

Agricultural Marketing Service, USDA

§ 1033.7

WEST VIRGINIA COUNTIES

Barbour, Boone, Brooke, Cabell, Calhoun, Doddridge, Fayette, Gilmer, Hancock, Harrison, Jackson, Kanawha, Lewis, Lincoln, Logan, Marion, Marshall, Mason, Mingo, Monongalia, Ohio, Pleasants, Preston, Putnam, Raleigh, Randolph, Ritchie, Roane, Taylor, Tucker, Tyler, Upshur, Wayne, Wetzell, Wirt, Wood, and Wyoming.

§ 1033.3 Route disposition.

See § 1000.3.

§ 1033.4 Plant.

See § 1000.4.

§ 1033.5 Distributing plant.

See § 1000.5.

§ 1033.6 Supply plant.

See § 1000.6.

§ 1033.7 Pool plant.

Pool plant means a plant, unit of plants, or system of plants as specified in paragraphs (a) through (f) of this section, or a plant specified in paragraph (j) of this section, but excluding a plant specified in paragraph (h) of this section. The pooling standards described in paragraphs (c) through (f) of this section are subject to modification pursuant to paragraph (g) of this section:

(a) A distributing plant, other than a plant qualified as a pool plant pursuant to paragraph (b) of this section or § 1033.7(b) of any other Federal milk order, from which during the month 30 percent or more of the total quantity of fluid milk products physically received at the plant (excluding concentrated milk received from another plant by agreement for other than class I use) are disposed of as route disposition or are transferred in the form of packaged fluid milk products to other distributing plants. At least 25 percent of such route disposition and transfers must be to outlets in the marketing area. Plants located within the marketing area that meet the 30 percent route disposition standard contained above, and have combined route disposition and transfers of at least 50 percent into Federal order marketing areas will be regulated as a distributing plant in this order.

(b) Any distributing plant located in the marketing area which during the month processed at least 30 percent of the total quantity of fluid milk products physically received at the plant (excluding concentrated milk received from another plant by agreement for other than Class I use) into ultra-pasteurized or aseptically-processed fluid milk products.

(c) A supply plant from which the quantity of bulk fluid milk products shipped to, received at, and physically unloaded into plants described in paragraph (a) or (b) of this section as a percent of the Grade A milk received at the plant from dairy farmers (except dairy farmers described in § 1033.12(b)) and handlers described in § 1000.9(c), as reported in § 1033.30(a), is not less than 40 percent of the milk received from dairy farmers, including milk diverted pursuant to § 1033.13, subject to the following conditions:

(1) Qualifying shipments pursuant to this paragraph may be made to the following plants, except whenever the authority provided in paragraph (g) of this section is applied to increase the shipping requirements specified in this section, only shipments to pool plants described in § 1033.7(a) and (b), shall count as qualifying shipments for the purpose of meeting the increased shipments:

(i) Pool plants described in § 1033.7(a) and (b);

(ii) Plants of producer-handlers;

(iii) Partially regulated distributing plants, except that credit for such shipments shall be limited to the amount of such milk classified as Class I at the transferee plant.

(2) The operator of a supply plant located within the marketing area may include deliveries to pool distributing plants directly from farms of producers pursuant to § 1033.13(c) as up to 90 percent of the supply plant's qualifying shipments. Handlers may not use shipments pursuant to § 1033.13(c) to qualify plants located outside the marketing area.

(3) Concentrated milk transferred from the supply plant to a distributing plant for an agreed-upon use other than Class I shall be excluded from the supply plant's shipments in computing the supply plant's shipping percentage.
