

(c) *Pork or pork products.* The pork or pork products must be accompanied by a certification issued by a full-time salaried veterinary officer of the national government of the region of export. Upon arrival of the pork or pork products in the United States, the certification must be presented to an authorized inspector at the port of arrival. The certification must identify both the exporting region and the region of origin of the pork or pork products as a region listed under §§94.9 and 94.10 as free of CSF at the time the pork or pork products were in the region and must state that:

(1) The pork or pork products were derived from swine that were born and raised in a region listed under §§94.9 and 94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the regulations in §327.2 of this title;

(2) The pork or pork products were derived from swine that have not lived in a region classified under §§94.9 and 94.10 as a region in which CSF is known to exist;

(3) The pork or pork products have never been commingled with pork or pork products that have been in a region that is classified under §§94.9 and 94.10 as a region in which CSF is known to exist;

(4) The pork or pork products have not transited through a region classified under §§94.9 and 94.10 as a region in which CSF is known to exist unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination; and

(5) If processed, the pork or pork products were processed in a region listed under §§94.9 and 94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary

official of the national government of that region.

§ 94.33 Restrictions on importation of live poultry, poultry meat, and other poultry products from specified regions.

Argentina and the Mexican States of Campeche, Quintana Roo, and Yucatan, which are declared in §94.6(a)(1) to be free of Newcastle disease, supplement their meat supply by the importation of fresh (chilled or frozen) poultry meat from regions designated in §94.6(a) as regions where Newcastle disease is considered to exist, have a common land border with regions where Newcastle disease is considered to exist, or import live poultry from regions where Newcastle disease is considered to exist under conditions less restrictive than would be acceptable for importation into the United States. Thus, even though the Department has declared such regions to be free of Newcastle disease, live poultry originating in such free regions may be commingled with live poultry originating in an Newcastle disease-affected region and the meat and other animal products produced in such free regions may be commingled with the fresh (chilled or frozen) meat of animals from an Newcastle disease-affected region, resulting in an undue risk of introducing Newcastle disease into the United States. Therefore, live poultry, poultry meat and other poultry products, and ship stores, airplane meals, and baggage containing such meat or animal products originating in the free regions listed in this section may not be imported into the United States unless the following requirements, in addition to all other applicable requirements of part 93 of this chapter and of chapter III of this title, are met:

(a) *Additional certification.* Live poultry, poultry meat, and other poultry products from any region designated in this section must be accompanied by an additional certification by a full-

time salaried veterinary officer of the national Government of the exporting region. Upon arrival of the live poultry, poultry meat, or other poultry product in the United States, the certification must be presented to an authorized inspector at the port of arrival.

(b) *Live poultry.* The certification accompanying live poultry must identify the exporting region of the poultry as a region designated in §94.6(a) as free of Newcastle disease and highly pathogenic avian influenza at the time the poultry were in the region and must state that:

(1) The poultry have not been in contact with poultry or poultry products from any region where Newcastle disease is considered to exist;

(2) The poultry have not lived in a region where Newcastle disease is considered to exist; and

(3) The poultry have not transited through a region where Newcastle disease is considered to exist unless moved directly through the region in a sealed means of conveyance with the seal intact upon arrival at the point of destination.

(c) *Poultry meat or other poultry products.* The certification accompanying poultry meat or other poultry products must state that:

(1) The poultry meat or other poultry products are derived from poultry that meet all requirements of this section and that have been slaughtered in a region designated in §94.6(a) as free of Newcastle disease and highly pathogenic avian influenza at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national Government of the exporting region and that is approved to export poultry meat and other poultry products to the United States in accordance with §381.196 of this title;

(2) The poultry meat or other poultry products have not been in contact with poultry meat or other poultry products from any region where Newcastle disease is considered to exist;

(3) The poultry meat or other poultry products have not transited through a region where Newcastle disease is considered to exist unless moved directly through the region in a sealed means of

conveyance with the seal intact upon arrival at the point of destination; and

(4) If processed, the poultry meat or other poultry products were processed in a region designated in §94.6(a) as free of Newcastle disease and highly pathogenic avian influenza in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinarian of the national Government of the exporting region.

PART 95—SANITARY CONTROL OF ANIMAL BYPRODUCTS (EXCEPT CASINGS), AND HAY AND STRAW, OFFERED FOR ENTRY INTO THE UNITED STATES

Sec.

95.1 Definitions.

95.2 Region of origin.

95.3 Byproducts from diseased animals prohibited.

95.4 Restrictions on the importation of processed animal protein, offal, tallow, fat, glands, certain tallow other than tallow derivatives, and serum due to bovine spongiform encephalopathy.

95.5 Processed animal protein derived from ruminants.

95.6 Offal derived from bovines.

95.7 Collagen derived from bovines.

95.8 Tallow derived from bovines.

95.9 Derivatives of tallow derived from bovines.

95.10 Dicalcium phosphate derived from bovines.

95.11 Specified risk materials.

95.12 Blood and blood products derived from bovines.

95.13 Importation from regions of negligible risk for BSE of processed animal protein derived from animals other than ruminants.

95.14 Importation from regions of controlled risk or undetermined risk for BSE of processed animal protein derived from animals other than ruminants.

95.15 Transit shipment of articles.

95.16 Untanned hides and skins and bird trophies; requirements for entry.

95.17 Untanned hides, skins, and bird trophies; importations permitted subject to restrictions.
