

Proclamation 9106 of April 21, 2014**Earth Day, 2014**

*By the President of the United States of America
A Proclamation*

Over four decades ago, Americans from all walks of life came together to tackle a shared challenge. Pollution damaged our health and livelihoods—from children swimming in contaminated streams to workers exposed to dangerous chemicals to city residents living under a thick haze of smog. The first Earth Day was a call to action for every citizen, every family, and every public official. It gave voice to the conservation movement, led to the creation of the Environmental Protection Agency, and pushed our Nation to adopt landmark laws on clean air and water. This Earth Day, we remember that when Americans unite in common purpose, we can overcome any obstacle.

Today, we face another problem that threatens us all. The overwhelming judgment of science tells us that climate change is altering our planet in ways that will have profound impacts on all of humankind. Already, longer wildfire seasons put first responders at greater risk. Farmers must cope with increased soil erosion following heavy downpours and greater stresses from weeds, plant diseases, and insect pests. Increasingly severe weather patterns strain infrastructure and damage our communities, especially low-income communities, which are disproportionately vulnerable and have few resources to prepare. The consequences of climate change will only grow more dire in the years to come.

That is why, last year, I took executive action to prepare our Nation for the impacts of climate change. As my Administration works to build a more resilient country, we also remain committed to averting the most catastrophic effects. Since I took office, America has increased the electricity it produces from solar energy by more than tenfold, tripled the electricity it generates from wind energy, and brought carbon pollution to its lowest levels in nearly two decades. In the international community, we are working with our partners to reduce greenhouse gas emissions around the globe. Along with States, utilities, health groups, and advocates, we will develop commonsense and achievable carbon pollution standards for our biggest pollution source—power plants.

We are also taking on environmental challenges by increasing fuel efficiency, restoring public lands, and curbing emissions of mercury and other toxic chemicals. We are safeguarding the water our families drink and the waterways and oceans that sustain our livelihoods. This February, we proposed new standards to protect farm workers from dangerous pesticides. And because caring for our planet requires commitment from all of us, we are engaging organizations, businesses, and individuals in these efforts.

As we mark this observance, let us reflect on the mission of the first Earth Day and recall our power to forge a cleaner, healthier future. Let us accept our responsibilities to future generations and meet today's tests with the same energy, passion, and sense of purpose.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and

Proclamations

Proc. 9107

the laws of the United States, do hereby proclaim April 22, 2014, as Earth Day. I encourage all Americans to participate in programs and activities that will protect our environment and contribute to a healthy, sustainable future.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of April, in the year of our Lord two thousand fourteen, and of the Independence of the United States of America the two hundred and thirty-eighth.

BARACK OBAMA

Proclamation 9107 of April 25, 2014

Workers Memorial Day, 2014

*By the President of the United States of America
A Proclamation*

America is built on the promise of opportunity. We believe that everyone should have a chance to succeed, that what matters is the strength of our work ethic, the scope of our dreams, and our willingness to take responsibility for ourselves and each other. Yet each year, workplace illness and injury threaten that promise for millions of Americans, and even more tragically, thousands die on the job. This is unacceptable. On Workers Memorial Day, we honor those we have lost, and in their memory, affirm everyone's right to a safe workplace.

With grit and determination, the American labor force has propelled our Nation through times of hardship and war, and it laid the foundation for tremendous economic growth. Workers risked life and limb to turn the gears of the Industrial Revolution, raise our first skyscrapers, and lay railroad track that connected our country from coast to coast. The injured, as well as families of the dead, received little or no compensation.

It was only after decades of organizing, unionizing, and public pressure that workers won many of the rights we take for granted today. Finally, with the Occupational Safety and Health Act of 1970, the Federal Government required employers to provide basic safety equipment. Just 1 year prior, the Federal Coal Mine Health and Safety Act of 1969 established comprehensive safety and health standards for coal mines, increased Federal enforcement powers, and provided compensation to miners with black lung.

My Administration remains dedicated to building on this progress. We are improving standards to protect workers from black lung and reduce their exposure to dangerous substances. We are helping employers provide safe workplaces and holding those who risk workers' lives and health accountable. And we are empowering workers with information so they can stay safe on the job.

We must never accept that injury, illness, or death is the cost of doing business. Workers are the backbone of our economy, and no one's prosperity should come at the expense of their safety. Today, let us celebrate our
