintains complete photocopy files with respect to such securities. The activities of the office of Y in country X with respect to these securities consist of giving pro forma approval of the loans, storing the original securities, and recording the securities on the books of the country X office. Pursuant to paragraphs (c)(5)(ii) and (c)(5)(iii) of this section, the U.S. source interest income received by Y during the taxable year on these securities is effectively connected for such year with the active conduct by Y of a banking business in the United States.

(6) *Income related to personal services of an individual*—(i) *Income, gain, or loss from assets.* Income or gains from sources within the United States described in section 871(a)(1) and derived from an asset, and gain or loss from sources within the United States from the sale or exchange of capital assets, realized by a nonresident alien individual engaged in a trade or business in the United States during the taxable year solely by reason of his performing personal services in the United States shall not be treated as income, gain, or loss which is effectively connected for the taxable year with the conduct of a trade or business in the United States, unless there is a direct economic relationship between his holding of the asset from which the income, gain, or loss results and his trade or business of performing the personal services.

(ii) *Wages, salaries, and pensions.* Wages, salaries, fees, compensations, emoluments, or other remunerations, including bonuses, received by a nonresident alien individual for performing personal services in the United States which, under paragraph (a) of § 1.864-2, constitute engaging in a trade or business in the United States, and pensions and retirement pay attributable to such personal services, constitute income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual if he is engaged in a trade or business in the United States at some time during the taxable year in which such income is received.

(7) *Effective date.* Paragraphs (c)(2) and (c)(6)(i) of this section are effective

for taxable years beginning on or after June 6, 1996.

[T.D. 7216, 37 FR 23425, Nov. 3, 1972, as amended by T.D. 7332, 39 FR 44232, Dec. 23, 1974; T.D. 79-58, 49 FR 21052, May 18, 1984; T.D. 8657, 61 FR 9337, Mar. 8, 1996; T.D. 9226, 70 FR 57510, Oct. 3, 2005]

§ 1.864-5 Foreign source income effectively connected with U.S. business.

(a) *In general.* This section applies only to a nonresident alien individual or a foreign corporation that is engaged in a trade or business in the United States at some time during a taxable year beginning after December 31, 1966, and to the income, gain, or loss of such person from sources without the United States. The income, gain, or loss of such person for the taxable year from sources without the United States which is specified in paragraph (b) of this section shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States, only if he also has in the United States at some time during the taxable year, but not necessarily at the time the income, gain, or loss is realized, an office or other fixed place of business, as defined in § 1.864-7, to which such income, gain, or loss is attributable in accordance with § 1.864-6. The income of such person for the taxable year from sources without the United States which is specified in paragraph (c) of this section shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States when derived by a foreign corporation carrying on a life insurance business in the United States. Except as provided in paragraphs (b) and (c) of this section, no income, gain, or loss of a nonresident alien individual or a foreign corporation for the taxable year from sources without the United States shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that person. Any income, gain, or loss described in paragraph (b) or (c) of this section which, if it were derived by the taxpayer from sources within the United States for the taxable year, would not be treated under § 1.864-4 as effectively connected for the taxable year with the conduct

of a trade or business in the United States shall not be treated under this section as effectively connected for the taxable year with the conduct of a trade or business in the United States.

(b) *Income other than income attributable to U.S. life insurance business.* Income, gain, or loss from sources without the United States other than income described in paragraph (c) of this section shall be taken into account pursuant to paragraph (a) of this section in applying §§ 1.864-6 and 1.864-7 only if it consists of—

(1) *Rents, royalties, or gains on sales of intangible property.* (i) Rents or royalties for the use of, or for the privilege of using, intangible personal property located outside the United States or from any interest in such property, including rents or royalties for the use, or for the privilege of using, outside the United States, patents, copyrights, secret processes and formulas, good will, trademarks, trade brands, franchises, and other like properties, if such rents or royalties are derived in the active conduct of the trade or business in the United States.

(ii) Gains or losses on the sale or exchange of intangible personal property located outside the United States or from any interest in such property, including gains or losses on the sale or exchange of the privilege of using, outside the United States, patents, copyrights, secret processes and formulas, good will, trademarks, trade brands, franchises, and other like properties, if such gains or losses are derived in the active conduct of the trade or business in the United States.

(iii) Whether or not such an item of income, gain, or loss is derived in the active conduct of a trade or business in the United States shall be determined from the facts and circumstances of each case. The frequency with which a nonresident alien individual or a foreign corporation enters into transactions of the type from which the income, gain, or loss is derived shall not of itself determine that the income, gain, or loss is derived in the active conduct of a trade or business.

(iv) This subparagraph shall not apply to rents or royalties for the use of, or for the privilege of using, real property or tangible personal property,

or to gain or loss from the sale or exchange of such property.

(2) *Dividends or interest, or gains or loss from sales of stocks or securities*—(i) *In general.* Dividends or interests from any transaction, or gains or losses on the sale or exchange of stocks or securities, realized by (a) a nonresident alien individual or a foreign corporation in the active conduct of a banking, financing, or similar business in the United States or (b) a foreign corporation engaged in business in the United States whose principal business is trading in stocks or securities for its own account. Whether the taxpayer is engaged in the active conduct of a banking, financing, or similar business in the United States for purposes of this subparagraph shall be determined in accordance with the principles of paragraph (c)(5)(i) of § 1.864-4.

(ii) *Substitute payments.* For purposes of this paragraph (b)(2), a substitute interest payment (as defined in § 1.861-2(a)(7)) received by a foreign person subject to tax under this paragraph (b) pursuant to a securities lending transaction or a sale-repurchase transaction (as defined in § 1.861-2(a)(7)) with respect to a security (as defined in § 1.864-6(b)(2)(ii)(c)) shall have the same character as interest income paid or accrued with respect to the terms of the transferred security. Similarly, for purposes of this paragraph (b)(2), a substitute dividend payment (as defined in § 1.861-3(a)(6)) received by a foreign person pursuant to a securities lending transaction or a sale-repurchase transaction (as defined in § 1.861-3(a)(6)) with respect to a stock shall have the same character as a distribution with respect to the transferred security. This paragraph (b)(2)(ii) is applicable to payments made after November 13, 1997.

(iii) *Incidental investment activity.* This subparagraph shall not apply to income, gain, or loss realized by a nonresident alien individual or foreign corporation on stocks or securities held, sold, or exchanged in connection with incidental investment activities carried on by that person. Thus, a foreign corporation which is primarily a holding company owning significant percentages of the stocks or securities issued by other corporations shall not be treated under this subparagraph as a

corporation the principal business of which is trading in stocks or securities for its own account, solely because it engages in sporadic purchases or sales of stocks or securities to adjust its portfolio. The application of this subdivision may be illustrated by the following example:

Example. F, a foreign corporation, owns voting stock in foreign corporations M, N, and P, its holdings in such corporations constituting 15, 20, and 100 percent, respectively, of all classes of their outstanding voting stock. Each of such stock holdings by F represents approximately 20 percent of its total assets. The remaining 40 percent of F's assets consist of other investments, 20 percent being invested in securities issued by foreign governments and in stocks and bonds issued by other corporations in which F does not own a significant percentage of their outstanding voting stock, and 20 percent being invested in bonds issued by N. None of the assets of F are held primarily for sale; but if the officers of that corporation were to decide that other investments would be preferable to its holding of such assets, F would sell the stocks and securities and reinvest the proceeds therefrom in other holdings. Any income, gain, or loss which F may derive from this investment activity is not considered to be realized by a foreign corporation described in subdivision (i) of this subparagraph.

(3) *Sale of goods or merchandise through U.S. office.* (i) Income, gain, or loss from the sale of inventory items or of property held primarily for sale to customers in the ordinary course of business, as described in section 1221(1), where the sale is outside the United States but through the office or other fixed place of business which the nonresident alien or foreign corporation has in the United States, irrespective of the destination to which such property is sent for use, consumption, or disposition.

(ii) This subparagraph shall not apply to income, gain, or loss resulting from a sales contract entered into on or before February 24, 1966. See section 102(e)(1) of the Foreign Investors Tax Act of 1966 (80 Stat. 1547). Thus, for example, the sales office in the United States of a foreign corporation enters into negotiations for the sale of 500,000 industrial bearings which the corporation produces in a foreign country for consumption in the Western Hemisphere. These negotiations culminate

in a binding agreement entered into on January 1, 1966. By its terms delivery under the contract is to be made over a period of 3 years beginning in March of 1966. Payment is due upon delivery. The income from sources without the United States resulting from this sale negotiated by the U.S. sales office of the foreign corporation shall not be taken into account under this subparagraph for any taxable year.

(iii) This subparagraph shall not apply to gains or losses on the sale or exchange of intangible personal property to which subparagraph (1) of this paragraph applies or of stocks or securities to which subparagraph (2) of this paragraph applies.

(c) *Income attributable to U.S. life insurance business.* (1) All of the income for the taxable year of a foreign corporation described in subparagraph (2) of this paragraph from sources without the United States, which is attributable to its U.S. life insurance business, shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation. Thus, in determining its life insurance company taxable income from its U.S. business for purposes of section 802, the foreign corporation shall include all of its items of income from sources without the United States which would appropriately be taken into account in determining the life insurance company taxable income of a domestic corporation. The income to which this subparagraph applies shall be taken into account for purposes of paragraph (a) of this section without reference to §§ 1.864-6 and 1.864-7.

(2) A foreign corporation to which subparagraph (1) of this paragraph applies is a foreign corporation carrying on an insurance business in the United States during the taxable year which—

(i) Without taking into account its income not effectively connected for that year with the conduct of any trade or business in the United States, would qualify as a life insurance company under part I (section 801 and following) of subchapter L, chapter 1 of the Code, if it were a domestic corporation, and

(ii) By reason of section 842 is taxable under that part on its income which is effectively connected for that year

with its conduct of any trade or business in the United States.

(d) *Excluded foreign source income.* Notwithstanding paragraphs (b) and (c) of this section, no income from sources without the United States shall be treated as effectively connected for any taxable year with the conduct of a trade or business in the United States by a nonresident alien individual or a foreign corporation if the income consists of—

(1) *Dividends, interest, or royalties paid by a related foreign corporation.* Dividends, interest, or royalties paid by a foreign corporation in which the nonresident alien individual or the foreign corporation described in paragraph (a) of this section owns, within the meaning of section 958(a), or is considered as owning, by applying the ownership rules of section 958(b), at the time such items are paid more than 50 percent of the total combined voting power of all classes of stock entitled to vote.

(2) *Subpart F income of a controlled foreign corporation.* Any income of the foreign corporation described in paragraph (a) of this section which is subpart F income for the taxable year, as determined under section 952(a), even though part of the income is attributable to amounts which, if distributed by the foreign corporation, would be distributed with respect to its stock which is owned by shareholders who are not U.S. shareholders within the meaning of section 951(b). This subparagraph shall not apply to any income of the foreign corporation which is excluded in determining its subpart F income for the taxable year for purposes of section 952(a). Thus, for example, this subparagraph shall not apply to—

(i) Foreign base company shipping income which is excluded under section 954(b)(2),

(ii) Foreign base company income amounting to less than 10 percent (30 percent in the case of taxable years of foreign corporations ending before January 1, 1976) of gross income which by reason of section 954(b)(3)(A) does not become subpart F income for the taxable year,

(iii) Any income excluded from foreign base company income under section 954(b)(4), relating to exception for

foreign corporations not availed of to reduce taxes,

(iv) Any income derived in the active conduct of a trade or business which is excluded under section 954(c)(3), or

(v) Any income received from related persons which is excluded under section 954(c)(4).

This subparagraph shall apply to the foreign corporation's entire subpart F income for the taxable year determined under section 952(a), even though no amount is included in the gross income of a U.S. shareholder under section 951(a) with respect to that subpart F income because of the minimum distribution provisions of section 963(a) or because of the reduction under section 970(a) with respect to an export trade corporation. This subparagraph shall apply only to a foreign corporation which is a controlled foreign corporation within the meaning of section 957 and the regulations thereunder. The application of this subparagraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation M, incorporated under the laws of foreign country X, is engaged in the business of purchasing and selling merchandise manufactured in foreign country Y by an unrelated person. M negotiates sales, through its sales office in the United States, of its merchandise for use outside of country X. These sales are made outside the United States, and the merchandise is sold for use outside the United States. No office maintained by M outside the United States participates materially in the sales made through its U.S. sales office. These activities constitute the only activities of M. During the taxable year M derives \$100,000 income from these sales made through its U.S. sales office, and all of such income is foreign base company sales income by reason of section 954(d)(2) and paragraph (b) of § 1.954-3. The entire \$100,000 is also subpart F income, determined under section 952(a). In addition, all of this income would, without reference to section 864(c)(4)(D)(ii) and this subparagraph, be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by M. Through its entire taxable year 60 percent of the one class of stock of M is owned within the meaning of section 958(a) by U.S. shareholders, as defined in section 951(b), and 40 percent of its one class of stock is owned within the meaning of section 958(a) by persons who are not U.S. shareholders, as defined in section 951(b). Although only \$60,000 of the subpart F income of M for the taxable

year is includible in the income of the U.S. shareholders under section 951(a), the entire subpart F income of \$100,000 constitutes income which, by reason of section 864(c)(4)(D)(ii) and this subparagraph, is not effectively connected for the taxable year with the conduct of a trade or business in the United States by M.

Example 2. The facts are the same as in example 1 except that the foreign base company sales income amounts to \$150,000 determined in accordance with paragraph (d)(3)(i) of § 1.954-1, and that M also has gross income from sources without the United States of \$50,000 from sales, through its sales office in the United States, of merchandise for use in country X. These sales are made outside the United States. All of this income would, without reference to section 864(c)(4)(D)(ii) and this subparagraph, be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by M. Since the foreign base company income of \$150,000 amounts to 75 percent of the entire gross income of \$200,000, determined as provided in paragraph (d)(3)(ii) of § 1.954-1, the entire \$200,000 constitutes foreign base company income under section 954(b)(3)(B). Assuming that M has no amounts to be taken into account under paragraphs (1), (2), (4), and (5) of section 954(b), the \$200,000 is also subpart F income, determined under section 952(a). This subpart F income of \$200,000 constitutes income which, by reason of section 864(c)(4)(D)(ii) and this subparagraph, is not effectively connected for the taxable year with the conduct of a trade or business in the United States by M.

(3) *Interest on certain deposits.* Interest which, by reason of section 861(a)(1)(A) (relating to interest on deposits with banks, savings and loan associations, and insurance companies paid or credited before January 1, 1976) and paragraph (c) of § 1.864-4, is determined to be income from sources without the United States because it is not effectively connected for the taxable year with the conduct of a trade or business in the United States by the non-resident alien individual or foreign corporation.

[T.D. 7216, 37 FR 23429, Nov. 3, 1972, as amended by T.D. 7893, 48 FR 22507, May 19, 1983; T.D. 8735, 62 FR 53501, Oct. 14, 1997]

§ 1.864-6 Income, gain, or loss attributable to an office or other fixed place of business in the United States.

(a) *In general.* Income, gain, or loss from sources without the United States

which is specified in paragraph (b) of § 1.864-5 and received by a nonresident alien individual or a foreign corporation engaged in a trade or business in the United States at some time during a taxable year beginning after December 31, 1966, shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States only if the income, gain, or loss is attributable under paragraphs (b) and (c) of this section to an office or other fixed place of business, as defined in § 1.864-7, which the taxpayer has in the United States at some time during the taxable year.

(b) *Material factor test*—(1) *In general.* For purposes of paragraph (a) of this section, income, gain, or loss is attributable to an office or other fixed place of business which a nonresident alien individual or a foreign corporation has in the United States only if such office or other fixed place of business is a material factor in the realization of the income, gain, or loss, and if the income, gain, or loss is realized in the ordinary course of the trade or business carried on through that office or other fixed place of business. For this purpose, the activities of the office or other fixed place of business shall not be considered to be a material factor in the realization of the income, gain, or loss unless they provide a significant contribution to, by being an essential economic element in, the realization of the income, gain, or loss. Thus, for example, meetings in the United States of the board of directors of a foreign corporation do not of themselves constitute a material factor in the realization of income, gain, or loss. It is not necessary that the activities of the office or other fixed place of business in the United States be a major factor in the realization of the income, gain, or loss. An office or other fixed place of business located in the United States at some time during a taxable year may be a material factor in the realization of an item of income, gain, or loss for that year even though the office or other fixed place of business is not present in the United States when the income, gain, or loss is realized.

(2) *Application of material factor test to specific classes of income.* For purposes of paragraph (a) of this section, an of-

fice or other fixed place of business which a nonresident alien individual or a foreign corporation, engaged in a trade or business in the United States at some time during the taxable year, had in the United States, shall be considered a material factor in the realization of income, gain, or loss consisting of—

(i) *Rents, royalties, or gains on sales of intangible property.* Rents, royalties, or gains or losses, from intangible personal property specified in paragraph (b)(1) of § 1.864-5, if the office or other fixed place of business either actively participates in soliciting, negotiating, or performing other activities required to arrange, the lease, license, sale, or exchange from which such income, gain, or loss is derived or performs significant services incident to such lease, license, sale, or exchange. An office or other fixed place of business in the United States shall not be considered to be a material factor in the realization of income, gain, or loss for purposes of this subdivision merely because the office or other fixed place of business conducts one or more of the following activities: (a) Develops, creates, produces, or acquires and adds substantial value to, the property which is leased, licensed, or sold, or exchanged, (b) collects or accounts for the rents, royalties, gains, or losses, (c) exercises general supervision over the activities of the persons directly responsible for carrying on the activities or services described in the immediately preceding sentence, (d) performs merely clerical functions incident to the lease, license, sale, or exchange or (e) exercises final approval over the execution of the lease, license, sale, or exchange. The application of this subdivision may be illustrated by the following examples:

Example 1. F, a foreign corporation, is engaged in the active conduct of the business of licensing patents which it has either purchased or developed in the United States. F has a business office in the United States. Licenses for the use of such patents outside the United States are negotiated by offices of F located outside the United States, subject to approval by an officer of such corporation located in the U.S. office. All services which are rendered to F's foreign licensees are performed by employees of F's offices located outside the United States. None of

the income, gain, or loss resulting from the foreign licenses so negotiated by F is attributable to its business office in the United States.

Example 2. N, a foreign corporation, is engaged in the active conduct of the business of distributing motion picture films and television programs. N does not distribute such films or programs in the United States. The foreign distribution rights to these films and programs are acquired by N's U.S. business office from the U.S. owners of these films and programs. Employees of N's offices located in various foreign countries carry on in such countries all the solicitations and negotiations for the licensing of these films and programs to licensees located in such countries and provide the necessary incidental services to the licensees. N's U.S. office collects the rentals from the foreign licensees and maintains the necessary records of income and expense. Officers of N located in the United States also maintain general supervision over the employees of the foreign offices, but the foreign employees conduct the day to day business of N outside the United States of soliciting, negotiating, or performing other activities required to arrange the foreign licenses. None of the income, gain, or loss resulting from the foreign licenses so negotiated by N is attributable to N's U.S. office.

(ii) *Dividends or interest, or gains or losses from sales of stock or securities—(a) In general.* Dividends or interest from any transaction, or gains or losses on the sale or exchange of stocks or securities, specified in paragraph (b)(2) of § 1.864-5, if the office or other fixed place of business either actively participates in soliciting, negotiating, or performing other activities required to arrange, the issue, acquisition, sale, or exchange, of the asset from which such income, gain, or loss is derived or performs significant services incident to such issue, acquisition, sale, or exchange. An office or other fixed place of business in the United States shall not be considered to be a material factor in the realization of income, gain, or loss for purposes of this subdivision merely because the office or other fixed place of business conducts one or more of the following activities: (1) Collects or accounts for the dividends, interest, gains, or losses, (2) exercises general supervision over the activities of the persons directly responsible for carrying on the activities or services described in the immediately preceding sentence, (3) performs merely clerical

functions incident to the issue, acquisition, sale, or exchange, or (4) exercises final approval over the execution of the issue, acquisition, sale, or exchange.

(b) *Effective connection of income from stocks or securities with active conduct of a banking, financing, or similar business.* Notwithstanding (a) of this subdivision (ii), the determination as to whether any dividends or interest from stocks or securities, or gain or loss from the sale or exchange of stocks or securities which are capital assets, which is from sources without the United States and derived by a nonresident alien individual or a foreign corporation in the active conduct during the taxable year of a banking, financing, or similar business in the United States, shall be treated as effectively connected for such year with the active conduct of that business shall be made by applying the principles of paragraph (c)(5)(ii) of § 1.864-4 for determining whether income, gain, or loss of such type from sources within the United States is effectively connected for such year with the active conduct of that business.

(c) *Security defined.* For purposes of this subdivision (ii), a security is any bill, note, bond, debenture, or other evidence of indebtedness, or any evidence of an interest in, or right to subscribe or to purchase, any of the foregoing items.

(d) *Limitations on application of rules on banking, financing, or similar business—(1) Trading for taxpayer's own account.* The provisions of (b) of this subdivision (ii) apply for purposes of determining when certain income, gain, or loss from stocks or securities is effectively connected with the active conduct of a banking, financing, or similar business in the United States. Any dividends, interest, gain, or loss from sources without the United States which by reason of the application of (b) of this subdivision (ii) is not effectively connected with the active conduct by a foreign corporation of a banking, financing, or similar business in the United States may be effectively connected for the taxable year, under (a) of this subdivision (ii), with the conduct by such taxpayer of a trade or business in the United States which consists of trading in stocks or securities for the taxpayer's own account.

(2) *Other income.* For rules relating to dividends or interest from sources without the United States (other than dividends or interest from, or gain or loss from the sale or exchange of, stocks or securities referred to in (b) of this subdivision (ii)) derived in the active conduct of a banking, financing, or similar business in the United States, see (a) of this subdivision (ii).

(iii) *Sale of goods or merchandise through U.S. office.* Income, gain, or loss from sales of goods or merchandise specified in paragraph (b)(3) of §1.864-5, if the office or other fixed place of business actively participates in soliciting the order, negotiating the contract of sale, or performing other significant services necessary for the consummation of the sale which are not the subject of a separate agreement between the seller and the buyer. The office or other fixed place of business in the United States shall be considered a material factor in the realization of income, gain, or loss from a sale made as a result of a sales order received in such office or other fixed place of business except where the sales order is received unsolicited and that office or other fixed place of business is not held out to potential customers as the place to which such sales orders should be sent. The income, gain, or loss must be realized in the ordinary course of the trade or business carried on through the office or other fixed place of business in the United States. Thus, if a foreign corporation is engaged solely in a manufacturing business in the United States, the income derived by its office in the United States as a result of an occasional sale outside the United States is not attributable to the U.S. office if the sales office of the manufacturing business is located outside the United States. On the other hand, if a foreign corporation establishes a sales office in the United States to sell for consumption in the Western Hemisphere merchandise which the corporation produces in Africa, the income derived by the sales office in the United States as a result of an occasional sale made by it in Europe shall be attributable to the U.S. sales office. An office or other fixed place of business in the United States shall not be considered to be a material factor in the realiza-

tion of income, gain, or loss for purposes of this subdivision merely because of one or more of the following activities: (a) The sale is made subject to the final approval of such office or other fixed place of business, (b) the property sold is held in, and distributed from, such office or other fixed place of business, (c) samples of the property sold are displayed (but not otherwise promoted or sold) in such office or other fixed place of business, or (d) such office or other fixed place of business performs merely clerical functions incident to the sale. Activities carried on by employees of an office or other fixed place of business constitute activities of that office or other fixed place of business.

(3) *Limitation where foreign office is a material factor in realization of income—*

(i) *Goods or merchandise destined for foreign use, consumption, or disposition.* Notwithstanding subparagraphs (1) and (2) of this paragraph, an office or other fixed place of business which a non-resident alien individual or a foreign corporation has in the United States shall not be considered, for purposes of paragraph (a) of this section, to be a material factor in the realization of income, gain, or loss from sales of goods or merchandise specified in paragraph (b)(3) of §1.864-5 if the property is sold for use, consumption, or disposition outside the United States and an office or other fixed place of business, as defined in §1.864-7, which such non-resident alien individual or foreign corporation has outside the United States participates materially in the sale. For this purpose an office or other fixed place of business which the taxpayer has outside the United States shall be considered to have participated materially in a sale made through the office or other fixed place of business in the United States if the office or other fixed place of business outside the United States actively participates in soliciting the order resulting in the sale, negotiating the contract of sale, or performing other significant services necessary for the consummation of the sale which are not the subject of a separate agreement between the seller and buyer. An office or other fixed place of business which the taxpayer has outside the United States shall not

be considered to have participated materially in a sale merely because of one or more of the following activities: (a) The sale is made subject to the final approval of such office or other fixed place of business, (b) the property sold is held in, and distributed from, such office or other fixed place of business, (c) samples of the property sold are displayed (but not otherwise promoted or sold) in such office or other fixed place of business, (d) such office or other fixed place of business is used for purposes of having title to the property pass outside the United States, or (e) such office or other fixed place of business performs merely clerical functions incident to the sale.

(ii) *Rules for determining country of use, consumption, or disposition—(a) In general.* As a general rule, personal property which is sold to an unrelated person shall be presumed for purposes of this subparagraph to have been sold for use, consumption, or disposition in the country of destination of the property sold; for such purpose, the occurrence in a country of a temporary interruption in shipment of property shall not cause that country to be considered the country of destination. However, if at the time of a sale of personal property to an unrelated person the taxpayer knew, or should have known from the facts and circumstances surrounding the transaction, that the property probably would not be used, consumed, or disposed of in the country of destination, the taxpayer must determine the country of ultimate use, consumption, or disposition of the property or the property shall be presumed to have been sold for use, consumption, or disposition in the United States. A taxpayer who sells personal property to a related person shall be presumed to have sold the property for use, consumption, or disposition in the United States unless the taxpayer establishes the use made of the property by the related person; once he has established that the related person has disposed of the property, the rules in the two immediately preceding sentences relating to sales to an unrelated person shall apply at the first stage in the chain of distribution at which a sale is made by a related person to an unrelated person. Not-

withstanding the preceding provisions of this subdivision (a), a taxpayer who sells personal property to any person whose principal business consists of selling from inventory to retail customers at retail outlets outside the United States may assume at the time of the sale to that person that the property will be used, consumed, or disposed of outside the United States. For purposes of this (a), a person is related to another person if either person owns or controls directly or indirectly the other, or if any third person or persons own or control directly or indirectly both. For this purpose, the term “control” includes any kind of control, whether or not legally enforceable, and however, exercised or exercisable. For illustrations of the principles of this subdivision, see paragraph (a)(3)(iv) of § 1.954-3.

(b) *Fungible goods.* For purposes of this subparagraph, a taxpayer who sells to a purchaser personal property which because of its fungible nature cannot reasonably be specifically traced to other purchasers and to the countries of ultimate use, consumption, or disposition shall, unless the taxpayer establishes a different disposition as being proper, treat that property as being sold, for ultimate use, consumption, or disposition in those countries, and to those other purchasers, in the same proportions in which property from the fungible mass of the first purchaser is sold in the ordinary course of business by such first purchaser. No apportionment is required to be made, however, on the basis of sporadic sales by the first purchaser. This (b) shall apply only in a case where the taxpayer knew, or should have known from the facts and circumstances surrounding the transaction, the manner in which the first purchaser disposes of property from the fungible mass.

(iii) *Illustration.* The application of this subparagraph may be illustrated by the following example:

Example. Foreign corporation M has a sales office in the United States during the taxable year through which it sells outside the United States for use in foreign countries industrial electrical generators which such corporation manufactures in a foreign country. M is not a controlled foreign corporation within the meaning of section 957 and the regulations thereunder, and, by reason of its

activities in the United States, is engaged in business in the United States during the taxable year. The generators require specialized installation and continuous adjustment and maintenance services. M has an office in foreign country X which is the only organization qualified to perform these installation, adjustment, and maintenance services. During the taxable year M sells several generators through its U.S. office for use in foreign country Y under sales contracts which also provide for installation, adjustment, and maintenance by its office in country X. The generators are installed in country Y by employees of M's office in country X, who also are responsible for the servicing of the equipment. Since the office of M in country X performs significant services incident to these sales which are necessary for their consummation and are not the subject of a separate agreement between M and the purchaser, the U.S. office of M is not considered to be a material factor in the realization of the income from the sales and, for purposes of paragraph (a) of this section, such income is not attributable to the U.S. office of that corporation.

(c) *Amount of income, gain, or loss allocable to U.S. office*—(1) *In general.* If, in accordance with paragraph (b) of this section, an office or other fixed place of business which a nonresident alien individual or a foreign corporation has in the United States at some time during the taxable year is a material factor in the realization for that year of an item of income, gain, or loss specified in paragraph (b) of § 1.864-5, such item of income, gain, or loss shall be considered to be allocable in its entirety to that office or other fixed place of business. In no case may any income, gain, or loss for the taxable year from sources without the United States, or part thereof, be allocable under this paragraph to an office or other fixed place of business which a nonresident alien individual or a foreign corporation has in the United States if the taxpayer is at no time during the taxable year engaged in a trade or business in the United States.

(2) *Special limitation in case of sales of goods or merchandise through U.S. office.* Notwithstanding subparagraph (1) of this paragraph, in the case of a sale of goods or merchandise specified in paragraph (b)(3) of § 1.864-5, which is not a sale to which paragraph (b)(3)(i) of this section applies, the amount of income which shall be considered to be allocable to the office or other fixed place

of business which the nonresident alien individual or foreign corporation has in the United States shall not exceed the amount which would be treated as income from sources within the United States if the taxpayer had sold the goods or merchandise in the United States. See, for example, section 863(b)(2) and paragraph (b) of § 1.863-3, which prescribes, as available methods for determining the income from sources within the United States, the independent factory or production price method, the gross sales and property apportionment method, and any other method regularly employed by the taxpayer which more clearly reflects taxable income from such sources than those specifically authorized.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation M, which is not a controlled foreign corporation within the meaning of section 957 and the regulations thereunder, manufactures machinery in a foreign country and sells the machinery outside the United States through its sales office in the United States for use in foreign countries. Title to the property which is sold is transferred to the foreign purchaser outside the United States, but no office or other fixed place of business of M in a foreign country participates materially in the sale made through its U.S. office. During the taxable year M derives a total taxable income (determined as though M were a domestic corporation) of \$250,000 from these sales. If the sales made through the U.S. office for the taxable year had been made in the United States and the property had been sold for use in the United States, the taxable income from sources within the United States from such sales would have been \$100,000, determined as provided in section 863 and 882(c) and the regulations thereunder. The taxable income which is allocable to M's U.S. sales office pursuant to this paragraph and which is effectively connected for the taxable year with the conduct of a trade or business within the United States by that corporation is \$100,000.

Example 2. Foreign corporation N, which is not a controlled foreign corporation within the meaning of section 957 and the regulations thereunder, has an office in a foreign country which purchases merchandise and sells it through its sales office in the United States for use in various foreign countries, such sales being made outside the United States and title to the property passing outside the United States. No other office of N

participates materially in these sales made through its U.S. office. By reason of its sales activities in the United States, N is engaged in business in the United States during the taxable year. During the taxable year N derives taxable income (determined as though N were a domestic corporation) of \$300,000 from these sales made through its U.S. sales office. If the sales made through the U.S. office for the taxable year had been made in the United States and the property had been sold for use in the United States, the taxable income from sources within the United States from such sales would also have been \$300,000, determined as provided in sections 861 and 882(c) and the regulations thereunder. The taxable income which is allocable to N's U.S. sales office pursuant to this paragraph and which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation is \$300,000.

Example 3. The facts are the same as in example 2, except that N has an office in a foreign country which participates materially in the sales which are made through its U.S. office. The taxable income which is allocable to N's U.S. sales office is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation.

[T.D. 7216, 37 FR 23431, Nov. 3, 1972]

§ 1.864-7 Definition of office or other fixed place of business.

(a) *In general.* (1) This section applies for purposes of determining whether a nonresident alien individual or a foreign corporation that is engaged in a trade or business in the United States at some time during a taxable year beginning after December 31, 1966, has an office or other fixed place of business in the United States for purposes of applying section 864(c)(4)(B) and § 1.864-6 to income, gain, or loss specified in paragraph (b) of § 1.864-5 from sources without the United States or has an office or other fixed place of business outside the United States for purposes of applying section 864(c)(4)(B)(iii) and paragraph (b)(3)(i) of § 1.864-6 to sales of goods or merchandise for use, consumption, or disposition outside the United States.

(2) In making a determination under this section due regard shall be given to the facts and circumstances of each case, particularly to the nature of the taxpayer's trade or business and the physical facilities actually required by

the taxpayer in the ordinary course of the conduct of his trade or business.

(3) The law of a foreign country shall not be controlling in determining whether a nonresident alien individual or a foreign corporation has an office or other fixed place of business.

(b) *Fixed facilities—(1) In general.* As a general rule, an office or other fixed place of business is a fixed facility, that is, a place, site, structure, or other similar facility, through which a nonresident alien individual or a foreign corporation engages in a trade or business. For this purpose an office or other fixed place of business shall include, but shall not be limited to, a factory; a store or other sales outlet; a workshop; or a mine, quarry, or other place of extraction of natural resources. A fixed facility may be considered an office or other fixed place of business whether or not the facility is continuously used by a nonresident alien individual or foreign corporation.

(2) *Use of another person's office or other fixed place of business.* A nonresident alien individual or a foreign corporation shall not be considered to have an office or other fixed place of business merely because such alien individual or foreign corporation uses another person's office or other fixed place of business, whether or not the office or place of business of a related person, through which to transact a trade or business, if the trade or business activities of the alien individual or foreign corporation in that office or other fixed place of business are relatively sporadic or infrequent, taking into account the overall needs and conduct of that trade or business.

(c) *Management activity.* A foreign corporation shall not be considered to have an office or other fixed place of business merely because a person controlling that corporation has an office or other fixed place of business from which general supervision and control over the policies of the foreign corporation are exercised. The fact that top management decisions affecting the foreign corporation are made in a country shall not of itself mean that the foreign corporation has an office or other fixed place of business in that country. For example, a foreign sales corporation which is a wholly owned

subsidiary of a domestic corporation shall not be considered to have an office or other fixed place of business in the United States merely because of the presence in the United States of officers of the domestic parent corporation who are generally responsible only for the policy decisions affecting the foreign sales corporation, provided that the foreign corporation has a chief executive officer, whether or not he is also an officer of the domestic parent corporation, who conducts the day-to-day trade or business of the foreign corporation from a foreign office. The result in this example would be the same even if the executive officer should (1) regularly confer with the officers of the domestic parent corporation, (2) occasionally visit the U.S. office of the domestic parent corporation, and (3) during such visits to the United States temporarily conduct the business of the foreign subsidiary corporation out of the domestic parent corporation's office in the United States.

(d) *Agent activity*—(1) *Dependent agents*—(i) *In general*. In determining whether a nonresident alien individual or a foreign corporation has an office or other fixed place of business, the office or other fixed place of business of an agent who is not an independent agent, as defined in subparagraph (3) of this paragraph, shall be disregarded unless such agent (a) has the authority to negotiate and conclude contracts in the name of the nonresident alien individual or foreign corporation, and regularly exercises that authority, or (b) has a stock of merchandise belonging to the nonresident alien individual or foreign corporation from which orders are regularly filed on behalf of such alien individual or foreign corporation. A person who purchases goods from a nonresident alien individual or a foreign corporation shall not be considered to be an agent for such alien individual or foreign corporation for purposes of this paragraph where such person is carrying on such purchasing activities in the ordinary course of its own business, even though such person is related in some manner to the nonresident alien individual or foreign corporation. For example, a wholly owned domestic subsidiary corporation of a

foreign corporation shall not be treated as an agent of the foreign parent corporation merely because the subsidiary corporation purchases goods from the foreign parent corporation and resells them in its own name. However, if the domestic subsidiary corporation regularly negotiates and concludes contracts in the name of its foreign parent corporation or maintains a stock of merchandise from which it regularly fills orders on behalf of the foreign parent corporation, the office or other fixed place of business of the domestic subsidiary corporation shall be treated as the office or other fixed place of business of the foreign parent corporation unless the domestic subsidiary corporation is an independent agent within the meaning of subparagraph (3) of this paragraph.

(ii) *Authority to conclude contracts or fill orders*. For purposes of subdivision (i) of this subparagraph, an agent shall be considered regularly to exercise authority to negotiate and conclude contracts or regularly to fill orders on behalf of his foreign principal only if the authority is exercised, or the orders are filled, with some frequency over a continuous period of time. This determination shall be made on the basis of the facts and circumstances in each case, taking into account the nature of the business of the principal; but, in all cases, the frequency and continuity tests are to be applied conjunctively. Regularity shall not be evidenced by occasional or incidental activity. An agent shall not be considered regularly to negotiate and conclude contracts on behalf of his foreign principal if the agent's authority to negotiate and conclude contracts is limited only to unusual cases or such authority must be separately secured by the agent from his principal with respect to each transaction effected.

(2) *Independent agents*. The office or other fixed place of business of an independent agent, as defined in subparagraph (3) of this paragraph, shall not be treated as the office or other fixed place of business of his principal who is a nonresident alien individual or a foreign corporation, irrespective of whether such agent has authority to negotiate and conclude contracts in the

name of his principal, and regularly exercises that authority, or maintains a stock of goods from which he regularly fills orders on behalf of his principal.

(3) *Definition of independent agent*—(i) *In general.* For purposes of this paragraph, the term “independent agent” means a general commission agent, broker, or other agent of an independent status acting in the ordinary course of his business in that capacity. Thus, for example, an agent who, in pursuance of his usual trade or business, and for compensation, sells goods or merchandise consigned or entrusted to his possession, management, and control for that purpose by or for the owner of such goods or merchandise is an independent agent.

(ii) *Related persons.* The determination of whether an agent is an independent agent for purposes of this paragraph shall be made without regard to facts indicating that either the agent or the principal owns or controls directly or indirectly the other or that a third person or persons own or control directly or indirectly both. For example, a wholly owned domestic subsidiary corporation of a foreign corporation which acts as an agent for the foreign parent corporation may be treated as acting in the capacity of independent agent for the foreign parent corporation. The facts and circumstances of a specific case shall determine whether the agent, while acting for his principal, is acting in pursuance of his usual trade or business and in such manner as to constitute him an independent agent in his relations with the nonresident alien individual or foreign corporation.

(iii) *Exclusive agents.* Where an agent who is otherwise an independent agent within the meaning of subdivision (i) of this subparagraph acts in such capacity exclusively, or almost exclusively, for one principal who is a nonresident alien individual or a foreign corporation, the facts and circumstances of a particular case shall be taken into account in determining whether the agent, while acting in that capacity, may be classified as an independent agent.

(e) *Employee activity.* Ordinarily, an employee of a nonresident alien individual or a foreign corporation shall be

treated as a dependent agent to whom the rules of paragraph (d)(1) of this section apply if such employer does not in and of itself have a fixed facility (as defined in paragraph (b) of this section) in the United States or outside the United States, as the case may be. However, where the employee, in the ordinary course of his duties, carries on the trade or business of his employer in or through a fixed facility of such employer which is regularly used by the employee in the course of carrying out such duties, such fixed facility shall be considered the office or other fixed place of business of the employer, irrespective of the rules of paragraph (d)(1) of this section. The application of this paragraph may be illustrated by the following example:

Example. M, a foreign corporation, opens a showroom office in the United States for the purpose of promoting its sales of merchandise which it purchases in foreign country X. The employees of the U.S. office, consisting of salesmen and general clerks, are empowered only to run the office, to arrange for the appointment of distributing agents for the merchandise offered by M, and to solicit orders generally. These employees do not have the authority to negotiate and conclude contracts in the name of M, nor do they have a stock of merchandise from which to fill orders on behalf of M. Any negotiations entered into by these employees are under M's instructions and subject to its approval as to any decision reached. The only independent authority which the employees have is in the appointment of distributors to whom M is to sell merchandise, but even this authority is subject to the right of M to approve or disapprove these buyers on receipt of information as to their business standing. Under the circumstances, this office used by a group of salesmen for sales promotion is a fixed place of business which M has in the United States.

(f) *Office or other fixed place of business of a related person.* The fact that a nonresident alien individual or a foreign corporation is related in some manner to another person who has an office or other fixed place of business shall not of itself mean that such office or other fixed place of business of the other person is the office or other fixed place of business of the nonresident alien individual or foreign corporation. Thus, for example, the U.S. office of foreign corporation M, a wholly owned

subsidiary corporation of foreign corporation N, shall not be considered the office or other fixed place of business of N unless the facts and circumstances show that N is engaged in trade or business in the United States through that office or other fixed place of business. However, see paragraph (b)(2) of this section.

(g) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. S, a foreign corporation, is engaged in the business of buying and selling tangible personal property. S is a wholly owned subsidiary of P, a domestic corporation engaged in the business of buying and selling similar property, which has an office in the United States. Officers of P are generally responsible for the policies followed by S and are directors of S, but S has an independent group of officers, none of whom are regularly employed in the United States. In addition to this group of officers, S has a chief executive officer, D, who is also an officer of P but who is permanently stationed outside the United States. The day-to-day conduct of S's business is handled by D and the other officers of such corporation, but they regularly confer with the officers of P and on occasion temporarily visit P's offices in the United States, at which time they continue to conduct the business of S. S does not have an office or other fixed place of business in the United States for purposes of this section.

Example 2. The facts are the same as in example 1 except that, on rare occasions, an employee of P receives an order which he, after consultation with officials of S and because P cannot fill the order, accepts on behalf of S rather than on behalf of P. P does not hold itself out as a person which those wishing to do business with S should contact. Assuming that orders for S are seldom handled in this manner and that they do not constitute a significant part of that corporation's business, S shall not be considered to have an office or other fixed place of business in the United States because of these activities of an employee of P.

Example 3. The facts are the same as in example 1 except that all orders received by S are subject to review by an officer of P before acceptance. S has a business office in the United States.

Example 4. S, a foreign corporation organized under the laws of Puerto Rico, is engaged in the business of manufacturing dresses in Puerto Rico and is entitled to an income tax exemption under the Puerto Rico Industrial Incentive Act of 1963. S is a wholly owned subsidiary of P, a domestic corporation engaged in the business of buying and selling dresses to customers in the United

States. S sells most of the dresses it produces to P, the assumption being made that the income from these sales is derived from sources without the United States. P in turn sells these dresses in the United States in its name and through the efforts of its own employees and of distributors appointed by it. S does not have a fixed facility in the United States, and none of its employees are stationed in the United States. On occasion, employees of S visit the office of P in the United States, and executives of P visit the office of S in Puerto Rico, to discuss with one another matters of mutual business interest involving both corporations, including the strategy for marketing the dresses produced by S. These matters are also regularly discussed by such persons by telephone calls between the United States and Puerto Rico. S's employees do not otherwise participate in P's marketing activities. Officers of P are generally responsible for the policies followed by S and are directors of S, but S has a chief executive officer in Puerto Rico who, from its office therein, handles the day-to-day conduct of S's business. Based upon the facts presented, and assuming there are no other facts which would lead to a different determination, S shall not be considered to have an office or other fixed place of business in the United States for purposes of this section.

Example 5. The facts are the same as in example 4 except that the dresses are manufactured by S in styles and designs furnished by P and out of goods and raw materials purchased by P and sold to S. Based upon the facts presented, and assuming there are no other facts which would lead to a different determination, S shall not be considered to have an office or other fixed place of business in the United States for purposes of this section.

Example 6. The facts are the same as in example 5 except that, pursuant to the instructions of P, the dresses sold by P are shipped by S directly to P's customers in the United States. Based upon the facts presented, and assuming there are no other facts which would lead to a different determination, S shall not be considered to have an office or other fixed place of business in the United States for purposes of this section.

[T.D. 7216, 37 FR 23433, Nov. 3, 1972]

§ 1.864-8T Treatment of related person factoring income (temporary).

(a) *Applicability*—(1) *General rule.* This section applies for purposes of determining the treatment of income derived by a person from a trade or service receivable acquired from a related person. Except as provided in paragraph (d) of this section, if a person acquires (directly or indirectly) a trade

or service receivable from a related person, any income (including any stated interest, discount or service fee) derived from the trade or service receivable shall be treated as if it were interest received on a loan to the obligor under the receivable. The characterization of income as interest pursuant to this section shall apply only for purposes of sections 551-558 (relating to foreign personal holding companies), sections 951-964 (relating to controlled foreign corporations), and section 904 (relating to the limitation on the foreign tax credit) of the Code and the regulations thereunder. The principles of sections 861 through 863 and the regulations thereunder shall be applied to determine the source of such interest income for purposes of section 904.

(2) *Override.* With respect to income characterized as interest under this section, the special rules of section 864(d) and this section override any conflicting provisions of the Code and regulations relating to foreign personal holding companies, controlled foreign corporations, and the foreign tax credit limitation. Thus, for example, pursuant to section 864(d)(5) and paragraph (e) of this section, stated interest derived from a factored trade or service receivable is not eligible for the subpart F de minimis rule of section 954(b)(3), the same country exception of section 954(c)(3)(A)(i), or the special rules for export financing interest of sections 904(d)(2) and 954(c)(2)(B), even if in the absence of this section the treatment of such stated interest would be governed by those sections.

(3) *Limitation.* Section 864(d) and this section apply only with respect to the tax treatment of income derived from a trade or service receivable acquired from a related person. Therefore, neither section 864(d) nor this section affects the characterization of an expense or loss of either the seller of a receivable or the obligor under a receivable. Accordingly, the obligor under a trade or service receivable shall not be allowed to treat any part of the purchase price of property or services as interest (other than amounts treated as interest under provisions other than section 864(d)).

(b) *Definitions.* The following definitions apply for purposes of this section and § 1.956-3T.

(1) *Trade or service receivable.* The term “trade or service receivable” means any account receivable or evidence of indebtedness, whether or not issued at a discount and whether or not bearing stated interest, arising out of the disposition by a related person of property described in section 1221(l) (hereinafter referred to as “inventory property”) or the performance of services by a related person.

(2) *Related person.* A “related person” is:

(i) A person who is a related person within the meaning of section 267(b) and the regulations thereunder;

(ii) A United States shareholder (as defined in section 951(b)); or

(iii) A person who is related (within the meaning of section 267(b) and the regulations thereunder) to a United States shareholder.

(c) *Acquisition of a trade or service receivable—(1) General rule.* A trade or service receivable is considered to be acquired by a person at the time when that person is entitled to receive all or a portion of the income from the trade or service receivable. A person who acquires a trade or service receivable (hereinafter referred to as the “factor”) is considered to have acquired a trade or service receivable regardless of whether:

(i) The acquisition is characterized for federal income tax purposes as a sale, a pledge of collateral for a loan, an assignment, a capital contribution, or otherwise;

(ii) The factor takes title to or obtains physical possession of the trade or service receivable;

(iii) The related person assigns the trade or service receivable with or without recourse;

(iv) The factor or some other person is obligated to collect the payments due under the trade or service receivable;

(v) The factor is liable for all property, excise, sales, or similar taxes due upon collection of the receivable;

(vi) The factor advances the entire face amount of the trade or service receivable transferred;

(vii) All trade or service receivables assigned by the related person are assigned to one factor; and

(viii) The obligor under the trade or service receivable is notified of the assignment.

(2) *Example.* The following example illustrates the application of paragraphs (a), (b), and (c)(1) of this section.

Example. P, a domestic corporation, owns all of the outstanding stock of FS, a controlled foreign corporation. P manufactures and sells paper products to customers, including X, an unrelated domestic corporation. As part of a sales transaction, P takes back a trade receivable from X and sells the receivable to FS. Because FS has acquired a trade or service receivable from a related person, the income derived by FS from P's receivable is interest income described in paragraph (a)(1) of this section.

(3) *Indirect acquisitions—(i) Acquisition through unrelated person.* A trade or service receivable will be considered to be acquired from a related person if it is acquired from an unrelated person who acquired (directly or indirectly) such receivable from a person who is a related person to the factor. The following example illustrates the application of this paragraph (c)(3)(i).

Example. A, a United States citizen, owns all of the outstanding stock of FPHC, a foreign personal holding company. A performs engineering services within and without the United States for customers, including X, an unrelated corporation. A performs engineering services for X and takes back a service receivable. A sells the receivable to Y, an unrelated corporation engaged in the factoring business. Y resells the receivable to FPHC. Because FPHC has indirectly acquired a service receivable from a related person, the income derived by FPHC from A's receivable is interest income described in paragraph (a)(1) of this section.

(ii) *Acquisition by nominee or pass-through entity.* A factor will be considered to have acquired a trade or service receivable held on its behalf by a nominee or by a partnership, simple trust, S corporation or other pass-through entity to the extent the factor owns (directly or indirectly) a beneficial interest in such partnership or other pass-through entity. The rule of this paragraph (c)(3)(ii) does not limit the application of paragraph (c)(3)(iii) of this section regarding the characterization of trade or service receivables of unre-

lated persons acquired pursuant to certain swap or pooling arrangements. The following example illustrates the application of this paragraph (c)(3)(ii).

Example. FS1, a controlled foreign corporation, acquires a 20 percent limited partnership interest in PS, a partnership. PS purchases trade or service receivables resulting from the sale of inventory property by FS1's domestic parent, P. PS does not purchase receivables of any person who is related to any other partner in PS. FS1 is considered to have acquired a 20 percent interest in the receivables acquired by PS. Thus, FS1's distributive share of the income derived by PS from the receivables of P is considered to be interest income described in paragraph (a)(1) of this section.

(iii) *Swap or pooling arrangements.* A trade or service receivable of a person unrelated to the factor will be considered to be a trade or service receivable acquired from a related person and subject to the rules of this section if it is acquired in accordance with an arrangement that involves two or more groups of related persons that are unrelated to each other and the effect of the arrangement is that one or more related persons in each group acquire (directly or indirectly) trade or service receivables of one or more unrelated persons who are also parties to the arrangement, in exchange for reciprocal purchases of the first group's receivables. The following example illustrates the application of this paragraph (c)(3)(iii).

Example. Controlled foreign corporations A, B, C, and D are wholly-owned subsidiaries of domestic corporations M, N, O, and P, respectively. M, N, O, and P are not related persons. According to a prearranged plan, A, B, C, and D each acquire trade or service receivables of M, N, O, and/or P, except that neither A, B, C nor D acquires receivables of its own parent corporation. Because the effect of this arrangement is that the unrelated groups acquire each other's trade or service receivables pursuant to the arrangement, income derived by A, B, C, and D from the receivables acquired from M, N, O, and P is interest income described in paragraph (a)(1) of this section.

(iv) *Financing arrangements.* If a controlled foreign corporation (as defined in section 957(a)) participates (directly or indirectly) in a lending transaction that results in a loan to the purchaser of inventory property, services, or trade or service receivables of a related

person (or a loan to a person who is related to the purchaser), and if the loan would not have been made or maintained on the same terms but for the corresponding purchase, then the controlled foreign corporation shall be considered to have indirectly acquired a trade or service receivable, and income derived by the controlled foreign corporation from such a loan shall be considered to be income described in paragraph (a)(1) of this section. For purposes of this paragraph (c)(3)(iv), it is immaterial that the sums lent are not, in fact, the sums used to finance the purchase of a related person's inventory property, services, or trade or service receivables. The amount of income derived by the controlled foreign corporation to be taken into account shall be the total amount of income derived from a lending transaction described in this paragraph (c)(3)(iv), if the amount lent is less than or equal to the purchase price of the inventory property, services, or trade or service receivables. If the amount lent is greater than the purchase price of the inventory property, services or receivables, the amount to be taken into account shall be the proportion of the interest charge (including original issue discount) that the purchase price bears to the total amount lent pursuant to the lending transaction. The following examples illustrate the application of this paragraph (c)(3)(iv).

Example 1. P, a domestic corporation, owns all of the outstanding stock of FS1, a controlled foreign corporation engaged in the financing business in Country X. P manufactures and sells toys, including sales to C, an unrelated corporation. Prior to P's sale of toys to C for \$2,000, D, a wholly-owned Country X subsidiary of C, borrows \$3,000 from FS1. The loan from FS1 to D would not have been made or maintained on the same terms but for C's purchase of toys from P. Two-thirds of the income derived by FS1 from the loan to D is interest income described in paragraph (a)(1) of this section.

Example 2. P, a domestic corporation, owns all of the outstanding stock of FS1, a controlled foreign corporation organized under the laws of Country X. FS1 has accumulated cash reserves. P has uncollected trade and service receivables of foreign obligors. FS1 makes a \$1,000 loan to U, a foreign corporation that is unrelated to P or FS1. U purchases P's trade and service receivables for \$2,000. The loan would not have been made or

maintained on the same terms but for U's purchase of P's receivables. The income derived by U from the receivables is not interest income within the meaning of paragraph (a) of this section. However, the interest paid by U to FS1 is interest income described in paragraph (a)(1) of this section.

Example 3. The facts are the same as in Example (2), except that U is a wholly-owned Country Y subsidiary of FS1. Because U is related to P within the meaning of paragraph (b)(2) of this section, under paragraph (c)(1) of this section, income derived by U from P's receivables is interest income described in paragraph (a)(1) of this section. In addition, the income derived by FS1 from the loan to U is interest income described in paragraph (a)(1) of this section.

(d) *Same country exception—(1) Income from trade or service receivables.* Income derived from a trade or service receivable acquired from a related person shall not be treated as interest income described in paragraph (a)(1) of this section if:

(i) The person acquiring the trade or service receivable and the related person are created or organized under the laws of the same foreign country;

(ii) The related person has a substantial part of its assets used in its trade or business located in such foreign country; and

(iii) The related person would not have derived foreign base company income, as defined in section 954(a) and the regulations thereunder, or income effectively connected with a United States trade or business from such receivable if the related person had collected the receivable.

For purposes of paragraph (d)(1)(ii) of this section, the standards contained in § 1.954-2(e) shall apply in determining the location of a substantial part of the assets of a related person. For purposes of paragraph (d)(1)(iii) of this section, a determination of whether the related person would have derived foreign base company income shall be made without regard to the de minimis test described in section 954(b)(3)(A). The following examples illustrate the application of this paragraph (d)(1).

Example 1. FS1, a controlled foreign corporation incorporated under the laws of Country X, owns all of the outstanding stock of FS2, which is also incorporated under the laws of Country X. FS1 has a substantial part of its assets used in its business in Country X. FS1 manufactures and sells toys

for use in Country Y. The toys sold are considered to be manufactured in Country X under §1.954-3(a)(2). FS1 is not considered to have a branch or similar establishment in Country Y that is treated as a separate corporation under section 954(d)(2) and §1.954-3(b). Thus, gross income derived by FS1 from the toy sales is not foreign base company sales income. FS1 takes back receivables without stated interest from its customers. FS1 assigns those receivables to FS2. The income derived by FS2 from the receivables of FS1 is not interest income described in paragraph (a)(1) of this section, because it satisfies the same country exception under paragraph (d)(1) of this section.

Example 2. The facts are the same as in Example 1, except that the toys sold by FS1 are purchased from FS1's U.S. parent and are sold for use outside of Country X. Thus, any income derived by FS1 from the sale of the toys would be foreign base company sales income. Therefore, income derived by FS2 from the receivables of FS1 is interest income described in paragraph (a)(1) of this section. FS2 is considered to derive interest income from the receivable even if, solely by reason of the de minimis rule of section 954(b)(3)(A), FS1 would not have derived foreign base company income if FS1 had collected the receivable.

(2) *Income from financing arrangements.* Income derived by a controlled foreign corporation from a loan to a person that purchases inventory property or services of a person that is related to the controlled foreign corporation, or from other loans described in paragraph (c)(3)(iv) of this section, shall not be treated as interest income described in paragraph (a)(1) of this section if:

(i) The person providing the financing and the related person are created or organized under the laws of the same foreign country;

(ii) The related person has a substantial part of its assets used in its trade or business located in such foreign country; and

(iii) The related person would not have derived foreign base company income or income effectively connected with a United States trade or business:

(A) From the sale of inventory property or services to the borrower or from financing the borrower's purchase of inventory property or services, in the case of a loan to the purchaser of inventory property or services of a related person; or

(B) From collecting amounts due under the receivable or from financing the purchase of the receivable, in the case of a loan to the purchaser of a trade or service receivable of a related person.

For purposes of paragraph (d)(2)(ii) of this section, the standards contained in §1.954-2(e) shall apply in determining the location of a substantial part of the assets of a related person. For purposes of paragraph (d)(2)(iii) of this section, a determination of whether the related person would have derived foreign base company income shall be made without regard to the de minimis test described in section 954(b)(3)(A). The following examples illustrate the application of this paragraph (d)(2).

Example 1. FS1, a controlled foreign corporation incorporated under the laws of Country X, owns all of the outstanding stock of FS2, which is also incorporated under the laws of Country X. FS1, which has a substantial part of its assets used in its business located in Country X, manufactures and sells toys for use in Country Y. The toys sold are considered to be manufactured in Country X under §1.954-3(a)(2). FS1 is not considered to have a branch or similar establishment in Country Y that is treated as a separate corporation under section 954(d)(2) and §1.954-3(b). Thus, the gross income derived by FS1 from the toy sales is not foreign base company sales income. FS2 makes a loan to FS3, a wholly-owned subsidiary of FS1 which is also incorporated under the laws of Country X, in connection with FS3's purchase of toys from FS1. FS3 does not earn any subpart F gross income. Thus, FS1 would not have derived foreign personal holding company interest income if FS1 had made the loan to FS3, because the interest would be covered by the same country exception of section 954(c)(3). Therefore, the income derived by FS2 from its loan to FS3 is not treated as interest income described in paragraph (a)(1) of this section, because it satisfies the same country exception under paragraph (d)(2) of this section. Such income is also not treated as foreign personal holding company income described in section 954(c)(1)(A) because the same country exception of section 954(c)(3) also applies to the interest actually derived by FS2 from its loan to FS3.

Example 2. FS1, a controlled foreign corporation incorporated under the laws of Country X, owns all of the outstanding stock of FS2, which is also incorporated under the laws of Country X. FS1 purchases toys from its U.S. parent and resells them for use outside of Country X. As part of a sales transaction, FS1 takes back trade receivables.

FS2 makes a loan to U, an unrelated corporation, to finance U's purchase of FS1's trade receivables. Because FS1 would have derived foreign base company income if FS1 had collected the receivables or made the loan itself, the same country exception of paragraph (d)(2) of this section does not apply. Accordingly, under paragraph (c)(3)(iv) of this section, the income derived by FS2 from its loan to U is treated as interest income described in paragraph (a)(1) of this section.

(e) *Special rules*—(1) *Foreign personal holding companies and controlled foreign corporations.* For purposes of sections 551-558 (relating to foreign personal holding companies), the exclusion provided by section 552(c) for interest described in section 954(c)(3)(A) shall not apply to income described in paragraph (a)(1) of this section. For purposes of the sections 951-964 (relating to controlled foreign corporations), income described in paragraph (a)(1) of this section shall be included in a United States shareholder's pro rata share of a controlled foreign corporation's subpart F income without regard to the de minimis rule under section 954(b)(3)(A). However, income described in paragraph (a)(1) of this section shall be included in the computation of a controlled foreign corporation's foreign base company income for purposes of applying the de minimis rule under section 954(b)(3)(A) and the more than 70 percent of gross income test under section 954(b)(3)(B). In addition, income described in paragraph (a)(1) of this section shall be considered to be subpart F income without regard to the exclusions from foreign base company income provided by section 954(c)(2)(B) (relating to export financing interest derived in the conduct of a banking business) and section 954(c)(3)(A)(i) (relating to certain interest income received from related persons).

(2) *Foreign tax credit.* Income described in paragraph (a)(1) of this section shall be considered to be interest income for purposes of the section 904 foreign tax credit limitation and is not eligible for the exceptions for export financing interest provided in section 904(d)(2) (A)(iii)(II), (B)(ii), and (C)(iii). In addition, such income will be subject to the look-through rule for subpart F income set forth in section 904(d)(3) without regard to the de mini-

mis exception provided in section 904(d)(3)(E).

(3) *Possessions corporations*—(i) *Limitation on credit.* Income described in paragraph (a)(1) of this section shall not be treated as income described in section 936(a)(1) (A) or (B) unless the income is considered under the principles of § 1.863-6 to be derived from sources within the possessions. Thus, the credit provided by section 936 is not available for income described in paragraph (a)(1) of this section unless the obligor under the receivable is a resident of a possession. In the case of a loan described in section 864(d)(6), the credit provided by section 936 is not available for income described in paragraph (a)(1) of this section unless the purchaser of the inventory property or services is a resident of a possession.

(ii) *Eligibility determination.* Notwithstanding the limitation on the availability of the section 936 credit for income described in paragraph (a)(1) of this section, if income treated as interest income under paragraph (a)(1) of this section is derived from sources within a possession (determined without regard to this section), such income shall be eligible for inclusion in a corporation's gross income for purposes of section 936(a)(2)(A). If such income is derived from the active conduct of a trade or business within a possession (determined without regard to this section), such income shall be eligible for inclusion in a corporation's gross income for purposes of section 936(a)(2)(B). (These rules apply for purposes of determining whether a corporation is eligible to elect the credit provided under section 936(a).)

(iii) *Example.* The following example illustrates the application of paragraph (e)(3) of this section.

Example. Corporation X is operating in a possession as a possessions corporation. In 1985, X earned \$50,000 from the active conduct of a business in the possession, including \$5,000 from trade or service receivables acquired from a related party. Obligors under the receivables acquired by X are not residents of the possession. Corporation X also earned \$20,000 from activities other than its active conduct of business in the possession. The \$5,000 derived by X from the receivables is not eligible for the section 936 credit. However, the \$5,000 may be used by X to meet the percentage tests under section

936(a)(2) to the extent that such income is considered to be derived from sources within the possession (for purposes of section 936(a)(2)(A)) or is considered to be derived from the active conduct of a trade or business in the possession (for purposes of section 936(a)(2)(B)), in either case determined without regard to the characterization of such income under this section.

(f) *Effective date.* The provisions of this section shall apply with respect to accounts receivable and evidences of indebtedness transferred after March 1, 1984 and are effective June 14, 1988.

[T.D. 8209, 53 FR 22166, June 14, 1988]

§ 1.865-1 Loss with respect to personal property other than stock.

(a) *General rules for allocation of loss—*

(1) *Allocation against gain.* Except as otherwise provided in § 1.865-2 and paragraph (c) of this section, loss recognized with respect to personal property shall be allocated to the class of gross income and, if necessary, apportioned between the statutory grouping of gross income (or among the statutory groupings) and the residual grouping of gross income, with respect to which gain from a sale of such property would give rise in the hands of the seller. For purposes of this section, loss includes bad debt deductions under section 166 and loss on property that is marked-to-market (such as under section 475) and subject to the rules of this section. Thus, for example, loss recognized by a United States resident on the sale or worthlessness of a bond generally is allocated to reduce United States source income.

(2) *Loss attributable to foreign office.* Except as otherwise provided in § 1.865-2 and paragraph (c) of this section, and except with respect to loss subject to paragraph (b) of this section, in the case of loss recognized by a United States resident with respect to property that is attributable to an office or other fixed place of business in a foreign country within the meaning of section 865(e)(3), the loss shall be allocated to reduce foreign source income if a gain on the sale of the property would have been taxable by the foreign country and the highest marginal rate of tax imposed on such gains in the foreign country is at least 10 percent. However, paragraph (a)(1) of this sec-

tion and not this paragraph (a)(2) will apply if gain on the sale of such property would be sourced under section 865(c), (d)(1)(B), or (d)(3).

(3) *Loss recognized by United States citizen or resident alien with foreign tax home.* Except as otherwise provided in § 1.865-2 and paragraph (c) of this section, and except with respect to loss subject to paragraph (b) of this section, in the case of loss with respect to property recognized by a United States citizen or resident alien that has a tax home (as defined in section 911(d)(3)) in a foreign country, the loss shall be allocated to reduce foreign source income if a gain on the sale of such property would have been taxable by a foreign country and the highest marginal rate of tax imposed on such gains in the foreign country is at least 10 percent.

(4) *Allocation for purposes of section 904.* For purposes of section 904, loss recognized with respect to property that is allocated to foreign source income under this paragraph (a) shall be allocated to the separate category under section 904(d) to which gain on the sale of the property would have been assigned (without regard to section 904(d)(2)(A)(iii)(III)). For purposes of § 1.904-4(c)(2)(ii)(A), any such loss allocated to passive income shall be allocated (prior to the application of § 1.904-4(c)(2)(ii)(B)) to the group of passive income to which gain on a sale of the property would have been assigned had a sale of the property resulted in the recognition of a gain under the law of the relevant foreign jurisdiction or jurisdictions.

(5) *Loss recognized by partnership.* A partner's distributive share of loss recognized by a partnership with respect to personal property shall be allocated and apportioned in accordance with this section as if the partner had recognized the loss. If loss is attributable to an office or other fixed place of business of the partnership within the meaning of section 865(e)(3), such office or fixed place of business shall be considered to be an office of the partner for purposes of this section.

(b) *Special rules of application—*(1) *Depreciable property.* In the case of a loss recognized with respect to depreciable personal property, the gain referred to

in paragraph (a)(1) of this section is the gain that would be sourced under section 865(c)(1) (depreciation recapture).

(2) *Contingent payment debt instrument.* Loss described in the last sentence of § 1.1275-4(b)(9)(iv)(A) that is recognized with respect to a contingent payment debt instrument to which § 1.1275-4(b) applies (instruments issued for money or publicly traded property) shall be allocated to the class of gross income and, if necessary, apportioned between the statutory grouping of gross income (or among the statutory groupings) and the residual grouping of gross income, with respect to which interest income from the instrument (in the amount of the loss subject to this paragraph (b)(2)) would give rise.

(c) *Exceptions—(1) Foreign currency and certain financial instruments.* This section does not apply to loss governed by section 988 and loss recognized with respect to options contracts or derivative financial instruments, including futures contracts, forward contracts, notional principal contracts, or evidence of an interest in any of the foregoing.

(2) *Inventory.* This section does not apply to loss recognized with respect to property described in section 1221(a)(1).

(3) *Interest equivalents and trade receivables.* Loss subject to § 1.861-9T(b) (loss equivalent to interest expense and loss on trade receivables) shall be allocated and apportioned under the rules of § 1.861-9T and not under the rules of this section.

(4) *Unamortized bond premium.* If a taxpayer recognizing loss with respect to a bond (within the meaning of § 1.171-1(b)) did not amortize bond premium to the full extent permitted by section 171 and the regulations thereunder, then, to the extent of the amount of bond premium that could have been, but was not, amortized by the taxpayer, loss recognized with respect to the bond shall be allocated to the class of gross income and, if necessary, apportioned between the statutory grouping of gross income (or among the statutory groupings) and the residual grouping of gross income, with respect to which interest income from the bond was assigned.

(5) *Accrued interest.* Loss attributable to accrued but unpaid interest on a

debt obligation shall be allocated to the class of gross income and, if necessary, apportioned between the statutory grouping of gross income (or among the statutory groupings) and the residual grouping of gross income, with respect to which interest income from the obligation was assigned. For purposes of this section, whether loss is attributable to accrued but unpaid interest (rather than to principal) shall be determined under the principles of §§ 1.61-7(d) and 1.446-2(e).

(6) *Anti-abuse rules—(i) Transactions involving built-in losses.* If one of the principal purposes of a transaction is to change the allocation of a built-in loss with respect to personal property by transferring the property to another person, qualified business unit, office or other fixed place of business, or branch that subsequently recognizes the loss, the loss shall be allocated by the transferee as if it were recognized by the transferor immediately prior to the transaction. If one of the principal purposes of a change of residence is to change the allocation of a built-in loss with respect to personal property, the loss shall be allocated as if the change of residence had not occurred. If one of the principal purposes of a transaction is to change the allocation of a built-in loss on the disposition of personal property by converting the original property into other property and subsequently recognizing loss with respect to such other property, the loss shall be allocated as if it were recognized with respect to the original property immediately prior to the transaction. Transactions subject to this paragraph shall include, without limitation, reorganizations within the meaning of section 368(a), liquidations under section 332, transfers to a corporation under section 351, transfers to a partnership under section 721, transfers to a trust, distributions by a partnership, distributions by a trust, transfers to or from a qualified business unit, office or other fixed place of business, or branch, or exchanges under section 1031. A person may have a principal purpose of affecting loss allocation even though this purpose is outweighed by other purposes (taken together or separately).

(ii) *Offsetting positions.* If a taxpayer recognizes loss with respect to personal

property and the taxpayer (or any person described in section 267(b) (after application of section 267(c)), 267(e), 318 or 482 with respect to the taxpayer) holds (or held) offsetting positions with respect to such property with a principal purpose of recognizing foreign source income and United States source loss, the loss shall be allocated and apportioned against such foreign source income. For purposes of this paragraph (c)(6)(ii), positions are offsetting if the risk of loss of holding one or more positions is substantially diminished by holding one or more other positions.

(iii) *Matching rule.* If a taxpayer (or a person described in section 1059(c)(3)(C) with respect to the taxpayer) engages in a transaction or series of transactions with a principal purpose of recognizing foreign source income that results in the creation of a corresponding loss with respect to personal property (as a consequence of the rules regarding the timing of recognition of income, for example), the loss shall be allocated and apportioned against such income to the extent of the recognized foreign source income. For an example illustrating a similar rule with respect to stock loss, see § 1.865-2(b)(4)(iv) *Example 3*.

(d) *Definitions*—(1) *Contingent payment debt instrument.* A contingent payment debt instrument is any debt instrument that is subject to § 1.1275-4.

(2) *Depreciable personal property.* Depreciable personal property is any property described in section 865(c)(4)(A).

(3) *Terms defined in § 1.861-8.* See § 1.861-8 for the meaning of *class of gross income*, *statutory grouping of gross income*, and *residual grouping of gross income*.

(e) *Examples.* The application of this section may be illustrated by the following examples:

Example 1. On January 1, 2000, A, a domestic corporation, purchases for \$1,000 a machine that produces widgets, which A sells in the United States and throughout the world. Throughout A's holding period, the machine is located and used in Country X. During A's holding period, A incurs depreciation deductions of \$400 with respect to the machine. Under § 1.861-8, A allocates and apportions depreciation deductions of \$250 against foreign source general limitation income and

\$150 against U.S. source income. On December 12, 2002, A sells the machine for \$100 and recognizes a loss of \$500. Because the machine was used predominantly outside the United States, under sections 865(c)(1)(B) and 865(c)(3)(B)(ii) gain on the disposition of the machine would be foreign source general limitation income to the extent of the depreciation adjustments. Therefore, under paragraph (b)(1) of this section, the entire \$500 loss is allocated against foreign source general limitation income.

Example 2. On January 1, 2002, A, a domestic corporation, loans \$2,000 to N, its wholly-owned controlled foreign corporation, in exchange for a contingent payment debt instrument subject to § 1.1275-4(b). During 2002 through 2004, A accrues and receives interest income of \$630, \$150 of which is foreign source general limitation income and \$480 of which is foreign source passive income under section 904(d)(3). Assume there are no positive or negative adjustments pursuant to § 1.1275-4(b)(6) in 2002 through 2004. On January 1, 2005, A disposes of the debt instrument and recognizes a \$770 loss. Under § 1.1275-4(b)(8)(ii), \$630 of the loss is treated as ordinary loss and \$140 is treated as capital loss. Assume that \$140 of interest income earned in 2005 with respect to the debt instrument would be foreign source passive income under section 904(d)(3). Under § 1.1275-4(b)(9)(iv), \$150 of the ordinary loss is allocated against foreign source general limitation income and \$480 of the ordinary loss is allocated against foreign source passive income. Under paragraph (b)(2) of this section, the \$140 capital loss is allocated against foreign source passive income.

Example 3. (i) On January 1, 2003, A, a domestic corporation, purchases for \$1,200 a taxable bond maturing on December 31, 2008, with a stated principal amount of \$1,000, payable at maturity. The bond provides for unconditional payments of interest of \$100, payable December 31 of each year. The issuer of the bond is a foreign corporation and interest on the bond is thus foreign source. Interest payments for 2003 and 2004 are timely made. A does not elect to amortize its bond premium under section 171 and the regulations thereunder, which would have permitted A to offset the \$100 of interest income by \$28.72 of bond premium in 2003, and by \$30.42 in 2004. On January 1, 2005, A sells the bond and recognizes a \$100 loss. Under paragraph (c)(4) of this section, \$59.14 of the loss is allocated against foreign source income. Under paragraph (a)(1) of this section, the remaining \$40.86 of the loss is allocated against U.S. source income.

(ii) The facts are the same as in paragraph (i) of this *Example 3*, except that A made the election to amortize its bond premium effective for taxable year 2004 (see § 1.171-4(c)). Under paragraph (c)(4) of this section, \$28.72 of the loss is allocated against foreign source

income. Under paragraph (a)(1) of this section, the remaining \$71.28 of the loss is allocated against U.S. source income.

Example 4. On January 1, 2002, A, a domestic corporation, purchases for \$1,000 a bond maturing December 31, 2014, with a stated principal amount of \$1,000, payable at maturity. The bond provides for unconditional payments of interest of \$100, payable December 31 of each year. The issuer of the bond is a foreign corporation and interest on the bond is thus foreign source. Between 2002 and 2006, A accrues and receives foreign source interest income of \$500 with respect to the bond. On January 1, 2007, A sells the bond and recognizes a \$500 loss. Under paragraph (a)(1) of this section, the \$500 loss is allocated against U.S. source income.

Example 5. On January 1, 2002, A, a domestic corporation on the accrual method of accounting, purchases for \$1,000 a bond maturing December 31, 2012, with a stated principal amount of \$1,000, payable at maturity. The bond provides for unconditional payments of interest of \$100, payable December 31 of each year. The issuer of the bond is a foreign corporation and interest on the bond is thus foreign source. On June 10, 2002, after A has accrued \$44 of interest income, but before any interest has been paid, the issuer suddenly becomes insolvent and declares bankruptcy. A sells the bond (including the accrued interest) for \$20. Assuming that A properly accrued \$44 of interest income, A treats the \$20 proceeds from the sale of the bond as payment of interest previously accrued and recognizes a \$1,000 loss with respect to the bond principal and a \$24 loss with respect to the accrued interest. See § 1.61-7(d). Under paragraph (a)(1) of this section, the \$1,000 loss with respect to the principal is allocated against U.S. source income. Under paragraph (c)(5) of this section, the \$24 loss with respect to accrued but unpaid interest is allocated against foreign source interest income.

(f) *Effective date—(1) In general.* Except as provided in paragraph (f)(2) of this section, this section is applicable to loss recognized on or after January 8, 2002. For purposes of this paragraph (f), loss that is recognized but deferred (for example, under section 267 or 1092) shall be treated as recognized at the time the loss is taken into account.

(2) *Application to prior periods.* A taxpayer may apply the rules of this section to losses recognized in any taxable year beginning on or after January 1, 1987, and all subsequent years, provided that—

(i) The taxpayer's tax liability as shown on an original or amended tax return is consistent with the rules of this section for each such year for

which the statute of limitations does not preclude the filing of an amended return on June 30, 2002; and

(ii) The taxpayer makes appropriate adjustments to eliminate any double benefit arising from the application of this section to years that are not open for assessment.

(3) *Examples.* See § 1.865-2(e)(3) for examples illustrating an applicability date provision similar to the applicability date provided in this paragraph (f).

[T.D. 8973, 66 FR 67083, Dec. 28, 2001]

§ 1.865-2 Loss with respect to stock.

(a) *General rules for allocation of loss with respect to stock—(1) Allocation against gain.* Except as otherwise provided in paragraph (b) of this section, loss recognized with respect to stock shall be allocated to the class of gross income and, if necessary, apportioned between the statutory grouping of gross income (or among the statutory groupings) and the residual grouping of gross income, with respect to which gain (other than gain treated as a dividend under section 964(e)(1) or 1248) from a sale of such stock would give rise in the hands of the seller (without regard to section 865(f)). For purposes of this section, loss includes loss on property that is marked-to-market (such as under section 475) and subject to the rules of this section. Thus, for example, loss recognized by a United States resident on the sale of stock generally is allocated to reduce United States source income.

(2) *Stock attributable to foreign office.* Except as otherwise provided in paragraph (b) of this section, in the case of loss recognized by a United States resident with respect to stock that is attributable to an office or other fixed place of business in a foreign country within the meaning of section 865(e)(3), the loss shall be allocated to reduce foreign source income if a gain on the sale of the stock would have been taxable by the foreign country and the highest marginal rate of tax imposed on such gains in the foreign country is at least 10 percent.

(3) *Loss recognized by United States citizen or resident alien with foreign tax home—(i) In general.* Except as otherwise provided in paragraph (b) of this

section, in the case of loss with respect to stock that is recognized by a United States citizen or resident alien that has a tax home (as defined in section 911(d)(3)) in a foreign country, the loss shall be allocated to reduce foreign source income if a gain on the sale of the stock would have been taxable by a foreign country and the highest marginal rate of tax imposed on such gains in the foreign country is at least 10 percent.

(ii) *Bona fide residents of Puerto Rico.* Except as otherwise provided in paragraph (b) of this section, in the case of loss with respect to stock in a corporation described in section 865(g)(3) recognized by a United States citizen or resident alien that is a bona fide resident of Puerto Rico during the entire taxable year, the loss shall be allocated to reduce foreign source income. If gain from a sale of such stock would give rise to income exempt from tax under section 933, the loss with respect to such stock shall be allocated to amounts that are excluded from gross income under section 933(1) and therefore shall not be allowed as a deduction from gross income. See section 933(1) and § 1.933-1(c).

(4) *Stock constituting a United States real property interest.* Loss recognized by a nonresident alien individual or a foreign corporation with respect to stock that constitutes a United States real property interest shall be allocated to reduce United States source income. For additional rules governing the treatment of such loss, see section 897 and the regulations thereunder.

(5) *Allocation for purposes of section 904.* For purposes of section 904, loss recognized with respect to stock that is allocated to foreign source income under this paragraph (a) shall be allocated to the separate category under section 904(d) to which gain on a sale of the stock would have been assigned (without regard to section 904(d)(2)(A)(iii)(III)). For purposes of § 1.904-4(c)(2)(ii)(A), any such loss allocated to passive income shall be allocated (prior to the application of § 1.904-4(c)(2)(ii)(B)) to the group of passive income to which gain on a sale of the stock would have been assigned had a sale of the stock resulted in the recognition of a gain under the law of the

relevant foreign jurisdiction or jurisdictions.

(b) *Exceptions—(1) Dividend recapture exception—(i) In general.* If a taxpayer recognizes a loss with respect to shares of stock, and the taxpayer (or a person described in section 1059(c)(3)(C) with respect to such shares) included in income a dividend recapture amount (or amounts) with respect to such shares at any time during the recapture period, then, to the extent of the dividend recapture amount (or amounts), the loss shall be allocated and apportioned on a proportionate basis to the class or classes of gross income or the statutory or residual grouping or groupings of gross income to which the dividend recapture amount was assigned.

(ii) *Exception for de minimis amounts.* Paragraph (b)(1)(i) of this section shall not apply to a loss recognized by a taxpayer on the disposition of stock if the sum of all dividend recapture amounts (other than dividend recapture amounts eligible for the exception described in paragraph (b)(1)(iii) of this section (passive limitation dividends)) included in income by the taxpayer (or a person described in section 1059(c)(3)(C)) with respect to such stock during the recapture period is less than 10 percent of the recognized loss.

(iii) *Exception for passive limitation dividends.* Paragraph (b)(1)(i) of this section shall not apply to the extent of a dividend recapture amount that is treated as income in the separate category for passive income described in section 904(d)(2)(A) (without regard to section 904(d)(2)(A)(iii)(III)). The exception provided for in this paragraph (b)(1)(iii) shall not apply to any dividend recapture amount that is treated as income in the separate category for financial services income described in section 904(d)(2)(C).

(iv) *Examples.* The application of this paragraph (b)(1) may be illustrated by the following examples:

Example 1. (i) *P*, a domestic corporation, is a United States shareholder of *N*, a controlled foreign corporation. *N* has never had any subpart F income and all of its earnings and profits are described in section 959(c)(3). On May 5, 1998, *N* distributes a dividend to *P* in the amount of \$100. The dividend gives rise to a \$5 foreign withholding tax, and *P* is deemed to have paid an additional \$45 of foreign income tax with respect to the dividend

under section 902. Under the look-through rules of section 904(d)(3) the dividend is general limitation income described in section 904(d)(1)(I).

(ii) On February 6, 2000, *P* sells its shares of *N* and recognizes a \$110 loss. In 2000, *P* has the following taxable income, excluding the loss on the sale of *N*:

(A) \$1,000 of foreign source income that is general limitation income described in section 904(d)(1)(I);

(B) \$1,000 of foreign source capital gain from the sale of stock in a foreign affiliate that is sourced under section 865(f) and is passive income described in section 904(d)(1)(A); and

(C) \$1,000 of U.S. source income.

(iii) The \$100 dividend paid in 1998 is a dividend recapture amount that was included in *P*'s income within the recapture period preceding the disposition of the *N* stock. The *de minimis* exception of paragraph (b)(1)(ii) of this section does not apply because the \$100 dividend recapture amount exceeds 10 percent of the \$110 loss. Therefore, to the extent of the \$100 dividend recapture amount, the loss must be allocated under paragraph (b)(1)(i) of this section to the separate limitation category to which the dividend was assigned (general limitation income).

(iv) *P*'s remaining \$10 loss on the disposition of the *N* stock is allocated to U.S. source income under paragraph (a)(1) of this section.

(v) After allocation of the stock loss, *P*'s foreign source taxable income in 2000 consists of \$900 of foreign source general limitation income and \$1,000 of foreign source passive income.

Example 2. (i) *P*, a domestic corporation, owns all of the stock of *NI*, which owns all of the stock of *N2*, which owns all of the stock of *N3*. *NI*, *N2*, and *N3* are controlled foreign corporations. All of the corporations use the calendar year as their taxable year. On February 5, 1997, *N3* distributes a dividend to *N2*. The dividend is foreign personal holding company income of *N2* under section 954(c)(1)(A) that results in an inclusion of \$100 in *P*'s income under section 951(a)(1)(A)(i) as of December 31, 1997. Under section 904(d)(3)(B) the inclusion is general limitation income described in section 904(d)(1)(I). The income inclusion to *P* results in a corresponding increase in *P*'s basis in the stock of *NI* under section 961(a).

(ii) On March 5, 1999, *P* sells its shares of *NI* and recognizes a \$110 loss. The \$100 1997 subpart F inclusion is a dividend recapture amount that was included in *P*'s income within the recapture period preceding the disposition of the *NI* stock. The *de minimis* exception of paragraph (b)(1)(ii) of this section does not apply because the \$100 dividend recapture amount exceeds 10 percent of the \$110 loss. Therefore, to the extent of the \$100 dividend recapture amount, the loss must be

allocated under paragraph (b)(1)(i) of this section to the separate limitation category to which the dividend recapture amount was assigned (general limitation income). The remaining \$10 loss is allocated to U.S. source income under paragraph (a)(1) of this section.

Example 3. (i) *P*, a domestic corporation, owns all of the stock of *NI*, which owns all of the stock of *N2*. *NI* and *N2* are controlled foreign corporations. All the corporations use the calendar year as their taxable year and the U.S. dollar as their functional currency. On May 5, 1998, *N2* pays a dividend of \$100 to *NI* out of general limitation earnings and profits.

(ii) On February 5, 2000, *NI* sells its *N2* stock to an unrelated purchaser. The sale results in a loss to *NI* of \$110 for U.S. tax purposes. In 2000, *NI* has the following current earnings and profits, excluding the loss on the sale of *N2*:

(A) \$1,000 of non-subpart F foreign source general limitation earnings and profits described in section 904(d)(1)(I);

(B) \$1,000 of foreign source gain from the sale of stock that is taken into account in determining foreign personal holding company income under section 954(c)(1)(B)(i) and which is passive limitation earnings and profits described in section 904(d)(1)(A);

(C) \$1,000 of foreign source interest income received from an unrelated person that is foreign personal holding company income under section 954(c)(1)(A) and which is passive limitation earnings and profits described in section 904(d)(1)(A).

(iii) The \$100 dividend paid in 1998 is a dividend recapture amount that was included in *NI*'s income within the recapture period preceding the disposition of the *N2* stock. The *de minimis* exception of paragraph (b)(1)(ii) of this section does not apply because the \$100 dividend recapture amount exceeds 10 percent of the \$110 loss. Therefore, to the extent of the \$100 dividend recapture amount, the loss must be allocated under paragraph (b)(1)(i) of this section to the separate limitation category to which the dividend was assigned (general limitation earnings and profits).

(iv) *NI*'s remaining \$10 loss on the disposition of the *N2* stock is allocated to foreign source passive limitation earnings and profits under paragraph (a)(1) of this section.

(v) After allocation of the stock loss, *NI*'s current earnings and profits for 1998 consist of \$900 of foreign source general limitation earnings and profits and \$1,990 of foreign source passive limitation earnings and profits.

(vi) After allocation of the stock loss, *NI*'s subpart F income for 2000 consists of \$1,000 of foreign source interest income that is foreign personal holding company income under section 954(c)(1)(A) and \$890 of foreign source net gain that is foreign personal holding

company income under section 954(c)(1)(B)(i). *P* includes \$1,890 in income under section 951(a)(1)(A)(i) as passive income under sections 904(d)(1)(A) and 904(d)(3)(B).

Example 4. *P*, a foreign corporation, has two wholly-owned subsidiaries, *S*, a domestic corporation, and *B*, a foreign corporation. On January 1, 2000, *S* purchases a one-percent interest in *N*, a foreign corporation, for \$100. On January 2, 2000, *N* distributes a \$20 dividend to *S*. The \$20 dividend is foreign source financial services income. On January 3, 2000, *S* sells its *N* stock to *B* for \$80 and recognizes a \$20 loss that is deferred under section 267(f). On June 10, 2008, *B* sells its *N* stock to an unrelated person for \$55. Under section 267(f) and § 1.267(f)-1(c)(1), *S*'s \$20 loss is deferred until 2008. Under this paragraph (b)(1), the \$20 loss is allocated to reduce foreign source financial services income in 2008 because the loss was recognized (albeit deferred) within the 24-month recapture period following the receipt of the dividend. See §§ 1.267(f)-1(a)(2)(i)(B) and 1.267(f)-1(c)(2).

Example 5. The facts are the same as in *Example 4*, except *P*, *S*, and *B* are domestic corporations and members of the *P* consolidated group. Under the matching rule of § 1.1502-13(c)(1), the separate entity attributes of *S*'s intercompany items and *B*'s corresponding items are redetermined to the extent necessary to produce the same effect on consolidated taxable income as if *S* and *B* were divisions of a single corporation and the intercompany transaction was a transaction between divisions. If *S* and *B* were divisions of a single corporation, the transfer of *N* stock on January 3, 2000 would be ignored for tax purposes, and the corporation would be treated as selling that stock only in 2008. Thus, the corporation's entire \$45 loss would have been allocated against U.S. source income under paragraph (a)(1) of this section because a dividend recapture amount was not received during the corporation's recapture period. Accordingly, *S*'s \$20 loss and *B*'s \$25 loss are allocated to reduce U.S. source income.

Example 6. (i) On January 1, 1998, *P*, a domestic corporation, purchases *N*, a foreign corporation, for \$1,000. On March 1, 1998, *P* causes *N* to sell its operating assets, distribute a \$400 general limitation dividend to *P*, and invest its remaining \$600 in short-term government securities. *P* converted the *N* assets into low-risk investments with a principal purpose of holding the *N* stock without significant risk of loss until the recapture period expired. *N* earns interest income from the securities. The income constitutes subpart F income that is included in *P*'s income under section 951, increasing *P*'s basis in the *N* stock under section 961(a). On March 1, 2002, *P* sells *N* and recognizes a \$400 loss.

(ii) Pursuant to paragraph (d)(3) of this section, the recapture period is increased by

the period in which *N*'s assets were held as low-risk investments because *P* caused *N*'s assets to be converted into and held as low-risk investments with a principal purpose of enabling *P* to hold the *N* stock without significant risk of loss. Accordingly, under paragraph (b)(1)(i) of this section the \$400 loss is allocated against foreign source general limitation income.

(2) *Exception for inventory.* This section does not apply to loss recognized with respect to stock described in section 1221(1).

(3) *Exception for stock in an S corporation.* This section does not apply to loss recognized with respect to stock in an S corporation (as defined in section 1361).

(4) *Anti-abuse rules—(i) Transactions involving built-in losses.* If one of the principal purposes of a transaction is to change the allocation of a built-in loss with respect to stock by transferring the stock to another person, qualified business unit (within the meaning of section 989(a)), office or other fixed place of business, or branch that subsequently recognizes the loss, the loss shall be allocated by the transferee as if it were recognized with respect to the stock by the transferor immediately prior to the transaction. If one of the principal purposes of a change of residence is to change the allocation of a built-in loss with respect to stock, the loss shall be allocated as if the change of residence had not occurred. If one of the principal purposes of a transaction is to change the allocation of a built-in loss with respect to stock (or other personal property) by converting the original property into other property and subsequently recognizing loss with respect to such other property, the loss shall be allocated as if it were recognized with respect to the original property immediately prior to the transaction. Transactions subject to this paragraph shall include, without limitation, reorganizations within the meaning of section 368(a), liquidations under section 332, transfers to a corporation under section 351, transfers to a partnership under section 721, transfers to a trust, distributions by a partnership, distributions by a trust, or transfers to or from a qualified business unit, office or other fixed place of business. A person may have a

principal purpose of affecting loss allocation even though this purpose is outweighed by other purposes (taken together or separately).

(ii) *Offsetting positions.* If a taxpayer recognizes loss with respect to stock and the taxpayer (or any person described in section 267(b) (after application of section 267(c)), 267(e), 318 or 482 with respect to the taxpayer) holds (or held) offsetting positions with respect to such stock with a principal purpose of recognizing foreign source income and United States source loss, the loss will be allocated and apportioned against such foreign source income. For purposes of this paragraph (b)(4)(ii), positions are offsetting if the risk of loss of holding one or more positions is substantially diminished by holding one or more other positions.

(iii) *Matching rule.* If a taxpayer (or a person described in section 1059(c)(3)(C) with respect to the taxpayer) engages in a transaction or series of transactions with a principal purpose of recognizing foreign source income that results in the creation of a corresponding loss with respect to stock (as a consequence of the rules regarding the timing of recognition of income, for example), the loss shall be allocated and apportioned against such income to the extent of the recognized foreign source income. This paragraph (b)(4)(iii) applies to any portion of a loss that is not allocated under paragraph (b)(1)(i) of this section (dividend recapture rule), including a loss in excess of the dividend recapture amount and a loss that is related to a dividend recapture amount described in paragraph (b)(1)(ii) (de minimis exception) or (b)(1)(iii) (passive dividend exception) of this section.

(iv) *Examples.* The application of this paragraph (b)(4) may be illustrated by the following examples. No inference is intended regarding the application of any other Internal Revenue Code section or judicial doctrine that may apply to disallow or defer the recognition of loss. The examples are as follows:

Example 1. (i) *Facts.* On January 1, 2000, *P*, a domestic corporation, owns all of the stock of *N1*, a controlled foreign corporation, which owns all of the stock of *N2*, a controlled foreign corporation. *N1*'s basis in the

stock of *N2* exceeds its fair market value, and any loss recognized by *N1* on the sale of *N2* would be allocated under paragraph (a)(1) of this section to reduce foreign source passive limitation earnings and profits of *N1*. In contemplation of the sale of *N2* to an unrelated purchaser, *P* causes *N1* to liquidate with principal purposes of recognizing the loss on the *N2* stock and allocating the loss against U.S. source income. *P* sells the *N2* stock and *P* recognizes a loss.

(ii) *Loss allocation.* Because one of the principal purposes of the liquidation was to transfer the stock to *P* in order to change the allocation of the built-in loss on the *N2* stock, under paragraph (b)(4)(i) of this section the loss is allocated against *P*'s foreign source passive limitation income.

Example 2. (i) *Facts.* On January 1, 2000, *P*, a domestic corporation, forms *N* and *F*, foreign corporations, and contributes \$1,000 to the capital of each. *N* and *F* enter into offsetting positions in financial instruments that produce financial services income. Holding the *N* stock substantially diminishes *P*'s risk of loss with respect to the *F* stock (and vice versa). *P* holds *N* and *F* with a principal purpose of recognizing foreign source income and U.S. source loss. On March 31, 2000, when the financial instrument held by *N* is worth \$1,200 and the financial instrument held by *F* is worth \$800, *P* sells its *F* stock and recognizes a \$200 loss.

(ii) *Loss allocation.* Because *P* held an offsetting position with respect to the *F* stock with a principal purpose of recognizing foreign source income and U.S. source loss, the \$200 loss is allocated against foreign source financial services income under paragraph (b)(4)(ii) of this section.

Example 3. (i) *Facts.* On January 1, 2002, *P* and *Q*, domestic corporations, form *R*, a domestic partnership. The corporations and partnership use the calendar year as their taxable year. *P* contributes \$900 to *R* in exchange for a 90-percent partnership interest and *Q* contributes \$100 to *R* in exchange for a 10-percent partnership interest. *R* purchases a dance studio in Country *X* for \$1,000. On January 2, 2002, *R* enters into contracts to provide dance lessons in Country *X* for a 5-year period beginning January 1, 2003. These contracts are prepaid by the dance studio customers on December 31, 2002, and *R* recognizes foreign source taxable income of \$500 from the prepayments (*R*'s only income in 2002). *P* takes into income its \$450 distributive share of partnership taxable income. On January 1, 2003, *P*'s basis in its partnership interest is \$1,350 (\$900 from its contribution under section 722, increased by its \$450 distributive share of partnership income under section 705). On September 22, 2003, *P* contributes its *R* partnership interest to *S*, a newly-formed domestic corporation, in exchange for all the stock of *S*. Under section 358, *P*'s basis in *S* is \$1,350. On December

1, 2003, *P* sells *S* to an unrelated party for \$1050 and recognizes a \$300 loss.

(ii) *Loss allocation.* *P* recognized foreign source income for tax purposes before the income had economically accrued, and the accelerated recognition of income increased *P*'s basis in *R* without increasing its value by a corresponding amount, which resulted in the creation of a built-in loss with respect to the *S* stock. Under paragraph (b)(4)(iii) of this section the \$300 loss is allocated against foreign source income if *P* had a principal purpose of recognizing foreign source income and corresponding loss.

(c) *Loss recognized by partnership.* A partner's distributive share of loss recognized by a partnership shall be allocated and apportioned in accordance with this section as if the partner had recognized the loss. If loss is attributable to an office or other fixed place of business of the partnership within the meaning of section 865(e)(3), such office or fixed place of business shall be considered to be an office of the partner for purposes of this section.

(d) *Definitions*—(1) *Terms defined in § 1.861-8.* See § 1.861-8 for the meaning of *class of gross income*, *statutory grouping of gross income*, and *residual grouping of gross income*.

(2) *Dividend recapture amount.* A dividend recapture amount is a dividend (except for an amount treated as a dividend under section 78), an inclusion described in section 951(a)(1)(A)(i) (but only to the extent attributable to a dividend (including a dividend under section 964(e)(1)) included in the earnings of a controlled foreign corporation (held directly or indirectly by the person recognizing the loss) that is included in foreign personal holding company income under section 954(c)(1)(A)) and an inclusion described in section 951(a)(1)(B).

(3) *Recapture period.* A recapture period is the 24-month period ending on the date on which a taxpayer recognized a loss with respect to stock. For example, if a taxpayer recognizes a loss on March 15, 2002, the recapture period begins on and includes March 16, 2000, and ends on and includes March 15, 2002. A recapture period is increased by any period of time in which the taxpayer has diminished its risk of loss in a manner described in section 246(c)(4) and the regulations thereunder and by any period in which the assets of the

corporation are hedged against risk of loss (or are converted into and held as low-risk investments) with a principal purpose of enabling the taxpayer to hold the stock without significant risk of loss until the recapture period has expired. In the case of a loss recognized after a dividend is declared but before such dividend is paid, the recapture period is extended through the date on which the dividend is paid.

(4) *United States resident.* See section 865(g) and the regulations thereunder for the definition of United States resident.

(e) *Effective date*—(1) *In general.* This section is applicable to loss recognized on or after January 11, 1999, except that paragraphs (a)(3)(ii), (b)(1)(iv) *Example 6*, (b)(4)(iii), (b)(4)(iv) *Example 3*, and (d)(3) of this section are applicable to loss recognized on or after January 8, 2002. For purposes of this paragraph (e), loss that is recognized but deferred (for example, under section 267 or 1092) shall be treated as recognized at the time the loss is taken into account.

(2) *Application to prior periods.* A taxpayer may apply the rules of this section to losses recognized in any taxable year beginning on or after January 1, 1987, and all subsequent years, provided that—

(i) The taxpayer's tax liability as shown on an original or amended tax return is consistent with the rules of this section for each such year for which the statute of limitations does not preclude the filing of an amended return on June 30, 2002; and

(ii) The taxpayer makes appropriate adjustments to eliminate any double benefit arising from the application of this section to years that are not open for assessment.

(3) *Examples.* The rules of this paragraph (e) may be illustrated by the following examples:

Example 1. (i) *P*, a domestic corporation, has a calendar taxable year. On March 10, 1985, *P* recognizes a \$100 capital loss on the sale of *N*, a foreign corporation. Pursuant to sections 1211(a) and 1212(a), the loss is not allowed in 1985 and is carried over to the 1990 taxable year. The loss is allocated against foreign source income under § 1.861-8(e)(7). In 1999, *P* chooses to apply this section to all losses recognized in its 1987 taxable year and in all subsequent years.

§ 1.871-1

(ii) Allocation of the loss on the sale of *N* is not affected by the rules of this section because the loss was recognized in a taxable year that did not begin after December 31, 1986.

Example 2. (i) *P*, a domestic corporation, has a calendar taxable year. On March 10, 1988, *P* recognizes a \$100 capital loss on the sale of *N*, a foreign corporation. Pursuant to sections 1211(a) and 1212(a), the loss is not allowed in 1988 and is carried back to the 1985 taxable year. The loss is allocated against foreign source income under § 1.861-8(e)(7) on *P*'s federal income tax return for 1985 and increases an overall foreign loss account under § 1.904(f)-1.

(ii) In 1999, *P* chooses to apply this section to all losses recognized in its 1987 taxable year and in all subsequent years. Consequently, the loss on the sale of *N* is allocated against U.S. source income under paragraph (a)(1) of this section. Allocation of the loss against U.S. source income reduces *P*'s overall foreign loss account and increases *P*'s tax liability in 2 years: 1990, a year that will not be open for assessment on June 30, 1999, and 1997, a year that will be open for assessment on June 30, 1999. Pursuant to paragraph (e)(2)(i) of this section, *P* must file an amended federal income tax return that reflects the rules of this section for 1997, but not for 1990.

Example 3. (i) *P*, a domestic corporation, has a calendar taxable year. On March 10, 1989, *P* recognizes a \$100 capital loss on the sale of *N*, a foreign corporation. The loss is allocated against foreign source income under § 1.861-8(e)(7) on *P*'s federal income tax return for 1989 and results in excess foreign tax credits for that year. The excess credit is carried back to 1988, pursuant to section 904(c). In 1999, *P* chooses to apply this section to all losses recognized in its 1989 taxable year and in all subsequent years. On June 30, 1999, *P*'s 1988 taxable year is closed for assessment, but *P*'s 1989 taxable year is open with respect to claims for refund.

(ii) Because *P* chooses to apply this section to its 1989 taxable year, the loss on the sale of *N* is allocated against U.S. source income under paragraph (a)(1) of this section. Allocation of the loss against U.S. source income would have permitted the foreign tax credit to be used in 1989, reducing *P*'s tax liability in 1989. Nevertheless, under paragraph (e)(2)(ii) of this section, because the credit was carried back to 1988, *P* may not claim the foreign tax credit in 1989.

[T.D. 8805, 64 FR 1511, Jan. 11, 1999, as amended by T.D. 8973, 66 FR 67085, Dec. 28, 2001; 67 FR 3812, Jan. 28, 2002]

26 CFR Ch. I (4-1-15 Edition)

NONRESIDENT ALIENS AND FOREIGN CORPORATIONS

NONRESIDENT ALIEN INDIVIDUALS

§ 1.871-1 Classification and manner of taxing alien individuals.

(a) *Classes of aliens.* For purposes of the income tax, alien individuals are divided generally into two classes, namely, resident aliens and nonresident aliens. Resident alien individuals are, in general, taxable the same as citizens of the United States; that is, a resident alien is taxable on income derived from all sources, including sources without the United States. See § 1.1-1(b). Nonresident alien individuals are taxable only on certain income from sources within the United States and on the income described in section 864(c)(4) from sources without the United States which is effectively connected for the taxable year with the conduct of a trade or business in the United States. However, nonresident alien individuals may elect, under section 6013 (g) or (h), to be treated as U.S. residents for purposes of determining their income tax liability under Chapters 1, 5, and 24 of the code. Accordingly, any reference in §§ 1.1-1 through 1.1388-1 and §§ 1.1491-1 through 1.1494-1 of this part to non-resident alien individuals does not include those with respect to whom an election under section 6013 (g) or (h) is in effect, unless otherwise specifically provided. Similarly, any reference to resident aliens or U.S. residents includes those with respect to whom an election is in effect, unless otherwise specifically provided.

(b) *Classes of nonresident aliens*—(1) *In general.* For purposes of the income tax, nonresident alien individuals are divided into the following three classes:

(i) Nonresident alien individuals who at no time during the taxable year are engaged in a trade or business in the United States.

(ii) Nonresident alien individuals who at any time during the taxable year are, or are deemed under § 1.871-9 to be, engaged in a trade or business in the United States, and

(iii) Nonresident alien individuals who are bona fide residents of a section

931 possession (as defined in §1.931-1(c)(1) of this chapter) or Puerto Rico during the entire taxable year. An individual described in paragraph (b)(1)(i) or (ii) of this section is subject to tax pursuant to the provisions of subpart A (section 871 and following), part II, subchapter N, chapter 1 of the Code, and the regulations under those provisions. The provisions of subpart A do not apply to individuals described in this paragraph (b)(1)(iii), but such individuals, except as provided in section 931 or 933, are subject to the tax imposed by section 1 or 55. See §1.876-1.

(2) *Treaty income.* If the gross income of a nonresident alien individual described in subparagraph (1) (i) or (ii) of this paragraph includes income on which the tax is limited by tax convention, see §1.871-12.

(3) *Exclusions from gross income.* For rules relating to the exclusion of certain items from the gross income of a nonresident alien individual, including annuities excluded under section 871(f), see §§1.872-2 and 1.894-1.

(4) *Expatriation to avoid tax.* For special rules applicable in determining the tax of a nonresident alien individual who has lost U.S. citizenship with a principal purpose of avoiding certain taxes, see section 877.

(5) *Adjustment of tax of certain nonresident aliens.* For the application of pre-1967 income tax provisions to residents of a foreign country which imposes a more burdensome income tax than the United States, and for the adjustment of the income tax of a national or resident of a foreign country which imposes a discriminatory income tax on the income of citizens of the United States or domestic corporations, see section 896.

(6) *Conduit financing arrangements.* For rules regarding conduit financing arrangements, see §§1.881-3 and 1.881-4.

(c) *Effective/applicability date.* This section shall apply for taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.871-1 and 1.871-7(a) (Revised as of January 1, 1971). Paragraph (b)(1)(iii) of this section applies

to taxable years ending after April 9, 2008.

[T.D. 7332, 39 FR 44218, Dec. 23, 1974, as amended by T.D. 7670, 45 FR 6928, Jan. 31, 1980; T.D. 8611, 60 FR 41004, Aug. 11, 1995; T.D. 9194, 70 FR 18928, Apr. 11, 2005; T.D. 9391, 73 FR 19358, Apr. 9, 2008]

§ 1.871-2 Determining residence of alien individuals.

(a) *General.* The term *nonresident alien individual* means an individual whose residence is not within the United States, and who is not a citizen of the United States. The term includes a nonresident alien fiduciary. For such purpose the term fiduciary shall have the meaning assigned to it by section 7701(a)(6) and the regulations in part 301 of this chapter (Regulations on Procedure and Administration). For presumption as to an alien's nonresidence, see paragraph (b) of §1.871-4.

(b) *Residence defined.* An alien actually present in the United States who is not a mere transient or sojourner is a resident of the United States for purposes of the income tax. Whether he is a transient is determined by his intentions with regard to the length and nature of his stay. A mere floating intention, indefinite as to time, to return to another country is not sufficient to constitute him a transient. If he lives in the United States and has no definite intention as to his stay, he is a resident. One who comes to the United States for a definite purpose which in its nature may be promptly accomplished is a transient; but, if his purpose is of such a nature that an extended stay may be necessary for its accomplishment, and to that end the alien makes his home temporarily in the United States, he becomes a resident, though it may be his intention at all times to return to his domicile abroad when the purpose for which he came has been consummated or abandoned. An alien whose stay in the United States is limited to a definite period by the immigration laws is not a resident of the United States within the meaning of this section, in the absence of exceptional circumstances.

(c) *Application and effective dates.* Unless the context indicates otherwise, §§1.871-2 through 1.871-5 apply to determine the residence of aliens for taxable

§ 1.871-3

years beginning before January 1, 1985. To determine the residence of aliens for taxable years beginning after December 31, 1984, see section 7701(b) and §§ 301.7701(b)-1 through 301.7701(b)-9 of this chapter. However, for purposes of determining whether an individual is a qualified individual under section 911(d)(1)(A), the rules of §§ 1.871-2 and 1.871-5 shall continue to apply for taxable years beginning after December 31, 1984. For purposes of determining whether an individual is a resident of the United States for estate and gift tax purposes, see § 20.0-1(b) (1) and (2) and § 25.2501-1(b) of this chapter, respectively.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8411, 57 FR 15241, Apr. 27, 1992]

§ 1.871-3 Residence of alien seamen.

In order to determine whether an alien seaman is a resident of the United States for purposes of the income tax, it is necessary to decide whether the presumption of nonresidence (as prescribed by paragraph (b) of § 1.871-4) is overcome by facts showing that he has established a residence in the United States. Residence may be established on a vessel regularly engaged in coastwise trade, but the mere fact that a sailor makes his home on a vessel which is flying the United States flag and is engaged in foreign trade is not sufficient to establish residence in the United States, even though the vessel, while carrying on foreign trade, touches at American ports. An alien seaman may acquire an actual residence in the United States within the rules laid down in § 1.871-4, although the nature of his calling requires him to be absent for a long period from the place where his residence is established. An alien seaman may acquire such a residence at a sailors' boarding house or hotel, but such a claim should be carefully scrutinized in order to make sure that such residence is bona fide. The filing of Form 1078 or taking out first citizenship papers is proof of residence in the United States from the time the form is filed or the papers taken out, unless rebutted by other evidence showing an intention to be a transient.

26 CFR Ch. I (4-1-15 Edition)

§ 1.871-4 Proof of residence of aliens.

(a) *Rules of evidence.* The following rules of evidence shall govern in determining whether or not an alien within the United States has acquired residence therein for purposes of the income tax.

(b) *Nonresidence presumed.* An alien by reason of his alienage, is presumed to be a nonresident alien.

(c) *Presumption rebutted*—(1) *Departing alien.* In the case of an alien who presents himself for determination of tax liability before departure from the United States, the presumption as to the alien's nonresidence may be overcome by proof—

(i) That the alien, at least six months before the date he so presents himself, has filed a declaration of his intention to become a citizen of the United States under the naturalization laws; or

(ii) That the alien, at least six months before the date he so presents himself, has filed Form 1078 or its equivalent; or

(iii) Of acts and statements of the alien showing a definite intention to acquire residence in the United States or showing that his stay in the United States has been of such an extended nature as to constitute him a resident.

(2) *Other aliens.* In the case of other aliens, the presumption as to the alien's nonresidence may be overcome by proof—

(i) That the alien has filed a declaration of his intention to become a citizen of the United States under the naturalization laws; or

(ii) That the alien has filed Form 1078 or its equivalent; or

(iii) Of acts and statements of the alien showing a definite intention to acquire residence in the United States or showing that his stay in the United States has been of such an extended nature as to constitute him a resident.

(d) *Certificate.* If, in the application of paragraph (c)(1)(iii) or (2)(iii) of this section, the internal revenue officer or employee who examines the alien is in doubt as to the facts, such officer or employee may, to assist him in determining the facts, require a certificate or certificates setting forth the facts relied upon by the alien seeking to overcome the presumption. Each such

certificate, which shall contain, or be verified by, a written declaration that it is made under the penalties of perjury, shall be executed by some credible person or persons, other than the alien and members of his family, who have known the alien at least six months before the date of execution of the certificate or certificates.

§ 1.871-5 Loss of residence by an alien.

An alien who has acquired residence in the United States retains his status as a resident until he abandons the same and actually departs from the United States. An intention to change his residence does not change his status as a resident alien to that of a nonresident alien. Thus, an alien who has acquired a residence in the United States is taxable as a resident for the remainder of his stay in the United States.

§ 1.871-6 Duty of withholding agent to determine status of alien payees.

For the obligation of a withholding agent to withhold the tax imposed by this section, see chapter 3 of the Internal Revenue Code and the regulations thereunder.

[T.D. 8734, 62 FR 53416, Oct. 14, 1997]

§ 1.871-7 Taxation of nonresident alien individuals not engaged in U.S. business.

(a) *Imposition of tax.* (1) This section applies for purposes of determining the tax of a nonresident alien individual who at no time during the taxable year is engaged in trade or business in the United States. However, see also § 1.871-8 where such individual is a student or trainee deemed to be engaged in trade or business in the United States or where he has an election in effect for the taxable year in respect to real property income. Except as otherwise provided in § 1.871-12, a nonresident alien individual to whom this section applies is not subject to the tax imposed by section 1 or section 1201(b) but, pursuant to the provision of section 871(a), is liable to a flat tax of 30 percent upon the aggregate of the amounts determined under paragraphs (b), (c), and (d) of this section which are received during the taxable year from sources within the United States.

Except as specifically provided in such paragraphs, such amounts do not include gains from the sale or exchange of property. To determine the source of such amounts, see sections 861 through 863, and the regulations thereunder.

(2) The tax of 30 percent is imposed by section 871(a) upon an amount only to the extent the amount constitutes gross income. Thus, for example, the amount of an annuity which is subject to such tax shall be determined in accordance with section 72.

(3) Deductions shall not be allowed in determining the amount subject to tax under this section except that losses from sales or exchanges of capital assets shall be allowed to the extent provided in section 871(a)(2) and paragraph (d) of this section.

(4) Except as provided in §§ 1.871-9 and 1.871-10, a nonresident alien individual not engaged in trade or business in the United States during the taxable year has no income, gain, or loss for the taxable year which is effectively connected for the taxable year with the conduct of a trade or business in the United States. See section 864(c)(1)(B) and § 1.864-3.

(5) Gains and losses which, by reason of section 871(d) and § 1.871-10, are treated as gains or losses which are effectively connected for the taxable year with the conduct of a trade or business in the United States by the nonresident alien individual shall not be taken into account in determining the tax under this section. See, for example, paragraph (c)(2) of § 1.871-10.

(6) For special rules applicable in determining the tax of certain nonresident alien individuals, see paragraph (b) of § 1.871-1.

(b) *Fixed or determinable annual or periodical income*—(1) *General rule.* The tax of 30 percent imposed by section 871(a)(1) applies to the gross amount received from sources within the United States as fixed or determinable annual or periodical gains, profits, or income. Specific items of fixed or determinable annual or periodical income are enumerated in section 871(a)(1)(A) as interest, dividends, rents, salaries, wages, premiums, annuities, compensations, remunerations, and emoluments, but other items of fixed or determinable annual or periodical gains, profits, or

income are also subject to the tax, as, for instance, royalties, including royalties for the use of patents, copyrights, secret processes and formulas, and other like property. As to the determination of fixed or determinable annual or periodical income see § 1.1441-2(b). For special rules treating gain on the disposition of section 306 stock as fixed or determinable annual or periodical income for purposes of section 871(a), see section 306(f) and paragraph (h) of § 1.306-3.

(2) *Substitute payments.* For purposes of this section, a substitute interest payment (as defined in § 1.861-2(a)(7)) received by a foreign person pursuant to a securities lending transaction or a sale-repurchase transaction (as defined in § 1.861-2(a)(7)) shall have the same character as interest income paid or accrued with respect to the terms of the transferred security. Similarly, for purposes of this section, a substitute dividend payment (as defined in § 1.861-3(a)(6)) received by a foreign person pursuant to a securities lending transaction or a sale-repurchase transaction (as defined in § 1.861-3(a)(6)) shall have the same character as a distribution received with respect to the transferred security. Where, pursuant to a securities lending transaction or a sale-repurchase transaction, a foreign person transfers to another person a security the interest on which would qualify as portfolio interest under section 871(h) in the hands of the lender, substitute interest payments made with respect to the transferred security will be treated as portfolio interest, provided that in the case of interest on an obligation in registered form (as defined in § 1.871-14(c)(1)(i)), the transferor complies with the documentation requirement described in § 1.871-14(c)(1)(ii)(C) with respect to the payment of the substitute interest and none of the exceptions to the portfolio interest exemption in sections 871(h) (3) and (4) apply. See also §§ 1.861-2(b)(2) and 1.894-1(c).

(c) *Other income and gains*—(1) *Items subject to tax.* The tax of 30 percent imposed by section 871(a)(1) also applies to the following gains received during the taxable year from sources within the United States:

(i) Gains described in section 402(a)(2), relating to the treatment of

total distributions from certain employees' trusts; section 403(a)(2), relating to treatment of certain payments under certain employee annuity plans; and section 631 (b) or (c), relating to treatment of gain on the disposal of timber, coal, or iron ore with a retained economic interest;

(ii) [Reserved]

(iii) Gains on transfers described in section 1235, relating to certain transfers of patent rights, made on or before October 4, 1966; and

(iv) Gains from the sale or exchange after October 4, 1966, of patents, copyrights, secret processes and formulas, good will, trademarks, trade brands, franchises, or other like property, or of any interest in any such property, to the extent the gains are from payments (whether in a lump sum or in installments) which are contingent on the productivity, use or disposition of the property or interest sold or exchanged, or from payments which are treated under section 871(e) and § 1.871-11 as being so contingent.

(2) *Nonapplication of 183-day rule.* The provisions of section 871(a)(2), relating to gains from the sale or exchange of capital assets, and paragraph (d)(2) of this section do not apply to the gains described in this paragraph; as a consequence, the taxpayer receiving gains described in subparagraph (1) of this paragraph during a taxable year is subject to the tax of 30 percent thereon without regard to the 183-day rule contained in such provisions.

(3) *Determination of amount of gain.* The tax of 30 percent imposed upon the gains described in subparagraph (1) of this paragraph applies to the full amount of the gains and is determined (i) without regard to the alternative tax imposed by section 1201(b) upon the excess of the net long-term capital gain over the net short-term capital loss; (ii) without regard to the deduction allowed by section 1202 in respect of capital gains; (iii) without regard to section 1231, relating to property used in the trade or business and involuntary conversions; and (iv), except in the case of gains described in subparagraph (1)(ii) of this paragraph, whether or not the gains are considered to be gains from the sale or exchange of property which is a capital asset.

(d) *Gains from sale or exchange of capital assets*—(1) *Gains subject to tax.* The tax of 30 percent imposed by section 871(a)(2) applies to the excess of gains derived from sources within the United States over losses allocable to sources within the United States, which are derived from the sale or exchange of capital assets, determined in accordance with the provisions of subparagraphs (2) through (4) of this paragraph.

(2) *Presence in the United States 183 days or more.* (i) If the nonresident alien individual has been present in the United States for a period or periods aggregating 183 days or more during the taxable year, he is liable to a tax of 30 percent upon the amount by which his gains, derived from sources within the United States, from sales or exchanges of capital assets effected at any time during the year exceed his losses, allocable to sources within the United States, from sales or exchanges of capital assets effected at any time during that year. Gains and losses from sales or exchanges effected at any time during such taxable year are to be taken into account for this purpose even though the nonresident alien individual is not present in the United States at the time the sales or exchanges are effected. In addition, if the nonresident alien individual has been present in the United States for a period or periods aggregating 183 days or more during the taxable year, gains and losses for such taxable year from sales or exchanges of capital assets effected during a previous taxable year beginning after December 31, 1966, are to be taken into account, but only if he was also present in the United States during such previous taxable year for a period or periods aggregating 183 days or more.

(ii) If the nonresident alien individual has not been present in the United States during the taxable year, or if he has been present in the United States for a period or periods aggregating less than 183 days during the taxable year, gains and losses from sales or exchanges of capital assets effected during the year are not to be taken into account, except as required by paragraph (c) of this section, in determining the tax of such individual even though the sales or exchanges are

effected during his presence in the United States. Moreover, gains and losses for such taxable year from sales or exchanges of capital assets effected during a previous taxable year beginning after December 31, 1966, are not to be taken into account, even though the nonresident alien individual was present in the United States during such previous year for a period or periods aggregating 183 days or more.

(iii) For purposes of this subparagraph, a nonresident alien individual is not considered to be present in the United States by reason of the presence in the United States of a person who is an agent or partner of such individual or who is a fiduciary of an estate or trust of which such individual is a beneficiary or a grantor-owner to whom section 671 applies.

(iv) The application of this subparagraph may be illustrated by the following examples:

Example 1. B, a nonresident alien individual not engaged in trade or business in the United States and using the calendar year as the taxable year, is present in the United States from May 1, 1971, to November 15, 1971, a period of more than 182 days. While present in the United States, B effects for his own account on various dates a number of transactions in stocks and securities on the stock exchange, as a result of which he has recognized capital gains of \$10,000. During the period from January 1, 1971, to April 30, 1971, he carries out similar transactions through an agent in the United States, as a result of which B has recognized capital gains of \$5,000. On December 15, 1971, through an agent in the United States B sells a capital asset on the installment plan, no payments being made by the purchaser in 1971. During 1972, B receives installment payments of \$50,000 on the installment sale made in 1971, and the capital gain from sources within the United States for 1972 attributable to such payments is \$12,500. In addition, during the period from January 1, 1972, to May 31, 1972, B effects for his own account, through an agent in the United States, a number of transactions in stocks and securities on the stock exchange, as a result of which B has recognized capital gains of \$20,000. At no time during 1972 is B present in the United States or engaged in trade or business in the United States. Accordingly, for 1971, B is subject to tax under section 871(a)(2) on his capital gains of \$15,000 from the transactions in that year on the stock exchange. For 1972, B is not subject to tax on the capital gain of \$12,500 from the installment sale in 1971 or on the capital gains of

\$20,000 from the transactions in 1972 on the stock exchange.

Example 2. The facts are the same as in example 1 except that B is present in the United States from June 15, 1972, to December 31, 1972, a period of more than 182 days. Accordingly, B is subject to tax under section 871(a)(2) for 1971 on his capital gains of \$15,000 from the transactions in that year on the stock exchange. He is also subject to tax under section 871(a)(2) for 1972 on his capital gains of \$32,500 (\$12,500 from the installment sale in 1971 plus \$20,000 from the transactions in 1972 on the stock exchange).

Example 3. D, a nonresident alien individual not engaged in trade or business in the United States and using the calendar year as the taxable year, is present in the United States from April 1, 1971, to August 31, 1971, a period of less than 183 days. While present in the United States, D effects for his own account on various dates a number of transactions in stocks and securities on the stock exchange, as a result of which he has recognized capital gains of \$15,000. During the period from January 1, 1971, to March 31, 1971, he carries out similar transactions through an agent in the United States, as a result of which D has recognized capital gains of \$8,000. On December 20, 1971, through an agent in the United States D sells a capital asset on the installment plan, no payments being made by the purchaser in 1971. During 1972, D receives installment payments of \$200,000 on the installment sale made in 1971, and the capital gain from sources within the United States for 1972 attributable to such payments is \$50,000. In addition, during the period from February 1, 1972, to August 15, 1972, a period of more than 182 days, D effects for his own account, through an agent in the United States, a number of transactions in stocks and securities on the stock exchange, as a result of which D has recognized capital gains of \$25,000. At no time during 1972 is D present in the United States or engaged in trade or business in the United States. Accordingly, D is not subject to tax for 1971 or 1972 on any of his recognized capital gains.

Example 4. The facts are the same as in example 3 except that D is present in the United States from February 1, 1972, to August 15, 1972, a period of more than 182 days. Accordingly, D is not subject to tax for 1971 on his capital gains of \$23,000 from the transactions in that year on the stock exchange. For 1972 he is subject to tax under section 871(a)(2) on his capital gains of \$25,000 from the transactions in that year on the stock exchange, but he is not subject to the tax on the capital gain of \$50,000 from the installment sale in 1971.

(3) *Determination of 183-day period*—(i) *In general.* In determining the total period of presence in the United States

for a taxable year for purposes of subparagraph (2) of this paragraph, all separate periods of presence in the United States during the taxable year are to be aggregated. If the nonresident alien individual has not previously established a taxable year, as defined in section 441(b), he shall be treated as having a taxable year which is the calendar year, as defined in section 441(d). Subsequent adoption by such individual of a fiscal year as the taxable year will be treated as a change in the taxpayer's annual accounting period to which section 442 applies, and the change must be authorized under this part (Income Tax Regulations) or prior approval must be obtained by filing an application on Form 1128 in accordance with paragraph (b) of § 1.442-1. If in the course of his taxable year the nonresident alien individual changes his status from that of a citizen or resident of the United States to that of a nonresident alien individual, or vice versa, the determination of whether the individual has been present in the United States for 183 days or more during the taxable year shall be made by taking into account the entire taxable year, and not just that part of the taxable year during which he has the status of a nonresident alien individual.

(ii) *Definition of "day"*. The term "day", as used in subparagraph (2) of this paragraph, means a calendar day during any portion of which the nonresident alien individual is physically present in the United States (within the meaning of sections 7701(a)(9) and 638) except that, in the case of an individual who is a resident of Canada or Mexico and, in the normal course of his employment in transportation service touching points within both Canada or Mexico and the United States, performs personal services in both the foreign country and the United States, the following rules shall apply:

(a) The performance of labor or personal services during 8 hours or more in any 1 day within the United States shall be considered as 1 day in the United States, except that if a period of more or less than 8 hours is considered a full workday in the transportation job involved, such period shall be considered as 1 day within the United States.

(b) The performance of labor or personal services during less than 8 hours in any day in the United States shall, except as provided in (a) of this subdivision, be considered as a fractional part of a day in the United States. The total number of hours during which such services are performed in the United States during the taxable year, when divided by eight, shall be the number of days during which such individual shall be considered present in the United States during the taxable year.

(c) The aggregate number of days determined under (a) and (b) of this subdivision shall be considered the total number of days during which such individual is present in the United States during the taxable year.

(4) *Determination of amount of excess gains*—(i) *In general.* For the purpose of determining the excess of gains over losses subject to tax under this paragraph, gains and losses shall be taken into account only if, and to the extent that, they would be recognized and taken into account if the nonresident alien individual were engaged in trade or business in the United States during the taxable year and such gains and losses were effectively connected for such year with the conduct of a trade or business in the United States by such individual. However, in determining such excess of gains over losses no deduction may be taken under section 1202, relating to the deduction for capital gains, or section 1212, relating to the capital loss carryover. Thus, for example, in determining such excess gains all amounts considered under chapter 1 of the Code as gains or losses from the sale or exchange of capital assets shall be taken into account, except those gains which are described in section 871(a)(1) (B) or (D) and taken into account under paragraph (c) of this section and are considered to be gains from the sale or exchange of capital assets. Also, for example, a loss described in section 631 (b) or (c) which is considered to be a loss from the sale of a capital asset shall be taken into account in determining the excess gains which are subject to tax under this paragraph. In further illustration, in determining such excess gains no deduction shall be allowed, pursuant to the provi-

sions of section 267, for losses from sales or exchanges of property between related taxpayers. Any gains which are taken into account under section 871(a)(1) and paragraph (c) of this section shall not be taken into account in applying section 1231 for purposes of this paragraph. Gains and losses are to be taken into account under this paragraph whether they are short-term or long-term capital gains or losses within the meaning of section 1222.

(ii) *Gains not included.* The provisions of this paragraph do not apply to any gains described in section 871(a)(1) (B) or (D), and in subdivision (i), (iii), or (iv) of paragraph (c)(1) of this section, which are considered to be gains from the sale or exchange of capital assets.

(iii) *Allowance of losses.* In determining the excess of gains over losses subject to tax under this paragraph losses shall be allowed only to the extent provided by section 165(c). Losses from sales or exchanges of capital assets in excess of gains from sales or exchanges of capital assets shall not be taken into account.

(e) *Credits against tax.* The credits allowed by section 31 (relating to tax withheld on wages), by section 32 (relating to tax withheld at source on nonresident aliens), by section 39 (relating to certain uses of gasoline and lubricating oil), and by section 6402 (relating to overpayments of tax) shall be allowed against the tax of a nonresident alien individual determined in accordance with this section.

(f) *Effective date.* Except as otherwise provided in this paragraph, this section shall apply for taxable years beginning after December 31, 1966. Paragraph (b)(2) of this section is applicable to payments made after November 13, 1997. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.871-7 (b) and (c) (Revised as of January 1, 1971).

[T.D. 7332, 39 FR 44219, Dec. 23, 1974, as amended by T.D. 8734, 62 FR 53416, Oct. 14, 1997; T.D. 8735, 62 FR 53501, Oct. 14, 1997]

§ 1.871-8 Taxation of nonresident alien individuals engaged in U.S. business or treated as having effectively connected income.

(a) *Segregation of income.* This section applies for purposes of determining the

§ 1.871-8

tax of a nonresident alien individual who at any time during the taxable year is engaged in trade or business in the United States. It also applies for purposes of determining the tax of a nonresident alien student or trainee who is deemed under section 871(c) and § 1.871-9 to be engaged in trade or business in the United States or of a nonresident alien individual who at no time during the taxable year is engaged in trade or business in the United States but has an election in effect for the taxable year under section 871(d) and § 1.871-10 in respect to real property income. A nonresident alien individual to whom this section applies must segregate his gross income for the taxable year into two categories, namely (1) the income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual, and (2) the income which is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual. A separate tax shall then be determined upon each such category of income, as provided in paragraph (b) of this section. The determination of whether income or gain is or is not effectively connected for the taxable year with the conduct of a trade or business in the United States by the nonresident alien individual shall be made in accordance with section 864(c) and §§ 1.864-3 through 1.864-7. For purposes of this section income which is effectively connected for the taxable year with the conduct of a trade or business in the United States includes all income which is treated under section 871 (c) or (d) and § 1.871-9 or § 1.871-10 as income which is effectively connected for such year with the conduct of a trade or business in the United States by the nonresident alien individual.

(b) *Imposition of tax*—(1) *Income not effectively connected with the conduct of a trade or business in the United States.* If a nonresident alien individual who is engaged in trade or business in the United States at any time during the taxable year derives during such year from sources within the United States income or gains described in section 871(a)(1), and paragraph (b) or (c) of

26 CFR Ch. I (4-1-15 Edition)

§ 1.871-7 or gains from the sale or exchange of capital assets determined as provided in section 871(a)(2) and paragraph (d) of § 1.871-7, which are not effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual, such income or gains shall be subject to a flat tax of 30 percent of the aggregate amount of such items. This tax shall be determined in the manner, and subject to the same conditions, set forth in § 1.871-7 as though the income or gains were derived by a nonresident alien individual not engaged in trade or business in the United States during the taxable year, except that (i) the rule in paragraph (d)(3) of such section for treating the calendar year as the taxable year shall not apply and (ii) in applying paragraph (c) and (d)(4) of such section, there shall not be taken into account any gains or losses which are taken into account in determining the tax under section 871(b) and subparagraph (2) of this paragraph. A nonresident alien individual who has an election in effect for the taxable year under section 871(d) and § 1.871-10 and who at no time during the taxable year is engaged in trade or business in the United States must determine his tax under § 1.871-7 on his income which is not treated as effectively connected with the conduct of a trade or business in the United States, subject to the exception contained in subdivision (ii) of this subparagraph.

(2) *Income effectively connected with the conduct of a trade or business in the United States*—(i) *In general.* If a nonresident alien to whom this section applies derives income or gains which are effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual, the taxable income or gains shall, except as provided in § 1.871-12, be taxed in accordance with section 1 or, in the alternative, section 1201(b). See section 871(b)(1). Any income of the nonresident alien individual which is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual shall not be taken into account in determining either the rate

or amount of such tax. See paragraph (b) of §1.872-1.

(ii) *Determination of taxable income.* The taxable income for any taxable year for purposes of this subparagraph consists only of the nonresident alien individual's taxable income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual; and, for this purpose, it is immaterial that the trade or business with which that income is effectively connected is not the same as the trade or business carried on in the United States by that individual during the taxable year. See example 2 in §1.864-4(b). In determining such taxable income all amounts constituting, or considered to be, gains or losses for the taxable year from the sale or exchange of capital assets shall be taken into account if such gains or losses are effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual, and, for such purpose, the 183-day rule set forth in section 871(a)(2) and paragraph (d)(2) of §1.871-7 shall not apply. Losses which are not effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual shall not be taken into account in determining taxable income under this subdivision, except as provided in section 873(b)(1).

(iii) *Cross references.* For rules for determining the gross income and deductions for the taxable year, see sections 872 and 873, and the regulations thereunder.

(c) *Change in trade or business status—*

(1) *In general.* The determination as to whether a nonresident alien individual is engaged in trade or business within the United States during the taxable year is to be made for each taxable year. If at any time during the taxable year he is engaged in a trade or business in the United States, he is considered to be engaged in trade or business within the United States during the taxable year for purposes of sections 864(c)(1) and 871(b), and the regulations thereunder. Income, gain, or loss of a nonresident alien individual is not treated as being effectively connected for the taxable year with the conduct

of a trade or business in the United States if he is not engaged in trade or business within the United States during such year, even though such income, gain, or loss may have been effectively connected for a previous taxable year with the conduct of a trade or business in the United States. See §1.864-3. However, income, gain, or loss which is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by a nonresident alien individual will generally be treated as effectively connected for a subsequent taxable year if he is engaged in a trade or business in the United States during such subsequent year, even though such income, gain, or loss is not effectively connected with the conduct of the trade or business carried on in the United States during such subsequent year. This subparagraph does not apply to income described in section 871 (c) or (d). It may not apply to a nonresident alien individual who for the taxable year uses an accrual method of accounting or to income which is constructively received in the taxable year within the meaning of §1.451-2.

(2) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. B, a nonresident alien individual using the calendar year as the taxable year and the cash receipts and disbursements method of accounting, is engaged in business (business R) in the United States from January 1, 1971, to August 31, 1971. During the period of September 1, 1971, to December 31, 1971, B receives installment payments of \$30,000 on sales made in the United States by business R during that year, and the income from sources within the United States for that year attributable to such payments is \$7,509. On September 15, 1971, another business (business S), which is carried on by B only in a foreign country sells to U.S. customers on the installment plan several pieces of equipment from inventory. During the period of September 16, 1971, to December 31, 1971, B receives installment payments of \$50,000 on these sales by business S, and the income from sources within the United States for that year attributable to such payments is \$10,000. Under section 864(c)(3) and paragraph (b) of §1.864-4 the entire income of \$17,500 is effectively connected for 1971 with the conduct of a business in the United States by B. Accordingly, such income is taxable to B under paragraph (b)(2) of this section.

Example 2. Assume the same facts as in example 1, except that during 1972 B receives installment payments of \$20,000 from the sales made during 1971 in the United States by business R, and of \$80,000 from the sales made in 1971 to U.S. customers by business S, the total income from sources within the United States for 1972 attributable to such payments being \$13,000. At no time during 1972 is B engaged in a trade or business in the United States. Under section 864(c)(1)(B) the income of \$13,000 for 1972 is not effectively connected with the conduct of a trade or business in the United States by B. Moreover, such income is not fixed or determinable annual or periodical income. Accordingly, no amount of such income is taxable to B under section 871.

Example 3. Assume the same facts as in example 2, except that during 1972 B is engaged in a new business (business T) in the United States from July 1, 1972, to December 31, 1972. Under section 864(c)(3) and paragraph (b) of §1.864-4, the income of \$13,000 is effectively connected for 1972 with the conduct of a business in the United States by B. Accordingly, such income is taxable to B under paragraph (b)(2) of this section.

Example 4. Assume the same facts as in example 2, except that the installment payments of \$20,000 from the sales made during 1971 in the United States by business R and not received by B until 1972 could have been received by B in 1971 if he had so desired. Under §1.451-2, B is deemed to have constructively received the payments of \$20,000 in 1971. Accordingly, the income attributable to such payments is effectively connected for 1971 with the conduct of a business in the United States by B and is taxable to B in 1971 under paragraph (b)(2) of this section.

(d) *Credits against tax.* The credits allowed by section 31 (relating to tax withheld on wages), section 32 (relating to tax withheld at source on non-resident aliens), section 33 (relating to the foreign tax credit), section 35 (relating to partially tax-exempt interest), section 38 (relating to investment in certain depreciable property), section 39 (relating to certain uses of gasoline and lubricating oil), section 40 (relating to expenses of work incentive programs), and section 6402 (relating to overpayments of tax) shall be allowed against the tax determined in accordance with this section. However, the credits allowed by sections 33, 38, and 40 shall not be allowed against the flat tax of 30 percent imposed by section 871(a) and paragraph (b)(1) of this section. Moreover, no credit shall be allowed under section 35 to a non-resi-

dent alien individual with respect to whom a tax is imposed for the taxable year under section 871(a) and paragraph (b)(1) of this section, even though such individual has income for such year upon which tax is imposed under section 871(b) and paragraph (b)(2) of this section. For special rules applicable in determining the foreign tax credit, see section 906(b) and the regulations thereunder. For the disallowance of certain credits where a return is not filed for the taxable year, see section 874 and §1.874-1.

(e) *Effective date.* This section shall apply for taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.871-7(d) (Revised as of January 1, 1971).

[T.D. 7332, 39 FR 44221, Dec. 23, 1974]

§1.871-9 Nonresident alien students or trainees deemed to be engaged in U.S. business.

(a) *Participants in certain exchange or training programs.* For purposes of §§1.871-7 and 1.871-8 a nonresident alien individual who is temporarily present in the United States during the taxable year as a nonimmigrant under subparagraph (F) (relating to the admission of students into the United States) or subparagraph (J) (relating to the admission of teachers, trainees, specialists, etc., into the United States) of section 101(a)(15) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15) (F) or (J)), and who without regard to this paragraph is not engaged in trade or business in the United States during such year, shall be deemed to be engaged in trade or business in the United States during the taxable year. For purposes of determining whether an alien who is present in the United States on an F visa or a J visa is a resident of the United States, see §§301.7701(b)-1 through 301.7701(b)-9 of this chapter.

(b) *Income treated as effectively connected with U.S. business.* Any income described in paragraph (1) (relating to the nonexcluded portion of certain scholarship or fellowship grants) or paragraph (2) (relating to certain non-excluded expenses incident to such

grants) of section 1441(b) which is received during the taxable year from sources within the United States by a nonresident alien individual described in paragraph (a) of this section is to be treated for purposes of §§ 1.871-7, 1.871-8, 1.872-1, and 1.873-1 as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual. However, such income is not to be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States for purposes of section 1441(c)(1) and paragraph (a) of § 1.1441-4. For exclusion relating to compensation paid to such individual by a foreign employer, see paragraph (b) of § 1.872-2.

(c) *Exchange visitors.* For purposes of paragraph (a) of this section a nonresident alien individual who is temporarily present in the United States during the taxable year as a non-immigrant under subparagraph (J) of section 101(a)(15) of the Immigration and Nationality Act includes a nonresident alien individual admitted to the United States as an “exchange visitor” under section 201 of the U.S. Information and Educational Exchange Act of 1948 (22 U.S.C. 1446), which section was repealed by section 111 of the Mutual Educational and Cultural Exchange Act of 1961 (75 Stat. 538).

(d) *Mandatory application of rule.* The application of this section is mandatory and not subject to an election by the taxpayer.

(e) *Effective date.* This section shall apply for taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.871-7(a)(3) (Revised as of January 1, 1971).

[T.D. 7332, 39 FR 44222, Dec. 23, 1974, as amended by T.D. 8411, 57 FR 15241, Apr. 27, 1992]

§ 1.871-10 Election to treat real property income as effectively connected with U.S. business.

(a) *When election may be made.* A nonresident alien individual or foreign corporation which during the taxable year derives any income from real property which is located in the United States and, in the case of a nonresident alien

individual, held for the production of income, or derives income from any interest in any such property, may elect, pursuant to section 871(d) or 882(d) and this section, to treat all such income as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that taxpayer. The election may be made whether or not the taxpayer is engaged in trade or business in the United States during the taxable year for which the election is made or whether or not the taxpayer has income from real property which for the taxable year is effectively connected with the conduct of a trade or business in the United States, but it may be made only with respect to that income from sources within the United States which, without regard to this section, is not effectively connected for the taxable year with the conduct of a trade or business in the United States by the taxpayer. If for the taxable year the taxpayer has no income from real property located in the United States, or from any interest in such property, which is subject to the tax imposed by section 871(a) or 881(a), the election may not be made. But if an election has been properly made under this section for a taxable year, the election remains in effect, unless properly revoked, for subsequent taxable years even though during any such subsequent taxable year there is no income from the real property, or interest therein, in respect of which the election applies.

(b) *Income to which the election applies—(1) Included income.* An election under this section shall apply to all income from real property which is located in the United States and, in the case of a nonresident alien individual, held for the production of income, and to all income derived from any interest in such property, including (i) gains from the sale or exchange of such property or an interest therein, (ii) rents or royalties from mines, oil or gas wells, or other natural resources, and (iii) gains described in section 631 (b) or (c), relating to treatment of gain on the disposal of timber, coal, or iron ore with a retained economic interest. The election may not be made with respect to only one class of such income. For

purposes of the election, income from real property, or from any interest in real property, includes any amount included under section 652 or 662 in the gross income of a nonresident alien individual or foreign corporation that is the beneficiary of an estate or trust if, by reason of the application of section 652(b) or 662(b), and the regulations thereunder, such amount has the character in the hands of that beneficiary of income from real property, or from any interest in real property. It is immaterial that no tax would be imposed on the income by section 871(a) and paragraph (a) of § 1.871-7, or by section 881(a) and paragraph (a) of § 1.881-2, if the election were not in effect. Thus, for example, if an election under this section has been made by a nonresident alien individual not engaged in trade or business in the United States during the taxable year, the tax imposed by section 871(b)(1) and paragraph (b)(2) of § 1.871-8 applies to his gains derived from the sale of real property located in the United States and held for the production of income, even though such income would not be subject to tax under section 871(a) if the election had not been made. In further illustration, assume that a nonresident alien individual not engaged in trade or business, or present, in the United States during the taxable year has income from sources within the United States consisting of oil royalties, rentals from a former personal residence, and capital gain from the sale of another residence held for the production of income. If he makes an election under this section, it will apply with respect to his royalties, rentals, and capital gain, even though such capital gain would not be subject to tax under section 871(a) if the election had not been made.

(2) *Income not included.* For purposes of subparagraph (1) of this paragraph, income from real property, or from any interest in real property, does not include (i) interest on a debt obligation secured by a mortgage of real property, (ii) any portion of a dividend, within the meaning of section 316, which is paid by a corporation or a trust, such as a real estate investment trust described in section 857, which derives income from real property, (iii) in the

case of a nonresident alien individual, income from real property, such as a personal residence, which is not held for the production of income or from any transaction in such property which was not entered into for profit, (iv) rentals from personal property, or royalties from intangible personal property, within the meaning of subparagraph (3) of this paragraph, or (v) income which, without regard to section 871(d) or 882(d) and this section, is treated as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States.

(3) *Rules applicable to personal property.* For purposes of subparagraph (2) of this paragraph, in the case of a sales agreement, or rental or royalty agreement, affecting both real and personal property, the income from the transaction is to be allocated between the real property and the personal property in proportion to their respective fair market values unless the agreement specifically provides otherwise. In the case of such a rental or royalty agreement, the respective fair market values are to be determined as of the time the agreement is signed. In making determinations of this subparagraph, the principles of paragraph (c) of § 1.48-1, relating to the definition of "section 38 property," apply for purposes of determining whether property is tangible or intangible personal property and of paragraph (a)(5) of § 1.1245-1 apply for purposes of making the allocation of income between real and personal property.

(c) *Effect of the election—*(1) *Determination of tax.* The income to which, in accordance with paragraph (b) of this section, an election under this section applies shall be subject to tax in the manner, and subject to the same conditions, provided by section 871(b)(1) and paragraph (b)(2) of § 1.871-8, or by section 882(a)(1) and paragraph (b)(2) of § 1.882-1. For purposes of determining such tax for the taxable year, income to which the election applies shall be aggregated with all other income of the nonresident alien individual or foreign corporation which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that taxpayer. To the

extent that deductions are connected with income from real property to which the election applies, they shall be treated for purposes of section 873(a) or section 882(c)(1) as connected with income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by the nonresident alien individual or foreign corporation. An election under this section does not cause a nonresident alien individual or foreign corporation, which is not engaged in trade or business in the United States during the taxable year, to be treated as though such taxpayer were engaged in trade or business in the United States during the taxable year. Thus, for example, the compensation received during the taxable year for services performed in the United States in a previous taxable year by a nonresident alien individual, who has an election in effect for the taxable year under this section but is engaged in trade or business in the United States at no time during the taxable year, is not effectively connected for the taxable year with the conduct of a trade or business in the United States. In further illustration, gain for the taxable year from the casual sale of personal property described in section 1221(I) derived by a nonresident alien individual who is not engaged in trade or business in the United States during the taxable year but has an election in effect for such year under this section is not effectively connected with the conduct of a trade or business in the United States. See §1.864-3. If an election under this section is in effect for the taxable year, the income to which the election applies shall be treated, for purposes of section 871(b)(1) or section 882(a)(1), section 1441(c)(1), and paragraph (a) of §1.1441-4, as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by the taxpayer.

(2) *Treatment of property to which election applies.* Any real property, or interest in real property, with respect to which an election under this section applies shall be treated as a capital asset which, if depreciable, is subject to the allowance for depreciation provided in section 167 and the regulations

thereunder. Such property, or interest in property, shall be treated as property not used in a trade or business for purposes of applying any provisions of the Code, such as section 172(d)(4)(A), relating to gain or loss attributable to a trade or business for purposes of determining a net operating loss; section 1221(2), relating to property not constituting a capital asset; or section 1231(b), relating to special rules for treatment of gains and losses. For example, if a nonresident alien individual makes the election under this section and, while the election is in effect, sells unimproved land which is located in the United States and held for investment purposes, any gain or loss from the sale shall be considered gain or loss from the sale of a capital asset and shall be treated, for purposes of determining the tax under section 871(b)(1) and paragraph (b)(2) of §1.871-8, as a gain or loss which is effectively connected for the taxable year with the conduct of a trade or business in the United States.

(d) *Manner of making or revoking an election—(1) Election, or revocation, without consent of Commissioner—(i) In general.* A nonresident alien individual or foreign corporation may, for the first taxable year for which the election under this section is to apply, make the initial election at any time before the expiration of the period prescribed by section 6511(a), or by section 6511(c) if the period for assessment is extended by agreement, for filing a claim for credit or refund of the tax imposed by chapter 1 of the Code for such taxable year. This election may be made without the consent of the Commissioner. Having made the initial election, the taxpayer may, within the time prescribed for making the election for such taxable year, revoke the election without the consent of the Commissioner. If the revocation is timely and properly made, the taxpayer may make his initial election under this section for a later taxable year without the consent of the Commissioner. If the taxpayer revokes the initial election without the consent of the Commissioner he must file amended income tax returns, or claims for credit or refund, where applicable, for the taxable years to which the revocation applies.

(ii) *Statement to be filed with return.* An election made under this section without the consent of the Commissioner shall be made for a taxable year by filing with the income tax return required under section 6012 and the regulations thereunder for such taxable year a statement to the effect that the election is being made. This statement shall include (a) a complete schedule of all real property, or any interest in real property, of which the taxpayer is titular or beneficial owner, which is located in the United States, (b) an indication of the extent to which the taxpayer has direct or beneficial ownership in each such item of real property, or interest in real property, (c) the location of the real property or interest therein, (d) a description of any substantial improvements on any such property, and (e) an identification of any taxable year or years in respect of which a revocation or new election under this section has previously occurred. This statement may not be filed with any return under section 6851 and the regulations thereunder.

(iii) *Exemption from withholding of tax.* For statement to be filed with a withholding agent at the beginning of a taxable year in respect of which an election under this section is to be made, see paragraph (a) of § 1.1441-4.

(2) *Revocation, or election, with consent of Commissioner*—(i) *In general.* If the nonresident alien individual or foreign corporation makes the initial election under this section for any taxable year and the period prescribed by subparagraph (1)(i) of this paragraph for making the election for such taxable year has expired, the election shall remain in effect for all subsequent taxable years, including taxable years for which the taxpayer realizes no income from real property, or from any interest therein, or for which he is not required under section 6012 and the regulations thereunder to file an income tax return. However, the election may be revoked in accordance with subdivision (iii) of this subparagraph for any subsequent taxable year with the consent of the Commissioner. If the election for any such taxable year is revoked with the consent of the Commissioner, the taxpayer may not make a new election before his fifth taxable

year which begins after the first taxable year for which the revocation is effective unless consent is given to such new election by the Commissioner in accordance with subdivision (iii) of this subparagraph.

(ii) *Effect of new election.* A new election made for the fifth taxable year, or taxable year thereafter, without the consent of the Commissioner, and a new election made with the consent of the Commissioner, shall be treated as an initial election to which subparagraph (1) of this paragraph applies.

(iii) *Written request required.* A request to revoke an election made under this section when such revocation requires the consent of the Commissioner, or to make a new election when such election requires the consent of the Commissioner, shall be made in writing and shall be addressed to the Director of International Operations, Internal Revenue Service, Washington, DC 20225. The request shall include the name and address of the taxpayer and shall be signed by the taxpayer or his duly authorized representative. It must specify the taxable year for which the revocation or new election is to be effective and shall be filed within 75 days after the close of the first taxable year for which it is desired to make the change. The request must specify the grounds which are considered to justify the revocation or new election. The Director of International Operations may require such other information as may be necessary in order to determine whether the proposed change will be permitted. A copy of the consent by the Director of International Operations shall be attached to the taxpayer's return required under section 6012 and the regulations thereunder for the taxable year for which the revocation or new election is effective. A copy of such consent may not be filed with any return under section 6851 and the regulations thereunder.

(3) *Election by partnership.* If a nonresident alien individual or foreign corporation is a member of a partnership which has income described in paragraph (b)(1) of this section from real property, any election to be made under this section in respect of such income shall be made by the partners and not by the partnership. A nonresident

alien or foreign corporation that makes an election generally must provide the partnership a Form W-8ECI, "Certificate of Foreign Person's Claim for Exemption from Withholding on Income Effectively Connected with the Conduct of a Trade or Business in the United States," and attach to such form a copy of the election (or a statement that indicates that the nonresident alien or foreign corporation will make the election). However, if the nonresident alien or foreign corporation has already submitted a valid form to the partnership that establishes such partner's foreign status, the partner shall furnish the partnership a copy of the election (or a statement that indicates that the nonresident alien or foreign corporation will make the election). To the extent the partnership has income to which the election pertains, the partnership shall treat such income as effectively connected income subject to withholding under section 1446. See also § 1.1446-2.

(e) *Effective dates.* This section shall apply for taxable years beginning after December 31, 1966, except the last four sentences of paragraph (d)(3) of this section shall apply to partnership taxable years beginning after May 18, 2005, or such earlier time as the regulations under §§ 1.1446-1 through 1.1446-5 apply by reason of an election under § 1.1446-7. There are no corresponding rules in this part for taxable years beginning before January 1, 1967.

[T.D. 7332, 39 FR 44222, Dec. 23, 1974, as amended by T.D. 9200, 70 FR 28717, May 18, 2005]

§ 1.871-11 Gains from sale or exchange of patents, copyrights, or similar property.

(a) *Contingent payment defined.* For purposes of section 871(a)(1)(D), section 881(a)(4), § 1.871-7(c)(1)(iv), § 1.881-2(c)(1)(iii), and this section, payments which are contingent on the productivity, use, or disposition of property or of an interest therein include continuing payments measured by a percentage of the selling price of the products marketed, or based on the number of units manufactured or sold, or based in a similar manner upon production, sale or use, or disposition of the property or interest transferred. A payment

which is certain as to the amount to be received, but contingent as to the time of payment, or an installment payment of a principal sum agreed upon in a transfer agreement, shall not be treated as a contingent payment for purposes of this paragraph. For the inapplication of section 1253 to certain amounts described in this paragraph, see paragraph (a) of § 1.1253-1.

(b) *Payments treated as contingent on use.* Pursuant to section 871(e), if more than 50 percent of the gain of a nonresident alien individual or foreign corporation for any taxable year from the sale or exchange after October 4, 1966, of any patent, copyright, secret process or formula, goodwill, trademark, trade brand, franchise, or other like property, or of any interest in any such property, is from payments which are contingent on the productivity, use, or disposition of such property or interest, all of the gain of such individual or corporation for the taxable year from the sale or exchange of such property or interest are, for purposes of section 871(a)(1)(D), section 881(a)(4), section 1441(b), or section 1442(a), and the regulations thereunder, to be treated as being from payments which are contingent on the productivity, use, or disposition of such property or interest. This paragraph does not apply for purposes of determining under section 871(b)(1) or 882(a)(1) the tax of a nonresident alien individual or foreign corporation on income which is effectively connected for the taxable year with the conduct of a trade or business in the United States.

(c) *Sale or exchange.* A sale or exchange for purposes of this section includes, but is not limited to, a transfer by an individual which by reason of section 1235, relating to the sale or exchange of patents, is considered the sale or exchange of a capital asset. The provisions of section 1253, relating to transfers of franchises, trademarks, and trade names, do not apply in determining whether a transfer is a sale or exchange for purposes of this section.

(d) *Recovery of adjusted basis.* For purposes of determining for any taxable year the amount of gains which are subject to tax under section 871(a)(1)(D) or 881(a)(4), payments received by the nonresident alien individual or foreign

corporation during such year must be reduced by amounts representing recovery of the taxpayer's adjusted basis of the property or interest which is sold or exchanged. Where the taxpayer receives in the same taxable year payments which, without reference to section 871(e) and this section, are not contingent on the productivity, use, or disposition of the property or interest which is sold or exchanged and payments which are contingent on the productivity, use, or disposition of the property or interest which is sold or exchanged, the taxpayer's unrecovered adjusted basis in the property or interest which is sold or exchanged must be allocated for the taxable year between such payments on the basis of the gross amount of each such type of payments. Where the taxpayer receives in the taxable year only payments which are not so contingent or only payments which are so contingent, the taxpayer's unrecovered basis must be allocated in its entirety to such payments for the taxable year.

(e) *Source rule.* In determining whether gains described in section 871(a)(1)(D) or 881(a)(4) and paragraph (b) of this section are received from sources within the United States, such gains shall be treated, for purposes of section 871(a)(1)(D), section 881(a)(4), section 1441(b), and section 1442(a), as rentals or royalties for the use of, or privilege of using, property or an interest in property. See section 861(a)(4), § 1.861-5, and paragraph (a) of § 1.862-1.

(f) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. (a) A, a nonresident alien individual who uses the cash receipts and disbursements method of accounting and the calendar year as the taxable year, holds a U.S. patent which he developed through his own effort. On December 15, 1967, A enters into an agreement of sale with M Corporation, a domestic corporation, whereby A assigns to M Corporation all of his U.S. rights in the patent. In consideration of the sale, M Corporation is obligated to pay a fixed sum of \$60,000, \$20,000 being payable on execution of the contract and the balance payable in four annual installments of \$10,000 each. As additional consideration, M Corporation agrees to pay to A a royalty in the amount of 2 percent of the gross sales of the products manufactured by M Corporation under the patent. A is not engaged in trade or business

in the United States at any time during 1967 and 1968. His adjusted basis in the patent at the time of sale is \$28,800.

(b) In 1967, A receives only the \$20,000 paid by M Corporation on the execution of the contract of sale. No gain is realized by A upon receipt of this amount, and his unrecovered adjusted basis in the patent is reduced to \$8,800 (\$28,800 less \$20,000).

(c) In 1968, M Corporation has gross sales of \$600,000 from products manufactured under the patent. Consequently, for 1968, M Corporation pays \$22,000 to A, \$10,000 being the annual installment on the fixed payment and \$12,000 being payments under the terms of the royalty provision. A's recognized gain for 1968 is \$13,200 (\$22,000 reduced by the unrecovered adjusted basis of \$8,800). Of the total gain of \$13,200, gain in the amount of \$6,000 ($\$10,000 - [\$8,800 \times \$10,000 / \$22,000]$) is considered to be from the fixed installment payment and of \$7,200 ($\$12,000 - [\$8,800 \times \$12,000 / \$22,000]$) is considered to be from the royalty payment. Since 54.5 percent ($\$7,200 / \$13,200$) of the gain recognized in 1968 from the sale of the patent is from payments which are contingent on the productivity, use, or disposition of the patent, all of the \$13,200 gain recognized in 1968 is treated, for purposes of section 871(a)(1)(D) and section 1441(b), as being from payments which are contingent on the productivity, use, or disposition of the patent.

Example 2. (a) F, a foreign corporation using the calendar year as the taxable year and not engaged in trade or business in the United States, holds a U.S. patent on certain property which it developed through its own efforts. Corporation F uses the cash receipts and disbursements method of accounting. On December 1, 1966, F Corporation enters into an agreement of sale with D Corporation, a domestic corporation, whereby D Corporation purchases the exclusive right and license, and the right to sublicense to others, to manufacture, use, and/or sell certain devices under the patent in the United States during the term of the patent. The agreement grants D Corporation the right to dispose, anywhere in the world, of machinery manufactured in the United States and equipped with such devices. Corporation D is granted the right, at its own expense, to prosecute infringers in its own name or in the name of F Corporation, or both, and to retain any damages recovered.

(b) Corporation D agrees to pay to F Corporation annually \$5 for each device manufactured under the patent during the year but in no case less than \$5,000 per year. In 1967, D Corporation manufactures 2,500 devices under the patent; and, in 1968, 1,500 devices. Under the terms of the contract D Corporation pays to F Corporation in 1967 \$12,500 with respect to production in that year and \$7,500 in 1968 with respect to production in

that year. F Corporation's basis in the patent at the time of the sale is \$17,000.

(c) With respect to the payments received by F Corporation in 1967, no gain is realized by that corporation and its unrecovered adjusted basis in the patent is reduced to \$4,500 (\$17,000 less \$12,500).

(d) With respect to the payments received by F Corporation in 1968, such corporation has recognized gain of \$3,000 (\$7,500 reduced by unrecovered adjusted basis of \$4,500). Of the total gain of \$3,000, gain in the amount of \$2,000 (\$5,000 - [\$4,500 × \$5,000/\$7,500]) is considered to be from the fixed installment payment and of \$1,000 (\$2,500 - [\$4,500 × \$2,500/\$7,500]) is considered to be from payments which are contingent on the productivity, use, or disposition of the patent. Since 33.3 percent (\$1,000/\$3,000) of the gain recognized in 1968 from the sale of the patent is from payments which are contingent on the productivity, use, or disposition of the patent, only \$1,000 of the \$3,000 gain for that year constitutes gains which, for purposes of section 881(a)(4) and section 1442(a), are from payments which are contingent on the productivity, use, or disposition of the patent. The balance of \$2,000 is gain from the sale of property and is not subject to tax under section 881(a).

(g) *Effective date.* This section shall apply for taxable years beginning after December 31, 1966, but only in respect of gains from sales or exchanges occurring after October 4, 1966. There are no corresponding rules in this part for taxable years beginning before January 1, 1967.

[T.D. 7332, 39 FR 44224, Dec. 23, 1974]

§ 1.871-12 Determination of tax on treaty income.

(a) *In general.* This section applies for purposes of determining under § 1.871-7 or § 1.871-8 the tax of a nonresident alien individual, or under § 1.881-2 or § 1.882-1 the tax of a foreign corporation, which for the taxable year has income described in section 872(a) or 882(b) upon which the tax is limited by an income tax convention to which the United States is a party. Income for such purposes does not include income of any kind which is exempt from tax under the provisions of an income tax convention to which the United States is a party. See §§ 1.872-2(c) and 1.883-1(b). This section shall not apply to a nonresident alien individual who is a bona fide resident of Puerto Rico during the entire taxable year.

(b) *Definition of treaty and nontreaty income—(1) In general.* (i) For purposes of this section the term "treaty income" shall be construed to mean the gross income of a nonresident alien individual or foreign corporation, as the case may be, the tax on which is limited by a tax convention. The term "non-treaty income" shall be construed, for such purposes, to mean the gross income of the nonresident alien individual or foreign corporation other than the treaty income. Neither term includes income of any kind which is exempt from the tax imposed by chapter 1 of the Code.

(ii) In determining either the treaty or nontreaty income the gross income shall be determined in accordance with §§ 1.872-1 and 1.872-2, or with §§ 1.882-3 and 1.883-1, except that in determining the treaty income the exclusion granted by section 116(a) for dividends shall not be taken into account. Thus, for example, treaty income includes the total amount of dividends paid by a domestic corporation not disqualified by section 116(b) and received from sources within the United States if, in accordance with a tax convention, the dividends are subject to the income tax at a rate not to exceed 15 percent but does not include interest which, in accordance with a tax convention, is exempt from the income tax. In further illustration, neither the treaty nor the nontreaty income includes interest on certain governmental obligations which by reason of section 103 is excluded from gross income, or interest which by reason of a tax convention is exempt from the tax imposed by chapter 1 of the Code.

(iii) For purposes of applying any income tax convention to which the United States is a party, original issue discount which is subject to tax under section 871(a)(1)(C) or 881(a)(3) is to be treated as interest, and gains which are subject to tax under section 871(a)(1)(D) or 881(a)(4) are to be treated as royalty income. This subdivision shall not apply, however, where its application would be contrary to any treaty obligation of the United States.

(2) *Application of permanent establishment rule of treaties.* In applying this section with respect to income which is

§ 1.871-12

not effectively connected for the taxable year with the conduct of a trade or business in the United States by a nonresident alien individual or foreign corporation, see section 894(b), which provides that with respect to such income the nonresident alien individual or foreign corporation shall be deemed not to have a permanent establishment in the United States at any time during the taxable year for purposes of applying any exemption from, or reduction in rate of, tax provided by any tax convention.

(c) *Determination of tax—(1) In general.* If the gross income of a nonresident alien individual or foreign corporation, as the case may be, consists of both treaty and nontreaty income, the tax liability for the taxable year shall be the sum of the amounts determined in accordance with subparagraphs (2) and (3) of this paragraph. In no case, however, may the tax liability so determined exceed the tax liability (tax reduced by allowable credits) with respect to the taxpayer's entire income, determined in accordance with § 1.871-7 or § 1.871-8, or with § 1.881-2 or § 1.882-1, as though the tax convention had not come into effect and without reference to the provisions of this section. Determinations under this paragraph shall be made without taking into account any credits allowed by sections 31, 32, 39, and 6402, but such credits shall be allowed against the tax liability determined in accordance with this subparagraph.

(2) *Tax on nontreaty income.* For purposes of subparagraph (1) of this paragraph, compute a partial tax (determined without the allowance of any credit) upon only the nontreaty income in accordance with § 1.871-7 or § 1.871-8, or with § 1.881-2 or § 1.882-1, whichever applies, as though the tax convention had not come into effect. To the extent allowed by paragraph (d) of § 1.871-8, or paragraph (c) of § 1.882-1, the credits allowed by sections 33, 35, 38, and 40 shall then be allowed, without taking into account any item included in the treaty income, against the tax determined under this subparagraph.

(3) *Tax on treaty income.* For purposes of subparagraph (1) of this paragraph, compute a tax upon the gross amount, determined without the allowance of

any deduction, of each separate item of treaty income at the reduced rate applicable to that item under the tax convention. No credits shall be allowed against the tax determined under this subparagraph.

(d) *Illustration.* The application of this section may be illustrated by the following example:

Example. (a) A nonresident alien individual who is a resident of a foreign country with which the United States has entered into a tax convention receives during the taxable year 1967 from sources within the United States total gross income of \$22,000, consisting of the following items:

| | |
|---|----------|
| Compensation for personal services the tax on which is not limited by the tax convention (effectively connected income under § 1.864-4(c)(6)(ii)) | \$20,000 |
| Oil royalties the tax on which is limited by the tax convention to 15 percent of the gross amount thereof (effectively connected income by reason of election under § 1.871-10) | 2,000 |
| Total gross income | 22,000 |

(b) The taxpayer is engaged in business in the United States during the taxable year but does not have a permanent establishment therein. There are no allowable deductions, other than the deductions allowed by sections 613 and 873(b)(3).

(c) The tax liability for the taxable year is \$6,100, determined as follows:

| | |
|--|----------|
| Nontreaty gross income | \$20,000 |
| Less: Deduction for personal exemption | 600 |
| Nontreaty taxable income | 19,400 |
| Tax under section 1 of the Code on nontreaty taxable income (\$5,170 plus 45 percent of \$1,400) | 5,800 |
| Plus: Tax on treaty income (Gross oil royalties) (\$2,000×15 percent) | 300 |
| Total tax (determined as provided in paragraph (c) (2) and (3) of this section) | 6,100 |

(d) If the tax had been determined under paragraph (b)(2) of § 1.871-8 as though the tax liability would have been \$6,478, determined as follows and by taking into account the election under § 1.871-10:

| | |
|--|----------|
| Total gross income | \$22,000 |
| Less: Deduction under section 613 for percentage depletion (\$2000×27½ percent) | 550 |
| Deduction for personal exemption | 600 |
| Taxable income | 20,850 |
| Tax under section 1 of the Code on taxable income (\$6,070 plus 48 percent of \$850) | 6,478 |

(e) *Effective date.* This section shall apply for taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR

1.871-7(e) (Revised as of January 1, 1971).

[T.D. 7332, 39 FR 44225, Dec. 23, 1974; as amended at T.D. 8657, 61 FR 9338, Mar. 8, 1996]

§ 1.871-13 Taxation of individuals for taxable year of change of U.S. citizenship or residence.

(a) *In general.* (1) An individual who is a citizen or resident of the United States at the beginning of the taxable year but a nonresident alien at the end of the taxable year, or a nonresident alien at the beginning of the taxable year but a citizen or resident of the United States at the end of the taxable year, is taxable for such year as though his taxable year were comprised of two separate periods, one consisting of the time during which he is a citizen or resident of the United States and the other consisting of the time during which he is not a citizen or resident of the United States. Thus, for example, the income tax liability of an alien individual under chapter 1 of the Code for the taxable year in which he changes his residence will be computed under two different sets of rules, one relating to resident aliens for the period of residence and the other relating to nonresident aliens for the period of nonresidence. However, in determining the taxable income for such year which is subject to the graduated rate of tax imposed by section 1 or 1201 of the Code, all income for the period of U.S. citizenship or residence must be aggregated with the income for the period of nonresidence which is effectively connected for such year with the conduct of a trade or business in the United States. This section does not apply to alien individuals treated as residents for the entire taxable year under section 6013 (g) or (h). These individuals are taxed under the rules in § 1.1-1(b).

(2) For purposes of this section, an individual is deemed to be a citizen or resident of the United States for the day on which he becomes a citizen or resident of the United States, a nonresident of the United States for the day on which he abandons his U.S. residence, and an alien for the day on which he gives up his U.S. citizenship.

(b) *Acquisition of U.S. citizenship or residence.* Income from sources without the United States which is not effec-

tively connected with the conduct by the taxpayer of a trade or business in the United States is not taxable if received by an alien individual while he is not a resident of the United States even though he becomes a citizen or resident of the United States after its receipt and before the close of the taxable year. However, income from sources without the United States which is not effectively connected with the conduct by the taxpayer of a trade or business in the United States is taxable if received by an individual while he is a citizen or resident of the United States, even though he earns the income earlier in the taxable year while he is neither a citizen nor resident of the United States.

(c) *Abandonment of U.S. citizenship or residence.* Income from sources without the United States which is not effectively connected with the conduct by the taxpayer of a trade or business in the United States is not taxable if received by an alien individual while he is not a resident of the United States, even though he earns the income earlier in the taxable year while he is a citizen or resident of the United States. However, income from sources without the United States which is not effectively connected with the conduct by the taxpayer of a trade or business in the United States is taxable if received by an individual while he is a citizen or resident of the United States, even though he abandons his U.S. citizenship or residence after its receipt and before the close of the taxable year.

(d) *Special rules—(1) Method of accounting.* Paragraphs (b) and (c) of this section may not apply to an individual who for the taxable year uses an accrual method of accounting.

(2) *Deductions for personal exemptions.* An alien individual to whom this section applies is entitled to deduct one personal exemption for the taxable year under section 151. In addition, he is entitled to such additional exemptions as are allowed as a deduction under section 151 but only to the extent the amount of such additional exemptions do not exceed his taxable income (determined without regard to any deduction for personal exemptions) for the period in the taxable year during

which he is a citizen or resident of the United States. This subparagraph does not apply to the extent it is inconsistent with section 873, and the regulations thereunder, or with the provisions of an income tax convention to which the United States is a party.

(3) *Exclusion of dividends received.* In determining the \$100 exclusion for the taxable year provided by section 116 in respect of certain dividends, only those dividends for the period during which the individual is neither a citizen nor resident of the United States may be taken into account as are effectively connected for the taxable year with the conduct of a trade or business in the United States. See § 1.116-1(e)(1).

(e) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. A, a married alien individual who uses the calendar year as the taxable year and the cash receipts and disbursements method of accounting, becomes a resident of the United States on June 1, 1971. During the period of nonresidence from January 1, 1971, to May 31, 1971, inclusive, A receives \$15,000 income from sources without the United States which is not effectively connected with the conduct of a trade or business in the United States. During the period of residence from June 1, 1971, to December 31, 1971, A receives wages of \$10,000, dividends of \$200 from a foreign corporation, and dividends of \$75 from a domestic corporation qualifying under section 116(a). Of the amount of wages so received, \$2,000 is for services performed by A outside the United States during the period of nonresidence. Total allowable deductions (other than for personal exemptions) amount to \$700, none of which are deductible under section 62 in computing adjusted gross income. For 1971 A's spouse has no gross income and is not the dependent of another taxpayer. For 1971, A's taxable income is \$8,200, all of which is subject to tax under section 1, as follows:

| | | |
|--|----------|-------|
| Wages | \$10,000 | |
| Dividends from foreign corporation | 200 | |
| Dividends from domestic corporation (\$75 less \$75 exclusion) | 0 | |
| Adjusted gross income | 10,200 | |
| Less deductions: | | |
| Personal exemptions (2×\$650) | \$1,300 | |
| Other allowable deductions | 700 | 2,000 |
| Taxable income | | 8,200 |

Example 2. The facts are the same as in example 1 except that during the period of nonresidence from January 1, 1971, to May 31, 1971, A receives from sources within the

United States income of \$1,850 which is effectively connected with the conduct by A of a business in the United States and \$350 in dividends from domestic corporations qualifying under section 116(a). Only \$50 of these dividends are effectively connected with the conduct by A of a business in the United States. The assumption is made that there are no allowable deductions connected with such effectively connected income. For 1971, A has taxable income of \$10,075 subject to tax under section 1 and \$300 income subject to tax under section 871(a)(1)(A), as follows:

| | | |
|--|----------|--------|
| Wages | \$10,000 | |
| Business income | 1,850 | |
| Dividends from foreign corporation | 200 | |
| Dividends from domestic corporation (\$125 less \$100 exclusion) | 25 | |
| Adjusted gross income | 12,075 | |
| Less deductions: | | |
| Personal exemptions (2×\$650) | \$1,300 | |
| Other allowable deductions | 700 | 2,000 |
| Taxable income subject to tax under section 1 | | 10,075 |
| Income subject to tax under section 871(a)(1)(A) ... | | 300 |

Example 3. A, a married alien individual with three children, uses the calendar year as the taxable year and the cash receipts and disbursements method of accounting. On October 1, 1971, A and his family become residents of the United States. During the period of nonresidence from January 1, 1971, to September 30, 1971, A receives income of \$18,000 from sources without the United States which is not effectively connected with the conduct of a trade or business in the United States and of \$2,500 from sources within the United States which is effectively connected with the conduct of a business in the United States. It is assumed there are no allowable deductions connected with such effectively connected income. During the period of residence from October 1, 1971, to December 31, 1971, A receives wages of \$2,000, of which \$400 is for services performed outside the United States during the period of nonresidence. Total allowable deductions (other than for personal exemptions) amount to \$250, none of which are deductible under section 62 in computing adjusted gross income. Neither the spouse nor any of the children has any gross income for 1971, and the spouse is not the dependent of another taxpayer for such year. For 1971, A's taxable income is \$1,850, all of which is subject to tax under section 1, as follows:

| | | |
|---|---------|-------|
| Wages (residence period) | \$2,000 | |
| Less: Allowable deductions | 250 | |
| Taxable income (without deduction for personal exemptions) (residence period) | \$1,750 | |
| Business income (nonresidence period) | | 2,500 |
| Total taxable income (without deduction for personal exemptions) | | 4,250 |

Internal Revenue Service, Treasury

§ 1.871-14

| | | |
|--|-------|-------|
| Less deduction for personal exemptions: | | |
| Taxpayer | 650 | |
| Wife and 3 children (4×\$650, but not to exceed \$1,750) | 1,750 | 2,400 |
| | | 1,850 |
| Taxable income | | 1,850 |

(f) *Effective date.* This section shall apply for taxable years beginning after December 31, 1966. There are no corresponding rules in this part for taxable years beginning before January 1, 1967.

[T.D. 7332, 39 FR 44226, Dec. 23, 1974, as amended by T.D. 7670, 45 FR 6928, Jan. 31, 1980]

§ 1.871-14 Rules relating to repeal of tax on interest of nonresident alien individuals and foreign corporations received from certain portfolio debt investments.

(a) *General rule.* No tax shall be imposed under section 871(a)(1)(A), 871(a)(1)(C), 881(a)(1) or 881(a)(3) on any portfolio interest as defined in sections 871(h)(2) and 881(c)(2) received by a foreign person. But see section 871(b) or 882(a) if such interest is effectively connected with the conduct of a trade or business within the United States.

(b) [Reserved] For further guidance, see § 1.871-14T(b).

(c) *Rules concerning obligations in registered form—(1) In general—(i) Obligation in registered form.* For purposes of this section, an obligation is in registered form only as provided in this paragraph (c)(1)(i). The conditions for an obligation to be considered in registered form are identical to the conditions described in § 5f.103-1 of this chapter. Therefore, an obligation that would be an obligation in registered form except for the fact that it can be converted at any time in the future into an obligation that is not in registered form shall not be an obligation in registered form. An obligation that is not in registered form by reason of the preceding sentence may nevertheless be in registered form, but only after the possibility of conversion is terminated. An obligation that is not in registered form and can be converted into an obligation that would meet the requirements of this paragraph (c)(1)(i) for being in registered form shall be considered in registered form only after the conversion is effected. For purposes of this section, an obligation

is convertible if the obligation can be transferred by any means not described in § 5f.103-1(c) of this chapter. An obligation is treated as an obligation in registered form if—

(A) The obligation is registered as to both principal and any stated interest with the issuer (or its agent) and transfer of the obligation may be effected only by surrender of the old instrument, and either the reissuance by the issuer of the old instrument to the new holder or the issuance by the issuer of a new instrument to the new holder;

(B) The right to the principal of, and stated interest on, the obligation may be transferred only through a book entry system maintained by the issuer (or its agent) described in this paragraph (c)(1)(i)(B). An obligation shall be considered transferable through a book entry system if the ownership of an interest in the obligation, is required to be reflected in a book entry, whether or not physical securities are issued. A book entry is a record of ownership that identifies the owner of an interest in the obligation; or

(C) It is registered as to both principal and any stated interest with the issuer (or its agent) and may be transferred by way of either of the methods described in paragraph (c)(1)(i) (A) or (B) of this section.

(ii) *Requirements for portfolio interest qualification in the case of an obligation in registered form.* Interest (including original issue discount) received on an obligation that is in registered form qualifies as portfolio interest only if—

(A) The interest is paid on an obligation issued after July 18, 1984;

(B) The interest would be subject to tax under section 871(a)(1)(A), 871(a)(1)(C), 881(a)(1) or 881(a)(3) but for section 871(h) or 881(c);

(C) A United States (U.S.) person otherwise required to deduct and withhold tax under chapter 3 of the Internal Revenue Code (Code) receives a statement that meets the requirements of section 871(h)(5) that the beneficial owner of the obligation is not a U.S. person; and

(D) An exception under section 871(h) or 881(c) does not apply.

(2) through (c)(2)(iv) [Reserved]. For further guidance, see § 1.871-14T(c)(2) through (c)(2)(iv).

(v) The U.S. person receives a statement from a securities clearing organization, a bank, or another financial institution that holds customers' securities in the ordinary course of its trade or business. In such case the statement must be signed under penalties of perjury by an authorized representative of the financial institution and must state that the institution has received from the beneficial owner a withholding certificate described in § 1.1441-1(e)(2)(i) (a Form W-8 or an acceptable substitute form as defined § 1.1441-1(e)(4)(vi)) or that it has received from another financial institution a similar statement that it, or another financial institution acting on behalf of the beneficial owner, has received the Form W-8 from the beneficial owner. In the case of multiple financial institutions between the beneficial owner and the U.S. person, this statement must be given by each financial institution to the one above it in the chain. No particular form is required for the statement provided by the financial institutions. However, the statement must provide the name and address of the beneficial owner, and a copy of the Form W-8 provided by the beneficial owner must be attached. The statement is subject to the same rules described in § 1.1441-1(e)(4) that apply to intermediary Forms W-8 described in § 1.1441-1(e)(3)(iii). If the information on the Form W-8 changes, the beneficial owner must so notify the financial institution acting on its behalf within 30 days of such changes, and the financial institution must promptly so inform the U.S. person. This notice also must be given if the financial institution has actual knowledge that the information has changed but has not been so informed by the beneficial owner. In the case of multiple financial institutions between the beneficial owner and the U.S. person, this notice must be given by each financial institution to the institution above it in the chain.

(vi) The U.S. person complies with procedures that the U.S. competent authority may agree to with the competent authority of a country with which the United States has an income tax treaty in effect.

(3) [Reserved]. For further guidance, see § 1.871-14T(c)(3).

(i) [Reserved]. For further guidance, see § 1.871-14T(c)(3)(i).

(ii) *Example.* The following example illustrates the rules of this paragraph (c)(3) and their coordination with § 1.1441-1(b)(7):

Example. A is a withholding agent who, on October 12, 2001, pays interest on a registered obligation to B, a foreign corporation. B is a calendar year taxpayer, engaged in the conduct of a trade or business in the United States, and is, therefore, required to file an annual income tax return on Form 1120F. The interest, however, is not effectively connected with B's U.S. trade or business. On the date of payment, B has not furnished, and A cannot associate the payment with documentation for B. However, A does not withhold under section 1442, even though, under § 1.1441-1(b)(3)(iii)(A), A should presume that B is a foreign person, because A's communications with B are mailed to an address in a foreign country. Assuming that B files a return for its taxable year ending December 31, 2001, and that its statute of limitations period with regard to that year expires on June 15, 2005, the interest paid on October 12, 2001, may qualify as portfolio interest only if B provides appropriate documentation to A on or before June 15, 2005. If B does not provide the documentation on or before June 15, 2005, and does not pay the tax, A is liable for the tax under section 1463, even if B provides the documentation to A after June 15, 2005. Therefore, the provisions in § 1.1441-1(b)(7), regarding late-received documentation would not help A avoid liability for tax under section 1463 even if the documentation is furnished within the statute of limitations period of A. This is because, in a case involving interest, the documentation received within the limitations period of the beneficial owner serves as a condition for the interest to qualify as portfolio interest. When documentation is received after the expiration of the beneficial owner's limitations period, the interest can no longer qualify as portfolio interest. On the other hand, A could rely on documentation that it receives after the expiration of B's limitations period to establish B's right to a reduced rate of withholding under an applicable income tax treaty (since, in such a case, a claim of treaty benefits is not conditioned upon providing documentation prior to the expiration of the beneficial owner's limitations period).

(4) [Reserved] For further guidance, see § 1.871-14T(c)(4).

(d) *Application of repeal of 30-percent withholding to pass-through certificates—*
(1) *In general.* Interest received on a pass-through certificate qualifies as portfolio interest under section

871(h)(2) or 881(c)(2) if the interest satisfies the conditions described in paragraph (b)(1), (c)(1), or (e) of this section without regard to whether any obligation held by the fund or trust to which the pass-through certificate relates is described in paragraph (b)(1), (c)(1)(ii), or (e) of this section. This paragraph (d)(1) applies only to payments made to the holder of the pass-through certificate from the trustee of the pass-through trust and does not apply to payments made to the trustee of the pass-through trust. For example, a mortgage pass-through certificate in bearer form must meet the requirements set forth in paragraph (b)(1) of this section, but the obligations held by the fund or trust to which the mortgage pass-through certificate relates need not meet the requirements set forth in paragraph (b)(1), (c)(1)(ii), or (e) of this section. However, for purposes of paragraphs (b)(1), (c)(1)(ii), and (e) of this section and section 127 of the Tax Reform Act of 1984, a pass-through certificate will be considered as issued after July 18, 1984, only to the extent that the obligations held by the fund or trust to which the pass-through certificate relates are issued after July 18, 1984.

(2) *Interest in REMICs.* Interest received on a regular or residual interest in a REMIC qualifies as portfolio interest under section 871(h)(2) or 881(c)(2) if the interest satisfies the conditions described in paragraph (b)(1), (c)(1)(ii), or (e) of this section. For purposes of paragraph (b)(1), (c)(1)(ii), or (e) of this section, interest on a regular interest in a REMIC is not considered interest on any mortgage obligations held by the REMIC. The foregoing rule, however, applies only to payments made to the holder of the regular interest from the REMIC and does not apply to payments made to the REMIC. For purposes of paragraph (b)(1), (c)(1)(ii), or (e) of this section, interest on a residual interest in a REMIC is considered to be interest on or with respect to the obligations held by the REMIC, and not on or with respect to the residual interest. For purposes of paragraphs (b)(1), (c)(1)(ii), and (e) of this section and section 127 of the Tax Reform Act of 1984, a residual interest in a REMIC will be considered as issued after July

18, 1984, only to the extent that the obligations held by the REMIC are issued after July 18, 1984, but a regular interest in a REMIC will be considered as issued after July 18, 1984, if the regular interest was issued after July 18, 1984, without regard to the date on which the mortgage obligations held by the REMIC were issued.

(3) *Date of issuance.* In general, a mortgage pass-through certificate will be considered to have been issued after July 18, 1984, if all of the mortgages held by the fund or trust were issued after July 18, 1984. If some of the mortgages held by the fund or trust were issued before July 19, 1984, then the portion of any interest payment which represents interest on those mortgages shall not be considered to be portfolio interest. The preceding sentence shall not apply, however, if all of the following conditions are satisfied:

(i) The mortgage pass-through certificate is issued after December 31, 1986;

(ii) Payment of the mortgage pass-through certificate is guaranteed by, and a guarantee commitment has been issued by, an entity that is independent from the issuer of the underlying obligation;

(iii) The guarantee commitment with respect to the mortgage pass-through certificate cannot have been issued more than 14 months prior to the date on which the mortgage pass-through certificate is issued; and

(iv) The fund or trust to which the mortgage pass-through certificate relates cannot contain mortgage obligations on which the first scheduled monthly payment of principal and interest was made more than twelve months before the date on which the guarantee commitment was made.

(e) *Foreign-targeted registered obligations*—(1) [Reserved] For further guidance, see § 1.871-14T(e)(1).

(2) *Definition of a foreign-targeted registered obligation.* An obligation is considered to be targeted to foreign markets for purposes of paragraph (e)(1) of this section if it is sold (or resold in connection with its original issuance) only to foreign persons (or to foreign branches of United States financial institutions described in section

871(h)(5)(B)) in accordance with procedures similar to those prescribed in § 1.163-5(c)(2)(i) (A), (B), or (D). However, the provisions of that section that require an obligation to be offered for sale or resale in connection with its original issuance only outside the United States do not apply with respect to registered obligations offered for sale through a public auction. Similarly, the provisions of that section that require delivery to be made outside the United States do not apply to registered obligations offered for sale through a public auction if the obligations are considered to be in registered form by virtue of the fact that they may be transferred only through a book entry system. The obligation, if evidenced by a physical document other than a confirmation receipt, must contain on its face a legend indicating that it has been sold (or resold in connection with its original issuance) in accordance with those procedures.

(3) *Documentation.* A certificate described in paragraph (e)(3)(i) of this section is required if the United States person otherwise required to deduct and withhold tax (the withholding agent) pays interest to a financial institution described in section 871(h)(5)(B) or to a member of a clearing organization, which member is the beneficial owner of the obligation. The documentation described in paragraph (e)(3)(ii) of this section is required if a withholding agent pays interest to a beneficial owner that is neither a financial institution described in section 871(h)(5)(B) nor a member of a clearing organization.

(i) *Interest paid to a financial institution or a member of a clearing organization—(A) Requirement of a certificate—(1)* If the withholding agent pays interest to a financial institution described in section 871(h)(5)(B) or to a member of a clearing organization, which member is the beneficial owner of the obligation, the withholding agent must receive a certificate which states that, beginning at the time the last preceding certificate under this paragraph (e)(3)(i) was provided and while the financial institution or clearing organization member has held the obligation, with respect to each foreign-targeted reg-

istered obligation which has been held by the person providing the certificate at any time since the provision of such last preceding certificate, either—

(i) The beneficial owner of the obligation has not been a United States person on each interest payment date; or

(ii) If the person providing the certificate is a financial institution which is holding or has held an obligation on behalf of the beneficial owner, the beneficial owner of the obligation has been a United States person on one or more interest payment dates (identifying such date or dates), and the person making the certification has forwarded or will forward the appropriate United States beneficial ownership notification to the withholding agent in accordance with the provisions of paragraph (e)(4) of this section.

(2) The person providing the certificate need not state the foregoing where no previous certificate has been required to be provided by the payee to the withholding agent under this paragraph (e)(3)(i).

(B) *Additional representations.* Whether or not a previous certificate has been required to be provided with respect to the obligation, each certificate furnished pursuant to the provisions in this paragraph (e)(3)(i) must further state that, for each foreign-targeted registered obligation held and every other such obligation to be acquired and held by the person providing the certificate during the period beginning on the date of the certificate and ending on the date the next certificate is required to be provided, the beneficial owner of the obligation will not be a United States person on each interest payment date while the financial institution or clearing organization member holds the obligation and that, if the person providing the certificate is a financial institution which is holding or will be holding the obligation on behalf of a beneficial owner, such person will provide a United States beneficial ownership notification to the withholding agent (and a clearing organization that is not a withholding agent where a member organization is required by this paragraph (e)(3) to furnish the clearing organization with a statement) in accordance with paragraph (e)(4) of this section in the event such

certificate (or statement in the case of a statement provided by a member organization to a clearing organization that is not a withholding agent) is or becomes untrue with respect to any obligation. A clearing organization is an entity which is in the business of holding obligations for member organizations and transferring obligations among such members by credit or debit to the account of a member without the necessity of physical delivery of the obligation.

(C) *Obligation must be identified.* The certificate described in paragraph (e)(3)(ii)(A) of this section must identify the obligation or obligations with respect to which it is given, except where the certification is given with respect to an obligation that has not been acquired at the time the certification is made. An obligation is identified if it or the larger issuance of which it is a part is described on a list (e.g., \$5 million principal amount of 12% debentures of ABC Savings and Loan Association due February 25, 1995, \$3 million principal amount of 10% U.S. Treasury notes due May 28, 1990) of all registered obligations targeted to foreign markets held by or on behalf of the person providing the certificate and the list is attached to, and incorporated by reference into, the certificate. The certificate must identify and provide the address of the person furnishing the certificate.

(D) *Payment to a depository of a clearing organization.* If the withholding agent pays interest to a depository of a clearing organization, then the clearing organization must provide the certificate described in this paragraph (e)(3)(i) to the withholding agent. Any certificate that is provided by a clearing organization must state that the clearing organization has received a statement from each member which complies with the provisions of this paragraph (e)(3)(i) and of paragraph (e)(4) of this section (as if the clearing organization were the withholding agent and regardless of whether the member is a financial institution described in section 871(h)(5)(B)).

(E) *Statement in lieu of Form W-8.* Subject to the requirements set out in paragraph (e)(4) of this section, a certificate or statement in the form de-

scribed in this paragraph (e)(3)(i), in conjunction with the next annual certificate or statement, will serve as the certificate that may be provided in lieu of a Form W-8 with respect to interest on all foreign-targeted registered obligations held by the person making the certification or statement and which is paid to such person within the period beginning on the date of the certificate and ending on the date the next certificate is required to be provided.

(F) *Electronic transmission.* The certificate described in this paragraph (e)(3)(i) may be provided electronically under the terms and conditions of § 1.163-5(c)(2)(i)(D)(3)(ii).

(ii) *Payment to a person other than a financial institution or member of a clearing organization.* If the withholding agent pays interest to the beneficial owner of an obligation that is neither a financial institution described in section 871(h)(5)(B) nor a member of a clearing organization, then such owner must provide the withholding agent a statement described in paragraph (c)(1)(ii)(C) of this section.

(4) *Applicable procedures regarding documentation—(i) Procedures applicable to certificates required under paragraph (e)(3)(i) of this section—(A) Time for providing certificate.* Where no previous certificate for foreign-targeted registered obligations has been provided to the withholding agent by the person providing the certificate under paragraph (e)(3)(i) of this section, such certificate must be provided within the period beginning 90 days prior to the first interest payment date on which the person holds a foreign-targeted registered obligation. The withholding agent may, in its discretion, withhold under section 1441(a), 1442(a), or 1443 if the certificate is not received by the date 30 days prior to the interest payment. Thereafter the certificate must be filed within the period beginning on January 15 and ending January 31 of each year. If a certificate provided pursuant to the first sentence of this paragraph (e)(4)(i)(A) is provided during the period beginning on January 15 and ending on January 31 of any year, then no other certificate need be provided during such period in such year.

(B) *Change of status notification on Form W-9.* If, on any interest payment

date after the obligation was acquired by the person making the certification, the beneficial owner of the obligation is a U.S. person, then the person to whom the withholding agent pays interest must furnish the withholding agent with a U.S. beneficial ownership notification within 30 days after such interest payment date. A U.S. beneficial ownership notification must include a statement that the beneficial owner of the obligation has been a U.S. person on an interest payment date (identifying such date), that such owner has provided to the person providing the notification a Form W-9 (or a substitute form that is substantially similar to Form W-9 and completed under penalties of perjury), and that the person providing the notification has been and will be complying with the information reporting requirements of section 6049, if applicable.

(C) *Alternative notification statement.* Where the person providing the notification described in paragraph (e)(4)(i)(B) of this section is neither a controlled foreign corporation within the meaning of section 957(a), nor a foreign corporation 50-percent or more of the gross income of which from all sources for the three-year period ending with the close of the taxable year preceding the date of the statement was effectively connected with the conduct of trade or business in the United States, such person must attach to the notification a copy of the Form W-9 (or substitute form that is substantially similar to Form W-9 and completed under penalties of perjury) provided by the beneficial owner. When a person that provides the U.S. beneficial ownership notification does not attach to it a copy of such Form W-9 (or substitute form that is substantially similar to Form W-9 and completed under penalties of perjury), such person must state that it is either a controlled foreign corporation within the meaning of section 957(a), or a foreign corporation 50-percent or more of the gross income of which from all sources for the three-year period ending with the close of its taxable year preceding the date of the statement was effectively connected with the conduct of a trade or business in the United States. A withholding agent that receives a Form W-9 (or a

substitute form that is substantially similar to Form W-9 and completed under penalties of perjury) must send a copy of such form to the IRS, at such address as the IRS shall indicate, within 30 days after receiving it and must attach a statement that the Form W-9 or substitute form was provided pursuant to this paragraph (e)(4) with respect to a U.S. person that has owned a foreign-targeted registered obligation on one or more interest payment dates.

(D) *Failure to provide notification.* If either a Form W-9 (or a substitute form that is substantially similar to a Form W-9 and completed under penalties of perjury) or the statement described in paragraph (e)(4)(i)(C) of this section is not attached to the U.S. beneficial ownership notification provided pursuant to paragraph (e)(4)(i)(B) of this section, the withholding agent is required to withhold under section 1441, 1442, or 1443 on a payment of interest made after the withholding agent has received the notification unless such form or statement (or a statement that the beneficial owner of the obligation is no longer a U.S. person) is received before the interest payment date from the person who provided the notification (or transferee). If, during the period beginning on the next January 15 and ending on the next January 31, such person certifies as set out in paragraph (e)(3)(i) of this section (subject to paragraph (e)(3)(i)(A)(2) of this section) then the withholding agent is not required to withhold during the year following such certification (unless such person again provides a U.S. beneficial ownership notification without attaching a Form W-9 or substitute form that is substantially similar to Form W-9 and completed under penalties of perjury or the statement described in paragraph (e)(4)(i)(C) of this section).

(E) *Procedures for clearing organizations.* Within the period beginning 10 days before the end of the calendar quarter and ending on the last day of each calendar quarter, any clearing organization (including a clearing organization that is a withholding agent) relying on annual certificates or statements from its member organizations, as set forth in paragraph (e)(3)(i) of this

section, must send each member organization having submitted such certificate or statement a reminder that the member organization must give the clearing organization a U.S. beneficial ownership notification in the circumstances described in paragraph (e)(4)(i)(B) of this section.

(F) *Retention of certificates.* The certificate described in paragraph (e)(3)(i) of this section must be retained in the records of the withholding agent for four years from the end of the calendar year in which it was received. The statement described in paragraph (e)(3)(i) of this section that is received by a clearing organization from a member organization must be retained in the records of the clearing organization for four years from the end of the calendar year in which it was received.

(G) *No reporting requirement.* The withholding agent who receives the certificate described in paragraph (e)(3)(i) of this section is not required to file Form 1042S to report payments under §1.1461-1 (b) or (c) of interest that are made with respect to foreign-targeted registered obligations held by the person providing the certificate and are made within the period beginning with the certificate date and ending on the last date for filing the next certificate.

(ii) *Procedures regarding certificates required under paragraph (e)(3)(ii) of this section—*(A) *Time for providing certificate.* The statement described in paragraph (e)(3)(ii) of this section must be provided to the withholding agent within the period beginning 90 days prior to and ending on the first interest payment date on which the withholding agent pays interest to the beneficial owner. The withholding agent may, in its discretion, withhold under section 1441(a), 1442(a), or 1443 if the statement is not received by the date 30 days prior to the interest payment. The beneficial owner must confirm to the withholding agent the continuing validity of the documentary evidence within the period beginning 90 days prior to the first day of the third calendar year following the provision of such evidence and during the same period every three years thereafter while the owner still owns the obligation. The withholding agent who receives

the statement described in paragraph (e)(3)(ii) of this section is not required to report payments of interest under §1.1461-1(b) or (c) if the payments are made with respect to foreign-targeted registered obligations held by the person who provides the statement and are made within the period beginning with the date on which the statement is provided and ending on the last date for confirming the validity of the statement. The statement received for purposes of paragraph (e)(3)(ii) of this section is subject to the applicable procedures set forth in §1.1441-1(e)(4).

(B) *Change of status notification on Form W-9.* If on any interest payment date after the obligation was acquired by the person providing the statement described in paragraph (e)(3)(ii) of this section, the beneficial owner of the obligation is a U.S. person, then the beneficial owner must so inform the withholding agent within 30 days after such interest payment date and must provide a Form W-9 (or substitute form that is substantially similar completed under penalties of perjury) to the withholding agent. However, the beneficial owner is not required to provide another Form W-9 (or substitute form that is substantially similar and completed under penalties of perjury) if such person has already provided it to the withholding agent within the same calendar year.

(iii) *Disqualification of documentation.* In accordance with the provisions of section 871(h)(4), the Secretary may make a determination in appropriate cases that a certificate or statement by any person, or class of persons, does not satisfy the requirements of that section. Should that determination be made, all payments of interest that otherwise qualify as portfolio interest to that person would become subject to 30-percent withholding under section 1441(a), 1442(a), or 1443.

(iv) *Special effective date.* Notwithstanding the foregoing requirements of this section—

(A) Any certificate that is required to be filed with the withholding agent during the period beginning on January 15 and ending on January 31, 1986, is not required to state that the beneficial owner of an obligation, prior to the date of the certificate, either was

not a United States person or was a United States person if the obligation was acquired by the person providing the certificate on or before September 19, 1985; and

(B) All of the requirements of this paragraph (e), as in effect prior to the effective date of these amendments, shall remain effective with respect to each interest payment prior to the filing of the certificate described in paragraph (e)(4)(iv)(A) of this section, except that the provisions of paragraph (e)(3) of this section relating to which persons are required to receive certificates or statements and paragraph (e)(3)(ii) or (4)(ii) of this section shall become effective with respect to each interest payment after September 20, 1985.

(5) *Information reporting.* See § 1.6049-5(b)(7) for special information reporting rules applicable to interest on foreign-targeted registered obligations. See § 1.6045-1(g)(1)(ii) for information reporting rules applicable to the redemption, retirement, or sale of foreign-targeted registered obligations.

(f) *Securities lending transactions.* For applicable rules regarding substitute interest payments received pursuant to a securities lending transaction or a sale-repurchase transaction, see §§ 1.871-7(b)(2) and 1.881-2(b)(2).

(g) *Portfolio interest not to include interest received by 10-percent shareholders—(1) In general.* For purposes of section 871(h), the term *portfolio interest* shall not include any interest received by a 10-percent shareholder.

(2) *Ten-percent shareholder—(i) In general.* The term *10-percent shareholder* means—

(A) In the case of an obligation issued by a corporation, any person who owns 10-percent or more of the total combined voting power of all classes of stock of such corporation entitled to vote; or

(B) In the case of an obligation issued by a partnership, any person who owns 10-percent or more of the capital or profits interest in such partnership.

(ii) *Ownership—(A) Stock ownership.* For purposes of paragraph (g)(2)(i)(A) of this section, *stock owned* means stock directly or indirectly owned and stock owned by reason of the attrib-

tion rules of section 318(a), as modified by section 871(h)(3)(C).

(B) *Ownership of partnership interest.* For purposes of paragraph (g)(2)(i)(B) of this section, rules similar to the rules in paragraph (g)(2)(ii)(A) of this section shall be applied in determining the ownership of a capital or profits interest in a partnership.

(3) *Application of 10-percent shareholder test to partners receiving interest through a partnership—(i) Partner level test.* Whether interest paid to a partnership and included in the distributive share of a partner that is a nonresident alien individual or foreign corporation is received by a 10 percent shareholder shall be determined by applying the rules of this paragraph (g) only at the partner level.

(ii) *Time at which 10-percent shareholder test is applied.* The determination of whether a nonresident alien individual or foreign corporation that is a partner in a partnership is a 10-percent shareholder under the rules of section 871(h)(3), section 881(c)(3), and this paragraph (g) with respect to interest paid to such partnership shall be made at the time that the withholding agent, absent the provisions of section 871(h), 881(c) and the rules of this paragraph, would otherwise be required to withhold under sections 1441 and 1442 with respect to such interest. For example, in the case of U.S. source interest paid by a domestic corporation to a domestic partnership or withholding foreign partnership (as defined in § 1.1441-5(c)(2)), the 10-percent shareholder test is applied when any distributions that include the interest are made to a foreign partner and, to the extent that a foreign partner's distributive share of the interest has not actually been distributed, on the earlier of the date that the statement required under section 6031(b) is mailed or otherwise provided to such partner, or the due date for furnishing such statement. See § 1.1441-5(b)(2) and (c)(2)(iii).

(4) *Application of 10-percent shareholder test to interest paid to a simple trust or grantor trust.* Whether interest paid to a simple trust or grantor trust and distributed to or included in the gross income of a nonresident alien individual or foreign corporation that is a beneficiary or owner of such trust, as

the case may be, is received by a 10-percent shareholder shall be determined by applying the rules of this paragraph (g) only at the beneficiary or owner level. The 10-percent shareholder test is applied with respect to a non-resident alien individual or foreign corporation that is a beneficiary of a simple trust or an owner of a grantor trust at the time that a withholding agent, absent any exceptions, would otherwise be required to withhold under sections 1441 and 1442 with respect to such interest.

(h) *Definitions.* For purposes of this section, the terms *U.S. person* and *foreign person* have the meaning set forth in § 1.1441-1(c)(2), the term *beneficial owner* has the meaning set forth in § 1.1441-1(c)(6), the term *withholding agent* has the meaning set forth in § 1.1441-7(a); the term *payee* has the meaning set forth in § 1.1441-1(b)(2); and the term *payment* has the meaning set forth in § 1.1441-2(e).

(i) *Effective date—(1) In general.* This section shall apply to payments of interest made after December 31, 2000. The rules of paragraph (g) apply to interest paid after April 12, 2007. Taxpayers may choose to apply the rules of paragraph (g) to interest paid in any taxable year not closed by the period of limitations as of April 12, 2007, provided they do so consistently for all relevant partnerships during such years.

(2) *Transition rule.* For purposes of this section, the validity of a Form W-8 that was valid on January 1, 1998, under the regulations in effect prior to January 1, 2001 (see 26 CFR parts 1 and 35a, revised April 1, 1999) and expired, or will expire, at any time during 1998, is extended until December 31, 1998. The validity of a Form W-8 that is valid on or after January 1, 1999 remains valid until its validity expires under the regulations in effect prior to January 1, 2001 (see 26 CFR parts 1 and 35a, revised April 1, 1999) but in no event will such a form remain valid after December 31, 2000. The rule in this paragraph (h)(2), however, does not apply to extend the validity period of a Form W-8 that expired solely by reason of changes in the circumstances of the person whose name is on the certificate. Notwithstanding the first three

sentences of this paragraph (h)(2), a withholding agent or payor may choose to not take advantage of the transition rule in this paragraph (h)(2) with respect to one or more withholding certificates valid under the regulations in effect prior to January 1, 2001 (see 26 CFR parts 1 and 35a, revised April 1, 1999) and, therefore, may choose to obtain withholding certificates conforming to the requirements described in this section (new withholding certificates). For purposes of this section, a new withholding certificate is deemed to satisfy the documentation requirement under the regulations in effect prior to January 1, 2001 (see 26 CFR parts 1 and 35a, revised April 1, 1999). Further, a new withholding certificate remains valid for the period specified in § 1.1441-1(e)(4)(ii), regardless of when the certificate is obtained.

(3) [Reserved] For further guidance, see § 1.871-14T(i)(3).

[T.D. 8734, 62 FR 53416, Oct. 14, 1997, as amended by T.D. 8804, 63 FR 72184, 72187, Dec. 31, 1998; T.D. 8856, 64 FR 73409, 73412, Dec. 30, 1999; T.D. 9323, 72 FR 18387, Apr. 12, 2007; 72 FR 26543, May 10, 2007. T.D. 9658, 79 FR 12746, Mar. 6, 2013; 79 FR 37182, July 1, 2014]

§ 1.871-14T Rules relating to repeal of tax on interest of nonresident alien individuals and foreign corporations received from certain portfolio debt investments (temporary).

(a) [Reserved] For further guidance, see § 1.871-14(a).

(b) *Rules concerning obligations in bearer form before March 19, 2012—(1) In general.* Interest (including original issue discount) with respect to an obligation in bearer form is portfolio interest within the meaning of section 871(h)(2)(A) or 881(c)(2)(A) only if it is paid with respect to an obligation issued after July 18, 1984, and issued before March 19, 2012, that is described in section 163(f)(2)(B), as in effect prior to the amendment by section 502 of the Hiring Incentives to Restore Employment Act of 2010 (HIRE Act), Public Law 111-147, and the regulations under that section and an exception under section 871(h) or 881(c) does not apply. Any obligation that is not in registered form as defined in paragraph (c)(1)(i) of this section is an obligation in bearer form.

(2) *Coordination with withholding and reporting rules.* For an exemption from withholding under section 1441 with respect to obligations described in this paragraph (b), see § 1.1441-1(b)(4)(i). See § 1.1471-2 for rules relating to withholding under chapter 4 of the Code that may apply to withholdable payments (as defined in § 1.1471-4(b)(145)) made on or after July 1, 2014, with respect to an agreement or instrument that is not treated as an obligation outstanding before March 19, 2012. For purposes of the preceding sentence, the terms *obligation* and *outstanding* are described in § 1.1471-2(b). See also § 1.1471-4(d)(6) for the reporting requirements of participating foreign financial institutions (as defined in § 1.1471-1(b)(91)) with respect to accounts held by recalcitrant account holders (as defined in § 1.1471-5(g)). For rules relating to an exemption from Form 1099 reporting and backup withholding under section 3406, see section 6049 and § 1.6049-5(b)(8) for the payment of interest and § 1.6045-1(g)(1)(ii) for the redemption, retirement, or sale of an obligation in bearer form.

(c)(1) through (c)(1)(ii)(D) [Reserved] For further guidance, see § 1.1871-14(c)(1) introductory text through (c)(1)(ii)(D).

(2) *Required statement.* For purposes of paragraph (c)(1)(ii)(C) of this section, a U.S. person will be considered to have received a statement that meets the requirements of section 871(h)(5) if either it complies with one of the procedures described in this paragraph (c)(2) and does not have actual knowledge or reason to know that the beneficial owner is a U.S. person or it complies with the procedures described in paragraph (d) or (e) of this section (to the extent applicable).

(i) The U.S. person (or its authorized agent described in § 1.1441-7(c)(2)) can reliably associate the payment with documentation upon which it can rely to treat the payment as made to a foreign beneficial owner in accordance with § 1.1441-1(e)(1)(ii). See § 1.1441-1(b)(2)(vii) for rules regarding reliable association with documentation.

(ii) The U.S. person (or its authorized agent described in § 1.1441-7(c)(2)) can reliably associate the payment with a withholding certificate described in

§ 1.1441-5(c)(2)(iv) from a person claiming to be a withholding foreign partnership or § 1.1441-5(e)(v) for a person claiming to be a withholding foreign trust.

(iii) The U.S. person (or its authorized agent described in § 1.1441-7(c)(2)) can reliably associate the payment with a withholding certificate described in § 1.1441-1(e)(3)(ii) from a person representing to be a qualified intermediary that has assumed primary withholding responsibility for the payment in accordance with § 1.1441-1(e)(5)(iv) or a qualified intermediary that has provided a withholding statement that meets the requirements of § 1.1441-1(e)(5)(v)(C) or that includes the payment in a withholding rate pool for payments excepted from withholding.

(iv) The U.S. person (or its authorized agent described in § 1.1441-7(c)(2)) can reliably associate the payment with a withholding certificate described in § 1.1441-1(e)(3)(v) from a person claiming to be a U.S. branch of a foreign bank or of a foreign insurance company that is described in § 1.1441-1(b)(2)(iv)(A) or a U.S. branch designated in accordance with § 1.1441-1(b)(2)(iv)(E).

(v) and (vi) [Reserved]. For further guidance, see § 1.871-14(c)(2)(v) and (vi).

(3) *Time for providing certificate or documentary evidence—(i) General rule.* Interest on a registered obligation shall qualify as portfolio interest if the withholding certificate or documentary evidence that must be provided is furnished before expiration of the beneficial owner's period of limitation for claiming a refund of tax with respect to such interest. See, however, § 1.1441-1(b)(7) for consequences to a withholding agent that makes a payment without withholding even though it cannot reliably associate the payment with the documentation prior to the payment. If a withholding agent withholds an amount under chapter 3 of the Code because it cannot reliably associate the payment with the documentation for the beneficial owner on the date of payment, the beneficial owner may nevertheless claim the benefit of an exemption from tax under this section by claiming a refund or credit for the amount withheld based upon the procedures described in §§ 1.1464-1 and

301.6402-3(e) of this chapter. See § 1.1474-5 and § 301.6402-3(e) for the allowance and requirements for a refund with respect to an amount (including a payment of interest) that was withheld upon under chapter 4 of the Code. In the alternative, adjustments to any amount of overwithheld tax may be made under the procedures described in § 1.1461-2(a) for a payment withheld upon under chapter 3 of the Code or in § 1.1474-2 for a payment withheld upon under chapter 4 of the Code.

(ii) [Reserved] For further guidance, see § 1.871-14(c)(3)(ii).

(4) *Coordination with withholding and reporting rules.* For an exemption from withholding under section 1441 with respect to obligations described in this paragraph (c)(4), see § 1.1441-1(b)(4)(i). For rules applicable to withholding certificates, see § 1.1441-1(e)(4). For rules regarding documentary evidence, see § 1.6049-5(c)(1). For application of presumptions when the U.S. person cannot reliably associate the payment with documentation, see § 1.1441-1(b)(3). For standards of knowledge applicable to withholding agents, see § 1.1441-7(b). For rules relating to reporting on Forms 1042 and 1042-S, see § 1.1461-1(b) and (c). For rules relating to an exemption from Form 1099 reporting and backup withholding under section 3406, see section 6049 and § 1.6049-5(b)(8) for the payment of interest and § 1.6045-1(g)(1)(i) for the redemption, retirement, or sale of an obligation in registered form. For rules relating to withholding under sections 1471 and 1472 that may apply notwithstanding the exemption for payments of portfolio interest under section 1441, see §§ 1.1471-2(a), 1.1471-4(b), and 1.1472-1(b).

(d) [Reserved] For further guidance, see § 1.871-14(d) introductory text through (d)(3)(iv).

(e) *Foreign-targeted registered obligations—(1) General rule.* The statement described in paragraph (c)(1)(ii) of this section is not required with respect to interest paid on an obligation issued before January 1, 2016, that is a registered obligation targeting foreign markets in accordance with the provisions of paragraph (e)(2) of this section if the interest is paid by a U.S. person, a withholding foreign partnership, or a U.S. branch described in § 1.1441-

1(b)(2)(iv)(A) or (E) to a registered owner at an address outside the United States, provided that the registered owner is a financial institution described in section 871(h)(5)(B). In that case, the U.S. person otherwise required to deduct and withhold tax may treat the interest as portfolio interest if it does not have actual knowledge that the beneficial owner is a United States person and if it receives the certificate described in paragraph (e)(3)(i) of this section from a financial institution or member of a clearing organization, which member is the beneficial owner of the obligation, or the documentary evidence or statement described in paragraph (e)(3)(ii) of this section from the beneficial owner, in accordance with the procedures described in paragraph (e)(4) of this section.

(2) through (i)(2) [Reserved] For further guidance, see § 1.871-14(e)(2) through (i)(2).

(3) *Effective/applicability date.* The rules of paragraphs (b)(2), (c)(3)(i), and (c)(4) of this section apply to payments of interest made after June 30, 2014. (For payments of interest made before July 1, 2014, see paragraphs (b)(2), (c)(3)(i), and (c)(4) of this section as in effect prior to February 28, 2017.)

(j) *Expiration date.* The applicability of this section expires on or before February 28, 2017.

[T.D. 9658, 79 FR 12746, Mar. 6, 2014; as amended by T.D. 9658, 79 FR 37182, July 1, 2014]

§ 1.871-15 Treatment of dividend equivalents.

(a) through (c) [Reserved]

(d) *Specified NPCs—(1) Specified NPCs before January 1, 2016.* For payments made after March 18, 2012, and before January 1, 2016, a specified NPC is any NPC if—

(i) In connection with entering into the contract, any long party to the contract transfers the underlying security to any short party to the contract;

(ii) In connection with the termination of the contract, any short party to the contract transfers the underlying security to any long party to the contract;

(iii) The underlying security is not readily tradable on an established securities market; or

(iv) In connection with entering into the contract, the underlying security is posted as collateral by any short party to the contract with any long party to the contract.

(d)(2) through (n) [Reserved]

(o) *Effective/applicability date.* This section applies to payments made on or after January 23, 2012.

[T.D. 9648, 78 FR 73080, Dec. 5, 2013]

§ 1.872-1 Gross income of nonresident alien individuals.

(a) *In general*—(1) *Inclusions.* The gross income of a nonresident alien individual for any taxable year includes only (i) the gross income which is derived from sources within the United States and which is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual and (ii) the gross income, irrespective of whether such income is derived from sources within or without the United States, which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual. For the determination of the sources of income, see sections 861 through 863 and the regulations thereunder. For the determination of whether income from sources within or without the United States is effectively connected for the taxable year with the conduct of a trade or business in the United States, see sections 864(c) and 871 (c) and (d), §§ 1.864-3 through 1.864-7, and §§ 1.871-9 and 1.871-10. For special rules for determining the income of an alien individual who changes his residence during the taxable year, see § 1.871-13.

(2) *Exchange transactions.* Even though a nonresident alien individual who effects certain transactions in the United States in stocks, securities, or commodities during the taxable year may not, by reason of section 864(b)(2) and paragraph (c) or (d) of § 1.864-2, be engaged in trade or business in the United States during the taxable year through the effecting of such transactions, nevertheless he shall be required to include in gross income for the taxable year the gains and profits from those transactions to the extent required by § 1.871-7 or § 1.871-8.

(3) *Exclusions.* For exclusions from gross income, see § 1.872-2.

(b) *Individuals not engaged in U.S. business.* In the case of a nonresident alien individual who at no time during the taxable year is engaged in trade or business in the United States, the gross income shall include only (1) the gross income from sources within the United States which is described in section 871(a) and paragraphs (b), (c), and (d) of § 1.871-7, and (2) the gross income from sources within the United States which, by reason of section 871 (c) or (d) and § 1.871-9 or § 1.871-10, is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual.

(c) *Individuals engaged in U.S. business.* In the case of a nonresident alien individual who is engaged in trade or business in the United States at any time during the taxable year, the gross income shall include (1) the gross income from sources within and without the United States which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual, (2) the gross income from sources within the United States which, by reason of the election provided in section 871(d) and § 1.871-10, is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual, and (3) the gross income from sources within the United States which is described in section 871(a) and paragraphs (b), (c), and (d) of § 1.871-7 and is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual.

(d) *Special rules applicable to certain expatriates.* For special rules for determining the gross income of a nonresident alien individual who has lost U.S. citizenship with a principal purpose of avoiding certain taxes, see section 877(b)(1).

(e) *Alien resident of Puerto Rico.* This section shall not apply in the case of a nonresident alien individual who is a bona fide resident of Puerto Rico during the entire taxable year. See section 876 and § 1.876-1.

(f) *Effective date.* This section shall apply for taxable years beginning after

December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.872-1 (Revised as of January 1, 1971).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7332, 39 FR 44228, Dec. 23, 1974]

§ 1.872-2 Exclusions from gross income of nonresident alien individuals.

(a) *Earnings of foreign ships or aircraft*—(1) *Basic rule.* So much of the income from sources within the United States of a nonresident alien individual as consists of earnings derived from the operation of a ship or ships documented, or of aircraft registered, under the laws of a foreign country which grants an equivalent exemption to citizens of the United States nonresident in that foreign country and to corporations organized in the United States shall not be included in gross income.

(2) *Equivalent exemption*—(i) *Ships.* A foreign country which either imposes no income tax, or, in imposing an income tax, exempts from taxation so much of the income of a citizen of the U.S. nonresident in that foreign country and of a corporation organized in the United States as consists of earnings derived from the operation of a ship or ships documented under the laws of the United States is considered as granting an equivalent exemption for purposes of the exclusion from gross income of the earnings of a foreign ship or ships.

(ii) *Aircraft.* A foreign country which either imposes no income tax, or, in imposing an income tax, exempts from taxation so much of the income of a citizen of the U.S. nonresident in that foreign country and of a corporation organized in the United States as consists of earnings derived from the operation of aircraft registered under the laws of the United States is considered as granting an equivalent exemption for purposes of the exclusion from gross income of the earnings of foreign aircraft.

(3) *Definition of earnings.* For purposes of subparagraphs (1) and (2) of this paragraph, compensation for personal services performed by an individual aboard a ship or aircraft does not constitute earnings derived by such indi-

vidual from the operation of ships or aircraft.

(b) *Compensation paid by foreign employer to participants in certain exchange or training programs*—(1) *Exclusion from income.* Compensation paid to a nonresident alien individual for the period that the nonresident alien individual is temporarily present in the United States as a nonimmigrant under subparagraph (F) (relating to the admission of students into the United States) or subparagraph (J) (relating to the admission of teachers, trainees, specialists, etc., into the United States) of section 101(a)(15) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15) (F) or (J)) shall be excluded from gross income if the compensation is paid to such alien by his foreign employer. Compensation paid to a nonresident alien individual by the U.S. office of a domestic bank which is acting as paymaster on behalf of a foreign employer constitutes compensation paid by a foreign employer for purposes of this paragraph if the domestic bank is reimbursed by the foreign employer for such payment. A nonresident alien individual who is temporarily present in the United States as a nonimmigrant under such subparagraph (J) includes a nonresident alien individual admitted to the United States as an “exchange visitor” under section 201 of the U.S. Information and Educational Exchange Act of 1948 (22 U.S.C. 1446), which section was repealed by section 111 of the Mutual Education and Cultural Exchange Act of 1961 (75 Stat. 538).

(2) *Definition of foreign employer.* For purposes of this paragraph, the term “foreign employer” means a nonresident alien individual, a foreign partnership, a foreign corporation, or an office or place of business maintained in a foreign country or in a possession of the United States by a domestic corporation, a domestic partnership, or an individual who is a citizen or resident of the United States. The term does not include a foreign government. However, see section 893 and § 1.893-1. Thus, if a French citizen employed in the Paris branch of a banking company incorporated in the State of New York were admitted to the United States under section 101(a)(15)(J) of the Immigration and

Nationality Act to study monetary theory and continued to receive a salary from such foreign branch while studying in the United States, such salary would not be includable in his gross income.

(c) *Tax convention.* Income of any kind which is exempt from tax under the provisions of a tax convention or treaty to which the United States is a party shall not be included in the gross income of a nonresident alien individual. Income on which the tax is limited by tax convention shall be included in the gross income of a nonresident alien individual if it is not otherwise excluded from gross income. See §§ 1.871-12 and 1.894-1.

(d) *Certain bond income of residents of the Ryukyu Islands or the Trust Territory of the Pacific Islands.* Income derived by a nonresident alien individual from a series E or series H U.S. savings bond shall not be included in gross income if such individual acquired the bond while he was a resident of the Ryukyu Islands or the Trust Territory of the Pacific Islands. It is not necessary that the individual continue to be a resident of such Islands or Trust Territory for the period when, without regard to section 872(b)(4) and this paragraph, the income from the bond would otherwise be includable in his gross income under the provisions of section 446 or 454.

(e) *Certain annuities received under qualified plans.* Pursuant to section 871(f), income received by a nonresident alien individual as an annuity under a qualified annuity plan described in section 403(a)(1) (relating to taxation of employee annuities), or from a qualified trust described in section 401(a) (relating to qualified pension, profit-sharing, and stock bonus plans) which is exempt from tax under section 501(a) (relating to exemption from tax on corporations, certain trusts, etc.), shall not be included in gross income, and shall be exempt from tax, for purposes of section 871 and §§ 1.871-7 and 1.871-8, if—

(1) All of the personal services by reason of which the annuity is payable were either—

(i) Personal services performed outside the United States by an individual (whether or not the annuitant) who, at the time of performance of the serv-

ices, was a nonresident alien individual, or

(ii) Personal services performed in the United States by a nonresident alien individual (whether or not the annuitant) which, by reason of section 864(b)(1) (or corresponding provision of any prior law), were not personal services causing such individual to be engaged in trade or business in the United States during the taxable year, and

(2) At the time the first amount is paid (even though paid in a taxable year beginning before January 1, 1967) as such annuity under such annuity plan, or by such trust, to (i) the individual described in subparagraph (1) of this paragraph, or (ii) his nonresident alien beneficiary if such beneficiary is entitled to receive such first amount, 90 percent or more of the employees or annuitants for whom contributions or benefits are provided under the annuity plan, or under the plan or plans of which the trust is a part, are citizens or residents of the United States.

This paragraph shall apply whether or not the taxpayer is engaged in trade or business in the United States at any time during the taxable year in which the annuity is received. This paragraph shall not apply to distributions by an employees' trust or from an annuity plan which give rise to gains described in section 402(a)(2) or 403(a)(2), whichever applies. See section 871(a)(1)(B) and paragraph (c)(1)(i) of § 1.871-7. For exemption from withholding of tax at source on an annuity which is exempt from tax under section 871(f) and this paragraph, see paragraph (g) of § 1.1441-4.

(f) *Other exclusions.* Income which is from sources without the United States, as determined under the provisions of sections 861 through 863, and the regulations thereunder, is not included in the gross income of a nonresident alien individual unless such income is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual. To determine specific exclusions in the case of other items which are from sources within the United States, see the applicable sections of the Code. For special rules under a tax convention for determining

the sources of income and for excluding, from gross income, income from sources without the United States which is effectively connected with the conduct of a trade or business in the United States, see the applicable tax convention. For determining which income from sources without the United States is effectively connected with the conduct of a trade or business in the United States, see section 864(c)(4) and § 1.864-5.

(g) *Effective date.* This section shall apply for taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 4, 1967 see 26 CFR 1.872-2 (Revised as of January 1, 1971).

[T.D. 7332, 39 FR 44228, Dec. 23, 1974]

§ 1.873-1 Deductions allowed non-resident alien individuals.

(a) *General provisions*—(1) *Allocation of deductions.* In computing the taxable income of a nonresident alien individual the deductions otherwise allowable shall be allowed only if, and to the extent that, they are connected with income from sources within the United States. No deduction shall be allowed in respect of any item, or portion thereof, which is not connected with income from such sources. For this purpose, the proper apportionment and allocation of the deductions with respect to sources of income within and without the United States shall be determined as provided in part I (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder, except as may otherwise be provided by tax convention. Thus, from the items of gross income specifically from sources within the United States and from the items allocated thereto under the provisions of section 863(a), there shall be deducted (i) the expenses, losses, and other deductions which are connected with those items of income and are properly apportioned or allocated thereto, and (ii) a ratable part of any other expenses, losses, or deductions which are connected with those items of income but cannot definitely be allocated to some item or class of gross income. The ratable part shall be based upon the ratio of gross income from sources within the United States to the total gross income. See

§§ 1.861-8 and 1.863-1. In the case of income partly from within and partly from without the United States the expenses, losses, and other deductions connected with income from sources within the United States shall also be deducted in the manner prescribed by §§ 1.863-2 through 1.863-5 in order to ascertain under section 863 the portion of the taxable income attributable to sources within the United States.

(2) *Personal exemptions.* The deductions for the personal exemptions allowed by section 151 or 642(b) shall not be taken into account for purposes of subparagraph (1) of this paragraph but shall be allowed to the extent provided by paragraphs (b) and (c) of this section.

(3) *Adjusted gross income.* The adjusted gross income of a nonresident alien individual shall be the gross income from sources within the United States, determined in accordance with § 1.871-7, minus the deductions prescribed by section 62 to the extent such deductions are allowed under this section in computing taxable income.

(4) *Standard deduction.* The standard deduction shall not be allowed in computing the taxable income of a nonresident alien individual. See section 142(b)(1) and the regulations thereunder.

(5) *Exempt income.* No deduction shall be allowed under this section for the amount of any item or part thereof allocable to a class or classes of exempt income, including income exempt by tax convention. See section 265 and the regulations thereunder.

(b) *No United States business*—(1) *Income of not more than \$15,400*—(i) *Deduction for losses only.* A nonresident alien individual within class 1 shall not be allowed any deductions other than the deduction for losses from sales or exchanges of capital assets determined in the manner prescribed by paragraph (b)(4)(vii) of § 1.871-7. Thus, an individual within this class shall not be allowed any deductions for the personal exemptions otherwise allowed by section 151 or 642(b).

(ii) *Source of losses.* Notwithstanding the provisions of section 873(b)(1), losses from sales or exchanges of capital assets shall be allowed under this subparagraph only if allocable to

sources within the United States. See paragraph (b)(4)(i) of § 1.871-7.

(2) *Aggregate more than \$15,400*—(i) *Deductions allowed.* In computing the income subject to tax under section 1 or section 1201(b), a nonresident alien individual within class 2 shall be allowed deductions to the extent prescribed by paragraph (c)(3) of § 1.871-7, but subject to the limitations of this section. For this purpose, the deduction for the personal exemptions shall be allowed in accordance with subdivision (iii) of this subparagraph.

(ii) *Deductions disallowed.* In computing the minimum tax prescribed by section 871(b)(3), that individual shall not be allowed any deductions other than the deduction for losses from sales or exchanges of capital assets determined in the manner prescribed by paragraph (b)(4)(vii) of § 1.871-7. For this purpose, the deductions for the personal exemptions shall not be allowed. See paragraph (c)(4) of § 1.871-7.

(iii) *Personal exemptions.* When the deductions for personal exemptions are allowed under this subparagraph, only one exemption under section 151 shall be allowed in the case of an individual who is not a resident of Canada or Mexico. A resident of either of those countries shall be allowed all the exemptions granted by section 151 to the extent prescribed therein. An estate or trust, whether or not a resident of Canada or Mexico, shall determine its deduction for the personal exemption in accordance with section 642(b) and the regulations thereunder.

(iv) *Source of losses.* Notwithstanding the provisions of section 873(b), losses from sales or exchanges of capital assets shall be allowed under this subparagraph only if allocable to sources within the United States. See paragraph (c)(3)(i) of § 1.871-7.

(3) *Election to be taxed on a net basis.* Notwithstanding the other provisions of this paragraph, a nonresident alien individual within class 1 or 2 shall be allowed the deductions allowed by paragraph (c) of this section, if pursuant to a tax convention he is entitled, and does elect, to be subject to United States tax on a net basis as though he were engaged in trade or business within the United States through a permanent establishment situated therein.

(c) *United States business*—(1) *Deductions in general.* For purposes of computing the income subject to tax, a nonresident alien individual within class 3 shall be allowed deductions to the extent prescribed by paragraph (d) of § 1.871-7, but subject to the limitations of this section. For this purpose, the deductions for the personal exemptions shall be allowed in accordance with subparagraph (3) of this paragraph.

(2) *Special deductions.* Notwithstanding the rule of source prescribed in paragraph (a) of this section, an individual within class 3 shall be allowed the following deductions whether or not they are connected with income from sources within the United States:

(i) *Losses on transactions for profit.* Any loss sustained during the taxable year and not compensated for by insurance or otherwise, if incurred in any transaction entered into for profit, though not connected with a trade or business, shall be allowed to the extent allowed by section 165(c)(2), but only if and to the extent that the profit, if the transaction had resulted in a profit, would be taxable to such individual. Losses allowed under this subdivision shall be deducted in full, as provided in §§ 1.861-8 and 1.863-1, when the profit from the transaction, if it had resulted in a profit, would, under the provisions of section 861(a) or 863(a), have been taxable in full as income from sources within the United States; but shall be deducted under the provisions of § 1.863-3 when the profit from the transaction, if it had resulted in profit, would have been taxable only in part.

(ii) *Casualty losses.* Any loss of property not connected with a trade or business, sustained during the taxable year and not compensated for by insurance or otherwise, if the loss arises from fire, storm, shipwreck, or other casualty, or from theft, shall be allowed to the extent allowed by section 165(c)(3), but only if the loss is of property within the United States. Losses allowed under this subdivision shall be deducted in full, as provided in §§ 1.861-8 and 1.863-1, from the items of gross income specified under sections 861(a) and 863(a) as being derived in full from sources within the United States; but, if greater than the sum of those items,

the unabsorbed loss shall be deducted from the income apportioned under the provisions of §1.863-3 to sources within the United States.

(iii) *Charitable contributions.* The deduction for charitable contributions and gifts, to the extent allowed by section 170, shall be allowed under this subparagraph, but only as to contributions or gifts made to domestic corporations, or to community chests, funds, or foundations, created in the United States.

(3) *Personal exemptions.* Only one exemption under section 151 shall be allowed in the case of an individual who is not a resident of Canada or Mexico. A resident of either of those countries shall be allowed all the exemptions granted by section 151 to the extent prescribed therein. An estate or trust, whether or not a resident of Canada or Mexico, shall determine its deduction for the personal exemption in accordance with section 642(b) and the regulations thereunder.

§ 1.874-1 Allowance of deductions and credits to nonresident alien individuals.

(a) *Return required.* A nonresident alien individual shall receive the benefit of the deductions and credits otherwise allowable with respect to the income tax, only if the nonresident alien individual timely files or causes to be filed with the Philadelphia Service Center, in the manner prescribed in subtitle F, a true and accurate return of the income which is effectively connected, or treated as effectively connected, with the conduct of a trade or business within the United States by the nonresident alien individual. No provision of this section (other than paragraph (c)(2)) shall be construed, however, to deny the credits provided by sections 31, 32, 33, 34 and 852(b)(3)(D)(ii). In addition, notwithstanding the requirement that a nonresident alien must file a timely return in order to receive the benefit of the deductions and credits otherwise allowable with respect to the income tax, the nonresident alien individual may, for purposes of determining the amount of tax to be withheld under section 1441 from remuneration paid for labor or personal services performed

within the United States, receive the benefit of the deduction for personal exemptions provided in section 151, to the extent allowable under section 873(b)(3) and paragraph (c)(3) of §1.873-1, or in any applicable tax convention, by filing a claim therefore with the withholding agent. The amount of the deduction for the personal exemptions and the amount of the tax to be withheld under those circumstances shall be determined in accordance with paragraph (e)(2) of §1.1441-3. The deductions and credits allowed such a nonresident alien individual electing under a tax convention to be subject to tax on a net basis may be obtained by filing a return of income in the manner prescribed in the regulations (if any) under the tax convention or under any other guidance issued by the Commissioner.

(b) *Filing deadline for return—(1) General rule.* As provided in paragraph (a) of this section, for purposes of computing the nonresident alien individual's taxable income for any taxable year, otherwise allowable deductions and credits will be allowed only if a true and accurate return for that taxable year is filed by the nonresident alien individual on a timely basis. For taxable years of a nonresident alien individual ending after July 31, 1990, whether a return for the current taxable year has been filed on a timely basis is dependent upon whether the nonresident alien individual filed a return for the taxable year immediately preceding the current taxable year. If a return was filed for that immediately preceding taxable year, or if the current taxable year is the first taxable year of the nonresident alien individual for which a return is required to be filed, the required return for the current taxable year must be filed within 16 months of the due date, as set forth in section 6072 and the regulations under that section, for filing the return for the current taxable year. If no return for the taxable year immediately preceding the current taxable year has been filed, the required return for the current taxable year (other than the first taxable year of the nonresident alien individual for which a return is required to be filed) must have been filed no later than the earlier of the

date which is 16 months after the due date, as set forth in section 6072, for filing the return for the current taxable year or the date the Internal Revenue Service mails a notice to the nonresident alien individual advising the nonresident alien individual that the current year tax return has not been filed and that no deductions or credits (other than those provided in sections 31, 32, 33, 34 and 852(b)(3)(D)(ii)) may be claimed by the nonresident alien individual.

(2) *Waiver.* The filing deadlines set forth in paragraph (b)(1) of this section may be waived if the nonresident alien individual establishes to the satisfaction of the Commissioner or his or her delegate that the individual, based on the facts and circumstances, acted reasonably and in good faith in failing to file a U.S. income tax return (including a protective return (as described in paragraph (b)(6) of this section)). For this purpose, a nonresident alien individual shall not be considered to have acted reasonably and in good faith if the individual knew that he or she was required to file the return and chose not to do so. In addition, a nonresident alien individual shall not be granted a waiver unless the individual cooperates in determining his or her U.S. income tax liability for the taxable year for which the return was not filed. The Commissioner or his or her delegate shall consider the following factors in determining whether the nonresident alien individual, based on the facts and circumstances, acted reasonably and in good faith in failing to file a U.S. income tax return—

(i) Whether the individual voluntarily identifies himself or herself to the Internal Revenue Service as having failed to file a U.S. income tax return before the Internal Revenue Service discovers the failure to file;

(ii) Whether the individual did not become aware of his or her ability to file a protective return (as described in paragraph (b)(6) of this section) by the deadline for filing the protective return;

(iii) Whether the individual had not previously filed a U.S. income tax return;

(iv) Whether the individual failed to file a U.S. income tax return because,

after exercising reasonable diligence (taking into account his or her relevant experience and level of sophistication), the individual was unaware of the necessity for filing the return;

(v) Whether the individual failed to file a U.S. income tax return because of intervening events beyond the individual's control; and

(vi) Whether other mitigating or exacerbating factors existed.

(3) *Examples.* The following examples illustrate the provisions of paragraph (b). In all examples, A is a nonresident alien individual and uses the calendar year as A's taxable year. The examples are as follows:

Example 1. Nonresident alien individual discloses own failure to file. In Year 1, A became a limited partner with a passive investment in a U.S. limited partnership that was engaged in a U.S. trade or business. During Year 1 through Year 4, A incurred losses with respect to A's U.S. partnership interest. A's foreign tax advisor incorrectly concluded that because A was a limited partner and had only losses from A's partnership interest, A was not required to file a U.S. income tax return. A was aware neither of A's obligation to file a U.S. income tax return for those years nor of A's ability to file a protective return for those years. A had never filed a U.S. income tax return before. In Year 5, A began realizing a profit rather than a loss with respect to the partnership interest and, for this reason, engaged a U.S. tax advisor to handle A's responsibility to file U.S. income tax returns. In preparing A's U.S. income tax return for Year 5, A's U.S. tax advisor discovered that returns were not filed for Year 1 through Year 4. Therefore, with respect to those years for which applicable filing deadlines in paragraph (b)(1) of this section were not met, A would be barred by paragraph (a) of this section from claiming any deductions that otherwise would have given rise to net operating losses on returns for these years, and that would have been available as loss carryforwards in subsequent years. At A's direction, A's U.S. tax advisor promptly contacted the appropriate examining personnel and cooperated with the Internal Revenue Service in determining A's income tax liability, for example, by preparing and filing the appropriate income tax returns for Year 1 through Year 4 and by making A's books and records available to an Internal Revenue Service examiner. A has met the standard described in paragraph (b)(2) of this section for waiver of any applicable filing deadlines in paragraph (b)(1) of this section.

Example 2. Nonresident alien individual refuses to cooperate. Same facts as in *Example 1*,

except that while A's U.S. tax advisor contacted the appropriate examining personnel and filed the appropriate income tax returns for Year 1 through Year 4, A refused all requests by the Internal Revenue Service to provide supporting information (for example, books and records) with respect to those returns. Because A did not cooperate in determining A's U.S. tax liability for the taxable years for which an income tax return was not timely filed, A is not granted a waiver as described in paragraph (b)(2) of this section of any applicable filing deadlines in paragraph (b)(1) of this section.

Example 3. Nonresident alien individual fails to file a protective return. Same facts as in *Example 1*, except that in Year 1 through Year 4, A also consulted a U.S. tax advisor, who advised A that it was uncertain whether U.S. income tax returns were necessary for those years and that A could protect A's right subsequently to claim the loss carryforwards by filing protective returns under paragraph (b)(6) of this section. A did not file U.S. income tax returns or protective returns for those years. A did not present evidence that intervening events beyond A's control prevented A from filing an income tax return, and there were no other mitigating factors. A has not met the standard described in paragraph (b)(2) of this section for waiver of any applicable filing deadlines in paragraph (b)(1) of this section.

Example 4. Nonresident alien with effectively connected income. In Year 1, A, a computer programmer, opened an office in the United States to market and sell a software program that A had developed outside the United States. A had minimal business or tax experience internationally, and no such experience in the United States. Through A's personal efforts, U.S. sales of the software produced income effectively connected with a U.S. trade or business. A, however, did not file U.S. income tax returns for Year 1 or Year 2. A was aware neither of A's obligation to file a U.S. income tax return for those years, nor of A's ability to file a protective return for those years. A had never filed a U.S. income tax return before. In November of Year 3, A engaged U.S. counsel in connection with licensing software to an unrelated U.S. company. U.S. counsel reviewed A's U.S. activities and advised A that A should have filed U.S. income tax returns for Year 1 and Year 2. A immediately engaged a U.S. tax advisor who, at A's direction, promptly contacted the appropriate examining personnel and cooperated with the Internal Revenue Service in determining A's income tax liability, for example, by preparing and filing the appropriate income tax returns for Year 1 and Year 2 and by making A's books and records available to an Internal Revenue Service examiner. A has met the standard described in paragraph (b)(2) of this section

for waiver of any applicable filing deadlines in paragraph (b)(1) of this section.

Example 5. IRS discovers nonresident alien's failure to file. In Year 1, A, a computer programmer, opened an office in the United States to market and sell a software program that A had developed outside the United States. Through A's personal efforts, U.S. sales of the software produced income effectively connected with a U.S. trade or business. A had extensive experience conducting similar business activities in other countries, including making the appropriate tax filings. A, however, was aware neither of A's obligation to file a U.S. income tax return for those years, nor of A's ability to file a protective return for those years. A had never filed a U.S. income tax return before. Despite A's extensive experience conducting similar business activities in other countries, A made no effort to seek advice in connection with A's U.S. tax obligations. A failed to file either U.S. income tax returns or protective returns for Year 1 and Year 2. In November of Year 3, an Internal Revenue Service examiner asked A for an explanation of A's failure to file U.S. income tax returns. A immediately engaged a U.S. tax advisor, and cooperated with the Internal Revenue Service in determining A's income tax liability, for example, by preparing and filing the appropriate income tax returns for Year 1 and Year 2 and by making A's books and records available to the examiner. A did not present evidence that intervening events beyond A's control prevented A from filing a return, and there were no other mitigating factors. A has not met the standard described in paragraph (b)(2) of this section for waiver of any applicable filing deadlines in paragraph (b)(1) of this section.

Example 6. Nonresident alien with prior filing history. A began a U.S. trade or business in Year 1 as a sole proprietorship. A's tax advisor filed the appropriate U.S. income tax returns for Year 1 through Year 6, reporting income effectively connected with A's U.S. trade or business. In Year 7, A replaced this tax advisor with a tax advisor unfamiliar with U.S. tax law. A did not file a U.S. income tax return for any year from Year 7 through Year 10, although A had effectively connected income for those years. A was aware of A's ability to file a protective return for those years. In Year 11, an Internal Revenue Service examiner contacted A and asked for an explanation of A's failure to file income tax returns after Year 6. A immediately engaged a U.S. tax advisor and cooperated with the Internal Revenue Service in determining A's income tax liability, for example, by preparing and filing the appropriate income tax returns for Year 7 through Year 10 and by making A's books and records available to the examiner. A did not present evidence that intervening events beyond A's control prevented A from filing a return, and

there were no other mitigating factors. A has not met the standard described in paragraph (b)(2) of this section for waiver of any applicable filing deadlines in paragraph (b)(1) of this section.

(4) *Effective date.* Paragraphs (b)(2) and (3) of this section are applicable to open years for which a request for a waiver is filed on or after January 29, 2002.

(5) *Income tax treaties.* A nonresident alien individual who has a permanent establishment or fixed base, as defined in an income tax treaty between the United States and the country of residence of the nonresident alien individual, in the United States is subject to the filing deadlines as set forth in paragraph (b)(1) of this section.

(6) *Protective return.* If a nonresident alien individual conducts limited activities in the United States in a taxable year which the nonresident alien individual determines does not give rise to gross income which is effectively connected with the conduct of a trade or business within the United States as defined in sections 871(b) and 864 (b) and (c) and the regulations under those sections, the nonresident alien individual may nonetheless file a return for that taxable year on a timely basis under paragraph (b)(1) of this section and thereby protect the right to receive the benefit of the deductions and credits attributable to that gross income if it is later determined, after the return was filed, that the original determination was incorrect. On that timely filed return, the nonresident alien individual is not required to report any gross income as effectively connected with a United States trade or business or any deductions or credits but should attach a statement indicating that the return is being filed for the reason set forth in this paragraph (b)(4). If the nonresident alien individual determines that part of the activities which he or she conducts in the United States in a taxable year gives rise to gross income which is effectively connected with the conduct of a trade or business and part does not, the nonresident alien individual must timely file a return for that taxable year to report the gross income determined to be effectively connected, or treated as effectively connected, with

the conduct of that trade or business within the United States and the deductions and credits attributable to the gross income. In addition, the nonresident alien individual should attach to that return the statement described in this paragraph (b)(4) with regard to the other activities. The nonresident alien individual may follow the same procedure if the nonresident alien individual determines initially that he or she has no United States tax liability under the provisions of an applicable income tax treaty. In the event the nonresident alien individual relies on the provisions of an income tax treaty to reduce or eliminate the income subject to taxation, or to reduce the rate of tax to which that income is subject, disclosure may be required pursuant to section 6114.

(c) *Allowed deductions and credits*—(1) *In general.* Except for losses of property located within the United States, charitable contributions and personal exemptions (see section 873(b)), deductions are allowed to a nonresident alien individual only to the extent they are connected with gross income which is effectively connected, or treated as effectively connected, with the conduct of the nonresident alien individual's trade or business in the United States. Other than credits allowed by sections 31, 32, 33, 34, and 852(b)(3)(D)(ii), the nonresident alien individual is entitled to credits only if they are attributable to effectively connected income. See paragraph (a) of this section for the requirement that a return be timely filed. Except as provided by section 906, a nonresident alien individual shall not be allowed the credit against the tax for taxes of foreign countries and possessions of the United States allowed by section 901.

(2) *Verification.* At the request of the Internal Revenue Service, a nonresident alien individual claiming deductions from gross income which is effectively connected or treated as effectively connected, with the conduct of a trade or business in the United States and credits attributable to that income must furnish at the place designated pursuant to §301.7605-1(a) information sufficient to establish that the nonresident alien individual is entitled to the deductions and credits in the

amounts claimed. All information must be furnished in a form suitable to permit verification of the claimed deductions and credits. The Internal Revenue Service may require, as appropriate, that an English translation be provided with any information in a foreign language. If a nonresident alien individual fails to furnish sufficient information, the Internal Revenue Service may in its discretion disallow any claimed deductions and credits in full or in part.

(d) *Return by Internal Revenue Service.* If a nonresident alien individual has various sources of income within the United States, so that from any one source, or from all sources combined, the amount of income shall call for the assessment of a tax greater than that withheld at the source in the case of that individual, and a return of income has not been filed in the manner prescribed by subtitle F, including the filing deadlines set forth in paragraph (b)(1) of this section, the Internal Revenue Service shall:

(1) Cause a return of income to be made,

(2) Include on the return the income described in §1.871-7 or §1.871-8 of that individual from all sources concerning which it has information, and

(3) *Assess the tax.* If the nonresident alien individual is not engaged in, or does not receive income that is treated as being effectively connected with, a United States trade or business and §1.871-7 is applicable, the tax shall be assessed on the basis of gross income without allowance for deductions or credits (other than the credits provided by sections 31, 32, 33, 34 and 852(b)(3)(D)(ii)) and collected from one or more sources of income within the United States. If the nonresident alien individual is engaged in a United States trade or business or is treated as having effectively connected income and §1.871-8 applies, the tax on the income of the nonresident alien individual that is not effectively connected, or treated as effectively connected with the conduct of a United States trade or business shall be assessed on the basis of gross income, determined in accordance with the rules of §1.871-7, without allowance for deductions or credits (other than the

credits provided by sections 31, 32, 33, 34 and 852(b)(3)(D)(ii)) and collected from one or more of the sources of income within the United States. Tax on income that is effectively connected, or treated as effectively connected, with the conduct of a United States trade or business shall be assessed in accordance with either section 1, 55 or 402(e)(1) without allowance for deductions or credits (other than the credits provided by sections 31, 32, 33, 34 and 852(b)(3)(D)(ii)) and collected from one or more of the sources of income within the United States.

(e) *Alien resident of Puerto Rico, Guam, American Samoa, or the Commonwealth of the Northern Mariana Islands.* This section shall not apply to a nonresident alien individual who is a bona fide resident of Puerto Rico, Guam, American Samoa, or the Commonwealth of the Northern Mariana Islands during the entire taxable year. See section 876 and §1.876-1.

[T.D. 8322, 55 FR 50828, Dec. 11, 1990; 56 FR 1361, Jan. 14, 1991, as amended by T.D. 8981, 67 FR 4174, Jan. 29, 2002; T.D. 9043, 68 FR 11313, Mar. 10, 2003]

§ 1.875-1 Partnerships.

Whether a nonresident alien individual who is a member of a partnership is taxable in accordance with subsection (a), (b), or (c) of section 871 may depend on the status of the partnership. A nonresident alien individual who is a member of a partnership which is not engaged in trade or business within the United States is subject to the provisions of section 871 (a) or (b), as the case may be, depending on whether or not he receives during the taxable year an aggregate of more than \$15,400 gross income described in section 871(a), if he is not otherwise engaged in trade or business within the United States. A nonresident alien individual who is a member of a partnership which at any time within the taxable year is engaged in trade or business within the United States is considered as being engaged in trade or business within the United States and is therefore taxable under section 871(c). For definition of what the term "partnership" includes, see section 7701(a)(2) and the regulations in part

301 of this chapter (Regulations on Procedure and Administration). The test of whether a partnership is engaged in trade or business within the United States is the same as in the case of a nonresident alien individual. See § 1.871-8.

§ 1.875-2 Beneficiaries of estates or trusts.

(a) [Reserved]

(b) *Exception for certain taxable years.* Notwithstanding paragraph (a) of this section, for any taxable year beginning before January 1, 1975, the grantor of a trust, whether revocable or irrevocable, is not deemed to be engaged in trade or business within the United States merely because the trustee is engaged in trade or business within the United States.

(c) [Reserved]

[T.D. 7332, 39 FR 44233, Dec. 23, 1974]

§ 1.876-1 Alien residents of Puerto Rico, Guam, American Samoa, or the Northern Mariana Islands.

(a) *Scope.* Section 876 and this section apply to any nonresident alien individual who is a bona fide resident of Puerto Rico or of a section 931 possession during the entire taxable year.

(b) *In general.* An individual to whom this section applies is, in accordance with the provisions of section 876, subject to tax under sections 1 and 55 in generally the same manner as an alien resident of the United States. See §§ 1.1-1(b) and 1.871-1. The tax generally is imposed upon the taxable income of such individual, determined in accordance with section 63(a) and the regulations under that section, from sources both within and without the United States, except for amounts excluded from gross income under the provisions of section 931 or 933. For determining the form of return to be used by such an individual, see section 6012 and the regulations under that section.

(c) *Exceptions.* Though subject to the tax imposed by section 1, an individual to whom this section applies will nevertheless be treated as a nonresident alien individual for the purpose of many provisions of the Internal Revenue Code (Code) relating to nonresident alien individuals. Thus, for example, such an individual is not al-

lowed the standard deduction (section 63(c)(6)); is subject to withholding of tax at source under chapter 3 of the Code (for example, section 1441(e)); is generally excepted from the collection of income tax at source on wages for services performed in the possession (section 3401(a)(6)); is not allowed to make a joint return (section 6013(a)(1)); and, if described in section 6072(c), must pay his first installment of estimated income tax on or before the 15th day of the 6th month of the taxable year (section 6654(j) and (k)) and must pay his income tax on or before the 15th day of the 6th month following the close of the taxable year (sections 6072(c) and 6151(a)). In addition, under section 152(b)(3), an individual is not allowed a deduction for a dependent who is a resident of the relevant possession unless the dependent is a citizen or national of the United States.

(d) *Credits against tax.* (1) Certain credits under the Internal Revenue Code are available to any taxpayer subject to the tax imposed by section 1, including individuals to whom this section applies. For example, except as otherwise provided under section 931 or 933, the credits provided by the following sections are allowable to the extent provided under such sections against the tax determined in accordance with this section—

(i) Section 23 (relating to the credit for adoption expenses);

(ii) Section 31 (relating to the credit for tax withheld on wages);

(iii) Section 33 (relating to the credit for tax withheld at source on nonresident aliens); and

(iv) Section 34 (relating to the credit for certain uses of gasoline and special fuels).

(2) Certain credits under the Internal Revenue Code are not available to nonresident aliens or are subject to limitations based on such factors as principal place of abode in the United States. For example, the credits provided by the following sections are not allowable against the tax determined in accordance with this section except to the extent otherwise provided under such sections—

(i) Section 22 (relating to the credit for the elderly and disabled);

Internal Revenue Service, Treasury

§ 1.879-1

(ii) Section 25A (relating to the Hope Scholarship and Lifetime Learning Credits); and

(iii) Section 32 (relating to the earned income credit).

(e) *Definitions.* For purposes of this section—

(1) “Bona fide resident” is defined in § 1.937-1; and

(2) “Section 931 possession” is defined in § 1.931-1(c)(1).

(f) *Effective/applicability date.* This section applies to taxable years ending after April 9, 2008.

[T.D. 9391, 73 FR 19358, Apr. 9, 2008]

§ 1.879-1 Treatment of community income.

(a) *Treatment of community income—(1) In general.* For taxable years beginning after December 31, 1976, community income of a citizen or resident of the United States who is married to a non-resident alien individual, and the deductions properly allocable to that income, shall be divided between the U.S. citizen or resident spouse in accordance with the rules in section 879 and paragraph (a)(2) through (a)(6) of this section. This section does not apply for any taxable year with respect to which an election under section 6013 (g) or (h) is in effect. Community income for this purpose includes all gross income, whether derived from sources within or without the United States, which is treated as community income of the spouses under the community property laws of the State, foreign country, or possession of the United States in which the recipient of the income is domiciled. Income from real property also may be community income if so treated under the laws of the jurisdiction in which the real property is located.

(2) *Earned income.* Wages, salaries, or professional fees, and other amounts received as compensation for personal services actually performed, which are community income for the taxable year, shall be treated as the income of the spouse who actually performed the personal services. This paragraph (a)(2) does not apply, however, to the following items of community income:

(i) Community income derived from any trade or business carried on by the husband or the wife.

(ii) Community income attributable to a spouse’s distributive share of the income of a partnership to which paragraph (a)(4) of this section applies.

(iii) Community income consisting of compensation for personal services rendered to a corporation which represents a distribution of the earnings and profits of the corporation rather than a reasonable allowance as compensation for the personal services actually performed, but not including any income that would be treated as earned income under the second sentence of section 911(b).

(iv) Community income derived from property which is acquired as consideration for personal services performed.

These items of community income are divided in accordance with the rules in paragraph (a)(3) through (a)(6) of this section.

(3) *Trade or business income.* If any income derived from a trade or business carried on by the husband or wife is community income for the taxable year, all of the gross income, and the deductions attributable to that income, shall be treated as the gross income and deductions of the husband. However, if the wife exercises substantially all of the management and control of the trade or business, all of the gross income and deductions shall be treated as the gross income and deductions of the wife. This paragraph (a)(3) does not apply to any income derived from a trade or business carried on by a partnership of which both or one of the spouses is a member (see paragraph (a)(4) of this section). For purposes of this paragraph (a)(3), income derived from a trade or business includes any income derived from a trade or business in which both personal services and capital are material income producing factors. The term “management and control” means management and control in fact, not the management and control imputed to the husband under the community property laws of a State, foreign country or possession of the United States. For example, a wife who operates a pharmacy without any appreciable collaboration on the part of a husband is considered as having substantially all of the management and control of the business despite the provisions of any community

property laws of a State, foreign country, or possession of the United States, vesting in the husband the right of management and control of community property. The income and deductions attributable to the operation of the pharmacy are considered the income and deductions of the wife.

(4) *Partnership income.* If any portion of a spouse's distributive share of the income of a partnership, of which the spouse is a member, is community income for the taxable year, all of that distributive share shall be treated as the income of that spouse and shall not be taken into account in determining the income of the other spouse. If both spouses are members of the same partnership, the distributive share of the income of each spouse which is community income shall be treated as the income of that spouse. A spouse's distributive share of the income of a partnership that is community income shall be determined as provided in section 704 and the regulations thereunder.

(5) *Income from separate property.* Any community income for the taxable year, other than income described in section 879(a) (1) or (2) and paragraph (a) (2), (3), or (4) of this section, which is derived from the separate property of one of the spouses shall be treated as the income of that spouse. The determination of what property is separate property for this purpose shall be made in accordance with the laws of the State, foreign country, or possession of the United States in which, in accordance with paragraph (a)(1) of this section, the recipient of the income is domiciled or, in the case of income from real property, in which the real property is located.

(6) *Other community income.* Any community income for the taxable year, other than income described in section 879(a) (1), (2), or (3), and paragraph (a) (2), (3), (4), or (5) of this section, shall be treated as income of that spouse who has a proprietary vested interest in that income under the laws of the state, foreign country, or possession of the United States in which, in accordance with paragraph (a)(1) of this section, the recipient of the income is domiciled or, in the case of income from real property, in which the real

property is located. Thus, for example, this paragraph (a)(6) applies to community income not described in paragraph (a) (2), (3), (4), or (5) of this section which consists of dividends, interest, rents, royalties, or gains, from community property or of the earnings of unemancipated minor children.

(7) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. H, a U.S. citizen, and W, a non-resident alien individual, each of whose taxable years is the calendar year, were married throughout 1977. H and W were residents of, and domiciled in, foreign country Z during the entire taxable year. No election under section 6013 (g) or (h) is in effect for 1977. During 1977, H earned \$10,000 from the performance of personal services as an employee. H also received \$500 in dividend income from stock which under the community property laws of country Z is considered to be the separate property of H. W had no separate income for 1977. Under the community property laws of country Z all income earned by either spouse is considered to be community income, and one-half of this income is considered to belong to the other spouse. In addition, the laws of country Z provide that all income derived from property held separately by either spouse is to be treated as community income and treated as belonging one-half to each spouse. Thus, under the community property laws of country Z, H and W are both considered to have realized income of \$5,250 during 1977, even though Z's laws recognize the stock as the separate property of H. Under the rules of paragraph (a) (2) and (5) of this section all of the income of \$10,500 derived during 1977 is treated, for U.S. income tax purposes, as the income of H.

Example 2. (a) The facts are the same as in example 1, except that H is the sole proprietor of a retail merchandising company, which has a \$10,000 profit during 1977. W exercises no management and control over the business. In addition, H is a partner in a wholesale distributing company, and his distributive share of the partnership profit is \$5,000. Both of these amounts of income are treated as community income under the community property laws of country Z, and under these laws both H and W are treated as realizing \$7,500 of the income. Under the rule of paragraph (a) (3) and (4) of this section all \$15,000 of the income is treated as the income of H for U.S. income tax purposes.

(b) If W exercises substantially all of the management and control over the retail merchandising company, then for U.S. income tax purposes the \$10,000 profit is treated as the income of W.

Example 3. The facts are the same as in example 1, except that H also received \$1,000 in dividends on stock held separately in his name. Under the community property laws of country Z the stock is considered to be community property, the dividends to be community income, and one-half of the income to be the income of each spouse. Under the rule of paragraph (a)(6) of this section, \$500 of the dividend income is treated, for U.S. income tax purposes, as the income of each spouse.

(b) *Definitions and other special rules—*

(1) *Spouses with different taxable years.* A special rule applies if the nonresident alien and the United States citizen or resident spouse of the alien do not have the same taxable years, as defined in section 441(b) and the regulations thereunder. The special rule is as follows. With respect to the U.S. citizen or resident spouse, section 879 and this section shall apply to each taxable year of the U.S. citizen or resident spouse for which no election under section 6013 (g) or (h) is in effect. With respect to the nonresident alien spouse, section 879 and this section apply to each period falling within the consecutive taxable years of the nonresident alien spouse which coincides with a taxable year of the U.S. citizen or resident spouse to which section 879 and this section apply.

(2) *Determination of marital status.* For purposes of this section, marital status shall be determined under section 143(a).

[T.D. 7670, 45 FR 6928, Jan. 31, 1980]

FOREIGN CORPORATIONS

§ 1.881-0 Table of contents.

This section lists the major headings for §§ 1.881-1 through 1.881-4.

§ 1.881-1 *Manner of Taxing Foreign Corporations*

- (a) Classes of foreign corporations.
- (b) Manner of taxing.
 - (1) Foreign corporations not engaged in U.S. business.
 - (2) Foreign corporations engaged in U.S. business.
- (c) Meaning of terms.
- (d) Rules applicable to foreign insurance companies.
 - (1) Corporations qualifying under subchapter L.
 - (2) Corporations not qualifying under subchapter L.

(e) Other provisions applicable to foreign corporations.

- (1) Accumulated earnings tax.
- (2) Personal holding company tax.
- (3) Foreign personal holding companies.
- (4) Controlled foreign corporations.
 - (i) Subpart F income and increase of earnings invested in U.S. property.
 - (ii) Certain accumulations of earnings and profits.
- (5) Changes in tax rate.
- (6) Consolidated returns.
- (7) Adjustment of tax of certain foreign corporations.
- (f) Effective date.

§ 1.881-2 *Taxation of Foreign Corporations Not Engaged in U.S. Business*

- (a) Imposition of tax.
- (b) Fixed or determinable annual or periodical income.
- (c) Other income and gains.
 - (1) Items subject to tax.
 - (2) Determination of amount of gain.
- (d) Credits against tax.
- (e) Effective date.

§ 1.881-3 *Conduit Financing Arrangements*

- (a) General rules and definitions.
 - (1) Purpose and scope.
 - (2) Definitions.
 - (i) Financing arrangement.
 - (A) In general.
 - (B) Special rule for related parties.
 - (ii) Financing transaction.
 - (A) In general.
 - (B) Limitation on inclusion of stock or similar interests.
 - (iii) Conduit entity.
 - (iv) Conduit financing arrangement.
 - (v) Related.
 - (3) Disregard of participation of conduit entity.
 - (i) Authority of district director.
 - (ii) Effect of disregarding conduit entity.
 - (A) In general.
 - (B) Character of payments made by the financed entity.
 - (C) Effect of income tax treaties.
 - (D) Effect on withholding tax.
 - (E) Special rule for a financing entity that is unrelated to both intermediate entity and financed entity.
 - (iii) Limitation on taxpayers's use of this section.
 - (4) Standard for treatment as a conduit entity.
 - (i) In general.
 - (ii) Multiple intermediate entities.
 - (A) In general.
 - (B) Special rule for related persons.
- (b) Determination of whether participation of intermediate entity is pursuant to a tax avoidance plan.
 - (1) In general.

§ 1.881-1

26 CFR Ch. I (4-1-15 Edition)

(2) Factors taken into account in determining the presence or absence of a tax avoidance purpose.

- (i) Significant reduction in tax.
- (ii) Ability to make the advance.
- (iii) Time period between financing transactions.

(iv) Financing transactions in the ordinary course of business.

(3) Presumption if significant financing activities performed by a related intermediate entity.

- (i) General rule.
- (ii) Significant financing activities.
 - (A) Active rents or royalties.
 - (B) Active risk management.
- (c) Determination of whether an unrelated intermediate entity would not have participated in financing arrangement on substantially same terms.

- (1) In general.
- (2) Effect of guarantee.
 - (i) In general.
 - (ii) Definition of guarantee.
- (d) Determination of amount of tax liability.

(1) Amount of payment subject to re-characterization.

- (i) In general.
- (ii) Determination of principal amount.
 - (A) In general.
 - (B) Debt instruments and certain stock.
 - (C) Partnership and trust interests.
 - (D) Leases and licenses.
- (2) Rate of tax.
- (e) Examples.
- (f) Effective date.

§ 1.881-4 Recordkeeping Requirements Concerning Conduit Financing Arrangements

- (a) Scope.
- (b) Recordkeeping requirements.
 - (1) In general.
 - (2) Application of sections 6038 and 6038A.
- (c) Records to be maintained.
 - (1) In general.
 - (2) Additional documents.
 - (3) Effect of record maintenance requirement.
- (d) Effective date.

[T.D. 8611, 60 FR 41005, Aug. 11, 1995]

§ 1.881-1 Manner of taxing foreign corporations.

(a) *Classes of foreign corporations.* For purposes of the income tax, foreign corporations are divided into two classes, namely, foreign corporations which at no time during the taxable year are engaged in trade or business in the United States and foreign corporations which, at any time during the taxable year, are engaged in trade or business in the United States.

(b) *Manner of taxing—(1) Foreign corporations not engaged in U.S. business.* A foreign corporation which at no time during the taxable year is engaged in trade or business in the United States is taxable, as provided in § 1.881-2, on all income received from sources within the United States which is fixed or determinable annual or periodical income and on other items of income enumerated under section 881(a). Such a foreign corporation is also taxable on certain income from sources within the United States which, pursuant to § 1.882-2, is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States.

(2) *Foreign corporations engaged in U.S. business.* A foreign corporation which at any time during the taxable year is engaged in trade or business in the United States is taxable, as provided in § 1.882-1, on all income from whatever source derived, whether or not fixed or determinable annual or periodical income, which is effectively connected for the taxable year with the conduct of a trade or business in the United States. Such a foreign corporation is also taxable, as provided in § 1.882-1, on income received from sources within the United States which is not effectively connected for the taxable year with the conduct of a trade or business in the United States and consists of (i) fixed or determinable annual or periodical income, or (ii) other items of income enumerated in section 881(a). A foreign corporation which at any time during the taxable year is engaged in trade or business in the United States is also taxable on certain income from sources within the United States which, pursuant to § 1.882-2, is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States.

(c) *Meaning of terms.* For the meaning of the term “engaged in trade or business within the United States”, as used in section 881 and this section, see section 864(b) and the regulations thereunder. For determining when income, gain, or loss of a foreign corporation for a taxable year is effectively connected for that year with the conduct of a trade or business in the United

States, see section 864(c), the regulations thereunder, and §1.882-2. The term *foreign corporation* has the meaning assigned to it by section 7701(a)(3) and (5) and the regulations thereunder. However, for special rules relating to possessions of the United States, see §1.881-5.

(d) *Rules applicable to foreign insurance companies*—(1) *Corporations qualifying under subchapter L*. A foreign corporation carrying on an insurance business in the United States at any time during the taxable year, which, without taking into account its income not effectively connected for the taxable year with the conduct of a trade or business in the United States, would qualify for the taxable year under part I, II, or III of subchapter L if it were a domestic corporation, shall be taxable for such year under that part on its entire taxable income (whether derived from sources within or without the United States) which is, or which pursuant to section 882 (d) or (e) and §1.882-2 is treated as, effectively connected for the taxable year with the conduct of a trade or business (whether or not its insurance business) in the United States. Any income derived by that foreign corporation from sources within the United States which is not effectively connected for the taxable year with the conduct of a trade or business in the United States is taxable as provided in section 881(a) and §1.882-1. See sections 842 and 861 through 864, and the regulations thereunder.

(2) *Corporations not qualifying under subchapter L*. A foreign corporation which carries on an insurance business in the United States at any time during the taxable year, and which, without taking into account its income not effectively connected for the taxable year with the conduct of a trade or business in the United States, would not qualify for the taxable year under part I, II, or III of subchapter L if it were a domestic corporation, and a foreign insurance company which does not carry on an insurance business in the United States at any time during the taxable year, shall be taxable—

(i) Under section 881(a) and §1.881-2 or §1.882-1 on its income from sources within the United States which is not effectively connected for the taxable

year with the conduct of a trade or business in the United States,

(ii) Under section 882(a)(1) and §1.882-1 on its income (whether derived from sources within or without the United States) which is effectively connected for the taxable year with the conduct of a trade or business in the United States, and

(iii) Under section 882(a)(1) and §1.882-1 on its income from sources within the United States which pursuant to section 882 (d) or (e) and §1.882-2, is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States.

(e) *Other provisions applicable to foreign corporations*—(1) *Accumulated earnings tax*. For the imposition of the accumulated earnings tax upon the accumulated taxable income of a foreign corporation formed or availed of for tax avoidance purposes, whether or not such corporation is engaged in trade or business in the United States, see section 532 and the regulations thereunder.

(2) *Personal holding company tax*. For the imposition of the personal holding company tax upon the undistributed personal holding company income of a foreign corporation which is a personal holding company, whether or not such corporation is engaged in trade or business in the United States, see sections 541 through 547, and the regulations thereunder. Except in the case of a foreign corporation having personal service contract income to which section 543(a)(7) applies, a foreign corporation is not a personal holding company if all of its stock outstanding during the last half of the taxable year is owned by nonresident alien individuals, whether directly or indirectly through foreign estates, foreign trusts, foreign partnerships, or other foreign corporations. See section 542(c)(7).

(3) *Foreign personal holding companies*. For the mandatory inclusion in the gross income of the United States shareholders of the undistributed foreign personal holding company income of a foreign personal holding company, see section 551 and the regulations thereunder.

(4) *Controlled foreign corporations*—(i) *Subpart F income and increase of earnings invested in U.S. Property.* For the mandatory inclusion in the gross income of the U.S. shareholders of the subpart F income, of the previously excluded subpart F income withdrawn from investment in less developed countries, of the previously excluded subpart F income withdrawn from investment in foreign base company shipping operations, and of the increase in earnings invested in U.S. property, of a controlled foreign corporation, see sections 951 through 964, and the regulations thereunder.

(ii) *Certain accumulations of earnings and profits.* For the inclusion in the gross income of U.S. persons as a dividend of the gain recognized on certain sales or exchanges of stock in a foreign corporation, to the extent of certain earnings and profits attributable to the stock which were accumulated while the corporation was a controlled foreign corporation, see section 1248 and the regulations thereunder.

(5) *Changes in tax rate.* For provisions respecting the effect of any change in rate of tax during the taxable year on the income of a foreign corporation, see section 21 and the regulations thereunder.

(6) *Consolidated returns.* Except in the case of certain corporations organized under the laws of Canada or Mexico and maintained solely for the purpose of complying with the laws of that country as to title and operation of property, a foreign corporation is not an includible corporation for purposes of the privilege of making a consolidated return by an affiliated group of corporations. See section 1504 and the regulations thereunder.

(7) *Adjustment of tax of certain foreign corporations.* For the application of pre-1967 income tax provisions to corporations of a foreign country which imposes a more burdensome income tax than the United States, and for the adjustment of the income tax of a corporation of a foreign country which imposes a discriminatory income tax on the income of citizens of the United States or domestic corporations, see section 896.

(f) *Effective/applicability date.* This section applies for taxable years begin-

ning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.881-1 (Revised as of January 1, 1971).

(Secs. 7805 (68A Stat. 917; 26 U.S.C. 7805) and 7654(e) (86 Stat. 1496; 26 U.S.C. 7654(e)) of the Internal Revenue Code of 1954)

[T.D. 7293, 38 FR 32795, Nov. 28, 1973, as amended by T.D. 7385, 40 FR 50260, Oct. 29, 1975; T.D. 7893, 48 FR 22507, May 19, 1983; T.D. 9194, 70 FR 18929, Apr. 11, 2005; T.D. 9391, 73 FR 19359, Apr. 9, 2008]

§ 1.881-2 Taxation of foreign corporations not engaged in U.S. business.

(a) *Imposition of tax.* (1) This section applies for purposes of determining the tax of a foreign corporation which at no time during the taxable year is engaged in trade or business in the United States. However, see also § 1.882-2 where such corporation has an election in effect for the taxable year in respect to real property income or receives interest on obligations of the United States. Except as otherwise provided in § 1.871-12, a foreign corporation to which this section applies is not subject to the tax imposed by section 11 or section 1201(a) but, pursuant to the provisions of section 881(a), is liable to a flat tax of 30 percent upon the aggregate of the amounts determined under paragraphs (b) and (c) of this section which are received during the taxable year from sources within the United States. Except as specifically provided in such paragraphs, such amounts do not include gains from the sale or exchange of property. To determine the source of such amounts, see sections 861 through 863, and the regulations thereunder.

(2) The tax of 30 percent is imposed by section 881(a) upon an amount only to the extent the amount constitutes gross income.

(3) Deductions shall not be allowed in determining the amount subject to tax under this section.

(4) Except as provided in § 1.882-2, a foreign corporation which at no time during the taxable year is engaged in trade or business in the United States has no income, gain, or loss for the taxable year which is effectively connected for the taxable year with the conduct of a trade or business in the

United States. See section 864(c)(1)(B) and §1.864-3.

(5) Gains and losses which, by reason of section 882(d) and §1.882-2, are treated as gains or losses which are effectively connected for the taxable year with the conduct of a trade or business in the United States by such a foreign corporation shall not be taken into account in determining the tax under this section. See, for example, paragraph (c)(2) of §1.871-10.

(6) Interest received by a foreign corporation pursuant to certain portfolio debt instruments is not subject to the flat tax of 30 percent described in paragraph (a)(1) of this section. For rules applicable to a foreign corporation's receipt of interest on certain portfolio debt instruments, see sections 871(h), 881(c), and §1.871-14.

(b) *Fixed or determinable annual or periodical income*—(1) General rule. The tax of 30 percent imposed by section 881(a) applies to the gross amount received from sources within the United States as fixed or determinable annual or periodical gains, profits, or income. Specific items of fixed or determinable annual or periodical income are enumerated in section 881(a)(1) as interest, dividends, rents, salaries, wages, premiums, annuities, compensations, remunerations, and emoluments, but other items of fixed or determinable annual or periodical gains, profits, or income are also subject to the tax as, for instance, royalties, including royalties for the use of patents, copyrights, secret processes and formulas, and other like property. As to the determination of fixed or determinable annual or periodical income, see paragraph (a) of §1.1441-2. For special rules treating gain on the disposition of section 306 stock as fixed or determinable annual or periodical income for purposes of section 881(a), see section 306(f) and paragraph (h) of §1.306-3.

(2) *Substitute payments*. For purposes of this section, a substitute interest payment (as defined in §1.861-2(a)(7)) received by a foreign person pursuant to a securities lending transaction or a sale-repurchase transaction (as defined in §1.861-2(a)(7)) shall have the same character as interest income received pursuant to the terms of the transferred security. Similarly, for purposes

of this section, a substitute dividend payment (as defined in §1.861-3(a)(6)) received by a foreign person pursuant to a securities lending transaction or a sale-repurchase transaction (as defined in §1.861-2(a)(7)) shall have the same character as a distribution received with respect to the transferred security. Where, pursuant to a securities lending transaction or a sale-repurchase transaction, a foreign person transfers to another person a security in the interest on which would qualify as portfolio interest under section 881(c) in the hands of the lender, substitute interest payments made with respect to the transferred security will be treated as portfolio interest, provided that in the case of interest on an obligation in registered form (as defined in §1.871-14(c)(1)(i)), the transferor complies with the documentation requirement described in §1.871-14(c)(1)(ii)(C) with respect to the payment of substitute interest and none of the exceptions to the portfolio interest exemption in sections 881(c) (3) and (4) apply. See also §§1.871-7(b)(2) and 1.894-1(c).

(3) *Dividend Equivalents*. For rules applicable to a foreign corporation's receipt of a dividend equivalent, see section 871(m) and the regulations thereunder.

(c) *Other income and gains*—(1) *Items subject to tax*. The tax of 30 percent imposed by section 881(a) also applies to the following gains received during the taxable year from sources within the United States:

(i) Gains described in section 631 (b) or (c), relating to the treatment of gain on the disposal of timber, coal, or iron ore with a retained economic interest;

(ii) [Reserved]

(iii) Gains from the sale or exchange after October 4, 1966, of patents, copyrights, secret processes and formulas, goodwill, trademarks, trade brands, franchises, or other like property, or of any interest in any such property, to the extent the gains are from payments (whether in a lump sum or in installments) which are contingent on the productivity, use, or disposition of the property or interest sold or exchanged, or from payments which are treated under section 871(e) and §1.871-11 as being so contingent.

(2) *Determination of amount of gain.* The tax of 30 percent imposed upon the gains described in subparagraph (1) of this paragraph applies to the full amount of the gains and is determined (i) without regard to the alternative tax imposed by section 1201(a) upon the excess of net long-term capital gain over the net short-term capital loss; (ii) without regard to section 1231, relating to property used in the trade or business and involuntary conversions; and (iii) except in the case of gains described in subparagraph (1)(ii) of this paragraph, whether or not the gains are considered to be gains from the sale or exchange of property which is a capital asset.

(d) *Credits against tax.* The credits allowed by section 32 (relating to tax withheld at source on foreign corporations), by section 39 (relating to certain uses of gasoline and lubricating oil), and by section 6402 (relating to overpayments of tax) shall be allowed against the tax of a foreign corporation determined in accordance with this section.

(e) *Effective/applicability date.* Except as otherwise provided in this paragraph, this section applies for taxable years beginning after December 31, 1966. Paragraph (b)(2) of this section is applicable to payments made after November 13, 1997. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.881-2 (Revised as of January 1, 1971). Paragraph (b)(3) of this section applies to payments made on or after January 23, 2012.

[T.D. 7293, 38 FR 32796, Nov. 28, 1973, as amended by T.D. 8735, 62 FR 53502, Oct. 14, 1997; T.D. 9323, 72 FR 18388, Apr. 12, 2007; T.D. 9572, 77 FR 3109, Jan. 23, 2012; T.D. 9648, 78 FR 73080, Dec. 5, 2013]

§ 1.881-3 Conduit financing arrangements.

(a) *General rules and definitions—(1) Purpose and scope.* Pursuant to the authority of section 7701(1), this section provides rules that permit the director of field operations to disregard, for purposes of section 881, the participation of one or more intermediate entities in a financing arrangement where such entities are acting as conduit entities. For purposes of this section, any ref-

erence to tax imposed under section 881 includes, except as otherwise provided and as the context may require, a reference to tax imposed under sections 871 or 884(f)(1)(A) or required to be withheld under section 1441 or 1442. See § 1.881-4 for recordkeeping requirements concerning financing arrangements. See §§ 1.1441-3(g) and 1.1441-7(f) for withholding rules applicable to conduit financing arrangements.

(2) *Definitions.* The following definitions apply for purposes of this section and §§ 1.881-4, 1.1441-3(g) and 1.1441-7(f).

(i) *Financing arrangement—(A) In general.* Financing arrangement means a series of transactions by which one person (the financing entity) advances money or other property, or grants rights to use property, and another person (the financed entity) receives money or other property, or rights to use property, if the advance and receipt are effected through one or more other persons (intermediate entities) and, except in cases to which paragraph (a)(2)(i)(B) of this section applies, there are financing transactions linking the financing entity, each of the intermediate entities, and the financed entity. A transfer of money or other property in satisfaction of a repayment obligation is not an advance of money or other property. A financing arrangement exists regardless of the order in which the transactions are entered into, but only for the period during which all of the financing transactions coexist. See *Examples 1, 2, 3 and 4* of paragraph (e) of this section for illustrations of the term financing arrangement.

(B) *Special rule for related parties.* If two (or more) financing transactions involving two (or more) related persons would form part of a financing arrangement but for the absence of a financing transaction between the related persons, the director of field operations may treat the related persons as a single intermediate entity if he determines that one of the principal purposes for the structure of the financing transactions is to prevent the characterization of such arrangement as a financing arrangement. This determination shall be based upon all of the facts and circumstances, including, without limitation, the factors set forth in

paragraph (b)(2) of this section. See *Examples 5 and 6* of paragraph (e) of this section for illustrations of this paragraph (a)(2)(i)(B).

(C) *Treatment of disregarded entities.* For purposes of this section, the term person includes a business entity that is disregarded as an entity separate from its single member owner under § 301.7701-1 through § 301.7701-3.

(ii) *Financing transaction—(A) In general.* Financing transaction means—

(1) Debt;

(2) Stock in a corporation (or a similar interest in a partnership, trust, or other person) that meets the requirements of paragraph (a)(2)(ii)(B) of this section;

(3) Any lease or license; or

(4) Any other transaction (including an interest in a trust described in sections 671 through 679) pursuant to which a person makes an advance of money or other property or grants rights to use property to a transferee who is obligated to repay or return a substantial portion of the money or other property advanced, or the equivalent in value. This paragraph (a)(2)(ii)(A)(4) shall not apply to the posting of collateral unless the collateral consists of cash or the person holding the collateral is permitted to reduce the collateral to cash (through a transfer, grant of a security interest or similar transaction) prior to default on the financing transaction secured by the collateral.

(B) *Limitation on inclusion of stock or similar interests—(1) In general.* Stock in a corporation (or a similar interest in a partnership, trust, or other person) will constitute a financing transaction only if one of the following conditions is satisfied—

(i) The issuer is required to redeem the stock or similar interest at a specified time or the holder has the right to require the issuer to redeem the stock or similar interest or to make any other payment with respect to the stock or similar interest;

(ii) The issuer has the right to redeem the stock or similar interest, but only if, based on all of the facts and circumstances as of the issue date, redemption pursuant to that right is more likely than not to occur; or

(iii) The owner of the stock or similar interest has the right to require a person related to the issuer (or any other person who is acting pursuant to a plan or arrangement with the issuer) to acquire the stock or similar interest or make a payment with respect to the stock or similar interest.

(2) *Rules of special application—(i) Existence of a right.* For purposes of this paragraph (a)(2)(ii)(B), a person will be considered to have a right to cause a redemption or payment if the person has the right (other than rights arising, in the ordinary course, between the date that a payment is declared and the date that a payment is made) to enforce the payment through a legal proceeding or to cause the issuer to be liquidated if it fails to redeem the interest or to make a payment. A person will not be considered to have a right to force a redemption or a payment if the right is derived solely from ownership of a controlling interest in the issuer in cases where the control does not arise from a default or similar contingency under the instrument. The person is considered to have such a right if the person has the right as of the issue date or, as of the issue date, it is more likely than not that the person will receive such a right, whether through the occurrence of a contingency or otherwise.

(ii) *Restrictions on payment.* The fact that the issuer does not have the legally available funds to redeem the stock or similar interest, or that the payments are to be made in a blocked currency, will not affect the determinations made pursuant to this paragraph (a)(2)(ii)(B).

(iii) *Conduit entity* means an intermediate entity whose participation in the financing arrangement may be disregarded in whole or in part pursuant to this section, whether or not the director of field operations has made a determination that the intermediate entity should be disregarded under paragraph (a)(3)(i) of this section.

(iv) *Conduit financing arrangement* means a financing arrangement that is effected through one or more conduit entities.

(v) *Related* means related within the meaning of sections 267(b) or 707(b)(1), or controlled within the meaning of

section 482, and the regulations under those sections. For purposes of determining whether a person is related to another person, the constructive ownership rules of section 318 shall apply, and the attribution rules of section 267(c) also shall apply to the extent they attribute ownership to persons to whom section 318 does not attribute ownership.

(3) *Disregard of participation of conduit entity*—(i) *Authority of director of field operations.* The director of field operations may determine that the participation of a conduit entity in a conduit financing arrangement should be disregarded for purposes of section 881. For this purpose, an intermediate entity will constitute a conduit entity if it meets the standards of paragraph (a)(4) of this section. The director of field operations has discretion to determine the manner in which the standards of paragraph (a)(4) of this section apply, including the financing transactions and parties composing the financing arrangement.

(ii) *Effect of disregarding conduit entity*—(A) *In general.* If the director of field operations determines that the participation of a conduit entity in a financing arrangement should be disregarded, the financing arrangement is recharacterized as a transaction directly between the remaining parties to the financing arrangement (in most cases, the financed entity and the financing entity) for purposes of section 881. To the extent that a disregarded conduit entity actually receives or makes payments pursuant to a conduit financing arrangement, it is treated as an agent of the financing entity. Except as otherwise provided, the recharacterization of the conduit financing arrangement also applies for purposes of sections 871, 884(f)(1)(A), 1441, and 1442 and other procedural provisions relating to those sections. This recharacterization will not otherwise affect a taxpayer's Federal income tax liability under any substantive provisions of the Internal Revenue Code. Thus, for example, the recharacterization generally applies for purposes of section 1461, in order to impose liability on a withholding agent who fails to withhold as required under § 1.1441-3(g), but not for purposes of § 1.882-5.

(B) *Character of payments made by the financed entity.* If the participation of a conduit financing arrangement is disregarded under this paragraph (a)(3), payments made by the financed entity generally shall be characterized by reference to the character (e.g., interest or rent) of the payments made to the financing entity. However, if the financing transaction to which the financing entity is a party is a transaction described in paragraph (a)(2)(ii)(A)(2) or (4) of this section that gives rise to payments that would not be deductible if paid by the financed entity, the character of the payments made by the financed entity will not be affected by the disregard of the participation of a conduit entity. The characterization provided by this paragraph (a)(3)(ii)(B) does not, however, extend to qualification of a payment for any exemption from withholding tax under the Internal Revenue Code or a provision of any applicable tax treaty if such qualification depends on the terms of, or other similar facts or circumstances relating to, the financing transaction to which the financing entity is a party that do not apply to the financing transaction to which the financed entity is a party. Thus, for example, payments made by a financed entity that is not a bank cannot qualify for the exemption provided by section 881(i) of the Code even if the loan between the financing entity and the conduit entity is a bank deposit.

(C) *Effect of income tax treaties.* Where the participation of a conduit entity in a conduit financing arrangement is disregarded pursuant to this section, it is disregarded for all purposes of section 881, including for purposes of applying any relevant income tax treaties. Accordingly, the conduit entity may not claim the benefits of a tax treaty between its country of residence and the United States to reduce the amount of tax due under section 881 with respect to payments made pursuant to the conduit financing arrangement. The financing entity may, however, claim the benefits of any income tax treaty under which it is entitled to benefits in

order to reduce the rate of tax on payments made pursuant to the conduit financing arrangement that are recharacterized in accordance with paragraph (a)(3)(ii)(B) of this section.

(D) *Effect on withholding tax.* For the effect of recharacterization on withholding obligations, see §§1.1441-3(g) and 1.1441-7(f).

(E) *Special rule for a financing entity that is unrelated to both intermediate entity and financed entity—(1) Liability of financing entity.* Notwithstanding the fact that a financing arrangement is a conduit financing arrangement, a financing entity that is unrelated to the financed entity and the conduit entity (or entities) shall not itself be liable for tax under section 881 unless the financing entity knows or has reason to know that the financing arrangement is a conduit financing arrangement. But see §1.1441-3(g) for the withholding agent's withholding obligations.

(2) *Financing entity's knowledge—(i) In general.* A financing entity knows or has reason to know that the financing arrangement is a conduit financing arrangement only if the financing entity knows or has reason to know of facts sufficient to establish that the financing arrangement is a conduit financing arrangement, including facts sufficient to establish that the participation of the intermediate entity in the financing arrangement is pursuant to a tax avoidance plan. A person that knows only of the financing transactions that comprise the financing arrangement will not be considered to know or have reason to know of facts sufficient to establish that the financing arrangement is a conduit financing arrangement.

(ii) *Presumption regarding financing entity's knowledge.* It shall be presumed that the financing entity does not know or have reason to know that the financing arrangement is a conduit financing arrangement if the financing entity is unrelated to all other parties to the financing arrangement and the financing entity establishes that the intermediate entity who is a party to the financing transaction with the financing entity is actively engaged in a substantial trade or business. An intermediate entity will not be considered to be engaged in a trade or business if its business is making or managing in-

vestments, unless the intermediate entity is actively engaged in a banking, insurance, financing or similar trade or business and such business consists predominantly of transactions with customers who are not related persons. An intermediate entity's trade or business is substantial if it is reasonable for the financing entity to expect that the intermediate entity will be able to make payments under the financing transaction out of the cash flow of that trade or business. This presumption may be rebutted if the director of field operations establishes that the financing entity knew or had reason to know that the financing arrangement is a conduit financing arrangement. See *Example 7* of paragraph (e) of this section for an illustration of the rules of this paragraph (a)(3)(ii)(E).

(iii) *Limitation on taxpayer's use of this section.* A taxpayer may not apply this section to reduce the amount of its Federal income tax liability by disregarding the form of its financing transactions for Federal income tax purposes or by compelling the director of field operations to do so. See, however, paragraph (b)(2)(i) of this section for rules regarding the taxpayer's ability to show that the participation of one or more intermediate entities results in no significant reduction in tax.

(4) *Standard for treatment as a conduit entity—(i) In general.* An intermediate entity is a conduit entity with respect to a financing arrangement if—

(A) The participation of the intermediate entity (or entities) in the financing arrangement reduces the tax imposed by section 881 (determined by comparing the aggregate tax imposed under section 881 on payments made on financing transactions making up the financing arrangement with the tax that would have been imposed under paragraph (d) of this section);

(B) The participation of the intermediate entity in the financing arrangement is pursuant to a tax avoidance plan; and

(C) Either—

(1) The intermediate entity is related to the financing entity or the financed entity; or

(2) The intermediate entity would not have participated in the financing arrangement on substantially the same

terms but for the fact that the financing entity engaged in the financing transaction with the intermediate entity.

(ii) *Multiple intermediate entities—(A) In general.* If a financing arrangement involves multiple intermediate entities, the director of field operations will determine whether each of the intermediate entities is a conduit entity. The director of field operations will make the determination by applying the special rules for multiple intermediate entities provided in this section or, if no special rules are provided, applying principles consistent with those of paragraph (a)(4)(i) of this section to each of the intermediate entities in the financing arrangement.

(B) *Special rule for related persons.* The director of field operations may treat related intermediate entities as a single intermediate entity if he determines that one of the principal purposes for the involvement of multiple intermediate entities in the financing arrangement is to prevent the characterization of an intermediate entity as a conduit entity, to reduce the portion of a payment that is subject to withholding tax or otherwise to circumvent the provisions of this section. This determination shall be based upon all of the facts and circumstances, including, but not limited to, the factors set forth in paragraph (b)(2) of this section. If a director of field operations determines that related persons are to be treated as a single intermediate entity, financing transactions between such related parties that are part of the conduit financing arrangement shall be disregarded for purposes of applying this section. See *Examples 8* and *9* of paragraph (e) of this section for illustrations of the rules of this paragraph (a)(4)(ii).

(b) *Determination of whether participation of intermediate entity is pursuant to a tax avoidance plan—(1) In general.* A tax avoidance plan is a plan one of the principal purposes of which is the avoidance of tax imposed by section 881. Avoidance of the tax imposed by section 881 may be one of the principal purposes for such a plan even though it is outweighed by other purposes (taken together or separately). In this regard, the only relevant purposes are those

pertaining to the participation of the intermediate entity in the financing arrangement and not those pertaining to the existence of a financing arrangement as a whole. The plan may be formal or informal, written or oral, and may involve any one or more of the parties to the financing arrangement. The plan must be in existence no later than the last date that any of the financing transactions comprising the financing arrangement is entered into. The director of field operations may infer the existence of a tax avoidance plan from the facts and circumstances. In determining whether there is a tax avoidance plan, the director of field operations will weigh all relevant evidence regarding the purposes for the intermediate entity's participation in the financing arrangement. See *Examples 12* and *13* of paragraph (e) of this section for illustrations of the rule of this paragraph (b)(1).

(2) *Factors taken into account in determining the presence or absence of a tax avoidance purpose.* The factors described in paragraphs (b)(2)(i) through (iv) of this section are among the facts and circumstances taken into account in determining whether the participation of an intermediate entity in a financing arrangement has as one of its principal purposes the avoidance of tax imposed by section 881.

(i) *Significant reduction in tax.* The director of field operations will consider whether the participation of the intermediate entity (or entities) in the financing arrangement significantly reduces the tax that otherwise would have been imposed under section 881. The fact that an intermediate entity is a resident of a country that has an income tax treaty with the United States that significantly reduces the tax that otherwise would have been imposed under section 881 is not sufficient, by itself, to establish the existence of a tax avoidance plan. The determination of whether the participation of an intermediate entity significantly reduces the tax generally is made by comparing the aggregate tax imposed under section 881 on payments made on financing transactions making up the financing arrangement with the tax that would be imposed under paragraph (d) of this section. However, the taxpayer

is not barred from presenting evidence that the financing entity, as determined by the director of field operations, was itself an intermediate entity and another entity should be treated as the financing entity for purposes of applying this test. A reduction in the absolute amount of tax may be significant even if the reduction in rate is not. A reduction in the amount of tax may be significant if the reduction is large in absolute terms or in relative terms. See *Examples 14, 15 and 16* of paragraph (e) of this section for illustrations of this factor.

(ii) *Ability to make the advance.* The director of field operations will consider whether the intermediate entity had sufficient available money or other property of its own to have made the advance to the financed entity without the advance of money or other property to it by the financing entity (or in the case of multiple intermediate entities, whether each of the intermediate entities had sufficient available money or other property of its own to have made the advance to either the financed entity or another intermediate entity without the advance of money or other property to it by either the financing entity or another intermediate entity).

(iii) *Time period between financing transactions.* The director of field operations will consider the length of the period of time that separates the advances of money or other property, or the grants of rights to use property, by the financing entity to the intermediate entity (in the case of multiple intermediate entities, from one intermediate entity to another), and ultimately by the intermediate entity to the financed entity. A short period of time is evidence of the existence of a tax avoidance plan while a long period of time is evidence that there is not a tax avoidance plan. See *Example 17* of paragraph (e) of this section for an illustration of this factor.

(iv) *Financing transactions in the ordinary course of business.* If the parties to the financing transaction are related, the director of field operations will consider whether the financing transaction occurs in the ordinary course of the active conduct of complementary or integrated trades or businesses en-

gaged in by these entities. The fact that a financing transaction is described in this paragraph (b)(2)(iv) is evidence that the participation of the parties to that transaction in the financing arrangement is not pursuant to a tax avoidance plan. A loan will not be considered to occur in the ordinary course of the active conduct of complementary or integrated trades or businesses unless the loan is a trade receivable or the parties to the transaction are actively engaged in a banking, insurance, financing or similar trade or business and such business consists predominantly of transactions with customers who are not related persons. See *Example 18* of paragraph (e) of this section for an illustration of this factor.

(3) *Presumption if significant financing activities performed by a related intermediate entity—(i) General rule.* It shall be presumed that the participation of an intermediate entity (or entities) in a financing arrangement is not pursuant to a tax avoidance plan if the intermediate entity is related to either or both the financing entity or the financed entity and the intermediate entity performs significant financing activities with respect to the financing transactions forming part of the financing arrangement to which it is a party. This presumption may be rebutted if the director of field operations establishes that the participation of the intermediate entity in the financing arrangement is pursuant to a tax avoidance plan. See *Examples 22, 23 and 24* of paragraph (e) of this section for illustrations of this presumption.

(ii) *Significant financing activities.* For purposes of this paragraph (b)(3), an intermediate entity performs significant financing activities with respect to such financing transactions only if the financing transactions satisfy the requirements of either paragraph (b)(3)(ii)(A) or (B) of this section.

(A) *Active rents or royalties.* An intermediate entity performs significant financing activities with respect to leases or licenses if rents or royalties earned with respect to such leases or licenses are derived in the active conduct of a trade or business within the meaning of section 954(c)(2)(A), to be

applied by substituting the term *intermediate* entity for the term *controlled foreign corporation*.

(B) *Active risk management*—(1) *In general*. An intermediate entity is considered to perform significant financing activities with respect to financing transactions only if officers and employees of the intermediate entity participate actively and materially in arranging the intermediate entity's participation in such financing transactions (other than financing transactions described in paragraph (b)(3)(ii)(B)(3) of this section) and perform the business activity and risk management activities described in paragraph (b)(3)(ii)(B)(2) of this section with respect to such financing transactions, and the participation of the intermediate entity in the financing transactions produces (or reasonably can be expected to produce) efficiency savings by reducing transaction costs and overhead and other fixed costs.

(2) *Business activity and risk management requirements*. An intermediate entity will be considered to perform significant financing activities only if, within the country in which the intermediate entity is organized (or, if different, within the country with respect to which the intermediate entity is claiming the benefits of a tax treaty), its officers and employees—

(i) Exercise management over, and actively conduct, the day-to-day operations of the intermediate entity. Such operations must consist of a substantial trade or business or the supervision, administration and financing for a substantial group of related persons; and

(ii) Actively manage, on an ongoing basis, material market risks arising from such financing transactions as an integral part of the management of the intermediate entity's financial and capital requirements (including management of risks of currency and interest rate fluctuations) and management of the intermediate entity's short-term investments of working capital by entering into transactions with unrelated persons.

(3) *Special rule for trade receivables and payables entered into in the ordinary course of business*. If the activities of the intermediate entity consist in

whole or in part of cash management for a controlled group of which the intermediate entity is a member, then employees of the intermediate entity need not have participated in arranging any such financing transactions that arise in the ordinary course of a substantial trade or business of either the financed entity or the financing entity. Officers or employees of the financing entity or financed entity, however, must have participated actively and materially in arranging the transaction that gave rise to the trade receivable or trade payable. Cash management includes the operation of a sweep account whereby the intermediate entity nets intercompany trade payables and receivables arising from transactions among the other members of the controlled group and between members of the controlled group and unrelated persons.

(4) *Activities of officers and employees of related persons*. Except as provided in paragraph (b)(3)(ii)(B)(3) of this section, in applying this paragraph (b)(3)(ii)(B), the activities of an officer or employee of an intermediate entity will not constitute significant financing activities if any officer or employee of a related person participated materially in any of the activities described in this paragraph, other than to approve any guarantee of a financing transaction or to exercise general supervision and control over the policies of the intermediate entity.

(c) *Determination of whether an unrelated intermediate entity would not have participated in financing arrangement on substantially the same terms*—(1) *In general*. The determination of whether an intermediate entity would not have participated in a financing arrangement on substantially the same terms but for the financing transaction between the financing entity and the intermediate entity shall be based upon all of the facts and circumstances.

(2) *Effect of guarantee*—(i) *In general*. The director of field operations may presume that the intermediate entity would not have participated in the financing arrangement on substantially the same terms if there is a guarantee of the financed entity's liability to the intermediate entity (or in the case of

multiple intermediate entities, a guarantee of the intermediate entity's liability to the intermediate entity that advanced money or property, or granted rights to use other property). However, a guarantee that was neither in existence nor contemplated on the last date that any of the financing transactions comprising the financing arrangement is entered into does not give rise to this presumption. A taxpayer may rebut this presumption by producing clear and convincing evidence that the intermediate entity would have participated in the financing transaction with the financed entity on substantially the same terms even if the financing entity had not entered into a financing transaction with the intermediate entity.

(ii) *Definition of guarantee.* For the purposes of this paragraph (c)(2), a guarantee is any arrangement under which a person, directly or indirectly, assures, on a conditional or unconditional basis, the payment of another person's obligation with respect to a financing transaction. The term shall be interpreted in accordance with the definition of the term in section 163(j)(6)(D)(iii).

(d) *Determination of amount of tax liability—(1) Amount of payment subject to recharacterization—(i) In general.* If a financing arrangement is a conduit financing arrangement, a portion of each payment made by the financed entity with respect to the financing transactions that comprise the conduit financing arrangement shall be recharacterized as a transaction directly between the financed entity and the financing entity. If the aggregate principal amount of the financing transaction(s) to which the financed entity is a party is less than or equal to the aggregate principal amount of the financing transaction(s) linking any of the parties to the financing arrangement, the entire amount of the payment shall be so recharacterized. If the aggregate principal amount of the financing transaction(s) to which the financed entity is a party is greater than the aggregate principal amount of the financing transaction(s) linking any of the parties to the financing arrangement, then the recharacterized portion shall be determined by multiplying the

payment by a fraction the numerator of which is equal to the lowest aggregate principal amount of the financing transaction(s) linking any of the parties to the financing arrangement (other than financing transactions that are disregarded pursuant to paragraphs (a)(2)(i)(B) and (a)(4)(ii)(B) of this section) and the denominator of which is the aggregate principal amount of the financing transaction(s) to which the financed entity is a party. In the case of financing transactions the principal amount of which is subject to adjustment, the fraction shall be determined using the average outstanding principal amounts for the period to which the payment relates. The average principal amount may be computed using any method applied consistently that reflects with reasonable accuracy the amount outstanding for the period. See *Example 25* of paragraph (e) of this section for an illustration of the calculation of the amount of tax liability.

(ii) *Determination of principal amount—(A) In general.* Unless otherwise provided in this paragraph (d)(1)(ii), the principal amount equals the amount of money advanced, or the fair market value of other property advanced or subject to a lease or license, in the financing transaction. In general, fair market value is calculated in U.S. dollars as of the close of business on the day on which the financing transaction is entered into. However, if the property advanced, or the right to use property granted, by the financing entity is the same as the property or rights received by the financed entity, the fair market value of the property or right shall be determined as of the close of business on the last date that any of the financing transactions comprising the financing arrangement is entered into. In the case of fungible property, property of the same type shall be considered to be the same property. See *Example 26* of paragraph (e) for an illustration of the calculation of the principal amount in the case of financing transactions involving fungible property. The principal amount of a financing transaction shall be subject to adjustments, as set forth in this paragraph (d)(1)(ii).

(B) *Debt instruments and certain stock.* In the case of a debt instrument or of

stock that is subject to the current inclusion rules of sections 305(c)(3) or (e), the principal amount generally will be equal to the issue price. However, if the fair market value on the issue date differs materially from the issue price, the fair market value of the debt instrument shall be used in lieu of the instrument's issue price. Appropriate adjustments will be made for accruals of original issue discount and repayments of principal (including accrued original issue discount).

(C) *Partnership and trust interests.* In the case of a partnership interest or an interest in a trust, the principal amount is equal to the fair market value of the money or property contributed to the partnership or trust in return for that partnership or trust interest.

(D) *Leases or licenses.* In the case of a lease or license, the principal amount is equal to the fair market value of the property subject to the lease or license on the date on which the lease or license is entered into. The principal amount shall be adjusted for depreciation or amortization, calculated on a basis that accurately reflects the anticipated decline in the value of the property over its life.

(2) *Rate of tax.* The rate at which tax is imposed under section 881 on the portion of the payment that is recharacterized pursuant to paragraph (d)(1) of this section is determined by reference to the nature of the recharacterized transaction, as determined under paragraphs (a)(3)(ii)(B) and (C) of this section.

(e) *Examples.* The following examples illustrate this section. For purposes of these examples, unless otherwise indicated, it is assumed that FP, a corporation organized in country N, owns all of the stock of FS, a corporation organized in country T, and DS, a corporation organized in the United States. Country T, but not country N, has an income tax treaty with the United States. The treaty exempts interest, rents and royalties paid by a resident of one state (the source state) to a resident of the other state from tax in the source state.

Example 1. Financing arrangement. (i) On January 1, 1996, BK, a bank organized in country T, lends \$1,000,000 to DS in exchange

for a note issued by DS. FP guarantees to BK that DS will satisfy its repayment obligation on the loan. There are no other transactions between FP and BK.

(ii) BK's loan to DS is a financing transaction within the meaning of paragraph (a)(2)(ii)(A)(1) of this section. FP's guarantee of DS's repayment obligation is not a financing transaction as described in paragraphs (a)(2)(ii)(A)(1) through (4) of this section. Therefore, these transactions do not constitute a financing arrangement as defined in paragraph (a)(2)(i) of this section.

Example 2. Financing arrangement. (i) On January 1, 1996, FP lends \$1,000,000 to DS in exchange for a note issued by DS. On January 1, 1997, FP assigns the DS note to FS in exchange for a note issued by FS. After receiving notice of the assignment, DS remits payments due under its note to FS.

(ii) The DS note held by FS and the FS note held by FP are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(1) of this section, and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section.

Example 3. Participation of a disregarded intermediate entity. The facts are the same as in *Example 2*, except that FS is an entity that is disregarded as an entity separate from its owner, FP, under §301.7701-3. Under paragraph (a)(2)(i)(C) of this section, FS is a person and, therefore, may itself be an intermediate entity that is linked by financing transactions to other persons in a financing arrangement. The DS note held by FS and the FS note held by FP are financing transactions within the meaning of paragraph (a)(2)(ii) of this section, and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section.

Example 4. Financing arrangement. (i) On December 1, 1994 FP creates a special purposes subsidiary, FS. On that date FP capitalizes FS with \$1,000,000 in cash and \$10,000,000 in debt from BK, a Country N bank. On January 1, 1995, C, a U.S. person, purchases an automobile from DS in return for an installment note. On August 1, 1995, DS sells a number of installment notes, including C's, to FS in exchange for \$10,000,000. DS continues to service the installment notes for FS.

(ii) The C installment note now held by FS (as well as all of the other installment notes now held by FS) and the FS note held by BK are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(1) of this section, and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section.

Example 5. Related persons treated as a single intermediate entity. (i) On January 1, 1996, FP deposits \$1,000,000 with BK, a bank that is organized in country N and is unrelated to FP

and its subsidiaries. M, a corporation also organized in country N, is wholly-owned by the sole shareholder of BK but is not a bank within the meaning of section 881(c)(3)(A). On July 1, 1996, M lends \$1,000,000 to DS in exchange for a note maturing on July 1, 2006. The note is in registered form within the meaning of section 881(c)(2)(B)(i) and DS has received from M the statement required by section 881(c)(2)(B)(ii). One of the principal purposes for the absence of a financing transaction between BK and M is the avoidance of the application of this section.

(i) The transactions described above would form a financing arrangement but for the absence of a financing transaction between BK and M. However, because one of the principal purposes for the structuring of these financing transactions is to prevent characterization of such arrangement as a financing arrangement, the director of field operations may treat the financing transactions between FP and BK, and between M and DS as a financing arrangement under paragraphs (a)(2)(i)(B) of this section. In such a case, BK and M would be considered a single intermediate entity for purposes of this section. See also paragraph (a)(4)(ii)(B) of this section for the authority to treat BK and M as a single intermediate entity.

Example 6. Related persons treated as a single intermediate entity. (i) On January 1, 1995, FP lends \$10,000,000 to FS in exchange for a 10-year note that pays interest annually at a rate of 8 percent per annum. On January 2, 1995, FS contributes \$10,000,000 to FS2, a wholly-owned subsidiary of FS organized in country T, in exchange for common stock of FS2. On January 1, 1996, FS2 lends \$10,000,000 to DS in exchange for an 8-year note that pays interest annually at a rate of 10 percent per annum. FS is a holding company whose most significant asset is the stock of FS2. Throughout the period that the FP-FS loan is outstanding, FS causes FS2 to make distributions to FS, most of which are used to make interest and principal payments on the FP-FS loan. Without the distributions from FS2, FS would not have had the funds with which to make payments on the FP-FS loan. One of the principal purposes for the absence of a financing transaction between FS and FS2 is the avoidance of the application of this section.

(ii) The conditions of paragraph (a)(4)(i)(A) of this section would be satisfied with respect to the financing transactions between FP, FS, FS2 and DS but for the absence of a financing transaction between FS and FS2. However, because one of the principal purposes for the structuring of these financing transactions is to prevent characterization of an entity as a conduit, the director of field operations may treat the financing transactions between FP and FS, and between FS2 and DS as a financing arrangement. See paragraph (a)(4)(ii)(B) of this section. In such

a case, FS and FS2 would be considered a single intermediate entity for purposes of this section. See also paragraph (a)(2)(i)(B) of this section for the authority to treat FS and FS2 as a single intermediate entity.

Example 7. Presumption with respect to unrelated financing entity. (i) FP is a corporation organized in country T that is actively engaged in a substantial manufacturing business. FP has a revolving credit facility with a syndicate of banks, none of which is related to FP and FP's subsidiaries, which provides that FP may borrow up to a maximum of \$100,000,000 at a time. The revolving credit facility provides that DS and certain other subsidiaries of FP may borrow directly from the syndicate at the same interest rates as FP, but each subsidiary is required to indemnify the syndicate banks for any withholding taxes imposed on interest payments by the country in which the subsidiary is organized. BK, a bank that is organized in country N, is the agent for the syndicate. Some of the syndicate banks are organized in country N, but others are residents of country O, a country that has an income tax treaty with the United States which allows the United States to impose a tax on interest at a maximum rate of 10 percent. It is reasonable for BK and the syndicate banks to have determined that FP will be able to meet its payment obligations on a maximum principal amount of \$100,000,000 out of the cash flow of its manufacturing business. At various times throughout 1995, FP borrows under the revolving credit facility until the outstanding principal amount reaches the maximum amount of \$100,000,000. On December 31, 1995, FP receives \$100,000,000 from a public offering of its equity. On January 1, 1996, FP pays BK \$90,000,000 to reduce the outstanding principal amount under the revolving credit facility and lends \$10,000,000 to DS. FP would have repaid the entire principal amount, and DS would have borrowed directly from the syndicate, but for the fact that DS did not want to incur the U.S. withholding tax that would have applied to payments made directly by DS to the syndicate banks.

(ii) Pursuant to paragraph (a)(3)(ii)(E)(1) of this section, even though the financing arrangement is a conduit financing arrangement (because the financing arrangement meets the standards for recharacterization in paragraph (a)(4)(i)), BK and the other syndicate banks have no section 881 liability unless they know or have reason to know that the financing arrangement is a conduit financing arrangement. Moreover, pursuant to paragraph (a)(3)(ii)(E)(2)(ii) of this section, BK and the syndicate banks are presumed not to know that the financing arrangement is a conduit financing arrangement. The syndicate banks are unrelated to both FP and DS, and FP is actively engaged in a substantial trade or business—that is, the cash flow

from FP's manufacturing business is sufficient for the banks to expect that FP will be able to make the payments required under the financing transaction. See § 1.1441-3(g) for the withholding obligations of the withholding agents.

Example 8. Multiple intermediate entities—special rule for related persons. (i) On January 1, 1995, FP lends \$10,000,000 to FS in exchange for a 10-year note that pays interest annually at a rate of 8 percent per annum. On January 2, 1995, FS contributes \$9,900,000 to FS2, a wholly-owned subsidiary of FS organized in country T, in exchange for common stock and lends \$100,000 to FS2. On January 1, 1996, FS2 lends \$10,000,000 to DS in exchange for an 8-year note that pays interest annually at a rate of 10 percent per annum. FS is a holding company that has no significant assets other than the stock of FS2. Throughout the period that the FP-FS loan is outstanding, FS causes FS2 to make distributions to FS, most of which are used to make interest and principal payments on the FP-FS loan. Without the distributions from FS2, FS would not have had the funds with which to make payments on the FP-FS loan. One of the principal purposes for structuring the transactions between FS and FS2 as primarily a contribution of capital is to reduce the amount of the payment that would be recharacterized under paragraph (d) of this section.

(ii) Pursuant to paragraph (a)(4)(ii)(B) of this section, the director of field operations may treat FS and FS2 as a single intermediate entity for purposes of this section since one of the principal purposes for the participation of multiple intermediate entities is to reduce the amount of the tax liability on any recharacterized payment by inserting a financing transaction with a low principal amount.

Example 9. Multiple intermediate entities. (i) On January 1, 1995, FP deposits \$1,000,000 with BK, a bank that is organized in country T and is unrelated to FP and its subsidiaries, FS and DS. On January 1, 1996, at a time when the FP-BK deposit is still outstanding, BK lends \$500,000 to BK2, a bank that is wholly-owned by BK and is organized in country T. On the same date, BK2 lends \$500,000 to FS. On July 1, 1996, FS lends \$500,000 to DS. FP pledges its deposit with BK to BK2 in support of FS' obligation to repay the BK2 loan. FS', BK's and BK2's participation in the financing arrangement is pursuant to a tax avoidance plan.

(ii) The conditions of paragraphs (a)(4)(i)(A) and (B) of this section are satisfied because the participation of BK, BK2 and FS in the financing arrangement reduces the tax imposed by section 881, and FS', BK's and BK2's participation in the financing arrangement is pursuant to a tax avoidance plan. However, since BK and BK2 are unrelated to FP and DS, under paragraph

(a)(4)(i)(C)(2) of this section, BK and BK2 will be treated as conduit entities only if BK and BK2 would not have participated in the financing arrangement on substantially the same terms but for the financing transaction between FP and BK.

(iii) It is presumed that BK2 would not have participated in the financing arrangement on substantially the same terms but for the BK-BK2 financing transaction because FP's pledge of an asset in support of FS' obligation to repay the BK2 loan is a guarantee within the meaning of paragraph (c)(2)(ii) of this section. If the taxpayer does not rebut this presumption by clear and convincing evidence, then BK2 will be a conduit entity.

(iv) Because BK and BK2 are related intermediate entities, the director of field operations must determine whether one of the principal purposes for the involvement of multiple intermediate entities was to prevent characterization of an entity as a conduit entity. In making this determination, the director of field operations may consider the fact that the involvement of two related intermediate entities prevents the presumption regarding guarantees from applying to BK. In the absence of evidence showing a business purpose for the involvement of both BK and BK2, the director of field operations may treat BK and BK2 as a single intermediate entity for purposes of determining whether they would have participated in the financing arrangement on substantially the same terms but for the financing transaction between FP and BK. The presumption that applies to BK2 therefore will apply to BK. If the taxpayer does not rebut this presumption by clear and convincing evidence, then BK will be a conduit entity.

Example 10. Reduction of tax. (i) On February 1, 1995, FP issues debt to the public that would satisfy the requirements of section 871(h)(2)(A) (relating to obligations that are not in registered form) if issued by a U.S. person. FP lends the proceeds of the debt offering to DS in exchange for a note.

(ii) The debt issued by FP and the DS note are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(I) of this section and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. The holders of the FP debt are the financing entities, FP is the intermediate entity and DS is the financed entity. Because interest payments on the debt issued by FP would not have been subject to withholding tax if the debt had been issued by DS, there is no reduction in tax under paragraph (a)(4)(i)(A) of this section. Accordingly, FP is not a conduit entity.

Example 11. Reduction of tax. (i) On January 1, 1995, FP licenses to FS the rights to use a patent in the United States to manufacture product A. FS agrees to pay FP a fixed

amount in royalties each year under the license. On January 1, 1996, FS sublicenses to DS the rights to use the patent in the United States. Under the sublicense, DS agrees to pay FS royalties based upon the units of product A manufactured by DS each year. Although the formula for computing the amount of royalties paid by DS to FS differs from the formula for computing the amount of royalties paid by FS to FP, each represents an arm's length rate.

(ii) Although the royalties paid by DS to FS are exempt from U.S. withholding tax, the royalty payments between FS and FP are income from U.S. sources under section 861(a)(4) subject to the 30 percent gross tax imposed by § 1.881-2(b) and subject to withholding under § 1.1441-2(a). Because the rate of tax imposed on royalties paid by FS to FP is the same as the rate that would have been imposed on royalties paid by DS to FP, the participation of FS in the FP-FS-DS financing arrangement does not reduce the tax imposed by section 881 within the meaning of paragraph (a)(4)(i)(A) of this section. Accordingly, FP is not a conduit entity.

Example 12. A principal purpose. (i) On January 1, 1995, FS lends \$10,000,000 to DS in exchange for a 10-year note that pays interest annually at a rate of 8 percent per annum. As was intended at the time of the loan from FS to DS, on July 1, 1995, FP makes an interest-free demand loan of \$10,000,000 to FS. A principal purpose for FS' participation in the FP-FS-DS financing arrangement is that FS generally coordinates the financing for all of FP's subsidiaries (although FS does not engage in significant financing activities with respect to such financing transactions). However, another principal purpose for FS' participation is to allow the parties to benefit from the lower withholding tax rate provided under the income tax treaty between country T and the United States.

(ii) The financing arrangement satisfies the tax avoidance purpose requirement of paragraph (a)(4)(i)(B) of this section because FS participated in the financing arrangement pursuant to a plan one of the principal purposes of which is to allow the parties to benefit from the country T-U.S. treaty.

Example 13. A principal purpose. (i) DX is a U.S. corporation that intends to purchase property to use in its manufacturing business. FX is a partnership organized in country N that is owned in equal parts by LC1 and LC2, leasing companies that are unrelated to DX. BK, a bank organized in country N and unrelated to DX, LC1 and LC2, lends \$100,000,000 to FX to enable FX to purchase the property. On the same day, FX purchases the property and engages in a transaction with DX which is treated as a lease of the property for country N tax purposes but a loan for U.S. tax purposes. Accordingly, DX is treated as the owner of the property for U.S. tax purposes. The parties comply with

the requirements of section 881(c) with respect to the debt obligation of DX to FX. FX and DX structured these transactions in this manner so that LC1 and LC2 would be entitled to accelerated depreciation deductions with respect to the property in country N and DX would be entitled to accelerated depreciation deductions in the United States. None of the parties would have participated in the transaction if the payments made by DX were subject to U.S. withholding tax.

(ii) The loan from BK to FX and from FX to DX are financing transactions and, together constitute a financing arrangement. The participation of FX in the financing arrangement reduces the tax imposed by section 881 because payments made to FX, but not BK, qualify for the portfolio interest exemption of section 881(c) because BK is a bank making an extension of credit in the ordinary course of its trade or business within the meaning of section 881(c)(3)(A). Moreover, because DX borrowed the money from FX instead of borrowing the money directly from BK to avoid the tax imposed by section 881, one of the principal purposes of the participation of FX was to avoid that tax (even though another principal purpose of the participation of FX was to allow LC1 and LC2 to take advantage of accelerated depreciation deductions in country N). Assuming that FX would not have participated in the financing arrangement on substantially the same terms but for the fact that BK loaned it \$100,000,000, FX is a conduit entity and the financing arrangement is a conduit financing arrangement.

Example 14. Significant reduction of tax. (i) FS owns all of the stock of FS1, which also is a resident of country T. FS1 owns all of the stock of DS. On January 1, 1995, FP contributes \$10,000,000 to the capital of FS in return for perpetual preferred stock. On July 1, 1995, FS lends \$10,000,000 to FS1. On January 1, 1996, FS1 lends \$10,000,000 to DS. Under the terms of the country T-U.S. income tax treaty, a country T resident is not entitled to the reduced withholding rate on interest income provided by the treaty if the resident is entitled to specified tax benefits under country T law. Although FS1 may deduct interest paid on the loan from FS, these deductions are not pursuant to any special tax benefits provided by country T law. However, FS qualifies for one of the enumerated tax benefits pursuant to which it may deduct dividends paid with respect to the stock held by FP. Therefore, if FS had made a loan directly to DS, FS would not have been entitled to the benefits of the country T-U.S. tax treaty with respect to payments it received from DS, and such payments would have been subject to tax under section 881 at a 30 percent rate.

(ii) The FS-FS1 loan and the FS1-DS loan are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(I) of this section and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. Pursuant to paragraph (b)(2)(i) of this section, the significant reduction in tax resulting from the participation of FS1 in the financing arrangement is evidence that the participation of FS1 in the financing arrangement is pursuant to a tax avoidance plan. However, other facts relevant to the presence of such a plan must also be taken into account.

Example 15. Significant reduction of tax. (i) FP owns 90 percent of the voting stock of FX, an unlimited liability company organized in country T. The other 10 percent of the common stock of FX is owned by FP1, a subsidiary of FP that is organized in country N. Although FX is a partnership for U.S. tax purposes, FX is entitled to the benefits of the U.S.-country T income tax treaty because FX is subject to tax in country T as a resident corporation. On January 1, 1996, FP contributes \$10,000,000 to FX in exchange for an instrument denominated as preferred stock that pays a dividend of 7 percent and that must be redeemed by FX in seven years. For U.S. tax purposes, the preferred stock is a partnership interest. On July 1, 1996, FX makes a loan of \$10,000,000 to DS in exchange for a 7-year note paying interest at 6 percent.

(ii) Because FX is required to redeem the partnership interest at a specified time, the partnership interest constitutes a financing transaction within the meaning of paragraph (a)(2)(ii)(A)(2) of this section. Moreover, because the FX-DS note is a financing transaction within the meaning of paragraph (a)(2)(ii)(A)(I) of this section, together the transactions constitute a financing arrangement within the meaning of (a)(2)(i) of this section. Payments of interest made directly by DS to FP and FP1 would not be eligible for the portfolio interest exemption and would not be entitled to a reduction in withholding tax pursuant to a tax treaty. Therefore, there is a significant reduction in tax resulting from the participation of FX in the financing arrangement, which is evidence that the participation of FX in the financing arrangement is pursuant to a tax avoidance plan. However, other facts relevant to the existence of such a plan must also be taken into account.

Example 16. Significant reduction of tax. (i) FP owns a 10 percent interest in the profits and capital of FX, a partnership organized in country N. The other 90 percent interest in FX is owned by G, an unrelated corporation that is organized in country T. FX is not engaged in business in the United States. On January 1, 1996, FP contributes \$10,000,000 to FX in exchange for an instrument documented as perpetual subordinated debt that

provides for quarterly interest payments at 9 percent per annum. Under the terms of the instrument, payments on the perpetual subordinated debt do not otherwise affect the allocation of income between the partners. FP has the right to require the liquidation of FX if FX fails to make an interest payment. For U.S. tax purposes, the perpetual subordinated debt is treated as a partnership interest in FX and the payments on the perpetual subordinated debt constitute guaranteed payments within the meaning of section 707(c). On July 1, 1996, FX makes a loan of \$10,000,000 to DS in exchange for a 7-year note paying interest at 8 percent per annum.

(ii) Because FP has the effective right to force payment of the "interest" on the perpetual subordinated debt, the instrument constitutes a financing transaction within the meaning of paragraph (a)(2)(ii)(A)(2) of this section. Moreover, because the note between FX and DS is a financing transaction within the meaning of paragraph (a)(2)(ii)(A)(I) of this section, together the transactions are a financing arrangement within the meaning of (a)(2)(i) of this section. Without regard to this section, 90 percent of each interest payment received by FX would be treated as exempt from U.S. withholding tax because it is beneficially owned by G, while 10 percent would be subject to a 30 percent withholding tax because beneficially owned by FP. If FP held directly the note issued by DS, 100 percent of the interest payments on the note would have been subject to the 30 percent withholding tax. The significant reduction in the tax imposed by section 881 resulting from the participation of FX in the financing arrangement is evidence that the participation of FX in the financing arrangement is pursuant to a tax avoidance plan. However, other facts relevant to the presence of such a plan must also be taken into account.

Example 17. Time period between transactions. (i) On January 1, 1995, FP lends \$10,000,000 to FS in exchange for a 10-year note that pays no interest annually. When the note matures, FS is obligated to pay \$24,000,000 to FP. On January 1, 1996, FS lends \$10,000,000 to DS in exchange for a 10-year note that pays interest annually at a rate of 10 percent per annum.

(ii) The FS note held by FP and the DS note held by FS are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(I) of this section and together constitute a financing arrangement within the meaning of (a)(2)(i) of this section. Pursuant to paragraph (b)(2)(iii) of this section, the short period of time (twelve months) between the loan by FP to FS and the loan by FS to DS is evidence that the participation of FS in the financing arrangement is pursuant to a tax avoidance plan. However, other facts relevant to the presence of such a plan must also be taken into account.

Example 18. Financing transactions in the ordinary course of business. (i) FP is a holding company. FS is actively engaged in country T in the business of manufacturing and selling product A. DS manufactures product B, a principal component in which is product A. FS' business activity is substantial. On January 1, 1995, FP lends \$100,000,000 to FS to finance FS' business operations. On January 1, 1996, FS ships \$30,000,000 of product A to DS. In return, FS creates an interest-bearing account receivable on its books. FS' shipment is in the ordinary course of the active conduct of its trade or business (which is complementary to DS' trade or business.)

(ii) The loan from FP to FS and the accounts receivable opened by FS for a payment owed by DS are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(I) of this section and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. Pursuant to paragraph (b)(2)(iv) of this section, the fact that DS' liability to FS is created in the ordinary course of the active conduct of DS' trade or business that is complementary to a business actively engaged in by DS is evidence that the participation of FS in the financing arrangement is not pursuant to a tax avoidance plan. However, other facts relevant to the presence of such a plan must also be taken into account.

Example 19. Tax avoidance plan—other factors. (i) On February 1, 1995, FP issues debt in Country N that is in registered form within the meaning of section 881(c)(3)(A). The FP debt would satisfy the requirements of section 881(c) if the debt were issued by a U.S. person and the withholding agent received the certification required by section 871(h)(2)(B)(ii). The purchasers of the debt are financial institutions and there is no reason to believe that they would not furnish Forms W-8. On March 1, 1995, FP lends a portion of the proceeds of the offering to DS.

(ii) The FP debt and the loan to DS are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(I) of this section and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. The owners of the FP debt are the financing entities, FP is the intermediate entity and DS is the financed entity. Interest payments on the debt issued by FP would be subject to withholding tax if the debt were issued by DS, unless DS received all necessary Forms W-8. Therefore, the participation of FP in the financing arrangement potentially reduces the tax imposed by section 881(a). However, because it is reasonable to assume that the purchasers of the FP debt would have provided certifications in order to avoid the withholding tax imposed by section 881, there is not a tax avoidance plan. Accordingly, FP is not a conduit entity.

Example 20. Tax avoidance plan—other factors. (i) Over a period of years, FP has maintained a deposit with BK, a bank organized in the United States, that is unrelated to FP and its subsidiaries. FP often sells goods and purchases raw materials in the United States. FP opened the bank account with BK in order to facilitate this business and the amounts it maintains in the account are reasonably related to its dollar-denominated working capital needs. On January 1, 1995, BK lends \$5,000,000 to DS. After the loan is made, the balance in FP's bank account remains within a range appropriate to meet FP's working capital needs.

(ii) FP's deposit with BK and BK's loan to DS are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(I) of this section and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. Pursuant to section 881(i), interest paid by BK to FP with respect to the bank deposit is exempt from withholding tax. Interest paid directly by DS to FP would not be exempt from withholding tax under section 881(i) and therefore would be subject to a 30% withholding tax. Accordingly, there is a significant reduction in the tax imposed by section 881, which is evidence of the existence of a tax avoidance plan. See paragraph (b)(2)(i) of this section. However, the director of field operations also will consider the fact that FP historically has maintained an account with BK to meet its working capital needs and that, prior to and after BK's loan to DS, the balance within the account remains within a range appropriate to meet those business needs as evidence that the participation of BK in the FP-BK-DS financing arrangement is not pursuant to a tax avoidance plan. In determining the presence or absence of a tax avoidance plan, all relevant facts will be taken into account.

Example 21. Tax avoidance plan—other factors. (i) Assume the same facts as in *Example 20*, except that on January 1, 2000, FP's deposit with BK substantially exceeds FP's expected working capital needs and on January 2, 2000, BK lends additional funds to DS. Assume also that BK's loan to DS provides BK with a right of offset against FP's deposit. Finally, assume that FP would have lent the funds to DS directly but for the imposition of the withholding tax on payments made directly to FP by DS.

(ii) As in *Example 19*, the transactions in paragraph (i) of this *Example 21* are a financing arrangement within the meaning of paragraph (a)(2)(i) and the participation of the BK reduces the section 881 tax. In this case, the presence of funds substantially in excess of FP's working capital needs and the fact that FP would have been willing to lend funds directly to DS if not for the withholding tax are evidence that the participation of BK in the FP-BK-FS financing arrangement is pursuant to a tax avoidance

plan. However, other facts relevant to the presence of such a plan must also be taken into account. Even if the director of field operations determines that the participation of BK in the financing arrangement is pursuant to a tax avoidance plan, BK may not be treated as a conduit entity unless BK would not have participated in the financing arrangement on substantially the same terms in the absence of FP's deposit with BK. BK's right of offset against FP's deposit (a form of guarantee of BK's loan to DS) creates a presumption that BK would not have made the loan to DS on substantially the same terms in the absence of FP's deposit with BK. If the taxpayer overcomes the presumption by clear and convincing evidence, BK will not be a conduit entity.

Example 22. Significant financing activities. (i) FS is responsible for coordinating the financing of all of the subsidiaries of FP, which are engaged in substantial trades or businesses and are located in country T, country N, and the United States. FS maintains a centralized cash management accounting system for FP and its subsidiaries in which it records all intercompany payables and receivables; these payables and receivables ultimately are reduced to a single balance either due from or owing to FS and each of FP's subsidiaries. FS is responsible for disbursing or receiving any cash payments required by transactions between its affiliates and unrelated parties. FS must borrow any cash necessary to meet those external obligations and invests any excess cash for the benefit of the FP group. FS enters into interest rate and foreign exchange contracts as necessary to manage the risks arising from mismatches in incoming and outgoing cash flows. The activities of FS are intended (and reasonably can be expected) to reduce transaction costs and overhead and other fixed costs. FS has 50 employees, including clerical and other back office personnel, located in country T. At the request of DS, on January 1, 1995, FS pays a supplier \$1,000,000 for materials delivered to DS and charges DS an open account receivable for this amount. On February 3, 1995, FS reverses the account receivable from DS to FS when DS delivers to FP goods with a value of \$1,000,000.

(ii) The accounts payable from DS to FS and from FS to other subsidiaries of FP constitute financing transactions within the meaning of paragraph (a)(2)(ii)(A)(1) of this section, and the transactions together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. FS's activities constitute significant financing activities with respect to the financing transactions even though FS did not actively and materially participate in arranging the financing transactions because the financing transactions consisted of trade receivables and trade payables that were ordinary and

necessary to carry on the trades or businesses of DS and the other subsidiaries of FP. Accordingly, pursuant to paragraph (b)(3)(i) of this section, FS' participation in the financing arrangement is presumed not to be pursuant to a tax avoidance plan.

Example 23. Significant financing activities—active risk management. (i) The facts are the same as in Example 22, except that, in addition to its short-term funding needs, DS needs long-term financing to fund an acquisition of another U.S. company; the acquisition is scheduled to close on January 15, 1995. FS has a revolving credit agreement with a syndicate of banks located in Country N. On January 14, 1995, FS borrows ¥10 billion for 10 years under the revolving credit agreement, paying yen LIBOR plus 50 basis points on a quarterly basis. FS enters into a currency swap with BK, an unrelated bank that is not a member of the syndicate, under which FS will pay BK ¥10 billion and will receive \$100 million on January 15, 1995; these payments will be reversed on January 15, 2004. FS will pay BK U.S. dollar LIBOR plus 50 basis points on a notional principal amount of \$100 million semi-annually and will receive yen LIBOR plus 50 basis points on a notional principal amount of ¥10 billion quarterly. Upon the closing of the acquisition on January 15, 1995, DS borrows \$100 million from FS for 10 years, paying U.S. dollar LIBOR plus 50 basis points semiannually.

(ii) Although FS performs significant financing activities with respect to certain financing transactions to which it is a party, FS does not perform significant financing activities with respect to the financing transactions between FS and the syndicate of banks and between FS and DS because FS has eliminated all material market risks arising from those financing transactions through its currency swap with BK. Accordingly, the financing arrangement does not benefit from the presumption of paragraph (b)(3)(i) of this section and the director of field operations must determine whether the participation of FS in the financing arrangement is pursuant to a tax avoidance plan on the basis of all the facts and circumstances. However, if additional facts indicated that FS reviews its currency swaps daily to determine whether they are the most cost efficient way of managing their currency risk and, as a result, frequently terminates swaps in favor of entering into more cost efficient hedging arrangements with unrelated parties, FS would be considered to perform significant financing activities and FS' participation in the financing arrangements would not be pursuant to a tax avoidance plan.

Example 24. Significant financing activities—presumption rebutted. (i) The facts are the same as in Example 22, except that, on January 1, 1995, FP lends to FS DM 15,000,000 (worth \$10,000,000) in exchange for a 10 year note that pays interest annually at a rate of

5 percent per annum. Also, on March 15, 1995, FS lends \$10,000,000 to DS in exchange for a 10-year note that pays interest annually at a rate of 8 percent per annum. FS would not have had sufficient funds to make the loan to DS without the loan from FP. FS does not enter into any long-term hedging transaction with respect to these financing transactions, but manages the interest rate and currency risk arising from the transactions on a daily, weekly or quarterly basis by entering into forward currency contracts.

(ii) Because FS performs significant financing activities with respect to the financing transactions between FS, DS and FP, the participation of FS in the financing arrangement is presumed not to be pursuant to a tax avoidance plan. The director of field operations may rebut this presumption by establishing that the participation of FS is pursuant to a tax avoidance plan, based on all the facts and circumstances. The mere fact that FS is a resident of country T is not sufficient to establish the existence of a tax avoidance plan. However, the existence of a plan can be inferred from other factors in addition to the fact that FS is a resident of country T. For example, the loans are made within a short time period and FS would not have been able to make the loan to DS without the loan from FP.

Example 25. Determination of amount of tax liability. (i) On January 1, 1996, FP makes two three-year installment loans of \$250,000 each to FS that pay interest at a rate of 9 percent per annum. The loans are self-amortizing with payments on each loan of \$7,950 per month. On the same date, FS lends \$1,000,000 to DS in exchange for a two-year note that pays interest semi-annually at a rate of 10 percent per annum, beginning on June 30, 1996. The FS-DS loan is not self-amortizing. Assume that for the period of January 1, 1996 through June 30, 1996, the average principal amount of the financing transactions between FP and FS that comprise the financing arrangement is \$469,319. Further, assume that for the period of July 1, 1996 through December 31, 1996, the average principal amount of the financing transactions between FP and FS is \$393,632. The average principal amount of the financing transaction between FS and DS for the same periods is \$1,000,000. The director of field operations determines that the financing transactions between FP and FS, and FS and DS, are a conduit financing arrangement.

(ii) Pursuant to paragraph (d)(1)(i) of this section, the portion of the \$50,000 interest payment made by DS to FS on June 30, 1996, that is recharacterized as a payment to FP is \$23,450 computed as follows: $(\$50,000 \times \$469,319 / \$1,000,000) = \$23,450$. The portion of the interest payment made on December 31, 1996 that is recharacterized as a payment to FP is \$19,650, computed as follows: $(\$50,000 \times \$393,632 / \$1,000,000) = \$19,650$. Furthermore, under

§ 1.1441-3(g), DS is liable for withholding tax at a 30 percent rate on the portion of the \$50,000 payment to FS that is recharacterized as a payment to FP, i.e., \$7,035 with respect to the June 30, 1996 payment and \$5,895 with respect to the December 31, 1996 payment.

Example 26. Determination of principal amount. (i) FP lends DM 5,000,000 to FS in exchange for a ten year note that pays interest semi-annually at a rate of 8 percent per annum. Six months later, pursuant to a tax avoidance plan, FS lends DM 10,000,000 to DS in exchange for a 10 year note that pays interest semi-annually at a rate of 10 percent per annum. At the time FP make its loan to FS, the exchange rate is DM 1.5/\$1. At the time FS makes its loan to DS the exchange rate is DM 1.4/\$1.

(ii) FP's loan to FS and FS' loan to DS are financing transactions and together constitute a financing arrangement. Furthermore, because the participation of FS reduces the tax imposed under section 881 and FS' participation is pursuant to a tax avoidance plan, the financing arrangement is a conduit financing arrangement.

(iii) Pursuant to paragraph (d)(1)(i) of this section, the amount subject to recharacterization is a fraction the numerator of which is the lowest aggregate principal amount advanced and the denominator of which is the principal amount advanced from FS to DS. Because the property advanced in these financing transactions is the same type of fungible property, under paragraph (d)(1)(ii)(A) of this section, both are valued on the date of the last financing transaction. Accordingly, the portion of the payments of interest that is recharacterized is $((DM\ 5,000,000 \times DM\ 1.4/\$1) / (DM\ 10,000,000 \times DM\ 1.4/\$1))$ or 0.5.

(f) *Effective/applicability date.* This section is effective for payments made by financed entities on or after September 11, 1995. This section shall not apply to interest payments covered by section 127(g)(3) of the Tax Reform Act of 1984, and to interest payments with respect to other debt obligations issued prior to October 15, 1984 (whether or not such debt was issued by a Netherlands Antilles corporation). Paragraph (a)(2)(i)(C) and *Example 3* of paragraph (e) of this section apply to payments made on or after December 9, 2011.

[T.D. 8611, 60 FR 41005, Aug. 11, 1995; 60 FR 55312, Oct. 31, 1995; 63 FR 67578, Dec. 8, 1998; T.D. 9562, 76 FR 76896, Dec. 9, 2011; 77 FR 22480, Apr. 16, 2012]

§ 1.881-4 Recordkeeping requirements concerning conduit financing arrangements.

(a) *Scope.* This section provides rules for the maintenance of records concerning certain financing arrangements to which the provisions of § 1.881-3 apply.

(b) *Recordkeeping requirements*—(1) *In general.* Any person subject to the general recordkeeping requirements of section 6001 must keep the permanent books of account or records, as required by section 6001, that may be relevant to determining whether that person is a party to a financing arrangement and whether that financing arrangement is a conduit financing arrangement.

(2) *Application of Sections 6038 and 6038A.* A financed entity that is a reporting corporation within the meaning of section 6038A(a) and the regulations under that section, and any other person that is subject to the recordkeeping requirements of § 1.6038A-3, must comply with those recordkeeping requirements with respect to records that may be relevant to determining whether the financed entity is a party to a financing arrangement and whether that financing arrangement is a conduit financing arrangement. Such records, including records that a person is required to maintain pursuant to paragraph (c) of this section, shall be considered records that are required to be maintained pursuant to section 6038 or 6038A. Accordingly, the provisions of sections 6038 and 6038A (including, without limitation, the penalty provisions thereof), and the regulations under those sections, shall apply to any records required to be maintained pursuant to this section.

(c) *Records to be maintained*—(1) *In general.* An entity described in paragraph (b) of this section shall be required to retain any records containing the following information concerning each financing transaction that the entity knows or has reason to know comprises the financing arrangement—

- (i) The nature (e.g., loan, stock, lease, license) of each financing transaction;
- (ii) The name, address, taxpayer identification number (if any) and country of residence of—

(A) Each person that advanced money or other property, or granted rights to use property;

(B) Each person that was the recipient of the advance or rights; and

(C) Each person to whom a payment was made pursuant to the financing transaction (to the extent that person is a different person than the person who made the advance or granted the rights);

(iii) The date and amount of—

(A) Each advance of money or other property or grant of rights; and

(B) Each payment made in return for the advance or grant of rights;

(iv) The terms of any guarantee provided in conjunction with a financing transaction, including the name of the guarantor; and

(v) In cases where one or both of the parties to a financing transaction are related to each other or another entity in the financing arrangement, the manner in which these persons are related.

(2) *Additional documents.* An entity described in paragraph (b) of this section must also retain all records relating to the circumstances surrounding its participation in the financing transactions and financing arrangements. Such documents may include, but are not limited to—

(i) Minutes of board of directors meetings;

(ii) Board resolutions or other authorizations for the financing transactions;

(iii) Private letter rulings;

(iv) Financial reports (audited or unaudited);

(v) Notes to financial statements;

(vi) Bank statements;

(vii) Copies of wire transfers;

(viii) Offering documents;

(ix) Materials from investment advisors, bankers and tax advisors; and

(x) Evidences of indebtedness.

(3) *Effect of record maintenance requirement.* Record maintenance in accordance with paragraph (b) of this section generally does not require the original creation of records that are ordinarily not created by affected entities. If, however, a document that is actually created is described in this paragraph (c), it is to be retained even if the document is not of a type ordinarily created by the affected entity.

(d) *Effective date.* This section is effective September 11, 1995. This section shall not apply to interest payments covered by section 127(g)(3) of the Tax Reform Act of 1984, and to interest payments with respect to other debt obligations issued prior to October 15, 1984 (whether or not such debt was issued by a Netherlands Antilles corporation).

[T.D. 8611, 60 FR 41014, Aug. 11, 1995]

§ 1.881-5 Exception for certain possessions corporations.

(a) *Scope.* Section 881(b) and this section provide special rules for the application of sections 881 and 884 to certain corporations created or organized in possessions of the United States. Paragraph (g) of this section provides special rules for the application of sections 881 and 884 to corporations created or organized in the United States for purposes of determining tax liability incurred to certain possessions that administer income tax laws that are identical (except for the substitution of the name of the possession for the term “United States” where appropriate) to those in force in the United States. See § 1.884-0(b) for special rules relating to the application of section 884 with respect to possessions of the United States.

(b) *Operative rules.* (1) Corporations described in paragraphs (c) and (d) of this section are not treated as foreign corporations for purposes of section 881. Accordingly, they are exempt from the tax imposed by section 881(a).

(2) For corporations described in paragraph (e) of this section, the rate of tax imposed by section 881(a) on U.S. source dividends received is 10 percent (rather than the generally applicable 30 percent).

(c) *U.S. Virgin Islands and section 931 possessions.* A corporation created or organized in, or under the law of, the U.S. Virgin Islands or a section 931 possession is described in this paragraph (c) for a taxable year when the following conditions are satisfied—

(1) At all times during such taxable year, less than 25 percent in value of the stock of such corporation is beneficially owned (directly or indirectly) by foreign persons;

(2) At least 65 percent of the gross income of such corporation is shown to

the satisfaction of the Commissioner upon examination to be effectively connected with the conduct of a trade or business in such a possession or the United States for the 3-year period ending with the close of the taxable year of such corporation (or for such part of such period as the corporation or any predecessor has been in existence); and

(3) No substantial part of the income of such corporation for the taxable year is used (directly or indirectly) to satisfy obligations to persons who are not bona fide residents of such a possession or the United States.

(d) *Section 935 possessions.* A corporation created or organized in, or under the law of, a section 935 possession is described in this paragraph (d) for a taxable year when the following conditions are satisfied—

(1) At all times during such taxable year, less than 25 percent in value of the stock of such corporation is owned (directly or indirectly) by foreign persons; and

(2) At least 20 percent of the gross income of such corporation is shown to the satisfaction of the Commissioner upon examination to have been derived from sources within such possession for the 3-year period ending with the close of the preceding taxable year of such corporation (or for such part of such period as the corporation has been in existence).

(e) *Puerto Rico.* A corporation created or organized in, or under the law of, Puerto Rico is described in this paragraph (e) for a taxable year when the conditions of paragraphs (c)(1) through (c)(3) of this section are satisfied (using the language “Puerto Rico” instead of “such a possession”).

(f) *Definitions and other rules.* For purposes of this section—

(1) “Section 931 possession” is defined in § 1.931-1(c)(1); and

(2) “Section 935 possession” is defined in § 1.935-1(a)(3)(i).

(3) *Foreign person* means any person other than—

(i) A United States person (as defined in section 7701(a)(30) and the regulations under that section); or

(ii) A person who would be a United States person if references to the United States in section 7701 included

references to a possession of the United States.

(4) *Bona fide resident*—

(i) With respect to a particular possession, means—

(A) An individual who is a bona fide resident of the possession as defined in § 1.937-1; or

(B) A business entity organized under the laws of the possession and taxable as a corporation in the possession; and

(ii) With respect to the United States, means—

(A) An individual who is a citizen or resident of the United States (as defined under section 7701(b)(1)(A)); or

(B) A business entity organized under the laws of the United States or any State that is classified as a corporation for Federal tax purposes under § 301.7701-2(b) of this chapter.

(5) *Source*. The rules of § 1.937-2 will apply for determining whether income is from sources within a possession.

(6) *Effectively connected income*. The rules of § 1.937-3 (other than paragraph (c) of that section) will apply for determining whether income is effectively connected with the conduct of a trade or business in a possession.

(7) *Indirect ownership*. The rules of section 318(a)(2) will apply except that the language “5 percent” will be used instead of “50 percent” in section 318(a)(2)(C).

(g) *Mirror code jurisdictions*. For purposes of applying mirrored section 881 to determine tax liability incurred to a section 935 possession or the U.S. Virgin Islands—

(1) The rules of paragraphs (b) through (d) of this section will not apply; and

(2) A corporation created or organized in, or under the law of, such possession or the United States will not be considered a foreign corporation.

(h) *Example*. The principles of this section are illustrated by the following example:

Example. X is a corporation organized under the law of the U.S. Virgin Islands with a branch located in State F. At least 65 percent of the gross income of X is effectively connected with the conduct of a trade or business in the U.S. Virgin Islands and no substantial part of the income of X for the taxable year is used to satisfy obligations to persons who are not bona fide residents of the United States or the U.S. Virgin Islands.

Seventy-four percent of the stock of X is owned by unrelated individuals who are residents of the United States or the U.S. Virgin Islands. Y, a corporation organized under the law of State D, and Z, a partnership organized under the law of State F, each own 13 percent of the stock of X. A, an unrelated foreign individual, owns 100 percent of the stock of corporation Y. B and C, unrelated foreign individuals, each own a 50 percent interest in partnership Z. Thus, the condition of paragraph (c)(1) of this section is not satisfied, because 26 percent of X is owned indirectly by foreign persons (A, B, and C). Accordingly, X is treated as a foreign corporation for purposes of section 881.

(i) *Effective/applicability dates*. Except as otherwise provided in this paragraph (i), this section applies to payments made in taxable years ending after April 9, 2008. If, on or after April 9, 2008, there takes effect an increase in the Commonwealth of Puerto Rico’s withholding tax generally applicable to dividends paid to United States corporations not engaged in a trade or business in the Commonwealth to a rate greater than 10 percent, the rules of paragraphs (b)(2) and (e) of this section will not apply to dividends received on or after the effective date of the increase. Paragraph (f)(4) of this section applies to payments made after January 31, 2006. Taxpayers may choose to apply paragraph (f)(4) of this section to payments made after October 22, 2004.

[T.D. 9248, 71 FR 5001, Jan. 31, 2006, as amended by T.D. 9391, 73 FR 19359, Apr. 9, 2008; 73 FR 27728, May 14, 2008]

[T.D. 8658, 61 FR 9329, Mar. 8, 1996; 61 FR 15891, Apr. 10, 1996, as amended by T.D. 9281, 71 FR 47448, Aug. 17, 2006; T.D. 9465, 74 FR 49317, Sept. 28, 2009]

§ 1.882-1 Taxation of foreign corporations engaged in U.S. business or of foreign corporations treated as having effectively connected income.

(a) *Segregation of income.* This section applies for purposes of determining the tax of a foreign corporation which at any time during the taxable year is engaged in trade or business in the United States. It also applies for purposes of determining the tax of a foreign corporation which at no time during the taxable year is engaged in trade or business in the United States but has for the taxable year real property income or interest on obligations of the United States which, by reason of section 882 (d) or (e) and § 1.882-2, is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation. A foreign corporation to which this section applies must segregate its gross income for the taxable year into two categories, namely, the income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation and the income which is not effectively connected for the taxable year with the conduct of a trade or business in the

United States by that corporation. A separate tax shall then be determined upon each such category of income, as provided in paragraph (b) of this section. The determination of whether income or gain is or is not effectively connected for the taxable year with the conduct of a trade or business in the United States by the foreign corporation shall be made in accordance with section 864(c) and §§ 1.864-3 through 1.864-7. For purposes of this section income which is effectively connected for the taxable year with the conduct of a trade or business in the United States includes all income which is treated under section 882 (d) or (e) and § 1.882-2 as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by the foreign corporation.

(b) *Imposition of tax—(1) Income not effectively connected with the conduct of a trade or business in the United States.* If a foreign corporation to which this section applies derives during the taxable year from sources within the United States income or gains described in section 881(a) and paragraph (b) or (c) of § 1.881-2 which are not effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation, such income or gains shall be subject to a flat tax of 30 percent of the aggregate amount of such items. This tax shall be determined in the manner, and subject to the same conditions, set forth in § 1.881-2 as though the income or gains were derived by a foreign corporation not engaged in trade or business in the United States during the taxable year, except that in applying paragraph (c) of such section there shall not be taken into account any gains which are taken into account in determining the tax under section 882(a)(1) and subparagraph (2) of this paragraph.

(2) *Income effectively connected with the conduct of a trade or business in the United States—(i) In general.* If a foreign corporation to which this section applies derives income or gains which are effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation, the taxable income or

gains shall, except as provided in §1.871-12, be taxed in accordance with section 11 or, in the alternative, section 1201(a). See sections 11(f) and 882(a)(1). Any income of the foreign corporation which is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation shall not be taken into account in determining either the rate or amount of such tax.

(ii) *Determination of taxable income.* The taxable income for any taxable year for purposes of this subparagraph consists only of the foreign corporation's taxable income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation; and, for this purpose, it is immaterial that the trade or business with which that income is effectively connected is not the same as the trade or business carried on in the United States by that corporation during the taxable year. See example 2 in §1.864-4(b). In determining such taxable income all amounts constituting, or considered to be, gains or losses for the taxable year from the sale or exchange of capital assets shall be taken into account if such gains or losses are effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation.

(iii) *Cross references.* For rules for determining the gross income and deductions for the taxable year, see section 882 (b) and (c)(1) and the regulations thereunder.

(c) *Change in trade or business status.* The principles of paragraph (c) of §1.871-8 shall apply to cases where there has been a change in the trade or business status of a foreign corporation.

(d) *Credits against tax.* The credits allowed by section 32 (relating to tax withheld at source on foreign corporations), section 33 (relating to the foreign tax credit), section 38 (relating to investment in certain depreciable property), section 39 (relating to certain uses of gasoline and lubricating oil), section 40 (relating to expenses of work incentive programs), and section 6042 (relating to overpayments of a tax)

shall be allowed against the tax determined in accordance with this section. However, the credits allowed by sections 33, 38, and 40 shall not be allowed against the flat tax of 30 percent imposed by section 881(a) and paragraph (b)(1) of this section. For special rules applicable in determining the foreign tax credit, see section 906(b) and the regulations thereunder. For the disallowance of certain credits where a return is not filed for the taxable year see section 882(c)(2) and the regulations thereunder.

(e) *Payment of estimated tax.* Every foreign corporation which for the taxable year is subject to tax under section 11 or 1201(a) and this section must make payment of its estimated tax in accordance with section 6154 and the regulations thereunder. In determining the amount of the estimated tax the foreign corporation must treat the tax imposed by section 881(a) and paragraph (b)(1) of this section as though it were a tax imposed by section 11.

(f) *Effective date.* This section applies for taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.882-1 (Revised as of January 1, 1971).

[T.D. 7293, 38 FR 32797, Nov. 28, 1973]

§ 1.882-2 Income of foreign corporations treated as effectively connected with U.S. business.

(a) *Election as to real property income.* A foreign corporation which during the taxable year derives any income from real property which is located in the United States, or derives income from any interest in any such real property, may elect, pursuant to section 882(d) and §1.871-10, to treat all such income as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation. The election may be made whether or not the foreign corporation is engaged in trade or business in the United States during the taxable year for which the election is made or whether or not the corporation has income from real property which for the taxable year is effectively connected with the conduct of a trade or business in the United States, but it may be made only with respect

to income from sources within the United States which, without regard to section 882(d) and § 1.871-10, is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation. The income to which the election applies shall be determined as provided in paragraph (b) of § 1.871-10 and shall be subject to tax in the manner, and subject to the same conditions, provided by section 882(a)(1) and paragraph (b)(2) of § 1.882-1. Section 871(d) (2) and (3) and the provisions of § 1.871-10 thereunder shall apply in respect of an election under section 882(d) in the same manner and to the same extent as they apply in respect of elections under section 871(d).

(b) *Interest on U.S. obligations received by banks organized in possessions.* Interest received from sources within the United States during the taxable year on obligations of the United States by a foreign corporation created or organized in, or under the law of, a possession of the United States and carrying on the banking business in a possession of the United States during the taxable year shall be treated, pursuant to section 882(e) and this paragraph, as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation. This paragraph applies whether or not the foreign corporation is engaged in trade or business in the United States at any time during the taxable year but only with respect to income which, without regard to this paragraph, is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation. Any interest to which this paragraph applies shall be subject to tax in the manner, and subject to the same conditions, provided by section 882(a)(1) and paragraph (b)(2) of § 1.882-1. To the extent that deductions are connected with interest to which this paragraph applies, they shall be treated for purposes of section 882(c)(1) and the regulations thereunder as connected with income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by the foreign corporation. An election by the taxpayer is not re-

quired in respect of the income to which this paragraph applies. For purposes of this paragraph the term "possession of the United States" includes Guam, the Midway Islands, the Panama Canal Zone, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Wake Island.

(c) *Treatment of income.* Any income in respect of which an election described in paragraph (a) of this section is in effect, and any interest to which paragraph (b) of this section applies, shall be treated, for purposes of paragraph (b)(2) of § 1.882-1 and paragraph (a) of § 1.1441-4, as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by the foreign corporation. A foreign corporation shall not be treated as being engaged in trade or business in the United States merely by reason of having such income for the taxable year.

(d) *Effective date.* This section applies for taxable years beginning after December 31, 1966. There are no corresponding rules in this part for taxable years beginning before January 1, 1967.

[T.D. 7293, 38 FR 32798, Nov. 28, 1973]

§ 1.882-3 Gross income of a foreign corporation.

(a) *In general—(1) Inclusions.* The gross income of a foreign corporation for any taxable year includes only (i) the gross income which is derived from sources within the United States and which is not effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation and (ii) the gross income, irrespective of whether such income is derived from sources within or without the United States, which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation. For the determination of the sources of income, see sections 861 through 863, and the regulations thereunder. For the determination of whether income from sources within or without the United States is effectively connected for the taxable year with the conduct of a trade or business in the United States, see sections 864(c) and

882 (d) and (e), §§1.864-3 through 1.864-7, and §1.882-2.

(2) *Exchange transactions.* Even though a foreign corporation which effects certain transactions in the United States in stocks, securities, or commodities during the taxable year may not, by reason of section 864(b)(2) and paragraph (c) or (d) of §1.864-2, be engaged in trade or business in the United States during the taxable year through the effecting of such transactions, nevertheless it shall be required to include in gross income for the taxable year the gains and profits from those transactions to the extent required by paragraph (c) of §1.881-2 or by paragraph (a) of §1.882-1.

(3) *Exclusions.* For exclusions from gross income of a foreign corporation, see §1.883-1.

(b) *Foreign corporations not engaged in U.S. business.* In the case of a foreign corporation which at no time during the taxable year is engaged in trade or business in the United States the gross income shall include only (1) the gross income from sources within the United States which is described in section 881(a) and paragraphs (b) and (c) of §1.881-2, and (2) the gross income from sources within the United States which, by reason of section 882 (d) or (e) and §1.882-2, is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation.

(c) *Foreign corporations engaged in U.S. business.* In the case of a foreign corporation which is engaged in trade or business in the United States at any time during the taxable year, the gross income shall include (1) the gross income from sources within and without the United States which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation, (2) the gross income from sources within the United States which, by reason of section 882 (d) or (e) and §1.882-2, is treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation, and (3) the gross income from sources within the United States which is described in section 881(a) and paragraphs (b) and (c) of §1.881-2 and is not effectively con-

nected for the taxable year with the conduct of a trade or business in the United States by that corporation.

(d) *Effective date.* This section applies for taxable years beginning after December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.882-2 (Revised as of January 1, 1971).

[T.D. 7293, 38 FR 32799, Nov. 28, 1973]

§1.882-4 Allowance of deductions and credits to foreign corporations.

(a) *Foreign corporations—(1) In general.* A foreign corporation that is engaged in, or receives income treated as effectively connected with, a trade or business within the United States is allowed the deductions which are properly allocated and apportioned to the foreign corporation's gross income which is effectively connected, or treated as effectively connected, with its conduct of a trade or business within the United States. The foreign corporation is entitled to credits which are attributable to that effectively connected income. No provision of this section (other than paragraph (b)(2)) shall be construed to deny the credits provided by sections 33, 34 and 852(b)(3)(D)(ii) or the deduction allowed by section 170.

(2) *Return necessary.* A foreign corporation shall receive the benefit of the deductions and credits otherwise allowed to it with respect to the income tax, only if it timely files or causes to be filed with the Philadelphia Service Center, in the manner prescribed in subtitle F, a true and accurate return of its taxable income which is effectively connected, or treated as effectively connected, for the taxable year with the conduct of a trade or business in the United States by that corporation. The deductions and credits allowed such a corporation electing under a tax convention to be subject to tax on a net basis may be obtained by filing a return of income in the manner prescribed in the regulations (if any) under the tax convention or under any other guidance issued by the Commissioner.

(3) *Filing deadline for return.* (i) As provided in paragraph (a)(2) of this section, for purposes of computing the foreign corporation's taxable income for

any taxable year, otherwise allowable deductions (other than that allowed by section 170) and credits (other than those allowed by sections 33, 34 and 852(b)(3)(D)(ii)) will be allowed only if a return for that taxable year is filed by the foreign corporation on a timely basis. For taxable years of a foreign corporation ending after July 31, 1990, whether a return for the current taxable year has been filed on a timely basis is dependent upon whether the foreign corporation filed a return for the taxable year immediately preceding the current taxable year. If a return was filed for that immediately preceding taxable year, or if the current taxable year is the first taxable year of the foreign corporation for which a return is required to be filed, the required return for the current taxable year must be filed within 18 months of the due date as set forth in section 6072 and the regulations under that section, for filing the return for the current taxable year. If no return for the taxable year immediately preceding the current taxable year has been filed, the required return for the current taxable year (other than the first taxable year of the foreign corporation for which a return is required to be filed) must have been filed no later than the earlier of the date which is 18 months after the due date, as set forth in section 6072, for filing the return for the current taxable year or the date the Internal Revenue Service mails a notice to the foreign corporation advising the corporation that the current year tax return has not been filed and that no deductions (other than that allowed under section 170) or credits (other than those allowed under sections 33, 34 and 852(b)(3)(D)(ii)) may be claimed by the taxpayer.

(ii) The filing deadlines set forth in paragraph (a)(3)(i) of this section may be waived if the foreign corporation establishes to the satisfaction of the Commissioner or his or her delegate that the corporation, based on the facts and circumstances, acted reasonably and in good faith in failing to file a U.S. income tax return (including a protective return (as described in paragraph (a)(3)(vi) of this section)). For this purpose, a foreign corporation shall not be considered to have acted

reasonably and in good faith if it knew that it was required to file the return and chose not to do so. In addition, a foreign corporation shall not be granted a waiver unless it cooperates in the process of determining its income tax liability for the taxable year for which the return was not filed. The Commissioner or his or her delegate shall consider the following factors in determining whether the foreign corporation, based on the facts and circumstances, acted reasonably and in good faith in failing to file a U.S. income tax return—

(A) Whether the corporation voluntarily identifies itself to the Internal Revenue Service as having failed to file a U.S. income tax return before the Internal Revenue Service discovers the failure to file;

(B) Whether the corporation did not become aware of its ability to file a protective return (as described in paragraph (a)(3)(vi) of this section) by the deadline for filing a protective return;

(C) Whether the corporation had not previously filed a U.S. income tax return;

(D) Whether the corporation failed to file a U.S. income tax return because, after exercising reasonable diligence (taking into account its relevant experience and level of sophistication), the corporation was unaware of the necessity for filing the return;

(E) Whether the corporation failed to file a U.S. income tax return because of intervening events beyond its control; and

(F) Whether other mitigating or exacerbating factors existed.

(iii) The following examples illustrate the provisions of this section. In all examples, FC is a foreign corporation and uses the calendar year as its taxable year. The examples are as follows:

Example 1. Foreign corporation discloses own failure to file. In Year 1, FC became a limited partner with a passive investment in a U.S. limited partnership that was engaged in a U.S. trade or business. During Year 1 through Year 4, FC incurred losses with respect to its U.S. partnership interest. FC's foreign tax director incorrectly concluded that because it was a limited partner and had only losses from its partnership interest, FC was not required to file a U.S. income tax return. FC's management was aware neither

of FC's obligation to file a U.S. income tax return for those years, nor of its ability to file a protective return for those years. FC had never filed a U.S. income tax return before. In Year 5, FC began realizing a profit rather than a loss with respect to its partnership interest and, for this reason, engaged a U.S. tax advisor to handle its responsibility to file U.S. income tax returns. In preparing FC's income tax return for Year 5, FC's U.S. tax advisor discovered that returns were not filed for Year 1 through Year 4. Therefore, with respect to those years for which applicable filing deadlines in paragraph (a)(3)(i) of this section were not met, FC would be barred by paragraph (a)(2) of this section from claiming any deductions that otherwise would have given rise to net operating losses on returns for those years, and that would have been available as loss carryforwards in subsequent years. At FC's direction, its U.S. tax advisor promptly contacted the appropriate examining personnel and cooperated with the Internal Revenue Service in determining FC's income tax liability, for example, by preparing and filing the appropriate income tax returns for Year 1 through Year 4 and by making FC's books and records available to an Internal Revenue Service examiner. FC has met the standard described in paragraph (a)(3)(ii) of this section for waiver of any applicable filing deadlines in paragraph (a)(3)(i) of this section.

Example 2. Foreign corporation refuses to cooperate. Same facts as in *Example 1*, except that while FC's U.S. tax advisor contacted the appropriate examining personnel and filed the appropriate income tax returns for Year 1 through Year 4, FC refused all requests by the Internal Revenue Service to provide supporting information (for example, books and records) with respect to those returns. Because FC did not cooperate in determining its U.S. tax liability for the taxable years for which an income tax return was not timely filed, FC is not granted a waiver as described in paragraph (a)(3)(ii) of this section of any applicable filing deadlines in paragraph (a)(3)(i) of this section.

Example 3. Foreign corporation fails to file a protective return. Same facts as in *Example 1*, except that in Year 1 through Year 4, FC's tax director also consulted a U.S. tax advisor, who advised FC's tax director that it was uncertain whether U.S. income tax returns were necessary for those years and that FC could protect its right subsequently to claim the loss carryforwards by filing protective returns under paragraph (a)(3)(vi) of this section. FC did not file U.S. income tax returns or protective returns for those years. FC did not present evidence that intervening events beyond FC's control prevented it from filing an income tax return, and there were no other mitigating factors. FC has not met the standard described in paragraph (a)(3)(ii) of this section for waiver of any applicable

filing deadlines in paragraph (a)(3)(i) of this section.

Example 4. Foreign corporation with effectively connected income. In Year 1, FC, a technology company, opened an office in the United States to market and sell a software program that FC had developed outside the United States. FC had minimal business or tax experience internationally, and no such experience in the United States. Through FC's direct efforts, U.S. sales of the software produced income effectively connected with a U.S. trade or business. FC, however, did not file U.S. income tax returns for Year 1 or Year 2. FC's management was aware neither of FC's obligation to file a U.S. income tax return for those years, nor of its ability to file a protective return for those years. FC had never filed a U.S. income tax return before. In January of Year 4, FC engaged U.S. counsel in connection with licensing software to an unrelated U.S. company. U.S. counsel reviewed FC's U.S. activities and advised FC that it should have filed U.S. income tax returns for Year 1 and Year 2. FC immediately engaged a U.S. tax advisor who, at FC's direction, promptly contacted the appropriate examining personnel and cooperated with the Internal Revenue Service in determining FC's income tax liability, for example, by preparing and filing the appropriate income tax returns for Year 1 and Year 2 and by making FC's books and records available to an Internal Revenue Service examiner. FC has met the standard described in paragraph (a)(3)(ii) of this section for waiver of any applicable filing deadlines in paragraph (a)(3)(i) of this section.

Example 5. IRS discovers foreign corporation's failure to file. In Year 1, FC, a technology company, opened an office in the United States to market and sell a software program that FC had developed outside the United States. Through FC's direct efforts, U.S. sales of the software produced income effectively connected with a U.S. trade or business. FC had extensive experience conducting similar business activities in other countries, including making the appropriate tax filings. However, FC's management was aware neither of FC's obligation to file a U.S. income tax return for those years, nor of its ability to file a protective return for those years. FC had never filed a U.S. income tax return before. Despite FC's extensive experience conducting similar business activities in other countries, it made no effort to seek advice in connection with its U.S. tax obligations. FC failed to file either U.S. income tax returns or protective returns for Year 1 and Year 2. In January of Year 4, an Internal Revenue Service examiner asked FC for an explanation of FC's failure to file U.S. income tax returns. FC immediately engaged a U.S. tax advisor, and cooperated with the Internal Revenue Service in determining FC's income tax liability, for example, by

preparing and filing the appropriate income tax returns for Year 1 and Year 2 and by making FC's books and records available to the examiner. FC did not present evidence that intervening events beyond its control prevented it from filing a return, and there were no other mitigating factors. FC has not met the standard described in paragraph (a)(3)(i) of this section for waiver of any applicable filing deadlines in paragraph (a)(3)(i) of this section.

Example 6. Foreign corporation with prior filing history. FC began a U.S. trade or business in Year 1. FC's tax advisor filed the appropriate U.S. income tax returns for Year 1 through Year 6, reporting income effectively connected with FC's U.S. trade or business. In Year 7, FC replaced its tax advisor with a tax advisor unfamiliar with U.S. tax law. FC did not file a U.S. income tax return for any year from Year 7 through Year 10, although it had effectively connected income for those years. FC's management was aware of FC's ability to file a protective return for those years. In Year 11, an Internal Revenue Service examiner contacted FC and asked its chief financial officer for an explanation of FC's failure to file U.S. income tax returns after Year 6. FC immediately engaged a U.S. tax advisor and cooperated with the Internal Revenue Service in determining FC's income tax liability, for example, by preparing and filing the appropriate income tax returns for Year 7 through Year 10 and by making FC's books and records available to the examiner. FC did not present evidence that intervening events beyond its control prevented it from filing a return, and there were no other mitigating factors. FC has not met the standard described in paragraph (a)(3)(i) of this section for waiver of any applicable filing deadlines in paragraph (a)(3)(i) of this section.

(iv) Paragraphs (a)(3)(ii) and (iii) of this section are applicable to open years for which a request for a waiver is filed on or after January 29, 2002.

(v) A foreign corporation which has a permanent establishment, as defined in an income tax treaty between the United States and the foreign corporation's country of residence, in the United States is subject to the filing deadlines set forth in paragraph (a)(3)(i) of this section.

(vi) If a foreign corporation conducts limited activities in the United States in a taxable year which the foreign corporation determines does not give rise to gross income which is effectively connected with the conduct of a trade or business within the United States as defined in sections 882(b) and 864 (b) and (c) and the regulations under those

sections, the foreign corporation may nonetheless file a return for that taxable year on a timely basis under paragraph (a)(3)(i) of this section and thereby protect the right to receive the benefit of the deductions and credits attributable to that gross income if it is later determined, after the return was filed, that the original determination was incorrect. On that timely filed return, the foreign corporation is not required to report any gross income as effectively connected with a United States trade or business or any deductions or credits but should attach a statement indicating that the return is being filed for the reason set forth in this paragraph (a)(3). If the foreign corporation determines that part of the activities which it conducts in the United States in a taxable year gives rise to gross income which is effectively connected with the conduct of a trade or business and part does not, the foreign corporation must timely file a return for that taxable year to report the gross income determined to be effectively connected, or treated as effectively connected, with the conduct of the trade or business within the United States and the deductions and credits attributable to the gross income. In addition, the foreign corporation should attach to that return the statement described in this paragraph (b)(3) with regard to the other activities. The foreign corporation may follow the same procedure if it determines initially that it has no United States tax liability under the provisions of an applicable income tax treaty. In the event the foreign corporation relies on the provisions of an income tax treaty to reduce or eliminate the income subject to taxation, or to reduce the rate of tax, disclosure may be required pursuant to section 6114.

(vii) In order to be eligible for any deductions and credits for purposes of computing the accumulated earnings tax of section 531, a foreign corporation must file a true and accurate return; on a timely basis, in the manner as set forth in paragraph (a) (2) and (3) of this section.

(4) *Return by Internal Revenue Service.* If a foreign corporation has various sources of income within the United States and a return of income has not

been filed, in the manner prescribed by subtitle F, including the filing deadlines set forth in paragraph (a)(3) of this section, the Internal Revenue Service shall:

(i) Cause a return of income to be made,

(ii) Include on the return the income described in §1.882-1 of that corporation from all sources concerning which it has information, and

(iii) Assess the tax and collect it from one or more of those sources of income within the United States, without allowance for any deductions (other than that allowed by section 170) or credits (other than those allowed by sections 33, 34 and 852(b)(3)(D)(ii)).

If the income of the corporation is not effectively connected with, or if the corporation did not receive income that is treated as being effectively connected with, the conduct of a United States trade or business, the tax will be assessed under §1.882-1(b)(1) on a gross basis, without allowance for any deduction (other than that allowed by section 170) or credit (other than the credits allowed by sections 33, 34 and 852(b)(3)(D)(ii)). If the income is effectively connected, or treated as effectively connected, with the conduct of a United States trade or business, tax will be assessed in accordance with either section 11, 55 or 1201(a) without allowance for any deduction (other than that allowed by section 170) or credit (other than the credits allowed by sections 33, 34 and 852(b)(3)(D)(ii)).

(b) *Allowed deductions and credits*—(1) *In general.* Except for the deduction allowed under section 170 for charitable contributions and gifts (see section 882(c)(1)(B)), deductions are allowed to a foreign corporation only to the extent they are connected with gross income which is effectively connected, or treated as effectively connected, with the conduct of a trade or business in the United States. Deductible expenses (other than interest expense) are properly allocated and apportioned to effectively connected gross income in accordance with the rules of §1.861-8. For the method of determining the interest deduction allowed to a foreign corporation, see §1.882-5. Other than the credits allowed by sections 33, 34 and 852(b)(3)(D)(ii), the foreign corporation

is entitled to credits only if they are attributable to effectively connected income. See paragraph (a)(2) of this section for the requirement that a return be filed. Except as provided by section 906, a foreign corporation shall not be allowed the credit against the tax for taxes of foreign countries and possessions of the United States allowed by section 901.

(2) *Verification.* At the request of the Internal Revenue Service, a foreign corporation claiming deductions from gross income which is effectively connected, or treated as effectively connected, with the conduct of a trade or business in the United States or credits which are attributable to that income must furnish at the place designated pursuant to §301.7605-1(a) information sufficient to establish that the corporation is entitled to the deductions and credits in the amounts claimed. All information must be furnished in a form suitable to permit verification of claimed deductions and credits. The Internal Revenue Service may require, as appropriate, that an English translation be provided with any information in a foreign language. If a foreign corporation fails to furnish sufficient information, the Internal Revenue Service may in its discretion disallow any claimed deductions and credits in full or in part. For additional filing requirements and for penalties for failure to provide information, see also section 6038A.

[T.D. 8322, 55 FR 50830, Dec. 11, 1990, as amended by T.D. 8981, 67 FR 4175, Jan. 29, 2002; T.D. 9043, 68 FR 11314, Mar. 10, 2003]

§ 1.882-5 Determination of interest deduction.

(a)(1) *Overview*—(i) *In general.* The amount of interest expense of a foreign corporation that is allocable under section 882(c) to income which is (or is treated as) effectively connected with the conduct of a trade or business within the United States (ECI) is the sum of the interest allocable by the foreign corporation under the three-step process set forth in paragraphs (b), (c), and (d) of this section and the specially allocated interest expense determined under paragraph (a)(1)(ii) of this section. The provisions of this section provide the exclusive rules for allocating

interest expense to the ECI of a foreign corporation under section 882(c). Under the three-step process, the total value of the U.S. assets of a foreign corporation is first determined under paragraph (b) of this section (Step 1). Next, the amount of U.S.-connected liabilities is determined under paragraph (c) of this section (Step 2). Finally, the amount of interest paid or accrued on U.S.-booked liabilities, as determined under paragraph (d)(2) of this section, is adjusted for interest expense attributable to the difference between U.S.-connected liabilities and U.S.-booked liabilities (Step 3). Alternatively, a foreign corporation may elect to determine its interest rate on U.S.-connected liabilities by reference to its U.S. assets, using the separate currency pools method described in paragraph (e) of this section.

(ii) *Direct allocations*—(A) *In general.* A foreign corporation that has a U.S. asset and indebtedness that meet the requirements of § 1.861-10T (b) or (c), as limited by § 1.861-10T(d)(1), shall directly allocate interest expense from such indebtedness to income from such asset in the manner and to the extent provided in § 1.861-10T. For purposes of paragraph (b)(1) or (c)(2) of this section, a foreign corporation that allocates its interest expense under the direct allocation rule of this paragraph (a)(1)(ii)(A) shall reduce the basis of the asset that meets the requirements of § 1.861-10T (b) or (c) by the principal amount of the indebtedness that meets the requirements of § 1.861-10T (b) or (c). The foreign corporation shall also disregard any indebtedness that meets the requirements of § 1.861-10T (b) or (c) in determining the amount of the foreign corporation's liabilities under paragraphs (c)(2) and (d)(2) of this section and shall not take into account any interest expense paid or accrued with respect to such a liability for purposes of paragraph (d) or (e) of this section.

(B) *Partnership interest.* A foreign corporation that is a partner in a partnership that has a U.S. asset and indebtedness that meet the requirements of § 1.861-10T (b) or (c), as limited by § 1.861-10T(d)(1), shall directly allocate its distributive share of interest expense from that indebtedness to its dis-

tributive share of income from that asset in the manner and to the extent provided in § 1.861-10T. A foreign corporation that allocates its distributive share of interest expense under the direct allocation rule of this paragraph (a)(1)(ii)(B) shall disregard any partnership indebtedness that meets the requirements of § 1.861-10T (b) or (c) in determining the amount of its distributive share of partnership liabilities for purposes of paragraphs (b)(1), (c)(2)(vi), and (d)(2)(vii) or (e)(1)(ii) of this section, and shall not take into account any partnership interest expense paid or accrued with respect to such a liability for purposes of paragraph (d) or (e) of this section. For purposes of paragraph (b)(1) of this section, a foreign corporation that directly allocates its distributive share of interest expense under this paragraph (a)(1)(ii)(B) shall—

(1) Reduce the partnership's basis in such asset by the amount of such indebtedness in allocating its basis in the partnership under § 1.884-1(d)(3)(ii); or

(2) Reduce the partnership's income from such asset by the partnership's interest expense from such indebtedness under § 1.884-1(d)(3)(iii).

(2) *Coordination with tax treaties.* Except as expressly provided by or pursuant to a U.S. income tax treaty or accompanying documents (such as an exchange of notes), the provisions of this section provide the exclusive rules for determining the interest expense attributable to the business profits of a permanent establishment under a U.S. income tax treaty.

(3) *Limitation on interest expense.* In no event may the amount of interest expense computed under this section exceed the amount of interest on indebtedness paid or accrued by the taxpayer within the taxable year (translated into U.S. dollars at the weighted average exchange rate for each currency prescribed by § 1.989(b)-1 for the taxable year).

(4) *Translation convention for foreign currency.* For each computation required by this section, the taxpayer shall translate values and amounts into the relevant currency at a spot rate or a weighted average exchange rate consistent with the method such taxpayer uses for financial reporting

purposes, provided such method is applied consistently from year to year. Interest expense paid or accrued, however, shall be translated under the rules of §1.988-2. The director of field operations or the Assistant Commissioner (International) may require that any or all computations required by this section be made in U.S. dollars if the functional currency of the taxpayer's home office is a hyperinflationary currency, as defined in §1.985-1, and the computation in U.S. dollars is necessary to prevent distortions.

(5) *Coordination with other sections.* Any provision that disallows, defers, or capitalizes interest expense applies after determining the amount of interest expense allocated to ECI under this section. For example, in determining the amount of interest expense that is disallowed as a deduction under section 265 or 163(j), deferred under section 163(e)(3) or 267(a)(3), or capitalized under section 263A with respect to a United States trade or business, a taxpayer takes into account only the amount of interest expense allocable to ECI under this section.

(6) *Special rule for foreign governments.* The amount of interest expense of a foreign government, as defined in §1.892-2T(a), that is allocable to ECI is the total amount of interest paid or accrued within the taxable year by the United States trade or business on U.S. booked liabilities (as defined in paragraph (d)(2) of this section). Interest expense of a foreign government, however, is not allocable to ECI to the extent that it is incurred with respect to U.S. booked liabilities that exceed 80 percent of the total value of U.S. assets for the taxable year (determined under paragraph (b) of this section). This paragraph (a)(6) does not apply to controlled commercial entities within the meaning of §1.892-5T.

(7) *Elections under §1.882-5—(i) In general.* A corporation must make each election provided in this section on the corporation's original timely filed Federal income tax return for the first taxable year it is subject to the rules of this section. An amended return does not qualify for this purpose, nor shall the provisions of §301.9100-1 of this chapter and any guidance promulgated

thereunder apply. Except as provided elsewhere in this section, each election under this section, whether an election for the first taxable year or a subsequent change of election, shall be made by indicating the method used on Schedule I (Form 1120-F) attached to the corporation's timely filed return. An elected method (other than the fair market value method under paragraph (b)(2)(ii) of this section, or the annual 30-day London Interbank Offered Rate (LIBOR) election in paragraph (d)(5)(ii) of this section) must be used for a minimum period of five years before the taxpayer may elect a different method. To change an election before the end of the requisite five-year period, a taxpayer must obtain the consent of the Commissioner or his delegate. The Commissioner or his delegate will generally consent to a taxpayer's request to change its election only in rare and unusual circumstances. After the five-year minimum period, an elected method may be changed for any subsequent year on the foreign corporation's original timely filed tax return for the first year to which the changed election applies.

(ii) *Failure to make the proper election.* If a taxpayer, for any reason, fails to make an election provided in this section in a timely fashion, the Director of Field Operations may make any or all of the elections provided in this section on behalf of the taxpayer, and such elections shall be binding as if made by the taxpayer.

(iii) *Step 2 special election for banks.* For the first taxable year for which an original income tax return is due (including extensions) after August 17, 2006, in which a taxpayer that is a bank as described in paragraph (c)(4) of this section is subject to the requirements of this section, a taxpayer may make a new election to use the fixed ratio on an original timely filed return. A new fixed ratio election may be made in any subsequent year subject to the timely filing and five-year minimum period requirements of paragraph (a)(7)(i) of this section. A new fixed ratio election under this paragraph (a)(7)(iii) is subject to the adjusted basis or fair market value conforming election requirements of paragraph (b)(2)(ii)(A)(2) of this section and may

not be made if a taxpayer elects or maintains a fair market value election for purposes of paragraph (b) of this section. Taxpayers that already use the fixed ratio method under an existing election may continue to use the new fixed ratio at the higher percentage without having to make a new five-year election in the first year that the higher percentage is effective.

(8) *Examples.* The following examples illustrate the application of paragraph (a) of this section:

Example 1. Direct allocations. (i) *Facts:* *FC* is a foreign corporation that conducts business through a branch, *B*, in the United States. Among *B*'s U.S. assets is an interest in a partnership, *P*, that is engaged in airplane leasing solely in the U.S. *FC* contributes 200× to *P* in exchange for its partnership interest. *P* incurs qualified nonrecourse indebtedness within the meaning of § 1.861-10T to purchase an airplane. *FC*'s share of the liability of *P*, as determined under section 752, is 800×.

(ii) *Analysis:* Pursuant to paragraph (a)(1)(ii)(B) of this section, *FC* is permitted to directly allocate its distributive share of the interest incurred with respect to the qualified nonrecourse indebtedness to *FC*'s distributive share of the rental income generated by the airplane. A liability the interest on which is allocated directly to the income from a particular asset under paragraph (a)(1)(ii)(B) of this section is disregarded for purposes of paragraphs (b)(1), (c)(2)(vi), and (d)(2)(vii) or (e)(1)(ii) of this section. Consequently, for purposes of determining the value of *FC*'s assets under paragraphs (b)(1) and (c)(2)(vi) of this section, *FC*'s basis in *P* is reduced by the 800× liability as determined under section 752, but is not increased by the 800× liability that is directly allocated under paragraph (a)(1)(ii)(B) of this section. Similarly, pursuant to paragraph (a)(1)(ii)(B) of this section, the 800× liability is disregarded for purposes of determining *FC*'s liabilities under paragraphs (c)(2)(vi) and (d)(2)(vii) of this section.

Example 2. Limitation on interest expense. (i) *FC* is a foreign corporation that conducts a real estate business in the United States. In its 1997 tax year, *FC* has no outstanding indebtedness, and therefore incurs no interest expense. *FC* elects to use the 50% fixed ratio under paragraph (c)(4) of this section.

(ii) Under paragraph (a)(3) of this section, *FC* is not allowed to deduct any interest expense that exceeds the amount of interest on indebtedness paid or accrued in that taxable year. Since *FC* incurred no interest expense in taxable year 1997, *FC* will not be entitled to any interest deduction for that year under § 1.882-5, notwithstanding the fact that *FC* has elected to use the 50% fixed ratio.

Example 3. Coordination with other sections.

(i) *FC* is a foreign corporation that is a bank under section 585(a)(2) and a financial institution under section 265(b)(5). *FC* is a calendar year taxpayer, and operates a U.S. branch, *B*. Throughout its taxable year 1997, *B* holds only two assets that are U.S. assets within the meaning of paragraph (b)(1) of this section. *FC* does not make a fair-market value election under paragraph (b)(2)(ii) of this section, and, therefore, values its U.S. assets according to their bases under paragraph (b)(2)(i) of this section. The first asset is a taxable security with an adjusted basis of \$100. The second asset is an obligation the interest on which is exempt from federal taxation under section 103, with an adjusted basis of \$50. The tax-exempt obligation is not a qualified tax-exempt obligation as defined by section 265(b)(3)(B).

(ii) *FC* calculates its interest expense under § 1.882-5 to be \$12. Under paragraph (a)(5) of this section, however, a portion of the interest expense that is allocated to *FC*'s effectively connected income under § 1.882-5 is disallowed in accordance with the provisions of section 265(b). Using the methodology prescribed under section 265, the amount of disallowed interest expense is \$4, calculated as follows:

$$\$12 \times \frac{\$50 \text{ Tax-exempt U.S. assets}}{\$150 \text{ Total U.S. assets}} = \$4$$

(iii) Therefore, *FC* deducts a total of \$8 (\$12-\$4) of interest expense attributable to its effectively connected income in 1997.

Example 4. Treaty exempt asset. (i) *FC* is a foreign corporation, resident in Country X, that is actively engaged in the banking business in the United States through a permanent establishment, *B*. The income tax treaty in effect between Country X and the United States provides that *FC* is not taxable on foreign source income earned by its U.S. permanent establishment. In its 1997 tax year, *B* earns \$90 of U.S. source income from U.S. assets with an adjusted tax basis of \$900, and \$12 of foreign source interest income from U.S. assets with an adjusted tax basis of \$100. *FC*'s U.S. interest expense deduction, computed in accordance with § 1.882-5, is \$500.

(ii) Under paragraph (a)(5) of this section, *FC* is required to apply any provision that disallows, defers, or capitalizes interest expense after determining the interest expense allocated to ECI under § 1.882-5. Section 265(a)(2) disallows interest expense that is allocable to one or more classes of income that are wholly exempt from taxation under subtitle A of the Internal Revenue Code. Section 1.265-1(b) provides that income wholly exempt from taxes includes both income excluded from tax under any provision of subtitle A and income wholly exempt from taxes under any other law. Section 894 specifies

Internal Revenue Service, Treasury

§ 1.882-5

that the provisions of subtitle A are applied with due regard to any relevant treaty obligation of the United States. Because the treaty between the United States and Country X exempts foreign source income earned by B from U.S. tax, FC has assets that produce income wholly exempt from taxes

under subtitle A, and must therefore allocate a portion of its §1.882-5 interest expense to its exempt income. Using the methodology prescribed under section 265, the amount of disallowed interest expense is \$50, calculated as follows:

$$\$500 \times \frac{\$100 \text{ Treaty-exempt U.S. assets}}{\$1000 \text{ Total U.S. assets}} = \$50$$

(iii) Therefore, FC deducts a total of \$450 (\$500-\$50) of interest expense attributable to its effectively connected income in 1997.

(b) *Step 1: Determination of total value of U.S. assets for the taxable year—(1) Classification of an asset as a U.S. asset—*

(i) *General rule.* Except as otherwise provided in this paragraph (b)(1), an asset is a U.S. asset for purposes of this section to the extent that it is a U.S. asset under §1.884-1(d). For purposes of this section, the term *determination date*, as used in §1.884-1(d), means each day for which the total value of U.S. assets is computed under paragraph (b)(3) of this section.

(ii) *Items excluded from the definition of U.S. asset.* For purposes of this section, the term *U.S. asset* excludes an asset to the extent it produces income or gain described in sections 883 (a)(3) and (b).

(iii) *Items included in the definition of U.S. asset.* For purposes of this section, the term *U.S. asset* includes—

(A) U.S. real property held in a wholly-owned domestic subsidiary of a foreign corporation that qualifies as a bank under section 585(a)(2)(B) (without regard to the second sentence thereof), provided that the real property would qualify as used in the foreign corporation's trade or business within the meaning of §1.864-4(c) (2) or (3) if held directly by the foreign corporation and either was initially acquired through foreclosure or similar proceedings or is U.S. real property occupied by the foreign corporation (the value of which shall be adjusted by the amount of any indebtedness that is reflected in the value of the property);

(B) An asset that produces income treated as ECI under section 921(d) or 926(b) (relating to certain income of a

FSC and certain dividends paid by a FSC to a foreign corporation);

(C) An asset that produces income treated as ECI under section 953(c)(3)(C) (relating to certain income of a captive insurance company that a corporation elects to treat as ECI) that is not otherwise ECI; and

(D) An asset that produces income treated as ECI under section 882(e) (relating to certain interest income of possessions banks).

(iv) *Interbranch transactions.* A transaction of any type between separate offices or branches of the same taxpayer does not create a U.S. asset.

(v) *Assets acquired to increase U.S. assets artificially.* An asset shall not be treated as a U.S. asset if one of the principal purposes for acquiring or using that asset is to increase artificially the U.S. assets of a foreign corporation on the determination date. Whether an asset is acquired or used for such purpose will depend upon all the facts and circumstances of each case. Factors to be considered in determining whether one of the principal purposes in acquiring or using an asset is to increase artificially the U.S. assets of a foreign corporation include the length of time during which the asset was used in a U.S. trade or business, whether the asset was acquired from a related person, and whether the aggregate value of the U.S. assets of the foreign corporation increased temporarily on or around the determination date. A purpose may be a principal purpose even though it is outweighed by other purposes (taken together or separately).

(2) *Determination of the value of a U.S. asset—(i) General rule.* The value of a U.S. asset is the adjusted basis of the

asset for determining gain or loss from the sale or other disposition of that item, further adjusted as provided in paragraph (b)(2)(iii) of this section.

(ii) *Fair-market value election*—

(A) *In general*—(1) *Fair market value conformity requirement.* A taxpayer may elect to value all of its U.S. assets on the basis of fair market value, subject to the requirements of §1.861-9T(g)(1)(iii), and provided the taxpayer is eligible and uses the actual ratio method under paragraph (c)(2) of this section and the methodology prescribed in §1.861-9T(h). Once elected, the fair market value must be used by the taxpayer for both Step 1 and Step 2 described in paragraphs (b) and (c) of this section, and must be used in all subsequent taxable years unless the Commissioner or his delegate consents to a change.

(2) *Conforming election requirement.* Taxpayers that as of the effective date of this paragraph (b)(2)(ii)(A)(2) have elected and currently use both the fair market value method for purposes of paragraph (b) of this section and a fixed ratio for purposes of paragraph (c)(4) of this section must conform either the adjusted basis or fair market value methods in Step 1 and Step 2 of the allocation formula by making an adjusted basis election for paragraph (b) of this section purposes while continuing the fixed ratio for Step 2, or by making an actual ratio election under paragraph (c)(2) of this section while remaining on the fair market value method under paragraph (b) of this section. Taxpayers who elect to conform Step 1 and Step 2 of the formula to the adjusted basis method must remain on both methods for the minimum five-year period in accordance with the provisions of paragraph (a)(7) of this section. Taxpayers that elect to conform Step 1 and Step 2 of the formula to the fair market value method must remain on the actual ratio method until the consent of the Commissioner or his delegate is obtained to switch to the adjusted basis method. If consent to use the adjusted basis method in Step 1 is granted in a later year, the taxpayer must remain on the actual ratio method for the minimum five-year period unless consent to use the fixed ratio is independently obtained under the re-

quirements of paragraph (a)(7) of this section. For the first taxable year for which an original income tax return is due (including extensions) after August 17, 2006, taxpayers that are required to make a conforming election under this paragraph (b)(2)(ii)(A)(2), may do so on an original timely filed return. If a conforming election is not made within the timeframe provided in this paragraph, the Director of Field Operations or his delegate may make the conforming elections in accordance with the provisions of paragraph (a)(7)(ii) of this section.

(B) *Adjustment to partnership basis.* If a partner makes a fair market value election under paragraph (b)(2)(ii) of this section, the value of the partner's interest in a partnership that is treated as an asset shall be the fair market value of his partnership interest, increased by the fair market value of the partner's share of the liabilities determined under paragraph (c)(2)(vi) of this section. See §1.884-1(d)(3).

(iii) *Reduction of total value of U.S. assets by amount of bad debt reserves under section 585*—(A) *In general.* The total value of loans that qualify as U.S. assets shall be reduced by the amount of any reserve for bad debts additions to which are allowed as deductions under section 585.

(B) *Example.* The following example illustrates the provisions of paragraph (b)(2)(iii)(A) of this section:

Example. Foreign banks; bad debt reserves. FC is a foreign corporation that qualifies as a bank under section 585(a)(2)(B) (without regard to the second sentence thereof), but is not a large bank as defined in section 585(c)(2). FC conducts business through a branch, B, in the United States. Among B's U.S. assets are a portfolio of loans with an adjusted basis of \$500. FC accounts for its bad debts for U.S. federal income tax purposes under the reserve method, and B maintains a deductible reserve for bad debts of \$50. Under paragraph (b)(2)(iii) of this section, the total value of FC's portfolio of loans is \$450 (\$500 - \$50).

(3) *Computation of total value of U.S. assets*—(1) *General rule.* The total value of U.S. assets for the taxable year is the average of the sums of the values (determined under paragraph (b)(2) of this section) of U.S. assets. For each U.S. asset, value shall be computed at the most frequent regular intervals for

which data are reasonably available. In no event shall the value of any U.S. asset be computed less frequently than monthly (beginning of taxable year and monthly thereafter) by a large bank (as defined in section 585(c)(2)) or a dealer in securities (within the meaning of section 475) and semi-annually (beginning, middle and end of taxable year) by any other taxpayer.

(ii) *Adjustment to basis of financial instruments.* For purposes of determining the total average value of U.S. assets in this paragraph (b)(3), the value of a security or contract that is marked to market pursuant to section 475 or section 1256 shall be determined as if each determination date is the most frequent regular interval for which data are reasonably available that reflects the taxpayer's consistent business practices for reflecting mark-to-market valuations on its books and records.

(c) *Step 2: Determination of total amount of U.S.-connected liabilities for the taxable year*—(1) *General rule.* The amount of U.S.-connected liabilities for the taxable year equals the total value of U.S. assets for the taxable year (as determined under paragraph (b)(3) of this section) multiplied by the actual ratio for the taxable year (as determined under paragraph (c)(2) of this section) or, if the taxpayer has made an election in accordance with paragraph (c)(4) of this section, by the fixed ratio.

(2) *Computation of the actual ratio*—(i) *In general.* A taxpayer's actual ratio for the taxable year is the total amount of its worldwide liabilities for the taxable year divided by the total value of its worldwide assets for the taxable year. The total amount of worldwide liabilities and the total value of worldwide assets for the taxable year is the average of the sums of the amounts of the taxpayer's worldwide liabilities and the values of its worldwide assets (determined under paragraphs (c)(2) (iii) and (iv) of this section). In each case, the sums must be computed semi-annually (beginning, middle and end of taxable year) by a large bank (as defined in section 585(c)(2)) and annually (beginning and end of taxable year) by any other taxpayer.

(ii) *Classification of items.* The classification of an item as a liability or an asset must be consistent from year to year and in accordance with U.S. tax principles.
